

494th Knowledge Seekers Workshop July 13 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:16).

R: Background imagine of Keshe Knee GANS, a special GANS that's used for knee pain. You can participate in the research program.

(:18). ...

K - ... Good morning, good day to you as usual. Wherever, whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back as usual, and as usual we try to share knowledge, to understand more, and try to breakthrough new grounds of knowledge in space, and other matters.

As usual, we have a couple of small announcements to make. And one is about the 4 sessions which starts tomorrow, in respect to the, what we call, 3 hour sessions. These sessions are set up directly for what we call, new grounds of understanding and new, what we call, technologies which are developed, that we can see how much in what numbers and how in different applications, we can expand the knowledge of the technology. For example, tomorrow session we start at 12 o'clock, and you need minimum two headphones. (:20). This is a different way that we've done before. You can have three headphones, or maybe you can have access to one mobile phone with five entries. We leave everything to you. You write down what's the reason you took part, and what is your expectation. And we set up in the background to establish our way, our work, in the 4 sessions which come up. One is 14, 21st, 28th and the 30th.

Then, on the 30th, at the end of the session, we ask you what you achieved, what you wanted. And, maybe in one session you wanted to do something with your emotion, in one session you want to do something with your knee, in one session you wanted to do something with your lung, or whatever. We leave all that to you. We are not here to, what we call, interfere or anything. We want to see the process of the expansion of the Soul, in the dimension (D) of satisfaction of the emotion and physicality.

So, usually our medical people, on the health side, on wellness side, over decades have tried everything. Now what we want to establish is that, we want to create a condition as the citizens of one's country, as a citizen of one city. This is a pre-test for upcoming space cities which is going to be structured with Keshe Foundation cooperation. (:22). Which means you can come in one session and see how you feel, what you want to change. And the test we monitor in the background continuously as we .. you saw us last week we didn't take any testimonial or any, what we call, ballots to see what happened, how you felt, because we could see the operation on our system.

So, in next 4 weeks, you come in and tell us, and we expect an email from all of you who participate, after each session, each connection, that you come into the session, on that email return back to us, an information at the end of each session. Which means, you tell us what you came in for, and what you felt after the session, and then you monitor yourself in the next 4 sessions. If you achieved more happiness, more, God knows, whatever, we don't know. We don't want to interfere. This was your expectation, this is what you came in (for). And then, let's see, after 4 sessions what was your experience, what did you achieve. And then, a month later you send us an email, that, in process, in progress, what has changed over the month.

This is part of the large scale, what we call, operation of the Keshe Foundation. There are a lot of things happening in the background in the Keshe Foundation, that we cannot disclose, or we don't want to open till we reach ?? final. A lot of things were supposed to be done, as you know, with the help, with the, what we call, the damage we received financially, (:24). and some of you helped us with it, and we tried to structure a new, but now we've gone a different way to achieve the same, through a much bigger structure.

The whole idea is to build a space city. In that space city, no one should get sick. No one should go ill. No one should go hungry. No one should feel cold. And this is part of that structure. This is part of that understanding of what we call, total process of the next step in reaching everyone at the same time. We have, those of you who join us in the sessions, you've always seen a number of lines open in the background, even when you're silent. We keep monitoring and feeding information or technologies in the background.

So, during the sessions, we add systems in the background, we test different systems. And maybe we ask you how you felt in this part, how you feel in that part, you feel happier, whatever. We'll come to that when we (start the) ?? sessions. So, for the next 4 sessions of the Keshe Foundation, in cooperation with the Knowledge Seekers (KS), in July, we are looking to see what you came in for, and what you received, how well you felt, or you came in for chocolate addiction, and you see, I eat more chocolate or I eat less chocolate. So, we have given you not one particular thing. (:26). You can come in all 4 sessions for the same thing, it's not a problem. But, you come in one session for this, next session for that, and another session for that, and each session, immediately after the session, or the following day, you send us an email, we collect your data, we understand what it is, and we compare some other things in the background.

Because, during the operation we change a lot of parameters, during the 3 hours. And then we see what parameter goes with what. So, is not excluded to one session, and then you say, "I came one session, nothing happened." It's a completion of the full 4 sessions. But if you feel good, one session, two sessions, that's your decision. We more or less have a good idea of what will be the results in many cases. But now in a way it's a information of the technology and then understanding more for the next cycle of what we call, approach to development.

The other point with the Keshe Foundation is that we will make announcements in a coming time where we call upon many Knowledge Seekers to join us in the research, in

the deep research in different aspects. And we'll let you know how, what and it's not just good being a Knowledge Seeker with a Gans. We rely on your expertise outside the Keshe Foundation. That you emerge it, you amalgamate it with the knowledge of Keshe Foundation and we give you the direction to see what we can develop. This is very important for us as Keshe Foundation is going into a new era of its development. And maybe you are a space specialist. (:28). Maybe you are an electrical engineer specialist. And how you have worked with it in conjunction with what we call, Keshe technology. We call upon you and then we'll organize things with you to come in to start.

In respect to the meeting of the 25 Knowledge Seekers who are coming for the special session, by early August, we make announcement for the meeting of the first 25, the place where we expect to be and where we hope to be able to meet the 25 of you during one week, Friday, what you call it, Monday to Friday. The option for us sits on three major cities of Manchester, greater United Kingdom, London, and Beijing. And the three sessions will be kept in one of these three cities. We have to decide which session we keep where. But the first session of 25 will be kept most probably in city of Manchester, United Kingdom. And then the session for the 200 will be held in the city of London. The final destination, if we can organize, will be held in Beijing, in China. Or we hold it in city of Frankfurt in Germany. We have to, primarily to let you know, with all chances, if everything goes okay, we announce the date, and the first session will be kept for one week, in the city of Manchester, United Kingdom, for the first 25. (:30). And if we can secure everything in many aspects, we'll inform you the place, the time, or we move the first session to London, Frankfurt, possibilities. But on target, we aim to have the first 65 people for it throughout the session of one week in Beijing. But that has to be ratified and it needs a lot of work to be done in what we call, November, December. But we'll inform you in early August, the exact position of first position, because many of you have to sort out visas. And we recommend to you the hotels. We will not release the position of the conference. It will be kept confidential, but it will be in the city of Manchester or London. The other point for us is the progress in the teaching will carry on the same. And we will see how we can bring all the matters to one point.

Going back to the teaching, we have tried in the past few weeks to bring a new dimension teaching, a new understanding in the way of space, time and travel. What will be interesting for many of you is that it goes back again to Book 1, Book 2, Book 3, but now we're putting a structure into it more or less what happened in the past .. 2 - 3 sessions in respect to the speed, the size of the universe (U). And in respect to how you arrive at a destination. (:32).

You were a plasma of a human, as a Soul. You have gone through transmutation in the way of traveling to a new position as an energy field. What's going to happen to you when you arrive? How would the emotion of the Soul let you know if it wants you to transmute and become part of the transfer? Which means, I want to see the place, I want to be part of the place, I want to feel the emotion of the physicality (P) of the place.

Then it comes to the point, how do you integrate the emotion of the physicality to the emotion of the Soul? How do you communicate through the Soul of the Physicality (STP)

to the Soul of the Man (STM), to create dimension of physicality? To me, as a Soul, this ground feels solid. But if I manifest myself in the shape of a citizen of that planet, that position, with what I transfer, what I transmute to transfer, would I become sinking, or floating, or standing on the surface? Would I like to be a "fish behavior"? Or would I like to be walking as a man? Or would I like to be like a bird, flying the space of the place? Till I find somewhere I feel comfortable, then I change from being a, what we call, "a flying pattern," to a solid pattern. I want to feel a fish life, or what we call, submerged. Even you can, (:34). in the teachings of the future we'll teach you, you can land on the surface of a liquid. (audio drops ...)

R: Bear with us a minute, I think Mr. Keshe needs to mute for a period of time here. Can you hear us Mr. Keshe? Your microphone is muted. Oops! See he's restarting his microphone.

K- Sorry about that. Sorry, it was an emergency call, I had to accept.

K- ... The position is, you want to float on the water, or a liquid .. gas. You don't want to submerge. You have to make that decision. How do you make a decision to what matter state of the time, place, and position to convert into? A bird on Earth interacts with many conditions. And they know how to fly, they know how to transfer themselves with swinging the wings and whatever, (:36). duck and dive the rain, or whatever. You're a "newcomer." On the surface there is no bird, that you can take knowledge from, through the Soul. How do you decide, I came, I know the birds, I want to fly on this planet? How do you do it? How do you go back into the dimension of the transmutation, but still in a transfer of the physicality? Alertness, interaction with the STM and STP of the man and the "Soul of the planet," and the condition of the Inertia will dictate how you manifest yourself.

I don't like this. What happen if you lose control, if you don't understand the transmutation? What are the consequences of it? In part of the process of the next 4 weeks (July Sessions), you will go through this emotion. The part of the next 4 weeks is not just for you to come in for whatever. We're testing a lot of new conditions. You will tell us how you feel.

In a way, you have to go through that to be able to repair a lot of things. Because you landed on the surface as a dimension of the different physical condition, and you burn your wing. You burn your leg. You burn your point of contact. How do you heal it? How do you repair it? Or how do you go back in the dimension of the Soul and come back at a different dimension of physicality? (:38). A lot of the teachings will come into effect. And how would you feel if you land in a populated area of a given species in a given part of the universe? How do you interact with them? You are not in the shape of the man, the body of the man ?? in the amino acid (AA) in this dimension has no life to live. It is in a way, a different ?? condition, but you want to manifest yourself in physicality.

We know we are not the only citizens of this universe. So we should not be surprised if we come across population like ants, like cities we have, in a different shape of construction, intelligence of the building is not exclusivity of the human race. Science

and technology is not exclusive of man. Races who have developed, like us over millions of years, they have developed tools to live. They have created societies. They establish the structure of life. ?? they do not need to eat the man does. They don't kill, but they live amongst each other. They respect each other's space and time. You land in, "ooh, it looks delicious." You don't eat. You pick up the Soul of the environment, that this planet does not need to kill to eat. You take from the point of the saturation of the field of the Universe.

How do we see ourselves in the new environment? How do we transmute? (:40). How do you convert from physicality to the Soul and from the Soul back to physicality? This teaching has been sitting in the Book number one from the first chapter. If you go through the first 3 chapters, the whole understanding of the transportation and conversion to a field, to matter, is fully explained. But you have to understand what it says. If you go in what we call, the first 3 chapters of the Book number 3, the ?? same structure is set. I keep on telling you, go to chapter at the end of the Book number 2, to the beginning of number 3, you'll understand the process of the Creation.

But now you have to create yourself in the time and position. You still have the emotion, physical condition of the man in the physical, what we call, capacity of the STP within the STM. How do you change the skin? By changing the skin, it means, how do you bring the STP out of the Soul, and bring the Soul inside, and the reverse? This knowledge has to be understood. When you run in a physical dimension, that's a physical transfer. How do you transmute, which means bringing this physicality inside, with the STP inside the STM? (:42). Where now, it's the Soul fields strength, which interacts with the environment. Not the skin of the man in the dimension of physicality.

And then, would us, with the STP of the man, on the surface of the planet, end up to be a miniature things like an ant walking, or a giant of a thing like a dinosaur, compared to its environment? How do we adapt ourselves to be one of them, that we are not recognized (as being) from outside? These are the teachings which gradually we'll start teaching you. This is what... but we have to open your eyes into what is to come. It's no use telling you, this is the system, this is the way you do it, when you haven't had time to think. You haven't had time to understand what are the implication of it, what are the application of it.

We've been teaching for past months, and two or three years about the STM, about the STP of the man, about the physicality (P) of the man, that today's man has leeched upon the Soul. Now, the change of the game is what happen when the Soul leeches upon the P of the Man. How do you switch? What is the process of switching? How do we understand the way we need to switch? (:44). And how do we make ourselves available for this switch? That we are in full understanding of the process of the life. In what shape and to what point of need we convert.

In what shape and point of need we collectively bring changes. We travel as a family and we want the brother, the sister, the mom, the dad and the children to be with us. And we want to convert all of us together. In a way we've done the transmutation from A to B,

from P of the man to the STM. Now, how do we do as a whole that no one knows we are from another planet? We become part of the society, even though the family know we are together. We are not the people from what you call, origin race.

And how do we learn the language or the line of communication? There are no schools, no universities, no foreign school languages. How do you tap into the "Soul of the knowledge"? How do you tap into the "Soul of the life of the planet"? These are the teachings which is coming up. These are the teachings, what again, I'll go back. The next 4 week sessions will bring us to the point to do, in how in the coming conferences, (:46). we will explain to you how, and you will learn how to do the conversion. How to do the transmutation, how to understand what transmutation means, and what effects we will have on life of every individual in this process.

It's important for us to understand the totality of the transmutation, and the totality of what we call, understanding of the work in every aspects of the work. How you switch the STM to become the container of the physicality on this planet. How you travel the span of this U, and at the point of arrival, you change, and you reverse the position where the STP and the P of the man manifests itself to become the holder of the Soul. In a way, put your hand in and pull the skin inside out. But this time, what you pull out, what you change, is the Soul strength or the STP. And then, in the interaction of the two, gives you the manifestation of physicality in that time, place, and position. But as you arrive in the dimension of the Soul, (:48). in the strength of field of the Soul, now you convert into the dimension of the fields of the physicality. Then you will see the shape of you.

We can replicate these on Earth without the shadow of a doubt. Knowledge Seekers in the coming time will make facilities for all these to be able to be done in a matter of seconds. But till then, we have to teach you. You have to understand how you use the emotion of physicality, in conjunction with the emotion of the STP, with the emotion of the STM, in the interaction with each other, to create the transmutation.

In fact, if ?? you understand. The physicality of the man is Book one. The STP is Book 2 and the STM is Book 3. If you understood the knowledge given in these 3, you should have already understood the transportation and transmutation.

To what extent you can deviate from the line and experience new dimensions? And then, to what extent you have understood at the point of arrival as a Soul, you interact with the "Soul of the destination," with the "Soul of the citizens of the destination," and in that lines of interaction, you create your new physical being, (:50). which allows you to work, to live, and to be part of the time, place and position.

How do you switch? In Book one, are you transmute? And how you end up in Book three? And how do you create the motion between one and three? Then you find out. Transmutation has no time, space, and position. Which means, the transmutation will bring man to travel in the dimension of ?? .. , will bring in to understand the Totality. We have to, we see, and ... We have to understand the totality of the energy. Energy in the terminology of the Keshe Foundation, not energy in whatever man measures. Energy in

understanding of the field in motion. Understanding that each field strength has different emotion, what we call, strength. (:52). And each one has different emotion. So your emotion, field strength of emotion, understanding of the motion of the fields, all come together, in which line of the universe you will transport yourself. You will transmute yourself. You will come to the point that you can bring the change.

So first of all, in the coming months, in coming weeks, we have to teach you how to go through the conversion. From the Soul to become the holder of the physicality. And in that condition, to become the holder, container, what I call, interface with the STP. Then one of our most important points will be how we get you from Earth to Moon, from Earth to another position in the universe, with the dimension of the speed of the light of the universe. Considering the light of universe to man is dark, but in fact it's not. This is the light of the knowledge, the light of understanding, the, what we call, "enlightenment." And then, how to get you to the point, and then manifestation.

Then, you still have a problem, if you understand the whole process. You leave in the Soul of this man, to meet the mother who died 20 years ago. (:54). She has no physicality in the dimension of what you were expecting. She has a new dimension. But the Soul, the energy, tells you, this is the mother. What would you expect to see? What is your understanding of the emotion of the interaction? You see a field. You don't see the mother in physicality the way you knew. But you know this field is a field, which is the Soul of your mother. You interact with it, the way you do exactly in your dreams. Because the dream to you is the reality of the interaction of the Souls in the dimension of energy.

All these in the next few years will be taught, in a very, very detail. There is no calculation. If you go back into my first teachings, first lectures ever, 20 years ago, 15 years ago, I always said, "God does not have a scale, a measuring tool, that I'll put 50 gram of this and 200 gram of that and 10 liters of this." There is no grams and (liars) and mileage in the measurement of the Creation of universe by the Creator. And now you are the Creator. You can't put, "oh, I put 20% of my Soul and 30% of my physicality, and I'm going to end up there." You have to learn, in the dimension of the strength of the fields of the universe. (:56).

Then we have to understand, how we create these fields through emotion. Then you understand, even the very first teachings in health, we always spoke about the emotion, why it's important. It's not a blood flow, it's an emotion flow, which leads to the creation of the sense of the STM. You look at the redness, I look at the strength of the measurements of the fields. The fingerprint of the human race in the field energy. In the space you have no blood, but you have field flow emotion.

Now you understand, how much more, in the past couple of weeks, and in the next few weeks, I do a lot of talking, a lot of explanation, open your eyes to new dimensions. Because, if I don't do that, it'll be very hard, like many of you before, he went from Nano material to Gans, and now he's come to fields, he's ?? come from ?? radiation. Now we teach you, because now this is the school of the space technology. We taught you ?? for

10 years. Now, that's why we taught for 2 or 3 years about the Soul, in the handling of the field of energy. Now we are moving there. You have to understand, you have to, in a way, be educated to be ready to go through the transmutation, by yourself. You do that in your dream, you do that in the time of, when the physicality is resting, but you've learned to park it between the blanket and the bed, we call it, a sleep time. (:58). Now, there is no sleep time, because now you park it between the Soul and the STP and there is no physicality. Nothing, except the emotion of the physicality, of the STP, and the emotion of the STM, which allows you the point of manifestation of the physicality.

Unfortunately, we have not made any measurement tools to measure the strength of the fields of the emotion of the man, yet. And as I know very little, there is no such a system in the U. You go on the edge of a cliff, the fear stops you jumping over the cliff, it pulls you back. It's the emotion which does that. Fear is an emotion. Now, you are on the same point. You are on the cliff of jumping from the physicality into the Soul, and knowing there is emotion of STP, which has held me (back) ... ?? doing something. I hide, I turn my back, I say, "it's not there, but let it do it," and I call it a dream and a sleep. That's what we do when we go to sleep. We hide under the blanket, we put something on our ?? .. ourselves, we have the physicality that we are asleep, and we turn our back, we close our eyes and we said, "okay, now go." Dream, go, wherever you want to go, you are free, and I call you a dream, because I don't want to accept this is my capability, it's my responsibility and it's actually part of me."

Now, you have to understand this. (1:00). This Soul has no bed and blanket to hide in between. Except the energy fields of the environment it's in, and except the energy fields which is within it, we call it the STP of the man. Sometimes in and sometimes out. When you sandwich the STM, and the physicality of the man, and the Soul and the condition of the environment, you get the STP doing something and create what we call, the physical structure. Now, in this process, you have a plasma of STP, you have a plasma of STM, and then you have a plasma of Soul of the space, time and position. And you're trying to drag the STM to go in the other side, and pull the STP in the middle. And when you do that, you get the physicality.

Many of you, many of you who are used to dimension of the physicality, when you interface and interact with the first time, your new physicality, in new dimension, you will be panicking, hiding as fast as you can, (saying) "this is not me." Would I see with the eye of the man, in the mirror of the position and time, and see another body, which is not mine, but inside I know .. I am a man.

These things we have seen, we put you through the experience. We put you, we brought you to Linz, we let you go and you said, "I see blurred, I went to the Moon, I went to the sea, I became this, I saw the Soul of Christ and everything else." (1:02). We allowed you to experience. Because it was not you who experienced. Because as a man, you are part of the Soul of the race of the man, that knowledge has been embedded in the Soul of every man alive on this planet. Now, they have to tap into it. They have to progress to the level to be able to understand the transition.

Many experiences we did with you. In the time of the four or five hundred of you came to Linz to go through the system and we told you, come from all races, because we're storing, now you understand what we have stored, your emotion, everything else is part of this. You came in for a test, you actually added to the knowledge of Totality. And this is how it will work, and this is how you will be.

When you arrive in a time and place and position, you'll receive the knowledge from the "Soul of the citizens," and not from the school of the teaching and universities of the citizens. They haven't gone so advanced to bring in a structure of what we call, the lying, cheating structure of the, what I want you to learn, and what I want to indoctrinate you to know is the truth, because it fits me. You learn from the Soul of the citizens of the universe, in time and position and the place and the point of arrival, because you interact with their Soul, and not with their physicality. Because you entered into the dimension, in the dimension of the Soul, not the physicality. You didn't come off the plane, "oh these are Chinese and these are blacks, and I'm a European and I'm an Asian." (1:04).

As I said, listen to one of the Intros. When somebody looks from outside, sees the Soul, the brightness of the light, does not see the Soul of the king, a peasant, or a dog. As the Soul of the king and the dog look exactly the same, from the brightness of the man observing in the Soul. So there is no difference between the dog and the king, in the dimension of the Soul, why should be in physicality? Unless the man decides it. And then, we have to understand, who is the real dog, the king or the dog?

In the dimension of universe, we have no hierarchy. And we have nothing hidden. And this is what many of you will come to understand. In your first trips, you'll come to understand. Have any of you had a dream, talking to your mom, and in the dream, the mom tells you, "you're lying to me." Then, I, in the dimension of the Soul, everything is transparent, everything is dimension of what we call, line of the fields. So, you learn the language of the fields, you learn the language of the emotion of the language, you learn everything else with it, what to eat, what not to eat, where to go, where not to go, as you are born in that society.

This is what I tell you, in the coming time when you learn this, when you come from France into China, and understand to arrive in the STM, (1:06). not off the plane of the man, you will understand Chinese, you speak the language of Chinese, you'll understand the emotion, and everything about the Chinese culture. Because you arrived through the Soul, you arrived through the fields of emotion, not through the plane with the fuel in the back, dropping your physicality.

The science of the man will change. The understanding of a life of the man will change. And then with it, the whole structure of the physicality of man will change. We tested this, without you knowing, through the process of the last meeting of you Knowledge Seekers, in elevating the Soul of the abusers, some couple of weeks ago. And it was so beautiful to see how the STM has taken over the STP and the physicality.

And the physicality had no line, it was a straight liner, a "flat liner." And how the physicality stayed on the line, and watched the STP and the STM battling it out to find balance, for the Soul to be in the opposite position, equal to the STP, that physicality stays flat liner, and there is no abuse. If we show you the graphs and the electronic information we collected, it just puzzles you, if you understand it.

Now it comes to the point, that how in a coming time, we can transmute you through the Soul. You can transmute yourself through the Soul, and then give yourself dimension of manifestation of physicality, (1:08). at the end of transmutation. This is what is part of the teaching, this is what, if you listen to the past two, three teachings, I start opening, telling you that when we bring you to the point, you already understand. You learned enough about physicality. We had to show you everything about the dimension of the Soul, and then dimension of the matter state, the Gans's, and the rest. Now, we put you through the transmutation. We put you through, going from Book 1 to Book 3. But this time it's you. It's not a reactor, it's not a system. The system is you, understanding of it. And it goes back to what I always said. As Knowledge Seekers, you take from these teachings, according to your intelligence. According to what you decide to be the reality in life, which becomes your understanding.

We go through a break, and we come back, and try to explain. The teachings are surely short, half an hour, 45 minutes nowadays, Because, it's so intense if you understand it. There is no more mixing things, the only thing you mix is your energy of your Soul, energy of your STP, and your physicality and see what you get. And what you experience with the new transmutation. And gradually, as you go through the teachings, in the coming months and years, one by one of you will start going through the transmutation. You learn it, you understand it. Don't take it just a voice, understand what the voice means, which is teaching. And this you understand, when I tell you, when we teach, we teach for the whole of universe. Because universe taps in the Soul of the Creator. We go for a break and we come back, and then we'll see what we can do. And answer any questions. Thank you very much, Rick.

R: Thank you Mr. Keshe, excellent teaching today. Okay, well we'll take a short break here, and be back in a few minutes.

proofed

BREAK >>

494 KSW July 13 2023 (1:16).

K- Okay, carry on. Let's see what are the questions.

Q: Good morning Mr. Keshe, I have two short questions. One, (can) the earphones or only headsets can be used for the July sessions. So, can we use both earphones and headsets, (1:18). or does it have to be only headsets?

K- I don't understand.

R: I believe it's, you know, the earphones are the ones that just go into the ears. And the headsets rest on the ears. So either ones can be used for the July sessions, correct?

K- Either one can be used. Either one can be used. Can you give me five minutes, something urgent has come up, please? I'll come back and just put another ?? .. please. Thank you very much.

R: Well Dean you had a hand up, maybe it's a good time to say something to the public here, perhaps you've been at the center in Linz and directing groups and so on, in the, kind of the end days, you could say, of the center in Linz. How are you feeling about that? How is that going? . Talk a little about that.

Q: .. Yeah, thank you Rick. It's been, it's usual with humanity and with all of us. In Austria, it's become, for many Knowledge Seekers, a center of thought provoking, field strengths of emotions, and then some clarity coming through where you feel emotionally stable. You know, the Center has become a platform, and a position where Knowledge Seekers have come forward, and some have said ?? that they feel extremely comfortable in those positions. (1:20). They feel like they've received energies and when they're in the building itself and in surrounding areas, they feel a comfort. And we know this is directly related to their experiences on a Soul level where the Soul is bringing them forward, the Soul is present within the Foundation And all the Souls that are present, because it's not just the foundation Knowledge Seekers, there's many, many, many Souls present. And you sense it and feel it.

And I've understood that many Knowledge Seekers have experienced deep, deep self awareness and understanding that they probably didn't even know what it was. And then it just starts to open up like plasma does, you know, you get the first initial seed, you know, the first bit where you walk in through the door, or you experience it on the internet, you meet a Knowledge Seeker, the knowledge is shared, you know, you give them some of the knowledge, and then all of a sudden, it resonates so hard and so profoundly with the very essence of yourself that you just, you just want to know more. And then as soon as you want to know more, it opens up to you, and it becomes something much, much bigger.

So it starts off as it did for me, it started off with a just listening to Mr. Keshe and one of his teachings a long time ago. And the moment that the you know, the universal

knowledge is portrayed to you, that field strength, then everything changes. And the knowledge, you know, when you share the knowledge, as Mr. Keshe does, the knowledge seems to talk directly to you. So when you receive the knowledge yourself, and then you share it once more, (1:22). it's the same feeling for the others that are coming forward. It touches them very deeply. When I was in the exhibition just the other day, I was speaking to some people and I just give them a little bit more knowledge of what I've come to understand. And you can see it in their eyes, you can see in their structure, the way that they respond to it. And you can see the, you know, this, the slight elevation, the, you know, the part of the enlightenment happen within the structure of them, you see in their eyes, and you can see when people have emotional imbalances that in the in the physical body, or in the emotional body.

And as soon as they walk, as I said, the walk in the door of the Centers and guided into the centers by their own Soul, they start to receive the balance and you can, it's a beautiful experience to see. And sometimes it's very subtle, very, very subtle. And, but you know, it's present. And other times, it's very, it's like, "bam," it's there. It's sort of like, you see it very physically. And I've experienced it many times where people get very emotional and some people like we all ?? they have different emotions and they will be very quiet and subdued and you wouldn't know but you sense it behind the structure, you sense that there's a big emotional change is happening.

So for me it's a constant evolution of sharing the knowledge and now we're coming to a position that Mr. Keshe has explained this morning, where, you know, it's the next stage. And I'd like to ask Mr. Keshe some questions about how it's really going to feel to transmute to how is man going to go through this emotional understanding to be able to comprehend, suddenly being in a different position with a different set of, even if it's the physical body, (1:24). like Mr. Keshe was speaking about, if you go into another body, how are we going to feel about suddenly not, you know, not having, you know, the body that we're used to, and still feeling it's me, but in another environment, that we don't, we're not, we don't even know. So we don't, you know, we may land on, you know, in another position, even on planet Earth, we could land in another position that feels totally, for want of a better word, alien to us. However, we have to interact with it and we have to be part of it. And are we going to feel connected enough that we can emotionally be stable enough to interact in that environment and enjoy it, you know, and be enjoying in balance? How will that happen? So that would be one of my questions to Mr. Keshe when he comes back. Is there anything else you think I should explain, Rick? Or was that enough?

R: Well, there's the thing about the background image today, and of course, because we're broadcasting on YouTube, we have to be extremely careful of any testimonials of the medical kind, as you know, but you did give a very good testimonial in the public meeting for testimonials last Monday. And people can go to our Livestream channel, which I've put the, I've put the connection (link), that Livestream channel connection, to our chats here. And if you'd like to refer to a more detailed explanation by Dean, about the "Knee Gans." (1:26). But, perhaps you can, you know, say something about that Dean, that's not going to be impinging on our responsibilities, in terms of the medical, so

called, medical misinformation. And just tell people that you had good results from using that product.

Q: Yeah, of course Rick. I will keep it in balance as we know we have to. So for me, I had a condition that I've experienced a long time ago where I used to play the game of soccer, football, as it's called in the UK and most parts of Europe. And it caused me where my knee had a condition where the fluid in the middle of the knee sort of more some part cartilage sort of "popped out" from experiencing this football game. And I never got it, I never got it medically looked at or anything, because I was very young and fit at the time. And I just went back to the, you know, my training schedules and just healed in that way, physically myself by just doing physical hard sports and activities. I went through a phase where as I've got older, it started to get, because I'm not obviously physically strong anymore, it started to cause me problems and started to, the structure of it started to, you know, I had a lot of pain when I was walking up and down stairs and other, you know, up and down mountains, I should say.

And so I mentioned this in the Foundation to Mr. Keshe with all his beauty, I said to him about it and then very shortly afterwards this Knee Gans came out. And I thank Mr. Keshe for that deeply. (1:28). And so I've used this Knee Gans and I used it according to the instructions and so what you see here is the Knee Gans on the right hand side. In the middle is the containment of the Gans itself and I've shaken this jar so you can just see some of the Gans just sort of fluttering down. And then on the left hand side, that brown bottle you see is actually the plasma water itself. And then you see the syringe and the bandage, the knee bandage that I would spray the knee bandage with some of the plasma water. And so I went through the procedure.

The procedure is very simple. you do a test first, where you would put a band, sorry, a "plaster" in the middle of your arm, opposite side to your elbow, the inside part of it. And you would just test it for 24 hours to make sure you don't get any reactions to the plasma. And then if that's okay, then according to the instructions, you mix up the Gans, shake it, let it settle to the bottom. So all that you see in the middle here would be floated all the way down to the bottom and it would be clear, like you see in the brown bottle. And then this brown bottle, the plasma water, you would then spray some different amounts of spray, creating a flow. So you may have two or three sprays on the front of the knee and one on the back of the knee. So you're creating a gradient. And then basically you keep doing this for seven days. And then after seven days, you assess what's taken place in the structure of your knee. And if you sense and feel that you need it once more, then you can reapply. So you wait seven days with no interactions, you're not using it at all. (1:30). And then you would start to use it again for another seven days, spraying as you, once or twice a day, I would spray the bandage and then reapply it to the knee.

We say Knee Gans, but it's obviously for any joints. So it can be used across the body really. And I experienced many beautiful things. First of all, I experienced a connection, a reconnection of the neurological system. It seemed to me where when I first started using it within the very first couple of sprays, I think I went to bed that night and I felt a connection from my brain down the top of my neck, my back, that I knew was

reconnecting the neural pathway from my brain to my knee, reconnecting it. And I think creating that flow again. And because that flow was connected, it meant that the knee then had a position to be able to start to re-grow and reposition itself using the Gans. And Mr. Keshe has made this specifically to help people and to help any, you know, creatures created and human beings to, you know, recondition something that's happened. It actually is there to, I don't want to go into medical terms, but it helps to rebalance the condition that you have and bring the ligaments and the tendons and cartilages back into balance.

And I personally have experienced that it has done this. It has taken a little bit longer than I would have liked, but this is because I had quite a severe thing that I'd left for quite a long time. One thing I did notice when I was using it as well, was I had like a sense of feeling of my knee getting bigger around the front to begin with. (1:32). And then it seemed to move around the knee. And then one time I remember feeling it on the back of my knee and I could feel the, you know the different areas of the knee responding. And it seemed to be readjusting, re-growing and reconditioning itself. And so this is probably two or three months ago now. And now my knee is, I wouldn't say it's 100%, but it's back to sort of 90 - 95%. And it means I can have an active life again and not be in pain when I just do the most simple things like walking up and down stairs, which is a massive thing, because this one technology alone that Mr. Keshe has released, if you multiply this, the amount of times somebody would strain themselves or hurt themselves or be in a position where, you know, they're in discomfort, then this opens up a huge, you know, this one product opens up a huge structure within the totality of positions on planet Earth with our physical bodies.

And so for me, it's a very, very important product that I know many people from the sports arenas, from lots of different positions. I mean, not just sports, I mean, just everyday physical life of many people that work very hard. have a repetitive problem or something they might do, then this would, I would suggest, would be a wonderful way of redressing and bring yourself back to balance. And it is a beautiful gift, a beautiful gift from Mr. Keshe to humanity. And as I said, this is just one, and it touches the full structure of humanity and all the creatures. (1:34). As I said, there's one product. You can then when we start looking into as Mr. Keshe said, 20 or 30,000 products, can you imagine the full spectrum of energies we're going to receive to bring back the balance of the physicality and emotional state that we all experience as Souls present on planet Earth and elsewhere. Is that good enough?

R: Thanks, Dean. That was more than enough, probably. But I gave a break for Mr. Keshe to do his thing there, too. So, thank you.

K- Yes, I am very busy in the back with a lot of things. Sorting a lot of things out. These kind of things, which we put out, and Dean speaks about, this is a wellness. We are not in a health business. This is what brings comfort. Don't forget these materials have all been, Gans's have been, received a certification. When we produced them, tested them in China, and it has a health certification for it. It's a normal Gans of materials, but in a specific way, which we have developed for these things.

And we are not in the health business. We are in the wellness, in feeling better. And as Dean said, he feels the emotion in his body before reaching the physical condition. There are a lot of people using in different ways. As I said, Keshe Foundation is entering a new, totally new environment of work. And in the recent past, we have tested a new dimension in the process of converting fields into energies, into matters, (1:36). and conversion of the matters in the new dimension work. into the structure of the body of man.

We had the pleasure in the past few days, as part of the same process, to see physically what we call, the helix structure of the amino acid (AA) in a very, very specific way. I set it up to see it. And when it was there, it was amazing. Where you see it in the matter of what we call, "visual structure." And we'll bring in new dimensions, new materials and products in the coming months, in two or three years.

We have merged the Keshe Foundation with one of the strongest nations on this planet as a collaboration with the nation. And we are set on course to bring huge changes. As one said very recently, the giants of power and science have finally met. And that'll bring the change. The trap we were set up by Europeans to keep the Keshe Foundation silent has failed drastically. And one of the most powerful nations on this planet has joined force with the Keshe Foundation to bring the technology, as its utmost to serve humanity. Knowledge in exchange for peace has taken shape. And this bottle is a small bottle. Compared to what is to come. And deeply involved. (1:38). And we have left it to the governments to announce the collaboration and extent of the collaboration between the two organizations.

.. It will be fundamental that technologies like this, so simple, can change people's life. Like Dean said, you cannot go up the stairs. And then you find out life has changed. The reason I released this wellness product was I got injured badly last year in a hiking accident ?? .. work. The doctors told me I need to replace my kneecap. The cartilage has totally gone. And on the MRI showed both legs were kneecaps, cartilages, and part of the knee itself, through this accident, has been damaged beyond and needs operation. I said to the doctors, I don't need it. I know how to repair it. And he said, when you've done it, come back. I couldn't go upstairs to the surgery to take pictures. I had to take ?? rest. Very painful.

And strange enough, on Sunday I was at the location and I was told that the electricity will be cut at 12 o'clock. And I was on the eighth floor. And I had to be outside. And I climbed the whole staircase, the whole eighth floor, round about 15 steps on each floor in one go, without any pain, without any actually thinking about it. And we see the change. (1:40). For me walking 100 meter was impossibilities for some time. And one of the Knowledge Seekers I said, when one of the teachings said, you, I felt you have a pain, there was a pain, and I said, yes it was. My cartilage doesn't need to be replaced, it's fully restored. And what you see in the bottle is what I used. And I thought the knowledge has to be shared. It's a kneecap operation, joint operation on the knee, because the MRI, we still have the MRI, we kept it for reference, shows totally there is no cartilage. And you

cannot go up the stairs, eighth floor, at my age, in less than a minute or two, if you do not, and if you are not fit.

And this is how the knowledge is. I shared my technology (T) with all of you, like everything else. And, this is what it is. Many of you have tested it. There are different ways of doing, testing this, adding it. It's a wellness product. And this is exactly how it should be. Knowledge at the reach of man, at the point of demand. And I, many times, thought, I'll go back to the surgery in Vienna and tell the guy, "how many people would you like me to help?" (1:42). It's not a medicine, it conditions the environment in a ?? plaster of the fields. And I've seen the result. Don't forget, I originally used this in June of 2010 or 2011, when I fell off a horse. I rebuilt the whole structure of broken bones within 7 days. There is a lot of knowledge's which is to be shared, to be understood, to be in a way applied.

This technology creates condition, it's not healing, it's not medicine. And we've seen many people having used this different type of structures for this purpose. We have reached in the level of technology we have come to a point that ... (1:44). ?? today I have ?? very emergency things happening. Just please, one second.

R: Okay, bear with us a minute or two, while Mr. Keshe does his thing and reconnects in a minute.

Q: Rick ... one thing I forgot to mention, is Dean here again, is, what's beautiful about these products, about the... and I'm not, we're not trying to sell products, it's not about this, it's about the, the gift of creating fields, plasmatic fields, that bring, as Mr. Keshe said, wellness back to people. So you have here something that I know in this, in the matter state condition of this containment of this jar, this plastic container, a liquid plasma, you know, and Gans, gas in a Nano solid state. And you have the capability and what is the beauty, the real beauty of the knowledge is that you can share it. So physically, you can split this up and you can give it to other people, other creatures created to bring their structures and their emotions into balance. And for me, that is the real, the beauty of this knowledge. It is the fact that it can be shared, it's given and it's in the sheer power of this technology is in the fact that, (1:46). in that very small little bottle is a technology that is beyond what we've experienced before and can bring, as I said, a balance back to all sorts of conditions that we have. And the fact that we can share it with our loved ones, our friends and family, communities, nations, is the beauty of this technology. And that is, for me, that is the most incredible thing.

K- Thank you very much. And sorry, I'm back again. In the recent past days, we have tested, in a specific way, the fields interaction. That's part of a very large scale test. And again, this will come into (flourish) in the next few months. You will see it. Where we release another range of technological scientific materials which can help with daily life. Restoration of the energies in the body in a very, very specific way that will change a lot of things for many of us.

What we foresee in the next maybe 12 months, maybe 2 years, in collaboration with our new partners, where we enter feeding nations, (1:48). where we enter a cycle of wellness care for nations. For example, today you send food packages to disaster areas or for famine areas. I foresee next 5 years our partners will market, feeding a whole nation with the new technologies, emerging technologies, where we become responsible for feeding a nation. Technology has been tested, technology is available. But in that way we don't need to farm. In Africa, in third world nation, where food is one of the biggest problems for governments, will be resolved. Where through very much like what you see, we'll put that into reality of the delivering of the food through plasmatic conditions.

New plasma, a new definition in the world of plasma. It's matter of how we come to an agreement and in a way, it's not something new. You as Knowledge Seekers, we promoted a few months ago and it's still on the Keshe Foundation website, that you can join in a food contract where we feed you through the Keshe Foundation Apps for so much per family. Now this, or your wellness covered by this. (1:50). Now this with the new structure which is coming in the Keshe Foundation, makes us possible in collaboration with the governments we work with, to become nationwide. Which means for example, let's say, the nation of France accepts to feed nation citizens of, let's say, Algeria for 2,000 per head for a whole year, irrespective of position in Algeria. This technology now is available.

There is a reason we push this forward. And the reason for that is very simple. Technology is jumping in a very, very rapid way. The development of the Keshe Foundation technology is growing so rapid, that now it's possible, accepting in the next 5 years, for example, to feed a nation. You don't need to export rice and grain and control the policy. You come to an agreement on a percentage of GDP to do this. Which means we take 2%, 3% of the GDP, whatever it is, whatever nation you are, and that becomes a payment for feeding the whole nation. And this ties up with the nation we have joined things to work, that we can do this.

This gives us a spare structure to learn more. Where a lot of problems with poverty brings a lot of diseases, malnourishment of the children, now we can cover. (1:52). And there's a lot of new breakthrough knowledge's and technologies, which we have started releasing. And we will carry on releasing this in the coming months and years with our new collaborators. We have signed agreements with the nation.

The Keshe Foundation has entered into full collaboration with one of the most powerful nations in writing, not in talk. We are in that process, to allow many, many, many positions to be cleared. The Wellness Center of the Keshe Foundation will be spread across this planet in a very specific way. We have allocated the first Wellness Center to work with the doctors, but has no operation within the Keshe Foundation. In the next couple of weeks, we'll announce the first Keshe Foundation Wellness Center set up and up and running. But you don't need to go to the Wellness Center. You can be anywhere around the world. We see the operation, the opening of the second Wellness Center in Arizona and Uruguay. Most probably in a very, very systematic way, we, in collaboration with our partners, we'll start the Service Centers like this. But Germany, Arizona, and

Uruguay will become part of our best structure of the world by Christmas. Where, through Uruguay, we serve the southern hemisphere of the American continent. (1:54).

We need to understand that the separation will come in a very big way. We do not sell our systems, but we install with the doctors to operate for a nation, or for a place. The state of ??, we lost a lot of money. And that brought us to understand and open new collaborations. And those of you who invested with us, you know, most of you have received some of your money back already. And some will receive it back in the coming due course in the next few months. But it brought us what we wanted to do as a Foundation individually, in collaboration with the government. Which I always say, thanks God we lost the funds, because then we had to go through the whole process. Now we are not involved in that process, because we are just research developers. And the nation will do the rest.

And the nation we have signed an agreement and entered into work is one of the most powerful nations and the richest nations on this planet. The leadership of the nation have understood and backed us, tested us, tested the technology, and we keep out till they announce publicly about the Keshe Foundation technology as one of the prime works of the, what we call, the nation, as a new emerging science. It's a sadness to see so much work was done in Europe but in a way it built us up to what it should be and now the Keshe Foundation has entered a new era, that technologies like this will be available to every man, more or less, on this planet, because we don't have to worry about it.

Every product carries the name of the Keshe Foundation on it. It will not be something hidden behind somewhere, (1:56). from the gas production to oil production, comes to satellite space travel, food, agriculture, everything will carry the Keshe Foundation name on it. This is how they respected the technology is. Technology as our Knowledge Seekers develop, ?? we'll see and will come up into the structure to announce it on due course. But we still work and the Keshe Foundation team has not stopped working on this ground for past months.

Any other question?

Q: Good morning Rick, good morning Mr. Keshe, good morning everyone. Mr. Keshe, you, you talked a little bit, but, you know, I had, of course, Hassan said it's fake, but this is what I heard, that Elon Musk was talking about, they created AI that every single person can use that program to get funds everyday so you don't have to have jobs that you don't like, or don't have to be poor or don't have food or shelter. And it's 91% is accurate and you can do it. So my question is this, because I know in the past we always talked about how can we bring the plasma science, this technology to the society that we don't create more chaos and mayhem. (1:58). Say, when we talk about the energy field replacing oil, if we suddenly give everybody a generator or they have everything, we have so many people work in oil business, refineries, and so on and on and on. And then they lose job. So for example, in Middle East, so many people like Saudi Arabia, Kuwait, all those countries, people are going to be, we don't want to make people poor.

But then, with the advancement of plasma technology at the moment, it is 100% we know is possible if we create an App. There's one App for food. For example, when I touch the App, I say I want a banana. I feel the banana and I get the energy of it. And I don't have to eat the banana. Or for example, in terms of shelter, the shelter doesn't have, a home doesn't have to have a wall or a roof. Because we know with the plasma field, I can be on the mountain, someplace in anywhere and don't feel the wind, don't feel the cold or don't feel the heat and because I'm protected I have the shelter, it's a field. Just like the field we create that we can grow tomato or wheat in the middle of winter with the snow because we create like the dome. So we can have App for both. So if we have an App for both and people have it, so everything else is going to be resolved. Because when I have my food and shelter I don't need a job. So all the killing is going to stop and everything is going to be done. So why can't we do that?

K- Do what?

Q: Create this App.

K- We talked about these Apps will come, a few months ago. (2:00). But to structure it has taken a long time, and to structure it, come and take maybe a year or two. But there has to be a new approach, than to the App. We don't think about things on the basis of man on this planet. We are a space structure. So if you go back on the headphones and the new Combination Homes Units which we brought out. There is no App in it, there is no way you can App to it. The technology has developed, has gone further. If you're on planet Zeus, there is no Apps and no televisions and no computers that you can App it to feed yourself. But you carry the strength of the field of the human race or planet Earth. Or you see in the creature which is need of energy, you can transfer that to.

This "App business" we already passed by introduction of new technology. New technologies when will be released, has the combination of work. You can tap into it. This is part of the teaching. You don't need an App. You don't have a computer. You're in the middle of a desert. You lost your mobile phone. Sorry, you die. This is the present state of day today. (2:02). If you learn to tap into universal energy, if you learn to tap into energy centers, which is set up across we call it, Service Centers, you're fed. You have a headache...

Q: Mr. Keshe, I understand this.

K- These are what is the reality.

Q: Mr. Keshe, I understand this, as a Knowledge Seekers, we understand this. But one thing is, like right now at the present moment, there are people in the planet have been displaced or they have certain needs and stuff like this. So this App, it can be a transition for those people.

K- Yes, it can be a transition for those people, but this is what we said months ago. But the development is going to the next step. We showed and we have tested a lot of things

in the background and it's getting developed to be tested. We don't set a system. I'm trying not to give too much, but at the same time trying to explain a lot. Just one second, please.

R: This seems to relate to Mark's question in the chat as well. He had the question, "would this product or technology be transferred into an application in the future?" (2:04). So, we seem to be getting an answer to your question there Mark.

Q: Yeah, you see Rick, because you see we understand, Mr. Keshe talk about we using the, because we start to recognize the field and not only we can use the energy of it as a food or traveling or transmutation or teleportation, but because we're not bound to this planet, we can go anywhere we want. But now, there are people that, you know, they don't have this knowledge. I was at the meeting yesterday, last night, it was a lecture, there were 10 doctors there. There was a lecture about implant and new technology in a implant. And then the doctor was from Italy and then describing how the implant can be done. When I was looking at it, all these doctors are so looking at it as such an advanced technology, when I looking at it, I mean I couldn't explain anything, but for me I was just like, I had, I was shivering my bone because all those metal and frame and everything in the mouth with everything. I mean, I feel I was like 200 years ahead of what they're talking about, but even if I want to explain to them what can happen in the future, what it entails, they wouldn't even understand it. So, there are these people, I mean, we have these people, and we have people who are suffering in terms of food and shelter, we have people who are doing crime because they don't have any means of support emotionally or physically. So, this transition can help them.

K- The transition can help, we can do a lot of things, a lot can be done. But, we can do it the old way or we can do it the newly developed. (2:06). I mean, we are not the end, we are not the answer to everything. We are even ourselves a transition, till, I'm sure, other people will come into it, and they do it bigger than this, better than this. But, the new structure of technology, allows us to upgrade in, we can do it by Apps, which will be done in the coming time. But we've gone a step further than that. And there is two ways to do it. To stick to what we've done, because it works, or to bring the new technology and add to it.

This is what you do. When you come tomorrow online, you bring us your Zoom number in. And then down, once we establish that, we connect to your Soul. That's all that's going to be done. So in the next sessions of Keshe Foundation development, we don't send you a Zoom number. We interact with you in a different way. But you receive much more, whatever information, be it wellness, be it hunger, or whatever, through the new lines of communication. If you are in the desert, you run out of battery, your App is good for nothing. But if you carry the new system, it never runs out of battery. It is connected to everything you need. (2:08).

We try to jump very fast. And I see this even in the past few weeks. It is a struggle for governments to understand the transition can cost a lot of money, can cost a lot of time. But if we don't pass this transition, if we jump the transition to a new level without the

transition, we'll gain a lot. And in the next few months, this is part of what we have to convey and put into, especially in October meeting with the ambassadors in London. To show the transition is the... You see, it's very simple.

In America you use the most ?? , oldest system for your Internet. Because the cable was set 30 - 40 years ago, nobody knew these things (will) come out. But you still have to cover those costs. You're still behind Kenya and Africa in all sorts of things, in communication, computers, and the rest of it. Because they didn't have, they didn't spend on these infrastructures. So people financed it for themselves, and the government supported it through.

And we are trying to explain this to the governments, that we have to jump the transition. We have systems we can show you can jump to transition. And it costs nothing for governments. The beauty with this transition to a new science, governments don't like to spend money. But they like to earn money out of the science and technology, (2:10). but have control over it. And this new development gives them all of it.

So do we go to the Apps? We still go through the Zoom. But are we going to spend a lot of money on it, to develop it? Or we already know the next generation here. Cope with it till the next generation of science comes in, and it kicks in, and it's done. It is very much like the oil industry. We sell you the fuel to burn in your car, because if you don't do, it costs a lot of money to do it. Or we come up with the new tricks of electric cars. It's so advantageous to the refineries and to the oil companies. Unbelievable compared to the present cars. But are we going to the electric? In electric cars, which they need to be charged on the wall, or are we going electric cars, which never need to be charged? There's a lot of games played, even with this.

It's the same way we talk about feeding people. A lot of people, if you understand what electric cars means, if the present pattern is kept, it's a gift to the refineries, gifted to the oil companies. To produce electric power at the power stations we use the most crudest oil, cost nothing to refine. (2:12). We don't need to have petrol stations. We don't need to pay people to sell it. We don't need to transport it, and all sorts of mess. As a refiner, the biggest gift given to, is these electric cars, because we sell the oil of not clean, not clear to be burned into power stations. Governments are happy instead of paying 10 dollars a liter, of let's say a barrel, a gallon. They pay 1 dollar a gallon, but they charge you electricity at the end. It's a win and win for the government, oil companies, the electric cars.

But if you try now to bring the new technologies, which allows you to do 10,000 kilometers for one charge, governments will stop you. If you bring a car which doesn't need charging, there is no way they allow you to come, because they'll lose revenue. All this game you see with electric cars is one of the most profitable businesses for the governments. There is no environmental cleaning, car exhaust. The burning of the fuel in the power stations to produce your electricity is 100 times worse than your cars. Example, look at the ships and the amount of pollution they create. Governments don't care.

But if, as a scientist, you come up with a car which now, Tesla does 600 - 700 per cycle of charging, kilometers, if you bring this one to 10,000 kilometers, which the technology exists today, (2:14). the governments don't allow it to come in. Because they have not planned for the revenue from it to be less, unless they charge you the revenue, which gives you the 10,000, the same as you charge a 700. We are in the same position. Technologies, sciences, which the Keshe Foundation, I'm sure, many, many other scientific organization done, will not be allowed to come into the market so easily, because we shake the "apple cart."

If you took a bottle of the Knee Gans and you sprayed some water on your knee, as Dean says, it's changed his life 90%, 95%. Then what's going to happen to all the operating room? All the other things which they were supposed to, all the doctors we educated to do the knee operation. And all the incomes which brings with it. What about the pharmaceuticals, and the others who are going to look after you after your knee operation. If you spray our water, (it's) done. A life of pain away, no operation done.

The governments don't allow technology. We are now in a position, that we can eradicate a lot of problems health wise on the wellness. But it has to come in the right way. We can feed people. It has to come the right way. (2:16). And if I can tune, if you understand the gravity of what I'm going to state today, if you understand what I'm going to say, you understand how advanced we are.

If I can tune through the headphone to your Soul, to feed you, to change you, do you think we haven't reached a point of not needing the headphone and reach your Soul and feed it. Now you understand. But we have to get the governments to do it. And the best test of it is, let's do it in the space, because there is no food in space. We have to feed our astronauts, we have to feed our space people. Just flip the satellite 180 degrees, you feed the planet directly through the Soul.

It's not that we don't have the technology, it's not that we don't have the knowledge. It's if we release this technology, not if, it's already been released in past week, we have shown what, in past two weeks, we have shown the government, things that you cannot even imagine possible. It does not exist even in the sci-fi movies and in the imagination of the man today. They had to taste it, they had to touch it, they had to feel it, and even that has caused them more headache than where we are today. The leading scientists of a nation, the most powerful men of the nation, have stood in this environment, (2:18). and had to accept the technology is beyond even the knowledge of the man. They had to feel it. And even feeling it, they are baffled in how such a simple technology can create such a mayhem.

For me to feed the man it takes no time. I don't need no satellites or anything ???. But man has to understand it, that in the space can teach himself not to do what he's done on this planet. Most powerful man on this planet Earth are watching their eyes, the baffleness of what is happening around us, in past two weeks. What is next? We have the knowledge, we have the technology. But as I said, the political arena, the financial arena, the power

point of arena of this planet, in past two weeks has changed. And, gradually will change a lot of things.

But we're in the space technology. Governments have to find a way that it becomes a human technology on Earth. I can cover myself with saying this is what we do in the space. But governments have to turn it for nationals and other governments to accept it. (2:20). We're so advanced in technology, it's beyond your imagination. And we don't talk we are, we have shown it.

Q: Mr. Keshe, I am thinking about all this, bring me back to another question I have is. You see, I started to teach the from beginning of the Knowledge Seeker number one. And we are right in the beginning. So when I listen to those, I wasn't a student there at that time. You were saying, "with the movement of my pen, I can make everything under the ?? surface talk. All your war mongering, all the killing, ?? everything."

<< audio breaks >>

K- We can't hear you.

Q: Can you hear me now?

K- Yeah.

Q: Okay, so my question is, why we so keen on attaching ourselves to the government and the government...

K- Let me, let me, let me tell you one thing Azarjan. We have moved our "pen." In past few days, we have released a "pen of knowledge" to the leaders of the world. Not by talk, by delivering of the technology and showing it. And, it takes time to go across to the other world leaders, (2:22). and go across to the understanding of the others, and the nationals, and then to the back of the African villages, and to the palaces of the kings. It's not that we haven't, we, as you say, you said, "I move my pen." My pen has moved in past few days. And there has been Knowledge Seekers witness to it. And the same with the world leaders. The Knowledge Seekers stood "shoulder to shoulder" with some of the most powerful man on this planet, to see the technology and its beauty.

And now it's in the hand of the leaders to understand it themselves. And then it takes time to think in how to implement it. And how to understand that the technology is not for the man on Earth, but it's for the "man in the space." When even we send you to another part of universe, you're still connected to Earth through the line of the fields of your birth. We still can feed you. Not food, and apple, and orange, but through the fields that you need to survive the span of the universe life.

We have shown one of the most powerful technologies ever existed to the world leaders in past few days. (2:24). And they are puzzled how this technology, like the cap you saw, the bottle you saw in simplicity, can change the course. We will use the London conference with the world ambassadors to bring in a massive change in the course of humanity. It's not just a simple presentation.

Q: Mr. Keshe, I have one last question. Say you left this planet and then, and maybe I die or leave this planet too, and then and if I bump into you, do I know you? Do I know, that I know you?

K- All your dream is how to bump into me somewhere. As a Soul we don't bump, we are aware of each other.

Q: We are aware of each other, but do I know, that I knew you on this planet?

K- Of course. Of course.

Q: Thank you Mr. Keshe.

K- Just be careful where you bump to, and who you bump in the Soul level. It could be much stronger fields and it can, you can end up in the other part of the Universe, ?? you know the bump will be ?? .

Q: Okay, thank you.

K- Thank you very much.

Keshe Foundation in structure will stay the same. But in operation and delivery of the technology, in the coming months will change drastically. (2:26). And one of the reasons we are moving totally out of Austria, is that we have moved into a new position with our collaborators which, through the strength of power, power of the political, and the financial, and military, and defense and the space, gives us the opportunity to open new doors and allows the nations to become more powerful, to be more peaceful. The gun policies of United States to be more, to sell more, to be more powerful in the arms. We have changed it to be much stronger in technology and sciences. That makes the arms of the United States obsolete.

The Iranian military forces have shown the power of this technology in defense, in January of 2020, in Iraq. Not to be aggressive, but to be defensive. To be in a way, to defend what was planned to deliver in a massive way. And it literally decentralized all the plans which Trump and his son-in-law planned in Tel Aviv for Iran. And with it brought to show whatever was sold to Middle East, to the armed ?? militia countries as a defense against Iran, could not even defend the manufacturers and producers of defense, because ?? they couldn't defend themselves ??

Now we are entering the next phase, where with technology, we make everything obsolete of the past, in so many ways. Not only defense, space, not only space, the food, (2:28). the energy transfer, the health transfer. The same machine can feed billions of men on this planet. One machine. The same as the "Soul of the Creator" fed the whole universe.

So we have the knowledge on both sides. And now we have contemplated and we have come to an agreement with one of the most powerful nations on this planet, to bring that cycle in. But they need themselves to understand in a slow pace what is coming in. The

"gun policy" to sell, to be, to create fear will be replaced with knowledge and technology, which brings comfort and peace and equality, not only on this planet. Then it goes back to the time when everything's peaceful, man will progress in knowledge and technology in a much, much more rapid way. That "heaven" which was promised has arrived. And we didn't need to do much, we just had to show the power of the technology, in its peacefulness and its beauty. And we have shown. It's now just getting slowly, next few months and years.

The rest of the world leaders on the same ?? ship as we call it, and ?? same soul. Making more aircraft carriers, making more nuclear weapons, making more weapons of mass destruction, has joined the, what I call, the time of the "bows and arrows" of the knowledge of today. (2:30). If you remember, when you go around Europe, and most of the places around the world, they used to dig trenches (and moats) around the castle, that no one can cross the water, and they could protect the castle. Till the first man came, first was the arrows, and then when a cannon came, and then when the planes came, these castles were nothing, became museum. The present nuclear war mongering and the systems, now has become those castles with all the, what we call, waters around them, obsolete, because you could cross it, you could bridge it. Now we can bridge that point.

Nuclear weapons have become obsolete, with what we have shown to the world, it is in past 7-10 days. All these aircraft carriers are good, for children to have holiday on and play with, on it. And it's for governments to start this ?? . And it's for governments to understand it. We've become very, very, what I call, outspoken about this. Because now we have started delivering technologies to a nation, to world leaders. That with it, they can see the changes they can bring in. Humanity is fed up of killing. Humanity is fed up of all this mess we created, as citizens. It is just a few people would like to be the leaders who create all the mess.

And with this new cycle, we take that out of their hand. (2:32). And in a way, we give it to the STM. Most of the world leaders suffer from all sorts of cancers, diseases, and they are like what we call, "Hollywood actors." They're pumped up, they're 80 years old, they make them up when they look 40, because 40 years ago they played in Western movie, which was very popular. People won't recognize their face compared to 40 years ago. It's the same with the world leaders. And now, they do anything to stay more in power, and be called, whatever. And with this technology, it does not exist anymore. We all become equal citizens and comfortable citizens.

But it takes time. And because the knowledge is transferred to scientists of a nation, will not be shelved. And in the peace conference of the world ambassadors in October in London, we will bring the shocking news and technologies, which none of you could imagine existed. We'll see. it's time to deliver the technologies, not to a few, but to all, but at the same time.

Any other question?

Q: Do we have so called, (2:34). "critical mass" in plasma technology like in nuclear field?

K- What do you mean by that?

R: Well I guess he's saying that...

K- We have "critical energy," ?? it's part of the... We have critical energies. But not critical mass.

R: Right. The critical mass in nuclear, as you know as an engineer, is the sort of a break even point where the...

K- I know nothing about it.

R: .. Things run away or whatever. But in plasma technology it's different. So, could you just explain that a little bit more, what you just said about that?

K- Critical mass, or whatever you call it, and when it runs away, we call it, "China Syndrome" in nuclear industry. Literally what we call, Fukushima, it was known as China Syndrome. In the energy, we don't have a critical point. In the energy of the plasma, everything finds balance. And if it reaches a point of not being holding the fields together, we reach a point of sharing and splitting. We call it, in a way, "fission."

So, critical mass to run away and create mayhem, does not exist in the world of plasma. (2:36). What we call, ?? "outer surface tension of the fields," cannot hold on with the inner gravitational field forces. Certain amount of gravitational field forces, take part in separation according to their strength, but they still carry the ?? outer strength level surface with them, which means they cannot enter each other.

In nuclear industry, as we know "China Syndrome," critical mass which, and then you go into overloading the energy, then the mass, going to China Syndrome is, it cannot happen in a plasma technology, impossibilities. And I know nothing about nuclear to start with, so it's much easy to understand the energy.

Any other question?

Q: .. Okay, hello Mr. Keshe, hello everybody.

K- Long time we haven't heard from you Mr. Mosfeq.

Q: Thank you. You just mentioned in response, what you mentioned in response to Azar's question, it kind of prompted me, I didn't want to ask this, but anyway I'll ask it and you may choose to comment on it. In the last few meetings in elevations of the children and the... those who are, you know, (2:38). abusers of the children. I participated in those meetings intentionally without any devices. I did not feel any difference compared to whether when I connected with the device. Of course, I didn't hear the actual voice instructions, but I felt things, and it was somewhat clear, I may not be perfect in it, but it did, something came through. And, would you like to comment a little bit on it? Perhaps it's my ?? descent enchantment with the...

K- Tell me how you connected?

Q: Directly through my Soul.

K- How did you, how did you connect?

Q: Essentially what I did is...

K- Yeah, but I mean, you didn't come through the Zoom?

Q: No, I didn't come through the Zoom. I just, through my Soul. I essentially tried to recreate, you know, there is a sensation one feels, once the connection happens. This is how I have been doing it. So I essentially lowered the field of the blood flow, and I feel something different when it happens, and then I connected with the system. And I feel certain something some other feelings and this is how I connected. It was very distinct sensation and, anyway so this is how I did it. And in any case um yeah, I'm not you know, I like this because it seemed to work. I mean, maybe it may not have been perfect, but it did. I mean, at least to me. And I just wanted to hear your comment on it. As I said, you know, I have enough of these digital computers. (2:40). But anyway.

K- It's not... If you have managed to link up to that level, you don't need it. The Martians and the people on planet Zeus receive the information and the knowledge the same as you do with the headphones and your telephones. There is no need for what we recently brought up as computers and communication systems we are aware of today.

If you have reached that level of maturity in the level of the Soul, you can quite easily bypass our, or even the systems, and reach the Soul of the abusers. There's no exclusivity.

Q: This is something else, in addition to what I just asked you. And I have tried that as well. And, and there is a feedback I get, when I do it. And this...

K- Can I ask you something? ...

Q: Yes.

K- Did you reach our system or did you reach what was the feeling? You reached our system?

Q: First, I mean I've done two experiments. One is...

K- You felt that you were in communication with the system that...

Q: Yes, that's the first one I did. And then I did the second one, which is whether I can do it directly. And actually I came in contact with a specific Soul. (2:42). When I was doing it for the children, and that's your son. You know what I mean. So it is something definite that comes through for me. I mean, I maybe there might be some errors here and there. And maybe I may get distracted in things at times. But things do come through and that's my feeling of course. It's a feeling and I don't know it beyond that I can .. it's difficult to talk about these things. But I'm just saying what my experience has been.

K- Yeah, but you don't... this is what I was saying earlier on. You do not need the system, but the system is a tool for you to know what to do. And as we go deeper and deeper in teachings, many of the teachings will become a silent time, than the voice time. Very much the way you have it during the sessions. During the sessions there is no talk. I mean if we instruct something we want to do, yes, but in general there is no, nobody talks

except you listen, you hear, you receive the energy from a system, which is set in a specific way...

R: Even the talk is very minimal when you do that and most of the verbal that we hear is just the translation of that initial sentence or two that you say, (2:44). and it has to be translated into several languages and that takes time otherwise it's quiet time. And it's very, very bizarre, because you're using Zoom which is known as for social media, for videos, audio, visual and so on. And, we tune in to Zoom with no visual and no audio basically, to be quiet. And, but yet the microphone has to remain on. So, it's a very unique situation and forces everyone to go into a particular position that they don't normally do when we're on social media. Social media is normally about talking and interacting and all of that "busyness," with our busy brain and so many things to think about and do as humans. But then in this, in this program it's a different situation. Everyone is quiet, but yet together. It's very, it's a beautiful approach and I thank you Mr. Keshe for coming up with that. And it's, it's great.

K- It's something which we, in a way, allow the expansion of the Soul. And this is what it is, when you expand your Soul. Once you learn to link, you don't need the intermediaries. And the more you link, the more you learn, the more access you receive. And this is the whole object of these teachings. (2:46). And in the future, many of you will, will do that automatically. It's just I have to show you how to get to the uncle's house. And once you learn the way, you go to the uncle's house, you don't need me to show you.

Any other question?

Q: ... Because recently, a very famous music star had suicide because of her depression. So our Chinese team has somebody asking, what's the reason to cause depression, and how to handle it?

K- Many reasons for depression. Many, many, many, many reasons for depression. And 99% of it, we bring it on ourselves. It's that we cannot achieve. This expectation could be communication, could be material, could be anything that we cannot reach. And we see ourselves as a failure, and man does not like failure. (2:48). And depression ...

When you speak for like a musician, a singer, we've seen this in very big numbers compared to in past 10 years, compared to before. The musicians expect to sell 100 million, but they don't sell, they sell 50 million. They don't look that they reached 50 million. But on the other hand, they see themselves as a failure. But their social life is not what we see outside.

Depression has many reasons, but primarily it's a change in the level of certain fields, which does not reach. Our team of doctors work on this quite a lot in the past recent months. But with the new technologies even what we use now, it's become obsolete. We can find the strength of the fields of the emotion of depression and feel it, that it become the strength.

But generally, depression comes from not receiving what you're expecting and not achieving what you wanted, and seeing yourself as a failure, and then it leads up one to another. Not being satisfied with, with what we call, (2:50). with life in the dimension of emotion. Which triggers by the physicality. It could be a word, which we like. Not having, it usually comes from shortage or loss << audio breaks >>.

It's very easy to process with the new technology. Very easy. And you have to feel what it is and how you can reach to add to the strength of it.

Any other question?

Q: ... Good morning, thank you very much. I would like to make this question to Professor Keshe. How to make a water Gans for world peace? << audio breaks >>. How to make a water Gans for world peace ?? spray to president Biden and Pentagon to gain peace with Russia? (2:52). Thank you.

R: You mean spray, not spry, I think.

Q: Spray, right.

K- Can you repeat Rick?

R: Well he put the question in the chat here, "how to do a water Gans for world peace to spray to president Biden to gain peace?" How do we spray President Biden and for all of the peace on the planet? Maybe, you know...

K- The thing is, he's just a "puppet," as we call it. You have to spray it over those who are the instigator of it. The people who make money out of war. You can wash it with a Gans water of peace ... It's impossibilities, because these people are just a voice box, especially in United States, for the people who pay them to be there. You got to reach the Soul of these people, not the water to wash them. See he's Italian, he still thinks of baptizing. And these people cannot, (2:54). or it is of the Christian mentality, we cannot, these people have to be elevated through the Soul.

Any other question?

K- ... Can we finish in about 15 minutes please?

R: Sure.

Q: Just to give you a proposal, to make a proposal, regarding our television, could be in a pod cast manner? What do you think? Because I am always thinking about our project. And I feel not so well because we didn't achieve yet to do this. And I am just thinking to solutions. Thank you. It's easier way to teach...

K- I don't understand what solution you're trying to find for what?

Q: For television. Television by pod cast.

K- The television .. and the rest of it, it does not work if they don't allow you to spread the knowledge. Or with the pod cast. This is one of the biggest problems which needs to be solved in different ways. I think in next few months you will see Keshe Foundation becomes fashionable. And all televisions and all the stations would like to speak about the technology in one way or another. We are reaching that point. We'll become our scientific work, (2:56). our peace work, our Soul work, will become very fashionable. And that's the time when we should ?? not lose track. And we need to reach masses and not a few. You got to remember, television and pod cast nowadays don't carry that much weight, not many people spend watching. The only majority of the old people watch television, television has become a thing of the past. The young generation does not have much time to sit in front of the TV, unless it's a beautiful football game, or another match or something.

The science of new communication has changed. And we have to reach those through the new sciences, new ways of communication. And it needs to be done by governments, that they have to, they can stand the, what you call, the abuses of the power of organizations.

Any other question?

We'll close in... after this question we can... ??

Q: Mr. Keshe, it's Dean here, may I ask a quick question Mr. Keshe?

K- It's been three hours now. Yes, yes, go ahead.

Q: Thank you Mr. Keshe. So you'd mentioned something very, very important just then. How do we reach the Soul of somebody to elevate them, who is creating a condition that's affecting many others, that we do not know who the Soul is, that's doing this. How would we reach that Soul, to be able to bring peace to their emotions?

K- Reach the Soul of the others, that they know how to reach. Find a friend who's got the telephone number, but in the Soul level. (2:58).

Q: Okay, thank you Mr. Keshe.

K- Many of you, many of you reached the elevation of Soul of the world leaders. And it has worked, you will see it.

Q: You just said that the world leaders are not the ones, it's there's others behind this. So, it's reaching the Soul of the... the seed...

K- You reach them, they got to... listen. If you reach them, if you reach the Soul of the world leaders, they already got to become world leaders by reaching, or being in reach of those Souls who reached them, their abusers, or the power players ?? If you understand what I'm talking about.

Q: I think partly Mr. Keshe, thank you.

K- Through the Soul ,we brought them to that point. It's the easiest way.

Thank you very much for today. I have to leave. It's over 3 hours. And we try to be very, very, what you call, upfront and open about the things. As usual, Keshe Foundation has been and we keep to that manner. But we don't expect, but we were working on a massive changes for the Keshe Foundation. Those who are close to us and work with us are aware of it, and we will not stop till that point reaches. And that needs a lot of support from a lot of you. You supported us financially and we worked very hard to bring things in past 10 years, 15 years, you've been there with us. Now we need the support of the Soul because then we have reached what we came here for, to bring the change. (3:00). And in past couple of weeks we see huge hope for that change to come. And we hope our hope becomes reality in a very short time. Thank you very much for today. Thank you very much Rick.

R: One last question Mr. Keshe. Do the sessions tomorrow start at, there's people are asking, do the sessions tomorrow start at 12 noon like previous?

K- At 12 ...

R: Sorry, you broke up there. Sorry, we can't hear you Mr. Keshe. He's gone totally. I think he was about to say 12 noon. And he's just cut out, I think things are happening there. Okay, I believe that's what it is.

494 KSW July 13, 2023

END
