

496th Knowledge Seekers Workshop July 27, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:24).

K- Yes, thank you very much, as usual good morning, good day to you, and whenever and wherever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back and as usual we hope we share knowledge and we learn from each other some more knowledge of Creation and what we are up to as humans.

As usual we make you a couple of announcements that we keep ourselves up to date. The Keshe Foundation conference or what we call, the meeting of the August 28th, which will take place in Manchester. Is what is upcoming to us. And then we follow the meeting of the change of the date from October to November, 6th to 10th of November in London, and then 11th and 12th, the ambassadorial meeting and the weekend conference in London. We expect diplomats of a high caliber and from major nations to join. And invitations have already gone to a number of countries, and we're sure that they will attend. The purpose of the London meeting is introduction of new technology (T) in space, and bringing forward the next step in space development. (:26).

As usual, we keep our work to what it is and what's going on. And as we announced, the Keshe Foundation Wellness, what we call, Centers, has already gone into operation as of last week. And we'll see where we take it, and where it's going to go. And it's not in the hand of the Keshe Foundation, now it's in the hand of the doctors, and they will take it a step further. And hopefully soon we open operation in other countries the same.

Many of you ask questions and raise questions about the Keshe Foundation and our position with China, that we needed to be clarified. Keshe Foundation has become a joint collaboration, organization for a spread of the technology with the Chinese, what we call, nation and the government. We have become and very soon, the titles of the Keshe Foundation companies will switch over to the, and in the hand of the Chinese government authorities, in a way, of the partnership. In a way, Keshe Foundation will become China Keshe Organization Corporation. This allows us to spread the knowledge very fast, very rapid. The strength which come with the power of the Chinese government, financially strengthened, politically to spread the knowledge and technology, is beyond the imagination of many, many nations.

We've been lucky, thanks to most of your work, from all of you and the Chinese group. Keshe Foundation has, officially is becoming, what we call, a Chinese collaboration organization. We are the provider of technology. The rest of it, will come with the support of different aspects, sections of the Chinese government and different

organizations. (:28). We have been around ??, we tried to bring the technology to open, and in next 10 years we have a commitment with, from us, with the Chinese, to spread the knowledge as fast as possible.

And this will take shape in a different way. At the beginning it will be slow, but as it builds up in next 2, 3 or 4 or 5 years, you will see, massive changes in the Keshe Foundation operation and organization, and the spread of the technology. Does not matter if it carries the Keshe Foundation name or not, but if the knowledge creates peace, brings prosperity, and change the life of the humanity, that's what we came here for. And, we are not there to change, we are not there to... change in a way, next time, next change. And this is what it is, we stay the same, we stay the human race, we stay peaceful people. We will not change by the name of the religion, creed and whatever, we become one race, and opens up the door for us.

In our collaboration with the Chinese government we foresee colonization of the space in the next 2 to 5 years. All my effort goes to back, step by step. You have to understand, just becoming part of a partnership or connection. And establishing a line with the Chinese, does not make it easy. It's harder than, and harder than when we're operating on our own. The reason for it is, we have to prove every step of the technology, to scientists of Chinese government. We have to, step by step, go forward, expand, explain, show, demonstrate the correctness of the technology. And then find a way for the Chinese to commercialize it or whatever it is.

We are extremely highly involved in what we call, space and defense technology in the space. We don't create the defense technology for us, for Americans, or the Chinese. We create a defense technology in space, man can protect himself, (:30). defend his Soul. Defend the interaction of the fields of the universe (U) with his Soul. If you listen to the two intros, was very, very interesting. The first intro was totally about the physical life. What we do, what we've done, MaGravs, Gans's and everything else. And the Intro number two was about the Soul of the Man (STM). And both are covered within the teaching and education of the Keshe Foundation. Depends on the Man, if he wants to go with Soul of the Physicality (STP), or man wants to go physically. And this is where we bring a change, where we diversify.

We'll see many parallel technologies and sciences become, because the enlightenment comes through the STM, and not through the knowledge, Internet, and the rest. Some people receive the knowledge as Keshe Foundation Knowledge Seekers (KS), some others receive the knowledge, as I said, through the Soul. They no need to be from this planet, they are from other dimensions (D), but the message has become known how and the way to do.

In the coming weeks and months, we will see a radical change, even in our teachings, in our presentation of the teachings. And what is beautiful with is, we can still teach, where a lot of, a lot of other organizations have hit the firewall of Chinese teaching, Chinese system. We teach from China, we teach deep inside China, we teach with the Chinese, we work with the Chinese, and Chinese allow, that the teaching of the Keshe Foundation to

spread from China. Very soon you will see different kind of teachings. Very soon, part of the Keshe Foundation knowledge will become part of the public knowledge. And this is thanks to many of you which has brought us to here.

But, what's next for us as Knowledge Seekers? What is the next to learn, to be there? (:32). To, in a way, be ready for the change. We are... we have decided to travel with the STM. We have decided to travel on a energy level, than the physical matter level. There are a number of questions, which I've raised this before, from Knowledge Seekers. And, it's nice for you to understand what it means, what it entails, and what is, what is to come, what it'll bring to us.

On Earth, many of us have witnessed the ?? Sun barrier. When the speed reach the point that the molecule, the structures compresses, and we see what we call, the Sun. As Einstein has put in our head, the speed of light to be the ultimate, which is 100% wrong, what is going to be the light barrier for the man? Is there such a thing as a light barrier? Or is it, in a way, going from one strength to another, will meet a barrier? Because the light is in every dimension of the field strength. What would be the effect of it, on the STM? What will be this transition, for man to learn to go to a higher order, or to go to a lower order?

When we get enlightened, we go through understanding of a higher order. Does that enlightenment means going through the light barrier? Going through a higher order to see more? Or do we come to the point that in transition, we find new dimension? (:34). How do we handle it? How does man goes from one strength to another? In the physical life, when you get enlightened, you'll feel it physically. Because your emotion changes. Your understanding changes. And then you say, "I understood."

What happened to us when we go from one field strength to a higher? By chance, by elevation, by receiving more in the process of giving, we connect to a higher order. Do we go through that light barrier? Or do we go through a Soul barrier? That the Soul needs to be enlightened. And does this need to be without the dimension of physicality (P)? Or does it happen when we are in a physical dimension?

Then it comes the fact that, do we need to die? Do we need to change the physical dimension of life, to receive the enlightenment, to receive the knowledge? And does it matter us, as a physical body of the man, feel the change? Do we go through the Soul barrier, and we feel it, and we come out of the other side with more knowledge of the Creation? Or do we, as we become traveler of the space, travel like everybody else in one dimension of the Soul level?

Then it comes for mankind to understand in space, as you have physical dimension changes, you have Soul dimension changes, where those who are enlightened, enlighten those who are less enlightened. (:36). And then what happened to those who reach the ultimate enlightenment? In a way they become part of the Creation and the Creator.

In the coming time, in the teachings, we start to explain this, especially in the upcoming sessions in Manchester, London and Beijing, for those who attend, the enlightenment. The ultimate goal, to reach the point where the dimension of physicality does not need jet planes. As a few of those who participate in Manchester sessions wrote, do we fly in with a plane, or the Foundation will transport us or transmute us with our Soul? Have you enlightened yourself to do that yourself?

Unfortunately, in the world of Creation, there are no travel agencies that you can buy a ticket of Soul. It's you who has to achieve, has to reach the dimension, that you buy the ticket for yourself to the next level.

When the man loses the fear of what we call, death, ?? at hand. The biggest barrier for most of the Knowledge Seekers, most of humanity, has been the fear of separation of the STM from the dimension of physicality of the man, for the man up to now considered the Soul to be somewhere.

Now it comes to the point for most of you Knowledge Seekers, to ask yourself one question. Would you attend the conference in Manchester, in London, or in Beijing and appear in the dimension of the physicality through your Soul. Or, as usual, like rest of us humans, (:38). you buy a ticket, wait in the airport, and appear with a suitcase on the other end.

Now it comes to the point that in upcoming teachings, in upcoming conferences and sessions in Manchester, in London, and in Beijing, we start training you to start understanding the process of the change. Transmutation. Because it cannot be done in an aircraft, it cannot be taught in a way that one does not understand, does not feel, does not see the expansion of the STM. And in the upcoming sessions, we try to bring the dimension of the Soul of those who participate, to understand another way of living.

We are not a religious organization, we are a scientific organization. And scientifically we show you, the way scientifically you go to NASA and you become part of astronaut and you go through all these years of training and maybe one out of twenty will be qualified to fly. With our teaching everyone has to qualify. To be able to travel in the dimension of the STM. To be able to travel without wings, to be able to travel without going to the airports. Unfortunately, there is no landing strips on Moon, Americans haven't gone there yet to do it for us, and there is no landing strip on the Mars and the rest of it. You come in and you literally land in. Would you like the legs down or would you like to land on your head?

So you understand, goes back to the same position, as I always said, "you're the last man standing for your Soul." Nobody else does. Everybody else is busy with their own Soul. And now you have to learn, you have no choice. (:40). In a way, as it becomes more fashionable and more people go to Mars and Moon and come back and tell you everything else, and you say, "is it really?" Because, you have not reached the process to understanding of the elevation of your own Soul. The connection, the loss of the fear of the physicality not be there, till you get there, and it's actually there, and you enjoy the

presence of your own physicality. Even though you might have 20 legs and 4 heads, because, you have to directionally find which way you're going to land and how you're going to hold these 4 heads together again, with twenty arms and so many legs.

Or, would it be in dimension of plasma, and you'll never physically manifest yourself? In the upcoming sessions, especially in Manchester, and then in London. When you come and when you go through the sessions, through to the, what we call, meeting with the ambassadors, many of you will enlighten the world leaders, the ambassadors. Not even talking a word with them. You become masters in understanding. We just guide you, we just show you the way. It's you, who has to reach that point, not us. Nobody will come to pass exams or achieve something. Everybody comes in to find themselves, in the dimension of the Soul, in the dimension of the field strength of their own transmutation and transportation.

In a way, those of you who attend the Manchester session, and those of you then, with the others join the London session, and those of you then, gather together in Beijing, sometime in December hopefully, then you should be able to be the travelers of the Universe through your own Soul. (:42).

We have not built you any airports, even though Beijing has just opened up their own beautiful South Beijing airport. As we have no helicopter pads on the roof that you can go from there to take off. You take off within your own clothes, you departure with your own strength, you understand the expansion of the STM. And then, you'll find out, by your enlightenment, how many more will be enlightened. And the doors ??, what I call, to bring the change, gradually opens up. But, as I said, there is 8 billion.

<< audio of Mr. Keshe breaks >>

R: Hello Mr. Keshe, we lost your voice.

K- Can you hear me now?

R: Yes, yes we can hear you now.

K- We are in a position that you might lose us a few times, but it's okay. Apparently all our, what we call, VPNs and everything is in a big mess in the past 24 hours, we don't know. We know the reason, but it will be sorted. It's not our problem, it's an international problem.

In a way, in a coming time, in a way, in the next few months, as we push to the dimension of the both, travel with the Soul and travel with the dimension of physicality, we will help the nations to achieve what most of them want to see, physical transportation. And then, when we achieve these rapid fields ?? of transportation, we add the transmutation next to it. That it means, you can go, (:44). but there is a home there. We have already colonized the Moon. You don't need to wait and go in four days or four hours, you are there and you still see some more humans, could be cousins or could be somebody from another part of this planet.

As I said to our Chinese counterparts, colonization of the space is the responsibility of the Chinese nation. Because, it'll become place of peace, it becomes where most of people would try to achieve balance in both the physicality and emotion. The collaboration of the physicality, the STP, and the STM, is the responsibility of individuals and not governments. You cannot elevate the STM by borrowing money from the government, and you cannot elevate the physicality of the man by feeding it whatever a government gives you. It becomes your responsibility.

And in the process of next few weeks and months, we go in that direction. As I said, we'll talk a lot, we'll teach you a lot. And gradually, as there are no universities, and there are no education centers, to show you the elevation of your Soul, you'll become your own teachers. The new messengers. You'll receive the message by enlightenment of your Soul, and then you test it, through the dimension of physicality, through the dimension of the, your own interaction of the fields.

In sessions, upcoming sessions, we'll teach you how to expand the Soul. We'll teach you how to feel the expansion. And we teach you how you are in control of everything, in every dimension. And then, if your thoughts, from what we call, (:46). Manchester conference, to the London conference expands in dimension, you'll be able to enlighten the politicians, the diplomats, and those who attend the London conference on the 11th and the 12th.

You have got to remember, we are inviting many, many, many nations, and we're inviting world leaders this time. As you know, as I said, we had to change the conference from October to November, due to the, what we call, the conference in Macau. As the presentation of the health of the new science and technologies, hundreds of world scientists and health people will attend, will be inaugurated by his Eminence the President Xi of China. And Keshe Foundation is on the panelist of this conference. And for that reason, you will see, we can enlighten the world leaders, even during that time.

Many, many eminent scientists will turn up in this conference, and be a panelist guests of the conference. Through that conference we enlighten the world leaders, we enlighten, the, what we call, the scientists of the world, to understand about the creation of the man. And how the knowledge will come to sit, will come to change, will bring that change to all of us.

We are sitting here, at the verge of the change for humanity. And many of us are lucky enough, that we are not waiting for that "Methi." We are not waiting for that "Messenger." We are not waiting to change something to become. We are looking inwards, to bring the change ourselves to ourselves, without a change.

I was talking to one of our Knowledge Seekers very recently. (:48). I was in talk with Iranian officials, religious leaders. And I said to them, the discussion came about politics and religion. And I said to these religious people and politicians and whatever, I said, "I'm Iranian. And then, believe in Islam." Your problem is, you become first Muslim and then Iranians. And that's where you have to change, and I don't have to. I stay loyal to my

roots, because, we are still believing in Muhammad, waiting for Methi. And when he comes, what are you going to call yourself? You're not a Muslim anymore. So, you have to change again. But, if you stay true to your nation, no religion can change you. Because you still believe in the principle of the truth. And this is how you stand.

If we go from this planet, we ?? bring the truth, the ethos of this planet. The ethos of Mitra. We don't do wrong. We don't do, we don't talk wrong. And even our actions, our talk, thinking, everything is one to elevate the others. We don't need to change just because a new religion comes, or we are waiting for that change to come. And what would be the name of all these Muslims when they come? Do they become Muslim Muhammad? Or do they become Muslim Methi? Or we forget about it. And what is all this war and conflict in the name of religions, where they're all waiting for that Methi? What are they going to call themselves? Christian Methi? And then Buddhist Methi? And Jewish Methi? And then, or we all believe in the totality of the change. (:50).

You can see, man, when he carries the truth within himself, does not need no Methi. But he is the Methi of himself. He is the savior of elevation of his own Soul. He understands where he wants to be. And this is the criterion of what I call, to become the "passengers of the universe." You cannot become passenger of the universe when you're always relying on a pilot. You're always relying on somebody to give you, somebody to guide you. Where you guide yourself, where you learn to tap into the universal knowledge, then there is no change of religion, you're always from planet Earth. Does not matter where you land, nobody can prophesize, and nobody tells you what is right and what is wrong, because there is no intermediary between the STM and the STP of the man, and the man in himself.

If you think of it, we always talked about emotion. Physicality is part of Mitra, when it says, "you don't do anything wrong. Do good, in the dimension of it." Do good, means the physical life." Think good, which comes from the Soul. And then you understand, the three Ethos of Mitra, is the Ethos of the Soul, STP and the physicality (P) and nothing else. It's the religion of the universe, it's the religion of the Creator. And nobody can come between you and the Creator.

Now, I'm still waiting for the Iranian politicians, who are Muslims and the diplomats, to answer me, which one they are? Are they Muslim Iranians? (:52). Or are we Iranians who accept Islam and then when the next comes we believe in a path, we see what it is. We don't change religion, we stay true to ourselves. And it's the same for all of you. As you become passenger of the universe, you stay human based, human race and with it you live through the "Ethos of Mitra." There is no religion, but the principle of living in the universe. One is for your Soul, one is for your STP, and one is for your P at the point of manifestation.

So, we have to come to understand, how what we choose, in the things we choose, we become to believe in, to live in, because of the power of our Soul and nothing else. This is the beauty, why you understand we chose China? Because there is no religion based fanaticism here to be, to create war. Chinese don't fight and create war to expand

Buddhism or Taoism. They don't have what is in Vatican to have more followers, as they contain in what they have and they stay in what they keep. The nation is balanced.

So, with new understanding and the new knowledge, we bring that elevation too. And that elevation sits with all of you, with all you Knowledge Seekers. Is not how you make things, is how you make things out of what you have, through your Soul. Any of you, in the next few months, in the next few years, will be able to put his hands out and create what you need, if you understand. (:54). It's not the first time, I tell you. Now that the knowledge has expanded, you understood more, you can do. Go back to the teachings of the past, I said, "you can put your hand out, and between two hands you can create light, which the interaction of that light, and the light of the STM, can create anything."

So in a way, the knowledge, the creation of the knowledge, the expansion of the knowledge, the understanding of the knowledge, becomes the knowledge of the universe. It becomes what we want to carry with us as human race in the depth of the universe. Does not matter we fly, using UFO, we go to the Americans, we go with the rocket, or we travel with the dimension of our Soul. At the end of it, we have to manifest somewhere to confirm our existence. And wherever, in whatever shape and dimension, we manifest ourselves, we have no choice but to live by the Ethos of Mitra, in all three dimensions of the life, in all three dimensions of existence.

And then you come to understand one point. Your Soul is a live thing, it's a live entity. Your STP is a live entity. Your P is a live entity. And the interaction of the three has to be in balance, for it to find its best position and its elevation in all realms of the Creation by itself. And no prophets, no religion can tell you so.

As I said many times, I've traveled the span of the universe, except on Earth, I have seen no churches. I've traveled every corner of this universe, I've never seen a mosque. (:56). And I've traveled in all dimensions, I have not seen a synagogue, let alone rabbi. Every man, every creation you meet in the universe, is a prophet himself. Because, he believes and lives in the dimension of the correct conduct of the Soul, the STP and the P of the man. Now you understand, where we are taking you into.

You can still go with the balloons, be what I call, ?? you just do it because it's your great grandfather, the balloon ?? runner. Or, somebody did a flight with a rocket. But at the end of it, if you want to travel and have the freedom, you have to travel with your Soul. And, while we're under there, sooner or later, if not you, your grandchild or your great grandchild, will learn to do it. Why do you need ?? when you can do it yourself? Then when it comes to them, you can teach them already in what to do.

The totality of the teaching, the totality of the way we are going. Even though, as I said, when you're alive you have to keep yourself busy, otherwise you're just a stone. Sit there and wait, till the wave and the rain comes and gradually, even the stone cracks to pieces and become a dust. But, we have to do things. We keep ourselves busy, we show you Energy Unit, we do a bit of teaching and run around and do some other things. All of you, you do your own best to be physically alive. But, when do we start the separation,

between the STM, and the dimension of P of the man? (:58). And then maybe you find peace, and maybe you become passenger of the universe. And maybe, we don't need someone to share knowledge with you, as you become the share of knowledge yourselves. Sharing knowledge with others of the universe, where you can tell where you've been, or what you've seen.

Then, as I said, if you remember, in the very beginning, we invited your Knowledge Seekers to the Linz Center. Whatever you say, we believe, because it's your Soul does the travel, and not your P. You captured the Soul inside your physical body, for decades. We brought you to Linz, we freed the Soul, and we kept your P captured within the system. And then, if the Soul believed what you did in your P, you have to believe the Soul, while the P was encapsulated within the system, in the magnetic fields of itself.

Now you know what we done with you, in the Universal Systems. And now you understand more, as the time comes, the new systems, we bring and show, and the technologies and the knowledge we share, is literally, we have given you all the dimensions. The space reactors, exactly 15 years ago. In 2008, about this time, through Sharif Tehran University Laboratory. So, we finished this physical teaching, physical flight and everything else, in 2008, or we started it. And then, now, in past few years, as we finish with the flight, we start covering the other things which you need, in your physical life heating, electricity, energy, food, medicine and everything else.

You cannot fly a man and leave him in space and say, "goodbye, we flew you." (1:00). You have to teach him the rest of it. And it's taken us another 15 years to teach you the rest of the things, how to fly physically, and what you need, and that's what it is. You just can't fly, you have to have the food and everything else to enjoy. Otherwise, it's a dead end, it's literally dead, because it's the end. You didn't take food with you, you didn't take medicine with you, and sorry, physicality needs these things to survive in the space.

And now, we have brought you the dimension of the energy, transformation, transmutation. And then we expand it, for you to understand, you are responsible for the elevation and nobody else, but you have to understand how you elevate your Soul. How you manage to switch in the dimension of energy, and switch back and gain in the trust. In a way, if you look at it, I'm that driver, teacher, sitting next to you in the car. I still control a bit of a pedal and a bit of the steering, but you are sitting in the main seat. If you do wrong or take a wrong turning, or break and not break something over, which is your own Soul, your physicality, I teach you which clutch and which gear box you need to be in. The rest is you, who teaches you how to become a driver. But this time, you drive your Soul. This time it's not a car, it's you in the dimension of fields of your own creation.

We go for a break and we come back, and we try to see if any of you Knowledge Seekers really understood, or we heard for this and that and other things, which it ?? might come to your, what we call, knowledge, that you want to share. Thank you very much Rick. If you want to take the usual break, tunes, we are here to listen and then we come back to answer any questions. (1:02).

<< **BREAK** >> 496 KSW July 7, 2023 (1:07).

K- As usual, no I'm not ready for next question. But let's see what we have to answer.
Can you hear me?

R: Sorry, I missed part of that, could you say again?

K- I said, we are ready to answer any questions, if there are any.
(1:08).

Q: ... Is there such a thing as a taxi in the universe, where we can travel as a group?

K- They call it UFO, don't they? That's the what we call, Universe Taxi System, we call it, the UFO.

If you still want to travel. Go back to few years, quite a few years ago, teaching. In one of the teachings I explained, the time will come, maybe the time is today, if you understand it, the time has come. That we trust our Souls to one captain. That that captain will deliver us, our Soul in a given point, and then we take the shape of the place and time. And there are those who do this. This was explained in the very early teachings there, 100, maybe 200 (KSW), somewhere down there. That now you see, after maybe 6, 7 years from that time, you're back to the same point.

The time will come that you don't see the strength of yourself to go to higher elevation. But there are those, you call them taxi drivers, or I'll call them Soul elevators, who can take you across. And if you call them a Soul Taxis, I presume they are. (1:10). And this is something we brought into teaching years and years ago. And now that you understand the totality of the knowledge, you can understand how it's possible that in a way, you expand your Soul within the structure of another Soul. And then you release it where you want.

If you look at it as I explained in the Enhancement Units (EU) when you came to Italy, is in a way a version of that, where the Soul of the system took many of your Souls with it and is still there. Maybe you paid a visit last June or last July, but you still got the trace back there. You can connect back into it. In a way, you jump in off and ?? unlock the taxi, which you just got off once, and you met some others. And that kind of taxi ride exists.

But in time, when man understands, as I said, there's a lot of teachings still to come, where you not use, but you collaborate, to become part of another Soul, a group of Souls, who go through that leap of faith of the elevation of the Soul. And the totality of those who take that leap, will elevate together. That needs a lot of understanding and a lot of trust and similar emotions to do that kind of taxi ride, as I call it. But, we spoke about this in sessions long, long time ago. Now we speak about the Soul, we see it how it comes to be in reality. It's again, building a block until one day you see how the block takes shape.

Any other question? (1:12).

R: Thank you. I think you mentioned one time that often it's a group of four that travels together as well. Is there any particular reason for that group of four idea?

K- It's part of the Star Formation (SF). It's part. Usually, you don't get a balance in everything, in all. And by recognition of the fields, you always on, you find one which is short in one, maybe higher than the others, where it becomes the receiver, and the others feed it while they are feeding each other. It's a part of the SF, but you don't need to be in that formation of one on top. They could all be on the same level, but still feed one. And that allows the progressive development. That allows the creation of motion. That allows interaction of the fields from outside the circle into what I call, the outside of or in.

But in essence is, I was setting up a system in the past couple of days. And I was looking at it, I said, I wish Knowledge Seekers understand how this thing works on the star formation in the dimension of the Soul. I still sometimes get a chance to do some work and research. And it was amazing feeling to see how everything is connected, if you understand it. When you set the system, everything connected to, with each other, with all the knowledge's together. (1:14). That when you develop something new, is a new dimension, new knowledge. As it's a collection of all the past knowledge's. And the star formation is one of the main ways of transportation of the Souls. You will learn gradually. Slowly you'll come to it.

Q: ... Do we have in London 11 and 12th this conference, or in Beijing, because I have an interruption of electricity, and I was not able to hear properly, and when...

K- 28th of August till the 1st of September, we're in Manchester. From the 6th of November till the 10th of November, the group moves to London. And then on the 11th and 12th, which is a weekend session, will include those who come from the five day session before as one integrated conference. And then on the evening of the 11th, around about 7 o'clock, we'll go into a session with world ambassadors, diplomats and politicians, and showing of the new technology. (1:16).

Q: Thank you very much. In the same day is the conference of peace, two days, in Paris. Maybe you know.

K- In where?

Q: In Paris.

K- No.

Q: 11th and 12th November, day of link with Bahá'u'lláh, you know.

K- We are not aware of such a thing. Then we move in December into the most beautiful capitals of the world in Beijing. And we might have surprises for those who come to Beijing session. A number of people have started moving and shifting the attending of these conferences. They were coming to come to Manchester. Now they want to shift it to London, and then maybe shift it to Beijing. We allow you to shift as much as you like. Those of you who paid for Manchester, you are already eligible for London and Beijing. You don't need to pay again. Those of you who pay for London, if you become part of the 65, you become eligible for the meeting in Beijing. In a way, the Beijing conference is, you cannot buy yourself in. You come in from the other two conferences. You cannot register for Beijing conference. It's impossibility. We will not allow it, because there is a reason for it. And we expect very, very interesting session in Beijing. You'll come to understand how and why. So once you attended London and Manchester, and if you become part of that 25, 65, you come to Beijing, then it's just you have to organize in all three cases, the hotels and transportation and the rest of it. By moving, (1:18). because a few people have moved themselves from Manchester now to London, and some people want to move to Beijing. It's all the same, because once you register for Manchester session, London and Beijing are included. Once you register from London, you are already automatically become part of ?? in Beijing session anyway. And Beijing session cannot be bought. No one can buy to be in Beijing session. And those who come to that point, they will understand. But you still have to register, if you are from the first two sessions, that you want to be in Beijing at the same time too.

Any other question?

Q: ... How could my Soul, who knew about this extraordinary Foundation only three months ago, be working assiduously alongside Keshe Foundation immediately after my passing? ... How will others who will not have known about the Keshe Foundation before their passing, have their Souls rescued to work alongside the Keshe Foundation?

K- We are not a religious organization. If you haven't heard from us through the physical dimension, your Soul has already heard and maybe part of your work comes after time. To serve the universe. We are just a name on this page of paper. Nothing else. (1:20). If you haven't heard about the Keshe Foundation, you're going to go to hell and all that, it's all nonsense of it. When we teach, even if you haven't heard about us, your Soul has heard. Because we teach freely for the man to be free. And doesn't need a word or language. So in a way, we're all, heard or unheard, we are part of that cycle of evolution and revolution and elevation of the Soul by knowledge. We are not sending teachers on the road to go and teach and convert. You hear when the Soul is ready about it and when the time is made ready for it. We will hear from where we sit, from what we see, from what we have signed ourselves to.

If everything goes according to what is to be done, there'll be no one on this planet, no living creatures which will not be touched by the knowledge we brought. Heard or

unheard about the Keshe Foundation. Be it the fish, be it the bird, be it the man, be it the beast, be the tree and the shrub. Because the knowledge we are bringing in, the knowledge now is getting implemented. The knowledge is getting spread in a way by changing the atmosphere, in a way by bringing a new dimension to growing vegetation, expanding the food, changing the condition of life, travel, energy, and everything else. You cannot, not be touched by it, because everything is plasma.

So in a way, even if you produce a MaGrav with some Gans's in it, in center of Tehran, you're still connect it, elevated the rest of the humanity and creatures because they go through the same process. (1:22). So it's not those times. If you don't, if you haven't heard, it's going to be the end of what's going to happen to them. They're going to go to hell, as is the belief of the Muslims and the Jews, and both run the same ?? horses, and the same horses are gathering more money and power. There is no such a thing. When we taught 10 weeks ago, of 10 years ago, our voice of knowledge is heard by the Soul of every creature. Because it's given unconditionally.

I was with some officials in the past few months. There's not a day we cannot, what I call, escape from these kind of meetings and interactions for these people. And today, in the discussion, I was with a Knowledge Seekers and said, you know what the guy asked, who's paying for Mr. Keshe? Has Mr. Keshe been ?? paid? And I said, no. But I said inside myself, "I've already been paid, I created that knowledge that a lot can be enjoying the peace." I received my payment, and somehow life will go on.

Most probably, if the things go the way it goes, we'll become part of the structure that we can influence the change. And somebody told me, "Mr. Bill Gates and what's his name, Saris or whatever, have got together to reduce the population to half a billion, because they have said (there are) too many." I said, "they're so stupid, even at 8 billion we are not enough, when we are planning to colonize the rest of the universe, and spread our Soul and physicality, and take our physicality, where our Soul is there, or has been of our ancestors." (1:24). How can these people contemplate on killing or limiting the numbers, when there is so much to be gained?

It's just... in a way, I explained to one of our Knowledge Seekers, our teaching, our spread of knowledge, it's that last water, where you give to harvest, before you harvest, that it comes out perfect when you harvest it. And now, these teachings are the "last waters of knowledge," which we give to the Soul of the created on this planet, before the beauty of the STM is harvested by the universe. How can you decide, and how can you change things, where is in a way the harvest time? How can you contemplate on destroying 90% of what has been cultivated to be harvested, to bring peace, to bring prosperity to the rest of the universe? This Gate is so ignorant, that his ignorance has brought him back to where he was. He stole when he was in the garage, and now he ... still thinks he can steal, steal from the palaces of faking ?? . Eight billion is not enough. And in a way, eight billion elevated Souls is not enough to spread the love of the Creator in the universe. << audio cut >> he said ?? killing, (not) knowing what's the purpose of ??.

<< audio cut here on Youtube Recording, but in Elias recording this was what Mr. Keshe said: their following paragraph >>

It's a dust. But it's that little seed that it grows to become and the harvest across the universe. So, we wait and see. But now we're getting closer to the harvest time. How it's in the way elevation of the STM, to become passengers of universe. The correct way, without killing, knowing what is the purpose of living life.

Any other question?

Q: ... Yes, good afternoon Mr. Keshe. (1:26). My question is with the Manchester meeting, When people register for this, if I'm not mistaken, was 10,000 dollars for this.

K- It's 10,000 Euros.

Q: Euro. And then when people pay that, automatically they enroll in the two days conference in London after the second week in London?

K- Yes. That's included in that part here, because it's part of the same thing. Plus the 200 group session, the week just prior.

Q: So if somebody paid 2,000, they just have to pay 8,000 more to be in all of it.

K- Yeah, Manchester. The most beautiful part will be in London. London will be a pivotal point. It's in our plan to invite his Excellency, President Xi of China, to join us in London, or a member of Chinese government. As we attend the sessions and collaborate deeply with the Chinese, we expect to see the Chinese support for the peace work of the Keshe Foundation equally, mutually. And we've been told there'll be, something will be done. And it's the same with the Iranian government. We'll show the strength of peace through knowledge in London. And that's where what we call, colonization of the universe starts, where English colonized the rest of the world for centuries. But this time, we don't go to bring a slave. We are going there to be a slave, to bring peace to the rest ?? our knowledge.

Q: Mr. Keshe, I'm a little bit puzzled because you see...

K- You're always puzzled. I've got used to you being puzzled. (1:28).

Q: So, now maybe you get me out of this dilemma. You see, we came to this planet and God created us in His image, but then when we started, we totally didn't know who we are. Then He decided to send the prophet Moses, and then Jesus, and then Muhammad, and the rest. And then instead of learning who we are, we made more statues, added more to this by making temples, churches, mosque, and making huge mess out of ourselves. We got ourselves more deeper in the ground. So now with all these governments around the world with so long, for centuries, We have people who are ruling us, not knowing who we are. And then we call them superpower, USA, now China, Russia. And then once in a while, they come, they bring the tanks, the bullets, the missiles, and show off what they have, soldiers. And then if you look at it, when you go to Iran, you have to deal with VPN. There's no internet access. You have to do this, that. What makes you so sure, collaborating with Chinese government, you're there right now, that we have to use VPN

to have access to this and that. Accessing the knowledge to them, they're not going to make more rules and regulations for us to have more control over the world, and now one superpower over again another one. Because you see, when I think about it...

K- ... Azar, .. I was with one of the high ranking Iranian diplomats very recently. And she said something very interesting to me. She said, (1:30). why don't you go back to Iran? We have set up everything for you to go back. Even the universities, that public don't know, are structured around your technology and knowledge. Why don't you go back? I said, as long as the women are not free in Iran, we have no freedom. She looked at me with eyes to the floor, even though she was dressed in Islamic clothes. I said, you're a high ranking diplomat, very high ranking diplomat. How can I go back to where there is freedom for only half of me?

But as I said, we don't trust nations that they will do. We have set the seed of changing the Soul of the leaders, and we are sure we'll achieve. It's a big difference in what I do in public, and what I do in private and what I do in the dimension of. If with all the funds and money built a big castle and God knows, and a new Keshe Foundation center, and temple and the rest of it, would have been the same as before. I still live like a nomad. I still travel from place to place, teaching just about technology and what that technology can do for peace. And I also... (1:32).

Q: .. Because the only thing came to my mind, because you said one time to me, you have a thousand hats. And I said, maybe you're playing one of your hat that I cannot see what's in it. So I trust you that you're doing the right thing. You are going to put us in a position where we're going to...

K- No, we still are, what you call it, 30% human physical life. And even if we make mistake, it's a good mistake. It's not bad. Because it didn't come with a bad intention and thoughts and emotion. We came with a good emotion. What looks wrong to us could be the seed for perfect things for the future. I lived a horrible life when I look at it for years. But I was happy to be there because it allowed a lot of things to take shape. But when I look at it, the joy, the happiness, the peace I have today, came because I lasted all those (years). I'm most probably one of the most joyful, comfortable, happy people, content, amongst all of you. Because I have found what I was looking for whole of my life, and with it has come peace for me. It didn't come from private jets and Rolls Royce's and God knows, some of you came to the homes and houses I lived. It meant nothing.

Now I live in a very, very simple, from hotel room to hotel room. And I found peace. And that peace allows me to create a condition of peace for the others and the world leaders. This is one of the, maybe, (1:34). best things ever happen into our lives. We don't see it when we are in it, but we are blessed to be in that position. No attachment. My attachment is not even to the suitcase I carry. Because when I fly, airlines have a habit of losing it. So, what is to be attached?

And we make mistakes, but the mistakes, and if you make it with a wish to serve, become success by it's own, you've seen it. You're part of that problem, which I created with us

trying to do the expansion by the Keshe Foundation, and the Soul of the human said, no, it has to come in a faster way. And now, look, six months later, we have signed one of the biggest ever contractual agreements with the most largest, powerful nation on Earth. One day, one day, Knowledge Seekers will know what we have signed into. And even the officials who were, leaked the knowledge of the contract, were shocked how such agreement has been reached by the Chinese. And we didn't ask for it. It was put on the table, given the condition we wanted for the Knowledge Seekers and the world peace, and it was signed into.

I could never imagine, six months ago, when I arrived in Beijing, All was set. It was just like Chinese were waiting for us to return after Corona. We got to understand, Chinese, what they call it, the Keshe Foundation technology, has written into the 14th and the 15th program of the Chinese nation. (1:36). A technology is written in the most powerful nation on this planet, in its national programs. We were told this 4 years ago, that your technology will be imprinted in the 14 and the 15, 5 year plan of the nation. Now it's written into it.

And, when I tell you, you'll hear, in next two or three years, you start seeing the emergence of the Keshe Foundation technology, as a Chinese Keshe collaboration structure, and then we'll spread around the world. I didn't do anything. We landed and within a week, the agreement was on the table. All the details ?? accepted in, arranged internally by them. We're just a tool to bring that implication of the spreading the knowledge across the nation and then across the world.

We will hear, very, very soon, how what turned out to be one of the biggest losses for the Foundation, turned out to be one of the biggest gains, for the whole of the Keshe Foundation worldwide. So, I make mistakes, but the Souls who conduct me to get that mistake done, is just, I understand why it happened now. I had many sleepless nights, why, how did I get to it. Now sitting in the most beautiful city of the world, in Beijing, and teaching you, sharing knowledge, I sit with a confidence that the technology to bring peace, has signed itself to the constitution of the nation, in work for next 10 years. And then we deliver, spread around the world.

We still work, we still work. (1:38). I just, one of the reasons teaching of today was delayed to 3 o'clock, is because we had sessions to actually show application of technology to some of the people who are influential, can bring that change, and how to be implemented worldwide. It wasn't just random, when we do this. We spend all the time possible in interacting to bring the change. But it takes time. It's not just we came and hullabaloo. It'll take another year for it to show itself. It takes another three, five years to bring the change gradually in the structure.

We have committed ourselves to make China self-sufficient food security within the next five years through technology. And maybe by 2030, one of the largest exporting food nations on this planet. The wheat is there, the land is there, is the technology and knowledge is there now, and the peaceful Nation is there. So, next maximum 5 years, China will become a bread basket. But, a "bread basket" of the food which is not GMO,

which is clean, no fertilizer, natural food, and changes the habit of the nation by eating it, and then with it, bring the other changes?

There is something, I was in a shop in Vienna a few weeks ago. And I was looking at products and, as usual, because my background comes from 20 years of being a retailer and wholesaler and other things of the world. And I was surprised myself saying it. When I touched the quality of the material in the shop in the West. And a guy said, there's something wrong. I said, I get a better quality than this in China. (1:40). Why should I buy this rubbish? The guy said, but it's Chinese good. I said, you know Chinese 20 years ago. You don't know Chinese today. I said, come with me. You'll see quality of the clothing in China, that in the West you dream about. Why should I buy and I pay four times more than I pay in China for, quality ten times better? And, this is what we, we have to understand.

This change will come across to all of us. And, the beauty of it is, in the implication of the technology with the Chinese, we always emphasize, other nations have to be involved. It's not just how we are here, we are comfortable. As I said in my agreement, Iran stays paramount to me. The land of Iran, the nation of Iran. Then China, and then all equal the rest of the World. So, it can't be prejudice towards one or the other. And this has to be the ethos of the Knowledge Seekers. You're Indian, you're Pakistani, you are Arab, you are Muslim, you are Christian, it's all blind. We have to be blind to it, because these are the mistakes of the past, the future. We know our Souls has no color, or race, or religion. We'll see.

Q: Thank you Mr. Keshe.

K- The world will know about all of your work, Azar, and many other Knowledge Seekers, in the coming time.

Any other question?

Q: ... He says, (1:42). he bought the MaGrav Power Plasma Generator a few years ago and he still waits patiently, But now that the Foundation Store will be closed in Europe and goes to China, what will happen to all the orders like this?

K- All will be kept. Keshe Foundation is a worldwide operation. And we'll keep to all our (contracts and agreements). Actually ... the... what is going to be done in China, it'll be more expensive than the ones we sold before. But all commitments, anybody who bought anything from us, will receive it when it's done and it's going through the Chinese. The quality of Chinese products will be much, much higher than even we could produce in the West.

The process of setting up the factories, the process of setting up the industrial, what you call it, centers, is all going through. We travel, we see the new, new, what you call it, industrial factory setups for the Keshe Foundation, and joint collaboration is getting done, so we travel to places, different locations, and it's all in progress. And everything will be

at the highest quality. When you buy something made in Keshe, what you call it, China, or wherever else, with the name of the Keshe Foundation on it, with the Chinese collaboration, you'll be proud, you're receiving one of the best.

Because everything is new, we are not going to start something, and we don't have to show profit to survive. Our finances of our companies, everything is guaranteed by Chinese central government. And the team we have will look after that the best is done. I brought Keshe Foundation to a position of strength, (1:44). with no "penny pinching." You will see it gradually, next year, two years, as it comes up, you'll see more.

We are not kicking back, because we came to China with the Europe, or the Americans, or South America. From here we strengthen you. You'll find more strength in Knowledge Seekers in Keshe Foundation. And most probably the distribution operation will become a massive scale jobs across, around, everywhere. We are not backed by "business man condition," we are backed by a nation to change the course. You will understand, gradually as it happens.

Any other question?

Q: ... What mental and emotional attitude and posture should we have to train the Soul transmutation with Gans and Keshe Foundation technology?

K- Are you short, are you tall? Is one ear like shorter than the other one? Do you limp? Are you blue eyes, black eyes? Are you black hair, blonde hair? Are you blind? There is no condition. You have... you... This is how the human race is. You have to find the essence of your own creation. Then nothing can happen, nothing matters. (1:46). Race, color, religion, physicality, is totally "skin deep." When you take a brown skin off, underneath is the red muscles, it's the same with the white man and the same with the yellow man. So we are all underneath the skin exactly the same. We don't have a pink meat, or yellow meat, we are all red, and we believe the same. So, when you ask such a question, the only answer is, is only you. You have to find that way.

Q: ... What is responsible for creating the Inertia field of an element at a point on Earth? And how does Keshe technology produce the Inertia Gans?

K- Oh, that's a secret, we will not reveal. That's a secret Keshe Foundation will not release, that's for sure. And it's in our possession. And we use it extensively in some of our work. We use it extensively.

R: So why would you not release it? What is the... is it because of proprietary information that you want to...

K- It's the "knowledge of God." Who's got propriety on it?

R: Well, that's usually the way it is, except for, you know, dangerous technologies or something that's beyond our comprehension. (1:48).

K- This is part of... This is, in the future, most probably, it will come out, how we do it. It's like that "Coca-Cola bottle." You know, that secret magic "thingy," the liquid? (At that time people didn't know caustic made Nano material). It's ... I don't see it at the moment, needed to be taught. On the other hand, it's part of what once you become "man of the universe," create the Inertia of the place, time, and position. But you have to understand the essence of life, creation of this planet, and then you understand how Inertia is created.

R: Isn't it the time in general for mankind to start creating elements from the fields directly?

K- We... You brought something, I don't know if we can disclose or not, but... Let's put it this way. In the past days, handful of days, Keshe Foundation has, we got confirmation by test by governmental, or the co-official laboratories. We have produced 22 elements of the Creation. And it's been confirmed by three independent tests. By one of the most reputable laboratories and reliable in the world. So we have entered this cycle of creating matters out of fields in a massive way. (1:50).

As we evolve into position of peace, one of the most important things for me as a Iranian nuclear physicist is to show, especially to the Americans, that we can produce Plutonium pure 100% at will, at any time. Which, that brings to make nuclear industry obsolete. But the reason we do it, is because for the deep space travel, we need these kind of heavy fields. We're not looking for radiation. We are looking for atomic mass, field strength. And this is part of the process.

I presume in the next three, four weeks, we'll produce another maybe 30 to 50 new elements. And this, again, is part of our work. And this is part of the larger, bigger scale operation of the Keshe Foundation work with the Chinese government. And it will stay that way. I think a bomb is ticking somewhere (there is a beep in background of audio). It will stop somewhere. So it's not a time and a place for it, but it's part of the work we do. And we need to show we can produce as part of the colonization, we can produce Aluminum on Moon, we can produce Copper on the Moon, we can produce Zinc on the Mars, (1:52). with the interaction of the fields. And this is already been done and confirmed.

It's one of the biggest achievements of the Keshe Foundation development in science and technology, conversion of the fields. And 2 or 3 governments are already studying this achievement. It's not making gold. It's understanding how to create different matters, different conditions, be it metals, be it, what we call, elements of non-ferrous and other things. In collective mixture, we produce 22, which is now fully confirmed and is a major breakthrough in science. And then, in next few weeks we, I will endeavor to produce another 50.

Today we produce two new elements, maybe three. That even one of the guys who was present, he said, "I can smell it." We created out of field materials which can be smelled,

as is the original material. So, we are not going to. We are already deeply involved, and I presume in next year, two years, we produce a full spectrum of the elements in the universe, in the laboratories of the, what we call, the Chinese collaboration with us, with on every level of science and technology.

And we have. It's not when the time it comes. We have produced, we have delivered, and it has been tested. (1:54). And we handed over the documentation of the test to those who matter to understand the change has come. And with it, what is important is to be in command of the technology. We are setting the new rules of engagement in science and technology. And this is part of our work.

Next week, we set out to part of trying to deliver a new material, maybe release another 50 new products, new elements, created out of the fields. And we don't touch the samples, we stay totally up clear of it, militaries and Chinese officials are in charge of all the operation and sites. We just deliver the technology and we move out, and it is observed and looked after and collected by the Chinese, what you call it, officials, and gets tested by them. We just get the test results, what we have produced.

And in past two weeks we have produced 22 new elements, out of interaction of fields. Today we delivered two or three, and in the next few weeks we deliver another 50 new elements, which shows we can sustain life in space. We don't need to, but one of the major things which we will release, maybe in the next seven days, will be production of gases, which can be used for production of the breathing systems for colonization. (1:56). We were talking with the laboratories this afternoon, what kind of tests we want to confirm the existence of the plasma of it, that allows it to be as a gas.

As I said, we have entered partnership with one of the most powerful nations on this planet, with one of the most powerful organizations, and other things which goes with it. It just takes time to create, even though we've been here six, seven years. It's creating now the trust at the highest level with the leaders of the nation, with the Keshe Foundation scientists, step by step. It is, ok, let's go to the next step. We want to see this. What's the next step? We play a bit hard to get. They play a bit hard to get. But in a way, in essence, we both know where we are heading for.

This is part of my plan for colonization in the next two years. Because when we say, ok, we go to the Moon. Say, how? It says, look, two years ago we did all this. We know how to make the elements. We have no worries. Chinese planning to be on the Moon colonizing by 2030. Keshe Foundation plan is 2025. So we need to. We need to show we can.

One of our main targets today was production of water. That we can produce water. And we have done so. And it comes in a natural way, interaction of the fields. When we stand by the new systems. If you look at it, when you say, I ordered a gas generator and a power generator to go with it, (1:58). just go back a few years. On the main website of the Keshe Foundation was something called, "Oasis system." It's a box. Today, I stood

with that box. So what we've shown, what we put out as a Oasis system, today is a reality with us, with the Chinese officials in different sections and military.

Today was a beautiful day, and that's why we, as I said, we delayed the session. When I looked, I said, this is what I promised 10 years ago, an Oasis system. Because through it, if the guy could smell the gas of it, the odor of it, it means I could have feed him the same way. Why would I put in this mixture? And with the tests we've done in past few weeks, I can add everything to be in the same system.

It was another fulfillment of promise. It's just how fast we can run to. That's the one, exactly the same square-ish, shape-ish (photo of Oasis system shown on screen). And what you see there, is what I stood with the Chinese officials today, looking at. And I said to them, I said, "this box is made for the time of disaster, if you have an earthquake. This box becomes the food, the water, the energy, the electricity, everything of a family." And it was fully understood. What you see in that picture, (2:00). today was on the table, physically. And I'm sure soon, will be implemented in different ways, for the Chinese for emergency, for earthquakes or whatever.

Any other question?

Q: .. You once said that every plasma that wants to gain or increase, must first lose or decrease. Could you explain this better to us? And what is its relationship with the elevation of Souls?

K- The Soul is a plasma, so whatever happens on that side, it happens on this side. And you cannot fill a cup with a fresh water, if you don't take some of the old ones away. And while you're taking the old ones away and you add more to it, the cup gets full. And it's very similar to the life of the man, the STM. Get rid of the old, get rid of the weak, because it's somebody else's, getting benefit, that it can receive it, that with that you have room to receive new. Just don't go and throw everything out, because new will come, new might not come, because you never understood that you have to pay for the new to come. But it's not a payment, it's elevation of the knowledge, which counts from now on. (2:02).

And so it's, the more you give, the more you get. You have to give from what actually you more need, than what you don't need. Because, as I said to a Knowledge Seeker once, I test, or you are tested, by the love you give up for the love you receive. And then you understand how much bigger the love you received is, compared to what you let go. But you have to understand, I don't let go to get more. I let go because I know it brings more to the others than to me. Then that's the elevation, if you understand it.

Any other question?

Q: ... Hello, blessings Mr. Keshe, will the everlasting MaGravs Plasma lighting technology be released in the near future to make all conventional lights obsolete? He says, I'm ?? not a big fan of lighting.

K- This technology, in a very short days, will be for the first time demonstrated to Chinese highest rank military officers. This technology, what you are asking, we, it will be delivered to the Chinese. And this is for the space technology. And what we call, Space Defense System. (2:04). And it's a combination of 4 technologies of the Keshe Foundation together. One system, if used properly, can literally supply all the energy needs of Beijing. That's how powerful the system is, and that's what we are delivering.

And, if you understand it, all of you who made MaGravs and the rest, has been with you, but you don't see it. You are too busy with plugging it in. Try to plug yourself into its environment, then you find out exactly what you need.

As I said, we will deliver some of the most advanced technologies man has ever seen in the coming weeks to the Chinese leadership and the government and military. To bring the peaceful change, to bring the change. Not to puzzle or gain position, but to understand what it needs to be done to create the proper leadership towards peace.

Q: ... At present the China Keshe Foundation has no official website or the site has stopped running. And there is no special organization for teaching translation. So is there... So he says the learning progress of Knowledge Seekers is slow, because of that. (2:06). Will you help China to do these things well, next?

K- In time, the teaching of the Keshe Foundation will become part of the teaching of the national teaching in the nation. As I said, one of the leaders said, the scientists said, "this is not in the... with the new ?? and the other books we read." He said, "we write the books, the new books, that the world will read and bring the new technology. You can forget about the old." So, the way we see it, as next few months and years, more collaboration way and more direct interactions showing technologies. The technology of Keshe Foundation, ?? will not need the Keshe Foundation website as such to teach. It'll be taught in the schools and the universities of the, of the nation. Through the structure of the new technology.

It's not that once we teach everything old is gone. This is what I explained before to many world leaders and ambassadors we met before, and even to the present ones. We have to understand, we have two structure of life in the universe. One is a matter state and one is the energy state. Up to now, everything we've done is in the matter state. That's why what we do in the energy state, like plasma, Gans's and everything, it looks odd.

Universities, education, has to teach both together. That when the man is in a state of the Soul and energy, knows what he can do with the physicality, or knows how to live in that state of energy, and when he's in the dimension of physicality, knows how to do. This is the purpose of it, not to make things and then become an energy.

The long term understanding is that, when you are aware of the energy of your Soul, your creation, then you can handle the physicality, because it needs protection. (2:08). Otherwise your lose energy in the cave, you need to be protected, then the physicality ??

will protect you, you do it yourself. And then at the same time, the two knowledge has to be taught hand in hand. And I see this in the structure of, what you call it, teaching and life, in a coming time. We cannot demolish and say, "we are the only knowledge, everything in the past is wrong." No! God forbid! When we do that, we become ignorant.

The knowledge we have up to now, is a matter state, physicality. The knowledge we teach is the energy, dimension of creation of universe. We have to learn this, then we have to learn how to transmute between the two. Then, we are correct in science and technology. The minute we say, "whatever is wrong in the past, now is..." No. Even Knowledge Seekers, I've seen a lot of you make this mistake. No, whenever you come to someone introducing the technology, explain to them, this is addition, up to now was matter, your body radiates that energy, now we know what that energy is, where it goes. Then you find people who stick to the knowledge, understand both.

The minute he says, "oh, everything is wrong with Newton and..." Everything is wrong with what Einstein said, without a doubt. Because he wasn't a scientist, he was whatever. Whatever came out of Stephen Hawking has to be written off the books, sooner or later it will be done. Then, you look at the scientists, Tesla and the others, they brought the intermediary between the plasma magnetic fields and the matter state. These are to be respected. We have scientists who discovered alcohol and whatever, centuries ago. And that's we are alive with it. And because of it, most of us. (2:10). These have to be respected. Knowledge now, has two parts. And the both have, has to be understood parallel together, to create that "heaven on Earth."

When you become too materialistic, you lose the sight of energy, which actually influences matter. When you become too much energy, and then when you want to become matter, to show, you don't know how to do it, then you pay for it.

So, teaching and education, about the plasma technology, about the new science, about the space, has to be in parallel with the plasma. It's no use getting with the plasma fast from here to the Moon. I arrive! How do you make a house? How do you stand the conversion? How do you want physically to cuddle your lover, when you have no atmosphere created for you with the plasma energy? Soul kissing is not as nice as physical kissing.

So, nothing is wrong with the old. And, we are not promoting a new sect, a new knowledge. We are bringing addition to what we didn't know, and the two will go parallel. And I see the interaction for us is amazing with the Chinese authorities. Some of the most correct, knowledgeable people I've ever met, run this nation. They don't, they let some of their, what they call, physical life come into it, whatever. But, the target is the nation, it is not me. The target is bringing everything for change, for betterment of the others.

When we speak to the West, (2:12). if it's a thousand units, how much profit we make? Here, they speak about a hundred million, but it allows millions of people come out of the poverty, they don't have, how we get to them. We still make profit, but the nation will

move on. We don't see this mentality in the West. And the leaders in this country, and most of what you call, countries like this, work that way. It's a beautiful experience, but we have to learn. We can't deny everything is wrong, now we are here.

As I said to, I was explaining to a friend of mine, very recently, then you understand. All of you who are in our twenties and thirties know exactly what I'm talking about. It's not something for talk. You know the first time a girl or a boy said, "I love you", you went home and says to Mom, "you never loved me, because you don't even know what love is, I've never been loved by no one." Because, somebody said, and it touched us, that he or she loves us, that's Goddess, that's what I call, the God.

And this should not be with the Keshe Foundation technology. It should be as much loved as I was loved in the house. But now, I found something new to love more. And that's how the technology should be done. And don't worry about the Keshe Foundation not being there. Keshe Foundation knowledge and technology will be in every book, of every school in China, and very soon. In a gap of time, in time. Maybe even on your televisions, as... Then if your leaders believe the knowledge has to be spread, that they can carry the nation with them.

Any other questions? (2:14).

Q: ... Can the system of STM and STP be considered a working model of C14, where STP plays the role of additional neutrons in the C14? Thank you very much.

K- I'm lost, can you translate Rick?

R: I'm lost as well. He's trying to compare STM and STP, those two systems, as a working model of the C14, and the additional neutrons would be the STP. I know that might be stretching it a bit.

K- ..

We are now developing technologies to create massive amounts of Carbon 14 (C14) in atmospheric condition. We already have achieved it, but it's something we'll be waiting for the proof of it. But in a way, it shows itself as a Carbon 12 (C12). But it is C14 by behavior and the field transformation? We will show you, I have pictures of it. Where C14 behaves as a C12 in the structure, in a matter state, but it's C14.

Because Carbon in the matter state of 12 does not behave this way. (2:16). It's non-existence, impossibilities. The C14 exists, operates, in the atmospheric condition, with the, as a C12. And now, with the knowledge we have, we can understand it, it's actually the way diamond is created. How a Carbon explodes into a diamond, at a given, doesn't need a high temperature, it can be done at a low temperature. Converts itself, as it converts from 14 to 12, it becomes at the structure of the stone.

All the teachings (will come) in the coming time. In a way it's Graphene, you already know it. But in a larger scale, as one single Carbon, it's like popcorn, as I call it. If you...

I always used to say, "the most expensive popcorn called diamond." That's all it is. And if you've been in diamond business, you know, when you go to a cinema and you get a popcorn, it's all that fluff, but when you chew it, there's the hard bit, the original piece in it, diamond is the same. You get the most beautiful diamond. If you look in it, there's a black spot, the mother where it came and it cannot chew, it's dark.

That's a C14, conversion into C12, and in that explosion of expansion, you get a diamond. And they tell us, "oh, diamonds created (from) the high temperature. Blah, blah, blah, blah, blah, blah, blah." You give me a C12 in a specific field, I make you the most beautiful, largest diamond man has ever seen. (2:18).

Shall we call it a day? We're nearly two and a half hours.

R: Sure, you got through, I think, all the questions we had here. Thank you.

K- Oh, how did I know that? Thank you very much. We'll see you next week. And we're getting ready to meet those of you who come to Manchester. And then we meet in one of the most beautiful cities of the world, even though with all the ?? nations, like his king, in the city of London, very soon. Thank you very much Rick. Somebody sent me a message. It's not too late to register for Manchester. You can still attend, and we facilitate. A lot of people have moved themselves to the other events, So, they created the gaps in Manchester's session. Thank you very much, and see you next week.
