

492nd Knowledge Seekers Workshop June 29 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you. As usual, whenever and wherever you listen to these series of Knowledge Seekers of the Keshe Foundation, the Spaceship Institute. We welcome you back, and, we hope we can manage to share some more knowledge. In effect to our work and we are trying to get across, and what we develop, what, where and how it will go through, in the gaining of the knowledge.

In the last week I opened a Pandora Box, which a lot of you asked, why have you connected "this to that," this has got 12 digits, this has got 9 digits. You are talking a million and that's a billion. And it's very interesting how Knowledge Seekers (KS) respond to numbers. We do things when you look at the teaching of last week. Why is it important? I used 9 (digits) or I used billion, and I used number 12 (12 digits means trillion), 10 to power of 12. The reason for it is, the speed of light is ?? (speed) per second. So I cannot drop you in the middle of the water, a meter away, a meter higher, a meter lower and drop you on the ground. We calculate to millimeters (mm) that's why we added the number to 12. That's why I said, use number 12. (To go from 1 to .001 is 3 digits).

In that process we understand more. (:18). And we come to ?? our work in a very precise manner. Why we use the 13 billion (years) life on this planet. The calculation of our scientists, they call it, 13 billion years. So we have 365 days in this "billion years" and we have 24 hours in it. And we according to our calculation we assuming the Earth always maintaining 1,600 and something kilometers per hour. It shows if our planet was moving on a straight line from the center of the universe (U), where it would be, and how will it take shape? And where we'll find ourselves. When we add all these numbers into digits and whatever. And then we come out, we said 1,000 kilometers per hour, 1.6 thousand km per hour. Again we go with km with digits and meters and mm to be precise. We find out there is a big gap.

They say the life does not depend on the speed. In a spherical shape, when we sit outside on the surface, you are a flat line. You walk on a straight line, in a way, but you, even though you come back, (because it's) a circle, to the same point. We are measuring dimension (D) as a ?? ?? leg, as a straight line, 2 dimensional, more or less. But when it comes to the surface area, (:20). not the circumference, we are in an order of magnitude. We calculate the perimeter of the sphere, a circle, on a what we call, "2 times r" (radius), or is a "d" (diameter) by 5. And when we come to measure the surface area, we go "r" to the power of 2. So it's an order of magnitude. .. When you look at the light. A light is 3 dimensional, shines out. So you consider volume, not a flat surface. The same with the

surface of the sphere. And you run into an order of magnitude, than multiplication of the length. When we say, let's say 100 meter .. radius, when we do a diameter, it's 2 times 100, is 200. But when we calculate the surface area it's 100 times 100, which is 10,000. It's a big difference.

Then you consider M field strength, not "Force" (physics term), which is a linear line. And in that order, then you understand the whole of the calculation in a M field transmutation creates a different dimension. But when we chose the central line, the H, not the distance of travel on the surface, as we call it, or the size of the circumference. Then we find out the age of the U is far, far, much, (:22). much bigger than what we call, "13 billion."

The reason for it is very simple, a plasma explodes from inside out, and takes its shape. Secondly, our scientists at the time when they calculated, theoretically the circumference of the U, they had this fantasy idea that is one U on its own, and it's spherical shape. In fact, it's not. We see that in the changed shapes of our own galaxies, other galaxies M fields. It's not a hard surface, it's a plasmatic, it takes different shapes and then when you put this in the order of magnitudes of the C14 and not Carbon 12 which has, because all our measurements are in a matter state, then you find out the whole ball game of the transmutation changes.

In a way, when we calculate, truly, in the future, our scientists will recalculate, there is no way that, to what we understand, to what we can calculate, that the life of this Universe is 13 billion. It is unconceivable to imagine the Universe has lived such a short life. And it has, ?? of itself, it has maintained its what we call, 'integrity'. And it has managed to keep Life, in 13 and a half billion years. (:24).

Even, you consider the building of the intelligence, the brain of the Man, the organs, which is ordered and structured, layers of everything else, and we are considering we are one of the late comers, it will take more than what we calculated, and what we see, what we understand. It doesn't matter if you are a cat or a dog or a man, a structure has been set up. And, what will be interesting, when we recalculate, understanding the position of the Soul of the Man (STM), and where the STM will end up in, or will become the seed of, then we'll find out, the life of this Universe, is in a way, if we go 13 billion "light years" magnitude, a few digits up and down.

So this is important for us in locating, positioning, through the new understanding of the technology, to be able to find, access, deliver the STM to a given point, your Soul of your grandfather is not on the next galaxy. Most probably, he's right on the other side of the planet, trying to balance the universe, trying to balance on this side. So the digital calculation, the understanding of the size of the universe, and then once you understand this, understanding the size of the Unicose, (:26). then you understand the digits, the numbers which our scientists have calculated, is totally wrong.

In the future, we will deliver systems for calculation. In a way, you want to go to such and such a place. You land in such and such a place. You will get a lot of opposition from

the scientists, or the people who spend a lot of their time explaining this happened to Cosmos here, that happened to the Cosmos there. Because they have to protect those PhDs, and certificates and whatever. But our scientists, the way nowadays we have laser beam and put it down the line and say, "okay, Moon is so far away from us and this is a gap with us." The new understanding of the matter state magnetic (M) field, and the plasma state magnetic field strength, will open a knowledge and technology where we can literally, like the laser beams of today, measure truly the science of this universe, and through Carbon decay 14 and others, bring in a more realistic data for the life of this universe. We will get a lot of opposition. We will get a lot of people who have to protect their degree. I was told it's 13 and a half million and I will stick to it because I've been told. I've read a book.

And it's for us to carry on with our work and ignore these, but understand what I opened in the teaching on last week. Open your eyes to another step, another dimension. In reality, our universe is even larger than our scientists have ever could imagine. (:28). Much bigger than the numbers we mentioned last week teaching. They say so many billion light years.

Then we come to understand, we need to, we have to, with the new technology of the plasma, create new set of data's. That when we send, when we connect to a given position, we land in a given position, and not a few billion kilometers away. "Oops, sorry, I made a small mistake in digit number zeros on the top and the bottom." And we will get this opposition from many, many scientists, and we have to become used to it.

Today I was in a meeting with one of our Knowledge Seekers (KS). We had an expert, supposedly one of the geniuses of a, what we call, a structure was brought in to give his verdict and regarding a part of the work of the Foundation. And the minute he sat and he heard about how we Nano coat and how we use Gans's, it was, "no, this is all wrong. This is all lies. It cannot be. Cannot have these things." And he could not stop himself. 82 year old man, as an expert, could not keep his mouth shut. Because, what I said, if he understands, it means all his degrees have gone. All his PhDs are good for, as I said, "something else." And the opposition and the strength of denial was so much that even he denied everything else, which was physically in front of him. (:30). We will get, and we have seen a lot of these.

So, I put a seed of thoughts amongst you last week, and I asked you to start working to understand. Many of you are not good mathematicians, but you'll find out you can add up two and two together. And then go back and see what did these scientists who told us it's 13 billion, what did they assume from the bone of the cat? Or do we have actually a carbon dating from the center of the universe? That they have found on Earth, and they can say a carbon dating. But does the carbon dating of the universe matches to the knowledge of the man today?

So what the whole purpose of the teaching has been last week and this week, is to open your eyes into understanding that if you're the "last man standing," and in your physical system, please make sure you don't end up in the wrong place in the universe, because

you miscalculated it. There's one thing good, with the Soul you cannot go wrong. Traveling with the Soul. Because you create a given magnetic field strength through the wish and the structure of the emotion, you always end up in the .. right place. Going wrong is very, very seldom.

And then it comes for us to understand the next step of knowledge. What man can do with this knowledge? What can you, as Knowledge Seekers, do, (:32). having this accessibility to the knowledge dimensions of the universe, which some of you cannot even write the number of zeros in front of it. You've got to count 10 times if you've got the zeros right. But when you go to the Soul, automatically knows where you are.

In a coming time, in a process of development of the space technology, as we said, we have two separate systems. We have a physical system, spacecrafts. And you have the, what we call, magnetic field strength. Up to now, we taught you and we developed technologies for you that you could understand that creates gravity, creates magnetic field. And then we called it, MaGrav position. But I think it's the right time to introduce what we call, "cosmic travels," in a way of Cosmic Rays (CR). In a way that you do not need to produce a gravity to be pulled to a destination. But you travel on the magnetic field lines of the universe. This is exactly what your Soul does.

These kind of travels, these kind of use of magnetic field motions, it's like in rivers. It's like being on a belt, it's one direction. So you can jump across (to) the one going backwards. We are used to this. We know this, but we have ignored it. We know this in a very simple way. From the first days we went to school, and they gave us a magnet, and we throw some iron dust on it, we saw the magnetic lines. (:34). When we were given two magnets, and we brought them together, we saw the two magnets coming together, or pushing away, through the fields forces of these magnetic lines.

So, if man's knowledge extends to the next level, if man's knowledge comes to understand the reality and the work of the universe, you will find very soon, that ... creating gravity, creating magnetical field, to be pulled and pushed in a direction where you want to go, becomes meaningless. The magnetic field, gravitational (G) field, is for matter state, physical tangibility. When it comes to the travel with the STM, within the, what we call, plasmatic packaging. You do not, you have, you do not, you cannot use a gravitational pull. You cannot adjust your brain, "now I increase the gravity to the Moon, and I reduce the gravity to the Mars, and then I go there and there."

In the world of the Creation, in the world of the magnetic field travel, you get on the rivers of the Universe magnetic field strength. And then, through the position and conversion, this is how you reach the mother. You, you... what we call, field strength of the brain of the man, creates that condition of travel.

So, when we start talking about transmutation, Now we have to speak about what we call, magnetic field flow lines. (:36). Not magnetic, or gravitational or MaGrav positioning. The STM, and when the man become expert to create lines of travel in the packages of the plasma, has to re-sign, re-assign, re-understand, re-educate himself to a new way of

how, which rivers, which directions, to flow in that, in a way of a back, forward, up and down, and to where you want to be. Because, in a way, all magnetic fields of the universe, in one way or another, due to the strength order of magnitude, all travel and end up where the emotion of the man finds satisfaction of the emotion. You will not stop till you see the mom. But, because of the dimension and the field strength order of magnitude, it's a few seconds, not that you get lost in years and thousands of years in the universe.

So, as now you understand why I introduced the concept of the size and the life of the Universe and the size of this Universe. These, in so many ways, in the coming time, will become apparent. And in a very slow way, last week and the week before and this week, we start introducing you into magnetic field strength travel. (:38). Now you understand. You're traveling inside the sphere. And now you're bound with the order of magnitude. You're not on the surface to be on a linear line. You might "pop up" on the surface. But in traveling, due to the field strength interaction, you pop up from under somewhere else. It's much faster to travel within their fields, within their structure, that they run around on top of it.

This brings you to a new understanding. This brings you to understand how and the way man will travel in the future. And how we connect to the other Souls. Because the way we travel the span of universe through the emotion, we travel the emotion through span of the, what we call, the STM, in interaction with other Souls. It's not the reverse, it's amalgamation of the two.

And so, in the coming time, as we prepare you for the transmutation through your own Soul, through the dimension of the packages of this energies created through the interaction of the fields of yourself. Then you understand how you will shape, how you will create destiny for your Soul and STP, and the rest of the caboodle you carry with yourself. (:40). Now you understand why we brought this subject, this topic, last week, and continuation of it, but connecting to it in the life of the man in this teaching.

At the moment, it looks a little bit "patchy." But as you understand, step by step, you will see the picture will be complete. Then you don't need to walk in dimension. You think and you literally hover to the position you want. You don't need to carry things, because if you run on the parallel lines of ... magnetic field, it will carry it for you in respect to position and time in magnetic field strength, where the emotion has interaction with the fields of the universe. "I want to go slow, I want to go fast, I want to go with the speed of whatever, to be with my lover." So, you create that transmutation, you create that condition of travel, and the body through its connections, which you left behind, will create that connection for you to be delivered where you wanted to deliver.

Now you understand, how we have come to the next phase of the development of the technology, which is order of the magnitude, and magnetic field strength, and time in the essence of the universe, and not time in the essence of the "matter man time." (:42). The circulation of the Earth around the Sun, we call it, a one year, is absolutely few seconds in the running of the operation of the STM in this universe. Then you will see, you will

understand, how you have to distribute the field forces through emotion across the three dimensional structure of your ?? work.

Go back to the teachings of a very few weeks ago, where I explained how your emotion of the joy is in such a place, and the emotion of sadness in another, then you use this to travel to left, to right, up and down and the rest of it. But then you have to understand, is the left connected to which, what I call, magnetic field line. Does it take me backwards or does it bring me forwards? And does it throw me to the other side of the universe, where I didn't want to be?

So, in that process, in the consequences of working, and understanding order of magnitude, the spherical shape of the universe, roughly, and everything else which we have taught, you'll come to a very fantastic point of view, or knowledge. And that is, life of the man is not worth living on this planet. Where the man can have the joys of the life in the universe, for billions of years, and not suffering physical life, for a few meager seconds of universe time, in this planet of man. Then, man will create, understanding this, a new dimension for the elevation of his Soul. (:44). That with it, he'll find what we call, new dimension in life and living, across the creation of the Creator.

Then we come to another point. Then we come to understanding of another point. How far does man go? And how fast can the STM travel, without endangering the existence of the Soul, or the physicality of the man? Or, how much man will be able to understand the transmutation of his Soul through the strength of the physicality (P) of the Man?

The structure of life in Universe is in order of magnitude and in the field strength and it's not in the linear lines of the kilometers and what we call, the speed of the travel of this planet per day or hour. The understanding of this process, for many of you, who in the coming months become MOJHANS, and you go through the transmutation, will bring a shocking news, a shocking style of understanding and travel for many of you. Because then, at the beginning, many of you will land in a ditch where you wanted to be on a ridge. Many of you land in the sea where you wanted to be on an island where you are practicing. And then you'll find out gradually you become good to land where you wanted to land. And you be with who you want to be, because their Soul, the strength of the field of their Soul, (:46). is at the strength field of you who wanted to meet, to enjoy and to be with.

Then the definition of the dream of the man become the reality of life of the man, where there is no place for dreams, as is man who had led his fancy dreams of life to become his dream. This process, this understanding, if understood by Knowledge Seekers, opens a new Pandora's box for travel. For all of you, one by one, without fail. And then you'll mature to understand the totality of the Creation and the way the Creator has created dimension of the travel.

Many "creatures of God" travel the span of the universe using this technology and where the man is still hackling with North Pole, South Pole, did we dig South Pole, do we have too much snow in the North Pole and at the end we are in the "mess of it," doesn't matter

where you are. It's our job to teach you how to protect yourself, it's our job to teach you how to create a condition of the safety for the life of you and your Soul, and those who you are responsible for.

Life has to. Life means to. Mean life in a transmutation, not in transportation. Then no man will ever die. No man will ever go through the process of what we call, destruction of itself, through itself, through the lack of understanding, (:48). that you can tap into the universal energy of the plasma rather than the food on the table, in the next door and in the fridge.

In the coming time, in the process of understanding the technology, in the process of understanding the severity of lack of one or another knowledge will force Knowledge Seekers to come to understand. I stop this session. If there are any questions, we'll try to answer. But remember, extremely hard question. It's not going to be solved with one ?? meeting ?? alone.

Are there any questions?

Q: .. Hello Mr. Keshe, in the teaching you taught us, that what we see with our eyes depends on the fields of the environment and the fields of our own body, which have different amino acids (AA) from each other. And you also said that you can see far beyond what we see through our eyes. We know that through knowledge and through ethos we can expand our perceptions, but my question is, can the fields we breathe, (:50). can expand more the fields we see or feel, instead of the fields sent by our ears? .. (repeats) can the fields we breathe, expand more the fields we see or feel, instead of the fields sent by our ears?

K- It must be sensed by our ears, then sent by our ear.

R: Yes.

K- In a way, our nose is another receptor, for different strength magnetic field. Brings a different definition to the information of life, to confirmation of life, to existence of life. And in that way, we are responsible to understand how we as creatures, and not obviously the only creatures of this universe, have come to understand life, and have come to value life. And to what extent we can value life?

We use our senses as a connection to our universe, or to our limited dimension of physical life of universe. But the interesting point would be, does your Soul have a nose that can smell the universe? (:52). Or, does the interaction of the fields within the plasma of the STM, allows, creates, and conditions man to smell the universe? Isn't it this, the way that you said, or you say, or you've seen, I saw mom and I could smell she was wearing a nice perfume. I met dad and he still smell the same as years ago before he dies.

So, yes, it's another sensory, another dimension, another field strength order of magnitude sensors, which we have in the physical life and in dimension of the fields of the universe. In the future, we'll come to these things physically and we explain physically. But at the

moment we're trying to explain to man, how you smell through your nose while you are dreaming, then it goes back to answer the way as you see while you are dreaming. You smell a rose in your dream and you get the sensation of the rose. But in fact, there is no rose except the Soul of the rose. So, in the long way, yes. Again, the smell in the dimension of the STM, it's field strength order of magnitude, and not linear.

Any other question?

Q: .. You said the planet Earth is the nursery of the universe. In correlation to our body, planet Earth would be the womb of a woman, thinking that the micro is equal to the macro? (:54).

K- Do all the creatures on this planet give birth, are only women, female? Or, do we have creatures who actually nurse and give birth too as a male? Then, you need to think a lot. And, understand, giving birth is not the gift of a female, or what we call, to have a womb. Giving birth is the right of sharing the Soul. That with it, manifests itself in dimension of the physicality.

Answer yourself in a very simple way. And I'm sure you know what's going to come. Did or does the Creator has a womb which led to the creation and birth of Mitra. So is our Creator or does the womb change to another being, an entity of life? Or do we, in the dimension of plasma of the universe, need what we call, a capsule, we call it, a womb of the birth? I think you know the answers. If you make Gans's, you already know the answer.

Any other question? (:56).

Q: .. I have a question related to the conference on 28th of October, with the ambassadors of the world for peace. And question is, how we can help you on doing this conference, how we can be involved, what are your expectations and the outcome of the conference will be only one day? And do you have the program and do you send the invitation and so on?

K- These things all ?? .. will be taken care of.

Q: I inform to the ..

K- .. It's a two day conference. It's a two day conference for Knowledge Seekers, and it's an evening session for the world dignitaries, ambassadors and the rest. We already know representative from two leading nations will be they're already, we all know they'll be present. We know the third one will ?? come in, and dignitaries from the government of United Kingdom will be present.

We do not start going public with a lot of things, and when we need, we go to the Universal Council. It's their job to bring, and the Earth Council members, the, (:58). all that is usually done by them and they will know when we announced it last week. They start getting prepared and what they can do. And the organization of the "Ambassadorial

Meeting" will be more or less, work in conjunction with the Universal Council and the Keshe Foundation.

Our message will be very clear in London conference. And when we go out as usual the place of the conference will not be disclosed to public to the very last minutes because of what we've seen before. And in that process we will announce everything to those who registered. The meeting is in London, in the central London and in one of the most prestigious hotels, or what we call, events areas of London. The presence of ambassadors, we have invited ambassadors and we really invite ambassadors and dignitary from outside United Kingdom this time. We will see a representative of United Nations. We will see a representative from BRICS. We will see a representative from what we call, European Union, as England now is out of the EU. We expect to see representative of the nation of Russia. (1:00). We've been assured, irrespective of what is the position in Ukraine, we will have representation by the Russians.

And in a way, we give the knowledge of the universal travel, we give the knowledge of space travel, to open the channel for the peace. Don't forget, Keshe Foundation is doing a lot of work in the background. I spend a lot of time moving, and making sure a lot of things comes in. Especially with the position we are in and the situation we have found ourselves in. We try to restructure Keshe Foundation in a way that it becomes back, as our resources come back to. The Keshe Foundation in Austria will shut down within the next 30 days, 60 days maximum, as we close our operation into dimension, moving to a major capital.

So in that process, new structures will come into operation. Then if you remember, prior to Corona, we held conferences around different cities around the world, the Corona put us to a halt. In 2024, most probably will be held in East Asia. And we'll announce that. It'll be part of the work of the Keshe Foundation.

And we go more in the way of space development, presentation and delivery than anything else. Technologies which were never seen before. (1:02). Technologies which allow space development to become a, what we call, a process for the governments to see how we're clearing the borders out with the development of new technologies. Hidden technologies will be opened up.

In a meeting today with some officials, we delivered the development of new technologies, which is not known at all across Keshe Foundation, which allows the governments to take steps in securing national security from resources. These technologies we start rapidly sharing with major governments. Because it's time to deliver. Because we have the technologies, we have developed it, and it'll not be shared with public. Because it needs to be done in the capacity of the governments. And now we have switched all our work, our majority of our work, with national governments, then when we were trying to centralize our work with what we call, individuals, organizations, and others.

So London conference will be held in a very beautiful way in London. Most of the Keshe Foundation team will be there. We might have a surprise for you when you attend the conference. But, that surprise, will come when we come much closer to it. And it will be announced by the Foundation in due course.

We are looking forward to the end of sanctions on Iran in the coming, very soon time. (1:04). Keshe Foundation will hold one of its major conferences in Tehran. And in that process, we'll open different dimensions. We are waiting for a lot of things to happen. As a lot of you know, we have had a battle with a lot of other things. But we have worked on the other end to change position, direction, and the strength of the Keshe Foundation. We have the technology to bring in major power work outside the Keshe Foundation, within the Keshe Foundation.

And London conference is one of those which will start that process, if we don't get hit again by another Corona. We are not relying on ambassadors from England of a nation. We're relying on ambassadors from different part of the world to attend that conference on behalf of their nations.

Q: I'm glad you restart these processes at the high level. And I'm sure will be a success at the Soul level and...

K- Oh, we shall see. We shall see. We have targeted this state for several reasons. Usually, we get a flow of ambassadors, world ambassadors, and world leaders through private meetings or private travel in September, October, going to United Nations and coming back. And usually, they stop over in London. Many of the world leaders, their private visits are never announced when they enter a country. (1:06). They're public official, you see. And we have access to a number of these world leaders, that we are looking for, to have or bring to be, in that meeting, in that conference. There's a lot of reasons why we chose that day, and that week. We'll be spending a lot of time in that area, during that course, and simultaneously, in other part of the world.

Any other question?

Q: Good luck, thank you very much and God bless you and all Knowledge Seekers and all the planet.

K- Thank you very much.

Any other question?

Q: .. I have trouble understanding the relevance of numbers in when we're talking about using gravitational magnetical fields for transportation. To me, it's always been an issue of just matching the field strengths or using the field strength. What significance does the number, where do the numbers come in?

K- The numbers will come in when you transmute and then you want to transfer.

Q: Do you not match the field strength of the destination?

K- The numbers comes when you want to manifest yourself in the dimension of physicality. And the numbers come into operation in a physical dimension. (1:08). In what we call magnetic field strength, there is "Zero-Time" to the point of manifestation. And in physical dimension, your time is already part of what you were, because you had a physical life within the structure and previous, before the structure, of the Soul, as a, what we call, carrier.

So, gradually, as we go into the teaching, we open this up, that you understand. In a way, in a physical life, you travel a million years, in seconds, with the time of the man. And then you come back in the other dimensions of the Universe, back to Earth. Let's say, if you understand it, opposite the way you went, in the direction of approach, you'll find out there is an age gap. There's a understanding of a time and a space. And these things will come into, gradually, we'll start teaching, then you'll understand. You need on matter state dimension of the fields, position and time. Not in the, what we call, magnetic field or plasma state.

The let ... we started a new chapter in teachings, in the real dimension of travel, and gradually, step by step, in different teachings, we bring the jigsaw together. And usually takes one or two years before you see the full light of it at the end of the tunnel.

Q: Okay, thank you. Thank you so much.

K- We didn't start this just to have an hour and a half session last week, (1:10). and what today we brought with the speed of the fields, magnetic fields for the STM. There is a pattern in the teaching and as you will see how it builds up gradually, that you understand both.

Many of you, many of you in the process of transmutation will make mistakes. The emotion will create manifestation of physicality. At a point and a place where you didn't know, want to be. And all these goes back to understanding of the way you ended up, where you landed in the middle of the universe, and how you're going to get yourself back to where you were at the beginning.

So, just bear with us, this is... You want a transmutation, you have to understand the alphabet of transmutation. But, as in the teachings, now the teaching is both for physicality and the STM, we have to teach both dimensions.

Q: Okay, thank you.

K- Last week we brought the size, dimension and the order of magnitude. The few lines of today's teaching is, if you understood it, about the Soul traveling on the fields of the magnetic fields, and there is no need, as you have in the dimension of physicality, to be pulled or pushed magnetically, gravitationally or MaGrav positioning. So, slowly we open a new knowledge of the universal travel, and this is part of a process of years of teachings to come.

Because, it's not anymore that you have to understand it. Fortunately or unfortunately, some of you, the way you made the MaGrav, you start testing it. And it has to be correct. (1:12). So, it needs time for you to understand and with the teaching gradually we open up, you'll understand, and then we develop (it). This goes to universal travel as energy in on and off, might take between 3 to 5 years of teaching. Because you have to understand the Totality, not just a little bit, and then you calculate something else.

And then you say, "oh, last year he was talking this .." It's like when a lot of you made a complaint, now he start going for the Soul. Now we understand the operation, so now we have to say, "how we carry this Soul? What's the speed, where it goes, how it goes?" And then, some of you are "chicken" (scared), or you like to be the slow one, or slow portion, you still want to get down the UFO's and see some physicality.

Not all of you will go, it's very much like, today as you go on the street, you see man on the donkey, man on the car, man in the bike, man in the motorcycle, man on a jet above you, and man in the space lab above, "waving" like crazy. Now we choose what we want to play and how we want to play. And for that we have to have a knowledge of how to ride a bike, how to drive a car, how to guide a rocket, and how to live in a space lab. And each one of us as the time comes, as we learn slowly, slowly, to be able to handle it. This time you're the "last man standing" and everything has to be with you. You can't go back, "oh, Papa, what can I do?"

Q: Whole new world. Thank you.

K- Thank you very much. (1:14).

Any other question?

Q: .. Hello Mr. Keshe, if we want and need to know where the STM is, in order to, not sure if the word is transmute or transmit, we need not only the distance, but also two angles, the azimuth and zenith, right? How do we find these two coordinates? Thanks a lot.

K- That's for your matter state. Your Soul does not know azimuth and the other bits. It has it's own field strength transmutation. You have to understand ... ??, when you put two magnets (together) ... There are many, many lines on a magnet. So the magnet is connected to many, many other magnets or fields. So is the STM. Your Soul is not mono-connection just to Papa. Just because today you dreamed about Papa. It's already with the uncle, it's already with the Martian, it's already with the fish in the tank and everything else. You decide which frequency you want to tune in that time.

And we've seen that in the experimental test in the UNO center when we had people in the machine in the system. We could narrow the line, ask people where to go. "would you like to go and see the mama?" And they say, "oh, I went and I saw my mom." And the other one you don't say anything, they go wherever they like.

It's interesting in so many cases, (1:16). we look at that our wish without being spoken, is carried out by the Knowledge Seekers in the system. Which means we transmuted emotion, or Soul contact, and then you go, ?? shuttle, it works.

By the way, before I forget, tomorrow at 12 o'clock, we have the elevation of the Soul of those who abuse the children. And, we'll be starting at 12 o'clock, for maybe 2 or 3 hours. And we have many people who are now registering for the 3 sessions of 14th, 21st, 28th, and a final session of the, what we call, three sessions of the July.

Somewhere in July, once we secure everything we are working on, we announce the first "meeting of the 25." (first 25 of the 200 to train personally with Mr. Keshe). We give you about two months to gather, together, somewhere around end of August, maybe, or somewhere around that time. And the 25 people who are there, and then the 200 will be brought in for meeting. And what we asked for it to be done, to build up in the same manner to follow up.

There's a lot of work is going on in the background, And in a way the huge setbacks we had, has opened new doors of opportunity for us to create new dimension of work. (1:18). As I always say, "he closes one and open ten more somewhere else."

Any other question?

Q: .. On the subject of the perception of cold in the body, in the 481st Knowledge Seekers Workshop, I heard the following sentence, "when you are cold, it means that you are taking in more energy than your environment needs. So you're giving something to the environment." As much as I listen to this, I don't understand it. Could you Mr. Keshe, try to describe the inner idea differently? Maybe then the enlightenment will come.

K- Oh, you'll be enlightened if you understand. Go back to the process of when we say, you eat 20% of your food and you absorb 80% of it from environment. Your answer sits there. Why some of us don't feel any cold, and we can walk in the ice water? And some of us with a drop of cold water we freeze.

You find the answer in emotion, in the state of mind at a given time and emotion. Then read it again and if you understand what I said then you found your answer. (1:20).

Shall we call it a day.

R: Okay. Yeah I know we need to wrap things up here.

K- From next week hopefully we go back to normal. We don't know yet, but as I said, within the next couple of weeks in July we'll make an announcement about a new time zone for the teaching. A few hours here and there. And this will become permanent, at least for 6 months to 12 months.

Any other question?

R: Well there was a note from Joel who said, that's Joel from France, and he says, "the vineyards are in good health thanks, thanks to you, and to the beautiful plasma technology."

K- We have plenty of people very happy.

R: And also our background image here is sent by Gianni, part of a video that he showed the... This field was planted with plasma technology as well. And it's the wheat, I believe, in this case, and it's doing really, really well.

K- We will introduce in the coming time, very soon, as part of the work which we already started, new processing for new style of agriculture. Very much different than the present, and very deep in technology. We were in a meeting in past couple of days, with one of the, (1:22). what we call, very, what we call, man with the knowledge and work for agriculture. And, in a way he said, "I've seen three people bring in this technology to me, and none of them could follow, because, they didn't have the depth of knowledge. They just went there, it's just to see this guy, that we have Gans's, and we do this and this, and there wasn't much more knowledge to actually give it and complete it." And then we said to him, "we are the owner of the technology and knowledge, and these are other things." He says, "wow. Now we can work or something we can start actually testing and see."

So, a lot of Knowledge Seekers are going to companies, governments, says this is the technology they want to do, blah, blah. And very few succeed, because you have to understand the depth of the knowledge, in a different way. And in the coming, next season most probably, we introduce a new method of agriculture. It's a process which we are developing, and it'll be introduced in a very large scale.

Any other question?

Q: .. Hello Mr. Keshe, I'm a Knowledge Seeker from China. Can you explain the nature of the gravitational wave that is relatively hot at present? Because our Chinese Five hundred meter Aperture Spherical Radio Telescope, FAST, radio telescope, once again confirmed the existence of gravitational waves recently? (1:24).

K- Not really, because it's... we... In China you have, what you call, you want to get the confirmation of it, but you have a different factors when these things happen. And they try to tell us there's a gravitational wave. We have gravitational waves. The gravity fields of the Earth is not constant. And it reduces, or compresses, or expands according to the other fields within the solar system. And to some extent, into the pressures from the galaxy.

And we have to understand, if it is, actually, there is no confirmation. But in China now you have the huge heat waves and whatever which is going on, plus the pollutions which you have, it creates all sorts of fields and scientists can call it anything that it suits, to call

it to be, and get confirmation to do. At the moment China is going through heat wave and massive pollution.

Any other question?

Q: .. Hi Mr. Keshe, I'm studying automobile technician course in India. I explained to them about our Foundation and work. They like to collaborate with us in education. How can we collaborate? (1:26). Given the link below.

K- Get in touch, send to info@keshe.foundation and they will sort it out something. Send an email and then we'll see what we can do.

Q: .. Could you open up a little more for our understanding about magnetic plasmatic packets, and what the difference is between magnetic and gravitational fields that are, that are for the matter state?

K- What does that mean? What do you mean by that? Can you explain?

R: Well, let me see, let me just re-read it here, perhaps it can be more clear. Can you open up a little more for our understanding about magnetic plasmatic packets, and what the difference is between magnetic and gravitational fields, that are for the matter state?

K- This will take... Can you bring this one to the next week's question, as the first question, and then we go through it in a very, very detailed way.

R: Okay, copy that for next week.

K- Because the answer, but it cannot be answered, to what we call... ??

R; One sentence... (1:28).

K- We have to go into understanding of gravitational field... it has to go into gravitational fields, and a lot of other bits.

R: Okay, very good.

K- Shall we call it a day for today?

R: Yes, yes, let's do that.

K- Tomorrow at 12 o'clock, and what you call it, till next week, next Thursday. The same time at nine o'clock, as usual.

R: Okay.

K- Thank you very much. And see you next week.

492 KSW June 29, 2023
