

# 502nd Knowledge Seekers Workshop September 7, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

## ENGLISH TRANSCRIPTION

(:17).

K- Hello, ... Good morning, good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual we welcome you back to a 500 and second teaching on this one. We have couple of messages for you. First of all, today we are in Amsterdam. And we officially invite, through the channels of you know, through Holland, (:18). we'll give a private meeting for the Knowledge Seekers (KS) of the, what we call, the home of the Keshe Foundation (KF) in Holland. Get in touch with your people, we wanted to keep it very quiet, but now we are here for another day or two, And through the China, and right channels, you will be able to meet us. At least we can meet together. Not many of us, I think we'll be able to get together. Sometimes, maybe Friday, or later Saturday, we'll meet in one of the beautiful places in Amsterdam. And we, in a way, come back home. And we wanted to keep it very quiet, just for the Dutch. But, if the Dutch Knowledge Seekers are, what I call, prepared to make the journey to Amsterdam, we're here, we announce it through the channels of the Keshe Foundation in Holland, to be able to attend this meeting. It'll be a pleasure to meet you again, after 12, 14 years of gap. We used to give lectures in Holland on regular basis, weekly and monthly, for a long time. That's where the main support of the Keshe Foundation built up, between Holland and Belgium, and became a "worldwide disease." We'll let you know where the venue will be, and if by sometime next 24 hours we know the numbers, we know the size of the room we need to take up. It'll be nice to meet you all back again, and we'll see where we go.

In ?? regards to the meeting of the 11th of November. We have upgraded the 11th of November to a magnificent presentation. (:20). We'll present the technology of Space, beyond imagination of Man. Systems will be brought in, technologies will be shown, that the present space technologies cannot even dream is existing and is operation. We will limit the number of the people of the Knowledge Seekers that can come in on the 10th and the 11th and the 12th and we will be stepping up the presentation, not only to the astronauts, but the space agencies, to scientific organizations, and to the Press. We will show technologies which man could not imagine is at the present in the hand of the man. And then we build on it, and we go forward.

The, what I call the... what we put has run about 300 people, we'll increase it to about 500 and those Knowledge Seekers who are booked by next few days, we keep that position. And the rest, the... what we call, the seats will be allocated to the... what we call major corporations will come to see and as ambassadors are invited. Expect to see things which have not even been discussed in the teaching. We have kept a lot of knowledge in the background, because we thought man is not ready. Now having the Chinese government

with us as collaborators in development of the technology (T), we release this knowledge to be seen in the West. Knowledge which even our own Knowledge Seekers do not understand exists within us. And then we take this progress forward to the next step. (:22).

Those of you who are attending the week before the 11th of November, complete registration as soon as you can, because we are targeting the weekend plus the people who were with us last week in Manchester, to bring to the next step of what we call, the development of the technology. The London teaching for the week, it'll be an amazing teaching. I think some of those who attended the Manchester meeting understands what it means. The change it brings, and it brings to us, is not that we're going to change the world, we're going to increase the understanding of ourselves for our own work.

In this process, we go one step further. We'll bring you to understand the limitation of transmutation and transportation (T&T). The limitation of what is possible to be done. In the coming weeks and months, massive new technologies will be released. Now that we have stepped to the Space development and Space technology and we have finished, more or less, teaching you the alphabet of the energy transformation. Now we come to the Space ?? transmutation, coming to Cosmic Rays (CR), coming to understand how to transport, transmute and live in both dimensions (D). Understanding of Totality of the knowledge, in... on both side of the fence, as I call it. But, depends what you want, what you have decided, which side of the fence you want to sit to watch? One side of the fence is the Soul of the Man (STM), energy pack. One side of Man is the Soul of Physicality (STP), another energy pack. How do we interact this? How do we become to decide, which one runs and which one shows, and which one does what it does? (:24).

In a long term, Keshe Foundation teachings will come to flourish, in a different way. At the same time, through the development of the technology, Keshe Foundation, in coming days, will open a new channel, a new way, a new presentation of technology, of what we call, to interact with the wellness of the Man. Conditions which up to now were not and could not be understood, can be brought on the, what we call, 'new dimension of the work'. Diseases that the doctors could not imagine, can be changed in minutes and days, now will be offered to the scientific world. Conditions which will, we could not imagine, can be handled so easily, by interaction of the fields, new technologies, new systems will be delivered, and it's already on the use, that will bring the possibility of eradication of Parkinsons. Eradication of illnesses like ILS, and other conditions. Very much eradication of what we call the 'neurosystem of the man', which cannot handle the physicality (P) of the man. in connecting the STM with the STP, and with it, connecting to what we call, the physical dimension of the Man.

Keshe Foundation, as we showed you, and as we developed the technologies, in respect to coma, as we showed, it took us weeks and months of operation, to bring back a coma in condition, as we saw with Naomi and other cases. Now the technology has developed, in such a rapid way, that it can be done within minutes. (:26). We'll open this side of the knowledge, hopefully with the permission of the Chinese government in the Macau presentation of the help. We will show the effectiveness of the new breakthrough in

science, where people with Parkinson, within days, hours and minutes, walk away from the painful life, which has been brought through the condition.

We will open a new technology that will be delivered in conjunction with what we already developed, eradication of the cancer through the scientific world, and through again working through the operation of ours in China. In a way we transfer the knowledge to the doctors and we show them the system and it's for them to use. We have tested this in many ways, but now in the past few weeks we see an end to a lot of these things. Some of the results and tests from our side shows the 100% correct result has been achieved, and can be achieved, and can be developed over weeks and months, eradicating the what we call the paralysis of the body of the man in the physical dimension.

This technology has been done very much before. But now is coming into flourishing. What we ask for, and what we'll ask, is to start of the new trials. What we call, conversion of the energies of the man in a dimension of the STP to the, what we call, P of the man. These we have seen the results of. We know exactly what we've got to do. In a way, even our UBESU's (Universal Body Enhancement Space Unit), and the systems we use in Linz and now into our service centers, has become totally obsolete. (:28).

I kept this technology back till the day, someday, like the conference in London comes, that the man can test. And now we are ready to show. We are ready to show most of the disease of the P of the man, can be eradicated in the space, will not exist, in a way it's a gift. In a way is understanding how to transmute between and how to become physical dimension in another position and time. And then we'll see the next step.

I always dreamt about the day where I'll be able to release this technology in its true sense, and London meeting is the venue, we'll open new doors. You (did) not understand when he said, "the dead will rise and the man paralyzed in a wheelchair will walk in an instant." We'll bring this technology forward in a rapid way to bring that change. And this will start, has already started, in a very, what we call, quiet way, our doctors and our systems have been tested to show the correctness of it, that they understand. People who are using the system have felt the change in their body when they use it through our system, internally.

But now we take this even a step further, much, much further. Because there's two choices. I can teach another 10 years to bring you to it, or now that you understand most of the knowledge, I can show it, and I can deliver it, and then you have to understand it. What we say in English, "the proof of the pudding is in eating it." We bring the "pudding," see if you can eat it and understand it. Intellect, knowledge, science, will become instantaneous transfer. Whatever is the knowledge of the man, (:30). can be transferred instantaneously. It does not matter what language, what emotion.

Going through the teaching of last week, sitting with the Knowledge Seekers, some of them old Knowledge Seekers, some of them loyal to the Keshe Foundation for years, I realized they've been waiting, and waiting, that, that promise will complete. Now is time

to complete. Delivery of the technologies, beyond imagination of the man. Deliveries of technologies which bring eradication of the illnesses from the physicality of the man, will be shown. I tested this in China, in the past few weeks, and it was amazing to see it. And I thought, Knowledge Seekers do not even understand what stands in front of them. They're too busy with physicality, they're too busy with understanding of nothing. And they're still waiting, as they did not understand the full comprehension, the full understanding of the technology.

Maybe, it's time to show, but not become magician, as you have the fundamental understanding of the technology, as many of you have understood. As I said to a Knowledge Seeker in the past few days, the biggest show on Earth about the space technology will be shown on the 11th of November in London. A show will not be "a show," but it shows what technology is, and what the space technologies of today have to abandon.

We'll bring an end to nuclear warfare, and bring an end to greed of the man for every elements of the Creation. We are not here to impress, we are here to bring the change. And this change will be shown in its first step on the 11th of November in London. (:32). The venue is limited, and as I said to the head of the Keshe Foundation in the past few days, close the registration within next few days. We'll increase the price to the position that no Knowledge Seekers can afford. Because we want to bring in the world to see as there is enough Knowledge Seekers who come in through the "200 sessions" and through the other channels of the Keshe Foundation. Now it's time for the world to see, and for Press to be impressed in what they denied themselves on humanity for past years.

I'll show technologies in London on the 11th of November, that will baffle the world of science. We'll change the course and we'll bring what I plan to do for years. Knowledge and technologies, which make most of the technology of today obsolete. This transformation and this transmutation in knowledge, is needed to be brought in now, that we have enough time to stop every other possibility of another cycle of war, as the man is not busy with something else.

In London presentation, you will see some of the most amazing things, as Knowledge Seekers and say, "wow, it was in front of us and we didn't see it. He always talked about it, but now he shows it." Now you understand the change. Now you understand the limitation. Those of you who were in Manchester, were touched by just the, what I call, the first "soft feathers" of the knowledge in understanding yourself. In transmutation and transportation of dimension of physicality and understanding it, how you can do it.

We'll bring and show technologies in London, that will baffle the world of the science. That how much we have misunderstood, (:34). and how much we've done wrong. In our dimension of understanding the transmutation, we have reached the limitation of matter state life. Now we open a new horizon in energy life. Dimension of the Soul, dimension of understanding, interaction of the dimension of the fields, and not just a few amps and volts and watts, and just a few "bits and bobs." You had enough time to play with MaGravs, you had enough time to play with the Star Formation (SF), I gave you enough

knowledge to play with every possibility of every knowledge. And you, as usual, as naughty children, just played and played. Now it's time to show.

It's time to bring the dimension of understanding, and the challenges which face man in the dimension of the physical transportation and transmutation. Teaching of today is very simple. Teaching of today is, again realizing, you Knowledge Seekers, sitting there for a week in front of me, how much you have played, and how much more you need to play, to be happy that you can do something. To be happy that you can understand, how situations and conditions can be created. In understanding of the technology, in understanding of the, what we call, the Totality of the work of the energies of the body of the man, we come to realize something very important. (:36). We come to realize, how much we can work.

Rick, I have a problem, I don't know how these people are moving around on my screen.

<< Problems with the white board >>

(:40).

K- .... (:40:41). Oh, there it is. I found it. ??, the knowledge increases, and we become more ignorant into it. ... (:41:10).

... Going back to the teaching, in understanding something which we never understood, but we emphasize again and again on it for you to understand. In the dimension of the physicality of the man. ... (Oh, very nice shape. Now, where do I find colors?)

We know in the dimension of physicality of the man. (:42). Man has no physical dimension, if there is not an environmental field. Which means we have no dimension, if there was no magnetical gravitational (MG) field of the Earth around us. If we move to another dimension, if we move to another position, and the environment changes, we'll find out that us as man will not exist. (This is a very nice trick.) But what will be interesting for most of us is, if we change the field, the environmental field, do we become invisible?

In the field dimension of the man, on Earth, we have a physicality. When we change the fields, we disappear. What kind of new creatures would be us manifesting ourselves as? Is the possibility of a "line of life" changes? Or do we still have that possibility, that what I call, having the Soul inside it? Having the Soul that can bring the dimension of P through the STP, in a new condition of life. (:44). (Shows odd shape with Soul in center).

In a way, if we change, if we bring a new condition, a new environment, how would we look? Would we trust to be able to go back to our real colors and conditions and life as a man? (Draws shape of man). Would we think as a man in the dimension, or would we think as a new creature, new understanding according to the environment we manifest ourselves (in)? The truth about all this is, that, have we understood, that we have a nuclear bomb, with massive radiation capabilities. That is a Cosmic Rays sits within the

center of the body of the man, we call it the STM. It is more energetic, it's more powerful in strength, than the whole of the physicality put together.

The body of the man is made of billions and billions of cells, and each cell itself has a energy to maintain its position and the condition of life. So, the body of the man physically is a energy packs times billions, trillions. (:46). And that energy in the dynamic motion transfer of the fields to what we call, its blood, creates a cage to hold us in. One energy pack encaging another. But there is an interconnection between these two, that allows one to be embedded inside the other.

In a way, if you look at it in a bigger scale, you have your physical dimension outside from the interaction of these two. It's very much like gravity and magnetical fields. In their interaction, we create the Mass, physicality. There is no difference if you call the STP, M field, and the STM, the G field. with the capability that one can change position with the other. Through an interconnection, through an interline power level, what we call, "common denominator," they can switch from one to another. Then this switch will decide in interaction with the environment, how you manifest yourself at a point and a place. (:48).

(If) you switch the fields to the dimension of physicality, what do we have? We are going to have an amazing condition where what we call, the dimension of the interaction, dimension of the position, and the possession of the fields can create the different dimension of physicality of the man in the same environment. What it means? You can change slightly, the emotion, the dimension, and the direction. And then in that process, you can turn from being a white man to a black man. Because the environment of the Earth has not changed. It's the field emotion of the place you live with, allows you to do the transmutation. You look like Chinese, you speak Chinese, you understand the emotion of the Chinese language. Because now, you kept within a gravitational magnetic field of the planet Earth. It's the Inertia and the position in respect to the center and the condition of the fields of the Inertia created, which gives you that environment.

Don't forget, when you enter a new environment. Let's say, from England you go to China, the "Soul of the Chinese" dictates part of that Inertia. The Soul of emotion of the nation, culture, language, dictates that part of Inertia. (:50). That's why you manifest yourself, if you decide as a Chinese and understand the whole lot. Then the language and the dictionaries are not needed. Because now you don't need to press this and it gives you the meaning, but not the emotion of. Now when you speak you understand your Soul has the emotion of the feeling of the word too.

Now you decide to change the gravitational field of the Earth to the Moon. Now you manifest yourself in that position, in the Moon, as a "man of the Moon." Is there a life on the Moon? Is the collective life and interaction of your Soul with it, teaches you how to communicate, how to exist? Or, you create a new dimension, that the interaction of the emotion of the STM, and the STP of the man, translates that to the existence on that planet. You learn the language, you learn the feature, not out of transmutation, but by the collection of the interaction of the fields of the environment of the Soul of the people,

entities, who live in that environment. They transfer the energy, they transfer the knowledge to you, as much as you transfer to them.

It's not only the transmutation by the physical dimension, is interaction of the STM in transmutation, that interacts with the Soul of the citizens of that environment, that allows you to be part of, to be understood, (:52). and to live like them. Now you understand, how some of the citizens of the universe (U) live amongst us, talk like us, show emotion like us, they fall in love like man, but they have no intention to show their existence, where they come from. Now we graduate into that knowledge.

Now with understanding this, with the training we have started in Manchester, and follow up in London, in Beijing, and courses and sessions will be put by the Keshe Foundation, and the world governments will bring that new dimension in. It will not be exclusivity of the rich, it will not be exclusivity of scientists, it will not be exclusivity of the man, even a dog can be educated into this knowledge. As we teach the Soul, not the physicality. Does not matter if you walk on two or four or ten (legs).

Now you understand how the environmental cognition in collective understanding of interaction of the fields makes man knowledgeable of the dimensions and the positions in the universe, as he manifests himself in that position on time and space. But once you interacted, once you (transmute), once you gather the knowledge, it becomes part of the Universal Knowledge. You move to another position in the universe, you gain the knowledge from them and the knowledge you gain from the previous positions will become the knowledge of the new citizens of the environment, to the area you landed in.

In understanding, in moving forward, (:54). in a way adding to the knowledge, we add to the Knowledge of the Universe. Do not work, do not forget that you are part of the intellect of the universe. And you become that position, and time and space. In a way, when your soul lands in an environment, and then you decide to manifest your STP, which now is embeds inside the Soul. Then, in the interaction with the Soul of the citizens, you'll be knowledgeable in the interaction to the whole knowledge of the environment you have manifested yourself. Now you understand how the fields of the STP in dimension of interaction, understanding, can manifest itself and move to the position of the new strength, which you have manifested yourself in.

In a way, man will become very fast aware of how to move in and out of the position without really knowing anything about it. In a way, even if you takeoff and land by mistake somewhere you did not think, imagined existed, (:56). you will find your Soul. And then you decide if the STP, which you embedded with you, will manifest itself in that dimension or not. This is why we keep on asking you. This is why we keep on teaching you how to understand the emotion, and how to complete the understanding of the work of the STM. Then you understand the STM is nothing but an energy pack. The STP of the man is nothing but (an) energy pack. And then you understand all we have talked about from the beginning of the teaching, 500 and something before and before that, is about transmutation and transportation of the packs of energies. You call it the

Soul, you call it the physicality, you call it both in the dimension of transportation and transmutation. That's all it is.

Now we have to gain the knowledge how to switch between the two, irrespective of environment. Then man, fear of transmutation, will walk away from him. As it's become a natural and normal process in understanding of the totality of the existence in the universe. And if you understand this, we go back as I always say in Koran, << speaks in Farsi or Arabic >>. "We have completed the knowledge of the Creation." (:58). We have completed in understanding the process of the Creation, how we create ourselves, how we manifest ourselves according to the time, place, position, strength of the fields, and in understanding of the Totality.

(Rick, they're asking to change your background, as I close the whiteboard).

In understanding the Totality, in understanding the reality of the existence, now we come to the next step. We come to the next understanding. How do we transfer one energy to another, to another energy? What is the common denominator, link between the STM and the STP? And if you understand that, then it gives you a link to the Creator. Because it comes through the same strength. It comes through the same path. And how do we communicate? How do we connect to the rest of the universe?

In teaching of the past, I have touched on this, I explained this in a very soft way. But in the coming time, in the coming months, in the coming years, we'll show you more and more, in how to connect, in how to add on, in how to understand the process of the creation, and transmutation and transportation. Depends, if you want to travel in the dimension of physicality, you go for the transportation, the way we do, 18 hours on a flight, from one position to another. (1:00). If you want to go through the transportation and transmutation of the fields of the planetary system, the same distance, instead of 18 hours, 18 seconds. And then, if you learn how to travel with the strength field of the Cosmic Rays of the higher order, in the same position, in milliseconds. That's all the difference is.

How do you want to ship the package, called the physicality of the man? And what method of the transportation you want to use? If you understood this, it's the same as what you do today. We call it different strength magnetic fields. You call it a donkey, a car, a jumbo jet, a rocket. There, you use more fuel, you feed it more to get something out of it. Here, you go by the order of magnitude strength of the fields interaction. Otherwise, it's the same Soul. Otherwise, it's the same STP, using different method of transportation. Then you understand, when you travel with a donkey, you need the saddle to sit on to carry you. Or if you're good enough, you sit on the donkey. When you go to travel by the jet, they sit you in the seat, they strap you up and everything else. And then they put more fuel, you go faster. And then if you're in a rocket technology, you shake and shiver, maybe it doesn't explode on the way up, and then you go to the condition of weightlessness. Now there is no weightlessness, but change the donkey to the rocket, using different magnetic field strength, you find new dimension of the emotion of the

Soul, (1:02). you find the speeds of the interaction needs faster understanding of the position, time and place.

Then this brings man a new intellect, a new knowledge, becoming the, what we call, Passengers of the U, the true passengers of the universe. Not with the "monkey suit" of the Americans, and not with the imaginary talks in the fancy books, and fantasy of the dream of the man. Because you make that dream the reality, because you understand the interaction of the fields of the STM and the STP. How these two interact, how you position them, how you distance them from each other, how you use the different layer of the strength of these, in respect to each other, you decide your method of existence, you decide your position and the foundation of life, anywhere in the universe.

Man decided to engage the Soul and give it a cage which is flexible. We call it the body of the man, we chose the Earth to manifest itself with two legs and two arms. Now if you decide to use a higher order dimension of the physicality, then you still be on this planet, maybe invisible, but understanding more of the Knowledge of the Creation, because you interact in different dimension field strength. The atmosphere of the Earth did not change, if you were on a donkey or a jumbo jet. A jumbo jet or a rocket has no more intelligence than the donkey, maybe the donkey is more intelligent than a piece of metal. At least he can make a decision where to turn, and how to turn and where to sit. (1:04). Where the plane has no, where the rocket has no decision. Somebody pushes a button and that's it.

You have to be that donkey, which still carries the emotion, the understanding of interaction with the environment. It's a real water, I don't cross. It's grass, I eat. I'm going to enjoy this one and not the other. I'm going to swim in this water and not the other. So, in a way, we are back to the position of the Creation, with no intelligence, but understanding of the emotion. And then, that interaction of the emotion of the man, with his environment, brings man that intellect. Does not matter where you are, because the knowledge of drinking and eating and walking on Earth has no application and no need on Planet Zeus, because there is no air, there is no water, and the life is in dimension of fields of the universe. What's the use to carry a bucket of water and a sack of hay? There is no donkey, and there is no condition for a donkey to live on this new position, time and space.

And this is what the lack of knowledge has made the "donkey of the man" on this planet. And the more we become ignorant of it, the more we deny the rest of it, the higher degrees are given to professors and scientists, because they become more narrow minded, more focused on ignorance of the Totality of the Creation. Sometime, when I sit in front of the scientific world, I see them in understanding of the Creation, (1:06). less than that donkey. Because, in a way, they are settled with the ignorance and pride of the Man, and have forgotten about the true life of existence, that the Man is created out of the energy of the universe. It'll come from it and it'll go back to it. It's just how clever you become, to use that position and time, to, in a way, advance your knowledge, in a way, enjoy more, as time comes, the beauty of the creation of the Creator.

Because, one way or another, in one position or another, in a dimension of physicality, in a dimension of field of the STM, in a dimension of interaction of the fields of the universe, there is always an end. Only, the only entity who will come from the beginning to the end, is the Creator and no other creature in the universe. But you have to understand, we are part of that creation. So we are responsible for it. We are there to bring that change, elevation of the understanding of the creation of even our own Creator in the dimension of this creation.

It cannot exist, if there wasn't an environment to confirm His existence. You are the God of your own physicality, and your child, is a God of his own physicality. Is there only one God? Is there only one existence? Without the existence of the child, there's no confirmation of the father. So, in understanding this, (1:08). we understand, we decide the emotion of how the father feels, and the emotion of how his child (feels). And in the time and place, and the collective society of the existence, of the fields of the universe and Unicose.

This dilemma will bring an end to the religions once he understood. And soon will make it to be understood by those who make themselves to be religious, and the religious leaders, as they understand the time of cheating the man through his ignorance of the knowledge of his creation is over.

I hope today I opened your eyes a little bit more to another dimension, a little bit more to understand more of the teaching of the past, a little more for you to understand you're in possession of the capabilities that you denied yourself and no one else. Extend the dimension of the STM. Extend the dimension strength of the STP of the man. And then, decide, in which field interactions, you want to manifest yourself. You can create the condition of the Mars on this planet, and show yourself, how you will look on Mars. Do I like this? I don't like the color of the skin, I'm going to another planet. Do I like to crawl, like animals on this planet? I don't want, I want something I can go faster. And then you find out, man expectation of the life in the universe, will change to the position of the perfection of life.

Where we all strive to reach the ultimate goal. (1:10). To become part of the Creation and become part of the Creator. And then at that point, man has matured to the knowledge of this universe. Now we have to understand the process of the knowledge of the Unicose and every other universe within it, as each one is unique, as is each man on this planet. Then, we learn the knowledge of sharing in a different dimension, of the field strength of the Creation, which the man is blind to at this moment of time. But in time he'll understand.

The point of the teaching of today is to open your eyes in a way that you understand the next cycle of teachings which come in. In what strength of the fields I want to travel. In what strength of the field I want to manifest the STP. In which dimension of field strength I want my two emotions to be in balance with each other, that I can confirm my existence to the best beauty of Mitra. And then we come to the "beginning and end." And we see the beauty of the Creator and the Creation. This was part of, in essence of the

teachings of the past week in Manchester. And in London, we create condition that some of you will be able to go to this dimension, condition and dimension of the transmutation, by your will, not by us. We are just the creator of environment. It's a condition, strength of your own understanding, between the STM and the STP of the man, to go through that transition. (1:12).

I can bring you to the airport, I cannot push you in the plane, unless I handcuff you as a prisoner, and this is not our job. Every man has to take that flight of fancy on his own accord, and own understanding of the Totality of his own creation. << speaks in Farsi >>. We have said what we have to say, it's for man to understand. Does not matter, it takes him days, minutes or centuries. It's the dilemma of the man himself, and nobody else. And it has, it's a trip, that it has to be made by each man individually. There is no collective gathering, a collective awareness. That game was the game, so they tried by collectiveness, to make a slave of the man, by the man who will lead that collection.

Now you understand, it's in the capability of every Soul, to reach the point of understanding of the Creation. And it's for man to decide, which school, which mode of transportation, and which dimension of the emotion and the strength that man uses, and nothing else. We are not here to slave man with another, we are here to free man from all others. And this is your responsibility to understand, the position and strength of your STP, and how you can transmute between one the other.

Up to now you called it a dream, now that dream has become reality. And it's only you who can ignore it, that nobody else, because nobody had the dream you had. And nobody has a dream which you have, except you. (1:14).

We go for a break, we come back, and we go through the usual method of answering any questions. Rick, if you want to take a break. The usual, the same things, but it has a lot of knowledge, the same system, but it has so much meaning, that we see. Thank you very much.

>> **BREAK** >> 502 KSW September 07, 2023 (1:21).

K- Yes. If there's any questions?

R: Actually, no there isn't. This is the first time in 500 workshops that there's no Q&A, There's none in the YouTube and none in the Live stream. (1:22).

K- That's fantastic. So we say goodbye. Thank you very much. We hope you enjoyed the teaching. And join us next week.

R: We have a hand up.

K- Please, just something to, just to mention. Those of you who take part in the session tomorrow, please make sure you do your, what we call, test before. And you can test after the session. And we would like to put a question there to you during the end part of the session. And then it'll be the same next Friday. And those of you who registered for the, what we call, the "sign of your Soul," Monday the 11th and the 18th, you've received emails. Please respond to it. Most of you have. I think about three or four people, I was told, have not responded. If you can go to your Junk, if you haven't received any mail, maybe has gone to your Junk Mail, and respond to the time you want to be during the session, or what we call, fingerprint of your Soul. So tomorrow, we got the numbers which we wanted this to, what we call, test the most important part of the technology's application. And then, the same next week. And it's a very interactive, within the first one hour, one and a half hour, we'll see the condition and the results. And then we ask you to retest yourself, and then come back in and fill in the questionnaire. (1:24). And this is important for us that we see the change. And then we'll tell you later on what does this mean, and how you have brought a massive next step towards the space development, space technology, and many, many other applications.

So if you have a question, you have a hand raised, let's answer it, and then we close it. It's the only question today.

R: The only question today? Ok.

K- Is that what you said? I think that's the only one with a hand, with a man's hand up. You have no others.

R: There's a longer question in the Q&A now from Hong Yuei...

K- There is something I have to mention, there's something, we have a very critical condition in part of the translation and operation of the Keshe Foundation China. Wang Lin is not available for next 2 to 3 months. And we are trying to find a replacement and a position to cover all the situations which has risen in China. The translation and the operational management of the Keshe Foundation China, in next week or so, we'll address that directly and we bring a new translator. To translate all the teachings and send a point of the communication between the Keshe Foundation China and the rest of the Keshe Foundation outside. No, no, no difficulties, it's just that we have to restructure, as everything was structured around Wang Lin, and now she's away for about 2-3 months. We have to restructure it, that it can be brought back, that there is no gap in the knowledge, and other parts of the Keshe Foundation work in China. (1:26). This does not

affect our work with the Chinese government at all. It's just something personal, and then it will be readdressed, and then it will be brought back to normal, hopefully after next couple of weeks. Okay, let's hear.

Q: ... I have a little question regarding the 11th of November. Maybe I'm a little early. But will there be a connection over Zoom?

K- No, no, no, nothing. We will not allow. We've done this before. We'll explain this again. We will not allow any cameras, any telephones, any recording of the sessions. When you attend the meeting, please make sure, I will give you, we've done that in, what you call, Belgium before. We'll make sure that there is no electronic operation in the room. You'll not be allowed to take any pictures, any recording. You'll be physically body checked with everything possible. We'll cover every aspect. But the reason is not that we're trying to put things aside. It's just that the fields and the condition created in the room can affect everything else. (1:28).

Q: ... And I'm sure you will inform us or give us some hints or show something after.

K- No. It'll be done by the Press. We'll not show, we'll not show anything. Keshe Foundation, the way we've done the same in Manchester. Nothing will be shown. We are not here to go in that extent. There is a reason we're doing it. And the London condition is that there are different condition in London than we ever been positioned in.

Q: I see. So maybe we will be informed through the presence of the Press afterwards?

K- All people. Depends how it gets reported. But even the Press, we try to bring a very tight control on it. There is a huge reason for this. And as I said, there is no difference between the cameramen of the Press and the individuals. This is a very... We don't want to go into detail, but we create a condition that we don't see fit for electronics. Even us have a problem in trying to see how we present things, will not affect our own system.

It's a beautiful presentation and a breakthrough in science. And it'll be shown in a very, very effective way. We'll follow the same procedure we've done before. If you attended the conference in city of Ghent, on the 3rd of December, 2011, (1:30). we gave you a plastic bag and everything goes in it. And your plastic bag gets numbered and kept out of the room. And if you attended the Bulgarian conference, we thoroughly body search everything you carry. And we are even planning to bring in a special system that, like airports, shows what your clothing is made of or whatever it is. We are very, very thorough with this. Don't forget, we are inviting ambassadors. We cannot take any risks. Do not bring with you, or you bring a mobile phone or whatever, will be taken off you in a sealed bag, registered at the end of the session. You can take it back as normal with everything else. Very, very tight. We bring this to a very, very tight security. We cannot allow, and we have to create a condition of safety for what we call, number of ambassadors which will attend.

This is one of the reasons when we did the first ambassadorial meeting in Nino, we did not allow any Knowledge Seekers, because we had to create that condition of safety for the ambassadors. Now there is many people and we have to control it in a very massive... We have to give undertakings that the dignitaries are safe.

Q: I see. Thank you very much for your explanation.

K- You're welcome. The fee for Saturday evening will rise to 5,000 euro in the next few days. All Knowledge Seekers who registered before still stands for that weekend for 1,500. But the fee for that weekend will rise to 5,000 euro. Because it goes to the governmental and to what we call, (1:32). institutes, and they come as part of the understanding of the research. We are not looking for numbers, we are looking for quality and what we call, people of the knowledge will be there, and that's what we are looking for. So, the 1,500 for that weekend, within next few days will rise to 5,000, which brings in what we call, the organizations we are looking for. They come in to see the change, we don't just bring people in just to be there. Those of you who registered for the, what we call, the weekend, the week before, you have an automatic entrance into the weekend session and the meeting with the ambassadors.

We start the work from next week, the whole, what we call, cycle. We already have found the venue where we want to hold it. It's in central London, capacity is about 500 people. And the people will create all the security structure we need for the meeting, for, to give confidence to the embassies for the ambassadors.

Any other question?

R: Okay, we have a number of questions in the Q&A here now. Let's begin with ...

K- I think they were asleep.

Q: ... Hello Mr. Keshe, you said quote, "there is no reincarnation," many times before. (1:34). I think what you mean is, all my cells structure, all Souls of cells and STP, will not be completely copied and regenerated in my next life. In addition, according to Buddhist scriptures, after leaving the body, a STM, or an animal, will enter the fertilized egg of a person or animal, under the action of karma. There is a lot of interaction with the Soul of parents in previous lives, no matter which side is helped or hurt. And then this Soul and the fertilized egg will be closely combined to start a new life. In addition, I think, all individual Souls were directly created by the Creator, separating a small part of its own energy at the beginning, and a huge number of individual Souls were created at that time, allowing them to enter the material world or physical world, which created at the same time to experience, and continuously sending the information they experience back to the Creator to confirm their existence. I would like to hear your views on the above three points, or could you talk directly about the process of creating individual Soul and its purpose, and where it goes after leaving the body, and how it enters the fertilized egg, or has a new physicality to start a new life? Thank you very much.

K- First of all, we got to look at it two ways. One is the transmutation. In the transmutation you never die, in a way. Because you change from the dimension of the STP to be, (1:36). or the dimension of the Soul to be, in charge of. So, death the way explained in Buddhism does not exist. Or what you explained just now. We do not die and fertilize another egg.

If you extend the knowledge of fertilizing another egg, with your Soul taking a new position, in a new dimension, after your physical death of today, as you call it, now it has a new environment and in the interaction with the new environment, or what you call it, the egg, it starts a new cycle. What we said, the creation of another star, another galaxy, another system. So, in a way you don't enter into another egg, your Soul, in gaining its strength and through its strength, of what we call, gravitational and magnetical, finds its position in the universe. And that, if you want to call it position, becomes the egg, becomes where, now, possessing both gravity and magnetical field, start the cycle of gathering energy from this environment, the womb of the universe, and then starts the process of cycle of life, what could be.

So, in a way, maybe part of your belief in Buddhism now can be explained in more detail scientific way, by the understanding more about the Creation. And in that process of creating new condition, new environment, you give new life, you create condition for new existence, as the fields by interaction, by natural process, create friction, create smaller plasmas and the interaction of the plasmas with a plasma of environment leads to creation of life. (1:38).

Two dynamic fields in interacting create a condition common denominator, which becomes the seed of the next collective connection between the two. As happens with the egg and the sperm in the womb of the mother. The only difference is that instead of the womb of the mother we have the womb of the universe. Collective energy in the womb of the mother to give additional energy to the, what we call, new dimension of the fields, which becomes later on the STM. Then it brings us to position of what we call, the life in the universe. It's just change of name and the dimension and the field strength and the freedom of the plasma.

In the physical dimension, we always begin with, start with the STP, which is the physical dimension of the two sperm and the egg, leading to creation of the Soul. Collective field strength of the totality. And at the same time, as different condition for transfer of energy, holding on to energy, conversion of the energy of the environment to the physical body, leads to the creation of the man.

If you are born on another condition, dimension, where there is no food, but you still exist, you don't need the dimension of the digestion system. So, your body doesn't create it, your STP in that dimension, is according to the physical need, confirmation of existence of the man in that time and place and position. The STP is not just energy pack, it's carrier of information in its interaction with its environment. (1:40). It's no use creating another man on the Moon when there is no food, there is no air and there is no water to eat, drink or breathe.

So, the STP creates condition of the physical life, in interaction with the Soul, for confirmation of existence in that point, place and position. You have a life without the lung, because there is no air to breathe. You have a life without the digestion system, because there is no food to eat. And what's the use of kidney, when you have no water? Now you understand, the common denominator, the emotion of the existence, in interaction of the field of the STM and the STP of the man. You call it the Soul and the "Spirit."

So, now, which way, which story through Torah, Bible, or Koran, or the word of Buddha you want to accept? All is the same knowledge, is how they interpret, how they put it that the knowledge of the man understands more? In Buddhism there is more interaction with the emotion. In Islam is more interaction with the physicality. You kill, you are punished, you cut your hand (off) and everything else. Because people of time of Buddha were more spiritual, understood more about the Soul. Arab guy understood about the hand and the finger, and where to put it. So, they deprived of him, to punish him, to teach him. Where, in Buddhism, you enlighten to understand more. But it's the same story. The same slavery of one into the other, where now is the freedom of both. With the new knowledge and understanding of both. (1:42).

Any other question?

Q: ... In the 493rd Knowledge Seekers Workshop, a Knowledge Seeker asks about the sacrum, and then Rick goes on Wikipedia to look up what the sacrum is, then an image of the pelvis caught my eye, which had the appearance of a dynamic core, with the sacrum positioned in the center. Then you replied that it was too early to teach about this. This reminded me of two teachings, in it you say that when we breathe in, part of the fields are to feed the Soul, and through the lymph, the Soul spreads the fields throughout the body. It also reminds me of the gas reactors, where you introduce gases into the inner core to expand the fields. So, would the basin and the skull of the man be the two reactors, just like the Sun and the Earth? Is the interaction between the two through the blood flow, like the heartbeat of physicality, and through the lymph, like the heartbeat of the Soul? Thank you very much Mr. Keshe for today's knowledge, which brings more understanding and clarity.

K- You can look at any physical part of the Man, and you come to the same conclusion. (1:44). Move from the bottom, to the top, to the brain. It's the same structure. You have the left brain and right brain. There, there is no physical bone condition of the shape, but it's a physical condition of the soft tissue. Bring the same knowledge into the two kidneys. bring the same picture into the heart of the man, bring the same picture into the lung of the man.

You always need, for life, a slightly two different field strengths, that the interaction in trying to bring a balance between the two, it creates continuity.

Man looks at the lung as two pair of things, but the two lungs are not the same. A slightly different structure, a slightly different composition, one works to get the other one going and vice versa. The same is the brain, the two half of the brain are not the same. In having a slightly different structure, they have different what we call, part of the Spirit, part of the STP strength, which creates that heartbeat, the time to balance, it creates intellect and emotion.

The same is with the hip, the same is with your toes, left toe, right toe, the same is with your thumb, the same is with your ear. There is a reason we have two of everything in the present physical body of the man on this. And if you go back to the very first teachings we always spoke about the condition and the shapes, which the Copper creates in this condition. Go back to the early teaching. (1:46). This is a characteristics physical interaction of existence of Copper in the dimension of physicality of the man on this ?? earth, which is in your muscles. Go back, long back into the teachings.

Splitting and then confirmation of the balance between the two, is one of the characteristics of the Copper which is a cornerstone of life on this planet. Because of its conductivity and in the position of the dimension of the vacuum condition of the physical body of the man as a Gans, it creates this, what we call, twin structure.

Any other question?

Q: ... Is the skin of organs and bones or muscles a Nano coating in our body? What is the function of the sack covering of these organs? Or does it provide information about the appearance and movement of a given body part?

K- In a way, the skin of every organ, even the skin of the man, is to contain its properties and field strength, and nothing else. And in that condition, it creates a condition of holding the part, and the collective structure field, the strength of the STP. Whatever is in that sack, be it the kidney, be it a heart, be it a bone, (1:48). has a rhythm, has a field strength of itself, that it identifies as that. So that creates part of the Spirit in passing, transferring that energy through the river of blood.

It's very much like you take a water from a river and you say there are these contaminations and these materials in this river. And it's because a factory of the roads has put some poison in, the factory of the roads has put some more rubbish in. That factory is called the kidney, the other factory is called the heart, and collectively they put the energies in this river of life, we call, blood, or we call it's interaction, the Spirit of the man.

So, and again, the skin itself is another plasmatic magnetic field containment, which has the strength enough to contain the field strength of the cells of that organ inside it. That it doesn't interfere with outside, or interferes the way the totality of the structure of physical life has decided for them to do.

It's very much, if you go back to the teaching, part of medical teaching, we always in the, what we call, dimension of the digestion system. We always say, oh, we eat the food and it goes in the stomach, and the acidity of the stomach digest the food, and then it goes to the long intestine, and then it come out of the big intestine, and we absorb the food.

And then, I ask one question, you put a banana, Where does it cross? Where does the banana go? And then now we find out there's hardly anything to do with the acidity of the stomach that the food converts. (1:50). The conversion of the energy comes from the salinity of the stomach when it converts into the gas. The acidity which you created is part of Nano structure production. Now you're familiar with it.

So once you Nano coated the material you put in stomach in a way, the salinity opens it up into a Gans and now is available as an energy to your body. And this is what the world of science has not understood. This is why we are doing this test tomorrow. To find out how the conversion of the matter into Nano in the stomach of the man leads to separation, and creation of Nano materials, which then the salinity in the stomach converts it into a Gans and travels the span of the, what we call, the intestine.

And then, oh, now they say there is a gate here, it opens up this goes. What a nonsense. The layers of your stomach is another Gans transmission, transmutation between the lymph in the body of the man and the food inside. And that transformation allows the energy of the food you ate crosses to your liver. And then, again, from the lymph into different organs according to the structure. And the interesting part is when the lymph receives the energy of whatever from the Gans's of the material going through intestine, now it feeds back the lining of intestine to support the next cycle. (1:52).

So, the world of science, of all the problem we have created, is the creation of our own lack of understanding of the world of Creation. We have created a mayhem of a nonsense, and now we believe in it because somebody has written it in a book. Now we have to destroy that knowledge which is half imaginary, and it doesn't exist, and we've given it pictures, shapes, and everything else.

So where does it come from? How do we confirm? How we change the matter into energy? Now we understand for the first time. And then the rest is understood. How a banana becomes vitamin blah, blah, blah in your lymph, and then converts again back into transmutation to blah, blah, blah, it becomes blood. If you look at it, that banana came as a matter when your stomach went through a transmutation, became energy, crossed the wall of the intestine, now appears as a blood cell in your body. Now appears as a bone. It's gone through the full transmutation from food to energy, energy back into a mass, you call it a bone. Nobody came and planted a bone in your structure. You went through a transmutation and then through it, came through a transportation and you've moved, as you call it, the body of the man.

We entered the world of Creation through men of nonsense. People like Einstein, who have created so much problem. And others who created the more problem, trying to

confirm their existence, (1:54). in a way bringing, bringing more and more fancy thinking into the dimension of reality of Creation.

Yesterday I received a message, I think from Azar or somewhere, that an 11 year old girl in London sat for a test, IQ test, and in Oxford University, and she has come out with a 162. Up to now, the highest man we had was one Einstein and one cheated guy who was given all their things, called Stephen Hawking. Now, this girl at the age of 11 has come up with two points higher than Einstein. And now, what is the IQ of our Souls when we put them to this test? 1,000 ... 10,000? And if you look, both, what I call, fabricated knowledge providers, Einstein and what I call, Stephen Hawking, both don't even exist, their knowledge in the world of reality of the Creation. Two fake people put up by two fake structures and made to be the most clever, where 11 year old can beat both of them.

And now, the new generation of man, born out of the Soul of children of Mitra, will have 10,000, 20,000 IQs. And then what we'll say? We accepted too many fallacies, (from) the "man of no knowledge," (1:56). who made themselves to become, to look to be knowledgeable. The way the Americans are, in a way, running away from the German guy, who became the father of the space of NASA, very soon, man of knowledge will erase the name of Einstein and Stephen Hawking from every page of science of man. Because our children can not be hold and cover with the fabrication of lies. Because now we understand, we can analyze. We see a new knowledge through energy, not through the physicality that any man could imagine, whatever fancy it has written.

I wrote to the Chinese authorities saying, in the presentation of upcoming time, we would like to show how we can eradicate Parkinson, in Macau presentation of the Keshe Foundation, in minutes. To show the change in the knowledge. To show the difference in the new understanding.

Any other question?

R: Okay, in our Q&A here, Irmgard is having difficulty understanding the blood test.

K- If you don't have a blood test, you can do a urine test. You go to any doctor, to any chemist and say, I want to test my pH. And they give you a film and you test it. (1:58). It's as easy as ABC.

R: But the blood test is special, you'd either have to have a blood sample...

K- That's a very complicated one, if you want to do it. You do this with a film, you go to a chemist and they just give you a film, and usually you pass water on it and it shows. It's that kind of thing, or some fertilities show with ?? there, with the saliva.

Q: ... Tomorrow we need to measure the pH, this is clear. What do we need to measure next Friday?

K- Insulin.

R: So the blood sugar or...

K- Yeah, yeah. It's very important, this is... This will give us a dimension of transmutation of the Soul. Then, those of you who participate in the sessions tomorrow and next week, then I'll explain to you, if this goes, especially many of the Knowledge Seekers who came to Manchester will understand how effective this will be. To know how to transmute from one to another. Salinity gives you condition of the manifestation. holding on to physicality. The, what you call, sugar or whatever, will give us a dimension of transmutation. It's energy given. Sugar, like you. This is the way you understand it in the world of matter state. But we use this knowledge for another dimension, to start teaching the Knowledge Seekers to understand when their body is ready for transmutation. (2:00).

And you know, we have, they say, women with the temperature and blah, blah, know when they have an egg ready to be released. That's the cycle of life. Now, Knowledge Seekers, in setting up conditions and tests like this, you become part of the structure to understand for yourself how you can bring a position from the dimension of physicality to dimension of transmutation. That's the reason for the test in next two sessions. If you put it that way, "oh, we want to know. Mr. Keshe said." No, you have to understand. You have to realize.

We'll bring this back into the next positions through the same process. We show you how to feed yourself. Those of you who participate in the test from now on, we put up, you are, in a way, collaborating for us to bring knowledge forward. But in a way, it's for yourself to find out the way of feeding yourself without touching the nature, how to absorb fields. Just what I said a few minutes ago. What happened in your stomach? How the fallacies of the knowledge has thrown us away from how we actually digest food and what the digestion system is.

If you can create that condition which the salinity creates a condition of the Gans in your body, inside your body, without eating, you absorb energy from Unicose. This is what it does in your intestine. Your intestine is not a place for energy to cross your wall of the intestine to feed the lymph. (2:02). By the law of physics, by the law of plasma, you create that seed inside the stomach. And the cosmos has a bigger dimension field strength that by trying to feed, trying to connect with that seed in your stomach, creates energy crossing your body.

This is what we do. We put a double loaded patch on the back and a single patch in the front. Why do we do this? Your spinal cord is a transmitter of that energy which comes through your body. If I explain how in depth we have got you to do things without you knowing, you'll understand how you've been educated to the knowledge of the universe. But you don't understand. You're still looking for that "blip, blip." As I said in the last week, with one of our Knowledge Seekers who's heavily involved in MaGravs, you're always looking for a few volts. But you do not see the "mega" energy which is available through the whole system.

If you understood why we encouraged, and some of the Knowledge Seekers went through production of the Gans water and they drank the Gans water, and say they don't need anything. Why? Because instead of eating the food, converting it into a Nano, converting it into a Gans in the stomach, and then putting it into the intestine, this energy water you drink becomes that seed that absorbs energy from the Unicose, the 80% you need.

How hard is this to understand? Why does it look like a magic? Because you didn't understand the knowledge. You were too busy not hearing, not seeing, but you never understood the structure of the science behind it. (2:04). I always said, you take from this technology according to your intelligence.

Drinking the water, the Gans water, it's not that it gives you energy. No, no way. It puts the seed of the energy in your intestine, in your body, in your stomach, that allows being a weaker to absorb energy from the universe. And that's how you're fed and say, oh, I drink a Gans water, and I don't eat food. What a nonsense. You eat more than before, because this time, you don't even spend energy to break it up into Nano. You directly receive energy fields from the universe, what your body needs to carry.

Now you understand how you're feeding yourself with Gans waters. You're seeding, you're sowing the seed of energy in your body, and the cosmos feeds you. This is where the 80% that is the essence of your life comes from. Now, "oh, I took Gans water. I didn't eat for 10 days. I'm eating the Gans water. I'm drinking this. Excuse me." Do you understand the work of plasma? You created that weak plasma, and the universe has to feed you. It becomes your father. It becomes your lamb. It becomes your banana. By balancing the fields in the stomach, the body says, what energy I need to get from the universe? And it feeds you.

This is what, as Knowledge Seekers, you have not understood. And you say, "oh, the guys in China didn't eat for seven months or two years." Or the man on the space. We just placed the seed of, we don't even need, this is the knowledge you'll gain in London. We don't even need to feed you the Gans water. We sow the seed of the energy of universe in your body in that conference. You'll be fed by the universe. I wonder how many of you who truly connect, will walk out of the London conference, and you'll feed yourself for rest of your lives. Because we have set the seed, it's you who have to control it through your Soul.

And then you understand. I told you, in London conference, we show such a technology, that baffles the world of science of today. Many libraries burn their books of the nonsense they have stored, to teach the man the lies of Creation. Many of you, who come to London Conference, your life will change, will be touched. And those who attend the week before, you will prepare for that change.

Now you understand, why do we need to eat? Was all this knowledge. We're coming to a point of the delivery, to make man ready, to understand in his physical body, does not need to eat, that then he goes to space, he's adapted, he understands it, he shall not kill

another entity in the universe. London Conference is the biggest show on this planet, to bring the biggest change in the race of the man. One day you will understand, those of you who participate in it, say, "I was there when the history of man changed." No magic.

R: Hello Mr. Keshe, I lost your audio there. (2:08).

K- ... Just give me a couple of minutes, I received the call, I have to accept, it's important. ( break ...)

K- ... (2:10). Hi Rick, I'm back. Sorry about that. This is a very important call for the Foundation. I had to accept it. This is the reason we came to Netherlands, for this reason. It had to be completed. It's important for the future of the Foundation worldwide. We are a Dutch structure and we have to work within the structure of the Dutch government. And these things need to be sorted. Soon later, you as Knowledge Seekers, when I pass away, become responsible to oversee these functions, interaction between the Foundation and the governments. And I do most of these things, as I've done from the beginning.

But, as I said to Knowledge Seekers, those of you who we are preparing to take over the function of running the Foundation, have to interface with governments, interface with what we call, legal side of everything in every country according to their law. And so, this is the reason we came to Holland. (2:12). And we are here for past 3 - 4 days with the head of the Keshe Foundation management team, standing by to complete part of the process of the Keshe Foundation with the Dutch authorities, and it has to be done, it has to be completed. And we had the same with Austrian, with the Chinese, with the Americans, and the rest of the world we operate.

Keshe Foundation operates in 51 Nations, through it's organization and companies. And these are the, what we call, management structure, which I have run, more or less, for past 20 - 25 years. And now gradually, as I prepare to leave the physicality, it's your responsibility, you have to learn. You have to learn how to interact with governments, how to talk them, and how to, what I call, teach them. And how to prepare them for the next step.

And the biggest problem for you Knowledge Seekers, is, once you become in charge of running (the KF), your headaches just start. I have just cut the grass off the ground. Now you have to dig a hole, put the foundation in, and build the building of knowledge on this planet. I've done the easy part, the hardest part is left with you, because it's your planet, you have to deal with it. And we try to make it as smooth as possible and part of these calls and these things and these meetings, is bringing nations, governments, authorities in line to work with each other. This meeting, we just had few seconds of calls being held back, it's taken 8 months of the Keshe Foundation to change everything from Central European authorities to national and international at a governmental level, (2:14). to accept the Keshe Foundation in a different way. And now we are here to complete it with the Dutch authorities. It'll bring a big change. In the next few weeks you'll understand the change, even the silence, you're waiting, will bring to the Foundation, in the coming days and months.

The next question.

Q: ... How will the Press work, the old fashioned way?

K- Show them a new way. I was walking on the streets of Manchester last week, and I was with Knowledge Seekers. And we passed through the West, back end of Manchester center. It used to be called the "Fleet Street of North." It's called Angkor Road, and all the, if you remember, the old presses, the ink presses, tick, tick, tick, tick. So you run, create the newspapers, daily newspapers, were on this road. And now, with the new computerized systems, we don't have these old ink belts, and the rest of it, because we used to stand when I went to Manchester, nearly 50 years ago, 40 odd years ago, these are still running. And now I passed, all these old buildings have been demolished, and the most modern city in the center has been built. And I'm saying, we used to watch newspapers to be printed here. And, yes, was that. What came out on the morning, on the headline of news, was the news, the most important news. Doesn't matter who detected it, what it was lied to, whatever it was important, that was there.

Now the Press comes different way, "awareness of the Soul." (2:16). Would we see, what I call, Internet communication? Or would we go through the new system of the wireless plasma communication, which Keshe Foundation has brought into operation? The first of these systems in a wireless, what we call, plasma condition, was taken away by the Knowledge Seekers in the conference last week. And the rest is getting sent out in the coming weeks, to those of you who purchased it. And then you'll find out, "I heard this, I know this knowledge." Then you start realizing, "I'm getting a knowledge through the new way. I'm getting informed of the truth, the new way."

It's not anymore coincident, "oh, I thought of this." How did you think about it? Where the knowledge came on? It goes back to, "How did I use the new plasma communication system packs?" And then, there are a lot of things we teach you in the future, how to be connected. Those of you who had a headphone sets, you took and you use, you connect to the conference directly, because we'll set a system inside. The knowledge, the information will come as knowledge, as emotion, as pictures, whatever you want to do it. You call it a dream, it's the reality of connection to the new technology. These are the things we start teaching you, you start understanding it. And then you have a favorite, this system or that system.

It was very interesting, our Knowledge Seekers know what I'm talking about, if you were in a meeting last week. I connect with this system more, because each system was numbered. So, I want to take system 1 or 3 or 5, because I have a connection to it. You never understood, it's you who have connected to the new line of communication. (2:18). It's like, I like Apple, I like Samsung. Now is how the structure of system has matched my field strength, that I can connect to the rest of the universe. And these are the new ways. And then it's not a dream anymore. It's your new Press. It's new understanding and new knowledge. And it's not coincidental anymore, because now you connect to all the dimensions of ?? knowledge. What you want to know, the way you want to know. I want

to speak Chinese with the emotion of it, not the word of it. And then I understand why they said, what the joke meant, because I carry the essence of the knowledge of the life in the language. Then it becomes sweet to become man of the universe, because you understand everyone, and not just the words.

Any other question?

Q: ... Dean made an announcement in the One Nation, One Planet, One Race meeting on Tuesday, concerning the Cosmic Ray Communication Bundle. Can you expand on this Mr. Keshe?

K- I don't know what he said, how can I expand on it? I wasn't there.

R: He started expanding, but he was asked not to reveal any more, than what he already had.

K- He doesn't have a system, it's his understanding of it. No one has a "Communication Bundle." The Communication Bundles are getting dispatched for those who bought it this week. The manufacturing has started this week. (2:20). So nobody has, except me, no one, and our production team, has ever put a communication bundle on their head. And even me, I don't like to be in it, because it brings a lot of things in.

Even the systems we gave, the Knowledge Seekers took last week, is not a communication bundle, but uses the plasmatic field line of communications. It's two to different things. Those systems are totally for different purpose. We put five units out to five of the participants. They took it with them last week. And there is a reason for it. Don't touch it. Don't do anything with it. Keep it the way it is. And it creates the condition we want. Each one has gone to a different part of the world. And will bring that condition for us, an extension of the Souls and interaction.

Whatever Dean has said, as a member of the Universal Council, is to their understanding, interaction of the Souls. But you cannot reveal something you haven't had. There is no, not a single Communication Bundle, up to this minute, has left Keshe Foundation manufacturing, even though they are produced. They're so complicated, in essence, that it take us, all our team, one unit a day to produce. Sometimes two days to produce one unit. And they're not easy.

And when you receive it, don't touch it. Just use it the way it is. The new Communication bundles, which you receive in the next few days and weeks, (2:22). as they go through the production, has no cables, has nothing, it's changed. Has no wires to connect anywhere, has nothing. Headphone sits on the unit. And let me go somewhere. If I can show you. It is actually a production line. There is one unit was placed last, or this week, at the Linz Center. It's a dummy. It's totally empty. But it shows the new communication. The new communication bundles is not fully completed, because there's so much rapid development coming in. In the next few months, a new edition will come in. But I show you, this is what a new communication bundle. Nobody has seen this up to today in

public, has not been delivered. I think we showed it to the Knowledge Seekers in, what you call it, in Manchester conference. And I'm going to see if I can share it. (2:24).

This is what you will receive. It's the first time we show it in public. If you remember the original units we showed, had wires and everything else. It's all gone. Again, it's advancement in technology. And even this is like "Apple 1." We'll have Apple 10 and 15 and 20, and you can imagine what will come. Very soon, the way we see it, this white unit, as we develop, will go into the headset. So one headset will be a complete unit with everything.

And what you see there, you don't dream anymore, because you're a creator of reality in the dimension of fields. We have to learn that we live two dimensional life. We call it a dream. No, that dream is not a dream. It's a reality we ignored. We called it a dream because we couldn't handle it. Now we have to handle it. And I foresee, maybe in two years, five years, that we reduce even those headphones to single units, embedded within the structure of the physical life of the man, in the communication with the STP, in a way, in the bloodstream. Quite possible. That allows instantaneous conversion and transmutation. (2:26). But this is in time ahead.

So what, what you call it, Dean has brought, is part of his own intuition, and part of being maybe a member of Universal Council. And in the past few days, we have delivered such a dummy unit. There is nothing in it. just shows, it's in, what you call it, in the Exhibition center, which is still running, till we pack it up in the next few days or weeks. The Linz, we have given notice to our, what we call, the owners of the properties that we're leaving by the end of October. So, till we get to that point, it's just anybody goes into exhibition you can see things. There is nothing that we cannot reveal, there is nothing there that can be revealed ?? ?? revealed.

And people who attended the Manchester conference, they had a feel of where this, how this thing will look and be, but the units which were in, what you call it, in Manchester, are again totally different and for different application.

Q: ... Can you tell a bit more about the new possibilities and how advanced the possibilities are, which are developed in the background? Thanks. (2:28).

K- We work with different structures of research. We have frontal research and at the same time I work with a lot of people individually or group of one and two in the background. So, if you take overall structure of the research and what is getting developed, we are very, very advanced. Some of it is frightening how advanced we are. Even our own Knowledge Seekers don't understand what they are doing, but they understand part of it, and they follow it because they see other effects. But the actual system is set up for a totally different outcome. And as we come to it, we bring your attention to it. And that's the only way, as Knowledge Seekers have seen, its work, whatever, they can connect.

Instead of targeting something which I want to achieve, I bring the environment of understanding, and then show the same system for different targets applications. We are extremely advanced. We can complete transmutation even now. We can complete transportation, London to New York, in minutes today. But first of all, our people are not understood.

The Iranian team, within the structure of Iranian flight system, are years ahead. Even them with being years ahead, they are still years behind what is actually taking place. Because there is a very big problem, or there is a very big difference. In Keshe Foundation, I head everything in research. More or less, our team had their own bits into it. (2:30). But the direction we take is, we decide today we've gone far enough. I teach the next step. I don't wait, to wait for the budget, somebody decides. I see our Knowledge Seekers, our team, have understood most of the grasp, some of it, or understand, we jump 10 years. Forget about it, you understood these things, let's do this.

When it comes to the government structure, it's different. You want to change one screw, or one panel, it has to go through acceptance, authorization, money spend, blah, blah. The only country which is fast speeding these things It's the Iranian SEPAH, an Iranian defense technology in nuclear industry. Decision made by head of divisions, done. This is what we understood with the Keshe teaching today, we go. Iranians have put a team to understand my mentality of thinking, not with what I say. And they're very good at it. This is why we even brought the Chinese to work with the Iranians. With the Iranians, they... Ahmadinejad had a very... or Ayatollah Khamenei had a very, very clear understanding of the teaching. This guy speaks, we look at the word. We have to understand the essence that we can be with him.

And that team, you listen to the teaching today. I work with the Iranian Keshe Foundation team. But there is a team behind which has worked with my work for past 14 years. They sit to understand the essence of the knowledge, not the word of the knowledge. And they work at it. Because they have seen the essence of it. So, how it will take shape, (2:32). is how you understand it, and how you interpret it, and how much technology is behind the scene.

Our technology, our team, have everything to complete the transmutation today. Within the capability of the Keshe Foundation, we have built the system. Actually, some of you have already used it, without you knowing, to convert energy into matter. But our Knowledge Seekers don't still understand it, so I have to take time. We built it last year. I built it 15 years ago. I said to the Knowledge Seekers before, those who came and went to the Moon and they brought handful of dust, or brought a stone with them, I said, "you need a system to convert this dream to reality, that it becomes a material." We already built that system.

What you touch as a stone on the Moon, when I put your hands inside the system, becomes that stone. So you didn't dream, you actually been on the Moon. We've done the reverse of this with Ali in Canada 7 years ago, when the hand disappeared in the system. So it's not something we dream.

It's our Knowledge Seekers have to understand the society when it's shown, as we understand, how can you bring a stone in your imagination, as you call it. You put it in the environment, it becomes that stone. And the scientists from Earth put the stone and say the stone is from Moon. It's come from Moon. (2:34). We showed this to the Chinese military in one week of tests in China in past five weeks. So we're not talking about something's going to happen. And they tested it, and they confirmed it.

So, the knowledge is there, the man is not ready. I brought the car, but nobody knows how to drive a car, so the car is parked. And the key is in my pocket. Show me a driving license you can ride, and knowledge of the universe, I give the key to it. Very complete, the knowledge. What sits in two or three of laboratories of the Keshe Foundation, and the people are taught individually to, is immense. If the Knowledge Seekers who are taught, are Iranian scientists, in Iran defense technology, in the space development, release the knowledge they understood, America become slave to Africans, in the lack of knowledge.

This is how advanced we are, but you are not ready. Then I become a magician, and I promised I'll never do magic. I'll make you to understand the science of it.

Any other question? (2:36).

Q: ... Is the "all in one system" you mentioned last week, in fact, a replication of the environment of Earth, where it was created perfectly, allowing people to tap into it, like the process of transmutation?

K- In a way, yes. (Would you like to change your screen please?) In a way, yes. In a way, no. But in a way, if you understand, your Soul does the job. We just train you how to use your Soul. You know, you can drive a car from the day you're born. If you can understand what a clutch, what a brake and what the accelerator and what the gearbox is, and .. how you can mix it and get what you want out of it. You don't need to wait till age of 18, you can drive while you are in the womb of the mother. It's the same situation. We all know, but we need to be taught, and we have to be at the age of maturity to understand, you can't use a brake, the car, to kill someone with the speed, or run yourself into a wall.

It's just time of the maturity man needs to understand the knowledge. Otherwise the knowledge is there. None of the things we (taught) is magic or something made up. We just open your eyes to the knowledge which exists, but you've been ignorant to it or you've been put the wrong way. That's all. Instead of calling and call it, you know, when you drive a car, they put a "L" plate on your car, you're a learner. (2:38). We change that learner to Knowledge Seeker. You're in that stage, learning about the knowledge. You're "L" drivers of the knowledge of the Creation.

Any other question?

R: We will have to have a new "K" rating. Knowledge Seeker, look out.

K- Dangerous. You know what the Indians have a beautiful word. In Urdu, in Persian , no, they say, they call it, << speaks in Farsi >>. It means, half a doctor is dangerous for life, because he doesn't know the whole thing. He can make a mistake in his medicine, because he's just, "I learned half of the knowledge." And it's the same with the man.

R: Yes indeed, my first experience of the freedom of having a bicycle, was running directly into a telephone pole.

K- Not knowing the telephone pole was already there.

R: Yeah, it was there, but it just seemed to magnetically attract the bicycles, so...

K- It was... I went to this... I spent a week in Manchester, 10 days in Manchester, and as I've been away for nearly 20 years from Manchester, I had to go through this city, and it brought back so many, so many memories. And I passed the place, going out of Manchester, just a few, a couple of kilometers away from Manchester United football ground. I was going to my, what you call it, place of what I call, beautiful game. And there's a, about, there's a hand wall in the middle of two carriageways, they put a wall with a plant on top of it and everything else. And I just bought a new car, a Volkswagen, (2:40). and at 4 o'clock in the morning, I stood on the street, watching the car being on top of the plant pot (concrete wall were the plants are).

The police came and says, "how did you get on top of that plant pot, nearly a meter and a half from the ground? And you're standing here, with no scratches on your body." I said, "I don't know, I just found myself on the street." And, they said, "you have to go to the hospital, because it cannot be like this, you have nothing." They took me to a hospital, they said, "no, there is nothing." And the police, later on, questioned me saying, "the front of the car is gone. The engine sits in the driver's seat, more or less. But how did you get out of that car, on the street, with no scratch?" I said, "I don't know, I just saw a car coming on the side. And, next thing I know, I'm standing on the street." Brand new car, 250 miles on the dial, was sitting one third of its length, short, on top of a plant pot. And I thought, myself asked a question, did I learn how to drive? How did I end up on top of this pile?

And it was amazing, you talk about the bicycle and the lamppost, I don't know how the car ended up on top of a plant pot. It was attracted to it, or something happened? But according to law of physics and law of cars, the car should have been half way in my stomach, but I was on the ground, standing next to it, without any scratch, watching it. Four o'clock in the morning. Very interesting.

Manchester has changed. If some of you know, I explained to the Knowledge Seekers, Manchester is known as a city of slaves. (2:42). It's where man slaved man in the same color. But, when you stand in the city center, we call it "Mills," we have a "Canal" Street, where the canal was built to move cotton. Manchester was a city of slaves, because we

have water coming from the mountains of what we call, ?? Pennine and the other side, and these waters created the running water needed for the mills to run. And the slavery of a white man in the slave city of Manchester, started with slaving the black man in Africa, in George Island. Where man, a slave man, in the color of the skin, took him to America to grow cotton. The same slave was used to bring the cotton to Liverpool, put on the canals, brought into Manchester, into different mills, to convert the cotton to thread and clothing, or fabric. And, in Manchester, the children of the white man, and the white man was a slave to run these mills. And if you stand in the city of Manchester, in the center, and all the mills around it. You have a mill, depends how many people lived or worked in this mill. The owner of the mill built houses next to it. They call it two up, two down, two room downstairs, and two room upstairs, two bedroom, and toilet was outside. And the man was given a job. Then his children, 5 years, 7 years, 10 years, worked with the father in the mill. (2:44). The slave literally paid enough to eat in those houses he gave them, because, "I gave you that ?? combination, you just need enough to live." Man had no saving, no future, no holidays.

In the slavery of the Bahamas, slaves fought to get one day off, called "Junkanoo Days". If you go to Bahamas, you know it on Christmas Day, called "Junkanoo". Junkanoo fought to get one day off a year, day of Christmas, that he go to church, free of the slavery. And in Manchester they didn't get that. So, the man worked as a father, his children age of 5, 6, 7, when they could know what the finger is, they put it into these mills. And when their father died, they put the children the same day, with the everything children, on the street. They lost everything. And, the next man moved in.

The slavery of white man in Manchester is very deep, But British are too ashamed of speak about slavery of their own. And people died on these mills. Just to have food to eat and a shelter for their children. They were a slave. Children of theirs were a slave. And Manchester was known as a slave city of the white man, where the slave was used from Africa to America. Slave brought the cotton, and the white man slave, made money for the white man.

And, there is a lot of pain in this city, you feel it. I lived there for nearly 30 years. And, this week brought back, understanding being away, the totality of things I've missed being too busy living in that city. And it's changed, it's become skyscrapers, it's getting the features of the skyline of New York and big cities, just building on top of each other to show man has more, become more arrogant and I can go higher. (2:46). But it's very interesting how we change our understanding. And we try to cover, that it doesn't show how bad it is.

But if you pay a visit to Manchester, or northwest of England, Manchester Bolton, that area, is the biggest slave city of the white man, without ever man knowing that they've created these things. We just call it the cotton or wool from England. We never understood, this is done with the white slaves. Children, age of 5, 6, put in, who used to work in these mills, who used to store in these mills, and I always ask, no one says, "can we see the certificate? I want to know if what we buy was the history behind this building. When was it built? How it was built?" In Manchester, a good example of how

the white man is good to cover his own slavery, his own abuse. And all this was brought home, spending back again, what I call, the city where I grew up.

Any other question?

R: We were looking at some of the accommodations they had for the employees back then, and they didn't have beds for them. So, and they worked, what, 20 hours a day or something, enough for their food. And so they had a rope strung across the room, and that would be where they would sleep. You would just hang your body, your waist, this waist high rope, you'd hang your body over it, and that's how you would rest, apparently. And that's how they got the name, "flop houses." (2:48). You flop your body over a rope.

K- There's a lot of history in British culture that is not. No, they don't like to speak about it, but it's actually a sense of how the nation is built up. It's like, you know, when Queen Victoria used to have a bath once a year, it was a public knowledge, it was announced that the Queen had a bath today. You know, like you celebrate the birthday of the Queen, public knew when the Queen Victoria had a bath. It was announced, because she washed herself once a year, put it that way. But the strangest thing is, the miners washed themselves every day. And the people who work in the mills, because it was so dusty and everything, they washed themselves every day.

There was a, what you call it, metal tub. They filled it up with the water. And they had to wash the soot and the dirt off, otherwise they couldn't even see what they're eating, put it that way. And then, after the father washed himself, then they washed the mother, if she could wash. And then the children. And it started with the age. And the last one was the baby of the house washed in the same tub, same water. So a minor was washed more than the queen. But you know the story, we say, don't throw the bath water with the baby. Because the water which the father washed himself coming from the mine was so black, you couldn't see the baby you washed. And many times they threw the water, the baby was still in the water, was thrown away. Now it becomes expression in English. You say, don't throw the, I mean, don't throw everything out without knowing what you are doing. So you talk about the rope. There is a lot of history in the history of the British empire, which was a very falsified empire, all by image of one palace in London, (2:50). and didn't give the truth.

You know about the story of the Queen and the "Tupperware"? You know what Tupperware is? Tupperware is these plastic boxes which has a little lid on plastic lid, and it's for poor people, or common people to, you know, store food. Used to be very fashionable in nineteen seventies, eighties. And somebody broke into the palace and sat with the Queen across the bed, while she was having her breakfast. And then says, "oh, Queen eats out of Tupperware, not out of the gold plates and things they tell us." Because she's so poor. So, don't get fooled by the palaces, inside is empty.

It's very, very interesting. We have a good expression in English for it, we said, and we say, "fair coats and no knickers." It look to be very expensive coat, but they don't have the (under) clothing to wear underneath it. You just look at the outside, got a beautiful

fur, which was stolen from the others. And then to get that fur coat, you go to "flea market." The flea market, it was where they used to sell the "second hand," and the everything of the fur, with the fleas used to live in it. So, you didn't buy a fur coat, you bought a coat which was full of fleas.

R: ... Free fleas at the flea market.

K- That's where the (word) "flea market" comes from. I think Dean can tell you more about that. And this is what I say... This is what I say, when you speak a language, you have to understand the essence and the culture of it. (2:52). And talking English about the language is very different than living inside it. And living in England you get the... partially the essence of the culture and the life. And living in that way with the English community, you learn a lot about them and about the beauty of their culture and the pitfalls of the culture.

Any other question?

Q: ... In the teaching of the 499th Knowledge Seekers Workshop, you said that the meeting in Manchester will close like the "last supper." How can our Souls understand these words? I would like to put my question into context with a short passage from the Bible, which says that in Luke's Gospel, Jesus says the following at the last supper, "I have longed to eat this Passover with you before I suffer, for I tell you I will not eat again until it is fulfilled in the Kingdom of God, and I will not drink of this wine until the Kingdom of God comes." Would you like to speak a little more to our hearts about your quote on the last supper? Thank you Mr. Keshe for all your love and for not giving up on us.

K- Being on both I can explain what it means, both on the time of Christ and the time of the man. In essence, last week, as is tradition with the Keshe Foundation, When we have conferences, and when we have meetings, public meetings, for a sessions of days or weeks, whatever, the last night, after the last session, (2:54). we always invite the Knowledge Seekers to eat together, we call it, it's become traditionally known as a "last supper." So, last Friday night, all the Knowledge Seekers, before they leave, back to their home, and one of the Knowledge Seekers left, literally, at the end of the order, during the food, because he had to catch his bus or train to go back. We eat together, and we enjoy the time, celebrating the time we spend together. It's known as a last supper in Keshe Foundation, if you've been with us around the world, we always have this ??.

Traditionally, we end up in an Iranian restaurant. This time, because of the position, it was easier to go to an Indian restaurant, which is another favorite food of mine. And as we had the last supper.

But, during the course of the week, was the "last supper," it was the beginning, an end of the past, beginning of a new cycle for those who understood. Expansion of the Soul, understanding of. And, in a way, we woke up with, or we try to wake up our Knowledge Seekers, in a way to understand the operation of the STM for transportation and transmutation. We had the last "joys" of physical dimension and we entered dimension

of, as you say, "I eat in a different dimension." Many Knowledge Seekers in the session understood, and they got touched by the new knowledge. And, in a way, it was important to be felt. It wasn't there to teach.

The purpose of last week was for Knowledge Seekers to come in touch with understanding the feeling of their Soul. And that was why we brought, as I call it, the ?? "L Plate" systems (learners systems), (2:56). for them to do, to understand their own way of doing it. And when you understood, and then the next cycle is the dimension of bringing to physicality and emotion of the man.

And so, in a way, in one week, we went through the sessions of what we call, completion of, beginning of a new way, for man to live, and closure of the past, but it takes time for man to go through it. And to understand it, and to implement it. It was a beautiful week, because usually we get in conferences and things, a lot of mixture of things. But this meeting was, all people more or less, totally focused on what it was, it was very easy, what you call it, transfer of knowledge at the emotional level, at the level of the Soul.

And, it was amazing to see, how we had couple of youngsters with us, they're mature in Soul, but we had Knowledge Seekers, who are deep Knowledge Seekers, understand, they are well versed in the work of the Soul. It was a very mature meeting, extremely mature meeting, and it made it so easy to go through the "last supper," as I call it, the beginning of the new race of man, to be flourished. And that's the best example of it. I can put in what you ask, new horizons, new understanding, new... first time drinking from the energies of the universe through the STM. (2:58).

As Christ said, when I wake up next time, and now we all... we have awoken the STM to that knowledge. You will see more and more of it. The London conference, and those of you who attend it, will not be to tell your grandchildren I was there. You'll tell the men of universe, I was there when it took place. Because that's the time of transition. You have to feel it, you have to be in it. When, in a way, I stood in it with the Chinese militaries, in China, past few weeks ago, I thought, "I wish man could understand what I'm doing to them." Because, they will not change a second of this, for all the wealth on this planet.

Any other questions?

Q: ... You once said that a vegan diet can cause problems after 10 years. Can you say something about this?

K- I sat in front of a vegan to have a dinner very recently. And I thought, what can I tell? To bring regrets or create an enemy. I sat across a vegetarian called, a lot of us know, a few years ago. And after I finished, a couple of days later, he said, Mr. Keshe, I can't be a vegetarian. I start eating meat. (3:00).

I have spoken about this in depth in some of the teachings, some of the health teachings in the past. Our body, physical body, is a combination of millions of years of what I call, evolution. We have adjusted our bodies according to the environment we eat, we live,

we... and is available to eat. And majority of us in the Western world, maybe a couple of centuries ago, meat was a luxury, if we could get access to it. We were vegetarian. Because in the cities getting meat was expensive, and in the villages to grow up the meat. Meat was luxury, Christmas, occasions, slaughter the pig or whatever.

The generation of man today, is very much through the luxury of being able to have to do, to eat, has added the meat into the structure of the body of the man in past century. Our children, from the day born with milk, and then, which is the essence of life. And then, they deny that access to that life. So, they shoot themselves in the foot from day one. You become vegan, "I don't touch dairy." You are made of it. The first thing you took in your body, is the milk of the mother, the love of the care of the Creator. And then you deny it. So, you're stopping a Juggernaut, (3:02). going down the road, 120 kilometers an hour, to a stop. Because, you made from that day the decision, "I'm not taking anymore, whatever." Even with you, with your vegetarians.

Then, this process has a knock on effect. You put a brake on, in your head. You haven't put a brake on in your body. Now, body has to go to a transition. In one go, I'm vegetarian from the... it's become fashionable. I'm become a vegan, it's become fashionable. You become a vegan in a very short time. And we already have a start seeing diseases, psychological patterns. We start seeing changes in the body, which body cannot respond to. And then we have to create other conditions for it to cover it. And now we come up with it, we'll see the vegans are children of the West. We have vegans in India and other places, they never ate meat at all. Even they are not called vegans, they still drink milk or whatever.

These, no dairy, no eggs, blah, blah. Body, used to go at the speed of 120. You decide in your brain to pull the plug. Body now has to adjust. And then we'll create mayhem. We see a specific psychological pattern with these kind of children who suddenly become fashionable to be vegan. We now see something very interesting. I was talking about it very recently with Knowledge Seekers. As you know I spent a lot of time in China and I live in a very affluent part of Beijing, (3:04). and the same when we are in Sanya is in, what you call, (South) China Sea. You notice very slim girls. All we looked at, very slim. We talk in size 6 and 4 and 8, if you talk in Western sizes. And they're all gathered in a certain area of Beijing. All educated, all money and availability. Or they come from the golden spoon and silver spoon dimension.

But when, in the middle of summer, you go in the heat of summer, literally, if you lived in Beijing, Chinese tell you, it's a murder. 40 degrees, 35, but special heat. Breathing is hard. You go to the clothing, ladies clothing shop. You find winter clothing during the summer in most of the shops. How? What is this could not be sorted. One of the Knowledge Seekers cracked it, and then with research or whatever, now we understood. These girls and these guys starve themselves. And then we were sitting in the restaurant, And I watched a very slim girl, size 6 - 8, and I was sitting in another position, that they keep on pulling something up. They're not actually size 6 - 8, and they're size 8 to 10. They put the body in a corset to be slim, because it's fashionable. And those who actually starve themselves to be bone in skin, (3:06). body has no blood, they need these warm

winter clothing to keep their body warm in the middle of the summer. The secret of, what you call it, winter clothing in the summer in this area was unraveled. And actually, they shake in the middle of the summer. The body has no blood to hold. And then now you imagine this body supposed to create the next generation of man, what defects we're going to see, what damages we're going to see psychologically, because the mother is already psychologically damaged, the father is psychologically damaged, what child they're going to create.

It's the same with the vegans. It's the same with those who suddenly try to be vegetarian. You want to be a vegetarian, you want to be a vegan, you plan it over 5 years, 10 years, step by step. And even that has its own dilemmas with it. And then the truth is, I'm vegan. I only eat rice and noodles and the vegetable. I'm proud to be a meat eater. I kill one animal, one Soul. Every grain has a Soul, you kill thousands of Souls, you are more criminal than I am, and then you call me a meat eater, a killer? One grain has enough life to it, that when you sow it, it creates a hundred grains, hundred new lives. (3:08). And in a bowl of rice you put ten, hundred, five hundred of it, and you chew it so happily, "I'm a vegetarian, I'm vegan."

This is the story of Mr. Einstein, and speed of light, being the maximum speed. This is the speed of idiocy of a new generation of the man, has put no speed and no limit to it, and they call it vegan and vegetarian. And the damages this create. To be a vegan, to deny milk, you're born out of, it's a lot of reverse psychology. A lot of advertising on television. Then denying the essence of what you came out of. God forbids, where this Soul is going to go. So, this if you're born as a Buddhist, if you're born, your body, over time, in the area you're born, has prepared you, in a slow way for it. You can't stop a Juggernaut, fully laden, 24 ton, because you decide to break. The rest of the cars are going down the motorway, they're going to ram you in.

One will be a cancer, one will be all sorts of psychological problem, and everything else which goes with it. And this is why we see so much psychological depression, suicide, in the young generation, most of them have gone through the process of the new fashion vegan, being size 6, because it's on the papers and newspapers, has to be, (3:10). and a vegetarian road path of life. If we educate our children the right way, you want to be a vegetarian, plan it over 10 years minimum, and I hope you're lucky you get away with it.

We just look at it, I'm much healthier. See you down the line, when the new cancers appear, when new psychological pressures will come in. We see a lot of these, vegans, new vegans, new worlds of veganism and vegetarianism, in the psychological and mental institutes. And it's growing, and governments don't know how to handle it. Because it's covered under another, another, and another thing. I hope one day doesn't come that somebody says, "I'm only plasmasist, I only eat plasma." God forbids that day.

Any other question?

Q: ... Hi, would it be all right to set up stalls outside of libraries, showcasing highlights of the books by the Keshe Foundation and sales? Not asking for anything, just be interested and see it get out there for those that aren't aware.

K- Oh, you can do anything, first of all, if you can get hold of the books. Oh, you got go to an arrangement with the Keshe Foundation, but in a way, knowledge has to be gone that way. Maybe, maybe a slightly different way, but we have to reach the governments, to be able to teach the new technology. (3:12). In libraries we will start a beginning, our bookshops is a beginning of a start of a sharing of the knowledge. One of our Knowledge Seekers wrote to me very recently, "I was looking for the book, I don't know one or two, whatever, and I couldn't find it, I found it on the store, and I bought it as a second hand." I said, "oh, the book has already been put in the store as a second hand, somebody has read it, and didn't want it." And what was interesting is, the book is signed, it's one of the very few books which are signed by me. And it's got a code number. And it's interesting, I think it would be bought in this, what you call, a second hand shop book. People read it and put it out, or somebody died and they put all the books out. Because they didn't know what they had in their hand.

R: A bit of a hidden treasure for somebody that's looking.

K- It's one of the Knowledge Seekers, he sent me the book, he said, "I bought it online, it's bought from a second hand shop." And the number and the signature and the date is on the book front page, inside. It's very few of them, because most of the signed books I signed, has been confiscated and destroyed by the Belgium post office. They were told anything which goes from this place with this name, just hack it. They had a room, I think, somewhere, storing, we signed the books. People said they never received it, and the Belgian king was laughing his head off. The more they blocked us, the more we went through. And we see a lot of it.

Any other question? (3:14).

Q: ... Mr. Keshe, can a Soul of a man be taken out of the body and put in another body, or swap Souls in special circumstances?

K- Come again? I'll open a Soul shop.

Q: ... Can a Soul of a man be taken out of the body and put in another body, or swap Souls in special circumstances?

K- I heard about transplant of the heart and brain. This will be very interesting.

R: Well you have a new name for a body shop.

K- You know the shop's called Victoria's Secret. Now we have to open a new secret shop. You know what they say about the Victoria's Secret shops. The Victoria is Victor, not Victoria. That's what the secret is.

Any other question?

R: Nick would like to confirm what you said a year ago, that the Kamala Harris might take over from President Biden due to illness. It was shown in the Australian news today, he says.

K- There are a lot of reports about the state of Biden. And he has not been governing for some times. I gave an example of this very... to a Knowledge Seeker very recently. I said, you know, Biden, (3:16). because of the present situation, cannot be shown. There's a huge problem with Mr. Trump and the rest of it. That he's not there, because he can jump on it in so many ways. It's like the way we transferred the Keshe Foundation to Ella to run when she was young, years ago when we were in Ghana. I said to her, "run the Foundation in my name, as is my decisions, till you learn the ways, but nobody will know." And I said to them, "it's at the moment, White House is run the same way." If you remember, five or six weeks ago, there was a report of seeing a body bag to be taken into the White House. And then officials explained that Biden has already passed away. It was on the 4th of July, it could not be announced, but now it's become a norm, they are running it, and there are a couple of people who run it ?? is a double (Biden), till they have the right place, right things in the position. There's a lot of talk about this, but how they're going to break it into public is a different way. Official government, at the highest level, the foreigners have accepted that Biden is not in operation for weeks now. But we have to wait and see.

Any other question?

You've got to understand, if she comes into power, it's not that, she's already in power, you will see a huge shift between China and America. As I explained before, she's a very pro-communist. This is one of the problems they have. (3:18). How are they going to bring her out if she's there. She is extremely pro-China. You will see things you could not imagine. And knowing this, I have put the Keshe Foundation in that course of work. That once if she comes into power, China and America in a line to start a new world collaborations (from) being enemies to work together, and we're there to bring the changes for it necessary to be done. And part of our work being in what you call it, in Amsterdam today is part of that initiative, a big part of it.

We assume and we presume if the elections of the next set goes to the next election, even if Biden's still operational, she'll come into operation. He cannot last a second, even we don't think he's already lasted. Official news at the highest level tells us he's not physically there for a few weeks. But the biggest problem is you have a black lady, in a way of a caste, with a very high influential Jewish background through her husband, with the extreme sense of communist, communism, through upbringing of the parents. And this has created mayhem for the White House. And she's very outspoken. And we'll see a lot of things moving in all sorts of directions now.

One thing, ?? we have put the Keshe Foundation in path of peace, with, when she comes into power. (3:20). We'll see a lot of things which now, encouraged by the White House, will diminish very rapidly. The situation with, what we call, the little island in South China Sea will be resolved, and ?? and China is ready for it. They know what they have in their hand. Taiwan will be resolved within the next five years, in a very, very different way. It will go back to the motherland. And it'll be not a confrontation, but a gift for peace. And Chinese leadership has prepared themselves for this transition.

And if Kamala comes and this is what they don't want, because Taiwan is a point of, they can sell arms to the others, pushing, pushing China expansionism in the China Sea and the rest of it, this will die with her in power. She's extremely, extremely biased towards China, and the value of the life. And they have found some sort of balance between them. And we'll see a huge change in that direction.

But she's in charge, more or less, for weeks. I was in a meeting with very high ranking officers when the death of Biden was leaked out. And they wanted to see how much we leak out, which we didn't leak out, we just watched it. But Biden has not been operational for a long, long time in the White House. And we'll see it.

But there's a power struggle within the Tel Aviv and what I call, Vatican and other part, (3:22). how to handle a black lady, deeply communist, came to power by selling her Soul to the Jews by marrying a Jewish guy, pre-planned, it will look and operate in the nation of United States. And this is not unraveled yet. We'll watch it. And it's a very good point.

The way I see it, we see from the people we sit and eat and talk around the world with, Taiwan will be given back as a peace token by the Americans. In a way, not given back in a way we see it, but gradually withdrawing from all objections. And China is prepared to take Taiwan back within the next five to seven years. Everything is set up for it. And this bring that.

You got to understand some things we don't, in the world of common public, we don't see. But, in the world of diplomacy and nations, they know. And they operate according to what they know, not what we see in public. I was in Korea, in the spring of 2008. And as a delegation from the Keshe Foundation. And I had two or three breakfasts at my hotel by the invitation of the Minister of Unification of Korea. Talking about 15 years ago. And in one of these breakfasts we were discussing how we're going to handle the North Korea and the rest of it, because I just came a couple of days before that, giving a lecture to the nuclear physicists of the South Korea, their nuclear center, a lot of them, (3:24). and the President asked the Minister to have a breakfast, who was talking about how we can use the technology to unify the North and South. One of the talks on the breakfast was that he said, "the father of the present North Korean leader," he said, "he will die in such a time frame." And I looked at him, he said, "he's critically ill, it's not known in public, but he will die within this limit." And they were expecting for the other son to take over, not this son. But he switched to this son, the father, before he died. And he said, "we are expecting this, and maybe that's the position, we can use your technology with his death at such time." I just listened to the conversation.

Sometimes later, the President died in the frame they gave me. They knew how long it's going to last. And I thought, "oh God, was it planned, or do they actually know, because of the span of the illness and the condition he had, how long it was given?" They knew of the death of their enemy, years ahead. Because of his condition, health condition. So, they know about the condition of Biden. The world leaders understand the situation, and they always have a duplicate running around, to cover up till a solution is found. And it's quite possible, he's not already there for a long time, from the meeting I had, some time ago. But, we listen to a lot of these things and one day will come up. Maybe he is still on the life support, maybe he still walks. But, he will not, and he has not been in the decision seat for some time. (3:26). And if he is, he will not be in the second term. If the same party is going to take him and hold seat.

So we're going to have this woman, sooner or later, as the leader of the United States, but a lot of her work, due to work of her father and mother, setting up the first Communist Party organization in the United States in a structured way, she's brought up in that mentality, and she always followed that mentality. It's a lion lying down, we are waiting to see when it wakes up, when it does. But as a gift, as a point of understanding, we know she will pull out of, what we call it, the conflict in South China Sea, with the excuse of what you call, Taiwan. And Taiwan will go back to motherland. And that will start a new process of peace between the nations and a lot of things to do with the arms race will change, in that process.

Any other question?

K- ... We are nearly 12:30, we've been going for 3 and a half hours. Doesn't matter whatever it is.

R: It's pretty much covered it. Yeah, you've done well.

K- Please, those of you who participate tomorrow, make sure you can do the test or get the strips. It's very cheap, it's one or two dollars. You can get it from any chemist to test both. And those of you who join us on Monday, 11th and 18th for the fingerprint of your Soul, you will learn more about yourself. (3:28).

And then we head on to London conference. And it'll be one of the most historical, what I call, shows ever, as is not, it'll be seen, as I said, I want it to be done. It'll be felt by the ambassadors. So deep. It'll be felt by the representatives, or people who are there, the whole session. It will touch the STM, and the physicality will talk. In a way, in a very packaged way, I explained to the Knowledge Seekers who were in Manchester, what is going to be essence of the London conference. And, we kept in one of the most prestigious places for conferences in London, at the City Center. And we'll see how it'll come, and we start promoting it in the next 2-3 weeks, even in the media. And the Knowledge Seekers had enough time to take their seat to, but you can take their position to be in the conference. We leave it open for a few more days, or a couple of weeks, and then we close to Knowledge Seekers.

And then you have to go through the public, ?? I know. And the price will go directly to 5,000 per seat for that venue. And we already know it'll be sold out, because it goes to the agencies who work to these things. We give everything to the professionals, we don't leave it for us. Scientific organizations, heads of operations will be invited to be there, to see and how it's going to affect their operations and their industry.

And then we'll go on to Beijing conference, and we'll see where we go. Thank you very much indeed, (3:30). and we'll see some of you tomorrow, and a few of you again on Monday, and hopefully we'll see you next week. Thank you very much Rick. And it was nice to be back to Manchester last week, because it brought a lot of things home, and a lot of beauties.

In the next few hours, we will announce through the Dutch channel connections, if any of the Dutch Knowledge Seekers would like to meet us, to have another coffee after a few years, or new Knowledge Seekers want to meet through our Universal Council member and through the structure of the Netherlands community, through our people who will be put across. We wanted to keep it very quiet but, what you call it, you're in a position we expected to be in Holland for maybe maximum two days. But due to negotiations it's taken longer, so... We were hoping to do it on Tuesday night before we leave, but now, we'll bring it next, 25, 48 hours, and it'll be announced through the channels. If anybody would like to have a meeting with us, we meet, and we'll see where we go. Thank you very much indeed, and see you tomorrow.

**502 KSW Sept 7, 2023**

**END**
