

# 509th Knowledge Seekers Workshop October 26, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

## ENGLISH TRANSCRIPTION

(:15)

K- Yes, thank you very much. Good morning, good day to you. As usual, wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation Space Institute. (:16) We welcome you back, and as usual, we create you more headache, and we'll see how you solve these headaches. And one day these headaches will become pleasurable. The pain of it is that we cannot understand it fully, so we have to cope with it. One day we'll understand it, one day it becomes useful, but we still battle with it.

In the science of today, in the knowledge of today, in understanding how we move, how we transmute, how we transport ourselves, is part of. Is a cornerstones of the work of our teachings. The teaching, according to many of you Knowledge Seekers (KS) is going too fast, and some of us are getting bored, we are not going that fast, we want to jump, we want to fly, we want to go all places. The flying and jumping and the rest of it, it's much closer than we can imagine, as technologies are getting developed. And the evolution in science goes up.

You got to understand, a lot of companies, a lot of organizations, use the knowledge and the teaching, and then they add other bits to it, and it appears on a different type of technologies, but essentially, is Keshe Foundation, knowledge we brought in, and the enlightenment, in the knowledge they have received.

One thing which is important for many of us, and in one of the teachings in the past I refer to it, is that when you travel, when you go from one position to another, when you decide to go by a, let's say UFO, or one of the entity, and then decide to convert to the Soul, transmutation, and come back again in a physical dimension (D), and then move. In so many ways, very much is like going on top of a cliff, for when it's over the mountain, you walked it all the way up. You're too tired. You don't want to do. So I used my Soul to get down. (:18) Pew. It took you days to get up. But now you had enough. It gets too cold. It's too windy. Physicality (P) suffers. I use nowadays parachute. Today I know how to do it. I use my Soul.

So the most important thing is what happened when you make a jump in the dimension of the Soul. And you land up in the middle of a stone. How do you get yourself out? How you, instead of landing on the surface, you find yourself 20 meters below the ground, in a cave, in a hole, whatever. These are all going to happen to us. We are not all mature, as we have accidents today by the climbers and divers. It will, we're still the same. We still make these minor mistakes. And how do we adjust it? And how do we get ourselves out of it? And where is the emotion which plays this? You might find yourself in a stone and

say, oh, I didn't want to come here, but it's much nicer. I want to stay. And how do you let know others that you're alive, but you're hiding in the stone? And these are not a fairy tale, not fancy, but sooner or later, one by one of you as Knowledge Seekers and your next generation has to handle it, has to live with it, because we are, even in a thousand years, 10,000 years, infants in this knowledge of the Creation.

But what actually happens to us? How do the energies stay separate? How does the Soul of the Man (STM) in its field dimension keeps the Soul of the Physicality (STP) in dimension separate? They don't become one. And what happens when they become one? What happens as, in a way, energy packs amalgamate. Fusion in the matter state is impossibility. (:20) Doesn't matter how you play it. If you understand the principle, you can create accidents. You can do whatever you like. But fusing to ?? come out is impossible in the matter state. But fusion in the energy state, in balancing the fields, is everyday occurrence. This is why scientists have not realized. If they go into the dimension of energy, and then amalgamate the field forces, they can come out as the fusion. They're in the matter state.

And this is what, in the coming time, we'll teach, we develop by the scientists, in production of alloys, in production of new materials. We don't melt anymore the zinc and the copper and something else to get that alloy to make, let's say, a bronze. In the transformation, in transmutation, we mix the energies. And then in that conversion, you get an alloy. This is what the UBESUS (Universal Body Enhancement Spaceship Units) are set to do. And this is a secret which we have never taught. We will not teach this last part till man is ready, because it has a lot of implications.

It has a lot of applications, you suddenly convert a huge mass into what you call energy, into mass. And then the mass cannot hold, cannot take, cannot handle. For example, as an energy, you're an energy pack. But if I convert you and you make a mistake in conversion and become a mass, and then you suddenly are a ton or 10 ton, and you appear on the plane, you know what happens to the plane. The crash is inevitable, because it's not programmed for it. So these are the things that man needs to understand. These are part of the technology (T). (:22) How do we, how we allow the new science to be developed?

This way, you use all the furnaces to melt the metals, measure them, put them together, and then pass them, and then do something else with them. And then you get it, and then you have to cut it, you have to shape it, you have to do everything with it to change it into usable item. And all the energy and all the effort goes into it. Where with the plasma technology, you convert, you extract the energy from the space into the box. And in the box, you convert it to matter state, to the shape you want. There is no conversion, there is no refinery, there is no work to do to create bars of copper and the rest of it, and then in future use it.

Now we see how much this new technology will change us. When now you buy a washing machine, you have to have a motor, you have to have a power supply for it. If you understand how to use the new energy for even washing your clothes, you'll be baffled. All you need to do, you put your clothes in the box, and the box is pre-primed for

so many energy transfers at all levels. The dirt as energy lifts you up from your clothing. There's no need for water. There is no need for new ways of doing things. Now you understand. What is coming, these are all in part of the patents which has done years ago, in different ways, we have touched it.

So how do we do it? How do we create that dimension of the field energy that even touches the matter state? How do we come to see the evolution in the science that they'll touch all our lives? (:24) In every aspects of life, from the animal in the jungles, from the man on the streets, from the bird in the sky, everything will be touched by this new technology. But not in a way, new, always been there. We are created out of it, now we understand it. It's the comprehension of the development in man's, what we call, level of understanding of his own creation. To what extent, to what limit, we can expand this? It all depends, as I always said, into your own level of understanding and the trust in what I understood, does what it says, and I can create it that way.

Knowledge Seekers who work with us have seen how I work. We need something, I said, "This, this needs to be done." And you get what you... spend years producing the Gans's and whatever, it's done within second. But, if you don't understand the basis, the top is very hard, and then using it the way it should. How do we, how we actually convert a matter into energy? All we do, we create an environment, for the plasma of the matter state to open up, and become manifest itself as a energy in it's dimension. Isn't this what you call it, Gans's production? When you produce Gans's of copper? Isn't this the way we absorb fields as a CO2 or as the others? And then we understand more about the facts, about the dimensions of Creation. (:26)

This is what, when I explained to you, go back weeks and weeks ago, with a collaboration, with new collaborations, you will have 3, 4 thousand, 10 thousand new items from the Keshe Foundation. Because, even your washing machine is not needed anymore. You don't have a water, it doesn't wash. If it's not heated, it doesn't do. If you don't buy detergent, it doesn't do. You can imagine, the hot water, the motor, the spinning, the detergents and everything else, the softener, all goes through the window.

And the beauty with this technology, the beauty with it is, once if you understand it, there is no dynamic system. We can make it all solid state. Then this brings you to the next step of the science, technology and development. To what extent we will extend the knowledge. To what extent we extend to what we had up to now to change. We saw at the beginning as an intro about the car. Now you can imagine what happens with your cooking. Would any of you ever cook? Or would we create an environment with like two headphones, two microphones, two speakers in the room, and continuously releases energies that we need?

We've seen certain races of man suffer from certain diseases, because their environment doesn't create the energy or magnetic (M) field that they need. Now with the system, you don't see diseases. Because it's always there, because the system provides it. (:28) Would we ?? take shape? Would it change our emotion? Would it take out of our worries? When you don't need to worry about food, feeding yourself, what's going to be next? What

things I have to do to just keep alive? If you look, if you understand the life of the man on this planet, it's one of the most miserable ways to live anywhere in the universe (U). You open your eyes (in the morning), you have to feed yourself. And to feed yourself, you have to do anything to keep that food on the table, that you have enough energy to wake up next day, next week, next month. So 80% of the man's life, even subconsciously, or consciously, spends on survival. When you have these systems, that goes out of the window.

Your time goes in, when, how can I heat myself? How can I go somewhere? When you understand you can transmute with your energy, you can go anywhere and through the interaction of the fields, you can create a heat with you, within you, then you understand. A lot of things goes. This is the beginning of the end of the governing. This is the end of the, in a way, man depending on the sources of this planet. It's detachment from ?? that. And these systems, sooner or later, will come into the market. Keshe Foundation, Knowledge Seekers, those who understand the technology, will add to it, will come out with it. Then, we see how life will change. (:30)

In next 10 years, once the new science gets hold, we will not recognize our lives, the lifestyle, the same as what the computer did with us, the same as what a mobile phone has done to us. Life without depending. Now with your mobiles, you don't need to be stuck to a wall and have to be there (where the phone is). You can do and talk, anywhere you want to be. With computers, the intelligence, the amount of information we can gather at the fingerprint. It is different, and we had with that fingerprint, we were used to write and scrub and do something, open books, something. Now you say what you want and it's there. It has brought new evolutions in man usage of his time and the knowledge and common intellect. What would be the next step? What's the next stage? And this is part of the work we do, this is part of the work, our work as the Keshe Foundation is.

Would it become the time that you literally, from point of inception, birth, to the point of death, could be 50, 100, 200, a thousand years on life, you never eat food, you never get sick, you never feel cold. You don't need to work to guarantee your survival. You survive because you have learned how to tap into the energies of the universe. Then you understand life will change in a very, very drastic way in how we interact. How we see things, and how do we actually feed ourselves. (:32)

What's the secret of feeding yourself with the plasma? Have you understood how you feed yourself in the matter state? Have you understood how what you eat as solid food becomes energy within you? Then, have you managed to understand, you take this, whatever it is, an apple or grapes or whatever, you put it in your stomach, create a Gans to absorb energies from the environment, and in the process of it, you release fields. Now, how can you create that seed of energy within you, but you do not need to eat, that attracts the totality of 100% energy you need to keep your physical life going.

The session of, what we call, November, at the end of November, with the light, is the beginning of this process for humanity. One of the most crucial points, this coming Friday, we have the session for what we call, the process which we want to see, how we

can elevate, how we can mark the structure of the STM, in its dimension of physicality. And many of you are coming in to see, to be there.

But the, what we call, the November session, it'll be a massive, massive change. For those Knowledge Seekers who have understood, and are ready to start the change. (:34) If you understand, how you can create fields energy, maybe you do not see it on the level of your vision strength, but you create that. How you can use that? How you can understand that energy to create transmutation? To create field of energy that your body can absorb. That you do not kill, you do not need to go to the next step of destruction, just to guarantee the physicality stays together.

Now you understand, gradually, gradually, we are taking you as Knowledge Seekers to next step. But you have to understand, the processes you've been going through, it prepares the Soul, it prepares the physicality (P) for the next step. And we are reaching that point. Within the next three or four weeks, as we go step by step forward, and we do other different developments, you should be able gradually to do what you see, a light between your hand. And how do you use this? This is that kindle which you start a fire with. And if you don't know how to handle it, it dies out. And say, I don't know how to make fire. Because you have not learned how to start that kindle, that first light. And as is magnetic gravitational field, that kindle of plasma will connect directly to every aspects. Then it comes how you emotionally move it. How you use your emotion to create a condition for its interaction, for its development, for its usage.

It's like having a flint in your pocket. Whenever you need, you start a fire. (:36) And this is where the knowledge and the technology comes. This is where I told you in the past few weeks and months, the revolution, the evolution in science is coming so rapid. It's coming in such a speed, that so many of you, you will not even feel it when it hits you.

So what is, how do we create a transmutation, a transportation of the fields that allows us to create that "kindle." How do I use my emotion? Or, how do I use my emotion for it not to go too far? I'm looking for energy and the level of the Calcium (Ca), because my body needs a Calcium. I don't want to produce a Uranium by accident in my body. It's one of these, what we call, gravitational (G) fields. It's... If the world of science, for example, could understand the existence, the dimension of the life of the man, and why, for example, you have Calcium in every cell of the body of the man, then you understand how you can negotiate your ways.

What is the purpose of the Calcium? Why do we need a Calcium in our body, in every cell? And what happen if we move this Calcium? The only reason every cell of body of the man, created, be it in bone marrow, be it in any part of the body of the man, has a Calcium, is one reason. (:38) Don't forget, your body is in a plasma field, it's in a ?? vacuum of itself. It has structures, it has Black Holes. And the Black Hole of the body of the man, to hold everything else, is the bone structure. So when you have Calcium in every cell, in connection to it, it keeps it together. It's a common denominator field force that in it, keeps your muscle tissue near the bone, holds it. It holds your leg tissue

together, because then it's a, what you call, muscles on the bone. And then in your blood, it keeps circulation. But it's there, it's a dynamic plasma of the Calcium moving around.

The only reason we have Calcium in every cell of the body of the man, is to keep our attachment to the bone structure. And it comes from the bone. And then, if you understand this process, it comes the next step. What happens if I get leg gets amputated? Aha, I need that mysterious thing, Calcium, that is always there. And then instead of ?? growing in one day, it grows in one hour. This is the development of the technologies which is coming forward. This is what you should not be worried, if you become even that reptile, will lose his tail, in two weeks time he'll have a full leg, in two minutes you'll have your leg back.

Now you understand, the extent that this technology, the knowledge of the technology, will bring changes to man. When I go to another planet, the Calcium is a vapor, doesn't even exist, because the dimensions for its magnetic field (to) exist, doesn't exist. (:40) There is another denominator which can give me that. And then if you understand why you have Calcium in your body, and then you understand why you have Zinc, why you have Iron, Why do you have Copper (Cu) as the components of the physicality? Don't forget that Calcium has as a spectrum of the magnetic field dimensions. It dictates that field condition of Calcium, what strength field is absorbed near to it, and then it becomes a tissue cell of the heart, or becomes a tissue cell of a lung. And then you understand why our lungs have no muscles in it. Because the Calcium has caged it, does not need no muscle for it. Your structure of your rib cage has dictated no muscle tissue.

The structure of the brain of the man has dictated no muscle tissue in the brain. And when the Calcium is in its form of itself, you have to attach other things to it, which we call muscle tissue. If you look the structure of the bone structure of the man, the structure of the marrow which is created within the structure of every single bone in the body of the man, dictates what kind, what structure of the muscle tissues and material you have. If you can control your spine, your vertebra, with the right Calcium condition, you'll never get any of the diseases which we see. (:42) Then, even cancer becomes impossibility.

The world of science has not understood, how Calcium in a structure of every cell of the man, and the bone structure are connected to each other. Because, we never understood, our body is built of Gans's, it evolves, it's field strength, its dimension. The field strength created in the rib cage, in the flat dimension, dictates the expansion of the Calcium in the structure of the lung. When you get old, the rib cage, the .. ?? bends in, you change the dimension of an interaction of the field of your lung. Then you open up the others to move, to create, and the lung tissues are created, and then you call it, cancer in the lung. Isn't that the same what happens in the breast of the woman when she gets a tumor?

Now we understand. If man understands the principle of creation in his own physical body, man will conquer the universe. This is what we have to understand, this is where when we get involved in the process of what we call, Wellness we do impossibilities. We can reach impossibilities. But you have to understand at this ?? time, our doctors have to understand this. Otherwise it's another magic, it's another prescription, another tablet out

of the box. To them, have this, god knows tablets, to them you can have this vitamin, or you can have this antibiotic. (:44)

Then, man never gets sick, then man understands, by his own action, he can change the Calcium combination energy, and walk away from any diseases. The slight change in the atmosphere, in the dimension of magnetic fields of your kidney, gives you kidney stone. But what is the stone? Whatever you made, what changed the gravitational field in the Calcium, that it led to this dimension?

Today's teaching is to open your eyes, in understanding and application of life, of man, within himself and within his environment. And then in the future, those who understand, will start making these machines. Mr. Keshe said, "It's Calcium, I have to do." And then I want to see how many of you are in back to MaGrav business. Is out of fashion now making MaGravs. Now we have to find the Calcium. Now we have to find this. This is why in the teaching of last week, I showed you the shape of the brain, and how, in fact, how it's been changed to fit the Inertia of this planet.

Then you understand, how now the physical structure of ?? it sits there. Why in the shape of the skull dictates the intelligence, dictates behavior, dictates the outcome of the future. Why, for goodness sake, doctors never understood, we call them all sorts of diseases, and we have no solution for it, with paraplegics, with the children who are born deformed head, in the birth tunnel, where they were perfect inside. (:46) If our scientists understand how to manipulate the Calcium structure within the deformed brain, the physicality of it, when it goes through the birth and understands how body does it, then we don't have these handicapped children for a lifetime. The scientists solve the problem at the point of birth, create the fields, that it creates the Calcium in the right direction, in the right position, as it's the Calcium of the child. They measure it's magnetic field, they understand it's plasma structure, and replicate it. Then, we don't need these incubators to keep them. We keep them in "plasma incubators," which the body is adjusted to perfect the child at birth. Then you understand, for man to be imperfect, for man to be sick, understanding the plasma technology is impossibilities. Then life is for eternity.

I had a pleasure this weekend to be in a conference, where the man literally sitting opposite to me, next to me at lunch. ?? away, another one is 122 years old. You look old, but as fit as me, half his age. Because, in structure of the environment, in the structure of the food we eat, they have managed without knowing, to trigger this Calcium. to trigger the position of it. When you look at the people, tall people, short people, at old age, walking high, walking tall, walking broad shoulders, you hardly see them sick. Because they keep the posture, they keep the magnetic field flow as it was young. When you bend in, you change combination, (:48) and you bring yourself, field strengths variation in the rib cage. Your ribs when you're young has a certain distance, that gravitational magnetic field gives you young, gives, allows you to absorb energy as you need for your Soul and your physicality. As you bend in, these two ribs move one millimeter, two millimeter closer, now getting changed. The field strength is changed.

If our doctors or scientists understand the totality of the field interaction in body of the man, goes back to what I told you, the guy who came to the Senzano (Italy), and he was a guru, he was a prophet, because he went seven times, 21 days, he could feed himself without eating, then he became magician, and the guy bends and kisses his foot, because he could do it. I couldn't do it. Now, every one of us can do it. No food for millions of years. So, the whole of the rest of humanity should bend a million times. The guy hasn't eaten for ten years. We don't eat for hundreds of years. Sorry, on planet Zeus and on the Moon, we have no petrol market, we have no fish and chip shop, and we have no grass to eat. So, and the food has run out, you brought yourself in the backpack. Do we fight for the food? Somebody else has it, and what happens when his runs out? Or, we learn how by absorbing different fields, we change our posture, we change our energy absorption. We use the air as that food, as that package, which absorbs the other 80% from the environment. (:50)

You got to remember, everything which is on this planet, comes from the air of this planet. And if you can absorb the right breathing, the right energy from atmosphere, you can use it as that source in your body, which absorbs the other 80% from outside. You bring it in as a matter state, you convert it into the Gans, and brings its energy from the universe. That's the secret of life. This is how the future generations will come to understand how to live. How to expand, how to survive the span of the universe. You create the condition that the energy in that point is used, the way every plasma within your body carries life.

In the physical life, you're connected to Calcium for your physical structure. In your plasma life, you don't have such a thing. We have energy fields of the plasma of Calcium, somewhere in our brain, of what I call, plasma of our Soul, partially in our plasma of our physicality, but if you go on the planet Zeus, Calcium has no structure, so you'll be just a jelly on the floor. Or, you can absorb, understand the process of the creation, and according to conversion through the emotion of the physicality, create the Calcium of the place, time and position, to give yourself the physical structure to survive. But in that planet, there are no air, the Oxygen combination, the Nitrogen combination, which we use. So, you change the dimension of the rib cage, to become, to absorb the energy from the environment of the place, (:52) to feed the Soul. And create the energy field, to feed the STP, that in between them, they create the energy of the physical life, that interaction with the Soul and the Inertia of the time and place, does not matter, there is no planet, it's just the open space of universe, or in the depth of the oceans of the deepest ocean in the universe. You still can create life, then you have no worries, if you manifest in a stone, or on the top of the mountain, in a place, there is nothing but fields.

Then, I wonder how many of you will come back and says, how do I make MaGravs? Can I get 10% energy reduction? Where the whole energy of the universe, the process of working with the universe, creation of the cell structure of the universe, sits in the MaGravs. If you look, the curvature, the twist and the turn, in every coil of the MaGrav, did you look at the MaGravs, the coils of the brain we showed last week, is just piled up on top of each other, different than ring. How do you play with it? Why when I do this, that happens? When I... because you only look at the physicality, look at the structure of

the fields. To what extent we have to "spoon feed" you, one by one. I think the generation would have been a million years old. Or is it nice just to be spoon fed and says, "I haven't eaten yet, give me more."

This is what knowledge is, this is what it gives you everlasting life. This is a fountain of youth, the knowledge of the man about his own creation, (:54) and the way the physical life works. Now you understand how much we still need to teach, how much we need to open your eyes in how you actually physically live, and what is the cause of your life. What maintains life for you on this planet, and how you will change in another dimension.

If I make a magnet of Calcium and put next to all of you, you'll be jelly on the floor, packs of energy just shivering like a river. Because we never understood the principle of the creation of physicality this time and point. We see people from, we call them aliens, and they have a feature. Look at the feature. What do they have? What gives them what material gives them their physical, vertical, whatever shape they have, and what is used as satellites, we call it, muscles. We call it, tissues, we call it, cells of the muscles and tissues.

Now you understand, life is very simple. Because man has not understood, man is trapped by all the anxiety and all the pains of the physicality. So, I wonder how many of you Knowledge Seekers, the speed you went to make MaGravs to get 10% reduction, Mr. Keshe doesn't know, it doesn't work. I have to make the Calcium condition system energies, and then you see what happens. Some of you doctors now jump, "Oh, we put Calcium in our, this and that, and we ??." It will not work that way. Be careful you might give a cancer, because you don't know how to handle it. (:56)

The whole process, the whole understanding of, is transmutation of the fields, is transportation of the fields, in the energy levels of the plasma, and nothing else. Does not matter where you are, where you exist, in the universe. You want to live as a worm without a bone structure? Now you have to understand how to create a condition that gives you that energy, that physical energy of a bone structure, but in the strength of the fields, that you don't need a bone structure. How do you think the worm exists without any bone structure? How did some animals exist that have no bones in them? Because the gravitational magnetic field of a specific isotope of Calcium on this planet has created that. Look at the oyster. Look at all the fish, which are soft with no bone structure, but they live inside the Calcium. They have managed to create Calcium outside their body to protect it inside. We haven't even managed to understand this simple physical principle. How these soft body tissues with no bone, they have skin that has shells. How come some exist without?

Now you understand, the principle of creation on this planet. Because, if you look at Mr. COHN, and you look at the Calcium, Isotopes, (:58) you understand the secret of life on this planet. Mr. COHN, which is the basic, the .. foundation of the Amino Acids (AA). You have a Carbon 12. You have 14, a Nitrogen, that's 28. Sorry, 26. Then, you have the Oxygen, and then you have the Hydrogen. Then, you have connection with the material

which attaches itself to AA as Iron. Then, you have the AA, or energy balance plasma of Copper. Now, does it start adding up?

Why the common denominator in the structure of the physicality, in the atmosphere of this planet, is Calcium? Even the worm has Calcium on his skin. Now you understand, how playing with a field, not with the material, which gives you life, which creates a stability anywhere in the universe. Now, the secret of creation is, unravels for you on this planet. (1:00). And it took me half an hour, and all of you as Knowledge Seekers, understand, how you are created, why you have a bone, why you die, why you get diseases, and how you can change it. And, when you go through transmutation, the first thing you hear, "Oh, what is the Calcium here? Do I need to swim or do I need to walk?" Emotion of me finds out in its field strength, what is going to be the seed of every cell.

That Black Hole, that absorbs everything and holds on to what it needs, that's all Calcium is, it's a Black Hole of every cell in the body of the man. And because it's a Black Hole, it has gravitational magnetic field, it interacts with its totality at field strength. It can be a cell in the middle of the stomach, can have a liver on one side of it, can have kidney on the other side of it, intestines are on the other side, you're everything else around it. Because, it dictates according to the Inertia, magnetic field of your vertebra, what things allows it.

Have you noticed, how come we have one organ in the cage of the lung of the man, and with all these bones around it, and we have all these organs, in where there is no magnetic field. And we call it, the stomach and it's just one piece going down, straight with nothing attached to it, we call it vertebra. They, the combination, the interaction of the fields of the Calcium within them, replaces the rib cage, increase that interaction between the balanced fields of the, what we call, the Black Hole, to keep the structure. (1:02) And then, you'll see, if you follow that structure, the cow has the rib cage and the bone's different shape, the dog has the same, the cat has the same, And then you understand how a heavy organ is in that part.

RNA is not that easy to make. DNA is absolutely hard part to play with. If I can change the energy fields of the plasma of the information of RNA, I can make in one second, cat out of your dog tomorrow, and a fish the day after. They call it, what we call, gene manipulation. Let me, when the man learns, understand RNA manipulation. It's much, much easier. It's much, much faster. And you don't need to have GMOs, because then you play with other one, "DMOs." Then you understand how we, as humans, still work on the matter state of it. We call it, DNA. If man learns to play with the energy of the MaGrav, you will all be creating RNA. And if you can sit on it, you can change it.

I hope today you understood. (1:04) I hope I open your eyes again to another dimension of life. In the future, if the knowledgeable scientists, called doctors and scientists, understand the teaching of today, the world of the medicine, the food of man will change forever. But as usual, it takes time.

And then we come to understand how we can transmute. Because we have to understand this, to be able to go through transmutation. The fear of powering as an energy, creating the Black Holes of the creation, at the point of the time and destination. And then it will be very different for man. Life will be totally different for any creatures who understand the knowledge of the creation of the Creator.

I hope today's teaching brought you a new dimension, to move away from matter state, to move away from your MaGravs, and understand the process of the creation of the fields, and the use of the fields. Unfortunately, it's like giving birth to the child and breastfeeding it. And now you say you're grown up, you cannot be breastfed anymore. No more ?? "Mama." And then what happens? The child cries. The detachment from something, a sucker from day one, is impossibility. Without it, I die. Till he starts walking, on the first day, shall I go for it? No, no. I can do it myself. And then becomes a man, it matures in the ways of life of physicality.

And now, for me, as I was explaining to the other Knowledge Seekers very recently, I have to get this creature of the man, the child of this planet, away from the "breast" of physicality, for it to start walking and mature. (1:06) And it's so attached to physicality, this is the impossibility of the world of the Creation, for people like me, how to get you from this suckling physicality, and look, there is more outside. And when we achieve this, man will start a new cycle of being part of Universal Community, as is itself a Universal ?? Unity. When I cannot take you off the suckling part, has been my dilemma for past years. Maybe the biggest mistake I made, I showed you the MaGravs, because that created more dilemma, but in a way, in the long run, once you understand it, gives you a key to the universe.

Thank you very much for today, and we go to our usual repetitive break, and we come back to see what we can enlighten each other with the knowledge of the Creation. Rick, if you can take us to the break?

>> **BREAK** >> 509 KSW October 26, 2023 (1:12).

K- ... This is, you'll see this on the Keshe Foundation, what you call it, Store. The ball you see in the front is a medallion or emblem, which has been made and promoted for the Keshe Foundation Conference in London. And the hands is going (refers) back to what we call, the November (Flight Session) meeting of the Knowledge Seekers, going through the process (making ball of light between hands). And this, what we call, like a medallion, and should be available in the stores of the Keshe Foundation. And it is, in a way, representing both sides of the Keshe Foundation, plasma technology and energy of the man at the same time. It's a beautiful package. And this brings back a lot of realities and it's done by our Keshe Foundation design by IT team. (1:14) And it's, it brings a lot, a lot of understanding in the simplicity. This is made especially to celebrate the ?? Ambassadorial Meeting in London. And is like a (token of the) memory ?? of the event. And collaboration of the plasma and the Spaceship Institute, how we work only with plasma, without the matter state, what we call, state of matter.

And, regarding to the London conference, as we're getting closer, we have a lot of requests from a lot of people sending messages, "Can you send the invitation to this, can you send the invitation to that?" "Can we invite this?" Keshe Foundation has decided, because we have so many of you, and at the same time, with what we see, in the present time, in the... was building up to become a horrendous situation in the Middle East, by simply the greed of the man and the rest of it. We're responding back to your request, and in a way, we will release two invitations within next few hours, on the Keshe Foundation website and on the, what you call, Keshe Foundation chat rooms, all the, what we call, connections of the Keshe Foundation with the public. You can pick up these, print them, put the name of the ambassador you have, in England, and if you're German, send it to, what you call, the German ambassador in London, for the invitation. You can use the other card to send to the scientists, the people you want. It's not an invitation, it's to inform that they can participate. At the end of each, (1:16) what you call, presentation, you will see the link where they can go and register for the, what we call, the conference.

The publicity for the conference started yesterday with one group of advertising group, which we brought in. And the next group of advertising team will start from maybe Sunday. That is targeted for British public, British press, and more or less for the, what we call, the embassies in London. We have brought specialists in this job because London is targeted, because of the number of scientists. Or you can invite your ministers, you invite, inform them, to be for anything else, that for the 11th of November, we have everybody informed as you need. Because, we had people say, "Can I invite such and such person?" Now we're giving you the invitation. Send it to your professors, send it to your ministers in your countries. Send it to your president, send it to whatever, whoever. It doesn't matter which country you are. But send one copy to your ambassador in London. German ambassador, you have so many Germans. Each one, make one and send to, by email. If you're a German in London, make a hard copy and register, post it to the embassy. If you're a German, make a hard copy, in a nice heavy paper, post it to your ambassador in London. "Please attend this conference." And, the more they get, the more it takes to take shape.

We are trying to fix one of the venues now in a special place, it'll be amazing. And if we get a collaboration where I want it to be completely, we'll move the, what we call, the one week conference into this position. (1:18)

It has to be understood. We see today sitting here, as I spoke last week, the war in Middle East imminent. Americans and Illuminati's have decided, we're going rob the Iran Central Bank. Every effort is getting made to stop this and the only thing is I can say, those who play the game will "pay the game." We will make sure if any excursion to damage Iran happens, through our technology and our will, without damaging a Soul, we'll bring those nations to more primitive levels, than when the man came out of the cave. I do not make a threat, but I deliver the technology, that living in those countries will become as you lived in the Stone Age. Those who start a war, will have to understand the time of war is over. Those who thought they're going to make profit, they'll find a very different profit.

My advice goes to the American administration and their work, and the same with the Israelis. You play with man, we play with Creator. Keep from making such a move, (1:20) because in a way, it's the wrong move. The war which started by Hamas was paid by the Israelis to start the war by Hamas, to create the present condition. So all ends up with the same. And we handle the same through the knowledge, technology, and at the same time, knowing what is to come.

London Conference will be the most position of our to enforce peace. Just don't send the invitation to your ambassador. There is a list of embassies, we'll provide you with all the links. You can sit down and send to 10, 20 or 30 embassies, once a day, once a week, till they understand the change. The conference is on the Internet, is going to be one of the most prestigious places in London. And, is where everything will take shape. Send to the members of Parliament of England, send it to the Prime Minister, send it to your Prime Minister, send it to your President, doesn't matter which country you are. They can ask through [info@keshe.foundation](mailto:info@keshe.foundation). It's on the promotion line, for a link for the President. We establish the correctness of the link, because anyone (can) say, "I'm the President." We establish with the embassy, that we've been given such a link, is this correct? They confirm it, we open the channel. So, when you ask your President, they want this, the embassy has to confirm the link, the line. (1:22) So, don't waste your time calling, "I'm the President," because one telephone call, one communication with the embassy, will clear the point for us.

We push to promote this, what you call, the conference, and the two-day conference and the week teaching. And I hope you will understand how to do it. Get in touch with head of your nuclear (industry). Get in touch with professors and university scientists. Get in touch with your (environmental lobbying) pressure groups for CO2 (reduction). You get in touch with your, what I call, scientists, your... every department which this technology can touch, and ask them to go to it. Be present with it, and understand it.

You've been sending me so many, "Can I invite this and this?" Now you cannot invite, but you can inform, because only ambassadors are invited. And they have to go through, fill in the form. We have brought in a special payment method for this session that is

automatically created and is done. You can pay with credit card. You can pay with any shape or form. And it will be done automatically. Please, once we post this message, this invitation. Yes, you have seen it now in some publications worldwide has already been released, as we see it's been put on the screen (by Digital Journal).

Send it to your ministers, send it to your priests, send it to the Vatican, send it to anyone you like, but keep the integrity of it. (1:24) And do not just think somebody else is going to do it. My (information) on top of theirs has more say (more power). All the embassies, African embassies, just don't look. We don't have many Africans in the Keshe Foundation. You do the work to support them, to inform them that they are in the same position as we saw in the Rome conference, and we saw in what I call, Belgian conference, we get a collection of people. But this time they go.

We try to give everyone who comes to the conference something scientific that they can take with you. I come from Queen Mary College. I have invited the chancellor, the president, prime principal of the Queen Mary College personally. You come from the university, do the same. I worked for BNFL. I invited the head of British Nuclear Fuel to attend to understand the time of nuclear game is over. You go to university, tell them, I'm your student. This is what you like to join. You work for a ministry, inform your minister. You work for a corporation with production of gas or whatever, inform them, attend this conference.

We're there to bring the change. And now is your part. As you can see, we told you we go international. And you can see Keshe Foundation promotion for the conference is on international press releases. The concentrated promotion for England and worldwide will come through the channels of another promoting company in UK, (1:26) which is expert in these jobs. I hope we can see the beginning and the start of the change.

Are there any questions?

R: Okay, very exciting Mr. Keshe. Could you tell us a little more about this medallion, this image that we see?

K- Yeah, .. It's the shape of the plasma, with the center and the plasma itself. It is a "brainchild" of one of the artists of the Keshe Foundation, who does a lot of work for us. And the one you were showing, the flying machine, going out of the anchor, this is done by the same designer. In the conference one, in the center, you have an SSI in gold in the center of it. You will see in the center of the, what you call, where the light you see, there's a light, there is a logo of SSI, as a Spaceship Institute, where we only deal with plasma. All the invitation cards, all the stationary, everything, follows the same, what you call it, emblem. You can buy this medallion. Now you can buy the medallion, it's transparent, and it should be on the Keshe Foundation Store somewhere. (1:28). But it's got a hole in it, the medallion, you can hang it on your back, you can hang it in the room. It's amazing what it is, and what it does is transparent, it takes the color of the background.

R: Yeah, I haven't seen it in the Store yet, so when we get a link we'll post it for people.  
K- It should be tomorrow, yeah.

Any other question?

Q: ... Hi Mr. Keshe, in this moment of change, where Plasma Technology will be shown to ambassadors and world leaders in a few days, what do you need from us, Knowledge Seekers? Thank you.

K- As I said, we, in the next few hours, maybe in the next 24 hours, we'll send the invitation to your ambassadors, and the information for you to inform the others, and spread it as much as you can. Everyday, we got about two weeks, three weeks to go, and we are there to respond to it. The point is that, in the conference, as it'll be shown, there are a lot of ambiguity, a lot of things which is sitting around the Foundation work will be opened.

It is there for you to see, it's there for people to see, to feel. It's the energy field presentation, not matter state presentation. (1:30) Our team will try to do their best to see if they can show other things, but you got to understand, there is a lot more. There is a second conference, a third conference of this series, which will come in China, and we are working till this is done, completed, that we can move with the other one. We try to establish this, the beautiful island of Sanya, in South China Sea. Where getting visa and this is not a problem, you can travel. Coming to Beijing you have to go to the embassy and all sorts. Sanya is a specific case that most of the Europeans, most of the nationals can just come in for 30 days and be a conference there. This is part of what's getting done, and the conference in Sanya has become one of the conference centers of the East Asia and most of the big corporations run their, what you call, conferences there now. It's a dream, what I call, holiday hotel chains. Things you never seen in the West, and you cannot imagine China has such a thing.

I live in Thailand, in these hotels for, in the, what you call it, ?? for some time. Those of you Knowledge Seekers who came to see us in China, we spend most of the time in Sanya. And it's a beautiful island. It's the largest, one of the largest islands, and we'll see if we can get that to be done. Then Beijing, Beijing will have a lot of problems in getting people visas invitations and the rest. Where Sanya has a different territorial principles, given to it by the, what you call, the Chinese government, and allows people much easier to enter. (1:32) And creates a lot more less problems for us than in Beijing, but it's a different world of what you call, existence. It's, they have built seven, eight star hotels, I call it. Things you have never seen in the West. You cannot imagine such a thing is possible, it's a beautiful island. And a chain of hotels built next to each other, about a hundred of them. Each one, what I call, mouth opening, and their beauty and their structure. But we'll see, we announce it after this conference, and what we negotiate with the Chinese.

Any other question?

Q: ... Hello Mr. Keshe, good day for you. I would like to ask, we human beings have the Creator side, but why do we become so insatiable and falling into vicious competition? Why don't we want to cooperate with each other, make progress together, and beauty, and beauty together?

K- I wonder if he's Chinese?

R: It seems like it by the name, yes, Hong Yuwei.

K- This is the way of Taoism, Buddhism, thinking, Confucianism, to share, to be balanced. And, this is the way in the West is unthinkable. But in the East, gradually dawns on you, it rubs on you, and you see there is a lot of it in the way of living for them. And, what I call, the greed of the man has brought this, (1:34). it's not that there is no greed. But in combination of Taoism, Confucianism and the Buddhism. In Chinese, most of them, or some of them, have come to that balance. They find peace. Even everyday they battle with the life of physicality. They have that essence of, what you call, peacefulness.

I had the pleasure of being with some of the Chinese, what I call, "men of power" in the past few days. And it's amazing how humble they are, in the position they are. And the only thing they talk is the balance, creating peace, creating environment that is peaceful for a lot of others. I was talking to one of our Knowledge Seekers this morning. And I said to him, that's the way you think, Chinese. It's not the way we think in the West. Everything has a value. It has to be there. Where Chinese do everything for the nation. You work and you build the society, and we don't have that in the West. It's not a nationalism, it's a "nation-alism." It's a very big difference. The society counts more to be than me, or be. Even though they're very hard working, very selfish-centered, whatever. But general structure is that way.

And I always say, you say to a Chinese, hello, never answers, very seldom if you are people you know, answer you with, "ni hao." (hello in Chinese). They answer you, " in Chinese" - "have you eaten?" They are first worried if you have enough in your stomach, if you are safe. If you are not hungry. (1:36). In English, you say, hello, how are you? In China, when you say somebody hello, the answer usually is, have you eaten? Are you hungry? So they're looking after for somebody not to be in that state of need, that you are equal to them. Because I've eaten, I'm happy. You'll be the same. Then we can talk equal. So this is one thing we have to learn and walk away from in the world of physicality. And it'll come, it'll come on its own, as we progress in that way. And then these questions will not exist.

Any other question?

Q: ... Hi Mr. Keshe, you said in an old teaching, that we never control our sacrosanct emotion, and we only control the fields that I give and take, and that the consequences of it. Could you please explain more about that?

K- Always goes back to the "Ethos of Mitra." And if we learn that one, that's sacrosanct, thy shall not steal. Do good, first of all think good, talk good and do good. And that brings on itself a lot of peace. Then you don't need to think to do something else, then you have to correct it, and it takes a lot of energy. (1:38) And, in time, man will learn this. Because when you do that, you're connected to the "line of the Creator." That's all it is. Because that's His attributes, that's the way He is.

If you notice how we think, how we say, we say, we take this ?? road. Go back to the cave time. Because it means they have to learn. They have not learned. Start again. Learn the principle of being connected. And then, maybe in time to come, you will learn, you'll mature. It's a line of connection. It's the way through a common denominator, your root goes back to the essence of the Creation, which is the Creator. We are all connected, as I said in the teachings of the past. All connected through one common denominator. Every created thing in the universe to the Creator. Is that, if you find a path, and the field strength that takes you to that path, it can be one instance you are part of, and become part of.

Any other question?

Q: ... In the 507th Knowledge Seekers Workshop (KSW), you taught that, the Cosmic Rays we receive at the back of the head, are different from those we receive at the front. (1:40) And that, when our energy is too much in the back of the head, we can't get the Soul to expand forward. So questions, there's two questions. Are the Cosmic Rays we receive in the front and back of the head different because of the interaction of the fields and needs of those specific areas? And second question, in what situations do our energies go to the back of the head not allowing our Soul to expand forward? How can we change this situation?

K- Can you repeat that please?

Q: ... Okay, the first question is, are the Cosmic Rays we receive in the front and back of the head, different because of the interaction of the fields and needs of those specific areas?

K- Not necessarily. It's as I showed you in the magnet. Every, what you call, field strength has its own line of connection. And every magnet has all the connections needed for every piece to come in touch with. You buy a magnet, which you use material in the North Pole, and you bring an Iron from the South Pole, another magnet from material from South Pole, they still interact. They are magnets. Have you ever bought the magnets from two different shops, years apart, and they say, "Oh, I'm not touching this one, I don't like this, this is Chinese or this is African or whatever, my magnet's different." No, they still interact. (1:42) And the beauty of it is this. So, when you look at the brain of the man, it's the same. Each field has a position, field strength and the position in the brain of the man, to interact with. It doesn't matter if it's from your back or the front.

Q: Okay, back to the second question, in which situations do our energies go to the back of the head, not allowing our Soul to expand forward? And how can we change this situation?

K- In the November (Flight) session, I think it's 24th, 27th of November, you will feel this, and you'll learn a lot. We know how to play with this. We know how to enhance it, and we know how to bring it into a ?? sharp. And those of you who attended last two sessions, we tested it and you confirmed it in the, what you call, testimonials you sent us to confirm we are correct, everything is correct. And this is the way it will be and the way it's set up to be. And we... you'll learn how to do it, how to direct energies. But those of you who attend the end of November, you will learn the same process. And in the next future few months, we'll bring you those directly into transmutation. That the process of transmutation will start and becomes a common knowledge. But it's like going through step by step, step by step, step by step. (1:44)

I put on the screen, somebody asked, "Can we see this?" This is just the final product, it's in this plastic coverage. In the shop you'll see it, in the center is the SSI logo. It's a medallion, which is transparent, it's beautiful. And those of you ask, "Can we see it in material?" This is one of the pictures I have from the production, so... But go to the Keshe Foundation Store, is there for promotion of the conferences.

Any other question?

Q: ... Mr. Keshe talks about absorbing plasma energy to nourish the STM and the STP, rather than killing organisms for nourishment. I am willing and ready to understand how to do this for myself. How can I achieve this? Let me know what I can do for you. Thank you, James.

K- You can't do that for me, you can do it for yourself, but you have to understand field transfer. You have to feel a field transfer. And part of the November and the following works is that way. If you look at the, what I call, (1:46) the picture which was put up a few minutes ago, even for the, what you call, the light, as you see now on the screen. For one second, for one second, when you look at this picture, imagine what happens if that bright center is your Soul. If that bright center is the Soul of the Creator. And then you understand the next step. You understand how you can help yourself and how you can connect to every plasma in the universe. The way your Soul is that Black Hole and is connected, because of its operation to every single magnetic field in the universe.

Any other question?

Q: ... Thank you very much for teaching patiently, step by step, to help all humanity equally. (1:48) So, the question is, how could we realize and notice the difference between emotion of the STP and emotion of the STM? So, maybe we can then manage it to the way it's desirable and correct.

K- You know, we should know by now, especially at our age, at our time, The difference between the emotion of the Soul and emotion of physicality. Emotion of physicality, what I call, is hunger. Emotion of physicality is a need to satisfy a physical condition. Emotion of the Soul is virtue, is a feeling, has no tangibility, and has no dimension of physicality. And by time we come next, become an expert in it, because we know the difference.

I explain this in a very, what you call, a pure way, in a very straightforward way. Loving to love, the true love comes from the Soul. (1:50) Making love, desire to, comes from the emotion of physicality. And is both using the same word, but two dimensions of the life of the man. And this is for man, confusing, very confusing. Unconditional love and knowing what it means comes from the Soul. And it has, could be directed to the same object, same person, same thing. You love a woman, you just look at her. It just satisfies every emotion, everything which brings a turmoil to you in your life. And what do you do? You say, "Thank for just loving."

When you get to the point when you love loving someone, is when you mature to the level of the STM. When you love someone, it's in a way loving, but loving in the dimension of physicality as you are. When you fall in love with the love, this is when you mature. You understand, you deal with the dimension of the Soul. And this is very, very, very tricky point for people to do. (1:52)

We fall in love with our children. And we enjoy their existence. We love to love them. And it's the essence of the Creation. It is how we have been, how we become, and how we feel the emotion of the Soul. And you can live a lifetime, don't feel it, and it can happen to you the first time. It's like when you look at your child, you love it. But if you get to the point of loving your, the way you love your child, that comes from the essence of the Soul. When you tell your partner, "I love you." And then when you're on your own, it's not missing. It's the emotion of loving, the way you love your partner. That emotion is from the Soul. Loving comes from the physicality, is emotion of feeling of the life, STP.

And some of us live a lifetime, never experience it. Some of us has the pleasure to feel it the first time, in our lives, it could be with our dog, with our cat, with our brother, sister, mother, whatever. And, if you reach to that point with your partner, it's one of the most beautiful ways to ever live. (1:54). Because, they say, "It touches my Soul." Because, you love in a dimension of physicality someone, but when you love, loving them, then you're aware of another dimension.

Any other question?

Q: I had another question, if you mind, don't mind. I remember you, when you say, "The more we give, the more we receive." and then there was a schema that you had these circles in the inside, it's the most gravitational, and then as it goes, opens up, it becomes gravitational with our emotions, the planets, things like that. Could you, with the schema, share with us how, the more we give, the more we take, because it's not easy for some people to grasp it.

K- I always said, it's like a cup. The more you take out of it, the more you can put in it. The fresher water, you can get in it. And it's understanding in the dimension of the fields and emotion. It has two ways of characteristics when you live, or talk about things ?? like this. And one is that your emotion, when you give, it's like opening fields wider, because it's not with you anymore. (1:56) And in opening that, the space gap between the separation of one to the other becomes to fill in. So you receive more of.

I explained this years ago. It needs a skill to do it and to show it. And with the present, what you call, Zoom facilities, is not that easy to do.

(Let's see. Let's see if this tool of what we call, Zoom, allows us to do this).

If you take a plasma in the, what I call, my...

<< Mr. Keshe tries to make the drawing on Zoom .... >>.

Now, if you look at a magnetic fields that they go out. (1:58) If I have another field going from here, will go here. This gap builds up, open and open. So, the more you give, if you look at it that way, the bigger this gap comes to receive, if you understand it. This is, allows more to arrive. Because, these two lines of emotion, have their own gravitational magnetic fields, and they create at lower strength, further separation. And this is the best way I can explain to you. The more you give, the bigger this gap becomes. So the more you receive. And this is the structure of the whole understanding.

So, it's, then you, in a way, because it changes, (2:00) the whole structure will change. And, as it comes, it condenses. And somewhere in here, it turns back, to its, what I call, origin, or again, what we call, giving. Because at this point, now it's arrived, it returns. So now you have more to give. So as you take more, you give more. And this is the essence of the Creation. That's why we see, we understand the operation of the Soul. And if you look at it, it started with the Creator, and as it goes further, you get more galaxies, and more, and more by the interaction of the fields. So, you create more fields to be absorbed.

Any other question?

<< Knowledge Seeker raised his hand by mistake >> (2:02)

Any other question?

Q: ... Good morning Mr. Keshe, can you please explain why the dialect changes and not the language when we talk about foreign language syndrome? Thank you so much.

K- Can you repeat that?

R: Can you please explain why the dialect changes and not the language, when we talk about foreign language syndrome? Not clear on that, other than maybe, it's when people are able to suddenly learn a foreign language perhaps?

K- It's like, I tell that to my children, quite a lot, even at the ages they are. They speak English, but they've been taught to speak Farsi. But when they speak Farsi, we have a certain accent or voice, or whatever you call it, combination, that it sounds like the way the Armenians speak. And most of the Iranian children Farsi, it's a second language they speak, they have this, what we call, the Armenian accent. Because Armenians speak another language, but they learn Farsi to be as they've been given a home in Iran, (2:04) even centuries later. When an Armenian speaks in Farsi, we know it's, they are Armenians. Even they've been there for centuries. Because at home, they use Armenian.

And is the way our voice, psychologically or pattern wise, is the way we... the twist of the tongue, they call it, goes in each language. Some languages we'll speak with the voice of the throat. Some of them speak more with the tongue. It's very, if you lived in England, you can tell somebody who's actually not English, trying to speak English, very, what I call, 'pot English'. And English, which is naturally English and they speak, the way they do, is the way they pronounce the 'th'. It is not a natural way. When you learn it from childhood, it's part of your process of learning. It comes naturally. But those who learn English, and then they want to speak a perfect English, you always hear that " ". Because, they want to fit in, as I know everything, I understand, but it's not there, the dialectic's not there. The language is there, but it's the way the tongue has twisted or turned or structured through the memory of their brain, to use certain muscles, and certain part of the voice box for ?? certain things. And speaking a new language, a dialect, and a dialect that just brings that more.

This is why when you go to a country like in some part of Austria, where we live, (2:06) you cannot, you don't hear, and then you move and the hundred kilometers, the accent, the voice is different. It's like in China, if you go from one part to another, you can't even understand what they are talking about. They are talking Chinese, but the style, dialect, like the way they eat the food, or whatever, has changed, has twisted. Now what they use is that somebody else doesn't understand it. We do this. It's to do with the structure of physical voice, and the voice box, and the muscle tissues, of the tongue and the mouth, and partially the emotion. How we attach to the emotion of the word and the language.

Any other question?

Q: ... Will transmutation processes be demonstrated at some of the future conferences? Even a mere thought of this working will shock the scientific community, let alone demonstrating it.

K- We were planning to do it, we think we are ready to do it, but with all the problems in the background, with the Keshe Foundation, what's happening and the pressures we had, is pushed backwards. The systems are set up to do it. We have built the systems for it. We were hoping to be able to even demonstrate it in London. But, Keshe Foundation's got so much things going around with it, and that is building up, and building up. It's not internal, it's the things put on us external.

But, the technology is there. We have built systems to do this. (2:08) You saw a unit in UNO Center. That system now is getting built, completely completed, to do this job. And we done more than this, where the people and the places which matters, we have shown the, what you call it, much bigger processes. Much, much bigger than, that it can bring.

They still don't. We, we went through a process, past two or three months, as I said in one of the talks, if you listen. Up to now we were on our own, we did what we liked, now in collaboration with governments, everything has to be done, to be shown, that it's there, that we can go to the next step. When we talk about coming to an agreement with certain governments, doing certain things, because Knowledge Seekers have literally shown how it works, what it is, the way it is, how it should be done. And they repeat it and repeat it. And they don't believe it, but it's there, so we have to accept it. And the worse it gets, the higher we go, the worse it gets, till we hit the ceiling. And even the scientists see it, understand it, they still have a problem because they read something else to accept as something else. They can't accept this.

I said to one of our team very recently, it's very much like. You understand this if you come from the Islamic background, because I know people who've been through this, and still know the emotion of it, is you have a mother, you love your mother, you love your dad. And then that dad comes with a second wife, and says, this is your mother too. It doesn't fit. (2:10) Cannot be, because I call mother. It cannot be. Or when this, we see this. Now I divorce your mom. This is your new mother. You have to accept this. It's not there. We can't accept it. There is no, nothing, because I accepted something else. It's a love affair I had with my mom. The emotion I have, this cannot fit.

This is the same with the scientists. This is the same with people. The notion of, I accepted something and I... and it's correct because I love and I understand it, is half of our battle with the Chinese academicians, more or less. And, in changing direction and doing a lot of things, the world of academicians still pushes that something till things start moving and then they see things and say, "Okay, so it's a new technology." But the problem is now we have no academicians to confirm it. And this is the problem of. We show things even to the top scientists, because they, as I call, the new "mistress of the dad," it's not acceptable. The new technology in the world of science, is not because, I'm the top, so we need somebody else.

Now they're trying to create an academician in plasma technology. They're asking us, "Have you got the standards?" They said, "You haven't even accepted the knowledge, how do you want us to make a standard for it?" And, so we have to accept. We are going into that state of, you know, you're just between the... We've been in the womb of the mother, we live with it, we know it, coming out now, the people are saying, "Oh, what animal has come out now?" "What, can we accept it? Is it a human?" (2:12)

We are not looking for that kind of proof, because, especially now, the way we are structuring it, the way you will see in the coming weeks and months, we will show, as we've done. Now we become independent, it's not showing now, it's just we are moving into the position of making it, to make it to be. We passed that point of belief. And now

even sometimes they ask it. "This is still in progress?" I said, "Yes, it's in progressive development for you, your grandchild, your grandchild of your grandchild and grandchild of your..." This technology never ends, it's a knowledge of Creator.

For us in China, the point of believe, seeing it to believe it, is gone. It's now, we've seen it, we believe it. How can we use it to our benefit? We are in that stage with the Chinese. The seeing and believing is gone, it's buried, is not questionable. But sometimes it still pops up. But now we don't have experts. Now, our job as Keshe Foundation Knowledge Seekers, is to create experts for Chinese who understand our technology, that they become expert to vote on, or decide on what we taught them. And this is another game for the Knowledge Seekers.

But, overall we are, we passed that believing point, especially in China. And now we are heading very fast towards the implication and application. And we have for the time from of 2 to 3 years, and you will see it. And different Knowledge Seekers change the name to be, but now we are bringing it. (2:14) You will see this believing, seeing to believing, believing to see, whatever, is eroded from the layer of the Chinese structure of the work. Now is, how can you implement? Tell us how much it costs to do this, how much, how many people with it? So now we become estimators of our own technology, in to train for the Chinese to become academician, to judge our own technology, we have told them. But it's part of the progress.

We are now in the process of creating future Keshe Foundation plasma academicians for this nation. Because it's past the believing to see, now it's implication. We are in a phase of... and then you will see it. You will see it and then the West will say, "How did this happen?" Nothing, you're ignorance brought it in. We are not in the game of proving anymore, now we're in a phase of implication and application and delivery, in China. And this will happen, takes us another year, to set up the research centers, to set up the factories, to start the productions, and ... next, next, next, and then you have to understand, as we deal with the national government. Now the government has accepted such a thing is there, they have to allocate finances for it. And, this we passed to certain extent. So now it's not, not believing it, it's just, okay, let's do this basic things which can change for the nation, basic things can bring security, basic things we accept, now we are in that ways.

The point of seeing to believing, to be shown on CNN, is finished, is over for us. (2:16) Now, we have reached implication, application, and production. And training, mass number of scientists is our next step of the work, that they can work with us to understand the technology, and in seeing, understanding technology, we start the delivery of the technology in different ways.

So, seeing and believing is for you Westerners. In China, we have moved, seen, believed, shown. Now we're going to be moved into the phase of implication. How we can be implement it. How, where it can be implemented, system for this. As I said to our Chinese partners, instead of you, us coming to show you what this technology can do, you bring us your problem, you bring us what you're looking for, and we see how we fit

the technology. Because now it solves your problem, you believe it, because your problem is solved. And now we reach that point.

And we are in the past CNN to be seen, and somebody to show in the news. We have shown enough to the leadership of this country that this is... Now we're in a phase of setting up how much it cost the factory to be set up. How much, how many people we need. We estimate something like 40 to 100 million people will be involved in this industry in next 3 to 5 years. Because once it goes, it moves and it goes on. And seeing to believing and when it can be demonstrated. We still do that in the West and say, "Oh, it's... we've done our work." Now Keshe Foundation in China is implication. We are in delivering technology to touch the national policy. (2:18)

Any other question?

Q: ... Hello, I would like to know if there's any technology that you have to protect in case of changing of the polarity of the Earth's poles?

K- Just one second please. ... Repeat, please.

Q: ... Hello, I would like to know if there's any technology that you have to protect in case of the changing of the polarity of the poles of the Earth?

K- (silence) Are you there?

R: Yes, did you hear? No.

K- Yes, I heard. I said, "Did you hear?"

R: No.

K- Okay, I didn't say anything. That's what happened when the polarity changes.

R: You answered, perhaps.

K- Did something happen to you?

Let me tell you something very straight forward. (2:20) The polarity of the Earth has changed many, many, many, many, many, many times. in the life of this planet. And, if you consider yourself to be a good man, a handsome man, and a good creature, so, the planet has created such a perfection, you shouldn't be worried what happens when it changes.

R: ... Yeah. I was going to say, it happens to the Sun every 11 years, it changes poles. Yeah.

K- Every 11 and a half years changes poles, and we change poles because of it. We know that. So, every 23 years, Sun goes back to its pole position, moving twice. And, then with it, the Earth changes, and then with it, our plasma changes with it. So, we are used to long distance changes of polarity, and a close changes will not make any difference.

Q: ... If Elon Musk's SpaceX rockets are burning holes in our Ozone or not? And he mentions that Keshe said, "It's time to stop the burning." So why are space rockets still like giant fireworks?

K- Because we haven't accepted the new technology, that's all. (2:22) Because we went the way the caveman went, up to now. Now we go the way the Gods go. We saw the fire, we made the fire, now we managed to find different things to burn it. We haven't changed from the caveman time. Not a bit. We just made a more glorious containers for it. And with the new technology, in a way, understanding the technology of the Creation, we don't need that. But don't forget, these people with the, what I call, frontier research development, are partially the reasons we are here. Because we can understand it, other people have done things, now because of that, you can understand the difference. So, science is something which is built on top of each other, and next to each other, and top and bottom of each other, but collectively over hundreds and thousands of years, what we developed, is a cornerstone when I speak to you about gravity, he can understand. Because if that apple would not fall on the head of a guy sleeping in the wrong place, being a lazy man, none of us maybe would have never had this problem with gravity, understanding what it is. And then I couldn't have proved the correctness of the Black Hole theory. So our science is built on the back of the others. And let them make a few more holes, we have a lot of process to patch it up. Called the knowledge of man.

R: So all of our science is based on somebody who got mad at an apple that woke him up under the tree. (2:24)

K- Yeah, and the guy who jumped out of, he went to have a bath and he jumped out of the bath and naked he discovered it. .. ?? ..

R: The religions are based on a guy under the tree too, and apples. So, hmm, must be a connection there, I'm sure. .. and speaking of secret societies Mike ...

K- I think that was the... the problem was, was what. One under the apple tree and the other one was watching it. When Newton got hit directly on the head, there was nobody else to watch him. You didn't get it, did you? No.

R: No.

K- You're talking about the apple and Adam and Eve. Yeah? Who was under the tree, Adam or Eve, who picked up that apple?

R: .. Okay.

Q: ... What is your opinion on the secret societies trying to subvert national sovereignty for a one world government, under global worship of the entity they worship another, and offer sacrifices to? Humans did this in the past, all over the planet, in past global civilizations, and the humans were wiped out for this.

K- I have no, no nothing to say.

R: Okay.

K- Global .. We were told that the Keshe Foundation is a globalist, one of our very good Knowledge Seekers. (2:26) And she opposes any globalist, and I said, "I'm a globalist, because I want one globe, I want one race that everybody is comfortable with." And it depends what you are there, you bring knowledge, you don't need to sacrifice. But that the rest is for what they get, from where they get. And what they try to do. And how much difference we put between them, this is the most beautiful part. How much, what difference between, put them and their behavior and their approach.

Any other question?

Q: ... What price is the medallion?

K- I don't know, that hasn't been decided I think.

R: So that'll probably be put in the Store in the next day or two, is that the idea? People are wondering when it will show up in the KF Store.

K- They should be there tonight or tomorrow, I think. And the same with the links with everything else. I don't know what the value, what the value has been put on it.

R: OK.

K- I just showed you what I received on the screen. And it'll be done very soon. (2:28)

Q: ... Hello Mr. Keshe, Karl from Melbourne, Australia. And a few weeks ago, you talked about slowness and the slowness of breath. And it reminded me of when we drove over to Western Australia and we saw the Pacific Ocean for the first time, and you could see these waves on the ocean, kilometers long, just coming in, coming in. And not long before that, it had been talked about that NASA had these seven kilometer mirrors, two arms that were seven kilometers long that were picking up the magnetic gravitational waves coming to the earth. And yeah, I feel like we need to just get a bit of reiteration on that slowness and how we connect in with these waves that come to us. And when I saw the Nano coating scans that had 30,000 layers to it, I always sort of described it as enabling us a different depth of connection by having those layers in the Nano coating to connect with these very subtle waves that come to the Earth. So I just wonder if you can build on that for us and just help us understand that.

K- What do you want me to build on, in a way? (2:30)

Q: Well, you were talking about breathing, slowing down, connecting with the Soul. Life is very fast and we're always told that things have to be faster and computing technology speeding up, but this is the antithesis of that, is really slowing down and connecting in with this natural wavelength that comes to the Earth, that comes from the core of the Earth. And I just wondered whether there was any other metaphor you could use to help us understand that, and whether I was actually interpreting what you were saying correctly.

K- There are different. .. It's very much, you know, if you've been a father or a mother, and you carry your child in your arm to go to sleep, the eyes are open, and they usually at that age, young, they cuddle a teddy bear or something, because they feel secure with it, they feel happy with it. And then you watch them, they close their eyes, and they go from the dimension of physicality into the dimension of the Soul. If you hold them long enough, the breathing changes. The rhythm of the breathing changes. The speed of the breathing changes. And just before you feel the speed of breathing changes, you try to kiss your child. (2:32) You see they give you that smile. And it's the same body. You wait. Even though they change, you know they're going to sleep. If you wait another few minutes, and then you kiss the child again, you want to turn to bed, then you see no reaction. But then you see, ?? if you watch enough, sometimes there's a smile. There is a, another dimension comes up. And I watched my children going through this many times. And I always say, this is where the time physicality is handed over to the Soul.

Then we understand it's us who creates that separation. What about if the child in awake-ness breathes this way, through the same rhythm? Would he or she go through that transition? How come a kiss, and a smile back, and then a few seconds later, a kiss and there is no emotion. But it's the same body. But in that point of transition you hear the change in the speed of breathing, and the depth of breathing. And then you see how much energy is needed from this dimension of physicality, that the Soul can take up. And you see that smile, which shows the dreamland, the direction of the Soul has started. (2:34)

So it's not a wave. It's us allowing us to be connected. It's just like moving in a room, nothing there, and you turn on the television. You bring in a different dimension. You are watching the same television, and nothing on it. Now you switch it on. It's a football game, and you get all excited. Nothing has changed. It's just you, the same screen, but different information and dimension. You're connected to a bigger world.

So, it's us who has created, could be 7 centimeter, could be 7 millimeter or 7,000 kilometers. We create that wave for ourselves and how we change it, and how we can change from inside to outside. This is why I always said, what do children, babies talk to each other, Even though a few days old, they know who's higher, who's up higher rank, who's there, who's the bossy one, and the rest of it. I watched over years a lot by literally adoring my children and holding them and watching their emotion, where there's a lot of cry and anger, not wanting to go to sleep. And then, when the breathing changes, the whole changes from the most beautiful creatures in the world you can ever hold in your hand. Serene, calm, and a smile, and then the kicks come when the neural system settles. (2:36) And you see them. It's a different dimension. And where do they go? And they only know your face and mom's face. And the environment you're in, which universe do they go to.

And that's the same as us. And we can control that. We don't need to go to sleep anymore. We know. Let it call it, daydream, but I call it connection with the Soul. So how do you want to create it? It's your perception of what you call, one understanding of one expectation of what you want ?? to be.

Any other questions?

Q: I just had one follow up. And you were talking about sleeping there. And I suffer from insomnia. And I just wondered if there was any particular exercise where we could connect in with the Soul, or... How do we settle ourselves to go back to sleep, particularly when we wake up harsh in the middle of the night?

K- I found a way to do it, and it works. I... for years, for decades, I used to travel around the world quite often. So, I slept a lot of nights alone in hotel rooms, and there was all sorts of noise and everything. I used to put a television on, and I used to sleep like a rock. There was no television, I wake up ten times. And, now a days it's very easy. I've got a thing called Keshe Foundation, on the, what you call it, the live stream or YouTube. (2:38)

Q: Nothing cosmic, just the TV?

K- Yeah, I just put that on and the guy talks (Mr. Keshe hears himself) and I go to sleep. And there's no insomnia. So, I keep the brain busy, in a background noise. And, the physicality goes (to sleep). Try it, it might work.

R: My ex- was like that, and she would fall asleep to the TV. If I turned the TV off it would wake her up. That's true. It has a lulling effect.

K- No, it depends what we call, a white noise matches your, what we call, sleep strength of fields. You put children near the washing machine, and turn it on, they sleep like a baby, you switch it off, they wake up. Does the noise of the washing machine is the same noise as the womb of the mother? Matches? This is the... We have to find the strength... Insomnia has a solution, it's partially physically, because we can't breathe, we snore, the tongue goes to the back and then you wake up. It's, I call it, fear of death. Then, being afraid to sleep, that the same (thing) happens, it creates that condition, but not all the time.

A lot of people with insomnia is subconscious awareness of, find a position in your sleep. And what position you wake up, and then you can't go back to sleep. (2:40) And then you find out two or three things, factors in insomnia. One is, first of all, happens in the old age, usually, or happens at a very young age, because you're too active. There is not enough time in the world.

It happens in the older age, because we have two cycles, or roughly, assume we have two cycles of sleep. The first cycle we sleep because physically, whatever we use, repairs or energies for everything else used. And then when we change to the next cycle, all the repairs are done, all the energy used, so there is nothing, so you have to wake up. This is the reason we wake up, because all the repairs are done. The left does the right, the right does the left side of the body, the left side of the brain does the right side of the body.

And so, in reducing the cycle of switch between the brain and the lung, we become, we call it, insomnia.

So, one of the best ways for people with insomnia is, make it work. Do some physical action, physical things, that there's more energy needed than four hours of repair. And then you go into six, eight hours and then 10 hours. Don't go out and kill yourself doing exercises. But, find a process to bring the physical side of the repair, or energy, to extend the... extend the sleeping time. Or it works, a lot of people in the old age have this insomnia. Because, when you sleep, the tongue falls in the back of the throat, it's just like a fear of dying, suffocation. You wake up, subconsciously, it happens a few times during the night, then the fear of not going, going to sleep, you might die, keeps you awake and becomes insomnia. (2:42) You have to find out which one fits you, and then accordingly, change the position, and you don't sleep, you cannot go into that way of sleeping, or find a white noise, or you find out if it's everyday. It means at that age, you are not physically enough active. And one cycle repairs both sides, because when the repair is done, brain switches. Every hour, even you breathe through your nose and your lung, one nose is used, one lung is used. And in one hour they switch back. And if you haven't used enough energy, that in two cycle completed (in one cycle). And this is how our body is made.

If you understand the reason of insomnia, you shouldn't (have it). Is it the fear of death, because of your, what you call it, the tongue falling in the back of the throat, or the extension of the roof of the mouth? Which is part of the snoring, and all this other... Find out what it is, and try to remedy it. Or, is the fear of loneliness, fear of being with someone, you put a white noise in the background? Usually, it's solvable, but you have to find out. And, because we see a lot of people who are inactive life, hits this barrier in older age.

Try to stand upright. A lot of us create this insomnia and the things for ourselves, because as the older we get, we just bend in. Try, you're aware, stand upright (keep the back straight). At my age, I tried not to... The minute I found out, I realized, tiredness or exhaustion, or whatever, brings you to bend, (2:44) I stand up (straight). If you walk with me, I tend most of the time to stand very upright. Because it allows the right combination of energies to be used.

And insomnia, and in some cases, lack of sleep, leads to a lot of other problems because of it. Heart disease, emotional problems, because you don't get enough rest, so putting a lot of weight on, Because when you sleep, the body uses energy. When you are awake, you create that little ?? candle in your body, swallowing the energy, you breathe different things. And so, the more you are sleeping, the extent to certain hours, keeps you very slim, because body is not taking energy, but holding the machine going. It's like being in a traffic light, or in a traffic jam, the engine runs, you use the fuel, but you're going nowhere.

Q: ... This must be synchronicity. I was going to comment that several Knowledge Seekers have realized that if we're in a tranquil mode, we must be breathing just about

less than 2% of what we normally breathe. And many time, we maybe get alarmed, because we're not breathing, (2:46) but the energy is there, so why bother? We don't have to get alarmed because of this, I imagine so. And...

K- Yeah, but it's the frustration of everybody's awake. Everybody's asleep and you're awake. It creates that frustration, is the most of the problem.

Q: Yeah, well, why frustrate, because of this? But, as you said...

K- Human race. You know the human race. If we have nothing to do, we go and find a pot, we break the pot and then start sorrowing, "Why did I break the pot? What happened? Why did the pot break?" We find a way to use it to keep our mind busy.

Q: Yes, and also the sleeping, the way to sleep. I've been sleeping for the last, what, at least 40 years with the television on, to be able to sleep profoundly. And another question would be, for positioning in space, we're told we have to master the 12 based mathematics, because the space is on a 12 math's base, maps sort of thing.

K- Teach us, we are students, explain what does it mean?

Q: Well, we're normally working with a 10 based mathematics. And computers work on a two-based mathematics, on and off. (2:48) But to position in space, apparently, according to, let's call them the maps, we have to manage a 12 based mathematics. Tesla talked about the 3, 6, 9 managing of the numbers, but apparently we're missing two other numbers. The up to 9 is the normal one, and then we got the 10th and the 11th number, which we are missing.

K- God help us.

Q: Do you get what I mean?

K- Yeah, yeah, I understand. It's just that ... it depends what theory, what fits where, isn't it. It could be correct, we can never say it's wrong, but... Could be correct, but we have to find the key to it.

R: What numbers does God use?

K- I think zero.

R: Zero and infinity perhaps, the two numbers that God uses.

Q: Yeah, what numbers are superior civilizations, ?? you saw?

K- Zero.

Q: Fine, thank you, thank you very much.

K- I think it's because everything goes back to the center. In English you make an, what you call, an oval shape of zero. In Arabic and the rest is a dot. (2:50)

R: There's a native language in Canada where they write starting from the very center of the page instead of the top or bottom. They start at the center because, because that's the origin. That's why they took away their language and made them go to the aboriginal residential schools and took all the kids away from the native populations.

K- You know...

R: Now they're paying billions of dollars to repair that error, the government is. Billions, literally, 24 billion just came up the other day.

K- For what? For repairing?

R: Part of the repairs to the, the native people for errors that were done in the past and they've gotten quite a bit of benefits from all that.

K- It's like it's very... Because you don't do it. If you read English, and on the sentence below, read Farsi or Arabic, is amazing what mayhem your eyes and your brain brings it. In English you go left to right, in Farsi you go from right to left.

Q: It's the same problem in Spanish and English.

K- Yeah. And then what creates in what state? Does the left to right is more suitable to left handed people? Or is it right to left more suited to the right handed? And then what happened, the people who have a left hand write it in a right hand language?

Q: That's a problem, we left handers have. We've had all our lives.

K- No, we don't have a problem, that's a beauty. We write closer to our heart, we are romantic, huh?

Q: Yeah, you're right there.

K- When we write, write with the essence of life. Yeah, but the thing is, they tried, you know, instill in some families, when the child is born, who with the left hand, they see some problem, "What can we do, how can we get him to write with the right hand?" They put the force, the pen, force, the spoon, everything in their hand, to get the right hand working. But they don't think that's the beauty of what we accept, we have to accept it the way it is, and it creates a long term problems when these things are done. And, once our parents are not mature to understand, and appreciate the beauty of it, they see that, there's something wrong if you write with your left hand, it creates mayhem... They do everything to make you to do with the right, because everybody else, you don't fit into

that thing, there is something and you go to some of them, "Sorry he's left handed. Oh, instead of jolly, he's left handed." This creates mayhem for us.

Thank you very much for today.

Q: Thank you very much Mr. Keshe.

K- Thank you very much. I hope we learned a little bit, we shared a little bit. (2:54) And we meet again next week. And I hope by the time we meet next week, we won't see another aggression of a religion, which I'm pretty sure, we are on the verge of one of the worst wars to hit, between the Christianity, the Jews and the Muslims, all in the holy land. And I wish all the best for those who are trapped in it, and I promise, we'll bring justice.

Thank you very much for today, and to be on your lines, where we announce the conferences, and send invitations to the people. Please keep on sending all invitations to your ambassadors. Don't say somebody else does it. If you are in England, print it, post it, let's send hard copies, letters and the emails and everything else. Today we'll, when we do it, we'll issue the list of the embassies in London. And then you can still send it to your embassy in your country. Where if you're German, send one to... and you live in England, send one to England, and send one to another country. We have to bring this peace process forward.

And, as I said, next 2-3 years, once we complete our work with Chinese nation, Chinese government, I can put my head down, hopefully, hopefully, and think that the humanity has started the process of the, what I call, conversion. And to what extent and how much we can accept and how much we can change.

But, I hope we still see each other tomorrow, (2:56) see each other again next Thursday. And I hope the world will not be a different place, and different points. But from what we see coming from Vatican, "insider stories," and insider information, they have instructed the masking of Iranians, and I hope we are wrong. But, I will return the stones of Coliseum back where they came, before I close my eyes. Thank you very much for today, and see you next week.

R: Mr. Keshe, where are those forms available, the letter to diplomats and so on? Are they going to be on the...

K- We'll post it. We will post it on all the chats. We will post it with the list. I'll post it myself because there is a, there is one for your ambassadors and there is one for you to inform the others. And there is a list of embassies you do, we do ourselves, our promoters are doing it. You will most probably, hopefully if it, as you've seen the other promotion from the American side is coming. The British promoters, we hope that we can come to an agreement with the national press and everything else. They can do it in next week or so. But you will see this presentation around the world, as you've seen, and you put it on the screen, in the past few minutes. Where we told you we have put it out, we are going

out. And, it's done in a mass, in a way, I've put it to your embassies in your countries and your ministers, that no, no one can stop, stop the process.

And, it is out, it's in public. And we have the pleasure of the Chinese government representatives, has already agreed, the invitation is going out to them. (2:58) They'll be in the conference. And, we will see. If we still have an embassy and ambassador in London, we don't have ambassador in London, but if we, our Council would attend with the present situation, which is zoning up in, what you call it, in Middle East.

Very interesting point to bring it forward. On the request of, I made to the Iranian leadership, last week, Iran changed the tone, and going into helping, what you call it, to supporting the radical regimes, and they said they step back. And, kept silence. And on Thursday, last week, Iran announced, Friday announced, that they will accept, on the line of the request of the Keshe Foundation, the students, and University students of Palestine, into Iran. They opened the door, as a first step.

And we held back and we heard nothing for five days, six days was silence. American administration listening to the open discussion of the Keshe Foundation, that there will be no participation, no support of Palestinians, the way they were hoping, if they got, to give them an excuse. They moved their naval forces, suddenly in past two or three days, to the position and now, as we saw in the United Nation, up to now they were waiting for Iran to go in to start the mayhem. They brought a fantastic policy in line in United Nation, that we're going to go to Iran, get Iran, because they helped them before they rocketed us. But they don't say, as you came to the Senate, how come the rockets which gave to Ukraine, has ended up on killing American citizens in Palestine, fired by the other side. (3:00)

So now you understand, we stopped the process of the war. Last week, because of the Iranian, and what we call, leadership, and in my talks with them, this morning, just prior to the teaching, everything, as was (in) of my request, we listened to what you said. And I said, "The only thing you didn't listen to, to open the white gates back to Iran." We know what the next step will be. I was hoping to receive a direct instruction, to announce this morning about what we were hoping to get, but the Americans, in response to us, that we're not taking part. As we saw United Nation yesterday, and what their administration asked. We are going to go, to get to Iran, because they helped before. They don't say, "It's our own arms, Iran did nothing." Any excuse to go in.

But, I promise one thing to humanity. I make sure, the nations who start this war, will not exist on the map of this (land), by their own doing, by their own action and nothing else. Not a single bloodshed. But there are ways when you're ashamed to be, you change. And only comes as I said, when a man becomes shameful to kill, he will change his habit.

And, it's very interesting what we might see in the next few days, as we know Americans have planned mass murdering on this Saturday, Sunday. And I hope we don't see it, I hope our leadership, and whatever, comes to their senses. But, we wait and we'll see. (3:02) And, our request, I thank the Iranian leadership, in accepting our request and

withholding from any aggression talks, or whatever going to do. And this brought us to the point and I hope that they would have listened further. Not just bring, open the door to the students, but to all the Palestinians. But they still would have found, they found another excuse to... The whole plan of the Americans is to empty Iran's central bank. One of the richest gold reserves over two and a half thousand years. And, I'll make gold not to be count for a cent. Thank you very much for today. See you next week.
