

512th Knowledge Seekers Workshop November 16, 2023

(Transcription, Editing and Proofing done by KF Brazil))

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:14)

K- Yes, good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you to share your knowledge with us, and we hope we share it with you. And how we can expand and extend the knowledge.

In the sessions which are coming up regarding the transmutation and about the light in the hand, which will be in a couple of weeks, I think it is on the 24th of the November, we try to bring a lot of understanding in what it means, and how you transfer, and you transmute, and you bring, in a way, light in transmutation.

As I've said in teachings before, and other places, is all these tests we do, (:16) all these criteria of showing the light, addiction, emotion, and everything else, is to give you the confidence, for you as Knowledge Seekers (KS), to attain confidence, in what you have ignored during the process of your life. It doesn't matter how old you are, you could be a 10 year old, you could be a 100 year old, or 60 or 70 year old. You have forgotten the essence of Creation, what is in you. That's what the essence is, that's what we can do.

So, we started months and months ago, and years and years ago, we introduced you to the metals and the Gans's and the "magic" liquid, which was on the Internet for years. What is this liquid? And then Nano coating, and then Gans's and now he will do, and when he produce Gans's and Mr. Keshe has jumped again from Nano coating to gases to Gans's. And now he's gone into the, what we call, the Spirit and the Soul and we become a cult and the rest of it.

It's all the process of transferring and transforming. When you want to see the God, you don't expect a UFO appears and God coming out of it. I don't think any of us have reached that level of foolishness. We don't expect God to manifest in front of us, "I am the God" and says, "Oh if you are God, do this and dance and put that on your head and the rest of it." In the essence, we feel the beauty of Him within us. In essence, we see, we feel the emotion of His presence, as a light, as could be emotion of the feeling of in any shape or form. (:18) Depends what kind of God you believe in, that, that God in that shape makes you to believe. That is God.

So, the whole process of the teaching, coming to where we are now, is in essence to show you, for you to trust in yourself. In understanding what this is within me, that I have ignored. When we are born, we are ... And then, when we grow up, we know the love of the mother, the love of the father, and then the siblings, and the people around us. Till we

come, maybe, in a position and a process, to a point of physical maturity, that our heart can take what we call the Spirit, the Soul of Physicality (STP), in the dimension of the maturity of the cells, which combines with creation of another Soul, that we become mature to reproduce. And then, for the first time, we understand the beauty of loving someone. And that love, when it touches us, super-passes the love of the mother, the father, and everything else we knew up to that time. We fall in love with another creature, another man, another woman. Doesn't matter what gender is, (:20) but we devote our life to it. And we stand a lifetime, because we felt that love.

It's the same when we touch the love of the Creator. When we touch that love, when we feel that love, when we understand the essence of the fields of it, nothing is compared even to loving the lover. The way when we mature to love another person, and then we fall in love. And the love of parents and the others never matches. Now when we touch the love of the Creator, even the love we felt in the physical dimension of another being, it just is irrelevant.

And then, we come to find out a way to get to it, a way how, a way to get to that, that ultimate love, which is the love of the Creator. We cannot take a UFO to go to it. We cannot drive a car to it, a rocket propulsion to it. And, in a way, the teaching of past few months, couple of years about the Soul, is the transportation a way for you to transport, to reach, to get to that point, to mature from dimension (D) of physicality, dimension of the Soul, and fall in love with the Soul. Souls still interact, they find maturity. But, the ultimate goal is to reach the Soul of the Creator. To that level of purity.

So, I cannot build you a Gans reactor, (:22) I cannot show you a lift and motion, and I cannot bring you a massive UFO, this is the one way traffic. This UFO goes to the Creator. He has no form, for us to go to see. And now you understand, what is the purpose of the teaching. We start teaching you slowly, slowly, in Gans's, in confidence in Souls.

In 25th of November, in seeing the light, that I can become light, I have that energy, I am very much like that Gans, hidden within me, power, that only has, can manifest itself in a dimension, time and position, but in essence as an energy, has direct connection to the Soul of the Creator, to essence of the creation of the Universe (U). Now, maybe, some of you, in the time to come, to understand why we introduce the teaching about the Soul. In a way, it's not for you to see the light in your hand. It's not for you to transmute, to go from A to B to Mars, blah, blah. It's in a way, if you can reach that point, gain confidence, understand the work of the Universe, this is your ticket to your Creator. But, you have to buy the right ticket, and you have to get on the right track, on the right length, on the right strength of the field, to reach. That is what we call, the ultimate goal of all the teaching. (:24)

And as I said before, the ultimate book is the magnetic field. We always said, we write nine books. The book about the magnetic field is about the light in your hand. It's about the light, it's about the way, the highway, the motorway, whatever you want to call it, the path to the Creator. It's not that where the Creator came from. It's for you how to get to

the Creator. And you cannot just go and say, I did. Maybe a child at the point of birth dies. Soul is so pure that reaches the Soul of the Creator dimension of the strength. And maybe a man, as a priest, praying all his life, by his behavior, become furthered from the point of his birth, backwards, than forward toward the Creator. As we've seen with (Pope) John Paul (II). In a way, going further than being closer.

Now we understand, what is the purpose of these teachings. You want to go instantaneously from Washington to, God knows, New York, from Beijing to this and that, to go to planet Mars and Moon and another Galaxy. This is still, this is still fallacy of behavior of the man, in not understanding the Totality, the truth about the teachings. We hide it, and step by step, take it further. We hide it in the teachings in different ways. But the essence of the totality of the teaching, now that you have become matured, is not just that light in the hand. (:26) If you can make that plasma, and if you can understand within it, has the essence connection to the Creator. I wonder if you still want to see, if I can see the light, if I can make a orange out of it, if I can do something else with it, or look in it, through the Soul of the Man (STM), through the eye of the man, with the STM, and within the palm of your hand, reach the strength, understand the complexity of the situation, and reach the Creator. Find a path about the Creation.

Those of you who are so physical, you still look for the light. Those of you who understood the maturity of the teaching, you'll find a way to your Creator. And all this needs you to gain confidence. All this needs you to understand the Totality. All this needs you to comprehend what everything is. You're like impatient children, standing next to mom, mom promising you a cake, and then just wanting the cake. Doesn't matter. But what does the mom do? Brings the flour, brings the milk, and the water, and the sugar and the ingredients and start mixing step by the time. First, butter with the flour and then adding the milk and then kneading it. And this is what I've done with you from the beginning of the teaching. We brought in bits of cooking.

The principle, the whole interest was to go in a UFO and fly, (:28) and be able not to use fuel. So we produced a flight system, as you saw, and has now become the practice of the Iranian Defense technology. The gases we used, but hidden inside the gases, we used to release the energy of the plasma, in dimension strength of the gravitational magnetic field of the Earth. Then we introduced you, we brought another piece on the table, while you're watching for your "cake" to be ready, with the Nano technology. And then we brought, that what we call, what binds everything together, like the milk, that it can now become a dough, in Gans technology. And now, you smell, you have the odor of, "Mmm, the cake is getting ready." and we call it, the STM. But, the essence, the final part, is to put it in the oven, to test it, give it the right temperature and wait for it, that you see it going through its transition and become the cake, which is the reaching the Soul of the Creator, understanding the process of the Creation. And as the English say, "The proof of the pudding, or the proof of the cake is in eating it, to see how delicious it is." Or, by mistake, mom put salt instead of sugar in the cake.

This is the stage where, even through the dimension of the STM, in seeing the light in your hand, you come to understand, if you still feel the taste, or the sweetness of the cake.

Hunger to reach a physicality confirmation, (:30) or maturity to find between your hand, in the dimension of the path to the Creator.

Go back to the teachings, years ago. When I explained, if you want gold, you create gold between the hand, and if you were an orange, you create an orange. But this is just because you are physical. But as every plasma which is created has an essence line of connection to Creator, those of you who are matured, with the thought in that light, I find the love to the Creator. The ultimate goal, the ultimate function.

And many of you on the 24th will fail, because, the STM, cannot see the maturity of the essence of the man, to see the Creator. Some of you on 24th and the training which comes after it, how to become a driver, how to push the levitation, will come to see the light, and you fall in love, with the love of the Creator, the beauty which is in the hand. You don't look for the light, you don't look for the orange and banana and the gold. And then you understand, the whole purpose of teaching.

When we go through these trial and ?? tribulations of teaching you about the light, our goal is not for you to see the light. Our goal is to set the scenery for you to understand, and if, if you're pure enough, you will see in the palm of your hand, in the essence of the emotion, you'll feel the love of the Creator. And then, my teaching is over. (:32) I came to take you home. And you're like a flock of sheep's. Seeing which one I can get through the gate to bring home, and which one of you is still running around, in the mountain, hill, keeping busy, with eating what you're not supposed to eat. At the end, all the sheep's will go in. And the end, as Knowledge Seekers (KS), and the humanity, you'll find the path.

So, when we talk about the light in the hand, when you see it, I wonder you're still looking for the light, or you look for the path to the Creator. And then, if you mature enough, you bring that light, to become part of your Soul in the dimension of the physicality (P) and light. Then you have reached eternal life. Because, then the STM, is in love with the Soul of the Creator, and the dimension of physicality, is the intention of the emotion.

Then, I hope, much sooner than later, you as Knowledge Seekers, one by one, step by step, will come to see the light. You become part of the light. And as I said many years ago, when the candle was put in front of me, to look into it, look at the light, I said, "I am the light." (:34) Maturity of understanding does not come by the age, maturity of understanding comes by the purity of understanding the process of the Creation.

So on the 24th, you decide how you come in, and then you decide what you have achieved. You see you still love the mother, you see you still love the lover, or you see if you've fallen in love with the ultimate Creator of love Himself. And then we carry on, we keep on going till more and more of you reaches that point, till you feel the fields of the Creation. Then you feel the emotion of the Creation, and then your process of the journey just starts. Because when you fall in love and become part of the lover, the next process of generation, the creation of the Unicose become part of the existence. Then you

understand the back pages of the Book number 3. And the whole process starts again. Till one day, in billions of years, you become part of the life structure of another creature. And in that process, you'll fall in love. And then you try to see, if this time, I can find my way to the Creator, to myself, as I am the Creator of me, and me is the Creator of it.

Now, let's see how many of you, on the 20th of November, (:36) will come to that point, to see the light, or to become the light, to enjoy that I can create a life, or to enjoy that I can create the light. To find a path to the process of the Creation, and become part of it, to become essential part of it. Then, as I said, we have come, or we become, to the final point of teaching. But this process will take years and years, as the man is not happy with it. The man is still in the doldrums of the physicality and the rest.

In the following teachings, the following sessions, I will show you how to become part of the light, once you've seen the light. Because those of you who understand and become part of the life, you will not hear the teachings anymore by voice. You'll feel the teachings through the Soul. Through understanding of Totality. And in a way, it's like listening, but in a way, without any ears. Feeling the emotion of the love of the Creator, and then it touches the STM. And then, we'll go into the dimension of the truth about the life, about the Creation, and how Creation has been. (:38)

Many of you, to start a process of understanding this. Many of you will feel the power, the energy, of the, what we call, the fields of the Creation within you, by yourself. And, we set the scene for you to become knowledgeable about yourself. And, the most important part will come, when by the dimension of the light in your hand, you can decide the position, the time and the place where you want to be. What you want to have, and in what form you transmute. If you understand the working between the STM, and the light in the palm of the man, you will dictate the position, the direction of the existence. I want to be in London, and hold my lover. In your hand, when you create that emotion, you will be. Does not matter where you've been, in London and in that position and dimension. This is how you will never land on the lap of the guy next to him, or in between the concrete, where he's leaning against. You'll land within his Soul, you'll land within dimension of his understanding, and you manifest yourself in the dimension of physicality of his presence.

Now you understand where the teaching is about to go. As I always said, (:40) when we achieved the first lift in 2008, in collaboration with the Iranian scientists, the question came, "What next?" We've flown, but we arrived, but... The "but" was, years of teaching to find a way to produce food, you use it for agriculture to prove it, medicine to prove it and the rest. But the ultimate goal was to create a complete physical flight system.

Now with this, is how to create a full system, for you to become the traveler of the Universe, through the dimension of the fields of the Universe and your Soul. How to travel? How to use the light between your hand ?? that to the end of the Unicose. Now you understand where the teaching is about to go. And step by step, as we get to one, we show you the next step. That you don't become too hungry and too eager to run up the steps which you have no knowledge of, or fall.

In so many ways, the 24th of November teaching, is the beginning of the next cycle of the teachings of the Keshe Foundation. How to travel from the beginning to the end. From the Creator to the last dimension of the expansion of his Soul within the Unicose, and within the dimension of the Creation of the Creators. (:42) You have to understand what I always said. And maybe you'll understand deeper. If you decide on which field strength you travel through. If within the Soul, within the light, you fall with the dimension of the love of the Creator of your cycle of life, then later on you'll have to find the path to the Creator of the Unicose.

And then, I always said, what is after, if He has existence, what is, that confirms His existence? His own, or to the others? There is no end in the cycle of Creation. The end comes with the limitation of the man of understanding of Totality of the process of the Creation.

In so many ways, as we always said, the love of a man and a woman, manifests itself as a child. That child has to be born in the space, which is available for it to manifest itself, otherwise cannot. Be it the womb of the mother, or be it manifestation of physicality in the atmosphere of the Earth. It's the same with the Creator and the Creation. There is no purpose to be alone, but it has to confirm our own existence. (:44) And would this be applying to the Creator and the Creator of the Creators? Which is another dimension of understanding.

How can I love? How can I confirm I'm here, if there is no one for me to confirm myself to? And how can I say I can love, when there is no one for me to fall in love with, to confirm my existence, that I can. I have the beauty of falling in love? Then, if you understand this, goes back to the philosophy of "Adam and Eve." The Creator, to create, to confirm His power and His existence, and His dominion. Without Him creating one, He has no way to show. If you have not become a father, how do you know the love of the father? To love, to share, to understand. And you become that guy who writes a book about how to love your child, when he had no child himself.

It's the same, the same process. No changes. The process of light in the hand of the man, is not the light, but essence of understanding the path through the whole process of the Creation. From the Creator, to its Creator, and to the man who was created from interaction of His fields.

So, in the upcoming teachings, in the upcoming tests we'll do, (:46) we'll try to show how you release energies, how you absorb energies. We set the energy's in the background, that your body reacts to. And then, it brings to the point that, you understand the Totality. That you understand the confirmation of your own existence, your own connection with your own Creator. And then, it's for you to understand to what limit, to what extent, you will understand the process of your own creation. And how this creation will lead to the creation of the others. And is that "others," will be a child, or a structure in the process of the creation, or another life in another dimension. Depending on the

maturity and openness of your intention in processing, in understanding, why you created that light in your hand.

We are not making magicians out of you. We are making you to understand the process of the Creation. And to what extent you can, you will, or you become part of that process of the Creation. The rest is your job. (:48) The rest is depending on the maturity of your creation and your Soul. The rest is to be written in the books of the Creation and the Creator. In how you went from the matter state by creating the right environment, creation of the Nano and the Gans. Now it's the same process, where the Gans was the source of the energies, that you can make whatever you like from it. Use the Gans of the Copper to create gold, to create iron, or to create magnesium.

Now, with the process of the light, is how the Gans of the body of the man can create that energy, that can become anything in the dimension of the Creation, and not just a banana, the copper, the gold, and the rest. If you understand the power of what is to come, what the teachings is about to go, you'll understand, man enters into a new dimension of the knowledge that he has never known. We open to you the knowledge of the Creation, the door to the Heaven of the Creation. And once you see that, the way you could change the energy of the Gans of the Copper to gold, you change, you find your way through that light, through that Gans of the man, and the energy within it, to every creation and the Creator in the Universe. (:50)

The light in the hand, in the palm of your hand, is not just for a game. It's the key for man to enter a new dimension of knowledge, a new dimension of understanding, a new dimension, that another world of the Creation, shall open to man. How man will use the emotion of the Soul, how man will use the emotion of his physicality, to sail through this, to the next dimension, all depends on the maturity of the Soul, and servitude of the man, to his Creator. And how, to what extent, all of you reach the dimension of the Soul of every Prophet which has come in the past. The maturity of man to see the light. In a way, the light in the palm of the hand is the fire that Moses saw. But, what stones shall you steal? And what stones shall you reveal to your own Soul, and the STP? This time, you're not stealing it from the tribe of where you came from, but you steal from your own Soul and the STP.

Now you understand where and how so smoothly, so refined I have brought you to the position to find the path to your Creator. The light in the palm of your hand, (:52) it's not just a light. It's the opening to another dimension of the Creation. And those of you who will go through that, you will see my Soul in another dimension, and understanding, which is not open to the man. The knowledge you gain is beyond imagination of the man, and beyond the understanding of the present time. And you enter the gates of the true knowledge of Creation.

As I said, our thinking is the thinking of the Creator. Our knowledge is the knowledge of Creator. And in that process, you have to mature to see, to become detached from the dimension of physicality. Even you use the dimension of physicality to sustain and confirm the existence of the STM that exists in every dimension. To what extent, you as

Knowledge Seekers, will go further? It all depends on the maturity of your own understanding. And in this process, there shall be no greed, no privileges, and no one is above the other. There is no kingship, but it's the totality of the existence in all dimensions of the life, as we call it, in arrangement, in energy transfer of the fields of the Universe.

Maybe one day, in a very simple way, (:54) through understanding of the life, you'll come to understand more. Where an artist uses the mixture of the paint colors to create a new color, then you understand through different colors of the strength of the Soul, in interacting with each other, you create new Souls, of the new dimension, the way the painter mixes the paints and creates new colors. This time it's the light of the STM, will lead to that position, and due to the different strength, lead to creation of new plasmas, in the strength of the Creation, leading to the creation of new life.

Now you understand, why we have chosen this path to teach. That one day you become that painter, and how different lights and strengths of the STM, in interaction with each other, will lead to creation of new life. Will shine in the Kingdom of the Creator. Now you understand how we made gold out of copper. When in fact, from the same Soul, in different strengths of itself, we create a new dimension of life in the dimension of the Creator.

If you understood this, and if you are clear about what you understand, now you understand the new dimension which shall open up with the teaching, with understanding of the creation of light. That light, (:56) that feeling, that emotion of the plasma within palm of the hand, of the man, as we said, every plasma, every Soul, has a lower common denominator which takes you to the Creator. Now you have that opportunity. That ball in the hand is that UFO you've been looking for, but this time transmutes your Soul to all dimensions of the life. From Creator to the created, in every dimension of the Creation. Now you understand why we are the light. And in that way, we shine, and with it, you shine with us.

This is the purpose of the teaching. Opening a new chapter in the knowledge of man. Opening a new chapter in understanding of the Creation. Opening a new chapter for man who was looking for a UFO to go to Creator, now you find out within him, he has access to it. But if you understands how to move from Gans production, what we call, UFOs, to understanding of the transmutation of the fields of the Creation.

One day, you Knowledge Seekers will understand who you've been listening to, and who's been the teacher. One day you understand the frock of physicality is no meeting, and in that we can change anytime. As we change the color, we change the interaction of the two colors of the Soul, but essence is the same Soul, (:58) and then manifest in the name of the Christ, the Moses, Muhammad and the rest. Depends which light we shine, and which light we mix.

Then you understand. The whole essence of the Creation has been for man to reach the point of maturity of today, in what he sees as light within his hand. As that light is, as you

said, and is in writing, is the "gate to the heaven." And heaven is understanding oneself and the path of that man to his Creator. That Soul to his Creator. Does not matter if you're a man, a cat or dog, or existence of life in the Creation, and in the cycle of the Creator.

I hope you Knowledge Seekers listen to this teaching as many times as you can. And every time, you'll come to understand what was said. We (have) finished with the past, and we open a new door for man to enter. In a way, the dimension of physicality is closed. And the dimension of the Creator has opened up. We are still teaching both languages, as I always said, it's a little village and one teacher. And the boy who comes in the first class sits in the front row, and the boy who studies for the 12th class sits in the back. And the teacher teaches both. One to go to university, one learns the first alphabet of life, in the same classroom. (1:00) But this time this classroom is the village of Earth, and it's 9 billion inhabitants and its creatures, and the rest of the Creation, in the world of the Creator.

Maybe, for the first time you understand, the voice of the man, in essence, is the light of the Creator. It's for you to understand what this light enlightens within you by the knowledge of the Creation. Try to understand what the light means. It's for man to enter a new dimension of knowledge. If you're looking for a light, you want to show you're a magician, you're quite welcome. If you're here to show you can create materials, and fold in your hand, you're quite welcome. And if you understand that light is the gate to the line of the understanding of the process of the Creation, in the cycle of Creator, then, a new cycle of knowledge starts.

In a way, man is mature to go through that point. And now is the time. And, we do not need place, time and position. But we reach through the STM. There are no satellites and there are no computers, anywhere in the Universe, except in the life and life of the man, who has created this dimension for himself. Thank you very much for today's, and I hope you understood, how today we have changed the cycle of the man, (1:02) if man understands the truth about the teaching of today. We go through a break and we come back and try to answer any questions. Rick, if you can take us through a break, please.

>> BREAK >> 512 KSW November 16, 2023 (1:08).

K- As usual. If there are any questions, we try to answer and we'll see where we go.

Q: ... Can you tell more about what happened in the ambassadorial conference?

K- No. You should have come. You didn't come, you don't need to know.

R: It's on a "need to know" basis ..

K- If you're so eager you would have been there, huh. We had a very interesting situation that was ??, which came out on Monday, that one of the participants, very disgracefully, recorded the whole session on a mobile phone in the background. And they sent it, and it was put on the Internet, and it was immediately withdrawn. We don't know what's the background, how many people did it. But this shows the difference between Knowledge Seekers and people who were put in to spy on the Foundation. And it's a disgrace in what they did. And it's shameful in what happened. But Knowledge Seekers principally kept to the Ethos there.

You've got to understand, American administration as before, bent backwards to stop this conference. Threat, cajoling and everything else, they stopped, tried to stop. But now, a few days away from the conference, (1:10) and with a limited number of high commissions and people from the embassies turned up, we achieved more than ever we thought, and actually given us a huge strength. Because the people who attended, now they have set up an organization with all the embassies ambassadors directly themselves. Bypassing all the American pressure, which in a way, it's amazing how

... the ?? American thinking ?? Biden tried to find out ?? how the things is.

<< *This part was cut on Youtube, but it was on the live broadcast on Zoom, as far as I can remember, and it was on the automatic translation:* ... it's taken shape. We don't go into it, because the Americans and those are listening, thinking, finding, trying to find out how ... >> ??.

But the outcome of it, because immediately, the day after, two days after conference, they got in touch with us, and now a massive process has started. It's literally... It becomes so huge, that it replaces an empire. If I explain to a Knowledge Seeker.

And, in so many ways, what is become a snowball from that meeting. It's amazing. Very shortly, in the next few days, I'm returning to London, we're meeting with the world leaders and ambassadors in a very private session, because of the meeting. And in that meeting, a new strategy will be set up, in what we discuss with them, in what we call, the ?? world diplomats. And to come

... << *This part was cut on Youtube, but it was on the live broadcast on Zoom, as far as I can remember, and it was on the automatic translation: ... in a way we touch the Soul, and in a way, we'll see what to come >>.*

Because this position created, and most probably in the next week, ten days, I'll be back in London for a couple of days meeting with them. In a way, informal meeting, with the formal meeting of the conference. (1:12) This is what we always looked for. What we gained, not just something in there and go.

Those who've been present, they got together themselves, and they have set up a much, much larger scale, about 18 nations, I'll be returning to address in the next few days. From the, what we call, the "spin-off" of the meeting of the conference. So, it has brought what we wanted, and with it, it brings

... << *This part was cut on Youtube, but it was on the live broadcast on Zoom, as far as I can remember, and it was on the automatic translation: ... a lot more. But in due course you'll understand, and*

We'll try to explain, because now we enter diplomacy, politics and a lot of other things. In a way, we'll see how it'll take shape. And prior to my return back to Beijing, next two, three weeks, we will conclude this, because we have to bring it all together as a package, for our work in China.

It was very nice, very few would dare to come. And we saw, especially those who tried to defy it, presented themselves, they were there, sat in the back, didn't come to the front. And it was very nice. We achieved more than actually what we would like to achieve on the floor, we achieved outside, but those who came on the floor.

As I said, in the next few days I'll be returning to London, for a meeting with the world ambassadors in private, but a very large number of them. And it's organized by them, because when we try to do it from outside, it's all the pressures, when they organize it themselves from inside it's a different story. (1:14) And I thank, especially Kawoos (?? Kay), who relentlessly stood and sorted everything out for us to be done, for achieving such a beautiful success, such a beautiful outcome. The success is for humanity, not for us.

Any other question?

Q: ... Mr. Keshe, can you expand on the importance of bringing the "light of the Soul" out between the hands. The hands representing the two hemispheres of the brain. I expand the light out to enclose the body.

K- Not really. It's for you... I'll explain it to you in a very simple way, you understand this as Knowledge Seekers. We bring the two different Gans's on the wall of the house. We put CO₂ on one side and we put CH₃ on the other side. And the difference in the strength brings a flow of the fields. It's the same with the brain of the man. The two hemispheres

are not the same. And the energy received and given is very much different. And we have never learned to use this. And now we use this difference to create, in conjunction with the Inertia of the STM, the light within the palm of the hand. (1:16)

If you look the way I have done from very young age, maybe 8 or 9, to the scans, MRIs and x-rays of the brain of the man. Something very interesting comes up, very, very interesting. But you have to pay attention to the details of the brain. When you look at a brain, you just see the brain. When I look at the x-ray or MRI of the brain, I don't look at what doctors look. I look at the shape of the brain. The distribution of the mass on the left and on the right side. On a gap between the outer layer of the brain, the tissue and the skull. I look at how the left side in comparison to the right side sits. How the distribution of the mass dictates the distribution of the energy.

When you look at the scan of the brain, you look at the layers and you see how the left side's composition is compared to the right side. (1:18) And how the totality of the fields is. You'll find out, strange enough, usually, majority of the time. The one who are right-handed and left-handed, have a different composition of the mass distribution. The ones who use both left and right hand, have a different mass composition. The one who are totally right-handed, have a different mass composition. And the one who are totally left-handed have totally different mass composition. And you see this mass composition is like you lot, make Gans's and you put two-third of one and one-third of the other and you dictate the field strength. It's the same way.

It's very interesting when you look at the fully left-handed, and fully right-handed people, and the construction of the brain. You will see different nationality have different brain composition and construction. The structure of the Chinese is different than the Europeans. (1:20) The structure of the left-handed Chinese is different than the right-handed, left-handed European. And all these creates a flow. All of this creates a specific emotion. And then this creates different fields transfer from the left to the right.

Let me explain to you for you to understand fully. If you are right-handed totally, you write with the right hand, you shake with the right hand, you give everything with the right hand. If you're left-handed fully, you write with the left hand, you cut with the left hand, you do everything with left hand. But when it comes to shaking hand, you shake with the right. Have you ever seen a left-handed man shaking with left hand to the left hand of the right-hand man? Then you understand how fields position, how priority and energy transfer works.

Those who are left-handed and do some work with the right hand, have the most balanced brain structure. Creating light for this group is hugely difficult. They are very stable. Because in their brain everything has a position. The most awkward one is the ones who are left-handed, totally, but shake hand with the right hand. These people, when they want to create light in their hand, (1:22) have to approach it totally different way than if you are right-handed and you do everything with the right hand, which is majority.

This is where all the mistakes comes, in production, in of the energy and the behavior of the man. In that process, you see a different brain structure, you see different field flow. And some of you will achieve to create light, because the difference is so huge that you have used to circulation. But when you put your Soul, when you put not the vision, but the Soul to interact with the field in the palm of the hand, you see the light in your Soul. You do not see the light with a vision. You can even close your eyes, people around you will see the light in the hand.

You need a difference of the flow, friction and absorption. And it's dynamic, you'll see it as a ball. But the energy you produced, which become that light, which with the interaction of your Soul, has a connection, dimension, common denominator with the Soul of the Creator. Some of you, you might see the heaven, while you're looking for that light. Because you realign all the energy. You don't need to see the light.

So, the energy difference between the two parts of the brain, transferring from one to another, in conjunction with the Soul of the emotion of the man can bring you enlightenment, not the light. (1:24) And that enlightenment is what we are looking for, not the light in the palm of the hand that you become magician and you can throw lights away and create gold and diamond. In the dimension of physicality, that's what we are looking for. But those of you who mature, this is what we are looking for. You're looking for a light. We are looking for the enlightenment. And we shall see in the process of teaching, in time to come, how many of you are still looking for a light, and how many of you will be enlightened. And how many of you will fake both. But that's the nature of the man.

Any other question?

Q: ... According to Mr. Keshe, will the dissemination of plasma technology be able to stop the genetic engineering from modifying human DNA. Apparently, they have demonstrated that DNA can already be modified in the human embryo. What consequences can this have?

K- This has already been done, and this is... (1:26) I mean in China, you can choose the color of the eye of your child. In China you can, or in the processes, they can do a lot of things. You can genetically modify everything you like. So, we are not waiting for anything else.

And we... It's part of the knowledge of the man. Man has to understand. And man has to comprehend every part of it. But slowly, slowly we get there. And we need the knowledge of both. The physical life, how they mutate, how they change. How we bring in, in some places we've used this DNA mutation, or what they can interfere with, but now it's a common ground.

There is a hospital, actually not one, a few hospitals, in one of the major countries in the world, where the minimum entry to the hospital is 1 million dollars. Hospital will not accept you. That's just to enter the hospital. (1:28) In these hospitals, they do a lot of

stem cells, gene modification, because the prince "so and so," wants to have a blue eye, blah, blah, blah. And in a way, the Elites have become the "guinea pigs" of science. And ... we will see a lot of things, they do a lot of things for these rich people, to find a way to get rid of the...

Especially, especially comes out of the pocket of the Saudis and the Middle Eastern's, where we see repetition of the diseases. We see a lot of Jewish, we see with this. It's not so common in Christians and the other side. But the Arabs and the Jews are spending huge amount of money in these clinics, in these countries, to modify their genes, the DNA. Because, these are over centuries, cousin has married cousins, and cousins has married cousins, So, they have built up a genetic defects in them. In the Jewish religion, is the only way where the uncle can marry a niece. I mean, you can marry your uncle, and it happens quite a lot. And in a way, if you look at it, you carry your default of your grandfather exactly directly into the child you bring. This is why we see so many demented people in Jewish, like, in Jewish leadership. They come that way. And now, some of these are horrendous, creates horrendous conditions, they couldn't do anything, now they're spending millions and millions, in these special clinics with the stem cells, and all of them, 90% of them with failure. (1:30) To change the DNA in the inheritance, because, you have to understand, forever cousins, marries cousins and bloods gets no... and creates a lot of what you call, disorders.

Yes, they manipulate, they're working very hard. And if you have a million dollar to go in to start with, you can go and become, what you call it, the guinea pig for testing of the new mutations of DNA tampering. In the future when the knowledge of the plasma will come in and we understand more, is as I said, new sciences will appear, new conditions will appear, that we can overcome these things through RNA, that we modify, which is the correct way, the DNA. Not tampering with DNA direct. But that's time to come. In the structure coming up, we will look into this. And the new technologies will be introduced. We just got to have to wait a few more months.

Q: ... On one occasion you said that when a person commits a crime, it may happen that a descendant of that person suffers the consequences of their ancestor's act. I would like to understand why the descendant has to pay for the actions of his ancestor. (1:32) Is that related to the RNA and DNA?

K- What do you mean? What do you mean? Can you read that again?

R: You mentioned on one occasion that when a person commits a crime, it may happen that the descendant of that person suffers the consequences of their ancestor's act. I would like to understand why the descendant has to pay for the actions of their ancestor?

K- It's a long term. It's a balancing. In a way, who is the witness and which Soul takes? We see for example, this is a real example, it's not something theoretical. We see a daughter-in-law causes the death of the mother-in-law through hate, which is very normal in India and that part of the world. In many, many cases like this, not just one. The daughter-in-law, because of the whatever reason, causes, usually drop the mother-in-law

in a what they call oven, the tandoor, because they cook on the floor, for to make the bread or whatever, And mother-in-law dies because of the fire. Later on, not much longer later on, we see the child of the daughter-in-law, (1:34) which is a grandson, or granddaughter of the grandmother, dies by the fire. And they say, the way he came, the way he goes. And at the same time, we see the daughter-in-law goes through a lot of things with burning and the rest.

I had to face this and explain this. And we've seen in other cases where people close their ears for somebody gets hurt, because there is a benefit into them, or for them. And we say, what's the purpose of the grandson to die for the daughter-in-law to be punished, as we call it. But we understand the balancing. We understand where you create the pain, has to balance out the pain.

But is this the way the Creation is done? Will the offspring pay the crime of the forefathers? In essence, that balance does not have time and position. In essence, where the field sits, the time and position is dictated. So what we see, what you say, in generation to come, for us, it is years and decades, whatever. For them is the, what you call, one second. It's just you move a magnet, the magnet moves. But then the others have to accommodate for that movement. So, how fast that movement comes, (1:36) for us might be a century, next generation and in a way the Soul balance because you created that condition, so everything else is.

The beauty with us, creation with human or whatever, is that we have a dynamic Soul. Our Soul is not sitting there as a Soul. Every event in the cycle of our life, emotion of physicality, reflects in it that it transfers to the bigger screen and then it comes back to us. This is something Knowledge Seekers have not understood. Mankind have not understood. And when you understand this, you live by the Ethos of Mitra. You don't even think wrong, that you might talk wrong, that you might do wrong, that it creates wrong something else. And then the Soul has to adjust for it.

How the dimension of the physicality touches the Soul. And then, the, what I call, the balance comes from the interaction of the Souls. Once we understand this, then we'll see what it means when you do something and then it goes to the dimension of the next generation to pay for it and whatever. Or you say, "This happened to me because my grandfather, you hear a story of my great-grandfather, did something, now I'm paying for it."

In a way, our physical dimension creates that wave, that it comes back to us, to stand the, what I call, the "tsunami." Put magnets on the table, which Rick does quite a lot of them, (1:38) and just move one magnet and see how the others move. But, don't look at... you're moving the magnet, look at the hand which moved that magnet. That magnet is your Soul. And the hand and physicality of intention to move, is your dimension of the physicality. Then you understand. How long will it take for everything to balance?

Any other question?

Q: ... Regarding the event on the transmutation of light. Will there be translations on that date?

K- As usual, yes. Depends if your the translators turn up. Yes.

K ... We had a number of Germans in the last week meeting. And in the, what do you call it, in the (London) conference. As we go now to China for the third session of the conference, we'll have, we open the door to a large number of Chinese. Chinese can attend the conference in China. We are trying and sort it out for February. We will bring in translators. (1:40) And now I realized in the week teaching in London, we have Germans who understand half of the teaching. But we try to remedy this in the, what you call, Chinese conference. The Chinese conference we'll try to increase it to about 1,000 to 3,000 people. All Chinese, majority of Chinese who want to come, we'll expand this. It's all how we negotiate with the Chinese government. That Chinese could not come out to other conferences and the rest. This time we go to China, Chinese and all, and travel within their country. So, the number of Chinese in the conference will increase. Once we get the okay from our negotiation with the government, that we can run a conference, we try to accommodate at least 2 to 3,000. And the translation will be simultaneous. The outside China delegation will be very, very nominal compared to what it is. But we still try to create a position of translation that you benefit by all of it.

And we need to do so. And with most of the teaching, most of the, what we call, the sessions we have on Fridays, like this light one, we have tried, we brought translators for, for them, what you call, Knowledge Seekers, what you call it, always are there to translate. We have to understand the essence of it, even though some of our translators, we call it A, they call it B, A, A, whatever, and totally change the translation themselves to what they think it is. And when we talk to the people, say, "This is not what was translated." (1:42) And so, yes, we try to bring translators in, and as usual, the translation is done in the beginning of the session, and we go through the whole session without any translation. We don't interfere, especially in the past few sessions, we just explain what's going to happen, and we go to two, three hour sessions of no talking, there is no need to talk, because we control everything in the background.

In the light session, there'll be a small translation in the beginning, but everything will be handled by us in the background, to create transfer of energy, and if you can benefit by it, to actually create that, what we call, enlightenment. Some of you will look for the light, so you'll say, "Oh, I want to make this." But principally, our work is to enlighten, for you to learn how to use the fields for transmutation.

Any other question?

Q: ... Could China initiate a peace magna carta, a universal declaration of peace? Yesterday's SUA's President and China's President meet in Los Angeles. Did they talk about peace in the Middle East and Ukraine? Are they interested in peace or to sell the military weapons? Thanks, how can we change it from our Soul positions and also in a diplomatic way?

K- Has any of us been in that meeting? Do we know what they are talking about? (1:44) You got to realize China will become independent and can dictate its terms, when China can self-sufficiently feed its nation. As long as Chinese import 40% of the grain, and 70% of the cooking oil, does not matter how mighty military they become. The guy who holds the string to the food will dictate Chinese outside policy.

And this is part of the Keshe Foundation work, to spread the technology to all the nations, that this control of the man's peace activity, controlled by the villains of the nations through arms, can be stopped. A lot of nations don't want to spend on arms. But they buy arms because it's a string attached to national food security. When you talk to many, many, many, many military officers, they always say so. I was privileged, or I was present, in a very recent, very recently, in a military discussion. (1:46) Where the Chief of Staff, chief officers of a nation, Air Force, were saying, by law, by international law, our pilots have to have so many hours of flying just to be certified to fly these jet lines, these fighter planes. But we don't have the fuel. If we get them one hour in the air, it's the maximum we can afford. Because we don't have the fuels. And the Americans are pushing us to buy more planes, which we cannot even train our officers. You don't have the fuel even to fly the thing for one hour a year. But they attach this purchase of arms to the food. How much grain they'll receive.

So at a moment, a lot of "gun policy" is attached to the food national security. All these guns and arms sold by Europeans and Americans are connected to aids. How much aid you receive is how much of... In a way it's become colonization through arms. And China is not immune to this. Europeans are not immune to this. Forget about African nations, South American nations and the rest. We sell you 3 billion of arms, we give you 1 billion of food that your nationals don't riot on the street, that you use the same arms to stop them.

This is where the problem sits. (1:48) This is why we talk about national food policy, security through the new technology. Then it does not need to be grain. It has to be ingrained in our leaders that we do not need grain to feed our nation. I don't go into depth into this, because in a coming up future, you'll understand why. As I said, I'm sure one of the Knowledge Seekers who knows who they are, are listening, they can tell you, that the fear of powerful nations of the world, according to what they convey to us, or our people around us is, Keshe is becoming a nation, and it's becoming a powerful structure. That's why many nations don't like to work with him. But, it's come to the point, you don't work. It's tastes like, you don't work with Keshe Foundation technology and try to "duck and dive" it. Soon later, somebody (else) ducks and dives you.

And, as they said to our Knowledge Seekers, he's becoming a force. And governments don't like to work with him, because he's setting up his own nation. You Knowledge Seekers have not realized what is coming to motion, and what is to come. We don't ask for any, what you call, finances, pay us millions, or whatever. You provide millions. We work with you for your nation. (1:50) And this is where we win. This is where the knowledge is winning over diplomacy and politics.

China has no way to escape this. At the end of the day, the, what we call, the string attached to national food security dictates in the background how much you can talk. And when we come to the point that only, only, national food, national security can be taken out the equation, the disarmament will come. And this is how the West is selling arms. This is how nations stay food secure. Because you buy arms, you don't agree with the world peace, then we give you food.

I explained this very, very recently. We have the same situation in Iran. You see hundreds of thousands of people on the street, riots, you know, shouting, "Death to America" and the rest. You don't see what's in the background. It's connected to the food they put on the table, to their family and their children. Through the mosques, they issue the paper, they go into all these hundreds of thousands shouting. (1:52) At the end they get endorsed that they've been to their, what we call it, demonstration. And they go back to the mosque and they get the food for the family. This is how it works.

It's the same in the larger scale with the governments. 99% of the, what we call, demonstrations has a string attached who pays it at the beginning. We had this with the Greenpeace. If you remember Greenpeace movement, why do we hear from them that much anymore? Why Greenpeace has become so silent, (but) in the 1970s and 80s it was a force? Because the Greenpeace was financed 95%, 99% by the Russians to create problems in the West. We saw the end of Greenpeace, and we don't see them the way they used to be in seventies and eighties, because in nineties when the East opened up, there is nobody to finance them. And Russia is not much interested, present Russia, to do that.

It's the same way with national governments and peace. When you talk about creating peace, you have to first create national food security. The peace will come, because I've sat in many, many meetings with generals, with colonels, with all sorts of military-ranked people over years. And unknown to public, military expenditure of a nation is connected to how much arms they buy and how much food they receive. But a few points of these are coming to an end. Americans are running into a problem with this, (1:54) because the lands which was used to create all the GMOs and the American rice policy and food policy, is now drying up in Texas. The underground reserves have finished and the desert is going back to desert. And we'll see this food policy of Americans, is coming to a natural end in the next 5 or 10 years. Those huge lands which used for putting 100 harvesters next to each other to harvest and what the harvest was showing the power, was that power of control.

In this meeting in United States by President Xi and the rest of Chinese and the rest of the world, we'll have no bite. If, suddenly tomorrow, American, as they've done with all the nations, put an embargo on food, on grain. The situation with Ukraine has become solvable, it's finished. Russians have won the game. You will understand in the next few months how Ukrainian leader and the rest soon will go into hiding in criminal offenses, and the rest will come against them. And Russia will take the main farming land, the enclave they were after, back into Russian territory. But under another name of, what you

call it, Ukraine. Because now, most of this will go under the control of the Russia. The grain export is sitting on the ports. They sit on the main part of the grain production. This is partially becomes part of national security of food for them. And they will guarantee food to China. (1:56) And this will change the position of American control of food supply.

We see this very clearly. Russians have heavily downloaded most of the grain. Some of the nations like Iran, North Korea, China, have never had such a full reserves of grain, which Ukraine was downloaded to. They are emptying the silos, but at the same time, the farmers, they are under control of, now they've taken territory over, still need to be paid, still produce the grain, it hasn't stopped, and this is becoming part of Russian export. You got to remember, Ukraine was part of USSR. And, they relied on this part we call Ukraine, on their food production. And now they got it back. And this will take a lot of pressure off the Chinese, on relying on grain, to (from) the Americans. It has changed slightly the balance. But, as long as, what you call, Chinese rely on their food security, the Americans will play the game. There is no, very little bite in the bark.

This is why China cannot resolve Taiwan. If they push a little bit, grain transfer will stop. Even though Chinese now operate heavily in Argentina, in Brazil, and the rest, America has a big chunk of the percentage of the grain export to them, and especially oil, and soya. (1:58) And this has to come to be produced inside China. And once Chinese can produce enough grain inside by 2030, then we'll see a change of policy. And Chinese will change their position, because they don't need, they have no fear of food.

Two choices is left for their governments. Go through this grain proposition, which they control America, Americans have control over all of it. Or go through the new technology, feed your people online with apps. The way Keshe Foundation is developing, proposing and delivering. Then no nation has control over national security. When people are hungry, they'll start rioting. When you fill the stomach of the man, he is calm. And, as I always said, "Armies march on the stomach of the soldier." You cannot have an army, when you have a starving soldier.

Very soon, very soon, the more Americans put with food policy against arms, and we can replace that with a different proposition, where you can feed people through Apps, the way you lot, the light in the hand and the others you've been, then they change the policy. Once we secure food against, arms out of the hand of the Western Europe and Americans, we'll see the beginning of the, what we call, world peace. And this is one of the ?? multiple sides, which we are extremely working hard on. Even though we still work ?? with the grains and the rest. (2:00)

You have to understand overall structure, not just bit by bit. And China knows this. And a comprehensive agreement is part of this, world peace. We have to make African nations, we have to make China, Central European Nations, some of them. And what you call, East Asia, through feeding through Apps. You have 8 million people living in Belgium, 9 million. You have 70 odd million people living in UK. There is not enough farming land for a small nation and a big nation to feed. So the grains are controlled. And that grain

control dictates the policy through arms. You show your shelves are empty, your people will go on the street. We keep your shelf filled up, you buy arms (from) us. This is how arms are so prevalent, through food policy, national food policy. The only way, which is a solution for most of the nations, from Africa to China to European, and the leaders will come to understand very soon, to come out of the hold of "arms against foods and controls," is the new technology.

The way a lot of you have tasted the banana and the rest of it. The way we get the Zinc and Copper, we produce gold. We can produce food, and waters, and everything else. Knowledge Seekers have not understood the strength of the technology which is on the table. (2:02) National food policy will separate from the arms, and when you don't need to by arms, you'll spend more of your finances on the nation. We just don't sit here as Keshe Foundation, we understand a lot of things happening in the background. And you have, as an organization like us, understand how to use the technology, but understand it. You can't be "doggy headed" and just bark your way. You have to understand how the water runs under the carpet, as they say.

Any other question?

Q: ... Will there be a session for a follow-up on the post-Coronavirus meeting? You mentioned November 17th for those who attended the first part?

K- We are trying to do that, otherwise you'll go to the last Friday of November. Because we came out of the London conference in a week of it, and there is a lot of things happening in the background, yes. Next week we do the, the lights and then we do the Corona, because at the same time we'll see some of the effect of it. Corona is causing huge, huge problem, even in the recent past we see, governments are reporting huge deaths. A lot of people are dying, more than before. And ... the, it has created a huge problem, out of nowhere. (2:04)

We see, what we call, especially in United States, in American continent, many, many people who had the Corona, or they took the injections, their lungs literally solidifies, they're dying of ?? that, getting a sign on the respiratory, death. A lot of people are having problem in the brain, a lot of... We see a 10-15% increase in death, and these are all Corona bits from the past.

And we are involved in it, we are trying to understand how to change the situation, but I saw an article sent to us, even the insurance companies are panicking, because too many people are dying and insurance policies are maturing, because they have to pay for it, and there was no allocation for this. They were assumed to die in next 30, 40 years. And this indication is coming from the insurance policy holders in the West. The insurance companies have gone into panic attack. Too many people are suddenly dying, but as we don't have Corona, they are going under cover of different diseases.

And we have to find out how even to help this, this, this new disease, this new line of death. But they're all Calcium based, it's very strange. All reports calcification and the rest of it. Brain, lung, kidneys, in testicles and the rest of it.

Any other question? (2:06)

Q: ... Penta and Hexa formation of our DNA is related to star formation, and flower of life, which is crystal symbol. Memory means liquid light and crystal frozen light. So, our DNA stores information in a fluid state of our light, and in a crystal Hexa-Penta formation, which is frozen light. So, when we transmute is at the DNA, in RNA type, so the transformation of solid light to liquid and gas light, just to make a comparison in order to understand.

R: I don't understand her question actually. It's kind of a...

K- Welcome. You're quite welcome to our world, I don't understand it either.

Q: ... Can you briefly explain why inbreeding leads to genetic defects?

K- It doesn't lead to genetic defects. It makes the availability of a broader spectrum of fields less available. It narrows the interaction. (2:08) When we marry on to the other, what you call, bloodlines, or other races or whatever, we expand the spectrum of fields available to our child. When you inbreed, it's very narrow, very, very narrow. And the more you inbreed, the narrower the spectrum of fields are available, because you haven't brought anything new to extend, to expand. And we see specific diseases, specific conditions into this line of inbreeding.

And we had it... even today we have it in the European monarchies. They have inbred so much over centuries to keep them in power, that we have diseases which is exclusive for European royal families. You don't get that much of it outside. Don't look at them, they get on their horses and the carriages and they shake hand and they wave as they are. These lines are so, so, so, so inbred over centuries to keep them in power, that they have diseases of their own. And there is no cure for it, because nobody has done the research when only 20 people have it. Blood disorders, all sorts of mental disorders. Half of the Monarchies in Europe are mentally demented. Just by inbreeding.

When you listen to this news that he's connected to Charles the second, and she is the grandchild of Victoria, and they married blah blah blah, (2:10) this is all the inbreeds. And they carry specific diseases, it's carried specific. Because the spectrum of the fields to come in, is not there. When you see a black, and a Chinese, or a black man and a white woman marry, what a beautiful children they create. Because it's a new energies come into play, and new dimensions. Have you ever seen some of these white, black Americans or the Europeans, and you just can sit and watch the child for hours with the beauty of it. The color of the eye comes from one, and the skin comes from the other. Mixture of the colors, it's just beautiful to see, because now a new spectrum has been opened up, new colors, new combinations.

And the inbred does not allow that, and that inherently narrows the option of the fields. We see a lot of mental disorder in this line of, what you call it. I used to joke with my mom sometimes, says, "Do you know what these Jews banging in their head against the Great Wall?" She said, "Why you keep on saying this?" I said, "You know the banging comes when you're mental, they inbred so much, that there is... they're all mental." They become mental, because the spectrum of the fields narrows down.

In the Islamic world, (2:12) in a lot of Muslim families, we don't see many disabilities, disabled child on the street, because they keep them in the house, comes out of inbred. It's a shame to have. Many, many, many Saudis houses, Arab houses, inside them have mental or disabled children, because it's come from inbreeding. All sorts of problems from blindness and to deformity in genetics and the rest of it.

Any other question?

Q: ... I think that my question is related with different stages, or states of the light as a plasma in movement and the relation also between light and our DNA and RNA. Because I don't understand very well, this is why I am asking you. Our DNA, as far as I understood, has a hexa shape and also a penta shape. I don't know how it is, I am not a medical doctor and my question was, could be this related with star formation of 5 and 6 elements? (2:14) Like the flower of life or as a pentagon, as a pyramid?

K- When you understand it, come and explain to us. We try to explain it. When you go on, understand it fully, and then explain to us what you want to understand, then we can explain.

Principally, principally, principally, we talked about this a long time ago, I remember, somewhere you might find it. You cannot put all hexagons and create a sphere, when it comes to dimension of the interaction of the fields. Because this is how you become diamond structure. But if you look at, for example, a football, you get a sewn football. They used to sew if you get a leather football. You find out you have so many hexagonal shape. And somewhere to fit in, you have to put a pentagon. In a... in all of... there is impossibility, I haven't seen it, because I always look for it, I haven't seen... haven't sewn footballs, which is all hexagon. It's a structure of the shape of the plasma, and DNA and RNA are part of it, they cannot do different. And create manifestation crystal structure, you create, you have this. That's a natural process of interaction of the fields. (2:16) But go on studying, then you understand exactly what I'm talking about. Thank you very much.

Q: Yes, to understand the intra connection in our common...

K- There is no... there is no

Q: ... Unicose ?? through the DNA and RNA.

K- No, it doesn't come, it's just the way the thing, fields connect to each other, to create that shape of physicality. Inside, they're connected by the fields, but outside it's just like a balloon. The air in that football, the air inside, connecting all of them with the air inside. But outside physicality, they have to fit in, and you cannot put hexagon in a football all the way. There is always one or two pentagon in it, that accommodate the existence of it. The same with dimension of the, what we call, RNA to be the gas inside, which connects everything, but DNA to be the physical structure, to fit into the sphere, always have that structure.

Any other question?

Q: ... Could you ask Mr. Keshe if there are problems at the nuclear power station in the Ukraine? Has it been shut down? If there are people at the Ukrainian nuclear power station, are they scientists?

K- I don't know. We don't follow. Don't follow it now. I don't know, past few months. The... you got to understand, the Russians are sitting inside these... especially the biggest nuclear power station. Ukrainians who are running it, were trained by the Russians. (2:18) Till 20 years ago, 30... you got to see the people on the top of the nuclear industry of the most of the Eastern nations, they're all in their fifties and sixties now. They were in the young age when they were in twenties and thirties, were trained by the Russians, they were part of USSR. And this is inherent in all the nuclear industry on the East side of the... what we call, what used to be Eastern Europe. And there is no...

The Russian nuclear physicists are some of the most skilled, some of the most innovative scientists I know. The freedom given to them to try to develop is amazing, even today. The American, European structure of nuclear industry is very restricted to legislation, how and what. Russians don't have that even today. It's very patterned, but very open. They allow a lot of innovation. The nuclear scientists in China fear of their life. If they make a mistake, they can be killed. Russians are encouraged to look for new ways. Always been. It's a different... that is why the Russian nuclear space is very innovative. It's very open in research and development. The legislation does not exist as such, (2:20) but caution is looked after, but it's still a lot of freedom.

And whatever, what you call, nuclear power stations are in the hands of the Russians in Ukraine, should be pretty safe, because they know, they masters in it. They build nuclear reactors. Ukrainians are users of what the Russians built. Iran nuclear power stations are Russian made. Chinese rely a lot on Russian nuclear technology. Chinese scientists in the space and nuclear look up to the Russians. A lot of information exchange, technology exchanges are very connected. Chinese nuclear and Russian nuclear are, what you call, knitted together, you cannot separate it. Russians are... Chinese are going to the Americas and all the blockage, as they were communists and still have a lot of good relationship, they work inside, to transfer technology. Ukraine nuclear reactors are in the safe hand, they know what they are doing. If they don't bomb it, they know how to run it.

Any other question?

Q: ... The problem you were mentioning about the football, with the pentagons and hexagons, (2:22) you also see in the domes, in the construction of domes. You've got the mixture of these two figures. And you can clearly see that problem there.

K- It is not a problem, it's a ?? combination of fields.

Q: Well, it's nature, yeah.

K- Yeah.

Q: And the Carbon 60, the C60, is it all hexagons, or does it also have pentagons?

K- You add it up.

Q: Good question. I was thinking of another problem we've had with the post-corona problems. The inoculations were supposedly for over 18 year olds and they've been vaccinating kids as from three year olds. And we're seeing a lot of problems with the menstrual problems for women and a lot of lack of sperm in kids.

K- We will have this problem with corona for decades to come. Americans are just looking at how much damage is done, how much more they can do. Why they forced the soldiers and the doctors to be vaccinated. Now they're killing themselves, killed so many of them, many of them dying. And we are coming up with other problems.

R: That's a delicate subject that we can't really discuss on YouTube because of their restrictions. (2:24)

K- Yeah, we have to wait and see what the history writes. What the history writes and why we see all the things which goes with it. If you look at it, Corona has been one of the first tests of mankind with the viruses in a different way.

But once we start space travel in the physical dimension, we'll bring more of these energy packs. And then what will be effect of it on our people? What is understanding of it? and what will be the disease which will come with it, or cure will come with it. It's not all one way, bad way. What through these energies we'll find answer for many diseases which we didn't have.

R: Well we do have the answer to the previous question, which is about the soccer ball shape and the particular atom structure of the C60, which is called Buckminsterfullerene, named after Buckminster Fuller, who originally conceived of the dome structure. And yes, it's got 20 hexagons and 12 pentagons and does resemble a football.

K- Tada! (2:26)

R: Okay there you go.

K- It's amazing... It's not an answer, it's a knowledge. We... in the future you look into this for specific works.

R: It's interesting that this Buckminster Fullerene, it exists in Space and has been observed in the Planetary Nebula, in several types of stars. The ionized form of the C60 plus has been identified in the interstellar medium, where it is the cause of several absorption features, known as diffuse interstellar bands in the near infrared.

K- Yes, because what it is, even though you see the structure, they're connected, between these structures there is a gap. And in that gap, the specific fields absorption strength exist. This is what I said. The Knowledge Seekers have a problem with creating fields. But from the fields we create radiation. Like the way now you can do what we call laser beam, monatomic energy fields. In space we produce mono field strength. (2:28) Which means, from Gans's I can create any radiation you can ever imagine. But the power of it is totally different behavior.

An X-ray, by X-ray machine coming from interaction of the high current hitting the surface and creating it. In the Plasma X-ray, when we produce it, it's the... it's not a ray, it's a plasma of rays. And, the power of it, is beyond man's imagination. I've done this and I have full knowledge, or as much as you can call it a full knowledge, of how to produce X-rays, gamma rays, cosmic rays at will, through our present technology.

And it's not what you call, if you understand this, then you can produce and go into these, what you call it, constructions and development and change it. When you have this, hexagonal, the ball, with the present knowledge, when you feed it into the ball enough air, there is no room for expansion, it blows up. But, when you feed this ball with the specific rays, cosmic rays, gamma rays or whatever, these walls, in progress, will expand. (2:30) You can reduce the size of this ball, or you can expand it. The walls will not change, the size of the walls, each wall stay the same. But more pieces will appear in the construction. And it's all done by energy transfer.

This is what I said in the teachings of past few weeks. In the Keshe Foundation, and I go back to years ago, we explained this. In the development of the Keshe Foundation Space Technology, we are not looking for huge air hangers, how can you make a UFO which is 200 meter across. We don't even have the platforms to hold such a weight. We don't have construction technology to hold two, 300 meter diameter tents. With the new Space Technology, we bring the reactor in the middle, we create, we set up the structure of the shape of the craft we want, we create the fields, and interaction of the fields with each other, creates the shape. And then, by how we feed this formation, decides what size the craft is going to be. How much of it is going to be solid, how much is going to be fields.

This is how the new technology comes. It's literally a backpack on the street, set it up the way it's instruction is on the manual, you got yourself a UFO, 20 meters, 100 meter, 1000 meter. (2:32) And every time you expand it or extend it, it's very much like this ball on the screen. You... you... the size of the walls does not increase so much. The fields inside,

creating, bringing new energy, will build from inside the next shell. The next piece, and the rest moves to accommodate that piece.

This is how your body, your skin grows inside the womb of the mother. This is how we create that shell and then inside it we develop secondary, what we call, body of the man. When we are born in the, what we call, or when the animals are born, you see the mother taking the, what we call, the skin off. This is what it is. Inside, once the child is conceived, once the sperm and egg do exist, or themselves, you have the womb of the mother, then you create this flexible membrane, to create a condition inside that the data can create the structure of the bone structure of the man. The heart, the leg and everything else. It's not a loose things in the womb of the mother. That membrane holds and that membrane expands as the child ?? grows. It's exactly like this ball. The energy comes from inside, and from inside, the division takes place, and the skin expands.

It's not the same number of Carbon. (2:34) If you manage to get energy in the cosmic rays, and then if you had 24 pieces, now you have 48 pieces. Now you have 60 pieces. And as it expands, look at the skin of you and see the texture of it, then you'll understand. They're not all pentagon. You got the hexagon and pentagon. They have to accommodate, the stretching and moving. And how much energy comes from inside, according to what it is. That's how your skin is regenerated.

And we have access to full cosmic ray spectrum to produce. For me to produce a cosmic rays, is as easy as drinking a glass of water. To produce gamma rays in the cosmic level, not in the man's machine. When we deplete nuclear warheads, at the moment, Americans are paying the Russians now. The treaty has stopped by the Russians. They pay them millions and billions to empty the warheads. With a new technology, understanding this, it takes a few seconds. Doesn't matter how deep they bury these nuclear warheads. We empty them like a scoop of ice cream, even easier than that. Because we have access to a knowledge unknown to mankind. For me to empty a nuclear power stations with all tons of fuels in it, from radioactive material, is easier than actually filling a cup of water.

Bringing an end to nuclear industry as a weapon, it'll take a few minutes. (2:36) You still have the rocket, you still have your warhead, but in that warhead, is emptiness. And it's a knowledge, it's well tested. It's not something that we might be able to do. Because, if you understand this structure, it gives you a lot of possibilities. You look in what is inside the ball. I look what can come out of this ball. And it goes back to "Creation of Black Hole" paper, if you understood that. And then you understand.

Nuclear radiation in a plasma is so powerful, you can disappear a whole of a planet and a star with it, in milliseconds. Or, you can allow it to expand, to become a bigger star, or reduce it. You can do this, it's done very, very systematically. It's like when a star or a planet goes into its point of disintegration, you can empty the energy through fields from inside it. It's something which is done... It's like a putting a fire out, for those who understand the knowledge of Creation. If you have a Star Formation or a star such a solar system, where the star is about to go out of control, and you have planetary system, which are nurseries, you don't go and empty. (2:38) With the knowledge we have we

reduce the heat inside. We withdraw the radiation fields, in cosmic and the rest. You will understand. We show this technology very, very soon. Extremely soon.

Any other question?

R: I believe they use the C60 geometry to enclose certain drugs and other things to be able to deliver to the body.

K- This C60 has a hidden power. Has a very, very... and it depends how it's used. You see, when they use this Carbon-60, they say, "Oh, medical blah, blah, blah," and it does this. Follow the life of the people they use it on. Follow the cycle of the cells they use it on. And then you see, it looks very sweet, because you're taking this picture frame, take a picture frame underneath later on. The scientists who work with the Carbon-60, and sometime by accident come to consume it, or come in touch with it, they live a horrible life, absolute... I was witness to one. This is why I keep on telling you, please do not drink Gans's and the rest. Because if a composition with the body of the man, with the stomach acidity, creates this, you die a horrible life. You live a horrible life.

Q: ... Is this the geometry, also the geometry of Gans?

K- No, Gans is dynamic. It does not maintain geometry as such. (2:40) It keeps a physical boundary, fields boundary. If you get such a geometry, you're in a big heap of problem. But we use it.

This Carbon-60 is under a huge discussion, especially for weapon technology at the moment, by Americans, by the Chinese, by the Russians, by the Iranians. Germans are doing some work on it, because it's primarily a Black Hole, and how you interact with it. And primarily how this Black Hole will interact with outside.

Any other question?

Q: ... Mr. Keshe you gave the food security plus other securities to all the governments of all nations through the Key that you gave them in 2012. Why don't they go for it? What holds them back?

K- They don't understand it.

Q: ... Are they mental?

K- No, they don't understand it. They don't understand it.

R: Is that because they're mental? Maybe they had too much crossbreeding.

K- No, it's just when you don't understand it, it's something written in the future, we will open up. You got to understand the patents we released, the Key we gave. Even they achieve one thing in one section of it, this section, as the knowledge increases, has

different implication, application. A new application, as the knowledge expands, then you go to the next step.

And, it's just like, (2:42) we had this discussion in the conference, many of you suffer from asthma. Many of you use these pumps. Keshe Foundation has, in the Wellness side, has a process for this. It takes a... our doctors to sort these things out. Not much. But, it's not in the hand of, it's not in public. We can bring an end to these conditions in a very rapid way, through the technology. But, is the man ready to go through it?

R: Well as you've mentioned, it's like a Pandora's box, and once you start to unveil the core of the technologies, then they all, all of the other parts, kind of come out with it. And that is rather devastating for the current "status quo" of the way things operate in the world of technology, and especially energy in the world.

K- If you understand the picture you have in the front, and you understand the totality of it. This is a micro size, is so small. This is enough to bring America, this one cell, is enough to bring the American most advanced naval aircraft carrier, one cell. No more.

If you understand this, (2:44) you can travel the Universe with what energy sits in one cell like this. It's very much like a football, how hard can you hit it, but with this, what energy you transfer inside it. And then it decides how far the ball is kicked. Primarily, if you get this and kick it against a one body of a ship, the energy transfer, which just opens up the whole structure. You'll have 7,000 soldiers swimming, because there was a boat, now there is not a boat. The knowledge is very extensive.

You need this technology as part of the defense, as you travel in deep Space. You have... you can't zigzag your way around. You travel on a straight line, you have a structure, meteorite or whatever, you just dilute it, it becomes sugar in the hot water. Man is not ready for this technology yet.

If you understand it, you can use this very much like a transmutation ?? ball. You put whatever you like inside it, and because of its structure, field structure, it has no resistance and no time. And then from inside you create gravitation, dimension and position. This is the hidden envelope we talked about a lot, but scientists are not ready for it.

Any other question? (2:46)

K- ... Let me explain something. In the China conference, we will openly show the first flight system. What you call UFOs, what you call flying machines, what you call hovering cars. In that conference we'll bring more or less an end to the present propulsion.

Those of you who were present in London conference, you saw with a frequent change of the screen on the panel, that what, how, small rate reductions leads to, then a massive and conversion. In this, we'll bring an end to the propulsion, in next 2-3 months, Once we get

to China and the presentation of the Chinese conference, maybe ?? nail the coffin of the propulsion and the electric car will be set. And we see how the new technologies will appear.

We cannot live without it, it's something needs to be done. And the technology more or less is complete there, but it just needs for people to understand. Those of you who come to China conference, you will see the first, what we call, flying machine. The structure will be built on the platform. And then we go through the other phases of it. (2:48) For the transmutation, as I said, understanding those who want to do physical transportation, join us in Beijing. Those of you who want to understand transmutation, join us in Shiraz in Iran, 2024. Knowledge comes with the poetry together, and then you understand how sweet it will be. And then we'll go to the next step. Then we understand more.

In demonstrations of the technology in Beijing, we bring an end to the present, what we call, matter state. In Tehran, in Iran, in Shiraz, we'll bring an end to understanding of the fields, and end of the religions. Where even the holy men and the religious men will see the light of the Creator. Then we understand where the peace comes. We show slowly, slowly, and in London conference we showed the first stage, first time ever we showed in public.

If you remember, years ago, we used to have a video showing the weight reduction on the Iranian reactor. If you remember, we were showing on the scale. We showed the reduction in weight in the ?? small ?? place, through control in London conference live. Now you will see a full flight system in China. Still tickets are the same, you still can register for China. (2:50) And we put a limitation on outside people who want to come in. We'll try to hold a conference in the island of ?? Hainan, in Sanya, where there is a hotel accommodation for this number of people. And you don't need much visa for it, if you are part of the certain nations who can travel to Hainan. Because he has a different visa restrictions on different nationalities, even though it's China, they have separated that you can come in for 30 days or whatever. Without visa, like Hong Kong.

And we will show the, what we call, an end to propulsion in China. Where, those of you who present in London, you saw the small weight reductions as it came live.

Any other question? Or we call it a day? We've been here nearly three hours.

... (looking for German translator)

Q: ... (2:52) What was the special gift for the participants of the London conference?

K- Ha, ha, asked them.

R: Is that top secret?

K- No, no, no.

R: I think Dean released a picture, I don't...

K- ... Yes, yes. We... all the participants, this was for those who participated in the teaching part, there is a, what you call it, a star, with a Gans inside it, a special combination, And then you have the coaster, a new coaster has been launched by the, by the Keshe Foundation, I think you should be able to purchase in the next few days. And, what we call, the medallion. But, the Knowledge Seekers in London conference, each, each participant chair, were put two Gans powders, which was worth a lot of money. But every participant had more or less a full bottle of CO2 and Zn, and dry Gans's that they can use in different ways. We actually gave thousands and thousands of grams of Gans's on the tables. And those who, what you call it, took it, somewhere in the future, might be able to understand how to use it. (2:54) This is part of the, what we call, reserve kept in Austria in eventuality of any nuclear disaster.

Thank you very much for today, try to join us on the 24th. And if you've been waiting all your life to see the first flying system, join us in China, in the conference in China. We showed the basic structure of it in London. And we'll show a complete structure and working system in, what you call, Hainan, next year. Thank you very much. And hopefully, we'll see what come up till next week. Thank you very much Rick, and for all the support.

K- Something ... I just remembered something to explain. Those of you who wanted always waiting for different Wellness conditions, to be able to use the UBESUS (Universal Body Enhancement Spaceship Units), these systems which now comes as a connection to the UBESUS, now has left the hand of the Keshe Foundation to what we call the distributors, to people who have licenses. A number of these was given to the people who bought the systems during the conference that they personally took it with them. (2:56) And very soon with their, what you call it, with their permission, a list of these people will be released that you have to be with the system to use it. And gradually we increase this number of, what we call, people to use the Enhancement Unit. You don't buy this huge, what you call it, UBESUS, it's changed to a Headset and a Unit. And now it's been distributed amongst those who have purchased the Units. And in next few days or weeks, because it's out of our hand, it goes through the, the Wellness Center. You can actually get in touch with the Wellness Center, or the people who are the distributors. You have to use it Live with the system. So you have to come to an arrangement with the, what we call, the licensees, how they will, what you call it, they will register you, how you can be with them to go through the process. It's a joint (use) with the Headphones you have for the physicality and these new plasma system, UBESUS for the expansion of the fields. As I said, what used to be done in three months, will be done in a fraction of time, with much, much more effective ways, through the Wellness.

In these conditions now, they're what we call, this is what you've been waiting for as UBESUS and the rest, now it's become realities in the hand of our people, who can... You have to get in touch with them, work through them, through the Wellness Centers of the setup for it. So, what you've been waiting for, now it's already been released. Thank you very much, (2:58) and we'll meet again. I'm sorry about that, I forgot about to tell you this.

512 KSW Nov 16, 2023

END
