

507th Knowledge Seekers Workshop October 12, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:10).

K- Yes, thank you very much. Good morning, good day to you, as usual. wherever and whenever you're listening to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you back. And as usual, we try to add to knowledge and understanding.

In the Intro, we hear something very interesting. And, we think and as was said in the Intro, a slight tilt in the position of the Earth, in respect to its vertical position, has created the 4 seasons, a few degrees change. We see summer, winter, we see the emotion of the Earth, ravaging winds and the rest of it. We have this in the other planets too, which are in vertical position. But because they're constantly at the same, what we call, angle, in respect to their horizontal position, we don't get the seasons. But this few degree change, it creates such a variety in race, in vegetation, in different emotion of the planet, and in every other aspects of our lives. (:12). Our moods, our emotion changes because of the summer time we feel happy. When the time, especially in the northern parts, is highest rates of suicide, and everything else which goes with it.

But, as we look at the structure of the brain of the man, by looking at the structure and how the brain is positioned in respect to the whole verticality of the body of the man, or be it the animals. By the scan, we have the knowledge nowadays, we see, we can determine the conditions of the body of the man. We call it, the brain of MS, the brain of somebody who has Parkinson. We say it this way, it's a bit of a desert, it causes dementia. And in so many ways, man, behavior of the man, structure of the man, the way the magnetic (M) fields of a Soul with the interaction of the physicality (P) of the brain, create the man, can be determined by the structure of the brain.

We just look at the scans, we don't understand them. We look at the picture of the Earth and we say, "It's a bit tilted." What happens when our brain tilts? What happens when the pressure changes in the brain, in the skull of the man? If we can understand the interaction of the fields, and if we can understand the expansion of the field forces within the center of the Earth, (:14). then we can, in a way, sort these things out. Now we can forecast how the weather is next year, next 30 days, how the fields will interact, where it's going to be cooler, where it's going to be hotter, possibility of the earthquakes and the rest of it. If we look at the brain of the man and if our, what I call, knowledgeable doctors look at the structure of the child at birth, we can predetermine what planet this planet is going to be, what is going to be outcome of this new Soul. And this is what we have not understood.

Over past 60 years or so, 55 years, I had the opportunity, I had the pleasure of being able to look at the brain of the man. Through x-rays, MRIs and every other means man could image it. Being a son of a x-ray engineer and being familiarized with these machines from age of 7, 8, 9, seeing the X-rays from the bone to kidneys to brain, always interested me to understand how can we change the center which is the above, which is the brain, for the rest not to happen.

Rick if you can go on Wikipedia and pop out some brains of the scan images of the MS and Parkinson, you might understand this. (:16). If we look at the magnetic field of the Soul of the Man (STM), which is in perfection within the center of the brain. But, according to the condition and the environment of its field strength of the Soul of the Physicality (STP), creating condition for the structure of the life to be, then our scientists realize, it's easier to understand the development of the STM. In interaction with the dimension of the STP, which is done to do with the dimension of the flow fields of the blood of the man, plus emotion, they don't need medication. They don't need to create chemicals and whatever and we stigmatize them for different things because actually our illnesses are very simple. Our doctors have not understood how to handle these things.

Pick up the image of a MS patient and the way it tilts or shows by the Wikipedia. If you look at some of the brain structures, if we, we need a closer, if you can find a very good single picture of MS brain, just put brain, MS brain, scan, you get a very good pictures on that channels usually. You will see that we call them diseases, but the shape, the way we have the deserts, we have the mountains, suddenly we have the floods, suddenly we have the droughts, it's the same with the brain of the man.

If you put a normal scan of a brain next to a scan of a MS, you'll be amazed. In most of the cases, (:18). MS brain is, (just go down to the one below, if you can bring it up a bit, yeah). If you look at this brain, usually what we see in the back, there's a "ditch" at the bottom. If you can open it, you see it. That ditch at the bottom of the picture, on the left hand side, gives you the first signs of something is wrong in the structure. This is that tilt, this is that deviation. And if with the technologies which we have developed, like the application of the Gans's, which you know how to make, changing the emotion of us in respect to the planet, to correct the condition by the Gans's you throw at the oceans, and the Gans's you produced to change the environment.

If we change the environment of this brain. And that "ditch" goes back to where it was originally, which you can pull it forward just a little bit, then you understand, there is no difference in forecasting the structure with emotion, and the weather forecast. These images gives us exactly what we see on Earth. ?? Downs, hills, curvatures, rivers, flow of information, (:20). but all this has a center in the center of it, which is the STM. In the interaction with the physicality (P) and the blood flow, the emotion which we bring to it, dictates how these ditches, how these changes come in.

And our doctors and scientists should be able to ratify (?? rectify) this, by simply strengthening the STM. Weaknesses brings these deviations, weaknesses brings these changes. Weaknesses which brings the condition of the, what we call, interaction of the

fields of the emotion of the physicality, the emotion of the STP and the STM. In a way, our physicality is a slave to interaction of the two fields, of the emotion of the Soul and STP.

When the emotion of the man, in the dimension (D) of physicality it's not satisfied with the condition of its environment. The "environment," in the terminology, is people you live with, environment you live in, interaction with the society, interaction with your siblings, interaction with your boss, interaction with your children. These are the hurricanes, the tornadoes, the beautiful warm summers, the leaf blowing and everything else.

We have not understood that we cannot separate the way, the shape of our brain is and the planet we live on. (:22). The shape of our brain, the structure of our brain, talks about a desperate situation, incomplete situation. Many times, when I used to make the flight systems, I always said, when would man understand he is flying halfway? Instability comes from the bottom end. When we look at the structure of the Earth, when we look at the structure of physicality of the Earth, when you become wise to understand this, you'll find out we are a flying object. We are absolutely uncontrollable flying entity, our brain tells us, the structure of our brain dictates this to us. And we need to understand this.

If you look at the Earth, it has symmetry on top and the bottom, left and right. It's a spherical shape. When you look at the brain of the man, it has a top half, parts is missing. We have compensated through a nervous system, we call this, spine, the rest of the shape of this matter. If you look at the reactor in the center of the Linz, (:24). in the Exhibition Center, the blue one which you've shown years ago, you see the similarity between the Keshe Foundation and the brain of the man. Where we have brought this body of the man into the central point, we have brought the STP in the center. Where the STP of the man as a blood flow, goes around to it. Perfection in all dimensions needs totality.

So you can understand by looking at this feature. From the birth, point of inception, we should be able to tell how our children, how our faces, how our features going to be? A lot of people talk about the stem cells. The stem cells is copying something, but not understanding the totality of the Creation. And when you look at the structure of the brain of the man, you'll find out that when there is something wrong in this half, because of the shape and connection through the spinal cord, this has to adjust itself to it. And then when the storm comes and the brain slightly tilts in, the physicality has to respond in the dimension of its interaction. Paralysis, limbs, arms not working. (:26).

We always said the problem with Earth is that it has not, in the course of its creation, provided the totality of what life needs on this planet, that it has created the man to kill, created the animals for that extra energy to be gained to do all sorts of funny things. Doesn't matter if you're a man, a cat, a dog. It's a common denominator. Short in the totality of the shape, in the structure of the planet, to be able <<audio cut >>. And this half circle, this half shape of the brain, is replaced with the physicality in the field strength wise, that it has created the whole problem of the creation. And this is what now we have to understand.

With the new systems, with adding, bringing in, what we call, the Head Units, the other system technology developed by us, we try to expand this, that the totality in field interaction will reach and complete, while the physicality is still in position. In a way, we allow the Soul to complete what was not done, what was not be able to be achieved by the STP of the man to complete the circle. In expansion in the Soul, in expansion of his spherical shape, we create that completion, but this time it's perfect. (:28). In a way, the physical body of the man becomes an accessory, and a tail which is added to the STP, as to the STM.

If you understand this, then you understand why the first spherical systems, I developed, tested in Iran, Sharif Tehran University, could fly, could take off. Because it's double core, I brought, you call it the double core, I call it the STP, I brought the STP inside the STM, while the fields are in balance with each other. If you look at the shape of the systems, you go into, you came to Linz and you sat in. We have again emphasized, you come in with that shape, you have a Soul, you call it in the center, we bring it in, you call it, you go to the state of dream. And I've seen many people who came and went through it. They say, "blurred, we can, we see you but you're blurred." Because, the Soul fields has super-passed the physicality.

And in that process, if you gradually, step by step, allow the physicality to catch up with the interaction of the fields, then you see any deviation, any fault, any mishaps in the creation, or the damage of the brain of the man, will find to balance his energy into perfection of itself and you call it now he has changed. He has no more this condition or that condition. But in fact what we've done we have understood the process of the Creation. (:30).

So when we come to explaining the seasons, we call it the autumn, storms, rain. We call it in our brain, different diseases. But in fact it's the same. A new position in respect to the Sun, to the Soul, gives us different condition and environment. So is the same with the STM. And what energies we can, what strength fields we can allow, what conditions we create with our systems around the brain of the man, will dictate how man will look, how man will be in the coming time, in the coming process, in reality of totality of the existence. Then, when you move this Soul, when you move this central energy, to another position, then in interaction of itself, with the STP of itself, will create a condition, that the STP in interaction with the STM and the environment, will give man a new shape. Where at all time, the emotion of the STP and the emotion of the STM, in interacting with each other, ?? being in balance with each other, dictates the manifestation of the perfect physical life at any position in the universe. (:32).

Now we see there is no difference between the man and the planet which created it, and the star which created the whole structure of the environment, and the galaxy, and the universe. They're all the same. Different winds, different ?? floors, what we see on Earth we call it, the winter storms, we open to space, we have magnetic storms, we have to understand the condition of universe, where is the winter time, because even our own galaxy is not in the right angle with its center, with our central force fields of the universe

(U). So it has its seasons, our galaxy has its own condition and environment and the storms and everything else. What is in macro is in micro.

It's for man to understand, it's for man to gather the intellect, understanding of if man can manage to handle the storms with his own brain, with his own structure, with his own physicality, man can handle everything else in the universe. Because the brain of the man is one of the most complicated systems, but in fact all connected to the operation of the Soul within the center of it. Do you battle in different positions, or do you handle the strength of the center, that the position is becoming irrelevant because you adjust to it? The fields adjust themselves to it, you don't need to do anything. Fighting takes time, fighting takes energy, but if you can be with it, go with it, create the condition of the field flow with it, you'll survive. (:34).

There is no difference in the operation of the brain of the man. The storms we create as rages, as joy, as laughter, as cry. And then the rain, the thunder, the beautiful sunshine, weather, the deserts, the valleys, and the rest. Our scientists have not understood, have not realized the bigger picture which is in front of you.

In our brain, we carry half of the sphere. Instability is guaranteed, unless we understand how to operate, how to run, how to manage this "chap" in the center. Then, once we realize this, once with the development of new technologies, the Head Units, the new systems which are going out, and you use, the headphones you used in different trials and tribulations of your life with Keshe Foundation, you'll find out, I've changed. Those of you who have been with us in through tests in past 12 months plus, sit back and look at 12 months ago. Sit back and look prior to June, before you start coming to Linz, and analyze what has changed in my life. Emotionally, physically and psychosomatically and every other angle. What do the people tell me today? What do I see today compared to last year? Has the hope has changed? (:36). Has the prosperity of understanding life has changed? And then you understand, there has been evolution. We have understood how to allow you to elevate, to free your Soul and in interaction, to repair the conditions, elevate the positions which must have or might have done, reduced in field strength, and then going back to.

If 12 months ago you had a Parkinson, 12 months ago you had MS, and 12 months ago you had Alzheimer's, or 12 months ago you had different conditions, look today and see, what is it? It's not the technology (T), it's the elevation of the Soul, in a way repairing itself, by strengthening the Soul to expand beyond. Those of you who think it might happen in one time, you're in dreamland. You live in absolute dream. Cells have to repair and see what is needed to be repaired next. What has changed, to change back. When you see a paralysis from MS today, it's not suddenly yesterday I could move this finger and today I can't. It's not today, this is planned, 7 years before, 10 years before by the brain. Millions of cells have been ordered to shut down, step by step, knowing that your cells, your deviation, takes to 9 years to change in the body of the man.

Then you understand, to reverse the conditions man has created for himself. The conditions man has determined for himself, comes out of his own lack of strength of the

fields of the Soul, (:38). to interact with the dimension of the STP, to create the condition of the working condition of the physical man. When you look at a finger not moving, this is reflection that the STP and the STM, have shut down that place in the brain. Now, physicality shows itself years later.

Why do we age? And why we call it death? If man realizes, through perfect, whatever you condition, you could call it, to feed, give enough energy, man will find out, can survive a lifetime. I always said, a lot of people tell us, we eat a balanced diet, we don't eat meat, we are vegetarian, we are vegan. Do you realize what it means? If you understood the work of the energy needed to elevate, to absorb by the Soul to expand, and you tell vegetarians and the others live longer. So you understand by true vegetation, eating vegetables or whatever you call it, the way of life, you kill more animals to give more energy to your Soul to live longer. Man should have understood this. It's not the healthy life, it's how much energy in a lower level, (:40). we absorb, we digest, we give to our Soul, that it can maintain the operation of the STP, in the dimension of the brain of the man.

We consume food in that way. Now we understand, if man could understand, if our scientists would have linked the lines together in one way or another, that large energies consuming meat in the high energy levels, does not give that low energy field strength which vegetation gives to the STM, man would have never eaten of it. And now that we understand this, we train our Souls to absorb the weakest fields from the universe. We'll guarantee life for eternity.

It's the misconception of the man, that it needs bigger things to get bigger, to survive longer. In the world of the Creation, the brick blocks, the blocks which brings you up to keep you to survive, is the weakest lines. And man in that position, if he understands it, then does not look for the strongest field in the universe, because he has another capability of handling it. He looks for the weakest, for the one which has the lowest strength that his Soul can maintain and absorb, and then in interaction with the environment field strength, create manifestation of perfect life, perfect physicality. (:42).

The biggest dilemma for man has been that he looks always in big things, big amount of consumption, but he doesn't understand the biggest structure, big things eating is in dimension of physicality. The STM, the structure of the physicality of the universe, look at every star, look at every planet, look at galaxy and universes, all work on the weakest. When you become matter state, you need a strong, bigger. When you work in the dimension of the plasma, you need the lower strength that it can add to. You build from inside, you build from the under, under.

If man understand this, if we come to understand the complete comprehension of the totality of the system, then we understand how much we have come to miscomprehend the Totality, the reality about the Creation, the life on this planet and the rest. Then, when I explained to you, when you put a food in your mouth, you are just an attraction point. You are now, have created a condition for your life, for your body, to attract that little field which come from outside. In a way, you have set the seed of absorbing fields.

This is your dimension of physicality and you have a big stomach. In the stomach when you put the food, as I explained many times, when you eat, all you do, you set the small seed, of, in a way, by body of the man, (:44). converting the food into a Nano material in the stomach, and then change it into a Gans, which creates a small fields, now you have created the condition for absorbing the fields of the universe into you. 80% of your energy which you absorb, to run this physical condition. Then in the process of the digestion, where it goes, how fields are interacted, decides what kind of diseases you will get.

This is why the new technology in health, in the space technology, by changing the environment of this condition, just creates the fields, and the body in respect to getting it from possibly the cosmic rays as a source, to change, to develop, to repair. Then you'll come to understand, in the future, one of the most important things for man will be, going back to what we just said, is that the brain of the man will change its shape to spherical. The shape we see, our shape, shape of our brain will 100% change, as we go into this process.

If you look at the pictures of the magnetic fields of the Earth. You have Earth, you have the direction of the flow of the field of the Sun and if you look we have a "tail wind" (:46). Because the strength of the fields facing pushes the fields back. Now isn't this the shape of the brain of the man, but in that tailwind the shape of our brain has changed to this shape. So what do we absorb in the direction of fields from the frontal view, from the face side, that pushes our brain to be extended slightly to the back. What fields from the Cosmos we receive on the tail end and the front end. And how these affects the emotion, the physicality of the man in the process of the creation in the life.

In the new systems, which some of you part, took part the last Friday, and some of you take part this Friday. Tomorrow, we are testing this on you. How would your emotion change? We don't tell you how we play with you, we don't tell you how, we just strengthen. We have put systems in operation, in our system, to see how you absorb energies. How much from the back, and how much from the front, and how the system evaluates. Don't forget, we have tens of you in this test, not one or two. (:48). So we see average operation of totality of humanity.

In the solar system, the tailwind of the facing the Sun, if you look, is like this. Because it comes from the Sun, field forces are strong. And if you look at this, it's the eye of the man too. And your Soul sits in line in that tail centralized. So that's why you see your dreams. The dreams you do not see are the dreams, are the field interactions, which are created by the back and not coming through the front. Those of you who say, "I can't remember, I don't dream." It's because you're heavily loaded on the field strength on the back end of the head, not on the front end. And it shows your behavior.

Many of you, when you go, when you've been with us and says, "It has no effect on me." Because this has a meaning, when the work, when the energy is on the back end, not on

the front. And then it's so heavily loaded, that does not allow the Soul to expand to the front, that you can see the visions.

In the trials, which has been going on, in past week and the coming week and then into the future, we are evaluating in how we change this shape of the brain of the man. It's extension, to create a balance that in one go, (:50). you can decide and you can learn to transmute. Some of you who took part in the last week, somewhere in between you should have had a shift of emotion. Change of emotion suddenly without you knowing. Because we change the system to see if it does. And we saw it on the graphs, immediately.

In a future test, when we put you through the dimension of the physicality, we will go even further into this. We go further in understanding the totality of what we call, life. How we will do? How we will bring that into operation? How we can change this in the addition of understanding of the work? How we can change in Totality, the dimension of the existence? Now you understand. In the dimension of the plasma, you call it "tail wind" of the Earth, magnetic field of the Earth. In the brain of the man, because the Soul sits so perfectly in the center. The tail winds are created as a matter structure of the physicality of the brain of the man. And at the same time, if you understood this, you have another dilemma with you, (:52). and that is, because the tail end is so in interaction with the body of the man, with the field interactions of what we call, magnetic field of the Earth, has no choice.

This is your brain. This is the shape of your brain. This is gravitational magnetic field of the Earth. So the Soul sits, hold on to, as is the Soul of the Planet. What does it do? Earth has Inertia, matter state's "second weapon," you call it, the STP, and it pulls. As it pulls, it creates the shape of the man. This is where the other half of your field forces have disappeared to. In interaction between the STM and the STP of the man, man has created, compensated for the ?? part of physicality, the storm has pushed the brain up, and created the relief of lower energy, called the physical condition. This is why it does not matter where you walk on Earth, you always have that condition. This is why, why we see what we do, (:54). what we have, and how we need to understand the totality.

We got to understand, that the process of creation is the same. You look at the bigger scale of this, you look at the shape and the position of our solar system, in respect to its galaxy's central point, you will see the same shape. It's not just holding on to, it has field forces that it pushes, releases energy. This is where the very first paper I published about the creation of Black Hole. Emphasis is on this. Black holes are not absorbing. They're radiating more than they absorb. They absorb from everywhere. The lower fields amalgamate ?? in them and release them to bigger, stronger fields. What they release decides the shape of the galaxy. What man's Soul releases, decides the shape of the man. In respect to his environment of Earth, or our Sun, our solar system in its galaxy, and the same shape of the galaxy, in respect to the central point of the universe.

If, as I explained last week, (:56). you go to a forest, you lose your way, and you try to find your way back out, the shape, the dimension and the direction of what we call, the

trees, will give you where the Sun is, which direction you are going, in which dimension and which direction you need to travel. Where is the Sun? Where is the North? Where is the South? When you see the trees, the heavier branches, longer branches, face the Sun. The thinner branches are away from the Sun, because they absorb more energy. In the galaxies, when we, our scientists come to understand which way the galaxies is shaped, they all show us the path to the center. We call a tree the leaves and the branches. We call it the galaxy with the stars and planetary system. But in fact it's the same as entity, the same entity as one.

In the direction of the field flow of the magnetic fields of it, instead of the shape of the galaxy, will show us which way the wind of the central system of the universe is blowing. Are we in the North Pole of the universe? Are we in the South Pole of the universe? If we measure the gravitational magnetic field of our galaxy, then we can determine the position of us. Those of you who travel in UFOs, have to gain this knowledge, before you get into it. (:58). Is your captain taking you this way, where you want to go, that way? Because your daughter has moved to galaxy "so and so." Now you understand.

It's the same when we become wise to operation of the Unicoise, The shape, the dimension and the direction of the field interaction of the Unicoise will dictate us, will show us the way to our Creator, to the central point. This is how the humanity has to extend his knowledge, extend his understanding of, expand his process of the knowledge gaining, through the weaker fields of the universe, if he works with the plasma. And not through this massive, everything has to be big. Because, when it's big, it creates power and you'll be frightened of it. God, your Creator, comes to you through the weakest strengths of the fields, and you don't even know it, because you're looking for him to be so big. That's why he's in every cell, every existence, every thought of you. Because you have not learned, not to be physical, not to look at the biggest thing.

I always said, when you go to communist countries like Russia, when you go to places like the churches and the mosques, you go to the offices of the government, they make it so big, that you live in a tiny house, so this thing big must be very important. (1:00). Fear of size, not knowing there is no Soul in any of these buildings, not even in the churches or the mosques, because the strength of the creation comes from the smallest, the essence of common denominator of the life of the universe. If it was supposed to be so big, you would have never existed, it would have hit you so hard that you can't even exist, stand it. The love of the mother comes from those small caresses of touch, not from the heavy hugs and slaps. When you sleep and the fingers of the mother runs through your hair, your skin and touches you and she says, I love you, you feel it. And this is the love of the Creator. And man has not understood this. If you think one day man will see the Creator in a huge entity, you have not even understood the essence of the Creation.

And it's the same with our doctors, it's the same with our scientists. To reach, to expand the STM, you have to reach to the lowest level strength fields as a plasma, not a big hammer and a sledge hammer. If you look at the stone, with all this mighty, when you look at these mountains with a huge size of them, what does it powder them? What does it break them up? What it destroys them and what makes them, little drop of rain,

receives through the cracks, (1:02). step by step, and then expanding. Man has not learned the process of the Creation. Man has not understood the process of the Creation.

And this is why the systems, the technologies we are testing, developing, looks so amazing, because we have learned to come in the soft way. The small, the way you are created. You come with the rage, you come with the heavy fields, you give yourself Alzheimer's, you give yourselves Parkinson's, give yourself everything else which your body cannot hold. And then you call it, "I'm sick, I have this disease, I have that disease." Because you don't know, you use the sledge hammer of the emotion on the physicality of the man, which is weak and works on the fields of the universe.

This is where the new technology will come as amazing, shocking and unbelievable, because man has never had any belief in the Creation, the process of Creation of itself. And most of this, most of this condition came out of fear, religion and those who abused the man. Now you understand. Go down deeper inside you, allow the fields of the Creation to touch you and not the stones of life of the physicality, (1:04). which the body has no way to stand it. The little touch, the little love, the little essence of giving and creating the condition that allows that weaker to come in. You receive the weakest, you give the strongest. In that process your strongest become weakest for someone else's energy, to become the essence of his creation. Now you understand why I keep on saying, as I've been teaching for years, the whole process of the Creation, in the simple word of loving.

Maybe as Knowledge Seekers today you understand a little bit more, about the essence of your own creation, and how you have created mayhem, with the storms and ravages of your own emotion, that the physicality cannot take. Maybe, maybe you understand from now on how you absorb the energies of the universe. And then with it you learn how to expand the Soul to become the passengers of the Unicose and not just passengers of the planet Earth, or this universe. And then maybe, if you understand how low you can go, then you find the strength of the field of the Creator.

When you steal, you add to. You make it heavier. You make it stronger. And this is why stealing is not allowed. Because you walk away from the weaker, (1:06). which is the essence of the line of your connection to your Creator. The heavier load you carry, the slower you go.

I hope you learned something today. I hope you understood how and the way life has to be for man. Not only on this planet, not only within the brain of the man. And now you see similarities in real condition of the life, which you call it, diseases, and we call it, storms, weathers and seasons. I hope with the new technology and understanding this, we create the next step.

As I said to somebody in front of me in the very same room I'm sitting now today, last night, that I'm not interested in all this. What I'm interested is to show the man the way he can fly the span of the Unicose. He can see the beauty of the Creation, not with rockets, and spaceships, and every other material condition, but through the essence of the

strength of his own Soul. And it's not, does not need that jet propulsion to create the faster run to take off. It needs to understand the lowest energy fields, that's the path to its Creator. And this is a very big dilemma for man. How to live in both dimension of strength of his condition of physicality, and the weak, in the strength of the lines to his Creator. (1:08). Connection to his essence of his own creation.

Thank you very much for today. And I hope I open your eyes into a new dimension. And in a while, your test, your cooperation with Keshe Foundation, is opening that door. For you and for those who gradually learn, man lives two lives, schizophrenic. One is a devil, and one is an angel. The devil is physicality of the man. He has to do everything to keep it. And the angel is the STM connected to the line of the Creator. We'll go for a break. We'll come back to answer any questions.

>> **BREAK** >> 507 KSW October 12, 2023 (1:16).

K- Not really, we do the same as usual. If there are any questions to answer, we try. And see what we can, how we endeavor to understand it, to answer it. The usual way we make announcements, if there is any, we don't have any announcement. The process for the London conferences, and Congress and the whole week session of teaching is going on. The advertising should start on the 16th, internationally with invitation. And the venue, thanks to one of our dearest Knowledge Seekers, has already been fixed, is there for the ambassadorial meeting, is in one of the most prestigious locations, and could not be any better position. And they invite, invitation to ambassadors to London, will start next week, public announcements on media, international media, starts the following week. And we'll see how, for the promoters we have brought in this time, do their work.

And, on the back of that, we're trying to get agreement from the Chinese authorities, to hold the event in Beijing in December or January. And these things are not so easy in China. Needs approval of many, many, many things to be done. And hopefully we should be able to get an agreement in holding the third session in China. And from then on we move on to Tokyo, Beijing. And then from Tokyo to, most probably, Tehran, in Iran, Washington and beyond, as we were planning, before the Corona, as you... (1:18). So, we start giving conferences in different countries, and the Corona came to a halt, there's a continuation, but this time it's not just a conference, we show technologies on the edge.

We have agreements with our, what we call, partners. What will be shown in public and what cannot be shown in public. And this will gradually, we'll explain, the developments which will be kept away from what we call, public, as part of the development and cooperation with nations. And part which affects the public life. Which be like agriculture and energy and the rest which will come through in 2024 through our partnership with ?? the Chinese government. And we'll go with that way.

Those of you who are trying to attend the conference in London, be it the whole Saturday, two sessions, or the ambassadorial meeting, or for the week session long. Please complete your ways, because after the 16th, we will literally do not see capability to control anything, because now it goes in the hand of the promoters and they, they have their own way of doing things and the operation of the running, of what we call, organizing, the accepting the people is with the organizers.

If you have a specific person, you think should be invited, or should receive the information, if they want to join the meeting, like your Prime Ministers or whatever, you can send the information to info@keshe.foundation and we pass it on to the promoters. Many of you have sent us the links to your Prime Ministers, to the high ranking offices of your government. (1:20). We have two levels of invitation, those who we invite, like the ambassadors, and those who receive the information, they have to register for the conference.

Some of the most leading people are on the list of the invitation. We have invited NASA's, will come in through, and people from Tesla, because we will affect the work of this company heavily, both on the space and the vehicle side. The development and release of the levitation cars, what we call it, through plasma magnetic fields, will bring an end to electric cars, and an end to energy consuming conditions. So, we have invited those who are going to be affected, and those who you think might affect their work, to be in the conference.

This conference has, as I said before, a special link set up for world leaders Zoom session. Which means any of your world leaders, your Presidents, your Prime Ministers, who cannot, and they cannot come to London because of the, what we call, problems with receiving such people, world leaders are allowed to join live in the session, through a specific way, we know, it's them and set up with them, to see the presentation, to see the change. And it's for them, how to set up the situation with their governments. If you remember in 2011, 2012, we gave the key with the technology. This time through Zoom,

we instead of giving the key to the ambassador, the ambassadors are present, and the leaders will watch what is to come. And the beauty of it is, this time you as Knowledge Seekers, see what your leaders know and what they don't do, or do about it. (1:22).

There's one thing for fact, that the technology implication and implementing it, will be very rapid in 2024, 25 in China. We are part of it, we watch it and how we are influencing the change and the thinking of the government. The biggest problem for us has been to change the mindset and allowing the people to follow. If you would have said, 10 years ago, man of 90, man of 80, does not know how to use a phone. Now we see men of 100 with a mobile phone in their pockets and they are more active than the 18 years old, because they talk to everyone they couldn't do. They are so active on the pages of the web, that is unbelievable.

So, we need to educate, you need to educate your nationals, your government. If you have and you are a member of people who are influential, and have a direct access to your presidents or what we call, the leaders. Only, this is only for your presidents, they will be given a direct line Zoom. We know five presidents today will be on the line. We know who they are, they already accepted our invitation. So, the whole seeds are set for it. We have asked for one of the world top five nations, to send the opening message to the, for the opening of the conference. If accepted ?? ... it's to give the message of peace, on the opening of the Keshe Foundation conference in London.

As it says, "It is technology in exchange of peace." And the peace only comes when our leaders understand, that their power compared to the power of the creation and the knowledge, cannot be matched. (1:24). As I said many time, and I used to business, us businessmen make you politicians, and us scientists make the world leaders. And what we deliver to the armies, what we deliver to the space technology, dictates the strength of the nation, who becomes to dictate. And in that position we have found a perfect partner in creating peace through the people who we collaborate.

So, if you have access to, or if you want agencies, be it environmental, be it, what you call, space, or whatever in your country, or people you know, should be in London, send us the email, who they are, what they are, and we pass it on to the promoters and they'll be sending the invitation. In any case, we are literally converging on London for the London conference and the congress and the week session of teaching and I hope you enjoy your time with us.

Are there any questions?

Q: ... If 8 billion is not enough for space colonization, then what is the appropriate number needed for men to explore, live and be present across the universe?

K- The answer is very easy. Every planet, every star has a Soul and life within it. (1:26). Does not matter if we see it physically with the eyes or they're on the ground, over ground, underground, or in the water, or in the atmosphere of it, as we have on this

planet. And, you just go on the Internet. Just put, "how many stars are in the universe?" And then you need, you understand how many we need. As simple as that.

And Earth is not the only nursery. And there is no competition. And the STM will create new stars. Those of you who have served your time right, for the world of Creation, and then you understand, you are one of those who needs to be perfect. And it's even if we lose half of the 8 billion to become new stars, and the other half to elevate the others, to become what we call, the teachers of the future, then you understand it, 8 billion is nothing. It's not even a fraction of the stars in our galaxy.

Any other question?

R: There's an interesting estimate here that the astronomers estimate that there exists roughly 10,000 stars for every grain of sand on Earth. It gives you kind of a, some sort of concept. Wow!

K- You don't want to know the deserts with the sands and the beaches with the sands on them. (1:28).

Something very interesting sometimes comes up, if we could... we understand it, because I tried to understand it. How come we have such a beautiful beachy sands, by the oceans and seas and whatever, and we have the same kind of sand in the desert? How do they come to be? Was the oceans created out of the deserts, or deserts come out of the oceans? Or some of them do.

Any other question?

Q: ... Thank you for your beautiful teachings Mr. Keshe, we love you. Our hearts are breaking for Palestine, is there anything that can be done to bring peace?

K- This is not a war, this is literally slavery of a modern Arab 21st century, supported by one of the most unjust nations. As you know, I work hard to support the Palestinian people, not their government or whatever, for decades. Even prior to the start of the Keshe Foundation. (1:30). I'm aware of their needs and how literally millions have been put in a open prison, called the Gaza Strip, or the West Bank. You've got to understand, when I look at these pictures, having connections with the Palestinian and Israelis, I want to open another side, I've done this before, if you haven't understood, and you haven't listened.

The Israeli businessmen, the Israeli construction companies, are "rubbing their hands with gold." They're so happy. Every time, every few years, doesn't matter if the Palestinians start to attack or the Israelis start to attack, the Israelis destroy most of the buildings which are built. And most of all these buildings, majority of it come through the Israeli borders in. So there's an investment of Palestinian slaving outside, sending money to the family to live in this "open prison." And then the Israeli businessmen and construction people waiting for it to destroy it. And then every time they need a boost in

Israeli economy, they push the government to bomb Gaza. And we send cements, the building construction, the rest of Israel.

There is a humanitarian side to it. But you've got to understand, there's a lot. I discussed this with people I've been with past week. And there is a lot of things which has opened up a lot of questions in the situation with Gaza and Palestinian and Israelis. You got to understand, is the "gun policy" of the United States, which has created this condition. (1:32). Selling gun, arming (with) guns, and creating jobs in United States, trying to be a Superpower, is where it's going to come, going to come to an end in 2024, 2025.

The new technology will bring American superiority to "zero-superiority," which means they will have no power, and becomes equal to other nations. You've got to understand, the what we call, cycle of life in Iran, during 2,500 years, during the Darius time and Kourosh time. Nations became part of Iran, leaders became, joined the Iranian, what we call, empire. Not by fighting, by knowing, by joining the nation, become peaceful, there is no need for soldiers, they knowing, they can spend, they can allow their citizens to live a normal life. Because, the structure was built on the Ethos of Mitra and Zoroastrian. They brought peace to their nations. There was no need for war.

Now, we see the opposite with American policy. You look, news in past 24 hours. Boeing is delivering 1,000 advanced bombs to Israel. If you put these bombs next to each other, explode them, (1:34). half of it will destroy half of Israel. Where are they going to use these 1,000 bombs from Boeing? How many more children of Palestinians, Egyptians, and Israelis and Americans are going to die? When the Israelis drag the Palestinians out of their home (by) their hair, to destroy the buildings, means to build new buildings for the Jewish people, we didn't see it in the public news. I get pictures of it. When Israeli taken from the same building of... they took by force the same way, is a world crime. Because CNN has decided.

This atrocities has to stop and it comes when there is a just power on this planet. When there is no need to fight, when there is, no one is more powerful than the other. And through our agreement, we will reach this point. They wanted 7 to 10 years, I want it in 1 to 2 years. And technology will prevail, that the "gun policy" becomes obsolete. And this aggression in Gaza has opened a lot of questions. You look at the figures, how many rockets has been hit, blah, blah, and how many people have been killed. We look at the security structure. How could the Palestinians, who have no manufacturing capability, bring thousands of rockets within the border of Israel, (1:36). without the most advanced intelligence organization, which the Israelis and the Americans "rub themselves" to be, have not seen? They don't talk about this, because it's embarrassing. It's absolutely shameful what we see. How did these people manage to bring so much weapons to the borders, that can create this mayhem?

Israeli people have asked the government, they have to ask the question, "Forget about what is happening here. How did all this money we spend, all the money America gives us, all the money we get from Palestinians, from the Saudis, and everybody else, did not give us this (intelligence about this) situation." You got to understand, the day of attack,

this was chosen historically. Attack was planned for the 6th of October, the night of the 7th. Go back 50 years, those of you who can go back that far, around October 6th and 7th, what happened in Palestine? Six Day War, the Yom Kippur War. That day, within six days, Israelis took half of Sinai desert, because the American intelligence told them, these Arabs are ready to come in, the Egyptians were coming in, the Syrians were coming in, to literally wipe out the Israel. And, that time the intelligence given to the Israelis, gave them upper hand, American put all the weapons in Israel, and they got half of Sinai deserts, and most of you eating Jaffa oranges, know what happened, how they come. It's changing the desert, putting tarmac on the Sinai desert, (1:38). making the orange trees, which you call the Jaffa orange.

This was done on the same day, more or less. But they don't tell you. The Israelis are so busy and embarrassing what happened to them. But the problem is, why did the Palestinians have to go to this cause? Why did they have to go to this extent? It's wrong. But, have they been left an option to be there? At the moment today, more Israelis have been killed than the Palestinians. With all the almighty ?? wire. With all the mighty power of United State. And how did the Palestinian hit 10,000 rockets on the borders of Israel? And how and where did they move it to? You don't want to hear, Israelis don't want to talk about it. This is, if it was in any other place in the world, Israeli president should be sacked, immediately. He has let the nation down for security. With all the power they have, all the satellites, all the remote cameras on Gaza Strip, all everything else, where did these come? (1:40).

Have the Palestinian use a new technology for not to be seen by satellites? Have a new strike of what has come into operation, that the Arabs who were reporting back to Israelis everything, kept their mouths shut. There's a lot of things has to be answered. But the biggest question is, where did Israeli security fail? To see 10,000 rockets moved across? Most probably, some of it come from Ukrainian war. The Ukrainian officers, half of the weapon are given to them to defend their nation and selling it to the others.

The most strangest thing is, was a question I put to one of the people in defense technology in past few days, is, why don't they, Israelis show the rockets and the label written on them. Majority are made in United State. Most probably. And a lot of missiles which were supposed to go to Ukraine, how could they end up in Palestine? It's no use blaming the Iranians that are supplying. It's... look at Ukraine, where have missiles disappeared to? Finger pointing doesn't work. We are not here to defend Palestinians or Israelis. I looked at, as I've done for years, right across. Who's wrong, who's right, what cause they fight? Is their problem. (1:42).

We have to provide a technology which does not allow these things to happen. We have to create a condition that allows nations to live, societies to live, religions to live, races to live amongst each other, in peace. This is the reason for London Conference. It's no use trying to divert attention in Palestinians hitting rocket onto Israel, or how many Israelis hit at the Palestine. We have to find a solution, that this condition does not exist. It's no use transmuting Palestinians to another star, give them a star, give them a planet. Shall

we do that with Israelis too? Or, can we change this hatred to a friendship, to collaboration, to operation together?

And the main cause of this is United State at the moment. Why does a company like Boeing holds 1,000, what you call it, missiles are ready to be delivered? For how many more years, Israel is going to pay for these rockets? How much more criminal systems has come to be built, that creates funds for, that it pays for these things? (1:44). A 3 billion contract with Germany for new missiles (from) Israel, if they have such a contract, if they have such a technology, what do they need weapons from Boeing? Germany has just signed itself to this, one of the largest defense weapon contracts, sold by the Israelis (to the Germans). So, Israelis could not defend Saudis and the bases of Americans in Iraq. Now they are selling the same thing to the Germans? Which ministries in Germany has been receiving whatever lubrications (bribes) we've seen with them in the EU, to get such a thing, puts Germany under such a burden.

This is what we have to understand. With creating condition that they live together. The hatred has come out of years of repression. The situation is that, there are now, out of 9 million citizens of the Israel, nearly 5 million Palestinians. Jewish citizens, in numbers are lower than the Palestinians. And this number is increasing. In next 10 or 15 years, the number of Palestinians born in Israel, will be two-third to one-third. You got to understand, a lot of Jewish girls, a lot of Jewish boys, are marrying outside of their faith. This is one of the biggest strain on the Jewish community around the world. They're marrying Muslims, they're marrying Christians, they're marrying Buddhists, they're marrying everybody else except Jews. So, Jews don't have that number to create more. (1:46). The Jewish women are like a rabbits, they're creating as many children as they can, but the number does not match the Palestinians.

In the next 15, 20 years, gradually the numbers will increase. The majority will not allow the minority to rule. We have the same situation as South Africa. And we will see more of these conflicts coming up, unless the Israelis set the scene, the condition for coexistence, peaceful coexistence between all Palestinians. How come one half million have to be in Gaza Strip, and 4.9 million, 5 million has to be inside Israel? Why can't we open the borders and make one nation out of it? Is your... This is going to happen, it's inevitable, it absolutely cannot be stopped in the next 20 years. Adding another 1.5 million Palestinians from Gaza into, to make one country out of Israel, it will happen. Two state nation does not work, it will not work. Israel at the moment is 60%, 55% Palestinian, 40%, 45% Israelis. And 90%, 80% of these Israelis who are capable to do carry American passport with them. Through single passport, Israelis are very few. But, all the Palestinians carry Israeli passports. (1:48). Cutting education, cutting water, cutting electricity does not help. It makes it more aggravated to go for the next step.

And soon, if it's pushed to tens of thousands killing, then you will see the reaction from the Islamic world on Israel. And that's one thing Israel has to avoid. We saw today, I've just received the message, meeting of the Iran president with the Prince of Saudi Arabia. What forces people to come in to, to talk and to get to this point. The Palestinians should have never happened, position, the situation today has to be resolved that Jews and the

Palestinians, as they did for centuries, go back and live together in peace. Israelis should have learned from the Holocaust, not to create another Holocaust for the others, what happened to them. If it wasn't good for them, how come it's good for 1.5 million people in Gaza?

When you go to Washington, when you go to the Jewish Museum, Holocaust Museum, and you walk through the tunnels, the smells of the shoes, they have created the same Holocaust for the Palestinians in Gaza, and on the other side, West Bank. They don't tell you. They should have learned, to accommodate the way it was, the whole of the society in Middle East, they would have loved and looked after it. They chose this path, and with it, they'll bring their own demise. You just wait. Numbers increases to the numbers that are increasing. You will find out, 10 million to 4 million, (1:50). 12 million to 5 million, and in 25 years, the new Palestinians who are born and their father has been killed, 10 of them in one house. One enemy has become 5. And this has to stop.

And the work we are doing with the Chinese government, and the work we are doing with other nations, will guarantee that the superiority in "gun policy" comes to an end. And that's the only way it will be done. When you have nothing to fight with, you'll talk. And that position, and in the recent policies of the Chinese government, you see that. Coexistence, dialogue and ?? work. We cannot fight this. This Palestinian situation, I've been involved in since 1980s. And we try to support in every way. We try to support the nationals. We don't get involved with the governments. This is not the work of the Keshe Foundation or my companies in the past. You dare to make life easier.

I remember in nineteen eighties, we had the Winter Olympic in Canada, earlier on. There were millions, thousands and hundreds of thousands pens, hats, And all sorts of things, stationery, which was specially ordered by Canada, for the Winter Olympic, was surplus. In one of my companies, we bought this surplus from Canada. I still remember some of the pens, because they were a little bit old, some of them would not even write. And I shipped this to go to, (1:52). through Israel, to the Palestinians schools. And we shipped the surplus Canadian Olympic stationery, as a gift to the Palestinian children who had no pen and pencil to study. My work for peace has not started with Keshe Foundation. For years I put supply of ?? , we used to manufacture during the summer time in Manchester, buy across the world and the Israelis always wanted a Hebrew label on it, and ship it to Palestine as cheap as possible, to clothes the Palestinians in Gaza Strip and West Bank, when the winters are cold and they had nothing. Every year, up to quarter of a million plus was shipped, from our offices in Manchester. Many times I told to my Jewish relatives, "It's no use carrying on with what's going on, we have to find a solution that we live in peaceful and common ?? way."

And this war will be the last one, this shows a big gap in intelligence gathering, security. And the biggest question is, why don't the Americans open up the rockets and tell us where they're made? (1:54). They all carry American digits, American labels, registered numbers. You got to remember, all the American equipments have 13 or 16 digit code on them. And you can pop (it) out. Were these missiles destined for Russia? And the

Ukrainian leadership has got paid for it and transferred it to unknown destination, because no one knows if they are fired, or not fired.

There are a lot of questions to ask from the Americans, especially from the White House, and especially from Israelis. You claim rockets, show what the shop knows. And I'm sure out of 3,000 or 4,000, And a few still haven't exploded, or pieces of their numbers are there. Before accusing Iran of supplying, let independent international investigators, or people, to go to Palestine and check the numbers in Israel. And see if these numbers matches with American export of rockets and the rest of Europeans, before accusing Iran. And then you ask the Ukrainian leadership why the Russians are so powerful and still creating problems for you, where half of the weapons are sold in other places.

There are a lot of questions to answer. We are observers and we monitor. And as the Iranian leadership said, we have nothing to do with it. (1:56). Look at your own pocket, who you sold your weapon and where it was sold. This is a question international world has to ask Israel. Show us the shrapnel's, show us the end (pieces), show us the registration number of them. And if they match with the production in the American factories, then Americans have to ask Ukrainians. You got to understand, 10,000 rockets cannot be put in a pocket and carried (over the border). They walk on the back of launchers. Where did these launchers come (from)? The rest is tactical, how and the way they've done it.

We see the same operation in Palestine, in capturing Israelis on the back of the bikes. The same as these other Palestinians were in Iran capturing a few months ago, Iranian women and men on the streets, the same technique, the same people. There are mercenaries working within the center, in the Middle East. When I look at the videos, how these, on the back of the bikes, get people do, go back and look at what happened in Iran, less than 8 months ago. There is a lot of things which doesn't pass our eyes. We watch, we monitor. These are not Palestinians. These are mercenaries. Who equipped them that now they move from Iran into Palestine? The same technique, the same tactic. (1:58).

Now you understand when I tell you, Iran revolution, no Iranian has ever killed an Iranian. These are paid to do. Now they're paid to do this job. When you hear the slaughtering, beheading, and the rest of it, you didn't do that in Iran. You saw a five-year-old child being shot blind, blank. No Iranian has ever killed in the Iranian revolution in Iran, except those in fire ?? escort, which again, were paid by those who wanted to confiscate their properties. Then you understand the game being played. And the situation in Palestine has more to answer. And a solution to it is literally disarming the superpowers who claim "gun policy" is the only policy, because it runs their factories.

Any other question?

Q: ... How do you see peace in the world?

R: And you've already been answering that in many ways. And her second part of her question is, you explain the Souls of these people who treat human beings like animals, such as in the case of terrorists?

K- The biggest terrorists are the governments, when they terrorize. And, unfortunately, you do not understand it, and it happens to you. (2:00). And, they terrorize in every shape or form. Because they can, and can get away with it. And depends, you call them a terrorist by blowing (up), you call them terrorists by capturing, and you call them terrorists by threatening. I've been terrorized by Canadian government for 11 days, most of you know. I was told I'd be killed, I'll be put in prison, whatever. In 11 days, day and night, interrogated, put under pressure, in Toronto airport. A nation of terrorists calling the others terrorists. It depends what you call terrorism, government terrorizing their citizens and those who don't belong to a government are ??, but the governments are, all the governments are doing. 11 days I sat in the airport and prisons of Canada, Just going through Canada, going to Mexico, to help the ?? . Terrorism in its worst condition, terrorized by Belgians for years, and in ?? combination with the death of Fabio, blowing a car up, high speed chase, poison, and the rest.

One way or another, governments and those who work against governments are in this act of terrorism. It just depends how they gloss it, or how they cover it. Where the Soul goes, where does the Soul of the Prime Minister of Canada, who gave the order for me to be terrorized? (2:02). What happened to the Soul of the woman who actually initiated it? Hillary Clinton. She created a brain hemorrhage. She received the brain hemorrhage in her own, to her own end. Again, through a peace work, nothing else. The irony of terrorizing me by the Canadians, with the support of Hillary Clinton. And then us launching the sharing of the key and the 5+1. She landing in Ahwaz airport and crashing on the land of Iran and getting brain damage. I always said that's an irony. The woman who tried to terrorize us, got terrorized herself.

You do not know when they tell you, "Every day you're going to be killed." Every day you open your eyes, they don't let you sleep, they march outside your door, day and night. You don't know they're going to drag you out of the bed. I sat, lying down, lying for 11 days, in Toronto airport, and in nearby prison. Scientists going through. How many other scientists are terrorized this way to get their technology? And your Prime Minister today knows about it. We haven't received any apologies or anything, just because I'm an Iranian.

So, how our terrorist leaders live? Then we can answer. They come in different jackets, from President to Prime Ministers, to head of securities, to the kings, to people with no money, (2:04). who choose the path, all goes the same. I just hope, elevate their Souls. If the Canadians, as I said many times, Intelligence in Russia and trying to get me out of Canada, with the arrangement with the Belgians, they thought they got all the technology and everything, left their documents in my suitcase, which I published. No way they would have believed what happened to me in Canada. And I think an officer deliberately left all the documents behind. Because he didn't agree the way they're terrorizing people. Documents of Canadian government in my suitcase, and all the methods they used for it.

When I opened the suitcase in Belgium, when they deported me back, I opened the suitcase. It was a gift. Or they were in such a rush, they thought they put them in their files, but it happened to be in the suitcase. They're all terrorists. Iranian government, American government, every other government, the terrorists, all work through the same ?? engine.

Any other question?

Q: ... Good day Mr. Keshe, we have accumulated some heavy things in our lives through misconduct and have thus distanced ourselves from the Creator. (2:06). How can we free ourselves from these heavy fields and come closer to our Creator? My answer today is to offer support and help to other creatures. When this support is accepted some of the heaviness goes away. Do you have any further advice on how to eliminate these heavy fields?

K- We all make mistakes, without a doubt. I think, I always says a joke, even the Creator made a mistake, he created humanity. But, in a way... The only way, or not the only way, one of the possible ways, is to make available the freedom of the STM, that maybe those who we did injustice to, receive and find peace, or find elevation with themselves. Sometimes you're not even aware of what we've done, or what action we did has caused to the others. It's the way we can do. There is no other way. Elevating the Soul does not ?? come near, I give you, because I did something wrong with my physical life. Making it available, in what I call, loving, that someone who we did injustice to, or whatever we did wrong, maybe they're not alive, elevation goes to the Soul, or whatever, in respect to. That's all we can do. There is no target, there is no address, that we can go and deliver. I took your jacket, this is a jacket to wear, I'm in the dimension of Soul, I need no jacket. But I needed that jacket in the winter. (2:08).

And what do we do for it? And why do we do it? I've asked this question many, many times. Why do we come and get to these positions? And why when we forgive, they think we are weak and they abuse more? So it's the only way is to be there, understanding that you might not even know when that energy, that field, is needed by who you've done wrong, ?? and did you learn anything from it? There's no use being charitable and giving everything to everyone. That's in the dimension of physicality. As much as you have to do with it. And ?? don't.

As I said in the teaching today, don't look, oh, I give all my Soul. I give what is there to it, in the essence of what is needed. There is no other way. We learn this. We learn this gradually and slowly. And usually the little things which we don't think even matter, is the one which has actually made a change in other people's life.

Any other question?

One of the things is. Don't live with the guilt of. Live the pleasure that you know that you can give of, that might change that position. The way we allow you in the machines to expand your Soul, (2:10). you can do it yourself and let, if you need be, will be taken. It's

like when you want to dream about mom today and mom is not there today, because she's not available, but she doesn't need you today, because she's busy somewhere else. It's the same process, literally the same process.

Any other question?

Q: ... I was doing some stretches and I happened to notice that my arms were swinging. That's when I realized I was in the middle of a field interaction. In front of me there were some ping pong balls with Gans and behind three reactors, CO₂ and ZNO, and above the Cup of the Man. My arms started swinging, my breathing went to the diaphragm, and the fields went up to my head, directed to the frontal, with three pulsations, the last of greater magnitude. The fields then went to the center of my head and remained pulsating with a beat. I stayed like this for two minutes and 40 seconds between the interaction. I left sat down in a chair and felt such a sense of well being that I lost track of time. Question, how can we understand this event?

K- I don't know, as I always say, I wasn't there to see what...

R: You weren't inside his head at the time.

K- .. In the London conference with ambassadors, we will show some development in the science of space technology, (2:12). that the participants become part of it, you feel it. Those of you who attend London Conference, your life will be changed forever. You will understand exactly what I'm talking about, when you look at it in a year or two years time, or maybe immediately.

It's creating the condition. Creating the position for the condition. And you create an environment for it. And only you who experience it, understand it. And this is what I said when people start coming to Linz, whatever you say we believe, because we have given you that freedom to get, to test that. We have allowed it to expand. And all we've done is what you've done (the questioner with his Gans and reactors). We create a field environment. And what fields you created, what condition you created, what mental condition you were there, that you created certain fields. And you won't be able most probably to repeat it again. Maybe you can if you did it on ?? times. Depends on the lunch you had, or the field, or what you had for breakfast. How much you suffered from your wife just before you get the room, or how much your husband tortured you with the love of knowing you so much. Because some people, some women, don't like to be loved so much. They see it as a torture. He's faking it. We don't need to fake it. It's just the way it is. We talk about what we love.

Then you can't repeat that condition. But if it's done in the right way, right condition, (2:14). and you can repeat that condition, you can reach this point again and again. This is the condition of environment. And you're the only one that carries that blood flow, that field strength, in that time, in that position. Nobody else can. And nobody can repeat it, because it's you who created that. And with it, you created that emotion, which you explained what happened to you. I wasn't there, but we believe it happened, because with

the condition you created, you tell me there's MaGravs here, Gans is there. But field flow, were you the giver to the systems, or did you take that, you elevate, or create a condition for expansion of your Soul, that you could do things? Nothing is impossible, if you understand how you set it up.

I always said, I used to joke, setting up a right emotion needs right tools and right set up mind, right thinking. And everything has to go perfect. I used to tease, you know, you, you make a condition of ... trying to show to your partner how much you love her and everything else. You put rose pebbles on the bed and you buy most beautiful flowers and a perfume as a gift and everything else. And there she comes, you had a discussion or argument with somebody in the office, there it goes, the pebbles, you put, throw them in the bin. It didn't work, the condition, you set everything right, the way you thought, but you don't know what's coming with the other part of it. And then you say, "Oh, I'm not doing it again with this." But you don't know, what about the next time you set it up again? (2:16). And maybe this time she had a good time in the office, had a promotion and it comes, everything matches to each other. And our job is to create that bed of pebbles and gifts. And let the Souls decide what they take from it, what pleasures they bring on the table of life. Or elevation of the Soul.

Anybody, any other question?

Q: ... Can the Knee Gans create the condition of regeneration of the anterior cruciate ligament of the knee, which has been totally ruptured?

K- You have to ask that from our doctors. The Knee Gans is produced for test demonstration. And, send your question to the doctors and get the answer through them.

Any other question?

Q: ... I have participated in the half hour session, the STM meets the Soul of the body. Next Sunday there will be the evaluation of this. Will this session be offered again? I would like to make it possible for my daughter. Thank you very much.

K- No, this session is so time consuming, and so much effort has gone to it. (2:18). We had to literally, because of the system running, we had to send our staff home, the whole laboratory, that their Soul, their emotion doesn't interact with the system, or create different condition. Some of you say we charge a lot for it. We literally had to close a section of the Keshe Foundation, where the systems are, send people home, just for you to be able to do this. And again, in explaining the graphs on the Sunday for those participated, and so again, there's a session the following week with it, it's more than what we can do. It was to learn, to see, you come as groups when you join the sessions. But individually, it's huge amount of effort for the back of the Keshe Foundation. And everything had to stop, during those sessions we had. And it was good for some of our staff, they had a day off. But the process is very time consuming, but we had to see the actual process. You see your figures, or your graph of your Soul, but we understand a lot more, we see how, what we have to set our systems up. How we saw it, what

misunderstood by us and what needs to be done. And those trials brought a lot of information for us, for you is a graph of your Soul. But for us it's a huge amount, it brought us new development, we added new things to our systems to... was the follow up last weekend, tomorrow's session. How we can, how you can, and then how we prepare the condition for what I call, transmutation.

Tomorrow's session is totally different than last week, (2:20). because last week we learned, we saw, and how you collectively switch on, switch off, how you collectively decide to receive fields, and we move our systems in different ways. As I said, if you're a participant and you look, there are two systems always on, most of the time. Because there we interact with field energies, we know how to do. If you've been part of this group, just look at the participants, because every, what you call it, available to everyone.

In some cases, some of the microphones of Keshe Foundation systems are on. We decide how, and then we switch one off, when we see how you interact through our systems in the background, what we've done, who's... how much you've taken, how much collectively you are. If we can... We've seen, for example, last week, there's a one section, that we know in that section, we can... we could have transmuted all of you to one point. There is a point of common denominator interaction of all your Souls together. And I think some of you, most of you, have felt that one. This is important for transmutation of the future time. Because of, we added a system last week, which we didn't have the week before, we never had it, because of the test we did with your Soul, we added another one, and now this brings us to a more completion.

The, the situation in the end of the month, that's another one, another cycle of adding up to the system. Literally perfecting it for the transmutation. You have to understand Keshe Foundation has two systems of flight. One is the one we develop for the space technology as a craft. You travel with a, what you call, MaGrav systems, with the shielding and everything else. (2:22). Then, it's a second mode of transportation, which is transmutation. One we move your physicality, one we move the energy fields. In the physicality, we create the physical, you're used to aircrafts, we create, we give it the shielding, we allow a higher speed, faster communication, faster motion.

In the energy, we create an envelope of that aircraft, which is your own Soul. Then, on the path of the universal ?? fields can travel anywhere. Is not one method, is two methods of transport. One is physical, which we've shown with the Iranian development in Sharif Tehran University and the evolution in that side of the science. And one, which is the expansion of using the fields. Matter state, versus the energy state of the Creation.

And this is how we, if you look at it, in the matter state, we told you how to do it. You get them Copper, Nano coated, make a Gans of it, and you have the energy of it in different form. In the energy level, we use that energy from that level, for making condition of envelope, and the strength of field of your Amino Acid (AA), for you to expand and to travel. One we engage you, one you engage yourself in. And so, there are two methods of space travel. Not one, and we've done enough with the physical condition.

I'm sure you will see a lot of the... because man likes to be in aircraft. You see this, especially with our cooperation now, coming up in the next few years with the two nations of Iran and China. (2:24). And we still develop the transmutation side with the Chinese operation. This is instant, which is part of it will be.

And we will see in the very near future, the evolution in healthcare in China. You will see it, it's a constant operation. Where Keshe Foundation technology will come directly into operation. Large number of people testing, feeding, and the rest of it. And then we have the other side, which is our commitment to the Chinese, other side of our work, which stays, till they decide to go public with it. But I think in the next 12 months, you will see effectively, in the wellness side of the Keshe Foundation, tested in large number, hundreds and thousands of the Chinese, and people in China, and around the World. Because, it makes sense, it works, and it does what it says.

As I said to our partners in past, recent time, is you still want to go through the medicine, do this, train nurses, doctors, blah, blah, blah, build hospitals, or do you want to give them a headphone, put them on the machine and see what it does? You got the leap, or others will take the leap and you become subordinate. And the other option is ?? understood man. You will see Chinese healthcare will jump 100 years compared to the rest of the world in the next 12 months, 24 months.

Do we need, does a man living in remote part of China, as a peasant with two three hundred dollars a year income, has to suffer, (2:26). not receive the same as the richest man in China, in Beijing with millions, both having the same cancer, both having the same Alzheimer's, both having the same difficulties. With this is equality, the man in the remotest village will receive the best the man receives in the city center. This is how a technology should be at the reach of both. Then we'll come gradually into operation of feeding, the other things which the technology gives.

Q: ... Will the plasma car be available to purchase in the next few years? And if so, would it be manufactured by collaborating with existing companies in the car industry?

K- We have, not we have, Mr. Musk of Tesla is invited to London conference. He'll be invited to London conference. We especially, specifically have targeted him through our promoters. And they have their own ways of accessing him, because they're American structure. Chinese car manufacturers are aware of this technology. We've been offered percentage of the car production, but we don't want to go to electric car. We want to prepare companies like Tesla and the Chinese operations, to go into what we call, flight system. Not levitation.

Last night in the meeting with some of the high ranking people, we were talking about this, that we... He said, "We have levitation, you have the mechanical." I said, "This American Marine done in 1975." Now you have to do it with the plasma. Now you don't use any energy. And it's inevitable. (2:28). In next two years, Keshe Foundation will start selling. We have to complete cycle of our work in China. And I'll be spending more and more (time) in China, as the development takes place.

And our target is parallel development. Space technology, defense technology, and public use of the technology, where we can reach, we can actually make difference. But you have to understand, this nation is the most conservative nation in the world. Everything has to be step by step, step by step, and we're taking... we understand their work now, so we take our time. But 2024... 25, 26 to see the first systems, who use MaGrav technology, in China, is not far-reach. We're trying to show it very soon, but in mass production it'll come. Electric cars are obsolete.

You... November is coming up, November 2011, we were prepared to show it in Eindhoven. 12 years later, we'll be most probably showing it to you in Beijing conference. Because once it's shown, the technology is shown, replicating it in such a simple way is a mass production. Levitation by magnets was shown, you go into the Internet you find in 1971, American Marines showed how they can, but creating positions, and other science have shown it. But through plasma technology, which doesn't need any energy, is a different way, and you will see this. It'll be very simple. (2:30). It's the simplicity of it is amazing, because we should have allowed to show this in 2023. In 20, what you call it, 11, in Eindhoven.

The way it works is very simple. (I'm just waiting for the whiteboard to come up for you to understand. Well, I wish someone would have changed this rubbish). You have a vehicle and you have the road. Present technology today puts a vehicle on a, what you call, a very good, nineteen fifties cars. Now it's more sophisticated, but it's the same principle. It puts the car on shock absorbers. And if you look at the top view of this car, you have what I call, the cage, human cage inside. You have 4 shock absorbers in the system. We place the shock absorbers, the same structure of absorbers, with the MaGrav system. Which means we can lift the car in 4 corners. There is a central control in here, which decides what fields ratio will change, that you turn left or right. The work we did with the scientists at Ghent University years ago, and the work they've done in that way, shows 200 kilogram, (2:32). 5 centimeter maximum, is safe and acceptable by elderly, and by people who have the fear of whatever. Because you have to carry, you can't have a levitation cars and then ordinary cars in the same manner. You have to change gradually, but it has to be done.

So you literally place a 4 MaGrav systems on either side. The speed of the running it is very simple. These MaGrav system create enough energy. Don't forget, when you are 5 centimeters or even 1 centimeter off the ground, you are a feather. Literally, two hair dryers can dictate your speed, if you look at it that way. But it's more complicated. The same way as we see in, what you call it, ships. We have (rudders down below), when switch them below, which way and to what speed you can go. Left or right, where you want to go, to do it the way, or the speed. The reverse is the same. This is the simplest way to get these things on the road immediately. More complicated, more advanced system will come in the future, which these ?? vents are not needed. And then, because you create a magnetic field, and this magnetic field on its own has created its own Star Formation (SF), if you see it. This has a central effect, which has a emotion, which will have emotion. You will understand it in time to come. So if you have a child crossing, as

a Soul, we'll avoid it. In a bigger way, mechanical way, if you have another car with the same shock absorber next to you, they avoid each other. The process of accident becomes very rare. (2:34).

And this is how the process will carry on. And this, making these reactors cost less than 10 dollars. And once you fuel them to run, they will run for decades. So it's not far fetched. It's literally on our tail. It's just that, then what do the governments have to decide how these are implemented? How they will, they bring these things into operation. It will change a lot, it will bring a new dimensions. The cost of manufacturing of cars will drop by maybe as much as 80%, because it's just what you furniture inside. You can get a wooden cardboard and put it on it and you still go the same. And the pollution will come to more or less to zero. The accident rates will reduce drastically.

And it's a transition of accepting and what to do. The, on the back of this will come the shipping, which in a way, if you look at it, you still want to ship a car container from China to, let's say, US. You don't need to have the ship actually sitting on the water. (2:36). You can create a levitation that is still using a free ?? path for it, and goes. Once you create that lift, doesn't matter if you're one kilo or one ton. It doesn't make any difference. It will not make any difference.

A lot of things will change with this development, this technology. We have the system. It's just that step in time, 2024, 25, 26, we see time for this to come. And then there is huge, huge investments, billions of dollars which now has gone into producing batteries for electric cars. These electric cars need continuous charging, wasted batteries, replacing batteries, and all this goes through the window. And we actually working on to show this in one of the conferences. Weight reduction system, what was supposed to be shown in Eindhoven. And then, we understand what this will implement, kind of implication of it and application of it.

Any other question?

R: You had mentioned Tesla cars and Elon Musk and one of his latest designs in his cars, he's going to incorporate thrusters, rocket thrusters into the car. So perhaps, like according to your diagram, with the ability to steer using thrusters, but levitate with the MaGravs, it could be a perfect combination. (2:38).

K- This is on the patents, and if you go on the pictures of the Keshe Foundation years ago, this is not something new. As I say, Musk and his team literally listen to every word of the teachings on Keshe Foundation. They haven't... they don't miss anything, because we see them in the research and what they do and how the things done. Because, it gives them an insight, a way to do things. And they study every single paper, page ever released by Keshe Foundation. The Musk group are literally sitting on top of the... We are not the only one, they sit on every technological group to see what they can get, what they can bring in. And you saw them launching that small MaGrav energy saving unit. and it didn't go anywhere. When you steal, it does not go far, it shows a few pieces. And

this is the habit which he's taken. But he's invited openly to be there, or he'll be invited openly to be there. And we'll see how things take shape.

As I said in the conference in London, we don't exclude anyone, even for the first time. Since my departure from Belgium, we allow the Belgium ambassador, he'll be invited to the meeting. The knowledge has to be, we cannot create another Palestine out of Belgium.

Any other question?

R: Okay, thank you. We have a... (2:40). Oh, your hand is up as a panelist here, Mr. Keshe, I was going to say we have two hands up.

K- Oh!

R: Oh, it's yours.

K- I want to ask a question.

R: Does that mean you need a bathroom break or something?

K- No, how does it come out?

R: I'm not sure, it's a independent hand raising, I'm sure.

K- I know where it is. It's not there. How did it come out? It's good, I have a question to ask myself, maybe my Soul has a question.

Q: ... In terms of the relationship between the physicality and physical Soul and the Soul. In a human being that decapitates someone's head, what is going on in that situation? What's the emotion afterwards for that person and what cause, I mean, what kind of imbalance is there that creates that? And how does it come to that point? Because, for me it's just something I cannot even imagine someone can do.

K- It's not can't imagine, it happens in accidents. (2:42). Or it happens in a way. Or we used to have the execution... my tongue doesn't turn around it. The executioners, they used to behead people. And so it... What happened to the Soul at that point, ... the Soul ..

Q: You mean the person, the person who kills? The person who kills and not, I mean the person who...

K- No, the body which is, the, the, the person who's been, or lose the section of the body with it. And the person...

Q: My question is about the person who does it. What is the, what happens with them?

K- Oh, they have their own demons to live with. They have their own demons and their own Soul to live with. We've seen this. We cover it up today, as war veterans of United State. And they come back with all sorts of nightmares and everything else. Sit down next to every single American soldier, who served, or a British soldier, a European soldier, who served in... American made wars in Iraq and Syria and whatever, and you listen to them. Why they are sick, and the way they are sick and ask them one single

question. Who did you harm? Who's your demon? What child did you shoot? What man did you shoot? You're responsible for that Soul. (2:44). And because you don't have the strength in your Soul, you pay it as a physical illness, psychological, other bits and the other bits.

Soldiers who go to frontier and come back, which do not take part in what I call, unjust work, usually come back healthy. They usually come back to just being to. They serve the, what you call it, and the others... you ask them the question, and then you find out why, and what happened to them. It's the same with people who go...

You see people in the front, but you don't see them in the background of their lives, what they live with, even if they are proud of what they've done. But you see what is done, and then you look at the structure of their family, look at the structure of how the loved ones have paid through the Souls and physicality for it. It's not for us to look at it.

There's a very long history of this. If you go into the history of Iran, and they follow the people who actually did the shooting and killing, what happened to them. Actually when follow these people, who have done as executioners, as a firing squad, number of people were put in to execute one person, and those who walked away had no problem. Those who stayed for a second time round, and actually carried out the execution, they followed their lives, people followed what happened to them. (2:46). They lived some of the most horrible lives, horrible deaths, in their life. ... And ... you don't look at these people, in what they do. The guy says, "My job to behead people." And listen to some of them, some of these people have actually ?? reason their life story. You can find it here and there. And some of them tell their own story, how they lived and what happened to them. Doesn't matter how much they pay you, you don't take a life. Life, Soul, cannot be bought with the money of the man on this planet.

There is a system set up to look after people like this, Souls like this.

Any other question?

K- How are you by the way? You're okay?

Q: I'm okay Mr. Keshe, thank you, thank you.

K- You don't sound very good. Yes, okay. Thank you very much. I wish all the best with what you've gone through in past few days.

Any other question?

Q: ... Is wrote a question inspired by your thoughts. (2:48). A federation of regions could be an example of conflict-free conflict resolution in the Middle East. What's your opinion? Thank you very much.

K- Can you repeat?

Q: Yes, a federation of regions, not of state, could be an example of the conflict free, conflict resolution, in the Middle East zone, area.

K- What does that mean? I don't understand it.

Q: Yes, like a federation entity of region, but not of a national state. You know, to be open.

K- Yeah, yes .. I understand. .. We have had a lot of contacts with these people , and Keshe Foundation has a very direct standing about this. These people usually become fringe, or other pressure groups, or radical groups. And the way Keshe Foundation stands this, is we only deal with national governments, from our point of view. And ... this is ... we've had this, I even had one of these groups coming to me to see in Ninove (Italy). They came in with all the uniforms and everything else, into the meeting and we are the generals of this, what you call, groups. And then they left the room and I accidentally went out to go out of the room. (2:50). I saw them, they are changing their clothes in the auditorium of the Ninove. I said, "What's going on here? This is not a changing room." "We cannot go out with these clothes, it's dangerous for us." When wearing uniform, what you represent, what you believe in, is danger. It shows a lot of things which we never want to get involved.

So, I set up a structure, we accept, at this moment of time. What you call it, at this moment of time, the structure of United Nation accepting nations and territories. I'm sure in the future, the name of these territories and nations, will be just a reference point, not the border point. And this will come very, very fast. Once the new transportation, transmutation systems come into operation, nationals, governments and all that, will come to its own natural end. We are from Earth, but I come from a region called Iran. You come from a place called Romania, and the other one comes from that region. But it has no superiority or priority over the others. And this is the, that's the inevitable. So we don't get involved in these things at all. Because then we become supporter of minorities. We are with terrorist groups and the rest of them. We don't need this.

Working with the frame of the acceptable structure of nations and territories at the moment is what is the norm ... (2:52). what our work is that in the coming time with the technology these things become irrelevant. Technological ?? then becomes normal right across the planet that everybody can get fed through the same thing. And everything else, there is no need for borders because everybody gets what they need. And this is not very far, maybe next 5 or 10 years.

I was talking this with some of the people who are involved in this, is that then we have to centralize the systems in certain nations, that they have control over their nationals. And this is the next step of discussion with governments. We set up systems internationally that no nation has control over it, that they can, all the people around the world can be fed by it, can look after their health and the rest of it. Or we become again, one system for each nation and that's not doable anymore. This is one of the dilemmas I was in discussion in past few days about this. The concerned nations want the controlling

systems, the servers in their territory that they can control. But this system works for everyone around the world. There's no control. But they have to learn. ...

Any other question?

Q: ... (2:54). Mr. Keshe, thank you for sharing the emotion of knowledge about the strength of the Soul of water, it really enlightened us. About the body of man and the understanding about the nourishment of the Soul on this planet, thinking about the Hydrogen fields in water, we would have this source which, or that forms our physicality and STP, thinking about the Soul of Hydrogen Gas and the body of man as a fractal of a galaxy, would the nose work as a black hole, where it captures the energy fields of gases and expels recycled force fields, now with the emotion of man, who is the feeder of the environment?

K- The nose you mean?

R: He's talking about the nose as a Black hole, And...

K- I don't know, ?? behind it. This is just the extraction point and ventilation point.

R: Well he's talking about the Soul of Hydrogen gas in the body of man. So, would that Soul of Hydrogen gas be, use the nose as a, sort of a Black Hole entrance into the Soul?

K- Not really. Not really. I don't think so anyway.

Shall we call it a day?

Thank you very much for today. (2:56). And hopefully we learned a little bit more, about a little bit more of what we don't understand, most of it. And we'll see you next week. And maybe from this ?? ... onwards we start bringing in larger audience of humanity to understand the changes which are coming through the conference in London.

As I said, if you have any heads of states, you have direct emails, not the offices, that it goes to their offices. Give it to our team to interact and create a condition. Thank you very much and see you next week.

...

Q: ... Mr. Keshe I have a wondering question. From all this knowledge, what you give even to the government, Iran, or the Russians, or the Chinese, did any one of them went further to do the Oasis system, nearly the Oasis system, that maybe they can help this situation in what happened in Palestine? And we see, you know, if you remember the Tom Salas video, in that time you referred to what happened there, it even can protect the whole island. (2:58). And the same thing, it can protect the whole area from anything penetrating it.

K- In a way, yes, in a way, it's so powerful that it has puzzled the government. It's a progressive work. We in a series of tests in very recent past, we have created conditions that has baffled the governments. Even though they were monitoring, they are part of the

test. It's a test they asked for, we just created an environment for it. And when it came to the point of try to accept, to understand the condition created, it was too much for them, because, this way they would lose a lot, but they gain a lot, but they want something they couldn't have.

This test was done, initially, years ago. And we created several times the same condition, the same ,what you call, position. And then again, did the same test twice, in recent time, in two different locations with the same outcome. The governments can see the Oasis system working, (3:00). energy, food and everything else with it. But it's in such a large scale that at the moment they cannot, they say, understand how. We created a condition, we created a huge amount of damage, most of you, some of you know, when we did this test years ago. And we repeated the test again twice with the same outcome. And one of them even much more powerful. It's recorded by governments, by national structural organizations.

The Oasis system is not something hard to create now with the new technology, new phase. But in creating it, that it changes the situation in where you're talking about. We have to sort the cause of this problem. I know exactly what you're talk about.

I said once before, maybe you understand, answering to a question. You must be of the lowest order in the size, in life, and the strength of the Soul. And understanding. If you cut a man from his water, and today's what we call, amenities. You don't do that to a dog, let alone to 1.5 million. (3:02). And my worry is, how now this people can live with their own conduct. They must be lower than the dog. They are not human, they are evil. And we have the will to, they shall be punished, as you call it. But if we do that, it will be the same as before. Only comes through elevation of the Soul. Only comes by understanding their own shortcomings.

A man is not powerful when he's at the point of power, to do what he likes. A man is powerful when he's at lowest, be kind and generous, to be able to give with what he doesn't have to ?? give. And the situations you're talking about, is not even in the realms of Creation. I once said, I will ?? , the position of the Soul of the Pope, who knew about the child abuse and he covered it up for some 16 years or so, as he was one of them himself most probably, to be lower than (Princess) Diana at that time, when she died. (3:04). But these people have no place for their Soul. And if they think they're going to walk away without it, with it, they have a long, long, long, long, long way to come.

So, the answer is not Oasis, the answer is, is creating condition. That Oasis is for all of us, by elevating the Souls, that they do not create this condition. There is no difference between the Auschwitz camp and the today West Bank. Only difference is the one who were inside, now they're outside. And they are more hideous than the ones who kept them inside in the past. Thank you very much for today. Hopefully we see you next week. Thank you very much.
