

# 508th Knowledge Seekers Workshop October 19, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

## ENGLISH TRANSCRIPTION

(:11).

K- Good day to you, as usual whenever and wherever you listen to this is a knowledge seekers from Keshe Foundation Spaceship Institute. We welcome you back and as usual we hope to endeavor to do some more what I call "naughty things" to find out what was hidden from us, we can learn from Him and the way He does things he of course being the Creator. It's not a "hide and seek," but it's understanding. The more we understand, the more we unravel His "tricks." (:12).

Today's teaching is as usual and we just try to add to some knowledge prior to starting this couple of announcements which have been, I would like to bring forward. First of all is the meeting in London please as of this week we hand over everything to the promoters and if there's anybody left wanting to join us please let us know. Otherwise you go through the system.

On the other hand we had a meeting with the Iranian Keshe Foundation team live program last night, addressing the Iranian leadership and the Iranian position in respect to Palestine. We have requested I'm sure the English translation of it will come out soon. We have requested the Iranian leadership, means Ayatollah Khamenei. of Iran, Iranian president, their representative knowing heads of Sepah, the president knowing, they were present in the meeting. We informed them 24 hours before, and the recording has already been passed on, ?? first message in recording was passed on to his eminence Ayatollah Khamenei. of Iran, in yesterday's meeting with the Keshe Foundation Iran has been done the same. We have requested from Iranian leadership and you will see the extract of it. We are aware of information that Iran could be pulled into a massive war, becomes the end of the nation. And we have requested from Ayatollah Khamenei. of Iran to issue orders to use the Iranian military forces to become the savior of the Palestinians and open a corridor between Palestine and Iran, and transfer the refugees into Iran. (:14). And provide facilities for existence till the situation with Palestine is sorted.

The reason for this we talked about last week in the teaching, and we have to understand Iran was pulled into a trap by the Americans and Israelis. But they sold the arms to them to bring it to Palestine, they use, and then Iran get accused of it, and they have all the armaments ready to annihilate Iran. This was part of a trick to get into central bank of Iran and the ?? orders of ?? Hamas.

For this reason we have requested the Iranian government to use the white flag part of Iran, which is the peace. And is the way was used by Kourosch and Darius, and by the other Iranian leaders over the past centuries to give refuge to the Jews, to the Armenians

when they brought him into ?? ?? what he called a side of Esrtafan, and then part of Iran was given to the Armenians, or Christians, and that's how ?? Afghanistan ?? was created. These are the people who gave refuge centuries ago to escape from the harms in Middle East. The same as today. And we even gave part of our nation to them, to create their own nation.

I have requested from the Iranian leadership with the reasons, which they are fully aware and they confirmed our information intelligence is correct, to open the corridor between Palestine and Iran, and give access to the refugees. These people who have been told to go to the south of the country, and then they bomb the South. They tell them to go to the hospitals, and they bomb the hospital, 600 - 800 people were killed in one bomb yesterday. And this is a trap. It's the way the Netanyahu government works, deceiving, cheating, and the rest of it. The way they did using the Keshe Foundation, (:16). the space nuclear reactor as a bomb from Iran and causing all the mayhem, until we opened his hand.

For this reason I have asked as always, advised the Iranian government over decades, and sit in the back watching what we call, the back of Iran that we don't get harmed. I have advised the Iranian government for Iran not be trapped with what they did or what I explained last week, to open a corridor for Palestinians to be moved into Iran. We give them sanctuary. We've done this for centuries, and we end this madness, which has been created by Israel. And hopefully we'll see what the decision will come.

We hear today in the speech of Iranian president that it says, we will be present in Palestine. We have to see what is the new decision. Iran will become the rescuer of the Palestinians, and the rest as we've done for centuries, and even with all the burdens of sanctions we accept the responsibility. We have to see what is the decision of the Iranian leadership. I asked him to turn the guns around, and put the white flags on the tanks and the personal carriers, which ?? were there to bring the Palestinians out. And make arrangements with the other countries to facilitate to transfer these people for the next few month.

Then we end up with this may have a greed for land by the Israelis. But I have to inform you, that with the technologies in the hand of the Keshe Foundation we don't talk just to talk. We are aware of the technology (T) should be delivered to the Chinese government and the Iranian government to make facility in a peaceful way, that the land of Palestine will return to the Palestinians in a very peaceful way. But the Israelis the way they came, they will leave, and the coexistence between two will be there. Where the land will be shared. Not by gun policy, but by sharing technology, knowledge, (:18). and making it available that this position, which has been taken to use Israel as a next point for wars, for a continuous wars to come for centuries, come to an end.

I have asked his Eminency Ayatollah Khamenei of Iran to consider the case thoroughly and understand the situation sensitivity in rescuing one and a half million Palestinians, the way it was planned, to wait to support other groups, radical groups. By opening the doors we save 80 million Iranians, which are targeted by the bombs and missiles of the

Americans long distance. The way they did in Syria, in Libya, and we saw it in Yugoslavia when it started the first time. I hope when the Iranian leadership and Sepah understand the sensitivity of the situation and act accordingly. We'll be present to help the Palestinians to move out of the prison created by the West, by the gun policy of the United States, and what we call, madness of the Jewish leaders, not in any other shape or form by the nation of Israel.

To this effect I put my request out to both side, the Iranians and Iranian leadership to facilitate if there is going to be a nation of Iran left, as the plan by Netanyahu and the American leadership was annihilated Tehran. And this way, annex the south of Iran was as part of the British petroleum ambition to control the whole operation in Persian Gulf with oil. I hope we see an outcome in a different way, and the first signs of what we see, hopefully if the information coming from Iranian president is in the right direction and not the other way, we see will be present in Palestine to remove, to help the Palestinians to get out of this open prison. (:20). Give the land as much as they like to the Israelis. The numbers is dwindling. And as I said, we have taken the "love of God" from the tribe of Israel. And when the God does that, they can fight as much as they like, there'll be no sign in time to come.

Going back to the other parts, the same way the London conference is set for the 11th of November. The venue is chosen, we have signed agreement contracts and our promoters will announce it around the world. It is their job, invitation of the ambassadors and the government. And at the same time we look forward to see many of you there. It'll be a historical time as the Keshe Foundation through technology will show the change. Through technology we show what is to come ,and through technology we bring the change.

In so many ways Keshe Foundation Knowledge Seekers (KS) for the first time we have allowed this to come in, have made a star, a star of peace and gold color. As the "star patch" in the store of the Keshe Foundation. These are individually handmade and it has a lot of meaning. It is done to celebrate the beginning of the conference and in a coming days we'll release a special envelope for the conference in London, which brings space and technology and peace together.

Going back to the teaching, in the last week teaching and the weeks before we tried to explain the connection, the understanding of the human body to the planet Earth. (:22). How we took shape, how we take shape from the interaction of the fields of our Soul, Soul of the Physicality (STP), and what we call, the Soul and the STP of the place, time and destination. When we fall in love we touch our love, we share our emotions (with) our love. And the way we touch our love, as a lover, he or she changes the way she eats, and the way she walks, the way she thinks, everything to suit the lover to fit in, to accept a lot of things that were unacceptable. But now the interaction creates, to create that condition of acceptance.

In a way the gravitational magnetic (GM) field of the Soul and STP, the physicality (P) and the Soul interaction with the new entity. They change their behavior, they change

their clothing they change. You used to be a hippie, you shave, you go into suit, just because she loves, and you try to please. You make yourself ?? fit in. She hates blue, but she wears blue, because you love the color of blue. It's the same when we move our Soul and the STP into an environment, to another planet. Our Soul, our STP interacts with the Soul and the STP of the environment, the star, the planet. The way we change our clothing to fit, we change our body, our presentation, our manifestation in that point and position.

This is how it works, this is how those of you who elevates the understanding, the knowledge of yourself, and your children. (:24). In understanding the science of the Creation will understand there is no fear of traveling, there's no fear of being in space. You don't need to go to university, you don't need to be taught by NASA how to get into a "monkey suit" and get into a swimming pool, and how the monkey will behave when he gets to a place. With the present propulsion system the way we go to the Moon we actually create our own prison due to the lack of understanding the process of the Creation. Jumping like a rabbit carrying a mask ?? to be. Like as we do, we go at the bottom of the sea in these clothing of the divers, because we never understood the process of Creation. Now we do, now we have no fear, now we understand the way we change ourselves for our lover. When we get to a point of destination anywhere in the space we find a lover in the level of the environment and the condition.

This is what our present Soul has done, this is what our present physicality has accepted and manifested itself. As the interaction of the field of the Soul of the Man (STM) and the STP of the man, in respect to his environment, has dictated us to look like humans. Short, tall depends how much energy is in the Soul, how the STP and the STM interacts. And then to and due to the Inertia which is the manifestation of physicality of the planet, we become short, tall, we become Chinese, we become American, and become Iranian and the rest. So when you're born, and you live, and you've been through the position and the condition of the let's say, Iran, you have a brown eyes, dark eyes, brown hair or whatever. Because there in there what we call, the Inertia of the materials, (:26). magnetic field of the Inertia dictates the interaction with the Soul and creates the condition of the color and the skin.

Now we understand. Our features, our behavior, our way of thinking is connected directly to the Inertia of the environment. And where we land. In the environment of England dictates such as such a color, environment of China dictates such as such a position of the head. That in that position, because of the gravitational M field of the calcium (Ca), we get a smaller head. Brain still has to go to the same position, and slightly we get twitches in the eye, in the position of the eye, and the shape of the eye. They say they're Chinese, because for hundreds of thousands of years they have adapted to the Inertia of the environment.

Now you understand how the Inertia of the environment we land, plus the Inertia of the environment of our Soul, our STP, creates in interaction with each other, creates the shape of manifestation of point, place, time and position. When we tell you that we create the condition of the Mars and Moon and you see how you'll be, what animal you'll come

out on the other end of the machine, it's just all it is. We create the condition of the Soul of the Moon, we create the condition of the STP of the Moon, we can create the condition of the Inertia of the Moon. And in that position your Soul, your STP, your physicality, while you are in the machine to adjust to the new changes. The process of millions of years is done within minutes, within seconds. (:28). Condition of survival is the same. If you want always to look as a man, doesn't matter if you go on Mars, on the Moon and on another planet, get into your monkey suit. And even then there is no guarantee, you come out of it as a monkey.

This understanding to this process we endeavor in the London presentation to show you the manifestation of the fish. If our scientists managed to understand the process I have given them. I always said, one drop. Now you understand what that drop is. We have our knowledge, we have our technology so advanced within the Keshe Foundation, that we can take in one drop the Soul, the STP, and the physicality of the fish in one drop and drop it to be manifested in another tank. But we made sure the two tanks are the same, so you should get the same fish. Why I change the dimension (D) of the magnetic field of the tank you will see maybe the fish becomes a frog, or an entity you don't know.

Now you understand the science and not the magician in the science. This is how you understand the process that everyone who can make a fish to appear somewhere else does not become a prophet. Because the next prophet in another other galaxy, another planet can do another magic with a field you don't see, and you'll call him another prophet. (:30). So you'll have billions of religions and you don't know which way you go, because you never understood the reality by the process of the Creation. So everyone becomes a magician and everyone becomes a prophet.

Now you understand it's not only the interaction of the Soul and the STP, which dictates your shape. The Inertia of the place and the Inertia that your field creates in the boundary of itself for manifestation of physicality as a what I call, fundamental playing force in your manifestation. In the future, as we endeavor to bring and develop systems in a very what I call, advanced way, as is now going ahead, you will see in London the transmutation units, the Vertical Transmutation Units will be brought in. We hope we can allow it to work and our scientists manage to get it working. If we create a slightly different environmental condition in the receiving end, you'll go in as an Iranian looking, you come out of as an American looking. Because by mistake we gave you the American look, or you decide through the magnetic fields, that's what I want, that's what my Soul want to be happy. When I arrive in the States I don't want them to say, oh, he is a foreigner. He's there. I want to look like them, blue eyes, brown or blond hair, tall and handsome.

And when I go to China I do the same. But because you created the emotion of the Soul to the environment you interact with other Souls. (:32). Automatically you reach, you receive the knowledge of the Chinese. When you speak Chinese you understand essence of the language, not the dictionary word of the language. Now you understand not to have fear, but have confidence, that you understand the process. No one can take that knowledge, that emotion from the emotion of physicality and emotion of the man.

In coming time in understanding the totality man will come to use this as a play, as a joy of life. As in a way, we go to carnivals, we go to ?? bar mask, we go to everything else to create a new cover, new clothes. We go to Halloween, we put new clothes on to look to be something else. Now we can do this without buying these clothes. Where through the emotion ourselves internally, even though we carry the same Inertia, we can change. We don't become a chameleon, we come to understand the complete science of the Creation. Control of emotion, what I need to change in the dimension of the fields of my Soul. What I need to change from the dimension of my STP and what Inertia this will create.

Man will find in a coming time in the process of learning is that all you need to do is, to keep the strength of the Soul the same and play through the emotion of the STP. The conversion, the understanding of the manifestation of the time, place and position. (:34). As I always said, the Soul of the Creator is within all of us even a stone. But the STP in interaction with that Soul, creates the image of the being. And when we produce the same strength, in the same Inertia environment, we'll get the same result. As the STP is not perfectly the same all the time, and the Inertia of the position ?? the sand, the layers below, and the layers below, and the interaction of the magma of the earth with the upper layers, creates different what I call, manifestation, we turn slightly different colors to fit the fields coming in.

If you are blonde, blue, American come and live in Iran for a few centuries. You'll become one of us. Nobody will know you had American ancestors. Now that we can live long time even if we go to other nations to live there, we'll see our field strength in interaction of the field of the environment. The food we eat, the magnetic fields we add to us through the consumption interaction of the fields of the environment will change.

We see this physically, we see this perfectly. And in our tests and in our process when we see this, we've seen this so beautifully. In our tests with the Chinese military in the past few weeks this was absolutely clearly on the card. Where we produced in the magnetic field environment we could see what's in that field, what's in that area, what materials manifest themselves, and in what shape and what quantities. (:36). Then the what I call, as I explained in the teaching of yesterday, in the Iranian teaching, we have nowadays the tools of drilling holes, hundreds of holes we drill to see what how deep is, what and where. Now with the new technology we don't need to, we just put the machine on the surface and we wait. What we collect is manifestation of Inertia of magnetic pool of the environment and tells us what's in this area. All these geological drilling has gone to zero. And our data is so precise, because they have the data for the environment and it matches. Even it's better than them, more accurate. Because the Inertia of the space and time dictates that.

So, if you understand this and use this knowledge we can see, we can dictate what Inertia, what material, what composition of the field and environment, in interaction with your Soul and STP we'll let you show what you'll be. If any of you can find hair of Christ. If any of you find and dust of his clothes where you can copy, you can manifest the Soul. As I said in the past, in the upcoming time with the knowledge we have, where the frock

of the prophets which they say they hold, we can see the essence of manifestation and ?? instruction of them. And not by the man and by the cheaters and the rest in different names. (:38). As a Soul will speak.

You remember what I tell you when you eat the food, in your digestion system the small amount of it allows the fields of the universe (U) to be absorbed. That 20% is a trap, is the link, is the connection. When I have the frock, when I have a hair of, it's again that 20% which brings the Soul, connects to the Soul and let them talk. And let's see how we meet the Soul of the prophets of the past. Then we understand the new science brings reality to existence.

The new science, understanding the process of Creation does not allow the creation of any more religions, any more sects, anymore whatever. Because it's you who makes that decision, you become the "sect" of your own interaction of the fields with your own environment and in the knowledge you receive. Then if you understand this how easily, then when you go to a new environment in the direction, the emotion and everything else you gather all the knowledge. The language, the emotion of the language, understanding everything else. And if you are clever enough how to interact with emotion of the Chinese as a whole, you'll speak the language better than them, you'll have the full memory capacity of all the historical and every emotion in every cooking and everything else. It'll be very hard time to sell dictionaries and encyclopedias at that time, because the encyclopedia of the knowledge of the source, (:40). the essence of the Creation is given to you by the interaction of it.

We would not have, we do not have schools and universities in the universe. But by interaction of the Souls in the dimension we want to exist, manifest ourselves, we gained that access to universal knowledge, collection of the essence of the Creation. That's how the knowledge of the Creator is in every spot, every point in the universe. As it's connected to, as it's created, as the interaction of the fields of it, it brings that in. And comes in dimension of understanding of Totality.

Knowledge has to be without what I call, mixing, adding, hypocrisy to it. Understanding it as it is, understanding it in its totality, being part of, being accepted by ourselves to our own existence in what we head for, what we're going to do, and what we will do. As I said from the beginning of the teaching, people will take from my teaching according to their intelligence and no more. You could be a dog, you could be a king, you could be a road sweeper, but if the level of understanding reaches to the point, to what how much of the essence of the Creation you understand, that brings you to that point. It is for you to strive to understand more. It is for you try to gather more fields of the universe to be able to attach to, and detach from. (:42). According to the emotion interaction where guarantees the survival of the Soul and the STP, which their interaction creates the Inertia to condition you to manifest yourself in a time, place and position. When you arrive you don't need to go to English classes to learn English as we did years ago, but you speak English as fluent as the Englishman does and you have access to all the encyclopedia of all the Englishmen in England. The Englishman knows a little bit each one, but you access at the time of the need and the position.

This process of creation of the fields become most part of the important part of the Keshe Foundation work. This is why for past months and years since I introduced you to the MaGrav technology, when I introduced you to the Gans technology, I keep on telling you, ignore the power supply, ignore the copper, ignore. Understand the creation of the fields. The rest is literally not important unless you want to manifest yourself in that time, place and position.

Interaction of the fields understanding the totality of the work of the Creation is the responsibility of every individual. Because it is you who's the "last man standing." It is you who has to understand how to interact, how to understand, and how to be clear about the point, the time, the feeling, the emotion and what you want. In being happy, in being content, (:44). in being in a way, in love with the Creator and what He provides is the only way man will find peace. Man will find new positions, man will reach the level of understanding of his creation.

Try to learn that what I call, access line. Try to find out the line of connection to the Soul of the Creator. Then going from one universe to another is child's play. As long as you try to get in the machine and try to push yourself out. As long as you don't match the essence of the emotion of the Creator, you're in doldrums of the man, and others in the universe trying to find a tool to move. Trying to find a technology and the science to be able to go from one to another, where the Creator is at every point in every place and every dimension and He's aware of all knowledge, that what He has created, are creating energy.

Reaching the condition of the understanding and the work of the Soul of the Creator is as easy as of drinking a cup of tea, a glass of water. It is you who has to endeavor to fill that cup up, that there is a water in it to drink. And that is the Knowledge of Creation, and the cup is the STM. And you don't go the way the man does, the bigger energy, the bigger Soul, you go for the essence common denominator of connection, and you'll find your path. (:46).

I hope as Knowledge Seekers (KS) now you understand more, now you understand the working the systems, how the system is you. How you have to create that condition of the contact, as the contact is there, always has been there. I was telling someone sometimes ago they say, we can hear specific noises coming from certain direction of the universe. It could be from civilization, or whatever. That noise has been there for billions of years, we didn't have the tool, we didn't have the knowledge to acknowledge its existence. So there should be no surprise. The voice of the Creator is the same, the motion of the essence of the love of the Creator is the same. It's always there, it is us who have to understand it, when with it we become mature.

It's very much with the spring and the river and the brook, which the spring creates. The water will always come from the same purity at the point of the spring and depends how far down that brook, how far down that river which the spring created you live and you decide to drink. And how much effort you will make to find your way to the source. But

the water, the taste, the mixture is always in essence the same. It does not matter what and which animal, (:48). what dirt and what soil and what else has been put in the river to get distorted. By the essence it's the same water, added to, to create the water on the top is crystal clear, down the river, down the brook where you collect it, is brown, yellow and every other color. Exactly how STM, the river of the fields of the interactions have stained the cycle of the life of the man at the point of manifestation of the man. The tainted fields. But in essence if you clean the water you come to the source exactly as it is at the top. That cleansing, that connection gives you direction and motion and understanding of the essence of the Creation ?? at the source.

It is you who has to decide how far up you want to go before it gets stained and at that point we get that, you can join that spring, that you start understanding the totality to the end. But as usual if this spring goes long enough evaporates, water goes in the skies, rains back and comes down the same spring in time to come. And that's the cycle of Creation. Are you in the rivers of it? Are you in the state of the clouds, evaporated from the same source, purified from whatever was in it and in essence rain back on the same mountain, join back the same the spring as where you started? It cannot go anywhere, it's a closed circuit, it is a .. complete circuit.

When you get the waters of the oceans evaporating, (:50). traveling halfway around the world and rains on you in another part of the world. When you taste that rain, you collect it and you drink it, do you taste from which ocean it came, how much salt was in it, what did the fishes did in it, how much dirt humanity added to the ocean? No. And it's the same if you understand this in the essence of Creation. And it goes back into the same mountain and it comes out of the same spring. We see the coming out of the water from the spring as a point of manifestation, but in fact that water is not there if it hasn't a rain, if it hasn't evaporated from the ocean, and if the spring itself hasn't provided it to go to. That the spring is the Creator, is the essence of understanding that everything comes together and pure. And it's for man to decide where he wants to evaporate, where he wants to be at the end of the river. Does he want to join the ocean and the ocean, then evaporate, and then come down the mountain.

Now you understand how easily man can dictate his own position, his own destination through understanding of the process. And this is where we get our emotion, our thoughts, our belief's tainted as we go down the line. And those who try to do some cleanup, to bring some order that you receive a clean water, we call them Prophets. That's the clarity of the Soul, (:52) clarity of the physicality, as the Soul of the water is exactly the same.

Now you understand creation, understanding the process of the creation of the fields of the universe. Connection of them, as was in the introduction. In the talk .. in the Intro we are all connected, depends which hand where we give, and how many people are ahead of us and how many people are behind us in that chain. But the chain is a closed circuit, so it comes back to the same.

Please try to understand the interaction of the fields. If you understand that, then you can understand the interaction of the fields of your emotion. Then you understand the interaction of the field of your Souls. And then in understanding those you understand how to create that condition. On the 20th of November (?? 24<sup>th</sup> of November), as we announced on the Keshe Foundation website we allow limited number of people to join, where we will try to endeavor to create the light between the two hands, where we change the system. Where we control the system. And your job is to create the condition of the Soul, pure devotion, to be able by the interaction of the fields between your two hands to manifest the light. In teaching of the past we have mentioned about this many times, now we show you. It is a technology, it's a knowledge. It is not magic. (:54).

(If) you don't know how to do it, we create that condition. We tested this with you last Friday, and the Friday before. Those of you who attended the sessions you felt an energy change, you felt energy from the back to the front. You've changed the emotion. We control everything in the background. Those of you who had emotion on the right side and the right hand, and you had the feeling on the left side and the left hand, you felt the emotion change. You .. felt the change of the fields. It was not coincidental.

When you join us look at those two microphones which are amongst you. Through those two microphones we change things, we introduce things, we create a condition of the joy. We can feed you and the rest of it. And there are other microphones. We don't (?? tell you).. we create other conditions. And we see that condition where we create. As you remember last year we brought the essence of the Soul of the child of Mitra, and we saw the immediate effect on the reading. How the Soul elevated the Soul of all you.

You got to understand, this has to be understood as a knowledge, has to be understood as a technology, has to be understood that now we understand what we can do. It's like that gymnast. It doesn't go on the floor and win the gold. It practices day and night, compares itself with others, what I can add to reach that perfection to win that gold medal. (:56). There's nobody else but him on the floor. The "last man standing." If he has ?? learned it and has mastered it, he wins a gold (medal). Winning the gold for man is not the gold, is understanding the process of Creation, and you're the only one on that floor. And it's you who have to understand. We bring the stadium, we bring the floor, and we bring the people to cheer you up. But it's you who has to decide, it's you who's going to do training, and you learn from the others who've done what to do to win that gold.

It's the same with us, we create the environment for you, we create and control the condition, we bring the audience, and we teach you slowly, slowly. As we've done in past year. In the meeting of 27th November, we endeavor to bring that in. In the last Friday and the Friday before you felt the emotion change, you felt something happened, you felt something is about to happen or your emotion changed, or you went through, we watched it. We created it. I can make all of participants in these sessions to laugh whole time and don't do anything else, and I can make you cry at the same time. Because I know the emotion of love, I know the emotion of joy and I know what creates that condition and that emotion and at what strength.

In the process of the knowledge, in process of understanding, (:58). in the process of gathering information for you to have to understand, to have a ?? track record ?? that you can repeat, we test everything to its perfection. Now you understand, go back to the teaching, go back from the beginning. Understand the interaction of the fields, understand what these fields do to you, understand how their interactions create what condition with you, knowledge, joy, happiness, whatever.

I was with a Knowledge Seekers very recently, and says that, every time I go into this building after half an hour I want to sleep. I think something to do with oxygen in there. And I looked at the sky and I said, yes you could be right, but I know why that emotion is created. I can create the same emotion in the house where she was, where she lives, where they go. Or through the systems we have, which a lot of you join, I can make ?? half of you to laugh with the open phones, with your microphone open, and the other half of you cry.

Look at the data, look at the voting in the screen, the questions we ask at the end. We've collected all the data we need. (1:00). When you went to the test for pH, those of you who went up your pH increased you will start laughing. Those of you who pH goes lower, you will cry. Those of you when you went for the test of insulin were increased. If I increase more in the background you'll be so happy, you'll be like drunk. And those of you who went down, you'll be as sad as depressed.

What we do in these tests? We do to understand how to make you in the process of understanding, that the system creates a normal condition in all time. This is how those of you who go through the Wellness Centers find out we change your emotion from depression to happy. When I came to the session six weeks ago I was so depressed, I had a depression. In six weeks I don't feel it, because my life has changed, I've become a happy man, I can live again. We didn't do magic, we did exactly what we did in the session of last two weeks, but we give you time for you to understand.

Those of you go through the Wellness Center you've gone through these processes with the doctors. You go in for two days, two sessions, because the body needs to learn to the next session, to the next session, to the next session. It's not magic, it is understanding what field is missing that you can enhance. This is the same as what we say, we add to the energies of this planet to change the condition that the man does not kill. (1:02). You put Gans's in the rivers and Gans's continuously to produce, or in the room, and they say, this happens. This is what we do, this is what the conditions are. But we are more, we have more, we access more knowledge in a deeper way.

I carry the knowledge of the universe, so I have to play slowly, slowly. Otherwise if I run too fast the child chasing me will fall or gives up, there is no fun running on your own. How many times you played the game of "I can catch you" with your children. He or she runs ahead of you and you say, I catch you, I'm catching you, and runs as fast as he can, or you run in the front says, catch me. Runs as fast as he can, but you know he can't catch and you know you can run away. But the whole purpose is to create that joy and let the child feel, I'm part of it. And this is exactly what I play with you. You take from it

according to your intelligence. Some of you feel behind chasing, and some of you feel ahead being chased. But that chasing is through your own Soul and your own STP and the knowledge you gain. And as children always say, sitting in the back of the car, have we got there yet, are we there yet. And that's the question you have to ask yourselves. How I got there yet to understand.

Thank you very much for today, we go for a break as usual, the same records, (1:04). the whole thing, and the whole way, we kept it that way as the knowledge of the man has to be added by the man himself. And then we come back and answer any questions. If you like to take us to a break Rick, please.

>> **BREAK** >> 508 KSW October 19, 2023 (1:10).

K- No, we are ready if there is any question. And we'll see what we learn. Go ahead.

Q: ... Years ago I had a daydream experience while awake where I was in the past in the Cathedral of St. Petersburg, and I was in the choir, and I was the bass ?? Pashukov. And I felt his emotions while I sang a song in Russian. If it was transmutation can one then transmute in the past, go back in time and see where and how our ancestors lived? Thank you.

K- There are different ways to connect this way. There are, if you've been there, you're part of it, you carry that emotion. You know you've been there so it's part of it, it's like your DNA, you got a blue eye from the grandmother. But the recording of the body of the man in a very different way as the information, not as the change of physicality.

On the other hand, we all have, if we create a right field forces. As I said when you go to China, if you carry the right field forces in the field of the strength of the emotion or that time, (1:12). that line to be connected, then you learn the language. You know the emotion. So if you tap into the common knowledge of the let's say Russian and in that structure fits to the match of a singer in a summer, or matches to the "ex" god knows who, what in Russia, you will see it, because...

There is a lot of knowledge which we have gained in the test and trials of past few weeks. We see, all of you receive fields, as I explained before in other teachings. It is very clear from what we have that... (I'm trying to open the white board that we can explain to you... ) (1:14). If this is your brain, you have a little bit of, which actually affects your spinal cord and your Soul is somewhere here. Your eyes are somewhere here. If you receive, you still say you daydream, the information which comes in that direction, or touches the visual part of your brain, you see and remember that dream. If you don't, if you receive the information in this direction, from the back of the Soul in this direction, you don't see it or you don't touch the visual part of the storage of confirmation of information, you do things or you react and you say, I've done that subconsciously. But in fact, there is no subconscious.

In our test shows, we have a clear division in this part. And depends which way the information come to us. We still add that to the energy of the Soul, the information of the Soul and then in this interaction with the STP, it will be in other parts. You hear a noise because that field strength matches the noise. This is visual. You don't hear sound through your vision. But you see and you hear. So that goes with interaction with that. (1:16). So if you do something, says, I don't feel anything, I went to the machine, but then you do something which is unusual afterwards or during the process, you say, I didn't feel, I didn't see anything, but I felt this and that, or I took such action. Because the fields at the strength, it's not the strength of the vision, but still enters from the backside of the brain, which touches the energy, changes the energy of the Soul. And it's not just the Soul because when you are in that process, when you are going through, there is a blood circulation around your brain. So this field has touched the Soul of emotion too. Which changes the gravity of magnetic field interaction between the two and creation of the fields and ?? emotion. And now you understand.

So if you, and you understand that your Soul is connected to many other souls. We are at any time, at all time, the way there is nowhere in the universe, there is no magnetic fields, is the same. We are at all time, even in the body of man, connected to every single string of the fields created, emanated from the Soul of the Creator, to every planet, every dust in the universe.

When you draw a magnet, and then you draw a magnetic fields, and then you say they come back, or they expand in different ways. Depends, this is at the strength of your magnetic field of your vision, (1:18). or this one is at the strength field of your magnetic field of the cry, or this one. But this does not connect to this. So, now we understand this. We clearly, we had people came in, they sat in the machine, but then they changed their life, they changed something in the way that something goes, oh, this happened subconsciously, or this happened, why it happened? Because you received in the system, that field. You call it subconscious.

The only things, most of you remember, if something, a field direction, because you enhance the condition of seeing. We ask you, have you seen anything? So you concentrate most of the fields in the strength of the field of the sight, then you see something. Or you see motion, or in the way of your fields, motion traveling or going,

interacting with the fields of the system, interacting with what I call, magnetic fields we create in our structure, then what happened? This field which it comes out, hits this, you see us blurred, because now you have a field of interaction, because you still force yourself to look, in the look, in the vision.

So what you see, do I travel in the past? Is somebody at the same time as you having this feeling, is actually singing in that church, that song, because of the matching gravitational magnetic fields, you match. So you could be, the only one who could be, another hundred people, listening to this chap, (1:20). because his field of strength matches the hundred.

It's the science, we have to understand. And once we understand, we can do that. At that time, at that field strength, you match the boy who sang, or in the, what we call, the dimension of the STP, and what I call, memory disc of the DNA you call it, that information has imprinted, because you were there sometime in the past. It's the way you go somewhere and say, I've been here before. So it's not. It's understanding the science, or you went to the back, to the future, and the rest of it. Look at the possibilities. And understand the possibilities. Then you find the true answer, scientifically.

Any other question?

Q: ... Thank you Mr. Keshe for asking for a corridor to be opened for the Palestinians. The genocide of civilians in Gaza is a war crime, so thank you, God bless. (1:22).

Q: ... Today's physics determines the size of the suns and stars from their absolute brightness. We have learned, see book two, that light is created in the interaction between plasmatic fields of cosmic objects. So we never see the surface of the cosmic object itself, because the light always originates at a large cosmic distance in front of the object. I imagine it is like in the cinema, where you see the film on a screen and not in the projector. Three parts to his question. Does this mean that star charts are useless because reality is completely different? And two, the luminous intensity or brightness is not dependent on the material size of the star. What are the influencing factors then? And three, are specific MaGrav maps used for navigation in space for those who travel by donkey, what he means is UFOs, in the universe?

K- We have answered this in depth somewhere in one of the teachings. Somewhere in the past times, and it's in one of the books. And in the Book number four, the Soul of Creation of what you call, solar systems. I explain that in detail. I had a discussion with Dirk Laureyssens, (1:24). how we're going to show this, how we're going to create a visual picture for this.

You got to understand, you have the center of the system, we call it the Soul. Usually empty, because of the fields, pulls and pushes. Then you have the, what I call, we call it the brain, we call it the magma part of it, we call it the field material strength. And then you have where the fields have reduced, and they have created what we call a layer, the top layer. In a way, this top layer is Gans state, Nano Gans state plasma. So the light we

see from the stars comes from the interaction of the fields from the center. In interaction with the material on the surface, with the Gans's on the surface.

In a way, when we have the sun and the interaction of the fields of the sun with Earth creates a light in the angle of facing the sun, we have. (Do you see my diagram ?? ) So, we have the same, instead of this interaction happening on the upper atmosphere of the Earth, it happens on the surface of the star itself. This is how the lights of the star are created. It's the law of physics. (1:26).

But here you have Gans's, you have what we call, plasma, which has gained Inertia plasma strength. And by interaction of the fields internally from itself creates the light of the star. And what is the content or the mixture of this reduction, what you call it, the field strength of the plasma dictates the color of the star. This is exactly like a diamond. Here if it's a slightly different strength, we see a blue diamond, yellow diamond and the rest of it. So the creation of the lights of the star is so intense that in fact, we have a zone which is nothing but influence of the lights coming, it's so intense. And sometimes what we see as the clouds, the dark clouds, is the motion of these on top of the surface.

We actually, do we actually see the surface of the star? It's a question. Because we see different things, because we never understood. But in the future, in this magma section, would we be able to find the actual surface or physical surface of the star? It's possible. So what we see is the field, intensity of the fields. It's very much like a cloud, but because it's mono energetic, you get this.

This is why when I tell you when you have the UFOs, you have the same problem. With the UFOs you have a central system which is the Soul, (1:28). and you create the fields on the other hand for the interaction. Due to mono energetic of the center and the fields created as a protection, you always get a silver color. It's, we see a bright color, mono energetic, because of the same reason. We create this and this from the same source, from the same plasma.

Then how you dictate the fields of this ?? beam dictates and there are ways to do it, to create the darkness, dark energy. This is a knowledge which we never teach. If you read the paper about the creation of the Black Hole and you understand the true knowledge given, you understand how you can make UFOs, how you can make flying objects which are dark in flight. And because they are dark and they are created that way to absorb all the fields, you can never ?? see it. This is how the Iranians annihilated the American base in Iraq. And this is what knowledge Iran will never pass on (to others).

If we change the light strength in the center, or a dimension of fields, then you can make, as we made it bright, make it black, we can make it any color. (1:30). Now we have LED of yellow, green and whatever and it depends what color you put into it and how they structure it. It's the same process. But now interaction of the fields of the plasma.

This is why your aura changes to different color. Because the Soul is the same. You have the physicality and you put different foods inside it. And this food creates the STP

motion, which is your blood. So as you change apple it'll be purple, as you change meat it'll be green. And if you have made a mixture of the foods you see different layers of aura and people say we got a machine ?? that can see (auras). It's so simple. I laugh when I see these machines. But in a way it's a good thing to see. So we understand the process. So it's how we feel internally we can do. And if you understand this process in space you can dictate what energies you want to absorb, not to eat. But you live on the energy of the universal systems.

Any other question?

Q: ... (1:32). Thank you for the new info regarding Palestine. My question is why do people think that the situation has to become worse? Is this the insidious message in the Bible and other books that Armageddon has to happen before the golden age comes? Is that not Armageddon at present? Is another option to see peace as the only way forward?

K- Armageddon is within the STM and its interaction with the STP. When man reaches balance and understands the two, and how they interact. You got to understand the whole structure is amazing. Sometimes I look at it, I've been. I had to look at it again in past few days and the situation which is as you say in Palestine.

When the Palestinians were centuries ago, they kicked the Jews out. When the Jews are there, they kick the Palestinians out. And it's very funny when you go to Israel, if you get on the, I've said that before, if you get on the taxi, if it's a Jewish driver and you've got to go to Palestinian place, he takes you to the wrong place. If you get on the Palestinian taxi and you want to go to a Jewish area, he'll take you to the wrong place. Two things, their GPS is designed deliberately for this kind of things. The Jewish GPS is different than the Muslim one. Or is intentionally they have no interaction with each other, therefore they are lost. Or intentionally they know, but because they say, oh, he is a Jew, so I'll take him somewhere else. But at the end you get to where you want to get.

I went to, when I was invited by the Israeli officials in 2000, I had to face this. And I said to my cousin, I said, what's going on? (1:34). He says, Mehran, he's a Palestinian and we are Jews. And he knows where it is. We went up and down the street, in one location to another, till my cousin asked, in Hebrew from a guy, he says, now you go that ?? direction. But he knew where he was going. And this has to go. Doesn't matter what taxi you get, you got to take him to the destination.

My hope, not a fear, but my hope is when we manage to bring Palestine back to what it was 200 years ago, ?? 8 - 900 years ago, or 100 years ago or so, these people would live together, the ways they did for centuries, for hundreds of years. And it's something new. Animosity so between the religions has been created by the religious leaders, not by man. And those who listen to these people.

I had the pleasure to see my great grandmother when I was young. She lived until nearly 100. And I was a great, great grandchild. And she used to stay with us. And she used to tell us, we asked about the story of her life. And my great-grandfather, grandfather, used

to be a merchant, generation after generations, traveling between Hamadan and Palestine, Hamadan and Samarand, and Palestine and Georgia. They moved because of they were merchants. And he always went all the way to Palestine and back, once a year or whatever. (1:36). And as a Jew, he was well known. I was told that by my uncle when I met him in Tel Aviv in the year 2000 when I was there, that talking about his grandfather, or the father, having such a beautiful voice, he used to verse Koran. And whenever he passed through Karbala, in where he used to stay while he was going from Palestine to Hamadan and Samarand, they used to ask him to chant the Azan on the minarets of the mosque, even though he was a Jew. Because they lived amongst each other, they loved living with each other. And my uncle always said, whenever he used to go through Karbala, we knew his a few days or a few weeks late, because they enjoyed him so much and he used to stay. And he was a guest, he was a merchant, and he had to always say the azan in the mosque.

But we saw this change with the situation of today. When a situation created another situation, and partially pre-planned, when you go to the history of Israel, establishing this country by what you call, Illuminati's or Rothschild's or whatever, was planned in 1800. (Break in audio ....) need to go to Palestine and buy the land. The plan of this animosity, long term division, was made for a long term gain. (1:38).

And so we see this, that when we speak about this situation in Palestine, has been there, you had this with the Christians and Crusaders, traveling all over to go to Bari and Baletta in south of Italy to get boats, as Crusaders going in one side from the churches, they're going to pray, get on the boat on the other side to go to Palestine. We lived in south of Italy, in ??, on that side, in Bari and Barletta, you see the churches where people came in because they were persecuted, they wanted to go to see the land of Christ, as they had the churches on the beach, they went in, as they were going to the church to pray, and the door in the back put them on the boat and took them to Palestine through Malta and Israel. So Romans didn't want the Christians to get to the holy land. One cycle of belief with another, now we have the same.

This land of Palestine has been the land of a lot of what I call, hot air emotion, and those who have used it for their own benefit have created mayhem on this land for centuries. Doesn't matter on what day, or what else. Doesn't matter if you're a Jew or a Muslim. Has to be the love of giving the other the pleasure that completes their cycle, not to take and destroy.

It's very funny, I explained to you, I've been in this position so many times when I was a young age, (1:40). and me and my cousins used to laugh about it, and we sometimes it was a joy to do it. As you know, by the Jewish religion on the Sabbath, when they set the table, the prayer has to be said, usually you have to have enough men on the table, doesn't matter if you have 200 women, doesn't count, but you have to have the right number of males, even if it's a little one year old boy, or a 90 year old man dying, around the table to be able to tell the prayer was started, whatever, the Sabbath. Knowing half of my family are Muslims and ?? Sayyids and the rest, and knowing my other half are Jews, my great aunt used to call my mom, come over for the Sabbath, because the Sabbath is a Friday

night in Iran. In Iran we are closed on Friday, and the Sabbath is on Saturday, so Friday night it always was free, because it was a holiday weekend. So my mom used to get a call from my great aunt, we are short of one or two boys, can you come over and bring the children, and our house was known as a house of seven boys, my cousins Muslim, whatever, we were all together, and my mom says, boys, aunt is calling us. We knew it's time for, what we call it, Gondi's chicken soup and everything else, and we loved it so, we all used to go, because the table had to be complete, and my cousins are Muslim, and we all knew, and we used to go to the house of the aunt, nothing to do with Jewish, just to come to put what we call, the soup bowl, you know what they put on their head, and sit down at the table to complete and enjoy. And sometimes my Muslim cousins used to ask my mom, they used to come and ask, are we going to the aunt today? (1:42).

These things has never existed, till it came the money and those who push the principle. I go with my Jewish cousins to Muslim ceremonies, respect was the same. How we create the environment in the house. And the world leaders are responsible to create that response, that condition of peace, condition of equality. And one day it's one sided, we create the mayhem we see today, and those who are opportunists, they see money making in it, and the guns and the rest of it.

The beauty with the teaching of this technology, and what is emergence, and I enjoy working with the Chinese, is that we see a path to peace, and we see, we deliver the technology for President Xi to deliver the principle politically, equality, share. Read what his Excellency President Xi has mentioned in past few hours, in the, what you call, yesterday conference of the "One road - One Belt." Creating an environment is his job.

Giving the technology to obsolete, absolute, all the technologies of the past, the gun technology and weapon technology, it's my job, it's Keshe Foundation's job. It's your job, that's why you are here as students, as Knowledge Seekers. I'm as much a student as you are, (1:44). I learned from the school of the Creator, and I share with you what I learned from the school of the Creator. We are just Messengers, we just pass the message. We are as transparent as you get, the Soul of the Creator. But we have to assess, what will be used by whom, and how, that creates that condition of peace.

And those who think a few pieces of coin, a few account numbers, a few billions in it, makes them any different than the others, have a lot to learn. I sit across the most powerful man in the world of military, and we enjoy working, because we know our target is creation of peace. I sit with the Chinese, they talk, what can we do to stop this aggression, this and that, just neutralizing, that we can spend time and things on our nation and the rest of the world, to carry on what has been said by President Xi.

I speak with the Americans, I've sat so many times with the Chief of Marines in South Korea, in London, I've sat with them in Brussels. I have access, when I tell to the American Ambassadors, the shape, the room, where their rooms, CIA agency, in offices, in their embassies, they say, how do you know? Because I've been there, I've been trusted by Americans, as much as I'm trusted by the Chinese and the rest. We move amongst these people, (1:46). we touch their Soul. The color of the passport doesn't count. How

can an Iranian, nuclear physicist, go and sit in CIA debriefings, in their embassies, which is highly secure, they take me there, they put me there, I sit with them in their rooms. Do the same with the Chinese. In Iran, I sat with the office of President of Iran. In other countries, the same approach. Because we are there, with the message and the knowledge of peace. And this is what our world leaders have to be.

What is shameful to me, is what I read in past few hours, with Biden, flying in, the rest of the Islamic world refused to meet him. He says, we stand by our people. It's wrong. We stand by all people. Let's find a solution. And this is, when we teach the technology this way, I don't know how many hundreds, thousands of you are present, and how many hundreds of thousands of millions of you listen in next few days and weeks, in different languages. Do I tell you this is only for the Jews? Do I tell you this is just for Americans? Do I say this is just for the Iranians?

I had a discussion with the Iranian government yesterday, we informed them the day before, we knew Ayatollah Khamenei's office and his representative, Sepah, and the rest were on the line. I came and I discussed with you, more or less, what was said yesterday to them. Because it's us as a human being. And there is no exclusivity. We hold certain information back, because man is not ready for it. (1:48). But we teach it, that the knowledge is there, that it can be used, to the benefit of it. So I don't tell you, this section is only for the Jews. Muslims will not understand and that's it. No, I teach you, you're from Christians, you're Chinese, now on the line. You're Americans on the line. You're Iranians on the line. You're Muslims on the line. You're Africans on the line. You all learn together. And according to your intelligence, you use it, you understand it, and it touches your Soul and you go to the next step.

We are not that religious sect, we are not this. We are not here to take things and run. If we were taking money, by the amount of money we've been offered, the lands we've been offered by Knowledge Seekers in past years, we would have had temples and centers in ?? Britain and Vatican. How many of you Knowledge Seekers offered us hundreds of thousands of meters of land, all over the world? I refused. We are not in property gathering. How many of you helped us when we needed it? I thanked you because it came when it was needed. And the beauty of it is when we need it, it comes. When we need it, we ask. And if it's given, it's for humanity.

This is how you should not be used, now you're Knowledge Seekers and I can touch you this and I can influence you to, you all now start beating the Israelis and kill the Americans. (1:50). No. It has to be just. And the justice has gone out of the window with Americans. But with the knowledge, with the technology we bring, we'll bring this "child" to order very soon. When a child feels it's very special, he plays games in the house. Till he's sat in his place and known (that he is) no different than the others. And this will be done with Americans and Israelis very soon. This is why I told the Iranian leadership, pull the Palestinians, don't let them suffer. In time I handle this solution. Through technology.

Many of you, you give your American passport back to any nation not to carry it. Ashamed of the conduct of the nation. Give me time. I've been here thousands of years, I

have the patience. You have a few handful of years. But in that time, we don't have to let one and a half million to suffer and we don't have to let this animal behavior to destroy the nation, ?? nation. The time will come very soon that there'll be no American aircraft carriers. They'll be there, but just for toys. Hotels you can go and enjoy yourself. Jets which will never fly. Ships which are bathtubs. We showed all that, by the Russians in the Black Sea, 2017. (1:52). Now we show it internationally. Any ship which carries gun is not to fly, not to float. Any nation produces arms not to be part of.

Let's see where we go. When we stop those who are inciters, the others don't need to make to match. The energy, the knowledge goes in development of the humanity, understanding more and spending more. And with the present time, we see it. In the past few weeks and months, and present time cycle of the Keshe Foundation, we don't need anyone to finance us, to develop the technology. It's our ultimate goal. We've been well, well looked after by the Chinese nation and Chinese military to create peace. As I said to the Chinese, I bring the technology, you use your power, you use your financial influence to use the "One Belt - One Road" to create the world peace. We stick to end of our bargain and they are doing their part. We don't need to sit around the table to talk. We enlighten the Soul and we get what we want. Sometimes we put a signature to it, that visually ?? it is accepted ?? as it is.

Any other question?

Q: ... (1:54). I'm very grateful that you are presenting a solution for the people in Gaza. My heart has been very heavy lately and wondering what can be done and I'm glad that you've come up with some sort of possible solution to their plight. I mean, killing on both sides, I'm against, but it was actually very good today to see the Jewish people in the United States protesting for peace and for those that are suffering. So I'm just very happy about that. I did have a question on the Security Council, which was a bit surprising that America vetoed against humanitarian aid for the people in Gaza. What's your thoughts about the Security Council? I mean, they don't seem to be serving anybody but themselves and although I still have hope for the United Nations of coming together, but I think the Security Council has done, no longer is needed. Is that, do you agree with that?

K- The Security Council, you have to understand the security. Security is not for humanity, for the nations. The Security Council is to secure the abuse by those who are abusers. (1:56). The United Nations Security Council, five of them, are the most, what you call, exclusive club and those who are and can or think they can influence to do what they like. First of all, the Security Council should be the whole of the nations, not one. Secondly, why, who are the members of the, what you call, Security Council? Can you put it on the screen and then I explain to you the funny bits about the Security Council? The Security Council is United States, remember, Russia, and, pardon? It used to be Taiwan, it used to be Taiwan. And they decided Taiwanese become Chinese. And a few hundred thousand used to give word for 1.4 billion, if you go back into the history of the, what you call it, you know, the Security Council. Then there are two funny members in this Security Council. And I never understood why these two have to be in the Security Council. Can you read the members of the Security Council?

R: Where is it? Members, let me see here. Current members, here we go. There's ... Albania, Brazil, pardon me?

K- No, no, no, no. This is the back of the Security Council.

R: There's five permanent members. Five permanent members. China, France, Russian Federation, the United Kingdom, and United States.

K- Why, why can't we have Italy as part of this five? (1:58). Why can't we have Brazil, which is an economical force? Why don't we have India as one of the main powerhouses of Asia? Why do we have Great Britain? France has no say. Security Council has to be from the five continents. Who are the Africans on the Security Council? Council of what? Chinese, as China, has been brought in by force, not by decision making. The rest of them is what I call, the "white club." There is no room for Britain and France to be on the, on this Council. Economical powerhouse of Russia is not there. This was when it was USSR, with 11 time zones. It's one-sided, only for Anglo-American group. And that's it. The only outsider is China. So it's a white club. Catholic, or what we call, Christian club, with a hope that the Chinese one day become Christian too. It's the way I always look at it. And nobody has a say. The Americans have vetoed more in the recent time than anybody else. Russia used to create a lot of vetoes during the communist time when it was USSR. (2:00). So this is a one-way club. One thing you say, you said the American vetoes support of giving help to the Gaza, to the Palestinians. In whose God's will, in whose God's love, deprive people who are under starvation not to give support to them, unless you're a criminal. There's no difference between mafias and the American administration. Terrorists, as I said last week, come in different shape and form. But very soon, very, very soon, sooner than you can imagine we'll sort this out, through technology and knowledge.

Q: Technology in exchange for peace.

K- That's what it is. We create a condition that, this is what I was explaining to a Knowledge Seeker very recently. Keshe Foundation, as many of you know and everything else, as I explained, we've shown it now physically in a large scale in experiments. We can produce any material. If we set the situation globally, which we can, that when it rains on you, it will be rain of gold. Would the gold have any more value? You all go to the shop with a bucket of gold. Nobody wants it.

Then they have come with this new game of digital banking. (2:02). Who tells me how many digits I can put in that bank? You understand? Now they want to control it. I like to have 10,000 zeros in front of this digit you created for me. So wherever I go, I have money. I can do what I like. This is the things which soon will be abolished. This money control soon will be abolished. You will understand how and the way it is.

Then it becomes like a boycott. I explained this in one of the teachings, private teachings. Now they say the Palestinians in Israel boycott their workforce. It means don't work.

Whatever benefits the Israelis, close your shops, whatever. Deprived of the finances, deprived of people, what they need. With the new technology, when .. you are allowed, when you have access, just go on the Headphone, you get your energy, your whatever is sorted. They cannot control the foods anymore. Supermarkets are empty places. Power companies are a waste of time. We don't need hospitals. Because by progressive development of using energy through the Soul, through the physicality, the way we are doing now, you hardly will have a cancer. Cancer becomes something of the past. Unless comes, even when you start, through the system, (2:04). over six months a year, it's not there.

So what we see as the biggest menace on man in next few years will not even be there. Because as you go through every time taking your food, taking energy, whatever, you change the structure. There is no way you have damaged cells. So we won't have any hospitals. We won't have any, what do you call it, we have accidents. So we have hospitals. If we have to sew arm and a leg, and even those, we don't need. If the leg fell off, ok. It's down the hill. Put the system on, let the leg grow. We've done this. This is not a theory anymore. It costs less than a dollar to grow a leg. Less than a dollar. I've done that. It takes 20, 30, 50 dollars to make a brain. Naomi is an example of it.

So we're gradually getting to the point that, they cannot control us by food. They cannot control us by medicine. They cannot control us by money. So we're getting to the point gradually, in the next 10, 15, 20 years, that nobody can control anybody. As I said in the Iranian talk and to the officials in the past few days. When you have the technology that you can empty the warheads, there are tens of meters under the ground, what's the use of a "blank bullet"?

You know when, during the Second World War, the Allies came to Iran. They didn't have bombs. They ran out of bombs, because they wanted to get to Iran to get to Russia, to get rid of Hitler. So the Shah of Iran, (2:06). the father of present Shah, said he stays neutral. Doesn't go with them or them. And this was against the rule of the Americans, because they wanted to use Iran to get to Russia to support. So to do that, they decided to bomb Tehran. But they didn't have enough bombs. I don't understand. If you don't have a bomb to go to Iran, how are you going to get a bomb to the Russians? There is another problem. You know, when they deliver to the border, the Russian railway is different than (ours). Then we had to do all the donkey work crossing it. That's the thing. Do you know how they bombed Tehran? Buckets of sand. They used to drop from the sky by the plane. Buckets of stone. That was Allies, Americans war, bomb. You go back to the Stone Age, but with the things, you can throw it further. You understand?

Now, this war has again, the same as those bombs. Because my parent, my mother, and my grand, what you call, family, born in Tehran. And they went through this. When the Russians were dropped. What do you call, the Allies were dropping buckets of stone on people's head. That was their bombing. They don't tell you, because it's shameful. So we're going back to the same point. With the new technology, we can do it. I told you, we can assess what is in the area. We can collect the material. We can empty these nuclear warheads the same way.

In next year, if our work, the speed we imagine, go with our allies, no nuclear warhead will have any material to deliver, except a big bang. Because we have the knowledge, (2:08). we've proven it. Now we have to extend it. So by devaluing, or taking the old man's weapon technology, it's the same. I said in the teaching, because you'll get translation from it. We call it ?? khandaq. You know the ditch around the castle that if anyone wanted to go, has to go through the ditch, the water, to get off the wall of the castle (a mote)? That was the biggest thing. And then the Genghis Khan came and brought the firework from China and his family later on. They put it on a thing and they flew it over. So these ditches (motes) had no use, because now they could get in anyway. And now we have helicopters and we have, what do you call it, everything else to jump over these waters, these little ditches. Now the technology we deliver is like the advanced nuclear weapons, supersonic, hypersonic, is like that ditch. New technology super-passes, it's useless.

Q: The countries around America, Russia, China, they're aware of this, aren't they? They're aware of the plasma technology?

K- You see they all talk. One of the world leaders a few years ago said, I was with the Chinese ambassador in Brussels. He said to me, we came to the door of the embassy to accompany me into the building. And he said, Mr. Keshe, can we go faster? Can we go quicker through. He said, from the door to here, I'm responsible for you. In the embassy, you are my, you are under my protection. The ambassador, Chinese ambassador, came to the gate of the embassy to greet me to the building. (2:10). In a discussion, he said to me, you are like an oil well. Whoever gets his hand on you becomes rich. It depends who can attract you to give you what you want. And we cannot tie you anywhere. This is the problem with you. This is why most of the nations don't like to work with you. You're asking for peace, you want to push this. This is 12 years ago, 2011, 2012, when I was living in Brussels, in Belgium.

And we have, they all know what is, and they all talk about the new technology. Biden talks about the new technology coming. The Chinese talk about the new technology. But Chinese now got the new technology. We signed ourselves to it. I have committed the Keshe Foundation to peace through the Chinese structure. With it, we'll bring the rest of the nations. And the policy of the Chinese government, you listen, you hear, you've seen, is to share, equal, to bring that ?? balance. And it needs time.

Somebody asked me, Mr. Keshe, yesterday in the talks in the Farsi, that if you have this, why don't you? We just brought it. They had to understand it, otherwise it becomes magic. Then we force ourselves. And surely, somebody, Knowledge Seekers, will bring the same mayhem as the others, because they think. Now everybody knows, nobody does. Everybody can produce gold. Gold has no value. Everybody can have food, just going on the line. You don't need anything.

So we have, with the new science, new technology, deliver a workable condition. I said before, with the same situation, Iran is worried how to feed 1.5 million Palestinians in

Iran. Keshe Foundation will supply through Headphones. I guarantee that. (2:12). That there will be no burden on the Iranian nation for feeding Palestinians. It's not something we're going to do. Today, give me 1.5 million. We have the facilities in Keshe Foundation service centers to feed 1.5 million. They have the medicine. They'll be healthier than you. They'll be better fed than you. They'll be better than any of you. I accept the feeding of the Palestinians, if the Iranian give them the "white corridor." We are there, because we have the technology.

My biggest discussion with my Chinese allies is, we want the centers in China that we make sure everybody gets, because the Europeans and the Americans can cut the others from it, to control. We are wise. We keep servers in different positions. If what happened in one place, the others can support. You've got to understand feeding you 1.4, what you call, 8 billion people, is just a Headphone. My biggest problem is, how much Zoom can provide us line to one server? Do you understand?

And all of you have been through this system. You've been through it. You felt the change. You felt the joy. You went to the Moon of you. You went to the oceans of your imagination or your Soul. So we're not talking about ?? (fantasy). And we have enough material within our structure that we can guarantee medicine and food (for) all the Palestinians. (2:14). Just give them a Headphone. Just have the Headphones on the streets. If people are hungry, just connect to it... These are not anymore fairytales. Just go on .. .pardon.

Q: I'm looking forward to what is to come, especially for the Palestinians. I'm a little bit disappointed that the way things are. And we just hope...

K- .. Let me explain to you something which I'm more worried. More children in the United States go hungry to bed, because there is no money to feed them. The figure... Your figure, just open, what you call it, if Rick, Mr. Crammond opens a percentage of children going hungry to bed in different nations, Americans are somewhere on the top. Africans can feed the children from the trees. My worry is to feed those American children, not to go to sleep hungry. And the rest of the nations. Have you ever held a child who's hungry when he cries? Does not know his religion and color.

I watched a report by one of the television presenters in the past few days. She was standing outside the hospital in Gaza. And the ambulances were bringing a bomb hit house, where the Israelis told them it would be a safe place, and then they bombed the area. (2:16). And they were bringing a number of ambulances. And in this process, one child, one or two years old, was brought out. You could see the child and the legs and arms hanging. And went in one direction with her, taking her. And the reporter said, this is a mortuary. That child is dead. They're just taking her there. He's not even going in to try to save it. It doesn't matter if that child is American, British, Chinese, Arab, Jew. We all die. That's one of the facets of being human. But what's the emotion in the mother and the father of that child? ...

Any other question?

You know you put here Security Council membership (on the screen). Very, very soon, this happens like this. Will be members of Universal Council members. United Nation has lost its credibility, and especially worse is the Security Council. These people who become these members of Security Councils, they bargain for every vote. I used to know an ambassador. And it was an ambassador who, we had a good relationship with. And every time I went to the embassy, I had to park the car in the back of the embassy. Security people opened the door, we parked the car. So he says, I never want anybody to know you're here. (2:18). The embassy was in like a hill type. It had a back garden in the hill. At the bottom of the hill, end of the embassy compound, there were tens and tens of secondhand cars, battered cars. And I said to the ambassador, this is an embassy. Why are you keeping this? He says, this is my business. I import, export car from here to my country. This is how I get paid, because my government doesn't have the money to pay for me as an ambassador.

Our ambassadors from the United Nations to the government are all businessmen. And they sell themselves to anything. This is why we took the voting right away from the Universal Council members, that they serve through their Soul, and not through bribery and cheats and the ?? words.

Any other question?

Q: ... How would you define a location? Is it the resonant frequency of the emotion of that space? We can tap into locations anywhere through the sensual experience or memory of that locality?

K- More or less, I call it the "GPS of the Soul." And it's different mine, than yours for the same location. And the same field strength, emotion, makes me laugh, but makes you cry, because your construction is different than mine, even though the same structure. (2:20). So when you speak about the GPS of the soul's position, it's the interaction of the fields with your Soul, even the position and the strength is the same.

These are, we can make systems for it, the way we copy the field strength of different things. And we can bring interaction of the fields of the position to create the Soul to manifest itself, or appear in a given position. This is very easy. But what happens if the system is not there and you travel with the strength of your Soul? It's very much like you drive a car to a destination, or you walk to the destination. You know the position. Now, up to now, we drive, or we fly a plane from New York to Tehran, and we know (we arrive in ) Tehran, because we are ??. How do you do that with your Soul? You want to go to Tehran, but you end up in Moscow. You made a small error. You want to be on the ground, you land on top of a tree. Another small error.

So this is why man needs to learn, to test, to make grounds, to be. As I said to one of Knowledge Seekers, try to go to the room next door. Don't try to fly. Try in the same room, test yourself, see if you can be in another room. Try yourself by moving something in the same room through the Soul. (2:22). Not like, oh, I always say about the Italian

guy sitting in a Barletta in the front room trying to move a glass. His face always stays with me. He was going, eh, eh, eh.

Learn the method of the Creator. And then you can do everything. You don't need a GPS, because you can be anywhere. It's no use you rendezvous your boyfriend somewhere between the Mars and the Moon, and then he ends up between Jupiter and Mars, and you end up between somewhere else. You have to understand both. My emotion, my feeling, my desire to meet, to be, to show the beauty of the Sun from this point has to be the same as his.

We are very good. Humans are very good, long-term emotional repetition, and remembering it. But when it comes to them actually doing it themselves consciously, they forget. You walk from one abusive system relationship to another abusive relationship of exactly the same. So you know the strength what you need to be abused. How come you don't remember where to go to enjoy? Self-denial, self, what I call, lack of understanding.

Any other questions?

Q: ... You have told us many times that you can annihilate military devices such as missiles, drones, etc. Now why can't you stop these wars? (2:24).

K- Man will not learn if I stop it. They have to learn to walk away from war. Man has to learn to walk away from killing. This is the problem with your genes as humans, or even dogs and cats.

Look at, you call it, migration. The whales, the fishes in the sea, the birds in the sky, the men on the ground, the animals in the cave. We travel the span of this planet to kill, to eat. Birds fly from North Pole to somewhere else to eat the fish, to kill, to get access. Man grows animals in New Zealand and Australia, carries it to the other part of the world to eat. A falcon does the same. The lack of absorbing energy to survive has brought all created things on this planet to do this. And it has to be uprooted. We have to change the condition that this does not happen, habitually, not happen. (2:26). And this cannot be done by magic. This cannot be done by disarming. This cannot be done by, if man has to learn not to make tools of war. Man has to learn not to kill to get energy to ?? do. Now we understand.

And in that process, we move to the next. Otherwise, it's all magic. We take it off one generation, and it's inherited in their blood, in their genes. The next generation starts killing (again). We take it to the planet Zeus, you start killing there. What's the reason? We kill, we become so much, we become so embedded in it, that we see it as our right.

The behavior of the American president in the past few days, and the Israelis, and the Palestinians, and the rest of it. It's no different than the wolves and the dogs in the wild. They gather collectively to go, to kill, to eat, to have. And then in that process, it's still a hierarchy of which dog eats first, and who's on the top. The same as what we saw. The

top dog of the world goes to see another top dog, or little dog, who thinks he's a big dog, called smallest state in the Middle East.

I was explaining this to a friend of mine, Jewish friend of mine some times ago. I said, you know, Israel is like a Chihuahua. Very small, but barks the things. When you pass a Chihuahua by a big (German) shepherd, (2:28). and see how much it barks. This little tiny dogs, and they think they're big. And get them to be friend, you see how they walk next to the big dog, as I'm a big dog. This is the behavior of what we see with Israel. And a big dog being Americans, and actually the behavior of the leaders is exactly like a dog. Tear apart to be the top dog.

The American president, being in Tel Aviv, went to Gaza to see what's happening. Came there. We know why he went there. He went there, create, kill more. Iran gets involved. We use our weapons. Then we can control the rest. That was the whole purpose. He was not there to help. There is no sense. There is no gram of mercy in these people. Animal behavior. And we've seen it. Israel is very, very beautiful.

We're in Beijing, and we're near the hotel where the conference is taking place. And you look at the pictures of the world leaders, of the ambassadors, representatives of the nations, which President Xi has managed to bring to this conference. 113 nations. Some 20, 30 world leaders are here. They were here till yesterday or last night. And they all come as a friend. I come to find a common ground, a man who's there to give them all the same. If you look at it, I was talking to someone. President Xi has become like a grandfather, looking after the children and grandchildren of what we call it, the others. (2:30). And he's like a man with, you know, you go to the grandpa for the new year, you get something gift, or there is somewhere a solution for the problem. China has taken that position, but without a gun, without a single bullet. Americans are there as much as the Russians. What I was wondering is, how do all these European nations, while boycotting Russia in Ukraine, sitting in the same conference room as Putin, he was here. How many of them actually sat with him? How many of them did ?? talk to him? The respect and the honor which President Xi greeted Putin and the rest of the world leaders was the same. Some of our friends, they get extra dinner or some private something.

But this is how leadership has to be. And China is one of the most powerful nations economically, politically, and military. But the Chinese want to get rid of their military. That's their ultimate goal. To find a solution that the money we spend on arms, is spent on the nation. China has 28 million farmers below poverty line. They have poverty for ?? Xi, then trying to face these little dogs, creating more weapons to kill more, and it becomes a game now, who has better.

So it is how we bring this about and how we create that condition. And as I said, two mighty power of knowledge and sense have come together. You will understand very soon. You will understand much sooner than you can imagine. (2:32). I've committed you as Knowledge Seekers to world peace. You have to deliver. I'm just paving the road for you lot. You have to come up with the systems. You have to come up with the logics of understanding, and adding to, for the others to follow. Otherwise, you wasted your

time being here 10 years. And we see that role, we see that path. And we have found our match.

Any other question?

Q: ... Can you give a definition of the STM and the STP?

K- Oh, can somebody does that? We've done that so many times. Which teaching? Can you have the references, please? (The North) American teaching people are very good at it. They've been through it, and they come up with these things sometimes. Alex is there.

R: Maybe you can give the current definition in the moment for right now.

K- The definition hasn't changed. Definition hasn't changed. The STM is a collection from the point of inception, gathering of every cell energy in common denominator. And the STP is the energy fields of every collective individual cell, which create physical parts (like organs & muscles) of the body of man. (2:34). And the interaction of the two and with the physical condition of matter state creates the emotion of the physicality or the emotion of the Soul. So when you have common denominator, the same connected to, that every cell is connected to, and then you have individual energy fields, which is slightly different, in connecting to your other cells, kidney needs to be connected to the blood ?? set. Heart needs to be connected to blood.

But at the same time, you have common denominator, which keeps all these together. And one is the conveying the energies, which each one individually, collectively, brings into operation of the existence of the physicality. One you call the Soul, and one you call the Spirit. So it's the central connection line. And they're still very much close, but slightly different. It's like being on a carousel at the end of the street. We're all connected to the center pole because it rotates us. But individually, we are there and we have a connection of it. What we put at the end of this carousel we sit in, the friction of it dictates how fast that center ?? of us, fast, in respect for it to go. And that's all it is. But we have a common denominator of all being on the circle of the carousel, as we call the STP. (2:36).

It's very, very simple, if you understand it. I mean, everything you have a common denominator. It's very much, if you look at it, you have a central government and you have a district. But all the districts work together in connection with each other, and in conjunction with each other. And at the same time, central government is there to run the totality connected. And this is the same.

The STM is created from the point of inception of the first atoms, which they make then, the next step of the molecules, and then through interaction and the memory ?? packages ?? which is, make the man in a physical condition. It's like you, I hold your hand, and on the other hand, you hold other people's hand. But the interaction with you decides how I react to hold you, to let you go, pull you, or whatever else. You're the collection, but the effect of those people holding hands with you in your circle, will affect how I react

towards you. So, but you, in a way, represent all their forces too. So in the center point, I become the Soul. And the interaction of you with them, then with the group next door, and the one they hold on to the hand of, and then another person, goes to be the same, called the STP. The effective interaction of the fields. And the two are different strength. I can hold to a pole very ?? precisely ?? softly, but you're pulling yourself to death on the other hand. My function has nothing to do with you, but I still operate through, but I'm connected to. (2:38).

Any other question?

Q: ... Mr. Keshe, when the STM expands and transmutes and takes the STP and the physicality with it, will the one who stays watch the physicality disappear as if by magic?

K- It doesn't disappear by magic. It does when you write a letter, you get an envelope, and you would, you put that letter in the envelope, is it magic when you close the envelope? It's the lack of understanding. You create an envelope of energy. But inside the STP and physicality, most probably. The physicality changes, because you change the fields. The same as I explained, when you appear in a place, you manifest yourself in respect to the field interaction of the Soul and the STP and the Inertia of that planet. When your Soul expands beyond your physicality, now your physicality is in the new condition. You don't know what, how your .. physicality shape is inside your Soul. You know your shape when your Soul is inside and you interact with the Earth. And the funny thing is, you'll find out you have no shape. The body of the man becomes a plasma when it's in the state of physicality within the Soul. And total energy of the STP dictates the position.

This shows Knowledge Seekers don't really understand the depth of the knowledge. (2:40). Because now you're in a different environment, gravitational field forces. Up to now, you were a letter. You're sitting on the table. You are, it was you. When I fold you and put you in the envelope, you're still that letter, but you're inside something else. I don't see you anymore. It could be water in there. Somebody could shred you. It's all what happens in there, because all I see is the envelope. And this is what is with the STM, and the STP. And your dimension of the manifestation inside your Soul is different than when your physicality is dictating, imprison the STM.

But the beauty of it is, it's of a different order. It's of a weaker. So it opens you up. Man, in time, will make systems to see the shape of their own physicality when the Soul has expanded and takes dimension.

Any other question?

Q: ... Can you please let us know when delivery of the Cosmic Ray Communication Bundle begins? Thank you.

K- Oh, we are making it. It's so hard, they are making it. Those Cosmic Ray Bundles are coming after now. (2:42). They're completing for those people who bought the Universal

Council, what you call it, the UBESUS. After the, what you call, the London Conference, those kind of processes, delivery starts. It's not, it's just there's so much happening, and with the limited, what you call it, structure, and the London Conference. But they are ready to go. The production is, I think we can produce one a day, at the moment. And they're busy, and they will come through. The first stuff, those of you who bought the, what you call it, Universal .. Enhancement Units, some, I think, start shipping. And most of you who come to the conference in London, it will be handed over to you. So UBESUS and the use of the doctors, see what you call it, patients can start. And I think we have enough for those to go through and the balance. And then, your Cosmic Rays Bundles will start floating. It should be before the end of this year. It's just that in the process, they have perfected so much these units, that it has changed shape in so many ways. But now we come to the point that we are not going any further (not making any further changes). We have to get these things done. And then we'll go through the release.

The Energy Units will be coming out of China. We're just trying to see how it's going to get done. It has to produce, because we wanted to produce in limited numbers, but the Chinese want, as usual, in millions. I think it's what we can do to ourselves. We changed the... (2:44). If you are a doctor and you want to bring patients to the Enhancement Units and Enhancement Center, you can just go and ask for a license. There is a license set up for it. And you can bring patients in. We are the Wellness, what we call, center for use of UBESUS has already started.

Any another question?

Q: ... Can you please explain the phenomenon of apparent death?

K- What?

R: Just the phenomenon of what we call death. Can you explain that phenomenon of?

K- What do you mean by that? Physical death?

R: I think that's what she means. Apparent death of the physicality.

K- We've done that many times in the teaching. Please go on it. It's very easy. A few weeks ago, we explained that too.

R: Ok. There are ways. Remind people there are ways now to search the previous Knowledge Seekers Workshops. There's PDF's and documents available that are searchable of the transcripts. The Brazilian people have been pretty good with that.

Q: ... If I mix dried CO<sub>2</sub> Gans and Sodium Hydroxide, NaOH, in the same amount and put boiled water on it, what remains? CO<sub>2</sub> or ZnO? I know you told it some time ago, but I cannot find it again. (2:46). Thank you for all you do for mankind.

K- Can we answer the same as the last question? Go out and find it.

R: Ok. Do a search. You can literally do a word search with that, actually, and maybe even find it.

Q: ... Can we eliminate satellite Internet and develop an uncensored universal MaGravs based Internet? And will we need any sort of cables or antennas to transmit Internet in the future? Thanks.

K- No. No (you won't need cables). We are testing. Not testing. We actually developed it. Absolutely works perfect. One of the things we'll do after the London conference, because there's so much on our people, is to convert the Internet data into universal data. I'll explain this in more detail. It's something I've had in my head for a couple of years. But now our teams have understood how to make the connection. Now we have to go back into, actually, data transfer interface with our new technology and the old technology.

So let's say you put the information about Google. Everybody gets access to it. But there is no need for satellites. In past few days, we are working on to call upon the Satellite, those of you who became the Satellite (Souls), to join us when we started the what we call, (2:48). the peace process in a very enhanced way. I was talking to the people at the Foundation that it's time to call in those of you who became Satellites (Souls). Especially on the verge of what we saw in Palestine, to be able to change, to bring that change. But there is a piece of what I call, "hardware" needs to be completed in two days, in next few weeks. Then we will come to you as Satellites, where we eliminate the presence of ?? my system. You will understand. And you will feel it, and you will see how it will work. We'll call, hopefully, once it's completed.

It's completed. It's just that we don't have time to connect it. We can transfer digital data into universal line of communication. In a way, you make a movie here. You connect it to our system. If, let's say, you send it to the Moon, takes, let's say, for example, 10 seconds, you put it through the system of the Keshe Foundation, it will be instantaneously on the Moon. I'll explain this.

We already implemented this system in our latest. That's why we have this. You ask for this, what you call, units to be, when it's going to be delivered. One of the delays has been this. We were completing part of this process. If you remember, a few weeks ago, (2:50). I showed you the new Head Enhancement Units. (Just one second. I have to find my share then go to my photos. Let's see if I can dig it up. I'll show you. You understand what it is). This is what, if you remember, we showed you, which is literally now connecting to the UBESUS. This is taking over, literally, the job. But if you see, this is a communication system part of it.

But what even has been in the evolution of the development of the technology, in the past few weeks, while we were finishing this lot, has been the evolution in the technology of the Keshe Foundation, as we are developing. Cannot be stopped. And we had to draw a line up somewhere, that, when we're going to let this go out. And I think we reached the point that we can let go now, the, what you call, the new systems. This is going, we can, at least we hope, to be able to allow, at least partially, for you, or the people, to start using this. And it's just that, what will be the next step in evolution? What will be the next step in development? (2:52). That we don't need to stop. At least you get this model, and we

give you the next model, and say, oh, you could have done that. It's just that we can carry on forever developing, and forever completing. But there's a line of drawing, and this communication, Satellite communication.

Now we have done this. It's complete. But it needs to be connected to our systems, that it can work. But it had to be done in a slightly different way. And our team has managed to get to that point, where the new system are different than even you see here, slightly different, but totally effective in communication between the Soul, the STP, outside the body of the man. And many of you, you will understand, once you get the systems, and you connect it. And you cannot connect to our health system. It's connected to a special part of the system, which is for you and your Soul. I'm saying, especially with these new ones, don't share it. Do not share with no one, the new Headphones, because it's so part of you. It's another extension of the energy fields, and you don't want somebody else to go in it. And the medical ones, the Wellness ones, are totally different. They're structurally different. They are put together different.

Any other question?

Q: ... (2:54). Can you explain why I am able to raise people's vibrations? Thank you so much.

K- What, has a girl told you that?

R: Perhaps several people's vibrations.

K- I don't know.

R: Well, I mean, some people, when they walk into a room, they just sort of naturally raise the vibrations of those around them. I think you might have that problem as well. You know, it's people tend to sort of raise their vibrations when your presence is present. So perhaps he has that quality, or?

K- I don't know.

I was talking to one of our friends recently, last few days, actually, and with a translator sitting at the table. He said, this is the problem with you. We notice when you come to the meeting, you bring something different. I said, not really, but we bring the knowledge. And that knowledge brings love, and brings emotion of equality and sharing. And those who fight it usually don't want to see us, especially after the event.

I always said, I give so much love that when you don't receive it, you feel that you're deprived from it. That hurts more than actually not giving. You deprive yourself from it. (2:56). And that's how life should be. It's the same with the knowledge. We don't stop sharing knowledge. And it's just you're so hungry to learn more, you come back for more. And it's shared equal amongst. And that's how it should be. Do you get a vibration? Do you get the tinkling, oh, it's 9 o'clock, the Knowledge Seekers starts, so I have to be there. Or is it something you do out of obligation, I have to be there, it's there, I might learn something.

It's the same as I told you with Netanyahu, we had this problem. When a world leader tells Americans, whatever, that I don't want to talk to Keshe, because I know he will win, he'll get his way. So it means he's already aware of the power of peace, what we implement, and what is going to be done.

So yes, we all create different vibrations. Some of us vibration of love, some of us vibration of joy, some of us vibration of fear. But depends on that vibration brings ???. And how we feel about it. What we find peace with, and within, and amongst us, ourselves, between the STM and the STP. (2:58). And who can give us that vibration, that peace? Does not have, does not need to be in love and going crazy. The essence of peace, comfort, joy. And then we find peace with ourselves, and we function differently. And somebody comes in, he brings a vibration of fear. Everybody is afraid, what is going to be next?

And it's part of us. And how we want to perceive, and how we want to be, and how we give. Do we give a vibration of love and joy? Do we give a vibration of fear? Do we give a vibration of sadness? Some people observe, they receive it, and they react. And when I used to run business, all my staff, my secretary, staff of my company, they always say, you know what's the problem Mr. Keshe, you work and talk with us the same as others do. We don't feel you are the boss. I said, I'm not a boss. I just happen to be able to put something together that we work together. When I used to go into factories, or into offices, when the, (3:00). I remember occasion in Manchester, we bought new machinery, and as usual, I always walk with a tie, with a suit, and jacket, and everything. And a machine, the guy couldn't work it, and had a problem with it. I just took the jacket off, and I went behind the machine and start, Mr. Keshe, you are with a suit, you don't know. I said, I never bought something, I don't know how it works. And I start producing. With your ties, with your suit. I said, doesn't matter. Don't get fooled by the suit.

When I was in Iran in 2008, there was a material which was brought in, specially for one of the reactors. They used to take me into secure factories to build these things, because we had to get it done. And they had these cutting machines, ??? machines, very advanced, most sophisticated things they have there. And this guy couldn't cut. And every time he came to cut it, broke the tip of the machine, of the system. And I always was there as a scientist, who was there to observe the parts are correct for the building of the new systems. And this guy couldn't cut it. They brought the material, especially for me, from Japan overnight for a special part of the reactor. And I knew what it is. I knew what was going to be done. I said to him, it's a big factory, machines everywhere, sit there, and they all get this, all get this, ??? carry ??? their time. And I could see the guys getting more ???. I said, what's the problem? He said, the tip melts. I cannot do it. I said, can you move? But you cannot. I said, can you just move? And I just set the system, I just set the tip, because I knew what the material was. And I cut into the material like a button. But you are, I said, I have three degrees working on these machines. (3:02). I've done three engineering courses. I know exactly what you've got. You haven't understood what the material is. That's why you lose your tip. And I stood there teaching them how to handle material.

Never gets fooled by the clothing ?? (we wear). And it was all oily. And if you work on these machines. I've been trained. That's why I build the reactors by hand. I'm not a theoretical scientist. I've been trained. I have engineering diplomas and everything. Not just theory, working by machines, building things, cutting things, mixing things. And this is how it should be. And that, when I, in Tehran, when I cut, they ?? brought me back in the factory again, too. There wasn't there that guy with a suit, a foreign guy, just coming here to do something. It was something we can learn. With my work, it's the same. He's there. Trucks come in. I took my jacket off on the back of a truck. Let's load, go, because it has to be done. But you .. It doesn't matter. It doesn't matter what you wear. Doesn't matter. It's just that you create that. They feel good. They feel you're part of them. And they work as part of it. So it doesn't matter. You bring shivers or whatever, or depends what you do. With one, you create the vibration of joy. And in the same room, the other one has a fear.

Any other question?

R: ... Thank you, Mr. Keshe. We have one last thing to deal with. And let me show you a secret message from the boss here on the Keshe Foundation store, (3:04). which has a new product. And it seems to be, it has that vibration of love and something made with hands that you also mentioned. And this is the Keshe Gans handmade crochet star, symbolizing a new beginning through the worldwide implementation of the Keshe plasma science and technology in exchange for peace. Simply hold it in your hands and feel your inner peace expanding. It comes in a range of colors and can be customized. Here's a sample.

K- This is one of the new things that has been added. So a lot of people have been asking for something we can hold it. We can go to bed with it, I presume. It's got the mixtures of what we think is the right combination for that kind of emotion.

Any other question?

R: I think you pretty much covered them all today, Mr. Keshe. We went sort of double over time there. And thank you very much.

K- Thank you very much, indeed. Hopefully, we see you next week. And as we are organizing the what I call, the London conference and everything else which goes with it, we enter a phase of direct public relationship with Press and the rest, (3:06). which we were blocked and we kept away for nearly 10 years. The promoter's job is what we brought this team to work with us for about a year. And to bring the Keshe Foundation into public, public domain. Where you say we are not seen, because the situation with the Alan Sterling is ?? turning more or less blocked it. Because we received a barrage of attacks and all sorts of threats from these hooligans. Now everything is in the hand of the agencies. And at the same time, governments, officials, and securities are standing behind us. Any interaction will be handled accordingly by them because this peace conference has to go through. And it has to be, what you call it, implemented for world peace.

Those of you who are like Palestinians, whether Israelis, Palestinians, trying to destroy something for them to say they exist, you are not short of what I call, ?? ?? . Try to, we come to you next week or two, for you to go mass out. At the same time as our, what you call it, promoters go out for world leaders, for the Press in your countries as they have a limited structure for you to reach your Press, whatever, promoting this conference in London. And as part of our conference and work, world leaders are given a special Zoom connection that they can attend in the background, the whole, what you call, the conference.

Thank you very much for today. And I hope, I wish, and my Soul goes, for the world leaders, (3:08). especially Ayatollah Khamenei of Iran, to open the "white corridor" and bring shame to the nation of Israel and the backers of the Americans. That there are still people there who can give a home to homeless. And you don't need to kill people in their hospitals when you tell them to go there .. to be.

Thank you very much, and see you next time.

R: Great. Thank you. Thank you very much, Mr. Keshe, for another Knowledge Seekers Workshop here...

K- Just to remind you, those of you who want to register for the 27th of November (24th of November), the light, what we call it, between your hands, please, (3:10). because we're going to stop this. There is a limited numbers we can accept, the system can support. So we close this very soon, because I got an idea of how many people we can carry through the system. So please complete it, that we know. And we stop, we close this, we close the, what you call it, registration with that one.

R: Mr. Keshe, you said 27th. And I think the advertising is for the 24th. The 24th of November would be a Friday...

K- .. 24th of November. Oh yeah, that's the, we have a session 24th of October.

R: There's another one the 27th of October on Friday, I think, coming up next week, right? That's for a different one. People can go to the website and have a look. You can sort out the different dates there quite easily.

**508 KSW October 19, 2023**
