

510th Knowledge Seekers Workshop November 2, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:08)

K- Yes, thank you very much. Good morning, good day to you. As usual, whenever and whenever you listen this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. The interesting part about the Intro, as we heard, is how we absorb energy by the food we digest and to what strength. But if you go back to the other teachings and recent teachings, we always said when the man breathes, the man, the higher strength order of the fields of the energies we breathe in through our nose and what we consume or put in our mouth, will... reaches the Soul of the Man (STM).

In a way, what is interesting is, how do we feed the Soul? How do we get the Soul to reach a point of maturity in its field strength? The physicality of the man, (:10) takes the food inside, to elevate, or to absorb energy from the environment. How does your...

<< Mr. Keshe tries to open the whiteboard >>

If we look at... I try to be, very, what you call it, I'm not a very good drawer, but we put your, what we call, brain here, and we put your Soul in this position. This to be the position of the STM, in red. Now... In this position, when we breathe air in, (:12) as we said before, as we breathe the air in, to go down to the lung, the food we eat to go down to the lung, both continuously and without any fail, feed energy, the highest order, to the STM.

So, what we see is that, the stomach of the man needs the solid food, to be put as a trap, to bring energy fields from the environment, from Cosmos to Galaxies, to the rest. So, it's the same with the Soul. But that's what you see, the nostrils and the mouth, both come to the same place, where your air pipes and the line to the stomach go. So, the body of the man needs the Earth to set trap, for absorbing the energy of the, what we call, environment. Where the STM uses the contents of the air we breathe, to set the trap for the same fields, but at the order of its own, to receive. It's not just that we set in the, what we call, the food, as a solid food, as a trap, but also does the same thing. (:14) Continuously receiving energies from the environment, as the seed to absorb higher order for its operation. And through some of these fields, is where we again, due to the strength, in one occasion or the other, connect to grandma, or grandpa, old friends, future friends and rest of it. You say, "I foreseen a future, I knew I would meet you, I saw you in my dream, and now you are here." It's not that we are connected only to the past, through these fields, we are connected to the energies which is connected to others, which come from the future and the past.

Now we understand, the whole process. The energy field of the STM, through the gaseous condition, through what it breathes, will get elevation. And then the physical part is from what man absorbs. So now you understand how much more energy has come, or comes to the body of the man, just by breathing. And then it comes an interesting part for many of you, which some of you who are so anxious to know, how come you can control with breathing, the operation of the release of the Soul? How come by changing the breathing system, sequences, capacity of the lung, we decide how this energy releases itself, breaks through its boundaries, and can go out. (:16) Because, if you look at it in reality, your brain is lined that way, your lungs are lined that way, you have two halves.

Now you understand, how the operation of the energy, which is the same as the energy which feeds the Soul, in the lung of the man, controls the freedom of the Soul. But at the same time, being just sitting above the digestion system, the same lung, the same food, interacts with the energy of the matters. In long run, man will realize what you eat, more or less, does not play, or plays very little game in transferring his energy, except when he transfers it to the blood, in elevation of the STM. And in many cases, brings that down.

Now you understand. How man through the breathing system, can attract, elevate, control the dreaming and release and expansion of the STM. In a way, when man becomes a bit more wise, you'll find out the digest system, (:18) field creation, extracting from the fields of the Universe, the STM, extracting fields from the Universe (U) to its strength, in creating a new dimension between the two, creates a crucial point and crucial way, in how man will live, the time it lives, and how it's dimension (D) of life will change.

Then you understand, the physicality of the man, has kept the STM, prisoner through what it consumes from this planet, in the matter state. When the time comes, that the man will live only through the breathing cycle, that creates enough energy, in that the STM, will have the capability and the power, to absorb all the energy needs, man will be encapsulated. And then, that's the time he can transmute. This is what we do with you in the systems. When you feel you fly, when you feel you've been somewhere.

Now you understand the knowledge, the technology. But, there's a crucial point. In many of my teachings, I always say, when we started the first flight system, when I saw the first flight system in Tehran Sharif University, (:20) when the system took off the ground, and then I jumped on it, I sat on it, trying to hold it down, and it doesn't go anywhere, it pulled me up and start shattering on the floor, "ch-ch-ch-ch", where the bottom blew off. Me, forcing the gravity to stick to the ground, forced the emotion of the system to release energy on the bottom end. If you look at the materials which will come sometime later on, in the hand of the Knowledge Seekers, in part of the museum, you'll see that the extra plate which we actually glue to the bottom, to be able to carry on till the new system was built in that week.

But, what happened, this question came to us, And then subsequently in discussions, we flew, we now fly. We have broken the code of flight using magnetic fields, plasma fields. No burning, no disposition of air. What's next? As we said in the discussions, in the, what we call, the office of the scientist of the President ?? Ahmadinejad, we arrive on the

Moon, what's next? How do we walk around? We can't put the monkey suit on and get off the command ???. We haven't improved, we haven't increased the knowledge, we haven't changed the position, we haven't added to. So, since 2008, plus the information and knowledge we had before, we said, "The flight is done." We left it to the hand of the scientists, (:22) who are interested in getting flown, and going up, and creating whatever they want to do.

But the truth is, question came, "What's next?" How do we feed the man in Space? We arrived on the Moon. Sit in a box, open the door in a monkey suit. What's the pleasure of coming here, opening another prison in the clothes of man? This is why we set out to develop technologies for food, for medicine, for agriculture. And it's taken 15 years. You see, "Oh, I put a Headphone, I don't get Alzheimer's." "Oh, I eat a Gans, I don't need to eat." "Oh, I can do this, I can make that." All this has taken 15 years, and this is what we call the auxiliary side, a new way of technology (T), where lift and motion, has come to, needed to, added to exist in Space.

So, we developed the flights, and with you Knowledge Seekers (KS), jumping up and down, growing seeds, coming to the sessions, see how your Soul expands and the rest, we got the knowledge, the technology, completed. But now, you have another dilemma. Your dilemma starts today, in this teaching. And, your dilemma, cannot be answered by no one. No one except you. We have taught you, as I said, the same as Sharif Tehran University in 2008, we showed you to fly. Now, you use the dimension of your Soul, to encapsulate the physicality (P), (:24) we send you to planet Zeus, we send you to the Mars, you get yourself to the Moon. And, then you convert. According to the time, place and the space and all the fields. But, your problem starts now.

On Earth, you use the energies of the air, to absorb the seed, to absorb energy. On the Moon, there is no food, you have no mouth. There's no air, you cannot breathe. How do you be, connect, elevate your Soul? That you landed by mistake, you became a stone, now you want to be a creature who moves, or, "I don't like this, I want to go back to Earth." But, "I need energy, I need the connection." How do you absorb energy from the Universal fields, now that you have no mouth to eat, no nose to breathe, to put the seed, to elevate the Soul? And maybe if you sit as a stone there, you need a million years before the strength absorbed by the stone, which you have manifest yourself, maybe give you the elevation to high enough to come back to Earth. But by the time you come to Earth, the meteorite has hit the thing, it doesn't exist and the rest of it, or the house you live, Israelis got hold of it and bombarded to the smithereens.

Now, your dilemma comes, how do you feed your Soul in Space? What is the secret of feeding your Soul? (:26) What is the method of being able to be functional as a being, once you arrive through the dimension of the fields of the Universe, in the plasma strength of the STM? Now, we have a beautiful saying, how do you bring the donkey to hold it, to saddle it, to put a load on it? We say, << Farsi language >>. Now, how do we load this Soul, which has arrived on the Moon, perfectly functional? Now, you want to transmute, which means you want to take the shape, time, place on the Moon, but this time there is no mouth, there is no nose, there is nothing else. How do you absorb energy,

even to sustain your existence on the Moon? Because you are an attraction field, and giving of fields, and a little bit goes too much, the plasma opens up. Sugar cube in the hot water of tea. How do we keep its integrity? How do you hold to its existence? How do you change that position?

I'm sure many of you have found the answer, many of you know the answer. And if you do not know, what is your option? There are two ways. (:28) You can create the seed that allows the Soul to be always in charge, and does not allow it to disintegrate, or become a stone and sit there for millions of years. I said this once in one ???. Next time you look at the picture of the Moon, and you see a big boulder or a big stone, ask yourself one question. Just for the fun of it. Whose Soul has made that boulder, and he forgot, he didn't know how to change? And he has to sit there for billions of years. Maybe it's your grand, great grand, grand, grandfather's Soul. Hit the Moon by mistake and he couldn't convert.

This is the difference between the man with the emotion, with the man as a traveler, the man as a transmuter, using his Soul to travel. And the man as a star, as a stone, as a Cosmic dust, just from the STM, that can never convert, can never transmute. If you do not get this part, you become that plasma, which wanted to transmute, forgot how to do it, and now it's become a stone dust.

Now you understand, you are back in the dilemma of us, as an Iranian nuclear physicist, as a scientist, sitting around a table, in 2008, (:30) what's next? How do we feed the man on the Moon, without taking food? Now for you is, what's next? Can I put the small seed that my Soul extract energy from his environment, that I can manifest myself and sustain life, because in this place there is no air for me to breathe, to bring that seed? Not with the Oxygen, even though the planet has its own dimension. How do you make a channel to attract fields from the environment of the space, you land yourself in?

As I said, there are two ways. One, is the emotion of the man. The emotion of the Soul, good and bad. Thinking good, doing good. Creating the emotion to create the circulation of the fields, that become the seed of the attracting the fields of the Universe, to allow the Soul to be in transmutation. Not when the Soul is released as a dead body of the man, no connection. But, there is one point which you as transmuters have carried with you, which is the secret of your success. It's the Soul of Physicality (STP). Because it's embedded in you.

In nuclear technology we have a fantastic saying. (:32) And that is, we create, we go back to what we call fundamental atom. Fundamental plasma. The initial fundamental plasma. Where if you read the books it tells you, the seed sits within the center, and then you have the fission, and you have the, what we call, the basic atom, what you call, Hydrogen (H). In a way, your job is to use the STP. Outside or inside, or create the environment that the STP becomes so thin, that it embeds the Soul, that in that interaction you get the reverse pattern. And with it now, with the Inertia of the interaction of the two, you create your manifestation of physicality, and with it, sustain life. Sustain the existence of the STM.

This is what you need to understand. And in the process, you always have to keep the emotion of physicality (P), STP and the emotion of the STM, always in operation, in connection, understanding their separation, understanding their power, that man in the Space will become a traveler of transmutation, not a traveler of the Soul, which died when the physicality separated, (:34) and become, to find his place and position according to the strength, and a star for billions of years, a seed of to become another cycle.

There is a difference, within the present knowledge of the man about his Soul, and the present knowledge of man, his Soul and transmutation. When you die, physical dimension, your Soul is free, and it fields strength dictates where it's got to go and that's it. You go to Galaxies, or to so and so, in such a spot there is a field there, that you are there, as it does, maybe it's the beginning of the star formation, whatever, and you start your cycle. You have no choice. You sign your sentence with your behavior, while you had the opportunity to live as man, and the strength you gathered within combination of the fields, and the life of the man has already dictated your position, your prison sentence, for rest of the time of the existence of your Soul. There is no emotion, there is no cycle of STP with it. Because it took all and it's gone. But with transmutation, through the strength of the emotion, you have that choice. You are given that choice.

Now you understand. Now you become the passengers of the Space and you become passengers of what we call, the "cycle of man." In the dimension of the Soul, in the dimension of the strength of the fields. (:36) This is where the separation we have between the death, physical death and transmutation comes. That's where the difference is. Where you have no control in where you're going to end up, because the cycle of your life in the physical dimension of the man, the strength of the field of the physicality of the STM, given to the STM, has zoomed off to his destination, where he finds his balance field as a dust, as a center of the Galaxy, and maybe even, is so pure that it reaches the Soul of the Creator's strength.

Now, you understand the difference. Now your dilemma just started. We put you through these systems, in the test we do with you. But now, as you come in the November teaching, you see the light, you try to establish the color of the light. Or you see no lights, but the energy fields of transmutation is there. You have to decide. Do I transfer the emotion of the STP of the man in between my hands? And in connection between the two, I decide where to fly to.

In the condition of the physicality of the man, the energy of your physicality is dictated by your stomach, and the liquid, and the Gans's, and the ?? lymph liquid which you create. (:38) In the dimension of the Soul, in transmutation of it, you only deal with the fields, there is no food to eat, there is no air to pass the body of the man. And then you understand, why for so long I keep on telling you, ignore that MaGrav, ignore the physicality of it, look at the field transformation of it, look at how, what it creates. As a field strength.

One day you Knowledge Seekers, will build these MaGravs, and you will use them for transportation of your physicality. Once you understand the work of the MaGravs as a field interaction system, and not just for discounting electricity bill by 20 or 50%. You have already discounted your life, when you took the path of material condition. Then, if you understand this, you have answered what is taken us 15 years to teach you about how to make Gans's for food, blah, blah, blah, blah. Where now you decide what energy fields I can get from the environment of the existence of the Soul, to achieve what I need, the emotion of the comfort and pleasure of existence in the time, place and position. That I can manifest myself, or at least I can enjoy the field strength of the environment. I do not need to become a Martian to enjoy, I can stay in the dimension of the fields, that has life, absorbs energy from the Mars, and I become non-physical, tangible entity, as a plasma of the existence in the environment. (:40) Don't we see these on upper atmosphere? So, it should not be that hard for you to exist, anywhere in the Universe, without giving yourself a dimension of physicality.

Now you understand. With Gans's, mixing it, doing this, doing that, we showed how you can use them for health, for food, for blah, blah, for fertilizer and the rest. Now your dilemma is, you're learning to travel with the STM. And entrapped in it, the STP of the man as a plasma, and how you use these two, to manifest yourself, in the form of entity or fields, anywhere in the Universe. And the only one, and the only way you can get these two monkeys working together, is the emotion, and nothing else. When one Soul does not lie to the other for its better existence. When one Soul in emotion looks after the both, "Thy shall not lie." Talk good, think good, and do good, end of you, with do-gooders for your own Soul in the Universe.

Now you understand, where the teaching is there, is gathering a strength to become in all dimensions. Now, you got rid of the "monkey suit." Now, how do you feed the monkey? (:42) You get a hole in that monkey suit in the space. The monkey is monkey-ed. You learn to travel in the dimension of the Soul. Even you are wearing the suit of a monkey, you still can survive in any dimension. The interesting point is that, how many of your children, and great, great grandchildren, and many of those who know with same position, the children, the great, great children, will do what we do, today on this planet, and it's fun. We call it parachuting. We go on the plane, we go as high as we can, and we jump off having a "monkey" parachute on our back. We know we push a button, and we land safely.

Now that the man is educated about the cycle of life through the dimension of Soul, how many of you will go with physical dimension into space between Earth and the Moon, for example, and jump off in a dimension of physicality, instantaneously convert in the strength of the field of the STM, and within seconds appear on the table having Sunday lunch with mom's, and mom says to you, "weren't you going today for parachuting?" "Mama, I did, but this time I parachuted from space." But no clothing, no parachutes. The only emergency parachute on your back is, understand how to work within the STP, (:44) in the STM, and create a dimension that allows you to create the gravitational field of the Earth. allows you to absorb life, field strength for your Soul, and the emotion of the presence of the position, time and space.

Now you understand. You, up to now, came to the systems, and you saw the expansion, and you were on the Moon. Now, how do you feed that monkey on the Moon? How do you jump out of the spaceships in the space? But on Earth, you know you have an air, you can breathe, or you carry oxygen as a backpack at a higher altitude, and you still get the mixture to keep the physicality going. But what do you take with you when you jump off the spaceship in between Earth and the Moon or in the Space? What is your parachute? What is your safety net? What have you understood? That the way you're born, from the womb of the mother, you jump out of the liquid environment into the air, and you go, "Wah," and then you survive, because you learn to absorb the energy through the first breathe from the conversion of the fields of the air of the man to feed your Soul. What cries your Soul will make, when you transmute, in the dimension of your physicality, into the STM? It's in a way, the reversal of the cycle of the life, on this planet, at the point of birth, in the dimension of physicality.

The interesting thing is, would you still cry, when you go back? (:46) From the dimension of the physicality to the dimension of the Soul. We have seen those who travel from the Soul to physicality, do cry. The emotion of tears, but we don't see any tears. How many of you been in the systems and you say, "I cried, I could feel the tear." But there is no tear, you think it touched, But, as observers outside, we don't see any tear. It's just the emotion that is so real, that it gives you the feeling of the wetness, but is nothing there. How many of you went into the system? How many of you have used the Head Units, and still come out with the same?

Those of you who come to the London conferences, and Ambassadorial conferences, you will have fun with this. You need to have fun with this. You need to understand what the fun is to have, and how you can jump without a parachute in the depth of the Universe, using the strength of the fields of not the physicality, but the energy within you, ?? trusting in yourself, understanding yourself, understanding the work of the work of the Universe. Now you understand, you came here today to learn, but now you have a dilemma to sort out. If you want to be the Passengers of the Universe, on your own accord, on your own standard, and how you test. (:48) You cannot go into Space and jump and "I made a mistake." There is no error, I can't breathe, I do not know how to do, there is no room for error. But, would your body automatically change into that position?

The teachings... The cycle of the test which we have put for you, starting with the light between your hands, is the beginning of teaching you how to feed yourself, in Space, through the Soul. It's the beginning of the Space in teaching you how to be able to manage to keep the integrity of the STM and the STP of the man together, that somewhere in Space, you will convert.

And then, we come to the beautiful part. When you achieve that, when you come to that, then, your second dilemma starts. What's the use to becoming a passengers of the transmutation of Space, when you don't have your loved ones with you? You go to the Moon, you're on your own, you go "mental" (crazy) after a week, two weeks. How do

you tune to the field strength of your lover, your child, your grandmother, your dog, the cat and the tree you like? Knowing you all have the same common denominator.

First Commandment, "Thy shall not steal." You cannot lock and steal the Souls, (:50) because you want to go to the Moon, you're coming with me, I'll lock the doors, I'm going to the cinema, you have no choice, I'm driving, I've got the button and I've got the ignition, you sit in the car where I go, you come. In the dimension of the Soul, you don't have that. Every man drives his own car, where it depends which man would like to go up with you. There'll be no waiting, I go there and I see you, we're going together. Even though you go and see each other, if you get it right, but you can't grab the physicality, or tie it up the Soul, and drag it out with you, because that's stealing.

Now you understand. The real process of transmutation, the real process of life starts when the first step is, we go through the transmutation of the light. Not necessarily you'll see the light, not necessarily you'll feel the light, but you ?? ride the condition of the transmutation. Many of you say, "Oh, I had no feeling, I had no dreams." So shall be between your hands, no lights, because you're still passenger of the frontal belief. He's still that guy who gets the MaGrav and does not see the field of MaGrav.

So, the teachings gradually, as you've seen, through the test trials and the rest, is heading for. The questions of the scientists in Sharif Tehran University, of 15 years ago, what's next? (:52) We learned to fly, what's next? We made the shielding, what's next? I hope today I brought you a new headache. A beautiful headache where man transmutes and not man dies to become another point dust in the Universe.

I brought you the thinking. Now you understand you are happy with the seeds of the energy to convert in your body. Now you understand your breathing feeds the Soul. And it's that seed that attracts more from the Space. Now you feed the monkey. How do you feed the monkey in Space? In the level of the Soul, that even through interaction of its fields, can lead to the creation of the monkey, in essence of the emotion as a man. But inside, he sees himself, he has four legs, two arms and 20 eyes. Do I need this? This is my new look on the Moon. Can I have half of them blue, half of them yellow? One leg longer, but it makes it more attractive for the other one, Soul, which sees me like this.

The true cycle of life starts when the man learns about the transmutation of his own Soul, and then learns how to survive, how to exist, how to go through this dimension. I hope, those of you who understood, and you have already understood the transmutation, (:54) understand how to feed the monkey, the point, the time and the place, that the monkey does not die. Thank you very much for today. I shared with you some of the deepest knowledge's of the Creation, if you understood. Otherwise, it still it's that MaGrav. How much more energy can I get out of it? Is our physicality, how long more I can run it to live 100, 200 years? I want the "fountain of youth," where actually the seed of that fountain ?? the seeds ?? as the STM, within the body of the man. It's you, ?? who has not found it. We go through a break, then we come back, and we go, as usual, try to answer some of your questions. Are you ready Rick?

>> **BREAK** >> 510 KSW November 02, 2023 (1:00).

K- Yes, as usual. As usual, we'll try to make some announcement at this point, for Knowledge Seekers, what's going on, and what is in progress. For those of you, who were interested to come to London to the, any of the three seminars or sessions or whatever, we have different pieces of information for different ones. The first one, the most important one, which is the London conference for the ambassadors. We posted the invitations, cards for you, for ambassadors and other people you want to invite or introduce. And we asked you to send it to the ambassadors of your country and other countries in London, and then to the other countries around the world, to your ambassadors, to inform your foreign officers that there is such an event.

We are start getting, as the actual process of this started this week, we have already received a number of embassies, sending their ambassadors, or attachés, or other people. (1:02) So, the ball has started rolling, in past 20 hours, I think we received 3 or 4, and this is since I start launching it on Tuesday, Monday, Tuesday. So, please keep on sending these invitations to all the embassies, do not stop, till we see how many they can bring. And, you can even add to yours, you can bring with yourself, your scientific attaché, your energy, your agriculture, and your health, ambassador attachés. So, in your letters, not only invite the ambassadors, but they can say if they're (who) coming with, because some of the ones we see now, they say they're coming with such and such attaché or the others. You can make, if you let us know, it's still the same. It's considered part of the nation. We're trying to keep this very, very limited.

We targeted about 500 and we are looking around about 200, 300 with ambassadors, because something has happened in the event of past few days and couple of weeks, which has changed the course of the Keshe Foundation work. This is a, at a very high level, a very big change for the Keshe Foundation. And for that reason, we prefer to keep directly into the, what we call, ambassadorial level. If Knowledge Seekers would like to come, we can allow you, a number more to add. But, the ratio we have, is perfect for very powerful presentation. We have officials from the governments, who will confirm the technology of the Keshe Foundation to the other ambassadors. And it's a beautiful setup, now it's heading, we are heading towards that. The event is booked, as you've seen where it is. It's still you want to come, join us, but you will remember, this is the point when the humanity will change. (1:04) You will understand exactly why and how. We have officials which will bring a change. They are coming, especially appointed by the governments, to open the doors. And, it cannot be stopped.

Going back to the, the week function, from the 6th to the 10th and then the weekend. We set out to bring this to a beautiful memory. It's something I wanted to do. Those of you who came to Manchester event, I put you in the hotel where, brought me a lot of memories. It brought a lot of things as a businessman, where I spent my time in that hotel. Millions of dollars or Euros or Pounds for me was... took shape, business, lost, gain, whatever. But it was beautiful, I brought that essence to the Knowledge Seekers, this is where, this is my city, this is where I was born as a teenager. I learned about the life, I learned about falling in love and the rest of it, and fell in love to be a father in Manchester and the rest of it.

This time we, the event in London, as some of you who are attending it, have already received the information in the past 24 hours. I take you back to the same place. The same condition, and, but in much deeper, towards the science of the man. With the collaboration of London University, and the Principal of Queen Mary College, and the staff of the Queen Mary College, we have arranged one of the most strangest teaching seminars in the history of the Queen Mary. Those of you who attend, we still have room, another 3-4 days if you want to attend, (1:06) you will sit in the classrooms, or in some of the classrooms where I as a student sat. You walk the corridors, the buildings, where I was taught. And so, in truth, you become the Knowledge Seekers, in the classes of, in the classrooms of, every day is a different classroom, different building, the way it used to be when we were students, of Queen Mary College. You go back to University. And, we tried to keep this in a very small numbers, because, a number of the staff and professors and the scientists of the Queen Mary are invited if they want to join in.

So, this time you go back to the home, where some of the nitty-gritty's of the nuclear technology was brought in, and I thank the Principal of the University and the staff of the Queen Mary College, who made this, something they said has never been done. It's very unusual, but it's such an important topic. Nuclear Plasma Technology, which was born out of Queen Mary College, back into their, into the classrooms. So, if you join us, and those of you who have already registered, you're going back to University. But this time you'll be taught the science of the truth about the traveling by the fields, and surviving the field of the space and time. I thank the office of the Principal, and those who made this dream to come true. (1:08) It would have been easy to give this lecture in the hotel room, somewhere as we did in Manchester. And then it'll be, that's it. Tea breaks are yours, you have to go and find a coffee and tea. Lunch breaks are yours, you are a student, you have to go and find, go to the canteens, what we used to do. And live the life of a student as a man, and get taught the knowledge of the Space Technology.

It's important for us to understand this. So, if you join us, I think a few more places left. We kept this, we don't push it so much, we keep it to the minimum, that it brings that essence, and how it's done. Saturday and Sunday is a different event, and then on Saturday night, we have already set the scene to meet the world ambassadors and others, and dignitaries. A person flies in specially, to be present in the London conference with the ambassadors. He's not an ambassador, but influential to change the course of the meeting. So, now you have a full set. We kept it as close to our chest as possible, and

thanks, as I said, to University of London and the Queen Mary College. As they said, "This is the most unusual teaching." But for an older student, everything is possible. And have made it possible to become a reality of, literally, going back to school, going back to University. And it'll be interesting, what we learn this time in a week, that the student take three years to get the degree and come out of it. (1:10)

Please do not stop sending them messages to your embassies, to all the embassies. If you have already done last week, send the second one this week. And tell them, if you already decided, please understand how important it is. In nineteen seventies, eighties and nineties we went for a peace walks, this time, peace talks, through Internet. And, for you, to encourage your, what we call, government, scientists to join, and to be part of. I hope we have the pleasure of seeing the Iranian attaché, which is now, we don't have ambassador in London, they will, what you call it, represent the Iranian nation. We have invited the Israelis, we have invited the Belgians, we have invited, the only people we cannot invite, we cannot get the email of the ambassador of United States. Well hidden, I usually get access to this very easily, but I haven't tried. So to the team, you try it when you fail, I know where it's gone. But, see if you can get access to the American ambassador, and invite him in. And we do our part.

We expect to have two, three hundred people, no more, because the scene has changed. Do not forget, today I'm in London. I have arrived back, two days ago, from Beijing. And, we carry a huge message. Not only from China, but on other positions and times, and what will bring the change. Joining forces with nations to bring peace is paying dividend, and huge dividends for the Keshe Foundation. (1:12)

Many of you asked me, what we talked about, what is the position with Palestine. As you remember, we asked the Palestinians, we asked the Iranians to give refugees, then do not go into war, do not talk about attacking and destroying. And our officials confirmed, they have stopped it. As we see, Iranians have changed position since two weeks ago, and they keep on telling, "We don't want wars, we don't want any conflict with .. Americans." And, we stick into the same plan. Iran will not enter any war. But, what is the beautiful outcome of this? Because there are other things in the background, when we gave you, and we gave the information to the Iranians, to take the Palestinians to save. And Iran went out saying, they take the educated Palestinians to support them to finish education in Iran. We're left with the Palestinians, which at the moment, are getting hammered. And interesting is, Senate says, "How come the guns and the things we get to Ukrainian, has appeared in the hand of the Hamas and the rest?" We explained exactly how the Israelis gave it to them to start this. In a way, played a trick, and we informed the Iranian ?? leaders ?? to not move, and set back. But we've seen different alliances has been created.

But, something very interesting has come out of Israel. Now the Israelis want the Egyptians to give part of Sinai desert to the Palestinians, to all to be moved out there, that the Israelis would have the whole of the Gaza. And again, a lot of you might understand, there's a bigger game to this. Oil industry and gas industry has a huge things to do with it. And now they're talking that the British become in charge, which means they are sold

their land, their Gaza Strip and the rest of it, to the British Petroleum, to put one of the largest reserves of oil and gas. (1:14) Now you see how their hands are opening up.

So, we see everything is taking shape in a way it has to. But, there is one thing which the, as we say, Americans and Israelis did not count on. And, as you know, the Russians, the Chinese, always spoke about the most advanced hypersonic. And now we know Iran is in a position of the same. America thinks by 2027 they might be able to test the first hypersonic, in the way the others have. But, my biggest fear and my advice to the Iranian is, as the Iranian Foreign Office said, "We have many secret weapons that the Israelis will (do) not know." They've got the taste of one of the simplest one. And these rockets can reach Tel Aviv in less time, less than 10 minutes. And, to estimate, calculate it, what is set to come, there is 100,000 missiles, targeted, set, to go to Tel Aviv. How many of them can be intercepted, 100,000 cannot. And I hope we'll not come to that end, we've just done the advice of not such a thing to take place. But if worse comes to worse, anything goes worse, this is going to be the end of the, what I call, the beginning of the end for the American superiority.

It is taking shape in a very bad way, but it's taking shape in a good way that those who are pushing with peace we will win the peace. And we're trying to understand, (1:16) with the help of technologies, how this can be diverted, and how this situation will take shape. But at the moment, what we were promised by the Iranians, will not get involved in this war. And they know how the trap was set. We keep to the same position. But what we hear, and what we understand in the backgrounds, very soon, if things go to the worst, all the nations around the world will expel all the Jewish back to Israel. This is a very high possibility, it's taking shape, except Europe. If this happens, all the Arab nations will start refusing and, this was bullet shot, which yesterday, Jordanian government recalled its ambassador and told the Israelis, "We don't want your ambassador back in our capital." And now we see, this will start a situation which, in a way, will create a bigger mess than anybody thought. But, we know the outcome, we know what will be, it'll bring a, what we call, everlasting peace. It's the last ?? skirmishes between the religions. But we see what happens and how it will take shape.

As I said, your Soul can bring the changes for your physicality. Our Soul bring changes for humanity. And we know, we see, we understand the Totality and how things will take shape. But we have to see it, and see how man will play the game. (1:18) In any case, join us if you can, in London, but we limit the numbers to... We would like to have majority ambassadors, of politicians and diplomats. And the other thing is your British nationals, you should invite your Prime Minister, your ministers, your nuclear people and the Space people, to register to be in this conference. Because, we do not have an ambassador in England for England. So, it's your job to invite dignitaries of your country to this presentation.

Any question?

R: Just before we get into the questions, Mr. Keshe, I'd like to show you a document that I ran across recently. I'm not sure even where I found it, but it's from the records of

Hansard of the UK. And ... let me just ... share here, so I guess you can see it there now. I'll make it a bit bigger. It's interesting because this is the... Some people have a hard time believing that Queen Mary College even had a Nuclear Reactor, and that you were involved in a nuclear reactor program and so on, because they don't have a nuclear reactor program now, apparently. So, it's, you know, people look it up and go, "Well, they don't even have a nuclear program." But, this is the actual document from the legislature, when they made the decision to go with the research reactor, the low-powered research reactor. (1:20) This is in November 1960. So, that's quite a long time ago, about ... you know, 60 years ago basically.

So, the Mr. D. Price asked the Minister of Power, whether he has approved the grant to Queen Mary College, University of London, of a license to install a nuclear reactor under the Nuclear Installations Licensing and Insurance Act, 1959? And Mr. Wood responds, "Yes, I recently sought the advice of the Nuclear Safety Advisory Committee about installing low-powered research reactors in the range of 10 to 100 kilowatt thermal on urban sites. The committee has now advised me that so long as the site housing design and operation of the reactors fully satisfies certain basic conditions, These low powered reactors can safely be permitted in built up areas. The Chief Inspector of Nuclear Installations agrees with this recommendation and has advised me that the Queen Mary College project satisfies the necessary conditions. I have therefore approved the issue of a license to the College to install a 10 kilowatt research reactor on a site in West Ham."

K- Yes, yes, yes. This reactor was put in the basement of the Queen Mary. The whole area of the nuclear engineering department. The floor-wise was not more than 100 square meter to 150 square meter. The original reactor was about 6, 8 meters below the ground, where we could stand on top of it. (1:22) And the control room was about six meter above it, about another six meter below the surface, ground surface. And then you had the University, what we call, lecture rooms above it. This was round about mid nineteen seventies, this reactor was kept, and then there was a lot of opposition, "How come there is a nuclear reactor right in the center of the University, right in the center of London." Then, mid seventies, they decided to build a reactor site about another 5 kilometers or so by a brook or a river, further up towards .. , towards West Ham, because there is a unused area. And they built a building. and they moved this nuclear reactor from the basement, with a lot of "rase matase," to the new building. Where actually, I think it was moved in 1976, 1977, or that time was built. And it was just a couple of years old, when I joined the Queen Mary College. And we used to get a bus, a mini bus, from department to the nuclear site, and you have to have permits and all sorts of other things, all fenced up with everything else, which is normal with the nuclear industry.

And, if Queen Mary would have kept that reactor. If Queen Mary would have kept this reactor... Just go back to the picture, and you'll, just go back to the picture. Is this the site of the new reactor or this is the old reactor, which was standing free? The new reactor was dug into the ground. (1:24) And, when you look at those, like windows in the background, these, they became the computer rooms, where we used to punch cards, we used to take in there over a bridge. You should see a bridge in the background, where we go into the control room, and then, when they took the nuclear reactor, this control room

became where I, his top secret computers are running the data on research from British government. Because, this is the old, this is the one which is on the basement of Queen Mary College building.

The new one was on the ground level, because we used to go over it, we used to lift up the concrete blocks and all sorts of funny games we used to play with it. Well, in 1981, partially, I did a, what we call, my thesis, on the leakage of the nuclear reactor, into the environment, beyond the boundaries of the reactor, and by completing this thesis, we hear afterwards, in 1982, the reactor was shut down, because it was proven that the reactor field radiation reaches beyond and within the public. And immediately it was shut down. But these reactors are very... used for high-rich Plutonium. We could see how fast we can produce Plutonium, then enrich Uranium, but they use plate system. It's like a, what you call it, like a toast. Long pieces, very narrow, Aluminum mixture, some of it. And, we used to change the plates. It's like a toast rack. And, we used to change one toast, we used to call it like, (1:26) with different enrichment, and see how much radiation increases, what's the critical position. And this is the history of Queen Mary College, it's not there anymore, they closed it.

But the British nuclear technology is much, much advanced now. They don't teach first graduates, they go directly into PhD and research. Because now they're building these new reactors, which is a PWR, Precipitation ?? Reactors from the American style. And, when I used to work with British Nuclear Fuel, 40 years ago, we designed safety systems, to be about 10 kilometers from the reactor, that if it blows up, we still have control over it. And the first design of this came after "three mile-Island." And I was involved in the first stage of designing the safety systems for the reactors. It's got a lot of memories. You put something else up.

R: Yes, this is the final report on the decommissioning and de-licensing of the Queen Mary College Research Reactor. I think this is the one mentions the original operations were carried out on the critical assembly at Queen Mary College in Mile End Road. It's mentioned as the former laboratory buildings are now being converted for non-nuclear usage by another faculty of the College. And that the... it was licensed by Nuclear Site License number 21 issued on the 24th of December 1963. The assembly being taken critical for the first time on the 10th of August 1964. The facility was shut down in October 1966, (1:28) in preparation for the transfer of the main components to the new Queen Mary College Nucleonics Laboratory in Marshgate Lane. And the site was completely cleared and the license surrendered on the 10th of March 1967, and the licensee's period of responsibility was terminated on the 16th of March 1967. So, I guess that's the original reactor that they're talking about there.

K- Yeah, it's a big hole in the ground. And, only people who are doing research in nuclear could go down, but it then became an empty space. They started doing a lot of research on plasma. That's part of the CERN, of operation that time, pre-CERN situation. Hmm, brings back some memories. I think the building is demolished now, I think they built something else on it. We'll see it when we go back. I went there a few years ago, two, three years ago, I can't remember.

R: Okay, I thought you'd like that blast from the past there.

K- I didn't see this was, by the time I got that, this was removed. We just had the hole (in the ground) ...

R: Yeah, this is actually, this picture has been removed recently as well. They used to have it on the Queen Mary College website, like you could look through and find it. I don't think it's there anymore. I think they wanted to kind of erase that part of their history.

K- Yeah, but...

R: You put a nuclear reactor in the middle of a city?

K- Yeah, because don't forget what's the same with Los Alamos. (1:30) We did not realize the power of these things at those days. When you read the history of the Los Alamos, originally when the Americans stole everything and ran away, they were so busy testing, they had these drums, and radioactive materials were in drums, in the corridors, in the rooms of the scientists where they were testing. Nobody, in reality, before the nuclear warheads, and even during the Second World War, and years after, realized the danger of these things. You read about the history of Los Alamos, they used to keep nuclear material, plutonium, whatever, in tanks in corridors where they used to walk. Sometimes they used to eat on these drums. They sit on them and chat. And there's a very good book about the life of a lot of people in Los Alamos. I read it when I was a student to see how ignorant we were about these things.

Now, nowadays you can't move anywhere. Everything is changed. But the beauty of it is, now with the technology we have developed, we can empty these nuclear reactors of the material remote. We don't need even to be, ... hundreds of kilometers away, we can literally empty it. We don't need to be... when it comes into positions like, let's say Fukushima, remote you extract the nuclear material from the site. We don't need to live with it for hundreds and thousands of years to come, and contamination.

This part of technology will be completed, (1:32) I think in about twelve months, two years. Where we, we have the technology, we have tested it in different ways. Now we can go into practicality of remotely, what you call it, depleting runaway reactors. Remotely depleting nuclear warheads. And not worrying about the material. One of the biggest problem between Russia and United States, in the nuclear industry, when we signed it now, the treaty has been de-ratified, I hear, by the Russians in past few days. They will not participate in nuclear arm control anymore, and it's getting worse in that direction, because of the problems in Ukraine.

These Americans are paying huge amount of money to the Russians, to decommission every single nuclear warhead, into safe level, because it's not just taking the things out, you have a lot of contaminated materials, you have a lot of contamination, everything is

literally raw. We have developed a technology that, we leave the rocket, even in the silo, we can extract the nuclear material out of the warhead. They still have a warhead, but now has no nuclear technology .. material in it. And we use this material for peaceful application.

It's one step in demilitarizing a lot of zones. And one of the things which is a problem is, what we do with the nuclear material, we're going store it. (1:34) The technology we developed, it makes it useful, into operation of the next generation of the Space travelers. Very interesting picture.

Q: ... Will our scientific textbooks be rewritten and new laws of Universe and science will be taught with the implementation of Plasma Science and Technology?

K- Pardon, can you repeat that?

Q: Will our scientific textbooks be rewritten and new laws of the Universe and science taught with the implementation of Plasma Science and Technology?

K- Oh, it'll be arrogance to say that we are the end and everything else. We are adding to the knowledge. And we are extending the knowledge, so we're not rewriting the books. We are adding to the books, adding to the knowledge. (1:36) And seeing how it takes shape. We cannot separate the new knowledge of us, from what we had before. Because all the time we go back to it.

When we change the dimension of physicality, we go back to it. We need it. How do we boil in one position, what is the wind velocity of our Soul, when you change the physicality, are you going to manifest as a feather, and where are you going to land? You understand? So it's a two-tier job. It's a two-tier work. And one is the dimension of physicality, one dimension of energy. And we have to keep it up.

So, we are not rewriting the books, we're adding to the books, we're adding the knowledge. But the knowledge we didn't have, is like, if what you put it is just, now that we found the work of an engine, we have a car, we get rid of all the donkeys. No, we still have a donkey, we still have horses. We even measure our cars and how many horses it has. The car has 100 horse power. Which horse, and what did the horse eat and what was his power? All the horses are not the same, but we still refer to it. So, we haven't finished, it's just we are a amalgamation. We're not rewriting books, we are adding to the knowledge. It's a big difference. (1:38)

Any other question?

Q: ... Hello Mr. Keshe, in the past few days there has been a heated, but inconclusive discussion on an issue in the Chinese Keshe Plasma studying group. The question is, Does the bombing of each other by Israel and Hamas, which has resulted in a great deal of death and suffering on both sides, especially in the cities of Gaza, bear some responsibility for an ordinary citizen on the other side of the Globe, who is seeking to

elevate his Soul... Now we are discussing a situation where one side believes that this person has no responsibility whatsoever, that the responsibility lies solely with the planners and implementers. And for him, that all he has to do is to pray for world peace. The other side believes that there is some responsibility and the implementation of this responsibility is mainly to look at himself, to see if he has the mentality to harm others, and try to elevate his Soul, and then go and influence those around him to achieve peace. Can you help us to provide some guidance?

K- I... this is a very broad, what you call it, question and broad answer. You can, all of it, you can do all of it together. It's not one thing or another. And, you can elevate the Soul of those who are in it, you can elevate those who are fighting it, (1:40) you can do all sorts of things. It's not anymore, this works or that works, or can we do that?

R: And that can all be done from the other side of the Globe as well, that's not a problem?

K- You can do it from another Universe, forget about the Globe. There is no time and the space and position when it comes to strength of the Soul. And it all depends what the wish is, and what you want to do, and what is your target to achieve, and how would it change.

We got to realize, when I look at the situation, in the long run, man will come to understand, maybe in next few years. What we see in Ukraine, what we see in Gaza Strip. It's the religion, you know when you see the last kicks before the body dies. It's the last kick of the religions. Doesn't matter which, Christian, Jews, Muslims. And if you see it, they have a common denominator, they have brought Russia to play on both sides. They have brought the Iranians to work on between the Christians and the Arabs. Then you have the American between the Jews and the Christians.

Interesting is... which I put this question before. (1:42) Why these people all fighting for a piece of land, through sentimentality of somebody was here, or somebody was sent here, be it Moses, Christ, or Muhammad, or whatever. This is, if somebody like, try to get rid of the Jews, you call it the Holocaust. You try to get it off the few Muslims, you call it the Gaza Strip. You try to get it, fight ?? Christians, you call it the Ukrainian war. If we try to discourage them, then there is somebody who is doing against us. But if they discourage themselves, and gradually come to the point, it dies.

The... I was talking about this, couple of days ago. The world is getting ready for manifestation of Methi. And the old have to diminish and demolish themselves for that to appear. And that Methi is a man's understanding of his own Soul. Not the man, not a person. And then, we are getting to that point.

As I said, the funniest thing is, or the most important thing is, when people like Ayatollahs and Rabbis and Popes, they themselves succumb to be, to understand this position. And they will put their turbans and their hats and everything else down, and they'll move away. It's not just the Christians arguing each other, it's not just the Muslims arguing with the others.

If you go back in the history of Iran, recent past history of Iran, (1:44) in past 40 years since the revolution. Look at the position of Ayatollah Khomeini, look at the position of Ayatollah Khomeini. When you look at the position of Khomeini, within the first three or four years, anyone who helped him to come to power was executed. They didn't just kill the Shah's supporters, they killed the people who brought them in to become rulers. Anyone who was on the highest level, they even killed their own children. Give the power. Read about recent past years of Iran.

Ayatollahs killed their own children, ordered them to be executed. The... those who sat, you see a picture of Ayatollah Khomeini, coming to Iran on a plane from Paris, look at there's a guy sitting next to him. He got him executed, and this guy put his life to bring him up. We see the same thing with the Vatican. They're all killing each other inside the Vatican City. We see the same with the Christians, same with the Jews. Jews are doing it in the worst way. So, it's rotting from inside, and now is peeling over to the others to rot. And then it comes the position of understanding, the manifestation of what they call, ?? Messiah, whatever, which is the STM, man himself which is ?? not known. And then we'll see the change.

And then we understand how we can elevate the Soul of the others and how these things will not happen. It's the time for Methi to come, for Messiah to come. But that Messiah is inside every man, (1:46) it's not a man to come to us. And then, when you reach that point, you don't accept any of these Ayatollahs, because you'll ?? be enlightened to the truth. So, you can remotely do, remotely do, and you can do it from anywhere in the Universe. You don't need to be on Earth, or to be on the, in this world, on this planet.

Any other question?

R: Thank you for that. Let me see, let's go to...

K- You know something very interesting Rick, even if they got... Even if God appears Himself and He says, "I'm God", and He shows everything which is supposed to be shown, Ayatollahs will deny it, because then they can't rob and kill for it. Rabbis will do the same, so does the Pope. So, as long as these people exist, Messiah will never come, because they deny everything, because it's going to the (end)... to the robbery and killing and abuse. So, the man who knows, if he accepts his job is finished, he will never accept, would he?

But, if you believe, understand the work of the Soul within yourself, you walk away from these people, these people have nobody to be there to support. And that's the job of the Knowledge Seekers, to enlighten the Soul of the others. that by enlightenment they walk away from it. And these people have nothing to do. You have in the history of Hitler, they call it the night of a thousand, the night of a thousand knives. He killed a thousand of the people he used physically, sexually, in the German army in one night. (1:48) He killed all of them, except the one he loved a lot, personally, because he had a long

personal relationship with him, physically. And they gave him a gun. They said, "You do it yourself, or, I have to do it."

We have the same thing in the recent past, in the Iranian Revolution, that they killed hundreds of Mullahs in the same night, across Iran, by the order of the rulers. Repeat of the same. So, we have the same thing in the history of Judaism. We have the same thing in the history of Christianity. So, the best thing is to find that Messiah within yourself, and then you don't follow any of these, they have nobody. When you go to a mosque and there is nobody there to listen to, to you, you don't go anywhere, it's no use.

Any other question?

Q: ... Can your Soul talk to you using words?

K- I presume so, yes, because that's the only way you can communicate, I presume yes. You want to see it as a light? You want to see it as an image? You want to hear it as a voice? You want to feel it as a touch? All depends how you want to accept and what you believe in. To see it, to understand it, or you call it premonition, or whatever. But yes, you can. But how you hear it. Go back to the teaching of last week, I said, when you fall in love, loving someone, (1:50) then you understand the difference between the love in the dimension of STP and the STM, even though is loving of the same thing.

Any other question?

Q: ... Yes, mine is talking to me even using hand signals.

R: So, I guess that's a different language other than words. Perhaps the Soul works more with images rather than words.

K- It depends what we... how much we are physical and how much we are emotion. If you understand the emotion, you do things you don't need to see. If you need to see something, then you actually need an image to believe to do. If you more or less work with the emotion, you work with the back of your head, if you work with the physical dimension, you work with the front side of your brain. We see that in our systems.

Any other question?

Q: ... I need certification from the Keshe Foundation to sell Keshe Plasma products in my country of Nigeria. Who should I contact? I have Plasma antiseptic soap, Plasma cream, Plasma patches and Plasma insecticides.

K- You have, you have, you have to do the certification in your own country through the structure set by the nation. (1:52) We do that, when we launched these... even Gans's for the trials in China, if I remember correctly, we had to get our Gans's certified to be used, that it is usable in use. When we did in Ghana, when we did the water, ?? Plasmajis, they

all had to go to FDA approval. Keshe Foundation cannot certify these things, it's your National Government structure, you have to know (go to).

R: Okay, so assuming that he could get certification for say, a plasma cream or some product, what would be the next step?

K- If you get it for example in Germany, you cannot use it in Nigeria. You can even get it in Ghana, you cannot use it in Nigeria. It has to be accepted in your country, and you go through the usual certification.

R: So, what about the use of the Keshe name involved with that process?

K- We would like it to be accepted, to be ratified by us, yes, to give you. We have this now, situation coming up in one of the countries we are working. Where they wanted us to do things and I said, "No, you're a government." We develop the technology, it's in public, people copy it. You are the government, you enforce it, if you don't want it to be copied, and all the benefits comes to government, only tell people you use it, you pay percentage to the government. It's becoming a head-on collusion about this, with the governments, and their income, and patents, and the rest of ??, and you see the patents are useless. (1:54)

But now, they didn't mind using our technology. Now they sit with us, they want to protect, because their own benefit is in it. Up to now it was Keshe Foundation use, no problem. Now, they are involved with it, they're coming up with a lot of things to me. And I said, "Yes, I'm listening." We are technology developers, we are not into running businesses.

Any other question?

Q: ... Can CuO₂ as Copper Oxide Gans water be taken orally in large quantity without harm? I want to use it to fight infections.

K- Go through the medical side, we don't ?? get involved in these things.

R: Okay.

K- First of all, all the rule is, never touch. Never touch, never drink Gans's. Never ever. Gans water is a different ballgame, but the Gans's no... I met a very senior, very, very senior government officials, at the highest we can get. And he was so carried away, with some new materials, that he actually digested it, and he is critically ill because of it. (1:56) You never touch high energy things.

You got to understand, I explained this before, but you have to understand the comparison, it doesn't mean that it's exactly what it is. You take a boiling water and put it on your hand, or hold a cup with it, and let it go. You see, you... forget about burning, we're not talking about it... How much heat is absorbed by your hand, how much stays

that heat and you feel it. It's the same with Gans's, it's the field strength. It doesn't create a burn, it doesn't... but the energy... energy transfer is so high, that the Soul doesn't need it, the physicality doesn't need it, and that's where you hit the problem.

Everything in moderation. And, Gans's are not to be drunk, Gans's are not to be put on the skin directly. In a very recent research, we will release this in the ... , with the ambassadors. We will show some technologies, some data, which has never been seen in public, and it will not be, will not come out of the conference. But, technology development shows us what the pattern of the ?? use is going to be in the coming time. (1:58) So please, never, ever consume.

Any other question?

Q: ... Good morning. Through His example, the Creator teaches us to serve, to serve wherever we are, regardless of the situation. Is serving unconditionally, positioning our Souls to serve the common good for the good of all Souls, the nourishment for our Souls?

K- What?

R: Is the act of serving unconditionally, the nourishment for our Souls?

K- What do you mean?

R: Well, I guess he's asking, if you position yourself to be of service for the good of all beings, or of all Souls, is that a way of nourishing your Soul? That unconditional serving, is that food for the Soul?

K- Yeah, the thing is, it depends what you call serving, huh? And how we serve. (2:00) You do ... I presume sitting in the corner and praying to elevate will not work. The process of elevation comes in tuning, connecting, to be able to give.

Two magnets physically, in distance from each other, are connected, but cannot affect the other one to move. Till you bring them close, till you strengthen the link, or bring them close together, that they can interact, can influence the other. And this is the same in the man. You have to target the Soul. The Universal Council team did this a few times, where they connect with the Soul of the world leaders, and we saw the changes. This is how you have to do it. Target practicing directly, in every shape or form.

Not giving like that, ?? you know, ?? I want to ?? the guy told that he wanted to move the cup in the classroom (in Italy). Make it available, that if you need it, it's there for you to elevate, that it's there to take. The difference between me and you moving a cup is very big. I tell the cup, the Soul of the cup, it will elevate my Soul, it will give me pleasure, if I could see that your Soul moves. Then with the cup moves, or then just me pushing it, kicking it, or throwing it to be moved. Or pressurizing with the brain, move, move, move. (2:02) And then you see it is. And how it works, I explained this many, many times.

R: ... What is telekinesis? How to communicate with the material outside, and charge it so that it wants to perform the movement that is convenient for it?

K- What does that mean? I don't understand this. I think most people are somewhere in different ??.

R: Telekinesis is being able to move an object, like what you were talking about, basically, using your thoughts or emotions or something by changing the fields or some way other than physically moving it. So, how to communicate with the material and charge it, he says, "charge it", maybe means change it. So, it wants to perform the movement that is convenient for it.

K- Hmm, I don't understand how we can answer this.

Q: ... Sometimes I practice on the ?? PSI wheel, and I manage to feel the paper on the needle, and I know that it will move. I feel it, and the paper moves. (2:04) I would like to understand this process.

K- Try to understand how you move, how, ?? when (what) it moves, in which way. Is it emotional or is it physically you want to push it, or does it move when you use the emotion? Very simple.

Q: ... Hello Mr. Keshe, how do magnets interact with plasma?

K- Very much so. We see it, we... you see it very, very easy. Because plasma is a... has a matter state field strength to, that it matches with the magnet. We developed a technology to do this. We have a technology in the Keshe Foundation, which we see the movement of the magnets because of the Gans's. It's a way to do it, and we use it to assist the strength of the fields. (2:06)

Any other question?

R: I'm trying to find another question, we don't have any hands up here. And not seeing any further questions.

K- That's good, that's very good. Hopefully... We'll try to see what we can do, we... next week, hopefully on Thursday, as we did the last time. You'll join us with the Knowledge Seekers from the classrooms of the Queen Mary College. And those of you who want to attend the London Conference, you're quite welcome. And some people tell us, "These are very expensive." It is expensive running this and we even, by our estimate of how much it cost, is more or less doubled. And, we still carrying on with the work. And we are carrying with what we estimated, that it will be total cost, but in occasions doubled and tripled. But we ?? wear the cost, we'll survive and we have to bring this position to, what you call it, (2:08) to an end with the governments. And then we'll see how far we can go. And how far we can push the pen of peace with the pen of new technologies.

If any of the Knowledge Seekers would like to support us, that that burden of running this conference is getting heavy for us, you can help us, by donation. But, we have, I've committed to this, and I have to complete it. It has to be done. It's not for us, just because we are Knowledge Seekers, it's for our, it's for the whole of human race, in the long run.

It won't be what they told you, the Messiah will come and it will be land of milk and honey. Try to see how much milk and honey you can drink and eat, and if the Messiah has come for you. All that milk and honey is the knowledge of the Creation, not milk as from a cow and honey from the bee. And this has to, this peace work has to take shape. It's a commitment to the lifetime of work and how we use this to elevate the Soul of the ?? whole of humanity and beyond. (2:10)

As I've said, we haven't come, many times I've said, we haven't come here to bring a new shape of a school or a new engine. We've come to change the whole structure of the society, humanity, and the rest of the creation on this planet, to stop killing. But, that the last step can start.

But, you see... You see, when you bring a wrong child, or you bring your first child up the wrong way, and the others learn his misconduct, or from his misconduct, we have the problem with Moses. And we still see his friends and followers follow the same path. And that disease has been passed on to the Christians and the other children of the God, Mohammed and the rest of it. And to change this, we can't ?? fully do that. But you have to come to the point that you change, not us. In the teaching of past few months, or the past few weeks even, I explained that many, many Jewish boys and girls are walking away from the religion. And when they're done, there is nothing left, it'll be just the name of it, but more and more of it. More and more understanding. And it's the same with the others.

Once... The religious leaders will not change their tune, (2:12) waiting for Methi, waiting for others, and they'll be ?? hand over, is Methi, whatever. As there is no more for them to rob and steal from. And we will not find many Gorbachev's. To save a nation, he moves down as the head of nation and opens his country. We won't see Ayatollahs, or Rabbis, or Popes walking away and saying, "That's what it is, this is the evidence." ?? how man matured, has to find his own, what you call it, maturity, to find his own Messiah, and they will shoot everything else out. So, it's for man to mature inside himself, and with that, walking away from all this, this stupidity of man. And the same with the animals, it's the same with cats and dogs and lions that still kill. Man has to create a field strength that it touches every being that do not need to kill.

In the conference of London with ambassadors, for the first time we show this. For the first time we show how we convert things in video, physically, it's not a talk. We convert things that you do not need to kill. Animals don't need to kill. Even if it means working with government to place in satellites, to produce the condition. And we have videoed it. It's how beautiful it can be done. (2:14)

So, as I said, plants does not kill, but creates a condition that brings to it energy, in the level that it can absorb, and in the level of the amino acid of its creation. And now, we have achieved that point. We will show the governments, through their ambassadors, that the new era for development of the man to the next level of understanding his own creation has come. And it's for them to do. And this is the process which has started and it will become extensive, extensively, extensively, in the next few weeks, to the conference in London. And we try what we see and what will bring us to that point. No one will be left untouched. And no one will be given unconditional position that they can come within the knowledge of the Creation and don't change because of it.

Thank you very much for today. And I hope in the first part I have brought you home to learn what you need to learn, what is the next step of the work, for you to become the Passengers of the Universe and not lose the life of the Soul, because you're responsible for it, and in how we can collaborate and cooperate. (2:16) And we have to come to that point, and we have to mature to that point.

Thank you very much for today. And hopefully we meet each other with the other Knowledge Seekers from the classrooms of the Queen Mary College University of London, next Thursday. Back to the school. Thank you very much Rick. And don't forget, if you can support us financially, as the ?? (costs) of this conference have become very heavy for us, After losing so much, we'll be appreciating it. It will help the Foundation a lot, to carry on with its work. Thank you very much indeed, see you next week.

510 KSW November 02, 2023
