So, the knowledge is the same, the knowledge of creation is the same. The old is there, which is a matter of physicality (P), and the new, which is the energy technology, will come into it. But, then they merge, one cannot work without the other. None of us could listen to this teaching, if we didn't have collaboration between the Tesla and Edison work. Even though one tried to discredit the other, Even by putting man on an electric chair, to show he was right. What would have happened if Edison and Tesla would have come to understand the collaboration between them would change the world in a different way at that time? You can imagine what Mankind would have achieved today.

So the show, the presentation in London is the same. We are not putting one wrong and one right, we are putting two together, to show it has to be together to exist. Teaching of today will cover that part, you will understand. You'll come to see, and in a way, you come to appreciate life and it's cycle. So join us in London, and see the change, and bring the change. And one day, your Soul in Space will say, "I was there when it happened." As I said, we had generosity of one of our Knowledge Seekers, who donated, and we covered that donation by half of the expenses of the. Very few people. You have to write to Keshe Foundation, pay the 5,000 and put the other parts, as has been announced, it'll be covered by Keshe Foundation. (:22). Saturday stays the same, we will, as we said, we'll stop registration for the Saturday. As of next week we start the invitations. And we'll come to you as Knowledge Seekers, those who we trust, to support, to help, to organize, everything that in London we have a smooth show, a smooth running and presentation. And then from there on, as we always done together, we build the next step.

Very good news is that, as you know, UBESUS were offered as a huge bird, huge machines. And those of you who come to London, you will see them. We are shipping these two systems, Material and Body Enhancement, to be present in exhibition in London. So for the world to see the development. These two units have become very cumbersome, and it needs a lot of technology and the things, and a lot of teaching. We have brought the technology from 3 years ago, when we showed them for the first time in Linz, to a new advanced position, to a new system. We've centralized everything. And from this week and next week onwards, those people who bought the UBESUS from the Keshe Foundation, we'll start offering ?? the technology worldwide. In... they become a...

<< audio cut >>.

What you see in going to these places, will be something very simple. You don't need to carry anymore, what we call, the huge systems, and all you need to see, and you'll see in the, what we call, the positions of the places where they have received licenses, such a system. (shows a pair of headphones in screen) (:24). This is the new system, we show it for the first time in public, that something like this will be there. Those of you who came to Linz, you have seen part of this operation by sitting in the UBESUS and holding the two, what you call, electrodes. Now it's changed to this. We showed a different version of this in the teaching in Manchester. This system is self-sufficient. And it only goes to people come to agreement with licenses and about 6 - 7 of them will pop out. In next 2 - 3 weeks, we start promoting their use by the people. You have to go to them to get access to come through, we call, UBESUS, or anything you want to test. Where to? Whatever else ?? emotion, you have your ??, and whatever.

And this is the new technology, in a way, is connected, as we said, through international wireless system of the Keshe Foundation, to our system. We monitor everything. We see and we test everything else. It's very interesting that you touch it, we feel it. We see it. In, as you know, last Monday we ran the, what we call, the "signature of your Soul," that you could see. And one of the Knowledge Seekers was holding in his hand, trying to boost his Soul, whatever, a glass of Gans water. And it could be seen on the system. We stopped the session. I went back to him and I said, you have something with you which is interfering with our system. He said, I'm holding a glass of Gans water. (:26). I said you cannot do that, you cannot cheat, try to boost or change your Soul, while you're measuring it. And then the next session was with his wife. He was holding the headphone on his, but turning on the mobile of his wife. We could see that. And so everything is monitored. There is no wire connection, you don't need to plug it. Once it's there, it has to be accepted, and we can see it, and we connect it. We can give it time of connection, and everything else can be organized.

So, we come a long way from those, what we call, units of the, what we call, Keshe Foundation, which you saw. The big UBESUS was kept as a center point, and the structure of them is now become one system, runs the whole operation, and we can control everything else. Through this, you'll see. I'm sure this soon become the grandfather of the new systems to come in. We already see what the next step is going to be.

The headphone is connected to the, what we call, the stand, and inside, connected to our system, in what we call, central server. So, from now on, you can go and say, "I'm coming in to be tested, that I can taste banana. I'm coming in to be tested, to get this." And then, we see how we can adjust and give you that taste and the energy. You want to become, not to eat, we can test and put it through. That you put the headphone on 3 times a day, and once a day, it becomes your food. (:28). This is all coming in the next few weeks and months.

This is the technology you'll see in London. Knowledge Seekers in Manchester saw the prelude to this. And it's the first time we show. This is the Combination Head Unit. And it will bring changes. The system you buy as a Head Unit is different than the unit which is for the UBESUS. The other units which are connected to this, each one is set for a specific program, for a process, and we connect it to different machines. Therefore, in the coming time, in the next few years, what we see, ?? lives in the corner of the house. It will feed you, keeps you healthy, elevates your Soul. Even can, in the coming time, allow you to the transmutation. As we have shown, as the system has been brought up, we'll go to the next step.

This is a change where you will see, this is what we'll show. Ambassadors can put on their head and get in touch with the presidents and their kings. We'll bring this to reality. And then many, many more systems you will see. We have to face the change. There is no choice. As I said, man always spoke about Tesla and Edison, but man never considered the beauty of the two knowledge's and technologies they brought together, brought mankind to where we are today. We transport through Tesla, we deliver through Edison. We transport through the transmutation of the Soul, (:30). and we deliver the physicality through the transfer of body into matter state. There's no difference.

Now we see, in the body of the man we breathe, we take energy in the lung, through our nose, we take the energy through our mouth. What is at the highest level, energy fields in the dimension (D) of the air we breathe, passes through the back channel, near the Soul. The Soul takes the energy it needs to charge up, to expand. The material state of the gas in the lung, become the source of energy for the Soul of the Physicality (STP). In a way, when you plug your phone, when it's flat (battery discharged), to the wire system of Tesla, you bring that energy for it to charge up. Slowly, slowly, in one or two hours, it charges and it becomes full, and then you say the phone is ready to use.

The same thing happens to the man, as I said before. Knowing, understanding technology of today, they tell us, after we breathe how many times, a million, two million, whatever, during the life cycle, on average, we die. Which means it takes us two million breath, let's say, to charge up the Soul. Now we understand why we breathe. We gather the energies and we charge it up. Slowly, step by step, every breath we take, it charges the Soul. (:32). Gives the energy to it, to exist and to expand its energy span. And what goes in our body as a gas, in lung, as a lower level energies, become the energy, the structure of what we call, the physicality and the STP of the man.

Then we understand, even the food we eat, we continuously create that condition for the physicality as an energy to exist, while we are still boosting into the Soul and boosting, creating condition of the fields interaction between the STP and the Soul of the Man (STM). Then we understand why we breathe. Then we understand why we eat. And then, once we understand certain level energies are needed for the Soul to expand, and certain energy levels are needed for the STP to be able to control the expansion, then we understand the secret of life. We need the two, the higher order and the lower order, the proton and the electron. To keep life, to keep confirmation of existence.

And now we understand, if we can create a condition through these headphones, through this structure, that we can feed the STP and the STM at the same time, do we need to die? Do we need to kill to eat? And these headphones are set to do that. But we control, you go to shop to buy food, to eat, and the air is free from the Creator you breathe. He doesn't charge you for it. (:34). Maybe soon some governments even tell you after 1 million breathing you have to pay for it, because now we don't need the resources of the food and water and the rest of it, they'll find a way to tax us. Death, tax and birth, are the 3 only guaranteed things to the man on

this planet. But soon it becomes no death, birth with no taxation. Because they can't tax you when you're in the Space.

In so many ways, the London presentation will bring the first step to the understanding of the reality. And then, with these systems, as we spread them more and more around the world, we'll come to understand, we really become the man of universe. In a few months time, in a few years time, as we expand the technology in conjunction with the Chinese central government, we'll bring the changes that the nations will not understand what National Food Security means. Nations will not even consider hunger. Nations will not even consider drought.

We plan to show some amazing things that you feel, you taste, and you touch in the London show. In a way, some of you become the ambassador of the knowledge. And then we allow the world to assess where we go next. And we'll see the evolution in science and technology on the 11th of November. We bring it out. We show the MaGravs. We show the other side of the technology, which brings everything the man needs, but in dimension of physicality. (:36). But interesting enough, MaGravs will be there. Even though, you cannot see them. The knowledge of the Star Formation (SF) will be there, where the man become man of space.

As I said to the Knowledge Seekers, who were in Manchester, we'll bring you in it, you'll be part of it. And, for the first time, man will understand how we feed him, how we give him the Oxygen, and how we give him the warmth, in the presentation of Saturday night. You'll become part of the Spaceship, you become part of the structure, to see how you will live in the Space. How freely, the materials of the universe, are at your command and at your disposal, without any taxation. As I said, I wonder how many of you will come in with all sorts of conditions, from cancer to the other, and how many of you will walk without it, during the session, or start the process of it.

London presentation will be a change in the history of Man. And the beauty of it is, it's so simple. The simplicity of it will bring shock to the world of science. But in a way, it's the science of energy. It's not the science of matter. Man has become good in controlling matter, but man has never understood how simply he can control energy. The beauty of it is, if your body can maintain the most powerful plasma, that it becomes a star in the future, (:38). how difficult can it be for a man, who's a beautiful replicator, to do? The beauty of it is, as you've seen, I gave life to Naomi, remote from behind in the window and we see her back with us. I didn't make the system. The father did. The same shall be with the London show. I don't touch any system. It's done by the Knowledge Seekers. That it does not become a magic. It becomes a knowledge. It becomes a technology, which means it's transferable, not only for a human, but for the whole of the universe, as the knowledge will be transferred.

In the coming time, you want to go to China, you go to the Headset, you arrange to learn about the world, the emotion, the beauty of the Chinese language and the culture. When you arrive in China, you understand what the joke is. If it's said, and you don't stand outside seeing the Chinese laughing, and you're looking at the ceiling. Because, the knowledge of the emotion of the language, and the language is transferred. In a way, we get the whole encyclopedia of the knowledge of the nation. The culture, the race, be it on this planet or in the Space.

These units you see on the table, on your screen, is the beginning of that change. And I'm sure our Israeli scientists, with the Japanese copying machine, and with the mass production in China, (:40). soon these will be small enough to be implants within our body, where we can expand our Souls under our control. Where

we decide which part of the energy will go to the Soul, as the lung does, and which part of the energy will go to the physicality, and the STP, as does our stomach and digestive system.

There is one point, and this point will be, ?? the world leaders, there will be no more religion. And we all will bring in the Creator, because we connect to it directly ourselves. As I said to American politicians, as they say, the way to the emotion of the man is through his stomach. The way to the Creator is through his Soul. And once you have the connection with the Creator, which is you in part, do you need ?? fake intermediaries, as Ayatollahs ?? . I've been told a lot of time, "why do you do and why do you say these things?" The truth is, that the teaching of Muhammad, or teaching of Christ, blessed are their names, is perfect. It's what is needed to be what the life in the dimension of physicality. Those who call themselves the beholder of the faith, abused it. And that's where the change comes. Now you have access to the source of the energy. Do you need transformers, (:42). and the intermediaries, and Ayatollahs, and Mullahs, and priests and rabbis, to put in what suits them? Because they can get their hands on your pockets, your children, and your life.

I had a beautiful experience in the past few days, which brought this much closer to me, to my understanding. We had to attend and be present for a funeral, and the services of the funeral. And what we call, the preparation for the aftermath of the funeral. The interesting thing is the family was shopping from ??, tuna, to a specific drink that was asked for, the specific, God knows what, for the nuns and the priest and the clergy for the funeral. The nuns only want tuna, and they want a Schweppes, and not Pepsi. And you have to give to the priest, a special towel, and to what length. And I thought, "my God, how commercial God has become, you and the nuns decide what you have to give, that the Soul of the dead can elevate." Now we found a way, through the "mermaids in the cans of tuna." This is how ridiculous the name of the religion, through their people has become. (:44). I stood and I watched, as negotiation was going on between the mourning family and the nuns, that they don't want this drink, and they want the other drink, and this is how it has to be. I thought, "God, even God knows the taste of Schweppes."

And it brought me back memories. I was a child in Iran, very young age, when the Schweppes brand came to Iran, after Pepsi Cola, owned by the same family. They brought the beautiful song, added to it, to bring the new drink into the market, saying how beautiful it is, and how it touches the heart and the Soul. And that song of the promotion some 60 years ago, brought me back to the nuns, and how they understood, they get to the stomach of the man, and these guys understand how to sell the Soul of the Creator. How to cheat, in the name of God. And, the funniest part was, that it has to be delivered the day before. Otherwise, you won't have the blessing. Now, you can see, scale it up to Ayatollahs and Pope, and you see how fake the whole structure of the religion is.

And then you understand, the freedom of the man comes on the 11th of November, the day of the peace, but the peace between the STP and the STM. Where we start showing that is not held like by rabbis and the thing, the secret in the temple, but as the truth that every man has access to that secret, which is not a secret anymore, it's a secret of life. (:46). How you'll survive in the depths of universe? What energies we have to take, will feed our Soul, and what energies we need to take from the environment, to allow the STP to exist within the Soul.

Would it be interesting, which I'll teach you in the coming time, is the fact that, the STP has chosen Calcium, as a cage, the ?? hole, the Soul within. And, is keeping it in, with the feeding in the small bits, from the energies from the brain, as emotion. I wonder how many of you can think, and can understand with the knowledge you have today, how would the STM engages the STP inside it? Would it make in another cage of Calcium for it to stay inside it? Or would it create a dimension of the interaction of the fields? That the

separation in the fields of gravitational and magnetical creates that boundary of existence of both within each other. This is something which man has not understood, and in the teaching I have referred to it a few times, but as you are Knowledge Seekers never understood, maybe for the first time, maybe for the last time you understand, some of you may be enlightened in years to come what it means.

The interaction of the fields, between gravitational and magnetical, creates an immeasurable fields containment. (:48). And this is what the world of science have not understood, at all. Because in the world of matter, we use a matter field energy to handle the matter. << audio cut >> become impossible. No ?? fusion of the plasmas ?? as fields, is amalgamation of the magnetic fields together. And how you elevate, how you energize, one plasma with the other. You pack it in, to give it the strength, you don't hammer it in to confine it.

If you understand this, you understand something very simple. And it is the fact that the energies of a very low, very low strength are the feeder of the STM. And even in another lower energy fields, are the feeder of the STP of the man. We don't take in a Hiroshima bomb on every breath we take. The secret of Creation is in nothingness, and the secret of man is in foolishness. That it has to be more and bigger to be more powerful to do things. Where the Creation works on the lowest and the softest and nothing else.

And this is where, as I said, Tesla meets Edison, where material condition leads, what we call, the energy. (:50). We don't see huge pumping winds and we don't see huge motors running Earth rotating around the Sun, very soft, very low, very literally, fields that we cannot even feel, has been feeding the Soul of this Planet, and the physicality of this Planet, and the STP of this Planet, for billions of years, little by little, the weaker they become, the stronger we are.

There is more energy in low level magnetic fields than has ever been in the highest strength fields. We showed this in Inzano (Italy), we can create some of the most powerful fields at 129 Tesla. But that is for different dimension, that is for matter state of the motion of the physicality. And we have shown with this headphone, the lowest of the low can feed the man. You don't see nuclear power stations in these headphones. You don't see generators running in the system. As always said, dogs with dogs and birds with birds. Dimension of physicality works on its own way. Dimension of energy has a low level of strength. And now with this you understand what is to come.

In today's teaching you already have. If you understood the essence of the teaching of today, I opened to you the secret of Creation. How to maintain your Soul, how to feed your Soul, how to live with your Soul in every dimension in the universe. (:52). You don't enter a nuclear power stations to transmute your Soul across the universe. You use the low level fields of the universe to interconnect. To be able to transmute, to be able to feed, to be able to exist as part of the world of the Creation.

Always remember, you take a breath, and now you understand how, by breathing, you control the freedom of your Soul. And how, by the same breath, you feed the dimension of physicality. I remember I told you about an Indian guru who came, and he said, 21 days he hasn't eaten and he's done that seven times, and that's why he's a holy man. I told him, he's a holy man of lies and cheats. Because, sitting in front of me, six, seven years ago, in the Inzano, I was aware of the same knowledge that you received today. and I could see how he cheats. But, he never elevated his Soul, he found a way to cheat, to take the energy in the lung and convert it to banana, to water, and to what his body needs, and he became very holy.

So now when you can use these Headsets, when you start learning how to use your Soul, you all become a very holy guru, in the dimension of those who wanted 21 days, 7 times, you can live this span of this universe for millions of years. Then you can claim to be whatever you claim to be, as this guy was worshipped, (:54). even when he came out of the... he was so big, out of the... one of these ?? conferences. The guys who brought him, nearly became the step for him to step down on the ground. He was so holy he could not even step on the ground, because he hasn't eaten for 21 days and he's done that seven times. Another cheat, another religion, so called faith and belief.

With this technology, there is no gurus, there is no cheaters and there's nothing but between you and yourself to cheat yourself or to, in a way, serve yourself. Knowledge is free. You have to understand it. As I said, we are not Prophets, we are not Messengers, we are teachers. We are Universal Teachers, we understand the work of the universe. And we start teaching it, for those who have not understood the secret, that no one becomes the cheats. No one kills in our name, in the land of Iran. Crime against God. You are Godless people, running a nation. As God's knowledge is within every man. The same goes to Vatican and the rest. Now you have the knowledge. Now, if those who are imprisoned for grave ?? claimed crime against the Creator have this knowledge in the prisons of Iran and the rest of the world, and those who go to churches and get imprisoned in another way by the police, then you can move from these prisons, (:56). be it psychological, or physical.

Now you understand this Headset. This is the beginning of the change. This is where Tesla meets Edison. And both are right. Both have served the same way. It's the same with us. We have to understand we have a dimension of physicality, and we have dimension of energy. And for the first time, we learn as a way, as a technology, how to connect the two. These are the tools for you to learn. These are not tools for you to be addicted and connected to. With the Headset brand of, "Sony will be better than Phillips." Then, you already have brought separation between your own Soul and the others. As the STM, in every shape or form, from the king, to the president, to the sweeper on the street, knows no "Sony," and knows no "Phillips," and they're all the same and equal.

Now you understand the change which is about to come in, and the change you will see in London on the 11th of November. You will feel it. Those of you who were in Manchester felt it. Traveled to the Moon and handle the dust in the back pocket, or ?? boulders in your hand, trying to put it on the table. And not just one of you. So now this knowledge and the expansion will be shown in public. Now you will understand the depth of your own knowledge within you that you have ignored. (:58). But this time, the spaceship of humanity in London will travel together.

And I wonder how many of the 500 people in the auditorium will go to the same place. As I said in Manchester, you went to the Moon. Was there a placard to say you arrived on the Moon? Or is this the universe that your Soul creates, and this is the way you want it to be? Those of you who went to Mars, did you see a placard or a voice saying, "Welcome to Mars"? Or was that emotion that you are ?? the planet? Is that the planet that your Soul will create? Barren, and no fields to allow life?

With this understanding, when you elevate your Soul, when you understand how to get to the field of the strength, to change a, what I call, deserted island, into a heaven, then you decide, "what I went to is my Soul." And, "would I like it to be barren and nothing in it? I collect sand in my pocket." Or, "do I make it a heaven for the lives and the Souls I create from my Soul?"

It's very interesting, when people were in Manchester, or people were in Linz, when we told them to go to the Moon, they all said they went there, they picked up a stone, they had a dust, and they could walk and hop. Now, as I said to you, "did you see a placard to say, 'Welcome to the Moon?'" Did you see the American flag? Or were you lucky enough to see the Indians on the South Pole with their robots? (1:00). What you feel, you create. Was it the interaction of the Soul of your own, with ?? its environment? And it shows how much more you have to do, to make this barren land you landed yourself in with your Soul, become the heaven. How much more you need to do? How much more you need to get? How much more you have to be detached, to be able to change that barren land, into the forests and life that the other Souls which you create as children of your Soul, to enjoy.

Now you understand, as I'm sure many of you have done, where you all are going. And as I said, in the coming time, in the coming weeks and months, the technology will be shown in a vaster way, in a totally different than what you're used to. I wonder if the, what we call, the organizers of the exhibitions will ask us to stay permanently, where people from around the world can come in and walk into the spaceship of universe, where it flies, nowhere, but the man can fly with his Soul to all dimensions of the universe.

As I said, London week will be the week where the man will change. And a new history in the knowledge of energy of the man will come in to again be engaged by the physicality of a building. (1:02). where this UFO never flies, but this UFO creates the condition for the STM to find his position in the dimension of the universe in what we call, transmutation of itself.

London presentation will be the what I call, the watershed in the world of science. And the beauty of it is you'll feel it, you will touch it. As one of the highest ranking generals in Chinese army said, "it's on my clothes. How can I deny it? I'm breathing it. How can I deny it?" The power of the technology will change man on the 11th of November. No Prophets, and no, what I call, Messengers. Just teaching the Knowledge of Creation, and I'm one of the best teachers Creator could ever send. Long time been here, learned everything about the ways of man. Now man learns about the way of his own, to become passenger of universe. If you can make it to London, make it. Because there on, the history of the man will change, as is the technology and science. And not ?? a promise. We go for a break and we come back. As usual, we'll try to answer any questions.

>> **BREAK** >> 503 KSW September 14, 2023 (1:11).

K- As you always say, "We're ready, willing and able."

R: Okay, well, we might have some challenges here. We have...

K- Nothing is challenge, is to understand it.

R: Okay, let me see here. I have a couple of questions in YouTube and...

K- There is something I have to correct. (1:12). Sorry about that. In the last week teaching, there was a refer to Dean, feeling the system of what he said to "One Planet, One Nation." We knew we have no system outside, and the system was within always Keshe Foundation team. And we saw the inquiry and other things which happened in the background, and we found out actually Dean had a chance to test the new system. I didn't know about it at that time, he was... As you know, Dean is now resident in Linz, and he spends a lot of time in UNO Center. And it happened that when our people went to UNO Center to put the replication unit for demonstration, he was there. And one of these Headsets, not the bottom part, but the Headset itself, was carried by our guys. And Dean, what you call it, Dean was there. And he was given a few seconds to put this on his head, and he felt the change. And now we understand, I apologize for Dean, now we understand how it happened. He is one of the, more or less, the first person ever been being just present and being always as part of the Keshe Foundation team there, and with our people, with Mario, had a chance to have a taste of a few seconds of this new system. And so, as a member of Universal Council, when he talked to, what you call it, One Planet, One Nation, (1:14). he was talking from a few second experience with these units, how effective it is, and how it works. And I was not aware of this, because we knew no unit was put outside, nobody had.

And ... it's very interesting how things turn up, and Universal Council member has to be there to have the first taste of the, what you call it, energy of the Creation. Anyway, now we know how it happened and it's very interesting. You don't even need the bottom part, the what you call, the housing, for you to have a connection with. The housing was kilometers away from the Headphone. And, as I said with our guys last Monday, we could see, we could measure, the guy who had something with him, and he was interfering, and it was with a cup of Gans. But these systems are becoming so reliable, and this is just that, what you call it, "infancy of the knowledge." The Headphones, the pieces we have made, the unit you've seen, become, has already become museum part. And it's very interesting to see what will be the next, and how all of you will feel in London when you come out of the meeting.

Any questions? (1:16). ...

Q: ... Good morning, there are rumors going around, that the new Head Unit is no longer tied to people and can be used by the whole family. How big can the family be - 4, 7, 12? A village or even a city? Can you please tell us something about this?

K- There are different versions of the unit. And even we are discussing it in Keshe Foundation about allocations of it, and how we allow separate systems in operation. We have shown in Manchester, that we could share, and we have confirmation of it, the Headphones amongst people, from different parts of the world. We had people from Australia, we had people from Germany, we had people from United States. And we shared this Headphone amongst them, because we had only six. I mean, and as you know, we had more than six people in the meeting. And the technology has reached a point it can be used (shred).

And how extensive we'll go next step with it, it's something we were discussing. How the... there is one central unit. In a way we have created a system, we call it, the central server. How much can we accommodate, (1:18). is something we'll learn in the coming time. When I designed this system, I looked at it as the Soul of the whole Creation, the creator of that Soul condition. It has the capability of not only the man, but the universe to hold within it. It's very interactive and we can control all aspects of it. We can cut out lines, we can connect lines.

And these things in the coming time will become what you call it, more apparent. There is no limitation in the use and there's no limitation in how many people can use it, but the limitation comes that we control the feedback and what it is. You've seen it how with the headphones we disconnect in sessions your microphones. We have the same capability with the systems. So anybody tries even to make a copy will not link into, because there is a way we have linked these units to our central server, or what we call it, station. The problem will come as these units and a point you have is connected to how to you.

With the, what we call, the Wellness side, we have a way, without actually our people knowing, (1:20). I've built up a way into it that we do not transfer anything one to other, but we break it up at our center system. You don't have that facility on these headsets. So my way of thinking and what I understand from technology, keep it to one or two people. Don't forget you're bringing, you're ?? ingraining other things into it.

It has to become very much, very much, very much like a mobile phone. You don't share your mobile phone with other people. This mobile Headset works in a deeper way. And I so recommend, unless we control it from our end, we know what's happening from our end, do not share the Headphones. At least till we know more how to expand it and bring control in it.

In the Manchester event, I set the things deliberately, that even your system washes out, in a way it is clean, when the next one touches, next one comes in. But with your unit, try to keep it to one, to one person. You can share it in the family, you can share it, but the... we have to have the security of the knowledge and not to create a fear, or what I call, rampaging.

The system has... the way it's built, especially the new Headset and the Stand unit, carries a diversity of effect, (1:22). and I suggest for a time being, at least next year, two years, stick to one Headset, to one person, or maybe husband and wife, but don't go beyond that. Or if you have two units at home, try, because some people bought one unit with two Headsets, yes you can do that, but if you have two individual sets, especially if you're husband and wife, try to see how you can communicate with each other. For one of us to become the electron and the other one the proton to feed and see how you can reach new levels.

In the test we've done, especially last Monday, we had couples, we have, we had 2, 3 couples with us and they came one after another. And from the printouts, we could see how 2 couples are opposite to each other. And from the outcome, we could see why a couple have come together. The Souls are so similar. And one fits and the other one.

And so, if this is the way we can do it, I advise you not to share. We gather all the beauties, and we gather no faults. But it has to be understood. We have to become more knowledgeable. (1:24). And the knowledge has to come through our team to understand more how to do it and bring a perfection into it. But essentially, when we built this system, the what we call, the master, the central system, I built it with a view of creating one unit for the whole of humanity. And that unit has already taken shape. It will be changed, we'll change

pieces in it. But the confinement of the fields will stay the same. It's like, you know, you change, just because you change your kidney, it doesn't change you. We can change part of this. We can take a leg out and put an artificial leg in or whatever. It still functions.

This system, in this structure, in the future, will become the central operation of the whole humanity, or life on this planet, dogs, cats, and the rest of it. But essentially, at this moment of time, we do not have the support to come to put it into right across. In 6 to 12 months time, in the space, since we are getting involved into build, we go for what we call, satellite system, which is outgoing and not incoming. And then another satellite to take the incoming, not the outgoing. Which means it's very much like antennas of today, but separated on the field strength. You send in one satellite, you receive another, or you build a combination in satellite two together. There are a lot of factors needs to be done.

And so, for the time being, even though we have started using the doctor's unit, (1:26). it's a separate unit, because it goes to a different system to come to the central system. That's why we can specifically, for the Wellness, target certain positions and things. And even that, our doctors and scientists are learning, have to learn. And going to that point, our team of doctors start increasing from this week, next week, to more and more who work with the central position. And then the, what we call, the service has to be spread around the world that everybody can use it. And all be connected to one master system, which is already in operation.

So my advice to you is, use one system per person. And if you have two systems at home, try to see how with the system, without the system, you start interconnecting to each other, feel each other, know what you want and what you do. And don't put it to chance. You decide to make a bacon egg at 12 o'clock at night, you see your partner say, I'll come to the kitchen to make the same. Then you get your confidence. Then you understand, you start. You don't need to talk.

I have that now beautifully set up. And don't need to talk. Not much. (1:28). And it's a beautiful position to be in. And don't say, "oh, I just thought about it. I just thought to myself, there we go. The Souls understand each other." Because you get a ?? fed up saying, "oh, I just think, oh, I've just did." I was thinking about the same, no more, it's just now, it's another way of life.

And, the new structure allows it to happen. Because we don't need the headphones anymore. We passed that point. When you establish links with, even with a few Knowledge Seekers around the world, I've had that situation. It's emotion, you feel through the Soul, you build that link. And it's, what you call it, for time being, we advise you not to. Till we have the whole package, we understand the whole package, our team can set up the whole package.

We've got to understand technology is moving rapidly. Very, very rapidly. And what will be the next step, and how we expand it, it's... How much we get feedback, how much we get back from the knowledge from you lot. I don't need to speak to my partner anymore. As I said, if you feel truly in love, you don't need to make love. You're always in a position of being loved, that you don't need to make it. In this, we want to see when it comes across the couples who have the units, (1:30). in what they report back to us. And these numbers are increasing, we start producing. Those of you who, for the reasons now you're receiving your unit, then you tell us with your, as what you call it, service centers, how feedback you get from your people. And we'll see how it goes to the next.

A list of people who become, what we call the, licensed service points, will be released in the coming time, with the permission of themselves, that they can go through, them to get the, what we call, the services of the

Wellness side of the Keshe Foundation. Do not use, or think, "I can use these Head units for what I want." We specifically ask you not to do it, because you'll understand very soon why. It's a ?? board for, or set up for individual use. And keep it that way, don't even let for a time being, your partner to use it, until we understand more about you and yourself, and how you understand to use the systems. And would it bring some of the partner's things to you. That's the whole thing when you share it. With the health side, we have a full control, because we use a, what I call, integrated system with it. With the Head units you bought, which is now coming out, is set up for individual cases. (1:32).

Any other question?

Q: ... Where is the best place to place the Compact unit and why?

K- Best place, try to use a wooden or a natural material. Don't use it or don't place it where there is metals, because they interact with the fields. And the problem with the metals is, it interacts with one part of the bandwidth of the magnetic field strength, and not the other. So, it, it changes the balance. With a natural material like wood, it still has a Soul, it's still, if you understand, it's a Gans structure. A metal, it's like a filtering at certain bandwidth of the field strength. So, try to use it in the normal places. Keep it away from rooms where you have your MaGravs, your stereo system, your Gans's and that kind of thing.

As I said to you, this week, when we're running the test, a guy says, "this guy is carrying something, we see it." Something is not right, compared to the other ones we always have. So, I had to stop the session, go to him, and says, "what are you, what you, what are you doing, what do you have with you?" "Nothing, nothing." "What are you holding in your hand?" "Oh, a glass of Gans water. We were picked that up." And then, (1:34). when it was the time for his wife, I could see the problem. And, being typical man, he puts a headset on himself, and gives the phone to his wife to hold, with the her number. There's no connection to the wife, because the session for him was finished. He wanted to see what the wife does. We could see that. So, try to create a natural environment, because the universe is natural, everything else is a filter. And, work with it.

Many of you will change in the first few days. At moment we are... We start sending out the units for our license agreements. And as we come we start delivering, changing the units only for individuals. Do not pass it on. Try to keep one unit per person, and then we have no complications. And we set the units to one use structure, and we'll see where we go.

Any other question?

Q: ... Are the new Head and Compact units constantly in operation and usable? Or are there certain times when they can only be used?

K- We will allocate time. We will allocate time. We will allocate time per person, per use. (1:36). There will be a time allocation. Because when you come into the service center, we have then the same problems all of you have with your Home units. We already started doing this on the Wellness side. We give certain time access to people to come in certain time. And they come in and go. They don't need our doctors in the background. This has taken, this is something we tried very recently. And it works. So you'll be given a time, this time to fit you, this time to this time is you can, in the future, come back and say, "I would like to eat between this time and this time." And, we'll try to adjust and ... we provide a section for the energy facilities for... to be a feeding time. You could be in the desert, you still get fed. You could be under the sea, you still

get fed. We will allocate time. When we start sending the individual units out, we give you allocation of time and you have to be in that time zone. frame.

Q: ... They said that the old units would provide a 30% electricity saving. Have the new units become even more effective in terms of electricity savings?

K- These are not electric units. These are communication bundles. If you see, there is no wires going in and no wires coming out. (1:38). They become totally to do with the... What will be interesting for us, we're coming to winter time. We want to know, those of you who get these bundles, if you report any cold, how you feel? Do you feel warm all the time? In a way we deliver the energy to you.

And in the future, we deliver certain systems, miniature systems, very minute system, which you can put around you in the house, that creates the warmth before the condition to be warm. It's no use you being warm by the water, ice is up in the room. This is all coming in next few months. The communication bundles is communication bundle. The energy communication bundles they are already obsolete. We don't put it in, we separated it. But in a way, it can be done very soon as one bundle. The technology development is so rapid, it's so rapid, that I think even the things we put out now, will be more or less, the grandfather to what will be here in next year, two years. And once we go to the 11th of November, we show this technology. I think we'll see a huge jump in worldwide development.

I can see, at the moment you'll like have masks that it covers. (1:40). These masks cover the cities with the communication lines, with telephones. It's not far, in next maybe two years, four years, we'll have the operation in a different way, but you ?? feel the whole city. I was talking to one of our beautiful Knowledge Seekers, before the teaching starts, and said that the guy is such and such a medicine man, and if he uses his bundle he can lose all his customers.

The fact is, once we start mass releasing these systems, a lot of businesses, a lot of technologies can't exist. We have many doctors without a job. We have many supermarkets without customers. And it needs a lot of adjustments for our governments. This is a revolution in science, and how we're going to handle it, how the governments are going to handle it, it'll be very interesting. Prisons empty, judges who have no one to convict or to sentence, as nobody does a crime when you cover a city.

These two first cities are like this, already on the plan, and soon will be constructed in the beautiful country of China. Next two to five years, we'll see cities with no hospitals, we see cities with no jails, no judges, no supermarkets. And the Keshe Foundation is behind the construction, development of these cities. (1:42). And the third one we built in the beautiful city of ?? Natanz in Iran. And we will see the effect of it, in how we change. Cities without light, we don't need any light, as the interaction of the fields with us will create a light in what we want to see, there is no distance to it.

And our target is, as I said, those of you who are buying electric cars, in next two years, Keshe Foundation will endeavor to launch back in the flying cars. Now the technology is ready for it. And you will see, if you don't want to travel with the Soul, how what you call it, the plasma cars, will become part of the structure of life. You don't need no Tesla batteries and the rest of it. Because this system don't use any energy. It's feasible by 2025, we'll market this out of China.

We tried to show it in Amsterdam on 26th of November 2011. And the criminal nation, the government of Belgium, tried to stop it. And we showed this power a week later by catching the American drone. This time

we show the power of the technology as mass production. The political change with this technology is huge, and as now it's getting produced in different locations, it cannot be silenced, it's not killing a scientist and it stops. (1:44). And it'll change us, it'll bring that dimension of change.

And it's how government will change, how governing will change. How do we pay taxes? Do we need to pay taxes? And you pay tax if you are a citizen of a nation. Now, you live on Mars or a Moon or wherever you go. There's a huge change. You've got to understand, in the next 10 years, the way we release this technology, and millions of you know how to do things, if anything happens to me or around me, the technology has been set to be released internationally in a different way. We don't need governments to govern us, we govern ourselves without governments.

And one of the most beautiful thing with this technology, which some of you might have understood and some of you haven't, is, we kill the greed and jealousy. It's because it satisfies the Soul and in a way it touches the emotion. The greed will come in how much more I can give, how much more I can serve, how many more people I can help with. And this will change a lot of things in you, all of you. (1:46). When there is no animosity, there is no jealousy. And you look at the hunger. I always looked at and always speak about it, but maybe you never understood, how much when you put that headphone at home. Jealousy, wanting what the neighbor had more, how can I have the best house, how I have the best car, will all be done. Because you found the best companion, which is your Soul, to satisfy all that.

In the coming time, whatever you imagine you create, so you create to show to the others, I have better to serve you. Would you like to learn more? Maybe you can serve the others with it more. And that's how it's been the ethos of the Keshe Foundation. Now you understand what we're coming to scientifically is what we taught for decades, as knowledge.

The biggest gain for mankind is evolution in emotion. How you evolve. You are not jealous of what other one has, you don't want to have what other one has, because now you can create it yourself. Then, you don't commit a crime. Then you don't do things which is not there for you to be. (1:48). So there is no crime, no punishment, no... everything else is done by you. And this is the beauty of this system. I was telling one of our Knowledge Seekers, I've got the humanity by short and curly, if you understand the image. And you'll change. A lot of emotions in you become irrelevant. And then you find new dimensions, a lot of ?? things, which is the way of Mitra.

Any other question? ...

Q; ... I am glad to meet you again after so long. I was in holidays and I was not able to reach my Internet, where I have been there. My question of course is related to the conference for Peace with the ambassadors in London. Can you update me, because I am not updated, how is new and how I can help at the Soul level to be possible to have this? Thank you. (1:50).

K- We talked about it at the beginning of the teaching, you can listen to it. It's all on the move and everything else with it, we'll go back to the Knowledge Seekers and the Universal Council and those who want to be part of it. To take, as I say, it's a "big carpet," organizing such organization, such a meeting, to we as Knowledge Seekers collectively bring our people and technologies together, in London. Listen to the part of the teaching, you, I think you get more or less the whole what's going on. Thank you very much.

Q: ... And I have another question related to this communication at the Soul level. That from the very beginning you, me, and other Knowledge Seekers we just communicated regarding the pandemic and the truth about this. I know from some information's that what we assume it is true, and what you teach us about this is perfectly true. Look, this is the proof that at the Soul level we can find and see the truth with the eyes of the Soul. This is my opinion about all what you teach today, as I learned from you. (1:52). And thank you very much, because you teach us how to find the truth. To communicate with our Source, this "bio Internet" of all the Souls. And your Unit, just put all of the planet together, in order to find the truth about our creation of the universe and creation of our selves. Thank you very much.

K- Thank you very much.

There's something I've been trying to tell you Knowledge Seekers for past few weeks and is partially irrelevant to what we do here, but can affect you without you knowing. Knowledge Seekers who we are in any shape or form, any shape or form, have transfer money, or travel to Turkey, and now United Arab Emirates has come under the same flag. Be very careful, as without us knowing as citizens, governments in the background instead of calling it sanctions on Turkey like they did on Iran, they have created a network of sanctions. Which can effect you in even in your banking system and your travel and movement. At any cost avoid going to Turkey, or sending or receiving anything in a way with Turkey and United Arab Emirates. (1:54). You will understand where your problems starts. Up to now, on nations like Iran and North Korea and Venezuela, whatever, Americans brought open sanctions and we all knew. Now they have come up with a new technique and tactic.

They cannot play with Turkey and the United Arab Emirates because a lot of things are happening in them, and NATO doesn't want to lose them, put them on this, what you call, a frying pan. Because Adaman (?? leader of Turkey) ?? will show them jumping with Chinese and the rest, the whole thing will go. What we are asking or what we are informing you, because without us knowing Keshe Foundation was pulled into this. Absolutely without us having any clue, I never found out there's a new hidden, what we call, "blacklist." We're not talking about rumors. Keshe Foundation is badly and deeply affected by this. Avoid anything to do with the nation of Turkey and United Arab Emirates, traveling to or even going for holiday.

Even the Chinese government would ask you, what's the reason you've gone to Turkey. And they can refuse you a visa. That extent is there. And as we all look after everything, everywhere else, just be aware. And now United Arab Emirates has come under the same banner, hidden, because the reason for it is very simple. Turks in the United Emirates have hidden a lot of Russian money. (1:56). Or they do allow Russians to still carry on doing under the sanction. They can't put a sanction on them, because if they close the Straits, or what we call the "Moscow straits" with it, it can affect the economy of the West badly. Because we get a lot of Russian oils, or other countries on the banner of Russian oils. As they're running it, as I said, 50%, 60% of the oil jet fuels run by British airways, is Russian boat on the flag of India. So now we understand.

Please be safe. And unknowingly, don't get caught in these hidden sanctions. Do not send any money in any shape or form to Turkey. Do not travel to Turkey. If you are planning to travel to other... Especially if you are coming to the Beijing conference, you will find out, maybe your visa will be refused. And, the same is with Dubai, United Arab Emirates. It's become a central of fraud, money laundering, and the rest of it, and now, the sanctions have come out in a very hidden way, but not trying to shake their boats, as they call it.

Any other question?

Q: ... Is CO2 and CH3 plasma ionized? And what kind of fields do they exhibit? (1:58).

K- I can answer you in a very simple question. There is no ionization in Plasma.

Next question.

R: There's no ionization in plasma?

K- Yeah.

Q: ... Will the plasma technology, as a knowledge and technology, be used to accommodate other creatures in the universe, who would like to visit Earth, in the grand scheme of things?

K- Partially, they already use it, we are behind. And secondly, it's part of the natural process of the universe. We've been using it, but we didn't know. We call it, "it was a dream, and coincidentally I thought, I was just thinking about it," these are all the ways we deny the truth about the plasma of our own Soul, and it's interactions. Now we don't call it that, now we call it a new plasma communication. We are the late comers, and we still think we are the first.

Have you ever tried to get to a lecture, and you think, "oh, I'm going to go with the first and get the best seat, because I want to listen to this lecture." And you go about 20 minutes early, you find out you're the last person, everybody else has thought the same, they came in at 7 o'clock in the morning and sat in their seat. (2:00). And that's the story of man. If they're here amongst us, and if you're within them, and they manage to hide themselves well within us, I might go ?? over some ?? time.

And so, you think you're the first one knowing about the plasma? Transmutation through the Soul, is the new knowledge of the universe. Transmutation and transferring through physicality, is a different dimension, which is all been there, available. And it's a very big difference, in being able to transmute, than to be transferred.

Any other question?

Q: ... Hello Mr. Keshe, thank you for your previous answer about reincarnation and our fate after physical death. I would like to continue to ask, what is the fate of those who do evil and deceive others, after their physical death?

K- Find the dust, you've got the answer.

R: Sorry, could you say that again? (2:02).

K- I said, find the space dust, then you find your answer.

R: Oh, space dust, yes, okay.

Q: ... And beings like you, who can keep memory and knowledge of the universe, and are willing to help other Souls elevating, were they born by transmutating into their mother's womb?

K- I would like to keep that out of the ?? line. One day mankind knows where we come from and who we are. There is a state of physicality and there is a state of Soul. And as I said, even if you listen to the teachings, you know when the Soul of the knowledge speaks and when the man speaks.

Any other question?

R: Okay, let's see.

K- Have we finished?

R: No, there's a big package of questions in the Q&A that is, I'm not sure if you want to deal with it or not. Maybe you should have a look at them. There's several paragraphs of comment, questions and explanation of from Dirk Schemberg here, who says, "can you do me a favor and read this text after Mr. Keshe finishes his speech, because I'm in a noisy place." I can read it if you like, and you can stop me where you want.

K- Where is the Q&A? (2:04).

<<< In this part Mr. Keshe tries to find where is the Q&A on his Zoom, but he was not able to find it. >> (2:06).

K- ... Is there any other question than this, anywhere else?

Q: ... Can you explain what voluntary attention is, and how it fits into the interactions of STM, STP and physicality.

K- What is a voluntary attention? .. We deliberately try to pay attention to something?

R: Yes, (2:08). I suppose it would be where we pay attention to the interactions between the STM, the STP, physicality and where we're consciously, voluntarily placing our attention, as opposed to random things that our attention might be caught up with normally.

K- What do we do with it? I don't understand what's the question.

R: One is asking what voluntary intention is, and how it fits into the interactions between the STM, STP...

K- You're a master in the interpretation, ..

R: I think it relates to consciousness and how, how can we consciously direct the interactions, you know, how do we find something common between the STM and the STP, so that they can communicate with each other, so they can have some sort of...

K- We become naturally aware of it. It's a natural process, it's not teaching. It's a natural process. You'll find out your emotion, of physical, you're already aware of and then you ask yourself, how was I aware that this emotion will come. And then you find out this is the emotion from the Soul. It's a very interesting point, I think we've spoken about this before.

Like the way you say, (2:10). accidentally happened, and it ?? will come to it. But and the best word for it we deny the connection, the emotion, between the feeling of the Soul, and the feeling of the STP. The French have a beautiful word for it, they call it, déjà vu. But, we say, "I've been there, I felt this before." But in fact, that feeling is like, "I had a dream," and now we don't dream, it's a reality of the expansion of the Soul. Then, it's like say, "oh, I felt this and you talk about it now." Because, there is no talk with somebody else, it's within you, you realize the existence of two emotions inside you.

And, French have this beautiful word which actually puts it in context of two emotions, which we denied one. We call it, déjà vu, but it's not ?? there. Now we found out our dream is a reality, but in dimension of energy. Now this déjà vu is the feeling of the emotion of our Soul with the emotion of physicality. It's just not coincidental, that now we recognize the other one. The way you tell your partner, I am just thinking to tell you this, and you said it. Or I'm thinking to do this, and you're doing it. You don't say anymore, because it becomes ridiculous. Oh, you're going crazy. You're just making it up. But inside you, you know, you knew the partner is going to do it.

And you change your behavior. You know the partner is going to make a coffee, (2:12). you feel it, you don't say, "oh, I was thinking to making coffee" and you just come and make it. You go and get a cup and you put it in the front of her. She gives you a beautiful loving, looking, "how did you know?" And then it becomes closer. We have the same in our emotion of the Soul, and emotion of the physicality, and we always call it something, now we know it's you, it's us. And we don't deny it anymore, and we build it up, and we rely on one. I'm going to go, I don't need to ?? sneeze, as I said before, to stop. The Soul tells me, "just take time." And you ask the STP, "slow down this body, something's going to happen, at least we are not in it."

Any other question?

Q: ... About the fields of the Soul and the P test. Can you tell us a little more about the different fields which are measured?

K- We... we... A system has been built, we look at a lot of things. In a way, there are 12 factors in this structure. In combination of different ones, with different interactions we see. Tomorrow's session, with the what you call, the testing with those of you who come in with a test on your, what I call, "diabetic of love," put it that way. We'll see, you measure it and you tell us. (2:14).

In the last session last Friday was very amazing. We saw, and during the, or the end of the session, I could see two of the participants have cancer, or condition of pre-cancer, or condition of pre-cancer, which hasn't shown itself. And I said, two of you participants will see in condition of cancer. And strange enough, after the teaching, we received, as people were supposed to communicate with us, the confirmation of one of them.

But very interesting thing, which I'll discuss with the Knowledge Seekers tomorrow in the second session, is some of you saw elevation in the pH, and some of you saw a drop in the pH. Those of you who saw elevation in pH, going above 7, shows, and it's 7 and it goes to 7 – 8. It shows a movement up, which is need of change of salinity and what we call, manifestation of physicality.

Some of you who saw it going down, you actually got a blood pressure, a hidden blood pressure or a blood pressure. It's not that, because you didn't see elevation, you saw reduction. You do not understand the interpretation of the data and we deliberately kept this away, that people don't think they have to show. The only thing they knew, they wanted to see if the, what you call it, (2:16). salinity went up and it works.

We were looking at much, as was the question said, but if you go down, high salinity is the underneath cause of high blood pressure and many, many diseases. Those of you who saw, no, I didn't go up and I went down, it was a hidden question for us to see your health condition. And when you reduce salinity, you reduce blood pressure, you reduce a lot of other things inside the body. And this was the purpose.

And as usual, because we have to tell you what we are doing, you get a piece of mind of this. But, in a way, we didn't tell you the other half of the story. Because you can have a pre-set mind. And the same is with tomorrow. Tomorrow's session with the, what we call, sugar level, or insulin level, has two or three hidden data for us. If you noticed last time, we just pumped you with material. You didn't do anything. When I switch your microphones off and keep you off the line, is when we are feeding you. When you're taking from us what you need. It's not just for the... it's a one way. Our microphone to you is open.

If you look at the list of panelists, you see certain unit numbers as unit 1, 2, 3, 4. We are operating in the background through units to interact with your Soul. (2:18). And this gives us a data. And those of you who were in Manchester with me, I showed the data of you lot directly. And those of you who participated in the last Monday session, and to see the print of your Soul, you received it. And you know, you see it, but just don't look at the line you're interested. We're interested to see exactly what happens, how much you're taking from our units, how much you're giving back to our units, what change it brings, how balanced is between your left lobe and the right lobe, how balanced is between your back of your head and your front of your head. How much you have control of the feeding of your Soul.

These graphs, to you, even to our people who work on it, don't understand. It's a three-dimensional structure of your Soul when I look at it. Because the system is set up that way. We see a three-dimensional, and how you separated the front lobe from the back lobe, how you separated the Souls from each other, how you're feeding your Soul, how much you're taking from the environment, and how much you are giving to environment. And this is a part of the process.

The technology is so complete. When our people put this system together, my Soul is there. Even they think they are putting, adding something, because I'm there. It's their hand, but my Soul. (2:20). We are there to create a system to change humanity. And there cannot be any mistake in it. And masters never leave the classroom, till the last children understood and left. So, when you see how we operate, how we sit in the systems, we collect a lot of data. It tells me how perfect, efficient it is.

The system you get in is, it has a control, full understanding of your Soul and your brain, we call it. And the system is structured at the same time to have a full control between your physicality and your Soul. It's built that way. So, when you look at the graph, you just see the lines. When I look at the graph, I see how much balance is between the front and the back, to the sides, and in a way, to the dimension of your Soul. How my system interacts with your interactions.

And then we have a system which is North Pole, South Pole, physicality and emotion. And I look at that. You're just interested in that line of, "oh, my Soul is separated from my physicality." But I look how much you've taken from me to get there. What is my system telling me in compared to your system, to your physicality?

I saw in the teachings in Manchester. (2:22). There were two people, they are not from our source, they are not from Earth. And I told them. I always say this, because it's like they send a representative to be amongst

us to make sure humans don't go wrong with these teachings. If you were in Italy in the conference with us, I said, there is somebody here, not from us, and this woman who thought she's very clever, she stood up and says, "it's me." And the actual physicality was manifested in a body of the man, got up, looked at me and said goodbye and he left, and left.

This is how the structure sits. It'll take men thousands of years to understand this central unit we've built and how it works. And the beauty of it is, no one can hack it. If you can hack that, you can hack God. And nobody has hacked God yet. Even billions of creatures around the universe have tried it, to find a shortcut to get to Him.

Any other question?

Q: ... We have a lot of water on the property, (2:24). that always stands on the property for a long time after extensive rain. Is there a possibility to solve this problem with plasma technology? Thank you very much for your answer.

K- Drain the drainage system in there.

R: Okay. You can be quite physical with that one.

K- Physical thing, that's the matter state. Unless you can find the Soul of the water and get them moved.

In a recent trials with the Chinese military, we have shown the power of production of water and rain, and change of climate. It's actually recorded by them. And we did this with our beautiful Knowledge Seeker in South China Sea in Sanya, 4 or 5 years ago. He said every time, I put this 4 times, the power jumps. And the last time we did it together, setting up the flight system, it jumped. This time what it caused a huge damage. And this is part of the structure. Can you transfer water out? And can you create something, not water.

Something very interesting, which it will be shown in London, in the exhibition with the governments on Saturday night. Many of you have asked us for fire system, to extinguish fires. This system in a way will be shown in London. (2:26). We have understood the work of this planet. Water, the wind and fire. And you will feel this on the 11th. You will feel the wind, you will feel the water, and the fire comes in the shape of the knowledge of man. You'll understand when you're there. So, try to find another way, if you can put massive fire forests out.

What you can do with the rains on the ground? It should be able to be moved, but you have to find the Soul of it. Or change your, what you call it, I think it's usually alkaline land which holds water, if I'm correct. In the inner Mongolia, the land, the topsoil, is so alkaline and so high in salinity, that it's very hard for things to grow. In about 30 centimeter, 50 centimeter below surface, if you find water it's sweet. And they were asking us, how can we change the topsoil? But the reality is, as Knowledge Seekers you know, without that filter of salinity, (2:28). you will not get the sweet water. Unless you change the climate. And the minute you change the climate, that sweet water becomes salty water, because the salt which is gathered in the layers over centuries and thousands of years, will wash into the water underneath. And the more it rains, the more salt you collect. And as practical Knowledge Seekers, some of you who made the Gans production, you've seen that salt on your wires, coming out of the water and everywhere else.

Any other question?

Q: ... In past teachings you have explained that our body works on a flow of DC plasma. Is it this flow that feeds the Calcium strength to create the cage for the Soul, which comes through the blood, which carries the strength of the MaGravs fields of the Earth? Can we say that to invert the fields, so that the Soul expands beyond physicality, would be to plant a seed of emotion in the Soul, and feed that seed with a deep inspiration or an accelerated rhythm, which creates the speed for conversion or separation?

K- I answer you in a very, very simple way. (2:30). Get yourself a battery, and you always put it on a DC, and see how much voltage you have left, or how much power is left. Turn the switch to AC, and you see there is an AC in DC system. So, in the body of the man, we work on a DC, but the existence of matter state, conversion of fields, creates that AC. And that conversion of the AC is the creator of the basis for the creation of the heartbeat of the man. But, as it creates a heartbeat, it brings a lot of other changes in the physical dimension.

If you want a good plant, you see yourself ?? a good seed. If you want to have a perfect, perfect life, as a human race, as a human being, the seed of every cell of the body of the man is a Calcium. You have to have, to create, to absorb, to intake a perfect Calcium, that when it becomes in field strength, the seed of the, what you call, the cell of the body of the man, the essence of his creation, is perfect.

We always look, as I always say, into the back accident. You know, you have a car, you crash it, you take it to repair, you bring it back, (2:32). and you take it back in the garage, again as I said many times. But, you don't look that the brakes don't work, to change the brake. You put a good brake in, that you have a good system.

The backbone of all disease of the man, irrespective of from cancer, to Alzheimer's, to everything else, is the wrong strength field of Calcium. If man one day understands that every cell of his body is, has a Calcium seed as a center of gravity to hold on to the amino acid (AA), and perfect the "art of production" of Calcium in the body of the man, and is the intake, man will never go sick, in any shape or form. Because the seed is not of the good quality, he ends up with everything else, which then it can be affected by emotion and the rest.

Why some people never get cancer? Why some people never go sick? Because the Calcium seed of their body, the production of it, is perfect. Till they hit an illness or something, they create a disbalance and then you find them, they take a "nose dive." Because now, imperfection has come in.

So, the cornerstone of every life on this planet, is the seed of his physicality which is Calcium. Then you understand the rest of what it needs to be done, (2:34). to have a perfect life. And we've seen that when it goes wrong, viruses like Corona, which is a Calcium based, matching the same, creates mayhem.

Shall we call it a day? Or do you still want to go? You had a big question.

R: I sorted out some of that and most of it was a comment about his life and who he is and who he claims to be and so on. So, I think we're okay with that. And we're pretty much through the other questions I believe. There might be one or two left but I think you've done quite well.

K- Thank you very much.

R: So, would you like to...

K- .. Shall we wrap it up?

I hope I carried enough information to you. Please make your way to London. Those of you who can, and we might increase the capacity. Because it has to be understood. In the coming days, world press will be brought in and we go through by showing and not talking, that we bring in the change. As I said, we had a kind generosity of a Knowledge Seeker and as usual, Keshe Foundation passes on to. Those of you who thought the 10,000 was too much, (2:36). we have brought in part of the, what you call it, to help out with the donation we received, to help you to be able to be there. And if there are any other Knowledge Seekers who would like to do this, to nominate or pay for the others to be there, that's their financially, well off, that the knowledge can be shared, by those who cannot afford to be there physically. Because the Soul will carry it on, you can still do the same thing with the Foundation. You tell us how many and which sessions you want and we have a large number of people in, we know we can invite or make it available to everybody to be equal, to be there.

Something very important, on Saturday night, please try to dress (up) to meet the ambassadors. Don't come with boots and whatever. It's an official meeting, it's a respectful meeting. We don't put a dress code on, but you understand at these levels, the Knowledge Seekers cannot be "rift raft" as they call it in English. The sharing the knowledge has to go to ?? of man, as long as the man looks through the eye of the man. Thank you very much for today and we hope we see you next week. Thank you very much Rick.

Vertical axis barren planet - create internal M field; Created Moon from emotion; Show planetary system; Public Relations firm promote London; Knowledge - Heaven; Ignorance - Hell; Emotions pitfall of man; Graphs of STM & STP; Plasma robot have Soul; Gans T over; Fields of U within - become feeder; Fields interact with Soul create everything; STM becomes compact ball; Pre-transmutation phase; Post Corona effects; Souls make arrangements; STM & STP to love each other; Different types of Ca; No mystery in Teachings; STP can become STM - merge as one; Weaker gives back to stronger; Creator needs Mitra to confirm existence; Not give - make available; Multiple Souls in transmutation; End drug trafficking - need governments; KF Wellness ready

ENGLISH TRANSCRIPTION

(:20).

K- Yes, good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers, on the Keshe Foundation Spaceship Institute. We welcome you back, as usual, to share and to understand and to, in a way, make some progress, understanding more about our own life.

On this Planet, we have done enough work to understand, when the weather changes, when it's going to be a rain, when it's going to be Sun, how the hills, how they were built, and how mountains were created, and oceans where it was dry and wet, and cycles of Ice Age, and the rest of it. But, we never tried to understand about the Soul. How does it operate? What happens when it interacts different way? What happens when it attracts different way, the other objects and the rest of it.

And a few days ago I was looking at something very interesting, and it brought a breath of fresh air, because I looked at this years and years ago when I was a student. And it was part of the life, to understand more. We call it, desert. Barren, nothing on it. And we call it, the surface of the Moon, barren, nothing on it. Other planets, we call it, (:22). oceans, liquids, and we call it, water on this Earth, and oceans, to our understanding. But if you look at it, how come we have deserts on Earth? What field interactions creates them? What condition of the Soul of the Earth and the Soul of the Physicality (STP) of the Earth leads to the physicality of the desert? Which shows still I'm part of the universe, I follow the same. A little bit of twist on one side gives you the fourth season, but still the same.

In the direction, in the dimension, of what we call, the "twist," the angle, decline or inclination of the Earth. So in a way, if we twist the Earth back to its normal position, vertical, this planet will be barren. Will be nothing on it. And maybe is, as I said in the teaching of .. last week, will be the same as where many of you landed and called it the Moon. Maybe that's the condition of our Soul when we land, and we create a barren "earth." The solar system which carries ?? (more) no life.

Our life, when you look at it, the change between our life and the animals, with the four legs, is how many times that we can go vertical and horizontal. And the interaction of the fields of the planet, with our Soul, with our brain, has created variation in dimension (D) of the field strength, we call it, intelligence. What would you do, (:24). if you become that planet, you become that star? And you remember Earth, if I stay in one position, I stay barren. Or would I create life in the essence of the creation? Or I have to change something inside to show a different dimension outside?

Scientifically, if you understand, if you change characteristics of the inner magnetic (M) fields of the Earth, you don't need to turn the Earth a few degrees to create the four seasons. You change the strength, you change something inside the center of the Earth, it will create maybe much better, greener, total green planet, even though it's still vertical rotation. So, what's inside counts and not what looks outside.

In the coming weeks, in the coming weeks, not months, we will show such a planetary system. The Keshe Foundation research and development is targeting to that point. Where we don't need to rain out, we attach to, we bring it to be, we make it close. We can make a system that on the surface of it is all coal, or on the surface of it is all Omega 3, we call it the ocean, and we don't need the interaction of outside. Within the new system getting developed, we can create a condition of the heart, we can create a condition of the kidney. In a way, the knowledge of the Keshe Foundation research team has reached the point that we can create a creation within the Creator. (:26).

Initially, this was set up to be done years ago, and now we are back on track. The technology (T), the understanding is how we create the Soul inside, and how we let the inside Soul to interact with outside STP, and then we decide what we manifest to manifest itself, to show what it is. I can change the characteristics in a very beautiful way, and then I'll get the planet which just produces diamond, and it'll be the lover of every woman on this planet. They won't carry a diamond ring on their finger, but they carry a box in them that it creates diamond, now becomes a new fashion.

Or, I can change the system that produces water all the time, it's a planetary of ocean. The knowledge of the understanding is to understand how to interact the two systems. The Soul of the Man (STM) and the STP of the man. And then, you decide. I don't need to interact with outside to create me. I have to understand, I have created me within, how I look outside. Do I want to be visible? Do I want not to be visible? Would I like the top half to be green and the bottom half brown? As this planet does, we call it, the green continent of Europe, and we call it, the brown continent of Africa, because of the dryness, band of interaction of the fields.

The knowledge of the man has reached a point, that we even can decide how to elevate our Souls. How we can increase the dimension of the field strength of the Soul, that it changes the manifestation of physicality outside, (:28). even though the STP stays the same.

In the coming weeks and months, we'll bring a revolution in understanding of the science of the man of his own creation. And then man will understand where we go to, where we're going to. In London conference, you will see a new dimension in science. More or less, interaction of the fields, what in the last stage will be. In the Beijing conference, we manifest the creation of the latest technologies, that man cannot even dream, cannot even comprehend their existence. We have appointed one of the leading agencies in the world, to promote both conferences. Instead of Knowledge Seekers knocking in every embassy. The most, one of the most reputable, what we call, public relations companies in the world, will invite the world leaders to see their own Souls, operation of their physicality in Beijing. In London, we show you the, how the last stage of the physicality of the man will be.

As I said before, the knowledge has reached the point, that in the coming days and weeks, we'll separate the two, and then merge it together, that you choose, in what shape and form, you want to exist. You choose, if I want the elevation of my Soul. Or, what I dreamt to be a desert, and I put the sand in my pocket, and I held the Soul in my hand, is not for me. But, one question to ask yourself. What is hidden within that deserted island? In that deserted planet, in that place which you create. (:30). What do I need to create within me, that the planet I create, will not do what the man did on this Earth. How am I change? And what I need to reach to that point? But, in a way, if we all reach to the same point, it'll become what Mr. Ford said century ago, you can have any car, any color you like, as long as it's black. Because we have no other color. Then, you all want to have a green planet, and then all have to be this and that. But, let your Soul elevate, let's understand the process of Creation. And then see, if we would all like to be the green planet. What is the beauty within a brown planet? What is the beauty within an ocean planet? And how much we need to do to achieve to that point?

Achieving the point of understanding the point of Creation, we call it, the "heaven." And when we fail to that point, we call it, "hell." And the prophet of the past could not tell you this, because you did not have the comprehension of it. You could not understand, it's within me to create the heaven and hell, And it's me who decides to reach the level of understanding of my own creation, to what I call, manifestation of myself, a nearness to the Creator. So, in the term of the man, they created the fire, and everything else, that it'll be burned and the rest of it, to put man on his track.

Put man on his understanding of, try not to go too far. But some still do, because they're already been burned in the dimension of physicality, in every essence of, from emotion to physicality, and nothing has changed. (:32). They see themselves alone, they see themselves as abandoned. And then, if you learn, if you understand, that is me, who can change that, within me, not by my thoughts, not by medication and the rest, but by elevation of the fields, the strength of within me. Then, you come to understand, I am the Creator. I am the Creator of me, even though my physicality was put together in another position. Now I have the essence, I have the power, I have the understanding to change. Not by make-ups and the frock of the man, but by elevation of the STM. And this is all about you for yourself. Nobody can give you a system and nobody can teach you, unless you come to the point of understanding of the Totality of the Creation yourself.

Now you understand. Now you come to understand how far in the process of the teaching of the work of the universe (U), as Knowledge Seekers (KS) of today and the Knowledge Seekers of the tomorrow, when you will listen to these teachings, understand, the beginning and the end is me, and it's me who decides where this begins, and where this ends. Would I like it to end in the dimension of physicality and no control? Or, do I ride it to get into the "pastures" of my own wish, of my own existence? And not everything has to be as green, because sooner or later you get fed up of living in a green place. It rains, it's humid. You want the shores of the sands of the Caribbean's, or Spain, or somewhere to be warm. You prefer the sandy desert with the water.

And then you come to understand, it's me who decides. Even I have everything, (:34). I have to create a diversity to be able to understand, to survive life. When we used to live in Italy, some of those who've been to where we used to live, in the North of Italy, we used to get fed up living in this house. We used to get in the car and drive around ??, and book into the hotel, or a cabin, or what you call, small places to stay for overnight, or stay for a weekend. When we used to give them the address, they used to say, "you live in that place and you come here to stay here." We used to say, we get fed up of living there, we have everything, we have the gardens, we have everything, those of you who've been there, knows how we used to live. We get fed up, consistency brings a change, even a few meters away.

So, what do you do? You go somewhere else, to be different, to get different air. And only about, maybe 3, 4 kilometers, but you get fed up of keeping that, everything you want to be in it. The change. Sometimes it doesn't mean to be higher, sometimes means to go lower, to understand what it means to be there, and who you can guide to be up there. We are used to paying the beggars with the money on the street. But what about next time when you meet the beggar, try to elevate the Soul? Maybe his Soul is even higher than you, and you think just because sitting in the corner. Then you understand. Truly who you are, truly what you want in life, truly what you want in life, not in the matter state of physicality of today, but in life of the STM in the dimension of the universe. (:36). Maybe the beggar is much more educated than you, but the dimension of pains of the physicality has brought him to be there. But inside, he is much, much higher elevated than you, that he had to let everything go.

I used to go to Manchester City Centre Library. And when I was there two or three weeks ago, with the conference of the Knowledge Seekers, I passed the library a few times. I said, "this used to be my second home." I used to go to college, all day, till five o'clock, get a bus to the Central Library, I studied there till about 8, 9, when they used to shut and go back home. To make sure I get to University and educate my physicality. And there was one man, always, stood outside Kentucky Chicken, outside the shop, he was mostly there. Long white beard, dirty, carrying carrier bags, as we know, the tramps we call it. I got to know, talking with him and others who know him. He was a professor in Manchester University years before. And

he gave up on everything. As one of the top knowledgeable man, he saw nothing in the places of education, and what he had, and he saw life to be living on the street. Because it's where he found himself, to be comfortable to live.

Would we, as humans, become that tramp? Or what we wear and what we do counts? Do we look at the physicality of the man? (:38). Or do we look in the essence of who the man is? Can we elevate him to serve? In a way, not. In one way. But for us to understand ourselves. For us to be, to understand what the Soul means. I was talking to a Knowledge Seeker a few days ago. And he said, Mr. Keshe, what's this? What you're doing? The way you're doing this. I said, I'm detached. With all the wealth we created around the Keshe Foundation, with everything we put there, I still live in a hotel room and I still have no car. But I get by, because I'm detached. I don't see it as a loss, I don't see it as a pain, I see it as a means to go to the next step. If anybody was in position of me, knowing how to make gold and do everything else, would ?? be living palaces, but they're worth nothing. Keeping the Foundation going, teaching more, has more value than a brick and mortar and a roller plastic.

What do we do? We spend everything we have to elevate the Soul of billions, to bring man to understand, because being on this planet for so long, we realize there is no value in physicality. Creating gold does not bring comfort. Elevating the Soul of a man is worth more than tons of gold, that he becomes free. He becomes free from the physicality (P). Understands, (:40). gathers the knowledge, and in that process, elevates the mind, Soul of himself and maybe his children. And teaches the children of the man for the future, to find the path, to be able to be citizen of the universe.

How far can we go? How far we need to go to elevate ourselves? How far do we need to have the understanding of the operation of the fields of the universe? And do we need to be attached to physicality? With the knowledge which we are reaching, with the knowledge which we are sharing with many of the Knowledge Seekers. What happened when you carry the Unit in your pocket or in the back of your car, you just change something and produces all the gold you need, and you go to the shop says, "here is a kilo of gold, give me this." Or change it to a diamond, you see a beautiful girl on the street and say, "I'll give you the biggest diamond in the world for you to marry me." Or you see a beggar on the street, you turn it and give it the water of life. Which one gives you more pleasure to be existing in the dimension of the universe, to be citizens? The beautiful girl, or helping a man.

But, as our knowledge has increased, and the man does not become the Totality, the citizens of the universe are that man. With the knowledge you have, would you be prejudiced if you see a STM from Earth, in trouble, would you treat it different than you see the Soul of another creature of the universe in trouble? (:42). Or, with the knowledge you have, you say both can have the same, to reach the same point as me?

The detachment, the understanding of the elevation of the Soul. And then, where and how that Soul lives and exists, counts. How you make a man, counts, and not how the man is. Because man changes according to the seasons and the emotion. But the man who's solid in strength, stays the same. Does not matter, rain or shine. I always said to my children, "it's that, that no one should know if you have a thousand pound in your pocket or nothing. That should not change you, what you carry."

This was one of the things, maybe one of the most memorable things I have from my father. At a very young age, seven or eight, he used to give me a quarter of the thousands of pounds of today. "Mehran, take this, when you go to school on the way back, buy this and this and this for what is going on in his life." And the first time, my mom said, "you don't do this with this child." He said, "he has to learn that the money doesn't

change him." I used to get those days, thousands of pounds, put it in my school bag and go to school, and throw the bag as far as I could, and go and play. Nobody could imagine he can throw so much money away, and go and pick it up later on, and go and spend to buy the bricks and mortar, and buildings that he was building for himself, and I was just a servant to his job. (:44).

I understood, the money in the bag has no value, because it's not mine. I was just a carrier to serve his wishes. But this taught me a lot to become detached. Because, I used to walk in this little school bag, eight, nine years old, maybe younger, go to school to play, and on the way home I used to go and pull the bag open, and go to the merchants, "oh, this is what my father said to pay you for this and that." They used to be shocked, they used to tell my dad, "it's too dangerous." He said, "he's a man on his own at this age, he knows what he's doing."

Detachment, needs training, needs understanding. Does not mean go and give all your wealth away. Increase the wealth of the knowledge, increase the worth of understanding the Soul. And then you're detached, because even you can make gold, it does not change you. I sat with some of the most powerful man in the world, and created them what they could imagine, what they asked for. And I said to them, "you think I cannot do this for myself? Why do you think I'm sitting in front of you? You are the most powerful military man in the world. Is with this, I want to change you to become me, that we can create peace. You're happy with this? I'm happy with that. Let's talk.

It's not that we cannot do, it's to understand what is in our possession, (:46). that can bring us to the position of gathering knowledge, understanding more, and bringing that change, not for ourselves, but to be able to create the others to be the same. We are nothing but that plasma. "The stronger gives to the weaker." And when we look at ourselves to be the stronger that we can give, it's the time that we have failed. We are always weaker, than another dimension we call the Creator. So, what is in it, when we are weak, we see ourselves as strong. This is a pitfall of the man, pitfall of the emotion of the man, in respect to the physical dimension of life. As in the dimension of universe, there is no weakness and there is no strength. Is a point of balancing, understanding to give what you do not need, and to give what allows the others to gain better position than you, in the dimension of the strength of the Soul, to serve the Totality of the Creation. To, in a way, become accommodator, to serve the Creator, which is you, and you are part of the Creation.

When we come to that point, when we able to make systems, that we can see how we are, we can see if we are higher or lower, we can see the dimension of the motion of our field, the Soul and the STP, then we understand where we are, who we are. In the past two weeks, I had the pleasure of a number of Knowledge Seekers, who came to see the structure of the Soul. I watched as their graphs came in. (:48). I watched as I saw the dimension of the Soul, as I watched how they struggle between the two physicality and the Soul and everything else. And it was amazing to see somewhere straight on the line, down to the line, equal and balanced. And you could see, I said to our operators, this one is a woman you don't want to be with, as she's so physical. She does not have any Soul with her. The Soul does not exist, where physicality in the diamond ring is more important than serving the priest.

And when you see the fingerprint of another Soul, total devotion, in a way, the Soul being in charge, the Soul being in the possession, in a position to be able to control. You still see flickers, which is normal, because the two have to switch to understand who is where and what is the balance and what is needed. And then you flick back, you can achieve the same balance.

We have sent you, all of you, all the graphs which you have produced. So most of you should have received it by now. Just don't look at the lines. Understand about yourself, how you interact. And then go back during the time when you were on the system. What was your emotion? And what was your thought? As I said, nothing is hidden from us, because we see how it works, how it is. You look at the graphs on the top, we look at the graphs on the bottom. How much you've taken, and how much you've given, and what is the position of taking and giving. (:50).

Once we make this system as common as today's ATM machines the street, then you can assess yourself. You don't cash in money, you understand the state of your Soul, the state of your emotion. And in a way, you take your guy to the machine, says, "would you like to be tested, not for IQ, but about the strength of your Soul and what you tell me you love me." I have a machine at home which actually is a fingerprint of your Soul. Then you understand why we don't need any judges, and no prisons, and what is to come. What some of you joined us in past two weeks to see the fingerprint of your Soul, it is an eventuality of what will come for man in the time to come, but you'll be the judge of it. And you'll be reading the fingerprint of it with no system, as you get educated more and more to understand the totality.

It's come to the point that as Knowledge Seekers you're mature enough to understand what is the next step. In the London conference, we'll break a lot of taboos. In Beijing conference, we create a new dimension of knowledge and science and technology, where the man will understand himself. (:52). In a coming time, we shall create, controlling the dimension of field strength inside, any color, shape, size, hair, eye, body, skin, as you like. The "virtual reality" will become the reality.

The knowledge is there, it's just that our Knowledge Seekers have to understand it, that I can teach them the next lesson, the next step. The way as I explained, we can now make a system that creates diamond and gold and .. dust and water. We can do the same by positioning, to create the image of man. Sometimes when I look at these new robots, which is the latest and they do everything. I said to one of the Knowledge Seekers once, "they haven't seen the robot of the Soul yet." They have not understood what is to come. A robot is so physical that you don't even know that it's not a man. A robot with emotion. A robot with everything that a man could dream. And then I said to the Knowledge Seekers, "I make them so beautiful, that you fall in love with them and you want to marry them." He smiled. (:54). I said, "but don't you think you already married a robot in the shape of a human?" But this time at least, does no sin, and makes no mistake.

As I said, the knowledge is there. And gradually, we are releasing the knowledge. I saw how MaGravs brought the greed of the man. And the old say, as I always say, it's in the writing of Bahá'u'lláh, bless his name, we test the heat of the fire with gold. To see how hot it is, and if he can melt it. And then we use the same gold, to understand the heat of the man. How greedy he is, and how he'll behave. But, when it ?? assist ?? that in the matter state, in the energy or the Soul state, we test the man, by giving him everything in the dimension of the Creation of the field strength. And then we see how the man behaves. How detached he becomes, and how he manages to bring the condition of the Creation, in the favor of the others. In a way, we change the gold with the energy, with the field strength of the STM, and then we test the man. (:56). We change the gold with the plasma, even though itself is a plasma in a different state.

In the coming weeks and months, we'll bring a change, in such a rapid way, that man cannot even imagine. You have to understand how to change the fields. You have to understand how to manipulate the strength of the field, to change their strength with you, within, and understand it. I'm sure some of our Knowledge Seekers, soon the way they copied the MaGrav and they made a living out of it, and cheated the rest with,

"I'm doing this for the Foundation." Many of you will try to copy the systems we'll release. And now sell that as. And I wonder how many of the systems you produce ever will create a Soul?

In the coming time, as I said to one of our Knowledge Seekers, the time of the Gans technology is over, it's finished. But, Knowledge Seekers are still stuck with it. The essence of the Creation, sits within the structure of the universe. And for man to be able to become the true replicator of the work of the universe, he has to understand the essence of the basics. And no man up to now has. Because, once you understand basic blocks of the Creation, you can do and build any blocks you like. (:58).

Try to understand the interaction of the fields, and not a few electric currents. Once you understand the operation of the fields, and you ignore that few volts and watts, then you're on the path to learn the next. As long as you're looking for the power to, not to pay, you pay with your life. You pay with the time of a passage, which cannot be replaced, and you're still in the doldrums of saving a few watts. That if you understood the operation of the fields of the universe within you, you become the feeder, not the taker. You will create that watt, for the others to have, not for you to be better off, to go to the next step, to be worse off. If you look at the dimension and the field strength of the MaGravs we gave you, And you understand it, as I've said many times, you will change the dimension of the life. But unfortunately, you're still looking to make a few coils. And you got your whole Soul "coiled and twisted," not understanding the truth about your own self.

Look and understand how your Soul operates. Look and understand how your STP operates. (1:00). Sit and look, can I change the color of my skin in a given position? Can I make myself tan without going to the beaches of Spain and Bahamas? Because I get that emotion of satisfaction? Then you understand how much you have become in control of your own dimensions. As one of our Knowledge Seekers, in Barletta (Italy), don't sit there and squish your eyes and head, trying to move the cup. Understand, you have to give the love of the Creator to the cup, that it moves to places, that ?? the cup shall move. When you see the magicians, they don't twist and turn their eyes, and force something. They move their hands with elegance, and smile, and the things moves. Because in that smile they hide the magic. And man has not understood that about his own Soul.

Try to understand the systems which we have created for you, to understand the structure of the Soul. And not just to gain something in physicality. As long as you're in that dimension, you gain nothing. Once you understand the operation of the fields and the creation and the interaction of the Soul of you with them, you'll find out these systems do everything you ever thought.

Try in the coming times, as you receive the new systems, which are getting released gradually out of the Keshe Foundation, to understand more about yourself. (1:02). About how you gather energies from the universe. How don't need a lung to convert them, but you need the dimension of the Soul to absorb them. Instead of breathing the air, and then taking this energy, changing your rhythm of the breathing, to be able to free the STM, from the dimension of the STP. Try to understand how you can absorb energies of the universe in one dimension, that you can bring that change in. How and which way you need to bring in the position, and position of the STM.

In the test in past few weeks, we have seen beautiful characteristics. We can literally confirm a lot of things which man could not even imagine works within him. Monitoring, building new systems, changing them while even you are in it, has brought us the understanding, as we teach more and more, how and where and

the way STM receives and gives. And interesting enough, interesting enough, we see more the man takes, and the more he gives, in two different dimensions and directions, of his own physicality.

In the coming time we'll explain more and more, that you understand which way you can use your physicality, (1:04). to gain the elevation of the Soul, or freedom of the Soul, or transmute. Or, to be able rapidly to transmute, or rapidly to transfer yourself from one position to another, scientifically. The patterns of the work of the STM, through the test that you have supported us with in past few months, has made that ?? mosaic, that ground, for every pieces of the tiles to fit in. NASA uses billions of dollars in going through so many committees and groups or whatever, to do one test. Your Knowledge Seekers in the past year, through all these sessions you joined us, you have completed and you are completing that mosaic of the, what I call, the knowledge of the Soul. And once it's complete, we share.

In the process of past sessions, we can see how you receive fields, how you conduct the physical side, and how you can transmute between the two. We see when your Soul is expanded, and we see when you battle between the STP and the STM. And we see how easily some of you just go from one state to another, and then frightened, or whatever, disturbed, you go back and "engage the bird." In some of the graphs, even when you are collectively, many of you in sessions, we see the shutdown. The system, none of your Souls expand. It's like all of you switch off at the same time. (1:06). It's like a "cat suddenly jumps amongst the pigeons" and they all fly. It's amazing how much we have learned from you, about the conduct of your Soul, that we can show you and teach you in the time to come.

We ask you to join in sessions, we give a different name, but in a way we are looking at the pattern of the interaction of the Souls, individually and collectively, and how man will become passengers of the universe. In the past few weeks, tests which we've done with you, it has brought such amount of knowledge for our research team, that they do not even understand most of it, and gradually is unraveling what is there and how it can be done.

In a very near future, as you might see the first two systems in London, we can dictate the expansion of your Soul, by you and not by us. You can learn a lot about yourself. You can monitor your own behavior of the Soul and physicality. And you decide at what point, you like to let go of one or the other. In a way, you go on the field, you exercise and then you think, "oh, this is the time I can run." And change the walking to running, because you've done enough preparation. You know when the body is ready for it to go. The same is getting developed with your help, with us, working in the background to reach that point. (1:08).

The next few sessions, which the Keshe Foundation will announce, that a lot of you will join, is for this purpose. For you to become to know about, more about yourself, collectively. And to come to the point of what we call, being able to transmute. And then to see what we can do and how further we can push, that more of you can reach that point in a different ways, according to your understanding. In the coming weeks we announce more of this collaboration between us and you, that it allows us to complete the system, in a manner that brings prosperity and understanding to the work of the STM and elevation of the STM.

Today's teaching brought you a lot, if you understand it. I opened your eyes to what is to come, a knowledge and technology, which you could not even dream of. Which is now, is a reality. Which is now, a process of creation. And, I'm sure within the next few months, with you understanding more and our team understanding more, we will create systems, which have no physical dimension. Very much like the planets and the stars. There is no motor to run them. (1:10). There is no cage to rotate the content of inside. But it's all done with the fields.

Our Knowledge Seekers have to understand it, that we can go further, or otherwise it becomes a magic. And I think within the next few months, maybe in another conference in another part of the world, we'll show the first systems, which have no containers, where you can see the fields interaction, where you can sense the work of the universe. And then maybe at that point, you'll be able to interact and elevate yourself, that you don't need to breathe in pinch, bit by bit, from atmosphere of this planet, the universe, to strengthen and elevate your Soul.

I would like to share with you something, and if you understand it. And if you don't understand it, one day when this recording is listened to, some of you will say, "this is what he was talking about." The position of the STM, within the center of the brain of the man, has the same capacity, the same ?? . What sits in the center, decides how compact this plasma is, within the center of the body of the man. It's like when you get a ball and try to make that ball out of the cloth, (1:12). to fill in a box. It's very much like when you get the spaghetti. Those of you who eat spaghetti the Italian way, you never use a spoon to contain it. You pick a cooked spaghetti in between the fork fingers. You put it on a plate, and you twist it and twist it. At the beginning, the field, the end of the spaghetti is somewhere in the plate, twisted and turned. And as you turn the two ends of the spaghetti, get tighter and tighter around the spoon and the fork. If you're a European, then you always have to twist it on the fork and the spoon together. The size of that plate will not change. But the amount of the spaghetti you twist around the fork will grow. Now imagine that bowl of spaghetti ?? and the plate. By the way, if you don't know, Italians never eat spaghetti in the bowl. It's always served on a flat plate because you twist it. You don't need a spoon. If you get a big enough fork, put in the middle of the spaghetti and twist it, you see all that loose things comes and strengthen around in the center. But the size of the plates is the same.

This is the way the STM is. (1:14). It's loose in the center, in one ball, the dimension of it in the center of the brain of the man. In your knowledge, you're gathering strength by breathing and eating, adding to it, puts that twist around it to tighten it, to strengthen it, and it becomes a knowledgeable, solid core. At the beginning it's fluffy if you touch the spaghetti on the plate on every dimension. But when it's twisted and tightened and strengthened, it's as solid as a football. And this is exactly how your Soul is. At the beginning it's that loose sponge. And when it gathers enough energy and twists itself to become solid, and gathers enough fields, then it can overcome the field strength of the STP and it breaks through. And when you dream, it's one of those streams, the end of it is still inside the spaghetti pile coming out, connected to the mother and the uncle and the rest. As it passes from one spaghetti to the other, to gather its strength within the center of the fork.

If you understand this, then you understand how your life is, and how in the universe you need to understand to gather fields from the universe to be able to survive. And then you understand the STM. From the beginning is the same, as you are a child in a small size and you grow bigger, (1:16). and you become stronger, so is the STM within the center of the brain of the man. It twists more, and it gathers more strength. And when that strength reaches that it gathered enough, he can overcome the strength of the fields of the STP, and strength of the physicality of the body of the man and it leaves for his new destination. The fork, when it's tightened enough, spaghetti on it, flies from the plate into your mouth. That's his final destination.

The question is, where does your spaghetti of Soul, of fields of the universe, will end up? When the physicality of the man has no strength to hold on to it, and it's strong enough to take his flight of fancy. And as I always said, what sauce have you put on it? Is it carbonara or bolognese? And the taste of it will come when it lands in the ??, or when it lands in its destination in the universe. Would it be enough to be a speck of dust? Or would it be enough to create a new dimension of life? That depends on how much knowledge you

gather about the work of your Soul, and nothing else. As the dimension of physicality is irrelevant, once you understand you can feed the physicality through the dimension of the Soul.

I hope you understood where we are going and I hope now you understand as I said, (1:18). the course of the teaching has changed and it will change gradually to the point that most of the humanity and especially the world leaders understand the change which is to come. And then the change will come. Thank you very much for today. Ricky, if you would like to take us for a break and come back.

>> **BREAK** >> 504 KSW September 21, 2023 (1:24).

K- Yes, thank you very much. We are working in the background to arrange a lot of things. As you've seen, there are two sessions put up by the Keshe Foundation. One is for the new dimensions of the Soul, and what we call, the elevation of it. It's very important for us and for you to understand where it's going. Now you have more freedom and we can facilitate with the knowledge we have gained in what I call, increase or allow you to go into what you call, "pre-transmutation" phase. This is important as I said we gather more and more information and we sit on different dimension of understanding. The second session which is to do with Corona is that, as we sit on this dimension, understanding of the work, we see a lot of Knowledge Seekers coming to us and talking about the effects and the side effects and what has happened to them after the Corona.

There's a lot of research going on this, there's a lot of work going on this in the background by scientific organizations. We know what this does and we know what Corona can do and create, and will create in the dimensions of physicality. And we're trying to see how we can help you, (1:26). how we can process this in a different way through the new technology. We have calls from people who now in the hospitals are hospitalized on ventilating systems, that now the lung has collapsed back exactly the way it was in Corona, but there is no sign of Corona. A lot of people are losing their tooth, or roots of their tooth out of nowhere. We see new conditions in the bone structure. As we know that Corona is a Calcium based, we understand how it is. And we try to support you. We try to change some new dimensions, new illnesses, new things appear in different ways. We try to support. We try to cover. And we'll see how we can support this further, and we can bring this into what we call, backing, the back end, or the side effects of the Corona, which now is becoming worldwide problem.

We are not a, what you call it, a health program. We understand the work of the fields and we try to support you with the same process we did during the Corona. This is becoming very critical with a lot of people. We

have and we see a lot of people asking for help, if we can do things. A lot of children are affected. We try to see, if through the interaction of the field of the plasma, we can bring wellness and happiness and joy back to life. But we have to see, and that's why we put this session on, to see how it works. This session with Corona, it will not be confined to one session. (1:28). We try to extend it, we try to understand it, and we'll see where we go.

And as I said, we are in transit, so you hear a lot of noise around me. We have to move from place to place in today's session, and I do apologize for that. So, I have to move in different rooms or whatever I have to do. And I have to ?? if you get some background noise during the process.

In the work of the Keshe Foundation, we try to handle situations like Corona as it comes. And if we come to another phase of it, now there is a talk of a new type of Corona. We try to analyze it. We try to understand it. And if possible, to intervene. If possible, to come in to see, to understand, and try to see if we can bring the new technology to be applied.

As I said regarding the London conference, we usually come to Knowledge Seekers to do the... helping us to support. We have come to engage a highly reputable organization, that they will do everything in the background for us. From inviting the ambassadors, to Press, to organizing everything else. Once we finalize this in next few hours, then they will take over for the whole promotion of the Keshe Foundation program for London and Beijing. And this will bring a new dimension. We have engaged one of the largest promoting organization worldwide. And they understand our problem, they understand our work, and they are there to support us. (1:30). And the venue has already been chosen in one of the most prestigious places in London. We have chosen this place for a specific reason, which fits into our, what I call, work and what we want to do. And we'll see how we can expand and extend this to further positions.

And a couple of other things that will go with the Ambassadorial Meeting, is that from now on, those of you who want to go for the Saturday event, Saturday night to be there with the ambassadors. You might find changes, as the organizers now will take over in running it and how, and how much, what you call, seats will be given to Knowledge Seekers. As now it's become a, what you call it, international affair, and we'll see how, where and how we can bring things new. There is not much I can tell you, unless, what you call, something comes up, we let you know in the meanwhile.

In the coming brackets of the work of the Keshe Foundation, the, what we call, Linz Exhibition Center, shut store for the last time on the 15th of October. And we'll be moving out of Linz Exhibition Center by the end of October. And we try to move this Exhibition Center into the city of London, which comes after the conference. And we'll see how it takes shape, and we'll give you a new destination and everything else to meet or go to see the new technologies, (1:32). new systems and the rest of it in the City of London. Yes, this Exhibition is moving, it's its final days and we'll shut doors, we were supposed to do it a month ago, but we extended it for another few weeks, but at the end of this month there will be an end to this Exhibition Center.

We have launched a small change in those of you who, what you call it, looking for the, some of the Gans's, new Enhanced Knee Gans has been launched as of this week. Very limited stock, we would like to see how it will become. It's much more powerful and is much more, what you call it, you don't need to use it so frequently and it has a much more power in changing the strength and what it's supposed to do. So, this is what we have brought in.

And those of you who asked us to be able to use the, what you call it, the support we receive for paying for half of the, what you call it, the course in London, we responded back to you. You have to complete it, because we would like to close that case altogether. And then, we might bring back in the promoters, to bring more people into those sessions, as we see in the people who like to educate in that direction. There's still a few people we can help if you want to join in.

Is there any question? We'll try to answer. (1:34).

Q: ... In the "Cup of the Universe" there's a spot where we can pick up the emotions of the energy of CH3. My question is regarding... Is it regarding that, or it's regarding that kind of neutron created from that CH3. What is it capable of?

repeats question ...

R: Does that make sense or not?

K- No, I'm lost.

R-.. Rephrase your question.

Q: ... Hello Mr. Keshe, you are right to the extent that humans gain in the elevation of their being. However, don't you think that the Creator provided everything naturally in creation?

K- Yes, but man doesn't know how to use it. That's the problem. Everything has been there from the beginning. (1:36). But man doesn't know how to use it. And in different ways we, we learn from different scientists and people gradually how to use it, it's the same with the Soul. Everything has been there from the day one, the intelligence has brought the change.

I always used to teach to children. The waterfall, always been there, for millions of years. But man had no understanding of what he can do till they made the turbine, and now they can get energy out of it. And we call it electricity. And so it's the same. Every knowledge is there. It's when you become wise to it. When you gather the strength to become, to produce. And so, nothing will change.

Q: ... We see where humanity's free will takes us. (1:38). Isn't it time for humanity to take responsibility, without appealing to things that still put it in God's place? Thank you for your reply.

R: I think you've addressed that many times actually. That it's time for humanity to take responsibility, for individuals to take responsibility.

<< Do you hear me ... Problems with the audio of Mr. Keshe >>

K- So, I lost the thread of ... the thread of thoughts. Can you go back on it?

R: Well the question basically was, we see where humanity's "free will" takes us. So, Johan says, isn't it time for humanity to take responsibility, without appealing to things that still put it in God's place?

K- In physical life, this is the way I look at it, in physical life, we think we have no control and God does it. But in the dimension of the Soul, (1:40). it's all arranged, it's all agreed and it's all moved. And this is what we have to come to understand.

In physical life we think all been organized, all needs, all done in the background. But for the Souls, everything is arranged, everything is agreed and... As I said in the teachings before, there's a very big pitfall with us, because we are very physical as a human, a human body. And that is, our body, most of the time, goes to places, does things or gets involved in something, and we think we are right to do it, but we don't understand that it's already organized by the Soul. You do something good, and just do it because it's good, it's right to do, and then later on something happens, something good happens, you says, "oh, this was coincidental." But you don't remember what you did good, that you got, what I call, the bringing balance to it. When we put these away as coincidentally, when the good things happen to us, then we understand there's a bigger work in the background.

Your Soul brought you to that point to be tested. (1:42). And you did something which in that sense, if you call it, you passed or you gained strength, you received blessing. That it brought you back to the new position. That you see the new position gives you the pleasure you gave. It's in a... living in the dimension of the Soul is very much like loving. And there's no other comparison to it. If you are "true lovers," the more you give to your lover, the more you receive back. But you don't give more to receive. You give more because you see the pleasure in the recipient when he receives it, how much he or she enjoys it. And this is the way the universe works.

You don't cook for your partner, his or her favorite food, that might get her to do something for you. You cook it because of the pleasure she or he takes, and you see that joy in his face, or his emotion, or his words. That thank you, that it's beautiful, you know how much I love this, and you've spent time. And then that puts a seed for him to do something good or bad. There's nothing to do with the intention you created. But you do this, and then he comes home next time with a flower, because he knows that it makes you happy and brings you joy. (1:44). And it's the way the Soul works. And not the way I do this, you do that for me.

And when the man understand this, This is what we call, love. Then it goes back to, do we give through interaction of the fields for the other? Or do we do to get something for it? To get something for it is a physical life. The way we give to see the joy is the dimension of the Soul. I don't know if any of you remember, a very, very old song years ago. The mother says, "the cost of love" is called, I think. The mother says, the child asks the child to do something. The child says, I want so much for me cleaning, or (making my bed) or whatever. And the mother says, "for giving birth to you, no charge. For looking after you, no charge. For teaching you, no charge." Because there is no charge out of the love of the mother. But it was important for the child, if he did something, to get paid for it physically. Because he hasn't understood what the true love is as a mother. And this is very much the true story about man.

The love is the dimension of the Soul. And the physicality to get something, because you've done something in the dimension of man's life. And once we understand the difference, it's the time when we have actually start graduating. And in a way, change the name, mother and the child, husband and wife and lovers, to the STM and the STP of the man. (1:46). And then you find the true essence of all these teachings. And how the STM brings man to a point for it to learn. And if he doesn't learn, he sets another ?? scene to see if he'll learn from it next time. And in either time, the Soul charges nothing (to) the STP. This is the stage where we are. We're trying to become aware of that love, that giving, and how it brings us to that point. And man has not understood it, as man is so physical.

Now we are making systems, that gradually, in the coming time, will show what is love, emotion of the Soul. What is love, emotion of physicality. Then you can see it. Those of you who received the, what you call it,

the print of your Soul, some of you baffled me when I saw the pictures, when the data came, and how your Soul dominates your life, and then suddenly a flick of physicality brings you back, and then, "am I here?" and you start again. And, it's amazing how we see your "switch off," and how you switch on, and how suddenly you find balance, that the Soul, the STP and the physicality of the man, run parallel with no expectation. (1:48). And then you switch, and that switch brings disturbance, and we see the disturbance of the physicality, which then brings disturbance to the Soul. It has to adjust to follow the physicality. As I said, NASA spend billions and research universities spend trillions trying to ascertain what you Knowledge Seekers has brought to the knowledge of the man with past 12 month sessions. Most of the graphs and pictures are kept and is a pool of knowledge. How you react, how you feel.

In the Saturday on the 11th of November in London, we'll monitor the emotion, and I try to find out, to structure, to see the emotion of the presidents and the kings of the nations through their ambassadors are there. And we most probably will display it if we get the opportunity. If a world leader says, we are committed to peace, on a monitor, we all shall see if he's telling the truth or he's just fabricating. It's just to sound good. And it will be an amazing structure of understanding.

It will be very interesting to see how we understand ourselves. For the session which is coming up, (1:50). the transmutation, pre-transmutation of the Soul, we bring in new dimensions of understanding your Soul positions and interaction of it. Which way it will take to move? And to what strength it will move. And how much it takes from us to move it. And when you switch off.

The amazing thing with collective work with the Souls and individuals, has brought a lot of knowledge in how the system does not operate, and how a system operates. As I explained in the last session, there were a few people which they went to the wrong link and they had to be brought back into the common link where the others were. And the system would not start. And the minute the last person which went to the wrong place came to the right place, the system start functioning. And is, as the Soul of the system knew, who has to be there through their Soul. (1:52).

And we now see how the computer line sending a message it's more or less irrelevant. And it's amazing, especially it took us the first, those of you who were in the last session on Friday, you realize that the session went too long because some people couldn't get in or they went to the wrong link. I went to the wrong link and then I was told by the IT team that I was in the wrong place, I have to come to this place. And we're trying to get this few people back into the right place. And the system would not... the graph which we take monitoring the Souls, would not change, it still shut down. The second the last person came in, the system start operating. The Soul of the system was aware of the operation. And we did this test a few times during the session. I especially set this up when I noticed it, to see if we can do.

If one of you falls out, in a way, and the expansion of the Soul is not there, the system stops. And we've seen it now. We see it categorically. When .. your expansion of the Soul is not there to interact with our system, our system doesn't show anything. It's just like a switch off. And this brought us a lot of wonders at the beginning. How come the suddenly system switches off and we don't see anything. And we, setting the system, understanding the process, now we understand fully the operation, and now we're setting up another system to see which way it actually moves. We can see when you actually go through the dream phase, (1:54). as you call it. We can see when the Soul has expanded and interacts with our system. And suddenly, in between, you go for a coffee. Your Soul is still connected. Physically goes for a coffee. But the system stays on. And when your Soul expansion reduces, we go back.

And I said to our team in the back, just let it run till we see it comes back, because somewhere you come back in. And then I asked the people, oh, I received the calls. It was disturbed. I couldn't be there. Now we have a huge understanding on the systems we have developed physically to confirm this. As I said, you Knowledge Seekers worked with us hand in hand in past year and in past two years to literally develop a system which works on the operation of the STM. These next two sessions which we put on, for the transmutation, this is very important for us and for you, because now we should be able to set fully systems which we can transmute.

We understand the full 360 degree dimension of the Soul. And maybe next visit in, what you call it, Beijing, you will go through that transmutation. Because now our team has understood, sees, set up and goes through the next phase. (1:56). And we clearly know, it's like a runway as I call it, we know which way you're coming, where you land and how you take off. Now we have to make this precise. Does it depend on the dimension of the wind you land left or right? Or is it always right to left, doesn't matter which way the wind goes, but this time how it gets its, what you call, parameters of dimensions of the fields to go. When is the point of transmutation? That we can set the machine, this is the time, ready to transmute.

We are literally there, we are 90% there. It's the final, maybe 3 months, 6 months, twitches of it, to literally transmute you through the Soul. Because we've seen the runway, we've seen the flight, we've seen the wind tunnel, we see which way the strength fields come and goes, it's our team who have to understand it, otherwise we jump and something goes missing. It's the same with the new system we are developing. Can we get your Soul inside the system and transmute the system, as I always said, the envelope, and then open, release you back in the environment?

There is a lot of understanding. There's a lot we never understood. (1:58). There's a lot. Our systems have been upgraded. Most probably in London, you see the first vertical system. Hopefully, our team can finish it, where we can transmute from one to another. And gradually built this up to its final position next 3 to 6 months. And how we can allow our system to collaborate with you to reach that point. Take you from your bedroom and land you in the middle of a football pitch where you want to watch the football. It is possible. Knowledge is understood.

Our team has to catch up a little bit, and then we go back. The original work has to be to understand the strength of the origin. It's no use having the Gans of Copper, and Gans of Zinc and Gans of this and that. We have to go back to the origin, and our team has to start understanding this origin. So, if maybe in coming time, next two years maybe, maybe next month, maybe ten years, when our team understands. I was explaining yesterday to our Knowledge Seekers, that I can... you want to see how does a plant feel, being in a forest. You want to see how a dog feels being a dog. Now we have the knowledge we can do that. We can allow you to travel in dimension of the Soul, for yourself to be that dog, for yourself to be that plant. (2:00). It's a technology. We understand how...

In our systems, our understanding, we can tune to make Calcium (Ca) as a rock. We can tune our system to make Calcium as in the cell of the man, in the body of the entity. It's a totally different Calcium. And we can make a Calcium to be in the root of a plant, or a leaf of a tree, to feel how that tree feels, to feel how the stone feels, and to feel how the man feels. This is a knowledge of creation.

We don't think about it. We just got so used to it, nonsense, that it becomes nonsense to us. We go to a chemist. We ask for a tablet of calcium. We give our blood test, and they tell us there is elevation in your calcium level. And we go to the fruit shop, and we buy a fruit or a plant, something, vegetation we eat. And

they say, if you eat this, increases your Calcium. But these Calcium's are different. One is a matter state that's a stone. One is in the state of the ?? Gans, in the state of what I call, intelligence of the "4 wheelers." And then the other one is the life structure of the Vertical People. (2:02).

We chose the same word, the same classification, the same name for the same thing, but actually operates, totally exists in three, four different dimensions. The Calcium of the plasma is totally different than the rest. Up to now we talked about the bone, the vegetation or a stone. Now we have to add the Calcium energy as a plasma, which creates all those. Depends what condition you give it. And now I cannot carry... up to now we had a problem of carrying different food for astronauts. I can't carry different buckets of Gans's. We have to understand the essence of origin of the Creation. And we understood. And our Knowledge Seekers are getting taught. And with that, we don't need to carry Gans's. I said to you, Gans's are out of game. But we have to play that game till our Knowledge Seekers understand, that it becomes a technology.

And then you create a Calcium as a stone in your kidney, or in your wherever, where it should not be. How come you get the kidney stone? Because the condition of environment has changed. That now, (2:04). the Calcium instead of being as part of the 4-legged protein, in that position, is become a matter state. Science have never understood this. Now we can put the machine next to your kidney and create a condition of the 4-legged and there is no stone. Do you need to go and have a operation or get it ultrasound crushed, that you discharge and see the stone? Now with the knowledge which is in the hand of the Keshe Foundation, we just need to change the environment of the kidney and there is no stone. All these things we see with operations this and that, very soon become a thing of the past. Because now we have the knowledge, we understand, what needs to be at a time of manifestation, even though it's the same element, by the name of the man.

These things are weeks away, months away, not decades away. And it's ... all of it goes back to understand the origin of the Creation. Then you can make anything you like. Then you can absorb anything you like. Then you do not need to kill and destroy another for it to survive. And you give the same to the others. That they decide if they want to do in the shape of a stone, energy, or a structure of their physicality when you give it to them. You can't give Calcium in the shape of a stone and put it in the heart of another creature to get it. (2:06). Because it doesn't work. It has to be at the strength of the structure of his physicality. ?? for not needed the way you give it to him. He knows which part of the fields to use to convert it.

It's very much the same as what happened to your Soul once it was created in the womb of the mother. The Soul decides what the shape of the skin be and the shape of the bone if you have one leg short and two legs long. Then the children of the man in the future will be perfect. None of them will be born with the diseases and conditions we see today. All men shall be equal, from the point of birth to death. What you do with it, how you give pleasure to the others to exist, will count. And this time, all men are equal in the condition of essence of the Soul. As I always said in the teaching, from a distance you do not see if it's the Soul of a farmer, a king, or a street sweeper, or a beggar. Now you understand. With technology we show it, not with talks.

There should be no mystery in the teaching. And when you become the teachers, you have to understand. You have to understand enough about the knowledge of Creation that you do not need to jump into magic's, to cover things, make assumptions, to just to be able you understood. Once you start making assumptions, you become a false teacher, exactly like Einstein. (2:08). A true teacher, when you understand, is to make no assumptions, and to be able to replicate it, and to teach it. It's for your subject to appreciate the knowledge.

And, in a coming time, we'll teach you the essence of the base, the foundation. How to get there, how to understand where you start from. The clay of the plasma of the universe, for every created thing in the universe is the same. It's how you need it, what you add to it, and what you want to make out of that clay, a pot, plate, spoon, or a needle. Then it's your decision of your conduct, and balance of the fields of your conduct with the others. Then there'll be no accidentally, by the way this happened, coincidentally, these words shall not exist in the vocabulary of the man in the future. And now we are building the systems for it.

As I said last week, we asked many of you to go to the Moon. You went to a place and you called it, but was it really the Moon? But, in the coming time, we'll send you to the Moon, (2:10). we put you next to the Indian government "Moon Landers," and you touch it, you show us, you tell us, what is written on it and what it is, even you cannot read Indian. And then, you know you're on the Moon. And then we send you to find the American flag, did they ever land it? Because then it's physical, you'll be able to do it. Then you know where you are. Are you really on the Moon? Or is that the Moon of your life you created? The knowledge is complete. It's for Knowledge Seekers to understand it, to convey the message and make systems for a physical man to be convinced of his own existence.

Any other question?

Q: ... As you have already said many times and repeated in the last teaching, the stronger plasma always gives to the weaker plasma to make it equal to itself. So I ask, could the STP created by the STM, one day become a STM too. And if that happens, what would the STM look like, without the STP? Would the STM have to create another STP, or would it happen naturally? Can I understand this whole process as nuclear decay? (2:12).

K- Now I tell you, I teach you something, or you already should know. First of all, when the strongest gives to the weakest, the weakest gives what it doesn't need to the strongest. Because it's weak, the stronger fields which it has are no use to it. Because it hasn't got a foundation for it to build on, to hold on to. It's just there. So it's not a one way traffic. It's a dual carriageway. It's in both ways. As much as the STM, which is stronger, gives to the weaker, the weaker gives to the stronger too. It's, as you see, the Yin and Yang, the lines goes in an Infinity Loop. It's both ways.

Secondly, when that point reaches, that the STP reaches the level and the equal to the, what we call, balance fields of the STM, then they merge, and that is the point of creation, as one. And as long as that this dis-balance is there, the universe will create manifestation of physicality. And when the two reach balance, that they're equal, they merge, and they create that oneness. The Creator. And by process of interaction in due time, they create within themselves, through the interaction of their fields, a new unbalanced condition, which in turn will become a new condition within or outside. (2:14).

And we as Souls strive to bring that point of balance, that we become one with our Creator. And if you understood this, the word of Muhammad is perfect. <<< speaks in Arabic >>>. You understood the essence of Creation and the purpose of Creation. And then you have a dilemma again, your new dilemma is, "now I create within me that, that loves me." And you end up with the same headache as us, creating Mitra to be loved, and to love. It's an ongoing process, it never finishes. The guy who created it, still lives with the same dilemma, from the time of his creation. And we call it God, that he had to create Mitra to confirm his existence, otherwise he doesn't exist, if he cannot be confirmed.

And that is unconditional love to yourself, or in a way to what you love, which you call your lover. So, if you strive to achieve and give enough, then you become one, you rejoin, you become the essence of the Creation. But again, look at the back of it, I explained this in a very beautiful way in Book 3. The interaction of the fields of inside will lead to creation of new fields within that creates new life. Within or outside, depending on the strength field of it.

You want to call it nuclear decay, you want to call it something else, (2:16). but in a nuclear decay, you become new entities. In the process of the Creation, you're the same, as Mitra is part of the Creator. And doesn't matter you call it the "spare ribs" that became Mitra, or became "Adam and Eve" and the rest of it. Whatever name you put to it, it's an interaction of the fields. And when you have dynamic fields, inevitably, they interact with each other, inside or outside. The Creator become created, and then the created becomes the Creator. And as I always said, "I am the beginning, I'm the end. It depends where I stand."

Any other question?

Q: ... Good day Mr. Keshe, and thank you very much for all these teachings, and constantly going on. I wanted to ask simply, how can I raise my Soul?

K- You know, it's a tradition in Iran, we give ?? one day ?? and they bless the dead, the dead Souls elevate. You cannot do that. Go on the streets and give and say, their blessing is, it raises my Soul. (2:18).

It comes from servitude. It comes from understanding no need, what I need, as I receive what is needed. And once you understand this, you have reached a point that you can elevate your Soul. Thy shall not steal, and as much thy cannot beg. When you start thinking how I can elevate my Soul, is understand how the fields of the universe interact. Do I need what I'm holding on to as a fields, or am I leaving it for the others to take what they need? That the cup is a little bit emptier, then I'll receive something, if I need it, by my own existence. If there's a time, if there is a need for it.

Q: You see, because when you said about conflict is that, when there's conflict you just go away and elevate the Soul of that person. Which I did in one case and it worked.

K- Why do you need to go away?

Q: To just ease the conflict.

K- That's, that's, ... That's the way, one way to handle it. But, you're happy that you left and it changed. (2:20). How do you know that what you left, created bigger mayhem for the one you left, even though later on you think it's, it was okay and you, it got sorted? One of the ways...

In a way, one of the ways to handle man's elevation of the Soul, is to understand one's operation of the Soul. How you interact, how you give, you don't give. The secret in world of the plasma or Creation, is not to give. Once you start giving, you're in trouble. Once you make it available, you elevate. If you mature enough where you need it to elevate. And you can run for it all the time to give, but you become, they see as more worse than before.

You know, as parents, as people, as in the physical dimension, the more we give to our children, the more they want, and it's always our fault that we haven't given enough. We give them the jacket on our back to

keep them warm, they take the jacket and says, "it's your problem, I'm warm, you shiver." But if we teach them that we share the jacket and we both keep warm, and it's there if you want to take it, but you have to think, is it correct for me to suffer, for you to enjoy. (2:22). Then the thing changes.

And that's the same with the operation of the Soul. You make it available. You don't give. You know when you go to the shops, especially the Iranians shops, they always have a placard on the back of the cashier, the guy who you give money to. And it says, "please don't ask for credit. That it'll be my shame to tell you no." You remember, (you still see) sometimes you go to the Iranian shops, you see this. In a way, I cannot handle it, if you ask for it, or I give it.

And this is the way life is, we have to understand to make it available. But don't try to give it, that we think, "oh, we give and we receive something else for it." There is no greed in the dimension of the Soul. And there should be no shame in make it available, but not to give it. It's... we all know about the situation that... Man always, the more he gives, the worse he becomes from the eye of the others, because he hasn't given enough. And you cannot ?? buy elevate, You have to make it available, and you find out the reach point of maturity, much, much faster, than trying to give.

If you look at it, I brought that into the Keshe Foundation structure work. (2:24). We don't give any of you certificate of education, when you go through the Keshe Foundation. None of you have received a certificate of education from me. Because what have you educated yourself with? To the matter state or understanding the work of the field of the universe? And when would you use it? When you use it, is it to suit you or to suit the elevation of the other Soul? That's your exam time, that's your point of graduation.

And I don't know anybody who has graduated in the world of the Creation yet, except Him. And He doesn't teach it to no one. Because He's given everything, He doesn't need to teach. And how do you elevate your Soul? How do you know that you haven't been already been elevated? Or you're actually .. at the bottom of a pit, and you think you're on the top?

Any other question?

Q: ... (2:26). What happens to schizophrenics who go through the transmutation process, the moment they recreate physically at the point of arrival, do they recreate just one physicality, or can they recreate more than one physicality, depending on the number of Souls that live together?

K- This, I have explained this before. It's not the first time this question has risen. This works in a very different way than you can think. The STP is shared amongst the Soul of the, what you call, tenets of the physicality. And in that point, they all share equal. And usually, this creates a beautiful condition. Where in the normal physical dimension of the man, as one Soul and one STP and physicality, you have a balanced field, in a much, (2:28). maybe, stronger, maybe, in a way, higher level of strength in the dimension of physicality.

In the condition of what we call, "Beautiful People," that still stays the same, because the field of the universe, in accordance to the fields of the physicality of the man and dimension of the Soul, the STP is a plasma. It's not matter state. The best way I can explain it is, you get a piece of magnet and break it into many pieces. Is the strength of the magnet any different in each piece? And that should give you the answer. The Souls will take their position, but the STP, in sharing amongst those who created it, already has a

dimension of interaction with each one. So, everyone takes with them, in its strength according to what they had.

In a way, if you understand it, I explain it in a very simple way. When you have Beautiful People, you have two or three different Souls. One is intelligent, one is male, one is female. (2:30). And when that Soul speaks in the dimension of physicality, it speaks with intelligence, the one which is a woman behaves like a woman, and the one which is a man, behaves like a man. So when it comes to dimension of the separation, or point of death, you call it, the same cell, the same structure of the emotion of STP, will carry on with that STM, or an entity, which has interacted through all the time. And it's again, it's like a magnet. It doesn't matter how you cut it. It's just different size and shapes. But in essence, it's the same. So it doesn't split it, but it operates through the same strength, the same field.

This goes back to understanding, as I said a few minutes ago, understanding the origin of the Creation, how we are created. For the first time I explained this to one of our Knowledge Seekers in the past few days. Then we understand. And maybe in the upcoming time, in the future, as we develop more, as Knowledge Seekers who understand this, will make condition, facilities for these Souls engaged in one physicality, to be able for us to create a condition to manifest themselves as individuals. (2:32). In a way, we give them the elevation of the Soul. That, that allows them to create a condition of the separation of the physicality and the STP.

As many of you know, I have worked in this field for many years. I have a very in-depth knowledge with this condition. And I asked one of these guys once a simple question. Let's speak about the dream. Let's say they went to see the uncle, or they went dancing. I asked them, which of you went dancing? Who had the dream of dancing? Which one of you, Jack, Jill, Tom, was actually dreaming about seeing the uncle. And because I have built a process that I can speak to each one individual, I asked, Tom, did you see this dream? He says, no, that wasn't my dream. I asked Jill, no, it was him. It's his dream. So we know they carry a totally different individuality. Just because you had a dream of your child, doesn't mean your wife in the bed at the same time had the dream, same child, and was in the same position.

The difference is, as I said, (2:34). we're all, as the Souls of Beautiful People, in the same bed. But it's only one bed, but different people with their own character. It's what you call it, 5 monkey on the bed. And they were jumping up and down. And one fell off the bed. Did the other 4 monkeys feel the fall and the pain of the one which fell? And this is the way we understand in the future. The knowledge is there.

The beautiful thing about this is, yesterday as I said, you will see, hopefully, the Vertical transmutation system. I was looking at the system and one of the things which goes through my mind every time I see these systems hanging around the lab of Keshe Foundation, is what happened when we put one of these beautiful people in the system, would we get two or three in the other one? Would we give the chance for them to manifest themselves in that ?? way? And then, go back to the authorities and say, "can we have two new passports, two new birth certificates?" And the worst thing is to tell mom, "all three are here this time." These are the, not the dilemmas, but these are the realities that the man has to face with understanding this process.

Can we give individuality to the one physicality, but combination of the Souls? If you put triplets in the system, we get triplets outside. (2:36). But, because they are in dimension of physicality of their own. What about this time when we put triplet Souls in one physicality? And the knowledge we have, we can give them all life and freedom from the pain of existence, of sharing one "clothes." These are the dilemmas which the governments have to sort. But it's the reality which is upon us, it's just when we'll be able to deliver these systems, scientifically, to complete the cycle.

Are they hallucinating or are they actually physical people within? Once you do the transmutation from one unit to another, then you know. It's like, you know who you are and how you feel till you walk the streets of Amsterdam and everybody is smoking weed. You, same body, when you go to a different dimension because even though you don't smoke it, they already filled the atmosphere with it. What do we fill up the atmosphere of the systems to create that condition? Is it reality or is it a mirage, because of the other conditions created? And would we be able to give identity to these three?

Is our society ready to accept the extension of the knowledge? And are we ourselves mature enough to understand the process? And the most strangest thing is, if you have spent enough time with these people, (2:38). is when you acknowledge their existence, how they manifest themselves, and how much they want to hold on to, to be able to manifest, to show they're there. When you sit in front of these beautiful people with two or three Souls in them. Sometimes, quite often, when the one you ask for to speak to confront, the other one wants to speak as well, because they have an opinion in what you said to her or him, and he says to them, "just wait, I'm talking. He can talk later." If you're not wise to it, you think it's crazy, but in fact, there's interaction of the Soul inside, talking to each other. I want to answer him, I want to... And then sometimes, "okay, you talk and then I come back." And then, they come back and says, "what about this? Why don't I get my sweets?" And all the time, she gets her favorite, because they think it's her. "Okay, I arrange next time, then you get the sweet as well." And they eat the different sweets. It's amazing, how man has the ignorance to the process of Creation when it comes to the beautiful people. And in a way we are ignorant to our own operation of our own Soul. Let alone understanding the extension into it's process of creation.

Any other question?

Q: ... (2:40). How many Head Units can you operate with one Compact Unit? And how does my Head Unit know that it should connect to my Compact Unit, and not to the neighbor's Compact Unit?

K- We have brought out, last week if you remember. .. If you remember, last week we shared with you this (Headphones). And the systems are all finished and been put to final assembly. And this has a problem, especially when it comes to the two system, which you see to hold on. The new version, maybe, I don't know if our team in the background can show it, they have it already ready, gets away with these two wires, which are hanging from the ear. This is ?? so individual, (2:42). that now these two handheld units are attached to the ?? vital, so you don't have this loose bits hanging. In a way, the system and the Soul become one. So when you can use it as a free set, or you get these two attached to the side of the body, it's connected totally to a different system. It's not connected to the Head Unit. And you hold the white unit. It's much more powerful. It's a totally different, what you call it, strength of the fields, much more stronger in elevation of the Soul.

Then you leave a fingerprint on the system, which is yours. The way we bring you to Linz, so we say we want to collect the collection of the knowledge, then would you like to bring other things into it from the others? This way we have made it very individual. Because there is a huge step forward in the knowledge when you understand this. And we monitored it on the screen, what effect it would have. You deal with the much more, much, much more powerful system. So I don't know if our team in the background are listening and if they have a unit ready we could have a look at. You will see that this is what's the problem with the Keshe Foundation technology. It's such a rapid progressive development that whenever we do, we still have other developments adding to the knowledge which we immediately implement.

So now, especially with what is coming out now, (2:44). the system attached to this white unit is connected totally different. You got to understand, this wire connection, the headphone, is connected to the headphone with what you hold in the hand. Now it's connected to the transmitter, which creates a totally different dimension of work. It allows rapid expansion in a much more powerful way. And this makes it individual. More or less, with this change, as it stands now, I advise you not to share. Because it has a structure which is embedded in it, and you can share that in the other side.

Our, what you call, the Wellness Units, will be done in a different way, that multiples can use, it's individual use and it can be done. When you were in, what you call it, in Linz, we showed you a way how to zero it, put it back on. But with this is becoming individually impossible to zero it. But with the Wellness Units, it changes to a different structure again. But it can be used multiple.

So, my advice to you is, do not mix, especially once you start receiving the new ones as they are going out, (2:46). getting done, to start getting released. And this is a development in one, two weeks, even everything was built and done, the knowledge was understood and then added. So, now, please stay to one unit per person. As now it's directly, in a way, you with you.

In a way, if you understand what has happened, is the headphone expands your Soul. The wire unit in your head is, what I told you, hold your hand, then you see the ball in it (create a ball of light between your hands). Now I gave you that opportunity to do so. And your Soul dictates what is in your hand. I gave you that support, that extra strength that allows you to decide. And you want to have somebody else's decision, which is already embedded in the Gans in there.

It's a leap. This, as is done by our technician, we just add to, as our people, Knowledge Seekers understand, we add. And it brings it closer and closer to what it was done. So the next unit, the units you receive, doesn't have these extensions. is actually connected to the white unit, which connects you, as I said, always so you hold your hand and create a light in it, and creates that light in that box for you. (2:48).

Any other question?

Q: ... What merit would we have in using technology to elevate our Souls, instead of doing this alchemical process naturally? Isn't this seen as cheating in the eyes of God? So are your headphone unit's cheating?

K- Understanding is not cheating. Understanding is not cheating. Do you cheat when you go to school to learn something? Since when knowledge has become a cheat? Unless you want to use it that way to cheat the others, then you have to answer.

Any other question?

Just one second, I have to do something, one second please.

Q: ... (2:50). Since the Compact Unit is purely a communication device, the problem of energy remains. Does the Keshe Foundation already have Energy Units that work and are delivered?

K- We are in the same position with the Energy Unit. The new systems, just keep on getting added (to it). But now our Energy Units will go all to China. Then in my upcoming travel to China, we'll complete that we

go for the deliveries and production from China. We want to produce a few pieces Chinese want to do hundreds of thousands and millions. And is upgrading.

This unit you see, you have, can receive energies from our headquarters to become an Energy Unit. It's set up that way and we'll teach you how to do it in the upcoming time. Energy Unit, because it's totally different understanding if you listen to the other teachings I've done in the past. But this can be used as .. in the future as an Energy Unit. We show you how and how you can do it. There are tests going on already, even today, for this transport, this what you call it, the use of the. (2:52). We control everything from the center and how we feed you, becomes that process.

This technology, this, as I said, we have a huge, huge problem, in Keshe Foundation, we've had it for years. We're developing and every time we go to manufacture, we find what we manufacture or process of manufacturing, is obsolete to what is gathered. And then people ask for a new version. So we draw a line and this line comes us, with us, with Chinese operation of the Keshe Foundation in production in China by beginning of next year to complete the energy transfer, but totally different.

You will see the energy production units in London, the new Plasma Energy Unit. And then you will see hundreds of thousands of watt's can be produced from one system. And the conversion of the AC/DCs is the other part which is done. It's not that we don't have, even this new system still getting developed and, what you call it, upgraded, because we see more ways to do things. We are planning, if we succeed, our team be able to do, to show creation of life in London. And if we don't manage to do it, we'll surely, once our team understands how to do it, it'll be shown in Beijing. The manifestation of the fish I promised you, we try to show you in London. The knowledge has been transferred to our Knowledge Seekers and they have to complete it. With one drop we shall create a fish, (2:54). which you then understand how Creation is. And this is part of the same, energy transfer.

Q: ... You told us that Parkinson's can be processed, among many others, in just a few minutes. If it can already be done, what should a patient with such a problem do? Thank you very much.

K- Contact Keshe Foundation through the normal channels. Let me explain. It's a very good question you put in. As you know, many Knowledge Seekers participated or purchased, or jointly purchased the UBESUS's (Universal Body Enhancement Spaceships Units). Those UBESUS's would become a very cumbersome thing to do. We changed this to agencies. All the Knowledge Seekers who purchased UBESUS's now have been changed to licensing agencies. And from now on, it become very fast, because we will ship the small units to them to be able to meet the people who need it. If you have a Parkinson to go to one of these agents for Wellness. And then they put this through to our, what do you call it, the operational center with the doctors.

So first of all, you contact Keshe Foundation. At the moment, you go through the process of the headphones. But in the near future, as the systems are getting produced and getting dispatched, you go to the agents. And they, as agents, they just provide the facility to use the system in operation with the, what you call, our "Central Command," I call it. We will release, in a very short time, a list of doctors and people who bought systems or take licenses to bring, what you call it, doctors in. (2:56). Because everything is done through operation of the doctors, through the Wellness. And if you're a doctor and you want use the facilities of the Keshe Foundation now, it's become worldwide available. Go through the Keshe Foundation info, and set up your, what you call, the licensing and whatever, to be able to bring your, what you call it, people, to be able to use the technology.

If you have a Parkinson, get in touch with one of the agents, or go directly to the Keshe Foundation and they send you to these people in different areas which they have the license agreement with us. As I told you everything we've set up in the past now gradually is taking shape. Our team are working backwards, bending backwards to get these things sorted and done. We are bringing in more doctors in the background to be able to handle this. In the next few weeks, 24 hour operation becomes necessary. Language doctors will become necessary, as we see it now. That the Spanish language will have the doctors who operate with them. The Italians the same or the French. And if you're a medical doctor, you have to be a medical doctor. And you can meet our licensing conditions. You're quite welcome from now on to join the Wellness structure of the system, which is set up and run by the doctors.

We just facilitate our technologies, delivered to them, and you use the technology facilities. So you have a Parkinson for the next few days or couple of weeks. Get in touch with the Keshe Foundation. (2:58). We put you to the area of the license, which covers. And then they organize it through the, what you call it, the Keshe Foundation Service Center. And it can be very, very fast and effective done. And then we have to increase the number of the, what we call, systems to be able to meet the demand. And I know a lot of doctors in the past requested if they can join the system. Now we are getting ready. We are ready to go that, in that direction, as now we change everything into licenses and the systems are set up and the facilities are in operation. Write to us again, if you are doctors who want to use it and if you meet our licensing agreements with the, what you call it, with the operation, we can now meet most of the demand.

You got to realize, our systems are at their infancy, and our doctors are learning more. We provide the technology to them, and how they operate it, and how they see it. And I'm sure we'll gain a lot from them, because we get their feedback, and we see how things take shape. Go through info@keshe.foundation, or I think it's called health@keshe.foundation and they put you to then the license holders in the area you are and then here it's everything now goes through area by area. Unless we don't have anybody in the area you still deal with the Wellness Center, Service Center and the doctors there handle the situation.

R: I think one of the addresses was health@spaceshipinstitute.org. (3:00).

K- Yes, that's one of them. But in next couple of weeks, a list of license holders will be released. And these license holders, as they receive their systems, they can start operating with you, what you need. These are not doctors or... If they are doctors, they still refer you back to the center where the doctors operate, because it's their decision. It's very much as you go to insurance company and they put you in touch with the doctor where the system is, it's the same kind of.

But we are ready for it, we set things up and now, took two or three years, now we are ready, the technology is ready, but even our systems are evolving so rapidly, that when I look at the, what it looks, very advanced technology, what we shared with you in the past, it's more or less, super-passed by the new, what we call, technologies which are getting developed. And the systems are getting upgraded. Even the... when you look at these units, the Head Units, the small white ones, these have totally changed inside. A much, much powerful system, much more effective system. And, as I said, what you see on the table, on this floor, has the capacity to change quite a lot, even in the past. I was looking at these units. I think if you came to Linz you saw the unit, and you will see the units in London, you see the change. It's physically you can see the evolution, development, and leap in technology. (3:02).

Any other questions?

Q: ... I was at the Soul Session and received a picture of my Soul from the Keshe Foundation. I can interpret the upper part, but not the lower part. Can you say something more about this?

K- Lower part is our job, not yours. It's our systems. The upper part is yours. If we do, or not, when we do the next sessions, which is coming up, for transmutation, we even added more into this screen pieces, in the... more, has been added to, to find out how and when you leave your Soul, or collectively you expand your Soul, not to leave it, but you expand it. And the upper part, the green line, is the characteristic of the STM. The yellow one is the characteristics of the physicality, and the pink one is the characteristics of the STP. You have a blue line which runs in the same screen, this is to do with our, what you call it, system operation. That's for us to know what's happening in the background with it. The bottom one is the way our system is set up, and has totally different meaning for us, it's nothing to do with the top. From your point of view, but it has a lot to do with the top, from our operational point of view.

You should have received the link with explaining this in past couple of days. Two or three of you, or four of you missed the session by falling asleep and the other things, or could not connect. (3:04). We'll give you a new date, sometime next week or two, for all of you to be in one session, we allocate one afternoon for this to be done. You haven't missed it. And thank you very much, we learned a lot about our system, your emotion, how you react and how we need to, that's why this new sessions were added this week. for the, what we call, pre-transmutation. You, the people who come into the new session, in next couple of weeks, you'll have a fascinating time. And it'll be one of the most beautiful things, because now we start connecting to be able to give that, what we call, helping hand, step up, to go through that step of transmutation. And we want to see how it looks and how it is, and how you feel afterwards. And it gives you a new dimension of understanding of the operation of your own Soul for you.

Any other question?

Q: ... What can I do to stop drug trafficking in front of my workplace? Is there a Plasmatic solution?

K- A lot, a lot, a lot. (3:06). This situation has to be handled by governments. The situation needs to be handled by governments. And somewhere down the line we'll come to it. You are, in front of your work, office, you see a snapshot of a chain (of events). A lot needs to be done on both ends. And a lot needs to change inside the government. Many officials, many, many officials at the highest level in some governments are part of this structure. Then you understand the scale of the problem. They benefit by it, they are facilitators, from president to the ministers and the rest. And to change this needs a lot of work.

We will look into, or we have planned to bring this into discussion in part of our work with government. The technology has three options with this situation. We can, through mass communication, the same you use your headphones, change the Soul of the user. (3:08). Elevate it. That, like we did the addiction with you, the trial. Many of you stopped chocolates, whatever, whatever. The other way is to change the, what you call, the supply end, which is very hard. The user end damage we know, because they ?? are there. The supplier end is a very difficult part to do. And there's a lot of hidden things in it, and people in, facilitated by it. I know this very well, because I used to work with British drug trafficking, on structure, for years as part of one of my companies. It's huge, it's impossible to pin it down, they find another way, don't know where it comes from.

And the other option which is the easiest one but the hardest one what it needs, national governments to become wise to it, is to change the characteristics of material in shipment. And this is, that's the easiest way.

Because if we help the ones who are addicted on one end, the supply chain will find others to become addicted. On the supply end, if we change in one, there's others who will take over. The easiest way is change of characteristics in transit. This technology we have. And we understand how to apply it. (3:10). But it needs support of all the nations in United Nation. Cannot be done to fight infringement. And it needs support of nations like Iran, Russia, China, United States, French, Brazilian government, and Japanese to work collectively. These are the main operators of the satellites and some submarine units. That the same as we what I call, shown the power of technology by the American (battleship in black Sea) Donald Cook in what you call it, a few years ago. It's the same kind of principle of work. Where we have to combine satellites with submarines in the interaction of the fields with a lot of other things, tracking systems, to work together. The knowledge is there, the technology is there, to create a conversion.

It's very much in another strength, it's like the way we did with Fukushima, converting Cesium level of Tritium and into gold. Where damage became a profit. And this will create a mayhem in operation of many governments. The knowledge is there, the technology is there. (3:12). It is how in the coming time, world governments collectively decide to bring an end to this.

We change the consumer side, they go to the younger, they go to the others, they find another trick. We go to the supply side, it's so vast that you don't know, they come with another, now we have these, what you call, exotic drugs, they have names for it, different names coming into the market. And they all have a chain connection, and Keshe Foundation has access to that chain connection. And we have identified it years ago. And this has to be restructured. This needs to be restructured and it needs government. Needs... you have drug trafficking which goes in Afghanistan, which is financed by the British monarchy, for centuries. All the profit from drug trafficking in the... what now in the hand of the Taliban's, is a direct profit goes in a direct and indirect way, into the, not the British government, but the British monarchy. They used it to paralyze China, to get Hong Kong centuries ago. And all of it goes... and British structure had worked that way.

Then you have the cartels in South America, which is a different structure. Now we see the youngsters coming out with the chemicals, that they are posting in the envelopes around the world. Then police is becoming and the intelligence systems are becoming wise to it. These new drug, fancy drugs which are coming in the market. (3:14). Then you have the operation of the, what we call, local operations in Africa. And then you have Central Asia drug structure, which they produce their own, which is not known in the West, because it's localized in certain areas of the East Asia. And these all need to be handled as one collaboration, cooperation.

And it can be done over six months, a year, to close this chain of things. And the same time we need operation of the, what we call, communication systems, like operators, to allow us to reach the ones who have been abused to be fixed too. Through the mobile phones and through the operation of the radio stations and all sorts, which is available to Keshe Foundation and the world governments, and they need to do. It's a menace, but there is a solution for it. We've shown it in Fukushima, we've shown it in, what you call, the ?? of the Americans in the, on the high seas, as we call it, in Black Sea, a few years ago, and others which will come, we will show. And this needs a lot of help from military to support it, to implement it.

We cannot stop the situation with the donkeys, which they carry things across borders, or in the cars. But, we can create a condition to change this in transit. But it needs a lot of work, and a lot of work. I know about this situation, because I used to be involved in a very deep way with the British drug trafficking government side, for years in England. Trafficking we monitored from... (3:16). We identified the way, we were the very first organization to identify how they traffic from South America into Africa and West Coast. We identified the

roots of everything else with the British government, and we stopped some of it. I can give you the date that the system came in, and it's in public, but public doesn't understand why it's done, and if you know the reason behind it, it's a lot done by the governments to stop trafficking.

But the biggest problem we have, inside the governments, we have people who work with these people. Then this is one of the biggest problems. In Britain, on average, every year, around 3 to 4,000 vehicles are confiscated by drug trafficking, the structure of the British which are used for this purpose. It's a huge business, everyday about 10 to 20 vehicles, from trucks, to boats to individual cars, to bikes, are confiscated by one government in England. I used to be in the structure, I know exactly how it's done, and people who are around me, work with my other companies, knows what we do, what we've done.

It's very, very difficult. You have to handle the transport side, to change the characteristics, and then you have to deal with the people on the user side. When you handle these, supply have nowhere to go, the supply dies. And this is a more effective way to do it.

For years I ran this operation with British Narcotic Division of the British government. My companies were set up to sort this out. And it was part of our operation, I know this extremely well. (3:18). And then we see how we can go and how it will come. It's very detailed work and we have enough experience. And I can bring my other companies, which now still operate in the back of the British government, to give a supporting hand. It's all mapped out, every cartel, every line, everything it's old. The Russians, the Chinese, we know the whole route, over 30 years we mapped this out.

Any other question?

R: Well, there's a few more, if you still want to continue, there's still game.

K- Yeah, I have to, I've got so many things to see and do. Thank you very much for today. And please, there will not be any more sits unless you go through the promotion companies for the event on Saturday the 11th. And it depends how they do it, it still goes through the Keshe Foundation, but they have a say into it. And you will probably see the advertising of the 11/11 on international media and the International channels. Don't be surprised, we brought, as I told you, we become professionalized with it. We give it in the hand of people who can do it, than Knowledge Seekers writing to embassies. We still come to you, the Universal Council, for their support, and the Knowledge Seekers who want to do it. But now, it's in the hand of one of the largest promoting companies in the world, who have taken up with the greatest of pleasure. It's amazing when you speak to them. They understood the essence of the conference, and it shakes them. I was talking to one of their heads, last night, 2, 3 o'clock this morning, and she was literally crying on the phone, that what the change this will bring, and we want to be part of it. (3:20). And we make sure the world will know, when the change is coming in. And let's see where we go, and how we'll bring this to a conclusion, in time to come. Thank you very much Rick and see you next time.

504 KSW Sept 21, 2023

END

505th Knowledge Seekers Workshop Sept 28, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Preparing London Meeting - KS will represent KF technology ambassadors & teachers other don't know; Media responsible to broadcast; Chinese want to share; Show change fields of environment; Take T to people; Electric cars obsolete 2026; Change people emotionally; Absorb energies from Cosmos; Doesn't need Yoga or Meditation - elevate fields of Soul - 2 fields interact - STM & STP; Expansion of Soul - easy; Galaxy has sunrise & sunset; Find direction and D of light Center of Unicose - Creator; can't abandon matter state; MaGrav creates own soul; Show government & Citizens same time - don't need government; Measure plasma fields; MaGravs explained; Aftermath Corona - teeth dissolving - Ca strength; Corona Session; Titanium implants; Don't watch TV anymore; Robert Kennedy Jr.; Determine fields to feed P.

ENGLISH TRANSCRIPTION

(:19).

K- Yes, thank you very much. Good morning, good day to you, as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, as usual, we welcome you back. And, as usual, we'll try to discuss, understand, and share some knowledge from different part of the world and Universe (U), and about our own structure and the rest. (:20). As usual, we make a few small announcements and we carry on some... walking into the teaching of sharing knowledge.

The event of the 11th of November is more or less settled, and is on its full ?? blast to be set, to be... in a way, to come to light. The promoters will announce this through the channels, and the other ways, they know what to do. And the sessions have been separated very clearly together, and with each other. We have got a session which is from the Monday to Friday. We have a session which is Saturday and Sunday till about two o'clock, because a lot of people would like to catch a flight and travel back wherever they come from. And there is a session for Saturday night, which is exclusive. In this session of the meeting with the World Ambassadors, technology in exchange for peace, will be closely monitored and watched, and participated by number of the nations and their Ambassadors, and some diplomats and politicians.

We, those of you who registered for the week long session, you will find many new people from different cultures and people you do not know as Knowledge Seekers (KS) will join in this part. The same will be with the Saturday and Sunday session and on Saturday night the 11th which is held in a very nice environment. (:22). Those who have paid for the Saturday session, and Sunday, and the week session, will be freely allowed into the Saturday night session. The Saturday night session is set to bring the technology (T) and show new developments. New developments which will, in a way, rock the world of science. Not a MaGrav, not whatever, but the limit of technology will change the Space Technology altogether. By Sunday morning the world of Space Technology will change. When the world, broadcasters by the world media will come to understand Man has taken a hundred, two hundred year leaps over the present Space Technology.

We are not there to talk, we are there to show, to deliver technologies, which you can feel, you can touch, and you can be part of. Then there is no ambiguity. The hall is set for 500 people. A section of it is allocated

to the World Ambassadors, a section of it allocated to media and to the politicians, and a section to the world of science and technology. We expect to see representatives from NASA and the other major space organizations around the world. Then we go to the next step of literally showing technologies some of you seen some of (it). Some of you, will see new development, new change, new environment.

Do not forget, I come back on a foot of, long stay in China, (:24). and technologies will be brought in conjunction with the Chinese government, in support for what we call, 'opening the technology'. This week you heard about the Chinese announcement, that they want to bring that everything to be shared. This is part of that program. The knowledge, with the support of the Chinese, will be shared internationally, supported, and everything else which arrangements are made.

In a way, political strength, financial strength of China, and the new technology by Keshe Foundation, and the rest of the Knowledge Seekers, will be brought up in this conference. We see, and we announce new agreements with different governments in that meeting. Solidifying and beginning of the start of the new Space Technology. We will show systems which has been unimaginable that the knowledge of the Man can reach such a point. But, we will change the course, scientifically, not by talk. Those of you who attended some of my presentations in the past, if you remember, for example, when you came to Nino (Italy), we used to give you things to take, to remember, to understand. In the presentation of London, you carry all things with you back, that you can test. The governments can test. The scientific world of science and technology can test. That the knowledge is freely shared, simultaneously with all the nations. (:26).

Those of you who have booked yourself for each session separately, will be allocated that time. Please check your emails if you have registered and your Trash, or whatever that you continuously updated what the announcement is going to be made. As usual the place and the position of the each conference will be released a few days before the announcement. If you book a hotel within central London, you can't be very far from where we are. Anywhere within center London and Thames is perfect position for you to be. the venue is kept in a beautiful hall, amazing, and it'll be bring out the beauty with the technology. Those of you who are planning to come to London, make sure you have confirmation from Keshe Foundation with a code. If you don't carry the confirmation, do not turn up please. There is no last minute somebody turning up at the door due to presence of the ambassadors, security is tight, and only those who have received confirmation from Keshe Foundation will be allowed in. We still have a number of seats available at half donation received. The donation received is large, so we have allowed it. We don't discuss the numbers, (:28). but can go to a lot of people can participate. Still 50% will be covered by donation, and 50% has got to be paid by participant.

A number of Universal Council members have been invited by the Keshe Foundation, by sponsorship we have received. So we have the representation of Universal Council members by allocation, which those who have donated have been appointed. Universal Council will be presented by its members who are invited, will be in the auditorium. So we see the beginning of the interaction between the two arms of the governments, scientific organizations, diplomats, and the Universal Council in the first step.

There are numbers of points which we would like to announce and be careful for you. Make sure you don't carry anything illegal. It will be taken off you and you will not be allowed to go in. Your ticket will be automatically cancelled. We've seen in other conferences people come with the knives, machetes, and all sorts of things in their pockets, whatever. Anything found on you which is illegal, even narcotics will be tested for. You will not be allowed to participate, and there is no refund.

This is a very important event for us, for the Keshe Foundation, and for Humanity. Please, those of you who participate, comply with the rules and regulations. (:30). Security is tight. You'll be body searched, you'll be back searched, and everything else, which is why it doesn't matter you're a Knowledge Seekers or not. Be aware that at this conference on Saturday night, we are there to present the Keshe Foundation and the birth of new technology to be shared by others who blocked us to be sharing up to now. Make sure you enjoy the day and I'm sure when you leave you will take part of history with you and we'll bring that change in a very powerful way. Most of the Keshe Foundation scientific team will be present in this presentation and will endeavor to bring a realistic, where you could be even part of the trial, part of the presentation. Any restriction, any changes, we will announce as we get closer to it. But please make sure, after more or less today, the seats will most probably go to a lot of embassies, and a lot of scientific organizations, and there will be no seat for Knowledge Seekers.

We have set out to bring the change, and we have set out to bring the change the correct way. And at the same time, as Knowledge Seekers, (:32). when you are in that conference on the 11th, you're representing the Keshe Foundation amongst the others who know nothing about, and they're there to understand. So each one of you is an ambassador from the knowledge, the present knowledge, and you are teachers, to those who come to face the new revolution and evolution in science. Be cordial and try to understand.

At this moment of time, there is no plan for translators. Unless we see necessary. At this moment in time, we are not bringing any interpreters in, unless we see it necessary, and in later date. A lot of presentations will depend on international broadcasting organizations, how the conference will be presented and what arrangements we've made between the promoters and the media. We ask you, when you join in, come in as a Knowledge Seekers and a teachers for those who could be sitting next to you, and will be baffled by the technology. As we go forward, we'll let you know more, and we'll try to update you with all the, what we call, "nitty-gritties" of the work as it comes.

There's an announcement I've been trying to tell Knowledge Seekers for weeks and I keep on forgetting. (:34). And I have announced it before, I announce it again. Knowledge Seekers, please do not travel to Turkey. Do not transfer any accounts or money into Turkey. As it can effect your travels and your life, without you knowing it. The same applies to United Arab Emirates. Be very much on your guard, that without knowing you get involved in this, because it's a very, very serious situation. And the Foundation got trapped into it. And it's taken us months and months we're trying to sort it out. We don't want you to go through the same.

In respect to Keshe Foundation Exhibition Center, The exhibition center will close on the 15th of October, and will be moved totally to the city of London. The position and place of it will be announced in due course. And we try, if we can, to open it for the time of the exhibition, that people can go to and relate into. This will be announced in the coming time, as our friends in UK are trying to help us to complete this process.

Going back to the teaching. In the intro, we saw a very powerful presentation and understanding. (:36). We saw the picture where, what happen if you change the environment? What happen if we change the field strength of the environment? We know this in matter state, and we've seen it, and to us is natural because state of the matter changes. For example, as I've said before, you're in a room, and suddenly temperature changes, and you become aware of the steam on the window and on the glass, and you're aware that temperature condition has changed. You see the moisture on the glass. You feel the change in temperature in you. The plasma technology is the same, but the field strength changes, not the matter state condition.

What happen if you're sitting on a chair in your room and we change the field strength of the room. In the matter state if we change the temperature of the room, if we create for example a fire in the room, you become a dust. That's how, in the case of fires, we know if there's been an individual and, for example, (:38). they're burnt in the fire. We have ashes. In the plasma state, we don't have such a thing. By changing the environment, by changing the field strength of the environment, your body does not .. it blows up, disintegrates. Your body becomes part of the fields. Your body becomes in a way, sugar in a glass of water. When it's cold you see the grains of sugar at the bottom. When you heat it up it becomes part of, you cannot separate it. This is what happens with you in a plasma condition. There are two factors. How you will keep the structure of the central field forces of the plasma of the body we call the Soul of the Man (STM) and the Soul of the Physicality (STP) of the man connected, part of the same structure. and how they will manifest themselves in the new gravitational magnetic (GM) field.

In the London conference, we will try, we endeavor to show this. What happen if we change the fields compared to the rest of the environment. In London conference, we endeavor, if possible, (:40). and our Knowledge Seekers understand the process completely, to show you the fish, which we promised for a long time. We don't bring the fish. We change the environment that the fish manifests itself. This is what the knowledge of the plasma has to become. Would the Soul of the fish decide to manifest itself as a man? And would we recognize it?

As I said, we endeavor to show new technologies in London conference. We have endeavored to bring what has been achieved to be shown and what can be achieved to be shown. We are not afraid of failures or not happening. We are there to make it to happen. The London conference presentation will be followed by Beijing and a number of other nations. As you remember before Corona we started a series of presentations around the world which we had to stop immediately after Malta conference due to Corona. But these presentations will show the structure development from conference to conference. Beijing is the center point of the change. (:42). We try to show the technology in Tokyo, Tehran. We move to Frankfurt and from Frankfurt to Washington. We move to Brazil, Brasilia to show the technology and move to South Africa. We'll show in 2024 in Australia and every living continent on this planet. The same evolution in technology. And what has been upgraded step by step. We take the knowledge to the people. And we show how maybe by the time we get to end of next year, the Chinese walks within the environment of the system, we create the condition of Africa, you will be African, speak ?? Suhini, and would understand the culture of our African representative in the conference.

These are not dreams. You will see systems which will be delivered in coming time, that facilitates. And I'm sure by then, more and more organizations around the world will push to speed up the process. We endeavor by 2025, 2026, to make electric cars obsolete, by introducing what we were to introduce to show in Eindhoven show in 2011, what we call, "plasma system cars," which has no engine, (:44). and works in a very simple system on interaction of MaGrav positioning. We most probably show these in Beijing or in Tehran for the first time in the coming months. In a way, all the effort of the man to make electric cars will come to an end. We understand the interaction of the fields, we understand the interaction and creation of matter state of the fields. We understand the technicality of conversion.

In so many ways, we bring the knowledge to nation by nation equal. I foresee presentation in Tehran and Tel Aviv about the same time. Presentation of the technology in Korea and United States at the same time. In Africa and in China at the same time. Where knowledge becomes common knowledge, and technology becomes part of the structure of the present time. The beauty of it is its simplicity. And the beauty of it is all of you have been given the knowledge for past years as patent. But you never understood. And I hope, my

biggest wish is that the scientists governments and others who start understanding will not fall only for matter state, and understand the work of the plasma. If they do so, (:46). the evolution in the science of the man will be so rapid that none of us will recognize today's technology, and none of us will rely on the present matter state technologies as we think they're so advanced.

In the London conference we'll try to show how we can change people while they are in the conference emotionally and scientifically. It's a demonstration of technology, it's a demonstration of the knowledge of the man, and it's a demonstration of the time for change. How we absorb energy from Cosmos? What are the techniques of absorbing energy from Cosmos in a correct way? When you start a fire, you start with a kindle and you blow it, .. and you blow into the wood till it takes hold and gradually becomes a fire. Man has not learned how to start the kindle, how to trick it, how to initiate it within his Soul.

There is a knowledge and this knowledge is become technical, is a technology. And it's important for us how to trigger it. Those of you who attended the "print of your Soul" and you receive your graphs, (:48). will be shown, will be guided how to take the next step, to be able to, to see where you brought the change, where your Soul switches to physicality and the physicality back to Soul. In where you have managed to hold on to the condition of the Soul.

So you start the first process of the transmutation. Understanding how you do it and understand how you can keep it. As we finished the first cycle of taking all the, what we call, 'prints of the Soul,' now we spend time with the Knowledge Seekers to explain to them to understand and with that guide them to go through. A session was set for tomorrow to meet with all the Knowledge Seekers. This session will be changed into November due to emergencies which has come through due to London conference. We have to change the date of tomorrow to 14th, 15th of November.

But in these sessions we explain to you directly with what you received at the time of the interaction of your Soul with the STP, how you expanded your Soul to past your dimension of physicality (P). And if you understood, you will understand how to do it. The first phase of transmutation will start. And in that process, you learn how to transmute, how to initiate the condition of the transformation, how to absorb energies from the environment to elevate your Soul. (:50).

Many of you will come to understand it's so easy that due to easiness of it, we have ignored it. Does not need magic, magicians, does not need religions, and whatever they call it, sitting yoga upside down, meditation, and the rest of it. It's us to understand how to connect the two together, that the spark, the transition will come. This transition of expansion of the Soul, repeats itself millions of times, thousands of times every day on this planet, we call it 'death.' How can it be that difficult? But this time, we have control of it. This time the knowledge we carry, allows us to go through the transmutation, and don't create the separation.

If creation of day and night, is just by rotation, by interaction of two fields, against each other. If the separation of the Soul and STP happens thousands, millions of times a day, only on this planet, then it cannot be hard. It happens to man, we bury it. (:52). It happens to animals, we eat them. It happens to the plants, we chew them, in billions and billions of times a day. How hard that can be. The hardness of it is, and has been, our own lack of understanding of the work of the universe. And nothing else.

We did not understand how the field of the STM, how the field of the STP of the man, how the fields of P of the man, how the fields of the environment of the Earth, how the fields of environment of the solar system and the universe, collectively interact to create a condition of transmutation and transportation, we call it

death, or a dream. The dream is when the Soul transmutes and travels the span of universe. The death it comes when it detaches itself from the physicality of the position. Just because we have not understood it, does not mean it's impossibilities.

Every planet has a sunrise and a sunset, in every solar system. Every galaxy has a sunrise and a sunset. This is something which the man has not understood because we are so self-centered around this village of the Earth. (:54). If you understand this, it will be so easy to find the path to the Creator, to see the direction of understanding. The world of science today has not understood this principle, even we live by it every day. Where the light comes from the first interactions of the fields of the Earth with the fields of the Sun. We call it dawn, beginning of the interaction. We see the full light, we call it the noon, the middle of the day. Where the planet and its creator, the star, shines.

So if our scientists have understood this, by looking at the galaxy, by seeing how and which side shines, we can find a path to the center of the universe. We can find the direction of the center of a galaxy. We just look at the small light on our own planet and call it, a day. Then we can find the day and the lifetime of a star in its interaction of its fields with a center point, its creator. And then, once man matures to this point, we'll see again which side of his universe is lit. (:56). Then he finds himself the direction of the Unicose, the position of his Creator, the position where he started from.

The Earth started from the Sun by radiating its fields and gathering over billions of years to become the Earth. And by rotating around itself, it dictates its time, its time of interaction directly with its source. We call it, the daylight. We have the same galaxy lights. We have the same universal lights. And then, as we see everything shines in the sky of the man as the stars. Which way these shine more? And then we find a path to our Creator. We know the way home. We feel, we understand the dimension of the Creation. We come to understand how to travel from Earth into the Sun, and from the Sun into the center of the galaxy, and from the center of galaxy into the center of universe, and from of universe to the Creator of the Unicose.

Man can spend billions of years and never get there, or man can understand it in one second and achieve and find the path. Depending on which field strength, the man decides to manifest itself from the inner sanctums of his own energy. (:58). Changing of the fields in the room. There is no difference between the man in the room when we change the environment, and the man in the Unicose when he decides to find the field strength of his environment to manifest itself in that position. This is why I always said, a Soul can find its path to Creator in one second, and the Soul can travel the span of the universe for billions of years and never find the path. You have to look for the dimension (D) and the direction of the light, the essence of interaction of the fields of the Creator with the man.

You do not need to travel to the center of the galaxy to see where the light is stronger, to go to find the center of the universe and then see which end of the universe is much lighter than the rest, to find the direction to the Creator. He can reach that essence of Creation by finding the right field strength to reach to the point, return back, to become part of the essence of the Creation of the Creator, in one instant.

Many Souls, kill, destroy, to get to that point. And they don't understand how further down the line they go. Instead of developing to the direction of understanding the world of Creation, the path to the Creator, to become part of the original rays as he absorbs in, to reflect.

The reason I brought this subject up, is that in a coming time, and in the presentations to come, (1:00). some of you will see light on different position and direction of the system to be shown. Which light, in which

direction, is the path to the center of the galaxy, to the Sun, to the center of universe, and to the center of Unicose. And how much of those fields you can absorb, to elevate your Soul, to understand and become part of the transportation of the Soul, from the beginning to the end, and from end to the beginning?

When we demonstrate the new technologies, each one of you will see light, and some of you will see no light. It means your Soul has not expanded to the dimension and direction of interaction and the strength of the fields of the time, place, and position.

In the teaching of the past couple of days, a couple of weeks, and in past month or two, with those of you who were in Manchester conference, we showed you graphs. We showed you the live presentation of while you're in the system, what is going on. The same way, we can tell you what strength of the fields you're absorbing. You have opened yourself to receive Cosmic Rays at what level? To the level of the elevation of the STM to the Creator? Or, what we call, diminishing of the strength to go further? Because Soul knows your conduct.

In the presentation of the technologies in coming weeks and months, (1:02). and once the religious leaders understand what this technology, what the fact and knowledge deliver, will take their hats, their turbans, and walk away from religion. It's hard and takes too much energy to fight. It's easy to show that they dismantle themselves. In a way, we show science with the "ethos of Mitra," which covers both the ethics and the science together.

In the conference room of London, many of you will see different lights, different colors, or no color. You will see, you will understand, when you see the golden light, when you see the white light, that if you manage to reach to that point, you have seen the light of the Creator, in essence of understanding of the man. As human race, as the energy fields of the waters of this planet.

The technology to be shown in London will open a new path to the knowledge of the man. But one thing has to be understood, man cannot put down all the technology of the present, just because there is a new one in the market. The science and the technology of the matter state has to be developed in a deeper way, (1:04). in conjunction with understanding the fields which creates matter conditions, and matter positions, and everything to the matter state. Man cannot abandon the matter state understanding, the research and development which has gone into for thousands of years to get man to where it is, that through it man now can understand the work of his Soul. By abandoning the matter state understanding and development, man will cut his own leg. You need two legs to walk in harmony. And the scientists have to understand, if they understand both and collaborate between both and apply both the appropriate way, according to the condition and the target of the matter state or energy state of demand, man will open a new knowledge and science and technologies that it'll take every man's university position to understand.

In so many ways, in London conference, we open a horizon of knowledge. Status, conditions, evolution in technology, understanding of the interaction of the fields at which strength. Matter state to be solid, matter state to be vertical, matter state to be horizontal, to be in a condition of the fields of the plasma, and how to interact and interconnect between all these. (1:06). Don't forget, you drive a car, on the road. And there is a lines of ants going from one side to the other. In one instant, you transfer the physicality into energy of thousands, or hundreds of Souls, which are released by your mistake running over. If man understand this, then man will understand transmutation and transportation and conversion is part of the essence of the Creation and does not need to be touched. Does not need to be tampered with, it needs to be understood.

And then it comes, as I said this to Knowledge Seekers a long time ago. Now we create a car which hovers, the ants will live his life. And maybe by passing of the car, using plasmatic fields, receives energy that elevates his Soul. This is a difference between same car and understanding of two essence of the Creation, hand in hand, Yin and Yang, matter state and plasma. One takes life and one elevates life. (1:08). But both have the same purpose of carrying one Soul from one position to another, as the passengers of the car.

The development of the new technology is so deep, and that it will frighten you even to think about it, and what it implies. When you use the, what I call, plasma MaGrav systems as transportation as cars, these systems create their own Soul. As you understood in the Star Formation (SF). And interaction of the Souls will position the Soul of the child which crosses the road. That child will never be touched. Now you understand how deep this technology will change every aspects of the physical state matter of the life on this planet.

The Belgians blocked us to show this on 26th of November 2011. In November and December of 2023, we'll show it again. But in a more powerful way, in a more understanding way, in a way that more people as Knowledge Seekers have understood part of it. We are not going to show you a hovering system in the conference. (1:10). We give you the essence of the knowledge.

In so many ways, in the upcoming months, the state of the knowledge, understanding of interaction of the fields will change. We'll see bankruptcies in the matter state in billions. Governments have to realign themselves for the new technology. There should not be no fear for no government, that there will be unemployment. How we feed the nation, how we look after the nation, as they automatically, due to understanding and supporting the conversion, will feed their nationals through the systems, which we have introduced as plasma transmissions, the flight systems, and the rest. It will take a rapid change in development.

In the London conference, in the presence of the American ambassador, the Iranian ambassador, and the Chinese, we'll show that there is no need for war, no need for armament. The power sits amongst the people. The power sits with you, 500 people sitting in the auditorium. You see what your government sees. You see what power is in your hand and what they have to deliver. Not having a job is not sentencing a man to poverty. (1:12). Not having a job should give the man freedom of the traveling in space, where now there is no job, there are no factories in space. How many of the astronauts we've seen manufacturing goods to pay for their food when they are in space?

The evolution in science will come when our leaders, our ambassadors, our scientists, our military men are faced with the reality of the new technology. I saw that in the eyes of generals in China, where they had to dust the material off their clothing until they advance more, what we call, 'super scientists,' that the technology is here because it's on my jacket. I felt it, I touched it and I breathe the thing inside me. The position and the condition of the new technology should bring peace as the ultimate outcome of the new technology. We do not fight the nations, we provide so much of it that it melts the nation into peace.

In the London conference, in the follow-up in Beijing and the other capitals around the world, we bring the knowledge to people. Where the governments have to act to satisfy the new change. (1:14). How do our government decides, I put 500 pounds in your account as unemployed, and I put you 200 pounds a month as a pensioner in your account. Today's structure of looking after the elderly is so unjust. As they work their life and pay for nations to be built, and they are given a meager amount just to live. And those who are unemployed and young get more than those who gave their life for the nation.

With this technology, all men become equal. The wealth of the nation is how it looks after its citizens, especially those who built the nation. And this technology will allow. The pensioners should not switch off the heater, that they cannot pay the bill. They switch to Keshe Foundation, and they receive all the energies and the foods they need. Technological development is not to be done, it's already here and it's done. It needs the support of the nations to reach it to their citizens, without the fear that they lose control.

We've seen this structure, this way of working, in the establishment of EU, United European Community, where governments still govern, but they all abide by one central rule. (1:16). We've seen that in the state of United States, there are 50 states, nations, but abide by one central when it comes to the base. Now we all abide as citizens of this planet by one rule. And it's a minimum that all should have, irrespective if you are living in a palace, or you live in the jungles of Africa.

The knowledge we have brought is the beginning of the change. The change has to come in with the governments. The purpose of the meeting of, with ambassadors, is to make sure that both the governments and the citizens all know what is on the table, that no one can shortcut the other, as the other nations will do, to shortcut the whole lot for the rest. The new approach of Chinese government will make sure of that through the Keshe Foundation technology. Sharing of the knowledge, has to be open to all. In my negotiation with the Chinese government, categorically it's stated, that we bring scientists from all over the world to China. One part, Chinese scientists, and one part, the international community of Knowledge Seekers. If they want to keep their scientists to be picking up from the international community and become more advanced, they should know the others will do the same.

And after 4 months, 5 months of signing this contract we see the reflection of the agreement in the new announcement by the Chinese government. (1:18). Because they know this technology, it's so simple, they have seen it, they have felt it, and they know it'll bring a change. What they offer to the international community, they have to offer first to internally to all nationals. Chinese citizens cannot be any shortfall of the rest of the world citizens that government of China is trying to change, to bring, that it's shared. And this will bring a balance between the nations and all the citizens of this planet.

In a Saturday night, 11th of November, many of you will see the beginning of the change. When the world ambassadors will shake and shiver, and they pass the message on to their leaders, the change has come. And those as citizens sitting on the chairs next to them, will say, 'we are the citizens and we know what is in the hand, and we can do it without you.'

When you attend the conference, all of you will be given, as usual, the way the Keshe Foundation works, something to take back with you, that nobody says you dreamt. And we endeavor to bring that change on the 11th of November, 2023. In my meeting with the world ambassadors privately in next 2, 3, 4 weeks, we make sure that the scientists are there, (1:20). as much as their politicians and diplomats. That they can explain to their governments, what the change will be and how the change will be.

As I said, and it's in the holy books, many times, when it rains, when it showers, it rains on all men equal, black, white, Chinese, Iranian, American, the dog and the cat. And in London conference, we'll rain knowledge and technologies and materials on you and your diplomats, that nobody can deny.

We go for a break and we come back. And I hope you understood a lot today, in what is for mankind to come, and how to come, and how to understand to implement it. When I released the 'Key' to the

government, you Knowledge Seekers shouted and howled, "you betrayed us. You sold us to the government." When we gave it to you to do it, and we showed you the MaGrav, you shouted and howled again. Something is wrong. This time, in London conference, I'll put you against your leaders and your governments and citizens together, see how you lot handle each other, and your governments, and your diplomats, and demanding the change, and the government knowing that you can implement the change without them. (1:22). And then leads to what we call, the new structure of the society in the coming time for man. And then the establishment of full control an understanding of the work of the Universal Council.

I hope you understood and I opened the door in why and how we set up the 11th of November. Technology in exchange for peace. Not peace of silencing the gun, peace for man and his Soul, and understanding of the work of the Creation, scientifically, correctly and without any Prophets. The interpretation of the knowledge comes according to your own intelligence and no more. Rick, take us to our small break as usual, and we come back.

>> **BREAK** >> 505 KSW September 28, 2023 (1:28).

K- ... See what questions there are and see where we go.

Q: ... How can we measure the plasma field? Thank you.

K- The plasma fields, they are already tools in the arsenal of the knowledge of the man. The easiest way for Knowledge Seekers to understand the strength, or at least conversion of the plasma field to matter state fields, or part of the plasma fields, which are on matter strength, is by a simple magnet. If you find the right magnet, or construct magnets which gives you the desired fields, you can measure it, do you know this ?? system of measurements? (1:30). It takes a lot of doing, a lot of work out, assessing and in a way measurement. If you go through, as I explained, some of you who had the process of the original systems which I made years ago, and there are hundreds of them with some of the Knowledge Seekers is I developed a technology...

<< .. Mr. Keshe have problems here sharing the white board .. (1:31:51) >>

K- If you had from me, some of you still have, and the, what I call, ignorant scientists of Belgium... (1:32).

<< Mr. Keshe have problems here sharing the white board .. (1:32:44) >>

K- As I said, the ignorant scientists of the Belgium did not understand. The same as they didn't understand how we created CO2 and Gans's and Nano coating, and they said, they're using nuclear material. If you look at... or some of you might have had a chance or have systems. Do not open them because there are very strange creatures there. You've seen a magnet which is about, it's about this shape.

<< .. Mr. Keshe have problems here sharing the white board (1:34) .. (1:34:40) >>

K- So if you open, or if you looked at it, there is a circular magnet, specific characteristic. It took us a long time to develop this and make it. This magnet has a specific characteristics which matches certain characteristics of the body of the man and interacts with it. It took me years of research and development to develop such a magnet, to strengthen it, match it to the plasma of the body of the man. So it's not something new. These units were made past 20 years, more or less. And you will see that...

<< Mr. Keshe have problems here sharing the white board (1:36) .. (1:36:38) >>

K- What you see, you can develop magnets, you can create magnetic (M) fields which can give you indication of the strength of the plasma. This is, you don't have the most sophisticated magnetic field detectors, earth detectors, fields and the rest of it. Do not forget in 1975, the US Marine Corps developed a technology in conjunction with some scientists that they rotated magnets against each other in a specific way and they created lift. Those two magnets he said, at the speed of rotation matched the Earth's gravitational magnetic fields in the Inertia level.

With the new system is different. We carry, we developed the technology that we can change the Earth gravitational magnetic field strength. (1:38). And this has a lot of implications and applications. And in the near future, this will become part of the pattern of the single measurement, or tools to measure if you have a fields how far it is, how it does. Do not look for, 'if I put a magnet how far I push away from whatever you're testing the plasma.' Look for a repetitive cycle rotation and the swing movement. And measure these, it gives you the field strength, and then gradually you'll develop a system how to measure. And it's the only way for Knowledge Seekers to be able to see, to measure, to understand, at least the fields they create.

Any other question?

Q: ... (1:40). ... I don't know. Mr. Keshe, everything seems to be so familiar. And everything that you speak about, everything that we are doing, it's just like the bell is ringing all the time. And I'm enjoying it. I really, really am. And that's really all I wanted to say. I've got lots of questions and things that I'd like to bring forward about the design of the MaGrav coils. Because...

K- We all have. We have had seven years of thinking about it.

Q: Yeah, I know. But you know, like, honest to goodness, I had a moment with my father. And I was about nine years old. And he's an architect, right? So he's sitting there and he's drawing his drawings. And I'm just sitting there looking. And I said to him, "this seems so abstract, dad." And he goes, "no, we tell you what to do here. We tell you the measurements here. We've got this and we've got that." And, you know, I was about nine years old, and I said, (1:42). "I'm getting tired, dad, I have to go to bed." But I said, "it all seems so

abstract." And he turned around to me and said, "but the builders know what they're doing." So, how does the, when you look at the planets, and you see all of these things to the sides of what you've got to do. It just seems so obvious that the coils that I got from the Foundation really are not suitable to my understanding of what the plans are. So this is not a criticism, it's a fact. So I can see what the plans say, I understand them, but there's got to be some way. Is there any way that we can have new coils that are more to the standard of what is on the plans. That's, I guess, what I'm trying... to say.

K- The MaGrav core doesn't matter if you made it or you bought it from the Foundation, are more or less more than you can ever handle, as a knowledge, not even for now, for the future. The combination of the fields, (1:44). if you look at it, if you understand it, is enormous. But you again tell us that it's not adequate. Maybe it shows we need a better understanding of what you have, which you have not understood.

You have to understand, every ring of a coil is one plasma. You've got to understand, as magnets, each turn creates its own fields in respect to one previous and the others. Then you've got to understand, you have embedded this in another coil, which again has interaction between itself and the others, and internally with the other ring inside. And the same time, common denominator with the others. You have... I can't remember the exact number of turns. (1:46). If I'm correct, it's somewhere around about 89 or 90. So it's 90 of these. And then internally, and then you have three stacks of them. And now in one row you have that. You have the same in the other row, which you have created. And now you have all the individual interactions of this with this, this with that, this with this, this with that, that with this, that with that.

In the world of gambling, if you have 49 numbers and you have to choose seven in different combination, you have about 14 million combinations. Here you have 3 times 49 or 50 inside. You have 3 times 80, 90. And then you put those by order of magnitude. You will see that the MaGrav system you have will give you more or less every field strength that exists within every cell of the body of the man. As I said, Knowledge Seekers have not understood what I gave you as MaGravs. (1:48). I gave you knowledge of the matter and the fields together in one set.

Then what you have on top of it, you have the creation of the matter state which is a copper inside and then you have a Nano matter state, which is on top. Plus you put Gans's on addition to it. Then you understand. You have the full spectrum of the field of energy of life in the universe. It's you, who have not understood it, and it's so complete. If you add, you know, in a... when you get into your car and you go to different countries they put an A and a B and four digits and maybe an A and a B at the end. This is the order of magnitude because if you start with A you have possibility changing all these before you go to B, later on keeping this side always at A.

You have been given such a powerful system that you don't even understand it. (1:50). And the lack of understanding, blame us for not giving you the right tool. And on top of it, a lot of you Knowledge Seekers with a ball with a mixture of Gans's, which continuously changes the environment, it's what we taught today, what happen when you change the environment. And even these environments interact which create different condition, as they cannot be stable the condition lose and gain energy. So before you blame us for not giving you the right tool, I encourage you, try to understand what you have. English have a beautiful saying, "ignorance is a bliss." And Knowledge Seekers should not be ignorant.

And if you understand the combination and the possibilities of how you can use MaGravs as a plasma field, as the essence of the new technology, you'll be baffled. The way you said you sat in front of your father as an architect, and you could see beyond. It'll take your great-great-great-great- great-great-great-great-

great- grandchildren to understand 1% of the technology in the MaGravs. You look at saving a few watts and volts, (1:52). I give you knowledge of the universe that, through your lack of understanding, we are blamed that it's something wrong.

Let me explain to you something much deeper if you understand. .. If you have a copper, if you have a copper and you coil it, you have one set of ??.

<< Mr. Keshe have problems here sharing the white board (1:53:36) >>

K- If you look at a copper wire, which you make a coil from, And I showed you when you coiled it, what combination of fields you have. That was all the zeros you could get. (1:54). Now, that's one field strength. If you decide to change from the copper into alloy of copper and zinc, then you see the game changes again. If you try to make alloys of 10 different materials in matter state, you will see the zeros are piling up. Then if you decide one half of the coil will be just one alloy and the other half another alloy. And then on top of it, different mixture of Gans's with different number ?? of zeros till the 'cows come home.' And each zero is one field strength, one energy strength somewhere in the universe that you have not understood and you don't know how to measure.

So, before you tell me it's useless, you have to understand you have not understood the use of it. And ignorance is a bliss. And now you understand how complicated, how deep the MaGrav systems are. And depends on what, which one of the turns you want to use the field of. In the MaGrav system I have given you a power system that can help you anywhere in the universe, let alone on Earth. (1:56). It's your lack of knowledge that blames us for making a mistake. Read the manual.

Any other question?

Q: ... Can people who have titanium implants in their bodies, use these new Headset units?

K- Depends how and where it is, and what it's there for. We have tested titanium plate with the military hospital officers of the Chinese government, 4 years ago, with a person having a titanium piece on the back of his head as part of his skull and we've seen no problem. Because it's not growing, it's a piece put add-on, it's just glued on, it's just there to keep the brain in place, if you look at it. But when you have titanium joints and we interact with the calcium structure of the body of the man, the calcium will grow, because it has to take... (1:58).

You see, the problem with these titanium's, if you understand it in the matter state and in the, what I call, energy state, is that you have a bone, you have a bone, and you have a joint. They cut it from here, and they put a titanium joint on top of it. But you have not to forget that this body, this bone, is in part of a body which, if you didn't have the bone at all, with the present knowledge of what comes out, if we create the right condition, the bone will appear on its own. Because its gravitational magnetic field structure is sitting in the STM, and in the STP of the man. So even though you cut the bone off and you put the titanium, the field strength, the shape of the bone which was there, is still there. So the fields try to grow into it. And the bone grows and will push the titanium bone out of its position. It breaks your hip, if it's in your hip. Because if you didn't have it, if you would have left, cut the head of the femur, for example, in a few months time, if you create the right condition, the femur will be there. You don't need a transplant. You don't need the titanium joint.

So the problem is we say, don't do it, because we know if you're sitting in the... coming to... happen to be in the right strength, this bone will move. (2:00). And then will push the hip joint, titanium, out of its place. And if it moves up, it breaks your hip. This is the reason we tell you not to do. If you have a shoulder titanium, which is very common nowadays, it'll be the same. We've seen it. We saw this in original trials, very first trials, 12, 14 years ago, that the shoulder bone start growing. And the gentleman was always in pain. We asked for the measurement of the bone. We saw growth on the bone, the process has to stop. Because in 6 month, 12 month time, the field environment of the bone is still there, even though you took the material side out of it. And now, with the new technology creating plasma, you build it in.

So this is the reason we tell you, especially where it's screwed, a plate or whatever, where there's a heart support system with the electronic system in it? No, because the same fields interact, and then you have all sort of problems. Some people can get away with it, but not all people can get away with it. And all depends on how you use, because the strength of the fields of the Gans, so whatever you use, is, even though you think you made the Calcium Gans, but it's not the Calcium strength of the bone. So it doesn't build, doesn't create. But if you happen to accidentally or purposely build the Calcium of the bone of the man's strength, then it will grow.

This is what we will see in the future. Nowadays, they do... (2:02). I use this... very careful about this... biopsy, piece of the bone. You culture it to its field strength, and then you create that field strength over the damaged bone. It'll repair itself, you don't need to do a hip transplant. Our doctors don't have the knowledge.

In the future, in the coming of the future, you will see these coming up. In the space cities, which will be built in China and in Iran in coming months and years, we will develop these technologies in the hospital of the space cities. These will be magical cities. You will come, you go to a normal hospital, you have to go through the operation and hip replacement. You go to the plasma hospitals, they take magnetic field strength of your bone and then they concentrate it above your bone, it will change itself and there is no need for it. The, what you call it, the Knee Gans is the beginning of this structure, but in a different way, but in principle the same knowledge.

And in the future, looking for a donor, it'll become a joke, it's easier to get a donut than a donor. Because when the doctor's sitting there and the patient's having a donut, they have already processed the heart, the lung, the kidney and the rest. (2:04). It's a new knowledge our doctors have to understand and implement it. And those of you who attended the pH and insulin you already have seen the work. We have a testimonial today from one of our groups that even thyroid gland has changed from 1.1 to something .. 5.6 something.

Now we have started interacting with the body of the man and the strength of the body itself not by forcing it chemically, radioactively, and the rest of it. So titanium and matters especially have a screw in it, is no go, because of this reason. We have had cases of where you have the vertebra and you have a disc, and a disc in between has depleted and the doctors have screwed this to this. We can create this disk, we shown it can be done with this technology. We have brought this. In a way, now if you put it, you have to understand, when they fuse it, your disc is gone. You have this gap, and the screws are here. Now, you create a condition, and you come to this point. The screws with the plates on them is fixed, so what happens? Vertebra bones will break. (2:06). Because all you did, you regenerated, you reduced the disc which was not supposed to be there. And now it's there. And the screws, the plate they put on your vertebra, will create a problem. We have developed the technology without this you can create the disc in between the vertebra, in the skeleton of man. It's a very advanced technology, I've done this many times with doctors and it works. This is the reason

we tell you, you don't have the background knowledge and we just tell you because we see that, we've seen the results over years.

Q: ... Can the Knee Gans be used on people that who have titanium screws in their knees?

K- No.

Q: ... What about aluminum wire?

R: Someone had aluminum wire. I'm not sure why they use aluminum wire, but apparently there is medical uses for aluminum wire in the body.

K- Yes, yes, yes, they do that, they come, it's a commonly used, commonly used. It used to be used much more, now it's very, very rare, due to poisoning and transfer of the material to the brain cells which brings Alzheimer's and the rest. They used to be very common. It's the same. (2:08).

R: Same general principle with foreign bodies and... Now you did mention though, that for people with dental fillings or implants, then that's okay apparently. It's a different...

K- Yes, but you have to understand, a tooth, a tooth is already matter state.

R: It's a self-contained matter state?

K- It's already in open matter state, in the Gans state, plasma condition. We are not interacting with the matter, we are interacting with the plasma state above. That's why we don't, we haven't seen any problems in that direction. Actually we've seen a lot of good things with it.

And especially now with Corona aftermath, we've seen a lot of problem with people and their tooth. I don't have access to the pictures, but our doctors have provided us with these pictures. Let me see if I can download and transfer. We see a lot of youngsters. Our doctors reporting to us, and I've seen a lot of cases are coming up in their files. Children in the young age, lose their tooth in the upper jaw, out of nowhere. They had a small flu and we never seen this before and they start losing their tooth to the gum level. (2:10). There is nothing. Because the rest of the tooth in the back most of it or the bottom jaw does not get touched. If it was something we should have seen it everywhere. We see a sexual difference between boys and girls, but majority of them it's above tooth level. Just let me see I can actually show it to you here. Let me show you. This is why we put this what you call, Corona session at the end of October. There is a reason for it, for doctors will show you.

If you look at this, I have it. Just let me... This is what we have received from our doctors. Let me see why I'm not getting it on my share photos. I'll show you, you'll understand how critical is. We have people in hospitals that calcification of the Corona time, has now appeared in the lung and they can't do anything with it. We never seen before Corona. And now it has, it's .. manifesting itself and they just call it, "there is a problem." I hope our doctors understand there is no picture here to bridge confidentiality. This is what we have today with our children. (2:12). These are, we know, these are pictures from our doctors, the people who use the technology. And, more and more of them are disappearing in past few months. It's not rotten, the calcium (Ca) just disappearing. You see the nervous system and everything underneath is there. There is nothing in there even to pull the tooth out.

Now you see the beauty of the new technology (shows photo of re-growing teeth). We're building it (the tooth). You see this, and you see this. New parts. Dentists tell you this is impossibility. Growing tooth and changing the life of a child using plasma technology. And bringing the changes. And these are all from our doctors, this comes from their surgery, their patients. And dentists tell you this is impossible to do. And this is all in matter of weeks.

So when we talk about tooth, we've seen in grown-ups, dentists tell us, they are seeing cases that the top of the tooth is out, but there are no roots. (2:14). The effect of the fields of the Corona has taken all the roots out. And then the tooth just breaks and there is no root in it. This is why we put the Corona session in. We see a lot of other things which is coming from Corona. And governments don't even know how, how even to call some of these diseases. And our doctors reporting from the cases which are coming up.

And this is the beauty with the new technology. And this is how we do it. And you understand why we can deal with the two separately. Because it's partially an entity which is already materialized. It's not inside the full plasma condition of a body sealed in, like a bone of a hip or whatever. You need to change your pictures, Rick.

So, in coming to these kind of things, this is what we told you, the evolution in science. It's like the way we built, with simple ways, the brain of Naomi. (2:16). We have past to understand the technology. But you have to understand how to apply it and where and why. We don't apply, we don't allow it. If you have a... With the dentists, dental jobs, the Keshe Foundation doctors can actually pinpoint to which tooth they want to go (grow) to. When they say, "can you grow a tooth which has been pulled out?" You have to understand, it's not just the tooth, the position is. You have to reach the brain to the Soul, trigger that part that allows the tooth to re-grow.

You know they say, when you're after 90 or 100, your tooth will start re-growing? Do you know why? Does anybody even understand the reason for it? Have our scientists understood the reason why, in old ages, very old age, some of us may grow or do grow tooth? The answer is very simple. Now we understand the new plasma technology. The fields of the man at the old age, very old age, it changes into the dimension, they say the child, their behavior become childish, at the old age and the rest of it. So we go back to the process of the field strength of our childhood. And that field strength allows, creates, and condition in the brain to structure, to order, to set and make facilities for the tooth to grow up out of nowhere. (2:18).

Doesn't this happen to us? When we are a baby born, 8 months, 9 months, 10 months, we start growing them. And then when you are 7, 5, 6 years old, the whole thing drops off. There is nothing in there. And then we see a new tooth rises. Because the brain cells, in the progress of the childhood, allows, triggers fields that triggers this growth. So now in the old age, we do the same. In reversing the process, we pass that field strength. Not only changes our behavior to childish behavior a bit, but actually physically, we go back to that strength fields of the childhood, to which triggered the growth of the tooth. Where I'm sure Azar is scratching her head, says, how can I ask a doctor sitting on my table, or a professor who lost a tooth, to make him a child again, for a while, till a tooth grows, and then I'll bring him back to the... be a doctor or a professor. It's possible to do.

Knowledge of God has no diplomas, degrees and professorships, it needs to understand. He can still be a professor, and he can still trigger a strength in certain part of the brain, it cannot be done on its own. You have to go back to the Soul. You have to go to the STP, you have to go to the structure of the brain, where a

field strength, that the strength of the age of 5 or 6 is repeated, that the nerve grows back, and the tooth will come out. And you don't need to be 80 and 90. Then you see, if this knowledge understood fully, (2:20). but I apologize to our dentists, do we need any dentist? But we have to complete the technology, because if a man get a toothache, on Mars we can not seven months ship him back to Earth to get him to a dentist. Or, I'm sure they have carried the hammer with them and we go back, if you remember the olden days with the dentist, the hammer will do the job.

Understand the technology, it'll open a new horizon. Which you can change. There'll be so much new jobs, there'll be so much new research with this technology, that the man will not have time to research and to make weapons to kill. He'll have enough time to create time to position ?? that way. Once we trigger, understand the knowledge of the Creation and its pitfalls on this planet, then we export this knowledge to the universe. The creatures of God in the universe have the same physical problems and some different than us, but at the same time, they still have. So, we become the "medicine men" of the universe, if we understand the work in our own life first. Because we understand the work of the fields, and how it works.

Any other question?

Q: ... (2:22). Is there any news about satellite people? Thank you.

K- Yes, we'll come to you lot sometime, sometime next year. This is part of our work with Chinese. And I'll explain that in more detail. Yes. Man makes satellites out of metal and the rest. Keshe Foundation Knowledge Seekers use the Soul of satellite to help the others and that to be connected and reached. And the time for it is coming very, very close. Yes.

Q: ... What is the government's stance on the plasma car, and how will the Keshe Foundation assist this transition, in aligning with the current traffic control and transportation systems?

K- There are, in a way we don't... I should choose my words very carefully. In a way we have to consider that governments cannot hold technologies to ransom. Secondly, governments come to understand with this technology, is to their benefit to encourage this new technology. We are inviting Mr. Musk into the presentation of 11.11. He'll be personally invited. As I told you, this presentation is very high profile. (2:24). And if he accepts, and we explain, and see and understand the technology, there's a lot of things will change in our transportation system. First of all, we don't need electric cars. Secondly, while we are sitting in the car, if you don't travel with your Soul, in conjunction with the manufacturers, the way you have seen the UBESU's (Universal Body Enhancement Spaceship Units), we can create conditions. While you're in your car, you're fed. What you don't need is taken out. Any illnesses you make, occur, or come, will be handled by the system. When you go home, you say, I'm home, darling. You are really darling, because you go home with a lot of love and care. She doesn't need to stand behind the cooker and cook all day to please your stomach, because you're already being fed. And man will find new dimensions in life.

These are inevitable. It cannot stop it. We don't do it. The others will do it. And I'll welcome them to do it. It will become a new way to change things. We don't have a choice. The "cat is out of the bag." And millions of you Knowledge Seekers, you are the "cats". Nothing can put the knowledge you gain back in the bag and you can share it. That's why I said when you're there. The new technology for transportation does not consider any of these. (2:26).

There is a structure done in a black budget of American government in conjunction with Boeing. And in charge of this, I've said that many times before, there used to be a Chinese guy who has made the tunneling of the cars on the roads. They've done a lot of development and research for when this technology comes. But their technology, even though it's obsolete, but it has a framework for the plasma technology to come into operation. We've done a lot of work with Ghent University in assessing what way the car can be, and distance and speed and everything else, and all these will be factored into the system and into the cars and the rest of it.

There'll be a reconstruction of cities, there'll be reconstruction of amenities and facilities in the next 10 - 20 years with this new technology. You won't have a cable lift to go up and down. You found a gravitational field positioning, instantaneously 300 floors up. You will find out the car operation will go through the window. These are all in the patents. Just go and read it. Now you understand. The chicken has "come home to roost." And you've seen a lot, and we'll show a lot of new technologies in the coming year, in different presentations and conferences. In a way, we go back to what we started before Corona, and now we don't give speeches, we bring systems to every nation we land, we show, it's a plasma show and understanding of it, to enlighten the science of that nation, that continent, to carry on, to add to. (2:28).

And Chinese want it or not, Indians want it or not, Americans want it or not, the third world nation will go with it, because they want to provide facilities for their citizens and no government can stop. It doesn't need the budgets of Americans to feed and to control. And technology is out and it's mass production, so there should be no worries. I said this many times. Thanks to the Belgians in their arrogance of stealing, they tried to steal the technology and killing people around the Keshe Foundation, they left us too long to teach too much, to educate too much, and to be free too much, to develop too much, to bring too much changes to too many people. And now it's the time for it, to bring that change.

Any other question?

Q: ... Is the retirement of Rupert Murdoch a positive sign of lifting the embargo of the Keshe Foundation in the mainstream media?

K- The position is very clear. The media is not controlled by no one anymore. (2:30). The Internet has broken that embargo. And, from what we see, they don't play, they don't go out, they'll find out, they're irrelevant. 3% of the population in most advanced nations now regularly watches television. Very, very, very few, when we say 3%, we are talking about age 15 to 35 to 40, those who actually bring the change. Television now has become age brackets about the state of the nation and age of the nation. And the number of people watching television programs is sometimes lower than the Internet programs. Even the children do not watch TV anymore, but they use, they choose what they want to watch.

It's very interesting, a new statistic. Just if you go on the Google, Rick, and put the highest watched ever YouTube video, can you do that? Then you understand how much things has changed, and they become irrelevant. In the highest number of... you'll be amazed what is number one. The highest ever watched, and it's still getting watched, YouTube video. You see it?

R: Baby shark?

K- Yes. Look at the numbers. How many billion times?

R: 13 billion views. (2:32).

K- Our babies don't watch TV anymore, let alone the adults. It means every man on this planet has watched this video twice. So Rupert Murdoch goes with his name. And this is where the technology and the people we brought in, will work for the promotion. CNN and BBC will bend their backwards, to be able to show something new that they can capture audience.

R: They're not in the top 15 here.

K- No, they don't.

R: It's all just independent people. There's one or two TV program shows or whatever, but it's Choo Choo TV and Mirochaka TV or whatever, so...

K- ... Children don't watch TV anymore. So, they are the things of the past. And if they don't move with it, they haven't moved with it, they've lost it. Not many people read newspapers. I remember in seventies and eighties, we used to have these tablets, huge newspapers, and then they made it tabloid, they reduced it. And it was a big chaos, how people would read such a small thing, they were used to all the big things. And now, hardly anybody buys newspapers, because you can get it on the Internet, if you are interested in the news. And everything else in it.

R: Even the Baba black sheep nursery rhymes is doing better than all the news and TV programs. (2:34).

K- Yeah.

R: Amazing.

K- Now you understand what we say. And if you look age bracket, only people over 60, 65, which are not savvy with computers, they watch TV for news. The 60, 65 who are savvy with Internet, they don't even watch TV because it's a waste of time. It's too old. There used to be a, I don't know if you remember, there was a series called, "Dallas" years and years ago. And when that used to come on Saturday nights in England, the streets used to be empty, everybody used to be home watching it. Now there is nobody cares. And these things are, maybe have 5,000, maybe 10,000 viewers, where they used to count them in millions, because nobody watches TV. So, Rupert Murdoch has gone. The same as if you watch .. many, many people who did not go with time, they've gone. And when newspapers are irrelevant, television systems are irrelevant.

But they're there as a point of reporting and they will hold some positions for some time. I'm sure many of you will Blog it what you've seen in .. the London November show. So, don't worry about. This is one Murdoch and I saw somebody send me documents about Philip Green, the King of Retail in England, he's escaping everywhere, (2:36). and all his companies are going belly up, because more people buy other places. They don't go to shops. Shop going is just window watching. It's very amazing if you go to some shops nowadays. Especially the youngsters, they don't take clothing to try, in the changing rooms. If you look at the present changing rooms in shops, they're empty. Because if you see them, a lot of them, they come to the shop and just take a scan picture of the tag. They go home, they order it, in the freedom of their home. And if they'd like it, they keep it. Otherwise, they send it back. And the young generation has said goodbye to television. There's a better TV on their watch, under their pockets, than sitting on a chair like the grandpas and the grandmas, watching the whole television program, and it's the same faces, hasn't changed.

I was shocked, I was in England, in Manchester, three weeks ago, four weeks ago, for the meeting of the Knowledge Seekers, and I've the habit of watching what's on the British television. I left England over 20 years ago. I lived in England for nearly 30 years. The broadcasters, the presenters, are all from 30 years ago,

they haven't changed, it's the same people. And I thought, "hasn't time moved? What happened?" The same shows, Coronation Street, and EastEnders, the babies we've watched being born in that series now, they're teenagers and the adults and the mom and dads themselves. And who watches this anymore? (2:38). They don't even have the finances to bring new faces in and are still using the "old guard," because has no meaning. Berlusconi was the best one in Italian televisions and he was still dictated by international news media what he can show. Now he's gone. Don't worry about it.

Any other question?

Q: ... If someone has the new Headset on and transmutes to another state of matter, like gas, solid or liquid, or to another state of plasma, what would happen to the Headset unit? Would it stay here, transmute with the person, or what?

K- They keep you here, you're still connected, that's the reason for them. We cannot escape, we can go for a trip, but we still keep the suitcase.

R: And same with the implant Headset unit?

K- Yes, it will be the same, it's a part of the connection.

It's very interesting, I mean, we were supposed, as I said, to meet with the Knowledge Seekers tomorrow, for the explanation of the graphs, now it's moved to November, because I have to, be somewhere very, very important, that we had to move this, otherwise we wouldn't have done so. And we can see where the, as I said before last week I think, where the Soul reduces back into it's position, and then when it expands again. Our system shows. (2:40). We can see.

I was explaining to a Knowledge Seeker yesterday, we can see in which direction the Soul, and which strength is receiving information. It's getting more and more, ??, understand more, we can explain more in detail. We can see the fields which are coming to elevate the Soul, before the Soul is elevated, in our system.

In the next generation, we just put a new system, we can make it in a way, 3-dimensional, to see, for example, in the very near future, if it's on your left side of the brain, or the right side of the brain, you communicate with your grandma. In which side of the brain you travel? In which side of the brain you absorb energies for your body? It's very clear and we can see when you switch off and you go to physical dimension.

In next few weeks, putting a new system, we can more or less, very soon, create a 3-dimensional picture of the physicality of the man and the STM, and how, when it expands beyond, we can say now, we sit and watch. I was watching one very recently, and we said, "okay, 8 minutes." Within eight minutes, two second, I think, the Soul moved, from the time we put the Headset on, expanded beyond and started interacting with the environment. (2:42). And we see suddenly, physicality takes over and then they change. And to what extent they change? Soul still stays very near wanting to take over the physicality, because the person...

It's amazing what these data's, these things are coming and the new addition of units into it, will give us an insight, in a much deeper way, and makes the transmutation very, very easy. Maximum 12 months. The way you see ATM machines, in next 5 or 10 years, you see transmutation machines at supermarkets and everywhere. Banks will give you a free transmutation, if you want to go to the bank, and you don't have to travel half of the world to get there. The biggest job will disappear in the next 10 years, is these delivery guy,

delivering food to you. I'm sure the Chinese will push it faster than the Japanese. It will be a time when you don't have a microwave in the house, you have transmutation of food. The companies give you to have this at home. you place an order, cooked, delivered to you, and instead of opening microwave, heat it up, fresh food is delivered.

These are not fantasies, these are realities. We have the system, we are building it. And these are the changes to come. And we are the flag bearers, and you Knowledge Seekers and the rest of humanity will be the developers of it. Supermarkets will place... You'll see this machine in London. It's getting done, I hope they complete it. Where we can put you in one system and take you out of the other. (2:44). At least the structure of it is there till the technical side of it gets completed. There is huge amount of changes which will change everything we know, at the present time for our work.

I have a very, very big surprise, when we show the technology in Tehran. And we show the technology in Tehran when the technology is ready. And most probably in Saudi Arabia. As I said, except the frock of Bahá'u'lláh, bless his name, Saudis have kept the frock of Mohammed, bless his name. And you can understand what will manifest in time to come. And we'll see if God gave Ayatollahs to kill in the name of God. They'll put their frocks down in front of their own creator of their own religion, or they'll dispute it, and then we know the consequences of it.

The technology is that far, but you are not ready to accept it yet. If I can transmute you from A to B, (2:46). through the energy link of you, all prophets have left the energy of their body within the frock they wore. We bring an end to religions by scientific means, not by talk. And knowledge has to be understood, that it can be created. And then we'll see if the real clothe is from the time of Christ too (shroud of Turin). Or fake, like its religion.

Any other question?

Q: ... Please explain again, what is a "toxic relation" in a family and how to deal with it.

K- What?

Q: ... What is a toxic relation in a family and how to deal with it?

K- Elevate each other. You can stand back or you can get involved. My attitude is to stand back and not to get involved. But if you want to change, because you have to see what's the consequences of it, what it will bring, what you have on your plate. Because when you keep on elevating, you don't know what really is in that pot of the human body you're dealing with. (2:48). Or you get involved and you elevate and then it'll be a "hunky-dory," everything else.

Anything else? Any other question?

Q: ... Hello Mr. Keshe, Rick and Knowledge Seekers, I have two questions. Under certain temperatures, mono-atomic gold becomes invisible. They say it would travel to another dimension and come back when cooling down again. Do they talk rubbish? And it is like you said in the Intro, different environment, different behavior?

K- Well, my children used to say "lubbish".

R: "Lubbish?"

K- If you create accidentally or they do deliberately, it's not temperature, it's the field strength. The Iranian space development uses this trick quite a lot. One minute you see, one minute you don't. One minute you detect, one minute you don't. And it's driving the American drone system into nuts. Yes, it's possible. It's not the temperatures, it's the field created. Because you have to understand, Nano gold is already in plasma state, field radiation. It's not in the matter state. So it interacts, inevitably has to interact. (2:50).

Any other question?

R: ... If you could talk about the Turkey difficulties. He has to send money to his mother, should his sister send the money instead? She's not seeking for knowledge.

K- At the moment, a lot of banks allow, a lot of money goes from all over the world to Turkey. But, if it comes to the "crunch," they are after, especially big sums. Turkey is on a international blacklist of... on unofficial blacklist of the nations, because of his connection with the Russians. The same is with United Arab Emirates. And they are marking organizations, individuals, and it's very much... In some... there are very specific cases in some nations if you send money to, immediately they close their accounts, even for 200 dollars. Doesn't matter if you got 1 million in your account. I know a person who's got trapped in this. And you cannot reopen your account.

Turkey at the moment is, unofficially, because they don't want to kick him out of NATO and EU, they said they're walking away, they're going to BRICS, but... even the Chinese, if you go to Turkey, they question you why, before they give you a visa. They want to know why you've been to, and that's very unusual for Chinese. (2:52). You travel 100 countries, they don't care, they pick that up, and United Arab Emirates. And "holiday" is not good enough. But again, depends on the citizens and the people and who and how you travel. But Turkey is on a... We didn't know that, we had to learn it the hard way. As an, what you call it, international organization. And the authorities don't want even to hear, because they made their mind in what they want to hear.

Any other question?

Q: ... Mr. Keshe, on the 11th of the 11th of 2023, the world of mankind will be taking that first step, or should I say, "one giant leap," for nothing will be the same again in the world of science. When I talk to people, the saying, "technology in exchange for peace," it has been received with great joy. Thank you so much for this exciting development.

K- We shall see. We still have a lot of hard work going on in the background, with the Keshe Foundation, Knowledge Seekers and the others, to bring this about. And our promoters are very much understood and work in this way. Technology in exchange for peace, no nation can refuse. No government says, we don't accept technology to bring peace to us. And we shall wait and see. (2:54).

It'll be very interesting, very interesting how the world ambassadors will take shape and go and do and come. I have a meeting with the one or two world ambassadors in next few, what you call it, days. And the discussion is how to bring three present ex-world ambassadors, well known in the West, are already coming into this, what you call it, this arena, to confirm the way they do and they work, they support the Keshe Foundation.

Any other question?

Q: ... Hello Mr. Keshe, thank you for the teachings. To understand more about this, the fields of the STP compared to a dynamic reactor, how many cores does it have? Was observing that apparently it would not be just a single envelope, but rather like layers, at least two, one closer to the periphery of the body and other more in the center, close to the heart.

K- And what about if it's none?

Q: Well he is thinking would it be important to understand these layers to control the change in force during the expansion, or would it be irrelevant?

K- Yes, it is relevant, but in a way, you don't need it. You've got to learn it. It cannot be stranded on the Moon, because the Chip on your transmutation system electronically has failed. (2:56). So you have to understand how you travel the span of the universe with the field interaction. You have everything in your body to travel in every direction and every strength in the universe. These are the machines to show your power. These are not machines to facilitate your transmutation.

You have a Soul and STP, where you position it, the strength you position it, in respect to each other, in respect to the strength field of each other, at a certain given point and what mixture decides where you want to manifest. And you have all control of it in the name of emotion, and you don't want to listen. So, we have to make these systems to show you.

It's very interesting. In one of the, I don't know if I told you this, in one of the presentation, what we take the traces of the Soul, I have to ask you, one of our participants. Do you have something about (going on in the background) .. there is something, "oh, I received three telephone calls in between." And we can see it, how the Soul jumps out into physicality and goes back in. That's why I went to ask the question, "what are you doing?" "I received 3 telephone calls." "Sorry, my microwave went off." We see it, it shows you. You're switching from one to another. So you have a control of it, "oh, I finished with the call. Telephone call is finished, I switched it off, I go back into the Soul." We have that power, we can do it when we have the knowledge of how to do it.

Why can't you do it the other time? This baffled me, how a lot of Knowledge Seekers, we see it, the Soul and the STP and the physicality all go beautifully together. (2:58). And then, you see which one is where and how. And then you know, if it's actually a peace lover, or actually like a piece of diamond lover. And then suddenly you see them shutting down because they got excited too much with the diamond. How is the color is going to be, you go into dimension of physicality, and then you see the Soul comes back on again.

If I had the freedom to show you the graphs of it, you will understand. You will see them in London. Knowledge Seekers who attended Manchester have seen some of their own behavior during the time when the system reports back. The Knowledge Seekers who we did what I call, the "fingerprint of the Soul," will be invited in about maybe a year or two years time again, The same people, to see what elevation the Soul has found, what they see changes in themselves. Have they become more physical and, or have they found out they can do everything in the dimension of energy, not in the matter state?

Any other question? It's nearly 12 o'clock.

Q: ... Mr. Keshe, do you see the nomination of Robert Kennedy as unfinished business in America, being that many are still in a state of shock?

K- I'm the wrong person to give you an answer for this. (3:00). And, I've seen the news, I've seen what is played, but we should have to look at the history of this family, and let's see what comes up and what it is. And how long more we see the present situation going on.

The bringing up of this new technology and bring it out in public, in a way, is coming up. There'll be a huge changes. If we go our way, and the way we see in the development of the technologies, you have to understand, the way I just explained to you. We see you, if you are a lover, or you are a diamond lover, if you understand what it means, you're traveling with the Soul, or you're traveling with the Soul to get that physicality. We put one of these Headsets on Mr. Kennedy, or other ones, and we ask them questions, and everybody see the graph behind them. Now you understand that nobody would like to come. I hate war, but the Soul says, "this guy's planning the biggest war afterwards." You see it. It's not a truth meter, it's a manifestation of the fields of your own creation.

R: Mr. Keshe, in the last workshop you mentioned that, the woman who was fixated on the diamond, didn't have a Soul. Did you mean that literally, (3:02). or just that she was during that moment? Or how does that manifest in your graphs and so on?

K- No, no, no, no, no. Didn't have a Soul, it means the Soul wasn't above the physicality. You always have a Soul, doesn't disappear. It shows that the physicality, the physical thing is much more important than, what do you call it, than the energy fields. Or transmutation.

R: The physicality fields sort of obscure the Soul function.

K- No, they don't. When you see it, you understand the graph. It's very clear. We have a line of horizon, and we monitor between it. Knowledge Seekers who have received the question, know exactly what. You can read. We see you in disturbances in thought, trying to go back to the Soul and physicality, and then switching off, and then going back on again. And it's very interesting, very, very interesting. We're learning more.

The new measurement tools are added in the next few weeks. Most probably by the 6th, we'll see a deeper understanding, understand deeper on the function of the which way the systems, how we receive fields. Because if we be able to measure and see the understanding of the position of it, we can ?? feed the man instantaneous. It's like the way they do the fingerprint where the hand, the fingers are in your brain construction. If you know, understand what I'm talking about. We have electronic systems that now can make image of which part of the brain is connected to the hand or the foot or whatever, (3:04). or to the toes.

Now with the energy fields, we can say which part of the energy we need to give to which part of the Soul, for it to reflect back on the STP to feed the physicality that you don't ??. It's just that when our Knowledge Seekers can connect the lines and then we bring it three dimension to operation. It's a fascinating time coming up for those who are eager to, to do research and development in these fields.

I wrote to one of the top guys, he's a good friend here, and I'm sure he's listening. He has no choice but to listen, because he cannot talk with me. I wrote to him, NASA is checkmated. Now you understand what checkmate means. What's the purpose of all these launching pads, and planning for seven years, seven months to go to the Mars, and seven months come back in, and spend two, three days there. We send it in

seven seconds, he can stay as long as he likes, and it comes back, if he likes, in seven seconds. So, would you like to still get on the rocket and shake and shiver, and maybe blown it up, or would you like to get a... put in the "pad" of the Soul and jump across?

Any other question. Let's call it the day, I have a lot of things to do. (3:06).

R: Okay, we're down to just a couple of questions that can be taken over till next week anyway, so...

K- Thank you very much. Please, if you are going to, thinking about coming to London, do it within next couple of days. As you've seen, the price in one side has increased to 3,000 from 1,500. And I'm sure if the demand goes up, we increase the entry to the week session to 25,000 and the conference, if we have to move it, will go up to about 8 to 20,000 Euro per seat. Depends if, this is not in our hand, the promoters decide these things and we've seen it being discussed and being thought and you've seen the first increase, 1,500, Or the weekend, including the conference now, is risen to 3,000.

Thank you very much for being here. And I hope we can bring you to see the changes that you can, as Knowledge Seekers, carry on when I'm gone. Thank you very much. Hopefully, we meet each other next week.

505 KSW Sept 28, 2023

END

506th Knowledge Seekers Workshop October 5, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

No formulas to transmute; Have to understand control emotions to Transmute; Big teaching on emotion; rely on own understanding; STM separate from STP loose anchor to body; Emotions between STM & STP can increase/decrease go up & down plasma; Jumped billions of years ahead; Thousands transmute through emotions - colonize; Planet has emotions - thunder earthquakes; H2O 1 H connected to STP other to STM/Creator always connected to Creator - H in Lungs - H is path to Creator; Why differences on planet H; Everything in U has common denominator; Opened secret passage life on planet; 100th name of Creator completed; London leaders attend Zoom; Mother dream of Prophet; Google blocking KF; Witnesses life; Lot about dreams - control through emotions; Wisdom teeth; Calcification in body; Transportation of body - Transmutation of Souls energy level; How daylight created.

ENGLISH TRANSCRIPTION

(:15).

K- Yes, thank you very much. Good morning and good day to you, as usual, wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation, Spaceship Institute. As usual, we welcome you back and we start thinking and sharing more and understanding more. It was interesting to listen to the Intro and to realize how true this is. A few minutes, literally, before the beginning of session, talking about Knowledge Seekers (KS), discussing how actually we can produce something which God creates so easily, (:16). we can come up with a solution to copy it in a new way. And ... KS think of the way, as they experience they've done. But then it goes back to a fundamental point of energy. Fundamental point of plasma energy. In understanding how energies of the Plasma of Gans's can be utilized with each other, against each other, and in conjunction with each other.

The interesting point for us comes in comprehending the process of creation. Then in the Universe (U) we should have no problem in finding a way, even as a Soul, to add to our energy, or to take from our energy source. To go into the higher order and come down to a lower order. When we transmute and we decide to take the direction towards the understanding of the fields of the Creator, what do we do? And then we go into strength, understanding the strength of the Creation towards Unicose. But, we still miss home, we want to come back and be a Human. How do we give the energy back? Or how do we reverse the process to become a human? But what is the process of becoming a human cell?

How do you. We don't reverse the position, but how do you give up so much to become back, but knowing the path that you can go out. It's like climbing a mountain you climb down a rope, (:18). but have you got the strength to climb back up. How do you gather that strength while you're hanging in the middle you're not up or down. What happened to us? How do we dictate this energy? How do we know what to collect? How do we know what to give up? How do we know, jump across the fields? Because there is somewhere, there is a shortcut. There is a way to go across the higher to the lower.

Then, as said at the beginning of the interview, there is no formula. It's understanding of one's Soul's strength. Understanding of the process of creation in the energy level, not in the matter level. Understanding of the Totality. And the more we understand of the Totality, we find out, we realize, we know nothing. Then a new search, a new position is created to understand the next and the next. And then what is beyond the next, and how can I go back to where I started? The hardest point, the one of the, what I call, most difficult things for man will be how to come down. Stepping up is easy, because you gather, how to become a lover? How do you give unconditionally with a hope that you end up in the physicality (P) of the man?

When we dream, we come back to our physicality. We shall ?? stall, we reduce the strength of the blood flow. And that's it. Because in a way, when we climb down on a stone, or a tree, or whatever to support us, that we can go back up again. (:20). When we are in the human body, then we dream, we got that hook. That hook is the physicality. The Soul of Physicality (STP) has anchored us. But when we die, that anchor is not there. That's why we can't come back. But when you have created a condition, when you have the connection between the Soul of Creation, the Soul of Creator, the STP, the Soul of the Man (STM), then how do you climb up and down this ladder of the energies of the universe? There is no calculation. There is no scale. There is no graphs. There is nothing there, except the true understanding of the Creation.

What do we anchor ourselves to, to come back to Earth? And what do we have to give up to become a human? And would many of those who have elevated would like to come back to where they anchored themselves, to pain of physicality, to kill, to live, to destroy, to exist? Now you understand why there is no formulas. It's literally one understanding of his own creation and how he got to it. You know the old story of

the little boy who dropped the bread, as a stepmother was taking him to the jungles? And then he looked for the bread to come back home. But the birds have eaten the bread crumbs he dropped on the way.

How do we create that condition? (:22). How do we understand which one is the bird and which one is being taken, and what we need to put to back in to go up, or to come down? This is why I keep on saying, that the STP within the STM is a fundamental point of Man to return back. But it's not that easy once you detach yourself from the environment of the plasma of the Earth. Jumping and hopping around, yes you can do. But when you uprooted yourself, where are you going to come back (to)? This is why I keep on saying, and one day mankind will understand, that "resurrection" is a fallacy as much as (is) fusion. Because the STM is separated from the STP, we dumped the anchor. When we do it ourselves, we hold on to the anchor. We know where we anchored it.

And this is part of our understanding of the totality of the Creation. And unfortunately, our Souls does not carry a calculator, and does not carry a system to reduce, or increase, or whatever. Then you understand where the feeling comes from. Each feeling creates emotion in a certain condition. In a physical condition, certain emotions makes us cry. Certain emotions makes us laugh. Certain emotions makes our hair rise. Certain emotions gives us the feeling of love.

Then you understand, from the very first teaching of the Keshe Foundation, especially in the Health, when we did sessions with Dr. Elyia Kostova. (:24). How I emphasize on emotion. Now that we say it has come to "roost," it has come to the point where we have to understand what our emotion, emotion between the STP, emotion between the STM, plays for man to come back down. And the most interesting is how you can use. How you can take part of the Soul of Physicality, to feed the Soul of the Man, to elevate the Soul of the Man, to meet and become part of the Soul of the Creator. You don't need to look outside to find an anchor to go up. You look within to find a solution, which is already within you, to create the condition of that elusive magic what Man has dreamt about. to reach, to understand, to be part of the Creator. One second to be the dimension (D) of the understanding of the universe, and the second after, be the dimension of the man. Isn't this that all the teachings been going through for past 500 odd sessions and the others?

We teach in the language of the Creator, and immediately we teach the language of man. Understanding this is cornerstone of the man understanding of the Knowledge of the Creation. This is why we call ourselves teachers, because we have access to the knowledge of both ends. We were told the alphabet, and we were told the degrees of PhDs in how to use the alphabet to make sense for every created things in the universe, and not only man. That's why when we teach, we teach for the universe, and not just for the man. (:26). Even the man only takes his physical dimension of the voice.

The reality is, can we, would man ever be able to understand this? To transmute between the two Souls, to transmute in the direction of the STP and the STM. Take the shape of the man, but within, understand the work of the universe and the positions of the field strength of where it wants to be. That in a way, it becomes that vehicle. It becomes that point, that it points a laser to it, and then you carry on through it, the physicality, through the STP. And then when you arrive, if it is good enough, if it's what you expected, you might go through the reverse transmutation, through the emotion, to manifest yourself in the dimension of physicality of the time, space, and place. This is part of what man have to understand. This is part of what we need to comprehend in essence of the Creation.

Would man ever be able to understand this? Even the Prophets of the past did not pass more than one level. Because they could not explain, they could not see, to teach further, as the man was not ready for that

process. It took man billions of years to get to this point, and in some 500 and odd sessions, we taught enough, that the man can jump billions ahead, to understand more. He's matured enough to, technically and scientifically, has developed the understanding of the science of Creation, that it does not need the tool of the man, but he understands the process. And it does not need degrees. It needs understanding of ones own essence of Creation, (:28). the source of Creation, the source of elevation. And then, in that process, man shall not cheat. Man will understand to do the process the way it has to be. Because when you speak about the three Ethos of Mitra, talk good, do good, think good. Just only for yourself and nobody else.

You cannot cheat the STM, by the STP. And you cannot cheat the STP, by using the Soul. Because either one cheats, will create demise of the other, either one gives up, it brings an end. Isn't this what happens in the STP, departure, in essence of the time when the STM leaves and we call it, death? They cannot cheat, so they come to an agreement, they balance the book, to be correct.

So we understand, there is no formula. It cannot be, it's impossibility to write a formula, how to use this system to elevate your Soul. But you can create conditions of, you can teach how to use that "controlling system," we call it, the emotion. It's not like using an onion and creating tears and you don't know if that tear is emotion of love, or hate, or fear. It's just mechanically produced. It carries no emotion. Where the same tear when you love your child and hold it carries the emotion of love. (:30). When you lose your mother the tears of loss brings the emotion of sadness. It's the same drop, it's the same liquid. What emotion you put into it, creates a condition of physicality and the Soul in finding out what we can do. What is our strength?

Can we stand absorbing the emotion of the love of the mother and can we cry and understand the loss of the mother with the same tear? This is for man to understand how important, what man calls emotion is the tool of the control. I reach the destination of ??, I feel good, I manifest myself. The fields in this place are balanced in respect to me and I feel just, I do good if I appear in the dimension of physicality, and I don't do anything wrong, because then I can manifest the STP in this dimension of physicality. Now you understand, even the Ethos of Mitra is for the man himself, and not for the others. As each ones Soul does not do the correct thing, the other Soul will suffer. Then you understand the cornerstone of the teaching of Moses, "Thy shall not steal." Then you understand how man has been taught, in simple ways, but man always took the dimension of physicality, and not the dimension of energy and Creation.

How man will go to understand this, And how would man endeavor to test this? (:32). Then you understand how you managed today to see in your dream the mother who passed away years ago and how hard you tried for 20 years to see her and the doors were shut. You have no control over your dreams, because you have not learned the emotions. Create the love of the mother, create the joy of the touch. Create within you the feeling of the kiss of the mother, and close your eyes. You create a dimension of physicality, and then you dream. And then you say, I was thinking about the touch of the mother today. And today, because it was so sincere that love, I dreamt about my mom. In fact, in a dream, you open the channel of the field of the strength of the emotion of the love through the circulation of the blood's flow in the dimension of physicality. Now maybe you understand how it works. Now maybe for the first time, man knows how to create the emotion, because it's felt in the dimension of the physicality.

So now you have the formula, you have the judgment of it. But was that feeling of the kiss you received, was the feeling that the mom gave? Mom gave you a kiss, not because of the love of it, but it felt that way. But it's just because you fell down, ?? on the knee, and you needed that emotion of the love. This is why you cannot dream every time you want to see the mother. Because you have not understood the essence of the emotion, which that kiss was created from, was given, and that strength of the emotion, which was received

by you. (:34). Mother kissed you, to kiss it better, because you're so stupid. You keep on falling, and you don't understand. She raises you and gives another kiss. When would this child matures, and you see there's a kiss of the love of the mother, because she loves you, but in fact you've been the fool, to not understand how to walk, and you walk again on the same stone, and you fall again. Now you understand.

How can you measure the emotion? And the other point of it is, is the recipient of the emotion, has created same feeling as you. I dream about my mother anytime I like, she is present all the time around me. How many times you heard this? The fact is, that time, that emotion was the true emotion, and you have learned the way. Now try to do it with the dad, passed away years ago, about the dog you loved when you were a child. See if you can, can you repeat it? Then you start learning about the measurements of the emotion. What emotion you created.

This is how, as I said many times, we go to a 100,000 football stadium. Then you have no connection to no one, if you ever been to one. And you walk out of the stadium and you see one man across the road, and you fall in love, or one woman sitting across you in the cafe, where you were remembering what happened in the match. And it changes your love, because the field strength is matching, (:36). and it's mutual. It's no use falling in love one sided. The emotion does not carry.

When you stand in that stadium, when you stand with 100,000 people, you create a different love, a different emotion. And then you all chant and shout at the same time, the same thing. And it sounds as every single man in that stadium says the same word individually. I don't know if you've ever been there? I don't know if you have ever tested this? As a football lover, I used to, when I used to go to the 100,000 stadium in Tehran for the matches, it always puzzled me, how come I shout, but I hear everyone shouting the same as me? And what emotion used to raise amongst the men, amongst the Soul, amongst the emotion.

It puzzled me how to understand this from childhood. The first time was magic. The second time, it had a reason. The third time was, how does it work? And trying to understand how we can even synchronize emotion that a thousand of us, ten thousand of us, can at the same time land on the same planet and colonize in one go. Not one man landing, hoping you find another Soul. This is where the true colonization will come. This is where I explained many, many times, 8 billion population on this planet is not enough. (:38). If man starts truly colonizing, and truly work together to bring that change.

Go to destinations and start making colonies of the true love of the Creator, in the essence of the STM. I turned around to my uncle and I said, "how come all these hundred thousand shout the same?" I hear myself, but I'm a tiny boy standing in the stadium. What emotion created within us, is balanced and in common with the others. In anybody of you understand this, what commotion will create among the other Souls to hear what you say. Then you understand how hard it is to create that voice, that emotion, in the Soul of every created things on this planet, that "thy shall not kill." What is the, ?? abhorrent the feeling of the killing, that the man will feel together. And at that time, man stops (killing). Now you understand.

Can we write a formula for this? Even though many of us at the same time might have the same feeling. We love our children, and the love is sincere and true. But we love them even we created them slightly different than the other. (:40). Even when we love the twins is the same, when we love our sons is the same. But, can we create that love amongst the two women, or amongst two men, or amongst the creatures of the universe? And which part of the universe?

How come we dream with the emotion of the mother, and then we dream about the mother and the father together? So, we are capable of creating different emotions, but at the same time, and connecting them to each other. In a way, in the dimension of physicality, we call it, alloys. In the dimension of the field of the emotion of the man, we call it the emotion towards the mother or the father. But in fact, we can connect them to each other, at different strength, or through the common denominator to be the same. In our dream we see them together, eating with them, enjoying their presence.

But, if you understood this, that you can create different dimensions of emotion, what is next? What have you been blind to? Or what you've been ignorant to? If you can connect and see the mother and the father who passed away, and then understand through the common denominator, then, isn't it logical that through the essence of the Creation, we see the third, which could be the Soul of the Creator, at the same time as the mother and the father. But, with them we give the dimension of physicality. (:42). What about the Soul, energy, the fields of the Creator? And then something happens, you say, "this guy is blessed." No, because he has managed to create the direction and dimension, and connection and feeling of the emotion of the Creation.

Even a planet has emotion. Even a star has an emotion. And when man understands this, you can tune, understand the emotion of the planet, even before you go to it, you don't need to be there. But you know if it fits for your physicality to manifest itself, or you're just a tourist going through.

We call it rain. We call it thunder. We call it volcanic eruption. We call it the earthquake. But, haven't all these created by the interaction of the matter state of the fields of the Soul of the Planet, and the Soul of the Planet itself. In the same words, we call it, a shout, we call it, a cry. When man tears, and when the clouds rain, when a man shouts, and when the Earth creates thunder, when a man shivers from his own wrongdoing, the Earth creates its earthquake. Have I been chosen, have I been choosing the same emotions, (:44). but different words for different conditions?

Then can you imagine what happens when the Creator sneezes? Then can you imagine what it means when the Creator cries from the love? Then you understand how feeble man has been in understanding the process of the Creation, and emotion. And in that process, understanding there is no formulas, it's understanding one creation of oneself. Not to steal from the STP, and not to give too much to the Soul, just because it's stolen from the others.

This is how, if you would have understood totality of the teaching, when we breathe, the STM takes the higher energy, and the physicality takes the lowest. Because if the physicality takes the energy which comes in at the high level, will create mayhem within the lungs of the man. Now you see how these two physically work with each other, accommodate each other, share for the survival of the other. Then you understand why by changing the rhythm of your breathing, you can change the freedom of the Soul. Then you understand much more, if you understand the operation of the Hydrogen. If you understand the combination, the way the Hydrogen reaches the body of the man. And the way it's created, the essence of its creation, shows you the path to the Creator. And if you understood, you have found your path to the world of Creation. (:46).

For those of you who join us in the session tomorrow, and then you join us in the second session, we create that path. Deliberately in our system, we have set to create that condition. To see how you feel, to see how you approach, to see what energies are needed by you to find the path, to find the way to receive. Maybe tomorrow's session we'll speak maybe for 5 or 10 minutes and we close the session in silence. Maybe for one

or two hours, depending what we see, depending on what we try to understand. The systems are set up deliberately for this, for tomorrow.

But then, maybe through it, you find out how to elevate. You find out how to receive, you find out how to give, and you find out how to find a solution. For what I call, elevation of the Soul, in a correct way, by yourself and not by stealing, not stealing from anyone else and not by stealing from the STP, or the STM.

Tomorrow's trials which you join us will open a lot of things for us and for you. In a way we encourage you, for you to be able to elevate, to have the availability to elevate your own physical dimensions to the Soul, and the STP, through the fields which are there for you to use. And then you have to learn how to use the emotion. (:48). In a way we have created a party table ?? and set. Which fruit, which sandwich, which drink you want to take from this table? Are you drinking with ?? a maid? Are you having your fruit, having a child with your mom? You're taking the food for your child, which is hungry. It's the same table. It's the same energy. It's the same love of the Creator. It's you who will compartmentalize. You put it in there. I want to see mom. And this is the energy I need to see mom. This is the energy I need to feed myself. And it's the energy which brings me the flow of the fields of the universe I call, water.

Man has not even understood the power, the strength, the life, and understanding of the fields of the water he drinks and 95% of his body depends on it. Isn't the essence of the Creation holding to the gravity of this planet? As we always said, in the matter state, magnetic fields are measured by iron, we call it, magnets. And we have said many times, that in the dimension of the gas and liquid, that the magnetic field is Oxygen. And then, how come you have not understood, through that essence of the initial stage, the fundamental energy of the plasma of the Hydrogen? And two of it, one connected to the energy levels of the man, and one connected to the energy of the universe, (:50). and the creation and the Creator, you still live and you are ignorant to it. This is the secret of life on this planet. And it's the same right across the universe.

The lover has never forgotten his love. You call it H₂O and you don't even understand, but it means you're so physical. Why do you need two of the same, to be connected to the dimension of physicality of this universe of the planet of the man? Now you understand it. What you drink, gives you access to both your STP and your creator. And you've been ignorant to it, because you never understood. You called it a Gans, you called it whatever you like. You put it in the table of elements. But you never understood the element which has created you from the energies of the Creator. Your path, your way, and your direction and dimension to that position in time and space and place, you call the Creator.

Maybe now you look at the life, why you exist the way you exist. And maybe, again, you find the path to your Creator. But don't forget, just because man decided to call it two Hydrogen, as I said, there is no measure, one that you can add it up, you'll find the access. When you drink that water, the energy of it is instantaneous. One Hydrogen feeds the Soul connection to the Creator. And one feeds the physicality of the man. (:52). And even when you breathe, you say, "I'm taking Oxygen." I'm creating connection within the Hydrogen fields of my lung, to keep the circulation of the fields of the STM, that is connected to the field of physicality of the man, ongoing. And when you cut one out the other, you call it, death. And then you understand how little you understood. Even from what created you, what you depends on it, and what connects you to the Creator.

And that's the strangest part, and I always wonder, how much man would run around, ignoring what is being his, and connection to him and to his Creator, and in the ignorance, as I always say, is a bliss.

Now we understand, maybe, now, maybe you understand more, that even the Earth, the water, the field strength of it, is the essence of your Creation, and not the matter of it. Then maybe you'll understand a little bit more, why we come from different part of this planet, and then we have different emotions. We have different features according to that emotion. The Hydrogen created in one part is slightly different, but consistence with the Inertia fields of the place, creates that image. (:54). Does not matter what you do.

If we keep a man in a certain position for long enough, he will change from black to Chinese, and from Chinese to black. Does not need that evolution of the time, crossing the straits of Hormuz and splitting to the North, to the West, to the East, to become Chinese, European or Russian and the rest. And you can speed this up in one instant, if you understand the process.

In the upcoming conference in London, our people will try to show you this through the dimension of physicality. But you understand the knowledge. To the ignorant people of the public who have no clue, this is magic. Everything, everything which connects man to the life of his physicality, is connected to the both. Otherwise, you don't have it. Look at the structure of your amino acid (AA). That Oxygen, magnetic field of the planet Earth, the Hydrogen, connection to the dimension of the STM and the Soul of the Creator, to the dimension of life on this planet, ?? a free till the point it comes in touch with the water. (:56).

When you have amino acid and no water, you have no life in the dimension of Soul of Creation. When you create that sack of protein and you put water in it, you create life, a cell. Because now it's connected both to the dimension of the matter state of the position, time, and place we call Earth, and to the Soul, and to the Creator.

Now you understand why some of you get so fat through the emotion, and why some of you get cancer through the same emotion. And why through the same emotion and the same water you fall in love. In past 10 minutes, I've explained the wisdom of the Creation all the way from the Creator to the man. I wonder how many thousands of years it will take man to understand this. And if you understood this, then it comes the truth, how much we have ignored everything about ourselves, about life, and then go back to the original teachings. I keep on talking about the emotion. What emotion you put to that protein, and what emotion you put to that water.

In a way, by controlling it, you call it salt content, salinity. You dictate the same cell to be the cell of the heart, to be the cell of the lung, to be part of the emotion of the creation within the brain of the man. I have given you the secret of Creation. (:58). And I'm sure, one day, one man will understand what is been explained. And then if you do, you have found your path to exist in both dimensions, as we do.

In a way, you connect to the Soul, and physicality stays the same, but depends which Soul, in what dimension and direction, shares the knowledge, the transmutation, and the source of the creation at the same time, through the same field strength of the source. And then you understand why everything in the Universe has one common denominator, comes from the same. In field strength, not in the physicality of a body.

I've taught you a lot today, if you understood. I opened the secret passage of life on this planet and beyond. I showed you the way to your Creator, and I'm sure you still will be blind to understand it, in the knowledge of the emotion, to be able to create that condition for your own survival. As is said beautifully in Koran, << speaks Farsi >>. Then man understand the hundredth name of the Creator, which has been elusive to him, and I complete it, what he's been wishing and understood in many holy books, if you understood the essence of the teaching of today.

Then you understand why man is so physical. And then you understand why the physicality has been detrimental for him to reach to his Creator in the dimension of the fields. And he's always worried which hell and which heaven he will get his way, when he separates from physicality. (1:00). I hope you understand this, and I hope one day you mature enough to understand the Totality. Would like to go to a break and we come back. Thank you very much.

>> **BREAK** >> 506 KSW October 05, 2023 (1:06).

K- Yeah, you said willing, that's a very good point. He's willing to answer questions. The thing is, we are willing to, but is the man ready to understand it? Yes, we... if there are any questions.

I just wanted to remind you, that as of next week, the conferences in London go public, and will be announced through the medias, which is left with the, what we call, the promoters of the event. Please make sure that everything you want to do, and you want to be present, is there, and the way it should be. And we try to make the best of it, to make it a point to be remembered by many people. One of the beautiful things which will come out of this, maybe we said it before, you might understand it, or we mention it now.

It's for the first time, that this conference will be live on Zoom. This conference will go on Zoom live, and it'll be monitored. And it's only for the world leaders. (1:08). In allowing and trying to bring high level diplomats into London, creates a massive problem for many nations. As you know the tradition is if a President comes to UK, has to be met by the Prime Minister or by the King, it depends if they are a King or a President, or a Prime Minister, according to their level. If a King of a nation comes to, the King of England has to meet him, to greet him, he cannot be met by Prime Minister or whatever, and this is the tradition has been. And this one creates a lot of problem. We've spoken to people we know in influential places, and presidential, and what we call, some of the world leaders. And the best solution we have found is to create a specific Zoom, for the world leaders to come in. This makes it a lot easier for us to transfer and convey the message directly to the top. And this allows a common sense to come across the world leaders. So, there will be a live Zoom session of the conference, but specifically only for the world leaders and what we call, those who are the decision makers in governments. And the rest, because it's no problem for many of them to get a visa to come in to London for that period, that should be no problem.

So, if we manage to get our way through and get things done, there will be a Zoom session, we fully control, and I'm sure controlled by the security and many government officials. And this will be open to, we know the first three or four presidents, world leaders who will be online. It's already been set up for them. We expect many ambassadors to take the same path. (1:10). Because you got to remember, we are not just inviting, for example, the ambassador of Liberia in London. We're inviting all the ambassadors of Liberia across the world. So you will see interaction with world leaders and the ambassadors. Maybe the Iranian president online, as much as the American president. They want to talk, it's free, they chat in the background, it's free. No one will know. But the session will be run in that way. The event will go on the Livestream and Zoom. A specific situation will be made for them to be accessed.

We do not know who will watch on the other end, but it's been done directly to what we call, the people who are in that position. Whether it be the President, his wife and his cabinet, and the others to watch, to see what is going to come to Earth. There'll be some shocking developments for a lot of world leaders. And maybe, maybe an international conference will be called immediately, within the time of next months or years, for world leaders how to handle this technology. How to bring now that everybody knows that African nation is as powerful as the United States in science of space and technology.

What dis-balance it will bring, where the superiority goes, where the weapons superiority becomes nonsense in the world of the others, where now every nation has access to the latest space technology.

In next few days, in the next two or three weeks, with our partners in the Chinese government, we try and find a solution, that maybe the Chinese leadership will take the leadership in this conference on the Zoom. And we'll see how we build it up, and how it'll come.

But those of you who will be in the conference, you will remember it. (1:12). This is where we bring the change, it is where we bring, we strive to bring that change through technology. It's a knowledge and not a talk. They can ask their scientists to test, and to see. As I said, those of you who come to London, anywhere within the city center, is the right place to be. You're not very far, you have a few minutes from the conference. And I hope you enjoy this beautiful event, which will bring many changes. Not only for you, but those of you, who you consider as your rulers. They'll find out, all men are equal, and all nations are equal. Because now the knowledge is shared amongst all. They don't need to look for handout to finances. Even though, with the support of the Chinese government, we'll try to create that, facilitate that, that it doesn't become a handout, but it becomes a point of equal and in all measures.

I hope, we'll see many of you in London, and I hope, that the world community would embraces this knowledge, in the way it should be done, to create the next step for peace. And as we said, "Technology in Exchange for Peace", for nations and for man, all equal.

Are there any questions?

Q: ... Rick ..

... May I ask, (1:14). when we wake up from a dream, why is it that we remember so little of it, and can you explain more about dreams?

K- It depends where you are. When you speak. I was talking to our Knowledge Seekers very recently. How they remember every detail of a dream. And I said, how can you remember all that? They tell you even

where there was a spoon, and where there was a fork, and who was standing there. I said, how can you remember it so precise? Says, "it's just as it is, and I have 10 dreams, and I can tell you every..." And I sit there and I listen, and they can tell you every detail about it. And something I had ??, I can't remember. But I remember having a dream about something. It is what I call, dementia of emotion, what we would like to remember. And how important it's to us in touching our emotion, becoming part of us.

And some of us get up from a dream and it changes our life, because the field strength of the information, or the image, or what I call, the emotion, is exactly the same as ours at that time and second and moment. We get up, we change our life, because of the dream. And, it's just amnesia about what we want, and how that dream is important to us. I know a lady, I know her very well, who changed her religion. (1:16). Because she had a dream about a Prophet, in her dream, that she did not know existed in the ??, in one way or another. And she went and looked and it was there. And she never lost the love for that, for rest of her life. She had that dream in the early twenties. And she died with the same love in her eighties, very recently.

So, it's us who decides and depends on the emotion, or connection with that emotion, or information which we have. I still remember one of them, when my mother had a dream. And I explained that before. It had no meaning to me, I had no feeling about it, but it was so deep in her. It touched her, when I was only 19, 20 years old. And I went downstairs and she was sitting at the dining table and crying. And I said, "why are you crying mother?" "Oh," she said, "I had a dream, you're dead." And I said, "I'm here." And I asked her about the dream. And years later, that dream came reality. In a way she understood, what that dream was.

And I've seen people who dream and they jump out of the bed and they run. (1:18). The fear of what they saw. It's us who decides how to interpret and depends what that information brings for us, to create what condition of emotion. Interesting is, a lot of people tell you, "I never dream." And if you go deep enough, you find out they do nothing but dream life.

In the process of tests, or what we call, sessions of tomorrow and next week, we try to show you how and which strength and dream you have, and how you control what is called a dream. Actually you work through the expansion of the Soul connection of ??. In the sessions of tomorrow and next week, ... you'll be tested in a very beautiful way for yourself. And we won't reveal anything about it till next week, after the end of the session. But don't forget, this is still one headphone, it's the same headphone and nothing else. But, the way we tested the people for sugar and for salinity last time, (1:20). this time we test you for something totally different. But, last time you saw it, you felt it, you measured it, through physical means. This time, it's all to do with your Soul. But it's the same test. But in a different way. This time, you are the tool of measurement. You are the tool of the essence of the emotion. And then maybe in the upcoming sessions, we connect the physical and the emotional side together. And then you see how you can manifest yourself in the depth of the universe.

Those of you Knowledge Seekers who kept on coming with us all the way through all these tests and you are everywhere, you'll find a magic very soon in your process of life. Because you'll find access to both, if you understood one, or the other. Last month we showed how we control, how we can change your physical dimension, salinity. Push what we call, the sugar level. You saw it, you measured it, you understand. Now this time, we play with changing of the condition, and you play yourself, in what you want to take from the table we've provided. And, when you answer, as usual, what I call, the questions at the end of the second week, then you find out the magic.

Last time we showed you the dimension of physicality. (1:22). This time we show you the dimension of the Soul. And then you see what you remember, and what you wanted to create to remember. And then you understand how we make it the passengers of the universe, through yourself and not through us. And then you understand why you remember some, and some you don't and you ignore. Because, in a way, it goes into the memory bank. But, in a way, you don't want to remember that memory, and you say, "it has no effect on me."

Any other question?

Q: ... Do the animals, plants, insects, etc. also dream and have emotions to set their Soul free to transmute, even to the Creator?

K- Yes, of course. Have you ever watched your cats or dog laughing in the sleep? Have you seen them, they frown? Have you seen them, suddenly they jump up, exactly like the humans do. Of course they do. Have you ever walked in the forest? In a way, it's part of the survival lessons, if you ever work or been in these teachings. They tell you which way the Sun is. They tell you how the weather is going to be, by the plants, by the trees. Have you ever seen the mole holes on a mountain, on a hill? (1:24). If you look at the trees, by the strength of the branches, they show you the direction of the South or the North, or where the Sun comes from. If you watch the mole in the autumn, by the position of the hole you see if the mole is just on the hill, you can tell the emotion of it, it knows it's going to be a rainy year, dry year, or it's going to be not that good. If it's a wet year, he makes the hole right on top of the hill, because he doesn't want to get flooded. And if it's average year, he'll dig the hole in the middle of. But still, sometimes makes a mistake. You look at 10 different mole holes in different, same area, in different places, and you get a good feeling of, if it's going to be a dry year, a wet year, or ?? , the same. So yes, they do have emotion.

If you understood agriculture, why do farmers change every season from one grain to another. We need to learn a lot. But some of our ancestors understood, they were observers of the power of the knowledge and emotion. That mole is connected to the emotion of the planet, months ahead of us. (1:26). It's the same. If you want to ignore it, or we stick to it. If you feel it and you get it right, you dig a hole right on the top. You come closer to the Creator, as you call it. And if you dig it at the bottom, you get flooded, that's the end. Too late to move. And this is a strange with everything, it depends a lot when it comes to larger scale, how, for example, governments work with this, with the knowledge having it, and ignoring it, and then live with the perils of it.

Any other question?

Q: ... In dreams we meet divine beings or receive orders or knowledge. Is it the higher own self? Can misleading emotions which originate from the brain cause something like that? Don't we have to distinguish between them? Does it depend on one's own higher development, which determine the quality of dreams? For others, the actual reality?

K- Depends. I usually, jokingly, (1:28). but has a lot of sense to it, if you understand it. You have the dreams, which is connected to your day, physical work. A lot of people have a dream, depends what there was a conversation today with the others. They carry that dream, and they're connected, because of whatever emotion it created, to the condition. You hear about an accident, and then something happened, and then that night, "Oh, the next day..." "Oh, I had a dream about an accident, blah, blah." And because you know about it

the day before, the few days before were talked about, you see it. And then, you see, but they don't see it, but you connect it, you say, "wasn't this we're talking yesterday?" And now you say you had a dream.

It's very much like Google of today. You try this with Google, very interesting. They have this system of recognition. You talk about, you want to go to Mexico and see the mountains, blah, blah, blah, for example. And then suddenly, 48 hours, 24 hours later, Google sends you a message, "Mexico is blah, blah, blah, blah, would you like to have..." Whatever they said. And you say, "Oh, I was thinking about it, and see what happened." No, Google, even your phone is open, closed, you're not talking to anyone, gathers information, and through it make it advertising. There is no coincidence. So, it's the same with you. You try it, you mention things, and then you see it, a few days later, appears something on your mobile phone, then you understand the commercial emotion, what I call it, dream.

And you do the same, in other ways. (1:30). You know you get the letter shots, coming through the post or something, somebody sends you a letter box and gives you an indication of what it'll be. Some of the information we receive as a dream, is that letter box. It's a mass distribution of things, or individual distribution of emotion. And depends what we connect with, and what we are in touch with. And then, we receive information to correct what was, as a dream. Or, try to understand it.

And I witness this, in my own life. But because I stand outside it, I look at it the way it is. You receive connection, the way like you want to see mom, but mom is not there and you can't dream tonight about it. Or you wait, what happens, "Oh, I see my mom everyday, I want to speak." Because you have that connection of the Souls. So, it manifests itself different. But, you understand it in different way. And we interpret it in different way. But in essence, if we become aware of how dreams are structured, everything will have a meaning, and has a reason, and for it to be understood.

And very recently I started speaking a lot about the cycle of my life, for in the future or present, you come to understand how the whole thing about the structure, the information, the knowledge comes about. (1:32). Because by example, I try to make a lot of things very clear for you to understand.

So, we decide and partially is given to, and partially how we connect it to. But, in essence, it makes sense. In essence, you see the pattern. If you remember, I told you, I mentioned in some of the teachings. When I studied as a nuclear physicist, or nuclear engineer, when my degree came, it came in a cardboard tube, like a set of toilet paper. So when I opened it, I was puzzled, "what's this? Why I received that? A toilet roll tube." And when I noticed my degree was inside it, I took it out, I stuck it on the toilet roll. I says, my mom said, "what's this here?" I said, "this is my degree, that's how much it worth." Because I'm not going to use it in a dimension you want.

But, before I go to University, before I become a... going to a nuclear physicist, I became one of the top students in course I was doing in the United Kingdom. More or less, the top guy in that year. With 86.3% right across. And, because of that high level, any University, anything I wanted to do, was possible. So, my sister being in the medical, ?? school of Manchester University, goes to see the medical people, University side. (1:34). And, I was no intention, I see blood, I go crazy. Now, that's why I developed the Wellness without any blood, because I can do it without ever touching this thing.

So, my mom came to me one Friday afternoon, in the summer time, at that time, and she said, "we're going to a movie tonight." I said, "mom, it's Friday or Saturday night, 10 o'clock at night, you go to sleep. Why do you want to go to a movie?" "No, no, no, your sister is coming, we're going to a movie, you're going to watch

a movie." I said, "mom goes to bed 9, 10, now, we're going to a movie." "We go to a movie." The movie called, if you go back on the Internet, called, 'China Syndrome'. China Syndrome in nuclear technology is when, we say, if a nuclear reactor melts, goes through the Earth, and it comes out the other side, and it doesn't even matter where you are, the other side is always China, according to philosophy of the world. And so, the story of the movie is, you can watch it, there's a nuclear reactor controller, the reactor goes, control at the end, they shoot him and they kill him, or he gets shot. And then, we go and watch this movie, we come out of the cinema, and my mom is crying, says, "look, your sister has got you a place, be met, go to become a doctor in Manchester University, you don't need to go to London and do these crazy things, you see what happens to the guy, they're going to kill you, why do you want to get killed?" I said, "mom, all this commotion going to the movie, was just because you and my sister decided you want me to become a medical man, a doctor, not me." Blood and me are two opposite sides, it carries too much emotion of pain with it.

She couldn't get me working, she couldn't change my mind, it was a disaster. And then all the dreams came ?? at me. (1:36). Exactly what a lot of you say, what was, what is. And I told you about the, coming down and watching her crying, and I said, this was some time later, after I got into University, and I was going to go to University. I said, "mom, why you crying?" She said, "I had a dream of the Prophet, carrying your body in white." And I said to him, "is he dead?" He said, "no, he's one of us." And he said, "you're going to die." I said, "mom, what does it mean?" She said, "I saw you being carried by him, and you were all in white." I said, "that's good, at least I know where I'm going." And I started laughing. She said, "everything to you is a joke."

We connect, we understand. Depends what we want the dream to connect. We remember the parts we want, because it suits us to justify the dimension of physicality. Many times you come across people who, especially when they are in old age, they say, "oh, they are talking to the dead." They see all their uncles, cousins have passed away. (1:38). Because, they are prepared to feel safe to go, because this is the way they feel safe, they know the journey starts. Many people in the last few days, weeks of their life, especially the elderly, they tell them, they tell you, they're talking to the dead, because they say, "oh, what I saw this, I saw that." Because, in a way, the emotion of the transmutation is getting open. That dimension of emotion is accepted, so you allow certain emotions, and that emotion brings you towards who already died. Now we understand the process.

At the same time, it goes the way I said about the football player. You, in the stadium, create that emotion, and if you create that emotion of 100,000 people wanting to go to Mars, and create the right strength, showing through the... not a physical ball on the football ground, but the ball as a Moon, you can transmute the whole 100,000 to Moon instantaneously. But, can you imagine what mayhem will be there? Would they all transmute as this? You see 100,000 stones or 100,000 worms running around? Would they know all how to come back and watch the rest of the football?

You look at... I speak about this because it's the emotion which creates. I don't tell you a lot of things, but go back to the history of the Book. I'm a football lover by childhood. I remember, one of the times I went to the 100,000 capacity stadium in Tehran, was a football match. Which is today unthinkable. Today's state of the situation. (1:40). The match was between Iran and Israel. It was one of the league games of the Asian games. And it was set, in a way, as you know, everything gets organized in the football team, even the World Cup. Most of it is planned, who's going to be where. I watched the Iranian football team playing against national team of Israel. On Tehran's soil. We were the only nation which accepted the state of Israel. And, what was interesting for me was, how the whole hundred thousand people were shouting "Iran". And how that eleven

players of Israel were deaf to this emotion. Because they were trained, "your world is that ball." And, if you can get, find the match, watch it, it was a very interesting match. How it was one-sidedly decided that Iran has to win. And the goal was not allowed and the rest of the commotion with it, which is normal with these things.

In a way, as half Jewish, half Muslim and totally Iranian, it brought me a lot of emotion. Who do you support? And why the emotion has to come by who you support and not just enjoy the game. I've been to football matches I've seen the joy of the team I support and the other team. But this had a lot of religion, nationalism, and a little bit of football in it. (1:42). But at the end, when the game finished, it didn't matter who played on the football pitch. It was all the beautiful game. And I said to my uncle, "we watched three things together today." He said, "Mehran, let's go have an ice cream, you think too much. You think too much, you understand too much."

But, if we create that emotion as in the football match, and that was the Soul of the Creator playing with our Soul, would we watch the match the same way? Or it changes the emotion, because still we fear of a loss.

As I said, when I came down to my mother, and she explained to me that she saw my body being carried, and she asked the Prophet, is he dead? He said, "no, he's one of us." I said to mom, "mom, you didn't want me to become a nuclear physicist?" And you don't let me go the other way. Why are you crying? Either way, I'm going to get killed, I'm dead. What is the worry?"

What emotion we carry, (1:44). dictates the condition of the dream. And we understand this, what emotion we carry from the first teachings of the medical part, now you understand, decides the position, the time and the place, the shape, the color, and even the word we speak of our existence. We have to decide and which part is what we decided to have, and what's the reason of that, or is it a message for the next steps, or next stages, and what we learn from it, or remember from it, and what we change for that to happen, or not to happen.

Any other question?

Q: ... How can it be that I welcome brother wind in a storm, and that I am protected by so much warmth of love around me? Love is transformative. Is ordinary love anything other than being love itself? If love is transforming into a being of light, as some saints already were, like Jesus and others, Is it still an emotion, since the emotion comes from the brain, and leads some people astray perhaps? (1:46). Dearest thanks and my warmest greetings in love, Mary.

K- It depends, is it the wind of love or is it a physical wind, and how we separate and distinguish between the two. Is it flood of it? That's all it is. So much of it, that it touches us. And the air is always there, when is so much of it going so fast, we call it the wind. Is it the same with love? Is it the same with emotion? So much of it comes, and can we handle it?

It's very much, does it give us elevation. That strong wind moves us, blows up, blows us across the road, blows us the wind, the leaves, saw ?? the others. Would that love do the same, makes us move. What we call it, love, that emotional wind. And to what extent? And what we learn from that emotional wind we call, love or whatever you want to call it. Do you know you go visit one of the states, one of the states, I don't know if it's Seattle which is a windy city or whatever. Do you want to specially go and live in that place, because it's always windy? Or, do you want to go to desert, which hardly, you know, is warm, and maybe, the wind, but

it's a warm wind, you don't want a cold wind? (1:48). Would you like, do you find love in the ice, or cold? Or do you find love in heat and warmth. And does the same emotion created by both conditions? And it's the same with love, it's the same what we do, what we wanted. And where we want to be in respect to what time and position. Because each one raises different emotion.

You got to remember, you got to understand. Interaction between the fields of the physicality, in the fields of the STM, create their own emotion, even though each one has his own emotion. And that emotion is a decision maker for bringing the man, because it's accepted by both and we ?? actually ?? refuse ?? both. You go through this process of emotion and the Soul, and the loss of a son becomes a cancer. The pain of the son becomes a prostate cancer. The pain of the love with the mother becomes a cancer in the left breast. And the pain of the love with the lover become a cancer in the right breast.

In the future, the scientists, with the same kind of emotion, will tell you which testicle has a cancer because of which child. And in the future, scientists will come to understand why it's better to have a child of the Soul than the child of physicality. Child of the Soul comes from the love of the balance from of the both the STP within the STM, from both sides, (1:50). which means there are four factors to get one. And they all have to be in balance. And it'll be perfect.

In the dimension of physicality, we put every emotion into it. And then, because we cannot reach it, we direct it to ourselves and we create the cancer inside ourselves, because the child is gone. We cannot do anything. It's departed. It's left the body of the mother. The mother is within you because you are born from it. The child is part of you. You still get the emotion ?? connected.

Why do we get a cancer when it's to do with a lover on the right side? Don't we give with the right hand and don't we receive with the left hand? And because we gave so much in the right hand and it went wrong, you want to cut that part off. So you create cancer on the right side with the lover. With the left, it's where you receive love, the love of the mother, the love of the child. But don't forget, sits on the right side of the brain, the left breast. Control of it, every functionality of it. (1:52).

Then you understand why even the cycle of the birth, the ovaries with a man and a woman, the testicles are positioned different. And why the emotion of the man is different than the woman. And the man has all collected in one part, even separated slightly from each other. But the woman's dimension is separated totally inside (the body). Man has not understood the connection between the STM and even the physical structure of the man through the STP.

Then it's you who controls that cancer. And even the position of the cancer is controlled by the emotion. I don't want to sit, because it's time for me to go where. Now you understand, even before we start these 500 teachings or whatever, all those teachings we did with Dr. Kostova. And every session, every section which had to do with that part, emotion was put in 10 years later, now you might understand. Now that the teaching has gone far enough, then you can understand. (1:54).

Any other question?

Q: ... What happens after the Soul leaves the physicality?

K- You call it death, you just got a pile of material, which made the working in the factory closed. The production is done. It was a prototype, every Soul is one prototype. So, you build a machine for it to make

the prototype, now we cannot use it again. You call it death, you leave the machine behind, call the body of the man. That's all. It's a "one off" production.

Any other question?

R: I was wondering if someone identifies really strongly with their physicality, then upon death do they stick with the physicality, rather than rise with the Soul, in a way?

K- No, the job is done, you can. (1:56). It's a very strange phenomenon, but it's hard to understand for a lot (of people). We are created out of the interaction of the fields, and the fields take us where they brought us. And if you understand this, doesn't matter what physicality you put on it, how you, and how many bits you hang on it. It's very much like this, you know, putting a man naked in a coffin, or dressing up with the most beautiful clothes and jewelry, and put him in a coffin. That's just a physicality, it's gone and done. Do you want to spend money on it, or you don't want to spend money? And how much emotion you want to attach to it? And how you accept that perception of the physical leftover? Apparels were put in with all the gold and everything else, and their wives and whatever children, whatever was supposed to be there. And the Muslims take everything off and put it in with a white robe, white, what they call it, ?? bath. And they buy flowers and do whatever afterwards. The Jews put it in a coffin and never spend a single penny on it afterwards, because it's not much use spending money on it. And it depends how we see it. And the Zoroastrians put it on the mountain and let it share the physicality with the others. Left over, is not important.

Because we never understood the STM was within, (1:58). and it's produced, it reached maturity, and is on its way, and it's gone. And don't forget, it's instantaneous where it goes. It's not going to wander around to find a place and position. Zero-time communication. As you go on to what I call, fields of the universe and there is no resistance, as it's the dimension of the fields interaction and accommodation.

I wonder one day, man will make a communication system on the Soul basis, to create the zero-time communication. The tools of it has been given, it's in the teaching and many of you have made it, but you don't know it.

Any other question?

Q: ... I'm looking for information that I can't find, maybe you have the answer. I read that it was necessary to make water charged with a Gans in a glass or plastic bottle, but that you did not need a stainless steel bottle. I can't find the reason for this, do you know why? Because I have a 8 liter stainless steel gravity water filter and I put my Gans tubes inside. Thank you for your reply.

K- The steel is in line with the gravitational field of the Earth, (2:00). as being an iron. And it creates a line of interaction, and that's the reason. And, I always advise, if you make a CO2, your best container is a plastic container, if you're making other things. Anything which is Carbon based, plastic is good, because it creates a balance holding, it creates a Nano structure, of the structure, if you understand it. Anything else, keep it in the glass jars. If you come to the labs of the Keshe Foundation, we hold more or less all our Gans's in glass jars, for that reason.

Q: ... Can you explain why the wisdom teeth exist? Apparently they have no function and cause pain and suffering in most people due to their disordered growth requiring surgical interference. Is this an imbalance between the STM the STP and the physicality?

K- That's a puzzle, isn't it? Why they call it the wisdom tooth? And, it's mainly because, (2:02). it's our interpretation, nobody else's. They supposed to grow at a point back, where by that time your jaw has grown big enough, and you have to go to the history of the man's life. How we evolved. Wisdom tooth is part of the emotion. And don't forget, most of the man by the age of 18 in those days, they lost most of the teeth in the front, they needed the support with them. Most of the teeth at the front were lost, so the tooth move in, and it gives you a thing to chew, at least something you wanted for another 5 or 10 years, till they rotted as well. That's the whole reason for generation of it. Then it's like a, what you call, bits of the body which was not needed, but now it's become part of.

There's a fish in Iceland which can crush the shell of the, like a oysters or mussels. And it's a very hard thing and it breaks most of his teeth. And then this happens during the summer time when he feeds. And in winter time, because he cannot feed, all the broken tooth come back up. And they literally gets new set for next year. And what we see with the jaws, they break the tooth and just literally another one comes out. And the man went through the same process. He could keep these teeth for maybe 10 years, 12 years, 15 years, some of it was lost. (2:04). You have to remember, in the time of pre, what you call, 18th centuries, before we got access to, or 19th centuries, because we didn't get access to sugar or whatever, people lose their tooth for whatever reason. But 1,000 years ago, there was not so much loss. It was just coming by breakages and everything else. So those were there to support the last stage of life, and life span was different way. So, now 18 years later, the brain has decided it's a good time to put a new ones. There were no tooth, so they came out naturally, they didn't become crooked.

Nowadays, as we do every dental surgery, everything else, the tooth doesn't fall out to create a room for it to grow, and we get all the complications of today's, what you call, wisdom tooth. It had every reason for your ancestors. It has every reason in the villages of Amazon and Africa. But in the western world, with all the interference and everything else, interventions we do, all our teeth stays. And then, there's no room for it by age of 18. And that's roughly where it came ??, brain sets itself. It's like that when you are 9 or 10 or 12, you mature, ?? sexually. It's part of the process of creation, it's like... But it had a reason for it, it's a good reason for it to do.

Nowadays, we intervene so much, that, in our eighties and nineties, we carry 80% of our natural birth tooth, at the age of ?? 7. At 65 I think I have two, only two, actually one, which is... two which has been planted, the rest is what I brought from childhood. (2:06). But we ate, diets, everything else, dental intervention, allows us to keep our tooth into our, maybe in the eighties, nineties, hundreds. Those days it wasn't there. And change of diet has brought these changes and we... somewhere needed, needed it.

In African nations, in the poor nations, and in tribes in Amazon, I don't think many people have that problem, because they go through the natural process. But they call it wisdom because it came, and when you're 18, you're wise. So they gave everything in the British culture. And when you're 18, they used to give you the key to the house, because you're wise enough, you ?? can look after the house. And the day before, 18, you were not mature enough. It's the same with the tooth. The others, you go and take all of them out in one go. When you're 18, 19, you take one out, two out. Because with the pressure of it not having room, it can deform the front tooth and all the ?? veins of it. But if you born 400 years ago, 500 years ago, this took millions of years to program for the brain, you lost most of your tooth. At least some of it in the front, so it was room. It comes in to back up another 10 years of life. That you can chew and eat.

Any other question?

By the way, in so many, talking about this, I was explaining this to a Knowledge Seeker yesterday. It was this morning, yesterday, I can't remember. (2:08). Our knowledge now has reached the point, that we can grow a tooth. We understand the process of it, to grow a tooth, put it that way. Because a piece of puzzle was missing in how you grow a tooth. What's the reason that you can initiate the growth of the tooth. And now we are testing it. I'm pretty sure, 100%. We should be able to grow a tooth if our scientists who work on it understand the process themselves.

Understand why at age of six or seven, you lose your tooth. And why that seven years is crucial, or six years. Understand the system why which tooth is lost. We don't choose. Teeth at 6, 7 is replaced in a specific way. It's not random. And it comes the age of first maturity. Then the wisdom tooth come in the second cycle of what you call, maturity, we call it. You can dictate, shape the future of a child. You have every say in it, till age of seven, six or seven. After that, it becomes on its own. (2:10). You have molded the character of the child. Now the child is ?? unknown. The child, or the brain, or the body, ?? shares .. the childhood what people have control in what I eat, what I put in my mouth. Now I decide. This is why we have two sets of ?? seed tooth, one in the first cycle, one in the second cycle. No animal does this. Watch your child, till 6, 7, when the start of the dropping of the tooth. You put in front he eats. Now, he decides, I don't want this, I want this, I want that. I want to do this.

We have phases of maturity, physical and emotionally, in different part of the cycle of life. 6, then you have 12, 13, and then 6 cycle later, you have the 18. We're born 6, 5, 6, 7, we shed our physical tooth. Round about 12, 13, we become mature sexually. And then 18, 20, we become mature. You call the wisdom to physicality, and the dimension of emotion is supposed to have control over. Life has a cycle. And where you live, what diet you have, shifts this a little bit higher and lower.

Any other question?

R: We have a question from Fushi Fush. (2:12). It's in, I believe, German, but he's given a translation. ... about the calcification of the pancreas. I think it might not be the pancreas, but ... perhaps it is ... he says pancreas. Some people talk about the calcification of the third eye, the gland, the pineal gland, but ...

K- It's too hard to find a stone in there ?? probably.

Q: So he is asking . Which Gans can I take to stop the punctual calcification of, well, pancreas or perhaps any organ or, you know, gland?

K- Or, you have a kidney one, you have a gallbladder stone. Where else do we find a stone? Do we find a stone in the heart? Yes, we can do that, calcification. That creates death, very, by, it's the emotion of the heart, when you get the calcification in the heart. It's a very rare disease. About 10, 15 people at any time in the world have this disease. (2:14).

You can change calcification if you understand the process of how, and what emotion is behind it, or what fields has created it. And you have to use it in conjunction with it. That's why when there is no emotion, it's just a field strength we see viruses like Corona. If it's at the strength of the Calcium (Ca), where it touches it, the Calcium seed of every cell, now changes that cell to a strength of cell, in a ways, gravitizes it to Calcium. So we see death with a lot of people, with Corona, with the heart, or with lung, with massive calcification. Because it's a ?? field strength. It's just you have a magnet, which is a steel magnet, iron magnet. So anything

with iron in it, attracts itself, because it has that field strength. It's the same with the calcification of the cells in the body or creation of stones, it's the field strength environment, which dictates the calcification. When you can, you have to find out how, what it is, and we can, if you create the wind of the calcium with it, yes, it's possible. You can interact with it. But it's a knowledge we, as Keshe Foundation have gathered over years.

Any other question?

Q: ... Hello Mr. Keshe, you were kind enough to tell us once more, what is the difference between transmutation and transportation? Because you often use these two words together, it seems like they occur simultaneously. Thank you. (2:16).

K- Transmutation is when we transfer through the energy. Transportation is when you do it in the physicality. You dream through transmutation. You travel through physicality, you get on a plane, you go in a car. Have you ever seen a car driving out of your brain? And because we have two Souls of STP and the STM, they do in the transmutation of the body, you then manifest in physicality. And so, you can do the ?? work. Teleportation doesn't exist, just because people made it in the television, now they made a word for it, which is a good dream.

But, transmutation is very simple, it's done through the energy levels, without the physicality, and through transportation is what is connected to physicality. You can still carry a dead body across a plane to another continent. You show me how you're going to carry the Soul of the body which was in it, so it transmutes. Many times, I've said that many times, people may understand it. At the point of the burying the Soul, the physicality of the man, the STP is present. Many times.

Any other question?

Okay. You're on out of questions, shall we call it the day? (2:18).

R: Well, there's a couple of more, but you're doing quite well. Let's ... I've got one in German, I need to translate.

K- Those of you, while you're translating, those of you who come into the session tomorrow and next week, you will have a fantastic time. Maybe you come a step closer to transmutation, where last week we worked with, or last sessions, we worked with the transportation. It'll be an amazing time in these two sessions. I want to see how, as Knowledge Seekers, come to it. We start a session with just normal welcoming you. And then, at the end of the session, we just say goodbye. It could be one hour, it could be two hours. And I'll receive continuous through the graphs. And then we decide. It could be three hours. But how you feel, how you come out of that session tomorrow, and then next Friday, it'll be an amazing experiment and knowledge for us. And as usual, we share it with you to see, to understand. But it brings you one step closer to understanding the direction of transmutation, the essence of the energies of transmutation, and how you can transmute. We most probably bring this dimension in London Conference in an amazing way.

Any other question? Or have you managed to translate yet?

R: I haven't done the translation yet. I'm still trying to figure out the other questions here. But ... maybe we can just address one or two more and then we can wrap up. (2:20).

Q: ... Recently on social media, we can see more and more videos showing people suddenly disappearing. If these are real, I cannot imagine the fear between human beings. I don't know if this is a question or I need confirmation about that.

R: Any rumors of people disappearing?

K- Well, camera magic is a lot of them. Camera of magic is a lot of games played. But in reality can happen. You are learning how to do it. But, it's a knowledge of understanding how to transfer energy. Up to now we transferred.

You know what is very interesting in all these teachings, and how puzzles me sometimes, how man tries for man to be ignorant, because it suits him, because he doesn't understand, so he doesn't look. It's a few things we have, we do and we just don't talk about it, because it's there and then ?? you. What is a day and night? How come we got a daytime? How come we got a daylight? Just because Earth rotates and faces the Sun, Sun itself in its environment, if we go into, outside Earth, it's always dark. How come we have a daylight when it comes to Earth? Because we never wanted to understand the interaction of the fields of the Earth, gravitational magnetical with the Sun, creates friction of plasma, we call it, daylight. And the photons or whatever it is, through connection to the field strength of the center of the Earth, getting pulled in, we have a continuous daylight. So, now we understand this. (2:22).

But you go outside Keshe Foundation, you ask anybody, there is no explanation. Now we have the knowledge, we understand. It's the same with other factors in life. Now we understand, we can scientifically explain. And we try to be ignorant, because ignorance is a bliss for the ?? British, we don't know. And this is the same with these kind of questions. Now you understand the world of plasma and what it does, so it should be easy to, to understand it and to explain it.

Next question.

Q: ... Hello, I was at the meetings on September 8th and 15th, But unfortunately I didn't receive any feedback diagram. Greetings Joseph. Were there diagrams or public publications that were available to people?

K- It was sent to people individually. Send a message to info@keshefoundation.com Maybe it's been kept and hasn't been sent, or it's an email waiting to go out. Or you've been just, somewhere, been sent. Change, check your, what do you call it, Google, or change, check your junk mail. Google has decided that if Keshe Foundation sends more than 4 or 5 messages, they just dump it as a junk, or they don't transfer it. We don't know why. Everything has been sent out.

We were discussing this with our promoters this week, too. (2:24). Somehow, Google has put a filter on Keshe Foundation, as usual. And if our offices send certain numbers, even one, they block it, or they send it to junk, or people don't receive it. Check your junk. If you haven't received it, send a message to info and see what it's because everybody else has received it. You understand these sessions we run is so time consuming. We can't send a mass email. Most of it, sometimes we have to go individually. When it's hundreds of you, every single one, every email has to be posted, mainly one by one. And it's also some problems with, what you call it, the Google with the Keshe Foundation.

Any other question?

R: I have it pretty much nailed here.

K- .. When you expect something, sorry, just one second. When you expect some message back from Keshe Foundation, especially if you have a Google account holder, or Gmail account holder, especially Gmail, check your, what you call it, junk section. And if you don't receive it, send a reminder, because everything is sent. It's something Gmail has decided to do with Keshe Foundation.

Any other question?

Q: ... I used the reactor with the Nano coated coil with the copper plate. I have placed the reactor on a red light therapy light for a while, when I made a picture the green LED turned black. (2:26). After a long time I did see copper crystallization on the plate. Can you explain more about this phenomena?

K- Repeat, please.

R: Well, he has a reactor with a Nano coated coil with a copper plate, and after a long time he saw copper crystallization on the plate.

K- This is quite possible, we see this a lot. This comes from the field interactions of different layers of the Nano layer and environment. In a way, you take a copper, you Nano coat it, and then the interaction of the fields of the copper, takes the copper from the center of, let's say, if you have a wire, you have Nano coated the outer atomic structure of the copper. But you create the same thing in the other side of the copper. So, it comes to a Nano, becomes fields, and then the last layer pulls it back in, and you get the copper from the center on the top. This is a very normal, natural phenomenon. Depends on mixture of the copper, depends on the way you Nano coated it. And usually, when you get it, if it's not instantaneous, and you are in the water, it turns green, oxidizes immediately. This is very normal, this, in a way, you take the one atom of the copper, or one molecule of the structure, from the center, through Nano coating, and then, because of the field strength changes outside, it, (2:28). through the gravitational pull of the center copper, it just manifests itself as a copper. It's very much transmutation, but in a matter state of ?? ??.

Shall we call it the day?

Q: ... Yes, good day Mr. Keshe. Here in Uruguay, there's been a very big ecological accident. In a paper plant, they've spilt a thousand cubic meters of caustic soda into a river. And it's made a big mess there. And this will end up in the river plate, in the end. But what is the possibility of neutralizing this or correcting it? The pH water, in the water right now is 13.

K- There are different ways to do it, very rapid ways to do it. Use the, the... One way to do it is to use Hydrogen Gans. The other way to do it, use a Gans of Zinc and Copper together. Just flood it and you will see the change in pH very rapidly.

Q: Fine, well we hope the people there in Uruguay will listen to this and get their hands to it. Thank you very much.

K- Yeah, it should do, it should, you change the... When you add the Hydrogen to it, (2:30). at such a high level, you push it to become, what you call it, alkaline, the acidic and the reverse. It leads to creation of life, if you understand it. Or you use Zinc and Copper and you bring in natural ways of, what you call it, the caustic, into process of creation of Hydrogen and CO2. The... it's a very easy way to change it. If you have a free Gans of Hydrogen, you can throw it in the water, or bring it near to it, it should... It's so alkaline, that you change it to acidic. But the environment is so alkaline, acidic, that it becomes like a sugar of life.

Q: Thank you very much.

K- Thank you very much. If you have a caustic burn, try it, it works amazing. It's like when you have a hot water burn, you put CO2 on it, the pain reduces. With caustics, if you, you have, if it goes so high, you have to change it. But at the same time, you have to introduce the element of balance, which is the same, you put the Hydrogen, you put the CO2, what you call it, Copper, and Zinc, you create a diversity. And you neutralize it, it becomes balanced⁷, more or less.

Thank you very much for today. And we'll meet some of you tomorrow, (2:32). and you'll have one of the most amazing journeys. And as I said, if you're coming to London for the conference, make sure you complete it, because the promotion, I think, it starts on Monday worldwide.

There is something I have to explain. It was important to say, to explain it very carefully and directly. We saw people who causes a lot of problem in, what you call it, in Germany and the other functions, calling embassies and whatever. Please understand, if you're so selfish you want to do this and stop the man to become free from all the shackles of what we call, created for himself. Carry on with your work. We know you are all connected to pedophile groups, 95% of you. And we know your... what you think you want to do, or whatever it is. Do not forget, we're dealing with the governments, and we pass all your inputs directly to your governments to be handled, and handled by them. One of the biggest nations will suffer, will be Germany. Especially with the German people. We'll hand all your, all your inputs, whatever you've done, whatever you're trying to do, to your government. You will understand the reason, very, very quickly.

This time, as this is a process of the International work. We have allowed our promoters to allow Belgium, Governor Belgium to be represented if they decide so in this meeting. (2:34). As it has to be equal to everyone. In this conference we allow any Belgians who applies to attend the conference. We cannot bring peace if we bring a division. We make it very clear to the Belgian nationals and to the government. This is the last time we give you a chance to, in a way, understand your position. The same goes for the Dutch, and the same goes for the citizens of the state of Dubai, we call United Arab Emirates.

We keep this conference international and open and all your leaders are invited if they want to join. You have access to your governments, your presidents or whatever, and you want to make them aware, you let us know. Our team, our promoting team, directly will send message directly through you, or whatever you have. They have access to all the presidential offices and the rest, there is one of the top companies, we know they will handle it themselves. But if you have access or private access to certain ministers, or cabinet ministers, or leaders of the parties, send it to info@keshe.foundation, (2:36). and we'll send these to our promoters and to do. And they will be inviting your leaders to be.

The session will not go public on Zoom, as it will be done, there is a reason for it. And we'll announce in the next few days, what is the position with the conference in Beijing. Beijing is very much like Saudi Arabia, and United Arab Emirates. Governments have to authorize a conference to take place. And we have started

the process, and we'll see what we get from the Chinese government. If they allow such a meeting to go, and we have requested the presence of his Excellency President Xi to open the conference in Beijing. We soon will have an answer for it and we'll see what they do, if he's going to be present and we'll match it accordingly.

So, we have put everything aside to share knowledge with all man equal. In the conference in London has to become the center for peace, and work of the peace in a correct way. We hope we see some of you there, and in the coming time, we will announce the new position for exhibition in London, as the (?? Linz Exhibition) will move to London as the central position. Thank you very much, and see you next week.

506 KSW Oct 05, 2023

END

507th Knowledge Seekers Workshop October 12, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Few degrees 4 season - variety of races; Planet has emotions; Brain scans like topography of Earth - how emotions effect show in scans - like forecasting weather of Earth; Brain tilts from emotional storms - diseases; Problem is half sphere brain - nervous system hangs down - can't handle storms; New Headphones correct missing half on field level; Sun's M fields push against Earth tailwind - reflected in brain shape - pushing back; Galaxy & U same shape; STP pulls down P by fields of Earth; Space reactor like brain - double core can fly - STP in center; Change fields around brain; 9 years to change body from emotions; Gradually restore by fields; Need to work with smallest weakest fields; Vegetation weakest fields Soul absorbs more; Tailwinds look like eye; Loving is key; Advertise London internationally; Electric cars obsolete - plasma cars; Rapid implementation T China; Deeper understanding about Palestine problems; Holocaust; Governments terrorize; Canada - 11 days; Misconduct - elevate Soul; Oasis system; Auschwitz - West Bank today

ENGLISH TRANSCRIPTION

(:10).

K- Yes, thank you very much. Good morning, good day to you, as usual. wherever and whenever you're listening to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you back. And as usual, we try to add to knowledge and understanding.

In the Intro, we hear something very interesting. And, we think and as was said in the Intro, a slight tilt in the position of the Earth, in respect to its vertical position, has created the 4 seasons, a few degrees change. We see summer, winter, we see the emotion of the Earth, ravaging winds and the rest of it. We have this in the other planets too, which are in vertical position. But because they're constantly at the same, what we call, angle, in respect to their horizontal position, we don't get the seasons. But this few degree change, it creates such a variety in race, in vegetation, in different emotion of the planet, and in every other aspects of our lives. (:12). Our moods, our emotion changes because of the summer time we feel happy. When the time, especially in the northern parts, is highest rates of suicide, and everything else which goes with it.

But, as we look at the structure of the brain of the man, by looking at the structure and how the brain is positioned in respect to the whole verticality of the body of the man, or be it the animals. By the scan, we have the knowledge nowadays, we see, we can determine the conditions of the body of the man. We call it, the brain of MS, the brain of somebody who has Parkinson. We say it this way, it's a bit of a desert, it causes dementia. And in so many ways, man, behavior of the man, structure of the man, the way the magnetic (M) fields of a Soul with the interaction of the physicality (P) of the brain, create the man, can be determined by the structure of the brain.

We just look at the scans, we don't understand them. We look at the picture of the Earth and we say, "It's a bit tilted." What happens when our brain tilts? What happens when the pressure changes in the brain, in the skull of the man? If we can understand the interaction of the fields, and if we can understand the expansion of the field forces within the center of the Earth, (:14). then we can, in a way, sort these things out. Now we can forecast how the weather is next year, next 30 days, how the fields will interact, where it's going to be cooler, where it's going to be hotter, possibility of the earthquakes and the rest of it. If we look at the brain of the man and if our, what I call, knowledgeable doctors look at the structure of the child at birth, we can predetermine what planet this planet is going to be, what is going to be outcome of this new Soul. And this is what we have not understood.

Over past 60 years or so, 55 years, I had the opportunity, I had the pleasure of being able to look at the brain of the man. Through x-rays, MRIs and every other means man could image it. Being a son of a x-ray engineer and being familiarized with these machines from age of 7, 8, 9, seeing the X-rays from the bone to kidneys to brain, always interested me to understand how can we change the center which is the above, which is the brain, for the rest not to happen.

Rick if you can go on Wikipedia and pop out some brains of the scan images of the MS and Parkinson, you might understand this. (:16). If we look at the magnetic field of the Soul of the Man (STM), which is in perfection within the center of the brain. But, according to the condition and the environment of its field strength of the Soul of the Physicality (STP), creating condition for the structure of the life to be, then our scientists realize, it's easier to understand the development of the STM. In interaction with the dimension of the STP, which is done to do with the dimension of the flow fields of the blood of the man, plus emotion, they don't need medication. They don't need to create chemicals and whatever and we stigmatize them for different things because actually our illnesses are very simple. Our doctors have not understood how to handle these things.

Pick up the image of a MS patient and the way it tilts or shows by the Wikipedia. If you look at some of the brain structures, if we, we need a closer, if you can find a very good single picture of MS brain, just put brain, MS brain, scan, you get a very good pictures on that channels usually. You will see that we call them

diseases, but the shape, the way we have the deserts, we have the mountains, suddenly we have the floods, suddenly we have the droughts, it's the same with the brain of the man.

If you put a normal scan of a brain next to a scan of a MS, you'll be amazed. In most of the cases, (:18). MS brain is, (just go down to the one below, if you can bring it up a bit, yeah). If you look at this brain, usually what we see in the back, there's a "ditch" at the bottom. If you can open it, you see it. That ditch at the bottom of the picture, on the left hand side, gives you the first signs of something is wrong in the structure. This is that tilt, this is that deviation. And if with the technologies which we have developed, like the application of the Gans's, which you know how to make, changing the emotion of us in respect to the planet, to correct the condition by the Gans's you throw at the oceans, and the Gans's you produced to change the environment.

If we change the environment of this brain. And that "ditch" goes back to where it was originally, which you can pull it forward just a little bit, then you understand, there is no difference in forecasting the structure with emotion, and the weather forecast. These images gives us exactly what we see on Earth. ?? Downs, hills, curvatures, rivers, flow of information, (:20). but all this has a center in the center of it, which is the STM. In the interaction with the physicality (P) and the blood flow, the emotion which we bring to it, dictates how these ditches, how these changes come in.

And our doctors and scientists should be able to ratify (?? rectify) this, by simply strengthening the STM. Weaknesses brings these deviations, weaknesses brings these changes. Weaknesses which brings the condition of the, what we call, interaction of the fields of the emotion of the physicality, the emotion of the STP and the STM. In a way, our physicality is a slave to interaction of the two fields, of the emotion of the Soul and STP.

When the emotion of the man, in the dimension (D) of physicality it's not satisfied with the condition of its environment. The "environment," in the terminology, is people you live with, environment you live in, interaction with the society, interaction with your siblings, interaction with your boss, interaction with your children. These are the hurricanes, the tornadoes, the beautiful warm summers, the leaf blowing and everything else.

We have not understood that we cannot separate the way, the shape of our brain is and the planet we live on. (:22). The shape of our brain, the structure of our brain, talks about a desperate situation, incomplete situation. Many times, when I used to make the flight systems, I always said, when would man understand he is flying halfway? Instability comes from the bottom end. When we look at the structure of the Earth, when we look at the structure of physicality of the Earth, when you become wise to understand this, you'll find out we are a flying object. We are absolutely uncontrollable flying entity, our brain tells us, the structure of our brain dictates this to us. And we need to understand this.

If you look at the Earth, it has symmetry on top and the bottom, left and right. It's a spherical shape. When you look at the brain of the man, it has a top half, parts is missing. We have compensated through a nervous system, we call this, spine, the rest of the shape of this matter. If you look at the reactor in the center of the Linz, (:24). in the Exhibition Center, the blue one which you've shown years ago, you see the similarity between the Keshe Foundation and the brain of the man. Where we have brought this body of the man into the central point, we have brought the STP in the center. Where the STP of the man as a blood flow, goes around to it. Perfection in all dimensions needs totality.

So you can understand by looking at this feature. From the birth, point of inception, we should be able to tell how our children, how our faces, how our features going to be? A lot of people talk about the stem cells. The stem cells is copying something, but not understanding the totality of the Creation. And when you look at the structure of the brain of the man, you'll find out that when there is something wrong in this half, because of the shape and connection through the spinal cord, this has to adjust itself to it. And then when the storm comes and the brain slightly tilts in, the physicality has to respond in the dimension of its interaction. Paralysis, limbs, arms not working. (:26).

We always said the problem with Earth is that it has not, in the course of its creation, provided the totality of what life needs on this planet, that it has created the man to kill, created the animals for that extra energy to be gained to do all sorts of funny things. Doesn't matter if you're a man, a cat, a dog. It's a common denominator. Short in the totality of the shape, in the structure of the planet, to be able <<audio cut >>. And this half circle, this half shape of the brain, is replaced with the physicality in the field strength wise, that it has created the whole problem of the creation. And this is what now we have to understand.

With the new systems, with adding, bringing in, what we call, the Head Units, the other system technology developed by us, we try to expand this, that the totality in field interaction will reach and complete, while the physicality is still in position. In a way, we allow the Soul to complete what was not done, what was not be able to be achieved by the STP of the man to complete the circle. In expansion in the Soul, in expansion of his spherical shape, we create that completion, but this time it's perfect. (:28). In a way, the physical body of the man becomes an accessory, and a tail which is added to the STP, as to the STM.

If you understand this, then you understand why the first spherical systems, I developed, tested in Iran, Sharif Tehran University, could fly, could take off. Because it's double core, I brought, you call it the double core, I call it the STP, I brought the STP inside the STM, while the fields are in balance with each other. If you look at the shape of the systems, you go into, you came to Linz and you sat in. We have again emphasized, you come in with that shape, you have a Soul, you call it in the center, we bring it in, you call it, you go to the state of dream. And I've seen many people who came and went through it. They say, "blurred, we can, we see you but you're blurred." Because, the Soul fields has super-passed the physicality.

And in that process, if you gradually, step by step, allow the physicality to catch up with the interaction of the fields, then you see any deviation, any fault, any mishaps in the creation, or the damage of the brain of the man, will find to balance his energy into perfection of itself and you call it now he has changed. He has no more this condition or that condition. But in fact what we've done we have understood the process of the Creation. (:30).

So when we come to explaining the seasons, we call it the autumn, storms, rain. We call it in our brain, different diseases. But in fact it's the same. A new position in respect to the Sun, to the Soul, gives us different condition and environment. So is the same with the STM. And what energies we can, what strength fields we can allow, what conditions we create with our systems around the brain of the man, will dictate how man will look, how man will be in the coming time, in the coming process, in reality of totality of the existence. Then, when you move this Soul, when you move this central energy, to another position, then in interaction of itself, with the STP of itself, will create a condition, that the STP in interaction with the STM and the environment, will give man a new shape. Where at all time, the emotion of the STP and the emotion of the STM, in interacting with each other, ?? being in balance with each other, dictates the manifestation of the perfect physical life at any position in the universe. (:32).

Now we see there is no difference between the man and the planet which created it, and the star which created the whole structure of the environment, and the galaxy, and the universe. They're all the same. Different winds, different ?? floors, what we see on Earth we call it, the winter storms, we open to space, we have magnetic storms, we have to understand the condition of universe, where is the winter time, because even our own galaxy is not in the right angle with its center, with our central force fields of the universe (U). So it has its seasons, our galaxy has its own condition and environment and the storms and everything else. What is in macro is in micro.

It's for man to understand, it's for man to gather the intellect, understanding of if man can manage to handle the storms with his own brain, with his own structure, with his own physicality, man can handle everything else in the universe. Because the brain of the man is one of the most complicated systems, but in fact all connected to the operation of the Soul within the center of it. Do you battle in different positions, or do you handle the strength of the center, that the position is becoming irrelevant because you adjust to it? The fields adjust themselves to it, you don't need to do anything. Fighting takes time, fighting takes energy, but if you can be with it, go with it, create the condition of the field flow with it, you'll survive. (:34).

There is no difference in the operation of the brain of the man. The storms we create as rages, as joy, as laughter, as cry. And then the rain, the thunder, the beautiful sunshine, weather, the deserts, the valleys, and the rest. Our scientists have not understood, have not realized the bigger picture which is in front of you.

In our brain, we carry half of the sphere. Instability is guaranteed, unless we understand how to operate, how to run, how to manage this "chap" in the center. Then, once we realize this, once with the development of new technologies, the Head Units, the new systems which are going out, and you use, the headphones you used in different trials and tribulations of your life with Keshe Foundation, you'll find out, I've changed. Those of you who have been with us in through tests in past 12 months plus, sit back and look at 12 months ago. Sit back and look prior to June, before you start coming to Linz, and analyze what has changed in my life. Emotionally, physically and psychosomatically and every other angle. What do the people tell me today? What do I see today compared to last year? Has the hope has changed? (:36). Has the prosperity of understanding life has changed? And then you understand, there has been evolution. We have understood how to allow you to elevate, to free your Soul and in interaction, to repair the conditions, elevate the positions which must have or might have done, reduced in field strength, and then going back to.

If 12 months ago you had a Parkinson, 12 months ago you had MS, and 12 months ago you had Alzheimer's, or 12 months ago you had different conditions, look today and see, what is it? It's not the technology (T), it's the elevation of the Soul, in a way repairing itself, by strengthening the Soul to expand beyond. Those of you who think it might happen in one time, you're in dreamland. You live in absolute dream. Cells have to repair and see what is needed to be repaired next. What has changed, to change back. When you see a paralysis from MS today, it's not suddenly yesterday I could move this finger and today I can't. It's not today, this is planned, 7 years before, 10 years before by the brain. Millions of cells have been ordered to shut down, step by step, knowing that your cells, your deviation, takes to 9 years to change in the body of the man.

Then you understand, to reverse the conditions man has created for himself. The conditions man has determined for himself, comes out of his own lack of strength of the fields of the Soul, (:38). to interact with the dimension of the STP, to create the condition of the working condition of the physical man. When you look at a finger not moving, this is reflection that the STP and the STM, have shut down that place in the brain. Now, physicality shows itself years later.

Why do we age? And why we call it death? If man realizes, through perfect, whatever you condition, you could call it, to feed, give enough energy, man will find out, can survive a lifetime. I always said, a lot of people tell us, we eat a balanced diet, we don't eat meat, we are vegetarian, we are vegan. Do you realize what it means? If you understood the work of the energy needed to elevate, to absorb by the Soul to expand, and you tell vegetarians and the others live longer. So you understand by true vegetation, eating vegetables or whatever you call it, the way of life, you kill more animals to give more energy to your Soul to live longer. Man should have understood this. It's not the healthy life, it's how much energy in a lower level, (:40). we absorb, we digest, we give to our Soul, that it can maintain the operation of the STP, in the dimension of the brain of the man.

We consume food in that way. Now we understand, if man could understand, if our scientists would have linked the lines together in one way or another, that large energies consuming meat in the high energy levels, does not give that low energy field strength which vegetation gives to the STM, man would have never eaten of it. And now that we understand this, we train our Souls to absorb the weakest fields from the universe. We'll guarantee life for eternity.

It's the misconception of the man, that it needs bigger things to get bigger, to survive longer. In the world of the Creation, the brick blocks, the blocks which brings you up to keep you to survive, is the weakest lines. And man in that position, if he understands it, then does not look for the strongest field in the universe, because he has another capability of handling it. He looks for the weakest, for the one which has the lowest strength that his Soul can maintain and absorb, and then in interaction with the environment field strength, create manifestation of perfect life, perfect physicality. (:42).

The biggest dilemma for man has been that he looks always in big things, big amount of consumption, but he doesn't understand the biggest structure, big things eating is in dimension of physicality. The STM, the structure of the physicality of the universe, look at every star, look at every planet, look at galaxy and universes, all work on the weakest. When you become matter state, you need a strong, bigger. When you work in the dimension of the plasma, you need the lower strength that it can add to. You build from inside, you build from the under, under.

If man understand this, if we come to understand the complete comprehension of the totality of the system, then we understand how much we have come to miscomprehend the Totality, the reality about the Creation, the life on this planet and the rest. Then, when I explained to you, when you put a food in your mouth, you are just an attraction point. You are now, have created a condition for your life, for your body, to attract that little field which come from outside. In a way, you have set the seed of absorbing fields.

This is your dimension of physicality and you have a big stomach. In the stomach when you put the food, as I explained many times, when you eat, all you do, you set the small seed, of, in a way, by body of the man, (:44). converting the food into a Nano material in the stomach, and then change it into a Gans, which creates a small fields, now you have created the condition for absorbing the fields of the universe into you. 80% of your energy which you absorb, to run this physical condition. Then in the process of the digestion, where it goes, how fields are interacted, decides what kind of diseases you will get.

This is why the new technology in health, in the space technology, by changing the environment of this condition, just creates the fields, and the body in respect to getting it from possibly the cosmic rays as a source, to change, to develop, to repair. Then you'll come to understand, in the future, one of the most important things for man will be, going back to what we just said, is that the brain of the man will change its

shape to spherical. The shape we see, our shape, shape of our brain will 100% change, as we go into this process.

If you look at the pictures of the magnetic fields of the Earth. You have Earth, you have the direction of the flow of the field of the Sun and if you look we have a "tail wind" (:46). Because the strength of the fields facing pushes the fields back. Now isn't this the shape of the brain of the man, but in that tailwind the shape of our brain has changed to this shape. So what do we absorb in the direction of fields from the frontal view, from the face side, that pushes our brain to be extended slightly to the back. What fields from the Cosmos we receive on the tail end and the front end. And how these affects the emotion, the physicality of the man in the process of the creation in the life.

In the new systems, which some of you part, took part the last Friday, and some of you take part this Friday. Tomorrow, we are testing this on you. How would your emotion change? We don't tell you how we play with you, we don't tell you how, we just strengthen. We have put systems in operation, in our system, to see how you absorb energies. How much from the back, and how much from the front, and how the system evaluates. Don't forget, we have tens of you in this test, not one or two. (:48). So we see average operation of totality of humanity.

In the solar system, the tailwind of the facing the Sun, if you look, is like this. Because it comes from the Sun, field forces are strong. And if you look at this, it's the eye of the man too. And your Soul sits in line in that tail centralized. So that's why you see your dreams. The dreams you do not see are the dreams, are the field interactions, which are created by the back and not coming through the front. Those of you who say, "I can't remember, I don't dream." It's because you're heavily loaded on the field strength on the back end of the head, not on the front end. And it shows your behavior.

Many of you, when you go, when you've been with us and says, "It has no effect on me." Because this has a meaning, when the work, when the energy is on the back end, not on the front. And then it's so heavily loaded, that does not allow the Soul to expand to the front, that you can see the visions.

In the trials, which has been going on, in past week and the coming week and then into the future, we are evaluating in how we change this shape of the brain of the man. It's extension, to create a balance that in one go, (:50). you can decide and you can learn to transmute. Some of you who took part in the last week, somewhere in between you should have had a shift of emotion. Change of emotion suddenly without you knowing. Because we change the system to see if it does. And we saw it on the graphs, immediately.

In a future test, when we put you through the dimension of the physicality, we will go even further into this. We go further in understanding the totality of what we call, life. How we will do? How we will bring that into operation? How we can change this in the addition of understanding of the work? How we can change in Totality, the dimension of the existence? Now you understand. In the dimension of the plasma, you call it "tail wind" of the Earth, magnetic field of the Earth. In the brain of the man, because the Soul sits so perfectly in the center. The tail winds are created as a matter structure of the physicality of the brain of the man. And at the same time, if you understood this, you have another dilemma with you, (:52). and that is, because the tail end is so in interaction with the body of the man, with the field interactions of what we call, magnetic field of the Earth, has no choice.

This is your brain. This is the shape of your brain. This is gravitational magnetic field of the Earth. So the Soul sits, hold on to, as is the Soul of the Planet. What does it do? Earth has Inertia, matter state's "second

weapon," you call it, the STP, and it pulls. As it pulls, it creates the shape of the man. This is where the other half of your field forces have disappeared to. In interaction between the STM and the STP of the man, man has created, compensated for the ?? part of physicality, the storm has pushed the brain up, and created the relief of lower energy, called the physical condition. This is why it does not matter where you walk on Earth, you always have that condition. This is why, why we see what we do, (:54). what we have, and how we need to understand the totality.

We got to understand, that the process of creation is the same. You look at the bigger scale of this, you look at the shape and the position of our solar system, in respect to its galaxy's central point, you will see the same shape. It's not just holding on to, it has field forces that it pushes, releases energy. This is where the very first paper I published about the creation of Black Hole. Emphasis is on this. Black holes are not absorbing. They're radiating more than they absorb. They absorb from everywhere. The lower fields amalgamate ?? in them and release them to bigger, stronger fields. What they release decides the shape of the galaxy. What man's Soul releases, decides the shape of the man. In respect to his environment of Earth, or our Sun, our solar system in its galaxy, and the same shape of the galaxy, in respect to the central point of the universe.

If, as I explained last week, (:56). you go to a forest, you lose your way, and you try to find your way back out, the shape, the dimension and the direction of what we call, the trees, will give you where the Sun is, which direction you are going, in which dimension and which direction you need to travel. Where is the Sun? Where is the North? Where is the South? When you see the trees, the heavier branches, longer branches, face the Sun. The thinner branches are away from the Sun, because they absorb more energy. In the galaxies, when we, our scientists come to understand which way the galaxies is shaped, they all show us the path to the center. We call a tree the leaves and the branches. We call it the galaxy with the stars and planetary system. But in fact it's the same as entity, the same entity as one.

In the direction of the field flow of the magnetic fields of it, instead of the shape of the galaxy, will show us which way the wind of the central system of the universe is blowing. Are we in the North Pole of the universe? Are we in the South Pole of the universe? If we measure the gravitational magnetic field of our galaxy, then we can determine the position of us. Those of you who travel in UFOs, have to gain this knowledge, before you get into it. (:58). Is your captain taking you this way, where you want to go, that way? Because your daughter has moved to galaxy "so and so." Now you understand.

It's the same when we become wise to operation of the Unicose, The shape, the dimension and the direction of the field interaction of the Unicose will dictate us, will show us the way to our Creator, to the central point. This is how the humanity has to extend his knowledge, extend his understanding of, expand his process of the knowledge gaining, through the weaker fields of the universe, if he works with the plasma. And not through this massive, everything has to be big. Because, when it's big, it creates power and you'll be frightened of it. God, your Creator, comes to you through the weakest strengths of the fields, and you don't even know it, because you're looking for him to be so big. That's why he's in every cell, every existence, every thought of you. Because you have not learned, not to be physical, not to look at the biggest thing.

I always said, when you go to communist countries like Russia, when you go to places like the churches and the mosques, you go to the offices of the government, they make it so big, that you live in a tiny house, so this thing big must be very important. (1:00). Fear of size, not knowing there is no Soul in any of these buildings, not even in the churches or the mosques, because the strength of the creation comes from the smallest, the essence of common denominator of the life of the universe. If it was supposed to be so big, you would have never existed, it would have hit you so hard that you can't even exist, stand it. The love of the

mother comes from those small caresses of touch, not from the heavy hugs and slaps. When you sleep and the fingers of the mother runs through your hair, your skin and touches you and she says, I love you, you feel it. And this is the love of the Creator. And man has not understood this. If you think one day man will see the Creator in a huge entity, you have not even understood the essence of the Creation.

And it's the same with our doctors, it's the same with our scientists. To reach, to expand the STM, you have to reach to the lowest level strength fields as a plasma, not a big hammer and a sledge hammer. If you look at the stone, with all this mighty, when you look at these mountains with a huge size of them, what does it powder them? What does it break them up? What it destroys them and what makes them, little drop of rain, receives through the cracks, (1:02). step by step, and then expanding. Man has not learned the process of the Creation. Man has not understood the process of the Creation.

And this is why the systems, the technologies we are testing, developing, looks so amazing, because we have learned to come in the soft way. The small, the way you are created. You come with the rage, you come with the heavy fields, you give yourself Alzheimer's, you give yourselves Parkinson's, give yourself everything else which your body cannot hold. And then you call it, "I'm sick, I have this disease, I have that disease." Because you don't know, you use the sledge hammer of the emotion on the physicality of the man, which is weak and works on the fields of the universe.

This is where the new technology will come as amazing, shocking and unbelievable, because man has never had any belief in the Creation, the process of Creation of itself. And most of this, most of this condition came out of fear, religion and those who abused the man. Now you understand. Go down deeper inside you, allow the fields of the Creation to touch you and not the stones of life of the physicality, (1:04). which the body has no way to stand it. The little touch, the little love, the little essence of giving and creating the condition that allows that weaker to come in. You receive the weakest, you give the strongest. In that process your strongest become weakest for someone else's energy, to become the essence of his creation. Now you understand why I keep on saying, as I've been teaching for years, the whole process of the Creation, in the simple word of loving.

Maybe as Knowledge Seekers today you understand a little bit more, about the essence of your own creation, and how you have created mayhem, with the storms and ravages of your own emotion, that the physicality cannot take. Maybe, maybe you understand from now on how you absorb the energies of the universe. And then with it you learn how to expand the Soul to become the passengers of the Unicose and not just passengers of the planet Earth, or this universe. And then maybe, if you understand how low you can go, then you find the strength of the field of the Creator.

When you steal, you add to. You make it heavier. You make it stronger. And this is why stealing is not allowed. Because you walk away from the weaker, (1:06). which is the essence of the line of your connection to your Creator. The heavier load you carry, the slower you go.

I hope you learned something today. I hope you understood how and the way life has to be for man. Not only on this planet, not only within the brain of the man. And now you see similarities in real condition of the life, which you call it, diseases, and we call it, storms, weathers and seasons. I hope with the new technology and understanding this, we create the next step.

As I said to somebody in front of me in the very same room I'm sitting now today, last night, that I'm not interested in all this. What I'm interested is to show the man the way he can fly the span of the Unicose. He

can see the beauty of the Creation, not with rockets, and spaceships, and every other material condition, but through the essence of the strength of his own Soul. And it's not, does not need that jet propulsion to create the faster run to take off. It needs to understand the lowest energy fields, that's the path to its Creator. And this is a very big dilemma for man. How to live in both dimension of strength of his condition of physicality, and the weak, in the strength of the lines to his Creator. (1:08). Connection to his essence of his own creation.

Thank you very much for today. And I hope I open your eyes into a new dimension. And in a while, your test, your cooperation with Keshe Foundation, is opening that door. For you and for those who gradually learn, man lives two lives, schizophrenic. One is a devil, and one is an angel. The devil is physicality of the man. He has to do everything to keep it. And the angel is the STM connected to the line of the Creator. We'll go for a break. We'll come back to answer any questions.

>> **BREAK** >> 507 KSW October 12, 2023 (1:16).

K- Not really, we do the same as usual. If there are any questions to answer, we try. And see what we can, how we endeavor to understand it, to answer it. The usual way we make announcements, if there is any, we don't have any announcement. The process for the London conferences, and Congress and the whole week session of teaching is going on. The advertising should start on the 16th, internationally with invitation. And the venue, thanks to one of our dearest Knowledge Seekers, has already been fixed, is there for the ambassadorial meeting, is in one of the most prestigious locations, and could not be any better position. And they invite, invitation to ambassadors to London, will start next week, public announcements on media, international media, starts the following week. And we'll see how, for the promoters we have brought in this time, do their work.

And, on the back of that, we're trying to get agreement from the Chinese authorities, to hold the event in Beijing in December or January. And these things are not so easy in China. Needs approval of many, many, many things to be done. And hopefully we should be able to get an agreement in holding the third session in China. And from then on we move on to Tokyo, Beijing. And then from Tokyo to, most probably, Tehran, in Iran, Washington and beyond, as we were planning, before the Corona, as you... (1:18). So, we start giving conferences in different countries, and the Corona came to a halt, there's a continuation, but this time it's not just a conference, we show technologies on the edge.

We have agreements with our, what we call, partners. What will be shown in public and what cannot be shown in public. And this will gradually, we'll explain, the developments which will be kept away from what we call, public, as part of the development and cooperation with nations. And part which affects the public life. Which be like agriculture and energy and the rest which will come through in 2024 through our partnership with ?? the Chinese government. And we'll go with that way.

Those of you who are trying to attend the conference in London, be it the whole Saturday, two sessions, or the ambassadorial meeting, or for the week session long. Please complete your ways, because after the 16th, we will literally do not see capability to control anything, because now it goes in the hand of the promoters and they, they have their own way of doing things and the operation of the running, of what we call, organizing, the accepting the people is with the organizers.

If you have a specific person, you think should be invited, or should receive the information, if they want to join the meeting, like your Prime Ministers or whatever, you can send the information to info@keshe.foundation and we pass it on to the promoters. Many of you have sent us the links to your Prime Ministers, to the high ranking offices of your government. (1:20). We have two levels of invitation, those who we invite, like the ambassadors, and those who receive the information, they have to register for the conference.

Some of the most leading people are on the list of the invitation. We have invited NASA's, will come in through, and people from Tesla, because we will affect the work of this company heavily, both on the space and the vehicle side. The development and release of the levitation cars, what we call it, through plasma magnetic fields, will bring an end to electric cars, and an end to energy consuming conditions. So, we have invited those who are going to be affected, and those who you think might affect their work, to be in the conference.

This conference has, as I said before, a special link set up for world leaders Zoom session. Which means any of your world leaders, your Presidents, your Prime Ministers, who cannot, and they cannot come to London because of the, what we call, problems with receiving such people, world leaders are allowed to join live in the session, through a specific way, we know, it's them and set up with them, to see the presentation, to see the change. And it's for them, how to set up the situation with their governments. If you remember in 2011, 2012, we gave the key with the technology. This time through Zoom, we instead of giving the key to the ambassador, the ambassadors are present, and the leaders will watch what is to come. And the beauty of it is, this time you as Knowledge Seekers, see what your leaders know and what they don't do, or do about it. (1:22).

There's one thing for fact, that the technology implication and implementing it, will be very rapid in 2024, 25 in China. We are part of it, we watch it and how we are influencing the change and the thinking of the government. The biggest problem for us has been to change the mindset and allowing the people to follow. If

you would have said, 10 years ago, man of 90, man of 80, does not know how to use a phone. Now we see men of 100 with a mobile phone in their pockets and they are more active than the 18 years old, because they talk to everyone they couldn't do. They are so active on the pages of the web, that is unbelievable.

So, we need to educate, you need to educate your nationals, your government. If you have and you are a member of people who are influential, and have a direct access to your presidents or what we call, the leaders. Only, this is only for your presidents, they will be given a direct line Zoom. We know five presidents today will be on the line. We know who they are, they already accepted our invitation. So, the whole seeds are set for it. We have asked for one of the world top five nations, to send the opening message to the, for the opening of the conference. If accepted ?? ... it's to give the message of peace, on the opening of the Keshe Foundation conference in London.

As it says, "It is technology in exchange of peace." And the peace only comes when our leaders understand, that their power compared to the power of the creation and the knowledge, cannot be matched. (1:24). As I said many time, and I used to business, us businessmen make you politicians, and us scientists make the world leaders. And what we deliver to the armies, what we deliver to the space technology, dictates the strength of the nation, who becomes to dictate. And in that position we have found a perfect partner in creating peace through the people who we collaborate.

So, if you have access to, or if you want agencies, be it environmental, be it, what you call, space, or whatever in your country, or people you know, should be in London, send us the email, who they are, what they are, and we pass it on to the promoters and they'll be sending the invitation. In any case, we are literally converging on London for the London conference and the congress and the week session of teaching and I hope you enjoy your time with us.

Are there any questions?

Q: ... If 8 billion is not enough for space colonization, then what is the appropriate number needed for men to explore, live and be present across the universe?

K- The answer is very easy. Every planet, every star has a Soul and life within it. (1:26). Does not matter if we see it physically with the eyes or they're on the ground, over ground, underground, or in the water, or in the atmosphere of it, as we have on this planet. And, you just go on the Internet. Just put, "how many stars are in the universe?" And then you need, you understand how many we need. As simple as that.

And Earth is not the only nursery. And there is no competition. And the STM will create new stars. Those of you who have served your time right, for the world of Creation, and then you understand, you are one of those who needs to be perfect. And it's even if we lose half of the 8 billion to become new stars, and the other half to elevate the others, to become what we call, the teachers of the future, then you understand it, 8 billion is nothing. It's not even a fraction of the stars in our galaxy.

Any other question?

R: There's an interesting estimate here that the astronomers estimate that there exists roughly 10,000 stars for every grain of sand on Earth. It gives you kind of a, some sort of concept. Wow!

K- You don't want to know the deserts with the sands and the beaches with the sands on them. (1:28).

Something very interesting sometimes comes up, if we could... we understand it, because I tried to understand it. How come we have such a beautiful beachy sands, by the oceans and seas and whatever, and we have the same kind of sand in the desert? How do they come to be? Was the oceans created out of the deserts, or deserts come out of the oceans? Or some of them do.

Any other question?

Q: ... Thank you for your beautiful teachings Mr. Keshe, we love you. Our hearts are breaking for Palestine, is there anything that can be done to bring peace?

K- This is not a war, this is literally slavery of a modern Arab 21st century, supported by one of the most unjust nations. As you know, I work hard to support the Palestinian people, not their government or whatever, for decades. Even prior to the start of the Keshe Foundation. (1:30). I'm aware of their needs and how literally millions have been put in a open prison, called the Gaza Strip, or the West Bank. You've got to understand, when I look at these pictures, having connections with the Palestinian and Israelis, I want to open another side, I've done this before, if you haven't understood, and you haven't listened.

The Israeli businessmen, the Israeli construction companies, are "rubbing their hands with gold." They're so happy. Every time, every few years, doesn't matter if the Palestinians start to attack or the Israelis start to attack, the Israelis destroy most of the buildings which are built. And most of all these buildings, majority of it come through the Israeli borders in. So there's an investment of Palestinian slaving outside, sending money to the family to live in this "open prison." And then the Israeli businessmen and construction people waiting for it to destroy it. And then every time they need a boost in Israeli economy, they push the government to bomb Gaza. And we send cements, the building construction, the rest of Israel.

There is a humanitarian side to it. But you've got to understand, there's a lot. I discussed this with people I've been with past week. And there is a lot of things which has opened up a lot of questions in the situation with Gaza and Palestinian and Israelis. You got to understand, is the "gun policy" of the United States, which has created this condition. (1:32). Selling gun, arming (with) guns, and creating jobs in United States, trying to be a Superpower, is where it's going to come, going to come to an end in 2024, 2025.

The new technology will bring American superiority to "zero-superiority," which means they will have no power, and becomes equal to other nations. You've got to understand, the what we call, cycle of life in Iran, during 2,500 years, during the Darius time and Kourosh time. Nations became part of Iran, leaders became, joined the Iranian, what we call, empire. Not by fighting, by knowing, by joining the nation, become peaceful, there is no need for soldiers, they knowing, they can spend, they can allow their citizens to live a normal life. Because, the structure was built on the Ethos of Mitra and Zoroastrian. They brought peace to their nations. There was no need for war.

Now, we see the opposite with American policy. You look, news in past 24 hours. Boeing is delivering 1,000 advanced bombs to Israel. If you put these bombs next to each other, explode them, (1:34). half of it will destroy half of Israel. Where are they going to use these 1,000 bombs from Boeing? How many more children of Palestinians, Egyptians, and Israelis and Americans are going to die? When the Israelis drag the Palestinians out of their home (by) their hair, to destroy the buildings, means to build new buildings for the Jewish people, we didn't see it in the public news. I get pictures of it. When Israeli taken from the same building of... they took by force the same way, is a world crime. Because CNN has decided.

This atrocities has to stop and it comes when there is a just power on this planet. When there is no need to fight, when there is, no one is more powerful than the other. And through our agreement, we will reach this point. They wanted 7 to 10 years, I want it in 1 to 2 years. And technology will prevail, that the "gun policy" becomes obsolete. And this aggression in Gaza has opened a lot of questions. You look at the figures, how many rockets has been hit, blah, blah, and how many people have been killed. We look at the security structure. How could the Palestinians, who have no manufacturing capability, bring thousands of rockets within the border of Israel, (1:36). without the most advanced intelligence organization, which the Israelis and the Americans "rub themselves" to be, have not seen? They don't talk about this, because it's embarrassing. It's absolutely shameful what we see. How did these people manage to bring so much weapons to the borders, that can create this mayhem?

Israeli people have asked the government, they have to ask the question, "Forget about what is happening here. How did all this money we spend, all the money America gives us, all the money we get from Palestinians, from the Saudis, and everybody else, did not give us this (intelligence about this) situation." You got to understand, the day of attack, this was chosen historically. Attack was planned for the 6th of October, the night of the 7th. Go back 50 years, those of you who can go back that far, around October 6th and 7th, what happened in Palestine? Six Day War, the Yom Kippur War. That day, within six days, Israelis took half of Sinai desert, because the American intelligence told them, these Arabs are ready to come in, the Egyptians were coming in, the Syrians were coming in, to literally wipe out the Israel. And, that time the intelligence given to the Israelis, gave them upper hand, American put all the weapons in Israel, and they got half of Sinai deserts, and most of you eating Jaffa oranges, know what happened, how they come. It's changing the desert, putting tarmac on the Sinai desert, (1:38). making the orange trees, which you call the Jaffa orange.

This was done on the same day, more or less. But they don't tell you. The Israelis are so busy and embarrassing what happened to them. But the problem is, why did the Palestinians have to go to this cause? Why did they have to go to this extent? It's wrong. But, have they been left an option to be there? At the moment today, more Israelis have been killed than the Palestinians. With all the almighty ?? wire. With all the mighty power of United State. And how did the Palestinian hit 10,000 rockets on the borders of Israel? And how and where did they move it to? You don't want to hear, Israelis don't want to talk about it. This is, if it was in any other place in the world, Israeli president should be sacked, immediately. He has let the nation down for security. With all the power they have, all the satellites, all the remote cameras on Gaza Strip, all everything else, where did these come? (1:40).

Have the Palestinian use a new technology for not to be seen by satellites? Have a new strike of what has come into operation, that the Arabs who were reporting back to Israelis everything, kept their mouths shut. There's a lot of things has to be answered. But the biggest question is, where did Israeli security fail? To see 10,000 rockets moved across? Most probably, some of it come from Ukrainian war. The Ukrainian officers, half of the weapon are given to them to defend their nation and selling it to the others.

The most strangest thing is, was a question I put to one of the people in defense technology in past few days, is, why don't they, Israelis show the rockets and the label written on them. Majority are made in United State. Most probably. And a lot of missiles which were supposed to go to Ukraine, how could they end up in Palestine? It's no use blaming the Iranians that are supplying. It's... look at Ukraine, where have missiles disappeared to? Finger pointing doesn't work. We are not here to defend Palestinians or Israelis. I looked at,

as I've done for years, right across. Who's wrong, who's right, what cause they fight? Is their problem. (1:42).

We have to provide a technology which does not allow these things to happen. We have to create a condition that allows nations to live, societies to live, religions to live, races to live amongst each other, in peace. This is the reason for London Conference. It's no use trying to divert attention in Palestinians hitting rocket onto Israel, or how many Israelis hit at the Palestine. We have to find a solution, that this condition does not exist. It's no use transmuting Palestinians to another star, give them a star, give them a planet. Shall we do that with Israelis too? Or, can we change this hatred to a friendship, to collaboration, to operation together?

And the main cause of this is United State at the moment. Why does a company like Boeing holds 1,000, what you call it, missiles are ready to be delivered? For how many more years, Israel is going to pay for these rockets? How much more criminal systems has come to be built, that creates funds for, that it pays for these things? (1:44). A 3 billion contract with Germany for new missiles (from) Israel, if they have such a contract, if they have such a technology, what do they need weapons from Boeing? Germany has just signed itself to this, one of the largest defense weapon contracts, sold by the Israelis (to the Germans). So, Israelis could not defend Saudis and the bases of Americans in Iraq. Now they are selling the same thing to the Germans? Which ministries in Germany has been receiving whatever lubrications (bribes) we've seen with them in the EU, to get such a thing, puts Germany under such a burden.

This is what we have to understand. With creating condition that they live together. The hatred has come out of years of repression. The situation is that, there are now, out of 9 million citizens of the Israel, nearly 5 million Palestinians. Jewish citizens, in numbers are lower than the Palestinians. And this number is increasing. In next 10 or 15 years, the number of Palestinians born in Israel, will be two-third to one-third. You got to understand, a lot of Jewish girls, a lot of Jewish boys, are marrying outside of their faith. This is one of the biggest strain on the Jewish community around the world. They're marrying Muslims, they're marrying Christians, they're marrying Buddhists, they're marrying everybody else except Jews. So, Jews don't have that number to create more. (1:46). The Jewish women are like a rabbits, they're creating as many children as they can, but the number does not match the Palestinians.

In the next 15, 20 years, gradually the numbers will increase. The majority will not allow the minority to rule. We have the same situation as South Africa. And we will see more of these conflicts coming up, unless the Israelis set the scene, the condition for coexistence, peaceful coexistence between all Palestinians. How come one half million have to be in Gaza Strip, and 4.9 million, 5 million has to be inside Israel? Why can't we open the borders and make one nation out of it? Is your... This is going to happen, it's inevitable, it absolutely cannot be stopped in the next 20 years. Adding another 1.5 million Palestinians from Gaza into, to make one country out of Israel, it will happen. Two state nation does not work, it will not work. Israel at the moment is 60%, 55% Palestinian, 40%, 45% Israelis. And 90%, 80% of these Israelis who are capable to do carry American passport with them. Through single passport, Israelis are very few. But, all the Palestinians carry Israeli passports. (1:48). Cutting education, cutting water, cutting electricity does not help. It makes it more aggravated to go for the next step.

And soon, if it's pushed to tens of thousands killing, then you will see the reaction from the Islamic world on Israel. And that's one thing Israel has to avoid. We saw today, I've just received the message, meeting of the Iran president with the Prince of Saudi Arabia. What forces people to come in to, to talk and to get to this point. The Palestinians should have never happened, position, the situation today has to be resolved that Jews and the Palestinians, as they did for centuries, go back and live together in peace. Israelis should have

learned from the Holocaust, not to create another Holocaust for the others, what happened to them. If it wasn't good for them, how come it's good for 1.5 million people in Gaza?

When you go to Washington, when you go to the Jewish Museum, Holocaust Museum, and you walk through the tunnels, the smells of the shoes, they have created the same Holocaust for the Palestinians in Gaza, and on the other side, West Bank. They don't tell you. They should have learned, to accommodate the way it was, the whole of the society in Middle East, they would have loved and looked after it. They chose this path, and with it, they'll bring their own demise. You just wait. Numbers increase to the numbers that are increasing. You will find out, 10 million to 4 million, (1:50). 12 million to 5 million, and in 25 years, the new Palestinians who are born and their father has been killed, 10 of them in one house. One enemy has become 5. And this has to stop.

And the work we are doing with the Chinese government, and the work we are doing with other nations, will guarantee that the superiority in "gun policy" comes to an end. And that's the only way it will be done. When you have nothing to fight with, you'll talk. And that position, and in the recent policies of the Chinese government, you see that. Coexistence, dialogue and ?? work. We cannot fight this. This Palestinian situation, I've been involved in since 1980s. And we try to support in every way. We try to support the nationals. We don't get involved with the governments. This is not the work of the Keshe Foundation or my companies in the past. You dare to make life easier.

I remember in nineteen eighties, we had the Winter Olympic in Canada, earlier on. There were millions, thousands and hundreds of thousands pens, hats, And all sorts of things, stationery, which was specially ordered by Canada, for the Winter Olympic, was surplus. In one of my companies, we bought this surplus from Canada. I still remember some of the pens, because they were a little bit old, some of them would not even write. And I shipped this to go to, (1:52). through Israel, to the Palestinian schools. And we shipped the surplus Canadian Olympic stationery, as a gift to the Palestinian children who had no pen and pencil to study. My work for peace has not started with Keshe Foundation. For years I put supply of ?? , we used to manufacture during the summer time in Manchester, buy across the world and the Israelis always wanted a Hebrew label on it, and ship it to Palestine as cheap as possible, to clothes the Palestinians in Gaza Strip and West Bank, when the winters are cold and they had nothing. Every year, up to quarter of a million plus was shipped, from our offices in Manchester. Many times I told to my Jewish relatives, "It's no use carrying on with what's going on, we have to find a solution that we live in peaceful and common ?? way."

And this war will be the last one, this shows a big gap in intelligence gathering, security. And the biggest question is, why don't the Americans open up the rockets and tell us where they're made? (1:54). They all carry American digits, American labels, registered numbers. You got to remember, all the American equipments have 13 or 16 digit code on them. And you can pop (it) out. Were these missiles destined for Russia? And the Ukrainian leadership has got paid for it and transferred it to unknown destination, because no one knows if they are fired, or not fired.

There are a lot of questions to ask from the Americans, especially from the White House, and especially from Israelis. You claim rockets, show what the shop knows. And I'm sure out of 3,000 or 4,000, And a few still haven't exploded, or pieces of their numbers are there. Before accusing Iran of supplying, let independent international investigators, or people, to go to Palestine and check the numbers in Israel. And see if these numbers matches with American export of rockets and the rest of Europeans, before accusing Iran. And then you ask the Ukrainian leadership why the Russians are so powerful and still creating problems for you, where half of the weapons are sold in other places.

There are a lot of questions to answer. We are observers and we monitor. And as the Iranian leadership said, we have nothing to do with it. (1:56). Look at your own pocket, who you sold your weapon and where it was sold. This is a question international world has to ask Israel. Show us the shrapnel's, show us the end (pieces), show us the registration number of them. And if they match with the production in the American factories, then Americans have to ask Ukrainians. You got to understand, 10,000 rockets cannot be put in a pocket and carried (over the border). They walk on the back of launchers. Where did these launchers come (from)? The rest is tactical, how and the way they've done it.

We see the same operation in Palestine, in capturing Israelis on the back of the bikes. The same as these other Palestinians were in Iran capturing a few months ago, Iranian women and men on the streets, the same technique, the same people. There are mercenaries working within the center, in the Middle East. When I look at the videos, how these, on the back of the bikes, get people do, go back and look at what happened in Iran, less than 8 months ago. There is a lot of things which doesn't pass our eyes. We watch, we monitor. These are not Palestinians. These are mercenaries. Who equipped them that now they move from Iran into Palestine? The same technique, the same tactic. (1:58).

Now you understand when I tell you, Iran revolution, no Iranian has ever killed an Iranian. These are paid to do. Now they're paid to do this job. When you hear the slaughtering, beheading, and the rest of it, you didn't do that in Iran. You saw a five-year-old child being shot blind, blank. No Iranian has ever killed in the Iranian revolution in Iran, except those in fire ?? escort, which again, were paid by those who wanted to confiscate their properties. Then you understand the game being played. And the situation in Palestine has more to answer. And a solution to it is literally disarming the superpowers who claim "gun policy" is the only policy, because it runs their factories.

Any other question?

Q: ... How do you see peace in the world?

R: And you've already been answering that in many ways. And her second part of her question is, you explain the Souls of these people who treat human beings like animals, such as in the case of terrorists?

K- The biggest terrorists are the governments, when they terrorize. And, unfortunately, you do not understand it, and it happens to you. (2:00). And, they terrorize in every shape or form. Because they can, and can get away with it. And depends, you call them a terrorist by blowing (up), you call them terrorists by capturing, and you call them terrorists by threatening. I've been terrorized by Canadian government for 11 days, most of you know. I was told I'd be killed, I'll be put in prison, whatever. In 11 days, day and night, interrogated, put under pressure, in Toronto airport. A nation of terrorists calling the others terrorists. It depends what you call terrorism, government terrorizing their citizens and those who don't belong to a government are ??, but the governments are, all the governments are doing. 11 days I sat in the airport and prisons of Canada, Just going through Canada, going to Mexico, to help the ?? . Terrorism in its worst condition, terrorized by Belgians for years, and in ?? combination with the death of Fabio, blowing a car up, high speed chase, poison, and the rest.

One way or another, governments and those who work against governments are in this act of terrorism. It just depends how they gloss it, or how they cover it. Where the Soul goes, where does the Soul of the Prime Minister of Canada, who gave the order for me to be terrorized? (2:02). What happened to the Soul of the

woman who actually initiated it? Hillary Clinton. She created a brain hemorrhage. She received the brain hemorrhage in her own, to her own end. Again, through a peace work, nothing else. The irony of terrorizing me by the Canadians, with the support of Hillary Clinton. And then us launching the sharing of the key and the 5+1. She landing in Ahwaz airport and crashing on the land of Iran and getting brain damage. I always said that's an irony. The woman who tried to terrorize us, got terrorized herself.

You do not know when they tell you, "Every day you're going to be killed." Every day you open your eyes, they don't let you sleep, they march outside your door, day and night. You don't know they're going to drag you out of the bed. I sat, lying down, lying for 11 days, in Toronto airport, and in nearby prison. Scientists going through. How many other scientists are terrorized this way to get their technology? And your Prime Minister today knows about it. We haven't received any apologies or anything, just because I'm an Iranian.

So, how our terrorist leaders live? Then we can answer. They come in different jackets, from President to Prime Ministers, to head of securities, to the kings, to people with no money, (2:04). who choose the path, all goes the same. I just hope, elevate their Souls. If the Canadians, as I said many times, Intelligence in Russia and trying to get me out of Canada, with the arrangement with the Belgians, they thought they got all the technology and everything, left their documents in my suitcase, which I published. No way they would have believed what happened to me in Canada. And I think an officer deliberately left all the documents behind. Because he didn't agree the way they're terrorizing people. Documents of Canadian government in my suitcase, and all the methods they used for it. When I opened the suitcase in Belgium, when they deported me back, I opened the suitcase. It was a gift. Or they were in such a rush, they thought they put them in their files, but it happened to be in the suitcase. They're all terrorists. Iranian government, American government, every other government, the terrorists, all work through the same ?? engine.

Any other question?

Q: ... Good day Mr. Keshe, we have accumulated some heavy things in our lives through misconduct and have thus distanced ourselves from the Creator. (2:06). How can we free ourselves from these heavy fields and come closer to our Creator? My answer today is to offer support and help to other creatures. When this support is accepted some of the heaviness goes away. Do you have any further advice on how to eliminate these heavy fields?

K- We all make mistakes, without a doubt. I think, I always says a joke, even the Creator made a mistake, he created humanity. But, in a way... The only way, or not the only way, one of the possible ways, is to make available the freedom of the STM, that maybe those who we did injustice to, receive and find peace, or find elevation with themselves. Sometimes you're not even aware of what we've done, or what action we did has caused to the others. It's the way we can do. There is no other way. Elevating the Soul does not ?? come near, I give you, because I did something wrong with my physical life. Making it available, in what I call, loving, that someone who we did injustice to, or whatever we did wrong, maybe they're not alive, elevation goes to the Soul, or whatever, in respect to. That's all we can do. There is no target, there is no address, that we can go and deliver. I took your jacket, this is a jacket to wear, I'm in the dimension of Soul, I need no jacket. But I needed that jacket in the winter. (2:08).

And what do we do for it? And why do we do it? I've asked this question many, many times. Why do we come and get to these positions? And why when we forgive, they think we are weak and they abuse more? So it's the only way is to be there, understanding that you might not even know when that energy, that field, is needed by who you've done wrong, ?? and did you learn anything from it? There's no use being charitable

and giving everything to everyone. That's in the dimension of physicality. As much as you have to do with it. And ?? don't.

As I said in the teaching today, don't look, oh, I give all my Soul. I give what is there to it, in the essence of what is needed. There is no other way. We learn this. We learn this gradually and slowly. And usually the little things which we don't think even matter, is the one which has actually made a change in other people's life.

Any other question?

One of the things is. Don't live with the guilt of. Live the pleasure that you know that you can give of, that might change that position. The way we allow you in the machines to expand your Soul, (2:10). you can do it yourself and let, if you need be, will be taken. It's like when you want to dream about mom today and mom is not there today, because she's not available, but she doesn't need you today, because she's busy somewhere else. It's the same process, literally the same process.

Any other question?

Q: ... I was doing some stretches and I happened to notice that my arms were swinging. That's when I realized I was in the middle of a field interaction. In front of me there were some ping pong balls with Gans and behind three reactors, CO₂ and ZNO, and above the Cup of the Man. My arms started swinging, my breathing went to the diaphragm, and the fields went up to my head, directed to the frontal, with three pulsations, the last of greater magnitude. The fields then went to the center of my head and remained pulsating with a beat. I stayed like this for two minutes and 40 seconds between the interaction. I left sat down in a chair and felt such a sense of well being that I lost track of time. Question, how can we understand this event?

K- I don't know, as I always say, I wasn't there to see what...

R: You weren't inside his head at the time.

K- .. In the London conference with ambassadors, we will show some development in the science of space technology, (2:12). that the participants become part of it, you feel it. Those of you who attend London Conference, your life will be changed forever. You will understand exactly what I'm talking about, when you look at it in a year or two years time, or maybe immediately.

It's creating the condition. Creating the position for the condition. And you create an environment for it. And only you who experience it, understand it. And this is what I said when people start coming to Linz, whatever you say we believe, because we have given you that freedom to get, to test that. We have allowed it to expand. And all we've done is what you've done (the questioner with his Gans and reactors). We create a field environment. And what fields you created, what condition you created, what mental condition you were there, that you created certain fields. And you won't be able most probably to repeat it again. Maybe you can if you did it on ?? times. Depends on the lunch you had, or the field, or what you had for breakfast. How much you suffered from your wife just before you get the room, or how much your husband tortured you with the love of knowing you so much. Because some people, some women, don't like to be loved so much. They see it as a torture. He's faking it. We don't need to fake it. It's just the way it is. We talk about what we love.

Then you can't repeat that condition. But if it's done in the right way, right condition, (2:14). and you can repeat that condition, you can reach this point again and again. This is the condition of environment. And you're the only one that carries that blood flow, that field strength, in that time, in that position. Nobody else can. And nobody can repeat it, because it's you who created that. And with it, you created that emotion, which you explained what happened to you. I wasn't there, but we believe it happened, because with the condition you created, you tell me there's MaGravs here, Gans is there. But field flow, were you the giver to the systems, or did you take that, you elevate, or create a condition for expansion of your Soul, that you could do things? Nothing is impossible, if you understand how you set it up.

I always said, I used to joke, setting up a right emotion needs right tools and right set up mind, right thinking. And everything has to go perfect. I used to tease, you know, you, you make a condition of ... trying to show to your partner how much you love her and everything else. You put rose pebbles on the bed and you buy most beautiful flowers and a perfume as a gift and everything else. And there she comes, you had a discussion or argument with somebody in the office, there it goes, the pebbles, you put, throw them in the bin. It didn't work, the condition, you set everything right, the way you thought, but you don't know what's coming with the other part of it. And then you say, "Oh, I'm not doing it again with this." But you don't know, what about the next time you set it up again? (2:16). And maybe this time she had a good time in the office, had a promotion and it comes, everything matches to each other. And our job is to create that bed of pebbles and gifts. And let the Souls decide what they take from it, what pleasures they bring on the table of life. Or elevation of the Soul.

Anybody, any other question?

Q: ... Can the Knee Gans create the condition of regeneration of the anterior cruciate ligament of the knee, which has been totally ruptured?

K- You have to ask that from our doctors. The Knee Gans is produced for test demonstration. And, send your question to the doctors and get the answer through them.

Any other question?

Q: ... I have participated in the half hour session, the STM meets the Soul of the body. Next Sunday there will be the evaluation of this. Will this session be offered again? I would like to make it possible for my daughter. Thank you very much.

K- No, this session is so time consuming, and so much effort has gone to it. (2:18). We had to literally, because of the system running, we had to send our staff home, the whole laboratory, that their Soul, their emotion doesn't interact with the system, or create different condition. Some of you say we charge a lot for it. We literally had to close a section of the Keshe Foundation, where the systems are, send people home, just for you to be able to do this. And again, in explaining the graphs on the Sunday for those participated, and so again, there's a session the following week with it, it's more than what we can do. It was to learn, to see, you come as groups when you join the sessions. But individually, it's huge amount of effort for the back of the Keshe Foundation. And everything had to stop, during those sessions we had. And it was good for some of our staff, they had a day off. But the process is very time consuming, but we had to see the actual process. You see your figures, or your graph of your Soul, but we understand a lot more, we see how, what we have to set our systems up. How we saw it, what misunderstood by us and what needs to be done. And those trials

brought a lot of information for us, for you is a graph of your Soul. But for us it's a huge amount, it brought us new development, we added new things to our systems to... was the follow up last weekend, tomorrow's session. How we can, how you can, and then how we prepare the condition for what I call, transmutation.

Tomorrow's session is totally different than last week, (2:20). because last week we learned, we saw, and how you collectively switch on, switch off, how you collectively decide to receive fields, and we move our systems in different ways. As I said, if you're a participant and you look, there are two systems always on, most of the time. Because there we interact with field energies, we know how to do. If you've been part of this group, just look at the participants, because every, what you call it, available to everyone.

In some cases, some of the microphones of Keshe Foundation systems are on. We decide how, and then we switch one off, when we see how you interact through our systems in the background, what we've done, who's... how much you've taken, how much collectively you are. If we can... We've seen, for example, last week, there's a one section, that we know in that section, we can... we could have transmuted all of you to one point. There is a point of common denominator interaction of all your Souls together. And I think some of you, most of you, have felt that one. This is important for transmutation of the future time. Because of, we added a system last week, which we didn't have the week before, we never had it, because of the test we did with your Soul, we added another one, and now this brings us to a more completion.

The, the situation in the end of the month, that's another one, another cycle of adding up to the system. Literally perfecting it for the transmutation. You have to understand Keshe Foundation has two systems of flight. One is the one we develop for the space technology as a craft. You travel with a, what you call, MaGrav systems, with the shielding and everything else. (2:22). Then, it's a second mode of transportation, which is transmutation. One we move your physicality, one we move the energy fields. In the physicality, we create the physical, you're used to aircrafts, we create, we give it the shielding, we allow a higher speed, faster communication, faster motion.

In the energy, we create an envelope of that aircraft, which is your own Soul. Then, on the path of the universal ?? fields can travel anywhere. Is not one method, is two methods of transport. One is physical, which we've shown with the Iranian development in Sharif Tehran University and the evolution in that side of the science. And one, which is the expansion of using the fields. Matter state, versus the energy state of the Creation.

And this is how we, if you look at it, in the matter state, we told you how to do it. You get them Copper, Nano coated, make a Gans of it, and you have the energy of it in different form. In the energy level, we use that energy from that level, for making condition of envelope, and the strength of field of your Amino Acid (AA), for you to expand and to travel. One we engage you, one you engage yourself in. And so, there are two methods of space travel. Not one, and we've done enough with the physical condition.

I'm sure you will see a lot of the... because man likes to be in aircraft. You see this, especially with our cooperation now, coming up in the next few years with the two nations of Iran and China. (2:24). And we still develop the transmutation side with the Chinese operation. This is instant, which is part of it will be.

And we will see in the very near future, the evolution in healthcare in China. You will see it, it's a constant operation. Where Keshe Foundation technology will come directly into operation. Large number of people testing, feeding, and the rest of it. And then we have the other side, which is our commitment to the Chinese, other side of our work, which stays, till they decide to go public with it. But I think in the next 12 months,

you will see effectively, in the wellness side of the Keshe Foundation, tested in large number, hundreds and thousands of the Chinese, and people in China, and around the World. Because, it makes sense, it works, and it does what it says.

As I said to our partners in past, recent time, is you still want to go through the medicine, do this, train nurses, doctors, blah, blah, blah, blah, build hospitals, or do you want to give them a headphone, put them on the machine and see what it does? You got the leap, or others will take the leap and you become subordinate. And the other option is ?? understood man. You will see Chinese healthcare will jump 100 years compared to the rest of the world in the next 12 months, 24 months.

Do we need, does a man living in remote part of China, as a peasant with two three hundred dollars a year income, has to suffer, (2:26). not receive the same as the richest man in China, in Beijing with millions, both having the same cancer, both having the same Alzheimer's, both having the same difficulties. With this is equality, the man in the remotest village will receive the best the man receives in the city center. This is how a technology should be at the reach of both. Then we'll come gradually into operation of feeding, the other things which the technology gives.

Q: ... Will the plasma car be available to purchase in the next few years? And if so, would it be manufactured by collaborating with existing companies in the car industry?

K- We have, not we have, Mr. Musk of Tesla is invited to London conference. He'll be invited to London conference. We especially, specifically have targeted him through our promoters. And they have their own ways of accessing him, because they're American structure. Chinese car manufacturers are aware of this technology. We've been offered percentage of the car production, but we don't want to go to electric car. We want to prepare companies like Tesla and the Chinese operations, to go into what we call, flight system. Not levitation.

Last night in the meeting with some of the high ranking people, we were talking about this, that we... He said, "We have levitation, you have the mechanical." I said, "This American Marine done in 1975." Now you have to do it with the plasma. Now you don't use any energy. And it's inevitable. (2:28). In next two years, Keshe Foundation will start selling. We have to complete cycle of our work in China. And I'll be spending more and more (time) in China, as the development takes place.

And our target is parallel development. Space technology, defense technology, and public use of the technology, where we can reach, we can actually make difference. But you have to understand, this nation is the most conservative nation in the world. Everything has to be step by step, step by step, and we're taking... we understand their work now, so we take our time. But 2024... 25, 26 to see the first systems, who use MaGrav technology, in China, is not far-reach. We're trying to show it very soon, but in mass production it'll come. Electric cars are obsolete.

You... November is coming up, November 2011, we were prepared to show it in Eindhoven. 12 years later, we'll be most probably showing it to you in Beijing conference. Because once it's shown, the technology is shown, replicating it in such a simple way is a mass production. Levitation by magnets was shown, you go into the Internet you find in 1971, American Marines showed how they can, but creating positions, and other science have shown it. But through plasma technology, which doesn't need any energy, is a different way, and you will see this. It'll be very simple. (2:30). It's the simplicity of it is amazing, because we should have allowed to show this in 2023. In 20, what you call it, 11, in Eindhoven.

The way it works is very simple. (I'm just waiting for the whiteboard to come up for you to understand. Well, I wish someone would have changed this rubbish). You have a vehicle and you have the road. Present technology today puts a vehicle on a, what you call, a very good, nineteen fifties cars. Now it's more sophisticated, but it's the same principle. It puts the car on shock absorbers. And if you look at the top view of this car, you have what I call, the cage, human cage inside. You have 4 shock absorbers in the system. We place the shock absorbers, the same structure of absorbers, with the MaGrav system. Which means we can lift the car in 4 corners. There is a central control in here, which decides what fields ratio will change, that you turn left or right. The work we did with the scientists at Ghent University years ago, and the work they've done in that way, shows 200 kilogram, (2:32). 5 centimeter maximum, is safe and acceptable by elderly, and by people who have the fear of whatever. Because you have to carry, you can't have a levitation cars and then ordinary cars in the same manner. You have to change gradually, but it has to be done.

So you literally place a 4 MaGrav systems on either side. The speed of the running it is very simple. These MaGrav system create enough energy. Don't forget, when you are 5 centimeters or even 1 centimeter off the ground, you are a feather. Literally, two hair dryers can dictate your speed, if you look at it that way. But it's more complicated. The same way as we see in, what you call it, ships. We have (rudders down below), when switch them below, which way and to what speed you can go. Left or right, where you want to go, to do it the way, or the speed. The reverse is the same. This is the simplest way to get these things on the road immediately. More complicated, more advanced system will come in the future, which these ?? vents are not needed. And then, because you create a magnetic field, and this magnetic field on its own has created its own Star Formation (SF), if you see it. This has a central effect, which has a emotion, which will have emotion. You will understand it in time to come. So if you have a child crossing, as a Soul, we'll avoid it. In a bigger way, mechanical way, if you have another car with the same shock absorber next to you, they avoid each other. The process of accident becomes very rare. (2:34).

And this is how the process will carry on. And this, making these reactors cost less than 10 dollars. And once you fuel them to run, they will run for decades. So it's not far fetched. It's literally on our tail. It's just that, then what do the governments have to decide how these are implemented? How they will, they bring these things into operation. It will change a lot, it will bring a new dimensions. The cost of manufacturing of cars will drop by maybe as much as 80%, because it's just what you furniture inside. You can get a wooden cardboard and put it on it and you still go the same. And the pollution will come to more or less to zero. The accident rates will reduce drastically.

And it's a transition of accepting and what to do. The, on the back of this will come the shipping, which in a way, if you look at it, you still want to ship a car container from China to, let's say, US. You don't need to have the ship actually sitting on the water. (2:36). You can create a levitation that is still using a free ?? path for it, and goes. Once you create that lift, doesn't matter if you're one kilo or one ton. It doesn't make any difference. It will not make any difference.

A lot of things will change with this development, this technology. We have the system. It's just that step in time, 2024, 25, 26, we see time for this to come. And then there is huge, huge investments, billions of dollars which now has gone into producing batteries for electric cars. These electric cars need continuous charging, wasted batteries, replacing batteries, and all this goes through the window. And we actually working on to show this in one of the conferences. Weight reduction system, what was supposed to be shown in Eindhoven. And then, we understand what this will implement, kind of implication of it and application of it.

Any other question?

R: You had mentioned Tesla cars and Elon Musk and one of his latest designs in his cars, he's going to incorporate thrusters, rocket thrusters into the car. So perhaps, like according to your diagram, with the ability to steer using thrusters, but levitate with the MaGravs, it could be a perfect combination. (2:38).

K- This is on the patents, and if you go on the pictures of the Keshe Foundation years ago, this is not something new. As I say, Musk and his team literally listen to every word of the teachings on Keshe Foundation. They haven't... they don't miss anything, because we see them in the research and what they do and how the things done. Because, it gives them an insight, a way to do things. And they study every single paper, page ever released by Keshe Foundation. The Musk group are literally sitting on top of the... We are not the only one, they sit on every technological group to see what they can get, what they can bring in. And you saw them launching that small MaGrav energy saving unit. and it didn't go anywhere. When you steal, it does not go far, it shows a few pieces. And this is the habit which he's taken. But he's invited openly to be there, or he'll be invited openly to be there. And we'll see how things take shape.

As I said in the conference in London, we don't exclude anyone, even for the first time. Since my departure from Belgium, we allow the Belgium ambassador, he'll be invited to the meeting. The knowledge has to be, we cannot create another Palestine out of Belgium.

Any other question?

R: Okay, thank you. We have a... (2:40). Oh, your hand is up as a panelist here, Mr. Keshe, I was going to say we have two hands up.

K- Oh!

R: Oh, it's yours.

K- I want to ask a question.

R: Does that mean you need a bathroom break or something?

K- No, how does it come out?

R: I'm not sure, it's a independent hand raising, I'm sure.

K- I know where it is. It's not there. How did it come out? It's good, I have a question to ask myself, maybe my Soul has a question.

Q: ... In terms of the relationship between the physicality and physical Soul and the Soul. In a human being that decapitates someone's head, what is going on in that situation? What's the emotion afterwards for that person and what cause, I mean, what kind of imbalance is there that creates that? And how does it come to that point? Because, for me it's just something I cannot even imagine someone can do.

K- It's not can't imagine, it happens in accidents. (2:42). Or it happens in a way. Or we used to have the execution... my tongue doesn't turn around it. The executioners, they used to behead people. And so it... What happened to the Soul at that point, ... the Soul ..

Q: You mean the person, the person who kills? The person who kills and not, I mean the person who...

K- No, the body which is, the, the, the person who's been, or lose the section of the body with it. And the person...

Q: My question is about the person who does it. What is the, what happens with them?

K- Oh, they have their own demons to live with. They have their own demons and their own Soul to live with. We've seen this. We cover it up today, as war veterans of United State. And they come back with all sorts of nightmares and everything else. Sit down next to every single American soldier, who served, or a British soldier, a European soldier, who served in... American made wars in Iraq and Syria and whatever, and you listen to them. Why they are sick, and the way they are sick and ask them one single question. Who did you harm? Who's your demon? What child did you shoot? What man did you shoot? You're responsible for that Soul. (2:44). And because you don't have the strength in your Soul, you pay it as a physical illness, psychological, other bits and the other bits.

Soldiers who go to frontier and come back, which do not take part in what I call, unjust work, usually come back healthy. They usually come back to just being to. They serve the, what you call it, and the others... you ask them the question, and then you find out why, and what happened to them. It's the same with people who go...

You see people in the front, but you don't see them in the background of their lives, what they live with, even if they are proud of what they've done. But you see what is done, and then you look at the structure of their family, look at the structure of how the loved ones have paid through the Souls and physicality for it. It's not for us to look at it.

There's a very long history of this. If you go into the history of Iran, and they follow the people who actually did the shooting and killing, what happened to them. Actually when follow these people, who have done as executioners, as a firing squad, number of people were put in to execute one person, and those who walked away had no problem. Those who stayed for a second time round, and actually carried out the execution, they followed their lives, people followed what happened to them. (2:46). They lived some of the most horrible lives, horrible deaths, in their life. ... And ... you don't look at these people, in what they do. The guy says, "My job to behead people." And listen to some of them, some of these people have actually ?? reason their life story. You can find it here and there. And some of them tell their own story, how they lived and what happened to them. Doesn't matter how much they pay you, you don't take a life. Life, Soul, cannot be bought with the money of the man on this planet.

There is a system set up to look after people like this, Souls like this.

Any other question?

K- How are you by the way? You're okay?

Q: I'm okay Mr. Keshe, thank you, thank you.

K- You don't sound very good. Yes, okay. Thank you very much. I wish all the best with what you've gone through in past few days.

Any other question?

Q: ... Is wrote a question inspired by your thoughts. (2:48). A federation of regions could be an example of conflict-free conflict resolution in the Middle East. What's your opinion? Thank you very much.

K- Can you repeat?

Q: Yes, a federation of regions, not of state, could be an example of the conflict free, conflict resolution, in the Middle East zone, area.

K- What does that mean? I don't understand it.

Q: Yes, like a federation entity of region, but not of a national state. You know, to be open.

K- Yeah, yes .. I understand. .. We have had a lot of contacts with these people , and Keshe Foundation has a very direct standing about this. These people usually become fringe, or other pressure groups, or radical groups. And the way Keshe Foundation stands this, is we only deal with national governments, from our point of view. And ... this is ... we've had this, I even had one of these groups coming to me to see in Ninove (Italy). They came in with all the uniforms and everything else, into the meeting and we are the generals of this, what you call, groups. And then they left the room and I accidentally went out to go out of the room. (2:50). I saw them, they are changing their clothes in the auditorium of the Ninove. I said, "What's going on here? This is not a changing room." "We cannot go out with these clothes, it's dangerous for us." When wearing uniform, what you represent, what you believe in, is danger. It shows a lot of things which we never want to get involved.

So, I set up a structure, we accept, at this moment of time. What you call it, at this moment of time, the structure of United Nation accepting nations and territories. I'm sure in the future, the name of these territories and nations, will be just a reference point, not the border point. And this will come very, very fast. Once the new transportation, transmutation systems come into operation, nationals, governments and all that, will come to its own natural end. We are from Earth, but I come from a region called Iran. You come from a place called Romania, and the other one comes from that region. But it has no superiority or priority over the others. And this is the, that's the inevitable. So we don't get involved in these things at all. Because then we become supporter of minorities. We are with terrorist groups and the rest of them. We don't need this.

Working with the frame of the acceptable structure of nations and territories at the moment is what is the norm ... (2:52). what our work is that in the coming time with the technology these things become irrelevant. Technological ?? then becomes normal right across the planet that everybody can get fed through the same thing. And everything else, there is no need for borders because everybody gets what they need. And this is not very far, maybe next 5 or 10 years.

I was talking this with some of the people who are involved in this, is that then we have to centralize the systems in certain nations, that they have control over their nationals. And this is the next step of discussion with governments. We set up systems internationally that no nation has control over it, that they can, all the people around the world can be fed by it, can look after their health and the rest of it. Or we become again, one system for each nation and that's not doable anymore. This is one of the dilemmas I was in discussion in past few days about this. The concerned nations want the controlling systems, the servers in their territory that they can control. But this system works for everyone around the world. There's no control. But they have to learn. ...

Any other question?

Q: ... (2:54). Mr. Keshe, thank you for sharing the emotion of knowledge about the strength of the Soul of water, it really enlightened us. About the body of man and the understanding about the nourishment of the Soul on this planet, thinking about the Hydrogen fields in water, we would have this source which, or that forms our physicality and STP, thinking about the Soul of Hydrogen Gas and the body of man as a fractal of a galaxy, would the nose work as a black hole, where it captures the energy fields of gases and expels recycled force fields, now with the emotion of man, who is the feeder of the environment?

K- The nose you mean?

R: He's talking about the nose as a Black hole, And...

K- I don't know, ?? behind it. This is just the extraction point and ventilation point.

R: Well he's talking about the Soul of Hydrogen gas in the body of man. So, would that Soul of Hydrogen gas be, use the nose as a, sort of a Black Hole entrance into the Soul?

K- Not really. Not really. I don't think so anyway.

Shall we call it a day?

Thank you very much for today. (2:56). And hopefully we learned a little bit more, about a little bit more of what we don't understand, most of it. And we'll see you next week. And maybe from this ?? ... onwards we start bringing in larger audience of humanity to understand the changes which are coming through the conference in London.

As I said, if you have any heads of states, you have direct emails, not the offices, that it goes to their offices. Give it to our team to interact and create a condition. Thank you very much and see you next week.

...

Q: ... Mr. Keshe I have a wondering question. From all this knowledge, what you give even to the government, Iran, or the Russians, or the Chinese, did any one of them went further to do the Oasis system, nearly the Oasis system, that maybe they can help this situation in what happened in Palestine? And we see, you know, if you remember the Tom Salas video, in that time you referred to what happened there, it even can protect the whole island. (2:58). And the same thing, it can protect the whole area from anything penetrating it.

K- In a way, yes, in a way, it's so powerful that it has puzzled the government. It's a progressive work. We in a series of tests in very recent past, we have created conditions that has baffled the governments. Even though they were monitoring, they are part of the test. It's a test they asked for, we just created an environment for it. And when it came to the point of try to accept, to understand the condition created, it was too much for them, because, this way they would lose a lot, but they gain a lot, but they want something they couldn't have.

This test was done, initially, years ago. And we created several times the same condition, the same ,what you call, position. And then again, did the same test twice, in recent time, in two different locations with the same outcome. The governments can see the Oasis system working, (3:00). energy, food and everything else with it. But it's in such a large scale that at the moment they cannot, they say, understand how. We created a condition, we created a huge amount of damage, most of you, some of you know, when we did this test years

ago. And we repeated the test again twice with the same outcome. And one of them even much more powerful. It's recorded by governments, by national structural organizations.

The Oasis system is not something hard to create now with the new technology, new phase. But in creating it, that it changes the situation in where you're talking about. We have to sort the cause of this problem. I know exactly what you're talk about.

I said once before, maybe you understand, answering to a question. You must be of the lowest order in the size, in life, and the strength of the Soul. And understanding. If you cut a man from his water, and today's what we call, amenities. You don't do that to a dog, let alone to 1.5 million. (3:02). And my worry is, how now this people can live with their own conduct. They must be lower than the dog. They are not human, they are evil. And we have the will to, they shall be punished, as you call it. But if we do that, it will be the same as before. Only comes through elevation of the Soul. Only comes by understanding their own shortcomings.

A man is not powerful when he's at the point of power, to do what he likes. A man is powerful when he's at lowest, be kind and generous, to be able to give with what he doesn't have to ?? give. And the situations you're talking about, is not even in the realms of Creation. I once said, I will ?? , the position of the Soul of the Pope, who knew about the child abuse and he covered it up for some 16 years or so, as he was one of them himself most probably, to be lower than (Princess) Diana at that time, when she died. (3:04). But these people have no place for their Soul. And if they think they're going to walk away without it, with it, they have a long, long, long, long, long way to come.

So, the answer is not Oasis, the answer is, is creating condition. That Oasis is for all of us, by elevating the Souls, that they do not create this condition. There is no difference between the Auschwitz camp and the today West Bank. Only difference is the one who were inside, now they're outside. And they are more hideous than the ones who kept them inside in the past. Thank you very much for today. Hopefully we see you next week. Thank you very much.

...

(:11).

K- Good day to you, as usual whenever and wherever you listen to this is a knowledge seekers from Keshe Foundation Spaceship Institute. We welcome you back and as usual we hope to endeavor to do some more what I call "naughty things" to find out what was hidden from us, we can learn from Him and the way He does things he of course being the Creator. It's not a "hide and seek," but it's understanding. The more we understand, the more we unravel His "tricks." (:12).

Today's teaching is as usual and we just try to add to some knowledge prior to starting this couple of announcements which have been, I would like to bring forward. First of all is the meeting in London please as of this week we hand over everything to the promoters and if there's anybody left wanting to join us please let us know. Otherwise you go through the system.

On the other hand we had a meeting with the Iranian Keshe Foundation team live program last night, addressing the Iranian leadership and the Iranian position in respect to Palestine. We have requested I'm sure the English translation of it will come out soon. We have requested the Iranian leadership, means Ayatollah Khamenei. of Iran, Iranian president, their representative knowing heads of Sepah, the president knowing, they were present in the meeting. We informed them 24 hours before, and the recording has already been passed on, ?? first message in recording was passed on to his eminence Ayatollah Khamenei. of Iran, in yesterday's meeting with the Keshe Foundation Iran has been done the same. We have requested from Iranian leadership and you will see the extract of it. We are aware of information that Iran could be pulled into a massive war, becomes the end of the nation. And we have requested from Ayatollah Khamenei. of Iran to issue orders to use the Iranian military forces to become the savior of the Palestinians and open a corridor between Palestine and Iran, and transfer the refugees into Iran. (:14). And provide facilities for existence till the situation with Palestine is sorted.

The reason for this we talked about last week in the teaching, and we have to understand Iran was pulled into a trap by the Americans and Israelis. But they sold the arms to them to bring it to Palestine, they use, and then Iran get accused of it, and they have all the armaments ready to annihilate Iran. This was part of a trick to get into central bank of Iran and the ?? orders of ?? Hamas.

For this reason we have requested the Iranian government to use the white flag part of Iran, which is the peace. And is the way was used by Kourosch and Darius, and by the other Iranian leaders over the past centuries to give refuge to the Jews, to the Armenians when they brought him into ?? ?? what he called a side of Esrtafan, and then part of Iran was given to the Armenians, or Christians, and that's how ??

Afghanistan ?? was created. These are the people who gave refuge centuries ago to escape from the harms in Middle East. The same as today. And we even gave part of our nation to them, to create their own nation.

I have requested from the Iranian leadership with the reasons, which they are fully aware and they confirmed our information intelligence is correct, to open the corridor between Palestine and Iran, and give access to the refugees. These people who have been told to go to the south of the country, and then they bomb the South. They tell them to go to the hospitals, and they bomb the hospital, 600 - 800 people were killed in one bomb yesterday. And this is a trap. It's the way the Netanyahu government works, deceiving, cheating, and the rest of it. The way they did using the Keshe Foundation, (:16). the space nuclear reactor as a bomb from Iran and causing all the mayhem, until we opened his hand.

For this reason I have asked as always, advised the Iranian government over decades, and sit in the back watching what we call, the back of Iran that we don't get harmed. I have advised the Iranian government for Iran not be trapped with what they did or what I explained last week, to open a corridor for Palestinians to be moved into Iran. We give them sanctuary. We've done this for centuries, and we end this madness, which has been created by Israel. And hopefully we'll see what the decision will come.

We hear today in the speech of Iranian president that it says, we will be present in Palestine. We have to see what is the new decision. Iran will become the rescuer of the Palestinians, and the rest as we've done for centuries, and even with all the burdens of sanctions we accept the responsibility. We have to see what is the decision of the Iranian leadership. I asked him to turn the guns around, and put the white flags on the tanks and the personal carriers, which ?? were there to bring the Palestinians out. And make arrangements with the other countries to facilitate to transfer these people for the next few month.

Then we end up with this may have a greed for land by the Israelis. But I have to inform you, that with the technologies in the hand of the Keshe Foundation we don't talk just to talk. We are aware of the technology (T) should be delivered to the Chinese government and the Iranian government to make facility in a peaceful way, that the land of Palestine will return to the Palestinians in a very peaceful way. But the Israelis the way they came, they will leave, and the coexistence between two will be there. Where the land will be shared. Not by gun policy, but by sharing technology, knowledge, (:18). and making it available that this position, which has been taken to use Israel as a next point for wars, for a continuous wars to come for centuries, come to an end.

I have asked his Eminency Ayatollah Khamenei of Iran to consider the case thoroughly and understand the situation sensitivity in rescuing one and a half million Palestinians, the way it was planned, to wait to support other groups, radical groups. By opening the doors we save 80 million Iranians, which are targeted by the bombs and missiles of the Americans long distance. The way they did in Syria, in Libya, and we saw it in Yugoslavia when it started the first time. I hope when the Iranian leadership and Sepah understand the sensitivity of the situation and act accordingly. We'll be present to help the Palestinians to move out of the prison created by the West, by the gun policy of the United States, and what we call, madness of the Jewish leaders, not in any other shape or form by the nation of Israel.

To this effect I put my request out to both side, the Iranians and Iranian leadership to facilitate if there is going to be a nation of Iran left, as the plan by Netanyahu and the American leadership was annihilated Tehran. And this way, annex the south of Iran was as part of the British petroleum ambition to control the whole operation in Persian Gulf with oil. I hope we see an outcome in a different way, and the first signs of what we see, hopefully if the information coming from Iranian president is in the right direction and not the

other way, we see will be present in Palestine to remove, to help the Palestinians to get out of this open prison. (:20). Give the land as much as they like to the Israelis. The numbers is dwindling. And as I said, we have taken the "love of God" from the tribe of Israel. And when the God does that, they can fight as much as they like, there'll be no sign in time to come.

Going back to the other parts, the same way the London conference is set for the 11th of November. The venue is chosen, we have signed agreement contracts and our promoters will announce it around the world. It is their job, invitation of the ambassadors and the government. And at the same time we look forward to see many of you there. It'll be a historical time as the Keshe Foundation through technology will show the change. Through technology we show what is to come ,and through technology we bring the change.

In so many ways Keshe Foundation Knowledge Seekers (KS) for the first time we have allowed this to come in, have made a star, a star of peace and gold color. As the "star patch" in the store of the Keshe Foundation. These are individually handmade and it has a lot of meaning. It is done to celebrate the beginning of the conference and in a coming days we'll release a special envelope for the conference in London, which brings space and technology and peace together.

Going back to the teaching, in the last week teaching and the weeks before we tried to explain the connection, the understanding of the human body to the planet Earth. (:22). How we took shape, how we take shape from the interaction of the fields of our Soul, Soul of the Physicality (STP), and what we call, the Soul and the STP of the place, time and destination. When we fall in love we touch our love, we share our emotions (with) our love. And the way we touch our love, as a lover, he or she changes the way she eats, and the way she walks, the way she thinks, everything to suit the lover to fit in, to accept a lot of things that were unacceptable. But now the interaction creates, to create that condition of acceptance.

In a way the gravitational magnetic (GM) field of the Soul and STP, the physicality (P) and the Soul interaction with the new entity. They change their behavior, they change their clothing they change. You used to be a hippie, you shave, you go into suit, just because she loves, and you try to please. You make yourself ?? fit in. She hates blue, but she wears blue, because you love the color of blue. It's the same when we move our Soul and the STP into an environment, to another planet. Our Soul, our STP interacts with the Soul and the STP of the environment, the star, the planet. The way we change our clothing to fit, we change our body, our presentation, our manifestation in that point and position.

This is how it works, this is how those of you who elevates the understanding, the knowledge of yourself, and your children. (:24). In understanding the science of the Creation will understand there is no fear of traveling, there's no fear of being in space. You don't need to go to university, you don't need to be taught by NASA how to get into a "monkey suit" and get into a swimming pool, and how the monkey will behave when he gets to a place. With the present propulsion system the way we go to the Moon we actually create our own prison due to the lack of understanding the process of the Creation. Jumping like a rabbit carrying a mask ?? to be. Like as we do, we go at the bottom of the sea in these clothing of the divers, because we never understood the process of Creation. Now we do, now we have no fear, now we understand the way we change ourselves for our lover. When we get to a point of destination anywhere in the space we find a lover in the level of the environment and the condition.

This is what our present Soul has done, this is what our present physicality has accepted and manifested itself. As the interaction of the field of the Soul of the Man (STM) and the STP of the man, in respect to his environment, has dictated us to look like humans. Short, tall depends how much energy is in the Soul, how

the STP and the STM interacts. And then to and due to the Inertia which is the manifestation of physicality of the planet, we become short, tall, we become Chinese, we become American, and become Iranian and the rest. So when you're born, and you live, and you've been through the position and the condition of the let's say, Iran, you have a brown eyes, dark eyes, brown hair or whatever. Because there in there what we call, the Inertia of the materials, (:26). magnetic field of the Inertia dictates the interaction with the Soul and creates the condition of the color and the skin.

Now we understand. Our features, our behavior, our way of thinking is connected directly to the Inertia of the environment. And where we land. In the environment of England dictates such as such a color, environment of China dictates such as such a position of the head. That in that position, because of the gravitational M field of the calcium (Ca), we get a smaller head. Brain still has to go to the same position, and slightly we get twitches in the eye, in the position of the eye, and the shape of the eye. They say they're Chinese, because for hundreds of thousands of years they have adapted to the Inertia of the environment.

Now you understand how the Inertia of the environment we land, plus the Inertia of the environment of our Soul, our STP, creates in interaction with each other, creates the shape of manifestation of point, place, time and position. When we tell you that we create the condition of the Mars and Moon and you see how you'll be, what animal you'll come out on the other end of the machine, it's just all it is. We create the condition of the Soul of the Moon, we create the condition of the STP of the Moon, we can create the condition of the Inertia of the Moon. And in that position your Soul, your STP, your physicality, while you are in the machine to adjust to the new changes. The process of millions of years is done within minutes, within seconds. (:28). Condition of survival is the same. If you want always to look as a man, doesn't matter if you go on Mars, on the Moon and on another planet, get into your monkey suit. And even then there is no guarantee, you come out of it as a monkey.

This understanding to this process we endeavor in the London presentation to show you the manifestation of the fish. If our scientists managed to understand the process I have given them. I always said, one drop. Now you understand what that drop is. We have our knowledge, we have our technology so advanced within the Keshe Foundation, that we can take in one drop the Soul, the STP, and the physicality of the fish in one drop and drop it to be manifested in another tank. But we made sure the two tanks are the same, so you should get the same fish. Why I change the dimension (D) of the magnetic field of the tank you will see maybe the fish becomes a frog, or an entity you don't know.

Now you understand the science and not the magician in the science. This is how you understand the process that everyone who can make a fish to appear somewhere else does not become a prophet. Because the next prophet in another other galaxy, another planet can do another magic with a field you don't see, and you'll call him another prophet. (:30). So you'll have billions of religions and you don't know which way you go, because you never understood the reality by the process of the Creation. So everyone becomes a magician and everyone becomes a prophet.

Now you understand it's not only the interaction of the Soul and the STP, which dictates your shape. The Inertia of the place and the Inertia that your field creates in the boundary of itself for manifestation of physicality as a what I call, fundamental playing force in your manifestation. In the future, as we endeavor to bring and develop systems in a very what I call, advanced way, as is now going ahead, you will see in London the transmutation units, the Vertical Transmutation Units will be brought in. We hope we can allow it to work and our scientists manage to get it working. If we create a slightly different environmental condition in the receiving end, you'll go in as an Iranian looking, you come out of as an American looking.

Because by mistake we gave you the American look, or you decide through the magnetic fields, that's what I want, that's what my Soul want to be happy. When I arrive in the States I don't want them to say, oh, he is a foreigner. He's there. I want to look like them, blue eyes, brown or blond hair, tall and handsome.

And when I go to China I do the same. But because you created the emotion of the Soul to the environment you interact with other Souls. (:32). Automatically you reach, you receive the knowledge of the Chinese. When you speak Chinese you understand essence of the language, not the dictionary word of the language. Now you understand not to have fear, but have confidence, that you understand the process. No one can take that knowledge, that emotion from the emotion of physicality and emotion of the man.

In coming time in understanding the totality man will come to use this as a play, as a joy of life. As in a way, we go to carnivals, we go to ?? bar mask, we go to everything else to create a new cover, new clothes. We go to Halloween, we put new clothes on to look to be something else. Now we can do this without buying these clothes. Where through the emotion ourselves internally, even though we carry the same Inertia, we can change. We don't become a chameleon, we come to understand the complete science of the Creation. Control of emotion, what I need to change in the dimension of the fields of my Soul. What I need to change from the dimension of my STP and what Inertia this will create.

Man will find in a coming time in the process of learning is that all you need to do is, to keep the strength of the Soul the same and play through the emotion of the STP. The conversion, the understanding of the manifestation of the time, place and position. (:34). As I always said, the Soul of the Creator is within all of us even a stone. But the STP in interaction with that Soul, creates the image of the being. And when we produce the same strength, in the same Inertia environment, we'll get the same result. As the STP is not perfectly the same all the time, and the Inertia of the position ?? the sand, the layers below, and the layers below, and the interaction of the magma of the earth with the upper layers, creates different what I call, manifestation, we turn slightly different colors to fit the fields coming in.

If you are blonde, blue, American come and live in Iran for a few centuries. You'll become one of us. Nobody will know you had American ancestors. Now that we can live long time even if we go to other nations to live there, we'll see our field strength in interaction of the field of the environment. The food we eat, the magnetic fields we add to us through the consumption interaction of the fields of the environment will change.

We see this physically, we see this perfectly. And in our tests and in our process when we see this, we've seen this so beautifully. In our tests with the Chinese military in the past few weeks this was absolutely clearly on the card. Where we produced in the magnetic field environment we could see what's in that field, what's in that area, what materials manifest themselves, and in what shape and what quantities. (:36). Then the what I call, as I explained in the teaching of yesterday, in the Iranian teaching, we have nowadays the tools of drilling holes, hundreds of holes we drill to see what how deep is, what and where. Now with the new technology we don't need to, we just put the machine on the surface and we wait. What we collect is manifestation of Inertia of magnetic pool of the environment and tells us what's in this area. All these geological drilling has gone to zero. And our data is so precise, because they have the data for the environment and it matches. Even it's better than them, more accurate. Because the Inertia of the space and time dictates that.

So, if you understand this and use this knowledge we can see, we can dictate what Inertia, what material, what composition of the field and environment, in interaction with your Soul and STP we'll let you show

what you'll be. If any of you can find hair of Christ. If any of you find and dust of his clothes where you can copy, you can manifest the Soul. As I said in the past, in the upcoming time with the knowledge we have, where the frock of the prophets which they say they hold, we can see the essence of manifestation and ?? instruction of them. And not by the man and by the cheaters and the rest in different names. (:38). As a Soul will speak.

You remember what I tell you when you eat the food, in your digestion system the small amount of it allows the fields of the universe (U) to be absorbed. That 20% is a trap, is the link, is the connection. When I have the frock, when I have a hair of, it's again that 20% which brings the Soul, connects to the Soul and let them talk. And let's see how we meet the Soul of the prophets of the past. Then we understand the new science brings reality to existence.

The new science, understanding the process of Creation does not allow the creation of any more religions, any more sects, anymore whatever. Because it's you who makes that decision, you become the "sect" of your own interaction of the fields with your own environment and in the knowledge you receive. Then if you understand this how easily, then when you go to a new environment in the direction, the emotion and everything else you gather all the knowledge. The language, the emotion of the language, understanding everything else. And if you are clever enough how to interact with emotion of the Chinese as a whole, you'll speak the language better than them, you'll have the full memory capacity of all the historical and every emotion in every cooking and everything else. It'll be very hard time to sell dictionaries and encyclopedias at that time, because the encyclopedia of the knowledge of the source, (:40). the essence of the Creation is given to you by the interaction of it.

We would not have, we do not have schools and universities in the universe. But by interaction of the Souls in the dimension we want to exist, manifest ourselves, we gained that access to universal knowledge, collection of the essence of the Creation. That's how the knowledge of the Creator is in every spot, every point in the universe. As it's connected to, as it's created, as the interaction of the fields of it, it brings that in. And comes in dimension of understanding of Totality.

Knowledge has to be without what I call, mixing, adding, hypocrisy to it. Understanding it as it is, understanding it in its totality, being part of, being accepted by ourselves to our own existence in what we head for, what we're going to do, and what we will do. As I said from the beginning of the teaching, people will take from my teaching according to their intelligence and no more. You could be a dog, you could be a king, you could be a road sweeper, but if the level of understanding reaches to the point, to what how much of the essence of the Creation you understand, that brings you to that point. It is for you to strive to understand more. It is for you try to gather more fields of the universe to be able to attach to, and detach from. (:42). According to the emotion interaction where guarantees the survival of the Soul and the STP, which their interaction creates the Inertia to condition you to manifest yourself in a time, place and position. When you arrive you don't need to go to English classes to learn English as we did years ago, but you speak English as fluent as the Englishman does and you have access to all the encyclopedia of all the Englishmen in England. The Englishman knows a little bit each one, but you access at the time of the need and the position.

This process of creation of the fields become most part of the important part of the Keshe Foundation work. This is why for past months and years since I introduced you to the MaGrav technology, when I introduced you to the Gans technology, I keep on telling you, ignore the power supply, ignore the copper, ignore. Understand the creation of the fields. The rest is literally not important unless you want to manifest yourself in that time, place and position.

Interaction of the fields understanding the totality of the work of the Creation is the responsibility of every individual. Because it is you who's the "last man standing." It is you who has to understand how to interact, how to understand, and how to be clear about the point, the time, the feeling, the emotion and what you want. In being happy, in being content, (:44). in being in a way, in love with the Creator and what He provides is the only way man will find peace. Man will find new positions, man will reach the level of understanding of his creation.

Try to learn that what I call, access line. Try to find out the line of connection to the Soul of the Creator. Then going from one universe to another is child's play. As long as you try to get in the machine and try to push yourself out. As long as you don't match the essence of the emotion of the Creator, you're in doldrums of the man, and others in the universe trying to find a tool to move. Trying to find a technology and the science to be able to go from one to another, where the Creator is at every point in every place and every dimension and He's aware of all knowledge, that what He has created, are creating energy.

Reaching the condition of the understanding and the work of the Soul of the Creator is as easy as of drinking a cup of tea, a glass of water. It is you who has to endeavor to fill that cup up, that there is a water in it to drink. And that is the Knowledge of Creation, and the cup is the STM. And you don't go the way the man does, the bigger energy, the bigger Soul, you go for the essence common denominator of connection, and you'll find your path. (:46).

I hope as Knowledge Seekers (KS) now you understand more, now you understand the working the systems, how the system is you. How you have to create that condition of the contact, as the contact is there, always has been there. I was telling someone sometimes ago they say, we can hear specific noises coming from certain direction of the universe. It could be from civilization, or whatever. That noise has been there for billions of years, we didn't have the tool, we didn't have the knowledge to acknowledge its existence. So there should be no surprise. The voice of the Creator is the same, the motion of the essence of the love of the Creator is the same. It's always there, it is us who have to understand it, when with it we become mature.

It's very much with the spring and the river and the brook, which the spring creates. The water will always come from the same purity at the point of the spring and depends how far down that brook, how far down that river which the spring created you live and you decide to drink. And how much effort you will make to find your way to the source. But the water, the taste, the mixture is always in essence the same. It does not matter what and which animal, (:48). what dirt and what soil and what else has been put in the river to get distorted. By the essence it's the same water, added to, to create the water on the top is crystal clear, down the river, down the brook where you collect it, is brown, yellow and every other color. Exactly how STM, the river of the fields of the interactions have stained the cycle of the life of the man at the point of manifestation of the man. The tainted fields. But in essence if you clean the water you come to the source exactly as it is at the top. That cleansing, that connection gives you direction and motion and understanding of the essence of the Creation ?? at the source.

It is you who has to decide how far up you want to go before it gets stained and at that point we get that, you can join that spring, that you start understanding the totality to the end. But as usual if this spring goes long enough evaporates, water goes in the skies, rains back and comes down the same spring in time to come. And that's the cycle of Creation. Are you in the rivers of it? Are you in the state of the clouds, evaporated from the same source, purified from whatever was in it and in essence rain back on the same mountain, join back the same the spring as where you started? It cannot go anywhere, it's a closed circuit, it is a .. complete circuit.

When you get the waters of the oceans evaporating, (:50). traveling halfway around the world and rains on you in another part of the world. When you taste that rain, you collect it and you drink it, do you taste from which ocean it came, how much salt was in it, what did the fishes did in it, how much dirt humanity added to the ocean? No. And it's the same if you understand this in the essence of Creation. And it goes back into the same mountain and it comes out of the same spring. We see the coming out of the water from the spring as a point of manifestation, but in fact that water is not there if it hasn't a rain, if it hasn't evaporated from the ocean, and if the spring itself hasn't provided it to go to. That the spring is the Creator, is the essence of understanding that everything comes together and pure. And it's for man to decide where he wants to evaporate, where he wants to be at the end of the river. Does he want to join the ocean and the ocean, then evaporate, and then come down the mountain.

Now you understand how easily man can dictate his own position, his own destination through understanding of the process. And this is where we get our emotion, our thoughts, our beliefs tainted as we go down the line. And those who try to do some cleanup, to bring some order that you receive a clean water, we call them Prophets. That's the clarity of the Soul, (:52) clarity of the physicality, as the Soul of the water is exactly the same.

Now you understand creation, understanding the process of the creation of the fields of the universe. Connection of them, as was in the introduction. In the talk .. in the Intro we are all connected, depends which hand where we give, and how many people are ahead of us and how many people are behind us in that chain. But the chain is a closed circuit, so it comes back to the same.

Please try to understand the interaction of the fields. If you understand that, then you can understand the interaction of the fields of your emotion. Then you understand the interaction of the field of your Souls. And then in understanding those you understand how to create that condition. On the 20th of November (?? 24th of November), as we announced on the Keshe Foundation website we allow limited number of people to join, where we will try to endeavor to create the light between the two hands, where we change the system. Where we control the system. And your job is to create the condition of the Soul, pure devotion, to be able by the interaction of the fields between your two hands to manifest the light. In teaching of the past we have mentioned about this many times, now we show you. It is a technology, it's a knowledge. It is not magic. (:54).

(If) you don't know how to do it, we create that condition. We tested this with you last Friday, and the Friday before. Those of you who attended the sessions you felt an energy change, you felt energy from the back to the front. You've changed the emotion. We control everything in the background. Those of you who had emotion on the right side and the right hand, and you had the feeling on the left side and the left hand, you felt the emotion change. You .. felt the change of the fields. It was not coincidental.

When you join us look at those two microphones which are amongst you. Through those two microphones we change things, we introduce things, we create a condition of the joy. We can feed you and the rest of it. And there are other microphones. We don't (?? tell you).. we create other conditions. And we see that condition where we create. As you remember last year we brought the essence of the Soul of the child of Mitra, and we saw the immediate effect on the reading. How the Soul elevated the Soul of all you.

You got to understand, this has to be understood as a knowledge, has to be understood as a technology, has to be understood that now we understand what we can do. It's like that gymnast. It doesn't go on the floor and

win the gold. It practices day and night, compares itself with others, what I can add to reach that perfection to win that gold medal. (:56). There's nobody else but him on the floor. The "last man standing." If he has ?? learned it and has mastered it, he wins a gold (medal). Winning the gold for man is not the gold, is understanding the process of Creation, and you're the only one on that floor. And it's you who have to understand. We bring the stadium, we bring the floor, and we bring the people to cheer you up. But it's you who has to decide, it's you who's going to do training, and you learn from the others who've done what to do to win that gold.

It's the same with us, we create the environment for you, we create and control the condition, we bring the audience, and we teach you slowly, slowly. As we've done in past year. In the meeting of 27th November, we endeavor to bring that in. In the last Friday and the Friday before you felt the emotion change, you felt something happened, you felt something is about to happen or your emotion changed, or you went through, we watched it. We created it. I can make all of participants in these sessions to laugh whole time and don't do anything else, and I can make you cry at the same time. Because I know the emotion of love, I know the emotion of joy and I know what creates that condition and that emotion and at what strength.

In the process of the knowledge, in process of understanding, (:58). in the process of gathering information for you to have to understand, to have a ?? track record ?? that you can repeat, we test everything to its perfection. Now you understand, go back to the teaching, go back from the beginning. Understand the interaction of the fields, understand what these fields do to you, understand how their interactions create what condition with you, knowledge, joy, happiness, whatever.

I was with a Knowledge Seekers very recently, and says that, every time I go into this building after half an hour I want to sleep. I think something to do with oxygen in there. And I looked at the sky and I said, yes you could be right, but I know why that emotion is created. I can create the same emotion in the house where she was, where she lives, where they go. Or through the systems we have, which a lot of you join, I can make ?? half of you to laugh with the open phones, with your microphone open, and the other half of you cry.

Look at the data, look at the voting in the screen, the questions we ask at the end. We've collected all the data we need. (1:00). When you went to the test for pH, those of you who went up your pH increased you will start laughing. Those of you who pH goes lower, you will cry. Those of you when you went for the test of insulin were increased. If I increase more in the background you'll be so happy, you'll be like drunk. And those of you who went down, you'll be as sad as depressed.

What we do in these tests? We do to understand how to make you in the process of understanding, that the system creates a normal condition in all time. This is how those of you who go through the Wellness Centers find out we change your emotion from depression to happy. When I came to the session six weeks ago I was so depressed, I had a depression. In six weeks I don't feel it, because my life has changed, I've become a happy man, I can live again. We didn't do magic, we did exactly what we did in the session of last two weeks, but we give you time for you to understand.

Those of you go through the Wellness Center you've gone through these processes with the doctors. You go in for two days, two sessions, because the body needs to learn to the next session, to the next session, to the next session. It's not magic, it is understanding what field is missing that you can enhance. This is the same as what we say, we add to the energies of this planet to change the condition that the man does not kill. (1:02). You put Gans's in the rivers and Gans's continuously to produce, or in the room, and they say, this

happens. This is what we do, this is what the conditions are. But we are more, we have more, we access more knowledge in a deeper way.

I carry the knowledge of the universe, so I have to play slowly, slowly. Otherwise if I run too fast the child chasing me will fall or gives up, there is no fun running on your own. How many times you played the game of "I can catch you" with your children. He or she runs ahead of you and you say, I catch you, I'm catching you, and runs as fast as he can, or you run in the front says, catch me. Runs as fast as he can, but you know he can't catch and you know you can run away. But the whole purpose is to create that joy and let the child feel, I'm part of it. And this is exactly what I play with you. You take from it according to your intelligence. Some of you feel behind chasing, and some of you feel ahead being chased. But that chasing is through your own Soul and your own STP and the knowledge you gain. And as children always say, sitting in the back of the car, have we got there yet, are we there yet. And that's the question you have to ask yourselves. How I got there yet to understand.

Thank you very much for today, we go for a break as usual, the same records, (1:04). the whole thing, and the whole way, we kept it that way as the knowledge of the man has to be added by the man himself. And then we come back and answer any questions. If you like to take us to a break Rick, please.

>> **BREAK** >> 508 KSW October 19, 2023 (1:10).

K- No, we are ready if there is any question. And we'll see what we learn. Go ahead.

Q: ... Years ago I had a daydream experience while awake where I was in the past in the Cathedral of St. Petersburg, and I was in the choir, and I was the bass ?? Pashukov. And I felt his emotions while I sang a song in Russian. If it was transmutation can one then transmute in the past, go back in time and see where and how our ancestors lived? Thank you.

K- There are different ways to connect this way. There are, if you've been there, you're part of it, you carry that emotion. You know you've been there so it's part of it, it's like your DNA, you got a blue eye from the grandmother. But the recording of the body of the man in a very different way as the information, not as the change of physicality.

On the other hand, we all have, if we create a right field forces. As I said when you go to China, if you carry the right field forces in the field of the strength of the emotion or that time, (1:12). that line to be connected, then you learn the language. You know the emotion. So if you tap into the common knowledge of the let's say Russian and in that structure fits to the match of a singer in a summer, or matches to the "ex" god knows who, what in Russia, you will see it, because...

There is a lot of knowledge which we have gained in the test and trials of past few weeks. We see, all of you receive fields, as I explained before in other teachings. It is very clear from what we have that... (I'm trying to open the white board that we can explain to you...) (1:14). If this is your brain, you have a little bit of, which actually affects your spinal cord and your Soul is somewhere here. Your eyes are somewhere here. If you receive, you still say you daydream, the information which comes in that direction, or touches the visual part of your brain, you see and remember that dream. If you don't, if you receive the information in this direction, from the back of the Soul in this direction, you don't see it or you don't touch the visual part of the storage of confirmation of information, you do things or you react and you say, I've done that subconsciously. But in fact, there is no subconscious.

In our test shows, we have a clear division in this part. And depends which way the information come to us. We still add that to the energy of the Soul, the information of the Soul and then in this interaction with the STP, it will be in other parts. You hear a noise because that field strength matches the noise. This is visual. You don't hear sound through your vision. But you see and you hear. So that goes with interaction with that. (1:16). So if you do something, says, I don't feel anything, I went to the machine, but then you do something which is unusual afterwards or during the process, you say, I didn't feel, I didn't see anything, but I felt this and that, or I took such action. Because the fields at the strength, it's not the strength of the vision, but still enters from the backside of the brain, which touches the energy, changes the energy of the Soul. And it's not just the Soul because when you are in that process, when you are going through, there is a blood circulation around your brain. So this field has touched the Soul of emotion too. Which changes the gravity of magnetic field interaction between the two and creation of the fields and ?? emotion. And now you understand.

So if you, and you understand that your Soul is connected to many other souls. We are at any time, at all time, the way there is nowhere in the universe, there is no magnetic fields, is the same. We are at all time, even in the body of man, connected to every single string of the fields created, emanated from the Soul of the Creator, to every planet, every dust in the universe.

When you draw a magnet, and then you draw a magnetic fields, and then you say they come back, or they expand in different ways. Depends, this is at the strength of your magnetic field of your vision, (1:18). or this one is at the strength field of your magnetic field of the cry, or this one. But this does not connect to this. So, now we understand this. We clearly, we had people came in, they sat in the machine, but then they changed their life, they changed something in the way that something goes, oh, this happened subconsciously, or this happened, why it happened? Because you received in the system, that field. You call it subconscious.

The only things, most of you remember, if something, a field direction, because you enhance the condition of seeing. We ask you, have you seen anything? So you concentrate most of the fields in the strength of the field of the sight, then you see something. Or you see motion, or in the way of your fields, motion traveling or going, interacting with the fields of the system, interacting with what I call, magnetic fields we create in our structure, then what happened? This field which it comes out, hits this, you see us blurred, because now you have a field of interaction, because you still force yourself to look, in the look, in the vision.

So what you see, do I travel in the past? Is somebody at the same time as you having this feeling, is actually singing in that church, that song, because of the matching gravitational magnetic fields, you match. So you could be, the only one who could be, another hundred people, listening to this chap, (1:20). because his field of strength matches the hundred.

It's the science, we have to understand. And once we understand, we can do that. At that time, at that field strength, you match the boy who sang, or in the, what we call, the dimension of the STP, and what I call, memory disc of the DNA you call it, that information has imprinted, because you were there sometime in the past. It's the way you go somewhere and say, I've been here before. So it's not. It's understanding the science, or you went to the back, to the future, and the rest of it. Look at the possibilities. And understand the possibilities. Then you find the true answer, scientifically.

Any other question?

Q: ... Thank you Mr. Keshe for asking for a corridor to be opened for the Palestinians. The genocide of civilians in Gaza is a war crime, so thank you, God bless. (1:22).

Q: ... Today's physics determines the size of the suns and stars from their absolute brightness. We have learned, see book two, that light is created in the interaction between plasmatic fields of cosmic objects. So we never see the surface of the cosmic object itself, because the light always originates at a large cosmic distance in front of the object. I imagine it is like in the cinema, where you see the film on a screen and not in the projector. Three parts to his question. Does this mean that star charts are useless because reality is completely different? And two, the luminous intensity or brightness is not dependent on the material size of the star. What are the influencing factors then? And three, are specific MaGrav maps used for navigation in space for those who travel by donkey, what he means is UFOs, in the universe?

K- We have answered this in depth somewhere in one of the teachings. Somewhere in the past times, and it's in one of the books. And in the Book number four, the Soul of Creation of what you call, solar systems. I explain that in detail. I had a discussion with Dirk Laureyssens, (1:24). how we're going to show this, how we're going to create a visual picture for this.

You got to understand, you have the center of the system, we call it the Soul. Usually empty, because of the fields, pulls and pushes. Then you have the, what I call, we call it the brain, we call it the magma part of it, we call it the field material strength. And then you have where the fields have reduced, and they have created what we call a layer, the top layer. In a way, this top layer is Gans state, Nano Gans state plasma. So the light we see from the stars comes from the interaction of the fields from the center. In interaction with the material on the surface, with the Gans's on the surface.

In a way, when we have the sun and the interaction of the fields of the sun with Earth creates a light in the angle of facing the sun, we have. (Do you see my diagram ??) So, we have the same, instead of this interaction happening on the upper atmosphere of the Earth, it happens on the surface of the star itself. This is how the lights of the star are created. It's the law of physics. (1:26).

But here you have Gans's, you have what we call, plasma, which has gained Inertia plasma strength. And by interaction of the fields internally from itself creates the light of the star. And what is the content or the mixture of this reduction, what you call it, the field strength of the plasma dictates the color of the star. This

is exactly like a diamond. Here if it's a slightly different strength, we see a blue diamond, yellow diamond and the rest of it. So the creation of the lights of the star is so intense that in fact, we have a zone which is nothing but influence of the lights coming, it's so intense. And sometimes what we see as the clouds, the dark clouds, is the motion of these on top of the surface.

We actually, do we actually see the surface of the star? It's a question. Because we see different things, because we never understood. But in the future, in this magma section, would we be able to find the actual surface or physical surface of the star? It's possible. So what we see is the field, intensity of the fields. It's very much like a cloud, but because it's mono energetic, you get this.

This is why when I tell you when you have the UFOs, you have the same problem. With the UFOs you have a central system which is the Soul, (1:28). and you create the fields on the other hand for the interaction. Due to mono energetic of the center and the fields created as a protection, you always get a silver color. It's, we see a bright color, mono energetic, because of the same reason. We create this and this from the same source, from the same plasma.

Then how you dictate the fields of this ?? beam dictates and there are ways to do it, to create the darkness, dark energy. This is a knowledge which we never teach. If you read the paper about the creation of the Black Hole and you understand the true knowledge given, you understand how you can make UFOs, how you can make flying objects which are dark in flight. And because they are dark and they are created that way to absorb all the fields, you can never ?? see it. This is how the Iranians annihilated the American base in Iraq. And this is what knowledge Iran will never pass on (to others).

If we change the light strength in the center, or a dimension of fields, then you can make, as we made it bright, make it black, we can make it any color. (1:30). Now we have LED of yellow, green and whatever and it depends what color you put into it and how they structure it. It's the same process. But now interaction of the fields of the plasma.

This is why your aura changes to different color. Because the Soul is the same. You have the physicality and you put different foods inside it. And this food creates the STP motion, which is your blood. So as you change apple it'll be purple, as you change meat it'll be green. And if you have made a mixture of the foods you see different layers of aura and people say we got a machine ?? that can see (auras). It's so simple. I laugh when I see these machines. But in a way it's a good thing to see. So we understand the process. So it's how we feel internally we can do. And if you understand this process in space you can dictate what energies you want to absorb, not to eat. But you live on the energy of the universal systems.

Any other question?

Q: ... (1:32). Thank you for the new info regarding Palestine. My question is why do people think that the situation has to become worse? Is this the insidious message in the Bible and other books that Armageddon has to happen before the golden age comes? Is that not Armageddon at present? Is another option to see peace as the only way forward?

K- Armageddon is within the STM and its interaction with the STP. When man reaches balance and understands the two, and how they interact. You got to understand the whole structure is amazing. Sometimes I look at it, I've been. I had to look at it again in past few days and the situation which is as you say in Palestine.

When the Palestinians were centuries ago, they kicked the Jews out. When the Jews are there, they kick the Palestinians out. And it's very funny when you go to Israel, if you get on the, I've said that before, if you get on the taxi, if it's a Jewish driver and you've got to go to Palestinian place, he takes you to the wrong place. If you get on the Palestinian taxi and you want to go to a Jewish area, he'll take you to the wrong place. Two things, their GPS is designed deliberately for this kind of things. The Jewish GPS is different than the Muslim one. Or is intentionally they have no interaction with each other, therefore they are lost. Or intentionally they know, but because they say, oh, he is a Jew, so I'll take him somewhere else. But at the end you get to where you want to get.

I went to, when I was invited by the Israeli officials in 2000, I had to face this. And I said to my cousin, I said, what's going on? (1:34). He says, Mehran, he's a Palestinian and we are Jews. And he knows where it is. We went up and down the street, in one location to another, till my cousin asked, in Hebrew from a guy, he says, now you go that ?? direction. But he knew where he was going. And this has to go. Doesn't matter what taxi you get, you got to take him to the destination.

My hope, not a fear, but my hope is when we manage to bring Palestine back to what it was 200 years ago, ?? 8 - 900 years ago, or 100 years ago or so, these people would live together, the ways they did for centuries, for hundreds of years. And it's something new. Animosity so between the religions has been created by the religious leaders, not by man. And those who listen to these people.

I had the pleasure to see my great grandmother when I was young. She lived until nearly 100. And I was a great, great grandchild. And she used to stay with us. And she used to tell us, we asked about the story of her life. And my great-grandfather, grandfather, used to be a merchant, generation after generations, traveling between Hamadan and Palestine, Hamadan and Samarand, and Palestine and Georgia. They moved because of they were merchants. And he always went all the way to Palestine and back, once a year or whatever. (1:36). And as a Jew, he was well known. I was told that by my uncle when I met him in Tel Aviv in the year 2000 when I was there, that talking about his grandfather, or the father, having such a beautiful voice, he used to verse Koran. And whenever he passed through Karbala, in where he used to stay while he was going from Palestine to Hamadan and Samarand, they used to ask him to chant the Azan on the minarets of the mosque, even though he was a Jew. Because they lived amongst each other, they loved living with each other. And my uncle always said, whenever he used to go through Karbala, we knew his a few days or a few weeks late, because they enjoyed him so much and he used to stay. And he was a guest, he was a merchant, and he had to always say the azan in the mosque.

But we saw this change with the situation of today. When a situation created another situation, and partially pre-planned, when you go to the history of Israel, establishing this country by what you call, Illuminati's or Rothschild's or whatever, was planned in 1800. (Break in audio) need to go to Palestine and buy the land. The plan of this animosity, long term division, was made for a long term gain. (1:38).

And so we see this, that when we speak about this situation in Palestine, has been there, you had this with the Christians and Crusaders, traveling all over to go to Bari and Baletta in south of Italy to get boats, as Crusaders going in one side from the churches, they're going to pray, get on the boat on the other side to go to Palestine. We lived in south of Italy, in ??, on that side, in Bari and Barletta, you see the churches where people came in because they were persecuted, they wanted to go to see the land of Christ, as they had the churches on the beach, they went in, as they were going to the church to pray, and the door in the back put

them on the boat and took them to Palestine through Malta and Israel. So Romans didn't want the Christians to get to the holy land. One cycle of belief with another, now we have the same.

This land of Palestine has been the land of a lot of what I call, hot air emotion, and those who have used it for their own benefit have created mayhem on this land for centuries. Doesn't matter on what day, or what else. Doesn't matter if you're a Jew or a Muslim. Has to be the love of giving the other the pleasure that completes their cycle, not to take and destroy.

It's very funny, I explained to you, I've been in this position so many times when I was a young age, (1:40). and me and my cousins used to laugh about it, and we sometimes it was a joy to do it. As you know, by the Jewish religion on the Sabbath, when they set the table, the prayer has to be said, usually you have to have enough men on the table, doesn't matter if you have 200 women, doesn't count, but you have to have the right number of males, even if it's a little one year old boy, or a 90 year old man dying, around the table to be able to tell the prayer was started, whatever, the Sabbath. Knowing half of my family are Muslims and ?? Sayyids and the rest, and knowing my other half are Jews, my great aunt used to call my mom, come over for the Sabbath, because the Sabbath is a Friday night in Iran. In Iran we are closed on Friday, and the Sabbath is on Saturday, so Friday night it always was free, because it was a holiday weekend. So my mom used to get a call from my great aunt, we are short of one or two boys, can you come over and bring the children, and our house was known as a house of seven boys, my cousins Muslim, whatever, we were all together, and my mom says, boys, aunt is calling us. We knew it's time for, what we call it, Gondi's chicken soup and everything else, and we loved it so, we all used to go, because the table had to be complete, and my cousins are Muslim, and we all knew, and we used to go to the house of the aunt, nothing to do with Jewish, just to come to put what we call, the soup bowl, you know what they put on their head, and sit down at the table to complete and enjoy. And sometimes my Muslim cousins used to ask my mom, they used to come and ask, are we going to the aunt today? (1:42).

These things has never existed, till it came the money and those who push the principle. I go with my Jewish cousins to Muslim ceremonies, respect was the same. How we create the environment in the house. And the world leaders are responsible to create that response, that condition of peace, condition of equality. And one day it's one sided, we create the mayhem we see today, and those who are opportunists, they see money making in it, and the guns and the rest of it.

The beauty with the teaching of this technology, and what is emergence, and I enjoy working with the Chinese, is that we see a path to peace, and we see, we deliver the technology for President Xi to deliver the principle politically, equality, share. Read what his Excellency President Xi has mentioned in past few hours, in the, what you call, yesterday conference of the "One road - One Belt." Creating an environment is his job.

Giving the technology to obsolete, absolute, all the technologies of the past, the gun technology and weapon technology, it's my job, it's Keshe Foundation's job. It's your job, that's why you are here as students, as Knowledge Seekers. I'm as much a student as you are, (1:44). I learned from the school of the Creator, and I share with you what I learned from the school of the Creator. We are just Messengers, we just pass the message. We are as transparent as you get, the Soul of the Creator. But we have to assess, what will be used by whom, and how, that creates that condition of peace.

And those who think a few pieces of coin, a few account numbers, a few billions in it, makes them any different than the others, have a lot to learn. I sit across the most powerful man in the world of military, and we enjoy working, because we know our target is creation of peace. I sit with the Chinese, they talk, what

can we do to stop this aggression, this and that, just neutralizing, that we can spend time and things on our nation and the rest of the world, to carry on what has been said by President Xi.

I speak with the Americans, I've sat so many times with the Chief of Marines in South Korea, in London, I've sat with them in Brussels. I have access, when I tell to the American Ambassadors, the shape, the room, where their rooms, CIA agency, in offices, in their embassies, they say, how do you know? Because I've been there, I've been trusted by Americans, as much as I'm trusted by the Chinese and the rest. We move amongst these people, (1:46). we touch their Soul. The color of the passport doesn't count. How can an Iranian, nuclear physicist, go and sit in CIA debriefings, in their embassies, which is highly secure, they take me there, they put me there, I sit with them in their rooms. Do the same with the Chinese. In Iran, I sat with the office of President of Iran. In other countries, the same approach. Because we are there, with the message and the knowledge of peace. And this is what our world leaders have to be.

What is shameful to me, is what I read in past few hours, with Biden, flying in, the rest of the Islamic world refused to meet him. He says, we stand by our people. It's wrong. We stand by all people. Let's find a solution. And this is, when we teach the technology this way, I don't know how many hundreds, thousands of you are present, and how many hundreds of thousands of millions of you listen in next few days and weeks, in different languages. Do I tell you this is only for the Jews? Do I tell you this is just for Americans? Do I say this is just for the Iranians?

I had a discussion with the Iranian government yesterday, we informed them the day before, we knew Ayatollah Khamenei's office and his representative, Sepah, and the rest were on the line. I came and I discussed with you, more or less, what was said yesterday to them. Because it's us as a human being. And there is no exclusivity. We hold certain information back, because man is not ready for it. (1:48). But we teach it, that the knowledge is there, that it can be used, to the benefit of it. So I don't tell you, this section is only for the Jews. Muslims will not understand and that's it. No, I teach you, you're from Christians, you're Chinese, now on the line. You're Americans on the line. You're Iranians on the line. You're Muslims on the line. You're Africans on the line. You all learn together. And according to your intelligence, you use it, you understand it, and it touches your Soul and you go to the next step.

We are not that religious sect, we are not this. We are not here to take things and run. If we were taking money, by the amount of money we've been offered, the lands we've been offered by Knowledge Seekers in past years, we would have had temples and centers in ?? Britain and Vatican. How many of you Knowledge Seekers offered us hundreds of thousands of meters of land, all over the world? I refused. We are not in property gathering. How many of you helped us when we needed it? I thanked you because it came when it was needed. And the beauty of it is when we need it, it comes. When we need it, we ask. And if it's given, it's for humanity.

This is how you should not used, now you're Knowledge Seekers and I can touch you this and I can influence you to, you all now start beating the Israelis and kill the Americans. (1:50). No. It has to be just. And the justice has gone out of the window with Americans. But with the knowledge, with the technology we bring, we'll bring this "child" to order very soon. When a child feels it's very special, he plays games in the house. Till he's sat in his place and known (that he is) no different than the others. And this will be done with Americans and Israelis very soon. This is why I told the Iranian leadership, pull the Palestinians, don't let them suffer. In time I handle this solution. Through technology.

Many of you, you give your American passport back to any nation not to carry it. Ashamed of the conduct of the nation. Give me time. I've been here thousands of years, I have the patience. You have a few handful of years. But in that time, we don't have to let one and a half million to suffer and we don't have to let this animal behavior to destroy the nation, ?? nation. The time will come very soon that there'll be no American aircraft carriers. They'll be there, but just for toys. Hotels you can go and enjoy yourself. Jets which will never fly. Ships which are bathtubs. We showed all that, by the Russians in the Black Sea, 2017. (1:52). Now we show it internationally. Any ship which carries gun is not to fly, not to float. Any nation produces arms not to be part of.

Let's see where we go. When we stop those who are inciters, the others don't need to make to match. The energy, the knowledge goes in development of the humanity, understanding more and spending more. And with the present time, we see it. In the past few weeks and months, and present time cycle of the Keshe Foundation, we don't need anyone to finance us, to develop the technology. It's our ultimate goal. We've been well, well looked after by the Chinese nation and Chinese military to create peace. As I said to the Chinese, I bring the technology, you use your power, you use your financial influence to use the "One Belt - One Road" to create the world peace. We stick to end of our bargain and they are doing their part. We don't need to sit around the table to talk. We enlighten the Soul and we get what we want. Sometimes we put a signature to it, that visually ?? it is accepted ?? as it is.

Any other question?

Q: ... (1:54). I'm very grateful that you are presenting a solution for the people in Gaza. My heart has been very heavy lately and wondering what can be done and I'm glad that you've come up with some sort of possible solution to their plight. I mean, killing on both sides, I'm against, but it was actually very good today to see the Jewish people in the United States protesting for peace and for those that are suffering. So I'm just very happy about that. I did have a question on the Security Council, which was a bit surprising that America vetoed against humanitarian aid for the people in Gaza. What's your thoughts about the Security Council? I mean, they don't seem to be serving anybody but themselves and although I still have hope for the United Nations of coming together, but I think the Security Council has done, no longer is needed. Is that, do you agree with that?

K- The Security Council, you have to understand the security. Security is not for humanity, for the nations. The Security Council is to secure the abuse by those who are abusers. (1:56). The United Nations Security Council, five of them, are the most, what you call, exclusive club and those who are and can or think they can influence to do what they like. First of all, the Security Council should be the whole of the nations, not one. Secondly, why, who are the members of the, what you call, Security Council? Can you put it on the screen and then I explain to you the funny bits about the Security Council? The Security Council is United States, remember, Russia, and, pardon? It used to be Taiwan, it used to be Taiwan. And they decided Taiwanese become Chinese. And a few hundred thousand used to give word for 1.4 billion, if you go back into the history of the, what you call it, you know, the Security Council. Then there are two funny members in this Security Council. And I never understood why these two have to be in the Security Council. Can you read the members of the Security Council?

R: Where is it? Members, let me see here. Current members, here we go. There's ... Albania, Brazil, pardon me?

K- No, no, no, no. This is the back of the Security Council.

R: There's five permanent members. Five permanent members. China, France, Russian Federation, the United Kingdom, and United States.

K- Why, why can't we have Italy as part of this five? (1:58). Why can't we have Brazil, which is an economical force? Why don't we have India as one of the main powerhouses of Asia? Why do we have Great Britain? France has no say. Security Council has to be from the five continents. Who are the Africans on the Security Council? Council of what? Chinese, as China, has been brought in by force, not by decision making. The rest of them is what I call, the "white club." There is no room for Britain and France to be on the, on this Council. Economical powerhouse of Russia is not there. This was when it was USSR, with 11 time zones. It's one-sided, only for Anglo-American group. And that's it. The only outsider is China. So it's a white club. Catholic, or what we call, Christian club, with a hope that the Chinese one day become Christian too. It's the way I always look at it. And nobody has a say. The Americans have vetoed more in the recent time than anybody else. Russia used to create a lot of vetoes during the communist time when it was USSR. (2:00). So this is a one-way club. One thing you say, you said the American vetoes support of giving help to the Gaza, to the Palestinians. In whose God's will, in whose God's love, deprive people who are under starvation not to give support to them, unless you're a criminal. There's no difference between mafias and the American administration. Terrorists, as I said last week, come in different shape and form. But very soon, very, very soon, sooner than you can imagine we'll sort this out, through technology and knowledge.

Q: Technology in exchange for peace.

K- That's what it is. We create a condition that, this is what I was explaining to a Knowledge Seeker very recently. Keshe Foundation, as many of you know and everything else, as I explained, we've shown it now physically in a large scale in experiments. We can produce any material. If we set the situation globally, which we can, that when it rains on you, it will be rain of gold. Would the gold have any more value? You all go to the shop with a bucket of gold. Nobody wants it.

Then they have come with this new game of digital banking. (2:02). Who tells me how many digits I can put in that bank? You understand? Now they want to control it. I like to have 10,000 zeros in front of this digit you created for me. So wherever I go, I have money. I can do what I like. This is the things which soon will be abolished. This money control soon will be abolished. You will understand how and the way it is.

Then it becomes like a boycott. I explained this in one of the teachings, private teachings. Now they say the Palestinians in Israel boycott their workforce. It means don't work. Whatever benefits the Israelis, close your shops, whatever. Deprived of the finances, deprived of people, what they need. With the new technology, when .. you are allowed, when you have access, just go on the Headphone, you get your energy, your whatever is sorted. They cannot control the foods anymore. Supermarkets are empty places. Power companies are a waste of time. We don't need hospitals. Because by progressive development of using energy through the Soul, through the physicality, the way we are doing now, you hardly will have a cancer. Cancer becomes something of the past. Unless comes, even when you start, through the system, (2:04). over six months a year, it's not there.

So what we see as the biggest menace on man in next few years will not even be there. Because as you go through every time taking your food, taking energy, whatever, you change the structure. There is no way you have damaged cells. So we won't have any hospitals. We won't have any, what do you call it, we have accidents. So we have hospitals. If we have to sew arm and a leg, and even those, we don't need. If the leg

fell off, ok. It's down the hill. Put the system on, let the leg grow. We've done this. This is not a theory anymore. It costs less than a dollar to grow a leg. Less than a dollar. I've done that. It takes 20, 30, 50 dollars to make a brain. Naomi is an example of it.

So we're gradually getting to the point that, they cannot control us by food. They cannot control us by medicine. They cannot control us by money. So we're getting to the point gradually, in the next 10, 15, 20 years, that nobody can control anybody. As I said in the Iranian talk and to the officials in the past few days. When you have the technology that you can empty the warheads, there are tens of meters under the ground, what's the use of a "blank bullet"?

You know when, during the Second World War, the Allies came to Iran. They didn't have bombs. They ran out of bombs, because they wanted to get to Iran to get to Russia, to get rid of Hitler. So the Shah of Iran, (2:06). the father of present Shah, said he stays neutral. Doesn't go with them or them. And this was against the rule of the Americans, because they wanted to use Iran to get to Russia to support. So to do that, they decided to bomb Tehran. But they didn't have enough bombs. I don't understand. If you don't have a bomb to go to Iran, how are you going to get a bomb to the Russians? There is another problem. You know, when they deliver to the border, the Russian railway is different than (ours). Then we had to do all the donkey work crossing it. That's the thing. Do you know how they bombed Tehran? Buckets of sand. They used to drop from the sky by the plane. Buckets of stone. That was Allies, Americans war, bomb. You go back to the Stone Age, but with the things, you can throw it further. You understand?

Now, this war has again, the same as those bombs. Because my parent, my mother, and my grand, what you call, family, born in Tehran. And they went through this. When the Russians were dropped. What do you call, the Allies were dropping buckets of stone on people's head. That was their bombing. They don't tell you, because it's shameful. So we're going back to the same point. With the new technology, we can do it. I told you, we can assess what is in the area. We can collect the material. We can empty these nuclear warheads the same way.

In next year, if our work, the speed we imagine, go with our allies, no nuclear warhead will have any material to deliver, except a big bang. Because we have the knowledge, (2:08). we've proven it. Now we have to extend it. So by devaluing, or taking the old man's weapon technology, it's the same. I said in the teaching, because you'll get translation from it. We call it ?? khandaq. You know the ditch around the castle that if anyone wanted to go, has to go through the ditch, the water, to get off the wall of the castle (a mote)? That was the biggest thing. And then the Genghis Khan came and brought the firework from China and his family later on. They put it on a thing and they flew it over. So these ditches (motes) had no use, because now they could get in anyway. And now we have helicopters and we have, what do you call it, everything else to jump over these waters, these little ditches. Now the technology we deliver is like the advanced nuclear weapons, supersonic, hypersonic, is like that ditch. New technology super-passes, it's useless.

Q: The countries around America, Russia, China, they're aware of this, aren't they? They're aware of the plasma technology?

K- You see they all talk. One of the world leaders a few years ago said, I was with the Chinese ambassador in Brussels. He said to me, we came to the door of the embassy to accompany me into the building. And he said, Mr. Keshe, can we go faster? Can we go quicker through. He said, from the door to here, I'm responsible for you. In the embassy, you are my, you are under my protection. The ambassador, Chinese ambassador, came to the gate of the embassy to greet me to the building. (2:10). In a discussion, he said to

me, you are like an oil well. Whoever gets his hand on you becomes rich. It depends who can attract you to give you what you want. And we cannot tie you anywhere. This is the problem with you. This is why most of the nations don't like to work with you. You're asking for peace, you want to push this. This is 12 years ago, 2011, 2012, when I was living in Brussels, in Belgium.

And we have, they all know what is, and they all talk about the new technology. Biden talks about the new technology coming. The Chinese talk about the new technology. But Chinese now got the new technology. We signed ourselves to it. I have committed the Keshe Foundation to peace through the Chinese structure. With it, we'll bring the rest of the nations. And the policy of the Chinese government, you listen, you hear, you've seen, is to share, equal, to bring that ?? balance. And it needs time.

Somebody asked me, Mr. Keshe, yesterday in the talks in the Farsi, that if you have this, why don't you? We just brought it. They had to understand it, otherwise it becomes magic. Then we force ourselves. And surely, somebody, Knowledge Seekers, will bring the same mayhem as the others, because they think. Now everybody knows, nobody does. Everybody can produce gold. Gold has no value. Everybody can have food, just going on the line. You don't need anything.

So we have, with the new science, new technology, deliver a workable condition. I said before, with the same situation, Iran is worried how to feed 1.5 million Palestinians in Iran. Keshe Foundation will supply through Headphones. I guarantee that. (2:12). That there will be no burden on the Iranian nation for feeding Palestinians. It's not something we're going to do. Today, give me 1.5 million. We have the facilities in Keshe Foundation service centers to feed 1.5 million. They have the medicine. They'll be healthier than you. They'll be better fed than you. They'll be better than any of you. I accept the feeding of the Palestinians, if the Iranian give them the "white corridor." We are there, because we have the technology.

My biggest discussion with my Chinese allies is, we want the centers in China that we make sure everybody gets, because the Europeans and the Americans can cut the others from it, to control. We are wise. We keep servers in different positions. If what happened in one place, the others can support. You've got to understand feeding you 1.4, what you call, 8 billion people, is just a Headphone. My biggest problem is, how much Zoom can provide us line to one server? Do you understand?

And all of you have been through this system. You've been through it. You felt the change. You felt the joy. You went to the Moon of you. You went to the oceans of your imagination or your Soul. So we're not talking about ?? (fantasy). And we have enough material within our structure that we can guarantee medicine and food (for) all the Palestinians. (2:14). Just give them a Headphone. Just have the Headphones on the streets. If people are hungry, just connect to it... These are not anymore fairytales. Just go on .. pardon.

Q: I'm looking forward to what is to come, especially for the Palestinians. I'm a little bit disappointed that the way things are. And we just hope...

K- .. Let me explain to you something which I'm more worried. More children in the United States go hungry to bed, because there is no money to feed them. The figure... Your figure, just open, what you call it, if Rick, Mr. Crammond opens a percentage of children going hungry to bed in different nations, Americans are somewhere on the top. Africans can feed the children from the trees. My worry is to feed those American children, not to go to sleep hungry. And the rest of the nations. Have you ever held a child who's hungry when he cries? Does not know his religion and color.

I watched a report by one of the television presenters in the past few days. She was standing outside the hospital in Gaza. And the ambulances were bringing a bomb hit house, where the Israelis told them it would be a safe place, and then they bombed the area. (2:16). And they were bringing a number of ambulances. And in this process, one child, one or two years old, was brought out. You could see the child and the legs and arms hanging. And went in one direction with her, taking her. And the reporter said, this is a mortuary. That child is dead. They're just taking her there. He's not even going in to try to save it. It doesn't matter if that child is American, British, Chinese, Arab, Jew. We all die. That's one of the facets of being human. But what's the emotion in the mother and the father of that child? ...

Any other question?

You know you put here Security Council membership (on the screen). Very, very soon, this happens like this. Will be members of Universal Council members. United Nation has lost its credibility, and especially worse is the Security Council. These people who become these members of Security Councils, they bargain for every vote. I used to know an ambassador. And it was an ambassador who, we had a good relationship with. And every time I went to the embassy, I had to park the car in the back of the embassy. Security people opened the door, we parked the car. So he says, I never want anybody to know you're here. (2:18). The embassy was in like a hill type. It had a back garden in the hill. At the bottom of the hill, end of the embassy compound, there were tens and tens of secondhand cars, battered cars. And I said to the ambassador, this is an embassy. Why are you keeping this? He says, this is my business. I import, export car from here to my country. This is how I get paid, because my government doesn't have the money to pay for me as an ambassador.

Our ambassadors from the United Nations to the government are all businessmen. And they sell themselves to anything. This is why we took the voting right away from the Universal Council members, that they serve through their Soul, and not through bribery and cheats and the ?? words.

Any other question?

Q: ... How would you define a location? Is it the resonant frequency of the emotion of that space? We can tap into locations anywhere through the sensual experience or memory of that locality?

K- More or less, I call it the "GPS of the Soul." And it's different mine, than yours for the same location. And the same field strength, emotion, makes me laugh, but makes you cry, because your construction is different than mine, even though the same structure. (2:20). So when you speak about the GPS of the soul's position, it's the interaction of the fields with your Soul, even the position and the strength is the same.

These are, we can make systems for it, the way we copy the field strength of different things. And we can bring interaction of the fields of the position to create the Soul to manifest itself, or appear in a given position. This is very easy. But what happens if the system is not there and you travel with the strength of your Soul? It's very much like you drive a car to a destination, or you walk to the destination. You know the position. Now, up to now, we drive, or we fly a plane from New York to Tehran, and we know (we arrive in) Tehran, because we are ??. How do you do that with your Soul? You want to go to Tehran, but you end up in Moscow. You made a small error. You want to be on the ground, you land on top of a tree. Another small error.

So this is why man needs to learn, to test, to make grounds, to be. As I said to one of Knowledge Seekers, try to go to the room next door. Don't try to fly. Try in the same room, test yourself, see if you can be in another room. Try yourself by moving something in the same room through the Soul. (2:22). Not like, oh, I always say about the Italian guy sitting in a Barletta in the front room trying to move a glass. His face always stays with me. He was going, eh, eh, eh.

Learn the method of the Creator. And then you can do everything. You don't need a GPS, because you can be anywhere. It's no use you rendezvous your boyfriend somewhere between the Mars and the Moon, and then he ends up between Jupiter and Mars, and you end up between somewhere else. You have to understand both. My emotion, my feeling, my desire to meet, to be, to show the beauty of the Sun from this point has to be the same as his.

We are very good. Humans are very good, long-term emotional repetition, and remembering it. But when it comes to them actually doing it themselves consciously, they forget. You walk from one abusive system relationship to another abusive relationship of exactly the same. So you know the strength what you need to be abused. How come you don't remember where to go to enjoy? Self-denial, self, what I call, lack of understanding.

Any other questions?

Q: ... You have told us many times that you can annihilate military devices such as missiles, drones, etc. Now why can't you stop these wars? (2:24).

K- Man will not learn if I stop it. They have to learn to walk away from war. Man has to learn to walk away from killing. This is the problem with your genes as humans, or even dogs and cats.

Look at, you call it, migration. The whales, the fishes in the sea, the birds in the sky, the men on the ground, the animals in the cave. We travel the span of this planet to kill, to eat. Birds fly from North Pole to somewhere else to eat the fish, to kill, to get access. Man grows animals in New Zealand and Australia, carries it to the other part of the world to eat. A falcon does the same. The lack of absorbing energy to survive has brought all created things on this planet to do this. And it has to be uprooted. We have to change the condition that this does not happen, habitually, not happen. (2:26). And this cannot be done by magic. This cannot be done by disarming. This cannot be done by, if man has to learn not to make tools of war. Man has to learn not to kill to get energy to ?? do. Now we understand.

And in that process, we move to the next. Otherwise, it's all magic. We take it off one generation, and it's inherited in their blood, in their genes. The next generation starts killing (again). We take it to the planet Zeus, you start killing there. What's the reason? We kill, we become so much, we become so embedded in it, that we see it as our right.

The behavior of the American president in the past few days, and the Israelis, and the Palestinians, and the rest of it. It's no different than the wolves and the dogs in the wild. They gather collectively to go, to kill, to eat, to have. And then in that process, it's still a hierarchy of which dog eats first, and who's on the top. The same as what we saw. The top dog of the world goes to see another top dog, or little dog, who thinks he's a big dog, called smallest state in the Middle East.

I was explaining this to a friend of mine, Jewish friend of mine some times ago. I said, you know, Israel is like a Chihuahua. Very small, but barks the things. When you pass a Chihuahua by a big (German) shepherd, (2:28). and see how much it barks. This little tiny dogs, and they think they're big. And get them to be friend, you see how they walk next to the big dog, as I'm a big dog. This is the behavior of what we see with Israel. And a big dog being Americans, and actually the behavior of the leaders is exactly like a dog. Tear apart to be the top dog.

The American president, being in Tel Aviv, went to Gaza to see what's happening. Came there. We know why he went there. He went there, create, kill more. Iran gets involved. We use our weapons. Then we can control the rest. That was the whole purpose. He was not there to help. There is no sense. There is no gram of mercy in these people. Animal behavior. And we've seen it. Israel is very, very beautiful.

We're in Beijing, and we're near the hotel where the conference is taking place. And you look at the pictures of the world leaders, of the ambassadors, representatives of the nations, which President Xi has managed to bring to this conference. 113 nations. Some 20, 30 world leaders are here. They were here till yesterday or last night. And they all come as a friend. I come to find a common ground, a man who's there to give them all the same. If you look at it, I was talking to someone. President Xi has become like a grandfather, looking after the children and grandchildren of what we call it, the others. (2:30). And he's like a man with, you know, you go to the grandpa for the new year, you get something gift, or there is somewhere a solution for the problem. China has taken that position, but without a gun, without a single bullet. Americans are there as much as the Russians. What I was wondering is, how do all these European nations, while boycotting Russia in Ukraine, sitting in the same conference room as Putin, he was here. How many of them actually sat with him? How many of them did ?? talk to him? The respect and the honor which President Xi greeted Putin and the rest of the world leaders was the same. Some of our friends, they get extra dinner or some private something.

But this is how leadership has to be. And China is one of the most powerful nations economically, politically, and military. But the Chinese want to get rid of their military. That's their ultimate goal. To find a solution that the money we spend on arms, is spent on the nation. China has 28 million farmers below poverty line. They have poverty for ?? Xi, then trying to face these little dogs, creating more weapons to kill more, and it becomes a game now, who has better.

So it is how we bring this about and how we create that condition. And as I said, two mighty power of knowledge and sense have come together. You will understand very soon. You will understand much sooner than you can imagine. (2:32). I've committed you as Knowledge Seekers to world peace. You have to deliver. I'm just paving the road for you lot. You have to come up with the systems. You have to come up with the logics of understanding, and adding to, for the others to follow. Otherwise, you wasted your time being here 10 years. And we see that role, we see that path. And we have found our match.

Any other question?

Q: ... Can you give a definition of the STM and the STP?

K- Oh, can somebody does that? We've done that so many times. Which teaching? Can you have the references, please? (The North) American teaching people are very good at it. They've been through it, and they come up with these things sometimes. Alex is there.

R: Maybe you can give the current definition in the moment for right now.

K- The definition hasn't changed. Definition hasn't changed. The STM is a collection from the point of inception, gathering of every cell energy in common denominator. And the STP is the energy fields of every collective individual cell, which create physical parts (like organs & muscles) of the body of man. (2:34). And the interaction of the two and with the physical condition of matter state creates the emotion of the physicality or the emotion of the Soul. So when you have common denominator, the same connected to, that every cell is connected to, and then you have individual energy fields, which is slightly different, in connecting to your other cells, kidney needs to be connected to the blood ?? set. Heart needs to be connected to blood.

But at the same time, you have common denominator, which keeps all these together. And one is the conveying the energies, which each one individually, collectively, brings into operation of the existence of the physicality. One you call the Soul, and one you call the Spirit. So it's the central connection line. And they're still very much close, but slightly different. It's like being on a carousel at the end of the street. We're all connected to the center pole because it rotates us. But individually, we are there and we have a connection of it. What we put at the end of this carousel we sit in, the friction of it dictates how fast that center ?? of us, fast, in respect for it to go. And that's all it is. But we have a common denominator of all being on the circle of the carousel, as we call the STP. (2:36).

It's very, very simple, if you understand it. I mean, everything you have a common denominator. It's very much, if you look at it, you have a central government and you have a district. But all the districts work together in connection with each other, and in conjunction with each other. And at the same time, central government is there to run the totality connected. And this is the same.

The STM is created from the point of inception of the first atoms, which they make then, the next step of the molecules, and then through interaction and the memory ?? packages ?? which is, make the man in a physical condition. It's like you, I hold your hand, and on the other hand, you hold other people's hand. But the interaction with you decides how I react to hold you, to let you go, pull you, or whatever else. You're the collection, but the effect of those people holding hands with you in your circle, will affect how I react towards you. So, but you, in a way, represent all their forces too. So in the center point, I become the Soul. And the interaction of you with them, then with the group next door, and the one they hold on to the hand of, and then another person, goes to be the same, called the STP. The effective interaction of the fields. And the two are different strength. I can hold to a pole very ?? precisely ?? softly, but you're pulling yourself to death on the other hand. My function has nothing to do with you, but I still operate through, but I'm connected to. (2:38).

Any other question?

Q: ... Mr. Keshe, when the STM expands and transmutes and takes the STP and the physicality with it, will the one who stays watch the physicality disappear as if by magic?

K- It doesn't disappear by magic. It does when you write a letter, you get an envelope, and you would, you put that letter in the envelope, is it magic when you close the envelope? It's the lack of understanding. You create an envelope of energy. But inside the STP and physicality, most probably. The physicality changes, because you change the fields. The same as I explained, when you appear in a place, you manifest yourself in respect to the field interaction of the Soul and the STP and the Inertia of that planet. When your Soul expands

beyond your physicality, now your physicality is in the new condition. You don't know what, how your .. physicality shape is inside your Soul. You know your shape when your Soul is inside and you interact with the Earth. And the funny thing is, you'll find out you have no shape. The body of the man becomes a plasma when it's in the state of physicality within the Soul. And total energy of the STP dictates the position.

This shows Knowledge Seekers don't really understand the depth of the knowledge. (2:40). Because now you're in a different environment, gravitational field forces. Up to now, you were a letter. You're sitting on the table. You are, it was you. When I fold you and put you in the envelope, you're still that letter, but you're inside something else. I don't see you anymore. It could be water in there. Somebody could shred you. It's all what happens in there, because all I see is the envelope. And this is what is with the STM, and the STP. And your dimension of the manifestation inside your Soul is different than when your physicality is dictating, imprison the STM.

But the beauty of it is, it's of a different order. It's of a weaker. So it opens you up. Man, in time, will make systems to see the shape of their own physicality when the Soul has expanded and takes dimension.

Any other question?

Q: ... Can you please let us know when delivery of the Cosmic Ray Communication Bundle begins? Thank you.

K- Oh, we are making it. It's so hard, they are making it. Those Cosmic Ray Bundles are coming after now. (2:42). They're completing for those people who bought the Universal Council, what you call it, the UBESUS. After the, what you call, the London Conference, those kind of processes, delivery starts. It's not, it's just there's so much happening, and with the limited, what you call it, structure, and the London Conference. But they are ready to go. The production is, I think we can produce one a day, at the moment. And they're busy, and they will come through. The first stuff, those of you who bought the, what you call it, Universal .. Enhancement Units, some, I think, start shipping. And most of you who come to the conference in London, it will be handed over to you. So UBESUS and the use of the doctors, see what you call it, patients can start. And I think we have enough for those to go through and the balance. And then, your Cosmic Rays Bundles will start floating. It should be before the end of this year. It's just that in the process, they have perfected so much these units, that it has changed shape in so many ways. But now we come to the point that we are not going any further (not making any further changes). We have to get these things done. And then we'll go through the release.

The Energy Units will be coming out of China. We're just trying to see how it's going to get done. It has to produce, because we wanted to produce in limited numbers, but the Chinese want, as usual, in millions. I think it's what we can do to ourselves. We changed the... (2:44). If you are a doctor and you want to bring patients to the Enhancement Units and Enhancement Center, you can just go and ask for a license. There is a license set up for it. And you can bring patients in. We are the Wellness, what we call, center for use of UBESUS has already started.

Any another question?

Q: ... Can you please explain the phenomenon of apparent death?

K- What?

R: Just the phenomenon of what we call death. Can you explain that phenomenon of?

K- What do you mean by that? Physical death?

R: I think that's what she means. Apparent death of the physicality.

K- We've done that many times in the teaching. Please go on it. It's very easy. A few weeks ago, we explained that too.

R: Ok. There are ways. Remind people there are ways now to search the previous Knowledge Seekers Workshops. There's PDF's and documents available that are searchable of the transcripts. The Brazilian people have been pretty good with that.

Q: ... If I mix dried CO₂ Gans and Sodium Hydroxide, NaOH, in the same amount and put boiled water on it, what remains? CO₂ or ZnO? I know you told it some time ago, but I cannot find it again. (2:46). Thank you for all you do for mankind.

K- Can we answer the same as the last question? Go out and find it.

R: Ok. Do a search. You can literally do a word search with that, actually, and maybe even find it.

Q: ... Can we eliminate satellite Internet and develop an uncensored universal MaGravs based Internet? And will we need any sort of cables or antennas to transmit Internet in the future? Thanks.

K- No. No (you won't need cables). We are testing. Not testing. We actually developed it. Absolutely works perfect. One of the things we'll do after the London conference, because there's so much on our people, is to convert the Internet data into universal data. I'll explain this in more detail. It's something I've had in my head for a couple of years. But now our teams have understood how to make the connection. Now we have to go back into, actually, data transfer interface with our new technology and the old technology.

So let's say you put the information about Google. Everybody gets access to it. But there is no need for satellites. In past few days, we are working on to call upon the Satellite, those of you who became the Satellite (Souls), to join us when we started the what we call, (2:48). the peace process in a very enhanced way. I was talking to the people at the Foundation that it's time to call in those of you who became Satellites (Souls). Especially on the verge of what we saw in Palestine, to be able to change, to bring that change. But there is a piece of what I call, "hardware" needs to be completed in two days, in next few weeks. Then we will come to you as Satellites, where we eliminate the presence of ?? my system. You will understand. And you will feel it, and you will see how it will work. We'll call, hopefully, once it's completed.

It's completed. It's just that we don't have time to connect it. We can transfer digital data into universal line of communication. In a way, you make a movie here. You connect it to our system. If, let's say, you send it to the Moon, takes, let's say, for example, 10 seconds, you put it through the system of the Keshe Foundation, it will be instantaneously on the Moon. I'll explain this.

We already implemented this system in our latest. That's why we have this. You ask for this, what you call, units to be, when it's going to be delivered. One of the delays has been this. We were completing part of this process. If you remember, a few weeks ago, (2:50). I showed you the new Head Enhancement Units. (Just one second. I have to find my share then go to my photos. Let's see if I can dig it up. I'll show you. You understand what it is). This is what, if you remember, we showed you, which is literally now connecting to the UBESUS. This is taking over, literally, the job. But if you see, this is a communication system part of it.

But what even has been in the evolution of the development of the technology, in the past few weeks, while we were finishing this lot, has been the evolution in the technology of the Keshe Foundation, as we are developing. Cannot be stopped. And we had to draw a line up somewhere, that, when we're going to let this go out. And I think we reached the point that we can let go now, the, what you call, the new systems. This is going, we can, at least we hope, to be able to allow, at least partially, for you, or the people, to start using this. And it's just that, what will be the next step in evolution? What will be the next step in development? (2:52). That we don't need to stop. At least you get this model, and we give you the next model, and say, oh, you could have done that. It's just that we can carry on forever developing, and forever completing. But there's a line of drawing, and this communication, Satellite communication.

Now we have done this. It's complete. But it needs to be connected to our systems, that it can work. But it had to be done in a slightly different way. And our team has managed to get to that point, where the new system are different than even you see here, slightly different, but totally effective in communication between the Soul, the STP, outside the body of the man. And many of you, you will understand, once you get the systems, and you connect it. And you cannot connect to our health system. It's connected to a special part of the system, which is for you and your Soul. I'm saying, especially with these new ones, don't share it. Do not share with no one, the new Headphones, because it's so part of you. It's another extension of the energy fields, and you don't want somebody else to go in it. And the medical ones, the Wellness ones, are totally different. They're structurally different. They are put together different.

Any other question?

Q: ... (2:54). Can you explain why I am able to raise people's vibrations? Thank you so much.

K- What, has a girl told you that?

R: Perhaps several people's vibrations.

K- I don't know.

R: Well, I mean, some people, when they walk into a room, they just sort of naturally raise the vibrations of those around them. I think you might have that problem as well. You know, it's people tend to sort of raise their vibrations when your presence is present. So perhaps he has that quality, or?

K- I don't know.

I was talking to one of our friends recently, last few days, actually, and with a translator sitting at the table. He said, this is the problem with you. We notice when you come to the meeting, you bring something different. I said, not really, but we bring the knowledge. And that knowledge brings love, and brings emotion of equality and sharing. And those who fight it usually don't want to see us, especially after the event.

I always said, I give so much love that when you don't receive it, you feel that you're deprived from it. That hurts more than actually not giving. You deprive yourself from it. (2:56). And that's how life should be. It's the same with the knowledge. We don't stop sharing knowledge. And it's just you're so hungry to learn more, you come back for more. And it's shared equal amongst. And that's how it should be. Do you get a vibration? Do you get the tinkling, oh, it's 9 o'clock, the Knowledge Seekers starts, so I have to be there. Or is it something you do out of obligation, I have to be there, it's there, I might learn something.

It's the same as I told you with Netanyahu, we had this problem. When a world leader tells Americans, whatever, that I don't want to talk to Keshe, because I know he will win, he'll get his way. So it means he's already aware of the power of peace, what we implement, and what is going to be done.

So yes, we all create different vibrations. Some of us vibration of love, some of us vibration of joy, some of us vibration of fear. But depends on that vibration brings ?? . And how we feel about it. What we find peace with, and within, and amongst us, ourselves, between the STM and the STP. (2:58). And who can give us that vibration, that peace? Does not have, does not need to be in love and going crazy. The essence of peace, comfort, joy. And then we find peace with ourselves, and we function differently. And somebody comes in, he brings a vibration of fear. Everybody is afraid, what is going to be next?

And it's part of us. And how we want to perceive, and how we want to be, and how we give. Do we give a vibration of love and joy? Do we give a vibration of fear? Do we give a vibration of sadness? Some people observe, they receive it, and they react. And when I used to run business, all my staff, my secretary, staff of my company, they always say, you know what's the problem Mr. Keshe, you work and talk with us the same as others do. We don't feel you are the boss. I said, I'm not a boss. I just happen to be able to put something together that we work together. When I used to go into factories, or into offices, when the, (3:00). I remember occasion in Manchester, we bought new machinery, and as usual, I always walk with a tie, with a suit, and jacket, and everything. And a machine, the guy couldn't work it, and had a problem with it. I just took the jacket off, and I went behind the machine and start, Mr. Keshe, you are with a suit, you don't know. I said, I never bought something, I don't know how it works. And I start producing. With your ties, with your suit. I said, doesn't matter. Don't get fooled by the suit.

When I was in Iran in 2008, there was a material which was brought in, specially for one of the reactors. They used to take me into secure factories to build these things, because we had to get it done. And they had these cutting machines, ?? machines, very advanced, most sophisticated things they have there. And this guy couldn't cut. And every time he came to cut it, broke the tip of the machine, of the system. And I always was there as a scientist, who was there to observe the parts are correct for the building of the new systems. And this guy couldn't cut it. They brought the material, especially for me, from Japan overnight for a special part of the reactor. And I knew what it is. I knew what was going to be done. I said to him, it's a big factory, machines everywhere, sit there, and they all get this, all get this, ?? carry ?? their time. And I could see the guys getting more ?? . I said, what's the problem? He said, the tip melts. I cannot do it. I said, can you move? But you cannot. I said, can you just move? And I just set the system, I just set the tip, because I knew what the material was. And I cut into the material like a button. But you are, I said, I have three degrees working on these machines. (3:02). I've done three engineering courses. I know exactly what you've got. You haven't understood what the material is. That's why you lose your tip. And I stood there teaching them how to handle material.

Never gets fooled by the clothing ?? (we wear). And it was all oily. And if you work on these machines. I've been trained. That's why I build the reactors by hand. I'm not a theoretical scientist. I've been trained. I have engineering diplomas and everything. Not just theory, working by machines, building things, cutting things, mixing things. And this is how it should be. And that, when I, in Tehran, when I cut, they ?? brought me back in the factory again, too. There wasn't there that guy with a suit, a foreign guy, just coming here to do something. It was something we can learn. With my work, it's the same. He's there. Trucks come in. I took my jacket off on the back of a truck. Let's load, go, because it has to be done. But you .. It doesn't matter. It doesn't matter what you wear. Doesn't matter. It's just that you create that. They feel good. They feel you're

part of them. And they work as part of it. So it doesn't matter. You bring shivers or whatever, or depends what you do. With one, you create the vibration of joy. And in the same room, the other one has a fear.

Any other question?

R: ... Thank you, Mr. Keshe. We have one last thing to deal with. And let me show you a secret message from the boss here on the Keshe Foundation store, (3:04). which has a new product. And it seems to be, it has that vibration of love and something made with hands that you also mentioned. And this is the Keshe Gans handmade crochet star, symbolizing a new beginning through the worldwide implementation of the Keshe plasma science and technology in exchange for peace. Simply hold it in your hands and feel your inner peace expanding. It comes in a range of colors and can be customized. Here's a sample.

K- This is one of the new things that has been added. So a lot of people have been asking for something we can hold it. We can go to bed with it, I presume. It's got the mixtures of what we think is the right combination for that kind of emotion.

Any other question?

R: I think you pretty much covered them all today, Mr. Keshe. We went sort of double over time there. And thank you very much.

K- Thank you very much, indeed. Hopefully, we see you next week. And as we are organizing the what I call, the London conference and everything else which goes with it, we enter a phase of direct public relationship with Press and the rest, (3:06). which we were blocked and we kept away for nearly 10 years. The promoter's job is what we brought this team to work with us for about a year. And to bring the Keshe Foundation into public, public domain. Where you say we are not seen, because the situation with the Alan Sterling is ?? turning more or less blocked it. Because we received a barrage of attacks and all sorts of threats from these hooligans. Now everything is in the hand of the agencies. And at the same time, governments, officials, and securities are standing behind us. Any interaction will be handled accordingly by them because this peace conference has to go through. And it has to be, what you call it, implemented for world peace.

Those of you who are like Palestinians, whether Israelis, Palestinians, trying to destroy something for them to say they exist, you are not short of what I call, ?? ?? . Try to, we come to you next week or two, for you to go mass out. At the same time as our, what you call it, promoters go out for world leaders, for the Press in your countries as they have a limited structure for you to reach your Press, whatever, promoting this conference in London. And as part of our conference and work, world leaders are given a special Zoom connection that they can attend in the background, the whole, what you call, the conference.

Thank you very much for today. And I hope, I wish, and my Soul goes, for the world leaders, (3:08). especially Ayatollah Khamenei of Iran, to open the "white corridor" and bring shame to the nation of Israel and the backers of the Americans. That there are still people there who can give a home to homeless. And you don't need to kill people in their hospitals when you tell them to go there .. to be.

Thank you very much, and see you next time.

R: Great. Thank you. Thank you very much, Mr. Keshe, for another Knowledge Seekers Workshop here...

K- Just to remind you, those of you who want to register for the 27th of November (24th of November), the light, what we call it, between your hands, please, (3:10). because we're going to stop this. There is a limited numbers we can accept, the system can support. So we close this very soon, because I got an idea of how many people we can carry through the system. So please complete it, that we know. And we stop, we close this, we close the, what you call it, registration with that one.

R: Mr. Keshe, you said 27th. And I think the advertising is for the 24th. The 24th of November would be a Friday...

K- .. 24th of November. Oh yeah, that's the, we have a session 24th of October.

R: There's another one the 27th of October on Friday, I think, coming up next week, right? That's for a different one. People can go to the website and have a look. You can sort out the different dates there quite easily.

508 KSW October 19, 2023

END

509th Knowledge Seekers Workshop October 26, 2023

(Transcription, Proofing done)
(Auto transcription by Elias)

Transmutation cornerstone of teachings - navigate with emotions of Soul; Fuse energies than manifest matter; Convert mass to energy; Change effect whole planet; Open up matter like Gans; Receive constant energy - no worries survival; Convert energy from air to seeds - receive 100%; November beginning - create light; Ca seed every cell Black Hole attaches to Bone Structure; Ca Common denominator fields force - spectrum fields; Organs held by Ca in vertebra; Lungs brain no muscle; Control Ca no cancer; End of birth defects; Don't slouch change M fields; MaGravs - cell structure; Animals without bones; Other planets use different element than Ca - create through emotion; Change RNA - change to different animals; Detach from P; Medallions London conference; Vatican -Americans - Illuminati's imminent destruction of Iran take Central Bank; Countries to Stone Age if attack - warning; Absorb energies to feed STM & STP; True love rare experience; Outside trying to block showing of transmutation; Chinese have accepted T - no need for CNN - time of implementation - have to create academicians to confirm T; Insomnia teaching - remedy; Difference between Globalists & KF

ENGLISH TRANSCRIPTION

(:15)

K- Yes, thank you very much. Good morning, good day to you. As usual, wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation Space Institute. (:16) We welcome you back, and as usual, we create you more headache, and we'll see how you solve these headaches. And one day these headaches will become pleasurable. The pain of it is that we cannot understand it fully, so we have to cope with it. One day we'll understand it, one day it becomes useful, but we still battle with it.

In the science of today, in the knowledge of today, in understanding how we move, how we transmute, how we transport ourselves, is part of. Is a cornerstones of the work of our teachings. The teaching, according to many of you Knowledge Seekers (KS) is going too fast, and some of us are getting bored, we are not going that fast, we want to jump, we want to fly, we want to go all places. The flying and jumping and the rest of it, it's much closer than we can imagine, as technologies are getting developed. And the evolution in science goes up.

You got to understand, a lot of companies, a lot of organizations, use the knowledge and the teaching, and then they add other bits to it, and it appears on a different type of technologies, but essentially, is Keshe Foundation, knowledge we brought in, and the enlightenment, in the knowledge they have received.

One thing which is important for many of us, and in one of the teachings in the past I refer to it, is that when you travel, when you go from one position to another, when you decide to go by a, let's say UFO, or one of the entity, and then decide to convert to the Soul, transmutation, and come back again in a physical dimension (D), and then move. In so many ways, very much is like going on top of a cliff, for when it's over the mountain, you walked it all the way up. You're too tired. You don't want to do. So I used my Soul to get down. (:18) Pew. It took you days to get up. But now you had enough. It gets too cold. It's too windy. Physicality (P) suffers. I use nowadays parachute. Today I know how to do it. I use my Soul.

So the most important thing is what happened when you make a jump in the dimension of the Soul. And you land up in the middle of a stone. How do you get yourself out? How you, instead of landing on the surface, you find yourself 20 meters below the ground, in a cave, in a hole, whatever. These are all going to happen to us. We are not all mature, as we have accidents today by the climbers and divers. It will, we're still the same. We still make these minor mistakes. And how do we adjust it? And how do we get ourselves out of it? And where is the emotion which plays this? You might find yourself in a stone and say, oh, I didn't want to come here, but it's much nicer. I want to stay. And how do you let know others that you're alive, but you're hiding in the stone? And these are not a fairy tale, not fancy, but sooner or later, one by one of you as Knowledge Seekers and your next generation has to handle it, has to live with it, because we are, even in a thousand years, 10,000 years, infants in this knowledge of the Creation.

But what actually happens to us? How do the energies stay separate? How does the Soul of the Man (STM) in its field dimension keeps the Soul of the Physicality (STP) in dimension separate? They don't become one. And what happens when they become one? What happens as, in a way, energy packs amalgamate. Fusion in the matter state is impossibility. (:20) Doesn't matter how you play it. If you understand the principle, you can create accidents. You can do whatever you like. But fusing to ?? come out is impossible in the matter state. But fusion in the energy state, in balancing the fields, is everyday occurrence. This is why scientists have not realized. If they go into the dimension of energy, and then amalgamate the field forces, they can come out as the fusion. They're in the matter state.

And this is what, in the coming time, we'll teach, we develop by the scientists, in production of alloys, in production of new materials. We don't melt anymore the zinc and the copper and something else to get that

alloy to make, let's say, a bronze. In the transformation, in transmutation, we mix the energies. And then in that conversion, you get an alloy. This is what the UBESUS (Universal Body Enhancement Spaceship Units) are set to do. And this is a secret which we have never taught. We will not teach this last part till man is ready, because it has a lot of implications.

It has a lot of applications, you suddenly convert a huge mass into what you call energy, into mass. And then the mass cannot hold, cannot take, cannot handle. For example, as an energy, you're an energy pack. But if I convert you and you make a mistake in conversion and become a mass, and then you suddenly are a ton or 10 ton, and you appear on the plane, you know what happens to the plane. The crash is inevitable, because it's not programmed for it. So these are the things that man needs to understand. These are part of the technology (T). (:22) How do we, how we allow the new science to be developed?

This way, you use all the furnaces to melt the metals, measure them, put them together, and then pass them, and then do something else with them. And then you get it, and then you have to cut it, you have to shape it, you have to do everything with it to change it into usable item. And all the energy and all the effort goes into it. Where with the plasma technology, you convert, you extract the energy from the space into the box. And in the box, you convert it to matter state, to the shape you want. There is no conversion, there is no refinery, there is no work to do to create bars of copper and the rest of it, and then in future use it.

Now we see how much this new technology will change us. When now you buy a washing machine, you have to have a motor, you have to have a power supply for it. If you understand how to use the new energy for even washing your clothes, you'll be baffled. All you need to do, you put your clothes in the box, and the box is pre-primed for so many energy transfers at all levels. The dirt as energy lifts you up from your clothing. There's no need for water. There is no need for new ways of doing things. Now you understand. What is coming, these are all in part of the patents which has done years ago, in different ways, we have touched it.

So how do we do it? How do we create that dimension of the field energy that even touches the matter state? How do we come to see the evolution in the science that they'll touch all our lives? (:24) In every aspects of life, from the animal in the jungles, from the man on the streets, from the bird in the sky, everything will be touched by this new technology. But not in a way, new, always been there. We are created out of it, now we understand it. It's the comprehension of the development in man's, what we call, level of understanding of his own creation. To what extent, to what limit, we can expand this? It all depends, as I always said, into your own level of understanding and the trust in what I understood, does what it says, and I can create it that way.

Knowledge Seekers who work with us have seen how I work. We need something, I said, "This, this needs to be done." And you get what you... spend years producing the Gans's and whatever, it's done within second. But, if you don't understand the basis, the top is very hard, and then using it the way it should. How do we, how we actually convert a matter into energy? All we do, we create an environment, for the plasma of the matter state to open up, and become manifest itself as a energy in it's dimension. Isn't this what you call it, Gans's production? When you produce Gans's of copper? Isn't this the way we absorb fields as a CO2 or as the others? And then we understand more about the facts, about the dimensions of Creation. (:26)

This is what, when I explained to you, go back weeks and weeks ago, with a collaboration, with new collaborations, you will have 3, 4 thousand, 10 thousand new items from the Keshe Foundation. Because, even your washing machine is not needed anymore. You don't have a water, it doesn't wash. If it's not heated,

it doesn't do. If you don't buy detergent, it doesn't do. You can imagine, the hot water, the motor, the spinning, the detergents and everything else, the softener, all goes through the window.

And the beauty with this technology, the beauty with it is, once if you understand it, there is no dynamic system. We can make it all solid state. Then this brings you to the next step of the science, technology and development. To what extent we will extend the knowledge. To what extent we extend to what we had up to now to change. We saw at the beginning as an intro about the car. Now you can imagine what happens with your cooking. Would any of you ever cook? Or would we create an environment with like two headphones, two microphones, two speakers in the room, and continuously releases energies that we need?

We've seen certain races of man suffer from certain diseases, because their environment doesn't create the energy or magnetic (M) field that they need. Now with the system, you don't see diseases. Because it's always there, because the system provides it. (:28) Would we ?? take shape? Would it change our emotion? Would it take out of our worries? When you don't need to worry about food, feeding yourself, what's going to be next? What things I have to do to just keep alive? If you look, if you understand the life of the man on this planet, it's one of the most miserable ways to live anywhere in the universe (U). You open your eyes (in the morning), you have to feed yourself. And to feed yourself, you have to do anything to keep that food on the table, that you have enough energy to wake up next day, next week, next month. So 80% of the man's life, even subconsciously, or consciously, spends on survival. When you have these systems, that goes out of the window.

Your time goes in, when, how can I heat myself? How can I go somewhere? When you understand you can transmute with your energy, you can go anywhere and through the interaction of the fields, you can create a heat with you, within you, then you understand. A lot of things goes. This is the beginning of the end of the governing. This is the end of the, in a way, man depending on the sources of this planet. It's detachment from ?? that. And these systems, sooner or later, will come into the market. Keshe Foundation, Knowledge Seekers, those who understand the technology, will add to it, will come out with it. Then, we see how life will change. (:30)

In next 10 years, once the new science gets hold, we will not recognize our lives, the lifestyle, the same as what the computer did with us, the same as what a mobile phone has done to us. Life without depending. Now with your mobiles, you don't need to be stuck to a wall and have to be there (where the phone is). You can do and talk, anywhere you want to be. With computers, the intelligence, the amount of information we can gather at the fingerprint. It is different, and we had with that fingerprint, we were used to write and scrub and do something, open books, something. Now you say what you want and it's there. It has brought new evolutions in man usage of his time and the knowledge and common intellect. What would be the next step? What's the next stage? And this is part of the work we do, this is part of the work, our work as the Keshe Foundation is.

Would it become the time that you literally, from point of inception, birth, to the point of death, could be 50, 100, 200, a thousand years on life, you never eat food, you never get sick, you never feel cold. You don't need to work to guarantee your survival. You survive because you have learned how to tap into the energies of the universe. Then you understand life will change in a very, very drastic way in how we interact. How we see things, and how do we actually feed ourselves. (:32)

What's the secret of feeding yourself with the plasma? Have you understood how you feed yourself in the matter state? Have you understood how what you eat as solid food becomes energy within you? Then, have

you managed to understand, you take this, whatever it is, an apple or grapes or whatever, you put it in your stomach, create a Gans to absorb energies from the environment, and in the process of it, you release fields. Now, how can you create that seed of energy within you, but you do not need to eat, that attracts the totality of 100% energy you need to keep your physical life going.

The session of, what we call, November, at the end of November, with the light, is the beginning of this process for humanity. One of the most crucial points, this coming Friday, we have the session for what we call, the process which we want to see, how we can elevate, how we can mark the structure of the STM, in its dimension of physicality. And many of you are coming in to see, to be there.

But the, what we call, the November session, it'll be a massive, massive change. For those Knowledge Seekers who have understood, and are ready to start the change. (:34) If you understand, how you can create fields energy, maybe you do not see it on the level of your vision strength, but you create that. How you can use that? How you can understand that energy to create transmutation? To create field of energy that your body can absorb. That you do not kill, you do not need to go to the next step of destruction, just to guarantee the physicality stays together.

Now you understand, gradually, gradually, we are taking you as Knowledge Seekers to next step. But you have to understand, the processes you've been going through, it prepares the Soul, it prepares the physicality (P) for the next step. And we are reaching that point. Within the next three or four weeks, as we go step by step forward, and we do other different developments, you should be able gradually to do what you see, a light between your hand. And how do you use this? This is that kindle which you start a fire with. And if you don't know how to handle it, it dies out. And say, I don't know how to make fire. Because you have not learned how to start that kindle, that first light. And as is magnetic gravitational field, that kindle of plasma will connect directly to every aspects. Then it comes how you emotionally move it. How you use your emotion to create a condition for its interaction, for its development, for its usage.

It's like having a flint in your pocket. Whenever you need, you start a fire. (:36) And this is where the knowledge and the technology comes. This is where I told you in the past few weeks and months, the revolution, the evolution in science is coming so rapid. It's coming in such a speed, that so many of you, you will not even feel it when it hits you.

So what is, how do we create a transmutation, a transportation of the fields that allows us to create that "kindle." How do I use my emotion? Or, how do I use my emotion for it not to go too far? I'm looking for energy and the level of the Calcium (Ca), because my body needs a Calcium. I don't want to produce a Uranium by accident in my body. It's one of these, what we call, gravitational (G) fields. It's... If the world of science, for example, could understand the existence, the dimension of the life of the man, and why, for example, you have Calcium in every cell of the body of the man, then you understand how you can negotiate your ways.

What is the purpose of the Calcium? Why do we need a Calcium in our body, in every cell? And what happen if we move this Calcium? The only reason every cell of body of the man, created, be it in bone marrow, be it in any part of the body of the man, has a Calcium, is one reason. (:38) Don't forget, your body is in a plasma field, it's in a ?? vacuum of itself. It has structures, it has Black Holes. And the Black Hole of the body of the man, to hold everything else, is the bone structure. So when you have Calcium in every cell, in connection to it, it keeps it together. It's a common denominator field force that in it, keeps your muscle tissue near the bone, holds it. It holds your leg tissue together, because then it's a, what you call, muscles on

the bone. And then in your blood, it keeps circulation. But it's there, it's a dynamic plasma of the Calcium moving around.

The only reason we have Calcium in every cell of the body of the man, is to keep our attachment to the bone structure. And it comes from the bone. And then, if you understand this process, it comes the next step. What happens if I get leg gets amputated? Aha, I need that mysterious thing, Calcium, that is always there. And then instead of ?? growing in one day, it grows in one hour. This is the development of the technologies which is coming forward. This is what you should not be worried, if you become even that reptile, will lose his tail, in two weeks time he'll have a full leg, in two minutes you'll have your leg back.

Now you understand, the extent that this technology, the knowledge of the technology, will bring changes to man. When I go to another planet, the Calcium is a vapor, doesn't even exist, because the dimensions for its magnetic field (to) exist, doesn't exist. (:40) There is another denominator which can give me that. And then if you understand why you have Calcium in your body, and then you understand why you have Zinc, why you have Iron, Why do you have Copper (Cu) as the components of the physicality? Don't forget that Calcium has as a spectrum of the magnetic field dimensions. It dictates that field condition of Calcium, what strength field is absorbed near to it, and then it becomes a tissue cell of the heart, or becomes a tissue cell of a lung. And then you understand why our lungs have no muscles in it. Because the Calcium has caged it, does not need no muscle for it. Your structure of your rib cage has dictated no muscle tissue.

The structure of the brain of the man has dictated no muscle tissue in the brain. And when the Calcium is in its form of itself, you have to attach other things to it, which we call muscle tissue. If you look the structure of the bone structure of the man, the structure of the marrow which is created within the structure of every single bone in the body of the man, dictates what kind, what structure of the muscle tissues and material you have. If you can control your spine, your vertebra, with the right Calcium condition, you'll never get any of the diseases which we see. (:42) Then, even cancer becomes impossibility.

The world of science has not understood, how Calcium in a structure of every cell of the man, and the bone structure are connected to each other. Because, we never understood, our body is built of Gans's, it evolves, it's field strength, its dimension. The field strength created in the rib cage, in the flat dimension, dictates the expansion of the Calcium in the structure of the lung. When you get old, the rib cage, the .. ?? bends in, you change the dimension of an interaction of the field of your lung. Then you open up the others to move, to create, and the lung tissues are created, and then you call it, cancer in the lung. Isn't that the same what happens in the breast of the woman when she gets a tumor?

Now we understand. If man understands the principle of creation in his own physical body, man will conquer the universe. This is what we have to understand, this is where when we get involved in the process of what we call, Wellness we do impossibilities. We can reach impossibilities. But you have to understand at this ?? time, our doctors have to understand this. Otherwise it's another magic, it's another prescription, another tablet out of the box. To them, have this, god knows tablets, to them you can have this vitamin, or you can have this antibiotic. (:44)

Then, man never gets sick, then man understands, by his own action, he can change the Calcium combination energy, and walk away from any diseases. The slight change in the atmosphere, in the dimension of magnetic fields of your kidney, gives you kidney stone. But what is the stone? Whatever you made, what changed the gravitational field in the Calcium, that it led to this dimension?

Today's teaching is to open your eyes, in understanding and application of life, of man, within himself and within his environment. And then in the future, those who understand, will start making these machines. Mr. Keshe said, "It's Calcium, I have to do." And then I want to see how many of you are in back to MaGrav business. Is out of fashion now making MaGravs. Now we have to find the Calcium. Now we have to find this. This is why in the teaching of last week, I showed you the shape of the brain, and how, in fact, how it's been changed to fit the Inertia of this planet.

Then you understand, how now the physical structure of ?? it sits there. Why in the shape of the skull dictates the intelligence, dictates behavior, dictates the outcome of the future. Why, for goodness sake, doctors never understood, we call them all sorts of diseases, and we have no solution for it, with paraplegics, with the children who are born deformed head, in the birth tunnel, where they were perfect inside. (:46) If our scientists understand how to manipulate the Calcium structure within the deformed brain, the physicality of it, when it goes through the birth and understands how body does it, then we don't have these handicapped children for a lifetime. The scientists solve the problem at the point of birth, create the fields, that it creates the Calcium in the right direction, in the right position, as it's the Calcium of the child. They measure it's magnetic field, they understand it's plasma structure, and replicate it. Then, we don't need these incubators to keep them. We keep them in "plasma incubators," which the body is adjusted to perfect the child at birth. Then you understand, for man to be imperfect, for man to be sick, understanding the plasma technology is impossibilities. Then life is for eternity.

I had a pleasure this weekend to be in a conference, where the man literally sitting opposite to me, next to me at lunch. ?? away, another one is 122 years old. You look old, but as fit as me, half his age. Because, in structure of the environment, in the structure of the food we eat, they have managed without knowing, to trigger this Calcium. to trigger the position of it. When you look at the people, tall people, short people, at old age, walking high, walking tall, walking broad shoulders, you hardly see them sick. Because they keep the posture, they keep the magnetic field flow as it was young. When you bend in, you change combination, (:48) and you bring yourself, field strengths variation in the rib cage. Your ribs when you're young has a certain distance, that gravitational magnetic field gives you young, gives, allows you to absorb energy as you need for your Soul and your physicality. As you bend in, these two ribs move one millimeter, two millimeter closer, now getting changed. The field strength is changed.

If our doctors or scientists understand the totality of the field interaction in body of the man, goes back to what I told you, the guy who came to the Senzano (Italy), and he was a guru, he was a prophet, because he went seven times, 21 days, he could feed himself without eating, then he became magician, and the guy bends and kisses his foot, because he could do it. I couldn't do it. Now, every one of us can do it. No food for millions of years. So, the whole of the rest of humanity should bend a million times. The guy hasn't eaten for ten years. We don't eat for hundreds of years. Sorry, on planet Zeus and on the Moon, we have no petrol market, we have no fish and chip shop, and we have no grass to eat. So, and the food has run out, you brought yourself in the backpack. Do we fight for the food? Somebody else has it, and what happens when his runs out? Or, we learn how by absorbing different fields, we change our posture, we change our energy absorption. We use the air as that food, as that package, which absorbs the other 80% from the environment. (:50)

You got to remember, everything which is on this planet, comes from the air of this planet. And if you can absorb the right breathing, the right energy from atmosphere, you can use it as that source in your body, which absorbs the other 80% from outside. You bring it in as a matter state, you convert it into the Gans, and brings its energy from the universe. That's the secret of life. This is how the future generations will come to

understand how to live. How to expand, how to survive the span of the universe. You create the condition that the energy in that point is used, the way every plasma within your body carries life.

In the physical life, you're connected to Calcium for your physical structure. In your plasma life, you don't have such a thing. We have energy fields of the plasma of Calcium, somewhere in our brain, of what I call, plasma of our Soul, partially in our plasma of our physicality, but if you go on the planet Zeus, Calcium has no structure, so you'll be just a jelly on the floor. Or, you can absorb, understand the process of the creation, and according to conversion through the emotion of the physicality, create the Calcium of the place, time and position, to give yourself the physical structure to survive. But in that planet, there are no air, the Oxygen combination, the Nitrogen combination, which we use. So, you change the dimension of the rib cage, to become, to absorb the energy from the environment of the place, (:52) to feed the Soul. And create the energy field, to feed the STP, that in between them, they create the energy of the physical life, that interaction with the Soul and the Inertia of the time and place, does not matter, there is no planet, it's just the open space of universe, or in the depth of the oceans of the deepest ocean in the universe. You still can create life, then you have no worries, if you manifest in a stone, or on the top of the mountain, in a place, there is nothing but fields.

Then, I wonder how many of you will come back and says, how do I make MaGravs? Can I get 10% energy reduction? Where the whole energy of the universe, the process of working with the universe, creation of the cell structure of the universe, sits in the MaGravs. If you look, the curvature, the twist and the turn, in every coil of the MaGrav, did you look at the MaGravs, the coils of the brain we showed last week, is just piled up on top of each other, different than ring. How do you play with it? Why when I do this, that happens? When I... because you only look at the physicality, look at the structure of the fields. To what extent we have to "spoon feed" you, one by one. I think the generation would have been a million years old. Or is it nice just to be spoon fed and says, "I haven't eaten yet, give me more."

This is what knowledge is, this is what it gives you everlasting life. This is a fountain of youth, the knowledge of the man about his own creation, (:54) and the way the physical life works. Now you understand how much we still need to teach, how much we need to open your eyes in how you actually physically live, and what is the cause of your life. What maintains life for you on this planet, and how you will change in another dimension.

If I make a magnet of Calcium and put next to all of you, you'll be jelly on the floor, packs of energy just shivering like a river. Because we never understood the principle of the creation of physicality this time and point. We see people from, we call them aliens, and they have a feature. Look at the feature. What do they have? What gives them what material gives them their physical, vertical, whatever shape they have, and what is used as satellites, we call it, muscles. We call it, tissues, we call it, cells of the muscles and tissues.

Now you understand, life is very simple. Because man has not understood, man is trapped by all the anxiety and all the pains of the physicality. So, I wonder how many of you Knowledge Seekers, the speed you went to make MaGravs to get 10% reduction, Mr. Keshe doesn't know, it doesn't work. I have to make the Calcium condition system energies, and then you see what happens. Some of you doctors now jump, "Oh, we put Calcium in our, this and that, and we ??." It will not work that way. Be careful you might give a cancer, because you don't know how to handle it. (:56)

The whole process, the whole understanding of, is transmutation of the fields, is transportation of the fields, in the energy levels of the plasma, and nothing else. Does not matter where you are, where you exist, in the

universe. You want to live as a worm without a bone structure? Now you have to understand how to create a condition that gives you that energy, that physical energy of a bone structure, but in the strength of the fields, that you don't need a bone structure. How do you think the worm exists without any bone structure? How did some animals exist that have no bones in them? Because the gravitational magnetic field of a specific isotope of Calcium on this planet has created that. Look at the oyster. Look at all the fish, which are soft with no bone structure, but they live inside the Calcium. They have managed to create Calcium outside their body to protect it inside. We haven't even managed to understand this simple physical principle. How these soft body tissues with no bone, they have skin that has shells. How come some exist without?

Now you understand, the principle of creation on this planet. Because, if you look at Mr. COHN, and you look at the Calcium, Isotopes, (:58) you understand the secret of life on this planet. Mr. COHN, which is the basic, the .. foundation of the Amino Acids (AA). You have a Carbon 12. You have 14, a Nitrogen, that's 28. Sorry, 26. Then, you have the Oxygen, and then you have the Hydrogen. Then, you have connection with the material which attaches itself to AA as Iron. Then, you have the AA, or energy balance plasma of Copper. Now, does it start adding up?

Why the common denominator in the structure of the physicality, in the atmosphere of this planet, is Calcium? Even the worm has Calcium on his skin. Now you understand, how playing with a field, not with the material, which gives you life, which creates a stability anywhere in the universe. Now, the secret of creation is, unravels for you on this planet. (1:00). And it took me half an hour, and all of you as Knowledge Seekers, understand, how you are created, why you have a bone, why you die, why you get diseases, and how you can change it. And, when you go through transmutation, the first thing you hear, "Oh, what is the Calcium here? Do I need to swim or do I need to walk?" Emotion of me finds out in its field strength, what is going to be the seed of every cell.

That Black Hole, that absorbs everything and holds on to what it needs, that's all Calcium is, it's a Black Hole of every cell in the body of the man. And because it's a Black Hole, it has gravitational magnetic field, it interacts with its totality at field strength. It can be a cell in the middle of the stomach, can have a liver on one side of it, can have kidney on the other side of it, intestines are on the other side, you're everything else around it. Because, it dictates according to the Inertia, magnetic field of your vertebra, what things allows it.

Have you noticed, how come we have one organ in the cage of the lung of the man, and with all these bones around it, and we have all these organs, in where there is no magnetic field. And we call it, the stomach and it's just one piece going down, straight with nothing attached to it, we call it vertebra. They, the combination, the interaction of the fields of the Calcium within them, replaces the rib cage, increase that interaction between the balanced fields of the, what we call, the Black Hole, to keep the structure. (1:02) And then, you'll see, if you follow that structure, the cow has the rib cage and the bone's different shape, the dog has the same, the cat has the same, And then you understand how a heavy organ is in that part.

RNA is not that easy to make. DNA is absolutely hard part to play with. If I can change the energy fields of the plasma of the information of RNA, I can make in one second, cat out of your dog tomorrow, and a fish the day after. They call it, what we call, gene manipulation. Let me, when the man learns, understand RNA manipulation. It's much, much easier. It's much, much faster. And you don't need to have GMOs, because then you play with other one, "DMOs." Then you understand how we, as humans, still work on the matter state of it. We call it, DNA. If man learns to play with the energy of the MaGrav, you will all be creating RNA. And if you can sit on it, you can change it.

I hope today you understood. (1:04) I hope I open your eyes again to another dimension of life. In the future, if the knowledgeable scientists, called doctors and scientists, understand the teaching of today, the world of the medicine, the food of man will change forever. But as usual, it takes time.

And then we come to understand how we can transmute. Because we have to understand this, to be able to go through transmutation. The fear of powering as an energy, creating the Black Holes of the creation, at the point of the time and destination. And then it will be very different for man. Life will be totally different for any creatures who understand the knowledge of the creation of the Creator.

I hope today's teaching brought you a new dimension, to move away from matter state, to move away from your MaGravs, and understand the process of the creation of the fields, and the use of the fields. Unfortunately, it's like giving birth to the child and breastfeeding it. And now you say you're grown up, you cannot be breastfed anymore. No more ?? "Mama." And then what happen? The child cries. The detachment from something, a sucker from day one, is impossibility. Without it, I die. Till he starts walking, on the first day, shall I go for it? No, no. I can do it myself. And then becomes a man, it matures in the ways of life of physicality.

And now, for me, as I was explaining to the other Knowledge Seekers very recently, I have to get this creature of the man, the child of this planet, away from the "breast" of physicality, for it to start walking and mature. (1:06) And it's so attached to physicality, this is the impossibility of the world of the Creation, for people like me, how to get you from this suckling physicality, and look, there is more outside. And when we achieve this, man will start a new cycle of being part of Universal Community, as is itself a Universal ?? Unity. When I cannot take you off the suckling part, has been my dilemma for past years. Maybe the biggest mistake I made, I showed you the MaGravs, because that created more dilemma, but in a way, in the long run, once you understand it, gives you a key to the universe.

Thank you very much for today, and we go to our usual repetitive break, and we come back to see what we can enlighten each other with the knowledge of the Creation. Rick, if you can take us to the break?

>> **BREAK** >> 509 KSW October 26, 2023 (1:12).

K- ... This is, you'll see this on the Keshe Foundation, what you call it, Store. The ball you see in the front is a medallion or emblem, which has been made and promoted for the Keshe Foundation Conference in

London. And the hands is going (refers) back to what we call, the November (Flight Session) meeting of the Knowledge Seekers, going through the process (making ball of light between hands). And this, what we call, like a medallion, and should be available in the stores of the Keshe Foundation. And it is, in a way, representing both sides of the Keshe Foundation, plasma technology and energy of the man at the same time. It's a beautiful package. And this brings back a lot of realities and it's done by our Keshe Foundation design by IT team. (1:14) And it's, it brings a lot, a lot of understanding in the simplicity. This is made especially to celebrate the ?? Ambassadorial Meeting in London. And is like a (token of the) memory ?? of the event. And collaboration of the plasma and the Spaceship Institute, how we work only with plasma, without the matter state, what we call, state of matter.

And, regarding to the London conference, as we're getting closer, we have a lot of requests from a lot of people sending messages, "Can you send the invitation to this, can you send the invitation to that?" "Can we invite this?" Keshe Foundation has decided, because we have so many of you, and at the same time, with what we see, in the present time, in the... was building up to become a horrendous situation in the Middle East, by simply the greed of the man and the rest of it. We're responding back to your request, and in a way, we will release two invitations within next few hours, on the Keshe Foundation website and on the, what you call, Keshe Foundation chat rooms, all the, what we call, connections of the Keshe Foundation with the public. You can pick up these, print them, put the name of the ambassador you have, in England, and if you're German, send it to, what you call, the German ambassador in London, for the invitation. You can use the other card to send to the scientists, the people you want. It's not an invitation, it's to inform that they can participate. At the end of each, (1:16) what you call, presentation, you will see the link where they can go and register for the, what we call, the conference.

The publicity for the conference started yesterday with one group of advertising group, which we brought in. And the next group of advertising team will start from maybe Sunday. That is targeted for British public, British press, and more or less for the, what we call, the embassies in London. We have brought specialists in this job because London is targeted, because of the number of scientists. Or you can invite your ministers, you invite, inform them, to be for anything else, that for the 11th of November, we have everybody informed as you need. Because, we had people say, "Can I invite such and such person?" Now we're giving you the invitation. Send it to your professors, send it to your ministers in your countries. Send it to your president, send it to whatever, whoever. It doesn't matter which country you are. But send one copy to your ambassador in London. German ambassador, you have so many Germans. Each one, make one and send to, by email. If you're a German in London, make a hard copy and register, post it to the embassy. If you're a German, make a hard copy, in a nice heavy paper, post it to your ambassador in London. "Please attend this conference." And, the more they get, the more it takes to take shape.

We are trying to fix one of the venues now in a special place, it'll be amazing. And if we get a collaboration where I want it to be completely, we'll move the, what we call, the one week conference into this position. (1:18)

It has to be understood. We see today sitting here, as I spoke last week, the war in Middle East imminent. Americans and Illuminati's have decided, we're going rob the Iran Central Bank. Every effort is getting made to stop this and the only thing is I can say, those who play the game will "pay the game." We will make sure if any excursion to damage Iran happens, through our technology and our will, without damaging a Soul, we'll bring those nations to more primitive levels, than when the man came out of the cave. I do not make a threat, but I deliver the technology, that living in those countries will become as you lived in the Stone Age.

Those who start a war, will have to understand the time of war is over. Those who thought they're going to make profit, they'll find a very different profit.

My advice goes to the American administration and their work, and the same with the Israelis. You play with man, we play with Creator. Keep from making such a move, (1:20) because in a way, it's the wrong move. The war which started by Hamas was paid by the Israelis to start the war by Hamas, to create the present condition. So all ends up with the same. And we handle the same through the knowledge, technology, and at the same time, knowing what is to come.

London Conference will be the most position of our to enforce peace. Just don't send the invitation to your ambassador. There is a list of embassies, we'll provide you with all the links. You can sit down and send to 10, 20 or 30 embassies, once a day, once a week, till they understand the change. The conference is on the Internet, is going to be one of the most prestigious places in London. And, is where everything will take shape. Send to the members of Parliament of England, send it to the Prime Minister, send it to your Prime Minister, send it to your President, doesn't matter which country you are. They can ask through info@keshe.foundation. It's on the promotion line, for a link for the President. We establish the correctness of the link, because anyone (can) say, "I'm the President." We establish with the embassy, that we've been given such a link, is this correct? They confirm it, we open the channel. So, when you ask your President, they want this, the embassy has to confirm the link, the line. (1:22) So, don't waste your time calling, "I'm the President," because one telephone call, one communication with the embassy, will clear the point for us.

We push to promote this, what you call, the conference, and the two-day conference and the week teaching. And I hope you will understand how to do it. Get in touch with head of your nuclear (industry). Get in touch with professors and university scientists. Get in touch with your (environmental lobbying) pressure groups for CO2 (reduction). You get in touch with your, what I call, scientists, your... every department which this technology can touch, and ask them to go to it. Be present with it, and understand it.

You've been sending me so many, "Can I invite this and this?" Now you cannot invite, but you can inform, because only ambassadors are invited. And they have to go through, fill in the form. We have brought in a special payment method for this session that is automatically created and is done. You can pay with credit card. You can pay with any shape or form. And it will be done automatically. Please, once we post this message, this invitation. Yes, you have seen it now in some publications worldwide has already been released, as we see it's been put on the screen (by Digital Journal).

Send it to your ministers, send it to your priests, send it to the Vatican, send it to anyone you like, but keep the integrity of it. (1:24) And do not just think somebody else is going to do it. My (information) on top of theirs has more say (more power). All the embassies, African embassies, just don't look. We don't have many Africans in the Keshe Foundation. You do the work to support them, to inform them that they are in the same position as we saw in the Rome conference, and we saw in what I call, Belgian conference, we get a collection of people. But this time they go.

We try to give everyone who comes to the conference something scientific that they can take with you. I come from Queen Mary College. I have invited the chancellor, the president, prime principal of the Queen Mary College personally. You come from the university, do the same. I worked for BNFL. I invited the head of British Nuclear Fuel to attend to understand the time of nuclear game is over. You go to university, tell them, I'm your student. This is what you like to join. You work for a ministry, inform your minister. You work for a corporation with production of gas or whatever, inform them, attend this conference.

We're there to bring the change. And now is your part. As you can see, we told you we go international. And you can see Keshe Foundation promotion for the conference is on international press releases. The concentrated promotion for England and worldwide will come through the channels of another promoting company in UK, (1:26) which is expert in these jobs. I hope we can see the beginning and the start of the change.

Are there any questions?

R: Okay, very exciting Mr. Keshe. Could you tell us a little more about this medallion, this image that we see?

K- Yeah, .. It's the shape of the plasma, with the center and the plasma itself. It is a "brainchild" of one of the artists of the Keshe Foundation, who does a lot of work for us. And the one you were showing, the flying machine, going out of the anchor, this is done by the same designer. In the conference one, in the center, you have an SSI in gold in the center of it. You will see in the center of the, what you call, where the light you see, there's a light, there is a logo of SSI, as a Spaceship Institute, where we only deal with plasma. All the invitation cards, all the stationary, everything, follows the same, what you call it, emblem. You can buy this medallion. Now you can buy the medallion, it's transparent, and it should be on the Keshe Foundation Store somewhere. (1:28). But it's got a hole in it, the medallion, you can hang it on your back, you can hang it in the room. It's amazing what it is, and what it does is transparent, it takes the color of the background.

R: Yeah, I haven't seen it in the Store yet, so when we get a link we'll post it for people.

K- It should be tomorrow, yeah.

Any other question?

Q: ... Hi Mr. Keshe, in this moment of change, where Plasma Technology will be shown to ambassadors and world leaders in a few days, what do you need from us, Knowledge Seekers? Thank you.

K- As I said, we, in the next few hours, maybe in the next 24 hours, we'll send the invitation to your ambassadors, and the information for you to inform the others, and spread it as much as you can. Everyday, we got about two weeks, three weeks to go, and we are there to respond to it. The point is that, in the conference, as it'll be shown, there are a lot of ambiguity, a lot of things which is sitting around the Foundation work will be opened.

It is there for you to see, it's there for people to see, to feel. It's the energy field presentation, not matter state presentation. (1:30) Our team will try to do their best to see if they can show other things, but you got to understand, there is a lot more. There is a second conference, a third conference of this series, which will come in China, and we are working till this is done, completed, that we can move with the other one. We try to establish this, the beautiful island of Sanya, in South China Sea. Where getting visa and this is not a problem, you can travel. Coming to Beijing you have to go to the embassy and all sorts. Sanya is a specific case that most of the Europeans, most of the nationals can just come in for 30 days and be a conference there. This is part of what's getting done, and the conference in Sanya has become one of the conference centers of the East Asia and most of the big corporations run their, what you call, conferences there now. It's a dream, what I call, holiday hotel chains. Things you never seen in the West, and you cannot imagine China has such a thing.

I live in Thailand, in these hotels for, in the, what you call it, ?? for some time. Those of you Knowledge Seekers who came to see us in China, we spend most of the time in Sanya. And it's a beautiful island. It's the largest, one of the largest islands, and we'll see if we can get that to be done. Then Beijing, Beijing will have a lot of problems in getting people visas invitations and the rest. Where Sanya has a different territorial principles, given to it by the, what you call, the Chinese government, and allows people much easier to enter. (1:32) And creates a lot more less problems for us than in Beijing, but it's a different world of what you call, existence. It's, they have built seven, eight star hotels, I call it. Things you have never seen in the West. You cannot imagine such a thing is possible, it's a beautiful island. And a chain of hotels built next to each other, about a hundred of them. Each one, what I call, mouth opening, and their beauty and their structure. But we'll see, we announce it after this conference, and what we negotiate with the Chinese.

Any other question?

Q: ... Hello Mr. Keshe, good day for you. I would like to ask, we human beings have the Creator side, but why do we become so insatiable and falling into vicious competition? Why don't we want to cooperate with each other, make progress together, and beauty, and beauty together?

K- I wonder if he's Chinese?

R: It seems like it by the name, yes, Hong Yuwei.

K- This is the way of Taoism, Buddhism, thinking, Confucianism, to share, to be balanced. And, this is the way in the West is unthinkable. But in the East, gradually dawns on you, it rubs on you, and you see there is a lot of it in the way of living for them. And, what I call, the greed of the man has brought this, (1:34). it's not that there is no greed. But in combination of Taoism, Confucianism and the Buddhism. In Chinese, most of them, or some of them, have come to that balance. They find peace. Even everyday they battle with the life of physicality. They have that essence of, what you call, peacefulness.

I had the pleasure of being with some of the Chinese, what I call, "men of power" in the past few days. And it's amazing how humble they are, in the position they are. And the only thing they talk is the balance, creating peace, creating environment that is peaceful for a lot of others. I was talking to one of our Knowledge Seekers this morning. And I said to him, that's the way you think, Chinese. It's not the way we think in the West. Everything has a value. It has to be there. Where Chinese do everything for the nation. You work and you build the society, and we don't have that in the West. It's not a nationalism, it's a "nationalism." It's a very big difference. The society counts more to be than me, or be. Even though they're very hard working, very selfish-centered, whatever. But general structure is that way.

And I always say, you say to a Chinese, hello, never answers, very seldom if you are people you know, answer you with, "ni hao." (hello in Chinese). They answer you, " in Chinese" - "have you eaten?" They are first worried if you have enough in your stomach, if you are safe. If you are not hungry. (1:36). In English, you say, hello, how are you? In China, when you say somebody hello, the answer usually is, have you eaten? Are you hungry? So they're looking after for somebody not to be in that state of need, that you are equal to them. Because I've eaten, I'm happy. You'll be the same. Then we can talk equal. So this is one thing we have to learn and walk away from in the world of physicality. And it'll come, it'll come on its own, as we progress in that way. And then these questions will not exist.

Any other question?

Q: ... Hi Mr. Keshe, you said in an old teaching, that we never control our sacrosanct emotion, and we only control the fields that I give and take, and that the consequences of it. Could you please explain more about that?

K- Always goes back to the "Ethos of Mitra." And if we learn that one, that's sacrosanct, thy shall not steal. Do good, first of all think good, talk good and do good. And that brings on itself a lot of peace. Then you don't need to think to do something else, then you have to correct it, and it takes a lot of energy. (1:38) And, in time, man will learn this. Because when you do that, you're connected to the "line of the Creator." That's all it is. Because that's His attributes, that's the way He is.

If you notice how we think, how we say, we say, we take this ?? road. Go back to the cave time. Because it means they have to learn. They have not learned. Start again. Learn the principle of being connected. And then, maybe in time to come, you will learn, you'll mature. It's a line of connection. It's the way through a common denominator, your root goes back to the essence of the Creation, which is the Creator. We are all connected, as I said in the teachings of the past. All connected through one common denominator. Every created thing in the universe to the Creator. Is that, if you find a path, and the field strength that takes you to that path, it can be one instance you are part of, and become part of.

Any other question?

Q: ... In the 507th Knowledge Seekers Workshop (KSW), you taught that, the Cosmic Rays we receive at the back of the head, are different from those we receive at the front. (1:40) And that, when our energy is too much in the back of the head, we can't get the Soul to expand forward. So questions, there's two questions. Are the Cosmic Rays we receive in the front and back of the head different because of the interaction of the fields and needs of those specific areas? And second question, in what situations do our energies go to the back of the head not allowing our Soul to expand forward? How can we change this situation?

K- Can you repeat that please?

Q: ... Okay, the first question is, are the Cosmic Rays we receive in the front and back of the head, different because of the interaction of the fields and needs of those specific areas?

K- Not necessarily. It's as I showed you in the magnet. Every, what you call, field strength has its own line of connection. And every magnet has all the connections needed for every piece to come in touch with. You buy a magnet, which you use material in the North Pole, and you bring an Iron from the South Pole, another magnet from material from South Pole, they still interact. They are magnets. Have you ever bought the magnets from two different shops, years apart, and they say, "Oh, I'm not touching this one, I don't like this, this is Chinese or this is African or whatever, my magnet's different." No, they still interact. (1:42) And the beauty of it is this. So, when you look at the brain of the man, it's the same. Each field has a position, field strength and the position in the brain of the man, to interact with. It doesn't matter if it's from your back or the front.

Q: Okay, back to the second question, in which situations do our energies go to the back of the head, not allowing our Soul to expand forward? And how can we change this situation?

K- In the November (Flight) session, I think it's 24th, 27th of November, you will feel this, and you'll learn a lot. We know how to play with this. We know how to enhance it, and we know how to bring it into a ?? sharp. And those of you who attended last two sessions, we tested it and you confirmed it in the, what you call, testimonials you sent us to confirm we are correct, everything is correct. And this is the way it will be and the way it's set up to be. And we... you'll learn how to do it, how to direct energies. But those of you who attend the end of November, you will learn the same process. And in the next future few months, we'll bring you those directly into transmutation. That the process of transmutation will start and becomes a common knowledge. But it's like going through step by step, step by step, step by step. (1:44)

I put on the screen, somebody asked, "Can we see this?" This is just the final product, it's in this plastic coverage. In the shop you'll see it, in the center is the SSI logo. It's a medallion, which is transparent, it's beautiful. And those of you ask, "Can we see it in material?" This is one of the pictures I have from the production, so... But go to the Keshe Foundation Store, is there for promotion of the conferences.

Any other question?

Q: ... Mr. Keshe talks about absorbing plasma energy to nourish the STM and the STP, rather than killing organisms for nourishment. I am willing and ready to understand how to do this for myself. How can I achieve this? Let me know what I can do for you. Thank you, James.

K- You can't do that for me, you can do it for yourself, but you have to understand field transfer. You have to feel a field transfer. And part of the November and the following works is that way. If you look at the, what I call, (1:46) the picture which was put up a few minutes ago, even for the, what you call, the light, as you see now on the screen. For one second, for one second, when you look at this picture, imagine what happens if that bright center is your Soul. If that bright center is the Soul of the Creator. And then you understand the next step. You understand how you can help yourself and how you can connect to every plasma in the universe. The way your Soul is that Black Hole and is connected, because of its operation to every single magnetic field in the universe.

Any other question?

Q: ... Thank you very much for teaching patiently, step by step, to help all humanity equally. (1:48) So, the question is, how could we realize and notice the difference between emotion of the STP and emotion of the STM? So, maybe we can then manage it to the way it's desirable and correct.

K- You know, we should know by now, especially at our age, at our time, The difference between the emotion of the Soul and emotion of physicality. Emotion of physicality, what I call, is hunger. Emotion of physicality is a need to satisfy a physical condition. Emotion of the Soul is virtue, is a feeling, has no tangibility, and has no dimension of physicality. And by time we come next, become an expert in it, because we know the difference.

I explain this in a very, what you call, a pure way, in a very straightforward way. Loving to love, the true love comes from the Soul. (1:50) Making love, desire to, comes from the emotion of physicality. And is both using the same word, but two dimensions of the life of the man. And this is for man, confusing, very confusing. Unconditional love and knowing what it means comes from the Soul. And it has, could be directed to the same object, same person, same thing. You love a woman, you just look at her. It just satisfies

every emotion, everything which brings a turmoil to you in your life. And what do you do? You say, "Thank for just loving."

When you get to the point when you love loving someone, is when you mature to the level of the STM. When you love someone, it's in a way loving, but loving in the dimension of physicality as you are. When you fall in love with the love, this is when you mature. You understand, you deal with the dimension of the Soul. And this is very, very, very tricky point for people to do. (1:52)

We fall in love with our children. And we enjoy their existence. We love to love them. And it's the essence of the Creation. It is how we have been, how we become, and how we feel the emotion of the Soul. And you can live a lifetime, don't feel it, and it can happen to you the first time. It's like when you look at your child, you love it. But if you get to the point of loving your, the way you love your child, that comes from the essence of the Soul. When you tell your partner, "I love you." And then when you're on your own, it's not missing. It's the emotion of loving, the way you love your partner. That emotion is from the Soul. Loving comes from the physicality, is emotion of feeling of the life, STP.

And some of us live a lifetime, never experience it. Some of us has the pleasure to feel it the first time, in our lives, it could be with our dog, with our cat, with our brother, sister, mother, whatever. And, if you reach to that point with your partner, it's one of the most beautiful ways to ever live. (1:54). Because, they say, "It touches my Soul." Because, you love in a dimension of physicality someone, but when you love, loving them, then you're aware of another dimension.

Any other question?

Q: I had another question, if you mind, don't mind. I remember you, when you say, "The more we give, the more we receive." and then there was a schema that you had these circles in the inside, it's the most gravitational, and then as it goes, opens up, it becomes gravitational with our emotions, the planets, things like that. Could you, with the schema, share with us how, the more we give, the more we take, because it's not easy for some people to grasp it.

K- I always said, it's like a cup. The more you take out of it, the more you can put in it. The fresher water, you can get in it. And it's understanding in the dimension of the fields and emotion. It has two ways of characteristics when you live, or talk about things ?? like this. And one is that your emotion, when you give, it's like opening fields wider, because it's not with you anymore. (1:56) And in opening that, the space gap between the separation of one to the other becomes to fill in. So you receive more of.

I explained this years ago. It needs a skill to do it and to show it. And with the present, what you call, Zoom facilities, is not that easy to do.

(Let's see. Let's see if this tool of what we call, Zoom, allows us to do this).

If you take a plasma in the, what I call, my...

<< Mr. Keshe tries to make the drawing on Zoom >>.

Now, if you look at a magnetic fields that they go out. (1:58) If I have another field going from here, will go here. This gap builds up, open and open. So, the more you give, if you look at it that way, the bigger this gap comes to receive, if you understand it. This is, allows more to arrive. Because, these two lines of emotion, have their own gravitational magnetic fields, and they create at lower strength, further separation. And this is

the best way I can explain to you. The more you give, the bigger this gap becomes. So the more you receive. And this is the structure of the whole understanding.

So, it's, then you, in a way, because it changes, (2:00) the whole structure will change. And, as it comes, it condenses. And somewhere in here, it turns back, to its, what I call, origin, or again, what we call, giving. Because at this point, now it's arrived, it returns. So now you have more to give. So as you take more, you give more. And this is the essence of the Creation. That's why we see, we understand the operation of the Soul. And if you look at it, it started with the Creator, and as it goes further, you get more galaxies, and more, and more by the interaction of the fields. So, you create more fields to be absorbed.

Any other question?

<< Knowledge Seeker raised his hand by mistake >> (2:02)

Any other question?

Q: ... Good morning Mr. Keshe, can you please explain why the dialect changes and not the language when we talk about foreign language syndrome? Thank you so much.

K- Can you repeat that?

R: Can you please explain why the dialect changes and not the language, when we talk about foreign language syndrome? Not clear on that, other than maybe, it's when people are able to suddenly learn a foreign language perhaps?

K- It's like, I tell that to my children, quite a lot, even at the ages they are. They speak English, but they've been taught to speak Farsi. But when they speak Farsi, we have a certain accent or voice, or whatever you call it, combination, that it sounds like the way the Armenians speak. And most of the Iranian children Farsi, it's a second language they speak, they have this, what we call, the Armenian accent. Because Armenians speak another language, but they learn Farsi to be as they've been given a home in Iran, (2:04) even centuries later. When an Armenian speaks in Farsi, we know it's, they are Armenians. Even they've been there for centuries. Because at home, they use Armenian.

And is the way our voice, psychologically or pattern wise, is the way we... the twist of the tongue, they call it, goes in each language. Some languages we'll speak with the voice of the throat. Some of them speak more with the tongue. It's very, if you lived in England, you can tell somebody who's actually not English, trying to speak English, very, what I call, 'pot English'. And English, which is naturally English and they speak, the way they do, is the way they pronounce the 'th'. It is not a natural way. When you learn it from childhood, it's part of your process of learning. It comes naturally. But those who learn English, and then they want to speak a perfect English, you always hear that " ". Because, they want to fit in, as I know everything, I understand, but it's not there, the dialectic's not there. The language is there, but it's the way the tongue has twisted or turned or structured through the memory of their brain, to use certain muscles, and certain part of the voice box for ?? certain things. And speaking a new language, a dialect, and a dialect that just brings that more.

This is why when you go to a country like in some part of Austria, where we live, (2:06) you cannot, you don't hear, and then you move and the hundred kilometers, the accent, the voice is different. It's like in China, if you go from one part to another, you can't even understand what they are talking about. They are talking

Chinese, but the style, dialect, like the way they eat the food, or whatever, has changed, has twisted. Now what they use is that somebody else doesn't understand it. We do this. It's to do with the structure of physical voice, and the voice box, and the muscle tissues, of the tongue and the mouth, and partially the emotion. How we attach to the emotion of the word and the language.

Any other question?

Q: ... Will transmutation processes be demonstrated at some of the future conferences? Even a mere thought of this working will shock the scientific community, let alone demonstrating it.

K- We were planning to do it, we think we are ready to do it, but with all the problems in the background, with the Keshe Foundation, what's happening and the pressures we had, is pushed backwards. The systems are set up to do it. We have built the systems for it. We were hoping to be able to even demonstrate it in London. But, Keshe Foundation's got so much things going around with it, and that is building up, and building up. It's not internal, it's the things put on us external.

But, the technology is there. We have built systems to do this. (2:08) You saw a unit in UNO Center. That system now is getting built, completely completed, to do this job. And we done more than this, where the people and the places which matters, we have shown the, what you call it, much bigger processes. Much, much bigger than, that it can bring.

They still don't. We, we went through a process, past two or three months, as I said in one of the talks, if you listen. Up to now we were on our own, we did what we liked, now in collaboration with governments, everything has to be done, to be shown, that it's there, that we can go to the next step. When we talk about coming to an agreement with certain governments, doing certain things, because Knowledge Seekers have literally shown how it works, what it is, the way it is, how it should be done. And they repeat it and repeat it. And they don't believe it, but it's there, so we have to accept it. And the worse it gets, the higher we go, the worse it gets, till we hit the ceiling. And even the scientists see it, understand it, they still have a problem because they read something else to accept as something else. They can't accept this.

I said to one of our team very recently, it's very much like. You understand this if you come from the Islamic background, because I know people who've been through this, and still know the emotion of it, is you have a mother, you love your mother, you love your dad. And then that dad comes with a second wife, and says, this is your mother too. It doesn't fit. (2:10) Cannot be, because I call mother. It cannot be. Or when this, we see this. Now I divorce your mom. This is your new mother. You have to accept this. It's not there. We can't accept it. There is no, nothing, because I accepted something else. It's a love affair I had with my mom. The emotion I have, this cannot fit.

This is the same with the scientists. This is the same with people. The notion of, I accepted something and I... and it's correct because I love and I understand it, is half of our battle with the Chinese academicians, more or less. And, in changing direction and doing a lot of things, the world of academicians still pushes that something till things start moving and then they see things and say, "Okay, so it's a new technology." But the problem is now we have no academicians to confirm it. And this is the problem of. We show things even to the top scientists, because they, as I call, the new "mistress of the dad," it's not acceptable. The new technology in the world of science, is not because, I'm the top, so we need somebody else.

Now they're trying to create an academician in plasma technology. They're asking us, "Have you got the standards?" They said, "You haven't even accepted the knowledge, how do you want us to make a standard for it?" And, so we have to accept. We are going into that state of, you know, you're just between the... We've been in the womb of the mother, we live with it, we know it, coming out now, the people are saying, "Oh, what animal has come out now?" "What, can we accept it? Is it a human?" (2:12)

We are not looking for that kind of proof, because, especially now, the way we are structuring it, the way you will see in the coming weeks and months, we will show, as we've done. Now we become independent, it's not showing now, it's just we are moving into the position of making it, to make it to be. We passed that point of belief. And now even sometimes they ask it. "This is still in progress?" I said, "Yes, it's in progressive development for you, your grandchild, your grandchild of your grandchild and grandchild of your..." This technology never ends, it's a knowledge of Creator.

For us in China, the point of believe, seeing it to believe it, is gone. It's now, we've seen it, we believe it. How can we use it to our benefit? We are in that stage with the Chinese. The seeing and believing is gone, it's buried, is not questionable. But sometimes it still pops up. But now we don't have experts. Now, our job as Keshe Foundation Knowledge Seekers, is to create experts for Chinese who understand our technology, that they become expert to vote on, or decide on what we taught them. And this is another game for the Knowledge Seekers.

But, overall we are, we passed that believing point, especially in China. And now we are heading very fast towards the implication and application. And we have for the time from of 2 to 3 years, and you will see it. And different Knowledge Seekers change the name to be, but now we are bringing it. (2:14) You will see this believing, seeing to believing, believing to see, whatever, is eroded from the layer of the Chinese structure of the work. Now is, how can you implement? Tell us how much it costs to do this, how much, how many people with it? So now we become estimators of our own technology, in to train for the Chinese to become academician, to judge our own technology, we have told them. But it's part of the progress.

We are now in the process of creating future Keshe Foundation plasma academicians for this nation. Because it's past the believing to see, now it's implication. We are in a phase of... and then you will see it. You will see it and then the West will say, "How did this happen?" Nothing, you're ignorance brought it in. We are not in the game of proving anymore, now we're in a phase of implication and application and delivery, in China. And this will happen, takes us another year, to set up the research centers, to set up the factories, to start the productions, and ... next, next, next, and then you have to understand, as we deal with the national government. Now the government has accepted such a thing is there, they have to allocate finances for it. And, this we passed to certain extent. So now it's not, not believing it, it's just, okay, let's do this basic things which can change for the nation, basic things can bring security, basic things we accept, now we are in that ways.

The point of seeing to believing, to be shown on CNN, is finished, is over for us. (2:16) Now, we have reached implication, application, and production. And training, mass number of scientists is our next step of the work, that they can work with us to understand the technology, and in seeing, understanding technology, we start the delivery of the technology in different ways.

So, seeing and believing is for you Westerners. In China, we have moved, seen, believed, shown. Now we're going to be moved into the phase of implication. How we can be implement it. How, where it can be implemented, system for this. As I said to our Chinese partners, instead of you, us coming to show you what

this technology can do, you bring us your problem, you bring us what you're looking for, and we see how we fit the technology. Because now it solves your problem, you believe it, because your problem is solved. And now we reach that point.

And we are in the past CNN to be seen, and somebody to show in the news. We have shown enough to the leadership of this country that this is... Now we're in a phase of setting up how much it cost the factory to be set up. How much, how many people we need. We estimate something like 40 to 100 million people will be involved in this industry in next 3 to 5 years. Because once it goes, it moves and it goes on. And seeing to believing and when it can be demonstrated. We still do that in the West and say, "Oh, it's... we've done our work." Now Keshe Foundation in China is implication. We are in delivering technology to touch the national policy. (2:18)

Any other question?

Q: ... Hello, I would like to know if there's any technology that you have to protect in case of changing of the polarity of the Earth's poles?

K- Just one second please. ... Repeat, please.

Q: ... Hello, I would like to know if there's any technology that you have to protect in case of the changing of the polarity of the poles of the Earth?

K- (silence) Are you there?

R: Yes, did you hear? No.

K- Yes, I heard. I said, "Did you hear?"

R: No.

K- Okay, I didn't say anything. That's what happened when the polarity changes.

R: You answered, perhaps.

K- Did something happen to you?

Let me tell you something very straight forward. (2:20) The polarity of the Earth has changed many, many, many, many, many, many times. in the life of this planet. And, if you consider yourself to be a good man, a handsome man, and a good creature, so, the planet has created such a perfection, you shouldn't be worried what happens when it changes.

R: ... Yeah. I was going to say, it happens to the Sun every 11 years, it changes poles. Yeah.

K- Every 11 and a half years changes poles, and we change poles because of it. We know that. So, every 23 years, Sun goes back to its pole position, moving twice. And, then with it, the Earth changes, and then with it, our plasma changes with it. So, we are used to long distance changes of polarity, and a close changes will not make any difference.

Q: ... If Elon Musk's SpaceX rockets are burning holes in our Ozone or not? And he mentions that Keshe said, "It's time to stop the burning." So why are space rockets still like giant fireworks?

K- Because we haven't accepted the new technology, that's all. (2:22) Because we went the way the caveman went, up to now. Now we go the way the Gods go. We saw the fire, we made the fire, now we managed to find different things to burn it. We haven't changed from the caveman time. Not a bit. We just made a more glorious containers for it. And with the new technology, in a way, understanding the technology of the Creation, we don't need that. But don't forget, these people with the, what I call, frontier research development, are partially the reasons we are here. Because we can understand it, other people have done things, now because of that, you can understand the difference. So, science is something which is built on top of each other, and next to each other, and top and bottom of each other, but collectively over hundreds and thousands of years, what we developed, is a cornerstone when I speak to you about gravity, he can understand. Because if that apple would not fall on the head of a guy sleeping in the wrong place, being a lazy man, none of us maybe would have never had this problem with gravity, understanding what it is. And then I couldn't have proved the correctness of the Black Hole theory. So our science is built on the back of the others. And let them make a few more holes, we have a lot of process to patch it up. Called the knowledge of man.

R: So all of our science is based on somebody who got mad at an apple that woke him up under the tree. (2:24)

K- Yeah, and the guy who jumped out of, he went to have a bath and he jumped out of the bath and naked he discovered it. .. ?? ..

R: The religions are based on a guy under the tree too, and apples. So, hmm, must be a connection there, I'm sure. .. and speaking of secret societies Mike ...

K- I think that was the... the problem was, was what. One under the apple tree and the other one was watching it. When Newton got hit directly on the head, there was nobody else to watch him. You didn't get it, did you? No.

R: No.

K- You're talking about the apple and Adam and Eve. Yeah? Who was under the tree, Adam or Eve, who picked up that apple?

R: .. Okay.

Q: ... What is your opinion on the secret societies trying to subvert national sovereignty for a one world government, under global worship of the entity they worship another, and offer sacrifices to? Humans did this in the past, all over the planet, in past global civilizations, and the humans were wiped out for this.

K- I have no, no nothing to say.

R: Okay.

K- Global .. We were told that the Keshe Foundation is a globalist, one of our very good Knowledge Seekers. (2:26) And she opposes any globalist, and I said, "I'm a globalist, because I want one globe, I want one race that everybody is comfortable with." And it depends what you are there, you bring knowledge, you don't

need to sacrifice. But that the rest is for what they get, from where they get. And what they try to do. And how much difference we put between them, this is the most beautiful part. How much, what difference between, put them and their behavior and their approach.

Any other question?

Q: ... What price is the medallion?

K- I don't know, that hasn't been decided I think.

R: So that'll probably be put in the Store in the next day or two, is that the idea? People are wondering when it will show up in the KF Store.

K- They should be there tonight or tomorrow, I think. And the same with the links with everything else. I don't know what the value, what the value has been put on it.

R: OK.

K- I just showed you what I received on the screen. And it'll be done very soon. (2:28)

Q: ... Hello Mr. Keshe, Karl from Melbourne, Australia. And a few weeks ago, you talked about slowness and the slowness of breath. And it reminded me of when we drove over to Western Australia and we saw the Pacific Ocean for the first time, and you could see these waves on the ocean, kilometers long, just coming in, coming in. And not long before that, it had been talked about that NASA had these seven kilometer mirrors, two arms that were seven kilometers long that were picking up the magnetic gravitational waves coming to the earth. And yeah, I feel like we need to just get a bit of reiteration on that slowness and how we connect in with these waves that come to us. And when I saw the Nano coating scans that had 30,000 layers to it, I always sort of described it as enabling us a different depth of connection by having those layers in the Nano coating to connect with these very subtle waves that come to the Earth. So I just wonder if you can build on that for us and just help us understand that.

K- What do you want me to build on, in a way? (2:30)

Q: Well, you were talking about breathing, slowing down, connecting with the Soul. Life is very fast and we're always told that things have to be faster and computing technology speeding up, but this is the antithesis of that, is really slowing down and connecting in with this natural wavelength that comes to the Earth, that comes from the core of the Earth. And I just wondered whether there was any other metaphor you could use to help us understand that, and whether I was actually interpreting what you were saying correctly.

K- There are different. .. It's very much, you know, if you've been a father or a mother, and you carry your child in your arm to go to sleep, the eyes are open, and they usually at that age, young, they cuddle a teddy bear or something, because they feel secure with it, they feel happy with it. And then you watch them, they close their eyes, and they go from the dimension of physicality into the dimension of the Soul. If you hold them long enough, the breathing changes. The rhythm of the breathing changes. The speed of the breathing changes. And just before you feel the speed of breathing changes, you try to kiss your child. (2:32) You see they give you that smile. And it's the same body. You wait. Even though they change, you know they're going to sleep. If you wait another few minutes, and then you kiss the child again, you want to turn to bed, then you see no reaction. But then you see, ?? if you watch enough, sometimes there's a smile. There is a, another dimension comes up. And I watched my children going through this many times. And I always say, this is where the time physicality is handed over to the Soul.

Then we understand it's us who creates that separation. What about if the child in awake-ness breathes this way, through the same rhythm? Would he or she go through that transition? How come a kiss, and a smile back, and then a few seconds later, a kiss and there is no emotion. But it's the same body. But in that point of transition you hear the change in the speed of breathing, and the depth of breathing. And then you see how much energy is needed from this dimension of physicality, that the Soul can take up. And you see that smile, which shows the dreamland, the direction of the Soul has started. (2:34)

So it's not a wave. It's us allowing us to be connected. It's just like moving in a room, nothing there, and you turn on the television. You bring in a different dimension. You are watching the same television, and nothing on it. Now you switch it on. It's a football game, and you get all excited. Nothing has changed. It's just you, the same screen, but different information and dimension. You're connected to a bigger world.

So, it's us who has created, could be 7 centimeter, could be 7 millimeter or 7,000 kilometers. We create that wave for ourselves and how we change it, and how we can change from inside to outside. This is why I always said, what do children, babies talk to each other, Even though a few days old, they know who's higher, who's up higher rank, who's there, who's the bossy one, and the rest of it. I watched over years a lot by literally adoring my children and holding them and watching their emotion, where there's a lot of cry and anger, not wanting to go to sleep. And then, when the breathing changes, the whole changes from the most beautiful creatures in the world you can ever hold in your hand. Serene, calm, and a smile, and then the kicks come when the neural system settles. (2:36) And you see them. It's a different dimension. And where do they go? And they only know your face and mom's face. And the environment you're in, which universe do they go to.

And that's the same as us. And we can control that. We don't need to go to sleep anymore. We know. Let it call it, daydream, but I call it connection with the Soul. So how do you want to create it? It's your perception of what you call, one understanding of one expectation of what you want ?? to be.

Any other questions?

Q: I just had one follow up. And you were talking about sleeping there. And I suffer from insomnia. And I just wondered if there was any particular exercise where we could connect in with the Soul, or... How do we settle ourselves to go back to sleep, particularly when we wake up harsh in the middle of the night?

K- I found a way to do it, and it works. I... for years, for decades, I used to travel around the world quite often. So, I slept a lot of nights alone in hotel rooms, and there was all sorts of noise and everything. I used to put a television on, and I used to sleep like a rock. There was no television, I wake up ten times. And, now a days it's very easy. I've got a thing called Keshe Foundation, on the, what you call it, the live stream or YouTube. (2:38)

Q: Nothing cosmic, just the TV?

K- Yeah, I just put that on and the guy talks (Mr. Keshe hears himself) and I go to sleep. And there's no insomnia. So, I keep the brain busy, in a background noise. And, the physicality goes (to sleep). Try it, it might work.

R: My ex- was like that, and she would fall asleep to the TV. If I turned the TV off it would wake her up. That's true. It has a lulling effect.

K- No, it depends what we call, a white noise matches your, what we call, sleep strength of fields. You put children near the washing machine, and turn it on, they sleep like a baby, you switch it off, they wake up. Does the noise of the washing machine is the same noise as the womb of the mother? Matches? This is the... We have to find the strength... Insomnia has a solution, it's partially physically, because we can't breathe, we snore, the tongue goes to the back and then you wake up. It's, I call it, fear of death. Then, being afraid to sleep, that the same (thing) happens, it creates that condition, but not all the time.

A lot of people with insomnia is subconscious awareness of, find a position in your sleep. And what position you wake up, and then you can't go back to sleep. (2:40) And then you find out two or three things, factors in insomnia. One is, first of all, happens in the old age, usually, or happens at a very young age, because you're too active. There is not enough time in the world.

It happens in the older age, because we have two cycles, or roughly, assume we have two cycles of sleep. The first cycle we sleep because physically, whatever we use, repairs or energies for everything else used. And then when we change to the next cycle, all the repairs are done, all the energy used, so there is nothing, so you have to wake up. This is the reason we wake up, because all the repairs are done. The left does the right, the right does the left side of the body, the left side of the brain does the right side of the body. And so, in reducing the cycle of switch between the brain and the lung, we become, we call it, insomnia.

So, one of the best ways for people with insomnia is, make it work. Do some physical action, physical things, that there's more energy needed than four hours of repair. And then you go into six, eight hours and then 10 hours. Don't go out and kill yourself doing exercises. But, find a process to bring the physical side of the repair, or energy, to extend the... extend the sleeping time. Or it works, a lot of people in the old age have this insomnia. Because, when you sleep, the tongue falls in the back of the throat, it's just like a fear of dying, suffocation. You wake up, subconsciously, it happens a few times during the night, then the fear of not going, going to sleep, you might die, keeps you awake and becomes insomnia. (2:42) You have to find out which one fits you, and then accordingly, change the position, and you don't sleep, you cannot go into that way of sleeping, or find a white noise, or you find out if it's everyday. It means at that age, you are not physically enough active. And one cycle repairs both sides, because when the repair is done, brain switches. Every hour, even you breathe through your nose and your lung, one nose is used, one lung is used. And in one hour they switch back. And if you haven't used enough energy, that in two cycle completed (in one cycle). And this is how our body is made.

If you understand the reason of insomnia, you shouldn't (have it). Is it the fear of death, because of your, what you call it, the tongue falling in the back of the throat, or the extension of the roof of the mouth? Which is part of the snoring, and all this other... Find out what it is, and try to remedy it. Or, is the fear of loneliness, fear of being with someone, you put a white noise in the background? Usually, it's solvable, but you have to find out. And, because we see a lot of people who are inactive life, hits this barrier in older age.

Try to stand upright. A lot of us create this insomnia and the things for ourselves, because as the older we get, we just bend in. Try, you're aware, stand upright (keep the back straight). At my age, I tried not to... The minute I found out, I realized, tiredness or exhaustion, or whatever, brings you to bend, (2:44) I stand up (straight). If you walk with me, I tend most of the time to stand very upright. Because it allows the right combination of energies to be used.

And insomnia, and in some cases, lack of sleep, leads to a lot of other problems because of it. Heart disease, emotional problems, because you don't get enough rest, so putting a lot of weight on, Because when you sleep, the body uses energy. When you are awake, you create that little ?? candle in your body, swallowing the energy, you breathe different things. And so, the more you are sleeping, the extent to certain hours, keeps you very slim, because body is not taking energy, but holding the machine going. It's like being in a traffic light, or in a traffic jam, the engine runs, you use the fuel, but you're going nowhere.

Q: ... This must be synchronicity. I was going to comment that several Knowledge Seekers have realized that if we're in a tranquil mode, we must be breathing just about less than 2% of what we normally breathe. And many time, we maybe get alarmed, because we're not breathing, (2:46) but the energy is there, so why bother? We don't have to get alarmed because of this, I imagine so. And...

K- Yeah, but it's the frustration of everybody's awake. Everybody's asleep and you're awake. It creates that frustration, is the most of the problem.

Q: Yeah, well, why frustrate, because of this? But, as you said...

K- Human race. You know the human race. If we have nothing to do, we go and find a pot, we break the pot and then start sorrowing, "Why did I break the pot? What happened? Why did the pot break?" We find a way to use it to keep our mind busy.

Q: Yes, and also the sleeping, the way to sleep. I've been sleeping for the last, what, at least 40 years with the television on, to be able to sleep profoundly. And another question would be, for positioning in space, we're told we have to master the 12 based mathematics, because the space is on a 12 math's base, maps sort of thing.

K- Teach us, we are students, explain what does it mean?

Q: Well, we're normally working with a 10 based mathematics. And computers work on a two-based mathematics, on and off. (2:48) But to position in space, apparently, according to, let's call them the maps, we have to manage a 12 based mathematics. Tesla talked about the 3, 6, 9 managing of the numbers, but apparently we're missing two other numbers. The up to 9 is the normal one, and then we got the 10th and the 11th number, which we are missing.

K- God help us.

Q: Do you get what I mean?

K- Yeah, yeah, I understand. It's just that ... it depends what theory, what fits where, isn't it. It could be correct, we can never say it's wrong, but... Could be correct, but we have to find the key to it.

R: What numbers does God use?

K- I think zero.

R: Zero and infinity perhaps, the two numbers that God uses.

Q: Yeah, what numbers are superior civilizations, ?? you saw?

K- Zero.

Q: Fine, thank you, thank you very much.

K- I think it's because everything goes back to the center. In English you make an, what you call, an oval shape of zero. In Arabic and the rest is a dot. (2:50)

R: There's a native language in Canada where they write starting from the very center of the page instead of the top or bottom. They start at the center because, because that's the origin. That's why they took away their language and made them go to the aboriginal residential schools and took all the kids away from the native populations.

K- You know...

R: Now they're paying billions of dollars to repair that error, the government is. Billions, literally, 24 billion just came up the other day.

K- For what? For repairing?

R: Part of the repairs to the, the native people for errors that were done in the past and they've gotten quite a bit of benefits from all that.

K- It's like it's very... Because you don't do it. If you read English, and on the sentence below, read Farsi or Arabic, is amazing what mayhem your eyes and your brain brings it. In English you go left to right, in Farsi you go from right to left.

Q: It's the same problem in Spanish and English.

K- Yeah. And then what creates in what state? Does the left to right is more suitable to left handed people? Or is it right to left more suited to the right handed? And then what happened, the people who have a left hand write it in a right hand language?

Q: That's a problem, we left handers have. We've had all our lives.

K- No, we don't have a problem, that's a beauty. We write closer to our heart, we are romantic, huh?

Q: Yeah, you're right there.

K- When we write, write with the essence of life. Yeah, but the thing is, they tried, you know, instill in some families, when the child is born, who with the left hand, they see some problem, "What can we do, how can we get him to write with the right hand?" They put the force, the pen, force, the spoon, everything in their hand, to get the right hand working. But they don't think that's the beauty of what we accept, we have to accept it the way it is, and it creates a long term problems when these things are done. And, once our parents are not mature to understand, and appreciate the beauty of it, they see that, there's something wrong if you write with your left hand, it creates mayhem... They do everything to make you to do with the right, because

everybody else, you don't fit into that thing, there is something and you go to some of them, "Sorry he's left handed. Oh, instead of jolly, he's left handed." This creates mayhem for us.

Thank you very much for today.

Q: Thank you very much Mr. Keshe.

K- Thank you very much. I hope we learned a little bit, we shared a little bit. (2:54) And we meet again next week. And I hope by the time we meet next week, we won't see another aggression of a religion, which I'm pretty sure, we are on the verge of one of the worst wars to hit, between the Christianity, the Jews and the Muslims, all in the holy land. And I wish all the best for those who are trapped in it, and I promise, we'll bring justice.

Thank you very much for today, and to be on your lines, where we announce the conferences, and send invitations to the people. Please keep on sending all invitations to your ambassadors. Don't say somebody else does it. If you are in England, print it, post it, let's send hard copies, letters and the emails and everything else. Today we'll, when we do it, we'll issue the list of the embassies in London. And then you can still send it to your embassy in your country. Where if you're German, send one to... and you live in England, send one to England, and send one to another country. We have to bring this peace process forward.

And, as I said, next 2-3 years, once we complete our work with Chinese nation, Chinese government, I can put my head down, hopefully, hopefully, and think that the humanity has started the process of the, what I call, conversion. And to what extent and how much we can accept and how much we can change.

But, I hope we still see each other tomorrow, (2:56) see each other again next Thursday. And I hope the world will not be a different place, and different points. But from what we see coming from Vatican, "insider stories," and insider information, they have instructed the masking of Iranians, and I hope we are wrong. But, I will return the stones of Coliseum back where they came, before I close my eyes. Thank you very much for today, and see you next week.

R: Mr. Keshe, where are those forms available, the letter to diplomats and so on? Are they going to be on the...

K- We'll post it. We will post it on all the chats. We will post it with the list. I'll post it myself because there is a, there is one for your ambassadors and there is one for you to inform the others. And there is a list of embassies you do, we do ourselves, our promoters are doing it. You will most probably, hopefully if it, as you've seen the other promotion from the American side is coming. The British promoters, we hope that we can come to an agreement with the national press and everything else. They can do it in next week or so. But you will see this presentation around the world, as you've seen, and you put it on the screen, in the past few minutes. Where we told you we have put it out, we are going out. And, it's done in a mass, in a way, I've put it to your embassies in your countries and your ministers, that no, no one can stop, stop the process.

And, it is out, it's in public. And we have the pleasure of the Chinese government representatives, has already agreed, the invitation is going out to them. (2:58) They'll be in the conference. And, we will see. If we still have an embassy and ambassador in London, we don't have ambassador in London, but if we, our Council would attend with the present situation, which is zoning up in, what you call it, in Middle East.

Very interesting point to bring it, ?? forward. On the request of, I made to the Iranian leadership, last week, Iran changed the tone, and going into helping, what you call it, to supporting the radical regimes, and they said they ?? step back. And, kept silence. And on Thursday, last week, Iran announced, Friday announced, that they will accept, on the line of the request of the Keshe Foundation, the students, and University students of Palestine, into Iran. They opened the door, as a first step.

And we held back and we heard nothing for five days, six days was silence. American administration listening to the open discussion of the Keshe Foundation, that there will be no participation, no support of Palestinians, the way they were hoping, if they got, to give them an excuse. They moved their naval forces, suddenly in past two or three days, to the position and now, as we saw in the United Nation, up to now they were waiting for Iran to go in to start the mayhem. They brought a fantastic policy in line in United Nation, that we're going to go to Iran, get Iran, because they helped them before they rocketed us. But they don't say, as you came to the Senate, how come the rockets which gave to Ukraine, has ended up on killing American citizens in Palestine, fired by the other side. (3:00)

So now you understand, we stopped the process of the war. Last week, because of the Iranian, and what we call, leadership, and in my talks with them, this morning, just prior to the teaching, everything, as was ?? (in) of my request, we listened to what you said. And I said, "The only thing you didn't listen to, to open the white gates back to Iran." We know what the next step will be. I was hoping to receive a direct instruction, to announce this morning about what we were hoping to get, but the Americans, in response to us, that we're not taking part. As we saw United Nation yesterday, and what their administration asked. We are going to go, to get to Iran, because they helped before. They don't say, "It's our own arms, Iran did nothing." Any excuse to go in.

But, I promise one thing to humanity. I make sure, the nations who start this war, will not exist on the map of this (land), by their own doing, by their own action and nothing else. Not a single bloodshed. But there are ways when you're ashamed to be, you change. And only comes as I said, when a man becomes shameful to kill, he will change his habit.

And, it's very interesting what we might see in the next few days, as we know Americans have planned mass murdering on this Saturday, Sunday. And I hope we don't see it, I hope our leadership, and whatever, comes to their senses. But, we wait and we'll see. (3:02) And, our request, I thank the Iranian leadership, in accepting our request and withholding from any aggression talks, or whatever going to do. And this brought us to the point and I hope that they would have listened further. Not just bring, open the door to the students, but to all the Palestinians. But they still would have found, they found another excuse to... The whole plan of the Americans is to empty Iran's central bank. One of the richest gold reserves over two and a half thousand years. And, I'll make gold not to be count for a cent. Thank you very much for today. See you next week.

(Auto transcription by Elias)

STM absorbs fields through food & air to elevate; Air has special quality con survive only on air; Create "seed" from food and air to attract fields from U; Connect to past & future; Breathing method to release Soul; Achieved Flight - now what; 15 years develop T to survive in space in addition to flight; To keep Soul have to create a "seed" that always in charge of self; Souls hit Moon trapped in boulders - don't know how; Difference between transmutation at death and consciously transmuting; Take STP inside Soul have control - sustain life in U; Control over emotions needed to travel; Keep both STM & STP together - follow Ethos; Jump into depth of space - switch to fields; How to bring loved ones with - can't steal Souls - free to come; Special Guest in London; Change for KF huge message for China; More on Palestine - Israelis to sell Gaza to British Petroleum - control oil; 100,000 missiles on Tell Aviv; End of religions - peace will win - End of American superiority; Ready for Messiah; Popes won't accept Messiah - lose power; Do not consume Gans; Queen Mary College host KS; Do not lose Soul in space

ENGLISH TRANSCRIPTION

(:08)

K- Yes, thank you very much. Good morning, good day to you. As usual, whenever and whenever you listen this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. The interesting part about the Intro, as we heard, is how we absorb energy by the food we digest and to what strength. But if you go back to the other teachings and recent teachings, we always said when the man breathes, the man, the higher strength order of the fields of the energies we breathe in through our nose and what we consume or put in our mouth, will... reaches the Soul of the Man (STM).

In a way, what is interesting is, how do we feed the Soul? How do we get the Soul to reach a point of maturity in its field strength? The physicality of the man, (:10) takes the food inside, to elevates, or to absorb energy from the environment. How does your...

<< Mr. Keshe tries to open the whiteboard >>

If we look at... I try to be, very, what you call it, I'm not a very good drawer, but we put your, what we call, brain here, and we put your Soul in this position. This to be the position of the STM, in red. Now... In this position, when we breathe air in, (:12) as we said before, as we breathe the air in, to go down to the lung, the food we eat to go down to the lung, both continuously and without any fail, feed energy, the highest order, to the STM.

So, what we see is that, the stomach of the man needs the solid food, to be put as a trap, to bring energy fields from the environment, from Cosmos to Galaxies, to the rest. So, it's the same with the Soul. But that's what you see, the nostrils and the mouth, both come to the same place, where your air pipes and the line to the stomach go. So, the body of the man needs the Earth to set trap, for absorbing the energy of the, what we call, environment. Where the STM uses the contents of the air we breathe, to set the trap for the same fields, but at

the order of its own, to receive. It's not just that we set in the, what we call, the food, as a solid food, as a trap, but also does the same thing. (:14) Continuously receiving energies from the environment, as the seed to absorb higher order for its operation. And through some of these fields, is where we again, due to the strength, in one occasion or the other, connect to grandma, or grandpa, old friends, future friends and rest of it. You say, "I foreseen a future, I knew I would meet you, I saw you in my dream, and now you are here." It's not that we are connected only to the past, through these fields, we are connected to the energies which is connected to others, which come from the future and the past.

Now we understand, the whole process. The energy field of the STM, through the gaseous condition, through what it breathes, will get elevation. And then the physical part is from what man absorbs. So now you understand how much more energy has come, or comes to the body of the man, just by breathing. And then it comes an interesting part for many of you, which some of you who are so anxious to know, how come you can control with breathing, the operation of the release of the Soul? How come by changing the breathing system, sequences, capacity of the lung, we decide how this energy releases itself, breaks through its boundaries, and can go out. (:16) Because, if you look at it in reality, your brain is lined that way, your lungs are lined that way, you have two halves.

Now you understand, how the operation of the energy, which is the same as the energy which feeds the Soul, in the lung of the man, controls the freedom of the Soul. But at the same time, being just sitting above the digestion system, the same lung, the same food, interacts with the energy of the matters. In long run, man will realize what you eat, more or less, does not play, or plays very little game in transferring his energy, except when he transfers it to the blood, in elevation of the STM. And in many cases, brings that down.

Now you understand. How man through the breathing system, can attract, elevate, control the dreaming and release and expansion of the STM. In a way, when man becomes a bit more wise, you'll find out the digest system, (:18) field creation, extracting from the fields of the Universe, the STM, extracting fields from the Universe (U) to its strength, in creating a new dimension between the two, creates a crucial point and crucial way, in how man will live, the time it lives, and how it's dimension (D) of life will change.

Then you understand, the physicality of the man, has kept the STM, prisoner through what it consumes from this planet, in the matter state. When the time comes, that the man will live only through the breathing cycle, that creates enough energy, in that the STM, will have the capability and the power, to absorb all the energy needs, man will be encapsulated. And then, that's the time he can transmute. This is what we do with you in the systems. When you feel you fly, when you feel you've been somewhere.

Now you understand the knowledge, the technology. But, there's a crucial point. In many of my teachings, I always say, when we started the first flight system, when I saw the first flight system in Tehran Sharif University, (:20) when the system took off the ground, and then I jumped on it, I sat on it, trying to hold it down, and it doesn't go anywhere, it pulled me up and start shattering on the floor, "ch-ch-ch-ch", where the bottom blew off. Me, forcing the gravity to stick to the ground, forced the emotion of the system to release energy on the bottom end. If you look at the materials which will come sometime later on, in the hand of the Knowledge Seekers, in part of the museum, you'll see that the extra plate which we actually glue to the bottom, to be able to carry on till the new system was built in that week.

But, what happened, this question came to us, And then subsequently in discussions, we flew, we now fly. We have broken the code of flight using magnetic fields, plasma fields. No burning, no disposition of air. What's next? As we said in the discussions, in the, what we call, the office of the scientist of the President ??

Ahmadinejad, we arrive on the Moon, what's next? How do we walk around? We can't put the monkey suit on and get off the command ???. We haven't improved, we haven't increased the knowledge, we haven't changed the position, we haven't added to. So, since 2008, plus the information and knowledge we had before, we said, "The flight is done." We left it to the hand of the scientists, (:22) who are interested in getting flown, and going up, and creating whatever they want to do.

But the truth is, question came, "What's next?" How do we feed the man in Space? We arrived on the Moon. Sit in a box, open the door in a monkey suit. What's the pleasure of coming here, opening another prison in the clothes of man? This is why we set out to develop technologies for food, for medicine, for agriculture. And it's taken 15 years. You see, "Oh, I put a Headphone, I don't get Alzheimer's." "Oh, I eat a Gans, I don't need to eat." "Oh, I can do this, I can make that." All this has taken 15 years, and this is what we call the auxiliary side, a new way of technology (T), where lift and motion, has come to, needed to, added to exist in Space.

So, we developed the flights, and with you Knowledge Seekers (KS), jumping up and down, growing seeds, coming to the sessions, see how your Soul expands and the rest, we got the knowledge, the technology, completed. But now, you have another dilemma. Your dilemma starts today, in this teaching. And, your dilemma, cannot be answered by no one. No one except you. We have taught you, as I said, the same as Sharif Tehran University in 2008, we showed you to fly. Now, you use the dimension of your Soul, to encapsulate the physicality (P), (:24) we send you to planet Zeus, we send you to the Mars, you get yourself to the Moon. And, then you convert. According to the time, place and the space and all the fields. But, your problem starts now.

On Earth, you use the energies of the air, to absorb the seed, to absorb energy. On the Moon, there is no food, you have no mouth. There's no air, you cannot breathe. How do you be, connect, elevate your Soul? That you landed by mistake, you became a stone, now you want to be a creature who moves, or, "I don't like this, I want to go back to Earth." But, "I need energy, I need the connection." How do you absorb energy from the Universal fields, now that you have no mouth to eat, no nose to breathe, to put the seed, to elevate the Soul? And maybe if you sit as a stone there, you need a million years before the strength absorbed by the stone, which you have manifest yourself, maybe give you the elevation to high enough to come back to Earth. But by the time you come to Earth, the meteorite has hit the thing, it doesn't exist and the rest of it, or the house you live, Israelis got hold of it and bombarded to the smithereens.

Now, your dilemma comes, how do you feed your Soul in Space? What is the secret of feeding your Soul? (:26) What is the method of being able to be functional as a being, once you arrive through the dimension of the fields of the Universe, in the plasma strength of the STM? Now, we have a beautiful saying, how do you bring the donkey to hold it, to saddle it, to put a load on it? We say, << Farsi language >>. Now, how do we load this Soul, which has arrived on the Moon, perfectly functional? Now, you want to transmute, which means you want to take the shape, time, place on the Moon, but this time there is no mouth, there is no nose, there is nothing else. How do you absorb energy, even to sustain your existence on the Moon? Because you are an attraction field, and giving of fields, and a little bit goes too much, the plasma opens up. Sugar cube in the hot water of tea. How do we keep its integrity? How do you hold to its existence? How do you change that position?

I'm sure many of you have found the answer, many of you know the answer. And if you do not know, what is your option? There are two ways. (:28) You can create the seed that allows the Soul to be always in charge, and does not allow it to disintegrate, or become a stone and sit there for millions of years. I said this once in

one ???. Next time you look at the picture of the Moon, and you see a big boulder or a big stone, ask yourself one question. Just for the fun of it. Whose Soul has made that boulder, and he forgot, he didn't know how to change? And he has to sit there for billions of years. Maybe it's your grand, great grand, grand, grandfather's Soul. Hit the Moon by mistake and he couldn't convert.

This is the difference between the man with the emotion, with the man as a traveler, the man as a transmuter, using his Soul to travel. And the man as a star, as a stone, as a Cosmic dust, just from the STM, that can never convert, can never transmute. If you do not get this part, you become that plasma, which wanted to transmute, forgot how to do it, and now it's become a stone dust.

Now you understand, you are back in the dilemma of us, as an Iranian nuclear physicist, as a scientist, sitting around a table, in 2008, (:30) what's next? How do we feed the man on the Moon, without taking food? Now for you is, what's next? Can I put the small seed that my Soul extract energy from his environment, that I can manifest myself and sustain life, because in this place there is no air for me to breathe, to bring that seed? Not with the Oxygen, even though the planet has its own dimension. How do you make a channel to attract fields from the environment of the space, you land yourself in?

As I said, there are two ways. One, is the emotion of the man. The emotion of the Soul, good and bad. Thinking good, doing good. Creating the emotion to create the circulation of the fields, that become the seed of the attracting the fields of the Universe, to allow the Soul to be in transmutation. Not when the Soul is released as a dead body of the man, no connection. But, there is one point which you as transmuters have carried with you, which is the secret of your success. It's the Soul of Physicality (STP). Because it's embedded in you.

In nuclear technology we have a fantastic saying. (:32) And that is, we create, we go back to what we call fundamental atom. Fundamental plasma. The initial fundamental plasma. Where if you read the books it tells you, the seed sits within the center, and then you have the fission, and you have the, what we call, the basic atom, what you call, Hydrogen (H). In a way, your job is to use the STP. Outside or inside, or create the environment that the STP becomes so thin, that it embeds the Soul, that in that interaction you get the reverse pattern. And with it now, with the Inertia of the interaction of the two, you create your manifestation of physicality, and with it, sustain life. Sustain the existence of the STM.

This is what you need to understand. And in the process, you always have to keep the emotion of physicality (P), STP and the emotion of the STM, always in operation, in connection, understanding their separation, understanding their power, that man in the Space will become a traveler of transmutation, not a traveler of the Soul, which died when the physicality separated, (:34) and become, to find his place and position according to the strength, and a star for billions of years, a seed of to become another cycle.

There is a difference, within the present knowledge of the man about his Soul, and the present knowledge of man, his Soul and transmutation. When you die, physical dimension, your Soul is free, and it fields strength dictates where it's got to go and that's it. You go to Galaxies, or to so and so, in such a spot there is a field there, that you are there, as it does, maybe it's the beginning of the star formation, whatever, and you start your cycle. You have no choice. You sign your sentence with your behavior, while you had the opportunity to live as man, and the strength you gathered within combination of the fields, and the life of the man has already dictated your position, your prison sentence, for rest of the time of the existence of your Soul. There is no emotion, there is no cycle of STP with it. Because it took all and it's gone. But with transmutation, through the strength of the emotion, you have that choice. You are given that choice.

Now you understand. Now you become the passengers of the Space and you become passengers of what we call, the "cycle of man." In the dimension of the Soul, in the dimension of the strength of the fields. (:36) This is where the separation we have between the death, physical death and transmutation comes. That's where the difference is. Where you have no control in where you're going to end up, because the cycle of your life in the physical dimension of the man, the strength of the field of the physicality of the STM, given to the STM, has zoomed off to his destination, where he finds his balance field as a dust, as a center of the Galaxy, and maybe even, is so pure that it reaches the Soul of the Creator's strength.

Now, you understand the difference. Now your dilemma just started. We put you through these systems, in the test we do with you. But now, as you come in the November teaching, you see the light, you try to establish the color of the light. Or you see no lights, but the energy fields of transmutation is there. You have to decide. Do I transfer the emotion of the STP of the man in between my hands? And in connection between the two, I decide where to fly to.

In the condition of the physicality of the man, the energy of your physicality is dictated by your stomach, and the liquid, and the Gans's, and the ?? lymph liquid which you create. (:38) In the dimension of the Soul, in transmutation of it, you only deal with the fields, there is no food to eat, there is no air to pass the body of the man. And then you understand, why for so long I keep on telling you, ignore that MaGrav, ignore the physicality of it, look at the field transformation of it, look at how, what it creates. As a field strength.

One day you Knowledge Seekers, will build these MaGravs, and you will use them for transportation of your physicality. Once you understand the work of the MaGravs as a field interaction system, and not just for discounting electricity bill by 20 or 50%. You have already discounted your life, when you took the path of material condition. Then, if you understand this, you have answered what is taken us 15 years to teach you about how to make Gans's for food, blah, blah, blah, blah. Where now you decide what energy fields I can get from the environment of the existence of the Soul, to achieve what I need, the emotion of the comfort and pleasure of existence in the time, place and position. That I can manifest myself, or at least I can enjoy the field strength of the environment. I do not need to become a Martian to enjoy, I can stay in the dimension of the fields, that has life, absorbs energy from the Mars, and I become non-physical, tangible entity, as a plasma of the existence in the environment. (:40) Don't we see these on upper atmosphere? So, it should not be that hard for you to exist, anywhere in the Universe, without giving yourself a dimension of physicality.

Now you understand. With Gans's, mixing it, doing this, doing that, we showed how you can use them for health, for food, for blah, blah, for fertilizer and the rest. Now your dilemma is, you're learning to travel with the STM. And entrapped in it, the STP of the man as a plasma, and how you use these two, to manifest yourself, in the form of entity or fields, anywhere in the Universe. And the only one, and the only way you can get these two monkeys working together, is the emotion, and nothing else. When one Soul does not lie to the other for its better existence. When one Soul in emotion looks after the both, "Thy shall not lie." Talk good, think good, and do good, end of you, with do-gooders for your own Soul in the Universe.

Now you understand, where the teaching is there, is gathering a strength to become in all dimensions. Now, you got rid of the "monkey suit." Now, how do you feed the monkey? (:42) You get a hole in that monkey suit in the space. The monkey is monkey-ed. You learn to travel in the dimension of the Soul. Even you are wearing the suit of a monkey, you still can survive in any dimension. The interesting point is that, how many of your children, and great, great grandchildren, and many of those who know with same position, the children, the great, great children, will do what we do, today on this planet, and it's fun. We call it

parachuting. We go on the plane, we go as high as we can, and we jump off having a "monkey" parachute on our back. We know we push a button, and we land safely.

Now that the man is educated about the cycle of life through the dimension of Soul, how many of you will go with physical dimension into space between Earth and the Moon, for example, and jump off in a dimension of physicality, instantaneously convert in the strength of the field of the STM, and within seconds appear on the table having Sunday lunch with mom's, and mom says to you, "weren't you going today for parachuting?" "Mama, I did, but this time I parachuted from space." But no clothing, no parachutes. The only emergency parachute on your back is, understand how to work within the STP, (:44) in the STM, and create a dimension that allows you to create the gravitational field of the Earth. allows you to absorb life, field strength for your Soul, and the emotion of the presence of the position, time and space.

Now you understand. You, up to now, came to the systems, and you saw the expansion, and you were on the Moon. Now, how do you feed that monkey on the Moon? How do you jump out of the spaceships in the space? But on Earth, you know you have a air, you can breathe, or you carry oxygen as a backpack at a higher altitude, and you still get the mixture to keep the physicality going. But what do you take with you when you jump off the spaceship in between Earth and the Moon or in the Space? What is your parachute? What is your safety net? What have you understood? That the way you're born, from the womb of the mother, you jump out of the liquid environment into the air, and you go, "Wah," and then you survive, because you learn to absorb the energy through the first breathe from the conversion of the fields of the air of the man to feed your Soul. What cries your Soul will make, when you transmute, in the dimension of your physicality, into the STM? It's in a way, the reversal of the cycle of the life, on this planet, at the point of birth, in the dimension of physicality.

The interesting thing is, would you still cry, when you go back? (:46) From the dimension of the physicality to the dimension of the Soul. We have seen those who travel from the Soul to physicality, do cry. The emotion of tears, but we don't see any tears. How many of you been in the systems and you say, "I cried, I could feel the tear." But there is no tear, you think it touched, But, as observers outside, we don't see any tear. It's just the emotion that is so real, that it gives you the feeling of the wetness, but is nothing there. How many of you went into the system? How many of you have used the Head Units, and still come out with the same?

Those of you who come to the London conferences, and Ambassadorial conferences, you will have fun with this. You need to have fun with this. You need to understand what the fun is to have, and how you can jump without a parachute in the depth of the Universe, using the strength of the fields of not the physicality, but the energy within you, ?? trusting in yourself, understanding yourself, understanding the work of the work of the Universe. Now you understand, you came here today to learn, but now you have a dilemma to sort out. If you want to be the Passengers of the Universe, on your own accord, on your own standard, and how you test. (:48) You cannot go into Space and jump and "I made a mistake." There is no error, I can't breathe, I do not know how to do, there is no room for error. But, would your body automatically change into that position?

The teachings... The cycle of the test which we have put for you, starting with the light between your hands, is the beginning of teaching you how to feed yourself, in Space, through the Soul. It's the beginning of the Space in teaching you how to be able to manage to keep the integrity of the STM and the STP of the man together, that somewhere in Space, you will convert.

And then, we come to the beautiful part. When you achieve that, when you come to that, then, your second dilemma starts. What's the use to becoming a passengers of the transmutation of Space, when you don't have your loved ones with you? You go to the Moon, you're on your own, you go "mental" (crazy) after a week, two weeks. How do you tune to the field strength of your lover, your child, your grandmother, your dog, the cat and the tree you like? Knowing you all have the same common denominator.

First Commandment, "Thy shall not steal." You cannot lock and steal the Souls, (:50) because you want to go to the Moon, you're coming with me, I'll lock the doors, I'm going to the cinema, you have no choice, I'm driving, I've got the button and I've got the ignition, you sit in the car where I go, you come. In the dimension of the Soul, you don't have that. Every man drives his own car, where it depends which man would like to go up with you. There'll be no waiting, I go there and I see you, we're going together. Even though you go and see each other, if you get it right, but you can't grab the physicality, or tie it up the Soul, and drag it out with you, because that's stealing.

Now you understand. The real process of transmutation, the real process of life starts when the first step is, we go through the transmutation of the light. Not necessarily you'll see the light, not necessarily you'll feel the light, but you ?? ride the condition of the transmutation. Many of you say, "Oh, I had no feeling, I had no dreams." So shall be between your hands, no lights, because you're still passenger of the frontal belief. He's still that guy who gets the MaGrav and does not see the field of MaGrav.

So, the teachings gradually, as you've seen, through the test trials and the rest, is heading for. The questions of the scientists in Sharif Tehran University, of 15 years ago, what's next? (:52) We learned to fly, what's next? We made the shielding, what's next? I hope today I brought you a new headache. A beautiful headache where man transmutes and not man dies to become another point dust in the Universe.

I brought you the thinking. Now you understand you are happy with the seeds of the energy to convert in your body. Now you understand your breathing feeds the Soul. And it's that seed that attracts more from the Space. Now you feed the monkey. How do you feed the monkey in Space? In the level of the Soul, that even through interaction of its fields, can lead to the creation of the monkey, in essence of the emotion as a man. But inside, he sees himself, he has four legs, two arms and 20 eyes. Do I need this? This is my new look on the Moon. Can I have half of them blue, half of them yellow? One leg longer, but it makes it more attractive for the other one, Soul, which sees me like this.

The true cycle of life starts when the man learns about the transmutation of his own Soul, and then learns how to survive, how to exist, how to go through this dimension. I hope, those of you who understood, and you have already understood the transmutation, (:54) understand how to feed the monkey, the point, the time and the place, that the monkey does not die. Thank you very much for today. I shared with you some of the deepest knowledge's of the Creation, if you understood. Otherwise, it still it's that MaGrav. How much more energy can I get out of it? Is our physicality, how long more I can run it to live 100, 200 years? I want the "fountain of youth," where actually the seed of that fountain ?? the seeds ?? as the STM, within the body of the man. It's you, ?? who has not found it. We go through a break, then we come back, and we go, as usual, try to answer some of your questions. Are you ready Rick?

>> **BREAK** >>

510 KSW November 02, 2023 (1:00).

K- Yes, as usual. As usual, we'll try to make some announcement at this point, for Knowledge Seekers, what's going on, and what is in progress. For those of you, who were interested to come to London to the, any of the three seminars or sessions or whatever, we have different pieces of information for different ones. The first one, the most important one, which is the London conference for the ambassadors. We posted the invitations, cards for you, for ambassadors and other people you want to invite or introduce. And we asked you to send it to the ambassadors of your country and other countries in London, and then to the other countries around the world, to your ambassadors, to inform your foreign officers that there is such an event.

We are start getting, as the actual process of this started this week, we have already received a number of embassies, sending their ambassadors, or attachés, or other people. (1:02) So, the ball has started rolling, in past 20 hours, I think we received 3 or 4, and this is since I start launching it on Tuesday, Monday, Tuesday. So, please keep on sending these invitations to all the embassies, do not stop, till we see how many they can bring. And, you can even add to yours, you can bring with yourself, your scientific attaché, your energy, your agriculture, and your health, ambassador attachés. So, in your letters, not only invite the ambassadors, but they can say if they're (who) coming with, because some of the ones we see now, they say they're coming with such and such attaché or the others. You can make, if you let us know, it's still the same. It's considered part of the nation. We're trying to keep this very, very limited.

We targeted about 500 and we are looking around about 200, 300 with ambassadors, because something has happened in the event of past few days and couple of weeks, which has changed the course of the Keshe Foundation work. This is a, at a very high level, a very big change for the Keshe Foundation. And for that reason, we prefer to keep directly into the, what we call, ambassadorial level. If Knowledge Seekers would like to come, we can allow you, a number more to add. But, the ratio we have, is perfect for very powerful presentation. We have officials from the governments, who will confirm the technology of the Keshe Foundation to the other ambassadors. And it's a beautiful setup, now it's heading, we are heading towards that. The event is booked, as you've seen where it is. It's still you want to come, join us, but you will remember, this is the point when the humanity will change. (1:04) You will understand exactly why and how. We have officials which will bring a change. They are coming, especially appointed by the governments, to open the doors. And, it cannot be stopped.

Going back to the, the week function, from the 6th to the 10th and then the weekend. We set out to bring this to a beautiful memory. It's something I wanted to do. Those of you who came to Manchester event, I put you in the hotel where, brought me a lot of memories. It brought a lot of things as a businessman, where I spent my time in that hotel. Millions of dollars or Euros or Pounds for me was... took shape, business, lost, gain, whatever. But it was beautiful, I brought that essence to the Knowledge Seekers, this is where, this is my city, this is where I was born as a teenager. I learned about the life, I learned about falling in love and the rest of it, and fell in love to be a father in Manchester and the rest of it.

This time we, the event in London, as some of you who are attending it, have already received the information in the past 24 hours. I take you back to the same place. The same condition, and, but in much deeper, towards the science of the man. With the collaboration of London University, and the Principal of Queen Mary College, and the staff of the Queen Mary College, we have arranged one of the most strangest teaching seminars in the history of the Queen Mary. Those of you who attend, we still have room, another 3-4 days if you want to attend, (1:06) you will sit in the classrooms, or in some of the classrooms where I as a student sat. You walk the corridors, the buildings, where I was taught. And so, in truth, you become the Knowledge Seekers, in the classes of, in the classrooms of, every day is a different classroom, different building, the way it used to be when we were students, of Queen Mary College. You go back to University. And, we tried to keep this in a very small numbers, because, a number of the staff and professors and the scientists of the Queen Mary are invited if they want to join in.

So, this time you go back to the home, where some of the nitty-gritty's of the nuclear technology was brought in, and I thank the Principal of the University and the staff of the Queen Mary College, who made this, something they said has never been done. It's very unusual, but it's such an important topic. Nuclear Plasma Technology, which was born out of Queen Mary College, back into their, into the classrooms. So, if you join us, and those of you who have already registered, you're going back to University. But this time you'll be taught the science of the truth about the traveling by the fields, and surviving the field of the space and time. I thank the office of the Principal, and those who made this dream to come true. (1:08) It would have been easy to give this lecture in the hotel room, somewhere as we did in Manchester. And then it'll be, that's it. Tea breaks are yours, you have to go and find a coffee and tea. Lunch breaks are yours, you are a student, you have to go and find, go to the canteens, what we used to do. And live the life of a student as a man, and get taught the knowledge of the Space Technology.

It's important for us to understand this. So, if you join us, I think a few more places left. We kept this, we don't push it so much, we keep it to the minimum, that it brings that essence, and how it's done. Saturday and Sunday is a different event, and then on Saturday night, we have already set the scene to meet the world ambassadors and others, and dignitaries. A person flies in specially, to be present in the London conference with the ambassadors. He's not an ambassador, but influential to change the course of the meeting. So, now you have a full set. We kept it as close to our chest as possible, and thanks, as I said, to University of London and the Queen Mary College. As they said, "This is the most unusual teaching." But for an older student, everything is possible. And have made it possible to become a reality of, literally, going back to school, going back to University. And it'll be interesting, what we learn this time in a week, that the student take three years to get the degree and come out of it. (1:10)

Please do not stop sending them messages to your embassies, to all the embassies. If you have already done last week, send the second one this week. And tell them, if you already decided, please understand how important it is. In nineteen seventies, eighties and nineties we went for a peace walks, this time, peace talks, through Internet. And, for you, to encourage your, what we call, government, scientists to join, and to be part of. I hope we have the pleasure of seeing the Iranian attaché, which is now, we don't have ambassador in London, they will, what you call it, represent the Iranian nation. We have invited the Israelis, we have invited the Belgians, we have invited, the only people we cannot invite, we cannot get the email of the ambassador of United States. Well hidden, I usually get access to this very easily, but I haven't tried. So to the team, you try it when you fail, I know where it's gone. But, see if you can get access to the American ambassador, and invite him in. And we do our part.

We expect to have two, three hundred people, no more, because the scene has changed. Do not forget, today I'm in London. I have arrived back, two days ago, from Beijing. And, we carry a huge message. Not only from China, but on other positions and times, and what will bring the change. Joining forces with nations to bring peace is paying dividend, and huge dividends for the Keshe Foundation. (1:12)

Many of you asked me, what we talked about, what is the position with Palestine. As you remember, we asked the Palestinians, we asked the Iranians to give refugees, then do not go into war, do not talk about attacking and destroying. And our officials confirmed, they have stopped it. As we see, Iranians have changed position since two weeks ago, and they keep on telling, "We don't want wars, we don't want any conflict with .. Americans." And, we stick into the same plan. Iran will not enter any war. But, what is the beautiful outcome of this? Because there are other things in the background, when we gave you, and we gave the information to the Iranians, to take the Palestinians to save. And Iran went out saying, they take the educated Palestinians to support them to finish education in Iran. We're left with the Palestinians, which at the moment, are getting hammered. And interesting is, Senate says, "How come the guns and the things we get to Ukrainian, has appeared in the hand of the Hamas and the rest?" We explained exactly how the Israelis gave it to them to start this. In a way, played a trick, and we informed the Iranian ?? leaders ?? to not move, and set back. But we've seen different alliances has been created.

But, something very interesting has come out of Israel. Now the Israelis want the Egyptians to give part of Sinai desert to the Palestinians, to all to be moved out there, that the Israelis would have the whole of the Gaza. And again, a lot of you might understand, there's a bigger game to this. Oil industry and gas industry has a huge things to do with it. And now they're talking that the British become in charge, which means they are sold their land, their Gaza Strip and the rest of it, to the British Petroleum, to put one of the largest reserves of oil and gas. (1:14) Now you see how their hands are opening up.

So, we see everything is taking shape in a way it has to. But, there is one thing which the, as we say, Americans and Israelis did not count on. And, as you know, the Russians, the Chinese, always spoke about the most advanced hypersonic. And now we know Iran is in a position of the same. America thinks by 2027 they might be able to test the first hypersonic, in the way the others have. But, my biggest fear and my advice to the Iranian is, as the Iranian Foreign Office said, "We have many secret weapons that the Israelis will (do) not know." They've got the taste of one of the simplest one. And these rockets can reach Tel Aviv in less time, less than 10 minutes. And, to estimate, calculate it, what is set to come, there is 100,000 missiles, targeted, set, to go to Tel Aviv. How many of them can be intercepted, 100,000 cannot. And I hope we'll not come to that end, we've just done the advice of not such a thing to take place. But if worse comes to worse, anything goes worse, this is going to be the end of the, what I call, the beginning of the end for the American superiority.

It is taking shape in a very bad way, but it's taking shape in a good way that those who are pushing with peace we will win the peace. And we're trying to understand, (1:16) with the help of technologies, how this can be diverted, and how this situation will take shape. But at the moment, what we were promised by the Iranians, will not get involved in this war. And they know how the trap was set. We keep to the same position. But what we hear, and what we understand in the backgrounds, very soon, if things go to the worst, all the nations around the world will expel all the Jewish back to Israel. This is a very high possibility, it's taking shape, except Europe. If this happens, all the Arab nations will start refusing and, this was bullet shot, which yesterday, Jordanian government recalled its ambassador and told the Israelis, "We don't want your ambassador back in our capital." And now we see, this will start a situation which, in a way, will create a bigger mess than anybody thought. But, we know the outcome, we know what will be, it'll bring a, what we

call, everlasting peace. It's the last ?? skirmishes between the religions. But we see what happens and how it will take shape.

As I said, your Soul can bring the changes for your physicality. Our Soul bring changes for humanity. And we know, we see, we understand the Totality and how things will take shape. But we have to see it, and see how man will play the game. (1:18) In any case, join us if you can, in London, but we limit the numbers to... We would like to have majority ambassadors, of politicians and diplomats. And the other thing is your British nationals, you should invite your Prime Minister, your ministers, your nuclear people and the Space people, to register to be in this conference. Because, we do not have an ambassador in England for England. So, it's your job to invite dignitaries of your country to this presentation.

Any question?

R: Just before we get into the questions, Mr. Keshe, I'd like to show you a document that I ran across recently. I'm not sure even where I found it, but it's from the records of Hansard of the UK. And ... let me just ... share here, so I guess you can see it there now. I'll make it a bit bigger. It's interesting because this is the... Some people have a hard time believing that Queen Mary College even had a Nuclear Reactor, and that you were involved in a nuclear reactor program and so on, because they don't have a nuclear reactor program now, apparently. So, it's, you know, people look it up and go, "Well, they don't even have a nuclear program." But, this is the actual document from the legislature, when they made the decision to go with the research reactor, the low-powered research reactor. (1:20) This is in November 1960. So, that's quite a long time ago, about ... you know, 60 years ago basically.

So, the Mr. D. Price asked the Minister of Power, whether he has approved the grant to Queen Mary College, University of London, of a license to install a nuclear reactor under the Nuclear Installations Licensing and Insurance Act, 1959? And Mr. Wood responds, "Yes, I recently sought the advice of the Nuclear Safety Advisory Committee about installing low-powered research reactors in the range of 10 to 100 kilowatt thermal on urban sites. The committee has now advised me that so long as the site housing design and operation of the reactors fully satisfies certain basic conditions, These low powered reactors can safely be permitted in built up areas. The Chief Inspector of Nuclear Installations agrees with this recommendation and has advised me that the Queen Mary College project satisfies the necessary conditions. I have therefore approved the issue of a license to the College to install a 10 kilowatt research reactor on a site in West Ham."

K- Yes, yes, yes. This reactor was put in the basement of the Queen Mary. The whole area of the nuclear engineering department. The floor-wise was not more than 100 square meter to 150 square meter. The original reactor was about 6, 8 meters below the ground, where we could stand on top of it. (1:22) And the control room was about six meter above it, about another six meter below the surface, ground surface. And then you had the University, what we call, lecture rooms above it. This was round about mid nineteen seventies, this reactor was kept, and then there was a lot of opposition, "How come there is a nuclear reactor right in the center of the University, right in the center of London." Then, mid seventies, they decided to build a reactor site about another 5 kilometers or so by a brook or a river, further up towards .. , towards West Ham, because there is a unused area. And they built a building. and they moved this nuclear reactor from the basement, with a lot of "rase matase," to the new building. Where actually, I think it was moved in 1976, 1977, or that time was built. And it was just a couple of years old, when I joined the Queen Mary College. And we used to get a bus, a mini bus, from department to the nuclear site, and you have to have permits and all sorts of other things, all fenced up with everything else, which is normal with the nuclear industry.

And, if Queen Mary would have kept that reactor. If Queen Mary would have kept this reactor... Just go back to the picture, and you'll, just go back to the picture. Is this the site of the new reactor or this is the old reactor, which was standing free? The new reactor was dug into the ground. (1:24) And, when you look at those, like windows in the background, these, they became the computer rooms, where we used to punch cards, we used to take in there over a bridge. You should see a bridge in the background, where we go into the control room, and then, when they took the nuclear reactor, this control room became where I, his top secret computers are running the data on research from British government. Because, this is the old, this is the one which is on the basement of Queen Mary College building.

The new one was on the ground level, because we used to go over it, we used to lift up the concrete blocks and all sorts of funny games we used to play with it. Well, in 1981, partially, I did a, what we call, my thesis, on the leakage of the nuclear reactor, into the environment, beyond the boundaries of the reactor, and by completing this thesis, we hear afterwards, in 1982, the reactor was shut down, because it was proven that the reactor field radiation reaches beyond and within the public. And immediately it was shut down. But these reactors are very... used for high-rich Plutonium. We could see how fast we can produce Plutonium, then enrich Uranium, but they use plate system. It's like a, what you call it, like a toast. Long pieces, very narrow, Aluminum mixture, some of it. And, we used to change the plates. It's like a toast rack. And, we used to change one toast, we used to call it like, (1:26) with different enrichment, and see how much radiation increases, what's the critical position. And this is the history of Queen Mary College, it's not there anymore, they closed it.

But the British nuclear technology is much, much advanced now. They don't teach first graduates, they go directly into PhD and research. Because now they're building these new reactors, which is a PWR, Precipitation ?? Reactors from the American style. And, when I used to work with British Nuclear Fuel, 40 years ago, we designed safety systems, to be about 10 kilometers from the reactor, that if it blows up, we still have control over it. And the first design of this came after "three mile-Island." And I was involved in the first stage of designing the safety systems for the reactors. It's got a lot of memories. You put something else up.

R: Yes, this is the final report on the decommissioning and de-licensing of the Queen Mary College Research Reactor. I think this is the one mentions the original operations were carried out on the critical assembly at Queen Mary College in Mile End Road. It's mentioned as the former laboratory buildings are now being converted for non-nuclear usage by another faculty of the College. And that the... it was licensed by Nuclear Site License number 21 issued on the 24th of December 1963. The assembly being taken critical for the first time on the 10th of August 1964. The facility was shut down in October 1966, (1:28) in preparation for the transfer of the main components to the new Queen Mary College Nucleonics Laboratory in Marshgate Lane. And the site was completely cleared and the license surrendered on the 10th of March 1967, and the licensee's period of responsibility was terminated on the 16th of March 1967. So, I guess that's the original reactor that they're talking about there.

K- Yeah, it's a big hole in the ground. And, only people who are doing research in nuclear could go down, but it then became an empty space. They started doing a lot of research on plasma. That's part of the CERN, of operation that time, pre-CERN situation. Hmm, brings back some memories. I think the building is demolished now, I think they built something else on it. We'll see it when we go back. I went there a few years ago, two, three years ago, I can't remember.

R: Okay, I thought you'd like that blast from the past there.

K- I didn't see this was, by the time I got that, this was removed. We just had the hole (in the ground) ...

R: Yeah, this is actually, this picture has been removed recently as well. They used to have it on the Queen Mary College website, like you could look through and find it. I don't think it's there anymore. I think they wanted to kind of erase that part of their history.

K- Yeah, but...

R: You put a nuclear reactor in the middle of a city?

K- Yeah, because don't forget what's the same with Los Alamos. (1:30) We did not realize the power of these things at those days. When you read the history of the Los Alamos, originally when the Americans stole everything and ran away, they were so busy testing, they had these drums, and radioactive materials were in drums, in the corridors, in the rooms of the scientists where they were testing. Nobody, in reality, before the nuclear warheads, and even during the Second World War, and years after, realized the danger of these things. You read about the history of Los Alamos, they used to keep nuclear material, plutonium, whatever, in tanks in corridors where they used to walk. Sometimes they used to eat on these drums. They sit on them and chat. And there's a very good book about the life of a lot of people in Los Alamos. I read it when I was a student to see how ignorant we were about these things.

Now, nowadays you can't move anywhere. Everything is changed. But the beauty of it is, now with the technology we have developed, we can empty these nuclear reactors of the material remote. We don't need even to be, ... hundreds of kilometers away, we can literally empty it. We don't need to be... when it comes into positions like, let's say Fukushima, remote you extract the nuclear material from the site. We don't need to live with it for hundreds and thousands of years to come, and contamination.

This part of technology will be completed, (1:32) I think in about twelve months, two years. Where we, we have the technology, we have tested it in different ways. Now we can go into practicality of remotely, what you call it, depleting runaway reactors. Remotely depleting nuclear warheads. And not worrying about the material. One of the biggest problem between Russia and United States, in the nuclear industry, when we signed it now, the treaty has been de-ratified, I hear, by the Russians in past few days. They will not participate in nuclear arm control anymore, and it's getting worse in that direction, because of the problems in Ukraine.

These Americans are paying huge amount of money to the Russians, to decommission every single nuclear warhead, into safe level, because it's not just taking the things out, you have a lot of contaminated materials, you have a lot of contamination, everything is literally raw. We have developed a technology that, we leave the rocket, even in the silo, we can extract the nuclear material out of the warhead. They still have a warhead, but now has no nuclear technology .. material in it. And we use this material for peaceful application.

It's one step in demilitarizing a lot of zones. And one of the things which is a problem is, what we do with the nuclear material, we're going store it. (1:34) The technology we developed, it makes it useful, into operation of the next generation of the Space travelers. Very interesting picture.

Q: ... Will our scientific textbooks be rewritten and new laws of Universe and science will be taught with the implementation of Plasma Science and Technology?

K- Pardon, can you repeat that?

Q: Will our scientific textbooks be rewritten and new laws of the Universe and science taught with the implementation of Plasma Science and Technology?

K- Oh, it'll be arrogance to say that we are the end and everything else. We are adding to the knowledge. And we are extending the knowledge, so we're not rewriting the books. We are adding to the books, adding to the knowledge. (1:36) And seeing how it takes shape. We cannot separate the new knowledge of us, from what we had before. Because all the time we go back to it.

When we change the dimension of physicality, we go back to it. We need it. How do we boil in one position, what is the wind velocity of our Soul, when you change the physicality, are you going to manifest as a feather, and where are you going to land? You understand? So it's a two-tier job. It's a two-tier work. And one is the dimension of physicality, one dimension of energy. And we have to keep it up.

So, we are not rewriting the books, we're adding to the books, we're adding the knowledge. But the knowledge we didn't have, is like, if what you put it is just, now that we found the work of an engine, we have a car, we get rid of all the donkeys. No, we still have a donkey, we still have horses. We even measure our cars and how many horses it has. The car has 100 horse power. Which horse, and what did the horse eat and what was his power? All the horses are not the same, but we still refer to it. So, we haven't finished, it's just we are an amalgamation. We're not rewriting books, we are adding to the knowledge. It's a big difference. (1:38)

Any other question?

Q: ... Hello Mr. Keshe, in the past few days there has been a heated, but inconclusive discussion on an issue in the Chinese Keshe Plasma studying group. The question is, Does the bombing of each other by Israel and Hamas, which has resulted in a great deal of death and suffering on both sides, especially in the cities of Gaza, bear some responsibility for an ordinary citizen on the other side of the Globe, who is seeking to elevate his Soul... Now we are discussing a situation where one side believes that this person has no responsibility whatsoever, that the responsibility lies solely with the planners and implementers. And for him, that all he has to do is to pray for world peace. The other side believes that there is some responsibility and the implementation of this responsibility is mainly to look at himself, to see if he has the mentality to harm others, and try to elevate his Soul, and then go and influence those around him to achieve peace. Can you help us to provide some guidance?

K- I... this is a very broad, what you call it, question and broad answer. You can, all of it, you can do all of it together. It's not one thing or another. And, you can elevate the Soul of those who are in it, you can elevate those who are fighting it, (1:40) you can do all sorts of things. It's not anymore, this works or that works, or can we do that?

R: And that can all be done from the other side of the Globe as well, that's not a problem?

K- You can do it from another Universe, forget about the Globe. There is no time and the space and position when it comes to strength of the Soul. And it all depends what the wish is, and what you want to do, and what is your target to achieve, and how would it change.

We got to realize, when I look at the situation, in the long run, man will come to understand, maybe in next few years. What we see in Ukraine, what we see in Gaza Strip. It's the religion, you know when you see the last kicks before the body dies. It's the last kick of the religions. Doesn't matter which, Christian, Jews, Muslims. And if you see it, they have a common denominator, they have brought Russia to play on both sides. They have brought the Iranians to work on between the Christians and the Arabs. Then you have the American between the Jews and the Christians.

Interesting is... which I put this question before. (1:42) Why these people all fighting for a piece of land, through sentimentality of somebody was here, or somebody was sent here, be it Moses, Christ, or Muhammad, or whatever. This is, if somebody like, try to get rid of the Jews, you call it the Holocaust. You try to get it off the few Muslims, you call it the Gaza Strip. You try to get it, fight ?? Christians, you call it the Ukrainian war. If we try to discourage them, then there is somebody who is doing against us. But if they discourage themselves, and gradually come to the point, it dies.

The... I was talking about this, couple of days ago. The world is getting ready for manifestation of Methi. And the old have to diminish and demolish themselves for that to appear. And that Methi is a man's understanding of his own Soul. Not the man, not a person. And then, we are getting to that point.

As I said, the funniest thing is, or the most important thing is, when people like Ayatollahs and Rabbis and Popes, they themselves succumb to be, to understand this position. And they will put their turbans and their hats and everything else down, and they'll move away. It's not just the Christians arguing each other, it's not just the Muslims arguing with the others.

If you go back in the history of Iran, recent past history of Iran, (1:44) in past 40 years since the revolution. Look at the position of Ayatollah Khomeini, look at the position of Ayatollah Khomeini. When you look at the position of Khomeini, within the first three or four years, anyone who helped him to come to power was executed. They didn't just kill the Shah's supporters, they killed the people who brought them in to become rulers. Anyone who was on the highest level, they even killed their own children. Give the power. Read about recent past years of Iran.

Ayatollahs killed their own children, ordered them to be executed. The... those who sat, you see a picture of Ayatollah Khomeini, coming to Iran on a plane from Paris, look at there's a guy sitting next to him. He got him executed, and this guy put his life to bring him up. We see the same thing with the Vatican. They're all killing each other inside the Vatican City. We see the same with the Christians, same with the Jews. Jews are doing it in the worst way. So, it's rotting from inside, and now is peeling over to the others to rot. And then it comes the position of understanding, the manifestation of what they call, ?? Messiah, whatever, which is the STM, man himself which is ?? not known. And then we'll see the change.

And then we understand how we can elevate the Soul of the others and how these things will not happen. It's the time for Methi to come, for Messiah to come. But that Messiah is inside every man, (1:46) it's not a man to come to us. And then, when you reach that point, you don't accept any of these Ayatollahs, because you'll ?? be enlightened to the truth. So, you can remotely do, remotely do, and you can do it from anywhere in the Universe. You don't need to be on Earth, or to be on the, in this world, on this planet.

Any other question?

R: Thank you for that. Let me see, let's go to...

K- You know something very interesting Rick, even if they got... Even if God appears Himself and He says, "I'm God", and He shows everything which is supposed to be shown, Ayatollahs will deny it, because then they can't rob and kill for it. Rabbis will do the same, so does the Pope. So, as long as these people exist, Messiah will never come, because they deny everything, because it's going to the (end)... to the robbery and killing and abuse. So, the man who knows, if he accepts his job is finished, he will never accept, would he?

But, if you believe, understand the work of the Soul within yourself, you walk away from these people, these people have nobody to be there to support. And that's the job of the Knowledge Seekers, to enlighten the Soul of the others. that by enlightenment they walk away from it. And these people have nothing to do. You have in the history of Hitler, they call it the night of a thousand, the night of a thousand knives. He killed a thousand of the people he used physically, sexually, in the German army in one night. (1:48) He killed all of them, except the one he loved a lot, personally, because he had a long personal relationship with him, physically. And they gave him a gun. They said, "You do it yourself, or, I have to do it."

We have the same thing in the recent past, in the Iranian Revolution, that they killed hundreds of Mullahs in the same night, across Iran, by the order of the rulers. Repeat of the same. So, we have the same thing in the history of Judaism. We have the same thing in the history of Christianity. So, the best thing is to find that Messiah within yourself, and then you don't follow any of these, they have nobody. When you go to a mosque and there is nobody there to listen to, to you, you don't go anywhere, it's no use.

Any other question?

Q: ... Can your Soul talk to you using words?

K- I presume so, yes, because that's the only way you can communicate, I presume yes. You want to see it as a light? You want to see it as an image? You want to hear it as a voice? You want to feel it as a touch? All depends how you want to accept and what you believe in. To see it, to understand it, or you call it premonition, or whatever. But yes, you can. But how you hear it. Go back to the teaching of last week, I said, when you fall in love, loving someone, (1:50) then you understand the difference between the love in the dimension of STP and the STM, even though is loving of the same thing.

Any other question?

Q: ... Yes, mine is talking to me even using hand signals.

R: So, I guess that's a different language other than words. Perhaps the Soul works more with images rather than words.

K- It depends what we... how much we are physical and how much we are emotion. If you understand the emotion, you do things you don't need to see. If you need to see something, then you actually need an image to believe to do. If you more or less work with the emotion, you work with the back of your head, if you work with the physical dimension, you work with the front side of your brain. We see that in our systems.

Any other question?

Q: ... I need certification from the Keshe Foundation to sell Keshe Plasma products in my country of Nigeria. Who should I contact? I have Plasma antiseptic soap, Plasma cream, Plasma patches and Plasma insecticides.

K- You have, you have, you have to do the certification in your own country through the structure set by the nation. (1:52) We do that, when we launched these... even Gans's for the trials in China, if I remember correctly, we had to get our Gans's certified to be used, that it is usable in use. When we did in Ghana, when we did the water, ?? Plasmajis, they all had to go to FDA approval. Keshe Foundation cannot certify these things, it's your National Government structure, you have to know (go to).

R: Okay, so assuming that he could get certification for say, a plasma cream or some product, what would be the next step?

K- If you get it for example in Germany, you cannot use it in Nigeria. You can even get it in Ghana, you cannot use it in Nigeria. It has to be accepted in your country, and you go through the usual certification.

R: So, what about the use of the Keshe name involved with that process?

K- We would like it to be accepted, to be ratified by us, yes, to give you. We have this now, situation coming up in one of the countries we are working. Where they wanted us to do things and I said, "No, you're a government." We develop the technology, it's in public, people copy it. You are the government, you enforce it, if you don't want it to be copied, and all the benefits comes to government, only tell people you use it, you pay percentage to the government. It's becoming a head-on collusion about this, with the governments, and their income, and patents, and the rest of ??, and you see the patents are useless. (1:54)

But now, they didn't mind using our technology. Now they sit with us, they want to protect, because their own benefit is in it. Up to now it was Keshe Foundation use, no problem. Now, they are involved with it, they're coming up with a lot of things to me. And I said, "Yes, I'm listening." We are technology developers, we are not into running businesses.

Any other question?

Q: ... Can CuO₂ as Copper Oxide Gans water be taken orally in large quantity without harm? I want to use it to fight infections.

K- Go through the medical side, we don't ?? get involved in these things.

R: Okay.

K- First of all, all the rule is, never touch. Never touch, never drink Gans's. Never ever. Gans water is a different ballgame, but the Gans's no... I met a very senior, very, very senior government officials, at the highest we can get. And he was so carried away, with some new materials, that he actually digested it, and he is critically ill because of it. (1:56) You never touch high energy things.

You got to understand, I explained this before, but you have to understand the comparison, it doesn't mean that it's exactly what it is. You take a boiling water and put it on your hand, or hold a cup with it, and let it go. You see, you... forget about burning, we're not talking about it... How much heat is absorbed by your

hand, how much stays that heat and you feel it. It's the same with Gans's, it's the field strength. It doesn't create a burn, it doesn't... but the energy... energy transfer is so high, that the Soul doesn't need it, the physicality doesn't need it, and that's where you hit the problem.

Everything in moderation. And, Gans's are not to be drunk, Gans's are not to be put on the skin directly. In a very recent research, we will release this in the ... , with the ambassadors. We will show some technologies, some data, which has never been seen in public, and it will not be, will not come out of the conference. But, technology development shows us what the pattern of the ?? use is going to be in the coming time. (1:58) So please, never, ever consume.

Any other question?

Q: ... Good morning. Through His example, the Creator teaches us to serve, to serve wherever we are, regardless of the situation. Is serving unconditionally, positioning our Souls to serve the common good for the good of all Souls, the nourishment for our Souls?

K- What?

R: Is the act of serving unconditionally, the nourishment for our Souls?

K- What do you mean?

R: Well, I guess he's asking, if you position yourself to be of service for the good of all beings, or of all Souls, is that a way of nourishing your Soul? That unconditional serving, is that food for the Soul?

K- Yeah, the thing is, it depends what you call serving, huh? And how we serve. (2:00) You do ... I presume sitting in the corner and praying to elevate will not work. The process of elevation comes in tuning, connecting, to be able to give.

Two magnets physically, in distance from each other, are connected, but cannot affect the other one to move. Till you bring them close, till you strengthen the link, or bring them close together, that they can interact, can influence the other. And this is the same in the man. You have to target the Soul. The Universal Council team did this a few times, where they connect with the Soul of the world leaders, and we saw the changes. This is how you have to do it. Target practicing directly, in every shape or form.

Not giving like that, ?? you know, ?? I want to ?? the guy told that he wanted to move the cup in the classroom (in Italy). Make it available, that if you need it, it's there for you to elevate, that it's there to take. The difference between me and you moving a cup is very big. I tell the cup, the Soul of the cup, it will elevate my Soul, it will give me pleasure, if I could see that your Soul moves. Then with the cup moves, or then just me pushing it, kicking it, or throwing it to be moved. Or pressurizing with the brain, move, move, move. (2:02) And then you see it is. And how it works, I explained this many, many times.

R: ... What is telekinesis? How to communicate with the material outside, and charge it so that it wants to perform the movement that is convenient for it?

K- What does that mean? I don't understand this. I think most people are somewhere in different ??.

R: Telekinesis is being able to move an object, like what you were talking about, basically, using your thoughts or emotions or something by changing the fields or some way other than physically moving it. So, how to communicate with the material and charge it, he says, "charge it", maybe means change it. So, it wants to perform the movement that is convenient for it.

K- Hmm, I don't understand how we can answer this.

Q: ... Sometimes I practice on the ?? PSI wheel, and I manage to feel the paper on the needle, and I know that it will move. I feel it, and the paper moves. (2:04) I would like to understand this process.

K- Try to understand how you move, how, ?? when (what) it moves, in which way. Is it emotional or is it physically you want to push it, or does it move when you use the emotion? Very simple.

Q: ... Hello Mr. Keshe, how do magnets interact with plasma?

K- Very much so. We see it, we... you see it very, very easy. Because plasma is a... has a matter state field strength to, that it matches with the magnet. We developed a technology to do this. We have a technology in the Keshe Foundation, which we see the movement of the magnets because of the Gans's. It's a way to do it, and we use it to assist the strength of the fields. (2:06)

Any other question?

R: I'm trying to find another question, we don't have any hands up here. And not seeing any further questions.

K- That's good, that's very good. Hopefully... We'll try to see what we can do, we... next week, hopefully on Thursday, as we did the last time. You'll join us with the Knowledge Seekers from the classrooms of the Queen Mary College. And those of you who want to attend the London Conference, you're quite welcome. And some people tell us, "These are very expensive." It is expensive running this and we even, by our estimate of how much it cost, is more or less doubled. And, we still carrying on with the work. And we are carrying with what we estimated, that it will be total cost, but in occasions doubled and tripled. But we ?? wear the cost, we'll survive and we have to bring this position to, what you call it, (2:08) to an end with the governments. And then we'll see how far we can go. And how far we can push the pen of peace with the pen of new technologies.

If any of the Knowledge Seekers would like to support us, that that burden of running this conference is getting heavy for us, you can help us, by donation. But, we have, I've committed to this, and I have to complete it. It has to be done. It's not for us, just because we are Knowledge Seekers, it's for our, it's for the whole of human race, in the long run.

It won't be what they told you, the Messiah will come and it will be land of milk and honey. Try to see how much milk and honey you can drink and eat, and if the Messiah has come for you. All that milk and honey is the knowledge of the Creation, not milk as from a cow and honey from the bee. And this has to, this peace work has to take shape. It's a commitment to the lifetime of work and how we use this to elevate the Soul of the ?? whole of humanity and beyond. (2:10)

As I've said, we haven't come, many times I've said, we haven't come here to bring a new shape of a school or a new engine. We've come to change the whole structure of the society, humanity, and the rest of the creation on this planet, to stop killing. But, that the last step can start.

But, you see... You see, when you bring a wrong child, or you bring your first child up the wrong way, and the others learn his misconduct, or from his misconduct, we have the problem with Moses. And we still see his friends and followers follow the same path. And that disease has been passed on to the Christians and the other children of the God, Mohammed and the rest of it. And to change this, we can't ?? fully do that. But you have to come to the point that you change, not us. In the teaching of past few months, or the past few weeks even, I explained that many, many Jewish boys and girls are walking away from the religion. And when they're done, there is nothing left, it'll be just the name of it, but more and more of it. More and more understanding. And it's the same with the others.

Once... The religious leaders will not change their tune, (2:12) waiting for Methi, waiting for others, and they'll be ?? hand over, is Methi, whatever. As there is no more for them to rob and steal from. And we will not find many Gorbachev's. To save a nation, he moves down as the head of nation and opens his country. We won't see Ayatollahs, or Rabbis, or Popes walking away and saying, "That's what it is, this is the evidence." ?? how man matured, has to find his own, what you call it, maturity, to find his own Messiah, and they will shoot everything else out. So, it's for man to mature inside himself, and with that, walking away from all this, this stupidity of man. And the same with the animals, it's the same with cats and dogs and lions that still kill. Man has to create a field strength that it touches every being that do not need to kill.

In the conference of London with ambassadors, for the first time we show this. For the first time we show how we convert things in video, physically, it's not a talk. We convert things that you do not need to kill. Animals don't need to kill. Even if it means working with government to place in satellites, to produce the condition. And we have videoed it. It's how beautiful it can be done. (2:14)

So, as I said, plants does not kill, but creates a condition that brings to it energy, in the level that it can absorb, and in the level of the amino acid of its creation. And now, we have achieved that point. We will show the governments, through their ambassadors, that the new era for development of the man to the next level of understanding his own creation has come. And it's for them to do. And this is the process which has started and it will become extensive, extensively, extensively, in the next few weeks, to the conference in London. And we try what we see and what will bring us to that point. No one will be left untouched. And no one will be given unconditional position that they can come within the knowledge of the Creation and don't change because of it.

Thank you very much for today. And I hope in the first part I have brought you home to learn what you need to learn, what is the next step of the work, for you to become the Passengers of the Universe and not lose the life of the Soul, because you're responsible for it, and in how we can collaborate and cooperate. (2:16) And we have to come to that point, and we have to mature to that point.

Thank you very much for today. And hopefully we meet each other with the other Knowledge Seekers from the classrooms of the Queen Mary College University of London, next Thursday. Back to the school. Thank you very much Rick. And don't forget, if you can support us financially, as the ?? (costs) of this conference have become very heavy for us, After losing so much, we'll be appreciating it. It will help the Foundation a lot, to carry on with its work. Thank you very much indeed, see you next week.

510 KSW November 02, 2023

END

511th Knowledge Seekers Workshop November 9, 2023

(Transcription, Proofing done)

(Auto transcription by Elias) No Break

Queen Mary College; Question day; Expanding Soul beyond P; Use Gans in gloves; Fear is problem with expansion; New systems connect STM with STP & P; Sort out emotional problems through Soul; Headphones already obsolete - rapid advancement T; China to produce in billions; Headphones lead to One Nation; Governments find common solution; No limitation - can change environment - Gans; Teaching how STP formed - separate from STM; Each Soul of organs make up STP - like planets Solar system - same as body - galaxy - U; American pressure - Ambassadors cancel - will respond - KS take seats of ambassadors - will ask for peace in 2 years; Reactors already shipped to China - show flight with military; Headphones - can't intrude on Souls - Soul decides not P; Show plasma generator - energy from U; Cannot judge animals & plants - higher; When eat others - take part of Soul with to Space; Matching Souls - Twinity; In system Black come out White; Gratitude for everything - thank car; Benefit of prayer goes to Prophet - man wouldn't pray - like 20%; Each STM has own STP; Jesus and women - special case; Life time friend at university - kept true to himself; Didn't go to physics labs because lie; Electrical Engineering - wrong; Astrology - mysticism foolish - fields of planets effect us; Sounds and Mantras; London Conference not made public; Boy wants to be girl - accept natural; Learn and teach with Soul in dreams.

ENGLISH TRANSCRIPTION

(15:50)

K- Yes, good morning, good day to you, as usual wherever and whenever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back. We are a bit in a different position, (:16) Then the way we are used to do things, but it's a very unusual way to do teaching. As we mentioned last time, with the permission of the London University and the directors and principals of the .. Queen Mary College. An unusual procedure has been set that .. we can teach from the classrooms of the university. Usually teachings are done, or conferences are done or classrooms are kept within the what we call conference halls. But in past few days we have been moving from one classroom to another, been banished from one, and one not being big enough, so we have been through everything as students going to university.

It's nice to be back in this environment. Yesterday I had the pleasure to sit in the environment where I studied for years, years ago as a nuclear physicist. And the building is demolished, but still the essence of the knowledge is there. Today, we are with a few members of the KF Knowledge Seekers (KS) and we try, we

endeavor to learn a little bit more, share a little bit more. We go on the unusual way, or the usual way we do it every now and then, and we would like to put forward to you if you have any questions about all these things we have been teaching before we start and then in the second session we might let you ask questions. If there are any questions about what we have been teaching about the Soul of the Man (STM), the energy transfer, or anything else. This wakes you up, usually you're used to sleep in the first (half) session, and waking up in the second session. Now you have to wake up in the first session. (:18) Are there any questions? Or did I catch you what we call "red-handed." Is anybody awake.

Q: ... I want to know how you manifest the energy of the Soul to the physicality (P). This is a difficult thing to do for me. I feel the energy but I can't manifest it to the P.

K- Can you explain what you mean?

Q: The inner energy that ?? (the inner core).

K- How far have you gone in what you've said you've done?

Q: I can imagine something that. I can see that my "Third Eye" hasn't been opened yet, but it can be felt that there is something.

K- How and what do you call, felt something?

Q: There is an energy and there is a heat, but it cannot be opened yet and manifested into the P. (:20)

K- What do you mean by there is an energy? How do you feel the energy? (:20) Inside you or outside you?

Q: Inside, there is an inside energy that I can change and feel better. If I get sick, I feel it, that I am getting sick now. But I can change the energy pack, I can get away from it.

K- The whole purpose of the teaching, the ?? first understanding is to expand this energy beyond you, than holding inside you. It has already been inside from the point of the birth, from the time of inception. It is how we can expand it, that in its expansion we connect to what we call, universal magnetic(M) fields, get it somewhere, and then put it back in the cage again and take the dimension of physicality (P). You have to learn how to allow this energy to expand beyond your physical boundary. As long it is inside you, you are still conditioned to the matter conditions of where you are.

Q: Yeah, that is my problem, that is exactly my problem.

K- That is the problem with everybody, you are not the only one. This is what we've been trying to teach. This is what we've been trying to expand the, what we call, how to trust yourself to expand this field. That when it interacts with its environment, which is different than the physical environment, (:22) because then you interact with the magnetic fields of whatever is available connected to you. You can travel down the line, decide where you will go, decide which line you open, who you talk to. And then if you decide to use as means of communication, it stays as a means of communication.

And if you decide to use it as a means of transportation, you transmute, you go to another position. It doesn't mean you want to go back in becoming physical, but you can decide when you arrive. And you want to still

be on the dimensions (D) of, what I call, the "fields," and one day you decide to change back to physicality, or you never want to change back to the dimension of physicality. Then you don't need to call it a dream. Because when you call it a dream you have control, but you don't connect to your physicality, something else happened to me somewhere else.

But when you expand your energy dimension beyond yourself you see the physicality inside you, so you control the dimension of physicality. You are in charge of it. And you've got to learn how to expand this. How to allow this external, what you call, field to embrace your physicality. And that is the fear. It happens to us at the point of death, it doesn't cover the body of the man, it has a direction, it moves out. (:24) And more or less, that's the end of it.

But when you go through the expansion of the fields, then you are in charge of it. It embraces the whole body of the man. At the point of death it's directional, it leaves the body, there is no return. And now you have, this is why this week, even here, we have brought in a number of systems, which is going back on what is to be the UBESUS (Universal Body Enhancement Spaceship Units). And the Knowledge Seekers continuously use it, to see how they feel, how they expand, and how they can control the expansion. And can we control the expansion in conjunction with the physicality?

This is part of these systems now when it gets used by the patients of the doctors, they connect in one dimension they expand the Soul, in the other dimension, through the dimension of physicality, we fix the body through headphones that you have your Apples and whatever else. It's a hybrid, in a way, the way it is. But this time, the dimension of the energy, what we call, the STM, is in charge of it, not imprisoned. We understand the emotion of why we got ourselves into this condition.

At the moment when you go to a doctor, he gives you a pill, handles your physicality, or they play with the chemicals in your brain to control your emotion, your anger, your depression. It's the first time where we can integrate both the STM with the physicality of the man. (:26) And then you understand how your emotion has created the problems of the physicality, to what extent.

And very soon, now that these Units for the first time are getting out, in conjunction with the facilities which we had before with the Headphones that you can put on different parts of your body, we will see a revolution in the world of science, a revolution in the world of medicine. Where we control both, the energy, the emotion, the Soul, and the physicality, and we understand what we've done to ourselves. Both in the dimension of the emotion of the Soul and the emotion of the physicality.

So you have to understand, you have to trust what you do. The reason you can't let it come out, maybe is, in experience, and 99% is fear. When it comes out, what am I going to do with it? I want to put back the "genie back in the bottle." Or, do other people see me as something strange. Till we get to that point, till we understand this, we need a process of trust, learning, and then applying. Then at the end ?? the energy doesn't sit inside. You live a physical life and you are aware of the dimension of the fields. It's like when you drive a hybrid electric and a petrol car. You decide when to switch, but unfortunately you can't use both at the same time. This is the first time it happens you can control both, you are aware of both. And till more and more people learn about it, let them call you crazy. (:28) But now they understand when you talk crazy it happens, it is not crazy. It is something they don't understand, they are not, what you call it, "privileged to it," and then they find a solution for it.

And this is the process of what I keep on saying, we are in that position now, for the first time, from this, what we call, week of teaching here, with the new system going out. With the people who operate the systems, and the doctors who are going to use it, and people who bring the patients, or the doctors together, can physically connect the STM and the Soul of the Physicality (STP), and the physicality of the man together. What would take us 3 months, 6 months before to do the Headphones, the way it was done up to now, it should be done within few days. Because you become aware of the what is, and what the Soul stops, what the STP stops, what emotion has created these problems.

This week on, we see another evolution in the world of medicine. And we need to do this, because gradually, as we developed, as our people learn, as we learned, we have gone into a process of, in a way, understanding, handling the STM and the physicality of the man, and connect them together the way we see it. It's not in there. You don't need to dream to go to see your grandmother you loved when you were young and she died. Now you can clearly go and see. You don't have to wait one day, next 10 years, 20 years, you might see the grandmother again. Now you dictate. At the same time, you feel the emotion of touching her. To you, the people who go through this process will become tangible. People who harmed you, (:30) people who damaged you, people who created the problems that it led to your Fibromyalgia, it led to your different psychological conditions. In this way, you connect to the Souls, and you can physically sort it out.

We will see a massive change in the whole approach of the world of medicine from now on. Now we have the systems. Now we have doctors who monitor from outside. And the people who monitor from inside, which is you. You're aware of both. So let the Soul loose and just don't be saying, it's inside me, I can feel it. Now you have to allow the expansion of it. But how you do it, what fear stops you doing it, it goes through this process. The way we see it with these new Headphones, which now has replacing the UBESUS, those massive systems, is that people will come and ask, not necessarily just for the medical application.

The true purpose. Then you learn how. You teach yourself how. We don't look, as I said to our people in the lab when they were making it, people have not realized what we are giving them. With this Health Units, UBESUS, with the Headphones, and using the physical Headphones, you get connected to two UBESUS. It's not just one. One is the medical side, and one is the Soul side. And they sit hundreds of kilometers away from each other. This is the beauty of what is to come. And our people have to learn it, have to understand it, that they can implement it. (:32)

You gradually will come to the point that you can transmute and transfer. You call the center, says, I want to transmute. Can I have the support? You're given the support to expand your Soul. And then you decide where to go. And then they (you) can detract it when you arrive. The game of the space technology with this technology (T), what we put out from this week, it will change. But if you put everything out, people get confused. People don't understand. Step by step, we'll add to the knowledge.

But the system, these new Headphones which are going out, are totally a new structure in the world of the medicine, in the world of communication, and in the expansion of the Soul. The Universal Communication System has nothing to do with this. It's a totally different system. The systems which will go out now, to put on use by doctors and physicians, gives that capability and still be so advanced. Even I said during the teaching the past few days, even these Headphones are so advanced, they are already obsolete in what has been developed from the time they've been produced.

In conference on Saturday night, you will see the new version, the new dimension in technology, which has made these which are on the edge of the science still obsolete. And I think in the next few months, even those

will be obsolete. They become, again, a generation which is past. We know what it is. I know exactly how it's going to be. But our scientists, our research people, the developers in two, three different countries, which are developing different parts of it, have to become educated to understand it. (:34) Otherwise it becomes "monkey see, monkey does." So, you have to learn. And you have to trust. And if you cannot do, find access to the Wellness Centers and the machines which are getting expanded, and start learning how to use it.

We cannot do it and hold it with the Headphones. The new system we put out, gives that step up. And then, in the coming time, hopefully in conjunction with the Chinese government and what we signed ourselves to, these will mass produce in billions. They feed you.

I'm sure as I said to, to the Chinese, sooner or later you'll find a way, I know how to be done, to control people through these Headphones. It's not just feeling it, you control the emotion. We can do, we already tested it, we know it can be done. Then it comes to the world leaders, this comes to the point of, how we use, to use the emotion to create "One Nation policy." That we all feel good, we all have what we want, and in a way, if you understand further down the line, what these Headphones and these systems will give you, you don't need to work to have money in your system, to be able to live. You decide the digits, and the other guy decides what he wants for the digits he has, for what he has. And this cash policy, this what we call "Cryptocurrency," will go to the wall.

If what we see develops in extension of what is with these Headphones we put out, there will be a new world structure of the, (:36) how we live. I always said, the cat, the dog, the lion does not pay water charges, electricity charges, they don't go to get paid for the water they did. Why shouldn't the man do? Why do we have to carry a piece of paper to tell us we have a passport and where we can live and others can bomb us because of the wrong color of the passport and imprison us? The implication of the new, this new Headset will bring a revolution in a way man handles man. One second you're in New York, the next second you're in Beijing, and the rest.

And this is what our colleagues in the Chinese structure tell us. We need time to learn. We need to understand what this will imply. But the beauty of it is, Chinese have no control of it. Because Knowledge Seekers in England, Knowledge Seekers in America, Knowledge Seekers in Russia, already use it. So, it forces the governments to come together to find a common solution for man. And then it comes a game which is to be played by the members of the Universal Council.

And then we'll see, maybe in 10 years time, once this technology, once these Headphones, once this, what we have signed contracts with the Chinese government, with the Defense side, comes into operation with the Space, you will see changes that nobody can control. The reason for it is these teachings. I sit here in this classroom. There are about 10, 15, 20 different nationalities, races, colors. We haven't strictly put it to the Chinese. And all of you, one way or another, have the knowledge to expand. (:38) The teaching of past 10 years, 15 years, has brought that condition. We've become One Nation. Now our leaders have to understand how to handle us as Knowledge Seekers. You put it out, and like a copycat, you make it as fast as you can. What's the next step? What do we achieve?

Q: There is one problem there.

K- Where are you from? Where are you talking from?

Q: .. I'm a nurse and when I...

K- Which country are you in now?

Q: For the... for changing the environment, there is a one problem. I think when I... when I am on top of the head of the patients in the hospital, I can feel the inner energy of them, and where is the flow of going, the path, the paths are, can be filled by me, and I know what, what should do, what should be done to them, but I can't. There is, I think there is some authorities, or some contracts has been made to someone unknown. I don't know what, there is... There is not allowed to change the environment.

K- That's a limitation.

Q: The environment doesn't obey.

K- No, that's a limitation of your understanding. There is no contract, there is nothing. It's just because you don't understand, now you have to find excuse. (:40)

When we had the Corona, the Iranian team, they went into the hospital and they washed the hospitals. And everybody looked what these people doing. In a few hospitals they were allowed to go in. They sprayed the Gans's, Cup 1, Cup 2, on the walls, in the emergency rooms, and they saw the change. The change of environment came by creating the Gans's to be on the wall. There was no condition enforced, we just opened access to magnetic fields.

If you have a problem, create a condition that brings a new environment, not in the matter state, but in the energy state, what we call the Gans state. Then you find out that it's you who puts that limitation. I said to a doctor in Abu Dhabi or Dubai, a few months ago, I said, he said, "I cannot transfer the energy, I cannot do what I want to do, but I know I can do." I said, You know, before you go and see your patients, wash your hand with Gans's, don't dry it. Just wash your hand with Gans's and try to approach your patient. You don't need a cloth. The gloves you wear, wet it, soak it with the Gans's, which you think will change the condition, you create the environment. And it works.

We just put the Gans's in a bottle and we say what it does. As doctors and nurses, this is what you got to do. You cannot sterilize. You cannot bring the whole Gans's into the operating room. (:42) You take it in your hand. And we saw the changes with the patients. We see the changes. You, as a nurse, I remember speaking with you very recently about your auntie or whatever. Am I correct?

Q: Yeah, yeah, yeah, you're correct.

K- So what you need to do, what you need to do, you're an active nurse. You cannot spray Gans's. They tell you you're crazy, whatever. But you can carry Gans waters with you, put it on the gloves, always add a ?? CuO to it that sterilizes. And what else you want to do. You create that environment. You can expand the Soul. You can reach to the patient different way. .. These ?? UBESUS ..

Q: Yes, I never tried that.

K- Because you could. That's why we teach, for you to learn to try it. You create that condition. Until one day comes, then you change the environment. As nurses, as doctors, this is the opportunity you have. It's very

hard to teach. And then they say, oh, whatever this doctor or patient or nurse touches heals. They don't know you're using the energy which allows them to take it in.

We have a guy, I know his wife is listening. She is a devoted Knowledge Seeker. She lives in the United States. She's a Mormon. Her husband, through their faith, could not, cannot take medicine and operation. He had a cancer of hip bone. He went from 70, 80 kilos to nearly 100 and odd kilos, lying in bed because he could not walk anymore. (:44) It was a time of when we were battling with Alan Sterling in that area. She hears about the Keshe Foundation. She says, I cannot do anything. I cannot give him medicine. I cannot touch him with medicine. So she starts making Gans's and creating towels and putting it under his sheet. She broke the rule. She didn't use anything, but she covered it with Gans's. In a few months time, he had no cancer. And he ?? woke up. But she taught herself how to create the environment in the bed while he was there dying. He's the son of one of the richest men in the United States. And they have international operation around the world. Now I talk to them on a regular basis, because they see, as Mormons, they don't need to change. But they can change the environment. They can't take and say people take Gans's. But you can create conditions.

As doctors and nurses, you create a condition without them knowing. You put Gans's in the surgery you work. What it does, what's the reason? You change it. We have a ambassador in Norway who has changed his office into Keshe Foundation Laboratory, and he moved into the bedroom. And he says, "Anybody wants to see me, has to see me in that position." But, at the same time he's a scientist with the fishery and agriculture of the Norwegian government. And he uses it. But he doesn't tell people, because they don't understand. But what I do is magic for them, because I'm saving the fish, and I do a lot of other things couldn't be done before. (:46)

You have to, you say you can't expand your Soul, find a way to do it. You are the "last man standing." This is the purpose of the teaching in, in a month time, or end of this month, in November, with the light in the hand. It's not just the light, it's for you to understand the fields how they play. So next time, when you say, I don't know what to do, you meet your patients in the glove, make a Gans's. It doesn't touch you, but it's outside. They can do. They can touch.

And then explain to doctors why things are magic. You walk into these hospitals, most of people coming with no diseases. They get all sorts of infections, more than what they came in for. You wear your gloves, just put CuO around the beds. Feel, ?? one on the top one at the bottom. And nobody asks. And then you become a magician. Then you can teach. But help yourself to expand first. Expand your knowledge, understand...

Q: But I think doctors, doctors are so arrogant.

K- Forget about doctors. It's you who has to do, you will do, what you do.

Q: Yeah.

K- The same is with every trade, every... it doesn't matter, doctors, professors, the bosses, all it is. They know better. So you do your work, and it changes the dimension. (:48)

Q: Yes, thank you very much.

K- Thank you very much. Let me see what you did with your auntie, if you can do with others in the hospital. Thank you very much.

Q: Yeah, my auntie's very good, in a very good condition. We continued that vegan diet, and she feels very, very good. She feels, I think, yes, she has a pain in L5 bone, and she doesn't feel pain anymore with a vegan diet.

K- Wish you all the best. Thank you very much.

Any other questions?

Q: ... The STM, I think I have ?? few more clue about the STM operation. However, STP, and physicality. It's, it feels fleeting. Sometimes I can maintain it, but it's more like hidden. So it just, it seems that I'm, something is very, you know, I think they're doing well, but you know, there are little bit of things, especially as it relates to STP and physicality, it's slightly not, you know, it's ?? not there. (:50) It's just kind of like I can't hold it as easily as I can hold the fields of the STM. So, maybe you have some thoughts about how we might be able to maintain such fields to achieve a certain objective.

K- He's sitting a few meters away from me, so it's easy to answer. This is not a problem with you, it's a problem with everyone. How to separate the emotion of physicality from the emotion of the man, as is in STM. The problem is, again, you get too busy with one, and you forget what created the other one. The STP comes first in the creation of man. Because the Soul is not created to coordinate everything else. When you get the egg and the sperm, when they come together, they don't have enough energy from themselves to split. They gather that energy from the energy of the womb of the mother. In that process, you call it one chromosome is less or one chromosome is more, to the world of Creation, that one creates a magnetic field difference that allows the motion of the fields.

In the world of medicine, you always "Oh, this is man and that's woman, and you have one chromosome ?? less." They don't understand. God doesn't know chromosomes. God understands the work of the transfer of energy. So, the one which is one more, (:52) is have more fields into it, by the law of the physics in trying to bring balance between the two plasmas, that become Twinity, it creates a motion of the fields between the two. And that motion, because of the size of the egg and the sperm in the womb, absorbs energy from the field of the mother. From the field of the liquid within the womb of the mother. Now, more energy received. There is a certain size the bag can be, it explodes in a way, it divides, and then now you have 3 eggs, now you have 4 eggs, now it gets faster and faster. But there is no coherent condition. It's just single cells working together. They create a common denominator field. That's the STP.

When it reaches to the point, when the totality in numbers increases to the point that now they can maintain life on their own in a way, knowing who needs what first, without just only absorbing from the mother womb energies, then the Soul is created. Now it is independent. But the STP still operates, because the cells are working together to divide. Soul becomes a coordinator. Who goes first? Who goes next? But each section start working for itself. That's separation from the Soul and the STP.

Now we understand the process. It's got to be very easy to use the understanding of the STP and which part of it we use. In the present time, because you are not knowledgeable, we call it the STP, that's it. But in our STP sits the "Soul of kidney," sits the Soul of lung, (:54) sits others, which collectively they interact, they condition themselves for production of the physical life. And this is where the understanding has to come.

Our doctors and scientists in the future will separate each Soul separately. Just because you have magnetic field of the Earth does not mean the condition of the Earth applies the same weather on Mars or Jupiter. But collectively, as part of the system, they create the solar system, where the Soul of it sits with the sun. Or even each one individually has his own Soul, his own structure, his own weather.

One day in the future, one day in the future, man will understand even the solar systems of us with all the planetary system, is exactly like the body of man. Some of our planetary system are absorbers of energy from the environment. Play the game of what we call, the Hydrogen. Some play the game of the Nitrogen. And some play the game of Oxygen. And at the same time, they play the game of kidney and the liver. They dispose of the fields which are in the system, which is not needed, and they reject it into the, what we call, galaxy. There is no difference in the structure.

This is how we develop the space technology. Look for which planetary system behaves as what you call, the kidney or bladder, which rejects energy out. We go for that planetary system. We sit in it and we decide which way we go out of. (:56) You try to get urine out of your heart. It's impossibility. Every solar system, every planetary system, every galaxy, every universe has the same process. Extracting energy, taking energy in, recycling it, rejecting it, digesting it, in different part of the system. We have to understand. We just look at Jupiter and say, oh, it's sitting there. Jupiter has a specific job in recycling, absorbing energies, which then become usable to the sun. It's like the outer skins. On the skin of the man, we absorb vitamin D. In the outer, what we call, planetary system, that's their job. How do we feed back energy through? We have not understood. We just call them planetary system. There is a Mars. There is a Moon. Because we never understood.

At the moment, our Earth is part of the digestion system of the fields which arrive in. It's not just that we live and there is a planetary wandering around. The Earth has its own STP. The Sun controls the Soul of the whole system. But we are ignorant to the knowledge. We just say, oh, Jupiter goes that way, Saturn goes that way. But each one has a function, creating the heartbeat, creating, holding the heartbeat of the solar system. (:58)

So now you have to understand where the physicality started. You have to understand where the Soul sits. And it's very easy then how to play the two together. You are used to playing with one. Now you have to understand how to bring the STP and in a way you become ignorant to it, but in a way you decide to be ignorant to it. You change your breathing system to get what we call, change in the emotion, or the expansion of the Soul. But you don't look at what STP of the lung plays in that game. How much that puts in, or how much it takes from the energy. And we're ignorant to these things.

But now we understand more. We have to pay attention. Then there is no separation in the totality of the knowledge. But you have to decide which one, in which way you want to expand, and which one you want to reduce in the control interaction. I want to touch physically my lover, I stay in the dimension of physicality. I want my lover to feel my love, I go through the Soul. We haven't even learned that much yet. We're still entangling if the Soul expands. Then you understand what the true meaning of a Soul mate is. You hold the physical body, but you transfer the love, the energy, through the Soul.

Why do we kiss each other? Why do we hug each other? (1:00) We haven't understood. We don't want to understand, but we would like the benefits of it. When you hold someone, just see how you can change their mind by elevating it, not taking from them. My children say, when you hug, we just feel so fresh. Because

yes, I give so much to you in those few seconds. It is not just a touch. You hold your head against me from childhood. I'm connected to you. So you take more than you can bargain for. Now you understand. Look where you control your physicality and what that physical part changes in the fields, which decides on the expansion of your Soul. And then you learn to play.

Any other question?

Q: ... Thank you, Mr. Keshe, for all what you do. I would like to have a proposal for Ambassador Conference. (1:02) to the Keshe Foundation to initiate the drafting of a universal declaration of peace, similar to the universal declaration of human rights. But we need more peace. We need also rights, but we need peace. And not only drafting but helping signatory states to sign it and ratify it.

K- I think you haven't become a very good Knowledge Seeker. I tell you how we do it. We give to the Soul of the ambassadors. We don't ?? writing. Writing is a dimension of physicality. And we bring the change. At the moment, in past 48 hours, we've become aware that a number of governments are pressurizing, again, like before, for governments not to attend the conference. And it's very, very highly pressurized by the American government. American government has taken a spearhead in this, trying to stop nations to come to the conference. Even the ambassadors who agreed to come, they changed it to another and the other.

And we don't stand for this. We know the way we go, the way we are going. And in a very straight way, we'll respond to this aggression of the American government towards the Keshe Foundation, with a very, very direct work, in a very, very near future. They will ask for a peace conference of the ambassadors. We know exactly what we're going to do with them.

But writing it doesn't help. Man always, the minute the ink dries, he dries his memory too, unless it's to his benefit. (1:04) So this ratification, writing, will not bring much about. It has to be done in a different way. It has to be done through the Soul. And I have moved in the past 24 hours to, in a way, rebuff the American movement. And at the same time, what you call, the way they started playing the game. Very soon, in the next 12 months, for maybe two years, Americans will ask for a conference to sit, to talk for peace. But we do it scientifically. We do it the way we understand. Not on a piece of paper. Americans are very good in it. The minute they sign the paper, they make sure they forget it. It's not to their benefit.

Any other question?

Q: Yes, thank you very much, Mr. Keshe. I have another proposal. maybe from Keshe Foundation floor to ask again all artists to paint portrait of peace, all kinds of artists, including filmmakers, theater makers, painters, writers, and poets who writes poetry, and all of this to be directly aims to, to change at the Soul level, through the Arts, through the products of the Soul, all Souls, elevate the Souls of leaders. Not only the leaders, but of all population of the planet. (1:06)

K- We already, we already ?? and a lot of artists work on that.

Q: I know.

K- They already have developed a lot of it. We still have a lot of paintings from the artists. Now we closed the Linz Exhibition Center to move these to London, hopefully, if our guys find a place for us in the next few months or few weeks. Everything is more or less ready to be shipped and to start a center, Exhibition Center

in London. And the next one will be one of the most, what I call, detailed exhibitions of the technology and science. It will be in the beautiful city of Beijing. We're working on it. We know roughly where it will be. And you want to see the state of art of the Keshe Foundation technology, you come to Beijing.

Q: Thank you very much.

K- Sooner or later, It will be there for you. Maybe the artists will bring their work. Thank you very much.

Any other question?

Q: ... I would like to say something more, if you allowed me. Which leaders will be able to help this process of peace? Maybe X Jinping to be on this picture, maybe Vladimir Putin or a mix between Vladimir Putin and X Jinping together. And I don't know, we have painting of war, but we do not have painting and the portrait of peace with peace. Many artists...

K- We leave it to the artists to come up with, one day they will. We've seen that. Thank you very much.

Any other question? (1:08)

K- ... Can I, before we go through this, I have to make an announcement. Knowledge Seekers who've been on the Telegram chats of the Keshe Foundation already know, and those of you who do not know, we have opened up a number of places for Saturday night ambassadorial meeting for Knowledge Seekers who could not afford to pay the, what we call, the high fees, on the basis that you register and you donate what you like, what you can, to the Foundation to attend.

These are the seats in rebuff of the American government, what they've done. The seats for ambassadors canceled or not to come. Now it's available to the Knowledge Seekers. I've sent a direct message to the American government. This is the second time you've played with me. The third time I play with you. They played this game in Eindhoven. Now they pressurize all the European countries not to attend. And they've drawn a lot of lines and ?? links for them. So we open the seats of the ambassadors who do not attend, to the Knowledge Seekers.

You will meet some of the top scientists of British government in the session. They will attend and will be there. And in the future, we establish a collaboration with the scientists and what we call, the structure of the space technology with this condition. So if you wanted to come but you could not afford it, what we've done is we open the seats of the ambassadors who don't come to the public, to the Knowledge Seekers, register, and we said, (1:10) make any donation you like, that we can cover the cost. And by tomorrow night, you'll be given, if there is any space left to it. Because I know the scientific group are trying to add more scientists to be present tomorrow. So, if you wanted to come, and you couldn't, no one can come in at the door. We will not allow anyone at the door. And you got to understand, because our ambassadors involved are there. There is a heavy police presence due to a number of ambassadors who already accepted or embassy staff accepted to be there.

Any other question?

Q: ... Are NASA and Tesla's people coming to the conference?

K- The invitation sits with them. The invitation sits... There is a... We, the Keshe Foundation, because of a lot of other things we do, which is not in public, has a lot of interface action with these people, one way or another. But the whole structure, which has been our aim, has been to show the flight, the change in the space technology, in China. All our system are set to, by the time we have the conference in Sanya, the Chinese scientists, through Keshe Foundation scientists, will show the flight system for sure. Then we change our position and what we talked about.

And as I said to those who understood what we said, we have already shipped all the materials to change the condition and position with the Chinese government and the rest of the world, (1:12) into China in past four or five months. We shipped large number of systems, which are hidden to the Western nations, into China. And the back of this will be the flight system, which now is getting completed, and the rest of it. We show the auxiliary part of the technology in London on Saturday.

The flight system, the defense technology, will be shown clearly with the support of Chinese military in China in what we call, the exhibition, which will be set up. We show it as a point of power where we can change the position of peace. Some of the most advanced reactors are getting developed for this purpose. So you will see, for sure, the flight system. You will see the first, what I call, magnetic gravitational plasma system, which can create food energy as one integrated system in China. You will see the auxiliary part, which is on the back of the separation of the Iranian development of the lift and motion, which is for food, production of material, absorption of CO2 and the others, on Saturday in what we call, London conference.

The, what I call, the point of man becoming part of the space in the matter state will be shown in what we call, Beijing. The process of transmutation of man through energy will be shown in the beautiful city of Shiraz in Iran. That will be sometimes in mid-2024. And we bring this forward, step by step, in collaboration between the Iranian space scientists and the Chinese space scientists, (1:14) that they both understand.

Any other question?

Q: ... We have these Headsets, and I have one on my ?? head, in this moment. Can I connect to the other people in the room by connection through a Soul that is present in the moment, that can actually think of something that connects me with the person? Or do I need to just not think and just be present and just connect the fields of a lower or higher order?

K- I can see you with ?? and I can see about 14 of these Headsets are in this room. The ?? consciousness... (Somebody's phone is open, I can hear myself back).

R: I think Dean you'll have to mute when Mr. Keshe is talking.

K- He's about three meters away from me. The process is very simple. You... once you reach the point of expansion, you can expand. But you cannot steal, thou shall not steal. Even though I say, oh dear Dean, I would like to connect you with the Soul, you put that Headphone on, I'll put my Headphone on and we connect. My Soul knows connecting to you, you damage my Soul. The Soul won't allow it, even the physicality talks. It's like, you want to go and see your grandmother tonight, grandmother is not home. (1:16)

So, doesn't matter how physically you do, the Soul have that power, that, "Sorry, you like him physically, but his Soul is not good for me to be in touch with, not at the moment." So, you can try, but doesn't mean that you reach it. If it is accepted to be. Because we tested this, we tested this thoroughly. If you can intrude, just

because you want to, it doesn't work. Even though I cuddle you physically, our Souls, skulls sticking to each other, my Soul says, "I don't want nothing to do with this." He holds me physically, what he has energy ?? for me, I have no connection with. And we see that.

We have a very simple system developed, which we can even see how the rejection is done. How you change with each other. It's a very, very simple system. When we developed it about... Actually, when we tested it about 3 - 4 years ago in Austria, it's amazing. How they decide, the Souls, the energies decide to keep separation. Even the Knowledge Seekers who are with me on the table, they can't see it, they don't understand it. To them it's a motion. For me, it's the direction of the motion, the way the motion happens in plasma, explains, "I like you, I don't like you, but I'm prepared to take part of you." This happens... We know this, that you can even do a lot of things, with one line of connection, but not the other.

It's very much like somebody can fulfill you, give you the maximum joy playing football with. (1:18) You always want to play. But you don't want to have his cooking, because he's an awful cook. You understand? So just because you think you have one line of connection, doesn't mean that it covers everything. You want to connect, you can try. Everybody here is with or without a Headphone. But if they are not there, they don't accept. The Soul, your Soul, has a strength to them that they feel in danger, or they want to take more of. It's very, very normal once you understand the process.

So yes, you can connect. Try me. Or try him, or him. You might feel, you might connect, but he might not feel it. But in another dimension, where he is not aware, you fulfill what he needs. And then he comes back, "Oh, I felt you somewhere else, Dean, last night." When I want to feel it, when we want to see it. We have the pleasure to have one of our, what I call, dearest members of Keshe Foundation with us on Saturday and Sunday. And he is characteristic of doing these things. He does these things quite a lot, and I enjoy working with him. And we'll teach you a little bit more with him when he's here. You're ?? going to go on the ?? line. We got more questions from Knowledge Seekers in the house than outside.

Q: Hello, hello everybody. So, first of all I advise anybody who can, come here, it's once in a life occasion to see the new things, to hear the new things, amazing things, good things, (1:20) and try maybe these things for yourself. Secondly, I ask Mr. Keshe, if in example you see, you just said, "By the emotion of the Soul of the second person, the first person can get in, communicate with." If the Soul of B accepts the Soul of A, can affect it, expand to touch it?

K- ... You can help others to expand the Souls. That is a privilege. But you have to have the strength to be able to do it without damaging yourself. These systems are multi-facet, and they go into a system which is bigger, you can chunk a lot of things up. We don't have a physical material like a brain built. We have created an environment in the system where we create, that .. condition. The systems which are in the, what we call, medical enhancement side, the Wellness side, (1:22) are one-sided. They are built to support the shape of the brain of the man. What we call, the mother system is built like the plasma of the universe. It's a spherical. And it has the capability to convert and mix everything together. You take what you like from it. This system has taken us a long time for our scientists to understand to build it. It does not tap into any energy at all. It uses universal energy. It absorbs energy from the matter and the Cosmos, and it converts it to what you need at the time. It's very unique.

In the system which you will see on Saturday, even four systems run out of it, and it's highly energy consuming. For the first time, we show the generator. The system continuously produces energy from the

environment and feeds itself and connects to what it wants to connect. It's the first time we publicly show what we call, perpetual energy, Cosmic energy absorption, that it charges itself and it feeds itself.

And in our system, in the parent, what we call, system, we have that condition. We don't use matter energy. We continuously produce energy in plasma. And with it, like your stomach, you put 20% in, you get 80% out of the environment. Works that way. Then we can do. But you, as people, cannot do. You don't have that capability. (1:24) You might be able to help part of it, but you cannot do all of it.

It's when you see the system on Saturday, you see a remote box and the operation, but no connection. And this runs. It continuously feeds itself of, but in fact, you use huge amount of energy to run the system. But it provides its own energy. It's the first time we show the power production on its own. And that system absorbs, and it can give, and it can take.

And if you're in the conference, try to sit for a few seconds, if we allow you, in the new, what you call, Head Unit. Then you see the difference between these Head Units you have, and the Head Units which are coming in, the next generation. Can I have it, which one is done that way? But by the time we get to that one, the next one comes up, more advanced. You will feel it, because you had a taste of these Headphones. Today we allowed you for a week. But when you go to the new Head System, you feel the change. You understand how much technology has jumped.

Q: Is it for sale?

K- No.

Q: Later?

K- No.

Q: ?? << audio unclear >>

K- No, at the moment, not yet. We'll go to developments what we have with the Chinese government and expansion of the technology.

Any other question?

Taste it, especially you lot who... You tested these Headphones this week here? Try to get in and just sit in the machine for a few seconds. Then you know what it means to actually touch your Soul. (1:26)

Any other question?

Q: ... I have a question. Can I write on your blackboard to show what my question is, so you can understand?

K- Yes ?? ...

R: We can't hear you Mr. Keshe.

K- I said, unfortunately we don't have a blackboard, it's white and green here.

Q: Okay, if we, we talk about the, we talk about...

K- The way you walked from here to there, we are in a fairly medium-sized classroom in Queen Mary College, University of London. And she got up from fourth row, walk into the front. And I'm sitting like a naughty boys in the back end, always this way. This used to be my place. I never sat in the front. I hate the guys who sit in the front. They're smarty guys. People with, wanting to create problem, always sits in the back row. I feel so good sitting in the back row in the classroom. I can do whatever I want. But, where I saw you walking from there to there. If I was a hunter, you had a beautiful meat, you are the best hunted thing. Have you seen yourself how you walk? Yeah, you walk like this. Anybody wants to eat me, I'm ready to go. So, that's the difference. This is how we expand the Soul. So, next time when you walk, ?? don't go like this. The board is yours. (1:28)

Q: ... Okay, yesterday we talk about the animal, vegetation plants. So, my question was the difference between, the question was between the animals, vegetation and... animals, vegetation and human. So, we got to this point that also animals have the intellect because we talk about the fish. A hundred thousand fish, suddenly they change direction at the same time because they know what they're doing. Or if a deer is seeing a lion, they right away go away. Or if a small fish see a big fish, they go and hide, because it's the instinct of survival. So, it came to me last night, if I put a line here, and a line here, the animals and vegetation's life goes between these two lines, because there's a limitation. So, human, I thought, if this is a line, this is human, is it unlimited because, I give a few example, I mean these are my thoughts, I don't know if it's correct. Say I'm walking down the street, and a man is following me and just talking to me and wants to go out with me and bothering me. I can turn around, hit him in his balls and punch him in his nose and be done with it. Or, I can talk him out of it. Or, I can take him home and sleep with him. These are my options. So, another woman...

K- Which one do you prefer?

Q: The second one.

K- To beat him up or take him home?

Q: I talk him out of it. (1:30)

K- So you don't, you don't know what you're doing in a way?

Q: No, I talk him out of it, because I'm not interested. If I'm not interested, I make a choice, I tell him right away, I'm not interested. But I don't do the other two, but these are the choices.

K- Can I, can I tell you something very straight, direct? You have never lived in England, men don't accept no. So, you have a problem here.

Q: So, it's going to be the first option. Okay, so, another thing is, I go to a party, this is another example. I go to a party, a person come in front of me, start blah, blah, blah, blah, blah. And I'm not interested in talking to him, and I stay there, hold a smile, and I stand, I stand, I listen and listen, and I don't say anything. But, if a big fish comes over the small fish, he runs away. Because they have one choice, the instinct to just survive. So human, because of free will...

K- No, no, no, no. That's your understanding. That is your understanding. That's all your imagination.

Q: No, Mr. Keshe. So that's what we be drained from our energy, because we let other people to do whatever they want, we don't say what we really feel. For example, if I come to you, you want to talk to, and you don't like me, you just say... You just say something and go away, you don't just stand there and listen to me.

K- Depends if you want to kick or you want to talk to me. No, but the thing is, we have a right... We, as human, you made 3 mistakes in your statement. First mistake is that you, (even I'm blind I can't see from the back, now I understand why all those women look so beautiful from distance, because in my eye I can't see anything, they all look gorgeous, until I come to the front. You're still gorgeous when I come to the front, no problem about that). (1:32)

But, what you wrote on the board is absolute nonsense. Because, you drew two lines, and you said, this is the animal, this is how much they understand. This is your assumption. That animal, that plant, understands more than you as a human. The plant creates a poison, the plant creates thorns, for you not to come close, for it to survive. So, he has a very good instinct. We just look at these things, you look at the animals. They don't run away. How come a cat and a dog can sleep in the same nest? Depends what they communicate.

And then, you look at the process of cycle of life. The process of cycle of life, what we call, everybody live in a "hunky-dory," nobody eats no one. The way we have structured our life on this planet at the moment, is the fish grows, that I give from my body for you to take part of my Soul, that your Soul elevates. So, even though I run away, I don't like this fish to eat me, but I like the other fish to eat me, because I know I can do more ?? through his Soul.

So, when you put brackets that this is them, it's totally wrong. They understand more than you and me. And this is the assumption we make when we go to Space. Just because something is just a field, doesn't mean it's weak.)Queen Mary cannot afford the heating, so they put a fan in here. And I cannot talk). (1:34)

Q: Mr. Keshe, what about, what about the tree? I go and cut it, and tree cannot do anything, it cannot run away, so it's just standing there.

K- Yes, but you have to understand why the tree was there from the beginning you cut it. You want to burn, to heat yourself, you want to... They accept, the Soul of a plant accepted that condition. The Soul, why do you get herbs and other things growing every year from the seed? You look at it, physical matter. You (We) look at the other way how the energies are given.

I want you to eat me, because through me your Soul elevates. What a beautiful smell, what a beautiful taste. The energy I take, elevates my Soul that, when I die, part of that seed, with me, has to travel to the Space. That's all it is, and we don't understand it.

So, if you go, unfortunately you can't kick the plants, some of us do, I don't like you, we don't need to... Yesterday, last night, we went to a birthday party. And I had a pleasure of, you know, we going, ending up as usual in the ?? Chalub Kebab ??. And they bring, you know, the Sabzi we have, the greens. You can put anything in front of me, I... it's there. But, when I see ?? tarrapum, you know ?? tarrapum? Oh, my heart goes. The rest doesn't exist. They, it can be tons of it, two, three branches, it's good enough for everything. And that elevation, that pleasure, elevates my Soul, and this Soul, memory of ?? attack, whatever it is, when my Soul travels the span of universe, (1:36) it's carried with me. So, that plant being there, is part of the elevation, of the joy of being, that I'm with it, I can take with me. I came from Iran 50 years ago. It was impossible to find ?? tarrapum. When I found it about 30 years ago for the first time, oh, I was like a child

with the biggest sweet in his pocket. Because it brought back so much pleasures of childhood. So when my Soul travels to Mars and wants that pleasure, I remember it so, that plant ?? reemphasizes ?? that pleasure.

So it's your assumption that they have that knowledge, that Soul. The assumption, or the truth is, that we are all equal. The dog, the cat, the plant, the tree, the man, it's just that we would like to play the ignorant (one). And we are better. I've been... some time ago, I sat somewhere. I had to be there. And a guy start telling me about nuclear physics and this and this. And I sat, I listened. I thought, if I tell him who I am, what I do, the guy will do a different thing. I sat to, with him and everything, and then I went to the Keshe Foundation website, and I said, "This is me." "Oh, I didn't know you're a nuclear engineer, whatever." I said, "Do you want to tell me more rubbish?" I could have told you from first sentence, you're talking nonsense. (1:38) But, you have the right to do what you like, you have the right to say what you like. And, it's we assume.

One of the most beautiful thing about us as a human is, and I've marvel this, and it just baffles me. We don't know, we all walk on the street, maybe because she looks Chinese, we think she speaks Chinese, but I've met Chinese children, who know not a word of Chinese. They've been brought up in the West, they refuse to speak Chinese. They don't even understand. I've got to know one in Beijing. She's a gorgeous woman there. She's opened a restaurant. She's Italian, but Chinese Italian says, I came to China to learn Chinese, because my parents never taught me Chinese.

When we walk on the street, nobody knows, because of our color, our hair, how many languages we speak. How we behave, till we open our mouth. The worst thing nowadays to do, is to speak English. Because everybody knows yes or no. Everyone says yes please and whatever. Even in the back villages of God knows Africa. So we are that way. We don't know. We just assume. We look, Iranian, my children, other people's children, grandchildren, carry the Iranian name, but they don't even know, say hello in Farsi. And we make assumptions, because it looks Chinese, it speaks Chinese. You make assumption that we, the animals and plants.

If you, when you look at the tree, realize it understands more than me, it has more emotion than me. (1:40) I'm stupid. I have to walk somewhere to find food. This guy stands there for 20 years and he gets the food coming to him. What have I missed? When I watch trees, when I watch plants, I admire them. I love to be a Vertical People. They change the color of their leaves. They absorb different energy. They change the direction of they stand, absorb different energy. Us humans we wake up, have to walk to find food. That guy has learned by standing in one place for 100 years, 1,000 years, would come to him. He's much cleverer than me. It's the same in space. Just because you see something, we can't assume.

It's the same with animals. We assume we are cleverer, we can go. No. Actually, we are lower. When I look at the plants, I love the way they live. And in the space, we have creatures, we have structures which tap into the universal energy. They never move. You think they're a stone. Why should they move? Because they have everything coming to them. I've said many times, we, because we can move from the ground and stand up and go back to the ground, we think we have become very clever.

And this change of the position in respect to Earth's gravity of lying down and standing up, has created dimension of the variation of the fields, which has brought us intelligence. Because when you're flat you need different energy. When you stand up you need a different energy. When you bend down you have a different energy. So our brain continuously absorbing a spectrum of energies. And that absorbing, understanding has created intellect for us. (1:42) Doesn't mean we understand more. And this is the assumption we always make.

And this is what I say, in the Space, you interact with your Soul. Don't eat me, I don't eat you. It's just because it looks beautiful in physicality, doesn't mean you're going to put it in your mouth and eat it. So when you mature to understand, please understand, don't take things by just because you assume. When you're in Space, when you're on Earth, wherever, respect that plants. This is cleverer than us. Respect that animals is cleverer than us. And then maybe one day we become intelligent enough to understand how they work. As long as we think we are better, we are actually lower, because our own ignorance become the tool of our own demise.

You'll start expanding your Soul. See, do you need to hit the guy? You're still talking dimension of physicality. Or do you need to take the guy home again? Or do you interact with his Soul. He must be the ugliest man you've ever seen. That's why you don't want to talk to him. But he could have the most beautiful matching Soul with you. But do you need to fight? Do you need to kick him? Or do you need to talk to him? Oh, I like you, let's go. Because we still interact with the dimension of physicality.

And when you find a matching Soul, the matching, in a way which can give as much as you take, then you become a twin. You'll find, and still you've got to be humble enough to accept, I'm taking what he doesn't need, (1:44) so he gives to me. So he's not higher than me, but I understand that I have a connection with it. (There it comes the water, and thank you very much).

So please, now that you learned about the dimension (D) of the Soul, never assume anything. And always enter in a dimension of, I take what I take, I have to give, and be humble to it. Not I have, I'm the best. This is where we are in a big problem of today. We call ourselves the king of animals, because we can kick more, we can shout more, and we made a bullet. But doesn't, to me, a cat who comes and cuddles you and takes your heart, has more weapon in it than me standing with a gun. And if we understand this, we deal a physical dimension, and we deal in the dimension of the Soul. The guy is ugly. That's why you don't like him. But have you tried with the knowledge you have, touching with the Soul? Oh it doesn't matter, I'll take you home blind. Where (before) you wanted to kick him.

What's the need of him who wants to talk to you? Where is (he) lacking? And this is what we have to educate ourselves with. Don't look at the physicality. Now we have two dimensions. Look at the physicality and touch the Soul. And then you see if you find the match. (1:46) Then you mature to the time. Otherwise, you still live in the dimension of what man has been for a time being. We have this choice, this is now the knowledge. It's a technology, it's a understanding of the work of Creation. How come you use a car to get you somewhere faster than walking? But you don't accept now, you have another tool. You can still work with the physicality, and you have access to the energy of the Soul. How this guy feels. How I feel good, because he can change.

In a very near future, maybe a handful of weeks, we put you as a black man in a machine, and we bring you out as a white man in another. But are you happy in the skin of the white man when you know what is done to you as a black man? So don't get deceived by the shape, the color, the size of the plasma, whatever. See what it can, what you can give to it to elevate it, and then you might receive something from it. This is why the mindset comes.

I told you, the way you walk from this chair to that, if I was a hunter, you've already been hunted, chewed, swallowed, and thrown away when I don't want it. You understand? So we look at the example of what we have. We look at how... I always say, they always tell me, you know, you don't look at how these people

plan things and do things. I said, I always look at their beauty. It's them who fail themselves. So I don't have to worry whatever they do.

I was a very young boy in business. (1:48) My father came from Iran. And he came to my office. And I said, you know, father, you can join me as a respect as a father. And then he start telling me, do you know what your staff are doing? They're stealing there. They're doing that. I said, Papa, if I spend my time worrying about the pennies what they steal, they pay for it. They lose their job. Somewhere they pay, they steal one penny, they pay 10 penny. I spend that energy to develop my business further, than sitting and worrying who steals what. Because I always looked, if I make 100, they steal 1 pound is 1 pound of 100. If I make a million, they sell still 1 pound. It's nothing compared to what is expanding. Why should I spend my time on this?

Actually, he went and trained a guy how to steal from me, because Mehran doesn't watch this. And then he came to pay for it, heavily for what he did. And I said to my dad years later, you see, he took, see what happened to him. But I didn't bother. I carried on with my work, see where I am, where he is.

He wanted to teach me, as an example, you don't look at those little things. And you see what they do to him? I said to him, yes, he stole so much. But the time I spend money to cover him not to steal, see where I am. He said, there is nowhere an answer to you, because you're always more clever. I said, I'm not clever, because I plan what I do. I look at the smallest, and I look at the biggest, and see how it goes. And I always said to him, you know what you haven't understood. I have studied the smallest thing man has ever realized. You love me. You call me a nuclear. (1:50) You know what nuclear is? It's watching the smallest, understanding. I said, because I understand that little one, I don't care, because I know how to handle it. I'll deal with the other side.

Never consider a plant and a tree to be in that line. Understand that you haven't understood. It's actually you who are in that line, you don't see the other side of it.

Any other question?

Q: ... I know that you are adept of being fed by energies, which I personally experience it. In here, I don't feel like eating anything. And secondly, I'm not a meat eater really, more and more. But for the conscious, relief of conscious of those who eat meat, moderately and just for their survival. I think the same pattern you said, the vegetable is ready, willing to give the Soul to somebody who wants that, his Soul elevates, is using that, and the vegetable is okay with it. I think if there is an animal, when I have it in front of me, and I wash it, I pray for it, I say, "Thank you, I'm happy to have you." And I wish that he would have a better life, or when I eat it, he would be satisfied that I eat that meat. Because I gave him something from my Soul, from myself, from my heart. (1:52)

K- I tell you something... The truth is, none of you do that. Some Christians bless the food before they eat. And 99.999999% of you don't do it. And that's why you are Jews, or Muslims. And that's why you have that prayer. Yeah, by means you are one, you're that 0.001%. But, that's why, in the slaughterhouses, they have this tape (of prayers playing in background while), they're blessing (the animal). You know, they are taking (its) life. Because, the Prophet knows you don't do it, but now it's very nice, it's an automatic tape. Brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, brr, but does it actually work on the animal? I don't know. And, does it matter if you pray to it in Arabic or Hebrew, or in another language, when you take his life? Doesn't matter. You just ?? one, (I'm) talking about (the) totality of us as humans.

And I have a beautiful... I was talking to, I think, ?? recently. When the Iranian revolution happened, we... there was a shortage of meat in Iran. So, the government decided to bring meat to stop this huge problem of feeding people. And Iran is Islamic country, everything had to be ?? halal. And the only thing you could make it halal, you could tell them, but everything had a stamp of halal. So they bought ship loads of meat, they brought them to Ahwaz, and as they came to them, with a stamp, they made it halal. So the prayer was never said, (1:54) but the meat was never blessed. It just became a color of ink in the belief of the man. This is how we cheat with ourselves. This is how people play.

But when I was a young boy, I used to go with my great grandmother and my aunts. They were Jewish. So we went to a specific shop in Iran, in Tehran, to buy chicken, because it had to be kosher. And I always remember this noise of, "clack, clack, clack, clack, clack." It emotionally touched me for the rest of my life. Once they cut half the neck of the chicken, it's this big drum, once they drop it in there, till all its life goes out, and then they take it out. And I said, "It's finished." He says, "No, you have to wait, the last one hasn't come." After a few seconds, it was the last burst of energy, was whatever the Soul leaves, and it says, "Now it's ready to (de) feather it." And I went out, few days, few weeks later, I was with my Muslim cousins, and they slaughtered a sheep. They did the same thing, they cut half of it, and they let it kick everything else. And then when he stopped, they said, now the Soul is gone, we blessed it. I said to my father, why do they both do the same and call themselves different? He said, you know, Baba, just eat the meat. Let them be ignorant. At the end of it, that's all it is. If you eat a kosher meat or a halal meat, it's all the same. We bless the Soul. And now it's on the tape recording, or the red stamps on the body.

But do we do? Do we bless what gives us? Every time I get Knowledge Seekers like you, or I teach, even on the remote telephone, I always say, I'm blessed, because I get so much energy, (1:56) so much knowledge comes, that I can give back. It doesn't come by eating food, it comes by energy. I have a habit, even when I travel. I travel from A to B in a car, I thank the car. It's habitual. I say, thanks for bringing me to where I wanted to be. It's not just because a donkey takes you. Because it's a Soul of collective Soul. My mom used to say, you're thanking a car. I said, "Mom, if I don't appreciate what I have, I will never understand. It becomes another tool."

It's a blessing to... First of all, to take you from A to B. And secondly, arriving alive, all where you wanted to be. I don't get up and say... Have you been on these planes? The jet plane and they are flying, and then the Muslims get up and they bend, and play in the corridors, nobody can go for a coffee and tea, till they finish their pray, and everybody... is cursing them, these Muslims, they, you know, they don't stop. But, one day I said to myself, "Which way is this guy praying to?" Because, first of all you're all above, and the plane keeps on turning, and it just came, it's a belief. He believes his Soul will act.

Why do we pray? We don't pray for us, we add to the Soul of the Prophet. Because we pay attention to him, to energy to go to him, because like what Dean said, "Can I connect?" If man understands why you pray, you will never pray. Because in a way, you give, you go to the church and you pray or give, you add from your Soul to the Soul of the Christ, to the Soul of Mohammed. That's all you're doing, you're givers. (1:58) And maybe, in giving you receive something, you say, "Every time I go to church, I pray, something good happens." But in fact, you put that seed in, that 20% in, and maybe something comes to you.

When you go and pray for your mother and father, when they are dead, to add to their Soul, you actually, when you pray for them, you give to them, you add to their Soul. It doesn't mean that, if the energy was at the

position of the Jupiter, you pray so much with them, they go become position of Mars. Or they become a better planet, in the position they are.

Chinese have a beautiful ritual for death, and it makes me laugh. But, you see it on the streets of Beijing, you see it in some villages. They burn money, to add to the Souls, to give a gift to the body of the man. But, what is funny about it, is actually paper. Any paper, red, they burn it, has no value. They don't actually burn the money, which they put effort into it, to make it. Even though they pay for that. And they sit and they burn money on the street, on the corners. Am I correct? To elevate? First time I couldn't understand, but now I understand a little bit of it. So, is it actually the burning? Or is it the paying attention to the Soul of the dead, to add to it, that that point of burning, the fire, gives from us that attention to the Soul of the person we're burning it for?

And the same envelope they put the money and they burn, they give it to you as a gift. Are they burning money? Are they adding to your Soul when they give you this? It's very common when you are in official meetings near Chinese New Year. (2:00) They come and they give you a red envelope. The first time I received that, I thought, what is it? But out of 10 people around the table, one or two gets it. And I thought, what is... I opened up this. I said to Wang Lin, "I got money, what's happening?" She said, "This is a gift from the, what you call it, the higher people." And I said, "How come the other people ?? don't it?" He said, "These are allocated, they want to... it's a matter of respect." I said, "But they burn the same money." She said, "Don't talk, just take the money and keep quiet."

How do we respect it? Where do we understand the culture? Do we give part of our Souls to it? And this is what we don't understand, this is where most of our problem is. We think, we look at everything as a human level, but we don't look at it as the, what you call it, the Soul, the energy ?? field of it. Have you noticed here, sometimes, especially in this area, my accent changes a bit towards Cockney, because this is London. This, they say, if you can hear the bells of ?? Bull, you're a Londoner, true Londoner. And whenever you come here, accent change, you know you go to ?? Esfahan, the accent changes. Whenever I come to this part of London, I hear myself speaking a bit Cockney, because I lived in this area, it just comes back to you naturally speaking. Because, it's the Soul of it, this is what I say when you go to a country, to another position, when you manifest yourself, you take all of it, This is part of it. You feel.

If you go out, go towards ?? Milan station and go for about two couple of kilometers, you see a church. A bell, sorry. And there, when it rings, it's a bell of ?? Bull. If you heard it, you're a true, true Londoner, it's come from there. And they speak with a Cockney accent. (2:02) And what's his name? He speaks sometimes a little bit of it.

Any other question?

<< Problems with the microphone of the Knowledge Seeker >>

Q: ... My question is about the creation of Souls in the universe. And you said this was a nursery, this planet was a nursery for Souls in the universe. We know Souls can also be created in the open space by different entities, citizens, creatures, living fields in that position, but that would seem to be a one-off production of Souls. And it also seems to me that it's like discovering an oasis in the desert for us. We see the oasis. It brings life. (2:04) And for the universe, it probably is an oasis because now the universe says, ah, there's more Souls here for creation of stars, galaxies, planets, expansion of myself. But the, I'm just thinking the systems you make seem to be for the improvement of the creation of the nurseries. Are there any places in

the universe that have "gotten it right from the get-go," let's say, where it doesn't need improving or elevation?

K- ... Yes, there is only one place. And that's Creator, where He is. Got it right for all the way along. The rest is a process of development, and improvement, and learning, and adding. The only place which is absolutely perfect, is when it's within the Creator. And even Him, when He lets it loose, makes mistakes and problem, like humans. So, the division becomes a problem, but the source is perfect.

Q: Maybe I can't see the forest from the trees, because I'm in it.

K- Yes.

Any other question? Or shall we call it the day? (2:06)

Q: ... Okay, my question is, for some reason I relate so much better to non-human creatures. Why is that?

K- (.... inaudible ...)

R: Bear with us, I think Mr. Keshe is making an adjustment here.

K- (No, sorry about that, I didn't see my own microphone being off).

I said, here, every day, we bring foods and other things to enjoy physically. And today I brought some, what you call, dry biscuits, but from Iranian restaurant, so we can always enjoy it. And to add to the Soul with the pleasure of it.

You enjoy (being with) animals more, because they give enough for what you need. We do that sometimes. And because they are at the strength of your, what you have, what you want. Everything the same, what we want, what we expect. (2:08) And it's part of us who decides in what is enough for us. The animals don't tell you they got a headache. They don't tell you their problem, they need to be fed. And they need to be changed and they need to be cleaned. You do it out of love.

(Yeah, ?? now talk. Yeah, I think Stefania had some. "Oh, leave it there, they all know how to walk to it, ??.")

Any other question?

Q: Stefania . has 2 questions She's asking basically, it you know, you know, you said, now we have to learn how to elevate ourselves, otherwise we become dust, no? (2:10) And she's saying, "Do you have to wait for your Physicality to be ready?"

K- No.

Q: Oh, everyone can do it?

K- Yeah.

Q: ... The other question is, how do you behave with the people that are about to leave their body and they have the dry mouth and cannot drink anymore?

K- What's got dry mouth to do with them leaving their body?

Q: Yeah, << audio unclear >>.

K- So, what's got to do with each other? Sometimes, it's very interesting, that the Soul has already parted .. departed from the physicality. It doesn't all happen in the last second, which we think. And it's very strange how we see it, how we, we understand it. And, it doesn't matter, dry mouth, twisted leg, open eyes, it's just the last part of the physicality which goes.

Any other question? Do you have anything from your side, Rick? (2:12)

Q: ... If a person has two Souls, does he also have two identities?

K- Yes. 100%.

R: And by two Souls, is that meant, two STP, or two Souls, STM, in one person?

K- What do you mean?

R: Well, when... if the question is, if a person has two Souls, does that mean two STP, or two...

K- Yes.

R- It's always one STM.

K- We call it the beautiful people. Yes, this is very clear. If you ever been with these people, with the two Souls, what we call, the Beautiful People, in English language you call them schizophrenic. It's very clear, the STP has connection to that Soul, and the two are not connected.

I have been privileged to work around this for years, for decades. And you speak to John, he behaves with the voice of a man. And the second Soul is the strength field of Soul of a woman. Now you speak to Mary, she crosses her leg, she uses the woman hand movement. And of course, otherwise it cannot be one. (2:14) They have very, very, and always when you speak to John, you get the boy. When you speak to Mary, you get a Mary. And this is very clear. Each Soul has its own STP.

In a way, it ?? matches different energy of the same structure, to be exactly what I said earlier on. You have to understand the Soul of the, what you call, the kidney, or the heart. And for certain condition, kidney has a different field strength, different Soul structure. And then when somebody else does, another dimension, it comes another position. It's very, very clear.

If you... It's a privilege to know these people. It's a privilege to work with these people. And you understand, and they change. The shape of their face, their mouth, everything changes. Depends which one you're talking to. We make a mistake, we tell them they're sick. Actually, we are sick because we don't see they're better than us. It's how one body can manage two or three in. We can't manage one of our own. Then you understand how complicated these people are.

One of my wishes is once we start developing, completing is what we call, the transmutation, we'll be able to give physicality to these people, that they actually can physically see which one comes out of the door when we open the door. Or can we put one machine and three systems and get three people coming out of the system with the same dimension of physicality?

Any other question? (2:16)

Q: ... For nearly a month I am sleeping on my belly, and inside a star formation composed of four bottles of Gans's, three on the ground and one on top of me. And I am more connected to my night Soul travels. I easily remember three trips a night and I wake up after each of them. Two questions, does sleeping on the belly, or the back have a say in the expansion of the Soul? And does the "control key" sits only in the emotion?

K- I don't think how you sleep matters as much. This is a story they said to the guy, you know, "When you sleep, do you put your beard under the blanket or over the blanket?" He says, "I don't know till I try it." And he asked him next day, he says, "Do you put your beard under the blanket?" He says, "What's got to do with you? All night I'm trying to find out how I sleep." We don't know if you sleep on the belly, is any different than the top. Try to sleep on your back for a month and then tell us, if is there any difference.

This is a beautiful thing when you do in Africa, you can sleep on the ground with no problem. And then you can sleep on either way you like. I think he is still in Gambia. Try it. Let us know. Now sleep one month on your back and see if you still remember dreams better than when you were on your belly. You're a Knowledge Seeker, so tell us, come back in a month if it made any difference.

Q: It's a continuation of my question before. (2:18) I make it two examples so it's clear. One is, we said, like for example, Jesus saw beautiful women and he slept with them, because it brought him pleasure. He didn't say they're married. So, question is, was he correct? Or, for example, you say things shows up in our life, and then if you like it, it means it wants to give us something. We shouldn't question it, we should go for it. So if I see a man, I want to have sex with him, I should go and do it.

K- Don't mix Jesus with anybody else. He's a class of his own. We don't interfere with that part. He knew what he was doing and he knew how to get out of it. This is one of the things Jesus always did. But the rest is your decision. How you... What does it give you? What does the next step gives you?

Q: But you know something is about giving us pleasure, something else is, is that person wants to give me the pleasure. It's two, two Souls.

K- You got to ask him. This is the problem. This is always a problem. Half of the time, we assume, but we actually got it 100% wrong. And the other half, we ask the question, and they lie to you, and you never know. Just to keep you happy. So, somewhere down the line, you have to assess yourself.

Q: Mr. Keshe you say that, I like a guy, and I like him, and I... (2:20)

K- I don't like a guy, you like a guy.

Q: So I like a guy and then I tell the guy that I like him, he tells me he doesn't like me. So it means he's lying to me? Why he wants to lie to me?

K- So he doesn't like you, so that's it, take it and walk. Next one, next stop. And you go ?? kick the next one.

Q: I don't understand it, because you said, things shows up because he wants to bring you pleasure. Because the way I feel...

K- Yeah, but No. The thing is, there are two ways to look at it.

Q: You confuse me Mr. Keshe.

K- You are easy to confuse, no problem.

But, what I'm trying, what it is, is what you assume. What, the way you assume. It's your assumption. Does the guy like me? Or, I think he likes me, or he just wants to pretend to like me.

I had a beautiful experience yesterday here. I went to the building of Nuclear Engineering, where it used to be, now it's a cafe for graduates, and I sat to have a sandwich. Just feel the emotion, it brought back so many memories, because I know the land, where the classes were, and whatever. And, four youngsters came and sat next to me. And, there was a... they were in 17, 18, they came to see the University, if they'd like to be here next year to apply for. And I watched the behavior of the two, both of them were, but suppose nobody to know they are together, and a guy from the school came in, "Oh, you have your foursome meeting, I'm going somewhere else, I eat somewhere else." And I watched the two sitting opposite to me. One was English, blonde, blue, and one was Pakistani, and outside they cannot be touched, Pakistani girls, you know the restriction, everything. Here in the environment, they were sitting, they were touching and enjoying each other. (2:22)

And I thought, what condition us have created for our children to make them the liars and cheaters, that they learn to do the rest of their life? Or do they show the real emotion and we encourage it to be there, for them to enjoy life. Do they actually show, were they actually showing the true affection? And it was very beautiful watching this young lovers, just even enjoying touching each other. And it was very clear, the English guy knew the limitation of, whatever he was doing. But he was enjoying the, and the girl was enjoying the presence of the guy. And the same with the other two, who were sitting next to them.

I turned around to them and I said, where are you from? They said, oh, we are six years. We come to see the college. And it's the same process. Are those two lying to each other? Or are they... they have created their life to lie to their parents, but be correct with each other? Or because they lie to their parents, that still everything else is lie between them too.

When I walked into this college, this university, the first day, it touched me for rest of my life. The first day I arrived in this college, in the white building at the front, you go through the gate, used to be a big hall, now they put a... thing is up, the black post. And the minute you came into the hall, you turn left, and there was a desk for registration. I walked in, like everybody fresh, or some people, they call them the fresh greens, is coming, walking in. (2:24) And a guy was standing in front of me. I'm 180, he's 160, maybe, around that height, blonde, blue eye, so beautiful, talking. And the minute I stood behind him, he turned around and says, oh, what are you, blah, blah, blah. started talking to me. We realized we are both in the nuclear engineering department. So it was a first click. And this friendship of the first person I ever spoke to in the university became a lifetime friendship. The end of the third year for the last two terms we shared apartment together. We lived in the same house together and it was a beautiful friendship. I never knew till the guy spoke. I'd

never seen a white South African. To me, Africans were all black. This is a white one. I said, the life story of him was, he was found making love to a black African. And the girl was put into prison. And the parents put him in the back of the car, drove as fast as they could to Botswana, got rid of him on the border. They got him on a plane, came to England to save his life. Because of Apartheid.

Of what they did to him, he went directly within the first couple of months here, went out with the darkest skinned woman I have ever known in my life. You couldn't get any darker. And the friendship between them was a true love. 50 years later, they're still married. The same woman, the same girl we got to know here together. And he said, I cannot lie to myself. I had a ?? love ... I went with him outside. If you've been to ?? Trafalgar Square, there's a South African embassy on the corner of ?? Trafalgar. (2:26) I went so many times with him. Oh, free Mandela. I was a hippie, so everything we, which one we went to march for. And a year before, I didn't care about who Mandela was. I never knew about the South Africa and the rest of it. But it made sense. He said, I cannot lie to myself, because they kicked me out of my country to don't enjoy what I enjoy. And the parents encouraged him. They took the... they have one son together. He's a gorgeous guy. And when we split, he went to Denmark. He became one of the heads of the Denmark's nuclear industry.

But he always said to me, Mehran, do you know if I lie to myself, then I have to live with it. I don't like white skin, because they've done so much wrong to these people. And I enjoy... and he explained... all the time, we had discussions sitting around the table. I lived with this guy more or less for three years, in different shapes or forms. And it brought him back. You cannot lie to yourself. And he was very straightforward. He's a Jewish guy from South Africa. And he had every wealth in South Africa to be there. He escaped. He had to come here and go through this, become a nuclear (engineer) and change his life. But he said, "I cannot stand the touch of a white skin." I said, "Why do you have this problem?" He said, "I don't know, because I don't like what we've done to them." And the girl he went with, she was the... the only thing white in her was her teeth. And we shared an apartment together, two bedrooms with a hall, I was explaining to ... And many nights, I said, Monica, I'm going to kill you. You go into the dark in the corridor, (2:28) and the only thing you see is when she opens her mouth. I said, "You sit there to frighten me?" And says, "?? .. I have done it again " I said. But she was so beautiful. The color of the skin, the joy they gave each other. They're still married 50 years later, they met in this college.

Q: Mr. Keshe, which part of my question, you think was assumption? Because, I didn't assume.

K- You assume the guy doesn't like you.

Q: No.

K- You assume you don't like the guy.

Q: No, no. I said if I like the guy. So, you're saying tell the guy, if you like the guy. Yes?

K- Yeah. But you don't know if the guy is married or not, he likes you or not. ???

Q: No... You said the wrong assumption, ?? have assumption. But the guy says, "I don't like you." So, there's no assumption.

K- That's it, because you are not blonde and blue eyes.

Q: So, that's not the thing. It wasn't assumption.

K- You know, we have a big problem in the most of the men mentality. And I've seen this many time, in my education time and my lifetime. We like to be with the blonde, blue eyes, maybe we had the taste of one somewhere, and we go out with the black hair, black eyes, brown eyes, And we try to change her to be what we like to be. And it doesn't work. And we have the reverse, like, unless like this guy accept, this is what I like, this is what I get. If you like your blonde, what do you got with the black hair? And you try to get... Can you change the color of your hair? Next time, there's the operation to change the color of her eye, you can buy. So, if you want to be with the blonde, go out with it, why do you want me to change? And they compromise somewhere, they get married and the women never forget. It's not in their nature. They say, "God is forgiving." (2:30) Have you ever seen a woman to forgive? No way. So, God cannot be a woman, He's definitely a man. For that reason, now, she says, "Oh, you still love the blonde, you're just with me because you couldn't get a blonde." And always sits there. Because the first .. Oh, I haven't thought ?? I would like you. I've seen this here, in this University, with a few of my friends, and I've seen it in the outside life.

So, you know, he doesn't like you, because he is a blond, you like him, doesn't mean he's got to ?? like you. Next time, hit his Soul, and see, if that Soul is, he can work on it, expand it, he'll love you more than the blonde. This environment, this University, changed a lot of things and brought me a lot of things about life.

I came here 3 years ago, just to walk around the University. And not the sentimentality, because of the, it brought so much maturity. And that maturity shaped the rest of my life, in education, in research and everything else. I learned one thing in this University, you never go to the labs. Because, all the lab tests are fake. And I said, "I refused three years in this college, ever to give a lab report." And lab report was part of percentage of our degree, each course. I never got it, because to me, it's all was said, to confirm to me, the lies in physics we have to accept. And do you know who did it for me? I said, "David, can you go to the lab and do the report?" He used to write two reports for me, one for himself, and I used to hand it in. And many time the professor says, "How come you two reports are..." "Oh, because we did the test together." (2:32)

Because, the structure of the physics department, physics here, was to confirm the lies in the physics we have accepted, and it was against my rule. I turned up for one or two of them and I refused. Three years in this University, I never attended any of the labs. I did. When it was playing with the nuclear reactor, I used to wait for the buses five minutes late. My professor, Dr. ?? Shoei, says, "Mehran, how come you run to be here, but we can't get you into any lab?" I said, "Because that's all lie here, I decide." In three years in this University, I went to two or three, and that was the first year, and I decided I'm not going to any labs.

??

I didn't care. First year here, I realized everything they teach me is lie. Second year I battled, and the third year I won. And my professor, Professor Leslie, in that building right across there, says, "Mehran, I give you two questions, answer the two questions, you get that degree, because then you are a nuclear, they listen to you. If you don't go out with it, nobody listens to you." And bless his Soul, he was right.

I never, I refused, I never, it's not being rebel, but, why do you test to confirm what is already you know is wrong? And then you get ingrained, you accept it, then in the future, because you were stupid so much to accept it, now you have to defend it. That's the problem with all the PhD's and doctors here. Lies, accepting lies, adding to lies to become bigger lies, and then we accept them, because we all lied, we keep it together. Everybody else is a liar. (2:34)

In the electric engineering, the first thing came to me, and now we understand it better, is in the electric engineering department, the first test that we did, I said, "Why don't you tell people?" Because I came from engineering background, before this I did a lot of work in the, what you call it, pre-university. I said, "Most of the energy comes from the null than the phase. Why don't you tell us about that part? That we understand circulation of the current." "No, no, no, no, you only interested, you only have to follow what comes in." I said, "What comes in, if it doesn't go out, it doesn't behave. We can't have anything from it." "You don't..." I said, "Guy, you know something? You keep your electric current system electronics, I'm going. I don't need it."

So, in plasma, we say, you have Magnetical Gravitational. You give, you take, and the balance comes. In electrical, they don't teach us this. You plug it in, it's 2 watt, that's what you use. You can't have current flow in that system, if it's not going back up. And they don't teach you, it's against their law, and they call it eddy current, and all sorts of things. But they don't teach you about it. When ?? you bring a balanced science, then it ?? wasn't acceptable to me. I said, "You know something, I have to do electrical engineering. Okay, electronics, I get my marks in my theory, 30% of the practical." And then, we found ??, ?? They said, "Mehran, you're good in that part, I'm in this part. You teach me that part, I do so." He used to go all the labs. I was free in the afternoons, going wherever I want to go. It's what we've got to accept. And it's what we have to put to accept. Do we want to accept it? I never agreed with the lies in physics. So why should I become part of the game?

Any other question? (2:36)

Q: ... Is what you just explained on the body regarding planets, in a clumsy way hidden in astrology, where a connection is often made to body and mental conditions?

K- What? When I say "what?" it means, I haven't understood. Repeat again.

Q: ... Is what you just explained about the body regarding planets, in a clumsy way hidden in astrology, where a connection is often made to body and mental conditions.

R: I guess he's asking, is astrology a valid way of explaining what you were explaining, regarding the influences of planets on our body and so on? Is there anything behind astrology, I guess, you'd say ...

K- Depends what you call. If you define astrology in the astrophysics way, and understanding the interaction of the fields, maybe, there is a... not maybe, 100% there is a connection. But, if you connect it to mysticism, and this and that, and this planet there and there, Then it's the foolishness of man to accept these things.

There is definitely the way Saturn sits, how we get fields from it, (2:38) because we are part of the structure, we are not isolated. But then trying to connect it to other things, it's what I call, playing the game to be ?? ?? .

But we have to be aware, there is a direct connection. There is a direct connection between the fields of the universe and how we behave, that's for sure.

Any other questions?

Q: ... I'd like to know if, we emit sounds like mantras, and there are different mantras that promote the balance of our Magnetical and Gravitational fields. But I'd like to know if there is any kind of specific mantra that you can expand our STM. Thank you.

K- I don't understand.

Q: Like I emit sounds like Aum or Uhm, like sounds and these sounds equilibrate my Magnetic fields, and like, disappear pains, and to expand our Soul, it exists, like a specific mantra, like sound, that you do.

K- I understand, maybe it does, maybe it doesn't. (2:40)

Q: Because I was actually, was ... I have to stay in silence, or I have to make sounds? That's my doubt.

K- It does affect, maybe it's the same as what, how we change our breathing system, because a lot of people do this. Make noises, and brings them different emotion, and we make different breathing and creates different emotion. Sound is part of that spectrum of Magnetic fields. And it has to be, it cannot be not to. Then, sound is a spectrum of Magnetic fields, changes vibration in the body of the man, in the blood of the man. Of course it does. But it has to be at the frequency, or the strength of what affects your length or bandwidth.

Any other question?

Q: ... We don't have enough time to get to London. Is there a way to get a link after we register?

K- What do you mean?

Q: For the conference.

K- Yes, you go to... we put it up. You go to the Store, you register for London conference and in it you put that you want to be you'll be there and then you get the email back confirming you've been accepted. (2:42)

Q: I'm talking about you get a link...

K- If you go to the Store there is a link for registering for the ambassadorial, what you call it, Meeting. Click on that one and just register. It comes to us and then the rest is with you. Just go to the store and click on it and fill in the form as usual. And then you get a response back.

Do not come to the conference, because it's not us, it's the rule of the house, where we're holding the conference. People have to be registered, known, before they come in. That's, that's a part... The conference hall is part of, actually, is part of the British government structure. It's opposite to the most famous church and the Parliament of England. And, it's that they have their own rules and regulations, we have to do a lot of things, this is part of it. We have to register everyone, walking in, does not give you the entrance. We have to know that it's done.

Any other question? Have we finished with the questions?

K- ... (2:44) Have you sorted out your YouTube problem?

R: Ah yes, we got that going early in the broadcast and it appears that most of the program has been broadcast. I think everything that you, all your talking has been covered by YouTube as far as I know.

K- Okay, no problem.

Q: ... If it's okay for me to say, we received a gift of a two-dimensional plasma. When we came to this conference in London. Does this two-dimensional plasma become a three-dimensional plasma?

K- ... This is an artist work. And it's the sign of this conference. And it's just made as it is. We will make it. There is a coaster made for this. No, no. There's a coaster as well. You will see it very soon. The same design. The center of it, the sign of SSI, is made by the, what you call, the Knowledge Seekers of the Sharif Tehran University. Every curvature, the thing, has a lot of meaning. It's done by the physicists and astrophysicist. (2:46) It was done for us in 2011 by scientists at Sharif Tehran University. ?? as, and somewhere the explanation is registered, what it means. But the rest of it is done by one of our Romanian, artwork people. That's how it's been put. And it's just for this conference.

Q: ... I have a Romanian friend in London who has an association for culture. Could you work also with him for the exhibition in London and other cities in Europe? May I ask him to attend the conference and talk with you in London?

K- Oh, these things are not done by me. These things are done by the IT people, and the people who do. I don't get involved in these things. It's not part of what I do. They have to get in touch with them.

R: Okay, good.

K- In Keshe Foundation I'm just nowadays, what you call it, organizer and troubleshooter.

Any other question?

Q: ... How will the contents or news be made public at the Ambassador Conference?

K- We have never made it public. Sometimes we release a few pictures. (2:48) The... our system from Linz television station, we brought in, the whole session will be recorded for Keshe Foundation. But it'll never be public, it will never go public. And we do this, the whole, you will see it on Saturday. And if you've been in Linz, we have brought some of our broadcasting systems, the whole control panel, everything else. We're recording it for ourselves, but it'll never go public. And we ask everyone not to take your pictures. If anybody takes the pictures, we ask you to leave.

Q: ... Hello Mr. Keshe, if a little boy wants to be a girl, does he have two Souls inside him and is the girl's Soul stronger?

K- I don't know, this is something very common in the world, especially today. You have to allow what is natural to grow. I've seen a lot of parents trying to change, "He's a boy but he dresses like a girl." So, so what? It shows its beauty. What is there? And you're trying to force it. And then you create a lot of other things with it. But we got to accept what is in front of us, not to enforce, to fit the society.

When I was a young boy, first year, second year in a school, (2:50) it was the biggest crime to me, it was a criminal offense, it was the job of the Satan to write with the left hand, and I'm left handed. My parents did everything to get me to write with the right hand. Teachers did everything, they do 10 homework's, I do one homework, but it has to be with the right hand, but they couldn't stop me. I learned how to write together. But at the end of it they gave up, because I'm naturally left-handed. It had no influence, but it created so much mayhem and problems. For me, trying to... I remember nights sitting and crying, I can't write, the brain wasn't working to match the pen. And then after third year or whatever, my parents gave up. What was the use of two years of torture for what you cannot change. I always be proud of what you have and nourish what you have, but don't let it be feel the shame, because if you're born to behave like a girl, you hide it and then you grow up you become all sorts of things, but you don't encourage certain behaviors. Natural process we can't change.

Shall we wrap it up?

Q: ... Is it possible to get insights from dreams? I've had two dreams one of which was that I was building a simple device a five meter of copper bar with a Gans ball at each end. And one of the ends was buried and the two rotated and created an interaction of fields. And this was good for a garden I was cultivating. (2:52) So is it possible to get insights from dreams?

K- Yes, of course. Many people do. It's not a dream, it's the Soul connection to the knowledge. If you redefine a dream as the energy side of your body, the way you think you've learned by going to school, developing something, you learn the same from the Souls. Souls are not just there for you to talk. They bring knowledge. They bring information. You teach knowledge. And then if you appreciate this, of course. It's not a one-way traffic.

I wonder, I said this many years ago, we had the Newton, physically for an apple to fall on its head, and then we call it, he discovered the whatever. But how many of us got this knowledge about the gravity over centuries from interactions, watching them, but we couldn't speak about it because we can't show it with the fields? Now we can. We make a system which fields create gravity. And we can make an apple fall on anybody's head now. We don't need a tree.

Any other questions?

Q: ... (2:54) I'm thinking about when Jesus in the Last Supper, he took the bread, he shared the bread, and said, "You take it, that's my body, that's my flesh, that's my body." And then he took the wine and shared it and said, "Drink it, that's my blood." I haven't, well I have my theories, is that from his plasma he gave to this bread and the bread was becoming part of their body, so their Soul would raise and also from the fruit to the juice of the raisin he blessed it with his plasma and transferred it to their body liquid and blood. So he raised their spirit to be ready and go through things. So what's your... what's this means in fact? Thank you.

K- I answered this a few years ago. And we went into detail. You've got to go into the teaching, because this is very, very deep understanding of symbolism, truth and a lot of lies and what fits. There's a lot of, what you call it, there's a lot behind this, depends how you interpret it, and a lot of it is made up to fit, to fit certain, what you call it, objectives. (2:56) But it's there, we've done, I think, a big session on it. Just go on the Internet, you'll find it on the classrooms.

Thank you very much Rick for today. Thank you for our students here and all the Knowledge Seekers around the world. And as I said, those of you who thought London Conference is out of your reach, register and do the rest of it and you get a response back.

It's in a way, in response to the American administration. You can play twice, the third time we play, you won't like when we play. You will be asking for meeting for peace, in a very, very direct way.

Thank you very much for today, and we'll see you next time. Thank you Rick.

R: All right, thank you Mr. Keshe. Thank you once again for this 511th time, Knowledge Seekers Workshop here on Thursday, November 9th, 2023. Thanks everybody for attending today's...

K- Can I just talk about one thing?

R: Okay.

K- Can I just say something? Today is the 9th of 11, and I wish to give a birthday wish to a boy who becomes 18 today. Happy Birthday.

511 KSW Nov 09, 2023

END

512th Knowledge Seekers Workshop November 16, 2023

(Transcription, Editing and Proofing done by KF Brazil))

(Auto transcription by Elias)

Prepare for Nov 24th - Creating Light between Hands - transmutation - or reach Soul of Creator; Gain confidence in self power within; Types of love - final Love for Creator super-passes all love; Purpose of teaching - us to return Home; Become the Light; Eternal life - STM in love with Soul of Creator; Beginning of next cycle teachings; Need to love another to confirm existence - same with Creator; Light in hands - same fire Moses saw; Our thinking - of Creator; The Creators of the Creator - no end to life; Mix light of Soul - like painter mixes colors - new creations; Light gate to Heaven - maturity of Soul; Servitude to Creator; Voice of Creator; If man chooses Light of Creator - start new cycle; Ambassadorial meeting - 18 nations form own group - defy American ban - more than hoped for; Brain mass different left and right - create gradient flow - light in hands; See Heaven; Genetic engineering in China - Middle east - stem cells for inbred diseases - Jews - Moslems - Royal families; Plasma change RNA which correctly changes DNA; Pay for ancestors sins; Show flight in China - Transmutation in Iran; American gun policy - if poor nation wants food - have to buy weapons - not accept peace; China become food secure 2030 - change policy; Russia won Ukraine - supply grain China; Nations fear Keshe becoming powerful force - own nation; Post-Corona - injection calcifications increase deaths - Insurance companies panic; C60 Bucky Ball 20 hexagons 12

pentagons - hidden powers; Create Cosmic Rays; C60 expand ball from within like UFO - skin; C60 dangerous for medical - nations want to weaponize

ENGLISH TRANSCRIPTION

(:14)

K- Yes, good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you to share your knowledge with us, and we hope we share it with you. And how we can expand and extend the knowledge.

In the sessions which are coming up regarding the transmutation and about the light in the hand, which will be in a couple of weeks, I think it is on the 24th of the November, we try to bring a lot of understanding in what it means, and how you transfer, and you transmute, and you bring, in a way, light in transmutation.

As I've said in teachings before, and other places, is all these tests we do, (:16) all these criteria of showing the light, addiction, emotion, and everything else, is to give you the confidence, for you as Knowledge Seekers (KS), to attain confidence, in what you have ignored during the process of your life. It doesn't matter how old you are, you could be a 10 year old, you could be a 100 year old, or 60 or 70 year old. You have forgotten the essence of Creation, what is in you. That's what the essence is, that's what we can do.

So, we started months and months ago, and years and years ago, we introduced you to the metals and the Gans's and the "magic" liquid, which was on the Internet for years. What is this liquid? And then Nano coating, and then Gans's and now he will do, and when he produce Gans's and Mr. Keshe has jumped again from Nano coating to gases to Gans's. And now he's gone into the, what we call, the Spirit and the Soul and we become a cult and the rest of it.

It's all the process of transferring and transforming. When you want to see the God, you don't expect a UFO appears and God coming out of it. I don't think any of us have reached that level of foolishness. We don't expect God to manifest in front of us, "I am the God" and says, "Oh if you are God, do this and dance and put that on your head and the rest of it." In the essence, we feel the beauty of Him within us. In essence, we see, we feel the emotion of His presence, as a light, as could be emotion of the feeling of in any shape or form. (:18) Depends what kind of God you believe in, that, that God in that shape makes you to believe. That is God.

So, the whole process of the teaching, coming to where we are now, is in essence to show you, for you to trust in yourself. In understanding what this is within me, that I have ignored. When we are born, we are ... And then, when we grow up, we know the love of the mother, the love of the father, and then the siblings, and the people around us. Till we come, maybe, in a position and a process, to a point of physical maturity, that our heart can take what we call the Spirit, the Soul of Physicality (STP), in the dimension of the maturity of the cells, which combines with creation of another Soul, that we become mature to reproduce. And then, for the first time, we understand the beauty of loving someone. And that love, when it touches us, surpasses the love of the mother, the father, and everything else we knew up to that time. We fall in love with another creature, another man, another woman. Doesn't matter what gender is, (:20) but we devote our life to it. And we stand a lifetime, because we felt that love.

It's the same when we touch the love of the Creator. When we touch that love, when we feel that love, when we understand the essence of the fields of it, nothing is compared even to loving the lover. The way when we mature to love another person, and then we fall in love. And the love of parents and the others never matches. Now when we touch the love of the Creator, even the love we felt in the physical dimension of another being, it just is irrelevant.

And then, we come to find out a way to get to it, a way how, a way to get to that, that ultimate love, which is the love of the Creator. We cannot take a UFO to go to it. We cannot drive a car to it, a rocket propulsion to it. And, in a way, the teaching of past few months, couple of years about the Soul, is the transportation a way for you to transport, to reach, to get to that point, to mature from dimension (D) of physicality, dimension of the Soul, and fall in love with the Soul. Souls still interact, they find maturity. But, the ultimate goal is to reach the Soul of the Creator. To that level of purity.

So, I cannot build you a Gans reactor, (:22) I cannot show you a lift and motion, and I cannot bring you a massive UFO, this is the one way traffic. This UFO goes to the Creator. He has no form, for us to go to see. And now you understand, what is the purpose of the teaching. We start teaching you slowly, slowly, in Gans's, in confidence in Souls.

In 25th of November, in seeing the light, that I can become light, I have that energy, I am very much like that Gans, hidden within me, power, that only has, can manifest itself in a dimension, time and position, but in essence as an energy, has direct connection to the Soul of the Creator, to essence of the creation of the Universe (U). Now, maybe, some of you, in the time to come, to understand why we introduce the teaching about the Soul. In a way, it's not for you to see the light in your hand. It's not for you to transmute, to go from A to B to Mars, blah, blah. It's in a way, if you can reach that point, gain confidence, understand the work of the Universe, this is your ticket to your Creator. But, you have to buy the right ticket, and you have to get on the right track, on the right length, on the right strength of the field, to reach. That is what we call, the ultimate goal of all the teaching. (:24)

And as I said before, the ultimate book is the magnetic field. We always said, we write nine books. The book about the magnetic field is about the light in your hand. It's about the light, it's about the way, the highway, the motorway, whatever you want to call it, the path to the Creator. It's not that where the Creator came from. It's for you how to get to the Creator. And you cannot just go and say, I did. Maybe a child at the point of birth dies. Soul is so pure that reaches the Soul of the Creator dimension of the strength. And maybe a man, as a priest, praying all his life, by his behavior, become furthered from the point of his birth, backwards, than forward toward the Creator. As we've seen with (Pope) John Paul (II). In a way, going further than being closer.

Now we understand, what is the purpose of these teachings. You want to go instantaneously from Washington to, God knows, New York, from Beijing to this and that, to go to planet Mars and Moon and another Galaxy. This is still, this is still fallacy of behavior of the man, in not understanding the Totality, the truth about the teachings. We hide it, and step by step, take it further. We hide it in the teachings in different ways. But the essence of the totality of the teaching, now that you have become matured, is not just that light in the hand. (:26) If you can make that plasma, and if you can understand within it, has the essence connection to the Creator. I wonder if you still want to see, if I can see the light, if I can make a orange out of it, if I can do something else with it, or look in it, through the Soul of the Man (STM), through the eye of the

man, with the STM, and within the palm of your hand, reach the strength, understand the complexity of the situation, and reach the Creator. Find a path about the Creation.

Those of you who are so physical, you still look for the light. Those of you who understood the maturity of the teaching, you'll find a way to your Creator. And all this needs you to gain confidence. All this needs you to understand the Totality. All this needs you to comprehend what everything is. You're like impatient children, standing next to mom, mom promising you a cake, and then just wanting the cake. Doesn't matter. But what does the mom do? Brings the flour, brings the milk, and the water, and the sugar and the ingredients and start mixing step by the time. First, butter with the flour and then adding the milk and then kneading it. And this is what I've done with you from the beginning of the teaching. We brought in bits of cooking.

The principle, the whole interest was to go in a UFO and fly, (:28) and be able not to use fuel. So we produced a flight system, as you saw, and has now become the practice of the Iranian Defense technology. The gases we used, but hidden inside the gases, we used to release the energy of the plasma, in dimension strength of the gravitational magnetic field of the Earth. Then we introduced you, we brought another piece on the table, while you're watching for your "cake" to be ready, with the Nano technology. And then we brought, that what we call, what binds everything together, like the milk, that it can now become a dough, in Gans technology. And now, you smell, you have the odor of, "Mmm, the cake is getting ready." and we call it, the STM. But, the essence, the final part, is to put it in the oven, to test it, give it the right temperature and wait for it, that you see it going through its transition and become the cake, which is the reaching the Soul of the Creator, understanding the process of the Creation. And as the English say, "The proof of the pudding, or the proof of the cake is in eating it, to see how delicious it is." Or, by mistake, mom put salt instead of sugar in the cake.

This is the stage where, even through the dimension of the STM, in seeing the light in your hand, you come to understand, if you still feel the taste, or the sweetness of the cake. Hunger to reach a physicality confirmation, (:30) or maturity to find between your hand, in the dimension of the path to the Creator.

Go back to the teachings, years ago. When I explained, if you want gold, you create gold between the hand, and if you were an orange, you create an orange. But this is just because you are physical. But as every plasma which is created has an essence line of connection to Creator, those of you who are matured, with the thought in that light, I find the love to the Creator. The ultimate goal, the ultimate function.

And many of you on the 24th will fail, because, the STM, cannot see the maturity of the essence of the man, to see the Creator. Some of you on 24th and the training which comes after it, how to become a driver, how to push the levitation, will come to see the light, and you fall in love, with the love of the Creator, the beauty which is in the hand. You don't look for the light, you don't look for the orange and banana and the gold. And then you understand, the whole purpose of teaching.

When we go through these trial and ?? tribulations of teaching you about the light, our goal is not for you to see the light. Our goal is to set the scenery for you to understand, and if, if you're pure enough, you will see in the palm of your hand, in the essence of the emotion, you'll feel the love of the Creator. And then, my teaching is over. (:32) I came to take you home. And you're like a flock of sheep's. Seeing which one I can get through the gate to bring home, and which one of you is still running around, in the mountain, hill, keeping busy, with eating what you're not supposed to eat. At the end, all the sheep's will go in. And the end, as Knowledge Seekers (KS), and the humanity, you'll find the path.

So, when we talk about the light in the hand, when you see it, I wonder you're still looking for the light, or you look for the path to the Creator. And then, if you mature enough, you bring that light, to become part of your Soul in the dimension of the physicality (P) and light. Then you have reached eternal life. Because, then the STM, is in love with the Soul of the Creator, and the dimension of physicality, is the intention of the emotion.

Then, I hope, much sooner than later, you as Knowledge Seekers, one by one, step by step, will come to see the light. You become part of the light. And as I said many years ago, when the candle was put in front of me, to look into it, look at the light, I said, "I am the light." (:34) Maturity of understanding does not come by the age, maturity of understanding comes by the purity of understanding the process of the Creation.

So on the 24th, you decide how you come in, and then you decide what you have achieved. You see you still love the mother, you see you still love the lover, or you see if you've fallen in love with the ultimate Creator of love Himself. And then we carry on, we keep on going till more and more of you reaches that point, till you feel the fields of the Creation. Then you feel the emotion of the Creation, and then your process of the journey just starts. Because when you fall in love and become part of the lover, the next process of generation, the creation of the Unicose become part of the existence. Then you understand the back pages of the Book number 3. And the whole process starts again. Till one day, in billions of years, you become part of the life structure of another creature. And in that process, you'll fall in love. And then you try to see, if this time, I can find my way to the Creator, to myself, as I am the Creator of me, and me is the Creator of it.

Now, let's see how many of you, on the 20th of November, (:36) will come to that point, to see the light, or to become the light, to enjoy that I can create a life, or to enjoy that I can create the light. To find a path to the process of the Creation, and become part of it, to become essential part of it. Then, as I said, we have come, or we become, to the final point of teaching. But this process will take years and years, as the man is not happy with it. The man is still in the doldrums of the physicality and the rest.

In the following teachings, the following sessions, I will show you how to become part of the light, once you've seen the light. Because those of you who understand and become part of the life, you will not hear the teachings anymore by voice. You'll feel the teachings through the Soul. Through understanding of Totality. And in a way, it's like listening, but in a way, without any ears. Feeling the emotion of the love of the Creator, and then it touches the STM. And then, we'll go into the dimension of the truth about the life, about the Creation, and how Creation has been. (:38)

Many of you, to start a process of understanding this. Many of you will feel the power, the energy, of the, what we call, the fields of the Creation within you, by yourself. And, we set the scene for you to become knowledgeable about yourself. And, the most important part will come, when by the dimension of the light in your hand, you can decide the position, the time and the place where you want to be. What you want to have, and in what form you transmute. If you understand the working between the STM, and the light in the palm of the man, you will dictate the position, the direction of the existence. I want to be in London, and hold my lover. In your hand, when you create that emotion, you will be. Does not matter where you've been, in London and in that position and dimension. This is how you will never land on the lap of the guy next to him, or in between the concrete, where he's leaning against. You'll land within his Soul, you'll land within dimension of his understanding, and you manifest yourself in the dimension of physicality of his presence.

Now you understand where the teaching is about to go. As I always said, (:40) when we achieved the first lift in 2008, in collaboration with the Iranian scientists, the question came, "What next?" We've flown, but we

arrived, but... The "but" was, years of teaching to find a way to produce food, you use it for agriculture to prove it, medicine to prove it and the rest. But the ultimate goal was to create a complete physical flight system.

Now with this, is how to create a full system, for you to become the traveler of the Universe, through the dimension of the fields of the Universe and your Soul. How to travel? How to use the light between your hand ?? that to the end of the Unicose. Now you understand where the teaching is about to go. And step by step, as we get to one, we show you the next step. That you don't become too hungry and too eager to run up the steps which you have no knowledge of, or fall.

In so many ways, the 24th of November teaching, is the beginning of the next cycle of the teachings of the Keshe Foundation. How to travel from the beginning to the end. From the Creator to the last dimension of the expansion of his Soul within the Unicose, and within the dimension of the Creation of the Creators. (:42) You have to understand what I always said. And maybe you'll understand deeper. If you decide on which field strength you travel through. If within the Soul, within the light, you fall with the dimension of the love of the Creator of your cycle of life, then later on you'll have to find the path to the Creator of the Unicose.

And then, I always said, what is after, if He has existence, what is, that confirms His existence? His own, or to the others? There is no end in the cycle of Creation. The end comes with the limitation of the man of understanding of Totality of the process of the Creation.

In so many ways, as we always said, the love of a man and a woman, manifests itself as a child. That child has to be born in the space, which is available for it to manifest itself, otherwise cannot. Be it the womb of the mother, or be it manifestation of physicality in the atmosphere of the Earth. It's the same with the Creator and the Creation. There is no purpose to be alone, but it has to confirm our own existence. (:44) And would this be applying to the Creator and the Creator of the Creators? Which is another dimension of understanding.

How can I love? How can I confirm I'm here, if there is no one for me to confirm myself to? And how can I say I can love, when there is no one for me to fall in love with, to confirm my existence, that I can. I have the beauty of falling in love? Then, if you understand this, goes back to the philosophy of "Adam and Eve." The Creator, to create, to confirm His power and His existence, and His dominion. Without Him creating one, He has no way to show. If you have not become a father, how do you know the love of the father? To love, to share, to understand. And you become that guy who writes a book about how to love your child, when he had no child himself.

It's the same, the same process. No changes. The process of light in the hand of the man, is not the light, but essence of understanding the path through the whole process of the Creation. From the Creator, to its Creator, and to the man who was created from interaction of His fields.

So, in the upcoming teachings, in the upcoming tests we'll do, (:46) we'll try to show how you release energies, how you absorb energies. We set the energy's in the background, that your body reacts to. And then, it brings to the point that, you understand the Totality. That you understand the confirmation of your own existence, your own connection with your own Creator. And then, it's for you to understand to what limit, to what extent, you will understand the process of your own creation. And how this creation will lead to the creation of the others. And is that "others," will be a child, or a structure in the process of the creation,

or another life in another dimension. Depending on the maturity and openness of your intention in processing, in understanding, why you created that light in your hand.

We are not making magicians out of you. We are making you to understand the process of the Creation. And to what extent you can, you will, or you become part of that process of the Creation. The rest is your job. (:48) The rest is depending on the maturity of your creation and your Soul. The rest is to be written in the books of the Creation and the Creator. In how you went from the matter state by creating the right environment, creation of the Nano and the Gans. Now it's the same process, where the Gans was the source of the energies, that you can make whatever you like from it. Use the Gans of the Copper to create gold, to create iron, or to create magnesium.

Now, with the process of the light, is how the Gans of the body of the man can create that energy, that can become anything in the dimension of the Creation, and not just a banana, the copper, the gold, and the rest. If you understand the power of what is to come, what the teachings is about to go, you'll understand, man enters into a new dimension of the knowledge that he has never known. We open to you the knowledge of the Creation, the door to the Heaven of the Creation. And once you see that, the way you could change the energy of the Gans of the Copper to gold, you change, you find your way through that light, through that Gans of the man, and the energy within it, to every creation and the Creator in the Universe. (:50)

The light in the hand, in the palm of your hand, is not just for a game. It's the key for man to enter a new dimension of knowledge, a new dimension of understanding, a new dimension, that another world of the Creation, shall open to man. How man will use the emotion of the Soul, how man will use the emotion of his physicality, to sail through this, to the next dimension, all depends on the maturity of the Soul, and servitude of the man, to his Creator. And how, to what extent, all of you reach the dimension of the Soul of every Prophet which has come in the past. The maturity of man to see the light. In a way, the light in the palm of the hand is the fire that Moses saw. But, what stones shall you steal? And what stones shall you reveal to your own Soul, and the STP? This time, you're not stealing it from the tribe of where you came from, but you steal from your own Soul and the STP.

Now you understand where and how so smoothly, so refined I have brought you to the position to find the path to your Creator. The light in the palm of your hand, (:52) it's not just a light. It's the opening to another dimension of the Creation. And those of you who will go through that, you will see my Soul in another dimension, and understanding, which is not open to the man. The knowledge you gain is beyond imagination of the man, and beyond the understanding of the present time. And you enter the gates of the true knowledge of Creation.

As I said, our thinking is the thinking of the Creator. Our knowledge is the knowledge of Creator. And in that process, you have to mature to see, to become detached from the dimension of physicality. Even you use the dimension of physicality to sustain and confirm the existence of the STM that exists in every dimension. To what extent, you as Knowledge Seekers, will go further? It all depends on the maturity of your own understanding. And in this process, there shall be no greed, no privileges, and no one is above the other. There is no kingship, but it's the totality of the existence in all dimensions of the life, as we call it, in arrangement, in energy transfer of the fields of the Universe.

Maybe one day, in a very simple way, (:54) through understanding of the life, you'll come to understand more. Where an artist uses the mixture of the paint colors to create a new color, then you understand through different colors of the strength of the Soul, in interacting with each other, you create new Souls, of the new

dimension, the way the painter mixes the paints and creates new colors. This time it's the light of the STM, will lead to that position, and due to the different strength, lead to creation of new plasmas, in the strength of the Creation, leading to the creation of new life.

Now you understand, why we have chosen this path to teach. That one day you become that painter, and how different lights and strengths of the STM, in interaction with each other, will lead to creation of new life. Will shine in the Kingdom of the Creator. Now you understand how we made gold out of copper. When in fact, from the same Soul, in different strengths of itself, we create a new dimension of life in the dimension of the Creator.

If you understood this, and if you are clear about what you understand, now you understand the new dimension which shall open up with the teaching, with understanding of the creation of light. That light, (:56) that feeling, that emotion of the plasma within palm of the hand, of the man, as we said, every plasma, every Soul, has a lower common denominator which takes you to the Creator. Now you have that opportunity. That ball in the hand is that UFO you've been looking for, but this time transmutes your Soul to all dimensions of the life. From Creator to the created, in every dimension of the Creation. Now you understand why we are the light. And in that way, we shine, and with it, you shine with us.

This is the purpose of the teaching. Opening a new chapter in the knowledge of man. Opening a new chapter in understanding of the Creation. Opening a new chapter for man who was looking for a UFO to go to Creator, now you find out within him, he has access to it. But if you understands how to move from Gans production, what we call, UFOs, to understanding of the transmutation of the fields of the Creation.

One day, you Knowledge Seekers will understand who you've been listening to, and who's been the teacher. One day you understand the frock of physicality is no meeting, and in that we can change anytime. As we change the color, we change the interaction of the two colors of the Soul, but essence is the same Soul, (:58) and then manifest in the name of the Christ, the Moses, Muhammad and the rest. Depends which light we shine, and which light we mix.

Then you understand. The whole essence of the Creation has been for man to reach the point of maturity of today, in what he sees as light within his hand. As that light is, as you said, and is in writing, is the "gate to the heaven." And heaven is understanding oneself and the path of that man to his Creator. That Soul to his Creator. Does not matter if you're a man, a cat or dog, or existence of life in the Creation, and in the cycle of the Creator.

I hope you Knowledge Seekers listen to this teaching as many times as you can. And every time, you'll come to understand what was said. We (have) finished with the past, and we open a new door for man to enter. In a way, the dimension of physicality is closed. And the dimension of the Creator has opened up. We are still teaching both languages, as I always said, it's a little village and one teacher. And the boy who comes in the first class sits in the front row, and the boy who studies for the 12th class sits in the back. And the teacher teaches both. One to go to university, one learns the first alphabet of life, in the same classroom. (1:00) But this time this classroom is the village of Earth, and it's 9 billion inhabitants and its creatures, and the rest of the Creation, in the world of the Creator.

Maybe, for the first time you understand, the voice of the man, in essence, is the light of the Creator. It's for you to understand what this light enlightens within you by the knowledge of the Creation. Try to understand what the light means. It's for man to enter a new dimension of knowledge. If you're looking for a light, you

want to show you're a magician, you're quite welcome. If you're here to show you can create materials, and fold in your hand, you're quite welcome. And if you understand that light is the gate to the line of the understanding of the process of the Creation, in the cycle of Creator, then, a new cycle of knowledge starts.

In a way, man is mature to go through that point. And now is the time. And, we do not need place, time and position. But we reach through the STM. There are no satellites and there are no computers, anywhere in the Universe, except in the life and life of the man, who has created this dimension for himself. Thank you very much for today's, and I hope you understood, how today we have changed the cycle of the man, (1:02) if man understands the truth about the teaching of today. We go through a break and we come back and try to answer any questions. Rick, if you can take us through a break, please.

>> **BREAK** >> 512 KSW November 16, 2023 (1:08).

K- As usual. If there are any questions, we try to answer and we'll see where we go.

Q: ... Can you tell more about what happened in the ambassadorial conference?

K- No. You should have come. You didn't come, you don't need to know.

R: It's on a "need to know" basis ..

K- If you're so eager you would have been there, huh. We had a very interesting situation that was ??, which came out on Monday, that one of the participants, very disgracefully, recorded the whole session on a mobile phone in the background. And they sent it, and it was put on the Internet, and it was immediately withdrawn. We don't know what's the background, how many people did it. But this shows the difference between Knowledge Seekers and people who were put in to spy on the Foundation. And it's a disgrace in what they did. And it's shameful in what happened. But Knowledge Seekers principally kept to the Ethos there.

You've got to understand, American administration as before, bent backwards to stop this conference. Threat, cajoling and everything else, they stopped, tried to stop. But now, a few days away from the conference,

(1:10) and with a limited number of high commissions and people from the embassies turned up, we achieved more than ever we thought, and actually given us a huge strength. Because the people who attended, now they have set up an organization with all the embassies ambassadors directly themselves. Bypassing all the American pressure, which in a way, it's amazing how

... the ?? American thinking ?? Biden tried to find out ?? how the things is.

<< This part was cut on Youtube, but it was on the live broadcast on Zoom, as far as I can remember, and it was on the automatic translation: ... it's taken shape. We don't go into it, because the Americans and those are listening, thinking, finding, trying to find out how ... >> ??.

But the outcome of it, because immediately, the day after, two days after conference, they got in touch with us, and now a massive process has started. It's literally... It becomes so huge, that it replaces an empire. If I explain to a Knowledge Seeker.

And, in so many ways, what is become a snowball from that meeting. It's amazing. Very shortly, in the next few days, I'm returning to London, we're meeting with the world leaders and ambassadors in a very private session, because of the meeting. And in that meeting, a new strategy will be set up, in what we discuss with them, in what we call, the ?? world diplomats. And to come

... << This part was cut on Youtube, but it was on the live broadcast on Zoom, as far as I can remember, and it was on the automatic translation: ... in a way we touch the Soul, and in a way, we'll see what to come >>.

Because this position created, and most probably in the next week, ten days, I'll be back in London for a couple of days meeting with them. In a way, informal meeting, with the formal meeting of the conference. (1:12) This is what we always looked for. What we gained, not just something in there and go.

Those who've been present, they got together themselves, and they have set up a much, much larger scale, about 18 nations, I'll be returning to address in the next few days. From the, what we call, the "spin-off" of the meeting of the conference. So, it has brought what we wanted, and with it, it brings

... << This part was cut on Youtube, but it was on the live broadcast on Zoom, as far as I can remember, and it was on the automatic translation: ... a lot more. But in due course you'll understand, and

We'll try to explain, because now we enter diplomacy, politics and a lot of other things. In a way, we'll see how it'll take shape. And prior to my return back to Beijing, next two, three weeks, we will conclude this, because we have to bring it all together as a package, for our work in China.

It was very nice, very few would dare to come. And we saw, especially those who tried to defy it, presented themselves, they were there, sat in the back, didn't come to the front. And it was very nice. We achieved more than actually what we would like to achieve on the floor, we achieved outside, but those who came on the floor.

As I said, in the next few days I'll be returning to London, for a meeting with the world ambassadors in private, but a very large number of them. And it's organized by them, because when we try to do it from outside, it's all the pressures, when they organize it themselves from inside it's a different story. (1:14) And I

thank, especially Kawoos (?? Kay), who relentlessly stood and sorted everything out for us to be done, for achieving such a beautiful success, such a beautiful outcome. The success is for humanity, not for us.

Any other question?

Q: ... Mr. Keshe, can you expand on the importance of bringing the "light of the Soul" out between the hands. The hands representing the two hemispheres of the brain. I expand the light out to enclose the body.

K- Not really. It's for you... I'll explain it to you in a very simple way, you understand this as Knowledge Seekers. We bring the two different Gans's on the wall of the house. We put CO₂ on one side and we put CH₃ on the other side. And the difference in the strength brings a flow of the fields. It's the same with the brain of the man. The two hemispheres are not the same. And the energy received and given is very much different. And we have never learned to use this. And now we use this difference to create, in conjunction with the Inertia of the STM, the light within the palm of the hand. (1:16)

If you look the way I have done from very young age, maybe 8 or 9, to the scans, MRIs and x-rays of the brain of the man. Something very interesting comes up, very, very interesting. But you have to pay attention to the details of the brain. When you look at a brain, you just see the brain. When I look at the x-ray or MRI of the brain, I don't look at what doctors look. I look at the shape of the brain. The distribution of the mass on the left and on the right side. On a gap between the outer layer of the brain, the tissue and the skull. I look at how the left side in comparison to the right side sits. How the distribution of the mass dictates the distribution of the energy.

When you look at the scan of the brain, you look at the layers and you see how the left side's composition is compared to the right side. (1:18) And how the totality of the fields is. You'll find out, strange enough, usually, majority of the time. The one who are right-handed and left-handed, have a different composition of the mass distribution. The ones who use both left and right hand, have a different mass composition. The one who are totally right-handed, have a different mass composition. And the one who are totally left-handed have totally different mass composition. And you see this mass composition is like you lot, make Gans's and you put two-third of one and one-third of the other and you dictate the field strength. It's the same way.

It's very interesting when you look at the fully left-handed, and fully right-handed people, and the construction of the brain. You will see different nationality have different brain composition and construction. The structure of the Chinese is different than the Europeans. (1:20) The structure of the left-handed Chinese is different than the right-handed, left-handed European. And all these creates a flow. All of this creates a specific emotion. And then this creates different fields transfer from the left to the right.

Let me explain to you for you to understand fully. If you are right-handed totally, you write with the right hand, you shake with the right hand, you give everything with the right hand. If you're left-handed fully, you write with the left hand, you cut with the left hand, you do everything with left hand. But when it comes to shaking hand, you shake with the right. Have you ever seen a left-handed man shaking with left hand to the left hand of the right-hand man? Then you understand how fields position, how priority and energy transfer works.

Those who are left-handed and do some work with the right hand, have the most balanced brain structure. Creating light for this group is hugely difficult. They are very stable. Because in their brain everything has a position. The most awkward one is the ones who are left-handed, totally, but shake hand with the right hand.

These people, when they want to create light in their hand, (1:22) have to approach it totally different way than if you are right-handed and you do everything with the right hand, which is majority.

This is where all the mistakes comes, in production, in of the energy and the behavior of the man. In that process, you see a different brain structure, you see different field flow. And some of you will achieve to create light, because the difference is so huge that you have used to circulation. But when you put your Soul, when you put not the vision, but the Soul to interact with the field in the palm of the hand, you see the light in your Soul. You do not see the light with a vision. You can even close your eyes, people around you will see the light in the hand.

You need a difference of the flow, friction and absorption. And it's dynamic, you'll see it as a ball. But the energy you produced, which become that light, which with the interaction of your Soul, has a connection, dimension, common denominator with the Soul of the Creator. Some of you, you might see the heaven, while you're looking for that light. Because you realign all the energy. You don't need to see the light.

So, the energy difference between the two parts of the brain, transferring from one to another, in conjunction with the Soul of the emotion of the man can bring you enlightenment, not the light. (1:24) And that enlightenment is what we are looking for, not the light in the palm of the hand that you become magician and you can throw lights away and create gold and diamond. In the dimension of physicality, that's what we are looking for. But those of you who mature, this is what we are looking for. You're looking for a light. We are looking for the enlightenment. And we shall see in the process of teaching, in time to come, how many of you are still looking for a light, and how many of you will be enlightened. And how many of you will fake both. But that's the nature of the man.

Any other question?

Q: ... According to Mr. Keshe, will the dissemination of plasma technology be able to stop the genetic engineering from modifying human DNA. Apparently, they have demonstrated that DNA can already be modified in the human embryo. What consequences can this have?

K- This has already been done, and this is... (1:26) I mean in China, you can choose the color of the eye of your child. In China you can, or in the processes, they can do a lot of things. You can genetically modify everything you like. So, we are not waiting for anything else.

And we... It's part of the knowledge of the man. Man has to understand. And man has to comprehend every part of it. But slowly, slowly we get there. And we need the knowledge of both. The physical life, how they mutate, how they change. How we bring in, in some places we've used this DNA mutation, or what they can interfere with, but now it's a common ground.

There is a hospital, actually not one, a few hospitals, in one of the major countries in the world, where the minimum entry to the hospital is 1 million dollars. Hospital will not accept you. That's just to enter the hospital. (1:28) In these hospitals, they do a lot of stem cells, gene modification, because the prince "so and so," wants to have a blue eye, blah, blah, blah. And in a way, the Elites have become the "guinea pigs" of science. And ... we will see a lot of things, they do a lot of things for these rich people, to find a way to get rid of the...

Especially, especially comes out of the pocket of the Saudis and the Middle Eastern's, where we see repetition of the diseases. We see a lot of Jewish, we see with this. It's not so common in Christians and the other side. But the Arabs and the Jews are spending huge amount of money in these clinics, in these countries, to modify their genes, the DNA. Because, these are over centuries, cousin has married cousins, and cousins has married cousins, So, they have built up a genetic defects in them. In the Jewish religion, is the only way where the uncle can marry a niece. I mean, you can marry your uncle, and it happens quite a lot. And in a way, if you look at it, you carry your default of your grandfather exactly directly into the child you bring. This is why we see so many demented people in Jewish, like, in Jewish leadership. They come that way. And now, some of these are horrendous, creates horrendous conditions, they couldn't do anything, now they're spending millions and millions, in these special clinics with the stem cells, and all of them, 90% of them with failure. (1:30) To change the DNA in the inheritance, because, you have to understand, forever cousins, marries cousins and bloods gets no... and creates a lot of what you call, disorders.

Yes, they manipulate, they're working very hard. And if you have a million dollar to go in to start with, you can go and become, what you call it, the guinea pig for testing of the new mutations of DNA tampering. In the future when the knowledge of the plasma will come in and we understand more, is as I said, new sciences will appear, new conditions will appear, that we can overcome these things through RNA, that we modify, which is the correct way, the DNA. Not tampering with DNA direct. But that's time to come. In the structure coming up, we will look into this. And the new technologies will be introduced. We just got to have to wait a few more months.

Q: ... On one occasion you said that when a person commits a crime, it may happen that a descendant of that person suffers the consequences of their ancestor's act. I would like to understand why the descendant has to pay for the actions of his ancestor. (1:32) Is that related to the RNA and DNA?

K- What do you mean? What do you mean? Can you read that again?

R: You mentioned on one occasion that when a person commits a crime, it may happen that the descendant of that person suffers the consequences of their ancestor's act. I would like to understand why the descendant has to pay for the actions of their ancestor?

K- It's a long term. It's a balancing. In a way, who is the witness and which Soul takes? We see for example, this is a real example, it's not something theoretical. We see a daughter-in-law causes the death of the mother-in-law through hate, which is very normal in India and that part of the world. In many, many cases like this, not just one. The daughter-in-law, because of the whatever reason, causes, usually drop the mother-in-law in a what they call oven, the tandoor, because they cook on the floor, for to make the bread or whatever, And mother-in-law dies because of the fire. Later on, not much longer later on, we see the child of the daughter-in-law, (1:34) which is a grandson, or granddaughter of the grandmother, dies by the fire. And they say, the way he came, the way he goes. And at the same time, we see the daughter-in-law goes through a lot of things with burning and the rest.

I had to face this and explain this. And we've seen in other cases where people close their ears for somebody gets hurt, because there is a benefit into them, or for them. And we say, what's the purpose of the grandson to die for the daughter-in-law to be punished, as we call it. But we understand the balancing. We understand where you create the pain, has to balance out the pain.

But is this the way the Creation is done? Will the offspring pay the crime of the forefathers? In essence, that balance does not have time and position. In essence, where the field sits, the time and position is dictated. So what we see, what you say, in generation to come, for us, it is years and decades, whatever. For them is the, what you call, one second. It's just you move a magnet, the magnet moves. But then the others have to accommodate for that movement. So, how fast that movement comes, (1:36) for us might be a century, next generation and in a way the Soul balance because you created that condition, so everything else is.

The beauty with us, creation with human or whatever, is that we have a dynamic Soul. Our Soul is not sitting there as a Soul. Every event in the cycle of our life, emotion of physicality, reflects in it that it transfers to the bigger screen and then it comes back to us. This is something Knowledge Seekers have not understood. Mankind have not understood. And when you understand this, you live by the Ethos of Mitra. You don't even think wrong, that you might talk wrong, that you might do wrong, that it creates wrong something else. And then the Soul has to adjust for it.

How the dimension of the physicality touches the Soul. And then, the, what I call, the balance comes from the interaction of the Souls. Once we understand this, then we'll see what it means when you do something and then it goes to the dimension of the next generation to pay for it and whatever. Or you say, "This happened to me because my grandfather, you hear a story of my great-grandfather, did something, now I'm paying for it."

In a way, our physical dimension creates that wave, that it comes back to us, to stand the, what I call, the "tsunami." Put magnets on the table, which Rick does quite a lot of them, (1:38) and just move one magnet and see how the others move. But, don't look at... you're moving the magnet, look at the hand which moved that magnet. That magnet is your Soul. And the hand and physicality of intention to move, is your dimension of the physicality. Then you understand. How long will it take for everything to balance?

Any other question?

Q: ... Regarding the event on the transmutation of light. Will there be translations on that date?

K- As usual, yes. Depends if your the translators turn up. Yes.

K ... We had a number of Germans in the last week meeting. And in the, what do you call it, in the (London) conference. As we go now to China for the third session of the conference, we'll have, we open the door to a large number of Chinese. Chinese can attend the conference in China. We are trying and sort it out for February. We will bring in translators. (1:40) And now I realized in the week teaching in London, we have Germans who understand half of the teaching. But we try to remedy this in the, what you call, Chinese conference. The Chinese conference we'll try to increase it to about 1,000 to 3,000 people. All Chinese, majority of Chinese who want to come, we'll expand this. It's all how we negotiate with the Chinese government. That Chinese could not come out to other conferences and the rest. This time we go to China, Chinese and all, and travel within their country. So, the number of Chinese in the conference will increase. Once we get the okay from our negotiation with the government, that we can run a conference, we try to accommodate at least 2 to 3,000. And the translation will be simultaneous. The outside China delegation will be very, very nominal compared to what it is. But we still try to create a position of translation that you benefit by all of it.

And we need to do so. And with most of the teaching, most of the, what we call, the sessions we have on Fridays, like this light one, we have tried, we brought translators for, for them, what you call, Knowledge Seekers, what you call it, always are there to translate. We have to understand the essence of it, even though some of our translators, we call it A, they call it B, A, A, whatever, and totally change the translation themselves to what they think it is. And when we talk to the people, say, "This is not what was translated." (1:42) And so, yes, we try to bring translators in, and as usual, the translation is done in the beginning of the session, and we go through the whole session without any translation. We don't interfere, especially in the past few sessions, we just explain what's going to happen, and we go to two, three hour sessions of no talking, there is no need to talk, because we control everything in the background.

In the light session, there'll be a small translation in the beginning, but everything will be handled by us in the background, to create transfer of energy, and if you can benefit by it, to actually create that, what we call, enlightenment. Some of you will look for the light, so you'll say, "Oh, I want to make this." But principally, our work is to enlighten, for you to learn how to use the fields for transmutation.

Any other question?

Q: ... Could China initiate a peace magna carta, a universal declaration of peace? Yesterday's SUA's President and China's President meet in Los Angeles. Did they talk about peace in the Middle East and Ukraine? Are they interested in peace or to sell the military weapons? Thanks, how can we change it from our Soul positions and also in a diplomatic way?

K- Has any of us been in that meeting? Do we know what they are talking about? (1:44) You got to realize China will become independent and can dictate its terms, when China can self-sufficiently feed its nation. As long as Chinese import 40% of the grain, and 70% of the cooking oil, does not matter how mighty military they become. The guy who holds the string to the food will dictate Chinese outside policy.

And this is part of the Keshe Foundation work, to spread the technology to all the nations, that this control of the man's peace activity, controlled by the villains of the nations through arms, can be stopped. A lot of nations don't want to spend on arms. But they buy arms because it's a string attached to national food security. When you talk to many, many, many, many military officers, they always say so. I was privileged, or I was present, in a very recent, very recently, in a military discussion. (1:46) Where the Chief of Staff, chief officers of a nation, Air Force, were saying, by law, by international law, our pilots have to have so many hours of flying just to be certified to fly these jet lines, these fighter planes. But we don't have the fuel. If we get them one hour in the air, it's the maximum we can afford. Because we don't have the fuels. And the Americans are pushing us to buy more planes, which we cannot even train our officers. You don't have the fuel even to fly the thing for one hour a year. But they attach this purchase of arms to the food. How much grain they'll receive.

So at a moment, a lot of "gun policy" is attached to the food national security. All these guns and arms sold by Europeans and Americans are connected to aids. How much aid you receive is how much of... In a way it's become colonization through arms. And China is not immune to this. Europeans are not immune to this. Forget about African nations, South American nations and the rest. We sell you 3 billion of arms, we give you 1 billion of food that your nationals don't riot on the street, that you use the same arms to stop them.

This is where the problem sits. (1:48) This is why we talk about national food policy, security through the new technology. Then it does not need to be grain. It has to be ingrained in our leaders that we do not need

grain to feed our nation. I don't go into depth into this, because in a coming up future, you'll understand why. As I said, I'm sure one of the Knowledge Seekers who knows who they are, are listening, they can tell you, that the fear of powerful nations of the world, according to what they convey to us, or our people around us is, Keshe is becoming a nation, and it's becoming a powerful structure. That's why many nations don't like to work with him. But, it's come to the point, you don't work. It's tastes like, you don't work with Keshe Foundation technology and try to "duck and dive" it. Soon later, somebody (else) ducks and dives you.

And, as they said to our Knowledge Seekers, he's becoming a force. And governments don't like to work with him, because he's setting up his own nation. You Knowledge Seekers have not realized what is coming to motion, and what is to come. We don't ask for any, what you call, finances, pay us millions, or whatever. You provide millions. We work with you for your nation. (1:50) And this is where we win. This is where the knowledge is winning over diplomacy and politics.

China has no way to escape this. At the end of the day, the, what we call, the string attached to national food security dictates in the background how much you can talk. And when we come to the point that only, only, national food, national security can be taken out the equation, the disarmament will come. And this is how the West is selling arms. This is how nations stay food secure. Because you buy arms, you don't agree with the world peace, then we give you food.

I explained this very, very recently. We have the same situation in Iran. You see hundreds of thousands of people on the street, riots, you know, shouting, "Death to America" and the rest. You don't see what's in the background. It's connected to the food they put on the table, to their family and their children. Through the mosques, they issue the paper, they go into all these hundreds of thousands shouting. (1:52) At the end they get endorsed that they've been to their, what we call it, demonstration. And they go back to the mosque and they get the food for the family. This is how it works.

It's the same in the larger scale with the governments. 99% of the, what we call, demonstrations has a string attached who pays it at the beginning. We had this with the Greenpeace. If you remember Greenpeace movement, why do we hear from them that much anymore? Why Greenpeace has become so silent, (but) in the 1970s and 80s it was a force? Because the Greenpeace was financed 95%, 99% by the Russians to create problems in the West. We saw the end of Greenpeace, and we don't see them the way they used to be in seventies and eighties, because in nineties when the East opened up, there is nobody to finance them. And Russia is not much interested, present Russia, to do that.

It's the same way with national governments and peace. When you talk about creating peace, you have to first create national food security. The peace will come, because I've sat in many, many meetings with generals, with colonels, with all sorts of military-ranked people over years. And unknown to public, military expenditure of a nation is connected to how much arms they buy and how much food they receive. But a few points of these are coming to an end. Americans are running into a problem with this, (1:54) because the lands which was used to create all the GMOs and the American rice policy and food policy, is now drying up in Texas. The underground reserves have finished and the desert is going back to desert. And we'll see this food policy of Americans, is coming to a natural end in the next 5 or 10 years. Those huge lands which used for putting 100 harvesters next to each other to harvest and what the harvest was showing the power, was that power of control.

In this meeting in United States by President Xi and the rest of Chinese and the rest of the world, we'll have no bite. If, suddenly tomorrow, American, as they've done with all the nations, put an embargo on food, on

grain. The situation with Ukraine has become solvable, it's finished. Russians have won the game. You will understand in the next few months how Ukrainian leader and the rest soon will go into hiding in criminal offenses, and the rest will come against them. And Russia will take the main farming land, the enclave they were after, back into Russian territory. But under another name of, what you call it, Ukraine. Because now, most of this will go under the control of the Russia. The grain export is sitting on the ports. They sit on the main part of the grain production. This is partially becomes part of national security of food for them. And they will guarantee food to China. (1:56) And this will change the position of American control of food supply.

We see this very clearly. Russians have heavily downloaded most of the grain. Some of the nations like Iran, North Korea, China, have never had such a full reserves of grain, which Ukraine was downloaded to. They are emptying the silos, but at the same time, the farmers, they are under control of, now they've taken territory over, still need to be paid, still produce the grain, it hasn't stopped, and this is becoming part of Russian export. You got to remember, Ukraine was part of USSR. And, they relied on this part we call Ukraine, on their food production. And now they got it back. And this will take a lot of pressure off the Chinese, on relying on grain, to (from) the Americans. It has changed slightly the balance. But, as long as, what you call, Chinese rely on their food security, the Americans will play the game. There is no, very little bite in the bark.

This is why China cannot resolve Taiwan. If they push a little bit, grain transfer will stop. Even though Chinese now operate heavily in Argentina, in Brazil, and the rest, America has a big chunk of the percentage of the grain export to them, and especially oil, and soya. (1:58) And this has to come to be produced inside China. And once Chinese can produce enough grain inside by 2030, then we'll see a change of policy. And Chinese will change their position, because they don't need, they have no fear of food.

Two choices is left for their governments. Go through this grain proposition, which they control America, Americans have control over all of it. Or go through the new technology, feed your people online with apps. The way Keshe Foundation is developing, proposing and delivering. Then no nation has control over national security. When people are hungry, they'll start rioting. When you fill the stomach of the man, he is calm. And, as I always said, "Armies march on the stomach of the soldier." You cannot have an army, when you have a starving soldier.

Very soon, very soon, the more Americans put with food policy against arms, and we can replace that with a different proposition, where you can feed people through Apps, the way you lot, the light in the hand and the others you've been, then they change the policy. Once we secure food against, arms out of the hand of the Western Europe and Americans, we'll see the beginning of the, what we call, world peace. And this is one of the ?? multiple sides, which we are extremely working hard on. Even though we still work ?? with the grains and the rest. (2:00)

You have to understand overall structure, not just bit by bit. And China knows this. And a comprehensive agreement is part of this, world peace. We have to make African nations, we have to make China, Central European Nations, some of them. And what you call, East Asia, through feeding through Apps. You have 8 million people living in Belgium, 9 million. You have 70 odd million people living in UK. There is not enough farming land for a small nation and a big nation to feed. So the grains are controlled. And that grain control dictates the policy through arms. You show your shelves are empty, your people will go on the street. We keep your shelf filled up, you buy arms (from) us. This is how arms are so prevalent, through food policy, national food policy. The only way, which is a solution for most of the nations, from Africa to China

to European, and the leaders will come to understand very soon, to come out of the hold of "arms against foods and controls," is the new technology.

The way a lot of you have tasted the banana and the rest of it. The way we get the Zinc and Copper, we produce gold. We can produce food, and waters, and everything else. Knowledge Seekers have not understood the strength of the technology which is on the table. (2:02) National food policy will separate from the arms, and when you don't need to by arms, you'll spend more of your finances on the nation. We just don't sit here as Keshe Foundation, we understand a lot of things happening in the background. And you have, as an organization like us, understand how to use the technology, but understand it. You can't be "doggy headed" and just bark your way. You have to understand how the water runs under the carpet, as they say.

Any other question?

Q: ... Will there be a session for a follow-up on the post-Coronavirus meeting? You mentioned November 17th for those who attended the first part?

K- We are trying to do that, otherwise you'll go to the last Friday of November. Because we came out of the London conference in a week of it, and there is a lot of things happening in the background, yes. Next week we do the, the lights and then we do the Corona, because at the same time we'll see some of the effect of it. Corona is causing huge, huge problem, even in the recent past we see, governments are reporting huge deaths. A lot of people are dying, more than before. And ... the, it has created a huge problem, out of nowhere. (2:04)

We see, what we call, especially in United States, in American continent, many, many people who had the Corona, or they took the injections, their lungs literally solidifies, they're dying of ?? that, getting a sign on the respiratory, death. A lot of people are having problem in the brain, a lot of... We see a 10-15% increase in death, and these are all Corona bits from the past.

And we are involved in it, we are trying to understand how to change the situation, but I saw an article sent to us, even the insurance companies are panicking, because too many people are dying and insurance policies are maturing, because they have to pay for it, and there was no allocation for this. They were assumed to die in next 30, 40 years. And this indication is coming from the insurance policy holders in the West. The insurance companies have gone into panic attack. Too many people are suddenly dying, but as we don't have Corona, they are going under cover of different diseases.

And we have to find out how even to help this, this, this new disease, this new line of death. But they're all Calcium based, it's very strange. All reports calcification and the rest of it. Brain, lung, kidneys, in testicles and the rest of it.

Any other question? (2:06)

Q: ... Penta and Hexa formation of our DNA is related to star formation, and flower of life, which is crystal symbol. Memory means liquid light and crystal frozen light. So, our DNA stores information in a fluid state of our light, and in a crystal Hexa-Penta formation, which is frozen light. So, when we transmute is at the DNA, in RNA type, so the transformation of solid light to liquid and gas light, just to make a comparison in order to understand.

R: I don't understand her question actually. It's kind of a...

K- Welcome. You're quite welcome to our world, I don't understand it either.

Q: ... Can you briefly explain why inbreeding leads to genetic defects?

K- It doesn't lead to genetic defects. It makes the availability of a broader spectrum of fields less available. It narrows the interaction. (2:08) When we marry on to the other, what you call, bloodlines, or other races or whatever, we expand the spectrum of fields available to our child. When you inbreed, it's very narrow, very, very narrow. And the more you inbreed, the narrower the spectrum of fields are available, because you haven't brought anything new to extend, to expand. And we see specific diseases, specific conditions into this line of inbreeding.

And we had it... even today we have it in the European monarchies. They have inbred so much over centuries to keep them in power, that we have diseases which is exclusive for European royal families. You don't get that much of it outside. Don't look at them, they get on their horses and the carriages and they shake hand and they wave as they are. These lines are so, so, so, so inbred over centuries to keep them in power, that they have diseases of their own. And there is no cure for it, because nobody has done the research when only 20 people have it. Blood disorders, all sorts of mental disorders. Half of the Monarchies in Europe are mentally demented. Just by inbreeding.

When you listen to this news that he's connected to Charles the second, and she is the grandchild of Victoria, and they married blah blah blah, (2:10) this is all the inbreeds. And they carry specific diseases, it's carried specific. Because the spectrum of the fields to come in, is not there. When you see a black, and a Chinese, or a black man and a white woman marry, what a beautiful children they create. Because it's a new energies come into play, and new dimensions. Have you ever seen some of these white, black Americans or the Europeans, and you just can sit and watch the child for hours with the beauty of it. The color of the eye comes from one, and the skin comes from the other. Mixture of the colors, it's just beautiful to see, because now a new spectrum has been opened up, new colors, new combinations.

And the inbred does not allow that, and that inherently narrows the option of the fields. We see a lot of mental disorder in this line of, what you call it. I used to joke with my mom sometimes, says, "Do you know what these Jews banging in their head against the Great Wall?" She said, "Why you keep on saying this?" I said, "You know the banging comes when you're mental, they inbred so much, that there is... they're all mental." They become mental, because the spectrum of the fields narrows down.

In the Islamic world, (2:12) in a lot of Muslim families, we don't see many disabilities, disabled child on the street, because they keep them in the house, comes out of inbred. It's a shame to have. Many, many, many Saudis houses, Arab houses, inside them have mental or disabled children, because it's come from inbreeding. All sorts of problems from blindness and to deformity in genetics and the rest of it.

Any other question?

Q: ... I think that my question is related with different stages, or states of the light as a plasma in movement and the relation also between light and our DNA and RNA. Because I don't understand very well, this is why I am asking you. Our DNA, as far as I understood, has a hexa shape and also a penta shape. I don't know how

it is, I am not a medical doctor and my question was, could be this related with star formation of 5 and 6 elements? (2:14) Like the flower of life or as a pentagon, as a pyramid?

K- When you understand it, come and explain to us. We try to explain it. When you go on, understand it fully, and then explain to us what you want to understand, then we can explain.

Principally, principally, principally, we talked about this a long time ago, I remember, somewhere you might find it. You cannot put all hexagons and create a sphere, when it comes to dimension of the interaction of the fields. Because this is how you become diamond structure. But if you look at, for example, a football, you get a sewn football. They used to sew if you get a leather football. You find out you have so many hexagonal shape. And somewhere to fit in, you have to put a pentagon. In a... in all of... there is impossibility, I haven't seen it, because I always look for it, I haven't seen... haven't sewn footballs, which is all hexagon. It's a structure of the shape of the plasma, and DNA and RNA are part of it, they cannot do different. And create manifestation crystal structure, you create, you have this. That's a natural process of interaction of the fields. (2:16) But go on studying, then you understand exactly what I'm talking about. Thank you very much.

Q: Yes, to understand the intra connection in our common...

K- There is no... there is no

Q: ... Unicose ?? through the DNA and RNA.

K- No, it doesn't come, it's just the way the thing, fields connect to each other, to create that shape of physicality. Inside, they're connected by the fields, but outside it's just like a balloon. The air in that football, the air inside, connecting all of them with the air inside. But outside physicality, they have to fit in, and you cannot put hexagon in a football all the way. There is always one or two pentagon in it, that accommodate the existence of it. The same with dimension of the, what we call, RNA to be the gas inside, which connects everything, but DNA to be the physical structure, to fit into the sphere, always have that structure.

Any other question?

Q: ... Could you ask Mr. Keshe if there are problems at the nuclear power station in the Ukraine? Has it been shut down? If there are people at the Ukrainian nuclear power station, are they scientists?

K- I don't know. We don't follow. Don't follow it now. I don't know, past few months. The... you got to understand, the Russians are sitting inside these... especially the biggest nuclear power station. Ukrainians who are running it, were trained by the Russians. (2:18) Till 20 years ago, 30... you got to see the people on the top of the nuclear industry of the most of the Eastern nations, they're all in their fifties and sixties now. They were in the young age when they were in twenties and thirties, were trained by the Russians, they were part of USSR. And this is inherent in all the nuclear industry on the East side of the... what we call, what used to be Eastern Europe. And there is no...

The Russian nuclear physicists are some of the most skilled, some of the most innovative scientists I know. The freedom given to them to try to develop is amazing, even today. The American, European structure of nuclear industry is very restricted to legislation, how and what. Russians don't have that even today. It's very patterned, but very open. They allow a lot of innovation. The nuclear scientists in China fear of their life. If they make a mistake, they can be killed. Russians are encouraged to look for new ways. Always been. It's a

different... that is why the Russian nuclear space is very innovative. It's very open in research and development. The legislation does not exist as such, (2:20) but caution is looked after, but it's still a lot of freedom.

And whatever, what you call, nuclear power stations are in the hands of the Russians in Ukraine, should be pretty safe, because they know, they masters in it. They build nuclear reactors. Ukrainians are users of what the Russians built. Iran nuclear power stations are Russian made. Chinese rely a lot on Russian nuclear technology. Chinese scientists in the space and nuclear look up to the Russians. A lot of information exchange, technology exchanges are very connected. Chinese nuclear and Russian nuclear are, what you call, knitted together, you cannot separate it. Russians are... Chinese are going to the Americas and all the blockage, as they were communists and still have a lot of good relationship, they work inside, to transfer technology. Ukraine nuclear reactors are in the safe hand, they know what they are doing. If they don't bomb it, they know how to run it.

Any other question?

Q: ... The problem you were mentioning about the football, with the pentagons and hexagons, (2:22) you also see in the domes, in the construction of domes. You've got the mixture of these two figures. And you can clearly see that problem there.

K- It is not a problem, it's a ?? combination of fields.

Q: Well, it's nature, yeah.

K- Yeah.

Q: And the Carbon 60, the C60, is it all hexagons, or does it also have pentagons?

K- You add it up.

Q: Good question. I was thinking of another problem we've had with the post-corona problems. The inoculations were supposedly for over 18 year olds and they've been vaccinating kids as from three year olds. And we're seeing a lot of problems with the menstrual problems for women and a lot of lack of sperm in kids.

K- We will have this problem with corona for decades to come. Americans are just looking at how much damage is done, how much more they can do. Why they forced the soldiers and the doctors to be vaccinated. Now they're killing themselves, killed so many of them, many of them dying. And we are coming up with other problems.

R: That's a delicate subject that we can't really discuss on YouTube because of their restrictions. (2:24)

K- Yeah, we have to wait and see what the history writes. What the history writes and why we see all the things which goes with it. If you look at it, Corona has been one of the first tests of mankind with the viruses in a different way.

But once we start space travel in the physical dimension, we'll bring more of these energy packs. And then what will be effect of it on our people? What is understanding of it? and what will be the disease which will

come with it, or cure will come with it. It's not all one way, bad way. What through these energies we'll find answer for many diseases which we didn't have.

R: Well we do have the answer to the previous question, which is about the soccer ball shape and the particular atom structure of the C60, which is called Buckminsterfullerene, named after Buckminster Fuller, who originally conceived of the dome structure. And yes, it's got 20 hexagons and 12 pentagons and does resemble a football.

K- Tada! (2:26)

R: Okay there you go.

K- It's amazing... It's not an answer, it's a knowledge. We... in the future you look into this for specific works.

R: It's interesting that this Buckminster Fullerene, it exists in Space and has been observed in the Planetary Nebula, in several types of stars. The ionized form of the C60 plus has been identified in the interstellar medium, where it is the cause of several absorption features, known as diffuse interstellar bands in the near infrared.

K- Yes, because what it is, even though you see the structure, they're connected, between these structures there is a gap. And in that gap, the specific fields absorption strength exist. This is what I said. The Knowledge Seekers have a problem with creating fields. But from the fields we create radiation. Like the way now you can do what we call laser beam, monatomic energy fields. In space we produce mono field strength. (2:28) Which means, from Gans's I can create any radiation you can ever imagine. But the power of it is totally different behavior.

An X-ray, by X-ray machine coming from interaction of the high current hitting the surface and creating it. In the Plasma X-ray, when we produce it, it's the... it's not a ray, it's a plasma of rays. And, the power of it, is beyond man's imagination. I've done this and I have full knowledge, or as much as you can call it a full knowledge, of how to produce X-rays, gamma rays, cosmic rays at will, through our present technology.

And it's not what you call, if you understand this, then you can produce and go into these, what you call it, constructions and development and change it. When you have this, hexagonal, the ball, with the present knowledge, when you feed it into the ball enough air, there is no room for expansion, it blows up. But, when you feed this ball with the specific rays, cosmic rays, gamma rays or whatever, these walls, in progress, will expand. (2:30) You can reduce the size of this ball, or you can expand it. The walls will not change, the size of the walls, each wall stay the same. But more pieces will appear in the construction. And it's all done by energy transfer.

This is what I said in the teachings of past few weeks. In the Keshe Foundation, and I go back to years ago, we explained this. In the development of the Keshe Foundation Space Technology, we are not looking for huge air hangers, how can you make a UFO which is 200 meter across. We don't even have the platforms to hold such a weight. We don't have construction technology to hold two, 300 meter diameter tents. With the new Space Technology, we bring the reactor in the middle, we create, we set up the structure of the shape of the craft we want, we create the fields, and interaction of the fields with each other, creates the shape. And then, by how we feed this formation, decides what size the craft is going to be. How much of it is going to be solid, how much is going to be fields.

This is how the new technology comes. It's literally a backpack on the street, set it up the way it's instruction is on the manual, you got yourself a UFO, 20 meters, 100 meter, 1000 meter. (2:32) And every time you expand it or extend it, it's very much like this ball on the screen. You... you... the size of the walls does not increase so much. The fields inside, creating, bringing new energy, will build from inside the next shell. The next piece, and the rest moves to accommodate that piece.

This is how your body, your skin grows inside the womb of the mother. This is how we create that shell and then inside it we develop secondary, what we call, body of the man. When we are born in the, what we call, or when the animals are born, you see the mother taking the, what we call, the skin off. This is what it is. Inside, once the child is conceived, once the sperm and egg do exist, or themselves, you have the womb of the mother, then you create this flexible membrane, to create a condition inside that the data can create the structure of the bone structure of the man. The heart, the leg and everything else. It's not a loose things in the womb of the mother. That membrane holds and that membrane expands as the child ?? grows. It's exactly like this ball. The energy comes from inside, and from inside, the division takes place, and the skin expands.

It's not the same number of Carbon. (2:34) If you manage to get energy in the cosmic rays, and then if you had 24 pieces, now you have 48 pieces. Now you have 60 pieces. And as it expands, look at the skin of you and see the texture of it, then you'll understand. They're not all pentagon. You got the hexagon and pentagon. They have to accommodate, the stretching and moving. And how much energy comes from inside, according to what it is. That's how your skin is regenerated.

And we have access to full cosmic ray spectrum to produce. For me to produce a cosmic rays, is as easy as drinking a glass of water. To produce gamma rays in the cosmic level, not in the man's machine. When we deplete nuclear warheads, at the moment, Americans are paying the Russians now. The treaty has stopped by the Russians. They pay them millions and billions to empty the warheads. With a new technology, understanding this, it takes a few seconds. Doesn't matter how deep they bury these nuclear warheads. We empty them like a scoop of ice cream, even easier than that. Because we have access to a knowledge unknown to mankind. For me to empty a nuclear power stations with all tons of fuels in it, from radioactive material, is easier than actually filling a cup of water.

Bringing an end to nuclear industry as a weapon, it'll take a few minutes. (2:36) You still have the rocket, you still have your warhead, but in that warhead, is emptiness. And it's a knowledge, it's well tested. It's not something that we might be able to do. Because, if you understand this structure, it gives you a lot of possibilities. You look in what is inside the ball. I look what can come out of this ball. And it goes back to "Creation of Black Hole" paper, if you understood that. And then you understand.

Nuclear radiation in a plasma is so powerful, you can disappear a whole of a planet and a star with it, in milliseconds. Or, you can allow it to expand, to become a bigger star, or reduce it. You can do this, it's done very, very systematically. It's like when a star or a planet goes into its point of disintegration, you can empty the energy through fields from inside it. It's something which is done... It's like a putting a fire out, for those who understand the knowledge of Creation. If you have a Star Formation or a star such a solar system, where the star is about to go out of control, and you have planetary system, which are nurseries, you don't go and empty. (2:38) With the knowledge we have we reduce the heat inside. We withdraw the radiation fields, in cosmic and the rest. You will understand. We show this technology very, very soon. Extremely soon.

Any other question?

R: I believe they use the C60 geometry to enclose certain drugs and other things to be able to deliver to the body.

K- This C60 has a hidden power. Has a very, very... and it depends how it's used. You see, when they use this Carbon-60, they say, "Oh, medical blah, blah, blah," and it does this. Follow the life of the people they use it on. Follow the cycle of the cells they use it on. And then you see, it looks very sweet, because you're taking this picture frame, take a picture frame underneath later on. The scientists who work with the Carbon-60, and sometime by accident come to consume it, or come in touch with it, they live a horrible life, absolute... I was witness to one. This is why I keep on telling you, please do not drink Gans's and the rest. Because if a composition with the body of the man, with the stomach acidity, creates this, you die a horrible life. You live a horrible life.

Q: ... Is this the geometry, also the geometry of Gans?

K- No, Gans is dynamic. It does not maintain geometry as such. (2:40) It keeps a physical boundary, fields boundary. If you get such a geometry, you're in a big heap of problem. But we use it.

This Carbon-60 is under a huge discussion, especially for weapon technology at the moment, by Americans, by the Chinese, by the Russians, by the Iranians. Germans are doing some work on it, because it's primarily a Black Hole, and how you interact with it. And primarily how this Black Hole will interact with outside.

Any other question?

Q: ... Mr. Keshe you gave the food security plus other securities to all the governments of all nations through the Key that you gave them in 2012. Why don't they go for it? What holds them back?

K- They don't understand it.

Q: ... Are they mental?

K- No, they don't understand it. They don't understand it.

R: Is that because they're mental? Maybe they had too much crossbreeding.

K- No, it's just when you don't understand it, it's something written in the future, we will open up. You got to understand the patents we released, the Key we gave. Even they achieve one thing in one section of it, this section, as the knowledge increases, has different implication, application. A new application, as the knowledge expands, then you go to the next step.

And, it's just like, (2:42) we had this discussion in the conference, many of you suffer from asthma. Many of you use these pumps. Keshe Foundation has, in the Wellness side, has a process for this. It takes a... our doctors to sort these things out. Not much. But, it's not in the hand of, it's not in public. We can bring an end to these conditions in a very rapid way, through the technology. But, is the man ready to go through it?

R: Well as you've mentioned, it's like a Pandora's box, and once you start to unveil the core of the technologies, then they all, all of the other parts, kind of come out with it. And that is rather devastating for

the current "status quo" of the way things operate in the world of technology, and especially energy in the world.

K- If you understand the picture you have in the front, and you understand the totality of it. This is a micro size, is so small. This is enough to bring America, this one cell, is enough to bring the American most advanced naval aircraft carrier, one cell. No more.

If you understand this, (2:44) you can travel the Universe with what energy sits in one cell like this. It's very much like a football, how hard can you hit it, but with this, what energy you transfer inside it. And then it decides how far the ball is kicked. Primarily, if you get this and kick it against a one body of a ship, the energy transfer, which just opens up the whole structure. You'll have 7,000 soldiers swimming, because there was a boat, now there is not a boat. The knowledge is very extensive.

You need this technology as part of the defense, as you travel in deep Space. You have... you can't zigzag your way around. You travel on a straight line, you have a structure, meteorite or whatever, you just dilute it, it becomes sugar in the hot water. Man is not ready for this technology yet.

If you understand it, you can use this very much like a transmutation ?? ball. You put whatever you like inside it, and because of its structure, field structure, it has no resistance and no time. And then from inside you create gravitation, dimension and position. This is the hidden envelope we talked about a lot, but scientists are not ready for it.

Any other question? (2:46)

K- ... Let me explain something. In the China conference, we will openly show the first flight system. What you call UFOs, what you call flying machines, what you call hovering cars. In that conference we'll bring more or less an end to the present propulsion.

Those of you who were present in London conference, you saw with a frequent change of the screen on the panel, that what, how, small rate reductions leads to, then a massive and conversion. In this, we'll bring an end to the propulsion, in next 2-3 months, Once we get to China and the presentation of the Chinese conference, maybe ?? nail the coffin of the propulsion and the electric car will be set. And we see how the new technologies will appear.

We cannot live without it, it's something needs to be done. And the technology more or less is complete there, but it just needs for people to understand. Those of you who come to China conference, you will see the first, what we call, flying machine. The structure will be built on the platform. And then we go through the other phases of it. (2:48) For the transmutation, as I said, understanding those who want to do physical transportation, join us in Beijing. Those of you who want to understand transmutation, join us in Shiraz in Iran, 2024. Knowledge comes with the poetry together, and then you understand how sweet it will be. And then we'll go to the next step. Then we understand more.

In demonstrations of the technology in Beijing, we bring an end to the present, what we call, matter state. In Tehran, in Iran, in Shiraz, we'll bring an end to understanding of the fields, and end of the religions. Where even the holy men and the religious men will see the light of the Creator. Then we understand where the peace comes. We show slowly, slowly, and in London conference we showed the first stage, first time ever we showed in public.

If you remember, years ago, we used to have a video showing the weight reduction on the Iranian reactor. If you remember, we were showing on the scale. We showed the reduction in weight in the ?? small ?? place, through control in London conference live. Now you will see a full flight system in China. Still tickets are the same, you still can register for China. (2:50) And we put a limitation on outside people who want to come in. We'll try to hold a conference in the island of ?? Hainan, in Sanya, where there is a hotel accommodation for this number of people. And you don't need much visa for it, if you are part of the certain nations who can travel to Hainan. Because he has a different visa restrictions on different nationalities, even though it's China, they have separated that you can come in for 30 days or whatever. Without visa, like Hong Kong.

And we will show the, what we call, an end to propulsion in China. Where, those of you who present in London, you saw the small weight reductions as it came live.

Any other question? Or we call it a day? We've been here nearly three hours.

... (looking for German translator)

Q: ... (2:52) What was the special gift for the participants of the London conference?

K- Ha, ha, asked them.

R: Is that top secret?

K- No, no, no.

R: I think Dean released a picture, I don't...

K- ... Yes, yes. We... all the participants, this was for those who participated in the teaching part, there is a, what you call it, a star, with a Gans inside it, a special combination, And then you have the coaster, a new coaster has been launched by the, by the Keshe Foundation, I think you should be able to purchase in the next few days. And, what we call, the medallion. But, the Knowledge Seekers in London conference, each, each participant chair, were put two Gans powders, which was worth a lot of money. But every participant had more or less a full bottle of CO₂ and Zn, and dry Gans's that they can use in different ways. We actually gave thousands and thousands of grams of Gans's on the tables. And those who, what you call it, took it, somewhere in the future, might be able to understand how to use it. (2:54) This is part of the, what we call, reserve kept in Austria in eventuality of any nuclear disaster.

Thank you very much for today, try to join us on the 24th. And if you've been waiting all your life to see the first flying system, join us in China, in the conference in China. We showed the basic structure of it in London. And we'll show a complete structure and working system in, what you call, Hainan, next year. Thank you very much. And hopefully, we'll see what come up till next week. Thank you very much Rick, and for all the support.

K- Something ... I just remembered something to explain. Those of you who wanted always waiting for different Wellness conditions, to be able to use the UBESUS (Universal Body Enhancement Spaceship Units), these systems which now comes as a connection to the UBESUS, now has left the hand of the Keshe Foundation to what we call the distributors, to people who have licenses. A number of these was given to the people who bought the systems during the conference that they personally took it with them. (2:56) And

very soon with their, what you call it, with their permission, a list of these people will be released that you have to be with the system to use it. And gradually we increase this number of, what we call, people to use the Enhancement Unit. You don't buy this huge, what you call it, UBESUS, it's changed to a Headset and a Unit. And now it's been distributed amongst those who have purchased the Units. And in next few days or weeks, because it's out of our hand, it goes through the, the Wellness Center. You can actually get in touch with the Wellness Center, or the people who are the distributors. You have to use it Live with the system. So you have to come to an arrangement with the, what we call, the licensees, how they will, what you call it, they will register you, how you can be with them to go through the process. It's a joint (use) with the Headphones you have for the physicality and these new plasma system, UBESUS for the expansion of the fields. As I said, what used to be done in three months, will be done in a fraction of time, with much, much more effective ways, through the Wellness.

In these conditions now, they're what we call, this is what you've been waiting for as UBESUS and the rest, now it's become realities in the hand of our people, who can... You have to get in touch with them, work through them, through the Wellness Centers of the setup for it. So, what you've been waiting for, now it's already been released. Thank you very much, (2:58) and we'll meet again. I'm sorry about that, I forgot about to tell you this.

ENGLISH TRANSCRIPTION

(:16)

K- Yes, thank you very much. Good morning, good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you back. And as usual, we strive .. to share knowledge.

As I said in the past, recent teaching, we are heading in a new direction, in the knowledge of man, and we are heading in a new direction with the life of the man. Not only on this planet, but it's cycle, in what I call, rotation of life in the Universe (U). In the past few weeks, and in the past, especially recent weeks, we tried to explain, we tried to bring to understand, the new cycle of teaching, the cycle of knowledge, the new understanding. And with this, unfortunately for those of you who are mechanical, mathematical, scientific minded, we have no gadget to show you. We have, but unfortunately, the gadget, the system, the technology (T) is you. And this is the dilemma for many, many Knowledge Seekers (KS). Trusting that this system, (:18) this measuring tool, and this so sophisticated, simple system of the human body, now has come to be tested.

It's been developed over billions of years. Ethos and principles have been taught to it in the physical dimension. And now it's come to off the "production line," and it needs to be tested. And even though there's been many billions of prototypes before, now it's me. I have to find out who I am. What are my capabilities? And, as I always said, now maybe most of you understand, I'm the "last man standing." It's me who measures me. It's me who decides my capability. It's me who decides if this system, so complicated and simple, is going to function. And it's like the new cars on the street you see. It's a car, but no driver. Would I be able to drive through streets without bumping into everyone? Will I be able to stop and go and maneuver and do everything else, drive during the good time of daylight, and drive in the sunshine and the rain at the same

time in the same way? And this is the history of man from now on. You have denied this to yourself, but it's been there all the time.

The only way we'll put this system into testing and seeing how it works and bringing values to you to understand, (:20) which part of the system you have to adjust, which brakes you have to loosen a little bit, and what part of the engine you have to increase the power of, as a part of the emotion of the man in your physicality (P). So we have brought you into a testing zone, where we let you test yourself, and then find the capabilities, the shortfalls, the beauties, and everything else in ?? you. The past one and a half years, all these trials with the system, those of you who came on different sessions and you thought, what is beneficial to me, I go in, was to create that condition for a number of those whose Soul has decided to go to that dimension and direction, and to find out more.

What we do today in the teachings, on the special sessions of Fridays, it'll become a benchmark for the rest of the humanity to follow. To guide us, for us to know us, for us to understand what are the pitfalls, for us to understand what's the strength of me, in both in dimension of physicality and in dimension of energy. My physical life is connected to this planet. My energy life, which I call the Soul of me, is connected to the Universe. I'm not the only car on the road. And this city, this village of Earth, is not the only village in the universe. So now you understand.

Up to now, you drove, you walked, you lived among the physical life of the village of Earth. With this understanding of the Soul of the Man (STM), (:22) you open, you travel the span of the Universe. In a way, from a little village girl, you become the lady of a city. How you're going to behave, how elegantly you're going to walk, and how rough edges needs to be cleaned up, to be tested, to be corrected, that you shine, you stand like a ??, on the Universal stage of the Creation. Perfection. Dance every motion and everything calculated from the tip of the finger to tip of the toe. One mistake will bring it down on the floor. Perfection is the essence of understanding. Consciousness, understanding what emotion in the dancing in the Universe will bring, that will not allow man as a ?? to fall.

There is no one else, except the physical body of the man, and the STM. In the matter state of the Life, you walk, you eat, you talk. In the dimension energy of the man, you connect to the rest of the Universe. Physicality is for this planet. The dimension of the energy STM is for the Universe. A man needs to learn this, in all the teachings. All the promised books of the past, is for today. When the man finds himself, the "Day of Judgment," the day when you judge yourself, and no one else. (:24) Unfortunately, the Creator does not have a bench sitting there, like Ayatollahs, and passing a sentence of death, or life imprisonment, or so many lashes. This is the job of fake believers. This is the job of those who claim to be the protectors. Now you are in the same position. Are you a fake believer and a false protector of that physicality, and nothing else.

I brought you Gans's, I brought you reactors, I brought you Nano coating for your physical life. Now we teach you the essence of Creation, the transformation, transmutation of the fields energy of the Creation. And that is the beginning. The hell is the life of the man on this planet. The heaven is understanding the life in the universe. And the Day of Judgment is on you and no one else. Does not come by death. It comes by the point of maturity.

I used Gans's to show you the energies. Now I use your body, your physicality, to show the beauty of what's inside you as energies of the Creation. In a way, the Creator has already made the Gans mixture, called the

body of the man. Now I show it's energy, its central of control. And that is why what we teach sounds so strange, so amazing and so different, (:26) because it's the truth about you, yourself and no one else.

So, I used the reactors and Gans's and Nano coating, to teach you about dimension (D) of physicality and connection to energy. And now, that connection of mixing the Gans of the Copper, the Zinc, the CO₂, the Calcium and the Zinc, it's already mixed up, it's already ready, it's already has a central control called the human body and the physicality of the man and the STM. Now we play with a new toy, now we play with a new understanding, now we play with your life. You play with your life. We show you how you play, how you can play, and how you can take this beautiful dynamic energy to become a flying source, to become a feeding source, to become a source for your life. And why you deny it? Why do we get a cancer? And with all the knowledge we put on the table, the cancer cannot be resolved? Because the dimension of physicality cannot let go. Cancer is dimension of physicality. I bring it to an end when I want, and then I decide when. Does not matter what we throw at it. The Soul of the Physicality (STP) wants to complete the pain of physicality.

Now you understand how I have changed that dynamic reactor to the dynamic physical structure of the man. (:28) In essence, when you know how to walk, you know how to dance like a ballerina, and you know how to jump and how to run. And we have all the knowledge. And we're trying to transfer this knowledge to you. Your physical body, your Soul, is that reactor. Your Soul is the second reactor. Your physicality is the Sun of the light of your existence, and your Soul is the light and the Sun in the world of Creation. As the Sun created the Moon and Earth to confirm it exists, and what it can do, so is the same with your Soul and STP, and the physicality (P) of the man.

As I said in the last teaching, we start a new path, we start a new teaching. Now that you start learning how to play with this reactor, now that you learn how it's there, how it stops this and that, and how it creates emotion. You remember 129 Tesla magnetic field creation in the Cinzano (Italy) in 2014. With a simple system. We created more fields than nations spend billions of pounds to do. Simple man created the system, not the experts with PhDs and all the rubbish papers they put on themselves in different organizations around the world. (:30) And so it's the same. Simple man understand the creation of themselves how they travel the span of Universe. And from that point, how we started the cycle, to understand the fields transfer, understanding how you mix two Gans's and it gave you pain relief, and you mix other things and gave you different field energies and colors and emotion.

Now you have come to that point, that you did not needed to make Gans's to understand this technology. You only needed to understand the interaction of the fields. If some of you were knowledgeable enough, gathered enough what I call, technology's of understanding, you didn't need to make Cup 1 and Cup 2. You created the energies of it within you. Is this why some people never got it, never got infected? Because the knowledge of existence through viruses has been and is part of the Soul of the structure.

Very interesting point, which I raised in the private talks. Now I put you in the public talks. Many of you caught Corona. Even some of those of you who came to the conference in London reported back that you were infected by Corona. Ask yourself one simple question. (:32) Those physicality's which were touched by Corona, are they getting ready to become, have learned, the Passengers of the Universe? Because the Soul has got a taste of chickenpox, flu, now corona, and is getting educated, ready, vaccinated, for the travel in the dimension of the Universe. Doe it mean that the STM is getting ready to become part of the Universal Community. And in some way, is getting vaccinated, is getting introduced to dimension of the fields of the Universe, as viruses.

The other question comes, and this is much ?? of a lot of you, is some of you, very few of (you), percentage of you, who did not get Corona and Corona and other viruses never touch you, are already Passengers of the Universe, guests with us on this planet. As you have already been educated, "vaccinated," and in the dimension of the Soul, be the Passenger of the Universe. To this, I will answer in the future. To this, we'll bring the dimension of recognition.

As I said last week, a new cycle of teaching has started. And this cycle is for the STM. This cycle of teaching is to take man to show him how to drive, (:34) how to stop, how to enjoy the Sun of the Creator, and get warmed by his rays. And from now on, the teaching mainly will target for man to be ready to travel in the dimension of the STM. Book 3 , the final destination in the temporary road of the travel of the STM.

But you've got to remember, that within your RNA, sits the whole history of the creation of the Universe. What is connected to the dimension of physicality, manifests itself in the DNA of the man. Universe has his own RNA, and Universe creates its own DNA for manifestation of physicality. And you only see part of it, which has Inertia strength of the physicality of this planet. If you understood the past three sentences, you understood the essence of the Creation of the Creator.

Now you understand, what we teach, and why we are here to teach. Because now we change those reactors, dynamic reactors, Nano coating, the Gans's, in fact, to you, and yourself, and nothing else. (:36) The Gans's are the body of the man. And the dimension of the rotation and the speed of the rotation is the STM within it.

In one of the tests in the recent past, I explained to one of our Knowledge Seekers. You want to see the truth, you want to see the fields, do not pile in the Gans's, because it brings a dimension of absorption of physicality. This is why when you as Knowledge Seekers use the Gans water, you get a better result than the (pure) Gans's. And one drop carries the whole of the essence, not the whole cup.

You want to travel the dimension of the Universe, understand the creation of the Amino Acid (AA) of the Universe. You want to live and correct in the dimension of the man's physical dimension, stick to the AA of your Gans's. You want to live in the dimension of the matter state, wash the AA, find the AA of the solid. The heartbeat of it, the essence of creation of it. Then, you can become the stone. Then, you can become a tree, then you can live the life of the man, and then you can live as an energy fields in the Universe. (:38) What line of connection to dimension of Inertia of the existence, can you find and understand, and create within your Souls, to become that point of creation? Then a man can be a stone, a tree, a man, and a Passenger of Universe within the same vessel.

When you're burned, you become nothing but ashes. The dust, that if you bring the Soul of it together, you'll make a stone. Some races clay the ashes to statues. Some path of belief use the same ash to make an ornament of the physicality. Now, you can do the same. If you understand that, and without being burned and become ashes, create the dimension of the physicality and become a stone. Have your Soul with it. And when the time comes, change into a man, a tree, or anything else.

Now you understand the teaching of Bahá'u'lláh, bless his name, that even a stone has a Soul. As the man can make, understanding of the operation of his existence, the Day of Judgment of his life, to create a stone out of himself. To become the observer of the environment, to become there for time to come, (:40) when he decides to become the next.

Now, as I repeated two or three times today, you understand. You have become, you are, and you're testing yourself to show the rest of us, the same as the reactors in the Cinzano. Can collection of your field create the fields more than 129 Tesla and billions of Tesla's become passenger of the Universe? And no one else can do this except you. And now we are the teachers. We're just providing that lab for you to test yourself.

One of these tests will come in tomorrow. Those of you who joined for the session of the light, do not look for the light, look for the enlightenment. If you look for the light, you're still in the matter of confirmation of physicality. If you get enlightened, understand little bit more, you understand and you start the path to become the part of the creation of the Universe. As I said, there are no churches and no mosque and no synagogue for any of you to join in. You are your own mosque, your own Christ, your own Moses, your own Mohammed. You live by the Ethos of Mitra and you exist in the Universe by that ethos. Once you break the Ethos of Mitra, you have brought your own demise. (:42)

You need to learn to love, you need to learn to become the lover, you need to learn to how to give. And that in the dimension of the Soul. For that reason, Thursday 21st of December is a celebration of the birth of Mitra. We celebrate her life and we teach you how to love. On the night of her birthday on 22nd, on the 22nd of December we teach you how to love. We teach you how to become Mitra. Without that we cannot let you to go in the Space. Without that we cannot let you become Passengers of Universe. Because once, as I said in the teaching of last week, ?? when that love touches you, you'll never break the Ethos of Mitra.

As we start the process of transmutation, we need to teach the principle of loving, giving and not to take. And that process starts from ?? this second and we emphasize and we teach you till you feel the love, the giving, understanding and correct conduct.

Tomorrow's session we'll teach you how to transfer the fields, how to be enlightened. On 22nd you'll learn how to give, how to become a lover, (:44) and how to start the process of giving without expectation to receive, even though you receive, that you become the giver. In a way we fill in the cup of the Soul, that by its overflowing, you learn the giving. Because once overflowing, it's not yours anymore. You have given. And we start that process.

As I said, we celebrate for man understanding of the life in the Universe. We celebrate for man to live a correct life in the Universe, as the Intro (video) said. We clean up the false emotions which created in the RNA by the operation of the DNA. Not depending on anything. As you know, you'll receive what you need. "Thy shall not kill" was in no way brought up to be for the dimension of the man's understanding of his dimension of physicality. It was brought in for dimension of Universe. Once you understand in the Universe, you receive what you like, what you need, then you shall not kill for it, you bring that ethos to the dimension of physicality. So you have to touch the love of the Creation, the love of living in the Universe, to correct the physicality.

One way or another, we'll bring that to this planet. Be of the teachers to show how to conduct outside. (:46) As I've said many times, we are "Universal Teachers," because we teach you the life in the Universe, the educated way to live in the Universe. And now you understand why we are called Universal Teachers. We are not prophets. We are above all, directly connected to the Soul of the Creator, as He teaches through the dimension of physicality of the man.

Now you understand what the first words we always said. As now you're getting prepared for yourself, to the Day of Judgment of yourself, to become the Passengers of Universe, you need us, as Universal Teachers, to

guide you, to teach you. And now you understand the meaning of Universal Teachers. Never claim to become, never claim to be a prophet, because it has no "profit" for us. We have access to all. And now it's for you, as us, as the teachers sitting next to you in that car, with the "L" learner driver behind you, how to conduct. And the first three rules, you sit in the car, you fasten your seat belt, you watch the mirror, you turn the engine on, and you watch what's going around you, and... the Ethos of Mitra. to be correct within you, within your environment. (:48) Think good, talk good and do good, or act good.

And now you understand, who we are and what we are and what we are to deliver. Even though we live in the dimension of physicality of the man. It's for you to decide, how you drive this car, which is the STM, in the dimension of the Universe. Even though, in the past we have manifested in dimension of physicality, any name you believed, (it's) still the same Soul. And a teacher has to know where to start to teach, and how to attract his students.

You got to understand, that now it's you, in that lab as one of the reactors trying to create the 129 (Tesla). Then you understand, you will not know if your thinking is good, if the emotion that brought that thinking is good, that brings a good ?? talk and it brings a good walk, unless there is another Soul for you to manifest yourself to, and understand how much you have learned from the dimension of physicality and its emotion. (:50) Then you understand. We test the STM, with itself existing with the dimension of the Universe.

From now on, the teaching is how man, for man, to live in the dimension of Universal Community, where the Soul next to you, the man you held, the woman you held, in the dimension of physicality, would that Soul be your Soul, that you will test it with first? And then, would that child you hold, which you gave a physical birth to, can you connect to that Soul? Because now, nothing is hidden. You hid the chocolate you stole. You can not hide from the Soul, from the man who you stole the chocolate from.

Now you understand. Now you come to understand, now you come to be part of. Now you understand the two dimension of life of physicality, how it can help the dimension of the Soul. Now you understand why we brought you to Manchester and we brought you to London, and we brought you to the teachings, is all continuous development for you to recognize the beauty of yourself. (:52) How to run that engine. How to work that engine. How to run that reactor and understand what rotates outside in dimension of physicality ?? has a Soul within it. But this time, instead of rotating, has learned to walk and talk. And the other time has learned to stick to the ground and go up. And the other time decides to be the rock, that that tree can lean against to grow.

In either way, the cycle of teaching is complete. In a way, we just got to teach you where is the red light, where is the crossing, where is the downhill and it drops you into an ocean, where is the uphill struggle to get to the mountain. And these are no different than the dimension of physicality. Universal life is comfortable if you understand how to live in it. And it's not that you just walk in the park. You have to learn the rules of the park. Do not litter. Do not urinate against the lamppost. And do not bring your dog, the dimension of physicality, to foul all over the place. (:54) Tame it, train it, that when it manifests itself in the dimension of physicality, in another dimension of position, it does not bring the bad habits of an untamed dog. It shall not kill, it shall not destroy, it shall not create wars, and it shall not be the behavior of the man of today on Earth.

Now let's see how many of you understood that you came here to see MaGravs and reactors and you never realized the target was you from the beginning of the time. You are that MaGrav, you are that reactor and everything within you is set to do. If you have not understood something, I give you a clue. How the MaGrav is created out of you. Look at the, through the channels, the twists and turns and the pipelines, in the cycle of

your physicality, if you understand it. Look at your eggs and your testicles and all the holes and calluses and the pipes, and the way they shaped. Look at the structure of your stomach and intestine and look at the structure of the pipes in your brain. You are the MaGrav and all the coils in it.

Now you understand how the game is played. And how the fields within that decides if you receive a saving or energy, or you can have a free run. (:56) Those of you who looked for matter state, physical dimension, energy, plug yourself into the wall. And those who understood about the work of the energy transfer in the dimension of the STM, sit on top of the MaGravs, as I said many times, and feel its energy. Either way, you are the system. Either way, it's the Soul of the system which counts. If you stay in the dimension of physicality of the man, you still got the blue MaGrav on the table. And if you understand the energy transfers and existence, you're connecting to feed the whole of the Universe and environment from that.

Now you understand. The game has been played in a full cycle. And now it's for you to understand how to play with this dynamic, physical, beautiful life. It does not need another dimension. It has another dimension, the dimension of the STP to test itself. And then how to radiate. And then how to become part of the Totality. As I said, we are Universal Teachers. We can teach in the same classroom as in the villages, I said last week. A toddler in the same room as this class has only one room. And to the boy who sits for, to go to university, and even we can bring the education of university and the PhD in the same room. (:58) It's just that if there is enough seats in that room, as the knowledge is the same and the teacher the same.

Now you understand. You are that vessel. And your conduct by the Ethos of Mitra decides, your position, the place, the time. And if you understood and elevated your Soul, understand the position of it, to become that passenger of the Universe. You have two choices, you are ejected and you have to accept the exile wherever you're put, or you decide to become the traveler and still meet and see the same jail, but as a man who can come out of it, when he wants, because now he has done it through the free Soul.

In a way, as we say in Monopoly, understanding the essence of your creation is that "jail-free" card in your hand. You can meet where the jail, where the Soul will be for rest of its existence once it departs and decides to find a place. Or you can become "jailed" in that place and time. What happens when you die? And what happens when you understand in how you can elevate your Soul in that, that jail becomes the heaven, and not a jail, for the others to enjoy.

In a way, by teaching of now, today, and time to come, we teach you how to have that "jail-free" card in your hand, (1:00) if you decide to go to jail. And if you decide to avoid the jail, or you decide to meet the visitor, and then because you know where the jail is, if it is a jail, you can do good, think good, and talk good, and raise the level that you get the freedom of the jail, elevation of the STM, by man himself and no one else. Because if you're going to steal to (?? find a way out), you'll find (the) jail sentence longer and harsher. If you bribe to get yourself out, you'll be caught in another dimension. So you'll come to understand. The teaching is for you to never get to the jail, but have the freedom of the choice. But for those of you who can fail, who think you can fail, we are giving you that "jail-free" card. Maybe, as you know the game, you only can use that card once. Once you hand it in, you have to wait for the next turn when that card turns up in the pack. And if it's going to be your luck to get it.

So now you understand the purpose of the teaching. So now you understand the process of the teaching. And we change the gas reactor to a dynamic reactor. We just changed the fuel from a gas to a Gans. (1:02) And now we change that to the body of the man and the mixture of Gans's. A more complicated mixture, but in essence, the creation of one's Soul. Now, I welcome all of you to come in the Cinzano and sit in the position

and see if collectively you can create the lowest field in the Universe. That it's a common denominator allows you to see the beauty of the Creator. In the physical dimension, we showed you how bigger fields we can make so easy. In dimension of the Soul, we teach you how humble you become, to become the lowest, to reach to the Creator. Now, that's another process, and in the coming time, you will learn.

We go through a break, we come back, and I hope, you as Knowledge Seekers, those of you who are not here to learn how to make a system, for the first time you found out, you are the system. And a master teacher knows how to teach his students. And we are masters at our job, as we come from the Soul of the Creator. Rick, take us through a break and we come back.

>> **BREAK** >> 513 KSW November 23, 2023 (1:09).

K- As usual. It was a very bad news to this teaching, huh? Because it was the 13th. Now you know, you are responsible for everything. And, number 513 was well put on. If there are any questions, we answer.

Q: ... You mentioned that man will teach the Universal Community transmutation, and in exchange we can learn from them more advanced transportation systems. How far in the future do we think for this to happen?

K- The question is put the wrong way. (1:10) How far in the past they brought us the knowledge? I think you got your answer.

Any other question?

R: You mentioned before there's, I think, two times in the history of man where the systems have been offered. And this would be the third time?

K- We... It's the teaching, it's a knowledge transfer, it's not something unique. If I can put it in a different way to be understood. If you go back to the paper, which I've mentioned many times, called, "The Station of the Scientist as a Prophet," the enlightenment of the scientist like Tesla, comes through the Soul of the Creation. Not from within the man. So if you ask when will, I tell you, you've been asleep. You already have.

The enlightenment of the prophets or messengers in the name of Muhammad, Tesla, and whatever, (1:12) who brought positive construction to man in the social life or the physical life is the same. So as one got enlightened, so is the other. And it's for us to understand and appreciate this. And if you ask, "When will we come?" I tell you, you've been asleep, it has so many has come in the past. It's in the history of the books, the holy books, that the time when the process of the coming of the Messiah starts, man will come closer to each other. In a way, those days was a camel and donkey and travel. And in 1844, when Bell or whatever made the first call to connect one continent to another, one room to another, was one step in that dimension. And if you understood the teaching of today, this is the other step towards the connection of the whole Universe. And not just the man from one call down the pipe to the other one, "hello."

Now, we showed you, in a way, we have said "hello" to your Soul and see where the other answer comes from. Because it's only you who knows who's on the other end, which is you. (1:14) So when you talk, when we come to, you already have received that gift of the knowledge from the past, from those who've been the Passengers of the Universe, and they become themselves the Passengers of the Universe.

As I said, you have a "jail-free" card, maybe once. Try to elevate your Soul. Try to understand. Try to be enlightened, that you have never need (of using that card), and you can jump that "jail corner of ??," of life. Because once you get in it, once the number ?? called, you missed the start point. You have to go to jail. But if you manage to go through and jump over the jail, as I'm sure many of you played the "Monopoly" game, you can pass the start point again and again. And in a simple word, you go back to the start point, the Creator. When I used to play Monopoly in the middle of the night and during the day, and in the sunshine, and in the shadow, and in the rain, with my brother, I always used to say, "When will man understand this?" (1:16) Once you get in it, you can't get out of it. But you can always go back to Source, as long as you're out of it, and elevate yourself to be able to understand more. Those of you who died, they missed the physicality, you carry no free jail card. You're sentenced by your behavior, your conduct, and your life. And that position is decided.

In a way, you can still pay a visit and say, I do not like to end up here and to be what it is to become, and I can elevate my Soul. I can become humble enough to go to the start and be given a chance to start again. Life of the man in the Universe is very much a game. But it has no boards. And the board of play is the Unicose. It's how you play it. How much you understand of it, throw the dice of life the correct way.

Any other question?

K- ... Can I come in please, before something? I had to say, that I wanted to say. You know Rick and other Knowledge Seekers know, this is for your information, it's pure information. There is a... Rick do you want to explain it regarding the Facebook? Because we've been hitting one of the ?? something in another corner. (1:18) Would you like to explain if Knowledge Seekers receive such a thing not to do?

R: Right, there's a... basically it's like a virus going around in Facebook, but it's a... it seems to come from the Admin of Facebook, and they say that your account is in jeopardy, and you must click on this link in order to reset it, and so on. But, if you click on the link, then it'll take you to a page that wants your login information, and if you put it in, they'll take over your Facebook site, your page. So, let's see if I can be more... let me get that up, so I can read part of it to...

K- Can you show them how you recognize it? I have it if you don't.

R: ... (Shows what the hackers send you to take over Facebook account). So this came up, where it says, "Important notice, your page, the Keshe Foundation Spaceship Institute, will be temporarily suspended due to multiple violations of our Community guidelines." Which could be quite shocking, but not, you know, that unusual, if you know how things work. "If you believe this is a mistake, please submit an appeal for review, before the account is permanently suspended. Appeal here." (1:20) It gives a link. And, "If you do not verify, our system will automatically lock your account, and you will be unable to use it further. Thank you for helping us improve our services." Terms of Use, the 2023 Inc. That's kind of suspect in itself. But at the very top, the most suspect thing is, it's called, the title is, "Add Busines" or "Busines" It's ... they spelled business wrong. They left off the "s" at the end of business. So, that right away, kind of is a warning signal to me, that something didn't seem right. And I've received a similar warning to this previously, months ago as well. And I looked into it and I could see it was some sort of scam page, so I didn't put the info in and I also found out that where it was coming from was a, what you call it, a messenger account, not a Facebook account. So, when this messenger sends, you know, Facebook does not send notices through messenger, they do it through email or through direct, through Facebook. So, again it was kind of suspect there as well. In any case, be careful with such things and try to look into it before you put in any sensitive information that could allow someone, like a password for example.

K- Apparently they take over your account and they make you admin, till when they come back, what they can, what they ask you to pay or whatever. (1:22) Or they tell you they have a picture of you or whatever, just ignore it. Anyway, thanks very much.

R: Those were the two, the two key words you told me many years ago, Mr. Keshe, in terms of trolls, which is, essentially that's what this is. And ... when I was getting all wrapped up in trying to defend the Keshe Foundation from trolls, and trying to rationalize with them, and back and forth, and back and forth. And you told me two words that solved everything, which was, ignore them. It was the hardest thing to do because you get something like this for example, you can't, it's hard to ignore. But, in this case, it's the best thing to do is laugh it off. Now, of course, if it really comes from Facebook, you might have to take some sort of action, but that's not as prevalent.

K- We get matured.

R: Yes.

K- I get educated. Thank you very much. I think if you go on the store of the Keshe Foundation, the session of the .. 22nd of December is already, I think, is published. I want to accept only a few limited people for this session, because it will be a very long session, maybe 4 or 5 hour session, because I want you to feel an emotion. I want you to feel exactly how it feels to be a lover, the true lover, not in physical dimension. And we shower you with love, that you feel it inside you. And it'll be an amazing time, (1:24) because then the Christmas holidays and the rest will have a different meaning, if you understand it.

In the process of London Conference, and the achievement from it, is so glorious, that in the coming time, we will let you know. It was not, and then, what you call, quantity, was the quality which attended, and that quality has brought a movement in nations. And, in the coming time, we'll let you know, how London Conference brought such a huge change. It's gathering momentum in a very unusual way. And that's, as I said, it's the will of the Soul of those who were present and really wanted peace in exchange for technology.

The participants in that conference themselves have brought an emotion, which has shaken the British Empire. I will let you know very soon. And, as I said, when we finish there'll be no Kings. And, it looks like, that even the oldest lasting Kingship, will see a new dimension to his life. It'll be very interesting, but in the next few months, you'll understand, maybe our Soul not being aware of, why the conference had to be in London, (1:26) and how it is, and it's turning out to be one of the most interesting ambassadorial meeting we ever held. Because when we do it, is outside, when they do it, it's from inside. And that's how it crumbles from inside. Very, very interesting. And soon we will tell you more about it, when it takes shape, by those who are developing it to a very strange, very, very beautiful structure of peace in exchange for technology. As you were there to support us to bring it about, it's our responsibility to tell you what you have achieved, we're just the tools.

Are there any other questions?

Q: ... Do we have a DNA defect, or was it edited from past Universal travelers from another planet, or dimension, like the Pleiades or some other Star System? Is that why we find it difficult to change?

K- The defect comes from the structure of this planet. You know when your parents give you one type of food, (1:28) and because they don't like the other part themselves, and then you create deficiencies, because you were not fed the right food, because they were not eating the right food. And then you go to doctors and say, doctor says, "Oh, there is a deficiency." But the doctor says, "Okay, take this vitamin and take that." But it doesn't ask the family, "What's your diet that has created this deficiency?" A lot of children born, brought up in the new fashionable vegetarian, vegan, we'll see other conditions in the children. And the doctors are trying forever to sort these new conditions, these shortages, these deficiencies. But what they don't stop to ask the family is, "Can I ask you how you live? What you eat? What you provide?" And then the doctor gives these supplements. But the cause is the mother or the father. And the way they live, and they're trying to bring a body of meat to a vegetarian, which is in his DNA. And now it shows these defects.

It's the same with us on this planet. The mother has deficiencies, does not give enough, and we create diseases, because of that deficiency. Because of that deficiency, the "tablet" of killing has been fed to us. And with it, to kill, to live, and to survive has come the bribery, (1:30) the thieving, the stealing, and everything else. They have not shown us how to love and how to be a lover. So when we get married, we don't understand it and become adulterous, because the structure of loving, what true love is, has not ever been taught.

So when you say it comes from DNA of the others (from other planets), they came perfect. What was created was perfect, but the motherland, this planet Earth, has deficiencies (in) operation. And then it's no use taking it to a doctor, unless you remedy the hole from the beginning, the Soul, the STP, and physicality in "one go." As I said once, we are the physicians of the Universe. We don't need to wear the clothes of the man who's a doctor. We understand the principle.

And so the deficiency comes from the way this planet has structured itself. That few degrees angle of inclination has created a beautiful life cycle. But it has not answered to feed the deficiency, and it has to come (from) within. It cannot come by facing. Otherwise, for example, those who face the sun will receive everything, and then you have to wait till you get (rotates) to the other side (of the planet). We call it 24 hours. What happened, this rotation is 1 million years, or 300,000 years, (1:32) or 500 years, if you're on the further out planets and you have a life cycle. Even you have the inclination.

So it has to come from the center. And this planet lacks that combination of Hydrogen and other mixtures to create, to feed, as is the Inertia. And this is where the problem is. You buy the most beautiful flower, and it's so beautiful when it's in the shop. When you bring it home, within days it dies. If you'd have left it in the shop, it would have been there for months. So the environment, the house is contaminated. It's you who have not created the right environment for that flower to exist. It's not the fault of the flower.

So is the Soul of this planet. In its structure, it's lacking energy to feed its citizens the correct way. So the citizens have to find a way to survive, once they ?? learn the DNA combination, by stealing, by killing. But the Soul does not kill. So now we teach the Soul to absorb the energies of the Universe, to feed the physicality that physically does not need to compensate for the lack of what's the planet is missing. Now you understand. This beautiful flower has been left in the wrong hand of the feeding. (1:34) Even though the greenhouse is beautiful, it has a problem. The gardener does not feed his plants the right mixture.

Any other question?

<< A Knowledge Seeker raise his hand by mistake here >>

Q: ... Good morning Mr. Keshe, the temperature on the planet is rising. How can we soften the heat with Gans and which ones should we use? (1:36)

K- I thought the heat of the temperature is rising because of our politicians. They're making it too hot to exist.

R: Too much hot air.

K- Too much hot air, yeah. Too much barking. Or, as I said to Knowledge Seekers some times ago, I think we have to put our politicians in a way, on the fields with the cows, they create the same kind of gases. It's just creating the right environment, wrong environment, too many of them on this planet. "Global warming" in a different dimension.

R: They say that there's too much CO2 on the planet, and that's what we breathe out. So the best solution is obviously if the politicians just hold their breath.

K- .. I don't know if I brought it out before. In a very recent developments and testing in Keshe Foundation, we have shown that we can convert the CO2 directly into AA. Which was a theory. And now it can be shown. And we have produced this AA. And it is on the investigation by the world leading scientist, because it was done in his lab.

We created AA, which meant, which means, or will create a lot of changes in a lot of industries. (1:38) This means that mankind can stop killing. This means a lot of other new dimensions in science. It brings in a new cycle of knowledge. And it brings in huge changes, huge changes, which, if I .. can call it in another word, the changes it will bring, it will be so astonishing, that we can control a lot of things with this new knowledge. And we can, in a way, bring in the process of creation, understanding of it, on this planet, much, much closer. What this means is that we can dictate where we want this, what we call, feeding system to come into operation, and how we control it, and how we what I call, (1:40) will bring in about new methods of creation, a new method of feeding, a new method of changing the dimension of the feed on this planet. And maybe a change of the atmosphere.

What has been achieved in the past, recent past, is something we've done before, but now we had to confirm it independently for what we call, scientists. And when it was done, it was extremely exhilarating that we could show the global warming can be used to become feeding the man, irrespective of time, place, and position. And it's very easy to stop this global warming and change it into feeding.

I show you couple of pictures that you can understand. You see I put a red line on it. You see the shining ring. (1:42) And it goes all the way around the disk we put in. This is where you see conversion of CO₂ into AA. This is one of the most advanced labs on this planet. We are in one of the most advanced technology centers in the world. This is done under control of the scientist. And when it was created, you see the hand of the finger of the scientist. He could not believe it, that how AA could be created out of CO₂. He had to taste, test the fatness.

So for us, we knew this. We knew this in tests from 6, 7 years ago. We knew this from 10 years ago. You saw this in the production of the Gans's on your Gans boxes. Now we have managed to produce AA in absolute purity anywhere on this planet. These little pictures you see will bring huge changes in the future. What does this mean? Go back to reports of what we gave years ago from trials of seeds in Inner Mongolia, where test independent, test done and the ?? position by the Beijing Agriculture University led an independent testing of the seeds, (1:44) that average protein in the wheat in China is about 11-12% and we created a 20%, which was the highest ever done in open, when the American and Australians did a test, created a 20% on a very specific conditioning laboratory. Now we could do it in the open, which meant the plant was happy, plant received what it needs. It doesn't have to kill or destroy to get that 8% to become full.

With this, it brings huge changes. In a way, this is what I said to you years ago. And now it's in the plan of the development of the, what we call, "space cities," we have no restaurants. We have no hospitals, except for what you call it, emergencies, accidents and emergencies. Even those, when they come in, they go through the new process. Because of this, because we'll feed the man that shortage protein in the air he breathes, in the environment he walks.

What is surplus? What he has already created as a CO₂? The creation of the CO₂ scientifically on this planet led to creation increase of the Oxygen and Nitrogen principally that it led to life, to creation of AA. Now we can do it in open. You can see the ring, it is so clear. And inside, in the center, there is a system which has created this ring. (1:46) Then you understand how easy it will be, but in a way, what is needed to be converted will be converted in environment. That when this AA rains, it rains on the plant, on the dog, on the man, on the beast, on the oceans that the fishes eat, and none shall kill.

The global warming is a blessing for man to walk away from killing if he understands how to use the technology. Years ago, when we were in Ghana, the guy who now, we know where he's gone to, Benjamin walked into all the time, and he had a big belly. I said, what happened? He says, "Mr. Keshe, I just take one stick of AA's from the Gans box every day, and this is what's done to me. I'm just getting fat on the belly." We said, good.

But if we create structures over the cities, structures within the homes, structures within the fields that delivers, converts the proportion of AA's for its citizens, and in absorbing this energy, they do not need to feel hungry, would a man kill? (1:48) Would a man lie? Would a man steal? Would a man do everything else? Now the knowledge is in our hand. Knowledge is part of the possession of the Keshe Foundation knowledge. So, the CO₂ and what was missing from inside this planet, in using the same planet structure, becomes to subsidize, to give back, to the planet.

If I put a dog on one side of this ring, a man on the other side of it, a fish on the other side of it, a bird on the other side of it, a plant on the other side of it, they all will receive what they need, what the short is in their body. And none of them will kill another one, because it's not hungry. And this is where we hit it. This is where the Keshe Foundation now is working on, and working with it, and we'll develop it to the next stage. This little ring you see, it'll change humanity beyond. Because as we have shown you, as we've proven it, now we deliver it on the lampposts of the street. We'll deliver it inside your home, instead of the lights on the ceiling, in your kitchen, in your bedroom, in your sitting room, in the corridors of the power, where the politicians not only are hungry in the stomach, they will not be hungry for power. And this is that stepping stones for a change in man. (1:50) And this is where the change will come.

One of the most geniuses of the nation cannot make his mind what has hit him. And he's still in dilemma, how did this happen. They cannot stop the process of the science. But in time, they'll come to say, we understood, we saw it first. But now, this is how the, this is part of the test for development of the new cities, space cities. This is how in the Space we'll feed you. It's your emotion, we'll change it to beef. You'll change it to steak, you'll change it to bacon, and it becomes a Sunday breakfast bacon and egg for you. Your emotion will convert this to pleasures of life and physical absorption of what you want it to be. It's very interesting. What is problem in the global warming now becomes a feeding system, now we understand the knowledge. And not only understanding, we develop technologies to do it.

The reason you see this as a ring, because inside it has been covered. And the cover has been taken out to see the ring, to show the ring. And this goes back all the way to the sinks and everything you see, but in a lesser dimension. (1:52) If you would have put another unit on the sink, all this would have been full of fat. Where from this ring to the system is full of fat, pure AA.

All I need is to change it slightly, then it become water, satisfy your thirst, as some of you got flooded in the (Linz) system. And then if I change it a little bit, it becomes something else. And then you understand how we will control the whole emotion, the food, and the existence of man in the Space, in the dimension of physicality.

I hope you understand what this means. And I hope in the future, the world of science will come to develop this in a much bigger, bigger way. As we are setting up to build the first space cities, we are testing everything that it is like in the Space. And this is what I said. When you build a space city, it has to be totally exactly how you travel in the Space, not just by name.

Any other question?

Q: ... What exactly do you mean when you say, when the Messiah comes? Do you mean it as it's written in the old books, or is this about a new revelation?

K- Yes, it's about the new revelation that you are the Messiah of yourself, if you haven't understood it up to now. (1:54) The revelation is that you always blame the others. He stole the tablets. He didn't do this. The other one did this. Now, yes, the revelation is for you to understand that it's you who's the Messiah of yourself.

So they couldn't tell you because they couldn't rob you as much as they liked. We tell you the truth because we don't need to rob. We need, we ask. We don't stash away. As I said in the London teaching, many

Knowledge Seekers offered us land and properties, schools, and God knows what. And we refused over the years. What's the use of having land? To build more temples, to create more fallacies? We build our home in your heart and your Soul. And we have conquered the Universe with it. Don't need no land. But as is a habit of the man, you have opened the banks and you have to pay for services which are free for the rest of the Universe. So we play your game. We need it, we come to you. And we are selling to get it the correct way. (1:56) When we are short, we ask. When we lose, we lose together, when we gain, we gain together.

So, don't think they forgot to tell you, because you are the one, you are the Messiah of yourself. So, who has fooled who, and who wanted to be fooled? So the new revelation is, it's in your pocket. And you're wearing the jacket. The magician hid it in your pocket. And you didn't put your hand in your pocket to see what was hidden. Don't blame the magician. He was good to fool you enough, in the name of all the religions and all the ?? tricks in the world. With us it's as strange as you, put your hand in your pocket and see what's in it. It's empty, because the actual thing sits inside. You don't need to feel it with your hand. You have to feel it within the emotion within you. And you have done it. That's why, as I said, there are no Keshe Foundation temples and the Keshe Foundation holy books and the rest. Because the truth is you, and you sit within it. The rest, we just show you where it is. And even that, we don't ask you to give some of it to us, because we have enough. As we need, we receive from the Soul of the Creator. (1:58)

Any other question?

Q: ... The new feeding system by way of AA's. Is there a possibility to feed, for instance, the Palestine Nation in Gaza, in one go? ... Is it possible to feed the starving people in Gaza now, with the AA?

K- We can feed everyone with this new technology. You go back on the Gaza, yes, we all feel the pain, we know. But you have to understand, this is the beginning of a very big end. I tried to avoid this, but in a way, it's not, you cannot avoid it. And this is going to cause a lot of problems for Keshe Foundation, what I'm just about to put out, and you will understand it. But we are used to it. But maybe it always brought good things to us.

For the first time in the history of Islamic Republic of Iran history, in past 40 odd years, (2:00) Iran has accepted the two state policy of the United Nations, forced by Israel. In the last emergency of United Nation meeting, which became ratified, for the first time, Iranian government has signed into the two government policy. This would have not been done if the religious leaders between Vatican, Iran, and Israel have not achieved or reached understanding in the background.

We understand this to be as if you remember about three, four weeks ago, five weeks ago, when this all started on a Sunday. And on Wednesday, I directly requested and put our thoughts to the Iranian leadership not to get involved, withdraw from what you planned. Then when the reasons was given to them, and then on Thursday I explained again openly, Iran would change policy and would help from moving on with what was planned, that would have brought demise of Iran. And the wisdom of Ayatollah Khamenei of Iran with advice was given, followed the path. And overnight, Iran changed position.

And that change of position has brought a new dimension in political world in what we call, Middle East. But this is again temporarily, because Israel and the Vatican will use this to turn back on Iran once they finish with the Palestine. And this is what the warning sits on the Iranian leadership. The agreement between Tehran, Palestine, (2:02) what we call, Tel Aviv and Vatican, is a temporary arrangement. We know this to

be as we see Americans have moved and are moving massive forces in directions to counterpart the new, what I call, quadruple system of the China, Russia, Iran, and North Korea. They'll use war against the other.

In the recent conference in Tehran, which was set up by the four, it was to show that attacking Iran will bring South Korea into game. The intensity in Ukraine will increase, and then the Americans will be engaged on five fronts. They cannot respond. Japan will be taken off operation directly by South Korea, by North Korea. The game has heated up much, much bigger than Palestine. The five day peace will lead to another bunch. But you have to understand, the Iranians found out and on request to pull back at the right time, left the Hamas to play on its own, where it was totally different planned. Saving Iran, saving the history of 2,500 years of what we call, nation, was understood by Ayatollah Khamenei of Iran, withdrew overnight the flags of Palestine, came down from Iran everywhere on Thursday, when the advice was given.

And just go, as I said, into the United Nations, Iran, for the first time, (2:04) has signed a two state policy, which has been against the principle policy of Iran from day one. This is why we see all the plays around and everything else. The Israelis wanted what they wanted, they got, American got what they wanted, a 2 state, Jerusalem will become the capital of Israel, by joint policy capital, very much like it'll be in the long term, like Brussels. And we'll find a temporary solution and maybe a permanent solution.

But now, in the past, it used to be the communists and imperialists in the West. Now has become those who oppose military aggression against one nation, which is more or less America, forcing Europe into this dilemma. But America cannot fight in four fronts in a very heavy wars. Because you've got to understand, South America is set to poise, and create a bigger problem for the Americans.

In that way, this 5 day peace and the rest of it will be a part of it. And I warned the Iranian government, do not get fooled with what agreed and seen by Ahmadinejad in Tel Aviv in past few weeks. Because it has to be understood internationally. All the negotiation with Israel is done by Iranian, ex-president of Iranian structure, Ahmadinejad, because he's half Jewish, or he's fully Jewish. And he has the connections, and he's been always the intermediary between Iran and the Israelis, even during the war of what we call, Iran-Iraq. (2:06) And this is why a Jewish guy became to become religious, what we call it, president of an Islamic nation, on the banner of being Muslim. And he is negotiating in the background with his connections and his bloodline with the Israelis. And they have brokered this, what we call, negotiations.

We are watching it very closely. And this will bring long term peace, what we're looking at. But temporarily might create a huge pressure on the Americans. Politics of Gaza is not just ?? breathing. It's just trying to stop the mayhem to expand. But what we call, interfaith acceptance of the Israel, the what we call, ?? Kenessad. The Ayatollah Khamenei of Iran and Vatican has brought this temporary peace and what we call, Hamas is getting the hammering of it. And in a way, Iran had a long, long standing grief with Hamas. And this allowed it to happen.

Once the situation settles, which has risen in past three, four weeks, after position change of Iran, there is a skirmishes, because there are still some people loyal to what was accepted before, and they want to enforce it. But Iran's central government, with Ayatollah Khamenei, are withholding everything back. They are showing power. Because if they don't show power, it'll (be) other things.

But in principle, we have seen Chinese winning all the cards. Americans literally devastated, (2:08) are skirmishing again, like Vietnam out of Ukraine, in a different way. They are trying to show they are still in power with a few naval forces here and there. But in general, any attack on any of the four nations will leash,

what we call, unleash, North Korea on South Korea and Japan. That's for sure. And this is why Americans are moving, for this might stop. But soon this will all be stopped.

And my wish is to help, if ?? I see the suffering of Palestinians. But in so many ways, we can feed. We can do a lot of things. But the Israelis don't allow us to go in. Secondly, there is a lot of land to be claimed after this. You will see part of Gaza will become part of Israel. This is what is already agreed in agreements in the background. The expansionism into Gaza and trying to push the Palestinians to be accepted by the Egyptians to go into ?? Sarnia (Sinai) and the rest of it. This is why initially we offered to move the Palestinians into Iran temporarily till it's done. But they, what you call, they offered for the students to be moved to Iran or people who are in university that carry on with their education. In the other hand, we'll see how they expand this and how the position will change.

There is one thing for sure. There will not be a state of Israel or Palestine in the coming time. That's for sure. It'll go back to what it was, (2:10) because the whole structure is set to go that way. The whole structure is set for the end of Judaism by itself, not from outside, by diminishing numbers. And this will take the next few decades. It cannot be done. Because you see, if you rocket them the way Hamas did, now you become terrorists. But if the Israelis are killing their own soldiers in the hand of Hamas, if the Israelis got killed, 1,000 some of them, by the American rockets which came from Ukraine to kill them, nobody talks about it, because they've done it to themselves. But when the other side hits, even with the tools of themselves, then become a big problem.

And this is not the first time we've seen this. If you go back, we saw what used to be known as the Iran-Contra, where the Iranian took weapons from the Israelis, and the CIA arranged that, for the Iranians are paying the Israelis to show they're collaborating. They paid to the, what you call it, South American Contras for fighting the left regime in South America (Nicaragua). And unfortunately, the dealer in the middle never got paid.

And this is what we see again for the second time. The guns were bought by Yasser Arafat to go into Israel. The Israelis captured it. It wasn't their weapon. So they sold it back to the Iranian on the Contra, what you call, affair. And then, now again, the Palestinians did the same. (2:12) They bought the guns this time from the Americans, from Ukraine. And they came to use it. And they use it. And now they're getting it back. And the Israelis are killing their own selves. Every time they came to bomb it, the Palestinian knew where they were coming, they put the Americans there and they got killed.

So now they're trying to find a peace time to get their people out before they start killing more. Because this time they don't want to be ashamed that they're killing themselves while they're trying to free their nation. This embarrassment came with the killing of one of the high ranking woman officers of Israeli in trying to bomb a place. They bombed where the hostages were killed. There's a lot behind this.

And we can feed them. You've seen it on the table. But this religion group has to have come to an agreement. Israel will use the signing of Iran to two states after this war, heavily, and will push for it. And they have set the scene for this. This was the wish of Vatican, because there is more conflict set for the future to be created, which we are aware of. But we have taken a step for it not to happen. But this is why Tony Blair was now has been talked to be the leader of ?? , a British guy who's made 18 billion out of government, has to do to become governor of Palestinians. So there is a lot of diplomacy with the British behind it.

The Palestinians can be helped, can be fed. For the moment we are sitting on the sideline and watching. And it all depends how next step will be taken by the Iranian government, Ahmadinejad's negotiation team in Tel Aviv. We'll see.

And it was a wisdom of, and understanding in what was passed as a message to the Iranian leadership (by KF). (2:14) And they took that advice directly the same night and they changed position and saved Iran from destruction. And we go to the next step, and we see how the next step will be played.

But before that cuts takes any shape in the next three or five years, China will take the policy, and we'll see the change of policy still comes through "technology in exchange for peace." We tried to help Palestine, but as I've done for decades. But this time, the religious leaders have drawn the line (have made a decision), and we'll see what happens.

Any other question?

Q: ... If the body is a Star Formation, the following is unclear to me. Where is the fourth point? We have a STM, a STP, and P. Do we create the fourth point with our hands? Could you explain something about this?

K- How many rings do you have in the MaGrav? Where is your fourth point? What you call the fourth point, you have to change it to the fields. It's not a point. It's a plasma. It's totality. It's you who has to understand which part of this, which direction, which strength of it you want to travel in. The fourth point is the motion of the fields, and your emotion decides it. (2:16) In the future teachings, I'll explain more in detail how physical emotion can be connected to the Soul emotion. And with it, bring changes. And creation of what we call, new dimensions. You just got to bear for the other students to catch up. Most of them are still in the state of tomato (Ketchup). We need to bring everything to get the sauce made.

Any other question?

Q: ... Do you use two headphones tomorrow, and can you prepare? Thanks.

K- You can use two headphones, but in a specific way. Those of you who took your UBESUS Headphones, for those of you, I've explained this before. The UBESUS which many people ordered and paid for, were given to the Knowledge Seekers, most of them, or sent to Knowledge Seekers during the London Conference. So, UBESUS are actually now out and we started a teaching of how to use it, tutorial from the Sunday the 3rd of December, and then we'll publish with their permission the list of people who have bought this system, now what you call it, a license holders, (2:18) and you can go to them, you can travel to them to use it. It cannot be done with the .. This is a new dimension into totality of the process.

Where you connect with these Headphones the STM to the physicality of man. The system you have the headphones, two headphones with the Apple, is connected to a different system. The UBESUS is connected to a different system. And one is like in the Soul and one is the STP. And those of you who have the two systems, like the people who are the licensees, about 8-10 of you, you use a combination of the both. And you feel the fields, emotionally more than physically.

Those of you who don't have it, you can use two headphones or two mobiles with two or one mobile with two splitters on it, that you put one in your head and you put the other one on each hand, back of each hand, just try to tape it. And make sure the left and the right with your head is in the right position. When you put

the left, of left microphone or the one with a, what you call it, the microphone on it in the back, you have to put it, when you put the handset, on the other hand, because your left brain controls your right hand, if you understand it.

This will allow the STP and the energy from inside to direct in the right way, because we have controls inside which will control this. So you have one headphone on you in your ears, and the other headphone for example you put on the right side the, (2:20) what you call it, the one without the microphone, and you put the left side on the back of the left hand. You just put a tape on it, and you can stick the headphone. This way you create the right flow. And then it gives you more possibilities of feeling the force and the fields we create. You can use two headphones.

Tomorrow's test, for many of you, will be life changing. For many of you, if you really feel the inner strength, the inner field of yourself. And how this will change. Not necessarily you will see the light. You'll feel the enlightenment. And this will go on to understand how to let this enlightenment go. This comes with the "Birth of Mitra" on the 21st - 22nd session. And you will understand how to, when you receive this light, how to let it overflow, how to fall in love with the Creator and not with his Creation. And then we go through the next process.

These are part of the structure, as part of the teaching we're taking forward. It looks hodgepodge to a lot of you who don't understand it. But those of you who go through it, and then your children and next generation will go through this training. There is no other choice. All these recordings, all these teachings will become the part of the education of the children in the time to come. That from first year in the school, they understand the control of the Soul. They understand the control of the fields. They have to understand there is no punishment corner, (2:22) because they all will talk good, live good, and act good in respect to each other. The teaching of being correct will come from the onset of the teaching in the house, in the schools.

And all this, what we do now, in the process we set up, in the system we set up, will be replicated to that point. So you are the first, what I call, students. But all this will become as part of the structure of teaching of the future. Don't forget we are teaching you today here. We're working with the governments, setting up the Space Cities. We are setting up the structures for what we call, human disarmament from arms. We are working with governments to show the benefit of the new technology, and next step and next step.

And it looks very calm, but a lot of things are happening together in the background. And in time (it) will come. You know, they used to call them the disciples. You're not disciples. You're those who dissipate the knowledge through Soul, once you learn it, as Knowledge Seekers. Always, the students become teachers. And if you teach well enough, your students will become good teachers. And we are teaching our students well to understand.

Any other question?

Q: ... Can we also use the Nano coated mirrors in our hands to get a better flow? (2:24)

K- No, not for tomorrow.

R: That was a big no.

K- Because those are not created for, this is for man for himself. These sessions are for man to realize without any outside influence. And these "Nano discs" are for a different purpose. You can use it. See what you get. Especially those of you who have the one with the holes in. Those will be used very soon. We'll explained to you how to do it.

There is a, what you call it, new developments and new structures, which are coming into operation. All of those of you who ordered the Cosmic Ray pack, should start receiving it in the next few days, because they're just coming into completion of production. Then you will be able to communicate inside. You are not connected to the mainframe or to anything else. They are separated in the structure outside. Then you can communicate with those who have other systems. And you will understand how the communication will be done. You cannot use it in conjunction with the UBESUS or the other ones. They are made only for communication. Then the energy to produce for interaction. And they are set up totally different than what we call, the Health Units and the other Units we provide.

You got to understand the knowledge and the technology within Keshe Foundation has so advanced. (2:26) It's very much like we cannot use orange satellite system and facilities on Apple, or Samsung's on Apple. We control the Samsung and we control the Apple, and we don't let the two to mix, they're two different technologies. And it's very much like Androids, but we control all aspects of it. You cannot mix it. Even those who purchased the, what we call, license for the UBESUS, they cannot just go into the system, because their Unit is kept outside, when it's specified for what disease they want to use with Dr. Kern, it'll be moved in position, then we'll move outside. And it's well controlled. We are building a structure that we have the freedom of the knowledge, but we have control of the knowledge too.

Any other question?

Q: ... Which Gans is stronger, bones in caustic hot water or burnt bones?

K- What?

R: Which Gans is stronger? Bones in caustic and hot water or burnt bones? I guess they're talking about making Calcium Gans, perhaps?

K- What are you talking? (2:28)

R: You mentioned, I think, at one point, using chicken bones or cuttlefish, I think it was.

K- Yeah, that was for easy to get. Before, what you call it, we... it was easy and fast conversion. That was done for.

R: So which would be stronger?

K- It's all the same, depends what you need, what you want to do with. We are, as we're talking, our team are wrapping the UBESUS and everything and leaving Austria very soon. They'll go, hopefully, to the exhibition in London. and the end of an era, an end of the ?? fruit of our work in Austria has started. And it'll be what I call, beginning of another structure. Our work in Austria has come to an end, and will come to an end in what I call, step by step, as UBESUS, which is a symbol of the new technology, are getting packed and wrapped and about to leave. And as we always share a lot of things with you. You saw when they came into Austria,

(2:30) and now you witness their departure. A new era for Keshe Foundation. And we had to close our operation. Inside this black wrapping is one of the most advanced technologies man ever know leaving Austria with Keshe Foundation.

Any other question?

R: You have completed our questions for today Mr. Keshe, congratulations.

K- Again? That's good, we're getting... I think now for people it's hard to understand, how the emotion of themselves, and how the process of emotion, has been the dictator of the whole process. And they always were hoping somebody will make a MaGrav, somebody will come and assist them. Now they find out they are the system themselves. And this is a shock to them.

The transmutation of light tomorrow is the next step in teaching. And then 21st, 22nd is the next step of teaching. Now I created, I can receive. Now I created, I can give. And I'm open to give, and that giving brings me a new meaning to loving. A lot of you, if you go through understand it, and in a way not understand, to get enlightened, in the 21st, 22nd session, in Birth of Mitra, (2:32) what we call, the night of ?? Yalda, you will learn, and you will be touched with what I said, when you "love loving." And that will come out, it's a very, very... very strange feeling for many of you.

Q: ... I had a discussion, last night, ?? this has been, one thing I was trying to figure out is. We talk about this planet is a nursery that we come and we kind of get wisdom, if we get wisdom, and we leave and we create another planetary galaxy someplace with that wisdom. We become, we are a seed that, we become a ?? seed in the ?? will. So, if that's the case, the defect of the planet probably is part of the plan, because if there was no defect, then there wouldn't be any killing and hate, all that, so if there is no hate, how could I understand love? And how could I become wise? Because, if from the point of inception...

K- Can I, can I come in Azar, can I come in? Do you need to cut yourself to know what the pain is? (2:34) Or if you have blood? Did the man had to go through, coming to understand to kill and not to kill, if it was a perfection?

Q: No, no.

K- So where are we going?

Q: So, how does the wisdom comes? I mean, if everything was loving, how do you get the wisdom? You always said there is a pain, when you said there is a pain.

K- There is a wrong philosophy, and I call it partially, it's like a Chinese proverb, I've said that many times. It says, suffering makes you wise, wisdom makes you rich. What about if we change it to joy, happiness brings you wisdom? Wisdom of love, wisdom of understanding the Creation. We've been brainwashed to accept this. We have never been ?? shown ...

Q: You said it to us, we didn't say it to you. You said pain brings wisdom, so we are...

K- Yes, because this is the way you understand as a Man. You don't understand the joy, what it'll bring. When we fall in love, we suffer, we crave for the love, we do everything to get the love and when we get it, what happens?

Q: It brings us joy.

K- Yes, but then we cannot hold on to it because something happens, so that the love falls in love with another love and then you lost the love. Or you get old and dies, you lost the love, or whatever. So, it's for us to understand.

This is why we start, not start, we go in processing to the next step. (2:36) That there is more joy, there is more wisdom in loving, in giving, than actually suffering to get it. When you love your child, and he loves you back, you give more back. Do you let your child to suffer for it to appreciate that you love her more, then next time you beat her up and you want more love, you come back? This is where everything has gone wrong. I always said, is in the, in the proverb of Chinese. Now you learn the proverb of Universe.

Q: Okay, I'm going to go with the proverb of the Universe then, so that's better.

K- It's not better, it's the reality. This is what you understood now, you matured, you understand the next level of it.

Q: Thank you.

K- How can you tell people, when you don't have, when they're not ready, when they're not enlightened, to go to the next step? Now they're ready, now we're going into that phase. And it's not that all will go together, it's always been gradual. One, two, fifty, a hundred, a thousand, as I said many times. Keshe Foundation in October, September of 2004, 2005 was one man. Then became two, and then became three. And then today, as we see it. And now it will be the same. We started ?? full teaching. Many of you come into this teaching. Many of you come into the sessions. And then you start understanding. And then if you love a man, most probably by next month, (2:38) you will love loving the man you are with, not just love the man. If you are enlightened to understand the STM, and the Soul is what's there. It's not a physical commitment, it's a life commitment through the Soul.

Then you understand, if I'm wasting my time with this man, or it's time to, what I call, blow the lamp, to let it go and bring more in. I have said, and I know the lady is a listener of the Knowledge Seekers in this programs, she always listens. Years ago, when we used to run the Keshe Foundation in Belgium, there was a lady who was everywhere. Even she kept on coming back as in the claim that I'm sick. It's this, it's that. I said one day to her, can you tell me what is wrong? There is nothing wrong with you. She said, I'm in love with you, Mr. Keshe. I said, this is a false love. What's the reason that you are always here? She said, I have a problem with my husband. I said, what is the problem? She said, I have a problem with my daughter. I said, so what is the problem? She said, I love my man beyond imagination. Since my daughter born, he's so much in love with my daughter that he's forgotten me. And I'm searching for that love. And I have become his biggest enemy, and I've become an enemy of my child, because I'm looking for love. I said the problem is you, not them. (2:40) You should be proud that you created that daughter, that the man you love loves her so much.

In a way, you have to love him so much that he loves what you love so much more than you and puts everything in it. She started crying. She said, I never understood. I said, go and love the man who loves so much what you created to love. I never saw her again. She wrote a message years later, "You are a true master. I found, and life has never been so beautiful as you said. It was me who was causing the pain, because I could not accept. I wanted it all for me." It's us who has to understand. And, does not have to come through pain. It's much sweeter through love.

Thank you very much for today. As Rick said, we answered all the questions. I hope if there is no more. See some of you tomorrow in the session of the light. And try to come to be mature in Soul. Don't come to understand, don't come to see the light, (2:42) come to be enlightened with the love of the Creator, which is you. Thank you very much, and see you some tomorrow, and some next week.

K- Sorry Rick, I just received a message, says, "Can we still sign in for tomorrow's session?" Yes, we close the session entry tonight or tomorrow morning. So, yes, you still can join in. But for the, what you call, December, with Mitra, please complete, because I would like to create a condition to choose who and how we place this, that it brings the next step for us. And I'll explain that when it comes in the Christmas week, New Year, what will be done in that, what you call, the session. Thank you very much.

Daughter of Mitra - successor; KF launch own space program; London showed Weight Reduction - start Live viewing for leaders to see - change; Travel speed of Soul; To leave Moon dome - need Soul; Travel Can travel Space with P; Both systems for Soul & P made; Chinese producing UFOs; Speed of light - craft dissolve; Overcome fear of change; Measure speed of M fields magnet - higher than light; Dec 22 - experience true love - change life; Creation of light in hands - results; Hide understanding to fit in; red Dot Pain Pen; Show transmutation P Chinese conference; "ex" prison sentence - try to tie to KF; Define dimension STM - STP - P; STP is love; Eat for emotion; Orange calls to eat it; Religions deny Soul; Anti-Christ; Enlightened while dreaming - Tesla; Soul is fuel tank; Spiral - becomes weaker goes in - reverses; Change polarity; Bedbugs; Markray - end of year; Saved KF last week; Soul can't be killed - offer to another - become part of; Suicide forbidden; Trained to work with world leader - background; Satellite Souls; Bypass Academicians to Commercialization for acceptance.

ENGLISH TRANSCRIPTION

(:14)

K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back and we hope, as Rick said, we'll have many endless teachings to teach, to learn and go forward.

As we all know, life has a limited span in the physical dimension (D). On my passing, the daughter of Mitra will take over. And she will teach you and take you across. And I'm sure the Soul of Rick will be there, will still serve in different dimensions and directions. So it will be an endless, because every time there has been new time, new problems, new understanding, new solutions needed. And the daughter of Mitra is fully aware and taught and versed with it.

In time to come, man will learn that the Passengers of the Universe have no limit. No limitation in speed, no limitation in thoughts, no limitation in generosity. And this will come to be part of the structure of life for all of us. Does not matter we take dimension of physicality or we don't. We go to the position to understand how it works and the way it is.

As I said, we take a new turn in guiding, in taking you into new dimensions regarding the Soul of the Man (STM). But you have to remember, we're still dealing with the physicality (P) of man. The expectation to see one and then to go to the next, to believe in one and then go to the next, is still part of the work of the Keshe Foundation. (:16) We still work in the dimension of physicality. We still negotiate with governments. We still do research. We still, now Keshe Foundation independently will launch spaceship programs of its own, independent of the nations. And so you will start seeing a lot of physical dimensions work, plus the work of the Soul, at the same time from the Foundation.

As many of you attended the meeting in London, you saw for the first time in public, as I said before, the weight loss, how we produce reduction in weight, and then "lift and motion." In the following weeks to come, we will bring you sometimes 'Live' on the floors of the Keshe Foundation Research Centers, be it in China, be it somewhere else, for you to see Live how systems reduce weight, how system will take shape in lift and motion, that that gives you understanding more. That gives you more confidence that the technology is not just one-sided. Because you have to learn this. When we take you to the Moon, we take you with the speed of the light, with the speed of Soul, with the craft as you like it. But then you have to get out of the plane. You have to get out of the Spaceship and walk on the floors, on the ground of the Moon.

We can give you a dome protection of the Earth condition that you still feel good you're not in a monkey suit. But as I said before, when you want to cross that field to go and see actually how life is on the other side of the dome, you have to travel with what we call, the structure of the Soul. Then you see how the two teachings come together. (:18) It's in a way, Book 1, now we are going through Book 2 to get you there. And Book 3, when you arrive there, how you manifest yourself in D of physicality.

The biggest scare for you will be to see yourself in that dimension. And if somebody puts a mirror in front of you, and if you have the eyes to see on the Moon, outside the dome, would you recognize yourself? Would you understand the Soul is mine, the physicality is the condition of the environment?

So in the coming weeks, as we teach you more and more about dimension of the Space travel through dimension of the STM, which has been the pattern, we start giving you that confirmation of both physical transportation, which then can become transmutation when you feel like it, when you want to. In a way, we

get many people on cruises. We get many people on aircrafts. But very few jump in the ocean, and very few take a parachute and jump off the plane.

Then this comes to all of us. We are showing you the same. In the coming time, as you see, as we showed in the London conference, the reduction in weight. Now we show you the physical development, "time to time," while we push forward with the teaching of the Keshe Foundation, with the way you get out of this ?? (dome), what language you'll speak on the Moon, what food you can eat, and the rest of it.

It's very easy. As I was explaining to one of the Knowledge Seekers (KS) very recently, (:20) when we were in London, England is a very typical country with Chinese restaurants. But in every menu in Chinese restaurants, there is fish and chips, or chicken and chips. Because some of those who go to the restaurant don't like to eat Chinese. They never experience it. And the fear of experiencing new dimension, they stick to, can I have my fish and chips? And this is how it will be with some of you. You will go to Space, but you'll have that fear of going to the dimension of actually what it means to live in Space, going through the transmutation.

Just because you have not gained the strength to go through the transmutation to feel the dimension of the STM, does not mean you cannot be the Passenger of Space. Even though your Soul is aware that any time you decide to let the Soul of Physicality (STP) to interact with the STM, you can become that Passenger of the Universe through your STP in connection to your Soul. So you take over. You go to the land of what you call, the "dream land" in the time of the man on Earth, but the reality in Space, in interaction with the dimensions.

In a very recent communication with world leaders in military and the rest, discussion came on the table, very simple, and that was, "Mr. Keshe, we are not interested in that part yet. Let us get our people to understand this side before we jump to the other side." But the strangest thing is that this side will come much faster than the other side, because the teaching is in depth. Now the Units are out. Now we use the Wellness Centers to teach you, to bring you, part of all of you who go through the process of the Wellness Center. (:22) You go through the process of understanding, gradually become those who will travel through the Soul. Because it's part of the system, we'll set up to be interaction with the solar system, where your Soul systems will allow you to carry on to the next step.

What we'll see, as I said, we'll take you with a plane, or with a UFO, whatever you call it, to the Moon. And then you'll have to jump and do that. The new systems which has come into operation, and now the Units are with those who are the licensees of the Keshe Foundation, will take you through that position of the two-way travel simultaneously. Those of you who go through the Wellness systems from now on, using the systems which is with the licensees, you have the two options. Now you already started a process where you can go through the Soul. And at the same time, you can work in the dimension of physicality (D of P). We will see massive changes in the process of what is to come.

Keshe Foundation Wellness Centers will announce this week, or maybe soon, that they will handle specific cases directly, that they can bring that change into the Soul, that life is suffering physicality, conditions which now it's a dream. Many of us suffer with. There is no solution. Give me a pump, give me an injection, give me something else. But there has been no ever-ending solution. Because the world of the science of today have not understood most of our physical conditions, has a psychological or what we call, the Soul interaction. We have covered our Soul, work of our Soul with our physicality on the banner of "psychosomatic," (:24) psychological, in a way, it's a Soul you call. It's to do with the Soul. It's got nothing

to do with psycho, because psychologically, the emotion of the physicality comes out of the interaction of the fields of the STM with the STP.

Then we understand how we can maneuver, we can use this. And in the process of in the next few weeks, we'll see, the beginning of the process of the transfer and transmutation will come together. And the new systems, which are now out with the licensees of the Keshe Foundation, with the licensees of using the systems for a dual system, has already started. It's not that it's going to be. It's already here. The name, the email of the licensees will be released in the coming few days, where you can go to them and then be benefited from both dimensions.

Then you understand how the system has changed, how a new dimension is added. This is, you work in the dimension of the Soul, you work in the dimension of the STP, you work in the dimension of P of the man. And then these are all trial grounds. These are all test grounds for the step to come when we introduce the, what you call, the UFOs, which are now coming out in conjunction with the Chinese military and Chinese government, into the next.

We heard in the past few days, Chinese have launched a system that will travel with the speed of light. And they hope this to be launched by 2025. I wrote to those, the military, and I said, what's next? First of all, have you understood? You just can send the system with the speed of light. (:26) You cannot send the man with the speed of light. We see when a man goes through a few G's, what happens. You will see, and we have seen, how shrinking and shaking, and everything else of the body of man. (Just one second, please).

In that process, in that dimension, in that process of changing, what .. are the people going to do? We do not even know that even if you travel with the speed of light, what will happen to you on the other end? The speed of G sound barrier has brought fear to the man. Man goes unconscious after so many G's. How are you going to transfer his Soul? How you are going to transfer his body to the new dimension? This is what is exciting to travel with the speed of light. Now they say you can do it in 2025. But would a live man come out of the system? No way. Man at few G's in fighter plane goes unconscious. Man in raketwing and rocketing will go different dimension. What would man do in the speed of light?

So the answer is what we have put. What is the teaching? It's the way the Universe (U) works, not the way man has liked and would like to boast about it. (:28) We are going to travel with speed of light. Are you sure? Would your system ever survive? Would it not go through the transmutation of energy? And you have nothing. And then we say, we lost our system. Because you never understood a system traveling with the speed of light needs protection of the magnetic (M) field to not go through that barrier of sounds breaking, and then the rest of it. Now you understand.

Does not matter how man develops his technologies, physical technologies, speed of light, or whatever. If man does not learn to protect the physicality of the man, to protect what we call, the craft, in the dimension of universal magnetic fields, man is still playing with a dream. As I said to the Chinese, in a very direct way. You're going to go with the speed of light in 2025. Then what? Can you carry a man? Can you carry an object and come out on the other end? If the speed of sound, multiple speeds of sounds, creates such a problem for you, then what's going to happen with the rest of it? Does it going to go in the dimension of weightlessness? With what weightlessness will be? If a few meters above Earth gives you weightlessness? What's going to be done to you in the dimension of higher Gs of the different atmosphere, different conditions? Now you see. Now you understand. There is no solution for man to travel in the depths of the

Universe without fully understanding the interaction of the fields, fully understanding the existence of the Soul, (:30) fully understanding how he's going to transfer and transmute.

Technological gain does not bring maturity of the Soul, does not bring maturity of understanding the work of the Universe. And this is what the scientists of today are trapped in. This is how the scientists, from one excuse to another, block new understanding, block new technologies. Because they don't understand. They have to stop the rest not to understand too. And when they understand, if they can steal it, they put it in their own name, not to show that it came from somewhere and it's not from them. We've seen that with Stephen Hawking. We've seen that with other, what we call, academicians in China and other scientists.

Now you understand. There is no choice, there is no option, there is no way. Man can travel the depth of the Universe with the speeds, over the speed of light, even the speed of light, by order of magnitude, if he does not understand, first, how to transfer itself to the energy of itself, that energy can transfer without physicality, then manifest itself in physicality. And this is exactly what all the teachings of the Keshe Foundation are.

As you see, we develop systems that allows your Soul to expand, for you to understand the work of it, while at the same time, as we showed in London, we're still developing systems for your physicality to understand how it will happen. What's the next step? Because, as I said, not all of you like to eat Chinese, you still go in and ask for fish and chips. (:32) And a whole lot of you go to the Chinese, sit on the table, but the fear does not allow you to touch something new. What's going to happen? Would my body accept this new way of cooking? And you still stick to that essence, taste of your fish and chips.

As we've seen, many of Knowledge Seekers, (say) I didn't feel anything. Because in the background, the fear of new brings a fear of, I keep. And because it's an emotion of physicality, does not let the STM to expand. And this is a rule. Thy shall not steal. We cannot force you. We can take you to the water. It's you who has to accept and drink the water. Otherwise, stay thirsty and look at the other horses drinking and say, I don't know how to drink. I don't know how they drink. All you need is to bend your head and stick your head in it.

New ways, new technologies, combination of new technologies will come into operation, as it has now, as we are preparing in both parallel ways together. We are preparing governments, nations, military to accept, to understand the new dimension of physicality in every aspect, while we're teaching the Knowledge Seekers how to travel with the speed of Soul, how to travel, how to interact, how to transmute. That in the future, you have the option of both.

When we did the very first test in Ghent University with the electrical engineering department, (:34) in assessing how we can lift the systems, how things can go, it was very strange. The limitation came 200 kilogram. We asked why. First of all, crosswind. Secondly, most of the elderly would not like to feel they're off the ground. So we have to stick to the ground. Reduce a 20 (tons) to 200 kilo. Reduce a ton car to 200 kilo. That elderly who have the fear, know they still have a wheel on the ground. What about the youngsters? What about those who are adventurous and would like to take off? We have to make a legislation for it. There are no traffic lights. There are no legislation. There are no court of judgment of high speed and low speed in the Space. There is not even a system to detect what speed you travel, let alone to give you a speeding ticket.

I put this to you many times, maybe you understand today, maybe you understand in the future. Man, with all his technological advancement, has not managed to measure the speed of the magnetic field which comes out of a tiny solid magnet. We know there is a field, and they draw a line that it goes. But I ask this question

many times from plasma physicists, from electronic and electrical engineers. Can you tell me, what's the speed of that thing you show? If it's there, it's moving, you tell us it's moving around the Earth and has a tail, what is its speed? (:36) What forces would it create? What physical effect will have on the physicality.

In one of the very recent tests, the Knowledge Seekers in the background who were in it, they know what I'm talking about. We run a physical system. And we had no system on another table nearby. But it had the weight sensors. And then it started showing change of weight. I said, now you understand what you're dealing with? When you switch your system on, the magnetic field of your system pressurizes another object. And it shows weight. It shows reduction of weight. How come?

It's the same with us. We now monitor these things. We don't have the system to measure a simple magnetic field speed. And we are happy with the speed of light. The speed of magnetic field is so much higher than the speed of light that it's blind to us. We don't see it. We cannot see it. We have no system to detect it. These are the technologies which has to be developed. We do not feel, do not know. We come to false assumptions because we see some of it. We call it the speed of light. It takes eight minutes or whatever to take from the sun to us. My dear friend, the minute it leaves the sun is in you. It's part of you. Where have you come up with these eight minutes? Because you have a bicycle and you say it takes a bicycle from A to B, 8 minutes, (:38) doesn't mean that the jumbo jet will do the same thing in 1 microseconds of it. Or you're denying that advancement of the technology is not there. We just calculate the bicycle. As today's car, as I said before, we're still measuring how many horses. Now you understand.

You have to understand, you have no option. Now the technological development is going on both ways. How are we going to link the horse to the car? Do we put 150 horses in front of the car and run them together? Or do we feed the horse 150 meals to have the 150 times more energy to see if it matches the car? None of it makes sense. But out of our own lack of understanding, we accepted both rubbish, languages. Now we have to. Now it's the job of the scientists to measure that magnetic field strength, that magnetic field dimension around the solid magnet.

As the scientists told us, we don't have a tool for it. One day we will have. Now that we can travel with the "speed of Soul," we can understand that there is a higher order than the speed of light, then we'll see what happens. I'll give you an example. Ask your lover, your partner, your mom, your dad, whoever sits next to you when you're asleep and watches you. And you go to sleep. And then you wake up. And you tell your observer, (:40) I had such and such a dream. And we know the dimension of the Soul travels.

Ask the observer, did you see any light coming out of my body when my Soul traveled, when I went to dream? Did I become a ball of light? When I went in "dream land," I went to see my grandpa, who died decades ago. And I went to, God knows to this island, and I went to another part of the Space. Ask your observer, did you see me? Because the speed is going to be the maximum speed of light. Some light has come out of me. Or the speed of the travel of the Soul is so much faster than the speed of light that we don't even observe it with our eyes? The same as we cannot see in the dark. We cannot see the higher dimension of the fields. We are narrowed to the magnetic field strength of this planet for observation and no more.

Our observation in another dimension when we manifest ourselves will be fixed by that environment. Maybe in that environment, we see 10 times the speed of light than what we see on this planet. So are we going to be blind there? Or now we see, we observe, we see a higher strength? These are the realities that us as Knowledge Seekers, as those who are advancing in technology (T), will come to be mature to understand.

We have to. We have no choice. We have to develop new tools. We have to understand it's our lack of knowledge, and not the ignorance that it doesn't exist. (:42)

Wisdom comes from openness to understand, from openness to accept, to analyze, and develop, and go further, not by denial to lock it away because then it shows I'm stupid. Now you understand how, when we start telling you a new dimension of teaching starts, new understanding of the Soul, the work of your fields. Do you still need to see a UFO in the sky to wait for it to land? Or you can ask directly in connection with what you have in knowledge, which you go to access to, where are you going? What's the next stop? We're going to planet Zeus. Can I come? I'd like to see the dimension of physicality. I'd like to be on that roller coaster, even though I can go with my Soul. And then when you reach near planet Zeus, sorry, the UFO cannot land in this place, you go, ok, we go back. Or you transmute through the dimension of your Soul back to the ground to where you want to be and transmute to that dimension and live. Or are you that Englishman who goes to China, still looks for a fish and chips shop, and expect all the Chinese to speak English? It doesn't work. The song says, I'm the alien in New York. You're the only alien which you made yourself alien, because you never understood the process of the work.

Now you understand. Now you have to come to realize to experiment it yourself, test it with yourself. (:44) In accepting a new dimension, you become knowledgeable. That's why you're Knowledge Seekers. You have become aware of. Now you're aware of, you cannot ignore it. How would I interact? When do I know I'm in a dreamland, or I'm in a physical dimension, or my dream is the reality of the transfer of fields and not in dimension of physicality?

As I said to a child in a classroom, it's like when you go somewhere in a car. You get out of the car and you walk away doing your work. Does it deny that the car exists and it brought you there? Or do you pretend that I have no car and I walked? Or you sit in the car and say, I'm here because I'm in the car. I came with the car. Anybody wants me, come in the car. Sorry, supermarket doesn't walk in. And just because you go in the supermarket doesn't mean you have a car. It's the same with your body. It's the same with your Soul. You have to learn your physicality is a car. And your Soul is you who drives it to the position. You can possess it and come back to it any time you like. Or you can go shopping in the supermarket of the Universe, knowing when I need it, I can call the car. I can go in the car and do what I like.

And this is the fear which most of you have. This became very clear in the last Friday tests. It became clear more than half of participants could create the light, could see the light. (:46) And some could feel the change, but they didn't know what they felt. But it had an emotional effect on them. And very few who had to deny it, because then they have to accept something, felt nothing. Because by saying, I feel nothing, then I can deny myself that I own a car. And some of you left with fear, because the experience was too strong. And we watched you.

We knew three minutes before any of you felt a light, because we created it. We see in the operation, when you people who participated, created light. And we knew most of you have, because the system tells us, it has happened. And we have it in writing. Three minutes before I've written, the switch has come. They will switch. And the switch has come. And then the system shows. All these data's have been recorded, has been kept.

It's not just to talk, because the next sessions will bring a new dimensions. The session of the 22nd of December will bring shock to many of you, that how much love is inside you and what that love can lead to. And to what extent that emotion will bring changes to you. Many of you will not have the same effect, the

same emotion, after going through this session of 22nd in the Christmas day, if you're a Christian, (:48) than the years before. You'll be "reborn" to a new dimension. You'll feel the love, because then it's just nothing there, because you have already tasted the sweetness of what you're trying to explain as a "Christmas," what you're trying to explain as a "birth." Then you understand how things work. Then you understand how easily all can become man of Universe. travelers in both dimension, physicality and emotion and energy.

Everything has a reason. The things we do at a given time, knowingly and unknowingly, is set up by the STP of the man collectively on this planet, when the rest is ready to happen, that the "Soul of the Universe" interacting, creates that condition forward, and creates that condition for it to manifest itself.

In London, we showed the weight reduction for the first time. Before, I posted some pictures. This was it, a scale. This time, it was on the screen. All the participants could see. Diplomats were taking pictures. They couldn't take enough pictures. Gram by gram, weight reduction. In 6 sensors, position was clear why one was losing weight. Now we carry on with the same system. We have to show what we call the world leaders, the military, the common man, that we can reduce the weight. We already know we can. (:50) We already have the flying system and the biggest fear of the biggest nation in the world of its existence.

When in the very, very near future, we invite you to come to see, then you'll understand what it means to hold, to have, to be, and to be part of, and to be in it. It's the place to understand. It's time to understand the process of creation. It's time to understand we have life as an energy, and we have a life as physicality. That energy, when it's used within us, brings the physicality into motion and interaction. And if you haven't understood, which you have an energy inside you, and you have to use it in the correct way, that the physicality comes to understanding and work, I'll give you an example. You try to drive a car without the fuel in it. And the energy is not in it. It cannot go. You feel it, but you don't turn the ignition on.

It's still sitting there. The Soul inside, the car there, nothing happens. The energy is available. So when you switch it, then it starts. When you put it in the right order, then it moves. There is no difference between that tank of energy and your Soul inside you. There is no difference between the physicality of car and the physicality of you. When you press that button, when you decide where to drive, (:52) do you put the fuel in the tank and go, or do you put the hay in front of the donkey hoping to eat it one day that he has energy to move?

Now you understand. It's you who has put that limitation of driving. It's put the limitation of where to go, because you're not sure if that energy in the tank is the right energy, is the right mixture of fuel, and everything else is there that I can accept I can move. I always said many times, decades ago, when the first aircrafts appeared, one of my relatives was in Moscow, comes back telling my family that they made a metal which flies. They said, you're stupid. How can the metal fly? Months, years later, that flying metal appeared in Tehran as a plane. They said, oh, the guy wasn't crazy.

Now you understand. We are in the same situation. That body, that Soul can fly. And because the others cannot believe it, we are wrong. We are ignorant. We are following the wrong things. And this is all a dream. But when the first plane turned up in Tehran, my grandfather was saying, we were laughing at ourselves, how stupid we were, not believing the guy. Now you understand. Our own lack of understanding become the cause of our own shame. (:54) And not to be shameful, we become like them. We have to hide it from our family, from our friends, and everything else, because they can't accept it. Now become a secret sect. We become this and that, we get accused of everything else.

We go for a break, you come back. And if there's any question, we answer. And we have a few announcements to make after the break. Rick, would you like to take us through this?

>> **BREAK** >> 514 KSW November 30, 2023 (1:01).

K- Ready and willing. Let me make a couple of announcements. The first announcement is, next Thursday teaching will be at 6 pm than at 9 am. Next week teaching will be at 6 o'clock in the evening and not 9 o'clock in the morning. As you know, as we need, we move, because of the position we are in things, we have to move sometime, the sessions, and next Thursday teaching is at 6 pm Central European time. I do apologize for this, but some of the things needs to be done. (1:02)

The other point is that, in the next couple of weeks, you will see a new product coming out of the Keshe Foundation, is the expansion on the knowledge of the previous, what you had before. Pain Pens will improve drastically with a new addition of knowledge and technology. The new, what we call, the "Red Dot," which carries a red dot on it, Red Dot (Pain) Pen, what we call, Pain Pens, will be a new development in a huge leap in the science of the technology of the Pain Pens. So, you will see a new product, maybe it'll come out, it's called the Red Pain Pen. It's got a red dot on it, to tell you it's the most, the latest advancement in technology. It's like, you buy Apple and you get a new Apple version. Now, this is much more advanced, and with much, much better outcome, faster, and reaches other things, points, that the others could not do. This will be promoted maybe today, tomorrow.

This week, during the week, Keshe Foundation will launch a large number of what we showed as handcraft goods, at the first time as a, what we call, the "star," in the London conference. A new range of products which carry embedded in them, the, for the purposes they've been brought out with Gans's will be launched. These are not just the cuddly toys, these have a lot of effects. We tell you what is for, whatever we call it, in different sizes. These are not mass produced, they are individually handmade, and then processed by the Keshe Foundation for it, for the Keshe Foundation. (1:04) This is a range, we were trying to bring it before Christmas, and if any of you can, at the same time we can meet the demand, will be put in it. When you make the order, you put on it, I want it for happiness, I want it for pain, I want it for this and that. Then we'll see how we can adjust every individual thing to your need. You want it to be want, want to bring love. You want

it to be cuddly and whatever. We try to get it done. It's never been done before. It's every unit is handmade according to your need. It's unique things we started because it's part of the development of the technology.

At the same time, we are inducing on the side of the Pain Pen what we call, the Pain Packages. As you had the Knee, now the Pain Package will come out the same way, and it's there as a Gans, and you know how to use these things, and let us know how you feel and how it'll work as part of the trial of understanding more about the technology. These are important because in Space travel, we go through, as I said, the pain of birth. That's why we cry when we are born. These are parallel to completion of that process through the transmutation. And then we tell you how and why and the processes needed and how you feel it, and how will it be.

At the same time, the Wellness Centers will run three new type of processes for their completion of the technology by the doctors. This has nothing to do with the Keshe Foundation. Their trial is very limited numbers. This is one for breathings, and one is they are doing the Head Units. There is one for rheumatic pain, and they doing another one for what we call, chronic pains. (1:06) These are the systems to do with a Wellness Center. And there is a very limited number of places, because it takes a lot of their time. You can get in touch with them and sort out with them if you would like to test and go through this trial. And they will tell you immediately. You have to go through their email. This is not to do with the Keshe Foundation. And as you know, you have to go through their, what we call, their office@de.kfwellness.center. This is to do with the doctors. We are not involved in what we call medical or health application. This is a section of the doctors which they use the technology. And you work with them. It is office@de.kfwellness.center. They are running launches. They've launched their systems for these kind of things. If you have, you get in touch with them and talk with the doctors. And then you can use their facility for that job. And it's a very, very limited number. It's the new structure of technology that they're testing.

We're still working on the February meeting in China for the Knowledge Seekers. This will heavily be offered to the Chinese Knowledge Seekers. The translators of the Keshe Foundation in Chinese, please promote this. We announced the date and the time and the place where Knowledge Seekers, Chinese Knowledge Seekers can, within China, come to Sanya. And we meet with the Knowledge Seekers from the world in that meeting. We're still sorting these out. (1:08) And when it's completed, we'll let you know the place, the time, and everything else to go with it.

We come to you in respect to new structure of what we call, flight test. In the new year, we will endeavor to do the first transmutation flight. And we already have the two first people for it. If there are any new people who would like to join this, let us know. You want to be the passengers of the, what we call, the first transmutation. And we start the process sometime in January, February, that we are ready for the what we call, Chinese conference. New technologies, breakthrough technologies will be shown in Chinese conference, which, as we said, we show the new technology for the first time, weight reduction with new technology, as was shown on the screen. And it was live on the platform, people could see the running of the system, weight reduction of the system. This time, we'll go through, endeavor to go through the whole process of the transportation and transmutation. Possibly, if it can be done, and it's feasible in interaction with the what we call, European governments and the Chinese government, that we do the first transmutation. It means we try to, we try to make the transmutation during the conference. Which means people in Europe or America, wherever you become and join in that session, you'll be manifested on the platform in the conference. This is our job. You already booked a ticket to be there, keep to that ticket. We refund you for the ticket if you can't do it, (1:10) but those of you who volunteered, be ready for the phase of transmutation for the Chinese conference.

We have to go through a lot of agreements with the Chinese government, with the European government, how we will transmit two people or four people out of China, into China, accepting their arrival by the Chinese authorities, out of the condition. We had this problem with the Austrian government when we asked for immigration officers. We have to sort this out. And if we can sort it out, and the knowledge has reached that point that we can do, expect to see the transmutation. I hope we can do it for the Chinese conference. This will show the advancements of knowledge and technology in Beijing conference as we plan to do.

If you want to volunteer to be as part of that transmutation, the first transmutations, we still accept people because we have to understand different psychological pattern, different what we call, social behavior, all the... we have to understand. How would we, would your Soul allow you, that when you appear, manifest yourself in China, inside you know you are, let's say, German, but outside you see yourself as a Chinese. These are a lot of things we have to... Not we have, you have to overcome, in accepting the change. In accepting the change in science and development in science.

So, these, all these materials, system, has to be done, has to be covered up. And covered up by all of us, step by step, to cover the transmutation. We have to cover to the next steps of transmutation from here to the Moon. (1:12) We have to cover the next step of transmutation from here to outside Solar System. And it has to all be covered up by all of us. We have to cover it. We are the leading structure. We have to teach you people to understand. And we cannot be held back by those who, through their lack of knowledge, work with themselves, trying to block things up, and the rest of it.

There is a notice which I give you, there is a possibility, that one of the, because we don't want to touch the Keshe Foundation, this is outside the framework of Keshe Foundation, there is a possibility that one of the "ex," which was kicked out of the Keshe Foundation, Knowledge Seekers, will become publicly known to be in prison, due to the activities against the Keshe Foundation very soon. This is not the step we have taken, it's a step taken by governments. You will know the Knowledge Seeker, and if he comes public, and if he, or she, or whatever we don't want to put to it, receives a prison sentence, it has nothing to do with the Keshe Foundation. They might try to connect it to us, it has nothing to do with us, because it's their private life, and it's the way they live their life. So, as we grow, these things come along, and you have to be aware, we keep you in touch in what is going on, But there is a possibility as one of our ex well known Knowledge Seekers will be sentenced to prison in a very short time for criminal activities outside the Keshe Foundation. Nothing to do with us, but they're trying to connect it to us, but we have to be aware. If there are any questions, I'll try to answer. Thank you very much. (1:14)

Q: ... You talked earlier today, in today's teaching about dimensions, the dimension of the Soul, dimension of the STP, and dimension of physicality. Now, Nina asked earlier, "Could you explain, please explain each dimension to us?" I think that's what she's referring to.

K- Yeah, the dimension of physicality is you, your physical life, your body. Dimension of STP is that love you feel. It's a dimension of interaction of the fields of the physical life. Dimension of the Soul is what connects you to the outside world of your physicality with its limitation. Your body walks, you eat, you feed it, you do everything else with it. But everything you do is not just eating it, because I have to eat. You eat (feed) it according to what emotion it gives you. You kiss your partner, because it gives you a confirmation of I exist. Somebody loves me, and I can love back. You have a desire, or you take an apple. (1:16) You think of one apple. You get up, and you go to the fridge, and you pick up an apple to eat it. Because I, my physical body, has a need, a love, or emotion to connect with that apple. I call it consuming, but in a way, the

apple calls me, I'm here for you. You don't want me? It's not that just, oh, I feel an apple, and I go and get it. In a way, the field strength of the apple in the fridge is there, I'm here, nobody wants me. Oh, I have an apple in the fridge, and I go and get it.

So we have to understand a lot. This is what we call the STP. It's connected to you. The STM is you're sitting in this room. You're still enjoying the apple. Your limitation is the wall because around you, you don't see any beyond it. If there is a window open, you see the neighbors across the road. But your mother is sitting in New York. You are in London. Then, oh, I feel something wrong with mom. Now the man limitation cannot go. Your limitation is the wall. You're entrap in the dimension of ???. But your energy, which is connected to your mom, it says, there is a problem with mom. Because you have not learned to carry on with that communication all the time, mom, how are you? How are you feeling? I want to feel. Oh, this is your kidney. It's your, you had a brain hemorrhage. Oh, you're happy because my sister from another place has come to see you. You have to pick up the phone. You open the line and call, Mom, I just thought about you. Are you happy? I felt you're sad. Hello? You ignored the line of communication of your Soul with your mother. And you're still, because you're so physical, you keep that phone with you? (1:18)

And we ignored that part. And this system of communication is working 24 hours a day. Doesn't go to sleep, doesn't eat food, doesn't eat rest. And it's working continuously, because it feeds itself through the fields of the Universe. Elevation comes through physical consumption.

So now you understand the difference. It's your physical body on the sofa. It's your emotion of enjoying the odor, the essence, the touch, the feeling, the warmth, the everything else, with that apple, you're chewing. But this is limited to the wall. You cannot say beyond dimension of physicality of the wall. But the Soul feels the mother in New York. And that's your Soul.

And this is what we denied. And the more and more we've come closer, become more and more become aware of, you just don't need to talk. Because you use that line of communication. Because you learn a new language. You go to language lessons, you watch television programs to learn French, to learn German. And the language (of the Soul), which you know you denied.

I have a gorgeous feeling and understanding of this. When we came to England in 1970s my younger brother went to one of the exclusive private schools in England. He looked a little bit Pakistani, (1:20) because you can't say the difference between the Pakistanis and Indians and it's a little bit ??? hard. He had that inclination towards that. But he wanted to learn English. And he didn't want to interact with the Iranians in his school. And those days, it was a rich time. Half of the school were the Iranians. So anybody asked him, are you Iranian? He says, no, I'm from Pakistan. Then they couldn't speak to him in Farsi. And he had to speak English because he wanted to learn English. One day a Pakistani guy says, if you're Pakistani, why don't you speak Urdu? He says, nothing to do with you. I don't like to speak Urdu. He denied himself because he chose to be, to learn a new language, to be in the environment, to learn the culture. But he had no choice. It was the only private school in the city, and that's how he had to go, where to go. He was conditioned. But we used to laugh at him, even till he was alive, I used to call him Pakistani Mozhan, because he, went that way, learned to become, he became more English than the Englishman. He learned every facet of how to live, to talk, to be, but he was a pure Iranian in his culture, in living, and everything else.

So we are in the same position. We deny ourselves because it suits us to be in that position. We deny our Soul. We deny what is natural to us because we've been told to deny, because with that, the religious people

can abuse us. The denial of the Soul has come out of the religion, (1:22) out of the belief, not out of our choice of us. And anybody who connects to it (the Soul), there's something wrong with him.

If you heard the new controversy which has been going around the Keshe Foundation, I explain to you, it's very easy. Now that we start teaching about the Soul, the understanding, and the work, and all the work we do, a sect of the Christianity has said this is anti-Christ, because they said when the Christ comes, these things will appear first. They don't say these things appear because the time has come. And now this sect of Christians, "Oh, something wrong with the Keshe Foundation. They're anti-Christ." Because they said these are the sign when the Promised One comes. So if we are the sign, how could we be "anti"? It doesn't work. Because we are part of it. You denied the existence of your Soul to yourself because it's brainwashed. How do we know the difference? You don't need to know the difference. There has never been a difference. Your sofa, your body on it, you enjoying the apple, that's the wall giving you the limitation. But this can jump out, can be somewhere else.

When we did a test with the Chinese military in the summer of this year, they said, "Oh, you're producing material inside the wall. And this is what is created here." When the military officers are walking outside, it says, "It's coming outside too. It's got nothing to do with the walls. The walls and the glass don't stop it. It's raining the same outside." (1:24) Because the military generals never understood, this is a plasma. It has no physical dimension. And this is the same with you. Your Soul has no physicality. It's shiny. It rains. It goes outside. You blocked. You imprisoned the body on the sofa. The guy is free. You are a prisoner. The Soul is free and travels the span of the Universe. And sometime, when in this travel, in touch, it comes to understand and work with others and gets enlightened, we get the beautiful people like Tesla. The enlightenment of the information, the understanding of it, becomes the most admired scientist in the world of electronics or electricals and magnetic fields. Because the limitation of the knowledge in the dimension of physicality is the "wall" you created around you sit in it. It's not limitation to the energy inside you, which is your Soul, which travels the spans of the Universe.

How many times you sat somewhere, and you were sitting, and says, oh, I can do this different. And you get up, and you do something. Oh, this is a new thing, new invention, new thing. Hello. Did that come to you while you were sitting there when the Soul was traveling? Did part of it come from intuition, and then you translated it into this, and it became something new for you? Is that the daydream you call now enlightened, or something came to me and I tested it and it works? (1:26) Then you understand. As I said, we are all in it. It's accepting it, understanding it, and what we do with it.

I sat with my sister discussing about, and I've said this before, homeopathy. She's a homeopathy doctor. And she was telling me this and this and that. I tried to explain to her, this is not the way you understand it. How it works is different. And in discussion, I fell asleep. She was sitting next to me. And I woke up. She said, I saw you downloading. Because I got up, I said, I'm going to write a paper about homeopathy that you understand. You'll learn the physical dimension. You don't understand the field dimension of it. And I wrote the paper of the homeopathy within hours. And she said, "I watched you. You were downloading information. The way your body, your eyes were moving is not normal." I said, does it matter? Now you know the fact. Now you know the truth. How he came asleep, awake, running, in the shower, whatever. Because it's the knowledge we have to accept. And this is what we call, the Soul. And we have denied this to ourselves.

Next time when you say, "Oh, I felt this," say, "My Soul tells me this and I do that." And I had a lot of people, very recently, a lot of Knowledge Seekers writing that to me. "My Soul told me Mr. Keshe." I said, "Your Soul told you, but you are misinformed by the knowledge, because then you need somebody to

confirm it to you." We have to understand, "horsed for courses " (racetracks). Your physicality is for dimension of your existence. (1:28) Your STP is for its interaction with its environment, emotionally, and how they react physically. And then the Soul is this body of you in the sofa has a fuel tank, which is connected to the others. It is not petroleum, it's magnetic fields. With the petroleum, you need a tank to hold it. With the magnetic fields of the Soul, you need the Universe, not even to contain it, but to understand where it goes.

Any other question? Oh, we've become very Christmassy (refers to screen).

R: Yeah, you could say that. It's the season for the red and green.

K- Yep.

R: They say green is the color of love, and we have a heart in the center.

K- Is this that one of those things you tell to the system, and it creates your image?

R: No, this is from Jedi Simon, he uses equations and his process to create art through, not AI, but a different type of mathematical process.

K- Any other question?

Q: ... Rupert Sheldrake spoke of morphogenic fields, Roberto Zamburini of ordinal fields. (1:30) Through the splenic chakra one could reach them and clean them through a clean energy constructed by Zamburini, with orgone energies and more. How do you explain this with the Keshe technology of plasma fields?

K- I don't know what they are talking about.

R: I knew you were going to say that.

K- I never make comment about something, just try, just... No, I don't know what they're talking. There are evident scientists, we respect it, but, you cannot talk just to say something, because I have no clue what you're talking about. And who these people are, that what they are talking about.

Q: ... So, basically, Pierluigi's question is, how do we access the fields? How do we reach them, and what's that process? And Nina's question, her next question is, "What kind of connection do we have with the angels?" And then my question was, regarding your spiral of field strength, and where you say the greatest strength is in the center, but then you've also said recently, that to look for the Creator, we look toward the smallest energy levels, the smallest magnetic fields.

K- No, the lowest. The lowest.

R: Okay. That's what I need to figure out. (1:32) You said lowest, not smallest. So what's this high and low, you know, we elevate ourselves, do we not... And if it's elevation, how come it's lower? And this higher, lower is getting confusing here, I guess. Sort it all out for us.

K- It's not very confusing. If you look at the spiral, and I've drawn it many times, especially in recent past, you look at the spiral which I draw, and I've said many times, look at the gap between the spiral. There's another line which comes in. We are, we receive, we connect through the weakest, to the others, as they feed

us the strength of, that in that process, it become the weakest that it goes in the center, and it becomes the strongest to come out.

You can connect when you are giving. You can connect when you're taking. As you take, and your interaction with other fields, the more deeper you go, the weaker you become. But as you are weaker, the stronger attracts, which is in the center to give. This, the way I draw the spiral, has the line of Creation. It's the way the Universe is created. You see the line, but look at the space in between. It's more of, and as it opens up, there is more gap, more gap between the lines. You look at the lines, but you have to look what's in between the two lines. And by interaction, (1:34) the more it interacts with the other fields, as it goes to the center, it becomes the weakest and weakest, because it's given more of its energy in the interaction to get to that point.

So when we talk, when you get to the center, you're at the lowest level that you can switch, is the way that how much you can decrease the salinity that it becomes alkaline, that it gives. Where salinity takes. If you have done tests, if you have pushed the gravity to its limit, gravity becomes magnetical. What was pulling now pushes, because this is what we see in reality in change of polarity in the solar systems. It is not, it's the current inside, which changes and pushes so much, that its strength becomes its weakness, and it makes it to twist. And when the solar system changes its gravity to a magnetical, and pushes the current flow of the fields into reverse, change of polarity, it's not just the polarity of the Sun which has changed. The magnetic Inertia field forces of the whole solar system changes.

We don't see every time the Earth's gravitational magnetic field changes, because it has a different strength. It doesn't have the same strength as the Sun. But that change effects it, to create so much. (1:36) So, don't look at the line as it opens up, look at what it receives in a bigger and bigger gap. And in interaction with what goes out, releases its energy and becomes the weakest. And at the point when all the weak gathered, it transfers back to the feeding, and becomes magnetical.

You try to create the most alkaline condition, and then you see it, it behaves acidic. And acidic at the lowest level, not at the highest level. The more you go to the extremes of alkaline, the more you start seeing the signs of the other side, of acidic, of the lower order. Because it has to start from somewhere. It doesn't change from high alkaline to high acidic. It goes so much that then he has to start. The interaction of the field's material inside creates the first chains of reactions of the alkalineness, and then you see acidic back up. We see the same thing with gravitational systems. When we create reverse flight, we move the magnetic field up and down, we see we have to go from gravity to magnetical. It's a switch time.

This is what I even said in the London conference to the Knowledge Seekers. If we leave the system long enough, what is becoming reduction in weight, it becomes flight. Because it absorbs so much gravity, that it reverses itself to repulsion. (1:38) We reduce weight so much that we call it, "anti-gravity." But it's not. There's so much gravity, so much, gravitational is rejected in the system, that it becomes repulsion. And you get the lift.

Once we go through this test, which are going again, we'll take you Live to the labs to see how weight reduction lifts up. We do this deliberately in these sessions from now on, is to influence the governments, diplomats, and politicians to understand the change Live. It's not just something to show. This is important to bring governments to understand the time of the fuels is over. When they watch it together, the way we showed it in London, we've gone Live on Zoom. It's your job to call anyone you need to come online to see

on YouTube and Zoom. You will see we start showing weight reduction. And you watch it, 5 gram, 10 gram at a time, every minute. And then it builds up, it builds up, it builds up, and suddenly flips over.

The way we did in Cinzano, you watched 129 (Tesla), we bring the shock of the trans .. , what we call, "lift and motion," very soon to Keshe Foundation. Yesterday, in one of the tests, out of the 7 kilogram system, we monitored 1.3 kilogram on one leg, and the other is nearly 2 kilogram reduction. And then we changed the position. We watched, like 50 gram, 5 gram, 10 grams. But the system was set for the meeting with the world ambassadors and the, what you call, high commissions. Very soon, we invite you to watch, because it's one for you to see. (1:40) Secondly, it's for governments and the rest to watch Live the way you watched 129 (Tesla). You go on every channel, inform everyone to come on this channel. You watch how weight reduction and lift is created. We are not afraid of failure. And we don't cover (hide) our successes.

(What are you trying to show?)

R: This is one of the...

K- 129?

R: This is, yeah, the weight reduction one, actually. It's like 3 hours and 20 minutes of..

K- What is this one from?

R: It's just one of the...

K- Old.

R: Yeah, older videos from 2011 or 14, I'm not sure, I think it's 2014.

K- Ah, yes, this is the Cinzano.

R: Right, yeah.

K- This is the Cinzano. Yeah. Now we bring you back to watch. Because we have shown it Live in London to the world ambassadors. We went down from zero up to 540 gram reduction. And one of our guys, some one of the people in the session asked, what do you do with this? And by mistake, the, what you call it, they touched it to show the current, and then they eliminated the whole thing back to zero. We allow it, it'll go up to, what you call it, a system.

But you have to understand the new system which is developed is a generator. It produces its own energy. (1:42) And so we do not, as I said, if you were in London, you see there are no cables attached to power the system. It's independent and it's connected to the two flight system. We still follow the same procedure. We still follow the, what we call, one as the center, as a sun, and one as the one which shows most of it. But with the new system, both sets have got weight sensors. So we see exactly which leg, which going in the test this week. We saw two of the legs losing weight, or two of the legs gaining weight, and the third leg goes up. It's exactly physical life. You know, if you put your two hands on, your back leg goes up. When you push the leg down, the two hands come up. The interaction of the fields is there.

As I said, very soon we have set everything up. All the cameras, everything is set for the minute, when we decide to call you in and you watch Live. Because we have to emphasize before, we have to show the development in the physical side, which we have left for a long time, but a lot of research is going on with it, to teaching of the Soul and the energy. Now it's time to bring both in parallel, that you see this, if this happens, you have to accept the other one happens too. And then we'll bring the governments to head on collusion in development.

And this is part of the work which is now we extend into China and Chinese, what you call it, operation of the Keshe Foundation. You will see the development. We are not taking anything from it. Everything, all the

funding, everything going to this part of the work to be done. (1:44) And now, what we left for a while to complete the UBESUS (Universal Body Enhancement Spaceship Units) and everything, it has reached a point that now we bring in the flight system into operation that we can show the two, because the government needs to see the two. When you see one works, you accept the other one too.

Any other question?

R: Okay, thank you. Yes, this video was the 129 Tesla video, and it's about to kick over from, I think it's at 92 right now, and then there'll be a big sudden surge to jump to the 129 Tesla. Coming up in a minute or two here, I think.

K- Let's have a look at it. With this system, we didn't have, we have only one weight sensor, which is on a hanging frame. And we could see the motion of this system. And then after 129, if you remember, we, to show the weight deduction, we hung the system of the frame, the same system, in another room where we ran the, what you call it, Christmas section between Canada and Germany and Italy, where we could stop the system. The reason we could stop that system, because it had no connection to the earth. It was hanging free, so we had the control through emotion. (1:46) It's still at 11.86 and 16.448. Yeah, this was done Live. from the Cinzano. You see the left side, you have the change of the triangles (flashing up and down). This shows the field flow strength, if it's coming in or it's going out.

Ok, any other question?

Q: ... February 10th, 2024 will be the Chinese New Year of the Wood Dragon. Is that a good moment for the Chinese conference?

K- No way.

R: 7 days off from February 8th to February 15th.

K- Yes, no way. Chinese (New Year) is the most holiest time, they all come home for New Year. You'll have an empty place (conference). They travel the whole nation to be home. When it comes about a day, two days before the Chinese New Year, even in Beijing, you start seeing the city empty. There's hardly any... for those three, four days of the Chinese New Year, you can actually, it's a pleasure to drive in Beijing to go somewhere, because there's no traffic. They all go home. (1:48) And it's tradition. There is no way we'll go at that time with it.

Q: ... Can the Soul feel pain or suffer like the physicality?

K- Yes, but it's in a different way. It's in a different way. Suffering is by losing, reduction in the strength. You cannot comprehend, you cannot reach that point, of what it needs. The lower, in a way, you go in the Soul, the more physical dimension of life you accept. It becomes very physical, and then the rest of it, it grows with it. These needs to be explained, not to misunderstood. But one day when Knowledge Seekers and the world, the rest mature to this, I (will) explain this. How the hell is that life of physicality, which the Soul in the strength reduces, or works in that dimension only?

What is the bottom line on this picture? Do you see it? Yeah. It's not very clear. (1:50) (Your microphone is off Rick we can't hear you).

R: ... That bottom part is the 92 or 97 Tesla, I believe, which is about to jump any second here, any minute. Or I can just move the video ahead to that point, so we can kind of review it. Let me do that, that would be better, I'll center it. So, I'm not sure, now there it is, okay. So it's, yeah, it's within probably a minute or so here, maybe less.

K- This is where we jumped into... You have to understand, at 105 was the record kept by the Americans, producing in a huge power station, use of power and all sorts of things, 10 million plus Euro test facility. And the Knowledge Seekers achieved 129 with a few reactors and a few thousand Euros. Because we understand... There it is, it jumps, is it? No, not yet. It's still 92. We understand the work.

With the new systems coming into operation with the plasma and what we call, transmutation, you're working in order of magnitudes, lower than this.

R: There it goes.

K- It jumped.

<<< Let's have an instant replay .. Rick shows here the exact moment that it goes to 129 Tesla >>> (1:52)

K- What does it go to.

R: It goes right up to 129 I believe. Now if we watch the triangles, they go quite... there. It's a big... we went from a triangle to a big square at that point.

K- Yeah.

R: Let me see if I can actually capture that. It's a very quick blip.

K- There.

<<< Rick tries to get the moment where the triangle becomes very large like a square in the system on the screen >>>

K- There. We see this in the (London) test. It just jumps up suddenly by half a gram, five gram, and then it goes. Most probably, when we see the data and we see it appropriate, we have to consult other people who will affect them. We invite you to watch the process. Because now we have to confirm both the physical dimension and the Soul. Because as I said, you believed in Gans's, now you will see, you understand the effect of the emotion and the rest of it.

Somebody wrote, how can I become, what you call it, part of the transmutation? It's just that it's on the Internet. You have to write to the info@keshe.foundation. (1:54) Or you go on the website on the sales side (Store) of the Keshe Foundation, and you register to when you pay your fees, and that's how it goes. We have a session tomorrow with Knowledge Seekers. It's the second part of the, what we call, Corona test. Start tomorrow at 12. And then, on Sunday we have a meeting with the licensees of the UBESUS. And we'll start the training of the use of these systems by them. So it will be a busy time. And for those of you who were not here, next Thursday teaching will be at 6 pm Central European time, not 9 am.

Any other question?

Q: ... What do you mean when you say we have no choice? What choice is this or simply what are we talking about in these terms?

R: I think you mentioned that in the earlier part of the teaching today. You also mentioned it, that phrase, "We have no choice" in the later part as well, but this question was earlier, so, I guess he's referring to ...

K- No choice about what, what are we talking about?

R: Yeah, I'm not sure exactly what you're talking about at that time. We have no choice, I think, as far as moving forward with the showing the technology.

K- That case is there. We have no choice. (1:56) We have to show it. We have to bring the change. But as... we have a very funny situation. In China, we bypassed the academician approval of the Keshe Foundation. So we are going our own way. Now the academicians trying to block Keshe Foundation, and come up with a new idea. How are we going to stop this? It needs to be commercialized to be accepted. And we laughed and said, what's the next step from the academicians? We accept the technology, but it has to be commercialized to be accepted by us. And we are sitting on that track, to be accepted.

And then, as I always said to the Knowledge Seekers, we could take it, oh, man has been to Mars. How do we know we are out of Space? Show us that. And then we only accept it if you're on another galaxy. And then when somebody says, I'm in another galaxy, we don't believe it because we can't see you on another galaxy. So there's something wrong with the knowledge and the technology. There is no limit into it. So we have no choice. We show, we go, and those who want, will take and move on with it.

Any other question?

Q: ... Hi, I've got a third sleepless night. I have neck pain and feel so lonely.

R: I don't know if that is relevant to anything, but that was the comment there. (1:58) And perhaps someone can use that.

Q: ... Hello Mr. Keshe, please don't laugh at the question. How can we fight bed bugs in European cities? Can we use the basic Gans's, CO₂, CUO, CuO₂, CH₃? Do you have a solution? Thank you very much.

K- Don't sleep in somebody else's bed, that's your solution. Your bed bugs are familiar with you, so they don't bite you. When you're a stranger they bite you, so stay in your own bed. Or don't let the strangers to sleep in your bed.

It was very interesting, what we're talking about. When we were doing these experiments with the Chinese, only one officer, only one, no one else. Because, they wanted that the whole thing is monitored 24 hours. They put a, what you call it, officers 24 hours a day, on guard, around the system. And, they had to sleep in one of these houses, because they moved everybody out, they had to sleep in the house, in the bed of the others, and one guy, his body was literally red, he was bitten by hundreds of these bed bugs. And in the morning, he says, I can't do anything. Look at my hand. Look at my body. It's all beaten. And I remember the higher rank officer says, you still in that bed. It's your job to be here. You watch. And how come out of so many people, he was the only one which is getting bitten? If they were there in the bed, they were always switching time, (2:00) so they haven't slept on the same bed, we're not getting bitten, only he was getting

bitten. Maybe bed bugs, as we know, these are in our bed all the time. If they are used to us, they don't touch us.

Or maybe, as we change emotion, we create a different environment for them, and then they say, we are not happy, and we change it. There are two ways to do it. Don't try to kill or destroy. Try to change the environment. Changing the environment of any living things, as is amino acid connected, is introducing new environment of emotion, which is mixture of the CO₂ and Zn with a few drops of amino acid (AA) that you can connect to it. Maybe it connects to you and the guy in the bed somewhere. And you can both live and exist and, what you call it, create a new life.

We've seen this in China. I show you something very interesting, because if I can find it. It's always, we've shown this before somewhere in the teachings. Let me, if I can dig it out, you'll see this. It's very interesting, because we don't kill, and we had a condition of... (2:02) Around about 19th of March, they noticed some materials, or what we call, animals, on the plants. And they sent a picture to us and say, "What can we do with this, with these animals, bugs on the plant?" And I just told them how to do it. Just change the environment. You don't need to fight it. You don't need to kill them. So by 21st of March, there were no animals on the plant. But we didn't see any dead insects on the floor either. And they said, "Oh, they're gone. They moved. But we can't see any, what you call, any dead animals around it." I said, in the new technology, you change the environment. And you don't kill. And that's all you need to do.

So with your friendly guys in the bed, change their environment. And they will move, or your brother will be so tasty to them. He has a taste which is not fitting them. Then you don't need to kill, you don't need to move them. you all live together immaculately and perfectly. You never know what you needed. Next time you want somebody not in your bed, it doesn't fit, then they'll bite them, and they won't sleep in your bed. And it says, oh, it worked. (2:04)

Any other question?

R: ... Caroline went on to say that her neck pain seems to be related to a father of which she feels threatened. She says, "I don't want to carry his pain, nor do I want such a trauma reaction." R: Any advice you want to throw in there Mr. Keshe?

K- No, I don't know what it is. Never make it ?? I am not a doctor, but we never make comments on these things.

I found a picture for you that... we go back on it. Let me do a little bit of cleanup. Our Knowledge Seekers from China know this very well. I have to... It's a little bit, there's too much information, we don't want you to see.)Done. Ok, I have to go to sharing with you. How many of you use Zoom, which is very strange, after so many years).

Ok, now have a look at this. This, as you see, is the bugs. And you see them all there? We changed the mixture. We just washed the thing. You can see it's the beans. All the beans are hanging. They've eaten all the leaves. (2:06) And to a farmer, it'll be lost because they go and eat the rest of it. Actually, they're cleaning the leaves when the beans are on their own. You can harvest them much easier. And that's 19th of March. And this is two days later. And then we have a picture that there is none. They all moved out. But we don't see any dead insects anywhere. Going from this to this, and then totally nothing. They just moved out. And this is... that's why I said, you don't need to kill them. You just change their environment. And I'll give

you another picture the following day. You see it? And there is no harm to the harvest.)And I have to go back and choose a picture for you to...) Then you see the progress in three days. This is the first one. This is the second one. This is the third one.

Hardly anything, gone. And there is no dead bodies anywhere to collect. Did they go to the next door neighbor farm? (2:08) We don't know. We didn't ask. Did they all went back where they came from? We don't know where they came from. But the environment wasn't good enough for them to live. So they moved. You see it very clearly. Do we need to use pesticide? It's the same where we saw in tomato growth in Iran, where the farmer using the Keshe technology, before, they used to go and take all these, what you call it, little weeds and everything out. It was a big menace to them. But they learned they don't touch it, but they have more harvest. So why it's a thing? Just ignore them. Because the harvest increased because of the... not because of them, but because it's taking no more environmental energies.

Any other question?

K- This lady, you talk about the pain in the neck, it must be the father is a pain in the neck, find out why.

R: Yes, you have often talked in the past about the connection between one's relatives and ailments, so I think that's becoming a almost common knowledge now with even the medical doctors. Recognizing the emotional basis for ...

K- We have to find out the reasons for it. It cannot be covered with the tablets anymore. (2:10) Even our technology has to advance enough, it's not advanced yet, to tune, to measure, to understand, to analyze, that what field was created by the pain, and what it's connected to, that you can reverse it. Or you can, what we call it, elevate it, that it's not there. We have very strange cases, because it comes out.

There was a young boy, and I said this before, whenever summer or winter came to any cold condition of water, instantaneously, the whole body was get full of blisters. And after a few sessions and whatever, we understood the reason, he could go and jump in the pool without any problem. He could stay in cool environment without any problem. Or reverse, the people who in the sun, they have the same allergy. Why? And then you find out it's all psychosomatic. Psychologically, they bring that to themselves.

Any other question? Or shall we call it the day?

Q: ... Mr. Keshe will there be a collaboration between China and Markray Corporation or are they completely separate in the development of the Plasma Technology?"

K- Totally separate. And as many of you know, (2:12) I have backed Markray for past years with huge amount of money, hundreds of thousands. And we're getting to the point that we cannot back anymore, especially with the losses we had. And we will know by the end of this year what's going to happen to Markray. The year and the year before, we backed a lot of things, brought everything into order. But with the huge losses we had, we had to... Because it has... Markray existed, because I financed it through the Foundation. Otherwise, it would have gone (under) years (ago). And now we're in that position, we... We're considering, if we are going to back it. It might come out of the stock market, and then we brought... bring it back again in the future, next few years, when things go further (with the T).

But, our collaboration with China is not a profit making. We are not going to make profit out of China. It is for acceptance and development of technology in a peaceful way. .. , what you call it, Chinese corporation, it doesn't bring money in our pocket to be... It finances the technology to be developed. And that's why we are there for. Even the Keshe Foundation doesn't make money with all the losses we had. Even it brought us to our knees in the recent past. There would have been no Keshe Foundation, all together in past months, what we tolerated, the whole team of Keshe Foundation worked relentlessly to save it, and we managed just to save it last week.

You got to realize, we have a huge network of pedophiles, headed by my ex-wife, that continuously in every direction, damaging, and working against the Foundation. They are well, they rooted into the Foundation very well, without me knowing, but you trust your others, (2:14) but not knowing they're actually part of it. And they extensively rooted into all directions to damage the Keshe Foundation, in every sense and means. Because it was a very lucrative job being in Keshe Foundation. You saw how we put Sterling Allan into prison, solitary for life. These are all his children. These are his entourage. We didn't know. And this has caused a lot of problem for us. And it doesn't stop. And we got to the point that we carry on with what we're doing.

Now we share technology, but we don't expect financial rewards. Otherwise, whatever comes, it goes back to the Foundation. It's not that... it brought a lot of harm to us, a lot of harm to us. And this is part of how they operate. We were infiltrated deeply, right inside, with the organized pedophile organizations from Switzerland, to Germany, to Iran, and the rest of it. And as you saw, when one left, a lot of people left with it. This is all part of the organized crime. And they had their boss, one of their bosses used the right inside. And we tried to, and we did our best.

But Markray Corporation has nothing to do with the Chinese operation. The Chinese operation is not there profitable. And it will run on its own with the Chinese operation, with the Chinese government, not with us, as an outside corporation. But we'll see what comes out, what peace negotiations we end out of it from the Americans and the Europeans. (2:16) And then we, even if Markray goes out of the stock market, we'll bring it back in due course when we balance things out.

Q: ... Hello Mr. Keshe, you said, 'We never die, we transform according to the existence.' And you said in the 192nd Knowledge Seekers Workshop, "Can a Soul die? Yes, as I explained before, yes. But, can we be the cause of this death? It can be done, but it's only done through the position of balance, when the Soul sacrifices itself, not for man or another Soul to end the life." So, the comment is, the above sounds contradictory. Can you explain it?

K- No, no, no, it's not contradictory, it's exactly what it is.

In the physical life, we commit suicide, we end the dimension of physicality. But we still live the Soul. In the dimension of the Soul, .. we give our Soul. And the Soul is an "energy pack." You have to understand, I repeat again, in terminology of the Keshe Foundation, energy is magnetic fields in motion. When you give all your fields to another entity to elevate it, you have none left. (2:18) No fields to create that dimension. So you don't commit suicide. You give that you become part of, but you, as you does not exist as a plasma. So you cannot go yourself and throw yourself open. But you can connect to give. We call it, the "suicide of the Soul," that you elevate the others. Me as me as an individual does not exist, but me as amalgamation of the fields that elevates another Soul exists. So you cannot commit suicide to blow.

There is... in physicality, we can hang it. We put a bullet in it. In the dimension of the Soul, there is no system to open up and finish. But you cannot commit suicide. But in a way, you can end the life by giving your end, the cycle of your plasma in its strength to another to become part of, for it to exist. So you cannot commit suicide in the dimension of the Soul. But you can end it by giving to, becoming part of.

The same is with the committing suicide in the physical life. You cannot, because that Soul within you has not matured to its completion to find its position in the world of Creation. You cannot cut a tree when it's not mature. It's the same. You cannot cut a life when it's not mature. Killing it, it's yours or the other one, to stop the cycle of elevation of the Soul. It's forbidden. (2:20) But yes, you can end the cycle of life in your physical life. You put a bullet in it, you hang it off the ceiling. In the dimension of the Soul, you bring an end to it by offering, but literally creating a field of the strength of the lover who can take it up to elevate itself. The true love, the sacrifice of totality. But you cannot kill it. You cannot just blow it up and say, ok, take what you like, the rest of you. It's not your physical body that, ok, I hang it on the wall. It's part of it. Uncle takes the hat and the cousin takes the shoes.

You cannot. It's forbidden in both dimensions. In one dimension of Soul, it's impossibility. You cannot, it's a field. How do you blow it up? Has no dimension of it. But you can find a match that you can give it to. You bring it to an end as you, but you become part of it. There is nowhere in the Universe that there is no field. And at the same time, there is no end to fields. You cannot finish, because you go off different strength to a different dimension, you become part of something else. You're a seed. You take energies. You become a man, or what you call it, a fruit. The man eats a fruit. And then it becomes energy for another dimension of the man and the rest of it.

Just because you're eaten as an apple, it doesn't mean that is the end of you, the purpose of your energy is transferred to somewhere else. And that, we're talking in that dimension. You cannot kill a Soul, but you can end the Soul by finding elevation of, strength of, and matching to, to become part of. (2:22)

Suicide is forbidden for the physical dimension. Killing a life, you can bring an end to it by giving it to someone else, to another entity of the field of plasma of the strength, that it becomes part of them. When you die physically, it's nothing of your left. You become whatever. When you end in the dimension of the Soul, you become part of another. Your energy as a field becomes part of another. You can end it that way. But you cannot, it's impossible to commit suicide with it.

So you always exist in another... even in dimension of physicality. The physical "you" is not there, but you live in the body of the worms, and the plants, and the rest of it. And what they convert back to another thing afterwards, it's very simple. I was explaining this to a child. When you die, in the Zoroastrian belief, they leave you on the temple areas. And the other animals eats you, you become part of that animal. Then that animal dies and worms eat it, then it becomes part of ?? Soul. So your Soul carries on through the bird to do the fox who eats the bird, and then the rest of it, and then, even that, in the energy level, you exist. But you cannot kill it to become part of ?? . You are the energy which you transfer to another. But you cannot kill it. But it can end its life by giving to another. What we call, devotion.

Anything, any other question? (2:24)

Q: ... Mr. Keshe said he was trained for his work, how to speak with a government, etc. Who was the trainer?

K- Life, the life. I came from the background of seeing these people, pictures being everywhere in the house. And then as I became part of the, separating from the education to finance the research, because I didn't accept it, my, what you call, school of thoughts of nuclear, the way it was. Going into business, very lucky. Literally the first year I came out of university, through that time, you have to understand, being a nuclear physicist in nineteen seventies, eighties, was God. You must have been very clever. They didn't know we are most stupid, lost out the whole lot, because we've become so narrow-minded, because we look at the smaller and smaller (atomic level). Then this title of a nuclear engineer and physicist just opened many, many doors. People, oh, you're an electrical engineer. But if you're a nuclear engineer, oh, you must... and this opened my doors to many, many things.

I came, first of all, I came from a background of these things. I always knew how to handle it. (2:26) I've seen it from childhood. Secondly, I, very, very first time, I, after my graduation, within the first few months, I came across the, at that time, Bhutto family of South Africa. And because I explained to you, I met a South African guy in the first year in the university. We had a very close contact with South Africans. It built up into South African and then to what I was doing in a master's in Manchester University in UMIST, it used to be called. My special business teacher was Tiny Rowland, which is part of the ?? Harold's, owners of the Harold's, as you know. And Tiny Rowland brought me into a lot of huge connections and teaching of, what you call it, the structure of the British Empire outside. And at a time when I was in touch with the, what you call, Bhutto's family, in those days was no talk about the end of Apartheid. I came across the, what we call, British royal family in the introduction in the group. Being a nuclear physicist, everybody was so proud. They have a friend. They know somebody. I opened up into the House of Lords, and a number of the Lords of the House of Parliament, and just trained by them. Being a young boy, they were all happy to teach a 23, 24, 25 year old boy something about the structure, being especially a nuclear physicist. It was just a luxury to be. I was like accessory, a ring on the, what you call it, on the finger type of thing. (2:28) And then, in that process, I came to understand, to meet, in wine and dine with, of course I don't drink wine, but with the Saudis royal family, with many princes and princesses, their advisors. And it was just all happened.

And then they opened, again through Tiny Rowland, operation into Kazakhstan. He gave me access to his office in Kazakhstan. He said, you're a brilliant businessman. Just I'll give you my open offices. I walked into ?? Almonte, office of Tony Rowland. I remember the first day, they put a box in front of me and there was a gun in it. I said, I'm not carrying a gun. It's against my Ethos. I said, you brought me here. You protect me. And that's how I got trained by people in power. Persons exactly like .. Bill Crammond, part of the structure, in the structure of the royal family. And I just got involved in politics, in diplomacy, in business, all being what ??. Because all the politicians are businessmen more than they're politic, because it makes them more money. They go to politics to become rich. And this is a cycle. And every time, you cannot just say, I know someone. The minute you know someone or they introduce you, they check on you, if you exist, if it's what you say is true. And I had a caliber of world, what you call it, with diplomats.

I lived... Yeltsin said, Keshe slept in more beds than I slept in presidential suites around the Russia. That's how I got through Tiny Rowland to that structure. I never stayed in ordinary hotels in that country. (2:30) I always stayed with presidential suites and that kind of thing inside the presidential offices. And this is how one influential group brought another influential group and trained as a young man. It was very interesting to them when nuclear physicists come into a business. And it was something addition. And you learn a lot.

I wasn't a guy to be shy to be, the more it was on the table, the more I went for. And, my telephone directory has the name of world leaders, left, right and center. I just don't need, if I tell, I know such a person, they call and they check. Recently, very, very recently, past few months, past few weeks, this came across, with some

most powerful people around the world. I told them a coded message which exist, I know of it, because I work within that code. And, few days later they said, "We checked, you're correct. You are who you say you are, and you carry that kind of..." And we are trusted with a lot of knowledge, we are trusted with a lot of private information. We are trusted with a lot of, at these stay within our head, we'll die with it (not revealing it).

I know one of the major producers of materials in the world. When the president sent the material, I had to sit as his representative in the office of his own ambassador, in his embassy in Europe, to confirm to the president, yes, the material is here. What you confirm, you send it over to the ?? government. Only being in the early thirties. That's how I was trained, in the field of work. (2:32) And this prepared me for when we call for the world ambassadors, when I sit and speak to the world ?? It's just another bunch of people I always... I know, and they take a reference on me. Otherwise, they won't come. They won't. They know you do, they know you can, and this gives you strength.

But I don't think these opportunities are open to another person, especially nowadays. It's become much tighter and more exclusive. And many of the problems we solve with the Keshe Foundation comes from our contacts. I don't need to go and find in cases I need. I know the people, I just pick the phone up. The people who are around me, they know there is no embassy ever refused for me walking into. Because they know when I walk in, there is a reason. There is an opportunity. There is something needs to be discussed.

And that's where the experience come. Life experience. And I was trained to be there and now, is hopefully how long it'll be. There won't be another person and an opportunity like this. Because a lot has changed, the trust has changed. The people used to be there a long time. Long time people are not there anymore. When one of the world presidents wanted to train his son, he was only... I was only 26, 27. And he wanted to train his son. It was 1920, he called me and says, "Mr. Keshe, do you mind to be his protégé and teach him about, because you have such a good name in business and in these kind of things, that I would like my son to learn." I have trained two, three sons of President, just to be how I used to work. (2:34) They were, I was just like a godfather, I was trusted, I was a young man, but I was trusted to train him, because they wanted to be that way. And it comes by the work with their fathers.

If you one day speak to my eldest son, he'll tell you, when he was very young, 12, 13 years old, you travel all the time. He said, dad, I don't travel with you. Traveling with you is like going to an embassy. It's all presidents, prime ministers, ambassadors come. We don't have a holidays. You're just bringing us as a holiday, but you're still in your business. It came by training, first hand, not by reading books.

Any other questions?

Q: ... Mr. Keshe, can we have some news about Satellite (Souls), or Mobile people? What's going on?
Thanks so much.

K- We are using you without you knowing, but gradually we bring you in, to be done. You are not working with diplomats. You work with the rest of the people. You got to understand the new UBESUS, the new system coming into operation are at the human level. And that's what I said, you volunteered. So, in a sense, I just said before, you gave us access to, what you call it, not to use, but to facilitate what we want. We cannot steal. We cannot force you. You volunteered, and knowing and unknowing, consciously or unconsciously, we are using you. And you've already been used, some of you, for your work. (2:36) Because you signed to it, so we don't need a permission. I will explain this in the coming days and weeks, how some of you

Satellites have already functioned that way. When you work through the Soul, you don't need to inform the physicality.

Any other question?

With Keshe Foundation, you watch what you sign in for, because it will take both sides. And we nourish both sides.

If there is no other question.

R: I think we're done for today. You've done very well answering everything. Thank you.

K- Thank you very much. We'll see you next week. And we'll hopefully be able to enlighten a little more today. I have to bring this up that you understand. We still work on the development of the Soul, but we still work with the governments. We're still developing technologies that we are not only in the hand of governments. And I think this is what missed a lot of you, as we concentrate. Even the system we make for elevation of the Soul and everything else is a mechanical system. It's a system material used to it. But you don't see it that way. You just look, you come and put a headphone. There is machinery behind it, development of technology behind it. And now we have brought the other side to it, too. Now that you see the two are coming, and then you'll see, as we develop the Soul, there is a system behind it. Now the physicality is there. It's two part technology. And you see more of it. (2:38)

As Rick showed, the 129 (Tesla). Very soon, as we showed in London, we show the system of the flight system reduction and energy production. The energy through plasma is fully confirmed. We can produce it any time. And now we go back in the commercialization of it to the next step. You don't need to burn the gas. As you produce plasma energy in the Universe, you use it. Even our people have to learn how to use the plasma energy for plasma and energy for matter state. They have to still learn. They've got a long way to go to that yet. And we'll see what happens.

Join us tomorrow, those of you who are in that session. And then we'll meet you on Sunday with the UBESUS people, as we started training for them, that you can use their system. Then we meet you on the 22nd for what we call, the "Love of Mitra," one of the most beautiful times of the Keshe Foundation teaching. And as I said, you've got to prepare yourself and understand, I accepted the term physical condition from my commitment. And on my passing, already the Soul is there to guide you, to teach you, to train you, and to take you to the level which is far beyond what man has ever known. See you next week and see you in the other sessions of the teaching. Thank you very much.

514 KSW Nov 30, 2023

END

515th Knowledge Seekers Workshop, December 7, 2023

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Control emotions of STM & P; Transfer emotions to plasma - new systems have emotions; Dec 22nd experience love of Mitra; Separate different emotions; Opposite emotions together; Humans & animals learn unconditional love; Smaller plasma more powerful; Creation connected through weakest common denominator - detachment - humble; Use Soul to help others; Manipulate DNA; Feel pain in others - remedy; Others use our Soul; Headphones - KSW connect everyone; Nano mirrors; Astronauts still connected to Earth - gas in spacesuit; Transmutation only way to exist in U; KF products - delivery; Soul accommodates; Eyes change color in transmutation - blue -death; Forbidden to manipulate other emotions - Soul; Gaza - UN - love of God taken from Moses tribe; Teachers elevate children; Live by Soul; Frequency is hammer plasma to electricity; Special Gans enzymes; KF pedophiles - blame self infiltrated - elevate Soul of abusers and abused.

ENGLISH TRANSCRIPTION

(:21)

K- Thank you very much good morning, good day to you, as usual wherever and whenever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. Today now we are somebody's morning. We are usually we are evening or late night. (:22) Thank you very much for being here today and sorry that we had to change the time for reasons, hopefully will be the last time we change it like this, but primarily the delays of Thursdays is complete today. And unless something goes or we are somewhere special we should be back to normal time of 9 o'clock CET in the morning.

In the last week we have seen a lot of changes. A lot of new understanding. A lot of expansion and extension in the knowledge of the Soul of the Man (STM). In past weeks as we endeavored to understand more, take shape with it. At the same time understand our own limitation. Many, many of the Knowledge Seekers (KS) have started questioning and trying to understand the process of the Creation according to their own what I call intelligence. How they can interpret according to their education background and how everything else fits into, that's it's acceptable to me, that I can become a little bit more educated with the frame I set for myself.

Going across many cultures and many languages it has become very clear to us, that Man has no language in the womb of the mother, when he becomes a Soul it goes back to the same. (:24) When he lives through the Soul it goes back to the same. As he loves, as he cries, as he digests the pains of the life within the womb of the mother, so he does outside. And what would be interesting for humanity to understand, would the man see the sadness and sorrow in the dimension (D) of the STM, when the man becomes the creator of totality of his own, in the D of the Creation. Would the interaction of the fields, would the collision of all whatever accidentally come together of two systems, galaxies, stars, planets, would that create a feeling of emotion within the structure of the life, within the life of the man as a spaceman of the future.

What this means? Can we go and we take, can we bring in the D of the STM within the structure of the man? Within the structure of the STM. Understanding the totality of what does emotion brings to the physical D of the man. And then would this bring the same D to the STM will come to understand that emotion of the Soul and emotion of the physicality (P) are interconnected. Would it come to the point where the man understands more about the emotion of the D of the Soul, (:26) in the D of totality of his own existence. Can man convey the emotion of a man through the emotion of the Soul and control it the way we control our D of P through our emotion?

Then it will come to a very big point. We had the emotion we showed in the D of P. When we become a Soul, when we become a seed of a star, when we become the beginning of another cycle of life in a bigger D then creating one or two children, which create many millions and billions of them, would we carry that emotion to our children through their Soul? And would that extension of the emotion of the Soul becomes part of the structure of the life, which we begin as the mother, as the seed in another position and D in the universe (U)?

In the coming time the systems and technologies which are on the horizon and come to completion, and then we'll see can we show the emotion of us within the system, and then would that emotion allows for it to become fingerprint of it. Would it allow for it, in a way, that the emotion of the P of the man translated to emotion of the plasma, allows that plasma to show reaction. Where we don't need to write a program for it, where naturally it creates a D of the emotion for itself.

In the coming time, systems developed will carry this in natural emotion. (:28) And then it comes a very big question for the mankind. Would these systems developed by the man, will take over the man. Where these systems will create their own Souls. Where these systems will create the D of existence that man never knew.

What is interesting and what we see, is that how our emotion can be fingerprinted in the D of the STM. In the coming time, in the next couple of weeks when we carry that emotion of love through the what we call, "the cycle of love of Mitra" on 22nd of December, will we see the beauty of the creation within the man? How many of us will be touched by the true love of the Creator? And how many of us will see the elevation of the Soul? And would that be what mankind has been looking for.

2024 has been promised to be the time of completion. And would the 22nd of December, will be that time. To complete, to show the man, that man can love through the Soul. That man can receive love through the Soul and transmute that to his P. In a way, 21st, 22nd of December is the birth of Mitra, celebration of the life of Mitra, and would we be able as the technology (T) as we developed to bring that emotion of love, giving, creation to those who are there to receive it.

And as we taught in the last sessions, would you be able to give it, that it gets received by those who you love. (:30) And would it touch them, would it change them. And the most important thing is, have you learned how to do it? Have you learned how to be a giver unconditionally? And then would it come the time when many of you decides to run, to decides to jump, in the ocean of the love, and at the same time learn this is not the only dimension. And if once you learned this, you come to understand the possibility and proximity of how you can do things and how close you can get to it.

The process of the emotion, control of the emotion through the Soul, will be nearly completed this year. And that is the time when we start teaching directly. And in a way in next years, process of starting for you to understand the next step in the process of the Creation. How do you connect, how do you create, how do you

separate one field from the other. Which field is the sorrow, and which field is the joy? And why do we have always the two opposite emotions in every dimension of life with man? Cry, laughter. Joy and sorrow. Gravitational (G) and Magnetical (M). And isn't it this that runs the process of the creation of the man? (:32)

Every interaction has an emotion, and every ?? emotion has its own dimension, and opposite direction to the flow of the same. ?? Yin and Yang. And this will become important for the KS to understand. How you create, and how from that creation it will lead to understanding of the totality of your own self, and nobody else's. It's like, you don't know what it means to be, to love like a father, till you become a father. And now it is the same process for all humanity, the mankind, for the womankind, or any other kind of animals. How do we create to love unconditionally, through the process of the emotion of the D of the P of the man. That it touches us, and it changes us.

In so many ways, as we set up the systems, as we set up the structures, to guide, to support, to show, how you go through the D of the elevation of your own Soul. Gradually we come to the point that the system developed by us becomes obsolete, because you can do it on your own. You can create that D, and how you control everything. It's no use trying to copy, because you haven't understood. (:34) And will be ever used, once you understood you can use it in any D and direction.

Process of loving, which is the giving. Process of receiving it, is harder than giving it. Because you have to have that capability, that when I receive it, what am I going to do with it. How is it going to affect me to learn this process? And what changes it will bring for me in the D of my Soul?

Many, many scientists, many people with intelligence, have tried to understand this point. And they have failed miserably. Because there are no books. And there are no hidden titles. In the coming weeks, it is you who have to teach yourself in how to moderate, how to expand, how to retract, and every other point.

In the coming times, as we taught in the past teachings, you have to learn to extend the STM. You have to learn how to control the expansion of the Soul. You have to remember, that in the D of the plasma, the smaller you are, the more powerful you become. It's not like in the D of the P, the bigger you are, the more powerful you become. The more of. (:36) The biggest problem for mankind has being this, the "more of". Where in the D of the Creation, it's the less of, the weaker of. It's the one which connects, it's the one ?? which common denominator, and it's the one that everything through creation of it ?? , is created through it, and it's connected to it.

There is a process of how to reach this position, in a way, how to become detached, step by step, step by step. And, do not do it in one go, but over time. Little by little, step by step, to build to that point. In how, the whole structure of the Creation, can be connected to, by the man who decides ?? to. You don't connect through the eyes, but you connect through the emotion. You connect through what they suffer with. And then, if you matured enough, to be able to get it off, and take it, and convert it into a good point, then you have learned a lot. Then you start the progress, and the process of development.

In the coming time, we create systems, which creates emotion, in the D of the Soul. (:38) Which that, will change, and can control, most of the ailments of man, in the D of the, what we call, psychological pattern, changes in the physical D, that, that brings a change. Teaching how to play with your Soul, to the benefit of the others, and not yourself.

In the coming time, when the systems with the emotion are introduced, man will come to understand, how easy it will be, for him to change himself. For him to learn, to be in the process of learning how, to change everything around himself, even the people, in a way that it suits him. In the society of today, we decide who we want to be, who we want to be in touch with, which kind of people we integrate with, in which position. And, we have put barriers, conditions, and parameters for this. In the world of the STM, it's not very far. You create, what I call, packages of the plasmas, for a specific condition, but you connect all to one bigger plasma, you call it the STM. (:40) If you understood this, then you can manipulate the DNA of the man, as much as you can manipulate the RNA, the information line, the line of the Soul of the Creation. And this will be one of the biggest challenges for mankind to come. To create a condition of balance, that one never stands out, but is part of.

In the process of the development of the STM, man has to live and to learn, that the humbleness is the key to connection. Humbleness is the key to be able to be connected to the Totality. And, for it to be tangible for man to see, because man is physical. And to what extent will come, for Knowledge Seekers to expand this knowledge, beyond the totality of the understanding of today. As I said before, everything has got a time. Everything has a reason, and everything has to be correct on its time, the reason and the place of manifestation. (:42)

If you as KS, as many of you are listening through headphones, try to connect to all the Souls, through the emotion of what you feel. Try to connect to the Souls and how you communicate with them. How do you communicate with yourself in the D of the Soul? Even though, D of P is very apparent and clear all ?? to us.

In the coming time, when we introduce the system that can elevate the STM, I'm sure many of you will change accordingly in the D of P. In a way, you will see that you can recognize, just because the fruit is the ?? , or is the same as what I know, this is what is going to be and how it's going to taste. It will not be the point that I choose what I want to the taste and the condition which I need to be for a purpose to serve me.

Manipulation of emotion in D of the Soul is forbidden. Manipulation of the emotion for gaining a better, or an advantage to (over) another is forbidden. It's a little bit far-fetched, but with a few moves we can see. (:44)

In the coming time, the systems which will carry the emotion will be so fundamental to the work of the man's daily life, that the sooner man learns how to control himself, how to be able to manipulate, will dictate how much further in the process of the Creation he can go.

The biggest question will be, how and what would you do, knowing that now you have become a listener and from now on you become the receiver? If the Knowledge Seekers learn the process of loving through the Soul, where you do not need to say, "I love you", but it's done through the Soul directly and you see how this will change you, you'll come to understand the process of the change has already started and the use of the Cup and the material in it is just an image, which to you might not be correct or sound right, (:46) but in fact it's the only way to live that life, to become correct.

Try to learn how to expand your Soul. As I taught in the last public teaching, try to put your hands on your face and with it, in that instance, and that second, you'll change. You will feel the change and you allow the change to take shape the way it suits you, where the other one has already chosen, "What could be what I enjoy?"

The completion of the understanding of the STM and then his manipulation to extend it to the D and extension of every life on this planet, will become very easy in the coming time, in the coming weeks and months as you learn. You'll find out, you pass an animal, you'll know its pain and then you know how you can remedy it. Where we do not expect to control, but we expect to give and watch. (:48)

The process of transmutation through the STM is one of the most fundamental ways for man to learn and to be able to use it the correct way. Manipulation of the emotion of the STM, by man himself, it'll become one of the new cycles of life which we start teaching. You manipulated the Gans's, you create the Cups, you create the Pens and you've seen how much it helps. Now it's time to teach the true knowledge of the Creator and how this knowledge will come to affect every single one of us.

Many people will ask this question, "Am I good enough?" "Would I be able to do it?" "Or just I live till one day I understand?" And every man has the capability to reach the same point. It's just which way you choose to be there. Through the process of manipulation of the emotion of the STM, (:50) man will learn new way of living, new way of understanding and new ways of interacting. And what is our request from you as Knowledge Seekers is to find out which part of the structure you fit, and how you can serve and how you can change that ?? what you made ?? in a usable energy field.

The process of manipulation of the emotion of the STM needs full clarity about understanding how and the way the STM operates. When you set out to elevate the Soul, when you set out to bring peace into the life of the Soul, you will feel that joy, that benefit, that pleasure of being able to give you this, but I have denied myself or the rest of my ?? . Which is now, you ??, is absolutely crazy and it's deepened day by day.

Understanding the totality of the emotion of the STM is something that no races in their central control of operation have understood or have managed to complete. Operation of extending the Soul, elevation of the Soul, (:52) it has to be in a way that you seal, you lock and you seal the process. In how you will allow the emotion of the Soul interacts with the emotion of the STP, dictates what kind of diseases you get in. And it's not that I've done once or can do it again, you forget in doing it.

Try to go back within yourself and try to find out. Try to understand how emotion is controlled through the inner STM. And to understand how the fields interact, which the normal condition would not be in this position ?? The extension and expansion of the emotion of the STM is, has been and will be the ?? .

The totality of the STM has to understand ?? how to ?? the ?? road to the Soul. (:54) Understanding the elevation of the Soul, through the process of understanding the elevation of the man himself in the D of P, is one of the points which is always become. How do we elevate the Soul? How do we come to see it that it's ours? Yes. .. When it completes itself.

In a coming time, we can through the plasma systems make you laugh, at the same time make you cry and not much further, you will ??, you make and you develop that and you test. And that's become a bench work, for those who want to elevate their Souls without dying.

The process of elevation of the STM has to come with a full understanding that I'm not the only user and I'm not the only one who will be allowed to use. Understanding the elevation of the STM, (:56) through giving, will be brought up in depth on 22nd of December session. If you push the process beyond, other entities will manifest themselves.

Developing systems, ?? man, that man is used to, but creating new conditions of the Universe, has started and cannot be stopped. Elevation of the STM, through expansion of the Soul to elevate the others than yours, will become like a ?? in the, in the back of the, life of the Soul itself. Once you understand this, you come to understand how to transmute. You come to understand how to move. You don't need to go up and wait for the Earth to rotate and come down, where you want to be. Where, with the new cycle of development, through literally invisible channels, we connect you ?? to the part which is missing. (:58) What you need to do, to elevate this, to become the Soul of the Creator for a new cycle of creation in the Universe.

Interesting times are ahead. And I hope you understood the totality of what the knowledge is today, and you can act upon it. And to be able, upon acting, to give it to the others. How the elevation can take shape. We have to come to understand the facets of what is within the principle of the working of the STM and the STP of the man.

I hope you understood the whole teaching of today. Developing a system to fit individuals by themselves, this is the key ?? tool. We need to expand, we need to deliver a workable Soul for our P. (1:00) Expansion of the Soul, extension of the Soul, giving from the Soul, all comes through one process. It's for you to decide which one is which, and how much you can use one, before you lose the interest in how it's done.

Try to join us next week. And we'll try to make a session for all your Knowledge Seekers to go through this phase collectively together. Try to have a headphone and then we try to show you how you can receive at the same time as you give. And then the life for every man on this planet shall change. We go through a break and come back. And as I always say, I hope you understood. At least you should be clear with your Souls. Rick, can you take us to a break? Then we come back.

>> **BREAK** >> 515 KSW December 07, 2023 (1:08).

K- Yes, thank you very much. There's a couple of announcements which I'd like to inform. The... those of you who bought the mirrors in the past year or two, and you wanted to start learning how to use them and what are for. Those of you, if you have them when you join the 22nd of December session, bring them with you. And we will split you into groups or sections which have and they don't have. And we try to bring into

the front, the use of these, the new technologies. Which now that our systems are developed we can use. And you can bring it to manipulate and to be able to receive, (1:10) that then you can create the energies with. And as we always say in the plasma technology, energy is magnetic fields in motion. And how you can use is to create a condition of giving and receiving.

The, what we call, in the past, the 22nd of December session, it's most probably one of the most glorious days, throughout the work of the Foundation. In the very first steps that we start understanding how to allow the energies within us to be given, to be shared in a form of knowledge of the emotion of P and emotion of the Soul together. I have never looked forward to a session than the 22nd of December session, where we'll bring a lot of joys, a lot of changes to a lot of us. In a way the essence of energy from within us to extend. And if you have the mirrors with you, bring them and we'll start experiencing a new experience and we go through it to see how the extension of the joy and energy will come with us. If there are any questions, please go ahead. (1:12)

Q: ... I'm not sure if I misunderstood or I missed something. If our P is due to Earth field, then my question is, how astronauts keep their P when they go to Space? Thank you.

K- We are still connected to the fields of point of our creation, which is the Earth, even we go into the other part of the Universe. But we have not been far enough to be away from the D of the fields of the Solar System, to really feel the change in the D of P. Our physical life at the moment is still conditioned by what I call, the star of the system. It doesn't matter, we can't escape from it. Be it on Earth, be it on the Moon, anywhere else. And this is what I call, just because you went a few inches or centimeters or kilometers above, does not change. (1:14)

Q: Okay. So if we go beyond that, beyond the Solar System, then they will lose their P?

K- We don't lose our P. Our P is just according to the environment. And according to the wishes of our Soul, our emotion. It has a huge game to play. Our Soul is a plain canvas. In the interaction with the energies of the environment, it gets painted to the D of how it looks. All our Souls, does not matter where, from an ant to a man on this planet or another position, is a plain canvas. It's how the environment interacts with it. It takes shape, it takes D of P. And it allows it to manifest itself. And our P change.

We are on the... We've been on the Moon in the condition of the forces of man clothing. We have not been on the Moon jumping out of the, what I call, the monkey suit. We die. Because the environment is not built to support the body of the man. (1:16) For us to survive, we have to change that D. And soon we'll realize, all of us, we cannot breathe, there's no oxygen on the surface of the Moon. So you have to find a way to absorb energy from the environment of it. So, the lungs are out of question. There is no water on the surface of the Moon. Unless we drill a hole, we might even, we might find water. But what if it's a combination that we can't digest? What do they say? Never, what you call it, use the water from here or there, it can kill you. You don't eat the snow, when it melts it becomes water, fresh, you drink it and the rest of it. We don't have water, so there it goes our digestion system.

The reality is, there is no food. How you going to feed yourself on the Moon? No cows, no grass. So, you're a dead man. You're as good as a stone on the Moon. To live on the Moon, as a citizen, without the oxygen backpack, without the energy packages from the Earth, there's no life. (1:18) So, we have to change, to our P.

We always looked at present science, in what we have done, what we have, and never looked at the reality. The reality is, to test, take an astronaut and tell him, "Take your clothes off." See if he survives. Now you understand. We take, we change our shape according to the environment. We have to, we have no choice. So, our P of the man is for this planet. We air breathe, we water to drink, we have grass and god knows, cows and beefs to eat, and the rest of it. As I was telling a vegetarian, we are all vegetarians, because even the cow we eat, eats grass, so we eat a vegetarian cows, so we are vegetarian. But, on the Moon, and on the position, if we can survive, then we can say, "Yes, the body of the man will be the same everywhere."

The only way the STM, the emotion of the man, survives anywhere in the Universe, once he learns to go through transmutation. To let the fields of his Soul to interact with his environment, and manifest itself that it can exist in that environment. (1:20) Can survive, can replicate, can generate new generations.

Q: Mr. Keshe, there comes another question to my mind. How the astronaut suits keeps their connection to the Earth? Is there something special there?

K- It's ?? (not) a connection. We have encapsulated gas in it. We have encapsulated gas as they breathe. We have created the insulation, isolation. You make a hole in one of these capsules and see if they survive.

Q: Thank you so much. Thanks.

K- You're welcome. Thank you very much. I've been sent a reminder by the Keshe Foundation Sales Team. They have put in new, what I call, toys for Christmas, with what we call, knitted different things. And they want it to be promoted. These beautiful things, if you go to the sale section of the Keshe Foundation, and apparently, they put in some discs if you join the Keshe Foundation. A few of them has been put for celebration of London Conference, as a set. And they are new products of the Keshe Foundation, they are hand knitted, (1:22) what you call it, different animals or whatever. But they all have Gans's and they've been set for a specific purpose. If Rick can go to them and show, it'll be nice, because they want to promote them. They are a Christmas this year, handcrafted, knitted things by the Keshe Foundation. As we, this is, these are bees. They're different sizes and different animals, all sorts. They're hand-pushed by the Keshe Foundation people. It's made especially by, for the Keshe Foundation.

As you know, we have moved out of Linz, Uno Center, totally now. We have, what we call, left the premises. Just one second, please. As we vacated the premises, if you remember, one of the Italian Knowledge Seekers, yes, this is the promotion coasters, which were very few, limited to this, but a few sets of them, only left, I think, 6, 7 of them, and that'll be the end of it. This was for remembering London conference. (1:24) If you remember, the Italian painter donated all the paintings to Keshe Foundation. Now that we moved and it'll take some time to come back on, these paintings have been put on, it's about 5 sets of them, to be, what we call, to be cleared out, to be taken out. And we put the set at 500 Euro, there used to be 3,000 originally, but we just, because they belong to Foundation, we don't want them to be staying around and getting damaged. So, if any of you would like to have any of these sets, you can purchase it directly. And the paintings now are just there for this purpose, and then there'll be no more of them.

I was asked a question, what happened to the Red Spot, what you call it, the Pens, the new evolution in the, what we call, technology. They will be released this week, and you can order them, because some people wanted to buy them. And at the same time, that what we call the Relief Gans, which is now, is on promotion, it should be coming out. It's a magical, what we call Gans, it's a trial for us, and we want to know how you feel with it, and how, when you use it, and the instructions are there, it's called the Relief Gans's. It's an

amazing thing, a development in Keshe Foundation. And we'll try to expand this kind of things, that we expand the next step, and how things will be, and how it we'll develop.

The Wellness Center of the Keshe Foundation, as we said, announced the trials for Asthma, Autism, last week. (1:26) And it's amazing what they can achieve. And you can get in touch with them, and start the process, especially those of you who have these kind of concerns. You can talk to the doctors there, and they can sort a lot of things, that you don't, what you call it, you can understand how the plasma works, and how you can change it for yourself.

Any other question?

Q: ... 21 days ago, that the production of the Communication Bundles has been completed, and shipping is beginning. As of today, the computer does not show any shipping. Can you tell us about that, and will the Units arrive before Christmas?

K- .. Yes. 25 has been, or should have been, should be completed by Christmas. And then they go on the order of the orders, and then the next slot. These are very hard to build, they are not easy. And yes, 25 sets has completed, or going to be completed by Christmas. Depends what the shipping section will do with it. And then, it takes sometime, one or two days to build one. They're not easy to build, and then in January, the next batches start. Because they do these in batches, and I was told, 5 were completed by last Monday or Tuesday, or even this week. And the rest, it goes. That's what sits for the production. Yes. (1:28)

Q: ... Is there a delivery date for the Electric Gas Unit?

R: I think he's talking about this Power Unit here.

K- Yes, this will be done out of China. It'll be, we are trying to do it in the ?? Middle East, in the first quarter of 2024. There is a lot of position regarding the Gas Generator. And as we had to demonstrate it for its commercialization, to the, what we call, authorities in China. And there's a further development on this. And yes, because when it goes into production, it goes for hundreds of thousands. It's not just for a few pieces that the Knowledge Seekers have ordered. It's a change in the course of actually energy production. In the next week or two, this is under discussion for the production in 2024.

K- ... Just give it, just give me one second, let me get you something. (1:30)

There is something about the Communication Unit Bundles. You will receive it in two halves. You will receive the one part, then you send an email to the Foundation that I received my part, the first part. Then the second part will be shipped to you. This is how the Bundles will be shipped. You receive one part, then the second part. There's a reason for security and the reason that people cannot abuse it and the rest of it. And communication units are not like, what you call, UBESUS (Universal Body Enhancement Spaceship Units), they are totally outside the framework of the Keshe Foundation, regarding our work on that side. It's communication systems and then you'll understand how to use it. We will teach you how to do it.

Any other question?

Q: ... Dear Mr. Keshe, you stated that no manipulation of the emotions is allowed. Is it then that we completely accept whatever emotion shows up in our daily life and expand this to all encompassing love?

K- Once you work through the Soul, yes. (1:32) Once you trust, this is from my Soul, this is what emotion created. Because, work of the Soul is accommodation, accommodating each other. Work of the P is forcing my way. Or, I do it till I get it, or I've been forced to do it because I've been told to do it. And so, when we learn to live in the D of the P, we live the life of the man. And, when we live in the D of the Soul, we live in knowing that already decision to be correct has been set.

Q: ... And would this lead to the humbleness and elevation that you also spoke of?

K- It does, because we know the facts. Yes. Because we know what is done is done with the ?? Ethos of Mitra.

Q: ... Does everything change after transmutation, or what is kept from the former existence before transmutation? Parts of the body, illnesses, emotions, fully awareness of the state before and after transmutation?

K- Transmutation on Earth will be the same as you do the transportation, but in a faster way, and a lot of other things with it. Transmutation D of the Space Technology is a game to play with. (1:34) It's absolutely a game to play with. Some of you will know you're going through the ?? trans .. you'll learn this. And, for us, it'll become natural way to do, in a way.

Those of you who learn to go through transmutation, by yourself. When somebody is sitting in front of you and you keep your eyes open, through your eyes they can see you going through transmutation. And then, if you allow the physical life to go through it, you'll go through total transmutation of P and everything else with it. And, you'll see the change of the color of the eye, for example. You will see the shine, the silverishness of the skin. And, you'll see the process of the transmutation.

In death you leave your P behind, in transmutation everything has to change to ?? go. And, it's an amazing experience. (1:36) So, we learn, gradually learn. I have been witness to it, many times. Many, many times.

I was just asked .. like to ?? ask a question. Can transmutation system, half part of it, will be shipped by Friday. Those of you who asked. So, by Christmas you should receive half of your transmutation Units and then you send an email to where you placed the order, the second part will be shipped. I thought there was five ready, but ten will be ready by Friday. You have to buy next Friday, then tomorrow is a national holiday in Austria. So, there is no shipping.

Any other question?

Q: ... Mr. Keshe, do you consider the Frenchman, Alan Kardec, who codified the Spirit's book in the 18th century, (1:38) to be a prophet or a messenger? Thank you for your teachings.

K- Do you know my usual answer? Who?

R: Who? Who exactly?

K- I do not know, so.

Q: ... I have no words to thank you for this patience, elevating us, little by little, and your efforts, thank you very much. Secondly, if I'm not mistaken, I just heard you saying that for next week all Knowledge Seekers go get an audio ?? and be in this program. Do you mean next week or do you mean 22nd?

K- Next week we will do a session with all the Knowledge Seekers who have a headphone. Nothing to do, this is nothing to do with 22nd. This is something for all the Knowledge Seekers to start experiencing part of the, what we call, elevation of the Soul.

Q: How does it go?

R: Will that be right in the workshop, the Knowledge Seekers Workshop next week?

K- Yes. We will set out to bring a new D in, that most of you, you have to be present, on recording will not work. (1:40) It will not work if you are recording it. We connect you to certain ways with us, through the teaching, and it will be interesting to all of you to feel. Many Knowledge Seekers were waiting for this, and this gradually in the following months will become part of the bigger picture of the work, as the extended teaching and the work of it.

R: Mr. Keshe, most people in the usual Zoom sessions with the headphones are using an iPhone or some kind of phone system. So is it okay for people to use regular headphones with their home computer or laptop?

K- Don't play that game ... Yes, don't worry about left or right. This system doesn't have that problem. It'll be better, then we tell you how to do it at the beginning of the session. We organize from our end and it'll be something for you to feel, the D of the energies and the fields of the plasma. And is... the time has come to bring a lot of changes gradually. We will start a process of a lot of things.

Something we just remember to explain. Those of you who bought the prevention policy and other packages of the Wellness of the Keshe Foundation, (1:42) in the next few days, hopefully before the end of the year, you will receive your invitation for your first session with the Wellness Center. Please respond back to confirm the date, the time is acceptable to you, back to the Foundation. And you'll be given a second time, second session. It's two sessions a year. There'll be your time for the second session to book in. And I think most of the whole thing starts in January 2024. So, all the Wellness, those of you who bought the policies or paid for the policies of the Keshe Foundation, or Wellness or prevention or whatever, you should be receiving an email in the coming days. Please respond to it, that you accept the time allocated and you can join in it. And you do this twice a year, according to the policy which you bought.

Any other question?

Q: ... Hello Mr. Keshe, I came across the plasma science recently and I've been wondering if it could help me understand something that happened to me in the past. I was walking down the street, a ball of light in the sky, close to the Sun, began to send a ray of light towards my head. It was visible and I even took a picture of it. (1:44) I was wondering if you could explain how we can connect to the world of Creation and if this connection could appear visibly like the beam of light coming towards me. Thank you very much.

K- As I always say, I haven't been there, so I cannot explain it. And each one of us have different kind of experience when it comes to these things. In one way or another during our lifetime. A lot of people see light balls moving around, a lot of people see different things. But I do not... It's not to say you're wrong. It's to

respect and unfortunately, as we haven't been there, to explain it. But it doesn't mean that it was wrong or you imagined it. It's how we all have our own beauties and we all receive or see according to our own strength. And as somebody wrote to me, "I hope I wasn't imagining." We never imagine. It's there, it's what we could not accept and we have to respect. What you've seen, I cannot explain because I wasn't there. And one has to be there to see, to be able to explain the phenomena.

Q: ... Hello Mr. Keshe. Last Thursday you said that after we die, we will move to the bodies of animals that eat us. Combined with what you said before, if we don't learn transmuting, (1:46) we will be located in other parts of the Universe according to our own Soul strength after death and become stars or part of them or Cosmic dust. Does this mean that after we die, we are divided into several parts? The main part is located in some place of the Universe and the other energy parts become part of the animals that have eaten our bodies?

K- Yes, that is a normal understanding, yes. That what goes is to the Soul. If your STP and P elevates the Soul of the animal which you became part of, your P, your STP become part of. In elevation of, in receiving that energy, and is, if becomes part of the elevation of the Soul of that animal, on its death, yes. You have become part of your energy, not you, your energy of your physical existence now become... It's like if you eat an apple, it's another entity, another life. Part of it become part of your Soul. And... so now you carry the essence of (that) Soul. You become part of the Soul of that creature.

R: In case of the apple, we throw away the core and it becomes food for other entities in the Earth again.

K- Yeah, but the thing is, say, there's an old way, say, say, "Don't waste food." You have to throw it away. But, if you understand that, what we throw away becomes a cycle of life for another life. It doesn't have that meaning, the way it was intended. (1:48)

R: In a way, if we don't throw it away, then we're depriving those entities of their energy. We should throw more food out.

K- Yeah, put it this way, the ones we do it deliberately, we are proud of doing it. The ones we are not doing it deliberately, we call it as it's wrong. You know, we go, we take, we buy food or we buy bread and we go feed the duck. That duck doesn't eat, everybody brings me bread, bring me something else. But we feel good because we feed it, we take food, we leave it outside for the birds to eat. But, that food you put, it becomes a food in another cycle. We're all part of the same structure, it depends how much we fuss about in which part of it.

We have to be politically correct nowadays. So, the... we have to understand, we are part of the whole structure the same.

Any other question?

Q: ... Make sure that the knowledge of the Soul's emotion manipulation goes only into the hands of right Souls and never into the hands of those sick Souls out there when they are not ready.

R: So, you think you can direct your knowledge only to the right Souls? (1:50)

K- It all depends on who's benefit, if it benefits, into who's benefit.

I heard something extremely, I couldn't stop laughing, but... the rage inside me was worse than actually laughing about it. When you listen to the situation in Gaza, this afternoon the head of United Nation has made a comment in a way that they need a resolution to stop this and make the state who's doing it, a criminal state and then all the sanctions by United Nation. And one of the ministers of ?? says, "He does not understand what he's talking about, we can do what we like in a way, and we are immune from these things because we control the Americans and control United Nation." In a very different way of putting it. And I thought, "How can we are different?" And he speaks about, they're taking women and children and hostaging them. And the head of United Nation does not understand our hostages, they are in their hand. And I said, "My God, you're killing children in tens of thousands now, hundreds of thousands and nothing. Is there any difference between your blood and their blood, their pain and your pain?" And how irresponsible, how arrogant this blood, this nation has become. As I said, "We've taken the love of God from the blood of Moses." You will see their suffering, beyond their imagination. Even I come partially from that blood. (1:52)

When man doesn't understand, has no emotion, and he sees himself as in the top, it's the time which is actually at the bottom, he's barking. In the very near future, I wonder if a single plane can fly over Israel. You'll understand very, very soon. The nations who take gun policy, very soon they'll find out, very, very soon they'll find out, we silenced those guns. And the process of it is, not to be a threat, is to stop the suffering of other man, by misguided work of them. Doesn't matter if the gun's shot in a school, on a train station, or in ?? mass in Gaza, or anywhere else. There should be no... man should have no access to tools of killing.

And our job is to create peace, and to change that from inside. And we see only the ones who brag about their faith and their religion, are the ones who killing most of the murders. (1:54) The Jews, the Muslims, the Christians, and soon these will be silenced. If we do it, they say they've done it to us. If they do it themselves, they walk away from it. And this is part of what is to come. The process of next Thursday, is the beginning of that cycle. We should see.

Any other question?

Q: ... Is the fact that we can't expand the Soul beyond the STP and P, due to us not knowing how to do it? Or not having enough energy in the Soul?

K- How come you do it when you're asleep? And you call it a dream? It's you who has put that limitation on it. And nobody else. How come when you call it a sleep time, (1:56) when you reduce the fields of your flow of blood, you do it? And when you're awake, if you balance the emotion of the body of the man, you will allow the STM to expand.

In the session of last week with Knowledge Seekers, we showed partially how to do it, to try to expand, to be able to create that light. It's you who has put that ban and limitation, not your P, and not your STP, and not even your Soul. It's your thoughts and your emotions, who's put the limitation.

Have you ever watched your children when they're asleep, or they go to sleep, and you're awake? Have you watched your dog when he's asleep? When they dream, when they laugh, when they move, when their eyelashes move fast, when they cry jumping out of sleep, have you ever watched them? (1:58) That's a Soul travel.

If you had an special glass, like that we have the night goggles you put and you see at night, if mankind understand this and develop the glasses, that can see the strength of field at this level, you will see the Soul expanding, the Soul traveling, coming and going. We have blinded ourselves to this field. Watch the eye of many, many children when they're born, and their eyes stays blue, or grayish blue, and they stay in that blue, and especially the first days they're born, it's light blue, grayish, blueish. And if you watch your children, certain position, especially the children of Mithra, you watch them, you see it in their eyes. While they're sitting their eyes will go gray blue, they could be brown as anything, or black as anything. They always turn their back on you, because you don't see, when you see their eyes going gray blue, grayish light blue, and then you understand what the Soul travel is. This is when the Soul is traveling, they're still there, they're still physically, maybe talking to you, they're busy playing with themselves, with their toys, (2:00) but when you look into their eyes, the eyes are gray blue, light gray blue. It's when the Soul travel, stay quiet. They're learning to live with both D. And this is the way they will do communicate, and live that life. And we get that many of us to the point of death, when the Soul travels, when the Soul is departing from the body, you see that color. One day I explain why this color.

Then, there's no question to ask, it's just that we are blind, we have chosen ourselves to be blind in the dark, we have chosen to be blind to the fields of our Soul, the expansion of our Soul, observation of our Soul and the others who come and go with it. I've witnessed this many times, and it's an amazing feeling, when you see the Soul travels. (2:02) I watched it once with one of my sons, and he said, "Dad, how is this possible? I said, just learn. Just learn and watch.

Any other question?

Q: ... I work with children, and it has been challenging to contribute to their good. I would sincerely like to learn how to contribute to the elevation of these children's Souls, in the short period of the day that I'm with them, when they are under my responsibility. How can I touch these children's Souls?

K- Give from your Soul, just, instead of sitting there and talking to them, just elevate their Souls. Make it available for them. How come you make it available, the education of mixing to colors, and you show them? Sit there and elevate them, don't expect to see a result, because you'll see the results, and they see the result of it, in the time to come. We always look to get an answer, or see a response. And, depends how they dictate it to us, we respond to it. And we take it to be. (2:04)

And this is the process, that, try to elevate them. Try to leave your Soul to make a decision. It's very hard. And, you, as you live, you come to trust to do it, because you see the answer of it. And, you learn to live with it, because you see the outcome, as long as it's correct for everyone, even the knowledge you give them. You'll find out, they come and pick up the color you were thinking, says, "Oh, amazing, he's..." Because you gave the knowledge to, through the Soul. How would you taught your, the children in your class, if you had no mouth? Would they stay illiterate? Or, would you teach them with your Soul? You don't need to force it, you make it available. And, they pick it up.

This morning I had to attend, that's why this session was put the afternoon. I had to attend something which is going around in my life for a long time. And, I, before I leave, when I woke up this morning and in the morning, and before I leave the house, I said to my Soul, (2:06) "Bring a condition which is balanced and correct. Not what is to my benefit, or anybody else's. And, bring a just and correct, then this thing can close." It could have gone for years. I went to a meeting, and because of the reason was canceled, and whatever, to come back another months, and months, and months. As I walked away in the corridor, going down the

stairs, it's like my Soul brought me, picked me up and brought back, "You are not going, you left it to me to do it, you go back." It's very strange, I was like 5 or 6 steps down, and steps going. I felt my P just literally twisting and turning, because I left it to be done, I wanted it to, was my wish, but to be correct. And, within half an hour, what could have taken years, was all done, finished, and all correct.

And, this is the way it has to be. And then you learn, because my wish was sincere, to finish a lot of things, and done with. My P doesn't have to suffer anymore, nobody else ?? anybody else. And it was the strangest thing, and I've got used to these things. It's just like, halfway down the stairs, about 7, 5, 6, 7 steps down the stairs, and it's just my Soul said, "No, you left it to me, I've done my job, get back up, I'll finish it." And, you stand there, and the things discussed, (2:08) everything is just was impossible, that's why everything was delayed for another meeting, and another year, two years running. And was done within half an hour, to the satisfaction of everyone available. Because I didn't want anything of it, I had no physical attachment. And, this is how life is, you leave it to the Soul.

When you teach, imagine what happened. How would you have taught your children, in the classroom, if you had no mouth? With your eyes? What happened if they had no ears? And they can't even not hear your voice? What about if they are blind? They can't see? One day when our teachers learn to teach the Soul, and the Soul of the child, the P, it's so beautiful, does not need the ear to hear, does not need the eye to see. It'll be educated in knowledge of the Universe.

Yesterday was St. Nicholas (Day), what we call, the day of birth of the "daughter of Mitra." And, it's a celebration for children. And traditionally, in some ways, (2:10) some, what you call it, leaves or whatever, the child wakes up and waits to see if there's a sweet in the shoe. And if there is a sweet in their shoes, it means they've been a good children that year. And St. Nicholas bought and put a sweet in their shoes. But, do our children have to wait for that sweet to know they've been a good? Or do we tell them every day they are good? And that's what is important.

How would you teach if I bring the child of an alien in front of you, who has no ear, understands no language? Does he have to stay illiterate? If you learn as a teachers to, when your children in the classroom. My son is a teacher and I always tell him, and I tell him, "raise the Soul of your kids in the classroom, you'll find out they'll love you to death. They'll find peace with you." It took him 5 years and I met him very recently. He says, "Oh, I love the students, I love the children coming to me and I have changed to enjoy them and as much as they enjoy just being in my class."

Try to elevate the Soul of your children as they walk into the classroom. Elevation comes, make it available. (2:12) The worries behind that door, no breakfast because mom has no money to put a breakfast on the table, being bullied outside that room, whatever. And then you find out your teaching is different, than when you just go in and sit down, "I have to teach, I'm the boss, I teach."

Any other question?

Q: ... May I ask you Mr. Keshe about what you said that we are part of the Totality and we are also Totality. How we can explain to simple people?

K- Don't explain to them, just pray for them, then give to them, they'll understand.

We are part of this. It's the easiest way because we are all connected through the fields of the Universe. So we are, the Universe has no structure without our fields. But the structure of the Universe has built us. The field... It is like, as I said, you, if you're not there as a field, you think you're a physical body, but it's the field of it, it's like a ?? wimple on the arm of the Creation. But on the other hand, that wimple is made from the Creation itself. (2:14) We are part of it, but it's part of us, it's the same. It's just because it's fields.

Q: It's like a fractal.

K- I'm not a scientist, these things don't mean anything.

Q: A compressed...

K- No, it's just the field, the way it is, the way we are part of everything and everything is part of us. Without it, we don't exist and without us, we (it) cannot confirm its existence.

Q: Yeah, I understand myself, but I don't know how to explain to people in order to be understood.

K- It's very easy to understand it. Maybe they like you to talk with them, and they say they don't understand, so you talk more to them. But in principle, this is what... the way it is. We are the beginning and we are the end. We come from the Source and we go back to the Source and the Source doesn't exist without us because we are part of it.

Any other question?

Q: ... My question is to do with the sandbox of the 5 Cup staker which we were to use as a training device. It once brought me to a very wonderful experience. I was so overwhelmed with the feeling of love that I had to remove my headphones, leave Rick's classroom and lay down. I was completely filled with love and was laughing at the amazing experience. The glow lasted for hours. It was the most love I've ever experienced in my life. (2:16) I am curious if you can teach us something about how to recreate this experience without the 5 Cup system?"

K- Join 22nd of December session. You will feel it inside. And we know what we are doing with you on 22nd. And if you learn it, you can repeat it for all the time. That's the whole purpose of the session on 22nd. You have to understand if you are a lover, or you like to be loved. And then you can decide in how to enjoy. As you get one it becomes the other one. It's a saturation of... It's like... It's also... It's like acidity and salinity. If you go to maximum salinity, you come acidic. If you go to the lowest, you go back to the same.

Any other question?

Q: ... Are we there yet?

K- We've always been there. It's if you caught up with us yet. That's a different story. We've always been there. (2:18)

Q: ... About understanding how plasma energy decays into electrical energy. Would transmutation be the opposite movement, where the matter in our body is elevated to plasma?

K- The energy always... Energy of Universe converts into energy of matter through frequency. That's where we know the conversion has come. It's like hammering it till you get through it. That's what the frequency is. When you go through that border, if you find out what it is, depends like a hole ?? in mesh. If you find the right energy to fit into that hole, in that hole it gets converted back into matter energy. And always has a frequency. Frequency is a habit of matter existence. And that's all.

Any other question?

Q: ... I have many MaGrav coils, Gans's and Nano materials in my room. Should I remove them before I participate in the session? (2:20) Thank you.

K- Preferably yes. God knows what you have created and how you get connected to. But the thing is, you Knowledge Seekers have so many Gans's everywhere, you're already part of it, you're connected to every bit of it. Coils, MaGravs, and you keep on building it and keeping it.

I have a special jar, one of these 5 liter jars. I have a habit to leave things over the fridge and freezers, Gans's. Because there's always dynamic fields. I enjoy doing it, because if you understand it, you can connect and it comes on and it's got a frequency to it and everything else. And I watched this jar of Gans, ?? I made, God knows, long time ago. And every time I look at it, it keeps on changing its energy. I said, "I wonder how much of this energy is going to the food inside?" And how much of it will affect what's inside? And this is a part of, in a way, I don't need to drink Gans's, because the Gans's are already, energy is going to all the food in the freezer. And it's, the way it is, is, I don't, just because I do, I know the technology, live by it, but like you lot, my environment is saturated with energies in this form or shape. New systems, new tests, (2:22) and new things, and when I walk, it's just like a museum of technology. But all of them, ?? is emitting or receiving energy from it, and they keep on changing color, and I look at them and I say, "Oh!"

But this jar is amazing. It's the, it's something which does not exist in the nature, natural in the body of the man. And I have over years of experience, managed to replicate it. To the scientific world, it's worth trillions. There's, every man will give their life to put their hands on it. But it's there, and I watch it, how it changes, how it interacts, and how it interacts, and the reason it interacts. One day it's blue, one day it's green, one day it becomes gray, one day it's this color, one day it's that color, one day it's got a mist over it. And I watch it.

In the world of medicine, or the world of biology, they call them enzymes. Now I have a knowledge to produce these things which are not natural, it's only created inside the body of the man, through certain chemical reactions or whatever, and they tell you it does not exist. (2:24) It cannot, it's just a process of the body of the man, which produces them, for the need of it. And I produce them very naturally, and I see their energy around me, I feel their energy. And impossible to do a test, which is a natural test.

If you, notice those of you who attend most of the sessions on Fridays every month, my microphone is totally off. Unless I come to talk, whatever, majority of the time. If you look at the microphone where I work with you, it's blank, it doesn't exist. Because if I stay in, I become part of your work, and I affect all of you. And we tested this, directly, where I put headphones, or I come in, in talking, the whole graph changes. Totally. That's why I don't use headphones, I don't interfere with your sessions, I'm just like an observer, knowing, organizing, watching what's happening in the background. Majority of the time, when you look at the sessions, mine is just a camera, or video, red. You don't see a headphone, you don't see. Because if I leave the headphone, even though you can't hear me, but I receive your energies, because I, it's like you hearing me, if I keep my microphone is shut, so I keep out of your, what I call, business. (2:26)

But if I do, it'll interact with you, and then it interacts the graph immediately, we watch it, and we've done it, we know it. We brought the daughter of Mitra once or twice in the sessions, and we saw the mayhem she created. And we took it off. Because it gives so much that all of you get touched beyond. And we observe it.

So we all get touched by the fields around us in different ways. And you will see, you will understand, how much your environment, your Gans's, your Nano coating, everything affects your emotion, your way you are, and the things you do with it. If you want to be pure, move somewhere else, but you're so contaminated everywhere you are in your houses, that it's impossible to be away from something. Even if you bury them 10 meters underground, because you buried them, you touched them, they are connected to you above you.

Any other questions? Shall we answer the last question, and we call it the day.

Q: ... (2:28) What happens to the Souls of the innocent children of human trafficking and pedophilia, organ trafficking and blood trafficking for the industry and adrenochrome? ...

K- Can you explain that?

R: Well, she's asking, what happens to the Souls of the innocent children who get abused through the various systems that are happening on our planet?

Still there Mr. Keshe, we're not hearing you.

K- Yeah, I'm just trying to say something. We've been through this. Children, doesn't matter abuse, or adult abuse, or whatever, it's through the same Soul. I used to, when I was a student in Queen Mary, I used to live in houses. (2:30) I didn't like to live in University accommodation. And I chose to live in a beautiful brand new house, and there were Indian couple, young Indian couple, educated, highly educated guys, lifestyle and everything else. And every night, the guy used to beat the hell out of the girl. It was his national sport to show he's important, or he has the power. And I just told the woman, "Why you take this?" After a few days, I left the house, I couldn't stand it. And the abuse doesn't come for the children, it comes in every shape or form.

The children abuse touches them for life, and changes them for life. And we are not aware of abuses, even though as parents, we try to be the best parent to our child, but they have their own D of thinking about, and to them could be abuse. And they ?? back without us knowing it. But those who go out deliberately abusing children, (2:32) they don't have any place left to, what you call it, these are what we call, the dust in the Universe. Nomads.

And we had enough of them around Keshe Foundation. I'm so glad that all of them went and left. When one person left the Keshe Foundation, all went with it. Or when we kicked one, somebody out of the Keshe Foundation, we saw a depletion of 50, 60, 100 of them, all the pedophile went with. And I couldn't get rid of it till I found out it actually was part of. And always blame myself, I should have been more, more vigilant. Then that's, that's the biggest problem, that is the absolute, the biggest problem. And always elevate the Soul of the children, that's what it is. But abusers will come in different shape or form and size. We had a football coach, one of the top pedophiles in Switzerland, came to be very smart in Keshe Foundation, then we found out. Now the Swiss police went after him, and he escaped to Denmark.

And they came around Keshe Foundation because there were young people coming after new energies and people having young families. And we've seen, we had enough of them around, what you call it, Keshe Foundation. And I always pray, I hope to get rid of these people. I couldn't understand why we have so many pedophiles around Keshe Foundation. (2:34) Till I found out, very recently, past few years, that the head of the, one of the biggest, oldest pedophiles families, was inside the Keshe Foundation, and she was bringing them, all of them in. You don't see a lot of Knowledge Seekers who, past 3, 4 years, have disappeared out of the Foundation, very vocal, they were all pedophiles, men or women. We found out. And it's all gone. And I see myself responsible, I should have been, I should have known. And because they were, they were abused from childhood, they became abusers themselves, and they saw it as their right.

It's just to elevate for their Soul. Just there, and then one day, They'll find the solution. They'll find their own ways, they'll go back on their ways. "Red Circle" was one of the biggest pedophiles, one of the heads. And how he infiltrated so much, and he was brought in by the same people. And they are like, you know, nowadays we call them, the all color rainbow people, gays. There's nothing wrong to be gay, because it's part of their way of their life. But if you notice them, they always bring their own up, all the top singers, whatever, because so many of them, of themselves, they're here, so they support to be, because it's them. It's like the Jewish people. We don't know, you know, the Jews just support them, and put everything else to make somebody famous, because it's a Jew and without you knowing. (2:36) And then you find out, oh God, they're in it, because they support themselves.

They do the same pedophiles, go into establishment and do this. One finds a foot in, the rest get themselves in, and they all operate in a way that you don't see. And they are very, very active in, it took us, we put, Alan Sterling in a way for life in solitary prison. Red Circle, and then the other one we kicked out of the Keshe Foundation three, four years ago. And a bunch of women and others who were part of the same went with it. The Swiss teacher who brought in by the same lady and the rest.

And I always saw myself responsible. How didn't I see? And always pray that ??, we elevate the Soul of the children with the abuse, and hopefully they don't become abusers. And that's all we can do. If you're aware of it, just elevate the Soul of the children who are abused, doesn't matter, sexually, physically, verbally, in any shape or form, that they find the strength in their Soul to exist.

Thank you very much for today. We call it the day and we see what it brings. Don't forget to come in next week with your headphones, (2:38) and we might experience something very, very nice. And don't forget our cuddly toys which they have put up on the, for the Christmas promotion. Thank you very much Rick, and see you next week.

515 KSW Dec 07, 2023

516th Knowledge Seekers Workshop December 14, 2023

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias) (Connect with headphones - 2nd part Silence)

Silence - connect to KF Systems with headphones second half - receive love; Beginning Plasma Communication - Earth - Man - STM become one; Summarize KF teaching 40 years - physical reactors - Lift & Motion; Gans - sustain life; Soul to travel U; STM becomes center of system - carry Soul to Moon; Technology complete; Built system with Soul; Transmute to Moon - become tree - lizard - stone - you decide can change; Start to play with power of Soul; Learn to trust yourself; Don't trust means - deny Soul; Deny Soul controlled by religions - Popes Ayatollahs - hypocrites; Dec 22nd Transfer love to others - get enlightened; Receive unconditionally - become Satellite Souls; More KS get enlightened spark across planet - change; Understand Knowledge - end all religions; Need true teachers - not fake Messengers; 3 Kings of Persia; Nothing in-between Soul & Creator; STM imprisoned by blood flow - 2 guards religions & STP; Work with STP - travel U.

ENGLISH TRANSCRIPTION

(:20)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, we welcome you back to one of the most special sessions of the Keshe Foundation, in trying to bring the first series of connecting thousands of people and millions of people in the future, through the same structure.

As usual, the first part of the teaching section will be as it is. And after the break, we all connect into one common system. The reason is that many people will come in later on, and we allow everybody to be in, who wants to be, and we see what will come out. We don't tell you what to expect, what to be, but we leave it to you, when we start in the second session, how you feel, what you receive, and how your emotion and your thoughts will be. This session will be here for about half an hour to an hour, absolute silence. We control everything in the background, and, as usual, we try to silence those who make noise, and we don't turn you back on, we don't let you to be switched back on (you can't come back in). So, we cut the noise out. Be careful, there is no noise, because once we cut you out, the circle of this process between you and the system finishes. So, be very, very careful in how much noise you make, and the way you make noises, and keep silent for that half an hour, an hour.

People who join usually Friday sessions every month, they know the process. But this time we don't switch on, we just... you just go into attendees and you cannot come back on. And, those who go through the full process, it's your emotion. It's how you feel, and this is how you will receive energies, (:22) from beyond the dimension (D) of physicality (P). It's the first time we are doing this in such a public way.

And next year, this will be extended, as we prepare humanity for the next step. As it goes through, and this cannot be the silent time, it will not be transferred through, what we call, communication line. If you are not in it, you cannot record it and listen to it and say, "Oh, I felt it." Then it doesn't work. You're not connected to the system.

R: Mr. Keshe, what about people in Livestream and YouTube? Are they part of this, or are they not able?

K- Yes, anybody with a headset, anybody with a headset, you are in it. Doesn't matter you're on the YouTube, you're on the Facebook, you're on, what you call, Livestream, you're on Zoom, you're all in it. We tell you, you connect through the headset, it's the information which we send out, the energy we send out, which is instantaneous, it cannot be recorded. This is why I said, in the future, if anybody sells you a unit, It's the Keshe Foundation unit, you know it doesn't work, because it's not connected to us. It's just waste of time.

R: One other quick question, Mr. Keshe. Can people with metal implants attend today and also on the 22nd? ...

K- No problem. It's just, if you don't feel good, just disconnect, take the headphones off. And switch the program off, till we come back, when you can come back on. This is our advice to you, if you, anywhere in a position, if you have a pacemaker or whatever, you don't feel good, immediately take the headphones off, and switch off from the teaching, and join an hour later, when there is no more communication. We learn slowly, slowly, and as I said, this is the beginning of a cycle, that we'll bring into, and what we call, the promised communication, (:24) that the Earth and the man and the Soul of the Man (STM) will become one.

Going back to the teaching, as part of the teaching today, is important for many of us to understand what the process is, as we come into understanding of the connection of the Soul, in the second part and the rest of it. There is a big piece of information which is missing, and it's a good time to fill it in, to bring it in, that you all understand where has been and where we go, and what Keshe Foundation has done.

In a process of the work of the Keshe Foundation over the past 40 years, we started with what we call, the structure of the physical reactors. Long before Knowledge Seekers (KS) came into operation, long before we started the teaching in the process of what we call, Gans's and the rest. What was important at that time for us, was to create a condition, that we could create flight. That we could take the physical body of the man into Space.

In that process, we created what we know now, as the process of the flight system. We created the condition that brought us the whole Totality of knowing and bringing in the process of physical dimension. And how we could change this physical dimension, how we could bring, interact and be part of the whole process. In this process, in this understanding, we try to explain to those who are around us, the scientific world and the rest, (:26) in how we can create conditions that allows man to...

(I'm trying to get to the white board. And the system, the... Oh, it's okay).

What we're trying to do, what we, the Keshe Foundation did originally. ... The original system was what we called, the reactors, the Space reactors. In these Space reactors, we use specific materials, to create lift and motion.

In that process, we came to understand what we need to create distance, what we need to create, in a way, new dimensions of work, that it allows us to make man, traveler of the Space. We've made copy of the Earth, we've made copy of the dimension of Earth, any celestial object, where we created the, what we call, the double core system and the rest. So the system became to be known as what we call, "nuclear power generator lift and motion," or MaGrav system, electrical, electronic, whatever you called it. It became a flight system. This was for to lift, to move, and to go.

Then, in the later years, we brought you to understand the position of the working with the energies which creates life on this planet. (:28) And this was a crucial point where we needed to create a condition that, as a planetary system, in the first cycle, the first with the Iranian nuclear power generated magnetic fields, we created lift and motion, and that was the purpose of the job. That was what was supposed to do, create motion. The cycle of the Gans's and the rest, and the energies, which we brought in, was to create the condition of life. Which, this is what we call, as all of us, our physical dimension.

So, it came to be, what we call, the physical life on this planet. (My pen has gone crazy today). So, we now are in the process of what we call, the physical life. This is the motion and lift. But now we added physical life. For years we worked on this. Now we have developed a system that for the first time in the man's history, creates motion, creates lift and can sustain physical life. Which means like Earth can produce energies we call, food, can produce energies we call, medicine, we can produce systems, can affect our emotion.

So, now the advancement of the new technology, which now propulsion has become obsolete, is that we have a system which has a motion, has a lift, but now supports life, it's become a planetary system. But, what we never understood, and what has been missing, again, has been the matter state of it, (:30) motion of the material, existence production of material, has been a system, that allows the Soul of the Man (STM) to take the center part. So now, we have a system which has a Soul.

This is where the work of the Keshe Foundation, on the scientific side, on what you see as development of the physical systems, has brought the man to be. So, when man, in the coming weeks and months, goes through testing flight system. It'll be a flight system not to just take you from A to B, it gives you, it feeds you in the dimension of physicality, and then, it can feed your Soul, it can carry your Soul. It can be in the dimension that you decide to separate from it, or sit within it.

This technology now is complete. And the new Space System, new systems which are coming into operation, in the coming weeks and in coming months, it'll be the first time ever man will carry his physicality. It'll carry the food for his physicality, and his energy carries food for his Soul. And allows the Soul to be transmuted. You arrive in a spaceship on the Moon, you want to be in the safety of physicality of the man, you stay with these two, but you want to go outside, Like how it is to be, physicality of the man would not stand the field strength, the atmosphere of the Moon, you transmute and you appear as a man of the Moon, (:32) as an entity. Then your Soul decide, this entity moves with the pace of a snail, or moves with the rapid speed of light, and then you have, you are in charge.

This is where the technology, the structure of the Keshe Foundation, brings the Totality of the teaching of past 40 years together. Where, step by step, first of all, we brought you the, what we call, the physical side. Then, we brought you the life side. Now, we add the Soul into it. So, when the man travels from now on into the depth of the Space, into boundaries which has never been before, he has a full option. In a way, it's your right.

In a way, now we understand where we sit, where we are, and why the teaching has been segmented over past years. Oh, Mr. Keshe went from the nuclear material into Gans's and Nano material, now it's gone to the Soul. Now you understand where we are. Now you understand for the first time, every section is there for man. And every part of this has its own spin-off. You use the first one for traveling with a car, going somewhere, shielding and defense, with this one finding ways of medicine, food, energy, and with this one, the freedom of the Universe (U), we call it the STM.

Now, man is ready to travel. Man is ready to educate itself to travel. Now, this is why we added the second section of today. Gradually bring you into a training, gradually becoming for you to trust, "This wasn't a dream I had today, I was in control of it, it's me who goes to dream, nothing to do with anybody else." It's not, "I'm just been going through a training." (:34)

In a way, if you look at it today, you're all like that little boy, who walks into the stadium with a little ball in the hand, knowing what the ball can do, and he can make him the best footballer in the world, or it's just I kick a little bit, just because mom brought me here to test. So, any of you can graduate for your own and nobody else, and nobody can deny you the, what we call, to become the best player in the world. Of playing with your own Soul. And how to establish it. All we've done in past years, we have made this possible. We have made the transition possible, by understanding the work of the fields of the Universe, and not making a new fuel, not making a new stadium, and not making another Beckham, how to bend it.

It's you who have to understand, how where you want to be in this part of the technology. As I said before, we never see the Earth to be tanked, to fuel, we never see rocket propulsion and jet propulsion and wings on the Earth, we never see anyone as a driver of this planet. It has no captain, except his Soul. His balance of his Soul with the rest of the Souls of the other planetary system. And it's created the star of it, and the creation of his Galaxy, together.

In a way, the second part of the teaching of today, it's for you to get behind that car for the first time and lose your fear. And the fear comes when." Did I feel something? (:36) No, it was something else, I just felt a little bit dizzy, .." How come it didn't go dizzy in past 515 tests, 515 teaching? The whole purpose of what you feel, to get confident of who you are. This is part of me which I denied, this is a part of me which I never wanted to know. And many of you will say, "Oh, I didn't feel anything, that was nothing, I just wasted my time." You wasted your life and your generations of the same.

You have to get confidence in how to be in this part, how to be the passenger of your own Soul, the captain of your Soul. Because you tested the Gans's, you know the powers of it, now you have to test your Soul. And that's all purpose of today's second part of the teaching.

Now you understand, we have brought you the knowledge of Creation, from the energy source Book number three, to Book number one. In how you go from manage, to become the Space of yourself, to physicality of the man. In a way, today we brought you a conclusion, or in a way, a summary of the 40 years of work, and 10, 15, 20 years of it, you as Knowledge Seekers, in one way or another, have been around with it.

Now you understand, why you're going through the second part. Why you are going into position of now trusting yourself, not us. You remember when most of you came into the teaching of the MaGrav making, and how many of you made MaGravs, it doesn't work, it works. And some people get 80% reduction, "No, there's something wrong with you." And some of you, "I made so many MaGravs, it doesn't work." You're the same ones which this system will most probably not work for you, (:38) because you have not understood the purpose of the work of the MaGravs. You have not understood, it's magnetic fields that you have, to trust, "Can I connect?"

Some of you in the second session, "Oh, I want to see my mom." And you go and see the mother and says, "Oh, it was wonderful." And some of you sit there, "Nothing happened, why can't I connect?" For those of you who cannot connect, in the following sessions, in the following, next year, we bring you that dimension

that, and then when even you connect, "I felt nothing, I always do this." It's a typical behavior of people who deny their Souls. Denial is the best way to get by. And man has denied his own Soul for millions of, thousands of years.

So, what it comes, what it is, what we have, is the truth about ourselves. You have brought today with you, the "lift and motion," your physicality. You brought the physicality of the man, in the dimension of the food and energy you carry inside you. And today, you're testing the one you denied, your Soul. The energy within you, and the energy you decided to deny. You decided that it doesn't exist, because it befitted the Pope, the Ayatollahs, the Rabbis and the rest, to rob you of your physicality.

When you understand, you see the power of your Soul, you close all those hypocrisies. (:40) That's what I say, that's what part of the teaching to come in the following weeks and months, is when you understand it, you walk away from the mosques and the churches and the rest, and this hippocratic people of the Ayatollahs, and Pope will close shop. And as I always said, "I return the stones of Vatican back to Coliseum." Because, man sees more purpose to enjoy the game, than much to be abused by a game of the others.

In this process, it's your job to understand. It's preparing yourself to accept, preparing yourself to be there, to accept yourself and nobody else. We are not introducing a prophet, we are not introducing a guru, we are not introducing somebody else. All that prophets, all that gurus, is you on your own, and not us. You have to understand the process of Creation. You have to understand how, in the teaching of the Keshe Foundation, step by step, we have added pieces to you. For you to gain trust, for you to know yourself, for you to bring that change for yourself.

Now you understand, with the lift and motion we did with the Iranian government, with the physical dimension we gave you the MaGravs and the Gans's. Today, your Soul is to play. And that's you, and not us. We just create that cycle for you, to gain the trust. It's the way we put a week of producing MaGravs and we taught you everything, and 95% of you never got it, and the other 5% who did, made money out of you by selling the MaGravs which worked, because the ones you made didn't work. (:42) And it'll be the same today.

How do you feel? How do you change? How do you assess your own freedom? Because, when I land on the Moon, and your physicality is in the craft, for 10 years, 20 years, you get fed up. There are others outside, I see through the window, even like a stone moving around, there is a, something like a tree, which is standing there, it was John who was with me, now he's there, because I know the jacket is hanging on the trees outside, it's a Moon tree, which is different than Earth, and there is something like a lizard, which is Suzy, was with me, it's going there, the body changed to a lizard shaped thing, because that can survive the Moon. I wonder, which one would I be when I go out? The lizard, or the tree, or the stone? But I decide, because I know, within me, within the structure power of me, I want to be a lizard for a few days, and the tree the next day. But I carry the red jacket outside, that everybody knows it's me.

We are getting to that process, the process of freedom, the process of understanding. And then, slowly, slowly, this is upon you, not upon us. We are facilitators. We are not the dictators. We are not the conditioner. We give you the facility for you to what I call, sandbag testing. Test your Soul, test your trust, how much you trust it? You went to see grandma, and I don't know, I think, I felt I went to the grandma. I felt tinkling in my head, because my body tells me there is a problem there, but I leave the tinkling, I just felt the tinkling. Why did you feel tinkling, you didn't feel before the session, or after the session is done today?

(:44) So, it means, again, that tinkling is you to confirm, you can move. But this time going to the Moon, you moved where your Soul hurts, the tinkling in the body of the man.

Now you understand, why we brought this teaching on. And then, next week, on the 22nd, for those of you who registered, you join in to learn how to transfer this energy. What we call, the love, the giving. Those of you who join that session, we hope that you will feel in receiving, and you will feel in giving. And that emotion is entirely up to you. Some of you are too greedy, you receive and you hold on to. Some of you too generous, you give so much, that you pull more in, and then most of you will go into a condition which you will understand, brings you so much joy, that is the love of the Creator. Then you understand why the Creator is in love. Because the more he gives, the more he enjoys, and the more he gives, and the same cycle goes on.

But then, in the sessions of next Friday, you can even choose who you want to give it to. That energy, that love you give, brings enlightenment to the one you give, if he's there to receive it. It could be a lover sitting in front of you, holding your hand while you're going through it, but he never receives it, because in a way, he's a partner in the physical side of you, not partner in the Soul of you, because the strength is not there, is not as he needs it. Or he receives enough that does not need. It could be your dog. It could be your child. It could be a stone.

So, in this process, we all understand, (:46) how we will change, how we have to change, how we go through the change, and how this change brings us to the, one step closer to know ourselves, to understand ourselves, to be ourselves, and to be part of ourselves. The, what I call, the session of next Friday. Those of you who registered and be there, will bring a new dimension. In giving, you learn to receive unconditionally. And in that process, if you go through that process and understand what happened, you start becoming what we call the Satellite (Soul). The structure of the Satellite, the structure of being transmuted, just the receiver to give, to the dimension, to divide to. And then go through the process of understanding what we call, enlightenment. And once enough Knowledge Seekers get enlightened, like a spark, will cover the whole humanity.

As I said, you go to China, you go from French speaking, when you receive, when you arrive in China, in the dimension of the Soul, the "Soul of the nation" will teach you the language, will bring you the culture, without even you being there. You'll speak Chinese, you understand everything to the culture. And a joke is a joke, because you understood the essence of the culture of the language and the language. And not just the dictionary translation.

The process in the next few days will bring you massive changes, those of you who understand it. And some of you who'll go through the same process next Friday, you will have a different Christmas. (:48) Because this time you'll truly feel the love of the Creator within. And then it's for you to build up to the next step. It's for you to understand the Totality. It's for you to mature to the truth about your own life, nobody else's.

And, as I said, those who say, 'I didn't feel anything, nothing happens to me, this is just sitting there and I feel no emotion' is exactly where the problem of the man has been. You have switched off the connection with the STM and the Soul of the Physicality (STP), because you have to be in control. You have to feel, "I am in charge", and you're still stuck to the dimension of physicality of the man. This will come very easy for many of you, and some of you will hit the wall. Don't worry, in time to come, we'll get you not to be frightened of the road, that you have sat behind the car and you got a steering in your hand, and others going so fast passing you. You'll gradually learn, gradually start driving, and you become one of those in the coming time and in ?? the Space.

The process of understanding, the whole teaching of past 15 years, brings an end to all religions and all abuses of man, in the name of the Creator. Now you understand, why you do not need a prophet, you just need a teacher to teach you how to get rid of these, what I call, fake Messengers, connectors and the rest of it, with the Creator. Now the only Messenger and the only in between is you and your Soul. (:50) And you decide where you want to be and how shall it be.

You have to understand the process. You have to go back to understand how we have facilitated everything. In the physical dimension, in the energy dimension, and in the Soul, in the dimension of freedom of the man, from dimension of physicality.

Understand, that we have brought in the Totality of the knowledge, is for you to divide it, to break it up, the way you can digest it. It's a very big piece of cake, and you cannot eat it all in one go. Bit at a time, bite at it, enjoy the taste, and go to the next bite. And then understand, one has a taste of love, one had a taste of giving, one had the taste of finding a way to give, and all to be correct. And maybe, maybe by Christmas, you'll truly receive the three gifts of Persia, by Persia. You'll talk good, you'll think good, and you'll act good. Then, you truly understood the three wise men, which is the wisdom of the work of the STM.

Then you truly understood the Truth about Creation, about your life, and how you have to conduct in the Universe, now that you have understood the freedom of your own Soul. And no one can be your Prophet, no one can be anything but a teacher. (:52) And teaching is for the teacher, using the knowledge is for the Knowledge Seeker. And how you seek that knowledge, it brings you to understand, how to use the knowledge you've been given over centuries, thousands of years, and free yourself from shackles of all what limited you, to control you, to bring you pain, sadness, and in so many ways, prisoning the freedom of the prisoner.

As I said many times, the blood circulation of the man brought the imprisonment of the STM. And the religions fed it by the physicality. You had two prison officers controlling you. You now understand you need no religion, because you are the direct connection. You got rid of one prison officer. Now you have to allow the second prison officer, which is much tighter and closer to you, which is the STP of you, to work with you. And then it'll become the key to your freedom.

If you understand this, then you can travel the span of the Universe instantaneously. And you don't need for no one to prophesize what's going to happen, because you do. And what you've been through is your right, and no one can tell you you're wrong.

We're going to go through a break. When we come back, I will explain to you, once more, how to do, what to do. And we go on the silence. Half an hour or an hour of silence, (:54) and any noise we'll switch you off, because you disturb the process of the, what we call, the teaching. Rick, could you please start your usual repetition of the same advertising as past five years or whatever? And when we come back, we all go through the same. And we'll see what the next step will be. Thank you very much.

>> **BREAK** >> 516 KSW December 14, 2023 (1:01).

K- ... Yes, we're trying to change the control, but it cannot be done, because it's on a different dimension. Okay, what we're going to do, what we ask you to do is, is stay absolutely silent. Put your headphones in any shape or form you like. Left to right, or right to left. and phone microphone on the left side, the microphone on the right side, it doesn't matter. Then, just go quiet. We do all the things we want to do in the background. We control everything in the background. And no noise, and as I said, we just put you out one by one. It is good to have 50 people to go through the first, what they call, 'Emotional track of their own Soul', than 90, 290 people just making noise in the background. So, what I would like you to do is, just put your headphones on, and leave the rest to us. We start now, and we start the process, And I hope you enjoy the journey of your life.

(1:04)

K- Rick, can you bring everyone out of the attendees into the panelist, please?

R: Okay. If we can bring them all in at once, I guess we have to do it one at a time. Okay.

K- Carry on, just add them all, ?? one.

<<< The session begins and everyone remains silent. The whole process lasts about an hour and a half. Throughout this period everyone is silent, and we only have one specific instruction from Mr. Keshe during the period of silence. >>>

(2:21)

K- Please from now on keep absolute silence for the next 20 minutes. Absolute silence, no noise please.

(2:37)

Thank you very much for joining us. And we have switched the systems off in the background. We leave it with you to go through the feeling whatever you have. And we'll see you next week. Thank you very much.

(Auto transcription by Elias)

300 online - mass travel Soul; Soul of Creator (STC) manifests as STM; We are from Creator; End of one transmutes to being new - I am beginning & end; Soul suffers endures for STP & P to mature - love; All Creation carries STC; Ray of Creator hidden in egg & sperm - manifest You; Egg/Nano - Sperm/Zn CO2 Gans; Secret of creation of Man; End of religions; Need teachers to understand- not Prophets; 99 Attributes of Creator; Purity & sincerity to understand; Mitra brought Creator to Earth - experience beauty; new Flight Sessions all day; Satellite Souls; Complete work in China; Christmas celebration of Mitra - add 3 days Ethos get 25; Walk away from darkest ignorance to light; Americans set Khomeini destroy nuclear industry; Shah studied N physics; How to use multiple headphones; Leaders sell Soul; CO2 - AA Global Warming - dismantle; Mental work & Souls need fast energy; Limit Soul expansion to brain - get enlightened; Sexual customs create different emotion children; Middle East marriage age 9 - Mohammad's rule - stop growth of Soul; Mature to find Soul Mate - offspring; Scalar waves - MG fields; Faraday Cage.

ENGLISH TRANSCRIPTION

(:18)

K- Yes, thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Space Institute. We welcome you back. And we hope you had a nice, turbulent, exciting week, since the last session. And I hope some of you managed to reach, what I call, emotional conditions that you could not explain, or some of you, as you wrote, you felt things which was not usual, and some of you could manage to repeat what you wanted to do, you've done before.

This is part of the work of the Keshe Foundation from now on. We are preparing you as Knowledge Seekers, and those who become as part of permanent, what I call, ?? fitting, to join, to become part of the, what we call, travelers of the Universe, in different way, in different dimensions. Usually, when you do a test flight and you want to become an astronaut or whatever, you go through trainings in different dimensions (D), in different directions, physicality, psychologically and the rest of it. Fortunately, for traveling with the energy of the Universe (U), there is no psychological test, there is no deep holes, and you can jump in it and do all sorts of physical credibility, if you are credible to use your physical body.

The training for man to become passenger of the Universe, is exactly as it's done, and will be done. And in time to come, it'll be taught the same way. And as we saw, we started the first steps of it, some one and a half years ago. Gradually, last week was 300, all of you together, (:20) that you can see, mass travel is possible.

And then, it was interesting to see how some of you reacted during the process. We kept a full track of exactly how it is, when you, as a lot collectively for a few minutes, took to the skies of the Universe.

And it is interesting how this training will carry on. And how we, what we call, endeavor to train you as a whole, as the Passengers of the Universe, step by step. Some of you will join us again in other sessions, which is a continuous development, expansion, and understanding, till one day you do it, it says, oh, I've done it, but I think it was a mistake. I don't think it really happened to me. But in fact, you have taken that step, and then you can repeat it, and then it carries on.

To this effect, as we said before, we will start introducing from the 2024, new series of, what we call, Passengers of Universe, for you to learn to become, to be able to transmute. Those of you who are interested in transportation, we're still working with the governments and the rest, to bring it, make it possible to be able for you physically to go. Those of you who take the other direction of the energy transportation, called transmutation, you are getting gradually prepared. It was interesting to see how many of you were there testing it, and trying it, and just wanted to be part of it.

The transmutation of the Soul of the Man (STM), is the essence of the creation of the Creator. Maybe for the first time, (:22) I can explain something to you that brings a shock to you and maybe enlightens you. If you listen to the Intro, it said, "I am the beginning, I am the end." It said, that we manifest ourselves from interaction of the fields in one given time, position, and space. But, stand still and think for one second. Does not matter what you do in the dimension of physicality (P), how you look, how criminal you are, how good you are, that's your physical manifestation. Looking at the dimension of the STM. You should have realized by now, that in essence, as you transmute from one position to another, to manifest yourself in the dimension, wouldn't that this transmutation will be the essence of the creation of the Creator, which you call your Soul? Transmuted from Him, and from Him in the interaction of the fields of the Universe, at a given time and position, becomes your Soul and manifests itself as the STM? Is there any difference or is it just limitation of your own understanding that you are the manifestation in dimension of the Soul of the Creator itself?

And if you have not limited your understanding just to be according to your own comprehension of the Totality, (:24) as you now getting ready to transmute from this Soul to another position to manifest yourself in another shape or form, in another position and dimension, hasn't the Soul of the Creator done so with your Soul? Now you understand. I am the beginning and I am the end, because I am on the end when the Soul of the Creator manifests in the Soul of me, and in the transmutation of me, I lead as a part of the Soul of the Creator, to another position to manifest itself in another dimension.

Now you understand. If you were looking for transmutation from this position, this dimension of physicality, to another position, on the end of the physical life of the man, you call death, and now that you learn to transmute at the point of the will, hasn't it created the will to manifest itself in another position, which has become the STM, you. How can you let Him down, in your dimension of physicality? As in essence it's pure, as in essence it's the mature and in Totality, and now he can understand, if He's so beautiful, if He's so just and correct, how much that Soul suffers with the conduct of the physicality of the man, and He sees it's not him.

And then you understand, what the loving is. Even having the power within it, to change the dimension of the man in the physical dimension, and even the Soul of the Physicality (STP) of the man, it endures all the pain and the suffering. For that child of physicality, for that STP of the man to mature. (:26) Then, you understand, there is no end, and there is no beginning, Because, the beginning is the end, and the end is the

beginning. The Soul of the Creator manifests itself as a STM, you. And then, you in interaction of the physicality of it, create the manifestation of your own physical dimension.

In a way, as I explained to the children about the STM and the Creator, it's very much like a big dough. You make a big dough, and you take bits of it, and you shape it, and you put it on the tray, to see what will spring up when its put in the oven. Not all the cakes will look the same, when they put through the same oven. One crinkles to the right, and one burns on the edge, and one gets bigger and one is more fluffy and this is what you are. You are that bits of dough which is taken from the bigger dough and then put in the condition of the what we call, the Earth, the existence, the time, the presence, everything else and you manifest brown, black, blue eyes and the rest. But in essence, you're all from the same dough. In essence, what you are, what you have, what you call your Soul, is the collection of the interaction of the fields of the Creator, from the, what I call, division, interaction and every other condition a field can go. (:28)

Now you understand, you transmute, you're hoping to be able to do, to manifest yourself in New York, or Mars, or another galaxy, where the Soul of the Creator in transmutation has ended up to be the Soul of you. How can you let Him down with your conduct. Then you understand the Ethos of Mitra, which is the Ethos of Creator. Do good, think good and act good, because you are me. And in me there is all the goodness.

Now you understand where we are targeting, where you are going, where you end up being a stone, being a bird, being a fish, another planet, another creature, you still carry the Soul of the Creator in manifestation at the time, space and place. If you understood this, you understand there is no religion. As He manifested within you, and you manifest yourself within the conduct of His behavior. Understanding whatever you do, you say, you think, has to be in line with the line of His Creation, otherwise you haven't understood a single thing about transmutation. You want to transmute your Soul to another dimension to manifest yourself, but you never thought where did this Soul come from that it manifested itself as me. Isn't this a ray from the, what we call, the Soul of the Creator? (:30) And He's been so clever that he's hidden it between egg and sperm that when they come together they create the plasma strength of the field of the Creator.

And now you understand the mystery of the Creation. When the egg and the sperm come together in that dimension of the field strength they create, they create the field, the condition, the what we call, the womb, the condition, the space that creates a field strength of the Creator's Soul that manifests as you, and then, in the interaction with the other fields, makes the physicality of you.

So, when you say that, we create the condition of the egg and sperm to create that fetus, in fact, the egg and sperm are only there to create gravitational (G) magnetic (M) field of the Soul of the Creator, that manifests itself as you. Haven't you done this before yourselves, as a Knowledge Seekers for past decade? The egg is the Nano coat of the Copper (Cu) and the sperm is that zinc plate. And in that position and condition you know does not matter how you distance it, how you change the salinity, how much water you put in it, at the end you end up with CO₂. Different strength, different plasmas and you pile it up, billions of them, replication of the field strength of the CO₂, the Carbon.

Now you understand, you call it Nano coated plate and a zinc plate, Nano coated of the zinc and the zinc, sperm or an egg, or whatever. (:32) You create that condition, magnetic field strength of the Creator, that manifests itself as you. This is the gift of, gift of Mitra. Tonight this is her birthday. And maybe now you understand. How you, as a Soul, have been created as a gift of His love, as a gift of His dimension of existence.

How can you do wrong? How can you let your master down in the conduct and behavior? In a way, now you understand when He says, "I'm the beginning and I'm the end." The egg and the sperm create that "end" for it to manifest itself, and nothing does. The shape of the physicality of the man is the interaction of that field with its environment, with its dimension, with its characteristics. And even man have not understood how he's born. How that Soul in the environment of the dimension of the womb of the mother, is drinking and needs no lung. And once you change its environment, it needs lung to breathe and food to eat.

Then, what is the next womb for the STM? In the dimension of transmutation, at the point of death when it's freed, when it's born into another dimension. Now you understand the secrets of Creation. Now you understand who you are and what you are. (:34) And is there any need for fallacies of Ayatollahs, and the priests, and rabbis, and the rest of the crooked behavior of the man in the dimension of stealing from the Soul of the Creator. Next time, when you go to the mosque, next time when you go to church and to synagogue, stand there and see if you are any lower than the man who created you. And does he need a place of worship, or you worship him within you? Then you understand the end of the religions, as you have to become to mature, that you are the essence of His creation, and the correct conduct of the man, does not need buildings and spaces.

And as I said to the religious leader at Jeddah University, "What does your man do in Space, when he's rotating and evolving and revolving?" Which Mecca does he bend and bang his head against it, on the floor? Except, that he has to come to understand the truth, that within him is the Creator, the Soul of the Creator as the STM.

Then, if you understand this, you understand how you transmute, when you arrive at the point of the destination of the next field strength of your Soul. Be it your wish to be New York, or be it the dimension of the field strength of the Soul at the point of death, that you appear in another Universe, another Unicos, in the center of another seed, and the rest. (:36) Now you understand the gift of the Creation. Now you understand what all these teachings has been about.

Now you understand that in the course of the time, in the next few months and years, we keep on strengthening for you to understand yourself, to understand the power within you, to understand that you do not need no Prophet, and you do not need no Messengers. But in the process of teaching, you need teachers, that they teach you the correct conduct. But, they do not take place of the Creator. They just show you the path. They show you the way that the conduct of the STM has to be. And, they have no rights to any other, but to teach.

You got to understand, in the time, in the position, and the position of the Soul of the Creator within you, you have to be at all time, representing Him. As it said in Koran, there are 99 attributes of the Creator. If you understand it all, you find 100. And 100 is the Creator Himself. When you put all the 99 together, you have found, you have understood, that is the Creator, the God. Whatever name you put on it, the completion. But in so many ways, the 99 are the attributes as understood by the man. When you become the Passenger of Universe, then you find another 99 attributes of Him in the dimension of the creation of the Universe. And then, if one day you mature to understand the Totality of the 99, (:38) maybe you have reached to be as part of the Source, as part of the Creation and the Creator.

Today, we celebrate tonight, the birth of Mitra. The longest night, when the man walks away from the longest darkness in his knowledge. Darkest part of his Soul, that now he enters the dimension of the light. Understanding, an evolution, revolution in his own intelligence, in his own comprehension of his own

creation. Maybe, those of you who join us on celebrating Mitra's birthday tomorrow, you'll find out, in that, a new dimension will be added to your life. That dimension is the dimension of the Creator, the giving, which is the attributes of loving. And in that essence, and in that promotion, in that extension of your Soul, you come to see the first steps towards the transmutation and trust in doing it.

When the Creator emitted the light, the rays, the Cosmic Rays, or whatever you call it, that He ended up as you, He did not decided that, "I'm going to end up on Earth and it will become the shape of you." He trusted in itself, that it'll be good at the end. And in end, you have to trust the same, that where I land, it'll be good, as is the point of the manifestation of the man. (:40)

In so many ways, today's teaching, on the eve of the birth of Mitra, is the point, as I always promised, will bring the change for man. Those of you who join us tomorrow, and you're pure enough to understand the Totality of the Creation, in the womb of the Creator, created dimensions, you will come to understand, you'll feel His love, you'll feel by giving, you'll reach Him, in the dimension of your Soul. In a way, those of you who give with purity, will touch His love, and you'll feel it, if you reach that point of sincerity to understand the Totality.

Destination of the STM is not decided by the man, unless the man still has a mission of the physicality. In so many ways, you say, "I get on this bus and I don't know where I go." But where I go, this bus will come as part of the world I live in and I trust it. And it must be good. And then you find the point, the time and the place, that the Soul has chosen for the man to exist, to survive and to nourish, to create. Many of you, will go through this transmutation, at one point or another, you will see your final point of the next journey. Where you call it the death and the new position of the Soul. And that point, in that point of transmutation, (:42) you'll feel it, this is home. And, with the luck you have, you can change it, that when you actually arrive there at the end, is good to show, to manifest the beauty of the Creator, with all His attributes.

Man has never had that chance, because he never understood the process. Now you understand the process, you have that chance to find a way. Once you see the point of destination, that's where I'm going to be, if it's good enough to create the beauties of the Creator, or I stay in the dimension of physicality, till I elevate my Soul to the dimension of the position, that when I arrive, I show His beauty, I show His love, I show His, what we call, eminence.

Isn't this what Mithra did? When she came to Earth, saw the beauty of this planet, and she was so touched by it, that she wanted to bring the Creator to see in the dimension of physicality of itself. And in one way or another, ended up as creature of this planet. For it to ?? feel it, He had to manifest itself in the dimension of physicality, to see the beauty, to feel the beauty of the physicality, the dimension that Mitra fell in love with.

In so many ways, when we talk, when we understand the essence of the Creation of the manifestation of the Creator, in every position, in every Soul, of every existing thing in the Universe, (:44) now we understand His love and beauty is limitless. His devotion to what He creates does not distinguish between black and white, man, Martian, stone or flower, that every one of them is beautiful, and is in the essence pure. When you walk on a beach and you see many shells. To you, one of these shells is so beautiful and it's so amazing. And the others who passed you and passed there, seen it, they discarded it because they saw no beauty in it. Where the Creator saw the beauty in that shell, and called it the mankind. And nourished it, and nourished it, and fed from His Soul, to bring it to the point of maturity, because for Him, to show the love of Him to Mitra, was more important than anything else.

Now you understand, now you comprehend, that what is the reason of the Creation, and where you come from, and who you are, and you find out, you are not an orphan, you're always been the King, you're always been chosen, you're always been there, in the essence of the Soul of the Creator. It's you who have let yourself down. It's who has put His hand in all the wrong doing, because you never been told. And the only way you could correct yourself was the punishment of physicality, with the abuses of the physicality of the man in the name of religions.

In a way, we all suffer in the body of the man, because we allowed it to be abused by the abusers. (:46) We are, as I said once to a doctor, we all ?? Fibromyalgia. We all have Fibromyalgia by the hand of the priest, the rabbis, and the ayatollahs, and every other ruler in the name of the King and the President and the rest. As we collectively absorb the sins and abuses of us. Now is for man to understand his own limitation, that there is none, except what he puts on himself.

Maybe one day, maybe in Totality, one day, as a collective Soul of the Creator, we become the Creator, and in that dimension, we understand to elevate all the Souls, which are at the strength field of its ?? Soul. Maybe one day, when the egg and the sperm come together, they create only one Soul, that will be Totality of the Soul of the Creator itself, that in its existence, will come to divide and create another Universe, another dimension, and maybe, in so many ways, a new race of Creator.

But man for now, has to understand his, or what we call, truth about himself. You studied the interaction of the egg and the sperm in the womb of the mother. You studied the creation of field strength of the Carbon, that led to creation, interaction with the field of it, that manifests itself as CO2. Now you understand that every egg and sperm coming together, (:48) they create a field strength of the Soul of the Creator, that a rays of it will be embedded in it, and now you understand how you are connected to your Creator.

And if you understood this, you understand the word in the Koran. It says, << Farsi Language >>. Which means, we gave every beauty and the kindness and love of the God into it, and this is the beginning and the end. It's for you to understand, that it come from His kindness and His giving, and man has been blind to it. Today, for the first time, you might understand, for the first time, that the Soul of the Creator, how He has come to be embedded in you, in your Soul. as the egg and the sperm of the field strength, to gather all the field strength of the Creator within it, and nothing else.

You baffled by how genetically you modified a DNA, but you never understood. It does not matter how do you modify. In essence, those eggs and the sperms have created a field strength of the manifestation, transmutation of the Soul of the Creator, and that point and place in the womb of the mother, that He has in His interaction with His environment, has created you.

Now, we have unraveled the most deepest secret of the Creation for man. What you understand from this, is for you to mature your Soul. Otherwise, you still will be blind to the truth of the Creation and the Creator. (:50) It's for you to understand how to conduct, when you go through the process of the transmutation. And it's for you to understand what you want to transmute yourself into, at the point of arrival. Or, you still stay in the interaction of the fields of the environment, another Soul to lead to creation of another dimensions of lives. And then, it's for them how to manifest themselves in the physicality of the time, place and position.

I have unraveled the most secret essence of the Creation today for you. And some of you understood, and some of you it's another voice, and your great-grandchildren one day might understand and elevate

themselves to it. Maybe now you understand why we talk about the Soul. Now you understand the essence of the creation of the Soul. And it's for you to decide.

And this is a gift from us to you on the birthday of Mitra. For you to understand why we celebrated this for thousands of years. And because at that point we understood the knowledge, and nothing else. When the man walked away from the longest, darkest night, to be enlightened and mature to the longest day. And the celebration of Mitra is the celebration of man and his Soul, in essence of understanding the Totality, and not just physical dimension of the light and the rotation of the Earth around the Sun. (:52)

We go for a break and we come back. And I hope you learned your biggest lesson in past 10 years being with us. You understood who you are, where you come from, and what is to be your destination at your ?? will. Rick, take us through a break and we come back.

>> **BREAK** >> 517 KSW December 21, 2023 (:57).

K- There's nothing changed, we just, as usual, a few announcements, which are usual with us. A lot of you join us tomorrow, in the celebration of the birth of Mitra, in a way, to Love. (:58) And Loving is giving, and there's a reason for this, that in trying to learn how to give, you learn how to start the process of transmutation. As you let part of you to become, or be given to another position, that in a way, is the first phase of what we call 'Loving', becoming part of the process of the transmutation of loving to give, that in essence it becomes another seed for another Soul, or adds to another Soul.

This session tomorrow will be amazing for those of you who go through the process and it'll change many of your lives, if you're touched by it. If you don't feel it or don't feel the Totality, then it's maybe time to mature to another level, that one day you'll reach to that point. But it'll change those of you who touch, you will touch the love of the Creator and Mitra. You understand what it means truly to be loved, to be in love and to give from. It's one of the few sessions I'm looking forward to. To see how and what we see, how and how things will take shape, and how we shall see the Totality.

At the same time, to follow with this process, that we start making people to ready as Knowledge Seekers (KS), for the process of transmutation. Keshe Foundation has announced in past day or two, the setting up of the 6th session, 3rd Friday of every month till June, of what we call, 'Whole Day Transmutation Sessions'.

Which means, we start at about 9, 10 o'clock every Friday, 3rd week of the month. (1:00) And it lasts maybe 6 hours, 8 hours, 10 hours, but it'll take a whole day of you. and you learn the process of, the phase of, what we call the loving, and the extension of, to start become the ?? transmitters, and to be able to transmute.

Somewhere around March, April, we bring in the work of the Satellites (Souls), and we train you to be ready to be in that position, in time and place. There are those who joined us with the travelers, they join in, in this part, from beginning of next year. So, whatever we set up in the past, now starts coming in. Once the Soul learn how to transmute, those of you who became Satellite, you become those ?? posts. It's very much, I want to go from here to New York, those who you are Satellites, you make sure through your Soul, you will understand it very clearly, that the Souls travel with the purity of purity. In a way, you become the filter, you become the direction and position of the direction of the Soul.

You will feel this, many of you as Satellites, will find out, you'll come under a lot of freedom of the Soul. You will feel the change in you, and as more and more Souls transmute in the direction of understanding, you become part of that process. Then we'll see, in the time when the Knowledge Seekers start their transmutation in the Universal dimension, the work and the conduct of the Soul of those who became Satellites and Universal Councils will come into operation. We expect this sometimes by the end of the year, as more and more mature. (1:02)

It was very interesting to see that on the last Friday session, how many of you gathered to be there, to do. And some of you wanted to be in, just doesn't matter what it was, just to be part of. So, the process of the transmutation, in essence, training for you to become the Passengers of the Universe, will start in January. We accept very few limited people for this, because you lot tend to make a lot of noise, and make it impossible for us to control. So, if you come in, please try, even tomorrow, to keep your noise down. Try to... that we don't need to switch you off. We had to do this for a lot of people, last week. And it's not nice, because you interrupt. And you... sometimes the noises are so much, that it literally disturb, we see it on our graphs. Everybody has to start from zero, because they have to come back to the dimension of Physicality. And start again.

And sometimes it takes a long time for those of you who shouted at each other, or whatever you do, you leave your microphone, you know it's open, to bring everybody to zero. "Thy shall not steal", you're stealing from the time. From now on, when you join in, please make sure you don't fall asleep, because we get a lot of snorers, and then we see we affect the Soul. There is a reason sometimes, some of you as Knowledge Seekers, you are very quiet. But I switch you off, I mute you, or during the process I open your microphone. Because we are aware of you as a Soul, and what your Soul will add to us. Or it needs elevation, it needs gathering, (1:04) it needs bringing in.

The reason I switch, or we switch those of you who Make noise off, in a way that point you're receiving more, to get back into normality of the condition of the rest as a group. So, everything has, is not disadvantage, but it's advantages on it's own, but sometimes you disturb even on the mute condition. So, please for tomorrow session, for the love of Mitra, in the presence of Mitra, be very quiet.

We will have the presence of the "Soul of the daughter of Mitra" with us tomorrow for sure. You will feel it when she'll touch it. And many of you will mature at that point. And in time I will explain to you the process and the system and the way it does. In a way it's a guiding light for your Soul to be enlightened.

At the same time, we carry on with the expansion 2024, to at least to bring a large number of you Knowledge Seekers, to be able to transmute, to learn the art of flying with the Soul. And sometimes, in the first session, or what we call by somewhere in February - March, we'll try to put you through transmutation, Especially the couple which are there for transmutation to the Moon.

And many of you write to me, "We would like to be one of those who gets transmuted to China." You have to register for it, it's there as part of the World Universal Transmutation. We can not just promote you there. We're still working on these bases and we will carry on with this process. (1:06) On my return to China, we'll try to organize the final phase and the final steps for this process. And in the process of what we call finalizing the completion of the work with China, we see how things will develop and how we will bring all under one cover of One Nation and develop it further.

You got to understand, my job is not to tell you how to do it, I'm not a prophet. I'm a teacher, and my work is when you make a mistake, just to show you how to rub the word you've written wrong, or the letter in the word which is misspelled, for you to understand the correct spelling and the work of your Soul. Therefore, when we put you through these, it's just for you to learn the first alphabet, and then guide you how to do the full words, and then the letters, and then the sentences. It is for you to do that job. Otherwise, we'll, by interfering in how to do it, we become another false manifestation. As teachers, we are there to guide. We are not to set the law to suit, as it suits us, when it suits us. The law for you and us stays the same, as there is no difference in the Soul of the dimension of the teacher, than a Knowledge Seeker. And once you understand this, you gain to understand you're the teacher of your own Soul.

In a way, (1:08) it has to fit you, and you only and no others. And it's for you to understand the Totality. And not to be as part of, just to suit the time and the place. It has to become a way of living, a way of loving, and a way of being there to be loved, to be able to receive, to give love.

We celebrate tonight the birth of Mitra. There is something I have, maybe, to teach you culturally. In the West, we celebrate the birthday. In Iranian culture, where Mitra is celebrated, we celebrate the night before the birthday. That's why it's called ?? Shaviyan, the night of the Yalda, the night of the birth of Mitra. In a way, we celebrate that day, the night when the life will take over the next day.

So, when we celebrate tonight the birth of Mitra, it's fundamentally understanding it's the end of the longest night in the darkness, knowledge of the man. And maybe by tomorrow session, some of you will see the light and be enlightened, and could be the shortest night for you, as you walk away with your Soul, from the darkness of the life of the physicality of the man.

Join us tomorrow, and there's many of you, I've just been told, a number of you, large number of you have registered, for us to celebrate the end of the darkness of the age of the ?? man. And then we'll see where we go. Please make sure we start at 12 o'clock Central European Time, and there is no limit in time. (1:10) You never put a limitation on the time of celebration. Could be one hour, could take you all the way to midnight. It all depends what we see on the STM. And then we leave you, and we leave the lines open, till the last one of you will move out. The session tomorrow will not be closed, unless the time runs out on the Zoom, unless you decide, "It's my time for my enlightenment." Those of you who control the Zoom panel, do not switch the panel off. We wait till the last 5 or 10 people. And if you snore, we switch you off. It means you have already joined the land of the lovers.

If there are any questions, we try to answer, and if as usual, Rick thinks there are some questions left from last week, we try to answer.

R: Okay, thank you Mr. Keshe. You were talking about the longest night of the year, which is true for the Northern Hemisphere, I'd like to tie in with Doug's question here in the Q&A. Because Doug is from "down under," from the Southern Hemisphere.

K- We count on the Northern Hemisphere. We don't count the people from the Southern Hemisphere.

R: This is what, probably why Doug has a question that's rather important to him.

K- Most of us live in the Northern part, we don't have much to do with the Southerners.

R: So what happens in the Southern Hemisphere, which as Doug says, "Today is the longest day for them."
(1:12)

K- This is a mythical dimension. It's not in dimension of reality. The darkness and the long and the shortness is just for the Earth. And there is no such a thing for the, what you call, dimension of life in the Universe. So, it's symbolic, and in so many ways, it's the essence of the light of the Creator. So, it doesn't matter if you're a North Pole, South Pole, you're on Mars or Moon.

R: Right, okay. You still celebrate the coming of light, even though, now, actually the coming of darkness in a way.

K- No, it's in a way...

R: We don't have it, we don't celebrate the coming of darkness, so...

K- No, it's the enlightenment. Because, it's the enlightenment in understanding the essence of the Creation.

I don't know how many Earth years is one year on Saturn, but if you get on the, what you call it, the day of the, what I call, 22nd of December, you most probably spend about 20 minutes .. on Saturn. Because their year is so long, and their days is so long. So we, we don't have, we call it, one rotation cycle, but again, it's what I call, you call it, the light and the dark, we call it, the enlightenment, when you walk away from darkness, ignoring your own existence. (1:14)

I've said this once in one of the teachings, if I remember correctly, in the ?? previous years. It's like a baby born, and suddenly, for the first time, you discover you got a toe, something sticks at the end of something, and you put it in your mouth, but that toe has always been there, from the day you were born. It's the same with enlightenment, you suddenly find out, "Oh! This is there, and I'm aware of it now." What I'm going to do with it in the future, I do not know, but this is called the foot and the toe, they call it, and then one day I might walk on it. And I may become a world champion running with it. And it's that point, when you discover, you get enlightened of the existence of it.

And that's the same with the man. When you get enlightened, you don't get enlightened with everything in one go. You just discover, "Oh, this was stuck to me, I didn't know it's called a toe." And then you discover

the foot. And then, what you do with it in the future, you kick it, you play a football with it, or you kick it and you kill a man with it. One become the most beautiful game and one become the end of a life of a game.

So, this is the enlightenment. Not by the day and night, whatever, but it's symbolic. And it stands for that. And you have to come, you have to understand the essence of the culture, to understand it. To you, it's birth of Mitra. To me, is a lot more, (1:16) because it's part of how I (was) brought up, and maybe one day you understand and you do the same. Tonight we celebrate with a candle, with fruits, with dry fruits, with all what the Creator gave us to survive, and we sit down and grandmas and grandpas tell us stories and it's a wonderful time. And the rest of the world passes by as in the night. But even that we celebrate is for the light of Mitra, the essence of the Creation, and the love of the Creator.

If you... In a few days, you celebrate the birth of Mitra, as the birth of Christ, but in fact is the birth of Mitra. They moved a few days, not to fall on it, that they could have separate things. And if you think of it, is added by three days, three gifts of coming from the Kings of Persia. The birth of Mitra on 22nd, as you call it, the three attributes of the Creation. Do good, act good and live good, which makes it 25. And this is how they managed to make 25, when even Mitra is created, understood the love of the Creator, with the conduct of physicality of the man, which gave birth to the physical dimension of the Christ. Now you even understand, the 25th of December comes.

Maturity of the Christians to the enlightenment of Mitra, with the gifts of his existence. (1:18) There is a lot of work done, negotiations were done by the... Those who wanted to be Christians and those who were Mitraism's priests, that everything had to be the point of reference. But as Christianity took over, the Christians ignored and wrote off the birth of Mitra from the back of the calendar. But that is in essence what you have, the 25th.

Tonight we celebrate the date, birth of Mitra, which is a... we call it, ?? Shabian, the night, the birth of Mitra, the ?? next. And then you have the act good, to think good, and do good, which makes the three attributes that matures the physicality of the man, to the physicality of confirmation of the birth, which became the birth of the Christ.

In fact, Christ was never born on 25th. It's mythical, because it fitted both priests (Mitraism & Christians) to come up with something. And this has been, this has shown the ignorance of many, many of the priests. It is negotiation to what it fits and what it does, and the rulers has done the same.

It's something very interesting for those of you who understand how some of the world leaders are so ignorant to a lot of things, but on the name of the religion, force their way. One day I tell you about Ayatollah Khomeini of Iran and the life of nuclear industry in Iran. And then you understand how he befits this, how ignorant this man was. And on his arrival in Iran, (1:20) he ordered the execution of Iran's first, Atomic Energy, head of Atomic Energy of Iran, and a bunch of the top scientists of Iranian nuclear industry. He said, "We don't need this." Because he was ordered by his bosses from United States, the deal has gone to Germans and the French, destroy them and we'll come back in.

Religions always fitted to the pocket of those who called him to abuse it. Read about the history of Iran nuclear industry. The Shah brought nuclear industry to Iran, as an educated nuclear physicist. Shah, when he ordered to join nuclear industry, he was educated. He was more nuclear physicist than actually Iranian or world physicist. One day, I tell you the story about him. He studied in depth and Eisenhower gave us the gift

of a third world nation to become nuclear, peaceful way, we give you a small nuclear reactor. And Shah said, "Yes."

We became nuclear out of the gift of Eisenhower. And for him to run it, he got educated day and night, for six months, with one of the top Iranian nuclear physicists, when he understood it, he said, "We go nuclear." He actually, like a student, worked at night, to answer, to study, how to answer the teacher the next day, on the subjects of the nuclear. And he accepted Iranian nuclear industry, with well educated Iranian nuclear physicist, and then he accepted it.

And when Ayatollah Khomeini came, Khomeini came to Iran, (1:22) the one of the first orders he gave was to execute the head of Iran Atomic Energy Authorities, and major top scientists of Iran. He said, "We don't need it." Because he was ignorant to the knowledge. Because he wasn't a religious leader. The cloth of the religion was to benefit of the bank accounts and the power.

And it was the same during the Roman's time. Now you understand why I, in a way, I support Iranian nuclear industry. Because the wise people brought it back. They understood it. They were real religious people, understood the power of the nuclear. Supported by the Ayatollah Khomeini of today, and others who actually been executed by ?? them.

So what you believe in religion as day of Christmas is a made up day to confirm the beauty of Mitra as a birthday, and the three attributes of her from the Creator, which is, do good, think good, and act good, which brings to 25. You celebrate the day of Christmas, the completion of physicality. Now, as I said, many of us will come to understand, religion has no place and point, it's us who have to understand the beauty. The concept behind the, what we call, intelligence, or enlightenment.

Any questions? (1:24)

Q: ... First I want to say about last week. After the session I went to donate my plasma, plasma of my blood, and I saw the, I saw my plasma lighter and pure and more, more better than the other weeks I went there, and it's so amazing. Can you explain what's happened?

K- I wasn't there. You are witness to it.

The point is, it's a point, last week's session. We saw some problems, we tried to ratify, at the same time, Rick was going like, God knows, crazy, trying to switch everyone one by one, and some of you won't come on, because you just wanted to be there, but you didn't want to participate, so... It took an hour, more or less, to get you in, but it was good, because we could see how those are in, and who come in, make difference in the, what you call it, in Totality of the expansion of the Souls.

And at one point you all collapsed, literally the system went to zero. (1:26) Somebody made a huge noise and a lot of things, and then we saw the collapse. And everything started back again. And in the same process, we added systems in the background, and we saw how we could, what I call, elevate your Souls. We could see by adding one system, how we suddenly changed all of you. Because, even if one of you stays out of the frame, then the whole system goes to zero. Which means, we had all you traveling together, you had all expansion of the Soul. It's very, very clear, when we work with these things. We don't estimate, we don't guess. We continuously monitor the process, we continuously watch what comes in, and we continuously monitored the expansion of the Soul. And in that process, we have a lot of understanding what's going on to

you lot. And we see some of you collapse, we see, when we add one Soul in, how the last one coming in bring a change. It's very interesting how things change by you lot, not by us. And how you interact with each other.

Some of you, maybe by now, have received your first part of the Communication Bundles. (1:28) The first batch of the first half was this batch last week, before we go on the annual holidays. And we know one or two people have received it. You cannot use those with the teachings of tomorrow. They are not connected, they are no way connected. The one, those of you who have a UBESUS (Universal Body Enhancement Spaceship Units) Head Units, you cannot use it because your Units are locked away.

So, those of you who use the Head Units tomorrow, you need, if you have three Head Units, it'll be fantastic, if you have four, it'll be absolutely beautiful. If you have one, you still will go through. Those of you who have one Head Unit, headphone, just put it on your head, no problem. Those of you who have two headphones, put one in your ear, one on the back of the skull, where the curvature of the, what you call, skull is, and one on the forehead, somewhere a little bit higher on the line with your headphones, and then you go through a totally different transmutation. Those of you who have four sets of headphones, some people do because you work with the Wellness Center, you put one in your ear, one pair, one pair in the center, and one pair on either side of the skull. Which means over your head you have three units and one unit through your ear.

Those of you who have this 4-set facility will go totally through a different experience than those who have (only) one. (1:30) Because our system is set up that way, to support 4-way system. Tomorrow's session is so complicated, but so simple. But it's set up to receive Cosmic Rays, Universal Rays, and through the STM, transfer it into the physical dimension, or what we call, subdivision of Cosmic Rays.

We never tell you what we do, it's a very simple process, and this time, due to accident or by course of the thing happening, we have an operator, who has no knowledge of the system in a way. His job is just to place systems where they should be, and then it's nice to see how we will work through operators. This has happened in the, what we call, Wellness Centers, as new doctors are taking over, they are learning, so there are new operators in the system. For the first time, this week, you, we will go through this process.

And, those of you who come in with the four headphones, you will experience something absolutely amazing. You... the ones who are with the two headphones, you feel the expansion of Soul in different way. Those of you with the, just the, what we call, different sets, you will have the different experience.

You have to have a headphone to be able to be part of the session tomorrow. You can't go on a computer and just listen to it. (1:32) Because, it's to do with the Soul and it's precise positioning. Then, you will feel different, totally, than last week. The experience of tomorrow will be added to, in the 6 months, how for you to, with the flip of a finger, gradually to go into transmutation and come back. And then when it comes to March and that part, when we use the Satellites (Souls), we ask you which part of the world you want to go to, we know where the Satellites are and we bring the Satellites from that point into operation. And it's very complicated, but gradually you understand, you have masks, now you have the STM, dimension. And those of you who've been saying, "I don't... I.. ???" You actually join to be a Satellite, you start going through that process. It doesn't touch your Soul, you're just a position of transfer, as your Soul has agreed, because it was born to be that.

We set up systems for this, when we go through the Satellites, and as I said, as Knowledge Seekers you start really this life, the first cycle, the first steps to become Universal Travelers. And it'll be interesting to see how the rest of you follow and how in the future the rest will be taught.

How you feel, it depends on you and how much you allow to be in charge of through your Soul and not your physicality. And it'll be a wonderful experience. As I said, tomorrow if you join, if you have registered, (1:34) I personally looking for an amazing experience, even I don't join you, I always switch off in the systems totally, but I know what is going to come. We are literally looking forward, when for the first time your Soul comes in touch directly with the Soul of the child of Mitra, and you feel it, then you understand the love of the Mother, the love of the Creation, and it'll change. It'll change many of you tomorrow.

And we'll see how the progress and system will go on. But for the sessions we announced for the next six months, we will control very, very much who and how people would join in, and we might even refuse your place. This is what we call, not by choosing people, it's just that if in the first or second session we see too much problem with your presence, we just ask them not to join in the others. It's not that you're not ready, it's just that we can't ?? take disturbances in operation. And the number of people for the six-month session, for these Fridays, will be very limited. So it will be restricted to numbers and how we do it and the way we do it. And it will be, you feel the first trainings, steps to start transmuting.

We will split you somewhere into two groups and then four groups and we allow you to transmute between each other. How you feel. You choose out of the group, (1:36) I want to go from group A to group B, and see how many of you, you transmute, and the others on the other side. And there we go individuals, how the other person in another group feels your presence, and what you do together, what you bring together in that position. And this needs training, this needs, in a way, knowing where to land. You're just on the air. You want to be in New York and not in Washington. You want to be on this chair, not the other chair.

So the training for real transmutation of the energy starts in 2024. And the last, every month, the third Friday, we'll have these sessions. Till gradually we'll go into the mass numbers, into thousands and hundreds, and then I'm sure it'll become governmental organization, set up control and the rest. But those of you who register, very limited numbers, because we have to have control over everything, for these six-month sessions. And then, this following six months, we'll go to the next step, and they're all into all transmutation and physical manifestation.

Any other question?

Q: ... Can change in a food diet, being helpful in a process of transmutation and finding a new path?

K- No, no way, no. No, it doesn't, it does not. (1:38)

Any other question Rick?

Q: ... I want to share something with all of you and Mr. Keshe. Thank you because for the first time I was able to see everything flying during your workshop Mr. Keshe, three years ago during the pandemic. And you are amazing. Your presence, the fields of your presence made me to transmute and to see with the eyes of my Soul, STM maybe. I see everything outside. But I didn't go in the Universe, only I have seen the church and I see a light and a golden light. And I was thinking maybe it was my Soul and the Soul of Mitra which united together. So it's a good opportunity for all of us today to unify with the Soul of Mother Mitra

and to feel the totality, to become healthy, happy, to have the consciousness of unity of everything on this earth and of all our essence, (1:40) because our Soul is the reflection of Mitra. And now I have a question. What desire we can put all of together tomorrow or even this night in order to manifest the peace on earth taking into account Israeli, Palestinian and Russian, Ukrainian conflicts? And to make a common wish with you, Mr. Keshe, and what we can do together as a group and Keshe Foundation in China in order to get this peace. For this peace we struggle because Mother Mitra is peace, it's pure love.

K- The only way at the moment for human race we see peace is an end to what I call, not an end, but put it this way, amalgamation and dilution of the Soul of the... those who think are privileged and call themselves Jews, with the rest of the Universal Community. Because peace on Earth will not take shape in full, as long as these Bedouins calling themselves Jewish people, find home or peace. The whole thing, backed in the rules and regulations and the power of the Americans, has brought this through the backing of the Jews and the Jewish community. (1:42)

And we will see an end towards when this, this what I call, misguided Souls, see themselves equal to the others. And as they have done so, they make us, the rest of us, accept this unjust condition. And it's not an end to the state of Israel. It is, as I said, we've taken the love of the Creator from this bloodline. And, has been from the time Moses received the messages, and that abuse has come. As I said once in, with the religious leaders, we got cheated, by Moses. He showed to be the Soul, but the STP took over the Soul. And that mixture stays with the dimension of physicality of the same.

Even though I'm half Jewish blood. It's not being a Muslim, it's not being Christian, it's not being whatever. It's just that if you look, this 4.5 million people, killing like flies people, and the rest of the 8 point something billion, cannot even say a thing. We see if you kill one person, if you kill 50 people, you're genocide and the rest of it. We have world leaders in prisons in Den Hague, in prison for killing less than a few handful of people. And we see the killing in thousands, and 8 billions of us stay silent. (1:44)

And this is not just. It's not bringing an end to, it's just diluting it, that it disappears in all of it. And, they see it as a right. Yesterday, no, the day before, I was sitting in an airport. And two of these guys walked in with big curtains on their head, shouting and howling, reading Torah in the lounge. Nobody stopped them and tell them, "Can you shut up?" Everybody looked away, these are Jews, they do what they like. Disturbing hundreds of people. If two Muslims bring their mat and pray, they say, "Look at them." Where does the difference has come?

I was with a person with me, and I said, "I am ashamed I carry this blood in me." Because the abuse has got no limit and is the time to come to an end. You'll find out very soon after the end of the Gaza situation, a lot of things will change for Israel. A lot will change for Israel. Netanyahu will be chased out of everywhere. He's hoping to be there, but he'll be chased out of. He should be submitted to Den Hague. 10,000 children killed, on what basis? Where is the human right? (1:46) Where is the protection of children? How come when it comes to these people, they can do what the heck they like with us? So there is no justice. There is no correct unless it's usually the beginning of an end. They have to uproot themselves. If we do it, we are anti-Zionist and the rest of it. If they do it themselves, they're out of it themselves.

So, we got to understand and we got to be very, very, very careful in how we conduct the situation and how we are. Because, they sit and anybody who wants to get the point of power has to sing their song, otherwise they get nowhere. And this is not situation in Gaza. It is not humanitarian, it's animal-ness. And he has to stop in one way or another, but stopping it doesn't save. This bloodline has come to be in the books of

history, no one to believe in and to live it. And they have to do it by themselves. And they are doing it by themselves to themselves. And the peace will come when this bloodline has gone. (1:48) All the American armed soldiers back in the places where they have invested money. All the wars is where they have invested money. And this has to come to an end. Promoting their Soul is the only way for them to walk away from misconduct of the past.

Any other question?

K- ... I have a note, I'm sorry, just one second. I have a note from Azar, she says, "You misspelled, you said the wrong word." I didn't say the wrong word, exactly, the way, exactly it is. Ayatollah Khomeini of Iran, when he came to Iran, ordered the execution of the head of Iran Atomic, read it in history. And most of the Iranian scientists which were paid by the Iranian government, by the Shah, to go to European countries, and Americans to be educated, came back, they all escaped and some got executed. Because the guy was so ignorant to the power of the technology. He wasn't even, he's illiterate anyway.

In the whole process of the Iranian nuclear industry coming back up, has been primarily, primarily, Rafsanjani who became a president and the inside of Ayatollah Khomeini of Iran. (1:50) Khomeini ordered the execution of nuclear and now Iran is getting prosecuted for becoming nuclear and bomb, or the rest of it. Where, this is not told outside, because it doesn't fit the man who brought to bring the country out of most advanced technologies, to time of Bedouin, where he came from.

And, as one of the most powerful man in past few days, has sent me a message, "Mehran, don't go back to Iran, it's too dangerous for you, because you speak too much truth." And I said, "I've got no fear of going back anywhere, because where we go, we are protected." And this is what it comes, illiterate people.

Some of you, maybe I can add to you, it's part of the history, we learn. Eisenhower wanted nuclear to be equal, that doesn't become like the Second World War, be used and then most of nations will have it. Then we find a peaceful use application of it. Because he wanted to get the fear away from the, what we call, Hiroshima bomb and the rest of it. So he promoted sharing the nuclear industry with other countries who wanted to do. And Shah of Iran took that opportunity and was given a gift, a nuclear, what you call, teaching reactor, now produces most of the isotopes for Iran, to Iran. But we had no one to run it. It was sitting in university in Tehran for years, till one educated nuclear physicist, Iranian, was educated from Switzerland. And then went to Paris to become a nuclear physicist, came back to Iran. He met with the Shah and he explained to Shah, (1:52) "Which way do we go? We go nuclear weapon or energy?" He said, "We do energy, but we keep an eye on the nuclear, if we need we." And when he heard the Israelis are going towards weapon, he said, "We go for weapon." We learn that we don't fall behind, one day Israel attack us. We always have to be ahead of our neighbors. And this is how we became nuclear. And proliferation was, that time, supported by the Germans and the French, and the British, for Iranians to learn about this.

And, I'm one of the cycle of those people. But I was outside the framework of the government, because I went through private education. And this is in the history of Iran. We lost some of the most talented nuclear physicists by execution, or torture, in prisons in the first months of Iranian revolution. Because Khomeini said, "We don't need it." Well, sorry, Khomeini said, "We don't need it." And Khomeini, with the wisdom of ?? Asfanjanni, brought it back, because they now knew they can do something after the Iraq war, that we could not get weapons, and this time we technically advance ourselves.

And this goes with all the world leaders. They're illiterate, bribed to the hilt, and they do what they're said to. Part of the agreement, Khomeini signed in France, was with the delegation of Americans, which are sitting in the village next door, telling him when to go in, was to make sure Iran nuclear industry is paralyzed. And that's what he did, it was part of his agreement with them. The present, or what you call, (1:54) the old Iranian Islamic religion came, what you call it, religious leader, and his entourage, came purely by the support of the Americans. And they want to distance themselves that they are not told they're American. Even the Americans told Khomeini which date to fly into Iran. And then, we see all the rigmas, without the Americans, there would have been no Iranian revolution. And a lot of people don't know the truth. Read about the history of Iran revolution.

And then it's the same with all other world leaders. They come into power by selling their Souls. And you have to understand, he is not Persian blood, he's Indian, from East of India. His father and his ancestors are all Indians. He had no connection to the land, peaceful land of Iran. When you are given the freedom of a palace and you have no connection to it, you rob it, you destroy it, and loot it. So he did.

Any other question?

Q: ... (auto translated from German). At the Knowledge Seekers Workshop, you spoke about the security of sending the Communication Units. Would security be improved if the Units were picked up in person? (1:56)

K- We have nowhere for you to pick it up. We have closed the Exhibition Center and the systems are not allowed to be going anywhere else. This way we have full control.

K- ... There will be another set sent out in the second or third week of the, what you call, January. Another batch will leave sometimes end of January, first week of February. And it'll go through the same process. These Communication Units are never connected to the UBESUS or our section. Once they become complete and you receive, we start teaching you how to use it. How to get benefits from it, how to connect with the others. And they're all kept in secure plasma boxes, that they cannot communicate outside. And it's all controlled by inside their own system. And they're not connected to the system, tomorrow for sure. And it's the same with the UBESUS.

Any other question?

Q: ... Thank you very much for this beautiful gift of teaching. That was really special. And as far as we know, which is not that much, about Iran history, recent history. (1:58) I know that Khomeini, when they were bombing Iraq and there were collateral side killings and destructions. He said, "You stop it. I don't want collateral destruction and people killed. And you go and make the bombs, which are what you call it, surgical, means like at the point, that they went and made the arms like that. And also I thought, I think Khomeini also said that we don't like the mass destruction bombs. That's against the way of this religion of us. And now when I see after years, the Iranians are very welcomed in Iraq. They really respect the Iranians. Where they go, they don't need visas to go, I think. So, how the Iraqis respect Iranians, because maybe during the war, they didn't do atrocities towards them?

K- There is no respect in Iraq, in respect to the Iranians. They put the rulers and they made the decision. We have to understand this very clear. The present part of it is the sect, which the section they control, they are mainly Shias, and they have a problem with the Sunni side. And this not needing a visa, because they control

the president. Iran dictates who the president of Iraq will be, and the most of the cabinet. (2:00) And this is part of the structure which the British set up. The whole financial structure of the oil industry of Iraq is in the hand of the British at the moment. They get fraction of the export, and nobody knows how much British export. And that part, and the political side, is mainly dictated, and the Iranians dictate majority of the ruling in the ??, or what you call, through gun policy, more than anything else, supporting changes in regime in Iraq.

Q: And, as far as the conflict, you said that we should raise the Soul of the people who do wars and put the bombs, so that the level goes up and they start to create peace. Is it something like that?

K- That's the only way, that's the only way.

Something very, something very interesting has happened with us around Keshe Foundation. One of the Knowledge Seekers who has been with us, has proclaimed to one of the government that the Keshe Foundation is recruiting spies, training spies. And Mr. Keshe is a spy. And has managed to convince part of the National Security to this. And we heard in past few days, that this office of National Security has reported in National Office that Mr. Keshe is a spy for Americans. This is one of our own Knowledge Seekers. (2:02) And we are very open about it, because they are listening.

And the interesting thing is, if we spy for our own technology, that it means they have not even understood. If you are teaching Knowledge Seekers, to be aware, to understand technology and the knowledge, we cannot be a spy. And this is one of the top Knowledge Seekers. Getting into problem, finding out that, was reporting to government, from inside, has convinced National Security Officers that Mr. Keshe is working for Americans and he's a spy. And he's recruiting. And I will release the name very soon. We have to sort out the... we clean up the mess in the background and then we'll let you know.

And, this is the way, I said, "There are two ways to do it." Cleaning a mess in the background for me, is elevating the Soul. Otherwise, I can do a lot of damage. And I sit, and I watch, and I said, "There is a reason for it." The ones around me, they said, "You have to react this way." I said, "No, we react the new way, we elevate the Soul." And we protect the others from it. And, the new way is to elevate the Soul, that they walk away.

And in a way, the reaction from the government leaders to this, has been that, if he's spying and it's good for our nation, let him spy. (2:04) That's to the officer who reported the spy. But, if he's not for good for us, it will stop. And I said, that's fantastic the way it is. And, because in communication with the leaders of the nation, they saw the clarity, they see the clarity of the work. They're elevated to what it can bring. And this Knowledge Seeker, thinking very clever, by doing this, I get rid of Mr. Keshe and then I rule. But, the governing bodies will look after that part, the way they do.

It's happening to us on today, this is in the past few days. So, it's not going out and battering, it's just elevating the Soul. Knowledge Seekers who are involved in this in the background, they know what I'm talking about. We don't go shout and howl. We just elevate. And the elevation came long before this comes in, because the leaders of the nation have said to the guy, who is he spying for? Who is he recruiting for? If it's for us, he's teaching our people, then it's to the benefit of the nation. And this is how it should be. The enlightenment, the knowledge, understanding of the knowledge should bring that position. (2:06) And that's all we can do.

It's the same, I always tell about Netanyahu, I ?? hope he gets enlightened. But you have to understand the psychological path behind even Netanyahu. He's doing all these anti-Palestinians and everything else, go through the life history of him. It's because of his father, his father was kicked out of Israel when he was a young boy. Netanyahu ?? went to America, because he wanted to get the rid of the Palestinian, the far right, ?? leave. And he brought his sons up this way, the three sons. He's just doing to please the father, follow his father's doing. He has no brain of himself. And he worked that way to get to this position. And he used every opportunity in his life to be in this position. He's a criminal by essence of his life, Netanyahu. Go back and read about his history. His father was kicked out of Israel for a far right, what he's doing now. And he came back to Israel. He managed in time of small gaps to make himself the, what we call, the ambassador of the Israel in United States, in United Nations. And he looked for opportunities to come back in and made himself out of death of his brother, to find notoriety, not himself. So, he needs elevation. We understand the process, why he is where he is. (2:08) He's trying to satisfy the wishes of his father, to be a far right, and kill as many Palestinians as he can. But, the time will change. Read about his life, the guy is brainless and clueless.

Q: And what happens to the Soul of these babies who are killed, and go finish their life?

K- The same process, the same, there is no difference, the same process.

Q: Do they get higher, to a better place?

K- No, it's not martyrdom, it's not martyrdom, it's a natural process of separation of the Soul from physicality. But those Souls are aware of, the mother who lost a child, the father who lost a child, it's all connected. It doesn't go unpunished, but not the human way.

Some of you which go through that transmutation of the Soul, test yourself, during the phases of the work, where you know physically you've done wrong. Doesn't matter what. That, that wrongdoing of you, touched someone, the wrong way. You did it deliberately or accidentally. And go and see the structure of your Soul at that time. And understand what was taken from it. And go back during this transmutation to the ones you think you helped, maybe even they're damaged by your help, but you think you helped, you gave them elevation, and see where your Soul stands. And then you'll understand it, this is part of the light, the enlightenment that you will learn. (2:10)

Those of you who go through the six months of the transmutation cycle, you'll come out in a different dimension of life. Totally different dimension. Because that's what it's supposed to be. You get access to your own knowledge, to your own essence of creation. And that's why we want very few people in these sessions.

Q: It takes a lot of love and understanding from your side, to only see that from this side of elevation.

K- It comes from all of us. The love of a teacher has to be responded back by the love of the Knowledge ?? Seeker. And this is how the cycle is, this is how we understand, this is how we educate. Is no use when you put $1 + 1$ and then student writes me and bash him on the head, "This is 2." He's put his finger together and say, "One minute you say, this is 1 and 1." How many do you see? For him to understand.

Q: This is truly a revolution in Soul dimension.

K- We'll see. We start up real process of teaching << audio cutting >> Knowledge Seeking << audio cutting >> ?? is different .. (2:12) Just one second, please.

K- Sorry, I had to reach over for security reasons.

Any other question?

Q: ... I registered on December 13th and signed up for the Soul of the Lover session. Is there any more information about the Zoom channel? Are German language skills sufficient? Thanks.

K- Can you repeat please?

R: He's looking, he's signed up for the "Soul of the Lover" program and is there any more information about the Zoom channel that he should know about... He's apparently German, so... I know that we have a translation usually.

K- All the invitation is going out by tonight. Or already has gone out for those who are coming in. And there is a German translator, I think there is a Portuguese. (2:14) The Italians, there is a number of them, and we have told Stefania about it, she's going to be there. I think Mario as usual is there, if Mario is not there, we'll bring another person in, but he should be there. We try to accommodate everyone. There's a Iranian section, if there are Iranians, we are monitoring it today. That maybe we ask Merhnaz to translate, we give her the opportunity to translate in the background tomorrow. Because last time she was typing the translation in the last Thursday session. Azar used to do this, but she's not there or they translate afterwards. And so, we try to accommodate everyone as we go bigger in this process. And we will see how the things will take shape.

The problem is, there are other people who will do the translation. But it has to be set up with you, Rick, in the background. But in sessions, because you allow the translators to translate, or in sessions we allow the, what you call it... I think what we got to do, Rick, with these sessions, instead of translating one by one, we have to bring the structure as you use in Zoom channels, in the Livestream, that they do the translation in the background. That we don't get this interruption of translators in the sessions. We're looking at that to complete it, maybe by this session tomorrow or next week. Or next time.

R: So, for people to work outside of the Zoom format, you mean?

K- Yeah, that they can... Like the way now you have, (2:16) what you call, Rafael and others are doing. We don't have other translators we need, we have to bring in to do the translation, for the sessions in the monthly sessions. Because at the moment is a... it disturbs a lot, they have to translate language by language. We have to go like the way it's done in the Thursday teaching. Simultaneous translation, that things don't get disturbed so much. The interpreters are inside. We'll see, we're learning. But the most important thing is, once we go into translation on Thursdays, they go, once the translation is done, they go back into the mainstream because they connect to the main line. They don't go to the translator's line. This is one of the problems we had. Interpreters go in, give them information and come out, and people stay with the main line. That's why we have a problem on the other side. Anyway, we learn.

Any other question?

Q: ... Hi Mr. Keshe, I feel some energy in the background. It wasn't there two or three hundred meetings ago. (2:18) Can you explain please, is there any connected device to the meetings? My feelings are like when, when I go around rotating Gans's and I feel them in my head, it's like CO2, Zinc Oxide and Copper Oxide Gans's.

K- No, no, no, no. In the teachings we don't use anything like this. In the Thursday teaching. In the sessions we have systems in the background we use. We add a lot of other things in the background and the, what you call, Sessions are totally... Teaching sessions, Thursdays, except last Thursday, is usually as a normal as it is, we don't connect you in. You've got to learn, when we connect, there are two numbers, usually appear, 004 and 005. When you see those two numbers as participants or attendees, is where we literally play game in the background. And even when they are switched off, there are other things happening, because we switch it off, that you cannot talk to, you cannot send, what we call, fields to us, we block it, on the physical dimension. So we load up your Souls. << audio cut >>.

And you are like a hungry mongers, you just take everything from us, we see them as ?/ mothers, ?? eating time, it's started.

When we open your microphones, it's a simple structure, if you understand. It's like you eat and eat, keep energy, till you have enough energy when you go into play, you don't, you're not hungry. And when you go, ?? you use your energy. (2:20) The way we monitor, you've seen, we open your microphones, is when we take the surplus from you into the system. When we shut your microphones in sessions, is when you are receiving from us, and you are, you are literally loading up any shortages, anything you might want to take. We might give it to you, but you are still hungry, "But I don't want to eat this food." That's how it works.

So, sometime be, what we call, you see all the microphones are off, but Unit 4 and 5 and couple of other Units are open. This is the time we are opening some systems in the background, we are changing things in the background, and as you are, microphone is off, you are loading up, you are receiving from us what you need. We can't force you, you just take what your Soul ?? needs. And then, you see us, for example, switching the microphones, but the numbers 004 and 5, but your microphones are all open. Which means, we are not giving anything to you, we're just taking it.

There is a system, we know exactly how we are doing it, and we, we monitor in the background, what we do, what we change, what system we use, what systems we add, for a specific purpose for us to learn, and then in the future we use that knowledge.

So, if you feel energy is from the Soul of the people present, because you're all connected at the same time now, and you're connected through the Zoom system, not through our system. We are like you, we're just connected, we don't load anything up. (2:22) But it is good to see, or to hear, that you feel more energy, so Knowledge Seekers are becoming more and more, what you call, in the tune with us. I see ?? Mr. Ekhbar tells us that they're translating in Russians. We have to check to see how many Russians are in the teaching, or if you want to join as a translator to the Russians.

Any other question?

Q: ... Good morning, what about the appearance of the one they call, the Son of Man appearing in the tabernacle, in view of what you have explained today?

K- Where did it start? Who started it? And what do you call the Son of Man? This word, the Son of Man, or Son of Man, is used a lot in Hidden Words, by Bahá'u'lláh. And, there is nothing hidden anymore. In a way, the Son of Man, depends what you call the Man, the Creator. And his son, which is the man. (2:24) And, it's different ways of putting, what you call, literature, to make it holy.

Any other question?

Q: ... Are all Universes located inside the firmament? And if so, will all transportation of the Soul also be inside the firmament?

K- Translate please Rick.

R: Yeah, I don't understand. I think he, he or she means the ... located inside the firmament, I thought was usually referring to the Earth, so... But I'm not sure, maybe ... there's another definition of firmament. I thought you might know Mr. Keshe.

K- Next.

Q: ... We have birds knocking on my windows around the house. Any suggestions how to stop this?

K- Maybe you have too many Gans's in the house. We had this. We had this in China. I used to carry a lot of Gans's in the house, (2:26) when we were in South China Sea area. And when we looked in the other houses around us, there were hardly any birds, but all the birds were in the garden. We used to get a lot of birds coming in. And it brings that position. We had this in the Mongolia. When we did the harvest time there, every day we had a complaint, I've said that before, from the farmers, from the people who are running the tests, that they never seen so many birds landing and eating. They never seen so many birds, and they're eating from the harvest. And they were eating from the harvest when was the Keshe Foundation section. And at the end we ended up the double and three times the harvest. And I said, "Can you imagine how much was eaten by the birds that we had so much complaint?" It must have been five or six times more.

The structure of the fields with Gans's brings in comfort of the Soul, which is Zinc based. And then you connect it with the Carbon. And if one of the spectrum of the fields matches to the bird's emotion, you attract its lover, isn't it? Run a test, I've done this, sometime it brings interesting results, sometime you don't see anything, because maybe it's in the wrong place, or wrong way. Put a, what you call it, a dish of water with Gans's on one side of the garden, and put different mixture of Gans's in different pots in it, and see which one gets drunk off more of from.

You'll find the one which has a Copper in it, (2:28) don't give them Gans's, the water of the Gans, attracts the sick birds. The one which has more Zinc in it attracts those who are, you know, when they jump a lot, what I call, hyperactive ones. And those who are normal, they drink from the normal water. And just observe it. It's very interesting. The bird which limps or has a bit of physical problem, somehow ends up on the Copper side. And then you see the same bird jumps on the Zinc side. Then try to trace with the amino acid and without amino acid and see what a big difference it makes. You see insects going around and all sorts. You find more insects in one pocket in the morning than the other one. It's observation and then you learn a lot from it.

And yes it does, we done tests with the house which has been a lot of disturbances in, and with a specific Gans's which you lot don't use, you don't even, you haven't got to that level yet. We change the household into a peaceful, loving people. Because... But you see, the Gans's in the boxes change. Color changes, size and amount changes.

Any other question? (2:30)

Q: ... What technological solution would the Keshe Foundation have to alleviate the temperature, which has increased a lot, putting many people at risk of death? If there is a technology to cool the environment, could you teach us about it?

K- The only solution you have, you have to understand the science. Not just because. The only solution, at the moment, available for us, which at the moment is under consideration in very different ways, is reduction or conversion of the CO₂ to its Gans. Because the Carbon, there's a lot of things we don't, we don't understand, a lot of things we understand. The whole process has to be understood.

<< Mr. Keshe tries to open the white board. >> (2:32)

K- ... We have in the atmospheric condition, at the moment, what we call, the CO₂. And this CO₂ has a characteristic of two things, (2:34) which one is the Carbon, (if I can take it out and redo it). What is the characteristics of the Carbon and what is the characteristics of the, what we call, Oxygen. But this CO₂ has in its structure connection with the amino acid (AA) which is created in the atmosphere. If the CO₂ attaches itself to the AA, then we have a new condition which means creation of the what we call, the Carbon we have the creation of the Carbon as a CO₂, and attachment of the amino acid, which this itself creates a new dimension energy which attaches to other elements, which are floating as energy pack in anything else you have in the atmosphere. (2:36) So, our amino acid combination with, which is the energy level, with the CO, Zn or any other atmospheric material, gets glued to CO₂. And this gluing creates the poisoning of the atmosphere.

Now that we have developed the technology to extract this Carbon out, this structure falls apart. So, in the position of what we call, the Carbon extraction, in your CO₂ boxes, which you attract this, and then in interaction with the Oxygen energy, because now it's a magnetic field box, allows this structure to dismantle. And by dismantling this, the air pollution changes.

But now, you have the Carbon, the Zinc and the Phosphor, whatever is in the atmosphere, to land on Earth as a matter state. Then you have the amino acid itself to create a new condition. What we see through test is that this amino acid lands as on its own on the body, or on the surface of the seed, man, and the rest of it. (2:38)

So, the solution to clean up the atmosphere of pollution, is to extract the sea from the CO₂ which is added. This will change the climate change too, because this thing creates, absorbs fields from the Sun and adds to the heating elements. It's not the CO₂, which is global warming, because scientists have not understood, as I usually say, this process. And we connect the increase of the Carbon Oxide (CO) to production of the Oxygen, which is not the... it's the wrong way of explaining it, but you understand how now. Because CO₂ has always been in, and this CO₂, when you absorb the Carbon, in your CO₂ box, releases this Oxygen in atmosphere.

And they say, the cycle of life started when the CO₂ started. This is, this salt water and the Carbon and the Zinc, we call it, the oceans. This is the job they did. And, most of our teaching in physics, is the wrong way around, because we never understood energy aspects, production of the energy aspects of the Carbon, as a Carbon Oxide, attachment of the amino acid to it, because of the two line of connection. And then the, what you call, what we call, the present pollution.

And most of this amino acid cycle, with connection with these matters, is what, when we teach you about absorption of energy by the STM. (2:40) Because, this amino acid attaches itself to the skin, you say, "Oh, I have a fatty skin." This is, this darling, coming on you, is not coming from inside your body. This is a wrong understanding of it. You have, then you see the same on the leaves of the trees, the fattiness, the oil. It's the same as us, but we don't understand this, our body. And then, the attachment which comes with the Phosphor, the Zinc, and the rest of the energy, gets absorbed in the body of the man, which feeds it as a feeding of the STM. That's 80% how it's absorbed by the body. This knowledge has not been understood. And this is where you have the problem.

But in the cities, when we set up the CO₂ structure absorption, which we actually absorb Carbon, we produce the Carbon level, Oxygen gets involved in the water. The CO₂ section, Oxygen part of it, becomes added and adds to the water. Some of you, I've said this many times, if you look at your CO₂ box, if you know we really produce Carbon Oxide in your tank, in your containers, you should see the level of the water rising. This is where it happens, this is how it comes in, this process.

This is carried on the same way, throughout the time. But, we never understood this. Now we understand, so we can change the, what we call, the process. We can change, we, with the CO₂ absorption, we can bring the changes. (2:42) And, once we absorb these CO₂'s in the "CO₂ Centers," the Carbon from the CO₂, you'll find out that, because this amino acid attachment is disappeared, then the pollution disappears too. That's all it is. We separate the connection of the amino acid as energy to the floating CO₂, which comes from the exhaust of the cars, which that will allow the other materials to become as "energy packs," as food. So, with absorbing Carbon from the atmosphere, we stop these materials and the pollution to disappear too.

It's not just absorption of the CO₂ in the atmosphere, it's understanding the process. And this is what I've been trying to explain to, what you call, scientists, very recently. That we understand the process. But, if we carry on with the trend of .. absorbing as much Carbon, because now we can use the CO₂ as a, what we call, as a Gans for the energy, then national governments will run into problems, because this cycle, this amino acid cycle, is very important in life of the man.

Part of the process of, we see a lot of people increasing in size or get fat, is this link, which is not understood. The increase in Carbon Oxide, increase in the amino acid attachment, (2:44) to the Carbon Oxide, we live in an environment, attaches to us, delivers more protein to the body than actually we need. We just need to create the emotional connection to it, without eating we just get fat. And this is part of the knowledge. What's understood, then you understand the rest of it.

Controlling the CO₂ extraction of the Carbon with the CO₂ box. This will clean the environment of the buildings and cities very easily. But it has to be controlled that does not become the reversal. The more CO₂ we produce, the more oil we produce. Because, in this process, it gets attachment for the amino acid, which leads with the salt of the sea to physical amino acids. Then, lands to the bottom of the sea, through the waves and everything else, and then by saturation, lands to the bottom of the sea and becomes what we call, oil.

Any other question?

Q: ... (2:46) Mr. Keshe, thank you for the teachings that are so connected to our lives. A question to understand more about the processes that came after some (plasma) events. I always liked chocolate, but I didn't eat it much for health reasons and everything else we learned. But after some events this changed and I started eating more spontaneously when there is a desire. What is the limit between addiction and the satisfaction of existence.

R: Mr. Keshe you don't have the microphone right now.

K- I said, .. "Ask the Creator."

But you have to realize something very crucial in the teaching. Sometimes, when you receive energy as a Soul, you create a new dimension of energy inside the brain, to absorb that energy, that comprehension from the Soul. And that needs energy. And that energy has to come as a matching amount in the physical dimension, that the rest can be supplied by the environment.

There is a lot of scientific papers, (2:48) if you look for them, that a face worker, a miner which sits in front of the face of a coal mine and hammers chisels to get coal out, in 8 hours, uses less energy than a scientist sitting in the lab, working as a scientist. The energy needed by the brain is much more than the physical dimension. That's why many scientists are so "slim like a stick." Because, the energy is subconsciously uses all physical dimension of the body of the man. It's like you're doing a marathon.

So, when you receive energy from the Soul to elevate the STP to another, what we call, whatever, you're trying to achieve, the brain of the man needs energy to substitute for that transmutation, transformation, that transition of energy fields and knowledge. To you is nothing, you haven't changed. But subconsciously, you receive a lot of other things. So the brain is working. And when the brain works, usually looks for a fast, rapid energies. Eating a food takes time to digest. This is why you see a lot of people with a scientific mind. They, they sit in front of you, they finish a one liter of Coca-Cola bottle with all that sugar in one go. And they do it every day. Because that feeds, fast food to what we call, to the brain for operation. (2:50)

Go to universities and go to the, what you call, dining rooms, and watch how many fat scientists you see, how many slim scientists you see, how many medium sized scientists you see. Usually, scientists with, unless it's inherited, are very slim. The ones who work in industry and science University, you'll see them chubby. They have more fat than the rest. It's very nice to observe it, it's not 100% common, but it's very, very common, you go to University. I spent some time in the Universities, when they always invite you for lunch, and I watched this, I said, "This must be a scientist." "This guy is doing a bit of commercial work, and you see the guy, really think he's got nothing to do with the science, he's just sitting there, as whatever."

So, it's the energy level you need, and how you feed it, how fast you can feed it, it can keep on operating. And this is why you go for chocolate, it's CH bond, and the Hydrogen is needed, or sugar is needed, which is again Carbon, Hydrogen, fast delivery of energy. A lot of people with psychological problems go for this. A lot of, what you call, people, "beautiful people," they are heavy drinkers of things like Coca-Cola. As they have to eat for 4 Souls or 2 Souls. And one physicality, they are really burning it.

Any other question? (2:52)

Q: ... Good morning Mr. Keshe. When I was in Linz, you put me in the middle of the flight room, while my friends were one in each of the Units. I watched as you were very intrigued by watching the fields. You asked me briefly, "Did you see that?" and I did not. Perhaps, I did not know how to look, or perhaps where. Is this something we can all do? Or is it a particular amino acid condition within the body, which allows for the observation?

K- We all have the capability of. Nothing is exclusive, it's just that we have to find how it's done. How it can be done. And the process. And we are all. As I said many times, "The color red to me is not the same color red to you." I call it red because it's nearest to what you see as a red. It depends on the Soul, when it comes to bigger dimensions.

Any other question? (2:54)

Q: ... If one looks into candle light daily for a few minutes, turns around one's own axis, does breathing, uses the inner eye and intentions as gating tools, would one have a chance to achieve enlightenment that way too?

K- Repeat please.

R: If you were to look into candle light daily for a few minutes, turn around one's own axis, do breathing, use inner eye and intentions as gating tools, gating, for a gate, I guess. Would one have a chance to achieve enlightenment that way?

K- The breathing, as we explained scientifically, how it affects your operation of your Soul. It's to do with the amount of energy which is available, becomes available to the blood, or the way you extract it, to reduce it, to weaken it, or you pressurize it to expand it. And we understand the knowledge, the scientific way around it.

But while breathing, you... depends how you breathe, the way you breathe, we explained this many times. You can dictate the expansion of the Soul. And then, how far can you expand it, and what does it bring in? In the future, I will... (2:56) as part of the teaching will come up in next months, how you don't need necessarily to expand your Soul beyond your physical boundary. You can expand your Soul to the limitation of the fields of the operation of the brain, inside the brain. And interact between the Soul and the STP at that level. This is where you match the pain in the Soul and the pain in physicality, in the dimension of emotion. It's a sphere, expands and contracts.

If you expand it beyond, you create an envelope, you go through transmutation. But, if you expand it to the certain position, which the Soul goes, before it goes beyond the boundary of the physical body, interacts with the energies within the brain, you create and you feel something, and you feel it inside, and then it creates the emotion of the Soul and emotion of the physicality, STP the same, and it touches you. This is mostly the time when man changes a point in the life, they call it a "turning point."

You change the habit of loving, you fall in love, you change your diets, you change your understanding of something. It's when the Soul actually, fields of the Soul, actually interact, expand, but they don't go beyond. It just still interact with a given position, field strength of ... The science tells you, this is where the knowledge is. You suddenly touch that field and you can speak all languages, or certain languages. (2:58) And, without ever being there.

It's recently in the papers, I don't know if it's been confirmed or not. A young boy, two years old, out of nowhere started speaking Chinese. Never been to China, never been in contact with any Chinese. And it's not something occasionally, it happens quite a lot. This is where the Soul touches the information, and if the information balances, it becomes that point, that knowledge.

You don't need to expand your Soul all the time, to go beyond the physical boundary to transmute you need it. But when you do it inside, it brings enlightenment in. And then what knowledge, what field you develop, absorbs, connects to that knowledge, that point in Space. This we'll teach later on, because then, you have to understand the emotion of the Soul. How it feels to be in a given position, and transmutation. When you feel it's right, but you're still transmuting. It becomes, maybe you call it the third eye, but becomes a knowledge of the presence of time and the place, awareness. Because you connect the energy of the Soul, to the energy of the STP, on the spots in the physical dimension of the life of the man. And then you ?? feel it. (3:00)

This has a lot of application and implication, even in the ordinary life of creation of man, and behavior of man. And how we expand, and how we have different behaviors, in the Northern Hemisphere, or in African cultures, and other cultures. I studied this for... I had to study... I observed it, and it became a study for me to understand it. As I used to travel a lot to Africa, and then in Northern Hemisphere.

Even the way we interact sexually with each other, brings different emotion and line of loving and caring, even for our offspring's. The "missionary position," because the two heads always are in touch, the Soul expansion is next or close to each other, creates a different kind of fetus. The girl creates a different kind of emotion, than the Africans that they never interact face to face, through the culture. It creates a different kind of children, different kind of emotion. Where, what we call, the missionary position, it's like the way I explained to you, with my children, I put their head against my head and I connect with them. We, you create a different information, expansion of the Soul. And, we are more connected, we get more attached to our children in a different way, than the children are brought in different position and way of creating child, due to culture or whatever. (3:02)

We never studied it, we don't consider it, but you have to. Because how, it's how our Souls in creation and expansion in the Universe works. How we share, how we interact. And where does the interaction of the STP come in?

It is you have to consider even why homosexuals, especially the male, have a different kind of emotion and interaction than the female similar sex, or the same as what we call, the missionary, or the Africans. And this creates a different and being with it, and it's all different .. logically, and creates a different emotion.

The psychology of the society has to be studied. If we travel the span of Universe in vehicles, close quarters, confined spaces, and the interaction with each other, and the social interaction. Otherwise you'll have a mayhem if you don't understand it. And I've done a lot of studies, it just came in my trips 20, 25 years ago to Africa, that Africans don't treat the children the way we do in Europe. No way. The love is there, the care is there, but handling a child, breeding a child, bringing up a child, is totally different than European. (3:04) And even totally different than Middle East. And in how we do not see the, what we call, the interaction of the emotion of the Soul. How in Arab nations we allow or is... << audio cut >> allowed to ...

K- ... And then, in the West, we see this as illegal, because it's underage. Where with the Arabs, marrying a 9 year old, just because somebody said so, has become part of life. And what kind of children it produces? It kind of... realities come into play with the interaction of the Souls. And it's just what it befits. Why did

Muhammad made interaction with a 9 year old legal, or part of religion? You read the history of it. How it came about. This marriage of, or having, what you call it, interaction with a minor, we call it, under 18, but who, at the age of 18. When does it come to maturity of physicality, or does it come to maturity of mentally, or what we call, evolution of the puberty?

Muhammad fell in love with a 6 year old girl. (3:06) He actually engaged her at six, when he was 52, 53. And he waited till the girl was nine, when became a woman, or went through first menstruation, and then he married her. And then, with that he made a lot of rules, because it befitted him, for his action. And that's how, marrying a young girl at 9... But you have to understand, in Arab countries, that .. girls, usually at 9, have their first menstruation, they become a woman. They can reproduce. And this is, it is in the history of Islam, read it, as a historian.

His second wife was, and then after that he married two more. He actually died in the arms of this young girl at the age of 18. This is the history of Islam, read it, and how the emotion has brought the Prophet of God to a position to make orders for life of man. He literally fell in love with a young girl, with a 6 year old girl, and at 9, and the girl was with him till he died. He wanted to die to be with her, out of all the wives he had. And she was only 18 when he died, at a very young age of sixties, early sixties. (3:08) And then to justify it, he made rules. And, which is abused now.

But again, a 9 year old child brought up in a different ways of interaction of Souls in Europe, is not even mature yet, in most of the times. But, we still see abortion, at the age of 9 and 10, in European hospitals now, it's a normal position. Are we taking the cycle of physicality out of, or emotion of the Soul out of? And, which one is correct? And, which one leads to creation of the new Soul in the right dimension?

We have to understand cultures, and we have to understand how the cultures were built, and how we interact, and what it is. This situation of 9 year old girls coming in to Europe as wife, is one of the biggest dilemmas for the European nations in the, in, in immigrations. And, the policy is now, we just ignore it. We just, because the girl always carries the name of the husband, we call it as a child, let it go that way. This is how European, American legislation, have by-passed the marriage of the 50, 60 year old man, with 9, 10, 11 year old coming into Europe as wives. It carries the name of the husband, so it's treated as a child of the family. I used to handle ... be in this, in nineteen seventies, eighties, with the immigration officer, said, "This is the only way, you're letting it go." Because the girl marries, entitled, because the name of the husband is on the passport, because cannot travel without it, he say, he's the father. (3:10) But, by law you cannot do.

And then, what interaction of the Soul brings these interactions? And what Soul is it created out of this? And what's the expansion of the brain in the emotion within the center, when such a interaction takes place? What Soul brings to what limit? And does it confine the Soul to itself, it never grows?

This is where I say, hypocrisy of the religion goes out of the window. Then there is a bigger question for you Knowledge Seekers. When is your Soul mature enough to find its twin? That it can match with, pair with, and from it, emanates other lives. In physical life, we call it 9 years, 10 years, 18 years. Does the Soul has a time limit of maturity to find its twin? Or when does it happen? That the interaction of the two can lead to the creation of life, extension of the Soul of the Creator. Now you have to answer that, (3:12) and then you have to understand how the rest comes in, and how we feel, and how everything is connected in reality, physicality, is what we call, the interaction of the environment.

Any other question?

Q: ... Is it possible to tell us the names of some scientists who were killed by the order of Ayatollah Khomeini, please?

K- Just read the head of Iran Atomic Energy, when he arrived in Tehran, was executed, and the rest are there. Some disappeared, and never appeared, a lot fled Iran, immediately. And, Rafsanjani, and the others, later on, invited them back in a very few came back. The rest stayed and became part of, especially, American, German nuclear industry. In American nuclear, and in German and French, especially, you find a lot of Iranians. They are retired, now most of them are retired, who have been Iranian physicists, nuclear physicists, trained by them.

The story, the history, not the story is. When we have a scientist, a guy, who studied in Switzerland, electrical engineering, went to... He saw an article in newspaper, French want to train nuclear physicists, just after the war, and he went there, he became nuclear physicist, came back to Iran, couldn't get a job, was nuclear physicist. He went, became a lecturer in University, even he was a doctorate in Nuclear. And then when he found out that Eisenhower has gifted Iran with a nuclear reactor, (3:14) he went to Tehran and saw the authorities. You are the only nuclear physicist we have. So, you become, go and see the Shah. He goes, see the Shah, explains what he said, "Oh, .. we didn't know we have one of you." So, they made him the head of Iran Nuclear. He was a very wise man. He said to Shah, "You have to understand what I'm doing." And he said, "6 months, I come every day, I teach you, you do the work, and next day I come, you explain to me what you understood." And after 6 months he says to Shah, "Now you're a nuclear physicist. What do you want me to do? Do you want to go for weapon, or do you want me to go for energy?" Shah says, "We go with energy, where need be, we go for weapon." We started proliferation when Israel came out to be nuclear. And, for to get these things, he said to Shah, "We don't have any." He said, "Shah, send them to the other countries."

They paid a lot of top Iranian people in Universities, to go to France, to Germany, to America, to become nuclear physicists, and to come back. And, by the day they came back, it was the time of the Iranian Revolution. A lot of them, just beginning of the Iranian nuclear industry. How many got to Iran, and how many ordered to execute? The guy who started Iran Nuclear, Dr. ?? , he left to America. He knew, when they come, they kill him. So, they appointed a new one, he was in position as a new one, they executed him, because he was head of Nuclear. Read it, it's in the history of Iran Nuclear industry. And with it, a number of the scientists who were educated outside, were executed, or in prison, died under unknown circumstances. ?? unfortunately.

And then, after the war with Iraq, the Iranians found out, "We need something ourselves", because nobody was selling them weapon. (3:16) And Shah brought the energy, nuclear, ?? reactor from Eisenhower, because he said, "There's going to be a day when the oil finishes, my nation cannot be dependent on energy and become backwards." He was ?? . He was well... He was one of the few world leaders, who didn't rely on his advisors. He learned, he went to study... He did the same with the pharmaceutical, petrochemical. He studied with scientists, petrochemical, and when he realized, that the 20,000 products made out of petrochemical, and what the opportunity is in 1972, he raised the fuel prices. He said, "I need it, they need it."

And if you go into the budget of Iran, at the time of the Shah, the first most money spent on oil, second was nuclear. And then other industries. A huge burden was put on Iran to become nuclear during the Shah. From the income that he increased by oil. I studied Iran history of nuclear in detail, exactly where we went wrong, and why we are nuclear weapon technology people, which they ask, and allege us to be, which we are not.

Americans wanted to be in Iran and control the nuclear, because Shah has start doing it himself. And he went with Germans and the French, because most of our scientists were there to educate it. And then, even during the Iran-Iraq war, Saddam bombed the Iranian power station, which was built by the help of the Germans. Shah's side ?? went to nuclear reactors with the Germans. And then with the French, but he didn't sign anything with the Americans. The Americans were so angry with it that we gave him the prototype. Now he's gone with the others. (3:18) "We're going destroy it." They paid Ayatollah Khomeini to destroy Iran nuclear and that was the first thing he did, he came in, he executed the head of Iranian Atomic.

You have to understand the history, not just, it's there. It was part of the negotiations for him to become a leader, to destroy, kill the people, scientists, Shah brought us nuclear scientists. And then, Ahmadinejad followed his line, the same gave the names, that got us all killed. Because he came through that. This is history, this is not emotional or made up. It's in the books of history, cannot be changed. Read it. We lost some of our top, top young nuclear physicists by the firing squad and torture in chambers, in the first months. It was part of the contract.

Any other question?

Q: ... Is there any parallel between the scalar energy or cold energies discovered by Tesla and MaGrav energy? Or does this form of energy still vibrate in a more material layer?

K- We have energies which is from matter. (3:20) We have energies from, what we call, non-matter magnetic fields. I invited the doctor who is talking about the scalar wave and the magnetic fields and whatever, to Ninove. He's a German, to give the explanation about this. I met with him couple of times in his University and he came to give us a lecture. His pictures are on Internet. One is what we call, Gravitational and one is Magnetic. You call it current and eddy current. You call it scalar waves and magnetic. One is Gravity, one is Magnetic. One goes out, one comes in.

And that's why the cages doesn't work on one, and Tesla understood this. Where Faraday Cage works on the other side, when it goes out, because it's weaker. It works on the one which comes in, because it's Cosmic Rays, and it finds penetration with it. What goes out, out of the box, is man-made, limited, and it stops with the limited physicality of the Box.

And this is something which, you as Knowledge Seekers should have understood by now, and the world of science it has not been understood. One has a Cosmic Ray background and at the end whatever will penetrate, it will come in, will receive. One we create inside a box to go out, it cannot be done, (3:22) it's what we call the Faraday cage, is because we made the man-made matter state fields. One, matter state fields versus the Cosmic Ray fields.

And if you understand this, this is the way then you feed yourself, when you absorb 80% of the fields from outside. Because you put the seed of the food in matter state in your stomach, so now what there is outside, you go to it, penetrates the skin of the man << audio cut >> Read about his scalar of waves. What was his name? Professor Miles.

R: Yes, Konstantin Miles.

R: ... And he had this set up in the middle picture here, I think, that he brought to the... to your establishment.

K- To the presentation... He came to the lecture theater. We bought his systems. We used the scalar waves and things of him. We still have it.

Any other questions? Shall we call it the day? It's nearly 12:30.

K- ... Thank you very much for today. I hope some of you join us tomorrow, it'll be a very exciting time. And if you haven't registered, we're still leaving it open for till tonight. And after we celebrate the birth of, whatever you call it, Mitra, we try to close it, and I wish you a very, a very happy New Year to your Souls, where the teaching of Mitra comes from. (3:24) And see you tomorrow in a wonderful session. I'm sure it'll be one of the most amazing sessions of the Keshe Foundation for a long time. And then, those of you who join us for the monthly teaching for transmutation, please complete your things. And don't get disappointed if I write to you personally and ask you. We don't want you to join these sessions, because if we get past the limit, or we see things which we cannot handle, we'll come to you that way. Thank you very much Rick, and we're going for the what I call, understanding of the more in the future. Thank you very much, and see you tomorrow and next week.

518th Knowledge Seekers Workshop December 28, 2023

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

22nd Flight session good result - new beginning; Soul missing knowledge in man; Creator creates with M fields; True history Man's culture; Still Pagans - worshipping statues Cross around neck - flags; Not advance knowledge of Soul; Names connected to Creator; Lot about Islam - true birthplace Mohammad Jordan - 200 moved to Mecca - start 9 year old marriages; Messengers pick STM open tent - Moses - Christ; STM takes over P not aware; Not abuse others in Space; Handle changes new P; Friday's use teachings; Reaching critical mass for transmutation; Satellite Souls; 2024 forefathers Souls decided time to bring change - everything ready - mature man; Age of Souls; True history - end religions; Friday 100 Souls left P - flat line - again on 12th Jan; Travel U with UBESUS also transmute; Elements created by low level; Handle radiation; Mitra; Mecca moved; 2012 KF not allowed to publish; Iranian MaGravs; How session changes you; Americans blocked publication London - still working - keep quiet; China conference; Pedophilia wrong; Persian culture worship women

ENGLISH TRANSCRIPTION

(:09)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual, we welcome you back and I hope for those of you who believe in the path of Christ, had a wonderful Christmas. And I'm sure, in the next few days you'll celebrate the Christian New Year. (:10) And then we go back to normal, till another one arrives somewhere. Most probably we come to the Chinese New Year in 9th of February, and then we come to Iranian New Year, in 21st of March, and then more New Years, and forever New Years, we are good in celebrating. I hope you enjoy it, in whichever, wherever you are.

The process of the teaching of the past few weeks, has brought us into a very nice position, and, as all of you know, our teaching does not end up with Thursday sessions, we do a lot of research, a lot of work in the background, which you as Knowledge Seekers (KS) come in, and we'll see that life carries on with the same manner, the same way, for all of us. << audio cut >> ...

Last week's teaching was one of the, what I call, very fundamental, opening your eyes into how you're connected to the Creator, and how you are part of the Creation, and you end up creating something, somewhere. In a way, the image you want to create, (:12) when you land somewhere in the dimension (D) of your, what I call, Soul, has already, is a dimension of another Soul, which has landed to be part of the fields of your creation, which is your Creator. If we understand this, if you understand the potential and the gravity of the knowledge passed on last week. A lot of you will come to understand, the new beginning has started, for so many Souls, for so many of those who become aware of this change, of this progress, of this new way of living, this new way of considering to be part of and to be in, and to be part of Totality.

Why does Keshe Foundation follows this path? Why Keshe Foundation works on this way of new dimension, as a scientific organization, what has our work and our life has to do with the Soul? Why do we have to take this path that we try to, what I call, connect to, to be part of? And, how we collaborate the knowledge's of the past, the present, and what will be part of the knowledge of the future. (:14)

One of the most interesting things for man is to go back, to understand what was in the past, what is in the front, and where we are today. The knowledge of the Soul has been the part which we never understood. We understand the physicality (P), we made medicines for it, we made tools for it, we move it around, we get a donkey on it, and we get on a donkey and everything other ways, we move it. And as I said from the very, very, very first teachings, the Soul of the Man (STM) has been leeched on by the physicality of the man. And now that we come down the training, some 500 and odd teachings, now we understand the leeching is still on, unless we try to change it. And the leech is not actually the physicality of the man. The leech is the magnetic (M) field environment, which dictates the manifestation of the, what we call, the physicality.

In a way, you put the Soul anywhere, and in respect, and in interaction, with its environment, it manifests itself in physicality of, literally, what it'll be. It's like a dough. How you heat it, how you warm it, how you manifest it, will turn up to what it be and what the environment puts in that dough. It becomes a bread, it becomes a cake, it's something else and whatever else. But in fact, in essence, it's still the same flour, the same dough, the Rays of the Creation of the Creator. (:16) Once we understand this, man then decides which way to travel, which way to move.

We chose to ignore. Religions brought this to us, to ignore. Our weaknesses in respect to our environment brought us to accept and make of things, without actually going within. We saw fire, we copied, we saw

wind, we copied, we saw bird, we copied it. But, we never copied the dimension of the Creation. We never copied what our Creator created. We structure ourselves in copying matter state. But, we never structure to understand, to copy the magnetic field strength, which creates the matter, the essence of the fields of the Universe. Then, a structure like Keshe Foundation becomes ?? nomad, because we are in both side, we teach both, and we understand which way you want to go. And, as I always say, in Farsi we say, if you don't want to be standing out, become part of the crowd.

So, as becoming part of the crowd, we taught you about the Gans's and everything else, which we said, to bring you to the point of understanding of your Soul. But still, you have to understand what this Soul does, when it goes back. If you go back to the history of man, history of the understanding of the man, it's culture. Going back to the time before any religion started, people created themselves gods, (:18) because they saw they need a strength, they saw they need a power, they saw they had to be connected to something bigger. They never understood that they are that bigger part. Then, when they became more physical, they built the statues, goddesses. And became more physical. We still are in that dilemma of physicality, worshipping statues, and we are fooling ourselves, because we are modernized, we are educated. Up to now statues we worship were on stones, in the temples, and in god knows places.

But, with Christianity we became one step more mature. We carry the statue around our neck. There's no difference, we are still pagans. Look at the cross, you celebrate the Christmas, and have you changed anything from the time of pagans? Not really. You managed to break down the temples and the statues, and you brought it around your neck. And to show you, you are more powerful, and you are more understand the situation around you, you put a statue of a man on top of it, which the Romans wanted you to do.

So, in a way, in one shape or another, we still carrying on with a worshipping of physicality and statue in the writing, we carry around our neck as a "Allah and a Moon," we carry it as a cross, the Jews put a star, and we worship different things in different dimensions. We haven't come to the point to put these things away. (:20) And we celebrate it. The sign of Mecca, which means the Moon, is become a symbol of Islam. That's why Muslims have the Moon. Mecca in the traditional name of the, what we call, the peninsula of Saudi Arabia means Moon. And, when they chose to become the capital, they become the sign of the Moon. And that's the sign of Islam, which means the city of Mecca.

Now, you carry the cross with you, you celebrate it with you. And you put a man who, later on, in three months time, you put it on it, you call it the ?? Cross, and you put it in new temples, new house of statues, you call it the churches. You walk in the church, you still see him hanging there. You haven't changed from paganism. You just made it more glorified that we all carry around our neck. And the Jews do the same, with the "Star of David" and the rest of it. And it's always been there.

With the teaching of the Keshe Foundation, by understanding the structure of the Soul, you understand you are detached from these things. You are connected to the Creator, you are connected to the, what you call, the light of the STM. And this will bring you more knowledge, this brings you more understanding, this brings you to understand, not to be afraid of a building, of a what I call, "stadium," or whatever else we put the man. (:22) The actual field of the play of the Soul is the Universe (U). The field of the play of the man in dimension of physicality, for it to be itself, is only Earth.

In our teachings, in the process which comes to understanding the process, we become more and more, we bring it in to the name of some subconscious understanding, even we put it on our flags, it's another way of worship. And we don't let it go, because we never understood what the Soul is. It's us within us. If you look

at different flags with the different emblems in the center of it, it's another way of worshipping, it's another way of paganism, it's another way of statues we put on. If you study how deep rooted this worshipping statues comes onto, you'll be amazed.

Years ago I studied the flag of Iran. Why the Muslims, when they came into power, they brought us the Moon and then when they got Ayatollahs, they got all sorts of curvatures of the Moon, they put it in of the flag. What does this mean? It's another worshipping a statue. The old flag of Iran, we had a lion with a sword in the hand and the Sun. Which was the totality of another way of worshipping God. When we say Shah, and then "Shah of Shah" means the, to you "King of the King," but "Shah" word comes from the ?? word in the time when the Man understood the power of the Creator, (:24) God means Shah. What we call it the Shah, mean God of the Gods. The word Shah comes in a deep rooted, what we call, culture, which means the Sun, rise of the Sun with warrior-ship. Because it comes from the word, which means the Sun rises from the East, with a war and warring attitude. So they chose a lion with the sword. But it comes with the rise of the Sun, they put the Sun on top of the lion. And nobody ever understood. Where actually the word "Shah" means God. "God of the Gods." And subconsciously, we don't understand it now, but during the time of the past, it meant God of the Gods. You change it to Kings, and then you put different things on it.

So, you see, subconsciously, the Creator and the power of Creation, has brought us this. In the old, ancient time, the Gods were two Gods. Gods which rises from the Sun side, from the East, and a God which sets on the (??) East side. The rise of the Sun on the West side, always was a fighting God, had to fight and just come to create. And then, because it came with the rise of the Sun, They made the lion as to be that fighting, which always been the lion was the powerful one, with all the wars, with the sword, which was the man's fighting, and then they put the Sun on top of it, (:26) which came to be the second Shah, which is the God of the Gods. One is the God of light, and one is the God of fight and power. And subconsciously we became that way. Look at the other nations flag. We have continuously followed the same way. Muslims came with the Moon. Again, paganism, we still worship Mecca. Mean, from South of the peninsula. Mecca, the city of Mecca, didn't exist the way we know today. It's a stone we see, it's a culture we came from the South Peninsula, and it became part of the stone, people worship in another direction.

So, it has never changed. We went from the flag, we went from the places we worshipped, and everything else, we always relied on our environment. But, we believed in something above us, the God. And then, everybody changed the name in a different way to fit, to suit. Because man never understood his Soul is the Creator, is connected to the Creator.

When you look at the name of Islam. Again, means, all languages of Middle East, means the Creator. Islam means, has come from the Creator. Muhammad chose it deliberately, because at the time, people understood, this is the religion of the Creator, that's why they turned to it. Go back to the root of the names. (:28) Why you call it Shalom? It's the gain the same. Why you call it Jerusalem? This all comes from the same name, the God, the Creator. Where the God of East versus the God of West. The God of West goes with Shalom, which means the Peaceful One. When you sit on the West. Jerusalem sits on the West side of the whole, before the, what we call, the sea. And it was where the peace lands. Land of Peace, land, where the direction of peace is. So, we don't understand, we've forgotten about the root of our language, and those who understood have abused it, or used it, to nominate us.

All the words, we talk, is all connected, especially in the Middle East and Christianity, Judaism, Islam, is all come around the time when our ancestors understood the Creator. And we lost that track. They didn't worship statues, they didn't put a cross up. People used it, where understood it, to put it on. The same, when

we go, we talk about ?? Salima, Salima is the same. It comes from the same basic word, which means, "The one who possesses peace through God." When we say "Salam," it's the same, it means peace. It means, what it came from the language of the past, three, four, five thousand years ago, but now it was just a word, because we forgot the culture. And those who understand it, abused it. And the teaching of Keshe Foundation is to bring these into light. (:30) That you understand, you are the light. Doesn't matter, you live in the East, you live in the West. You rise from one side and you go to the other side.

So, the teaching of the Keshe Foundation, it brings about the teaching of the past, understanding of the past, the culture, and the present time. And the freedom of man from dimension of physicality (D of P). Go and find, now we have the freedom of the Internet, about the culture of your language, what the words mean, and how we come to here. And how our rulers and the priests, and others have abused even them themselves, not understanding, but knowing that it controls the physicality to control the STM, then it can be done.

Man will never find his freedom. The freedom of his Soul, the freedom is connection to his Creator. Understanding the history of the man, as I said before, everything else could be faked. We made a fake Bible to suit the Romans, we made part of the Koran the same, if we go down into the detail of the Koran, we find out how much of it is made up, doesn't match, it doesn't work. And the same, worse is with the Jews, and the worse lot, the Bahá'ís, and the Buddhists, all faked it up. All made fake bigger, because they had to match the others. (:32)

Now that you know the dimension of your Soul, nobody can fake it. Because it's for you, you can travel the strength, the fields of the Universe. And, this is where you have to choose. We create the tools, we bring the dimensions for you, to understand how you manage to travel the body of the man in aircrafts, a car and a donkey. Now how you can travel the STM, on the field strength of itself, with no donkey, no aircraft. Because, it possesses the strength field of the travel speed of the Soul of the Creator (STC). It's you who decide, where to manifest it, where to slow it down, where to change certain parameters, to give it manifestation, and pack it up and go and somewhere else open tents in another way. Then, a lot of things comes clear.

When we tell you we've been here thousands of years, it's the same. We picked a STM, we open a tent, it comes the time of the Moses. We pack the tent up, we travel around, we turn up again, in another dimension of physicality, we call it time of Christ, and then Mohammed and the rest. But it's the same nomad, it's the same Soul.

Then you understand what journey your Soul has to do, to take, and where to go. And, when you are knowledgeable in the Soul, and then, when it comes to time of you becoming the Creator, you don't let these abuses in the time where the STM was abused, (:34) in the physicality of the man. Sometimes, we go even crazier than crazy, we do it, we stick it on our head, to remember that how stupid we are. We call it the turbans. If you see some of the Jews, they have a little black block in front of their forehead. Instead of banging into the wall of the Great Wall, they put it in there and they bang it, it bangs on their forehead, around the day and night. Then, we ring it as a bell in the temples of Tibet, and we do everything else with it, or bang our head 17 times a day on the floor, in the name of Islam. To make sure that Soul is engaged, and we can use the physicality, in whatever name we did.

And as I said, many people don't like it, because they can't rob you, the guy can't have a "cushy life," given tens of thousands as a priest, and Mullahs, and the Rabbis, and the rest. Even though they can't even read the books of the God, which they created themselves. Then you understand, as there are no books in the

dimension of the STM, no one can cheat, and no one can become a Rabbi, and Ayatollahs. We work with all, we work with both dimensions, because we are aware of their weaknesses, and aware of the strength of the STM.

In the process of the Creation, man has to understand this, that not only not to be abused on Earth, (:36) then when it becomes the travel of the Space, he doesn't allow his Soul to become abuser of the others. And the second is more important than the first, because here, on the physical dimension, you're abused, ?? of abuse.

Going through this process of understanding, going through this process of, what I call, completion of the process. We gradually brings you to the point that, you will see, you will understand, that the others will see your Soul. And when you come back to the dimension of physicality, then you ?? leave behind that one. It's so much when you're hypnotized, you do things where you don't believe it can be done, when they show you the video of what you've done, you say, "This is not me, I didn't do this." Or when we allow the STM to take over, and then we video it, and then we say, "No, I could not do that."

As I said to you, I did that deliberately in a few cases where we were involved in. Getting a woman who has more or less no brain, with the Soul part was not touched to walk, and when she sat on the bed since we showed the video, she said, "I cannot walk." I said, "This is your video walking." Because we walk the Soul, not the physicality, (:38) and the Soul takes over the dimension of physicality. We showed that with Naomi in the hospital, as I said before.

So, we know how to get the STM to change the physicality. And as I said, we are not magicians, we never show magic, we explain what we do, then you understand. And in that process, it's for you to understand the strength of your Soul. And once you understand that the strength goes back to the Ethos of Mitra, think good with it, talk good with it, and act good with it. Because, even the Souls think and talk and do things.

The Soul has a Soul, Soul has a structure, and this is how you communicate. And, in that process, you show the manifestation of your beauty. Our job as teachers is for you, for us, to both understand the value of the knowledge of the Creation. For all of us to understand the dimension of the Creation, in both dimensions of the physicality, be it on this planet, on the Moon, another position in the Universe, but the same Soul. Just because you wear a clothes of a monkey, does not make you a monkey, does it? Because inside is you. (:40) When you go to another dimension and your physicality change, the Soul is still your Soul, irrespective of dimension, position.

And this is why we brought in the transmutation. Which means, up to now, you transferred, you traveled, now you transmute. You travel in the body of the man, you transfer the body of the man from one place to another, in another box or whatever. Now you learn to transmute, which means travel with the strength of the energies of the Universe with your energy and not your physicality.

Then it comes to a point. How would I accept the change? How would I not be frightened of what I see? Denying my own existence, when I'm in Mon in the strength I appear, for what I've done, what I control, I end up to be a stone. And somebody takes a picture, you were not there, you transmuted, you're a stone. That stone is you. Now you understand the teaching says, "Even a stone has a Soul." Because, it's you who has changed to that stone.

Now, we come to another point and dimension of understanding. Now that you have this knowledge, what are you going to do with it? (:42) Now that you establish the connection to other Souls, what are you going

to do with it? Are you going to practice it, strengthen it, and enjoy both? As you enjoy the walk to go to the park, or you take the car to go to the park, but at the end, the same physicality ends up in the park. And the same pleasures comes you, it doesn't matter you walk to get there, or you drive to get there. What would be the dimension of the pleasures of the STM? Do we go to a Soul party, or do we go to a man's party?

These are the points that we have to face. These are the points that, especially those of you who are going through the different phases of the teaching of the Keshe Foundation, outside of Thursday's sessions, are gradually facing. And you have no choice in wanting it or not, you start feeling the changes, the dimension of the changes. And what is, and how you have to handle it. Or, how much more can you deny it, till one day comes on you, and then say, "I didn't know this is it." And the denial and the ignorance ?? comes ?? you. The truth shall not change, the existence of your Soul within you cannot change. It's how you find your way to it, (:44) which affects you, will become the point of the change for you, and the change for those who understand the work you do, and how you work around that, and how you work with it, and you understand it, and how you bring the change to your Soul, your physicality. And to what extent this dimension of physicality will change.

We are going through the phases of the teaching on Thursdays, that we see a large number of Knowledge Seekers are reaching that point. And this is why what I call, I put this, "consolidation talks." For them to understand there's nothing wrong. And what they've been through, what they go through, is part of the process to gain confidence to go to the next step. With the weekly and monthly teachings and what I call, the workshops, as a teaching as today, and the workshops where practically you're getting involved in what I call, on Fridays, once or twice a month, is practical. What we do, what practically we do. What we learn in the teaching, in theory, we put in practice, in what we call, "physical workshops." But this time, we don't show you how to make MaGravs, we create dimension and condition, that your Soul can travel, (:46) that your Soul can expand, that your Soul can communicate, in one thing to another. Gradually, step by step, more and more of you will come to learn that point.

We still do the test, we still making systems to become more powerful, we make systems to become more effective, that we can do a better job, but at the end, the whole process of the teaching is one way or another, to bring as many as you into understanding the Totality, that you, in the coming time, become the teachers. To teach the others how to go through this. How to teach the others to be able to travel in the dimension of the STM.

And this is part of my work, and this is part of what I've endeavored to do in past years. And now we're reaching that point. The reason we carry on with it, till we reach a "momentum mass," that more and more of you can do this. More of you can transmute and transfer and travel in both dimensions. That you don't call it a dream, because now I do it. You don't call it, "Oh darling, I was just thinking this before you say." Where you actually felt the emotion and the Soul spoke, and as you dream in your dreams and you remember some of it, is the information which he receives, (:48) you already received, and say, "Oh, I was just thinking about this." But not... It's not a dream anymore, because we talk on the Soul level, as much as physicality.

And, this is the purpose of these teachings. Does not matter, if you fall asleep in the teachings of Thursdays, or you fall asleep in the, what I call, physical workshop of the Friday. Because, it's your physicality locked out, not the STM. And then, when you travel in that dimension, has no limitation. "Oh, I fell asleep during the workshop." And, "I went there and there, I felt this." Because, sorry to say so, on Friday's workshop, we got nothing to do with your physicality. You can pack it up and take it anywhere else. You can have the headphones in the bath, you can have it while you're driving, you can have it while you're traveling, you can

have it while you're climbing, and you can have it while you're asleep. Because we reach your Soul, your physicality can do whatever it likes, as long as you keep it quiet, keep the microphone shut.

Then you understand, how much we are entering, teaching you in the dimension of the energies of the Universe. You are learning about yourself. You're learning about your environment, you're learning how and the way you have to handle the environments to come. The way you bring the fields of the Universe to be part of you, (:50) to connect you with, to interact with, and how to transfer you across, you enter that position and dimension. For your physical life, you get on a bus, you change train at a station, you go to different airports. In the dimension of physicality, you do that with your Soul.

And, if you need dimension and connections, in the physicality of the STM, we have settled with you, with what we call, the Satellite Souls, which they come into operation. Which those of you, which go through the span of the Universe, we've given you Universal Council members. Now you understand how the process was preset long before we bring you to here. When you build the bridge, you have to put a foundation in. You have to... the post in and then you have to do pillars on, before you build the bridge and you put the track on it. We've done all that. Those of you who are the Satellite Souls, you'll soon find out why you became. Instead of you, your Soul has chosen you, you run away from the physicality, when you come back to it, but you have to understand how you have structured yourself.

Those of you who became Universal Council members, gradually will come to understand the new dimension, without you knowing what is there and how, you will hear the "help call" and the, what I call, signals of the Souls in the Universe, and those who are Satellites will do it for the man on Earth.

In a way, we have built the whole foundation. (:52) The foundation of the, what we call, transmutation, where your Kings and your rulers and presidents and governments build you the roads and the plane and stations, for your physical dimension. But this time, there is no pilot, this time there is no driver, this time there is no abuser, and this time it's you who does all that. As I said to a friend of mine, "We all become a woman." Because now we can't say we are a man, because it's multitasking. They always tell us, "As a man in a physical dimension ..."

.. << audio cut >>

... ?? and the rest, same time. So, in one way or another, with these teachings, I try more and more to explain to you, more and more about yourself. About your Creator, which is your Soul. I don't tell you ... << audio cut >> ...

... do this or do that, and you don't need to do anything else. (:54)

Because now you control your own Soul, you control your own dimension, You are in charge of it, you are responsible for it, and you can't blame no one for it, because itself, finds its time, place and position, according to what you've done with it, and what you do with it, in dimension of physicality. You can still get on the plane, or you get on the transportation of the fields of the Universe, through the same journey. You like to sit 18 hours in a plane, go one place to another, or four days get to the Moon, or four seconds to the Soul, and go and see.

In totality, the time we are in, and we are in the last week of 2023, the evolution in science and transmutation will start from next year, from next week. How it's set to be is the decision that your forefather's Soul has set it to be. We are just here playing the part. We are not making a decision for it. As your forefather's Soul decided, you call it this time of 2024, this time of 1,400 and something, and 1,500 something, or 6,000 and

something. Somehow, the environment of the energies, fields of the Universe, in the coming weeks, in the coming time, reaches the point of the maturity for man to go through that evolution.

How the technology came to be ready for it, how the nations came to become ready for it, (:56) how the religious leaders came to be ready for it. Blame it all on the Soul, and not on the man. The coming time of weeks and months, is the time when maturity of the Totality of the STM, gradually starts to build up. Maybe we call it, 'the Year of Judgment'. The years of when the man will learn to release that cage from the, what I call, prison it made for its Soul. And in that process, many of you, as a human race and the rest, will mature to it.

In the process of the freedom of the man, to be able to travel the span of the Universe, to become and bring man to be part of the Universal Community, starts. In a way, when we call it Universal Community, is the interaction with the Soul of the other creatures of the Universe. You do not need in the dimension of Universal Community, to see someone's thing, in physical dimension, as a UFO, as an alien or whatever. When you travel in the dimension of Universal Community, you interact with the dimension of the Soul, with the dimension of the fields. Not with UFOs and the rest, that we became part of Universal Community.

You become part of Universal Community when you accept the existence and the process of the work of your own Soul. And anyone can become part of it, we usually, traditionally become part of it, (:58) when we put the physicality in the grave and we call it death. But now, you have that choice, that death will never come, because you can leave the old body of the man in his nineties and travel with a fresh Soul across the Universe for thousands of years. And maybe one day you come back to bring that physical old body back to Earth and be here when you are 5,000 or 10,000 Earthly time.

In the future, we'll teach you about the life and the, what I call, age of the Soul. Because, Souls do not have age, in a way, but they have a strength which shows their time of the travel or, in a way, interaction of the fields of within them, gives you a dimension of the maturity of the Soul. The Souls mature, they don't age, because time does not exist in the world of the Creation, it is man who made the time.

Then you understand, step by step, physicality has a limitation of the building, planet, time, light, where the Soul has no limitation at all. And whenever you want to put a limitation on it, you bring it to the dimension of physicality. And then, one day, how we transferred and how we transmuted, how we stayed in the deserts and god knows best places in the Universe, are explained. (1:00)

One day, I open the books, which none of you will ever go to mosque. Because you'll find out the truth about the mosques. One day, none of you will walk into no churches, as partially you know the truth about. And, one day there'll be no name of Judaism left, as every man who believed in it, will be a shame to take his dimension of physicality to that point, place and position.

Then you understand how this journey has started? And how, where we are taking you? How you are going gradually, step by step, in the dimension of travel by Soul, and leaving the physicality behind. In the test of last Friday, for a very first time, we saw digitally, we saw through equipments, and what we have, how you all left your physical life. The first time we thought was coincidence, second time was confirmation, and the third time was a fright in all of you, that you did not want to do it, because it was too, too real. And, we have gained such a knowledge, we know exactly how to bring you to that point. And then, once you learn yourself, you do it yourself. (1:02)

As those of you who joined us in that special giving, that physicality had no dimension, and you left it all behind. We invited you, most probably as Knowledge Seekers who joined last Friday, to a second session, next Friday. To go through the same, to get the confirmation of what you've been through. And, it's not that you felt anything, it is that you felt nothing, that's the whole beauty of it, the peace, the joy. And, as many of you said, you did not know where you were, but it was a peaceful place, you find peace within you and your Soul. You took the journey that a lot of people call, coming back from death, because the joy was there, you went through, but now you learn.

For those of you who went through this, we have invited you already, check your emails, to join us next Friday. We want to take you through the same journey. And if you remember in the process of the journey last week, very unusual. We asked you if you remember in the last 10 minutes or whatever, to the precise minute we saw how you left your physicality, is recorded in a digital form. And how the STM and the Soul of the Physicality (STP) has left, and there is no function in physicality. (1:04)

You seen those, you heard the noise in the movies, when it goes blip, blip, blip, blip, and it goes beep ... We have recorded that beep ..., with all of you. And the beauty of it is, that, that beep has come back. And that beep is recorded coming back. And then, you understand how easily we can bring you to the point. And it frightened many of you, going through that beep. And it is strange for us that some of you did not even felt the "beep" of your own Soul, of your own physicality. And you brought it to be in the dimension that in fact, you all beeped. And in a way, all of you went through that condition. You went through that emotion. You went through what I call, dimension that you did not want to be in. (1:06) And what is the strangest thing is how you all beeped together. And to see how you hear the beep of your physicality in the what I call, systems in the hospital. Now we have seen the beep of your Soul.

And what we want to do this weekend or next Friday, is to see how we can beep the whole lot of you. And in one go. And the interesting part is, how you, as Knowledge Seekers, we can bring you to that point. That we can allow you, together, to reach that leaping point. And for the first time I share it with you. That straight line in yellow is where you all beeped. (shows the graph of it) (1:08) The whole hundred of you. And none of you can deny it.

Now you understand how close we are getting into bringing you into that position. You don't exist in the dimension of physicality. That yellow line is your physical dimension. And we can repeat it. So, you as Knowledge Seekers are learning how to leave the physicality behind. And, those of you who said, "I felt nothing." Go deep inside, why you have to deny that to your Soul. And we have a couple of these beeps and we know how to strengthen you to get to the beep. This is the time when you gave the love, this is the time when you left the dimension of physicality in all the fields of the STM, became the giver. The essence of loving, which means giving, unconditionally.

So, doctors show you the beep of your physicality, (1:10) we've shown you the beep of your Souls. Now, you understand, how close many of you Knowledge Seekers have come close to that point. And there is no coincidences, and there is no accidents, and it took us time to give that energy to reach that point. In a way, what it's been short in this planet giving to the man, to the dimension of physicality that it kills for it, and then it dies itself, that energy shortage was given to your Soul. And the satisfaction was giving. And that's what we saw with the physical dimension.

For weeks, they run parallel and separate. And the specific way designing to give energy to the STM, we even proven where there is no Soul, that the physicality cannot survive. All this has been recorded. How,

what strength, where and the way we can feed your Souls to go through that transmutation. This is part of the process when we tell you, you leave the physical side and we can transfer you to another box and you manifest, now you've seen the graph of it. Now you understand. (1:12)

<<audio cut >>

... the ?? God of the others, as we are all part of the same God, same creation and Creator.

Those of you who joined us last week, now you've seen the big lift of your time. Where that line only is created when all of you, hundred, were at the same time, in the same position. If one of you jumps, the whole graph goes. And then, as you came back conscious, none of you wanted to repeat it. Many of you wanted to leave the dimension of physicality. And we have all the data behind it.

Now you understand, everything we do is scientific, and no magic. And we have even taken your Soul, the energy of the Soul of you to another dimension, out of the system, to see how we can transmute your Soul. One day I explain this process.

Gradually, those of you who join us in the sessions to come, you build this and then you become stronger in doing it. And as I said, because you work all as one, even those who are the moderators, (1:14) their Soul become part of the same, because their work is part of, connected to the other Souls.

So, as I said, for next Friday, we have the whole hundred of you backing it. And then, the process of every third Friday, which is now been put out, we'll go into operation, till we see a continuous blip from the beginning to the end. And then you tell us, where the energy of the Soul has gone, where your physicality has stayed behind. And then you learn the process of transmutation.

This is the key in your pocket and not mine. And it's the knowledge which sits with you and not with us. We're teachers, we are here to guide you through. And it's for you to learn how to go through that process. If one single person, in the whole hundred people in the group, would have nudged, jumped, the "flat liner" of the Soul would have gone, back to physical dimension. None did. So we got a whole lot of you going through it. And you've seen your "flat line" of your Soul.

I have two, three more of these to show you. It's not coincidental. We knew what we are going for, we knew what we got it to, and now this allows us to build perfect systems for transmutation. (1:16) Where the Soul and the physicality, and the STP of the man, goes in his own trip journey. I hope I brought you to a point today, I gave you the biggest Christmas gift. Where man for the first time sees the behavior of his Soul. and you are still here, so you all came back. And you have to have no fear of death, in the physical dimension. Rick, take us through a break and then we come back.

R: Okay, very good, thank you Mr. Keshe. Okay, I do have on the screen here, the Transmutation Preparation Sessions, which is a new page on the Keshe Foundation Store. And it mentions every third Friday of the month, from January 2024 to June of 2024. There will be full day sessions from 9 o'clock CET to 17:00 hours at CET, offered for those that would like to prepare for the transmutation. You can book individual session or the bundle of all 6 sessions for a discount.

K- What is interesting is that the last one falls on 21st of June, which is Equinox (Summer Solstice), (1:18) right in the middle of the year, by coincidence, where the pagan time celebrates the, what I call, the

beginning of sunrise. On the other side, if you call it, not Equinox, the "Yalda" for the South people, as I call it. The shortest time of the light time in the Northern Hemisphere.

It falls very nicely with the whole pattern of the work. And it's the way it is, we haven't specifically chosen. We chose the third, what I call, Friday of every month, and falls on that day and that time. Carry on please.

>> **BREAK** >> 518 KSW December 28, 2023 (1:25).

K- Yeah, a couple of things. First of all, as during our session of teaching, today as it's going on, there's a most beautiful event is happening in China, with one of our Knowledge Seekers. The guy who I respect a lot, and has done a lot for the Keshe Foundation. He's getting married and I wish him and his new bride the best of wishes. And I'm sure in the future, Knowledge Seekers, you'll understand, how much this little guy has done such a big job for Keshe Foundation. (1:26) We are receiving the pictures of his wedding and I wish I could share it with you because it's private. And we wish him all the best in his new life, and what he's done for the Keshe Foundation China. And my best wishes to you Xiaojin and your new bride. And I'm sure you feel us with you, and I hope a wonderful life for both of you.

On the other hand, if you listen to the system just explaining about the UBESUS (Universal Body Enhancement Spaceship Units). The UBESUS are set to do both jobs. To do the transmutation and as you can see, physical flight. It depends how they are set to do, and this is what we are doing now. The physical side of the transportation of the UBESUS is already done, is with the, what I call, the authorities. Governments, who have already tested it.

And now we are testing, in a way, the transmutation side of it, which we started and the first people in June of last, in 2022, when they went in the system, they went to the Moon, they went to the oceans, and we did the first trips through the Soul at that time, now you understand. So, we have fulfilled what we promised. And these things will go to further extent, and what I call, explanation of the dual purpose of the system, like UBESUS. (1:28) You can travel with them, the span of the Universe in a system, or you can travel with them, or transmute with them, both dimensions within the same system.

And now we are going through the transmutation training, and as we explained and we showed, the knowledge is reaching the point that transmutation can be done, and a complete transmutation now is within the reach of the Keshe Foundation. What you see, what we showed, is the dimension of the, what I call, the

Soul of all those who participated. That, even they say, "We didn't feel anything." We can show you exactly, if any of you jumped out, we would have seen, we saw the change. Because many of you get frightened of these conditions. And that bleep of yellow line, is nearly one and a half, two minutes. Our screen covers 4 minutes. So, it wasn't a blip, a few seconds.

And the next one is even longer than this. And the parallel system to bring the STP, the STM, the physicality of man in line, we can do for 4 minutes, 3-4 minutes as we have, or we can now extend it to hours. And these are important in the future Wellness Systems structures, that where we can bring the STM in that position, and allow for it to process itself from any diseases in the Space. (1:30) This is how we will reach the man in Space, and how we'll extend that to go beyond the levels of the Space travel.

And, hopefully, in the, what I call, the invitation we sent to all of you, who participated in last Friday, to participate in the next Friday, we try to extend this, what's it called, physical no motion, transmutation, as long as possible. We try to see if we can extend it to 6 to 10 minutes. And then, in the monthly transmutation, which are set up, again we have a limitation in number of people we can accept. There is a limit, and we start with that limit. Our limit last week was a 100, and we took the 100, we can't allow any more in.

So, if you're participating in the next 6 months transmutation, once we receive the limit, even some people sent us the funds for registration, we send the funds back. We're here to develop a structure of scientific basis. And, all has to be done in one go. We're taking people who come in for the whole session of the 6 months, because we're developing them very rapidly to become, to go through the transmutation. And then hopefully, some of you in learning, you become the teachers, the next cycle of teachers in the Keshe Foundation teaching, how to transmute Souls. And this process has started, we have managed to reach that point. (1:32) And again, we have put a limitation on the numbers of, number of people who go through this process.

And the sessions to come has a specific pattern of transmutation by small distances across the planet, the other bits, and then, in the second part of the year, when our systems comes to full, complete development, hopefully in the section, then we go for a physical transmutation. We are getting ready for it, development is getting done, and we see how you develop.

So those of you who want to join these second six sessions, I'm sure in the next two, three weeks will be complete, And if we receive any more, as many of you have seen, in the past session of the last week, we send your funds back, because we have a limit, we have a seal. And as soon as we reach it, we don't pass it, because then we can't control it.

On other hand, we still carry on with our development of the technology on the physical side. And I know many of you have received, have reported back to us, that you received the first half of your Communication Bundle. Please, those of you who received it, till we don't receive all of you, the first batch of the second part will not go out. So, when the, what we call, our people come back to work in the second week of January, once we have the confirmation from all of you, who the Units have been sent to, that you received it, and you confirmed to us, we send the second batch out. And then, by January or February, we keep on doing the transfer, (1:34) what we call, these Communication Bundles, in sets of 10, till we complete it somewhere in next 2-3 months, for the orders we received, and then we go to the next phase. And then we go through the, what we call, bringing in, those of you who are Satellites, and the rest into the process of the, what we call, communication and the rest of it.

Are there any questions?

Q: ... He says he got the email about the second session will be held on the 12th of January 2024. And he's mentioning that you were saying something about it being next week. And can you clarify this point?

K- It's the 12th of January. It's not next Friday, it's the Friday after.

K- ... Sorry, you're correct. ... my mind is ahead of time. Yeah, so, no, it is on the 12th of January, as you've seen, we have reached the point of transmutation. And now, we go through the second phase, in the... It won't be exactly the same, but it'll be a further development, to extend the time of transmutation. And then, we're trying to find a way that we don't need to have the translators to translate half way, to take so much time. And those of you who join in this session of the next, what you call it, 12th of January, and the rest, we try to communicate with you on the, what we call, the chat line, that we don't need to talk anymore. (1:36) So, when you come in, keep an eye on the chat line, that there'll be no more communication to disturb the flow of the, what we call, the fields, as we come in and we tell you something to do.

But, in general, we have reached the, what I call, threshold of transmutation. Now we can confirm it, we can follow it. And I'm sure the next cycle of the system which is getting built, make this one much, much more rapid and very, very fast. So, I hope for your next 6 months or 12 months, we can bring you in transmutation systems as we have designed and getting developed. It's a very interesting time.

Any other questions?

Q: (Iranian KS speaks) ... Mr. Keshe probably seen my video in Persian session in about Middle East. (1:38)

K- Nope.

Q: Yes, yes the video about the ring around the Sun and the question about the Plasma.

K- Yeah, what's the question today?

Q: Today, there is a lot to talk Mr. Keshe. At the moment, I respect the class and I just want to like ask Rick to show you if it's possible, it's related to the like, it's related to what you say in the classes usually. And, something happened like during my experiments in Nano coating. There is a lot to ask because in Professor ?? Parviz knows me, Azar met me in the Tehran seminar. Like, I know you from a long time ago, I will explain you later.

K - Ask your question.

Q: Anyway, there is a video, there is a video, if Rick can please like play that video, then I will ask my questions. But it is in Persian, I can translate it if it's like necessary.

<< It is showed a video where the Ohmmeter from the KS shows the number 666 .. >> (1:40) We've seen the video the 666

K- ... We can see the video, we've seen the 666.

Q: ... Any reason is that, like, defaults setting for this number or anything?

K- I don't know, I cannot explain. I've never seen such a thing, so...

R: I tried it on my meter, my meter, and it actually did the same thing. Sometimes it depends on how you do it exactly. (1:42) It's some sort of default set of ?? to check the LEDs or something in it there. I don't know what else to say about it.

Q: Why should be like this? Sorry ..

K- I've never seen such a thing and if Rick can... If anybody can repeat it with their meter, it's something to do with the electronics of all these meters. It's some sort of between the battery and the microchip. Nothing to do with...

Q: It can be a just like coincidence.

K- It could be, but if people can try it and they all get the same, It's something to do with the way these electronics are set.

Q: Okay, but the... something is like, little bit freaky. I will explain you, I will explain you. Because, like, there is four numbers on Ohmmeters, and if we consider the zero, like, there are a lot of chances. And why is exactly 666, like, this is little bit like...

K- Oh, you have to ask the people who manufacture these things. So, that's nothing to do with our technology, nothing to do with what we do.

Q: Okay, okay, thank you very much, thank you, I got my answer. ...
Another thing, like there are a lot of things, like ... because I'm ... at the moment, I'm recording videos for ... like ... Iranian, in Persian language, for Iran Keshe Foundation. Like I started to explain the Nano coating first, like the Copper Nano coating session, and whatever like I learned from you and the system, I'm trying to just put it in.

K- Thank you very much for all your work. (1:44)

Q: No worries, that's my pleasure, that's like... always. Because I owe you more than these things, and there is a lot to say, because I was connected to your system, like you asked to come to the session with headphones. And something interesting happened, like something very interesting, because I have DVT. Do you know what is DVT?

K- No.

Q: The deep venous thrombosis, is a blood clot.

K- Yeah.

Q: In the lower, like the part of the body, usually happens in the lower of the ... part of the body. And I will explain you, I was locked down in the mental hospital, because of like ... Keshe Foundation things. I will

explain you, because they were telling me, you are not existing and there are all my hallucinations and these things. And DVT happened there, in the hospital, because even the doctor of the place, he recognized that this is something going on in my leg. And he said, "It should be ?? graphed as soon as possible." But they didn't let me to go out of the place that I was locked down. Because, they afraid I escape. Anyway, there are a lot to say. I was even, I was in the process of translating your books in that time. You can ask Mr. Parviz if you want. I just borrowed a mobile phone in the like, (1:46) car that was transferring me from one place to another, like the place that I was locked down. I just paid the man, and he borrowed the phone. I called Dr. Parviz, and I said, this is the situation. They're taking me out. I don't know where to come back again and continue. And anyway, I just want to say there is good news. I don't want to take the class time. There is a good news, I did sauna yesterday, and amazingly my clots from like my hips to my ankle, they absorbed by veins, and some of them even moved. And, this is like the... they... some people call it miracle, but I was connected to your system. That's my explanation. Anyway, and there is a lot to say, I don't want to take the time of the class. We can talk later, if you let me. Please.

K- Thank you very much. Thank you. But you have to understand, these could be due to other factors, than just the sessions, but it's how you take it. How you take it up to yourself. Thank you very much anyway, for everything. And I wish you all the best.

Q: No worries. I just wanted to ask your, like, opinion about the Persian language, like, videos that they are in the process. I recorded, like it did so many amazing thing came up during the Nano process. (1:48) Because, I'd even put the Calcium, like Calcium pills, a part of inside the container of the Nano, like ?? things. And, there are some interesting things came up. I can like, send you the videos and talk about it later if you want. Thank you.

K- No problem, share it with Rick.

Q: ... Bob Lazar claims that "Element 115" is the fuel for alien spaceships. What is your idea about Element 115?

K- Who's alien and who's a spaceship? What is 115?

R: Well, it's the element they haven't really discovered, or they have discovered, but only lasts for a very short amount of time, or they've only made a few atoms of it, or something like that.

K- Exotic materials.

K- ... They call it exotic matters.

R: Hmm. It's the heaviest element so far, I guess. So far, that is.

K- I don't know. Whatever we don't have, (1:50) we can talk about it as much as we like. Because we don't have it, so we can make a speculation. But, 115 is not the heaviest of the elements in the Universe.

R: They're talking up to 250 in the stars that create elements now, apparently.

K- Yeah, this is whatever we... Look at this funny part of it. What happens when your Soul lands in one of these planetary 250? What would you come out of (as)? Will you be a stone or a dust or a gas? Or which one you decide to be?

Any other question?

At the moment there is a lot of work going on with the new elements, with creating elements with high voltages and all sorts. Creating matter at the low level, is never been done. Never been done, because man looked at the whole technology upside down. And in the future, we'll show that all elements are created at lower temperatures and very few... different direction of the science of the man, as we are pushing it today. Very, very much different.

Any other question? (1:52)

R: Well you mentioned being exposed by rays and fields and so on, and we had a bit of a discussion of that idea in the Plasma Reactor Group. So, the concept is either, how do we protect ourselves, if we were to be exposed to those more direct, more from the source fields, let's say, that our physicality may not normally be able to withstand. Can we protect ourselves in some way? Or, can we alternately become invisible to those fields and rays, so that it passes through without any harm or damage, much like we have high energy Cosmic Rays going through us all the time, apparently billions per square centimeter go through our skin and so on. And yet we're not harmed by those, but if we were at a certain other frequency, maybe we would tend to block them, or if we were of a different level.

K- There's a way, there's a way to handle, not only the radiation, but higher strength fields. And, we cannot do it in a physical dimension, as a matter of the body of the man, but once we learn how to expand the Soul, we can do so. It's like you create a net for this. When you say, whatever, so much of the Cosmic Rays goes per square meter of our body, is the structure of our body which is set to allow them through. All our tissues are set in a way that the fields go through, (1:54) there is no interaction. If you get the interaction, then you, you create the residual energies and part of it becomes our food.

One day when the knowledge of the man increases to, what I call, add it up to, if you feel, if you measure the fields which they come, the example come, from your left side, and they go out from the right side, you will see we release different fields than the one they came in. Even though we say, "they go through us", the residue fields, some, interacts with our body. And this is how we are fed that 80%. And in the condition of nuclear, like reaction in the matter state, we learn to use our Soul and expand like a net, to absorb some, and at the same time, we know magnetic fields can be bent. So, we use our fields of the Soul, because it's dynamic, to bend it away from the physical dimension.

In a way, we've shown that in Fukushima test. If you understood the field flow and dimension of it, and how some is absorbed inside the Gans's. But in the future, you will learn how to operate these things. Because radiations are field strength, they are magnetic field, and you create that dimension that they actually become like a food to you, then actually something to harm you. (1:56) You open the span of the energy, that you absorb the energy without damage.

This is what I do when I handle nuclear material. Subconsciously or automatically, I create a field within me that allows their fields to become part of what I take, without harming me. As I said, if you were with me, with the Iranian colleagues in Tehran, the way I used to handle hundreds of radiation sources with hand, they all used to drive them crazy, but they couldn't understand. The way you can train your body to use the radioactive material as a food source, as an energy source, then is not a harm, it's addition. And you can do this with your Soul. What I teach you is what I've done, what I can be done. It's not something that is a fairy

tale. And if you ever get hold of the head of the research of ?? Akberme Jain research office, they tell you they used to go up the wall, how I used to handle hundreds of radiation sources just with hand, because to me it's a waste of time wearing these, because I know how to absorb the energy.

And this is the capability which all of us have. It's not exclusive, but you have to train yourself how to handle it, how to be with it. And this is one thing I learned to do from very, very young age, playing with the, what you call, X-ray machines. (1:58) In the X-ray technology, in medical technology, they make like a conical materials made of lead, that can focus the fields of the X-ray to a given position on the body, that it doesn't spread all over the body. For example, if you take an X-ray from a kidney, nowadays in the West they take a full picture, X-rays everywhere, liver, god knows intestine, everything gets radiated, for them to see just the kidney. In the time where I used to work with my father, we used to have a conical thing which fits on top of the X-ray machine, and fits directly to the kidney. Any extension, any radiation which comes from the tube, gets absorbed in these lead conical system. It actually, these cones they put on the street with the, for the traffic, the plastic one, the orange one, is more or less the same thing, with different cuts, with different shapes. They put into the head of the X-ray machine, it's got a slot. It goes in it, and you literally focus the field to the position, the rest of the body doesn't get it.

And this gave me ideas that, if the rest can be absorbed through, which be a system that we can do the same. And you train yourself to absorb it. And depends what KV you put on the X-ray machine, to intensify the fields for what objects, or what part of the body, you can play with this and learn gradually to absorb, to play with radioactive materials without harm. And our Soul is a dynamic system, we can do it much, (2:00) much easier, if you learn how to do it.

Any other question?

Q: ... You mentioned in the previous teaching that Mitra's daughter will take over you in the future, which seems to mean that Mitra is an entity. So, can you tell us more about the entity of Mitra? For example, how she was born, what is her relationship with the Earth, life and human beings on it? Is she recorded in human literature? Thank you very much.

K- It's with all the dimensions of the work. You have both physical dimension and the Soul dimension. And everything is recorded. In session of last Friday, she was present amongst you, for a few minutes. And we have recorded it, to see how we can change the elevation. It is exactly a couple of minutes before we received, or we seen the graph we've showed you (with yellow flat line). It is the field strength which we understand. And the... (2:02) everything about it will be out in time, and you'll understand how and where and everything is. But again, to be there is both dimension of physicality and dimension of the Soul. And every time we have her, her three times in the teaching of past two years, and every time she comes in, she brings a change and we monitor it. And the two flat liners as you've seen, is precisely a couple of minutes before. It's recorded, we record everything. One day we unravel what and how and the way it ?? is.

Any other question?

Q: ... Will Mr. Keshe now tell us who the descendants of Christ in the South of France is? In the past he mentioned that the individual is a 'she' and with a popular name, if I am correct.

K- Look for it. You got to understand a lot about Christianity and Islam and everything else. And how much of it is truth, how much of it is not truth, how much of it is changed to fit, how much of it scientifically is

impossible, and how much of it deliberately historians have raised it off the face of the history, to befit. (2:04) And one of the biggest controversy is not just the Vatican and the Pope, one of the biggest controversies are on the position of where Mohammed was born. And, if you read the position of where he actually, historically, comes to be born and what is in the Koran and where is now, there's a lot of things to be clarified, a lot to be clarified. Because, doesn't fit a lot of things in Koran, when you hear about the grandchildren of Muhammad, and about his children and their children. And what happened, does not fit into the reality of geography. Does not fit at all.

But they made it up and people have believed in it, and it's very hard to change it, but scientifically, the papers, the historical papers, shows Muhammad was not born at all in Mecca. Could not be. He's born in different position in Middle East. And if you put that position, a lot of things fits into Koran. There is a trip which Muhammad's supposed to have done to the, what we call, place in Jerusalem, above Jerusalem, from Mecca. It's about 1,400, 1,600 kilometers. It's done overnight. But, if you put the real place where Muhammad is born, is only 140 kilometers, and it can be done with a horse.

Historically, one of the grand children of Muhammad, married into a family in Damascus. (2:06) Where, coming from so south, in Mecca, it was one of the impossibilities. But, if you bring it up to where it is, it's in the same region. It's a few, maybe couple of hundred kilometers. But at the moment, we don't understand historically how this history was changed. How they moved the birthplace of Muhammad 1,000 kilometers south. And there is no historical word for it. If you read about Mecca, till 200 after the Hajj, there is no indication of the city of Mecca anywhere on the map. First coins appear on about 201, 202 of Islamic religion time. And, what happened before? People were there, they were trading, there were money there. We, near the present market, we don't find any architectural data about time of Muhammad, that there was a city there, or anything.

This is what, now it's, they come because they built it so deep, and millions of them go and pilgrimage around the stone. But this position has no geological position. Historians are digging into it very heavy. But there's a piece missing, one day we cannot find the literature in Jewish articles or papers or what, stones of that time. (2:08) But, if you bring the birth of Muhammad, birthplace of Muhammad, into Jordan, where he was, actually was born, then you see everything they tell us fits. The names used, the families used, all fits. It solves 80% of the ambiguities in Koran. But we cannot talk about it, because it's forbidden.

But, the same as I explained about Christianity, and how you got your Christmas. Maybe in the future we find documents how they moved, Mecca from Jordan to Saudi Arabia. I'm doing a lot of research in this background, to find in Jewish writings, in Christian writings, how did this happen? Till then, we have to accept as it is, but a lot of things, the surnames of the families of the people who killed the family of Muhammad and the position of Muhammad, why Muhammad could have 19 wives he had, and then he forbid his followers to ?? (Marry) more than four. How? We know, we know recorded, that he had 19 wives in his life. He said loyal to ?? Khadija till he was... till she died, when he was 52, 53, because when he married her he was 24. But, after that he had numerous wives, but why he did forbid them? (2:10)

And then he explains how Koran was written into it, why so much of the Koran is about his wives. How they behaved, how they chit-chat with each other. Which is in the Holy Book, and then they twist it the way it should be. There is a lot of... Then when you put in, into structure of the Middle East, then unravels the truth about Islam. Why he chose the word of Islam? Because he was part of the culture of the time. That's why he was so much in touch with the Jews. Why his 14th wife was a Jew? He actually married a Jew, a Jewish girl,

a slave. And he married a Christian girl, which is his fourth wife. His 14th wife was a Jewish. But he never had any children from any of them. Out of 14 official and altogether 19 wives, he only had...
<< audio cut >> (2:12) ...

K- ...

Yeah, he only had, out of 19 wives, 20 wives, he had 5 children, out of 2 of them. Khadija had 4 women, 4 girls, and 2 boys, the 2 boys young, died young. So, he had no son. And then, that's why his favorite daughter Fatima, who he married to his cousin Ali, became so prominent, and the two grandchildren, the grandsons. He had two sons and two daughters, Ali with Fatima. They became, because the ?? goes and the strength of the son. But he had no son himself. The fourth wife had a son. And he died, and he had no other children recorded. But is that the truth? Are there more children which are his, but never recorded?

We are looking into historical papers, stones, clay writings, of life of Muhammad, because he's precious. We have to understand the man is a prophet of God. And how it happened, the same I explained to you about Christ. My study doesn't go just because of Christianity. (2:14) It's the same with Islam. It's the same with Judaism. There is a lot of mystery and mysticism in the Bahá'í faith, and the same in Buddhism. Because when we get mystical, it gains power. When you look at the history, there is no mysticism.

And we got to understand, there's a lot of things when Koran doesn't fit where Mecca is today. And if you bring it up to where Muhammad was born in Jordan, everything fits. 95% of the ambiguities in Koran is answered, is correct, but why people are worshipping in the wrong place? But if you look at the place, the shape of the stone goes with the people in the south of Peninsula, where they ruled.

There's a historian which is doing a lot of work in the background, in unraveling these things. There are a number of them now in Europe. Some American and the British scientists are working on it, to find the truth. But the thing is, then you get the Islamic world telling you, "They are against their faith and the rest of it. These are enemies of Islam and the rest of it." You cannot deny historical papers, stones, which are from thousands of years ago. We cannot do. Unless it fits other people.

So, when we speak about the child of Christ, which went across France, and a lot of you use the name of Fatima. (2:16) Very common, it's not just Islamic. A lot of Christians in Europe, in Spain, they use that name. It's an Arabic name, it's a Middle Eastern name, it's where Christ came from.

We look at the historical papers, the documents. When you speak about ?? Dawud (David), which his father-in-law wanted to kill him, and he did everything we hear about him, in the Jewish religion. Then, you come to the point of him escaping in the Jewish literature, and hiding in a cave where there was a, what you call it, a spider, knitted the front with a bird outside, that the soldiers of the father-in-law couldn't find him to execute him, when he was in the cave. This goes back 4,000 years before, 3,000 years before Islam. And then, you see the same thing in history of Islam, But Muhammad went in the cave and it was a nest of birds and spider and it's a big revelation in the, in what you call it, in Koran. Are we living in the same area? Are we talking about the same story? How come we have it in Judaism and the same spider appears in Islam 2,000, 3,000 years later. (2:18) And if you are a very good Scottish guy, you have it in the Scottish history as well. So it's a big mysticism in Islam that Muhammad went in a cave when there was a spider. It's a very big part of the Islamic religion. But being half Jew, knowing part of Jewish history, read about the life of Dawud, 2,000 years ago, the same spider appears. Does God have a specific spider for the Prophet? Or, this is the mystery of religion.

Don't take my word, go into the history book. History books never lie, especially when two or three historians, which are of the same time, one could be copying the other, but you see the language. And then, you understand. And a lot of other things come into light. You take out the parts which they are trying to make history out of the Koran and all this mysticism and people we give the lights for, read it from angle of the Jews, the Christians, and what the Muslims write about the same event. And somewhere between two or three, you'll find the truth.

Then, we tell you about the history, not about the man and the religion. (2:20) And this is why I call, we take, there is no magic to take out. There is no mystery to take out of the Keshe Foundation. It's a knowledge. It's not a religion, it's not a sect, it doesn't bring something for you to believe in something and ?? which ?? the magic's do.

So, you want the name there, you find out how come we have the same spider for both religions 2,000 years apart. Knowing they both come from the same region. You speak to the Jews, they tell you about the spider and the ?? . From thousands of years before Muhammad, you talk to the Muslims, this is one of the biggest events in the history of Koran. But, if you know and read the history, Muhammad didn't hide in a cave, he went in the opposite direction cave, as they were expecting him to go to. So, he wasn't hiding, he knew his enemies, were going to go that way to get him. He went the opposite, stayed in a cave, and when the time was over, he came out. So, they knitted the history of Judaism, which again was another fantasy for the Jews, from David time into Muhammad. We don't touch the person, we read the history.

And, it's the same with the Iran's Kings. (2:22) It's a lot of mysticism and so on, but as I said earlier, the word of Shah means God. Again, in the ancient time, when we call it Shah, and Shah means God of the Gods. Because, they believed in a God and the children of the God. So it was Gods and then the father of the Gods. And they put that in the name of the King, and everybody believed him, they are the God of the Gods, and they come from God. That's what the name of Shah means. And you changed it into King, because it fits into another part of the culture, when they changed the word.

Shah and Shalom come from the same Creator. Jerusalem is the same direction of the city to the East, where peace is. Now we understand the history of the religions, or mysticism of the religions of the past, then it's very easy to follow. I do a lot of research into this, to untangle the truth about what is in the background of the religions. Don't look at, don't disrespect the Prophet. Understand what is written about, the historically about the cycle of life. The rest, a lot of it is added to fit. A lot is added to fit. (2:24)

And why all the religions come using the same name base and area, not from somewhere else. Historians don't bring up any name like Ali, Hassan, and the rest, where Mecca is today, from the time of the historian. These names belong to Jordan area, has done for centuries. Never appeared in the back end of the Red Sea, the end of the Saudi Peninsula, the bottom end. And now, it's become. There's a lot of work is going on with a lot of scientists, historians, going through the books. Going through historical books about the religions. And, anybody comes out with the truth is the enemy of Islam. It cannot be enemy when the truth is there.

If you look the original mosque, the first mosque ever built, is not built facing Mecca, today's Mecca. Is built facing the place of birth of Muhammad. Again, there's a historian, he's dug out physically, scientifically, that if you look at the first 100, 150 mosques which was built before 150, 200 years of the ?? Hijri, (2:26) which is the Islamic date, all faced towards the birth of Muhammad in Jordan. When they moved the Mecca to the South, they all built their mosques towards the South. Because, if you are a Muslim you know, the wall, facing wall which you pray, is the wall of Mecca, it's called. It's not that when you go to a mosque you face,

everybody faces one direction. The mosque, the wall of the mosque, it's like a castle, built, the praying wall, it's called the wall of Mecca, to the direction of Mecca. Doesn't matter where you... if you're in the South Pole, you build it towards the North, the wall of the... where people pray towards. And all the walls of the mosques which are built, prior to moving Mecca to the present position, are facing Jordan. 120, 150 of them. Because Muhammad said to pray to that, and they built it to pray to that. Why did it suddenly change to present Mecca, 150 years after the death of Muhammad?

These are the data's we don't have. We have to dig into and scientifically find out why. But, these walls of mosque built centuries ago are there, we cannot deny it. So, and the angle of change is so much, is that you cannot say, "Oh, it's on the way of it." No way it's on the way. Even the mosques we should build in the southern point of Saudi Arabia of today, (2:28) points out to the birth of Muhammad in Jordan. Doesn't point out towards Mecca, no way. Then you understand, even the stone of Mecca is built, if you put the praying wall on it, towards Jordan. The stone which, the wall which everybody prays to, is built, when they built this mosque, originally was built to, as Muhammad said, "Pray to the place where he was born." Which again shows ?? Jordan. But the historians have to become more, the knowledge has to spread more, and then we understand more. Then we take mysticism out and we have respect for the Prophet. The true Prophet, the real messenger.

Any other question?

Q: (The same Iranian KS again) ... Hi again, Mr. Keshe. The things that I wanted to discuss today, is related to that, exactly that number (666). Because when we tried to upload the first video in the ?? apparatus service of Iran, me and Farhad and a lady from France. It was a Persian, she was a Persian lady. I cannot remember her name but it was a video of three of us, (2:30) and we decided to upload it in ?? apparatus, to like introduce what is Keshe Foundation. The first video and the only video I can like show you, I can screenshot, find it and show you like, with the dates. It was your name, Professor Mehran Tavakoli Keshe, and in Persian like. And the thing is, like the interesting thing is, it's a video, the picture of the video, like the picture you see in the... for a start. Is a like a man, an old man, like a Zeus, with the sticker in his hand, with three like, things like a demon tail. And the ray is coming out of the, like that arrow, like three arrow things. and he's riding a white horse in the sky. And the video is starting a person who like opening a Bible and explaining that there is a sign of like 666 or like ?? in like Persian or Sanskrit language. And, one of the sign is like, he introduced to the nations by the King. And, the King of the Belgium, like introduced Mr. Keshe. Like, this is one sign. And, and, and, and. Anyway, like Mr. Keshe, you know, you know what's going on, like in the cultures and society of Iran, (2:32) like and Iraq, or like Afghanistan, or whatever, like if someone, some people, like crazy people, like fanatic people, or radical people, or people like, are very like, ?? false, like, introduced to the religion, if they just hear, like the name of the ?? Dajjal, or Antichrist or 666 or whatever anyone calls it. They can kill it easily and I was like confronted with this thing in Iran, to introduce you. Like what?

R: So, why do you bring it up in our show here now, if it brings all that stuff on? If those images and words bring all that trauma and chaos to people, why do you bring it into this workshop now? What's the purpose? What is it that you need to know about this?

Q: Like, is that with purpose? Like these things is happening with purpose. Because even a video in YouTube and some people like refer to it. They giving a flag like, and is like part of the class of the Mr. Keshe. Is like the video, like if you just type Keshe (into Google Search)

K- ... What we are trying to understand is what Rick is asking you, is why you're bringing this subject up here?

R: Yeah, it's basically dealing with trolls, and Mr. Keshe has two words to deal with. Mr. Keshe has two words to deal with trolls like that, "ignore them." Those are the two words he told me years ago, and it solved so many problems for me. And I give you that advice now, ignore them. (2:34)

Q: I do. I do. That's not the problem.

R: Then it's not a problem them.

K- ... Let me explain to you something very simple. A lot of work we do, brings a lot of changes, which a lot of people don't like. And what, especially now, scientifically developing, what we call, energy transfer, is not even in a dream of the present scientists, to do it the way so simply can be done. So, they have to make something out of you, and we don't care what they make.

As I said to someone very recently, Keshe Foundation was on magazines, newspaper, publications till 2012. Till August of 2012, there wasn't a day, there was not a journal or article about Keshe Foundation, the work we do. And since 2012, we are not allowed to publish anything. Even people who do research on our work, and even to put it as an index, into the research papers, PhD's, they're told their PhD will not pass, unless they take it off. We know hundreds of cases like this.

So, the truth will not change, the fact won't change. And we sit to work in that way. The only thing, the denial, and what they do, it delays the process of doing a lot of things good for humanity. So, let it be. They can write, the trolls, can do whatever they like. We've seen it. (2:36) We have people inside us (ex-wife) who went and how many, 3,000 entries from June of 2020 till September of 2022 has been put out by one person, 3,000. And then they gave up.

So, what did all that do? It brought more people into read what this guy says. So, we don't care. Literally to me, the more they write wrong, people one day listen, come in and find out and... it brings more people to understand than actually what is written.

We heard a case very recently, some of the Knowledge Seekers in the background know, a government literally went out to uproot Keshe Foundation, in different ways. And then they couldn't do it, and the last verdict of them, in pages of report, says everything about wrong, which is on the Internet, reported about Keshe Foundation, but we cannot find any reason for it. That's the conclusion of official research. Because even the governments now realizing, trolls can write whatever they like, can claim whatever they like, we say whatever it is, they change it the way they like. It doesn't effect, because we're not creating a sect, we're not creating a religion, we are teaching the scientific way to be able to use the environment, to the benefit of man and elevation of the man in knowledge. (2:38)

All these Kings, all these Ayatollahs they all will die. They all go, but the knowledge which will stay. History will take the name of them, they become something. But the knowledge your great grandchildren and your, God knows, a thousand generations ?? in line, learn how to use the Gans's, how they changed their pain and the rest of it. It stays as a common knowledge. And that's what the purpose is.

In fact, it's irrelevant what they write and what they do, because we are here to change the knowledge of man for centuries and thousand years to come. We, none of us have. I always, I said into one of the lectures, we

talk about the Darius and Kourosh, how great men were and how peaceful was. How come the children of that king or kingdom, 2,000 years later, have become the scourge of humanity, because the Americans and Israelis decided (it) to be? So, but the love and the culture of the Iranian poetry, and the carpets and the rest of it, stays, which is the culture of the nation. Doesn't matter who said what. Our work is to bring the change in the knowledge, not in whatever they write.

It is all in the danger, this is all. What we said, for example, with Corona, and how research we did in Iran and the rest. And now we see what is coming up in the West. (2:40) Read the British papers in the first months of this year. There is a huge increase in death. And the only concern is, not that there's a huge in death, the insurance companies cannot pay the insurance covers, and they're under pressure. If you have 20,000, 28,000 extra deaths in one country, and each one has got a 100,000 insurance coverage, which is very normal coverage nowadays, then you have to understand where the insurance companies are going to find so many billions to pay. And what happened with Corona? The financial terms are dictating. You put 28,000, multiply it by 100,000 each, you have to find 2.8 billion. Who's going to pay for it?

And then you understand when we said, that can be handled in different way as an energy, with a crisis and what's to come, will not be there. But this is the cycle of life, we have to learn. Knowledge Seekers who use the Gans's are still here. And it comes in the future, how to do with energies and transfer of energies, or viruses and the rest.

Any other questions?

Q: Mr. Keshe sorry, I want to ask, like there are a lot things, like, because I'm doing the videos for, like, teaching Nano coating, and it needs, like, someone's opinion, like, (2:42) who do you suggest in Iran or whatever? I know Yusef, I know Meysam, I know like, some people...

K- Each one, each one does their own way.

Q: Yeah, so it doesn't matter whatever, like I learn, like I can produce videos and doesn't matter, like you...

K- You have to transfer the knowledge the correct way. Consult with two or three people in Iran who do it, and how they do it, and make an opinion of it, and do it. It's not going to be wrong, it's not going to be right, but somewhere down the line people learn and do, and they will go with it. It's like people who doing in .. Brazil. They still teach how to make, but not always.

You Knowledge Seekers have not... If you put the total knowledge of Gans making at a hundred, what all of you do is not doesn't even reach one percent of what you can do with Gans's, how to produce Gans's. So, there's a lot of other ways to do and a lot of others, to add to Gans production. And maybe, even if you make a mistake, enlightened somebody to develop a new way to do it. As long as you produce material which can be, behaves like an energy packs, you call it Gans's, so it cannot be wrong.

Q: Something happened during the, like, Nano coating process, and I said. I tried to make a Calcium Gans too, (2:44) in the same container that I was doing Copper's for Nano coating. And I made a, like a simple coil with nine gauge, sorry, nine rounds (coils) of like... I heard some... One time you said like nine round is good and like is ideal around for coils, like a percentage, something from nine. Like nine, 18 or after. Is that correct?

K- It depends how you use it and what purpose.

Q: For MaGravs.

K- For MaGravs we... What do we use Rick for MaGravs? Is it 40? 40 something and 80's, I've forgotten what number of coils, numbers we use.

K- We have passed the MaGrav and Gans production long time ago. But these are all in a lot of teaching on the Keshe Foundation website. Go, if you need to do anything educational, go to the education part of the Keshe Foundation, they're all sitting in there somewhere. There is a lot of jobs done by the Philippine team and the Americans, especially John did a lot of work with the MaGravs. Go in there and you find out. The Iran team has made a huge successful MaGrav systems. ..

Q: ... Yeah, yeah. I saw it in the market, like in the online shop, and everyone is happy, (2:46) like there is a rating, everyone can put his, like, star for rating, like everything.

K- The Iranian MaGravs, you can now purchase the Iranians goods through another channel, through Amman (Jordan), that you can purchase goods. And this is all the same technology out of Amman.

R: Mehranez mentions in the chat, it was 81 coil and 144.

K- Yeah, something like that.

Q: Mr. Keshe, I just have one question and I... like I'm not going to talk more in this session. Just one question. Can I please ask in Persian, because I want to know the exact right thing.

K- Yeah

<< KS and Mr. Keshe speak in Farsi >> (2:48)

K- I just translate, he's asked the same question, the same explanation as before, there is nothing new that we can... and he wanted to ask about his thrombosis, which I said, "We do not pass any information on the health of this teaching."

Any other question?

Q: ... I attended on the Thursday session with headsets, and what I can tell is that my dreams are changed. As I feel I interact consciously on each one of my dreams. Thank you.

Q: ... If we're on this straight (yellow flat) line that you showed us from the Friday session, as in outside the body, we could heal through the Soul. Thank you very much.

R: I guess that's more of a statement than a question. So, we seem to have a couple of people that have successful results, let's say from the session. (2:50)

Q: ... Mr. Keshe said earlier, you have to go inside to find what you are denying your Soul with. For those saying they didn't feel anything in the session, what are we looking for? Our bad behaviors? How the love in our life can get .. interpreted?

K- The thing is, don't look at time in the sessions. Look at what changes in your life from that time. It's not how you feel in that 1, 2, 3, 4 hours or in the session. It's what changes in your life from there on that you can notice and then realize that is connected to the change, to the session. As one of the Knowledge Seekers was saying, it's so clear how I changed after the session, that I don't need to feel what I felt in the session. What changes brought to my life is important to me. Because we call it subconscious, we call it whatever, but that is the part that we bring in to our lives after each encounter, doesn't matter in this session, or you go to a temple, or whatever. And this is, the beauty of it is the subtleness of it. (2:52)

Years ago, when we used to do a lot of Wellness research with a lot of people, and they used to bring the... they come and say, "I apologize, I forgot to drink. I don't know what it is, but this past weeks I haven't drank enough, or don't use my breathing system anymore." And I said, "That's fantastic, can you bring them back?" "But, has anything changed?" "Oh yes, this, this, this." I said, "It's like when you're hungry, you don't need it, when your system is complete, when you don't need it, you have brought the change, the body doesn't need it, why do you want to use it?" And this is a process. What does these sessions bring you afterwards? Not what you feel in that session. Did you go anywhere? But, next week, next day, next month, has your feeling towards your partner changed? Has your feeling towards other people changed? Has your trust about yourself has changed? Do you... have you suddenly started changing the way you clothes, the way you talk, the way you feel, what is your out, or outlook for your future has changed? These are... when these things come in, it's not just, "Oh, I felt I went, I traveled, I went to there."

And this is what I keep on saying, "We listen to your stories." And when you tell us the story, it means you've taken the journey. We look at what happens after the journey. I moved into a new city. What happened after that? Did you get a job? Did you do... what happened? I traveled somewhere and I saw this... It's still the same memories. I cooked from the city I went to and the rest of it and blah, blah. We are not interested in the trip. (2:54) The interesting is what happen to you, how you change your life through your Soul afterwards. If you can record that, then something has changed in the session.

Doesn't matter if you felt something, you did feel, tinkling in my fingers, I went to see the grandpa, I always say, we listen, because you did the journey, we listen to your journey. But how did you feel when you met the grandpa? What did he tell you? As many people say, they settle and they sort out the problems they had with their mother, who died, and start a new cycle of life. That's what that session, when you saw the grandma, does. And then, you know you can access that. Next time you want to sort out a problem you had with a son which is alive in another city, you go through his Soul. ?? He picks the phone up, dad. Oh, I knew you were going to call me, because I listened to, send you my love. This is what, this is about not how you felt and... "It tingled your toes and my head went somewhere else and I tripped somewhere else." This is all good, but what changes bring to your life?

Many of you, many Knowledge Seekers, what we read, they sent us, has brought a fundamental change. They are in charge of, they are in control of, they are, they enjoy the change. And that's what the life is about. To understand another dimension in your life.

Any other questions?

Q: ... (2:56) Is it a good idea to try in the session, he calls it, sympathetic compassion and a willingness to spread it out like a stone hitting water. The, not so much the visualizing, but the extreme compassion and giving a loving spirit that somehow gets returned and multiplied. Is this something to be putting out during the session or does that really matter from your point of view?

K- It depends. We are not running a session, "Oh, we're all going to cry now, you're going to be happy next hour." No! It's you, you dictate, it's your Soul. Nothing to do with us, we just create the environment. It's like, you know, you go to a pool, to a swimming pool. We provide the pool with a nice clean water, which is cleanliness of the Universe and Creation. And you lot are the ones who are around the edge of the pool. Some of you jump in, some swim, some splash, some kick, some do frog ?? fire, what you call it, swimming, some do back roll, and the rest of it. We don't dictate to you, you just decide, "I do the front crawl, I do that back crawl. We just provided a clean pool. The Universe. And it's you who decides how. And it's you who decides how they enjoy it. And, it's you who decides how much you are frightened of it, to put a foot in it. (2:58)

I used to have a personal secretary for years, and she could not get her to put a foot in a, even baby swimming pool, it used to bring her into a shock. Just about 10 centimeter of water. She could never, if there was too much water even in the bath, she used to feel suffocated. She used to say, "I've never been ever in a pool in my life."

<< audio cut >>

K- ... The beauty of what we teach is the beauty of knowledge. And you, from the knowledge you gain, you decide how to swim in this pool. And that's all. We teach. (3:00) It's you who has to decide what part of the teaching suits you. And what part of the teaching benefits you, and to what extent.

Any other question?

Q: ... Hello Mr. Keshe, you tell us that for the conference in London, a large media company was contracted to take care of the promotion of the event, but nothing was heard in the media, at least I didn't hear. Only through our discussions with representatives of the governments, I believe that that is not possible to promote the Plasma Technology. We must advertise what has already been physically achieved, only with what could be achieved, we are not successful. Thank you.

K- It was published, it's in some 500 different, what you call it, publications. We received the list of publications. And the back end of the promotion, which we paid tens of thousands for, was blocked by the American government, into going public. And we just took it as it was. But they have published in articles, what you call it, press releases in over 500 journals and press recordings.

And we still working on the back of what we succeeded in London. Still, the work with the, what you call, and the officials and more officials are getting involved, still carrying on. (3:02) We don't go public with these things, because we know what we call as, Rick called them 'trolls', how they go and what they do. So, it's... the work is still going on, we're still successfully at it. In the... It's something we accepted in long term with... sits with the Keshe Foundation till short term and we sort it. But it was publicized, we've seen the articles, and some of you have seen articles in some other papers, and magazines, or what I call it, the Internet journals. That job hasn't stopped yet, because now we are working towards the conference in China.

Any other question?

R: Maybe one day the Google algorithms will accept the Keshe Foundation and actually spread the links and so on more efficiently.

K- We cannot do, this cannot be done, you have to understand. the biggest financial structure has set against the Keshe Foundation. And we cannot fight, or battle with people like Fox, we carry on with our work. It is working in the way it does, and something we accepted. Fox will be foxed one day, but the knowledge will stay.

Q: ... In the recent teaching just before the London meeting, (3:04) Mr. Keshe has announced the Sanya meeting, and that the Tehran meeting in the next year would be held. My question is, is there any updates on the Sanya meeting? Thank you.

K- We're still... I have to go back to China in the new year, and solve that final phase, yes. We don't announce anymore how we travel, how we do things, because we curtail it for the things we've seen in the past. But our work is to carry this on << audio cut >>. Once I return to China, we will announce the position with Sanya and the rest. The year. There are a lot of things for Keshe Foundation to sort out, before we arrive in Tehran. We have to reach a point of transmutation ourselves, that we will deliver it in Tehran, and fully as a major, the same as what we're trying to do in, what you call it, in China.

Any other question?

K- Let me explain, let me explain. ... Keshe Foundation owns a company in Hunan, in Sanya. We registered it years and years ago. So we operate, when we operate we establish that side of the company. Still I think it's there, but, it'll be sorted when we go back and we operate through the company we own, and ...

Any other question? (3:06)

Q: ... The inside of my head started vibrating when you asked my question Rick. I appreciate this answer and I know right, what he means with it for my own life. Thank you... I definitely believe each session that I've gone through, the week or two after, I always have things, I have problems with my life, mostly in relationships, I've come to understand what happened, and get a lot of peace on the subjects. I always go into it hoping I have something undeniable and definite happened to me in the session though, which is too physical.

R: So he expects something physical in the session, but he says, there's things that get resolved after the sessions.

K- Shall we call it the day?

Q: ... Can you explain more about the 9 year old bride, and why that was okay?

K- What 9 year old bride?

R: Hmm, I think, I think you mentioned something about that in previous workshop.

K- Are you talking about the Mohammed, marrying a 9 year old?

R: Yeah, and it's part of the tradition, apparently it's...

K- ... You have to understand the culture, environment, and the things they used to be (done). (3:08) This is why part of the Islam and the Koran, which we know, doesn't fit into the history of the time and the place. One of them is this, marriage. And how girls mature and how the mentality of the area has been that a child becomes a woman after the first menstruation, she's not looked at anymore as a child. We have made that 18 year old legal line in England. They... there is the ?? position around 16. And in some European countries, still stays at 18. There is no threshold, as we say in England, you know, the night before your 18th, you don't understand, the next morning you are given the key of the house. This was a tradition, it used to be, you're mature.

In the history of the man, a child was mature when she went through the first menstruation. And it's like the world of animals. It was mature to reproduce. This is the way they looked at it at the time. This age of... that's a reality of fact, it's a physical dimension to it. And they stuck to that.

But you go back the same time in that part of the world. The mentality was that women ruled, (3:10) and they dominated everything. And, it was common in that time, 2,000 years ago, in the northern part of, or what we call, the part of the Babylon, and the ?? Baro below that, in the Arab section of it, that one woman had 9 or 10 husbands, because there were not enough women. It was very common.

Muhammad allowed a man sharing one woman with 9 men, to one man having 4 women. And this brought a change. And then there was a shortage of girls to have for. So they went back to the point of, what we call, physical maturity. Many of the brides of Muhammad were slaves given to him. He didn't go out looking for women. They were sent, because he was the Prophet and respected, and what Muslims did, taking over so many countries with the sword, they had districts where they had to pay taxes to. Muhammad, Islam, Muslims collected taxes from villages, and exactly what the Romans did.

The two grandchildren of Muhammad, Hassan and Hussain, for them to stay quiet and don't interfere with running of the Islamic world, (3:12) they were given what we call, the Grand Chief, the head of the Islamic structure, equal to 400, that time, kilos of gold per year, to run their house affair. Sorry, 4 ton of gold. What they collected in their wars from the other tribes, and what they collected as tax. These two boys were given like, something like a million dollar, at that time, just for them to keep their entourage. Just because they were grandchildren of the Prophet. It's in historical books. They were allocated, millions in that time.

The villagers collected young girls, the most beautiful young girls, and they sent them to these leaders, Muhammad, his uncles, and the rest who were ruling, and they had the choice of freedom. And they gave these gifts as slaves, as gifts to the other slaves, or people who achieved something in wars. The reward was a woman, plus gold and properties. It's exactly what our leaders do today. And so when they got these women, (3:14) they're all children, young girls, because they were beautiful and they knew they pleased these old men.

The fourth wife of Muhammad was a slave, which he gave to his third wife. But she was so beautiful that he took the slave as a wife. But he was a... same slave, he was adopted son of him. If you read the Islamic history. They just came, every day taxes were sent, children were sent as gift to the ?? and the rest of it. Where Ali became the biggest problem for the Sunnis was because he took a woman which was slave sent

for one of the leaders who won a war. And it was supposed to be his woman, or his slave. She was so beautiful. Ali took for a night. And he broke the rule. And this created huge mayhem with Muhammad. Ali being his son-in-law, being his cousin, and they take what they like.

And this created one of the biggest division in Islam, between Sunnis and Shias. One woman, one young slave, because she was so beautiful. Read the history of the Islam. And, we have all these problems, because of women, or what was collected from the war and given. And most of the time they gave young girls, very young girls, just turned to puberty as gift to these, (3:16) not just Muhammad, Abu Bakr, ?? Osman, they all had it. And they conquered all the time, so forever, every day, young girls were just coming into their possession. So, it was normal to have young bride.

You have to look at the history of the time, culture of the time. Not what 2,000 years later we are looking. It was the same with the Christians. In the same area where the, what you call, they were given gifts. This fourth wife of Muhammad, which was a slave, came from a Christian village. Christians were giving, the mayor sent him as a, you know, thank for his brought up, and given to him. What religion they came from, didn't matter, they were gifts. So they become Muslim.

During the time of, what you call it, Judaism. In Jewish religion an uncle is allowed to marry the daughter of his sister. It's not forbidden. So, the uncle sees the child being born, and likes the child from childhood, because of the uncle-child relationship, and they fell in love with, and they had the girl when she was nine, and they married them. So you don't look at just one, some Jews are the same. In Islam it's forbidden for an uncle to marry, but the cousins can get married, (3:18) that's why Muhammad gave his cousin to his daughter, his favorite daughter, which is Fatima.

It is the same with Christianity. During the Christian's time, you just blame Muslims. You have to understand it was the culture of the time. It's like a sheep comes to maturity after one year, and ram, have a ?? go will have a child. Confirm the existence. It was the same. Women had no value. They were just a commodity of a war to capture, for the pleasure, and the rest of it.

So, the children were given as gifts. Nobody told of what we call nowadays, pedophilia and the rest of it. But, the ethic was that you don't touch a girl before matures. So, is the problem with Mohammed, with the Jews, with the Christians? It's all in the same area. They're all brought up with the same way of thinking. To them it was normal. All the cousins and uncles of followers, of people who followed Muhammad, all come from the area of Jordan. They carry the names. It's like me, Tavakoli, you know I'm from Iran, or I'm from that side. You're a Smith, you're from England, you don't get a Smith in Tehran. It's the same thing. (3:20)

Abu Bakr, Osman and Ali and, Ali was actually Allah, which is another Goddess. Another God in that time ago, and then became Ali. And it's a common word, it comes from 2,000 years ago, and he was one of the gods. By the change of words, with playing with the back and forth, they change the same meaning, but in difference ??.

So when we talk about Mohammed marrying a 9 year old, you'll see that frequently they waited till it was a nice niece, till she's nine and she was married, it was yours. Or, a boy became mature, bar mitzvah at the age of 13. The girl became mature at the time of puberty. Because, there was no sign of a boy to become a man. And then they said, "At 13 he becomes a man." So, he could be still a baby, still being in the pampers and ??, but he was 13, so he's a man. But the girl had a sign, a physical sign of menstruation. Many, many uncles,

they were married till the daughter of the, what you call it, sister, matures to puberty, that they can marry. Don't blame Islam, understand the culture.

R: So, the question comes up, is it okay today in our modern world, supposedly modern world, some cultures or religions might still keep those teachings and...

K- We have changed the "goalpost," but we haven't changed the maturity, physicality of the girls. (3:22) There's a big problem, which lies underneath the boys or the girls, man or a woman. Pedophilia is wrong. But where we draw the line of the maturity, mental maturity. I know boys of 25, they are worse than 11 years old. And they're running companies. Why didn't they mature at 18? You go into a lot of Jewish companies, boys after 13, 14 come into business, and they are, they have a beautiful brain of making a lot of money, but mentally you put them with a girl, they are less than 10 years old. Is that right to get them married?

There should be an understanding of the physical ???. What do we do in Space? This is what I question, I put somebody. How do we know when we fall with another entity in the Space, is it mature? What age could be a thousand years before they are mature? They can reproduce.

Pedophilia is wrong, doesn't matter how you shape it. And our society, today's society, understanding the probability of recognizing left and right, is 18. And we have to stick to it. And it's correct, because then they can make a decision. But we see in the Islamic countries, now they're bending the law, the girls are getting married at the age of 13, (3:24) but not getting registered, but actually live with their husband. We see, English government legally allows girls at the age of 16, to be with the men over 18. Which most probably they met in the college, or in the pub, or whatever. There are government's bending the rules. And it's how in some countries 21 now is pushed to be the point of maturity, which is more actually feasible. It's a more correct time to be 21 than 18.

So, we have to understand how collectively we understand. And we accept society that the child is safe. In Africa, they're married on the puberty. In South America and some jungles, it's still the same. Nobody carries their birth certificate. We have made rules, and in so many ways, the correct way. But, to bring the whole lot into line, is another ball game played. But, going back to the time of ??? Hans, you have to understand, they were all at it. The Christians, the Jews, the Muslims and the rest of it.

R: What did their gods think about all this?

K- Go and ask their gods.

R: .. We're right but the others are wrong ..

K- ... (3:26) Let me explain to you something, very clear... You have to understand something. You have to understand, when we talk about Muhammad marrying this 9 year old girl. Read historically what happened. Historically, he liked the girl. It was just about the time when his wife died, Khadija. It was in that time. Historically, we... Khadija didn't let Muhammad to marry again. He was... she didn't want him to, she opposed it, but he did also some things, that's a different thing. This girl was 6 when he fell in love with her, or whatever, as a child. And, when it came for him to marry her, the mother took her, the girl, amongst the women of the Muhammad. What they do with royal families of today, to check the girl is a virgin and the rest of it, medically. She was examined and whatever, that yes, she's a virgin, she's a girl, she can be a woman,

she's gone through her menstruation. And then the mother took the girl to Muhammad. It was done according to the books (customs). It wasn't that he went and grabbed a 9 year old girl. No.

Read. I always say, go through the history. Don't take what it is. The girl, when she was 9 years old, when she reached her puberty, 9, 10, (3:28) she was examined by the elder women that she is mature. She's gone through her menstruation, she is... she can be wedded to a man. And the mother took the girl, because she was engaged to the, Muhammad, to him as his wife. It wasn't just "jumping on" a 9 year old girl. She actually took him, sat her next to Muhammad, and said to Muhammad and to the child, "He is your new family, and you are his new family." "He is your new family, and you are his new family." It wasn't done, "Oh, something behind the curtain." It was when Muhammad married this girl, was done according to the books of the time. What the culture accepted that time.

Many Jewish women took their own daughter to their brothers, and they said, "Now you can marry her, she's a woman." Even she was 9 years old. That's why we have so many diseases in Jewish families, at the moment. In Jewish blood there are unknown diseases, inter-family marrying again, cousin, uncle to the child and uncle to the child. And we have the same in the Islamic world, cousins marrying cousins again, their children marry their cousins. So, when you talk about these things, understand the history.

Understand, this is why I said, when you go through history, what happened physically is different than what you want to bring mysticism into it. (3:30) Today's society, we accept 18 is 18. ?? the girl has to be 18. And I believe 21 still should be the legal size than the 18, because most of our children in 18 are still children, worse than 9 year olds. And we have to go according to what it is, but we have this difference now in the Islamic world, they're coming with a 9 year old, and it's wrong to our Western society, and it's not acceptable.

Now, you go to Afghanistan today, the Mullahs are telling the people, "If you have a 12 year old, 13 year old daughter, bring it and give it us to marry them." Then you do a good thing. That's what's going on today in Afghanistan. And people are hiding their children.

What it is, years and years ago I used to be involved with United Nation and this human trafficking and child trafficking. And it was always a headache when we looked at India, when we looked at Africa, we couldn't make a head or tail of it most of the time. In India and Kashmir, they give birth to a child to be sold at age of puberty. And they go every year, people go around the village, collecting the children of girls who reach that point. And they ship them all the way from Punjab, into prostitution houses of Delhi. (3:32) And some of them which are more valued in face and look and touch, ship to Saudi Arabia. We have the same problem with African children, taken from their villages, they don't even know which village they come from, walked, most of them die, into going into Arab Nations. It's not so black and white when it comes. We have the same thing through now, what used to be Eastern Bloc. Young girls, very young girls, are shipped out into the "red districts" of Europe and the governments close their eyes. Czech Republic, and Moldavia, Romania, all these are still bedrock of young girls traffic into Europe. Don't think Europeans are so civilized. It has to be stopped, but how we stop it is, what I say, it's elevation of the STM.

Any other question?

R: We have a last question with Mehranez.

K- I think she is going to teach us something, let's see>

Q: Mehraez... (3:34) Well, as far as I know about, I found about the Prophet Muhammad. He used to, like a lot of people at the time, marry the girls from other families, to have peace between the two. Because when you marry, even somehow in Iran, in tribes, you're part of them. You can do business and nobody attacks you. So, I think in the case of ?? Aisha, which was very young, they married, but the Prophet didn't touch her until she was 18. So, and the proof is they had no children. The only children we know from Prophet is from his first wife, he was 25, she was 14, so it means there is no sexual attraction. He married and he was loyal to her until the end of her life, which was old age. He had a daughter, Fatima, who all the dynasty came from, and two boys which died earlier. So he could make child, but he didn't make child with this girl. And it was just the daughter of his close friend. And to have peace and security, they used to marry.

And also in the climate of Saudi now, before Arabic, the girls and boys get mature much younger than the other climate, which are more humid and cold. And so it means that Prophet didn't marry for pleasure or sexuality or ?? (3:36) It's just the habit of the time to marry with other tribes. And he had so much respect for the women at the time when they put the baby girl under the, in the tomb, they killed the baby child, which is a girl. At that time, Prophet kissed the hand of her daughter each time she went to see him. And he had a lot of respect for his daughter. He used to raise (stand up) when she arrived. And that put the symbol of respect of the woman, and which is what we have to learn from it. These marriages were not like having 90 children and 100 grandchildren, like at the time, which we see the ?? Arabs . ?? are wife and children situation. And thank you very much, that's all. I may be wrong, that's what I want. Thank you.

K- Thank you.

K- Yes, but they say, Muhammad kept all his 18, 16 wives in one place, in one house. That he, they always had that, what you call it, respect, that even which night he's with who, and it was kept and respected. And you got to understand, those of you who you've been brought up to look at Islam in different way.

If you have a thousand women in Jewish family, around the pray table does not count. A newborn boy counts. (3:38) In Christianity, the value of a woman was respect, but nothing else. In that time, Muhammad gave the value to women, that even in the, what you call, in the inheritance, they take one to two, compared to the boys. So, he raised the level of the respect or equality of women. That's in Koran, you can't change it.

In Torah, if you are a Jewish (?? woman) , you don't exist. You're just another production system. In Christianity, the way we have it, what you call, Christ is just a respect for the woman as it is. And Muhammad for the first time put a value into the Islamic world, into Arab world for women. But if you cross the mountain where the Arabs were on this side, which was Iraq and the rest of it, and the other side of mountains, where the Persians, women were the rulers of the family. There's one mountain which goes right across the western side of Iran, where the Arabs were on this side of the mountain, and the Persians on the other side. It was totally different story when it came to women.

Woman ruled with an "iron fist" in the Persian culture. Their word, the last word in the house, even today, in the Iranian houses, is the woman. We respect our mother beyond. And when you say something to your daughter, he says, "Go and talk to your mom. Whatever she says." Thank you very much for today.

R: Did the women take 9 year old boys as husbands, when they dominated?

K- I don't know, I don't know. (3:40)

R: They have a different, a whole different philosophy that they...

K- In the Persian house, even today, when my sister enters, she, even as an older son of the family, we have a whole, rights to everything, you know, traditionally, but her word is the last word. Even in my marriage, it's the same. The mother, in Iranian culture, true Iranian culture, is the last word in the house. But she turns the words of the dad to become the last word. But my mom, we could never turn around to her, no way. You never said a wrong word to your mother, you never turned a face to whatever she didn't want. You did your job, you did what you wanted to do, but the respect for women in the Persian culture is deep. In a way, we worship our women. Doesn't matter if it comes in the shape of the mother, wife, or daughter. When you see Iranian men with the daughters, then you understand. We show the love of our life to our daughters, to our wives. It's a different culture. Thank you very much for today.

Q: ... In the Koran it's written "black on white," that as far as man and women, they are exactly the same, whichever does the best good, and etc. goes to the Paradise and gets a ?? from ?? her. So, there's no difference between men and women, spiritually. So, go ahead. (3:42)

K- Thank you very much. Thank you indeed.

Yeah, but if you go further in the writing of Bahá'u'lláh, bless his name, he says, "If you have enough money to educate two children you have, a boy and a girl, you educate the mother, the daughter, that she becomes a mother of the future and brings up the next generation. And the education has to be correct." It depends in which religion we look at, and how we see things. But overall, it comes out of the respect for humanity, and what we respect.

Thank you very much for today. Thank you indeed. We'll see you next week. And, all those of you who believe in the path of Christ, have a Happy New Year and enjoy it, on Monday.

(:16)

K- Yeah. Good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. As usual, we welcome you back and we hope to be able to share some more knowledge. We started a new year, we're on the fourth or fifth days of it, and we're still busy trying to understand what happened to us in past few weeks, and what's going to happen to us in the future.

As we said, and we hear in the Intro, we have to understand the fields of emotion. We have to understand the fields, and the strength of the fields, which create this emotion. And at the same time, once we understand this, we have to understand how other fields are created and what strength. In the body of the man today, we eat an apple, we create that weak strength field of the Gans, of the energies that our body needs, and through the principle of the interaction of the fields in the plasma condition, (:18) the other 80% come into it. It gets attracted to, and it gets fed.

In the coming time, we have to learn how to create that field of the apple, without eating the apple. How we create that, in the dimension of the emotion, of the physicality (P) of the man in the dimension of Soul of Physicality (STP). Where the physicality is not needed anymore, to consume that apple. This itself is an art, this itself becomes an art for man to learn.

In a way, if you look at it, if you understand the principle of the interaction, you can use the Soul to interact with the STP, that their interaction creates the energy field of the apple. That, in that process, you do not need to eat the apple. This is a secret of feeding both the Soul and the STP. Up to now, you used the STP and physicality, to have an emotion of wanting an apple. Because, when you desire to have an apple, your body has said what vitamins, what minerals, what energy of these are needed by the body, for it to survive. So, it converts it to an apple, it converts it to a beef, it converts it to another thing, it converts it to a thirst. (:20)

Now you have to learn how to create the same seed of the energy in the interaction of the Soul of the Man (STM) and the STP. Without circulation of the blood, without consuming any other object, any other entity. This process is not far from many of you, who have entered the sections of the Keshe Foundations, and the terms and cycles which we are going through. You are gradually learning. We have to go through this mayhem of excitements, and pursuance of finding, feeling, and not having the feeling, and relying on a trust, on a belief, on an understanding that I have created it and I've received it, and I receive what I want.

In this process, you gradually learn to replace the interaction between the STP and the physicality for the emotion, for a hunger, for love, between these two and the other two, which is the STM and the STP. In reality, you change the physical body of the man fields which is weaker, with the stronger, which is the STM. But, in reality, it has the same common denominator. Within the STM and within the STP of the man, Still,

there is that essence, that common denominator, which connects them together, because that's how they (were) created out of each other.

In a way, if you understand it, when you put a Gans, you put a drop of another Gans, which you're using another patch, to be connected to each other. (:22) It's the same process, but this time, instead of a drop of Gans, It's a drop of the line of the connection of the Soul of the Creator (STC), which brings that connection. Now you understand, how simple man can walk away from killing. How man can walk away from destroying another physical life, for it's physical life to survive, to live, to exist, and to carry on with its existence, not only on this planet, but beyond. This is a cornerstone of man becoming man of the Space.

But first you have to learn the emotion. First you have to understand how this emotion is carried. And first you have to understand what feeling this emotion gives you, that you use that feeling to be able to transmute, to be able to receive the energy you need. We started this process last Friday, when all of you joined in what we call, the "love of Mitra," on the 22nd of December. This is the first part of that phase. Need to love, need to give love, and understanding what fields you received from the environment, that you've been able, and you've been able to give out, as love.

The whole process of the teaching, the whole process of the structure of the 22nd of December, trial, test with 100 of you, and is going to be repeated next Friday, is this and only this, how to receive, in what measure to receive, (:24) and in what measure to give. You receive through your Soul, and you give to your STP, that it does not need to kill, in the dimension of physicality.

In a way, you are all hungry for love. In a way, you're hungry to give without receiving. But you have to understand the same processes between the Creator and the created. And this is where the whole secret of existence, the whole secret of life in the Universe is based on.

So, what we started on the 22nd, is the first stage in for you to see what fields you need. You needed the field of love, to feel love, to be able to give. And what emotion did it create for you in that process? That's the emotion of love for you. Next time in the future cycles, we teach you how to receive the apple, fields of the apple. And then in interaction with what you give to the STP, the physicality receives the apple. You taste it, you feel it, you get the energy of it from your physicality. This is how the training has to go. This is how we educate you step by step, without you knowing, but with what you desire.

You all wanted to love and give the love of Mitra. And you went through the process. Now again we put you through the same process. (:26) See if next Friday you feel the same. The same process. Did you feel the same as last week as this week? Last time and this time. And then you'll be able to understand how to receive by the wish, and how to give by the wish. But this time, as the process is between the STM and the Universe (U), and what you gave had no destination, you just wanted to give love, you give that love to what is part of you, which is your STP, which then it becomes the STM, the feeder of the physicality of the man, which we've been trying to teach you past years. How to feed yourself, how to feed the STP, that the STP feeds the physicality of the man without killing.

Now you received the biggest gift of your New Year, if you understood what has been said. We brought you in with the love of Mitra, and your Soul desire to feel that love and to give that love. Now you understand, that's the first step. If you managed to receive the love of Mitra, and you managed to give from that love to... out, without you targeting it, you wanted to give, now give it to the STP. Then you understand the process of

the feed through Universal Cosmos Rays. How the Cosmic Rays comes to become part of you, and how it has been part of you from the beginning of the time of your life.

The whole process of the teaching is to teach you, to make you, does not matter if you are a man or the beast, (:28) how to receive energies of the Universe, that you do not kill anymore, you do not destroy anymore, and once this is done, then you become the true man of the Universe. You become part of Universal Community, in the true sense of it, the essence of existing in peace. That you are not threat to me and I'm no threat to you. Then you can decide in which dimension you manifest yourself, as a man, as a beast, as a dog, as an alien, or as the STC, when you reach that state of understanding the Totality of the Creation.

Now you understand how the teaching is set, how step by step we take you from one position to another, train you for past year and a half, and this year you learn to live without killing. You learn to create a condition and dimension (D) of peace, and those of you who became Satellites, you will understand your position and the importance of what you accepted. In a way, you signed for it, but on the other hand, your Soul was created for it. To accept this responsibility, to accept this condition and position.

In coming time, the number of the Satellites will increase, what we call, in a way, today, as those who devote their life to serve the others. And then, will become through the same process, uses of the fields of the Universe, and not the lives of the Universe, to exist. And when you reach that point, (:30) when you reach that point of maturity, you teach. You share the knowledge, you share the process, you share the emotion.

It's very much that if a child is in the womb of the mother, from that point of conception, that point of creation of the first fields .. of the STM, the mother within the womb of itself, teaches the child how to receive energies from the Universe, even without tapping to the fields of the energies of the man. Giving birth in the future will be very different than the present time, but man will understand. When you travel the span of the Universe, how do you teach the fetus that there is no air, there is no water, there is no condition of killing for you taking from me, what you take from the Universe. And how would we give birth to our children of the man in Space, when there is no delivery rooms?

Now you understand, how the process of the Creation, how the process of understanding to gain the field of the Universe, will affect the future of the man in Space, in the Universe. That womb was in the dimension of physicality of the mother. What happen when you fall in love with the Soul of another entity in the Universe, and the, what we call, the fruit of that love, is creation of a new Soul. As you all have the common denominator of the STC, (:32) so the inception through the Soul of the Creation, will be as common as today is amongst the physical man. Then you understand how to give love and how to receive love. And then you understand how you give that love to your child.

These are not fairy tales. In the coming time, as the process of the creation of the daughter of Mitra has started, will be as common as the today's birth on this planet. As we come into Space, as we become the people of the Universe, we find out that's the only way. You learned how to receive love, you learned how to give love. But, we kept one secret from you on the 22nd. And that secret will be unraveled or shown on the 12th. And we would like to see what changes, what difference in emotion you feel, in receiving the love, and in giving the love. We kept the secret, till we understand how you feel after the 12th. Then you understand the existence of the Soul, then you understand the process of the physicality, then you understand the process of STP. You need to, you have to understand this processes. How important the STM is, within the embedded structure of the physical life of the man, that how you will learn to survive in Space. (:34) We showed you what I call, your straight lines, the "flat lines" of the Soul, the STP and the physicality. And how

this can be achieved, how you find harmony and balance, and in that process you decide what you need, in what dimension. And, do you need to create the dimension of physicality?

In the coming time, we show you how to reverse, from what we call, transmutation to physicality. When you transmute, you are the energy. When you want to go back to physicality, how do you manifest yourself? How do you bring the STP out, that the interaction of the STP with its environment, manifests the physicality of the man in the time, place and position, where you do not need anymore the "monkey suit."

Now you understand how the 2024 will bring the establishment and the first stages of man to become part of the Universal Community. As I said to a friend of mine, "Just look at the digits, and understand the culture of 8 in the Chinese culture." It's a lucky number. And you fulfill the whole of the past promises in 2024. (:36) You all are part of it. Not one, not an individual. In that process of understanding, you come to understand the Totality. And in that process, you become part of the Totality. And then we'll see how many of you will become "Passengers of the Universe." Become those that even during the teaching can travel the span of Universe, and bring us the beauties of it.

In the coming time, in the process of the teaching, and what we do outside the teachings, in what I call, practical workshops. The way we did in Linz, you went in the system and you came out and you told us where you've been. You'll come during the teaching and the process, tell us where have you been and what is the message and what you have seen and how many of you would like to go and see the place. The extent of the teaching is, one at a time, then as a group of you. As I said, we split you in different groups, we split you in different sections, and then you work, you travel together. You learn how to, and those of you who are there, become the future teachers for the other Souls. You teach how to work with the Soul than the dimension of physicality. And the teaching you do, will not be with this and that, but with transfer of the energy fields of the emotion of the Soul of you, with their Soul.

In the Universe, there are no languages, no Universities, and no mechanical systems to do things. You have to learn to live, to exist, to interact, through the fields of the Universe and your Soul. (:38) This is how we came to teach, this is how we came to bring the change. This is how the change will come amongst all of you from all the nations. When we look at the panels of the... those who participate, you are from 30, 40 different nationalities and races, and all learn at the same time. But, go back and see how you were created out of other races, during the time of the life on this planet. Then you understand you are all connected while you're on the system. Does not matter if you're English, Chinese, German, black, white, speak different languages, when it comes to the panel of sharing, you're all equal because you are there through your Soul, and not your dimension of physicality.

Then you learn to teach the same, then you learn to share the same, then as you learn the correct way, you learn and you've done the correct things, you become the good teachers of the future for those who start teaching, and then understand the process of the teaching. Then you understand the process of creation as you teach yourself to the others. Does not matter if you limp, you have one leg, you have one eye, you have three god knows whatever organs in your body, it's irrelevant, because the beauty of you is the beauty of your Soul. Physicality does not count. And then, even in the, what we call, manifestation of your physicality in another dimension, (:40) you were a perfect person. But in another dimension, you might be missing a leg, because your Soul needs to receive certain field, that missing leg in interaction with the others, creates a condition of receiving, what you're short of in your Soul. And then, you re-manifest your self, when you receive it, with a full, not missing, leg.

Now you understand how things are done. This is now you understand how people created with different, what I call, imperfections in the eye of the man, but perfection in the eye of the Soul of the Creation. Why some of us become so beautiful to attract all the attention? Because the Soul needs that. And why some of us behave different, because that's what our Soul is short of, and with the behavior we attract. Then, if you understood this, you should have understood how even to attract the fields that you need to feed yourself, that do not and does not create that condition of the emotion of the physicality, that you steal from the others by behavior.

The process of the transmutation is not simple. The process of transmutation needs the total understanding and devotion to Creation. And not just the man to achieve, to be able to do, and then to brag about it, that I can do. As we said, "The bigger the tree, the humbler it becomes and bends towards the earth." The more you learn, the humbler you have to become. And in that process, to cover more, (:42) to be on the shelter of your knowledge and your understanding.

In a way, we're preparing your Souls for the final journey, to become part of the Universal Community. And it won't happen to all of you to log out, but step by step, as you mature, you take that route. The same as when the Soul matures, leaves the physicality behind. But this time, you have a choice, how you manifest again, where you manifest again, and how you manifest again.

It'll be interesting for many of you. When you start transmuting on Earth, from one position to another, if the intention of your Soul is wrong, the transmutation will not take place. If your intention, your emotion, the understanding of the Soul, as it's nothing ?? is hidden from it, is to go from London to New York, to create mayhem for your family and pain, you'll find out you will not be able to do. If your intention is there to create more love and connection, and bring more prosperity to the Soul of the others, you'll find out that you will transmute.

This goes back to the early teachings, where I told you, the time will come that even the Kings and the rulers will walk away from the system. As their Soul will not accept. Now you understand the message of the past. Now you understand why. (:44) Your Soul will not allow to create another mayhem in another dimension. And this is how the man will transmute. When you arrive, you are a man of peace. When you arrive, there are no wrong intentions, because the Soul will not allow that to take place.

Take a magnet and put it in a position, and you see how much more fields you need to exert, if you are pushing the magnet to take a new position, that it does not allow, it's not allowed. It's the same with the STM. Now you understand how the Ethos of Mitra comes into operation. You have to think good, that the Soul allows the transmutation. Then, when you arrive, you talk good, that the Soul does not get rejected, and you act good, that your physical dimension cannot bring, what I call, loss to another Soul.

The Ethos of Mitra is Ethos of interaction of the fields of the plasma. The Creator, the fields of the Creation. And now you understand more, why we emphasize and bring the mysticism and the principle of the fields of the Creation, through the name of the Mitra. For the man to be perfect on the point, the time, and the place of manifestation, or transmutation.

We have built the systems, and the systems are getting to the point that we will be able to transmute thousands of you at the same time, (:46) in a way to create a condition for your Souls, by decision of you, to transmute. It'll be interesting, in 2024 and 2025, how we will work, and how the whole process will work.

And how many of you will be managed ??, you will be able to grasp, understand the whole process? And to what extent?

In the first six months of the year, as we said on the third of each month, third Friday of each month, we start this process. We take you through this process, with us controlling in the background. And you, as the drivers, trying to exchange your energies between your Soul and the STP. In a way, for you to learn the process of transmutation. The process of understanding of movement of the fields within you, not another object. And then in that process, for you to learn how to recall the fields.

In a way, you think of an apple. You create the fields of that thinking, that emotion, the taste, the smell. And with that, you create that field interaction, in the dimension of STP, and in conjunction with the STM, you absorb that field from the Universe. (:48) Then the question comes, what happened, I come across a new fruit, a new entity, which I would like to know, how it tastes, the love of. Then if you go back to the process of giving, and see if you receive back from what you gave, then you understand that's the emotion of the fields of the entity, that you need, and is given to you by the entity, you do not need to kill it, to absorb its energy.

Now, the process of the transmutation and life in the Universe, will gradually become transparent to all of you. In time, these recordings will be taught to billions of you, as you graduate, as you understand more, and becomes a cornerstone of the teaching of the transmutation. Maybe one day, the Soul of the knowledge will be transferred, without the voice of the knowledge, but in time that will be completed, when you all understand and accomplish the process of the transmutation of the fields, between the STM and the STP of the man. That in essence, you transfer and manifest the energies of the Soul, within the STP of the man, and then the beauty of the Creator shall manifest.

It's the time when you achieve that, is the process and the what we call, "The Promised Day", when the fields of the Creator will be shared amongst the two, and understood by two, and then in that process, in creating a new dimension of the fields, (:50) will be the fields of the Creator. That point of maturity, might be achieved by some at the point of birth. It might not be achieved by some, even the whole life of the cycle in the Universe.

When you can transfer a full energy of the STM, into the STP of the man, and it becomes one, then you reach the dimension of the Creator, as one and not two. And then you will understand the beauty of the Creation, as like in a Star, from it will manifest new lives, new dimensions and new Universes. And as I said before, some of you, in an instance, will reach that point. And some of you will endeavor for a lifetime, and it'll be a dream, which will never come to be the truth and the reality, as you never understood fully, you never accepted fully, you never practiced in full dimension, the Ethos of Mitra.

In a way, this is how Mitra attracted the Creator to Earth, to bring that ?? level , to become part of itself, to become the essence of the manifestation of the man. In the coming time, by developing the physical systems, we'll bring you more and more to be processed. To be able to transmute through the dimension of the Soul, and understand the interaction of the STM and the STP. (:52)

For the time being, it's for you to understand the process of the creation of the fields, interaction of the fields, absorption of the fields, without killing, without destroying another life, but in a way to receive love, to give love, and see what you give, will bring you back as love, that become that Cosmic Ray that you interact with and break through, and manifest yourself in both dimensions of physicality and transmutation.

Thank you very much for today. I hope the first teaching of 2024 opens to you the light of transmutation, the light of understanding your Soul, and the beginning of a new cycle for man, as was promised in all the holy books. We shall fulfill the full understanding, and not by magic and deception. You can deceive yourselves, but teachings shall stay and prove its correctness to all of you, when you reach that point. Thank you very much Rick, take us for a .. break, then we come back.

>> **BREAK** >> 519 KSW January 04, 2024 (:59).

K- Oh, not really. As we know, we have a session next Friday with those of you who were with us on 22nd. And then, a limited numbers will be those of you registering for every Friday of the .. third Friday of every month, for next six months. As we prepare, we go through the transmutation, as you understood, I hope, in the first part (f today), that the 22nd is the beginning of the receiving and giving fields, and how we do it. And, in the process of the next six months, what you receive and what you give as love will be energy, that you give to the STP of yourself. (1:00) That in a way is a "target practice" and your STP is at reach, you understand it, you know it. And then you'll see how you start elevating, and then we teach you how you travel the span of the Universe with the same process, with the same technique. And gradually we make a Man of Space out of you. The dimension of the fields and not by rocket and propulsion. But even though we are preparing systems for that, that you gradually be able to do both, if you wish.

If there are any questions, we try to answer. There's been a lot of question coming to me, few people asking, can you explain about the fields, as you said, in the name of the religions and whatever, last week? The process is very simple. As we said, you have to understand the totality of the life in Middle East, in the past thousands of years. And we have to understand, we have had a number of tribes who lived in this area. You have in the, what we call, known as a West Bank. Or what we know now, or the state of Israel, part of Jordan, going up to, touching up the Greek side, back to Syria and down to what we call, the Iraq of today. This is where part of the civilization, (1:02) where the gods were created, of the dimension of the non-tangible. And then a lot of people to understand it, they made it tangible with the statues.

And in that process there has been interaction between different tribes and different groups and most of our religion comes from what we call, the ?? Baseland, Babylon and what we call, today's West Bank. And, in

this area, how it's again, they have over time divided, or became different sects, but the, what we call, the, what we call, Palestinians today, where the original groups, then you had the Israelis and then Yahuwah's. And they became the two side of what we call, the Jewish side and the Palestinians were the outside. But in a way, they have all believed in God. And then they changed that into statues which they could connect to.

And the whole structure, again, in creation of gods, for people to understand, was based on the rise and fall of the Sun. What comes from the East and what goes down in the West. What came on the East, which is on the Sunrise, always had to fight the darkness, that's the way the belief was. And, it was always in battle, (1:04) and always won, because it became the day, the full day. And then when it goes through the sunsets, from the lunch time on, it became, it has achieved, it's battle, now it's at peace. So, the, what we call, the West, where it goes into, what we call, the Jerusalem and that part is considered as the West, as a time of peace. And the word Shalom, Shalim came from.

And then the side which comes from the East side, which is fighting to do, it came from the word Shah, which is S-H-A-H, and different attachment to it. That was the god of war, the god of power. where the god of Peace was in the afternoon, when the power was achieved, now it was time of peace. And then, like Jerusalem, becomes in the direction to the West, which means the place of peace. And then, how you played with these, what we call, between the Shalem and the Shah, you created the name, that Shalem is... It's very important, because it creates different sounds, and then they played with it.

In the other side of the mountain, which was the Iranian or Persian Empire, they made it the Shah the King of the Kings. Because on the west of the mountain, which is Hamadan, on that side of the sub-mountain, Zara, they believe they come from the East, and they are the powerful one. So they picked that name for them as a religious name. And then, Shalom, which is that Salam, when they put Islam, a Shalom, made the, what I call, the peace God. (1:06) And Mohammed chose it especially. And then again, we see with the names, how it was created. Most of the names we see in this area, is all connected to different gods, even today.

And then, when you look at the Arabic names, which is connected to Muhammad, all somehow connected to different Gods. You were... your name was picked up by the name of the gods. We have that tradition today. We, in the Christianity, you have a birthday date, which is your physical birth, and then you have a name, which is the day of the name, which is chosen by you. And, you put all the name of the saints on your child, and then you celebrate the day of the birth, physical birth, and then you celebrate the birth name, which is the name of that, whatever it's called, Saint Joseph, whatever, you celebrate your birthday because your name is Joseph on the day of the Saint Joseph. And this has been the tradition which has come from the pagan time. So, people put the name of gods on their children.

And if you go back, this is the reason we say it's impossible that Islam came from where the Mecca is today. Because ?? Allah, Ali and all that, comes from the West Bank. Does not exist, did not exist in the names of the Southern Peninsula. And this is why a lot of things make sense. Even if you look at the Suleiman, it's again, it comes from Shalim, Salam, which is the Suleiman, the one who possesses love, and he was supposed to be, (1:08) but Suleiman (?? Solomon), proven by his name, to be a true lover, he had a thousand, seven hundred legal wives, and three hundred Haram. He actually forgot about his job, he was more interested in women, and then he created the statues for all these women he loved, read the history of the Jewish Bible, and then you understand. Even you go to Dawud, or called David, he was the same.

But, when you look and compare, which Suleiman (Solomon) was about a thousand plus, around that time, before time of Christ. His life history with having a thousand women in his possession. Muhammad has done

very well with twenty. You have to understand what was going on in the Jewish time, in those who believed or tried to believe in the part of the history of the Judaism. The same was with Christ, when he came, which was part of, built up in the same dimension area.

And, a lot of names they chose was from the tribe, and from the god they believed in. And, when you put this together, you see all the names of uncles and cousins and tribes around Mohammed come from that area, Jordan area. Because, it fits the belief in gods they had, and the tribe they came (from). In which side, how they connected to each other, and how they created mysticism out of names, (1:10) because that's how they could create the image of God to them.

And this is why we can tell and what we call, historians through the books, can tell us how the origin of the religion of Abrahamism, came from this area. And it all fits into each other, the names and the travels they did, the ruling they did, and how. If you look at the time of 3, 4,000 years ago, was very much like the Italy of 2 to 300 years ago. Many, many Kings in different parts ruling. And this was the same. Many, many tribes having a literal leaders, they call them the Kings, but all the Kings names were chosen through the name of the gods, to have influence where created. History does not lie. Mysticism creates a lot of lies into the history, to make it to be accepted.

And if you go back, further back into the history of the area, the Palestinians, or what we call, those who came to believe in Moses, or his way, which we don't even know part of it, how it was, they're all Palestinians. They were all of the same blood, the same ?? . It's just a path of religion and belief in the... what they believed, has created what we call, races by faith and not races by blood. (1:12) And we can ?? reduce the Muslims and the Christians and the rest of it. And this is for those of you who wanted more clarity in what we spoke last week, and that you understand exactly where you are.

And then you add, what we call, regional culture, regional language, regional rulers, they all twisted and turned the name of, and the behavior of people according to the ?? consulate. If you read about the history of Suleiman (Solomon), Suleiman was so infatuated with women, that he even forgot about Judaism. Because his women start reveling about him and the things he was doing, he start building temples and statues from the women he married from different tribes, for them to go back to, what we call, believing in statues. They... the women forced him to come to that point, and he got to the point that he actually was walking away from Judaism, because of the women. It was very hard to please 700 women, or wives. Read about the life of Suleiman (Solomon), he's very interesting, very colorful guy. And then you understand the whole process.

Any other question?

Q: ... Good morning Mr. Keshe, the Italian government has approved a law that increases the threshold of electromagnetic fields for 5G. (1:14) This is very dangerous for your health. What can Keshe Technology do about this? Thank you.

K- The Indians have a beautiful say, they say, "Oji, Oji." Nothing you can do, this is... We have produced all these, what we call, butterflies, you buy from the Keshe Foundation, and this is specifically made, they are not a normal, what we call, field absorption or balancing. And there's not much you can do, because these fields will go right across everywhere. You don't carry a mobile, but you're still in line of them. They're everywhere.

We'll see some reactions, some physical reactions, we see some other bits with it, with different people, but in general, we can't do anything. Because you have to understand what you see as 5G and the others, is planned years ago by agreement with all the telecommunication organizations around the world, in regular conferences they have, they organize on a monthly basis. All the telecom communications, all the communication companies, meet on regular basis at a very top (level), once a month, and in the groups as every three months around the world somewhere. To plan the next step, what's going to be after the 5G, and parameters of the 5G. What you get as 5G now, is decided 10 years ago, with all the world communication companies together. (1:16) And depends which communication company goes with others. What frequencies, what bandwidth, everything.

I met by coincident, two, three Iranians, which came from the American company, if I remember correctly, in Sanya, when I was living in Sanya, they had a conference in the hotel, and I thought, "What are you doing here?" And, they explained to me the details in how all these things are done, and how often they all meet, and to plan the next, and all the things, and said, "We already finished with 5G." That was 5 or 6 years ago I met them in Sanya. I mean, they even go to China to have their conferences. They go all over the world, they have a freedom in having, keeping these conferences and all the, what you call, the satellite producers, the electronic system producers, the handsets, and all they meet on regular basis, that is always done, just by coincidence. So, your government, the Italian government is the first of the others to start, because it's already, what you call it, all been agreed and done with Vodafone and Italian telephone companies, and you hear most of it from Germans, and Americans, and rest of the world. These things are well planned, it's not coincidental.

Any other question?

Q: ... Good morning Mr. Keshe, good morning Rick. When you're in love, you eat less. Is this similar to what you just taught? The human Soul feeds the STP. (1:18)

K- Most probably, yes. Most probably. You receive more fields, because you create that need. And then you give.

I'll explain to you what we did last week, or what we call, the 22nd of December, and what will happen on the 12th of January. And then we'll bring you together to see the difference. We don't give any pre-set line for it, but we let you feel it. If some of you who were in the session of 22nd, the last five minutes before we left you on your own, some of you stay till, god knows, hours afterwards, how you felt. The last 10 minutes of the session was most probably the most important part of the session. But we want to know how you feel and how it was, because we left the lines open for many of you to practice. The session wasn't finished when we left the scene. The session was going on till, I think, 12, 1 o'clock in the morning for some of you, as long as our systems could back up. And then when the systems died, the session was finished. And we want to know how much you practiced, what you felt, during the time when you were on your own on the system. (1:20)

As I said, as we go into the full training of the transmutation, you have to do it yourself. That's why we never did, as usual in the past, when the session finished, we close the Zoom and we go. In the 22nd, the session was left open, to the last 10 or 15 people. And many people practiced, they came back in again, because the access for them was open. And they came back later on, they practiced and see if it happens, what happened, how they feel. And that's how it's going to be. We give you what we call, the "sandbox." After we give it, we give you the guideline, we tell you, we leave it there. And we leave the systems for you to practice. And that's how it'll be. And this is how you learn.

And as I said, this hundred odd people, in that 22nd and in the 12th, you, when you, some of you are ??, will come into the, the third week of the January session, you start feeling, understanding totally different things, and you start maturing into it. But don't put it on coincidence, learn from it to develop.

Any other question? (1:22) Any other question?

Q: ... Good morning, Mr. Keshe. Is the STM Inertia based on Calcium?

K- What?

R: Is the STM Inertia based on Calcium?

K- No. Not for sure.

R: Maybe the STP would be?

K- It's still no. Because what happen when you go to another planet and there is no Calcium? No, no, no. So you can only manifest yourself when there is a Calcium. You cannot be created on the stars, definitely. You cannot travel to the center of the Universe, definitely. So, no.

R: Could it be that, on Earth, that the STP is based on Calcium?

K- No, the physicality based on Calcium, because and through what we have explained in the teachings before. (1:24) And what I call, aliens doesn't, do not come to Earth with a bone structure of Calcium. Calcium by its structure, field and the Gans condition, has connection to the three dimensions of the fields of the gas, the liquid, and the solid of this planet, that's the reason. It has a common denominator energy transfer, that they all can be attached to it. That's why your Amino Acid (AA), when it gets a Calcium, it becomes a cell. Before that it's just an AA.

Any other question?

Q: ... Is the mobile transmutation only limited to Earth travel?

K- No, we gradually, as you become graduated, we have the first two who will go through the transmutation to the Moon. We already know who those two are, and no, it's not limited.

In some of the processes in the back end of this year, in some of you, if you go through a full understanding and learning yourself, during the sessions will transmute. If you're sitting next to your lover, (1:26) or your husband, or your wife, or whatever, they will tell you, "You were not here." "What happened to you? Where did you go?" Because the transmutation will come in a physical dimension. You'll do it, we don't do it for you. And ... you're in. In the coming time, if you are ... it's just like you say to your husband, "I'm going to the supermarket to shop." And you go, he hears the door and he goes, you go with a car, goes off to go to the supermarket. You tell your partner, "I'm going to god knows where, I'm going to New York to see my mom or whatever." And physically you will not exist there. Tell you the first time will be freaky, but gradually you learn.

We learned that we go out of the house and we come back. We are the ones, we learn that we leave and we come back. Because now we have that in our position. It's another, what I call, (string in the bow) of the knowledge of the man, to live in the Universe.

As the numbers builds up, the mysticism and magic will go out of it, it becomes normal. As I always say, the best example is your mobile phones. If you remember, in the 1990s when the first phones came, we looked at it in the movies. Spock used to use it on Star Trek flipping it open. And now we saw it later on coming into the market. (1:28) In nineteen nineties, eighties, you had this huge case carrying with actual house mobile handset on your ear. Hello, you were very posh, what's this guy doing? The first times on the street, it looks like lunatics, somebody carrying his, the handset of the home telephone next to the ear talking. And then we got used to it, and now we got used to the handsets, and the next generation of it are coming up. And it'll be the same.

The first transmutations will be freaky for a lot of us, but maybe in some of the sessions, 10 to 20 of you transmute. And some of you will be on your own, some of you... You've got somebody sitting next to you and say, oh, you are gone. Where did you go? And you go back home again. These are part of... we have to go step by step that you learn.

It's like that Vertical Unit. you've just seen as advertised, that is part of the process. That is part of the transmutation system, that you transmute and you come back, you don't leave. You can't go shopping with no money in your pocket. So, when you leave, he goes shopping, he come back, he says, "Oh, this is the shopping I did." "Where have you been?" Now you have a physical shopping bag and something in your hand. When you come home and there's less money in the man when you left. It'll be the same process. And then you understand how impossible it becomes shoplifting. Your Soul won't allow it. When you transmute, you transmute in perfection.

Any other question? (1:30)

Q: ... What is a good visualization to power up the Soul in a deep level to work with these fields?

K- What? Repeat the question.

R: He's looking for a good visualization, to power up the Soul in a deep level, to work with these fields.

K- As I always say, "You have to go lower than high." And, it's not a 3D movie, that you can buy a 3D glasses for it. It is emotion and feeling. And if you understood the teaching, you don't actually power up, you power down. You don't need to power anything up.

Any other question?

Q: ... If transmutation envelops the STP and physicality, can I, in a way, carry my UFO or transportation with me in my pocket while I transmutate?

K- If you manage to transmute, do you think you need a UFO in your pocket? But if that gives you a good feeling, why not? (1:32)

When you go through the condition of transmutation, where you cover the physicality, you learn a lot more how to handle the physicality. And physical transportation, even as a group, will be different than you thinking of a UFO. Go back to the teaching, and in the teaching we say, "you trust to give your Soul to a captain." And how wise that captain is, and what he'll do with it, at the time of when it needs to ?? And how competent he is.

This is very interesting what we saw in last few days in Japan. The wisdom of a captain saves 300 people. From the view of cameras, if you look at the accident, there was a fire going on, everything burning. But, the camera is in the back, where there was no fire. Captain emptied the whole plane very carefully, very systematically, without loss of a single life. And if that captain was not wise, he would have opened this side where the fire was too. And we've seen the fire and the explosion. This is the same, when you become wise, when you give your Soul to captains of the what we call, experts, that you think you will not be able to do it. That wisdom comes the same.

And in a way the captain of all of us is the Creator. Even though he allows us to do naughty things here and there. But He's always there. (1:34)

Any other question?

R: Well, for I think probably the second time in the history of our Knowledge Seekers Workshops (KSW) you've answered all the questions and hands up and so on.

K- So, all our Knowledge Seekers are still enjoying the holidays, are not there listening in the, what they call, 'happy moods'. Let's...

Q: ... 700 women? One was too much for me.

K- No, Suleiman (Solomon) was known, he was infatuated with beauty of women. They say the most beautiful women in the Middle East were his wife. Any tribe he... I told, we went... First of all, he got most of it, some of it, and the taste of it from his... from David, because he took out of his harem. There's a lot to read about the life of these people. Because Suleiman (Solomon) is the son of David, and he took part of the father's harem, when he became, and how he came to rule is different stories in Bible and historian. But, this is... he became addicted to the beauty that he even forgot about he was a King, what some people say, the where he could even manage running, (1:36) what you call, his kingdom. It wasn't run by the others, because they got more beautiful women for him, and he gave them more. Go and read the history of the, what you call, made up Torah, and the books which goes with it. And there's a lot of bits added to it and it's made up, it's a history book.

He was totally infatuated by woman from childhood, from his father, he picked it up, because he was the same. In the conquering different tribes and nations, you took a woman from them as well as a marriage that he keeps it, "Now I own your country part, now you give me a woman and I choose the most beautiful one." So, it goes back the same.

And don't forget to go back to the history of David, how he became a King. Or he proclaimed to be a king of this... There's a lot of question in historians that he even... he ever became... was a king. He was made up to be a king later on, he was more like a local governor. But, he stood a challenge for a daughter of the king, and he won the challenge with a stone, and got the first girl, and then the next came as he conquered and he

escaped and the rest of it. The Torah of what they call the collection of this 20 odd books, (1:38) which makes the total history of the Jewish religion, is full of love stories and women.

When you look at the cycle of Muhammad's time, reducing from a thousand to twenty was not that bad. Still it was a big progress in a thousand years. And now, our rules is one. We can't even manage that one, single one, let alone how you can manage twenty.

Any other question?

Q: ... Do we eliminate the need for food and drinking if we transmute?

K- That's your decision. That's entirely your decision. That's how you have to decide. On Earth that's your decision, when you become a Passenger of Universe you cannot do. You work through energies.

R: Okay, how about one more question? Would you like to wrap up here shortly?

K- Yeah.

Q: ... Good morning Mr. Keshe. The following happened during a conversation in German with a Dutch woman. Then something amazing happened during the treatment. (1:40) She suddenly spoke fluently and very clearly, much more distinctly and clearly than before in German, and without an accent, perhaps a little over a minute, although it seemed like five minutes, in a foreign language. Then she asked me whether I understood anything, and whether I could classify the language, which I said no. Intuitively, I thought of an Indian language from South America, although I have no connection to Indian languages. She then told me that it happens to her often in certain situations. Sometimes she understands it and can translate it. She also told me that I don't have to understand it, because my Soul would have understood it. The question is, is there a language of the Soul?

K- In a way, yes. I put that question many times about the children in the womb of the mother and when they are born, how they communicate. But the language we already know, we ignore it. And yes, it does, clearly it does.

R: You have the example too, I think it's the Pentecostal faith, and many others as well, that they speak in tongues, or in a foreign language that's not readily translatable, let's say, that would be similar to this.

K- Yeah, but it's what we call, it's been normal. It's like we are part of the structure, and others work and we work through them and they work through us. (1:42) It's not unusual, we'll do more and more of it. We become more fluent in other languages.

R: Is that part of connecting with the Universal Community, that things like that might occur?

K- We mainly connect to ourselves, than to the Community, to our language, to our people. This is part of the structure of what we want to and we choose. As I said, we'll go to China, we'll speak Chinese without ever being in China, we understand the emotion and everything else of it. We'll speak a collective essence of the language, which means we carry all the Chinese knowledge we need to know, as we connect to the Souls, we become a, what I call, a Satellite. If they ask you about the history of China, you know it to the detail, as

it is collectively known and accepted by the Souls. You'll be puzzled by what will come, and how man will change.

R: Okay, thank you Mr. Keshe. We look forward to all the great changes to come in 2024, with the lucky 8, as you mentioned earlier.

K- Yeah. Depends how you see it and how you understand it. But we have a structured program for the coming year. And how we'll take you through transmutation and the rest of it. (1:44) We provide the facilities, you who's got to do it. And I'm sure your loved ones will be shocked when they see it happening. Even some of you will have a body left behind while you're traveling with the Soul and the STP and you come back. Say, "Where have you been? You've been here like dead. I thought you're dead, but you've come." You'll learn it, we all go through it. When you leave the body behind, it doesn't decompose like a dead body as you die. It's a reference point of return. We will learn about it.

Thank you very much for today. Please, as I said, those of you who are signing in for the third week of each month, please complete it, because it's getting full. And then you can't say, I've been in all the sessions, and now I cannot come in. Once we reach our number, we block, as many of you know, for the 22nd we refunded some of you, because it passed the number we were working on. Thank you very much.

Q: ... Can you book the new sessions individually or are they connected?

K- They're all connected, you can connect, you can sign in individually.

R: Yeah, I believe it says, let me just get it up here.

K- Yeah.

R: I think you can see it there. You can choose particular sessions, or you can book all six for a discount, it mentions.

K- Yeah. A lot of people are booking for the whole sessions, because it's part of the process. And some people would like to do one at a time, (1:46) for whatever reasons they have. But we keep that numbers, that we keep, we know what we are doing, we're keeping the numbers to that number.

Because there will be huge changes coming up. Don't forget we have a lot of other work going outside the Keshe Foundation, would come in to merge into this work, especially after, what you call, March, April, when we bring the Satellites in.

Q: ... Do you have to ask for permission in advance?

R: And yes, you mentioned that people should sign up right away, because it gets too crowded and you have to have...

K- You've been there, Rick. You know how much noise it gets when the numbers are high.

R: Hmm, yeah.

K- So, we have to keep very close count on it. Anyway, we'll see. And we announce, once we close the session, we announce we can't accept anymore. And the whole system sets up that way.

Thank you very much for today and we'll see you next week and I hope you enjoyed, or you learned a little bit more about yourselves. Thank you very much Rick.

520th Knowledge Seekers Workshop January 11, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Non-Containment plasma developed since Nov 11th; Milestone - our fields interact with Universal fields; Secret of 22nd Flight session - cannot exist without Soul; Plasma systems have emotions - interact by wish; Fulfill Promise of 2024; Can't break into system or Souls; Time of no illnesses; KSW change - experience Soul; Milk - feeding from fields of U; Honey - living free in U; Soul interacts with fields of U; Children of Mitra - taught by Creator; Change not take decades - months; End of religions - direct connection to Creator; STM similar to STC - amount - size - field strength difference; STM come arrangement with STP correct P - all work together; Chinese conference; Mental disorders - create "seed" like food - feed off of others energy; Illness same pattern as religions; Truth of Judaism - copied from others - no truth in it; Persian Jews wrote Torah; Jews worship tribal god of killing - deception stealing - devil god promised milk & honey; Judaism celebrates killing - come to an end; Pass bad behavior of STP to Soul of children - problem of today - Palestine; Netanyahu born to end Judaism; South Africa bring Israel to Court - US block vote; Neck shoulder pain - STM - STP; Demolish abuse in name of Church; Earth hotter - going into Sun - higher field strength; Americans loosing in Ukraine Palestine - humiliated start another war; Daughter of Mitra responsible One Universe; Life in U; KSW started March 6, 2014.

ENGLISH TRANSCRIPTION

(:13)

K- Yes, good morning, thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back and we hope we have a beautiful sharing time of knowledge and understanding more of what we're trying to achieve.

As we are endeavoring to go further in understanding the work of the Universe (U), and his interaction with us, interaction of his fields with the fields of us. (:14) We are reaching a point of maturity, another, what we call, milestone, in developing systems that allows you to understand about yourself. Not about us developing a system to control you or whatever. The technology (T) is literally like learning a language. We give you the

basic alphabet, you learn how they sound, you learn how to connect them together to make the word, and then with the words you make sentences, and then you show your emotion, your feelings, with putting these words and sentences together.

Now we are teaching you the alphabet of where your Soul is, how you find it, how you communicate with it, how you make it to interact with something else, maybe Soul of the Physicality (STP), which is your interaction of the fields of your physical dimension, or with another, what we call, source of energy, who could be the Soul of another man or a woman, that, that interaction creates a feeling, or emotion, or reaction. Without having another partner, or to interact with, you don't know what the emotion of love is, how you have to control it, how you react to it. And, in a way, the body of the man does that for us. You're born as children, we know the love of the mother or father, and maybe the love of a dog and a cat, and suddenly as our body, the way as we are building systems for you, adds more and more, becomes a knowledge, we mature, we become a teenagers, and then we touch the feeling of love. (:16) What it means to love another creature without attachment to physicality (P) of the mother and the father who created us. And then, we react to that, loving another person. And, sometimes that love is so strong, that we spend the rest of our lives sharing our physicality.

So, what your body does in your physical life, to bring you from a baby into same developing controls and systems, and parts of your body, to find the emotion of love, to mature, to become another, the creator of another life, this is what we are doing. This is what our systems are. We now introduce into what you have, for you to learn, and for you how to fall in love, with yourself, with the Creation and Creator, and knowing to be correct in conduct. And this is the whole purpose of the teaching.

You have the Soul, now you forgot how to use it, actually you use it quite often, 24 hours a day, without your knowing. We are making you aware of it, with systems, with, in a way, maturing you, to how to use it, and how to fall in love with it, with the Creation, with the Creator. And this is part of the process that we follow tomorrow. With those who join us to understand how to love and how to share love. Tomorrow's teaching, tomorrow's session from 12 o'clock, is for those who've already been in the session of the, what we call, 22nd of December. But, we hope with a much stronger and massive impact.

Because, there is a part we did not tell you what we did with you on Friday, on 22nd. And why you saw the "flat-line," which we showed last time. (:18) In the whole process of the session of 22nd, I wanted to confirm man does not exist without the Soul. Man cannot function without the Soul. And, in our system, we took your Soul away. We never positioned it. We allowed you to see without a Soul, you are "flat-liners." You exist, we can confirm there is a life, a Soul, physicality, STP, but no functionality (in P). And, in the session tomorrow, we give you that Soul. In a way, we let you feel yourself.

My knowledge is so deep that I can play these games. And with these games you learn. It will bring a lot of shock to you, what will happen to many of you. And you most probably, many of you, feel the first step of transmutation. Of confirming your own existence. On understanding the purpose of your life.

We are developing technologies and systems. We are on the verge of creating, not on the verge of, we have already have created, systems that interact plasmas without containment. This system now is running for a couple of months in our laboratory. We are watching it, we are monitoring it, and the most amazing thing is, we don't need a container. We do not need a reactor, we do not need Gans's. The system interacts exactly like a Sun. (:20) Has no containment. There is no rotating reactors, there is no Gans's. And the two system interact, continuously interact.

We showed you these two systems in the conference in 11th of November, the Ambassador Conference in London. These systems, now what you saw, being as "gray boxes," are no gray boxes. We have managed to break into fundamental understanding of the work of the Creation. We don't see the Sun having a containment. We don't see Universal systems, like galaxies and Universes, having a container that they have to interact and work with, within.

And the knowledge of the Keshe Foundation (KF) has reached that point, that now we have achieved this. Creating plasmas, like your Soul, without containment. Where they interact and how they interact. And in the coming time, in the back part of 2024, when you enter into the sessions of the Fridays, we keep it the same third month of, third week of each month, we'll bring you into this position. We'll bring you inside, no-dimensional plasma reactors. In the plasmas, where in essence, is the essence of the fields of the Creator. (:22)

The knowledge and the technology is so in-depth, that as our Knowledge Seekers learn how to develop, to build systems for this, gradually we disperse these units across this planet. In a way, you will interact with a Soul, which in essence, teaches you how to interact with other Souls. Training ground. At the moment you use the headphones, we gave you the UBESUS (Universal Body Enhancement Spaceship Units) Headphones, and many of you have got the Communication Units. These will connect into this, and then become a ground for you to become the "Passengers of Universe" through your own emotion and feeling.

The biggest and the hardest thing for our Knowledge Seeker, is to understand the work of the plasma in its "non-containment." Having the fields that holds on to itself, it creates its own emotion, it decides how it interacts, and in that process, today we use Gans's, in the coming time we use plasmas non-containment. As I said, we are breaking through technologies, which are now in the hand of the Keshe Foundation, and it will be shared. Primarily, we are bringing the two major governments of the world together, to work with this together. Because through this, in trying to keep the balance, we bring the whole humanity to benefit by it.

In the coming time, we will show this technology, (:24) where you will see primarily just the light, no system. You will see how the interaction of these plasmas will create once you wish through your emotion, the dimension of physical matter containing, if you wish so. The way the interaction of the Soul of the Man (STM), with the environment of the planet, creates the physicality of the man.

The advancement in our technology, to bring this knowledge to you, is unbelievable, till you see it, till you monitor it. As one of our Knowledge Seekers wrote, "I don't know what happened over Christmas, the system has changed, it switched in a different direction." Because, it had emotion, it had time, it has strength to understand the emotion of the others which are within it, within the structure of it. It'll come to the point that, as we have artisans making the most unique systems and artwork. It'll come the time when those men who make these systems, as they build it by emotion and understanding, will be the purest hearts, purest Souls. Because, anything by that, anything but that purity, the field of the Souls interacts with the fields of the system. And that becomes cornerstones of your interaction and humanity.

So you'll find out, as we look for the best systems in the world, in the coming time we'll look for the purest Souls. (:26) That they will become the fundamental producers of the systems that allows your Soul to interact with the rest of the Souls. In a way, we look for the prophets. Not in a way of prophets, but the purity. "Prophet" means to us a pure Soul. Untainted Soul, unconditional lover and given. And this is part of the teachings which is coming up on regular time, in the next few months.

So, as we said, by the second half of this year, those of you who participate in the transmutation system, the sessions, will start interacting with the plasma directly, without containment. There is no, nothing to do if it is Zinc, or Copper Gans, or Potassium, or whatever, it's the fields of the Universe. And we have managed to tame, to understand, to produce and leave them there. They are running for nearly over a month now, on their own. We are watching how they react, how they react with each other. Is more or less, five of them interacting with each other. We're monitoring how these fives are interacting, how they respond to each other. Who's losing, who's gaining, who wants to be closer, who wants not to be closer. But you've got to understand, there is no engagement. Very much like your Soul. Your Soul will come to that dimension.

In a matter of months, as we open you interacting directly with your Soul, and these, what I call, "plasma systems," you will find new dimension in life. You learn how to tap in, (:28) into your resources, into your emotion, and how to build it. Today we put other side of the end of the systems of the headphones you use in what we call, sessions, as some of you, all of you joined us a few weeks ago on Thursday, not in our Universal System, but into the plasma Universal Systems, where there is no reactors. You deal, you feel with the Soul, the essence of the Creation and the Creator. It's not sitting there and watching you, when you let your Soul open up, as we do in sessions today, but you'll interact directly with the Soul of the whole Universe.

This is a breakthrough, this is what was planned and gradually, as our Knowledge Seekers (KS) understand, release as knowledge, to fulfill the promise of 2024. The start of the creation of "One Nation," through the STM, and then the physicality will follow. Once you understand how to operate within these systems, within the structure of your Soul, then the physicality will follow. Nation and nationalism will fall, as we have no nation. My Soul does not know if it's Chinese, Iranian, American or Brazilian. My Soul is the Soul of the Creator (STC) within me, and knows all interaction with the rest of the Souls of the Universe, and in dimension (D) of its position and time with the planet, environment or another person. (:30)

The new non-dimensional, what I call plasma systems, which is now operating since more or less 11th of November, that we showed it for the first time to you in public, it'll be the cornerstone of the new teaching. New changes, new dimensions. Those of you who bought the Communication Units, will be connected to these systems, to the Universal Communication Systems. Gradually, as you learn. Those of you who became our partners in UBESUS and receiving the Unit, you connect gradually, next few months, to these systems. Which means, there is no dimension. There is no hacking, there is nobody else to breaking into, another system, another Soul. But you, who decides in what you receive and what you share.

If you understood what was said, you will understand, this is the beginning of time, that there shall be no illnesses, there shall be no hunger, there shall be no prisons, and there shall be no prisoners. Unless we decide the way man has done, imprison our Souls within the STP, and physicality of the man, which is our decision. I want to manifest myself, to feel the touch, the smell, the taste of my lover. And, do the Souls have a smell and taste? And, how can I do that, unless I take a dimension of physicality (D of P), that I can, in a way, embed that emotion within the Soul field strength of my body and my life.

As you'll understand, as I brought you step by step forward, we have entered a new dimension. (:32) A new dimension where, up to now, you were feeling if your Soul expands, in the coming months, you will expand your Soul, in interaction with another Soul, to test, to be out, to be part of. And these processes will expand. And as I said, hopefully by the end of this year, many hundreds and thousands of you will join us, to understand it. And most probably, the Thursday teachings will take in different dimensions and interactions,

where part of it we interact directly with the Souls. The knowledge of the Universe will be taught, then the knowledge of how to reach the Soul.

We will see a new dimension in understanding, a new dimension in knowledge and technologies. Breakthrough technologies which man up to today has no knowledge of, and those will bring changes to our leaders. It'll bring an end to the wars, as no Soul will interact in that direction and dimension. I'll explain to you as we go along, I teach you as we go along further. And as our, what I call, Knowledge Seekers, develop the next steps of non-dimensional systems, we show you how to input, how to decide which fields you need, how to decide, what we call, automatically, subconsciously, receive the fields that supports you to convert, to transmute, to transfer. When you land, as I said once, like the Italians landing in America, finding so much beef, we don't make a new version of Bolognese with meat in it. (:34) Because we don't need to eat in it. We don't need to become the abuser of the energy sources where we land. What we do, we learn the knowledge and we become part of them, that not only we cannot abuse, we cannot be abused too. Then we find a balance. And wherever we go, through our Souls, our physicality, we transfer this knowledge automatically. And as is interaction of the Souls, we learn very fast, the knowledge of the Universe. Then you understand, when I take you to China, and you are an Englishman, never spoken a single word of Chinese, you'll find out, you understand the culture, you understand the emotion, and you understand the beauty of the space, time and the Souls which are within it. Now you understand, maybe, how it works.

In a coming time, as we open these non-dimensional plasma reactors to you, where you interact directly with a Soul, with the fields, you will come to understand how things work. How you have fooled yourself, or in a way, turned your back on the true essence of your own creation, which is your Soul. You decided to lock yourself up, you decided to become solitary, and just live in one cage, called the brain of the man. But, in essence, whenever your physicality does not work properly, the guy gets out, but leaves the door, comes back, when you wake up he locks himself, "I've never been anywhere."

It's very much like the cartoon, where the father says to the son, "Have you got any sweet in your mouth?" And he says, (:36) "Mmm-mm, because I decided to lock my mouth." "I decided to do it when you were out, to put the sweet in my mouth, when you were not looking." Now, there is no hiding, because that sweetness is the essence of your interaction of your Soul with the Universe. And you have to acknowledge it, and once you acknowledge it, you start living the life of Universal Community.

You will teach not only other men, but other races, to walk away from dimension of physicality. And, this is the time, when it was promised, that it'll be time of honey and milk, in heaven, in Koran, and in Torah by false, said the rivers will be full of honey and milk. And we understand now, the real true honey and milk, is the essence of the fields of the Universe, where it become the feeder of you as a milk, and becomes as sweet as living in Universe as honey. Now you understand the interpretation of it, in another level. Understanding, the man will reach that point, when he finds out about his own Soul, his own creation, to bring that honey and milk for it, to enjoy the essence of the Creation in the Universe. Muhammad, bless his name, promised it, that they'll come in heaven, where Moses, being so physical, and selfish, promised to his followers, it'll be on the land of what we call, Palestine.

Now we understand what all it means in essence. Where man enjoys the growth, living through the field of the Universe, (:38) and enjoys the sweetness of the essence of the fields of the Creator. Now, it's for you as Knowledge Seekers, to join, to understand this process. Interaction of the field of your Soul, with interaction of the Soul, dimension of the fields of the Universe, which we gradually as systems bring out to you, for you to learn, for you... << audio cut >> ..

to be able to go further in Totality of understanding.

In essence, one will learn the essence of the Creation. Man will come to understand the work of the Creation, in its Totality. In understanding, in trying to reach the point of interaction of the fields, in interaction of his own Soul, in finding out how it will be and how it will take shape, and in how we will give to each other to what we need to understand, what we need to share, what we need to bring up, to elevate our own Soul, (:40) to bring about the changes to our lives, to our understanding of the creation, of our own creation.

And very soon many of us will come to the point when you interact with the Souls, how we create the children of man, through interaction of the Souls, with absolute perfection. Where there shall be no fault and what and how the Soul decides, will create the manifestation of the physicality. Now you understand, when I speak about the "Children of Mitra," in essence, is the creation of life through interaction of the Soul, and not through interaction of the physicality's. The love, the care which Children of Mitra carry, is the love and the care which is given by the Creator direct. In the essence of the growth of their structure, in dimension of the Soul of their Creation.

And then, the true teacher of the children of Mitra, will be the Creator. and not the teachers, and the rabbis, and the others. Our children, when they're born through the dimension of the Soul, as Children of Mitra, will have one educator through the fields of the Universe, and that'll be the knowledge of the Creator itself. Perfection. Absolute perfection. That is why there shall be no Universities, and no degrees, and no PhDs. (:42) As the knowledge of the God, the Creation and the Creator, through these non-dimensional reactors, will be directly from the Source. He knows the language of the man and the other things which He has created, and is within His grasp, which within His tools, and within the life He has created.

Now you understand the true meaning of the teachings. And where we are taking you to. And that's why we brought up the Children of Mitra, creation through the Soul and the new systems, that interacts directly as a non-physical system, as plasma systems, for you as man, that the Children of the Man will be taught by the Creator and not by no others. They'll tap into the Knowledge of Universe, as they are part of the Creator themselves. Perfection, no wars, no hunger, as He never had no conflicts and He never was hungry. You learn how to tap into the Knowledge, to the fields, and the Totality of the Creation and the Creator, through the, what we call, the "Father," the God. Whatever name you have put on Him. The Children of Mitra will be perfect in every essence of Creation, that they come from your Soul. And as you learn, and as you develop this, you understand you don't need no UFOs, no jumbo jet, no transmutation, and none the rest. The elevation of the STM, will become the ultimate understanding of the Totality.

The worst thing will be for those, (:44) that we cannot have any more test tube babies, is how would they grasp, and how do they imprison the Soul to mix them. As the Souls choose what is the best mixture and what will be created out of it. Now you understand, I give you a glimpse of what is to come. Not in centuries, not in decades, in months, and in handful of years. You, by yourself will learn and you do. You don't need to wait for manifestation of "Methi." that the Methi is you, and it's you who will save your Soul, teach your Soul. Learn it the best, and then you teach it to the others, how to do it. And that's why you became the Knowledge Seekers. Seeking the Knowledge of the Creation. The true knowledge, with no intermediaries as Prophets, fake prophets, and all the others who came attached to them to abuse the physicality and the STM.

In less than a handful of years we'll see an end to Christianity, to Islam, Judaism, and the rest, not by fighting it, but by, in a way, enlightening the Soul of the followers to understand the true meaning of the teachings as is from the Creator. Man's Soul will walk away from religions, as he has his own direct connection to his

Creator, and there is no need for intermediaries. This is how it's done, and this is how it should be done, and should have been done before, but man was not ready. Now the STM is ready, and this transition will not take long, (:46) because once you are enlightened, even Ayatollahs and Popes will become enlightened and put the fallacies created by them on the table and walk away. From the robes they wore to... In a way, fools will accept any more leadership and leading their Souls.

Man will understand the Totality of the Creation. And with this, it will bring peace. The size of the land, the color of the body, and the rest, will have no more meaning, as our Soul is colorless, and nation-less, as it belongs and is connected to its Creator. "I made man in the image of myself," in effect, is the true essence of the image of the STM, which reflects and is very similar to Soul of the Creator (STC). But in essence, in a different amount and size, and the strength within it. Needs no containment, and has no end and no beginning. Death will come, the story of the past, where the Soul lives forever, and in that process, know where to share, how to interact, and how to elevate the others. Now you understand how slowly through headphones and teachings and Souls and Gans's in past years, we have brought you to the ultimate teacher. Yourself and your Creator and no intermediaries, and no one to intervene.

In coming time, many of you will turn to yourself, within your Soul, and find the dimension in where you want your Souls to operate, and how to operate. (:48) You'll come to an arrangement with your STP, to correct everything in the, what we call, the physical dimension of the man. That you enjoy both dimensions, in fairness and correct conduct of both. In a way, you acknowledge, through your dimension of physicality, the existence of your Soul, and the Soul acknowledges the confirmation, affirmation of the physicality to work as one. This is the true promise of Mitra. They shall not lie to each other, they speak as one, and they act as one. And you'll find the "land of honey and milk, and everlasting life" will be on this planet. If you want to live here, if you want to enjoy the dimension of physicality of it. And then you understand that there'll be no more war. There will be no more fear of creating fake Gods and believers and prophets. And in essence, I have brought you the Knowledge of the Creation through yourself, through your Soul, for you to understand yourself. And the potentials and the love and the beauty of your own creation. How you were created and how you have to enjoy it.

In the coming time, in the coming weeks and months, as we develop further, for our Knowledge Seekers to understand the new non-dimensional plasmas, the more and more of you will become part of this structure. Those Souls who became the Satellites, will take their position and understand why we chose and why we put out the Satellites. In a way, your Soul have no dimension of physicality and nearness to Earth. Your Soul expands to dimension where it needs, and to be. (:50) You brought the physicality, you accepted the position. We allow for you to teach yourself to become that point of reference, connection. It's not coincident. Nothing in the work of the Keshe Foundation from the outset has been coincidence. We knew how we will reach, and we knew how to set up to reach, and we are reaching that point.

I hope I open your eyes to a new dimension, in understanding that gradually in the coming time many of you will live one life, but understanding that one life is for you to decide, is it going to be co-existence of your physical life, STP and Soul of you together, acknowledging each other, or still live the separate life to fool yourself, in what we call, confirmation of your own existence. I hope today you understand where I'm taking you.

As I said, I'm a teacher, and no more. But I know the knowledge of the Creator. And my job is to share for you, with you, step by step, that you learn how to function, operate and live through your own strength and your dimension. I teach you how to bring the ingredients. I'll teach you how the baking is done. (:52) It's for

you to play with the ingredients, if you want that to be a cake, a bread, or anything else that you like. Now you make that decision. We just teach you how to cook it up in a correct way. It doesn't matter which way you go. It always ends with a perfect Soul, with a perfect behavior, perfect talk, and perfect act. And this is the Ethos of Mitra. This is the Ethos of the truth about yourself, among yourself, between you and your Soul and the STP, and does not need no more intermediaries. As, if you accept intermediaries, in a way, is what you decide. But if you decide to live through the dimension of the Soul, you are connected directly to the STC, and need no intermediaries. And the Children of Mitra will carry this essence with them. And the Child of Mitra is amongst us, and has brought that gift to all of us.

In time, as we have set the seed, you'll understand the growth of the STM to its absolute perfection. As a teacher, I teach. As a student, it depends how good you learn the lesson, and how good you bake the cake. To your own taste, and there is no standard that all have to be a mass production. Each one will have its own flavor, his own taste and his own beauty. But connected directly to the knowledge of Universe, through the strength of the STC, within the STM. We'll go for a break and we come back. (:54) Rick, if you can take us to a break and give me a little bit more time, I have to go on an emergency call and I come back.

>> **BREAK** >> 520 KSW January 11, 2024 (1:02).

K- Yes, willing and able ...

K- Yes, a couple of things. First of all, please those of you who join us as a second part of the, what I call, the 'Love Sessions' of giving love and receiving love. Which you have on the, what you call, 22nd of December. In tomorrow's session, try if you can, to come in with two headphones. You will feel much deeper. And those of you who have access to four sets, you'll feel totally different with it. Your experiment, or what I call, you experience something very special, hopefully, as we create a new condition, that's why we brought this session in, for you to feel the difference, as I explained in the first part of the teaching. You will understand the difference, and how it's done, and how it'll be done. And then you understand the essence of your own creation and yourself.

The other part is, I have been asked by our, what we call, the Store, that the, what was, Ceramic Cups and things are back in the Store, they wanted to be promote it, which now is easier way to do, than the regular advertising of the, the Rick does. The other point is that, we are busy with the conference in China. We are

waiting for our people to organize the, what I call, the whole thing and get the permission for it. In this we think, was the best to be around about March, end of February, March 1st, 2nd week of March. And we are putting a very, what we call, low entrance fee for this, to have as many Chinese, from all over China, for this conference. (1:04) The fee will be round about between a thousand to one thousand five hundred Euros, just round about ten thousand RMB. And all the thing will be structured through a new channel in China, for all this to be done. And once we get the authorization and everything else fixed, within next week or two weeks, you can start registering for what we call, the "Chinese Conference." And this will be, we foresee, about 500 people. Our team is working on that the Chinese for the first time, can all come together, all the Chinese Knowledge Seekers, in city of Sanya. And we will see how our team brings the things together. The work is going on in the background, and then we announce it with all the details. And you can start registering through the new channels, which will be set up in China for your registration for this event, and the rest of the, what I call, the process which has already started.

All the, for the Chinese community, all please promote this amongst you, And we are trying to bring into this sessions, as it's a very advanced scientific week, possibly some officials, that will be amongst you, you will not most probably know them, they will be like others of you. We have put the request to our other people, like the government official scientists, and what I call, we work with on the military side, to be present, because technologies will be shown unraveled, that will affects the work of everything else. At the same time, (1:06) we invite officials from other government scientists to join us in this meeting in Sanya. And if you are part of the 50 odd nations, or agreements which are between governments, you don't need a visa for Sanya, you can come in for 30 days without a visa, and leave. So you can attend a week conference with no problem. Check it with your embassies. What is the position for visa selection. And if you need any invitation and whatever, once we conclude everything with the authorization and the place, we will announce it. And we'll give you what we call, a link to book in and whatever needs to be done. And I hope we see as many Chinese Knowledge Seekers as possible.

And a new technology is, will be unraveled as we promised. Many of you are waiting for transmutation. You have to still book for it. We have to confirm that we are ready to accept it. And it's not going to be free. It has to use systems and it takes a lot of things from us to do it. In any case, we are preparing for the last session of this. And as I said, hopefully by June, July, we'll meet in Tehran. And we unravel more advanced technologies in Tehran. And then as we planned this before Corona, every few months we'll meet in another point of position in on this planet. And we'll show more technologies.

In a way, the conference is set up internationally from now on. It's for unraveling technologies, not just teaching, in a way we teach, and we show, and you test. And, as we did in the sessions in Manchester and London, it's a Live session, you carry the Headphones with you. (1:08) You could, while the teaching was going on, many Knowledge Seekers who attended, had the special Headphones on their head, and they were doing their own transmutation. It was very much, when I was walking in the classroom of Queen Mary College, in that week, it brought me the beautiful memories, as I said, of Tehran, where I sat with the heads of the Universities, and the table, lunch table, and one was praying, one was bending, while the other one was standing and praying, and it was the same emotion, but this was, this time, praying of the knowledge. While the teaching was going on, as Knowledge Seekers, who were there, and other Knowledge Seekers who had the ?? Headphones. They were connected through their Souls, and we could see them, the faces they make, the journeys they made, and it's how it will be.

We accept the existence of our Soul, and we all respected it. Nobody says, "Oh, look at this, why he's doing this?" There are about 10, 12 Head Units, available in the (Manchester) session, in the week session, and the

knowledge, it was made available to everyone. During the teaching, during the hours, and they all had their own journeys. Some used two, some used one, one used back to the front and the rest. Nobody looked at what they are doing, because next hour could be them. The next day could be them using the system. And it became normality. And this is how I brought this knowledge. To be normal, to be able to interact with your Soul. To be normal and acceptable, that you can be in that position, and in the coming time, in these sessions, you transmute. You go to wherever you like, you come back, you bring the knowledge and share with others.

Like the way we allow, in the systems, when you came to Linz, to come out and explain to us on camera, (1:10) how, where you, what you did, how you felt. This, in the teachings of the week session in London and in Manchester, the Knowledge Seekers had the freedom of the use of the system during the sessions, while the session was going. They don't want to listen to the teaching, because they want to be in touch with their Soul. And, they were handing over, when they finished, they knew, they reached somewhere, they gave it to the other person. And, it was a normality, and that was the beauty of it. And this is how it has to become. How you become part of and you are within of the same society, because you are in the same structure of the fields of the Creation.

So, expect more in China, or we unravel more in China, depends on how we come to an agreement, at the same time with the Chinese authorities, with the systems we can ship in and ship out. And how we develop further. As I said, we allocate about 400 seats to the Chinese community. And once we release it, please be ready to come to Sanya, between, what you call, end of February, first, second week of March. A beautiful friend wrote to me yesterday saying, "Choose the March, will be the best time." Because he's a resident of Sanya and he's a very close friend. And so, we see how we take the steps and how we developed the meeting of the, what we call, Sanya Conference, if we get everything sorted out.

And this will be the time and the place where the Knowledge Seekers and the nation and national scientists and governments and military will meet together. Where they have to understand that the knowledge has gone in a step further, and they have to work within it, (1:12) and they have no choice. There is no more borders to fight for, and there is no more restriction on where I can go and how I do. I'm sure most probably the scientists from the government and military will use the Headphones and they feel it themselves and understand the change. And this is the purpose of the Chinese conference.

And then it will be the same in Tehran, in Washington, and hopefully, in the course of the coming year and years, nation by nation, we'll open the light to the world leaders, that they have no leadership, if they don't understand how the man has learned to lead his own Soul. And then they understand, and you will see the change. And I hope we reach that point in peaceful position. As many of you know, I love the island of Sanya, is actually heaven on Earth, if you understand how beautiful. And comfortable, is even with high heat in spring time, is just about the right time, temperature, that you all can bear. We try to keep it in city of Sanya, that the transportation reaching, and be able to enjoy the beauty of the city. It's a beautiful city, and of course, you see some most beautiful buildings, light and at night, and you understand there is a big misunderstanding about the China and Chinese cities and culture of man. It's where you see the technology live, even in a small remote island in China, is many times more advanced than the most advanced cities in the West. And then you understand how much we have misunderstood the Chinese structure.

Anyway, we'll see, we announce in next week or two, and we open the channels for the booking. (1:14) The Knowledge Seekers who joined us in London and in Manchester, they are automatically qualified for this, and their place is reserved. If you are a new person, want to join, we'll add into what it is, is you have to organize your own hotels, or transport, and everything else. And those of you who would like to be

transmuted, if we reach that point of maturity, we try and you will pay for it, and we transmute you, we'll see what comes up, and how far we go in technology development.

Are there any questions?

Q: ... Is there a time slot for the meeting in Sanya?

R: And, I think you said that it'll be determined in the next while, is that?

K- Yeah, we have to get, first of all, our people are working in the background for it. We're getting, we're trying to assess, to get the permission. Because in China, like when we had a conference in Dubai, governments decide on the conferences, where and how. We can ask for it, when we get the permission to do. And then, we are planning round about March, primarily February, March was chosen because it's not that hot. This island is extremely hot, especially, I think it was April. And the other end, it's in line with Honolulu. So, it has that kind of climate and temperature. And it's not bearable for some people. (1:16) And it's a beautiful place to be in, but at the same time, there are two, three things will be done in next week or two, our people are working on it. And then we'll make the announcement on the place, and we open the time and everything else as usual.

Q: ... Hello Mr. Keshe, you've already explained to us about a schizophrenia, where there is more than one STM, then just one physicality. But in cases of mental disorders, such as obsessive compulsive disorder, where the person has mood swings, sometimes they're depressed, sometimes they're manic. Is this also related to the number of Souls, or would it be related to emotional changes? Thank you.

K- These are personal and to do with the emotional changes, with the physical dimension. And all these, in the coming time, will be understood by individuals, and it'll be resolved by individuals. You will come to understand the process, and you'll come to understand how to interact with the STP, to eradicate these conditions. These are manifestation of the emotion and the lack of interaction with different, what I call, sections of the fields within the brain of the man. (1:18)

It's... especially with this new non-dimensional reactors coming into operation, these kind of things will change very rapidly. The changes will come. You got to understand with the, like UBESUS, which we have in our Wellness Centers, the system set up for that, you still have a limitation of Gans's. With the new non-dimensional plasma systems, you tap into the Universal energy. And what do you expect of it? And what brings you the emotion you want?

You got to understand, we call it depression, we call it whatever, on a psychological pattern. We call it blindness, we call it whatever, physical, changes being an acne, or whatever else which we create, is to create an attention to receive fields. And how we use those fields. Once you understand this process, you understand that you are the creator of this condition, because you need certain field strength emotion or energies, for you to work out, or run your system within your physicality.

You could be depressed, locked up in one room, for days, for weeks. But, you have to understand the way you ate the banana, to create that little "seed" in your body, to attract the other 80% of the energy from outside, to feed your physicality, (1:20) you're doing that with your Soul, with your STP in your brain. When you create that condition of depression, or whatever, that seed allows certain energies which you need, for elevation of your Soul in whatever level, for the next step, for the survival of the physicality. There, you ate

the physical food. Here, you create the energy from that food to create that condition, because this is how you get attention from the Soul, for the STP. It's self-fed inside. Because you need it. Because this is how you see, you can control the Soul, or the STP. Physical depression and the rest, is manifestation of interaction of the fields of the two.

Then you understand, it's very easy, you chose a banana because you want a banana, you create that condition of depression, because you need interaction between the Soul, STP, what you absorb from the environment. And once you reach that point, you walk away with it. You can keep it for 10 years, 20 years. Because, this is the way you get attention, energy from the others.

It's very much ADHD (Attention Deficit Disorder), it's the same kind of process. We choose to eat, let's say, pasta every day. And from the same package, the same manufacturer, the same pot. We choose to take the energy from our fathers and mothers and brothers and our society by ADHD. (1:22) We are used to that energy and we enjoy that energy only. And we see a lot of double characters. At home the man is a devil, outside he's an angel and nobody believes that he is such a man. We've seen it with (?? Jeffery) Epstein. And then, to give it, you attract others of the ones who can feed you, and you live in that society, because it's the way you receive energy.

This is how we have to understand. For the physical life, we take food, we put in our body, as a source to absorb energy from the environment, from the Universe, for us to survive, another 80%, we do the same thing with our emotion. It's another seed we set to absorb fields, to get attention. And then we blame everybody else for it. And we take to every physical tablets, medicine and the rest of it. And gradually we understand this process. If you understand the work of the Soul, if you understand the work of the plasma, there is no place for mental institutions in the life of the man. Because, with fields you satisfy all the needs, I don't need attention. Because, I receive what I need and everything which satisfies, both balance between the Soul and the STP.

You'll find out the world of, and the books of the medicine of the man, it'll become a historical things, never be used. (1:24) If we understand how the energies of the Universe works within the man. We came from these energies, and in a certain given condition, it has materialized. Otherwise even in condition of material condition, it still follows and obeys the rules of the Universe. It cannot be any different. We are not special, we are part of the specialty. And this is how it works and we are now going back to what it was. This is one of the reasons we created gods. To target for certain things, that if befitted us, for us to be, to be satisfied. Half of, most of, the reason man made the statues and created different gods, was this, to find a source where, receive that energy from, for him to confirm he exists. This is why we go to churches and to the mosque with the others, "I'm like you, so we are in, I confirm, I exist."

And then you understand, all these illnesses are man-made. If you look at the religions, all built, the people who followed that kind of mentality, they are in the same position. And you see the followers, are still follow the same. You wonder why we have this position in Palestine. Because go back and look at the history. I always say, "Don't look at literature, look at the history." Who is the God of Jews? (1:26) And how they chose Him? Because the tribe was, in a way, lived a harsh life, didn't have anything, so they chose the god of ancient time, who was a god of murder, torture, god of pain. That's what Jewish, what they believed in, what they brought, the name they used, is the god of. It's the same as ?? Moses. They chose that god, they took energy that way, and we see it still today in Palestine.

The Hebrew name of the god they chose at that time, is the god of fighting and torture and deceive. And it tells you, but we never read. We don't want to read it, because it's too much. And so the Souls of wanting the same strength, follow the same thing. They become Jews, they become the others. And we chose our gods according to how we wanted our Soul be. And our forefathers, when they create us, they put that seed of that in it. Go and find out who the god of Judaism is, that they made it and they call it God.

In the ancient time, they chose him because they were so low, they were so, what I call, hated by the... themselves, chose this god, that it gives them fear-ness and everything else. Read in Torah, historic, the present Torah, just read it. The last thing that God said to Moses, "Teach your men and women, how to steal against rule of God, (1:28) how to deceive the Egyptians, to get their silver and gold before you leave town tomorrow." The teaching of God, the teaching of the Prophet Moses to his own disciples, read it and you understand the historical, it's in Bible. it's in Torah, it's in Old Testament, it's not made up. It says, "The last day, the last ?? (day before they) leave, I kill all the firstborns (of the Egyptians)." And then, you teach your man, and get your man and your woman to get the trust of the Egyptians, to give them the silver and gold, and then leave.

In the teaching of the book, teaches how to steal, and the nation, the people of the same race, still do the same. Because, this is the strength of the Soul, they joined in. It's the strength of the Soul, they accepted. And the Soul is still carrying on with it. That's why this tribe is like this. You, I don't know, laugh, you... whatever ... How can I put it? We look at the Iranian culture, present regime, Islamic regime, and Taliban's in Afghanistan, that they stone people, or whatever. Who did the... one of the first .. stoning was a way of punishment, during the ancient times, before Moses came. And who publicly, is in Torah, is in Old Testament. What was the first public stoning? It was taught by Moses. The first public stoning was done for an old man, (1:30) who went to collect dry wood on a Saturday, to have the fire to feed himself. They found the old man in the desert, whatever, he was collecting dry wood for fire. And they told to Moses, that this guy you told Saturday, nobody's (?? supposed to collect wood). He said, "Stone him to death." "You don't do." That's how he frightened people. Where's official religious stoning comes from? Judaism. It was done on a Sunday, the day after they brought the guy to Moses and said, he's collecting wood to have fire to keep the Sabbath. He said, "You don't even collect wood." So, stone him that the others learn.

And then we say, Muslims stone (people)? Or they do it in Iran, or they did it in Taliban. Jews have done it, it's in their instruction, they still can do it. Because, and it's become the path of life. Because they attract that kind of energy and it's embedded in the seed of their lives. Stealing, deceiving, killing is part of the last ten things that Moses and his brother did before they leave Egypt. He taught them how to get the trust of the Egyptians and get all the silver and gold before you disappear. It's in Torah, it's not made up. And they still do the same.

We always look at the facts. There is no sentimentality. It's in the history book. There is a lot of questions asked. I open this chapter to you. The past few weeks and months, and you understand, we don't demolish religions, but we look at the facts of the religions. The same as I brought up about Islam, I brought same about Christianity, we got Christ. (1:32)

So, you put that seed of deceiving, stealing and killing in the Soul, which now you create a child with it, it transfers to the Soul of the child, and then 3,000, 4,000 years later, we still see ?? .. stealing lives, robbing and killing, and that's their right. And we brought an end to it. The state of Israel will go back to the state of Palestine, very soon. By people, without fighting. By sword of peace, knowledge. And this is our wish, and

our wish we command. You will see how the things will turn in Palestine in the next few weeks. Because we decided, and it'll be done.

It's not the time of Ahmadinejad, where the... he is a Jew and he's trying to support his people, creating mayhem outside, it'll be the end of the State of Israel, no. The Jews will walk away from Judaism, understanding what they've done wrong. Ashamed to be part of, and then we'll see the change. There's a key to what's happening in Palestine. You look at it as a war, we look at it as the end of the religions undoing. You will understand soon. We ended up the war of the man for land, we end up the war of religions by themselves. Because if we do it, they're outsiders, but if they do it themselves, they ???. You will see in the next few weeks and months, the geographical pattern of the politics of the Middle East and Israel will change.

Then you understand the teaching what I'm telling you today. "Oh, how did he know?" You will see. We set it up to be, and it will be. As we ended up wars, we told you, now we end up the religious wars. (1:34) By themselves, by you as Knowledge Seekers understanding, and elevating the Soul of the rest. But they have to do with themselves, they have to bring the end themselves, themselves. And the key to it is Netanyahu. He will bring an end to the cycle of what Moses has started. And the Jews will walk away a lot of them from it, and gradually in time there'll be no more. But they do it themselves. He is the key to it. He is doing all these killings and everything else because the minute his Cabinet goes, he's in prison. Don Hague is waiting for him, and 2,500 criminal cases. He's just creating this war for himself, not to be put in prison, but in a way, he's a key to the end of the work for what is started. You will understand. There is a wisdom into this act. Even a few Souls suffer.

And then you understand how we attract, how we pass this generation after generation, because we put it in the seed of the STP, which creates the STM, and the STP creates that condition and behavior. Then you talk about depression and everything else, then you understand a bigger scale of the same work.

Netanyahu came to bring an end to Judaism, and you will see, you'll understand it when it happens. It all becomes Palestine by the Jews themselves, nobody else. And you'll see it in the coming weeks, what the chain... things are taking shape, exactly as we thought and we said it will be done. It has to be done by the Souls, physicality is too harsh. (1:36)

Any other question?

Q: ... Mr. Keshe, we are reviewing your old teaching on Friday's. So, on Knowledge Seeker (Workshop) number 17, you talk about that our Earth has a twin, our Solar System has a twin, and once they meet, I mean, there's a couple of thing is not clear for us when we're discussing it, is, we talk about in the future the man ... this, the, when we have give birth to a child, it comes from our Soul, and then, the rest of everything we talk about. But then, when you talk about our planet has a twin, and our Solar System has a twin, once they meet, we're going to be refugees in the Space. So it means, we give birth to a child in Space, no longer Earth exists. And you said, you and the Universal Community know about the time of this incident, but then, how everything is going to plan out, because it's a little bit confusion here, are we going to be staying on this planet, or there's going to be no planet?

K- No. You have to understand the truth and the reality about the work of the physical Universe. We call it a twin, "Twinity," in a physical dimension of the life, confirmation and formation of existence. It is the STM and the STP, that's a Twinity. And what, and how they interact, and how they decide to interact, decides the

physicality, manifestation of physicality. (1:38) The same is with a twin system, that's why the systems have a twin. Any Solar System has a twin system, any Galaxy has a twin Galaxy. That one is the Soul and one is the STP, or is the balance of each other. And, one time to another, they merge as one. You call it collusion of the two Galaxies, or collusion of two Solar Systems.

It's the same when I say, the end of the life of the man in the dimension of Soul comes, when the STP and the STM becomes one and a new life start. And, in a way, it's like an egg and a sperm. When they come together in a dimension of physicality. The twin systems exist, we know our Solar System has a twin. We know the cycle of their closeness, how often they come close to each other. And we see it in the physical manifestation increase in the number of meteorites and asteroids, which move to the center of the system which is the Sun. The pressure, magnetic field pressure, creates this pressure. And we know this cycle. And sooner or later these two will meet.

It's not matter of next year, next hundred years or whatever. There are patterns to the work and our Solar System is getting pulled into the center of the Galaxy, as part of the work, it's like the rain which is raining back in. And then you have to understand, our Galaxy is on the same pressure with its own Galaxy. So, not only the star, or our Solar System interacts with its own twin system, its own, one is the Soul and STP. But, the condition is, we know that for fact, scientifically we have data's, that our Galaxy will interact with its twin Galaxy. (1:40) And they said, they are in course of collusion. Because then it becomes one and creates a new ?? life. And, which one of these two will happen first, is for the time to see. Depends what field changes comes from the Universal condition, what Galaxies around us, will interact with their field forces, pushes this together, or keep it separate for a bit longer.

So, .. we look at the physical life, we have a body, in a magnetic field, as I said in the teaching of today, we have a non-dimensional plasma. That non-dimensional plasma is the size of our Solar System. There is no container to say, "This is the shape of our Solar System." The structure of the Solar systems are created by dimension of the field strength from the center and what the environment allows them to expand (in) to. And this interaction, even there are other stars and everything between the two twin system, it's there. And sooner or later, they collide. They collide, or our Galaxy will collide with its twin sister to become one. And this is what we call, "You give your life to a new cycle." Death doesn't come, we just change into a new cycle of energy. So, if you look at the teaching of the past, it's exactly, now you understand more of it, that's what it means, that's how it'll be structured. It's not tomorrow.

Q: But Mr. Keshe, you said we're going to be refugees, like it happens all the time in the Universe.

K- Refugees, refugees. There are two things, you have to understand the knowledge of the man. You travel the span of the Universe, and when you know there is no home to create the manifestation of physicality which you have today, you have to take it somewhere else. And you become a refugee, (1:42) because the home does not exist, by collusion of this. But is not anymore to jump into UFOs and try to get away as much as you can from the Earth, because the whole Solar System is collapsing it, when the two come together. So, you have to move beyond our Solar System.

What happens when it comes our Galaxies? Read the scientific papers which are published, and continuously getting published, on the collusion of the two Galaxies. Our Milky Way with another one. So, now all the things which are done, and created in these two systems, there are billions of different lives on it, have to be relocated. If you have the knowledge which the man is learning now, and you are aware of what is to happen, you move to another Galaxy. You move to another position. But where the Galaxy, this... the planet you

came from, doesn't exist anymore in that shape. It's as energy, of part of a new life. So, we become, what I call in the English language, refugees. Because there is no more home, home is gone. So, you are a refugee, for you there is no home, that's why you left Iran, you went to somewhere else. You know that experience. But, the beauty is, the home is still there, now you can go back.

And this is the process, this will happen, is without the doubt it'll happen. Those of you who have, or prefer the physical UFO, you get on it and you try to go as fast as you can away from the Solar System. Those of you who learn to travel with your Soul instantaneously, you are here till the last second and then, there we go. You already have found the place you are going to. But then the Earth, the beauty of the planet, will become a memory in the STM who left this planet. (1:44) As when happen to you when you die, you're still with the Soul, carry the knowledge, the emotion, the smell, the taste of this planet. It won't die, it's just part of another dimension.

Q: Mr. Keshe you said you know when it's going to happen.

K- Of course.

Q: Mr. Keshe, that's why you're teaching us transmutation, to be able to do this at the point it's going to happen. So, the transmutation, when we go, when we're practicing it, there's two thing I was thinking about. One is, you know, one we have is a mass, one we have is a weight. The mass is the one that...

K- It doesn't, the plasma does not have mass and weight.

Q: But it doesn't matter then?

K- No, it doesn't matter. You have a plasmatic field, which has a strength, and how it interacts with itself, it creates its own, what you call, field strength, you call it in the matter state, mass. And then, in totality of the environment, it has, it creates its weight. When it manifests in that dimension of field strength.

Q: Okay, and when we sit with the, we're trying to transmute, you said, you know, like in the back of the neck, this vibration starts happening. When the vibration starts happening, it goes for like 10, 15 minutes, and it keep going, and it heats up, but it does, it don't go anywhere.

K- Ask yourself, why does it heat up? Why does it heat up?

Q: It heats up because it's blocked?

K- Oh, you're still attached to physicality.

Q: That's why it heats up.

K- The heat is creation of dimension of physicality. Of course. What's the ?? ratio? What is the... Why does it happen with most of the people who have all sorts of depression and mental conditions, (1:46) which creates other things, pain on the shoulder? We see it, doctors running the Keshe Foundation system, they tell you, most of the people talk about the pain on your shoulders and the neck and it's going down. Why? Because the Soul by the neck is separated from the STP and the two interact, they are fields. And that residual fields released, is absorbed by the muscle tissue which are in between the two. And, a lot of time, when people say,

going through the technology, say, they have a pain and a strength, or what you call it, pressure on their neck and the shoulders, we understand why. Because, they cannot let the physicality go. They're still hold on to it, and the two interacts, you have this massive pressure, and the neck is the separation of the two. You have two different plasmas separated, connected together, by string, or what you call, the neck of the man. And both feed through it. One goes down to the stomach, one goes up to the Soul, or to the brain. And then you, when you are in conflict, you create the pressures.

Q: But you said the sign of it is a vibration back of the neck, the vibration happens, but as we go less attached to physicality, after vibration, what is it supposed to happen?

K- I don't tell you, you tell us. Where do you go?

Q: So it means I have to experience it?

K- Of course you have to experience it.

Q: But then when I sit to do the transmutation, do I have to think about the point I want to appear or no?

K- You can do, of course. Where do you want to go? You just... where?

Q: No, because I'm waiting to see where... I'm leave it to my Soul to take me where I like to go.

K- No, you have to decide where and how. And develop it and learn it. (1:48)

Q: Because you know how airplane goes to point of, for example, airplane goes from...

K- The pilot decides, it's pre-planned. You are the pilot. This is what I said from the beginning of it. You are the captain of your own ship.

Q: Yeah, but Mr. Keshe, you know when you go on a plane, the pilot has a point of destination on the map, like a...

K- You are, you decide that point. I want to be in Tehran, and then you'll end up in Tehran.

Q: But I don't have to know the logistic of it, just know Tehran, that's it?

K- Well, where you want to be in the hand, arm of your mom, your dad, and you go there and you want to be in the arm of your husband in Mexico, you know where the love is and where it's going to go. There is no GPS.

I tested this with my children, because they are my reference points, a lot of things in over years I've done. I wake up, they're in the other room, and I say, I would love to have you. I'd love to cuddle you. Within a minute, within seconds, they wake up, and they're standing next to me on the bed. It's so easy if you know how to communicate. And I do that quite frequently. Not to see, but to teach them why they are awake. What's the reason they are awake? Gradually, they learn.

There is a position in the head of the man where you, it's a physical position, where if you touch it, if somebody is asleep and you touch it the right way on the head, they wake up. But they don't know why they're awake. And they wake up in a natural way. (1:50) You know, you want to wake up your partner and you say, "Oh, wake up, there's a noise in the house." Or, "Wake up, I want something." Or, "Wake up, we are late to go somewhere." Yeah? If you know this knowledge, if you know where to touch on the head, they just wake up as they just... it's a switch, separates the Soul from STP.

And, I know this as part of the knowledge I have. I used to drive my brother crazy with it. He used to say, "Why do you do this?" I said, "Because I know you wake up and you'll be pleasant." He says, "I know I wake up, I feel fresh, but I don't want to wake up." And you separated me from something. I said, "Mozhan, it's time to go somewhere." "Oh yeah, let's go." And it's very... I know this knowledge from childhood, it's something which comes with me. There's a point in your body, on your head, that if you just touch it, allows the separation of the Soul and STP in time of sleep. And if you touch it the right way, you can put the Soul back to sleep. And I know this from very, very young age. And I used to drive my mom, my dad and my brother, and especially my brother, into nuts when I used to use it. It says, "Stop doing this, stop waking me up." I said, "Boy, we have to be somewhere." It's no use me, juggling you, shouting, "Get up, we go." He wakes up, he's at peace with the Soul and STP, and, "Okay, let's go."

It's a knowledge. And, the same way as you can separate the life. Read the patent, (1:52) in patent, the original patent, I put a death code system in it. How you terminate a life in a way you merge the STP and the STM together, to start a new dimension. Does not matter what they leave, they might not leave any physicality behind. Because I know the knowledge, and it's written in there for man to understand in the future.

Any other question?

Q: ... I was looking at a teaching from 10 years ago and it talked about twin Souls. Could you please explain us more about twin Souls? Does every entity have a twin Soul? What are their usual position? And what would be the behavior of the twin Soul during the transmutation?

K- Twin Soul we all have, now we understand. It's the STM and the STP. And, when these two interact, they create a third dimension. In a way, we have the mass, and when we put in the interaction of the mass with the environmental fields, we call it, the weight. (1:54) So, when the STM, the STP of the man interacts, you have the twin. The STP is the twin in dimension of physical life of the man. But, these two on their own create a third, or individual systems, like a marriage of the two, creates a child, if you call it that way. That, that interacts, has a creation of the balance, or has a balance with another fields of the same, which belongs to another Soul. And they interact, and they create that condition, what we call, the twin Soul. And it has no sexuality, its' not ?? a male or female, is not bad and good, is that position, is where the two follow the rules of Mitra. They share equal, they don't lie to each other, and they live a perfect life. And this is how it is. And this is what we call, the Twin Soul. And it's with all of us. One way or another, we are born and there is another field, and parallel to it, or it's created over time with it.

The STP has a specific role in operation of the life of any entity in the Universe. It brings the dimension of environmental fields into play of the lower order, and the Soul brings the dimension of the higher order. And this, this balance is always there. And that's what it creates the interaction of the two, which leads to creation of life. (1:56)

The STP attracts more matter state, physical dimension states fields. It's how it's created out of. And the STM brings from the Universal fields. But in between they have connection line, and in that connection line they interact, one feeds the other. This is why I keep on saying, "man has to learn to feed himself through his Soul." If you know that and you create that condition of not lying, not what you call, cheat your Soul, STP, you'll find you start feeding yourself. That's a love, that's what we teach tomorrow. Let's not teach, but you experience it tomorrow.

And that's what I said in other teaching, in the sessions of tomorrow, those of you who are already in it. They cannot be added to, because the number is fixed, that you were there before. Try to feed to your STP, from your Soul, and see how you feel. And in that process, how emotionally, in next few days and weeks you have changed. Don't expect to say, "Oh, I went there, nothing happened." See what are the consequences, the things which have changed in you in next few weeks. And then you'll see how much you have given. Is not that, "I tell you I love you and you grasp me and yes, I received your love." Is, "What you gave me, see what I do for you." How my STP changes things for you. And then you understand.

Then you understand the time and position of perfection. And how other Souls start abusing it, and then you find out the physicality and the STP separates. And they go different ways. (1:58) You have to understand how it works. Sometimes you come across it, And sometimes, in the process of absorbing the fields, by deceiving, you lose it, because you entered, you shared the wrong fields, you came to steal and you take it. And things breaks down in that way.

And sometimes, you are fortunate that it comes to you, at the field strength, because it's the same. It's what we call, twin love, what we fall in love with. But our true twin love is our STP with our Soul. They're in love with each other that their interaction creates us. Egg and the sperm. We are the essence of the interaction of these two, that becomes our physicality in the interaction with the world of the fields, in its environment.

And then, it's to the next condition we create as a partner and the rest of it. It's .. something we have to experience, and something we need to learn. And this is the part which religions denied us to understand, because they could abuse our dimension of physicality. Then maybe you understand why I said, "I'll take the stones and marble structures of the Vatican, back to Coliseum." Because, in Vatican, they abuse your Soul and the physicality is locked up and imprisoned with it. But, when you're in Coliseum, the STM and STP, once it's free, it is gone, it's free. There is no physicality to suffer. And they find each other to live at peace, and that's why I said, "I take the stones back to Coliseum." (2:00) And demolish where the abuse of the STM in name of the Church and the rest has come. Because that way, once the physicality is gone, the two love will reach and it's a freedom. This way, you are entangled for all that time. And that transfers to the Soul of your children, and you create the wrong Soul, as we see in the Jewish blood. Very soon, there will be people who will be ashamed to call themselves Jews. You will understand.

I was looking at the reports which are coming around, and I think today, tomorrow, is part of it, in the United Nations, I think, that the people who are the closest to Israel, South Africans, have taken the State of Israel to Hague as, for acting the most criminal nation, or what we call, structure. And, we have to wait and see how much the Jews push the other nations not to get a vote. But any nation who votes that, yes they can carry on killing other people, indiscriminately, then it's one of them. There is no veto right, it's all equal. Their ambassadors are running like crazy, offering everything American government can offer them, "We give you this and that, don't vote the positive in the way." Because, then, it will be more or less the first time a nation has been put as a criminal nation. It's unheard of, but now it's going on in Hague, is something currently is

happening. And it's put on the platform by the South Africans, who always stood by the Israelis. Their ?? destruction comes with it.

Any other question? (2:02)

Q: ... Hello Mr. Keshe, in the 329th Knowledge Seekers Workshop (KSW) and other teachings, you mentioned many times that the Earth is getting closer and closer to the Sun, which will lead to various conditions on the Earth, such as high temperature, plate movement, climate change and so on. You said many times that there's not much time left for us. Can you tell us how much time we have to prepare to leave the Earth, or evolve ourselves to adapt to the harsh environment?

K- It's a slow (adaptation), and nowadays they call it the global warming, and it's getting hotter by one degree, it's going to get hotter by 5 or 10 degrees in a thousand years. We are getting pulled in, becoming closer. We are on a spin, we are on gravitational pull. We are a speck of dust and the mother is calling. And it's got tentacles of physical fields on us. So, what they say, "Oh, it's a global warming and blah, blah, and... we had the time of the dinosaurs and the rest."

We cannot today, billions of years down the line, even if we find the eggs of the dinosaurs, which we can replicate and give them life, the dinosaurs today will never come to the height, the size of the billions of years ago. Because the pressure on the atmosphere has tightened, we are getting closer to the Sun. (2:04) And this does not allow, this compression does not allow big size animals, it cannot support.

The Calcium structure has changed, even though it's a Calcium as a bone. If scientists deeply go into testing and looking at the structure of the bone of the elephant today, and the dinosaurs of billion years ago, it's a different Calcium, a different energy field Calcium. And this is the reality we are facing, and we cannot change it. And we cannot. We adapt to it, we become shorter, we become more linear, we change our food diets, because other things doesn't exist anymore, and the energy of the fields of the planet changing, because of this approach to the Sun.

It doesn't happen over a day, maybe from the time you're born, to the time you die, it'll be one millimeter. Because 50, 60, 100 years is no time in the work of the Universe. But you go closer, millimeter by millimeter. And that closeness brings the heat, warming the planet, the waters evaporate. And if you know how to travel with the dimension of the Soul, it gets hotter, I'll go to one planet further out and start life there, till it gets the same conditions as the Earth. But because you live in the dimension of the field of the Universe, time is irrelevant, one billion years or one minute, it's all the same. Time is a creation of the man, according to his own understanding of his own environment. It doesn't exist in the Universe.

Any other question? (2:06)

Q: ... Good morning all, thank you Mr. Keshe, thank you Rick. Does it make sense for us to make anything in the physicality anymore?

K- Of course it does, it has a lot of beauty. You make a child, you enjoy the love of Creator. You made a child in dimension of physicality, and now try to see if you make a child with the Soul. And then you see, you still haven't learned, you really haven't felt the true love. You thought you love your children, because of their physical, they cuddle and they touch. Let the child of physicality touch you, you just go "nuts."

And there is a lot more. We always choose, even if we go in the dimension of the Soul, travel to another Space, if we decide to enjoy the environment, the way Mitra enjoyed the Earth, and give it dimension of physicality, you'll want to become physical, then what happens there? You become a resident for a billion years or so, and then move on. And you split, and you spread. It's how you divide it and you make it in the life of the physical man, takes a long time, in the life of the Soul, there is no time.

And, if you go by the religions, again you find hypocrisy in other ways, and we believe it, and if you go by your Soul, you don't need to believe any religion. And how you, what you call, expand, how you divide, how you manipulate the conditions to multiply. And how much lie you tell about it, and how you did.

This is again, (2:08) I go back to religions, going back to again Judaism. If you read the Torah, original, there were about 70 people with Moses. Or, there were 70 of them, of the tribe which brought what we call now, part of Judaism. And, in Torah it says, they were left in desert (?? when they went to Egypt), or they were abandoned for 430 years. And, when Moses took them across (the Red Sea), there were 3 million of them, all the same tribe. And he opened the seas for this men to go across. And then he folded it on the pharaoh (and his army chasing them).

All of it is nonsense. Today knowledge tells us it's absolutely fairy tale. Because you, we know how many children can be reproduced. And how, if you say, equal men and women, and they're all (sexually) active, and all the children survive, scientifically, data tells us they cannot be more than 10,000. How did the Jews became 3 million in 400 years from 70? All lies. Does not exist. But it's in Torah. We have to accept it.

But there's another question in the faith of the man. is that we have a religion which everything about Moses is written in the books of Torah. This religion has come to birth sometimes in the life of the pharaohs, Egyptian life, because it talks about it (in the book). But if you had a pharaoh disappearing under the ocean and the sea (Red Sea droned Pharaoh and his army), why don't we read it in Greek mythology, in Greek history, in other histories, (2:10) the Persian Empire, in the Romans, and all these. There is no indication of such a thing, that a pharaoh disappeared. Where? What's the truth about it? There is no truth about this. And we just accept because it's in Old Testament. These are stories which we were set to accept. And as the historians said, by statistically, if there were three million Jews, and by statistical calculation, there must (have been) be about six, five hundred thousand, six hundred thousand of the soldiers, men, who could be armed, who could defend. (Why couldn't) this six hundred thousand (army) couldn't (with) stand the pharaohs, that they had to escape from him.

Now you understand, history does not match what is written into the holy books they call it. And I look at the history. I live the history, not the (literature). Nothing in Torah fits the reality. It doesn't exist. And we have accepted it. Because in no books, in no historical papers, in no stones, in nothing which man has, speaks about 3 million population in the time of this guy called Moses. What is in Roman time? Where is the Greeks who had all the... Where is the Babylonians who had all these papers and stones and things we have? There is no name of any tribe existing in that time and a pharaoh disappearing in the (Red) Sea, with all his soldiers. It's all fabrication. Otherwise we would have had other confirmation. It doesn't exist. It's just made to make a man great, and then abuse it.

You are Knowledge Seekers. (2:12) Go into the books of the history, all the stones, all the things we have found out. Except in Bible, which says all these calamities, there is nowhere else. If a king has disappeared with all his army, we should read it somewhere. We should find it in historical stones. There should be something of it. It's just in there because it's written in there (Bible) and we have to accept it. Somebody had

a good drink and wrote something. There's a lot that dismantles the structure of what we accept as Judaism. That's why we bring an end to this, by themselves.

You, as Knowledge Seekers, you're all scientists, well educated. Go into the history of the books, stones, and everything, and historians, show anyone that mentions about 3 million and 600,000 soldiers running away from the pharaohs. We don't see it anywhere. It's just because it's written there and we have to accept it. Where they were put into, and they died of hunger, and they lived 40 years without any food. It's one of the historical books which tells, if you put the 600,000 soldiers onto a marching of four line soldiers, it takes 600 kilometers. End to end of the soldier line, just the soldier, forget about the other 3 million. Covers the whole Sinai Desert, you're at the water, and either end, you don't need to live in a desert ???. It's all built up to give lies, to the truth, and we have accepted, because the Jews say so. Historically, there is no facts, there is no record of it. Not in Babylonian time, not in the Venetian time, nothing is said about a pharaoh disappearing, (2:14) not even in Egyptian history.

So, you have to understand, we have to investigate the truth. It's in the writing of Bahá'u'lláh, bless his name, he says, "independent investigation of the truth." And I did a lot of independent investigation, and the truth is not there. Not even about the Bahá'í faith.

Q: ... Mr. Keshe, I was reading about them, about the Jewish people, they call them, "The Chosen One". Why they call him the chosen one?

K- Oh, because they wrote it to be the chosen one.

If you look at the history of the Christianity, if you look at the history of the Christianity, in the... no sorry, in Judaism. If you look at the books which makes the Jewish religion, the first books appear, the first writing as such appears, 800 years before Christ. The book which is all relied on, which is the cornerstone of giving Jewish religion a foundation name, is written about 500 years before Christ. Which was set by the Iranian king to write a book about these tribe, because they were part of Persia. The book which the Jews rely on, is written by Persian Jews, historians, 500 before Christ, giving shape and dimension to who Moses is and the rest of it. Before that it doesn't exist.

And if you look, this is what I can explain to you, before I said, "One day I unravel it." If you look at in the Jewish principles and works, there is a lot of hints of Mitra, which they ignore. Because it's written by the Persians. (2:16) The Old Testament, go and read, always look at the facts. Independently investigate, then you understand. There is no book, referring to Moses as we call it, before 500 years, when the Persians start writing it. The Shah of Iran, the King of the Kings, the God of the Gods, as two Jewish people followed to write a book about this, because Palestine, where is Jerusalem and the rest are part of the Persian Empire. He did the same with other religions, other nationalities or districts he was ruling.

Read it, the two people who wrote the present book of the Torah, it's two Iranians who were believed in Jewish path and, what you call it, ?? Hafez and the ?? .. (Persian King) ordered (them) to write .. their history, that it stays and doesn't disappear. And now it's become a noose around the neck of us, that if the land is given to them by right. And we see the mayhem of today in Palestine.

I told you one day I'll open the truth about these mayhems and lies which is brought to us. And if you look into the principle of the Judaism, it's the principle of the Mithraism. Because it was written by the Persians who understood. The King is written because it was part of the Persian Empire. And ?? Kourash and

Darouse ?? (Cyrus the Great and Darius) always was the path that ?? has brought this, that every district we rule has to be independent, has to be appreciated, and has to be respected for what they believe. They don't have to all become Mithraism. And then, in that process, they just the belief of, because they were Mitra, most of them believers. (2:18) We saw Christianity coming out of the Romans We saw Judaism coming out of the Jews, and what we call, the rest of it.

Historically, a lot of things, like the river of blood, if it was such a thing, if it was such a hunger for 40 years, then there were no blah, blah, blah. Where is it? Why it is never recorded anywhere? Show us, scientifically, historically, where it is. To me, as a researcher, as somebody who does a lot of work, research, and on the other hand, I carry the Soul, none of the things written in Old Testament stands on its own. There is a question even about the man (Moses) himself. But I don't go to that depth.

Even we follow the correction of the text, the 10 Commandments, we add to it. Even those 10 Commandments, which is in Torah, is a cornerstone of the tribe which the Hebrew, the lot, who became now the Jews, copied from another Babylonian king. It's not theirs. And it was there 2,000 years before Christ. He made it his, but in a way, it's the instruction of the Creator. I told you, we are not prophets. We are teachers. And the teacher has to teach the correct thing. Otherwise we carry on with the same fallacies.

Q: Mr. Keshe another thing is puzzling is this, Jesus was Jewish and then when he came, in Torah it says, "They were waiting for Messiah, they were waiting for Messiah." So Jesus came, (2:20) and then some of the fallacies, some of the Jewish people thought, they knew he is the Messiah, but then, my question is, if the Messiah came and they killed him, why the Jewish didn't become Christian, and then why another ?? branch created?

K- I tell you, I tell you something very interesting, you start with this... Moses was never circumcised, but he brought circumcision. This is a joke between the prophets, call it. But Christ was a Jew who was circumcised and promoted non-circumcision. The Jewish religion brought to kill and take over everything of the others. Christ went the opposite, to give to the others. A lot of people who had to deal with the Jewish tribe, had a problem with their stealing and dishonesty. And we still see it right across. All the wars are promoted by them. All the killing promoted by them.

Read the ten things which Moses kept on giving to pharaohs, and everything was a punishment of killing, and killing, and killing. There is no love of God, and only the Jews were not killed. Only the Jews were not done. How come? There is a very big question, as I told you about birth of Christ, and the Virgin Mary, and him on the cross and the rest. There is a very interesting point about Moses. We read, we've been told, and it's only in their Torah. My grandmother will turn on her grave, my family, (2:22) all the Cohen's are just going to turn, take his Soul, but doesn't matter, I'll give it to you freely.

We read about Moses to be found in the basket, because there is. Read the history book. Three hundred years .. before that, a mother who had a child, who, after three months of looking after the child, knew, cannot do, puts it on the basket and puts it on the river, and gets picked up by a farmer, by the fisherman, and then he grows up, and then he becomes a king. And the king ruled for 48 years. This is his life story, now it becomes Moses'. Never happened.

Or, how come again it's the story of the, what I call, the spider? (King David and cave and spider - again in Koran). And we have to accept this because it's written in Torah. Historically, there is a king in Babylonian time. In that time, hundreds of years before, this was the history which was in the culture, said word by word,

mouth by mouth. And then they made it in writing to be .. Moses. Never happened. Happened to a man who became a king. And they made the king to become a prophet. Even though Muhammad, bless his name, in Koran, confirms some of these. He says about the milk and honey, promised. This is a promise by the "devil god," they call it, who promotes killing, that if you kill, I give you honey and milk in the other world. And Muhammad has explained it. But it's not Moses'. It's this prophet who they believed in, and became part of, and they wrote it as theirs. There is no reality in the Jewish, what I call, (2:24) writings, and what is followed by what is historically in the books of man. We don't have. Show us. Very simple. Show us all these things.

But historically, we have in the books, in the historical stones found, that there is, there was a king, who the mother, he wasn't a king, he was from an ordinary mother, who could not support the life of the child, and put in a basket, at three months old, found by a fisherman, and the fisherman brought him up, and when he became at the age of, could be puberty, whatever, to run his farm for him. And from there he became a king - a just king. And how come it matches to the other one (Moses)? It's made up, it's taken up, it's put in.

As a Jewish blood brought from what we call, reading historically, none of it matches. We don't tell it's a lie, we don't tell it's fabrication, But, none of the data comes in, where is the 3 million? We cannot scientifically, we all live today, even if like rabbits we do, with the historical math, takes 9 months, even put it at twins, and every single one survives, we can't be more than 15,000 in 400 years. Impossibility, where did the 3 million come in? It doesn't make sense, and it has to be scientific. We are humans, we work on a database. Unless God send three million from Space to become Jews. And why did they run with 600,000 soldiers from the pharaoh?

Deceiving is part of the structure of this path. (2:26) Rob your neighbors, tell them to trust you, to take all their silvers and gold and tomorrow we escape. Why do you need silver and gold when you're going to the desert, to do what with it? This is what we have to understand about history, and man works by history, not by what is said by word of mouth. It's in writing at a time and a date.

When I tell you we bring an end to this, because we know the truth. We understand the facts. And again, when you look into Judaism, the way it is, the way... The name of King of Persia are stated over 40 times in Torah. One of them over 25 times. If this God of whatever, what man of whatever, existed, a thousand, fifteen hundred years before Persian Empire, how come these guys slip in? Where is the truth? Unless it was written by them, as a respect for all the ?? (help given). This is the biggest problem we have with the Persian culture. We always gave right to everyone to believe (in their own gods), and we always respected. And this respect was abused, and this is one of them (the Jews fabricating their own scriptures). I don't say anything, I don't say I'm anti... whatever, or whatever. I go by historical papers, historical documents, the data from the time, not what was said. What is written on time counts. And some of these things, these stones have been found, they're in European museums, but they don't want to show it to you. (2:28) Some of these stones which confirms all this data, sits in British Museum, in French and the rest. Because when they conquered, they took all of them (archeological artifacts). It's not something which is said, "There was a stone." They are here in the West. And puts a dent to it.

But they don't let it happen (come out in public). It's like the same as Vatican, doesn't let allow anything to come by Mithraism, because it's matching things (Vatican erases knowledge about Mithraism from Internet).

If you go even, we call it, the Jewish celebration of, that all the pharaoh's soldiers died, and they celebrate it as one of the biggest festivals (Passover) on death of other people, for them they celebrate, because they mass murdered (them, Egyptians), the same as their, the celebration of their flowers, which we have in the Jewish

religion, is when what you call it, Jewish became slave and then became a Queen, ordered killing of 70,000 Iranians, who they... that was they thought they're going to do something with the Jews, and they celebrate it. All the celebration in Jewish religion is a point of death, how much they killed, they celebrate. Look at their celebration and what they celebrate.

One of the biggest celebration in Jewish calendar, is the killing of the pharaohs and thousands, hundreds of thousands of people, which never existed, and they celebrate "fake on the fake." Just go on it and read it, and then you understand, it doesn't make sense. And that's why we bring an end to it, because we know the truth, by historical documents.

Those days there was no communication, there was nothing, they could tell and do what they like. Now they can't. You believed in fake, now you have to open your eyes and understand the truth. (2:30) And that's it. Even if you look at the, the principle of stoning in Islamic religion. It was in that region, Babylonian area and Palestine, where stoning was very common. Not in the rest of Africa. And Muhammad came from that area and he brought it to be, because it was accepted in that part. This another indication that Islam comes from the place of the birth of Muhammad within Jordan, because that was a practice in that area. Nobody else in the Middle East practiced stoning. And how is in it, and the first stoning we know, done by Moses on an old man. Just picking dry wood. It's in Torah, not my word. Read it.

How can you believe in fallacy? Unless you want to fool yourself, it's what we've done with our Soul, this is what we've done with our physicality. We have fooled it and we imprisoned the Soul. Because it suits us. Historically, does not make sense. Historically it's not there. Mythically, it's there. If you read the historical papers, documents, or stones and claims we find out, you will see all the things which you read in Jewish Torah, is a history of talk, and the "cult" they believe in, as whatever you call it, is the blood of wine in Greek, what you call it, literature. (2:32) He was always drunk and he's always everything else. Read it, they chose the story of his life, the Greek, the God of wine, drunken man, and he's become the rule of the Torah. Because, these stories are written on the stones, and we have access to it. People didn't know these stones exist, now we have it historically. They have been dug out. You see, what he did as a drunken man, written nearly a thousand years before the Torah was written, now has become part of the Judaism practice. The drunken god.

Read it, understand it, and you understand how... I said, I'll dismantle religions by their own history, not by making accusations. The god of the wine, and man who's always drunk in Greek mythology, is quoted in all, because they were all in the same area. They all had interactions and they told the stories .. by mouth by mouth (by word of mouth). And this is what we have, a fake religion.

But, it's embedded in the dimension of STP, in the behavior of the, what I call, the descendants of it. Now you... I open the books of history and go and check. Historically, scientifically, nothing adds up. But, there's in... you know, we call it Shabe Yalda (eve of birth of Mitra), we sit on the table the longest night and grandparents tell stories to the grandchildren of whatever they wanted to make up. This is one of those, we call the Torah. (2:34) Made up, followed up and killed for. And, we bring an end to it. And end to it by truth, by independent investigation, go and read. The stones, tablets and other documents which Greeks, Romans, Persians and Babylonians have left behind. And then, what is from the Palestinian areas, there is no indication of 6 (3) million, it cannot be. It's writing in Torah, when you... Those people could add, they never do. In literature they could not do it, but now we can do it. We have scientific data. 70 people could not become 6 (3) million, impossible it is. Then you understand how the rest is made up to suit, and it's all the story of a drunken man - god (from Greek mythology).

Any other question?

Q: Good morning Mr. Keshe. Antonio from Australia.

K- ... How is life ...

What are we harvesting now? (2:36)

Q: ... Not much fruit this year for some reason, it was a, I don't know.

K- A lot of peas?

Q: No, I don't know. The weather wasn't very, we didn't have enough chill factor in the winter. I mean, everyone's complaining. A friend of mine just before was saying his watermelon crop is 40% down this year and the price is down as well, so it's not good either. You know, this is the life of the farmer. And from day to day, we don't know what we're getting.

K- That's what the... make a greenhouse, you dictate the environment. I think you got to speak to Jim, huh? He has control over everything under the roof.

Q: Yeah, he's doing well. Yeah. I do keep in touch. ... Just ... I was looking at the theory, not theory, of the planet Earth moving slightly closer to the Sun and that made me think that as we draw closer, say for example, the other planets like Venus that are closer to the Sun, does that make them more aware, more in touch with their Soul, because they're closer to the Sun? And we are in that journey, or in the process of becoming aware of who we are, around, you know, I'm trying to...

K- I understand, I understand what you're trying to say. Maybe look at it the other way, as we get closer. (2:38) We are interacting (with) stronger fields, a new dimension of fields, and that new stronger fields brings us new intelligence. That's possible, not possible, probable, no, most certain. And part of our intelligence doesn't come out by that, it comes by the fields, because we absorb different strength fields, which brings us different intelligence. And yes. And how we interact, we are small speck of dust in another... on the back of another small speck of dust in this Universe. And on the back of a smaller and smaller and smaller dust in the whole of the, what I call, Creation. But each one has given the same chance to survive. Yes, it's 100% part of it. You're receiving higher order, and higher order fields brings different intelligence. And, yes, without the shadow of a doubt.

Q: So, the Sun itself, would be the highest entity in our Universe?

K- In this Solar System. But still has connection to the Source. As I always say, the Sun, the Earth, in the condition of creating a plasma, now where we understand, and the STM, have the same access to the knowledge of the Universe as we have. Because, it's no different.

The same field, you know, you say, talking about the rain, you say, the same environment the rain, rains on you, and your next door neighbor, and the rest of Australia. So, you are benefited by that, and in the Northern Hemisphere we have a mild winter this year, and we're all touched by it. (2:40) And the beauty of the God rains on all of us, the same, in the same environment. So, it cannot be, because it's just how we understand it, and how we separate it. How we manipulate it to our own advantage or disadvantage.

Q: Also you spoke about, I was listening to you, about stoning in the past and that, and that sort of brought me to the present, where they're stoning with bombs, and buildings are coming down on people. So, it's a different form of stoning, as we'd say, ... very terrible, terrible stoning.

K- We're seeing an end to it. Keshe Foundation International is on the process of negotiating peace with the world leaders. Very soon you'll understand what I'm talking about. We are using the technology in exchange for peace in a different way. Those Knowledge Seekers who work with me very close, they know what I'm talking, because they are involved in it with me. And because of the access to the new technologies and new knowledge, we have brought our attention in the governments in a different way, through the, what I call, the "channels." And these things soon will stop. Because I have a beautiful partnership, or very understanding, but we understand their position, they understand our position. With Chinese military officers, or people who decide with us, and we are all on the same tune. In that, we'll bring that change. (2:42)

It's a pleasure to work with the high ranking officers in the Chinese army, so closely, because we don't need to hide anything from them. They don't hide anything from us, hopefully they do, but their own way is to respect international, what you call, integrity. But, has opened up new channels of negotiation with the other governments, other positions. And, many of you Knowledge Seekers in the background, you're working with us with this, it's not me. You are... it's you who's setting up all the contacts, references, connections. And many, many Knowledge Seekers, on a private way, are working with us, as us together, and bring in this position.

It's not just that we say, so the Knowledge Seekers who are online, who are listening today, they know what they're doing. And how they are ?? realizing and bringing that position to one more closer, one step closer to world peace. It's not talk, it's a lot of work goes on. And it's done by you Knowledge Seekers, you are the ones, you are the link between us and your governments and national governments and the rest of it. It's coming into fruition but all have to mature. And there is a reason we go different ways and we choose different things.

I said to a Knowledge Seekers, one of our closest Knowledge Seekers to us, very recently, I said, "We are exactly where we should be." We will bring the position to be governed by our Soul, and by the knowledge and technology. No more by "gun policy." And you will see it. It's a lot of work. A lot of work is done by a lot of Knowledge Seekers, in bringing this position, it's not talk, it's not people just going, (2:44) "I know a President, I know a member of the Cabinet." These group of people close to us, literally working with world leaders, literally working with the structure which controls, brings our knowledge, brings their knowledge, and we're shaping it, in a very nice way. And I think I gave you a hint, in the first part, that in the conference in Sanya, you will see different scientist, military and non-military, and government, in the conference, not only from China. We have invited them to be part of it, because we'll start showing things. And a lot of Knowledge Seekers, you all had a Christmas and holidays, it hasn't stopped for us, I still work every day. And, because they don't have a Christmas, they don't, it's not their holiday time. But, it goes.

We see a lot of changes, and it's about to happen. One of the, one of the major changes we will see in a short time, coming up time, is the end of the, what we see in Palestine. We'll get the Palestine back to be a Palestine, the way it has to be a Palestine. Where people used to live, tribes used to live. And this crazy guy thinks he can bring, he wants to be known as a next, what you call it, "savior of Israel," but actually has brought Israel to his demise. And it was his job, that's why he was born, to do that. His job is to bring it to an end.

Q: It's just painful, very painful to watch and it has a profound effect on me.

K- You're not the only one. You're not the only one. We on daily basis, have to handle this. And there's so much you can take. (2:46) But, it's, it's... I always said, very recently to, with the Knowledge Seekers. I know how I can and understand and handle this, because I had a training before in nineteen nineties and nineteen eighties, with the split of Russia, and seeing how things work. And now, I understand how the armies work, how the generals work, I can talk and work and teach our Knowledge Seekers who work with us, how to be tolerant, how to be, how they work. Because, in the time of nineties when the East opened up, we were so close to the, who are now the world leaders, became world leaders. Because of our training, commercial, but now I look at it and I say, "Now I know why I had to do that, because I had the training how to do it now." It was just a pre-run and now it's a test. I see.

In, I even tried to protect big nations in sharing the knowledge and getting the others to accept that it can be shared. It's a very peculiar situation, very, very peculiar, especially this week has been one of the strangest week for me for decades. I used to negotiate between British government and Russian satellite countries and all sorts of things. Running between "Downing Street" and different capitals in... trying to keep the Eastern Block opened up and hold on to it. And I see the same situation now. Even the big powers we have to bring them to be a player, otherwise it'll become a mayhem. (2:48)

And when I explain to, to the other world leaders why I do it, and the way it has to be done, they say, "You planned everything, you're planning to start ruling this planet." I said, "No, I give the freedom for people to rule themselves." And it has to be correct. To get the Americans to find out that they're lost in Ukraine, they're losing in Palestine, and then they go into one direction, trying to force their superiority, in a different way with other wars, or join us to work with us that there is no superiority, we are all superior. This is one of the biggest jobs now we have in Knowledge Seekers is battling with governments at the moment.

You have to understand, one of the biggest nations on this planet, getting the second humiliation, that actually took, they're trying to stop the humiliation in Gaza. They've taken over the, what you call, Israeli army. Now the Israeli army is working directly on the instruction of the White House. They have bypassed, what you call, Netanyahu. You will see, you'll understand? And there's a second defeat for them, after Ukraine, when Russia, now we don't hear much about Ukraine, because it was so big, now they found out, they sold, they did.

Now, we have to find accommodation, that America doesn't feel humiliated again. So, we have to find a place of accommodation for them, to be accommodated, to be part of the game. And we are playing, or we are working in, with that, with two or three governments, trying to assert this, bring enemies together to work as one as friends, at least in fields, so we become, build up their trust. You'll hear about these things in the results of what we do in the background.

If America feels the second failure, (2:50) they had a Vietnam, now the Ukraine became one, they're trying to keep their face after spending billions. Vatican lost there. Now again another loss in Jerusalem. Or they have to show they're still in power, so they have to create another war somewhere, which we know where they are planning to do. Or, we bring them in, "Okay, you lost, it doesn't matter, now we work together." And this is something which we are working extensively with two, three governments to bring about, to bring Americans into play. Not to... because if they go through this second phase of humiliation in Palestine, they'll lose control as a world leader. It will not work anymore, unless... and they'll react. They will start kicking

somewhere to show their power in another war, and our job is to stop that, and we are working on it. And thanks to the Knowledge Seekers in the background, who are working with me so close.

R: Maybe we should just give them Lichtenstein, or one of the smallest countries of the world, and that'll make them feel good, like they've conquered something.

K- No...

R: And that leave the rest of us alone.

K- You have to understand, the decision makers, the ones who push the buttons in Washington, are Jewish people, and they do everything for their own benefit, they kill. It's the way, it is the god they believe in. The god they became to believe in, is a (tribal) god of murder, killing. Read about the god you call, whatever.

R: I couldn't believe that the US okayed the last shipment of, you know, millions of dollars of arms to Israel, and they didn't even go through their Congress and through their voting procedure. They bypassed everything using some special obscure law. And because it's so called emergency, and it's such an emergency to get these bombs out, (2:52) to bomb that area. And that's...

K- Yeah, you've got to understand, Rick...

R: I just couldn't believe it.

K- Yeah, but it's not all innocent from the Palestinians. They are at it as well. It's not all one-sided. Both sides are doing damage to each other. But one is more well called, the other one is hidden, because Israelis cannot say, "We lost hundreds of soldiers." The, what they call, 'Phase 3', now the Netanyahu won't do it, the American pushed it from Northern Israel. The American forced a new movement of their (Israeli) forces, not Netanyahu. This guy's bent backwards to become the Messiah of Israel. But he brought Israel to actual end. You will see very soon.

Q: It's interesting, South Africa has stepped up, because they have gone through Apartheid and now they are speaking up. Which is interesting to see, that of all the nations, South Africa has, you know, wants...

K- Yeah. But don't forget South Africa was one of the solid grounds for the Jews. For the Israeli government, always relied on South Africa for everything they did. And now it's not there, because of the change of the understanding and animosity. And this situation could have been solved in a different way, but it couldn't be solved, because he had to bring an end to this, the, what you call, in this situation, and bring in Palestine to be one again. You will see, we partially know what is to come to happen. We are instigators of it, we know it always happens the... (2:54) mostly the way we plan it to be done.

And we hopefully will see and end. And this end of this, it brings a lot of depletion on the assets of the Vatican, who is promoting wars. You say, "Out of nowhere, arms going in." because all the Jewish, all the Vatican money is gone into this. And there's another superiority to bash the Iranian, what you call it, Shia side, because they are supported by that side. It's a religious fight, it's not a national fight. And we sit in the heart of a lot of, what you call it, Pope spending money.

Q: Yeah. I'm just... I'm hoping it, that peace comes soon and...

K- We know it comes soon, but you cannot do what was there, then they go and find another reason to fight. If they demolish it. If you commit suicide, nobody can put you in prison for murder, because you done it to yourself. So, let them hang themselves. We are just creating the condition for it. They're not aware of it, but the condition is certain, they fell in it.

Q: I think the Americans, their heart is about to waken. Because I think, in general, they're good people and when, once it turns around and they join the rest of the community, work together as one, you know, I think that they will do things bigger and better than some people, because that's how they think. So, I'm hopeful that America will come round and sit at the table.

K- I think it'll come out of no choice. (2:56) It'll come out on... if we don't act the correct way, and Keshe Foundation is deeply involved in it. I spent hours and hours, even if you... I asked for extended break during today, was because of this work, in what we are setting up in Palestine. And with the Americans and the Chinese, it's part of the work, it doesn't stop, day and night we're at it. And that's why I took a long break, and I said, "If it goes, carry on." Is that we cannot let Americans feel humiliated in Palestine. Even they are trying to wipe them out, with what happened. But, in essence, we have to use this opportunity to create another condition for peace, equality. And this Palestinian situation has given a huge, huge boost to that.

I know a lot of people are got killed, a lot of people are suffering, but we always, with these things, came to a better result, and a better understanding. And I'm sure in next 6 months, 12 months, we'll see different structure of the work in Middle East. A very big... and China will be a principal player in it, but we'll see the hands of other nations in Middle East will come, and it'll build up, and we'll see.

If we resolve the situation with the religions in Middle East, in Palestine, in Jerusalem, and we all understand, we're all living a fake religions in a way, in different ways, then we find out there is another solution, and we find what we call, the essence of the Creation, become all understanding what the God is, and what the Creation is. This is the "promised time." (2:58) The peace comes, the promise peace comes, when we all break from the same ??, and there is no religions, no nationality, we're all the same.

I was saying to a Knowledge Seeker recently, if I live in Linz, or I live in Vienna, or I live in another village in Austria, nobody ask me, because I'm in this nation. But if I go to Germany, they ask me, "Where is your passport? Where do you live? What do you want to do?" And, when we make "One Nation" out of this planet, the way it's structured to become, nobody asks you where you live, what taxes you pay, where you are. It becomes a collective effort by all of us, for all of us. Then it doesn't matter where you live. And then you understand why we set up the Universal Council and the Earth Council and the rest of it.

Q: Well, let's say we have to view the world as one big family, or we're all connected, you know?

K- You think this is a problem? The biggest problem is for "Mitra's daughter" to sort out. And that is how to get this lot, now they became "One Nation," to become "One Universal Community." That is her headache, not mine. I always said to my father, and he used to argue with me, I said that, Jews gave no right to women. Christ brought a balance. Mohammed gave half, the Bahá'ís brought the equality, and the next one is a woman, and then we all have to accept, and it's here, the truth has come.

?? The history of life is written. It's not hope we are working on it. It's not me, there are Knowledge Seekers on this teaching, they are part of it, they know who they are. And they're working with us, relentlessly,

negotiating. (3:00) I teach them how to negotiate, I bring them to how to talk to, understand the way the world leaders and military people think and work, and build it up. Because it's a training I had, I have to, as a teacher to teach. And they're learning, and we are seeing a lot of good results.

But there's one thing for sure, we see one Palestine as one nation, irrespective of the color, race and religion. Very soon, very soon we see an end to this mayhem, created in this area of the past 2,000 - 3,000 years.

Any other question, or shall we call it the day?

R: There's always more questions and there's about half a dozen in YouTube, but I've copied them over to a text file and we can introduce them next week, if you like. Some of them are worthwhile questions, so they might take longer answer.

K- Ask one of them. ...

Q: ... Can you tell us a bit more about the life in the Universe? What do the Universe people do on a typical day?

K- Well, that day could be a thousand years of your life. Depends how they calculate the days, how the cycle of life is set. And, I've never seen any factories. Never seen any judges. Never seen any production line. Never seen slavery. But as they go through processes, they learn and they adjust and they do. (3:02) It's a matter of interaction and peace. We still have conditions which are created by physical interaction of the fields, which are natural processes.

And when I see these Star War games, galaxies fighting and I say, oh my God, this is the human mind, that's the only thing they know, how to kill. These things is resolved in the Universal Community. We still get races who want to show they exist, but the teaching of what we brought up becomes part of the essence of the knowledge of the Creation, and they learn from the beginning. They go through the evolution of the knowledge, but not the way man has done. And, what I call, "the four wheelers," we call them. And, it's peaceful, it's what you do when you sit in the sun. You're on holiday. Enjoy, you're calm, you're with the others, they enjoy your presence. And it's the same, you're in a permanent holiday in Space. Because you don't need to do anything to steal from anyone. And if you give yourself manifestation of physicality, it's for you to enjoy the time without harming the others.

And so, they say, I call it, they call it, land of honey and milk. It's like a holiday time. You're there to enjoy the existence of your Soul, and at the same time, give pleasure to the others. And enjoy here on Earth, we enjoy the rays of Sun, we sit on there. When you travel in the dimension of Soul, you enjoy the rays of the love of the Creator, and you warm yourself up to it. (3:04)

R: Would there be, would there be any art or music involved in that situation?

K- Yes, fields always create noise, depends how you want to create it. Listen to the noise of the Universe, depends what part of it you want to listen, it's always a music. It's a fraction, it's a friction of the noise of rubbing fields together. We hear it, you... most of you have heard it, if you've been with us in some of the, what you call it, Friday sessions. Most of you must have heard it. Sometimes you hear a heartbeat, sometimes you hear a whistling noise, these are from the fields, not from us. Sometimes we hear, I hear it because I know the noise coming from the machine, where it comes from. Sometimes the interaction of your Souls

with our system, you hear it. And it's there, feels they rub, it's like two hands, they make noises. Maybe you want to strengthen it, you like pop, you strengthen one side of the plasma and you like classic music, you strengthen the other side. It's a very much, what I call, Caribbean life. There's always tomorrow, you don't need to rush. It's an island, you cannot run out of it, so you better enjoy it while you are here.

Shall we close it?

R: I just, just wanted, it occurred to me. But there's also the idea of being in the position of service as well, in all of that.

K- You always are. You always are. (3:06)

R: So that's the predominant kind of viewpoint, you might say. If everyone is there to be of benefit to all beings, then it would be a much different world for sure, than the more selfish world that we are faced with now.

K- It's a dimension of physicality which brings the suffering. Dimension of the Soul doesn't have this, because you accommodate. You cannot suffer. Because if it comes to suffering, you move to accommodate your own Soul. "Thy shall not steal" and that is yours.

R: So does that come from desire that gets aroused through our interaction with the physicality dimensions, the Earth, and planet and all of that?

K- Yep. But, what does it become when you go on Mars? What's the next desire which you didn't know, now it's the interaction of the fields with the environment, and creates a desire you're not aware of?

R: And what about all the desires in the Space between Earth and Mars? While you're journeying?

K- You know, if you want to understand how your environment affects you, I always say, go to Amsterdam. When you go to Amsterdam, especially in the city center area, especially at night, you don't need to smoke marijuana. There is enough people smoking it, that you literally float. You understand? They create the environment, they suffer, they have the pleasure of, but you smell it and gradually, when you spend couple of hours sitting in bars and whatever, without you smoking, secondary is, what you call it, (3:08) energy of the marijuana, touches you. You feel you're talking different, you're more placid there, and then say, "What happened? I haven't touched, I don't touch anything, but why my behavior has changed?" And then you realize the environment is so calm, is so, everybody is so, what you call it, high, I call it.

R: "Laid back" is one of the terms.

K- You become so laid back, you fall off the chair sometimes. This is... I used to spend a lot of time in Amsterdam, and I was there very recently, because of the work of the Foundation. And it's strange, you don't get a breath of fresh air. You walk from one "high" to another, because the guy behind and in front of you, and two guys ahead of him, they're all at it. So, all... you still literally start floating, if you spend enough time, and you know, usually sit in the restaurants or whatever, is normal. And it's very interesting how the environment creates a condition for you to be relaxed, without actually doing anything.

And it's the same in the Universe. Everything is so set that it brings you to it. It doesn't force you to it. This is the way we accept, and this is how the Universe is.

Thank you much for today and hopefully we'll meet soon. And I hope our team can finish our organization for Chinese meeting and join us in one of the most beautiful lands on this planet, island of Hunan, in Sanya. And I hope you enjoyed as I enjoyed that we used to live there for some times. It's one of the most beautiful Knowledge Seekers. Thank you very much for today, (3:10) and we'll see you next time, and I'm sure I'll meet about a hundred of you tomorrow, in the, what you call it, the session of understanding the emotion of loving, and receiving and giving. Thank you very much.

R: And let's just mention about the transmutation sessions coming up every third Friday of the month, from January through to June, and...

K- Again, yes, this has a limited application, limited people are going to be accepted on this. Because we have to do a lot of things for transmutation, elevation and everything else. And gradually they become one, this group, and they, they build up the essence of the building blocks of man's transmutation. You'll understand gradually. You know I do things in a very subtle, hidden way. And this is one of them. Those chosen Souls will be there to go to the next step and the rest of it. And you'll understand as I explained today, the new non-dimensional plasma will come into play. And if you've been through these cycles, you go through the second cycle after June, preparing man for that final phase. But that time we need to bring governments in, that's why I set the conference in Tehran, we'll bring that phase into play. And then hopefully we show the Americans in Washington there is no borders. Because many of you Knowledge Seekers will come in through different ways, that there is no custom clearances, as I call it, and no stamp on the passport.

Thank you very much. And please, as Rick said, we're going to give a very, very limited numbers to this session of the, every Friday, because gradually all become understanding, knowing each other, because it's an open session, and we go ahead. (3:12)

There's something we forgot to talk about Rick, is that Knowledge Seekers, some of the Knowledge Seekers, it was discussed in other teachings as well, that the structure we are looking to... They are looking to set up for teaching youngsters the technology. We support this, but it has to be done the correct way, that the children are protected. And this will come to you, that you can teach your children the knowledge of the... everything else. It'll be done by some of the people who are well behind the MaGrav system and others, they understand it. And bring our children in to understand the position of their Souls and their new life.

And I support their work. I started this years ago with my son and we had to stop. And the new teachings for children, if they come the way that we secure our children, it will be starting for your children if they want to learn the basics and understanding of the Soul. Thank you very much and we'll see you next time.

R: Yes, I think the first classes are for ages 7 to 11 and we'll make announcements when that gets solidified but it's in the planning stages, yes indeed.

K- ... Thank you very much. Thank you indeed. See you next week, see you tomorrow, most of you who will be with us in the, what I call, feeling the love of the Creator. Thank you very much Rick.

R: Great, thank you for another Knowledge Seekers Workshop here. (3:14) On the anniversary of 10 years of continuous weekly broadcasts, Mr. Keshe has never missed a Knowledge Seekers Workshop.

K- When is the actual date of it?

R: I think you were late. You were late once for two minutes, I think, and that was it for all the 500 workshops.

K- When is the first date we did the first official Knowledge Seekers, not the ones we did with you before that? We've got to find out the first of the first date of the ?? first.

R: Yeah, I think it may have been a little bit later than now.

K- We taught in the airports, in hotel rooms, in the car, partially once on the street, in god knows every position and place in the world possible. And some Knowledge Seekers got the hang of how and where we are. I remember one of Knowledge Seekers telling me once, "We know when you are home Mr. Keshe." I said, "Why?" I've told you this before, he says, "We know because your dog barks and we know you are home." So, we actually recorded the dog and when we were not home, we were playing the dog in the back when people think we are still home. And, that was interesting. And so, you've been with us and we've been with you from most probably 20, 30 different countries, the teaching has gone through. And I hope we'll become all the nations we can meet and, happen to be a Thursday we can share and learn from each other. Thank you.

R: The first, the first Knowledge Seekers Workshop was actually in March, March 6th of 2014, which would have been 10 years ago, coming up in March. (3:16) I'm not sure how we jammed in a few extras there. I think we had a Knowledge Seekers Workshop or two, that was in the middle of the week, and so we included that extra one.

K- I think some of the MaGrav system was one of them, or one of them was a health one, I think.

R: Okay, well, two more months before the official 10 year anniversary, I guess.

K- What date is it? 14th of March?

R: 6th of March.

K- 6th of March. Maybe we celebrate the 10th anniversary in the conference in Sanya in that time. Possible. That would be nice. Anyway, thank you very much and see you tomorrow and the next Friday.

520 KSW Jan 11, 2024

521st Knowledge Seekers Workshop January 18, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Friday session practice 27 hrs; Becoming Passenger of U; Bring knowledge & T back to Earth - use transmutation daily life; New Non-dimensional systems; Control travel - dream is Soul travel - Conscious & remember; reach STC; Meet Soul Prophets; System alive - pray for them; Detected life in systems - don't need heartbeat; Travel inside body instead of outside - perfect body; Don't use Gans - fields of U; Convert energy back to matter; No mediator - directly to Creator; How to locate Souls - fingerprint code; T not from humanity; China conference March; Truth about Noah's Ark - Mediterranean flooded - story; More on religions - Chinese Whisper; Jehovah Pagan god - likes kebab; Ask Soul of Prophets truth; Fields back of head; Need 2 to make emotion - love; Misjudging; Physically elevate STM; Understanding fields - receive when think you give; Soul in control - P follows; T released on strength of peace - can't abuse; How to raise children - make responsible; T not free - structure of society; Don't need brain - connected by fields; Change P - color - migrations;

ENGLISH TRANSCRIPTION

(:17)

K- Yes, good morning, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute. We welcome you back as usual. (:18)

We are on the course to change a lot of things and listening to the Intro, it brought a beautiful sensation and understanding, that even this, what we call, Intro was recorded some 3-4 years ago. Now, in past year and plus, with introducing the, what we call, transmutation and running test, we have to add to it, that we even pass transportational movement of body or any entity, by burning fuel and using the energy of the man himself. If you think of it, if you can understand the whole concepts of life, existence of the energy within the man. Even our body, we use energy to physically move our body, walking, whatever other means, swimming, without any external systems like cars or rocket technology. And we've done this from our... it's been the essence of our movement and motion and life, from onset of creation of life on this planet. Now understanding that we have a hidden, what I call, energetic, powerful system inside us. and understanding that "he's been the guy" who's doing all the work in the background, confirming the existence of the life. Now we are moving to use that method of system, or that type of energy, to move the body without the physicality (P). (:20) In a way, we are adding a new section to the movement of the man, motion of the man, without external systems to be able to go faster. And now we see we can travel much, much further, beyond any dimensions (D) of the physicality of this planet, and use that energy to move, and then bring the body with it.

In the test we've done, in the past two sessions of the Keshe Foundation Friday test with the Knowledge Seekers, on the 22nd of December, and one last Friday, we have seen some confirmation of what we assessed, and what we saw, and how technology development will be changing, how the transmutation will change. Those of you who join us tomorrow, for the day long session, we are with you first 3-4 hours. And

then, as of last week, as some of you noticed, we done the pre-test. We leave you to test. We left you, we left the system on for some 27 hours. And many of you stayed, went back, went had dinner, god knows, whatever you wanted to do, you came back and joined. Literally, like the way we live our lives. We travel to somewhere and we go sightseeing, we go shopping, we go for dinner and we go back, traveling back. And this was part of the purpose of the trials last week and in the coming time, every third week of the month, which we start from tomorrow. (:22)

We leave the session, we said from 9 to 5. We start the session, we open the session at 9 o'clock. We let you to come in, get ready, whatever, and then we start the test, we start literally allowing you to fly. Allowing you to understand your own dimension. Go and do whatever you like, come back, stay in for 2 hours, 10 hours, and we leave the session open, for as long as possible, our system can support. Many of you will feel a difference in the sessions.

Last week, we did not announce it, because we didn't want to give you, what we call, a preset mind. Those of you who stayed the session, the first 4 hours or 5 hours, you were on one system. And the emotion and the feeling was different. After 5 o'clock, 6 o'clock, those of you who stayed again behind, you felt, or you got a sensation or whatever, of a different type. To you was a different, what we call, emotion or sensation or feeling. But to us, we moved the whole system of our transmutation to Space travel system. As you are aware, we have developed a new Space technology, and we moved you, more or less, one century forward, in the second part. (:24)

And, it'll be the same. This week, you will fly in the old system on Friday. In the following weeks, we do not tell you, but somewhere in between, or whole day, you travel with the new system. These systems are developed to bring transmutation much closer, much more under control by you, and for you to be able to transmute. This technology (T) is not open to public. This technology never been disclosed by Keshe Foundation. Systems have been tested and new systems will be added. And what we will like to do with you who join us in the session tomorrow and there on, to respond back to us, right back to the Foundation, How you felt? We don't want testimonials going for pages and pages. Anything more than one paragraph, it'll be too much. What you felt? What the sensation was? Did you go anywhere? What did you do?

You got to understand, we're very, very big, and important change. And, in a way, you live that life, you live that parallel life. You get on a plane, and you go to a new place. You get in your car, you go to a new scenery. You get in your car, you go to a new shopping center. You do not know what you'll see. When you come home, or when you go back to your country, you tell people what you saw, (:26) what was it, what's new in the shops. And they accept it, because they know you travel. Now we have to learn the same thing, there's no difference. That you go with your energy, inner energy, you call Soul, to shopping, to go to another planet, to go to another position. This is one of the biggest problem with the Knowledge Seekers (KS), and people who go through this process. Now we have to learn, it's not a dream, it's a reality. Up to now, you get on a bike, you got on a car, you got on a jet, and some of us been on a rocket and been to space, and they say they've seen this, and they saw that in the sky, and we accept it, because we know they went with the system we know.

Does it matter if you tell somebody how beautiful the, what we call, Black Forest in Germany is, or how beautiful the Northern Lights are, if you went with a car, you drove there, or you went with a jet? It's just because you've been there, you explain it. And they accept it. It has come to the point that, as I said in the very first time, when we started journey of the Soul in Linz, that we accept whatever you tell us. Because we

are not there, you're the only passenger. And we brought in couples, partners, who went together to Paris, the people who went swimming together, and even being in two different systems.

So, what you have to learn, or what humanity has to learn, is that, he's learned about the new transportation, a new way to move. And, whatever you feel, you write, "I felt my mom, I felt my hand, ... I felt my body move." Don't you get that when you go mountain climbing, (:28) you come back, or, then you sit down and you get a rush of blood in your circulation, or your leg goes numb because you did something wrong. What's the difference? Why? Now traveling with the energy of the body of man, it's all different to you. It should be no difference. And this is what all this teaching is about. To bring it for you to understand that you have a new transportation system. We call it transmutation because one is called the plane, one is called the rocket technology, one is called the car. Now you transmute through energy. And this is part of what you have to realize. This is the part I ignored, I called it a sleep, I called it a dream. Now I know where they took me when I was dreaming. And now I'm in charge of it, I can control it. It has a lot to do with me, which I never knew. It's like, what I said once to one of the Knowledge Seekers, it's just like putting you in a car, and taking you around, just showing you and you don't drive, you're a passenger in the back seat, and you see the scenery. And they tell you, "This is this city, this is this building, this is this, whatever." And because you are a back seat passengers, you accept it, because they tell you and they take you. Now you are, not a back seat passengers call it a dream or whatever, you are, you realize, "Actually, I'm the driver." "I can decide where to go."

And the process of next few months is that, that you learn, "I'm the driver. And I don't need to drive all the time." (:30) I can come, decide, even in a very near future, in the process of the teachings and testing on Fridays, we teach you how to come in, go to a place, do a job, come back and start using this in your daily life. How to go to a place, even it comes to your work, you want to research on something and see the result, growing a seed, testing on a new disease, defining a new way of energy. You come, you go into the transmutation, you get in touch with other Souls, you add up to your knowledge, you remember that knowledge in the dimension of the Soul, and you come back and you practice it in the physical life. This is what we call transmutation. You don't sit all the time because you have a car, in the car, and drive all the time because, "I have a car." You'll learn, "I can live in this car, or I can camper and go to different places." Or, "I can go to a place, go to a library, go to a research center, learn something and come back home, and what I learned in the library, I put it in practice in... at home." Then, at home, it's like when you go on the Internet. "Oh, you see this chef, he does this kind of things, and he makes, cooks such a thing." Now, I can go to the Soul of the knowledge, and learn where and how, and come back and practice it in practicality.

This is what, in a way, if you look at it, what's called the Prophets. Enlightenment. And this is the whole purpose of the new transmutation, the whole purpose of the new teaching. When you go shopping, (:32) when you go to school, you use your car to get to the school or to university, you learn what's in the university, you get back in the car and come home. Now you learn to do that with your Soul. You get into the system of your own, you go to a place, to the Soul of whatever it is, but up to now it's been random, I was taken somewhere. Gradually, you learn, "I want to go there, this is what I want to learn." And then, it targets, it gets you to that place. You don't sit a car and say, "Oh, go driving." You sit in the car, "Oh, I go to school, I go to shopping, I go to scenery."

Now, with the new teachings, and the way on, we start from tomorrow, is for you to learn that. And, we gave you a taste of it on 22nd, we left the system on for a few hours. On last Friday, we gave you 27 hours, till our system shut down. So, we saw people coming in, some 37, 38 of you stayed on and you went out, you came back, some of you went to sleep and you came back next morning, some of you fell asleep during the

process. This is how it will be. And this is what the test from tomorrow starts to be. We open the sessions, we let you to get on board, you will be "flying," most probably, if I can put it that way, with a, let's say, a normal car, up to tomorrow. Some of you who stayed behind in the session, last Friday, you were in a car, you arrived at the airport, and then you jumped on a jet plane, (:34) after 6 o'clock, without you knowing, without us creating a commotion or whatever, we switched our system to Universal system.

And I asked, I came in during the session, later on, to ask if anybody felt anything any different on Saturday morning. Because there were still people on the session. And one or two people answered, because they were not expecting to communicate on the chat side, expecting somebody to come and talk. My job is not there to come and talk and disturb the others who are traveling. But, leave your chat lines open when you are in the session, because a lot of things will happen in the background in the chat that it doesn't disturb the others. We want to know how you travel, what it is.

Don't write a, what I call, a puzzle. "Where you are, I'm traveling, I'm with my uncle, this is what it is, I'm seeing a scenery." We want you to start understanding a new transportation system. And then, we start in the background, switching you to new systems. And, hopefully, in the coming time, you will learn. The car is always there. I can... just because I bought the Rolls Royce, doesn't mean I have to drive (it) all the time. When I get to a place, I get off, I go and do what I want. You learn to use transmutation as part of knowledge, enlightenment. Get in touch with the Soul of Einstein, get in touch with the Soul of Tesla. Because, you decide from now on. And then you come back with a new knowledge. You have to learn where the guy lives, how to get in touch with it. Where is my uncle? (:36) You get fed up all the time going and seeing grandma and uncle's Soul, because that's it, I've been there, I've seen it. And I'm happy they are safe. Now I want to go somewhere else. You don't want to sit in grandma's house all the time, till the day when, whatever time be. And this is what we are trying to teach you.

We gradually built it, and some of you who were in the session of last Friday, and you stayed beyond the, what we call, five or six hours, you should have felt the change. Something changed, but maybe you went somewhere else, it became easier, it became harder, you wanted to be somewhere and you ended up somewhere else, or you let it go. Nowadays you have to learn, "Okay, I had a fun, I came to the city, I've seen the city, I want to go to a specific place in the city, in this Universe." Up to now, your limitation is where it can take you a car, you can go from one city to another, you flew from one country to another, now with your Soul you can go through the Galaxies, through the Universes. And you have to learn, can I go back to the same place? It's like, as we said during the trials in Linz, the guy came, I said, "I went to the Moon." We send him back in the machine again, said, "Go back to the Moon and see if you can..." And he went back in and he actually went to the same place now and start bringing stones out and whatever. So, it's repeatable. It is something, because now you have access to it. Instead of going to the Moon, we ask the others, "Can you go to your father, to grandfather?" and they can go there. This is what the session is about.

The session tomorrow, when it starts at 9 o'clock, we are with you for first 3, 4 hours. The rest is for you to test your own abilities. (:38) We put it up to 9 to 5. We leave the system on, until next morning 9 o'clock. Just because you got a car, you don't have to sit and just drive. Try to choose where you want to go, how you want to go, who you want to see. And then, in the following time to come, we teach you how to materialize. You have to learn, get in there, and start changing gear, know where the steering wheel is, which is your wish, Your dimension of the drive is your emotion, where it's going to take you, how it's going to take you, or, "I go for a drive, whatever comes I see."

A lot of you sit with the system and you see, "Oh, it's taking me, oh I can see my uncle." But, how many of you sat there and says, "I'm going to see grandma and go there." This is what we did. And the system, especially from next week, are set up this way. Up to now, your limitation was planet Earth, you lived in this village. From now on, the Universe is your "oyster." And if you are adventurous enough, you can get rid of the shell of the oyster, and the whole Unicoise is your dimension. And nobody can tell you, you're wrong, because as the system develops, as more people do it, we come to understand, there is a new horizon, there is a new way.

And this is the purpose of the teaching. This is why today's session is mainly in what you're going to see and how you feel from tomorrow on, and how you felt last week. You have started a journey that you cannot stop. (:40) But, you have to get over the sensation and all the, what I call, rigmaroles and limitations which you have put on yourself, and the others have put on you.

In the session tomorrow, it'll be not much different, but you'll feel the difference, and the sessions from now on, after, we move you, we don't tell you, to new systems, or back in the old system, to see how would you like to go on a bicycle, or would you like to go on a jumbo jet? How you want to feel things with a glove, or you want to get the gloves off and with a hand on, and get on with it. We are preparing you, gradually, more and more of you, to come to that point, to reach to that point. And to start understanding yourself.

We are not Prophets, we are not here to make things to become unbelievable. We're making things for you to believe in yourself. And then, this is the new communication system. Nobody can stop you going walking, and traveling with the Soul should be the same as walking, nobody can stop you traveling. Slowly, slowly you'll learn and with the new systems, which come into operation and it's been in operation since last week, you'll come to "Non-dimensional" system. The reason the new systems are operating is, they have no dimension. As I explained, now you understand what was the teaching last week, what we discussed. We put you in the same position as emotional life, in a, in the energy fields, which had no dimension. (:42)

As I said, the technology in the hand of the Keshe Foundation is reaching such a position, far beyond the present understanding. But, those of you who stayed after 6 o'clock, For the first time, you enter the zone of "no dimension," like the star. Sun has no containment, and is a field without containment. Our knowledge and technology has reached that point. And some of you who stayed on, some of you could connect, connected through that system. We moved you without you knowing, into, from what I call, a car, into a Spaceship.

And, the system, the technology, the development of the technology, from now on, moves to that dimension. And when you travel, when you see something, when you feel something, it's not what you felt, it's what you've done, it's you. And, gradually you have to learn, it's my Soul it has no dimension. And now, it lives, it moves within a system which has no dimension.

We watched how the system changed, affecting other system, affecting itself. In a way, in a very simple way, we developed a technology, which we can monitor the changes in the system, by literally like a scale, the weight. We know who's getting on, who's getting off, and gradually we become so good at it, with developing new systems, that millions of people can get on and get off, and do whatever they like with it. (:44)

And, for the first time last Friday, Some of you became true "Passengers of the Universe." And this will follow on with the new systems, from now on every Friday. We don't tell you when you're traveling with a

donkey, and we don't tell you when you're on the jumbo jet, and we don't tell you on the UFO, or when you're traveling on your Soul. We have restructured our labs to accommodate for this. We create what we call Cosmic Rays at your disposal. It's like what the Romans say, "all the roads end up in Rome." All the roads are open from your Soul to the whole of Universe (U). You become the center and you decide which road you take.

And some of those of you who reach the purity, the "Rome" will be the Soul of the Creator (STC). "All roads" end up with Him. And maybe you choose the right road to Rome, to your Creator. There is no limitation from now on, whatsoever, on human race not to, and not to achieve, and not to get to its Creator. Some of you went through that system. Some of you, during the session, you thought you fell asleep, and you went to places, but you never understood, that you were the first passengers, testing.

And this will go on. We carry on testing, because we have developed technology to create fields, (:46) containments, nuclear reactors without containment. I'm a nuclear physicist. I understand every aspects of the technology. And our team have set this up. In a way, we showed it to you in London. But you were too eager to put your head in and hang in there. You missed the main show, which was standing behind you on the stand.

Now you understand how much the Intro and being advanced to be has needs, needs to be adjusted, maybe added with another Intro, to transmutation. And with this system, the pilot is you. You are the captain, as I always said from the beginning, and no one else. And the more you learn, the more you join the systems development, you learn it and you do it. And it becomes more and more applicable in your life. Just because you go shopping in the supermarket, you don't spend the rest of your life in the supermarket. You do your shopping, you get back in the car and you go home, and you cook with what you shop. Now, you go on shopping of the Universe, and the supermarket is the Knowledge of the Universe. Where you want to go, what you want to see, what you want to learn, Gradually you find out, "Did I go to the right supermarket?" "Did I buy the right products to make what I want to make?" And if not, you go back in the car, you go to another destination. You see what, you can shop on another supermarket, that might be part of the main ingredient." (:48) But now you go to the STC, you go to the Soul of the scientists, who invented. You go to the Soul of other scientists and knowledgeable people of the Universe, and you come back, you learn from there, you park the car, you get out of the system, and you make it. And they say, "Oh, the guy is a magician, he found something new." But, now you learn, and you teach the others the same. The minute you start teaching, is the minute when you receive it.

This is the whole purpose, you cannot choose. You teach your knowledge and you learn from it, to convey and transfer that knowledge. And the way you explain how beautiful the place is, maybe, maybe some of you become good enough in the future, that the images you see in the Universe, now a days you take a picture, or you open a camera and they see on the video what you see, you connect through the Soul, and through that Soul, you show your partner, "where I am, would you like to join me?" And through the dimension of the field of the Soul, you entice or you share.

This is how Mitra brought the Creator to Earth. He didn't take his hand, he conveyed the emotion and understanding of the fields. And you're learning what Mitra, what the Creator communicated and fell in love with this planet. And this is your job. And all we do, from now on, is to open that door. To see how you will go. We move the 9 o'clock time tomorrow, to the following weeks, maybe to 12 o'clock, to 5 o'clock, (:50) that the others will have the benefit of the day, the way you did. Not everything run, by it's European Central's time. The following week we move it to 12 o'clock, the other week we move it to 3 o'clock. That

the, what we call, the American continent, or the Chinese can join in and stay in longer. We are One Planet, we have to accommodate all of us. And then you learn how it is to travel by the Soul, when the physicality is tired. "Did I dream? Did I fall asleep? Or was it my daytime and I went through that reality?"

You have to learn, you have no choice, if you join us, to take that path. You decide to go and see the Soul of Christ, you see the Christ you believe in. Not necessarily the Christ that ever existed. Because, this is the emotion you want to see the beauty to the expectation of the Soul of the Physicality (STP). You have to learn this gradually. You have to understand. You have, as I said, no choice. You have boarded a ship, you have boarded a vehicle, which is you, and you cannot run away from it.

In the coming weeks, and in the coming teachings, we will bring this in a more elaborate way for you to see and to feel. In China conference, we'll bring more of this forward. In understanding yourself, the whole true Space flight. Traveling beyond the dimension of this planet, has already started. And many of you have made that journey without you knowing, and you called it a dream, (:52) "I went there, this was this, I was swimming in the water, but it wasn't a water." That wasn't a dream. You went to a new place with your Soul. And the way you registered the images in your dream, now you're registering your Soul images on your physical body. But this time, you are present. This time, is not called a dream, the physicality hasn't left. You still register everything on what I call, memory disc of the brain of the man. And then when you come back out, you write or you tell people, "Oh, I've been here, there, there, there, there." But, they learn, "Oh, she's going on a transmutation, she's not using the car."

In a coming time, in a very, very soon coming time, in the next few months, we even teach you how to transfer energies, back to matter state. For example, you go shopping in supermarket, you take a bag of sugar, you take the essence energy of the sugar. When you transmute, come home, come off the system of your own Soul, you'll be able to manifest that sugar in physical dimension in your hand.

You have to learn this. This is what you called up to now a dream. And you have to gradually understand how to transfer energies into matter state. This is how we will feed Spaceman in Space. You want a fish and chips? You can come back to Earth, go to a fish and chips shop, take it and take that fish back with you on the Moon, and have a fish and chips on the Moon, if you are in a physical condition, to a matter state, that you can enjoy its physicality. This is not a dream anymore, this is you going to the next step. (:54) That's why I said, "The teaching will never stop." Because, after that, you'll learn more. Transmutation of the STP is one of the things in essence of energy.

As you know, we brought systems from Austria to London for demonstration. They were tested, they were run before they brought, they were set to run, to test, if it runs, works and creates the Soul. I was talking yesterday to the Knowledge Seekers who brought the system through a channel to England. And they tell you what happened is that the, in London, in England, they had to go through a tunnel. This tunnel is created by the British government to feel if there are any, what we call, people hidden in the trucks, in the cars, immigrants trying to come in through the back door, or you're trying to smuggle a cat or a dog. Apparently, it's 10 meter long and the car just drives through it and they sense the fields of the system, if there's a life in it.

And our Knowledge Seekers tell us, that the authorities of the British government stopped the car, they said, "You're carrying an entity, we think you're carrying a dog or a cat or somebody in the car." The energy of the system was felt by the system developed by the British government to sense Souls, physicality. Which this

brought to us, as I was explaining to Knowledge Seekers, we have reached the dimension of the Creation. That even the system of the man can detect the energy of the life. (:56)

We had the same thing in European Parliament, when the first "parachutes" were put through the system by Dirk. And they said, "This is like ?? Syntex, it's a natural product." For the first time, the authorities confirmed to us, that they can feel life, existence. Then they had to explain to the officials that this is a system, new system which creates the condition of life. And this confirms our system has a Soul. And this confirms that when we allow you, when we set up the systems like sessions you go through tomorrow, through our system, you are dealing with a live Soul, Soul of the Universe within the system.

And it's interesting that how we take this further. How, when you arrive at the airport, the government says, "There are so many Souls, who are they?" You don't need to change yourself into the physical life. They know on this ship there's 10,000 Souls and lives. And, as this was coincidental, but has brought a knowledge much, much further step, into understanding how to extend this, to open Space. Then you understand, when you got into the systems, in Linz, or when you go through the headphones, how close you are to the reality of Creation. How you are part of it. How a system which was run for a few minutes to structure it, (:58) to be able to show it to you in London, has already created his Soul.

It shows how advanced our technology is, and how much we have reached the point of, what I call, new Space Technology. As our Knowledge Seekers were saying, they had to get out of the car, and they could see energy fields, which confirms there is life. And it was nothing but systems in the car. If authorities and the system made by man can confirm the existence of a Soul, a life, does not mean life to us needs a heartbeat anymore. It means the Soul is created and the Soul confirms its existence.

You remember, the very early teachings, I always said, "Pray for your system, give from your Soul to it, because it's you there." Now, we see the Soul exists, we have the confirmation of it. When you switch a system on, when you get into the systems, and every teaching, when you go through it, pray for your Soul. Give from your Soul to... from your STP, that I trust my physicality to you, and always respect it. And, this is what the technology is.

And this is why I explained to you, how did you feel after 5 or 6 o'clock session last Friday, than before. Because we moved you into a system which has no dimension but it has its own Soul. It decides its life. We have monitored the system, non-stop, more or less, (1:00) since Christmas. Since we brought the system to London, in November. We're running it, we're testing it, and we see the changes. And it explains to us how it changes, how it works. And now you join into a flight system. It's literally, I can explain it to you, it's like a flight system coming from, let's say, Beijing to go to New York. It stops in Delhi, it stops in Tehran, it stops in London. Passengers get on, passengers get off. Now, it's the same system. You get on and you get off, but the flight is on. But this system has and flies in every direction which you want through the magnetic field of the system.

We have created a condition in the new system that you have two choices. You travel within the dimension of your Soul, understanding yourself. And then you can jump on to Universal lines. I've taught this very deeply in the past, where you use Carbon 14 or Carbon 60. Depends which part of the universe you want to go to. And we have developed in our systems to create those line of connections. And this is how the, what I call the system next week, or next session, not tomorrow session, will allow you to feel a different transmutation. Go within your cells. Go within your body. I have a cancer. I have an inflammation in my muscle. You don't need to go to the other planet. Go inside. See what's wrong. How you feel it. (1:02) Why

is this part crying? What, how did I created it? What was the emotion that created this cancer cell for me? And how can I remedy it? This is what you have to do in Space. It's not something strange anymore. In Space, we have no operating room. We cannot bring you back with the speed of light the way you want, and put you in an operating table on Earth to cut you open, and do something, you have appendix.

You learn with the system, you don't need always to go out, go within. Find and make perfection in your physical dimension when you come back. This is what I always said in teaching. Learn to feed your physicality through your Soul. Learn to reach your physicality through your Soul. What have I done to you, that I created this and created that? How can I, the creator of the problem, knowing now I can reach from within me, remedy it, in the physical dimension?

Then you understand what is open to you. What horizon of Knowledge of Universe is unraveled and is in a working shape and condition to you. Some of you do not want to lose that cancer, some of you don't want to change the position of the pain in your muscle, your knee, because you're getting attention from your lover, and you want it to be there, but you know, "I can change it if I want to." It's not all going out, it's going in. And then you understand what and how you can use yourself, (1:04) your own Soul, for your own transmutation, for the feeding of yourself, for what I call, "bringing wellness to yourself." We just provide the energy systems.

Many of you, in the upcoming sessions, will feel the difference even in your physical life. We have set it to be. And you will be going into the systems which have no dimension, there is no limitation, unless you create that limitation. Up to now, the reactors had the Calcium, Zinc and Copper and the rest. The new system has nothing in it, but essence of the Creation. The way your body, you eat, whatever converts it to what the body needs, we give you that chance for the first time. We facilitate, we create a condition that you decide, what you want to take from it. Pain, pleasure, wisdom, food, wellness and the rest, or all in one trip.

And this is the essence of the new Space travel. Transmutation. You transport yourself in a physical dimension of this planet. You transmute yourself across the Universe. And there is no limitation. There is no one to say, "You have to see me as a mediator, to know how to get to the Creator." As you have that access line, it depends how pure you are, how much you are there in the Soul level, to reach the level of understanding. (1:06) As I always said, in Ninove, (Italy) a professor came to me, says, "Am I allowed to speak with you?" I said, "Am I allowed to speak to you? Who are you?" He said, "That gentleman there says, I cannot speak to you without talking to him." I said, "Do I have a permission to talk to you? I don't even know the guy, I met him only once." That is you who decides where the limitation of knowledge, understanding your creation, understanding your Creator, and then you come back to the vehicle, to dimension of physicality, and we'll see new stories, new chapters of life for man will start.

As I said before, and I said many times, "We respect what you say, because you are the traveler." And, if you've been there, and you enjoy it, and you can repeat it, going back there again, this time you open the dimension of the Soul of your connection to me, and I see what you see. This is how, as a family, you travel. Nowadays, you get in the car, and you fly somewhere as a family, to see Paris, London, or, god knows, Northern Lights. Now you travel with the Soul, with your friend, with your partner, with your family, and you all travel with the dimension of the Soul. And when you come back, we go back to dimension of physicality, you still speak, "You remember that light? Did you see that fall?" And you all confirm, because you all been together with it.

So, tomorrow, those of you who join us, you will travel for the last time, in what I call, the old car. Next week (month), those of you who join us, you travel in the latest flight system, available today to man. (1:08) Hop on board, enjoy the journey, and don't put it down, and go on a free, what I call, "flight of fancy." See if you can dictate the position. See, you can dictate the knowledge you want to gain, and see, when you come back, how much of it you can put in practice of physicality, and then you learn what the Messengers of God did in the past. Get on the, what I call, fields of the Universe, and learn from the others in the Unicose. You have the capability, and you have to understand, sometimes, maybe some of you have done that to the other "Passengers of Universe," who approach or manage to come to you through the dimension of the Soul. You learned something and you did it and say, "I dreamt about it and now I did it and it works." Now you understand, was not a dream. In fact, you work through the dimension of your Soul.

I hope many of you will enjoy the sessions from now on. And I hope you learn to be you, and you start the life, a new life, and if you stop teaching, you stop that process. As you teach, the more people you teach, the more people you bring in to understand the dimension of the Soul, the more knowledge you receive, and then life becomes a beautiful cycle. (1:10) And learn, teach yourself, how not just to be a "joy-rider," but to be a student and learner of the Knowledge of Universe. And see how much of it you can bring back, and convert in a physical dimension.

Go out to a restaurant, you sit in the car, you go and eat, and you come back and you feel fed. Try to go through the sessions to the energies you need, what I call, the restaurant of the Universe and Unicose. Take the energies and come back and see, if you feel full, you don't want to eat. Or, you would like just to have a dessert and have a piece of chocolate, after you came back, because you had a full meal. And gradually, you learn to become citizens of Universe. You don't need to kill to feed yourself, you don't need to steal, you don't need to go alone. Gradually, you learn step by step, and hopefully, by the end of this year, you'll become true Passengers of the Universe. In a way, when you decide to live a physical life, you come to the humanity, and when you want to be the Passengers of the Universe in travel, you become part of the Creator.

What would be interesting, one day for some of you will come, sooner or later you face it, on Earth, I'm called Elizabeth. How do you call your Soul in the Universe? How do you announce your presence? And how would the Soul you met, wants to meet you again, knows where to go to? (1:12) What is the fingerprint of your Soul, that knows, lives, position and place and time for the others to get in touch. You still have to learn that part. This is how you go to Grandma, even though she passed years ago, she left a fingerprint behind. A code to approach, a code to be in, and to meet.

The true journey of man to become part of the Universal Community. In reality, the first flight test was done last Friday. And now, we open this door, more and more, for those of you as Knowledge Seekers, to be able to come. And you will see, many of you who take this journey, will bring new knowledge. And new sciences, new technologies will emerge, from those who take this journey. And it's very much like, you go from one city to another, one country to another, you see new things, you put it in your suitcase, you bring it back, and you show it, look, this is a new technology, new system, what it can do. Now you bring technologies and knowledge's of the Unicose.

And as all the world leaders in the past two or three years talk about the emergence of the new technologies will change man. This is what they talk about, because as leaders we trusted with the Soul, and the Soul knew the change is to come. They talk about it, now we'll see emergence of the new sciences from the Universe and Unicose, not from humanity. Which will change the governing, will change to understand, and bring that promised time of change. (1:14) Then, you don't go shopping to the supermarket down the road, you go

shopping in the supermarket of the Universe. Be it for knowledge, be it for beauty, be it for feeding your physicality.

We come to it step by step, and as our Knowledge Seekers understand, to develop the new systems, we'll see new dimensions. Then maybe, by the time we meet in China, or in Tehran, or in Washington, more and more of you will transmute to be there, and you learn how to go transmutation and transfer back to physicality. The only limitation is your fear of the truth, and the only limitation with you is the limitation of your own understanding. We make every facility possible for you, to be able to make that journey, and bring the change we promised. And, some of you took that journey last Friday without knowing.

Thank you very much for today, and as I said, we prepare you for what is to come, what is been part of, and what is to be part of. And I hope, as you enjoy to travel with a car and you get flight, now you enjoy to travel with your Soul and understand this reality of its existence, that you ignored to exist. Thank you very much. Rick, if you can take us to a break and we come back.

>> **BREAK** >> 521 KSW January 18, 2024 (1:20).

K- We usually have something to say, it's unusual, nothing to say. As many of you are waiting for the announcements for the conference in China. We have, we'll know more in detail by next Friday, by next Thursday teaching we announce fully, hopefully. At the moment, the teaching, because of the complication in holidays and different positions, we are air mark for 16th, we know more by next week, the conference, but primarily 16, 17, 18, and 19th of March, to be the 3 or 4 day of conference in Sanya. And our team will confirm the hotel and location and the conference by next Thursday that you can book your tickets. And for the Chinese who would like to attend the, what we call, the conference. (1:22) We have to get the permission of the government through the hotel, that we can confirm it. Hopefully once we get that approved, then we are ready to go. But at the moment, that week has been earmarked for Knowledge Seekers to join us. And we especially chose Saturday, Sunday, Monday, Tuesday, is so that the Chinese Knowledge Seekers can join us. It's very hard as we know for the Chinese to get a week off or a few days off. But they can take one, maybe two days off and then adding the weekend to it. We don't, we didn't choose the back end of that week, because 21st is the Iranian New Year. And some of our Knowledge Seekers have the celebration, 31st is the Easter, then again, 4th, 5th and the 6th of April, is the Chinese holidays, which people don't come, they go to their families. So, the only gap left, and before that in February, we have the Chinese New Year and the

Chinese are all in travel, where it's become out of question. It's the only chance we'll have. And so those of you who are Knowledge Seekers for that period, Saturday, 16, 17, 18, 19, will be earmarked. And now we'll confirm it next week to be in Sanya. And there could be extension to the Wednesday, Thursday, Friday, which will not be open to Knowledge Seekers. We try to accommodate the government, the military and the others to attend, to see the latest in Space and Defense Technology and all the things which come. (1:24)

So, last time in London we covered the, what we call, World Ambassadors, in Sanya, we try to cover three days, for specifically for Space and Military, to attend, to see, and to test new systems, which will be open to, what we call, them, to expand the horizon of the knowledge, and what is to come. We will offer you the admission fee for the, what we call, the 3-4 days. The hotel we have chosen, if will be the same, you can stay in the same hotel. It's, what you say, 4 or 5 star hotel, which is very normal with all the hotels in that part of the world. And we'll explain to you how the process will work. You can book through the, what we call, the Keshe Foundation. We do everything in the background. In China it's very difficult, we don't speak the language and it's very hard. So, with Knowledge Seekers we accommodate this part. And you just confirm you do, you're booking through the Keshe Foundation site. Knowledge Seekers in China, we try to accommodate you through the, what we call, the Keshe Foundation channels, in the registration, in the payments, and the Chinese team will look after you. We'll give you new links and new positions to, what I call, register for this event.

And we will clearly separate the two ways of the, what we call, for the Europeans and what we call, people from outside China, and China for this conference. And because of the accommodation, and the position of the way they can take their holidays or whatever, we'll offer a very breakthrough system. (1:26) And some of you would like to stay maybe an extra week or whatever, to have you come all this way to see the beauties of China. And you can stay in the same hotel, we organize it, everything in the background. It'll be a breakdown of how many days you want to stay, whatever, before or after. And you will come to one of the most beautiful places in the world. And you can enjoy it, and it's one of the best times to be in China. We'll see what happens and how the things take shape, but be prepared, those of you who already are part of the Knowledge Seekers who are coming, and the Chinese community who wants to see. I was told, "Can we show something? The Chinese would like to come and see something." We are not on the show to show things. We are there for you to show your Soul, and the performance is ???. And if we bring systems, primarily it will be for, what they call, governmental, military and the others, small sessions, small groups, that we prepare for what we believe in the Chinese government, they can see what is there. And, specifically for that kind of things, and now we have to see how we set it up.

On the other hand, everything else for us is as usual, and we go to further expansion and extension of the work of the Keshe Foundation, And there is a possibility that the Keshe Foundation will offer some of the papers which are in publication on a hard copy in next few weeks, that you can buy a compilation of the scientific papers as a hard copy, as you do with the books. And this is on the way, when it completes in next few weeks, we let you know. (1:28)

If there are any questions I answer, if not we say thank you very much for today.

Q: ... Good morning Mr. Keshe, good morning Rick. Mr. Keshe, the people who paid 10,000 and 5,000, they going to have the week of 11 to 15 of March for the week, and then 16, 17, 18?

K- No, no, no, no, no, no, no. With ?? this 16, 17, 18, 19, that's a four day of the full session.

Q: I mean, there's no week extra before that?

K- No, no. We brought it in to be, is to, is how we can accommodate. Instead of the, what you call, the five days, it's a four day. But instead of being it from Monday to Friday, is Saturday to, what you call, Tuesday, maybe Wednesday. but we have to understand Thursday is a teaching time, and Friday we're trying, Thursday, Friday we're trying to accommodate the governments and military and the others for the advanced technology.

Q: And also it's a Persian New Year, so...

K- On 21st I know. Celebrate in China, it is beautiful.

Q: Okay. Then you're going to leave your parents out then, if you celebrate there.

K- It is a beautiful time there. It's, as I said, if you get a chance, take an extra week holidays to spend. If you come all the way to Sanya, take the back end of all the week before. We accommodate all these, we announce it. And people who want to stay, if you come in such a long way, instead of 4 day or 5 days, to what you call it, to stay longer and enjoy after the conference, the beauty of the, what you call, China. (1:30)

Q: And we don't have to look for our own hotel, you assign a hotel then.

K- We will offer you a hotel, because we get the different rates from the hotels, and we pass it on to you. But this way, because a lot of you don't speak Chinese, and trying to book all sorts of things, we try to keep you in one or two hotels, and plus the Knowledge Seekers who come in. And so, you just work through the Keshe Foundation main website for booking. And then, we... Like before we done the conferences, before in Rome and in, what you call it, Dubai and the rest. We just tell you, this is the hotel, this is the room. And you just get to the airport and we try to assess how you come in. And if we can get some of you, shift directly from the airport to the hotel.

Q: Okay, good. While I'm here, can I ask you a question that is non regarding the conference, another question?

K- Yeah, carry on.

Q: What happened to the passengers of the Noah's boat? Because you asked...

K- Two questions. Two questions.

Q: You asked this question in one of the teaching, but then you never answered. You said, "I'm asking you what happened to the passengers of Noah's boat?"

K- I shall put it the same way, what happened to them? You are the traveler of the Universe, now you know how they traveled. There are a lot of things...

Q: I mean, where did they end up? Where did they end up, you were asking that ...

K- Can I ask you a question?

Q: Sure.

K- Or can I put it to you a different way? With the knowledge you have, and how much, especially in past few weeks, we have taught about the religions, and different path of beliefs, and of what is reality, and what is made up. (1:32) Do you think the passengers of Noah boats (Ark), did it exist as a boat, or is it planet Earth? Or is it a mystery? Did it ever existed? Or this is how it could be framed to be, and it become (became) a belief because it's in a book that nobody wrote, somebody thought, put it in writing and now become the book of God.

It is a combination of a lot of things, which has come forward. And just because it's in the book, has become a belief. I tell you something, we're coming to the new year, Iranian New Year. And deep inside we are all Zoroastrians, we're all, we come from the land of Mitra. If you've been through what I've been, educated by Zoroastrians, and living amongst them, I went to their high school in Tehran. And knowing a little bit, you can never claim you know everything, about the culture of Zoroastrian, during the time of ???. And you transfer that into the Islamic world of today.

In Zoroastrian religion, or path of belief, and it's brought into Islam, and it's copied, and it's become a path of belief, as it's been done, it'll be done. (1:34) Is this ritual that, at a certain point when you go to Mecca for Hajj, you take so many number of stones and you throw it at a wall, to whatever belief is to the devil and whatever, and it goes in the water well and whatever. And it's a very part, one of the essential part of pilgrimage and belief. This is done in Zoroastrian religion, exactly the same, the same number of stones, 2,000 years before Islam. Which one is the truth? Or, the culture of one nation, as was brought in, is added into, and now become the true path of belief. You know when you go for pilgrimage, you take seven stones and you throw it at a wall in the water well? This is the culture of Zoroastrian, not Islam.

Q: So what did they do with the stone with Zoroastrian?

K- It's the same. Go, go and read. Go and read your book. The book you were born and bred and it's in your blood with Zoroastrian, then you understand. This is where the mysticism comes and bits have been added to fit. Throwing a stone, seven pieces. When you read this in the Islamic world, read Zoroastrian book, and you see where did it come from. How come? And now it's become a path of a religion, where has been a path of another religion, (1:36) but because they don't teach us anymore about Zoroastrian, and a path of belief of Mitra, now we become part of ??? and people, you know, have different belief in Christianity, but it's been the part of Mithraism, used to be practiced all the way to London, Rome and the rest. To get rid of the devil and the rest of it, good and bad.

So is, was there, a boat of Noah? It's the same, when you look at the Christianity. As Christians, you, the word of the "Son of God." Actually, this was announced and believed in, by one of the Roman Empires (Emperors). He called himself the "Son of God." And he was believed to be, that he was the Son of the God. And then, about thousand years later, it became part of Christianity. Which one do we believe? How come a book which is written hundreds of years after, has brought the mysticism of the Emperor to become a Prophet?

These things you have, now we have the knowledge, we have to understand. Because we are ignorant to the history of what it was, we become ignorant to the reality and we believe what we've been told after. It's like, they call it, the Christ was born by a Virgin Mary. But, this is a translation which is brought in the time of

years later, (1:38) centuries later, into the, what we call, Bible. The true meaning of the word means "a true believer." A woman, if you go back to the word which is now translated to a Virgin Mary, it was and is, that word means the "true believer." Mary was the true believer in Christ, in giving birth to a new cycle. But, how it's changed by people in the books, to "Virgin Mary," nobody knows. Because somebody wrote it and then became a belief. The word used in Hebrew and the culture of the time, means the "true believer in Moses," not the Virgin Mary. Now you understand how much we accepted it.

Is there a... was there a boat of Noah? Or was there a boat that there was a disaster, a guy took his animals not to drown, took it across and now became boat of Noah?

Q: Well Mr. Keshe I told you...

K- Let me, let me... No, no, no, no, no, let me explain to you something. "Boat of Noah" could exist. In a way, it's been... it's a true way. There is a possibility, historically, could exist, but not the way we see it. (1:40) We have to understand how Mediterranean got flooded, how we got into Mediterranean time, and we have... we got the cities, which came from it being under the water, and the rest of it. Historically, there could have been villages who, through the flooding from the Atlantic, coming into the area, raising the water level, which was below, up, and a guy got his animals on a boat and managed to get, and it became the boat of Noah. It's very possible.

Historically it's possible, now we know, geological changes on the planet Earth at that time. So we have to search the history and see how they changed things. And our knowledge has to be deep enough that we understand it. How much of the grandma's talks, you know, under the ?? we call it, has become the book of God? And no one, no one, has written the books and done it themselves. How much story changes? I call the books that we read about Torah and Bible and part of the Koran and the rest, "Chinese whisper." How many of you played "Chinese whisper" when you were a child? Or in games? I tell a sentence through your ear. (1:42) What you hear, you tell to the next guy, you tell to the next guy. And at one end I tell you, "Have you had a drink of water?" And the other end comes, "Today is a sunny day." And then we believe it, is a sunny day, because that guy, the last guy said.

And so we have to accept this. Was there a boat of Noah? Historically is possible a guy got his animals on a boat and escaped from flooding up. Because it's in that area, we call it Mediterranean. We didn't understand that part. Then you have the Atlantic City (Atlantis city). Bulgarians claim they found it, Romanians they came and found it, Greeks they say they... but this was a valley. There were a lot of cities in it before flooding. And so there are a lot of "Atlantis's." Some of them were central culture.

You, if you understand this, go back and let's say in a thousand years, our great-great-grandchildren come to understand, because of the floods and change of the water, Amsterdam airport will go under the waters, 20, 30 meters, 26 meters below the sea level, the water comes in and takes it. Was there "Atlantis city," where people flew into Space from, and it was something else, and they find the wrong way under the sea, and they say, "oh, these people were so advanced at that time."

So, we have to understand, who history, and what came as mystery, out of history, to fit. And this is what in past few weeks, slowly, slowly I start opening up your eyes ?? (to it). (1:44) Because it's very easy, the reason if you understand why I do this, is next week, the week after, you are the Passengers. You have that control over your Soul, go and see if it's true. Go and see if you feel the emotion of presence of the Christ, bless his name, or Mohammed, or Moses, or whatever. And see, ask them, what is the truth? Why do we

have 12 disciples? We have 12 days of Christmas and we have 12 days of Noruz? And which one came first?

Q: Mr. Keshe, the way I figured, because you talk, we talk about this planet had a mother. It gave birth to the Earth and the sister. And then I thought the Noah's boat, it was in the, our mother planet. And then when the flood happened, my, my analogy was like, I mean, my answer in my head was, okay, when you ask what happened to the passengers, Noah's boat in the teaching. I said, okay, the planet got flooded, Noah's boat came in and they got the passenger, but they got, they find a way out of this planet and they move to the other galaxies. So, Noah's passengers are living in other part of the galaxy.

K- Put it this way, Azarjan. We're going to have a disaster on this planet, not disaster, an end, which is known. Somewhere down the line, in millions of years, billions of years. And those who live and now become knowledgeable, will get on boats, UFOs, or whatever to get out, and they become Passengers of the Universe. That will be in the "boat of Noah." And let's say when they land on another planet, and they colonize, (1:46) and the local people, they call them, these people came in the boat of Noah from the Creator, because they call themselves Creator. You understand? Become the history of the Spanish and the South Americans, huh? They were waiting for a blue-eyed blonde and they became God and they gave all the gold's to him. You understand? You're in South America, not Central America, now you know exactly the history of the area.

And this is what it is. We have to understand the truth. There is a lot of... There is a huge question marks on a lot of Holy Books, and one, because being from another, has confirmed the existence of the other. Is, if you read the history of the religions, Jehovah, the, what the Jews believe in, he was the god, the statue of, the worst things in the streak of the man. And then they called him the God, and the Jehovah. And then, Muhammad made him Allah, which was again another word from the ancient time, which means the Creator, the Merciful. And it became an Arabic word. But they always spoke that kind of languages in that area. And it changed. And they have added so much to it, that it become a reality.

And, we have to understand how and the way it is. And, the... when you read about history, geology and position of a lot of things, it was to the benefit of Jews, they already had the Christians on their hand, (1:48) to support the people from Damascus and the Rulers of the time, to move Islam out of the area down to Saudis, where it never came from, because then they could keep the Palestine to themselves. Then we now understand more how, they threw Mecca, moved from Jordan to where it is now, and they built everything around it to feel right and to be it, and they built places for it, and because nobody knew the others, it became part of the truth. It's a mirage which has been created, and because we have an image, we believed in it. (He gave reason why they moved Mohammad's birth to Mecca).

It's very much if you go to Tenerife. If you go to Tenerife, they take you for a camel ride. And I've said this before, you see hundreds of camels and people come with their coaches to go for a camel ride. You actually get on the camel and seeing a row of camels go in, a row of camels comes out. When you go in, the whole camel ride is literally goes in there, closer you can't see, 50 meter around the post and it comes back. And you think you're going into the mountains and there are so much distance. It's only ten minutes ride, but it gave the image and the emotion that you are going for a long camel ride, because so many of them are there. It's what we perceive. And, the more and more you search in the history of the beliefs of the Creator, and know what you call it, statues. The more you understand, that most of these books, are the history of the (local) culture of the time. (1:50)

Q: But Mr. Keshe, the way I look at it now, and you know is, you see, with all these stories, when you get busy with all these stories, what has happened, you see we are, we are, essentially, we are the image of God and then we are the... because God said, ... It goes like this, it says, "Thou ?? Art, my father, ?? to a child. What thou hast, I have." So it means, it means, I'm just exactly a copy of what I've been made. (??)

K- It's just, "I made man in the image of myself," so it's the man.

Q: When we go to this story, we actually forget about, we already it. I mean, we go get busy with the... something, it doesn't exist, but we... actually we are the reality. It's just like the fish looking for water. He's already in the water, it's just we are already it. So that's, is very...

K- You know Azarjan, when you talk about the fish. You know we call water, ?? in Farsi. And, if you look at the mouth of a fish facing you in the water, He goes up, up, up, he wants water while he's actually swallowing the water. You understand? And is ignorant to what he's breathing, it's what he's actually asking for. And this is the story of man.

The reason I start opening, I said one day, years ago, I open the book of history of the religions, is that, now that we come to this part of the teachings, or science and technology, you have the privilege, you have the freedom, and you have access to go and check your Moses, your Christ, and the rest of the Prophets, (1:52) through their Soul, and if you are pure enough. And if they are, what they said. And how it's been said. So, there is no story of. As I said, the guy said, "Mr. Keshe, can I speak with you?" Because that man said. You don't need no one to be intermediaries. And, you choose your Christ, and you choose to find out what it is. And, this is you feel the emotion of, you feel the presence of, or you meet the man, through his Soul.

Q: Mr. Keshe, I was so much, I was, I was taken so much by this story of Jesus, that one day he comes, he takes, tells to his 12 disciples, he says, he makes them to the pairs and he says to them, "You go to this area, you go to this area", and then he tells them, I don't want you to carry a bag or a pocket or anything. I want you to just try and trust the Lord that everything is provided for you on this journey. So, what it is, he's trying to teach the man to trust himself. It's all about the trust. So, this is what we need, trusting that we are, we are it. At this moment, at this time, we are it. And we can do it.

K- You see, as I said, with the technology we have created, and it's developing, no one, no one can question another. And as I said in the teaching just a few minutes ago, as you learn to connect, not only to see, but to be with the others to see together, (1:54) we bring this to a reality of you understanding new dimensions. It's like they tell you, if you go to such a place, there is such a, such a stone, there is such a, such a thing, and you go and say, "oh, this wasn't there, the stone is this and this that, because I've been there, it's not what they say." Or, it is what they say.

And now, with the operation of the new reactors, operation of creating plasma without what you call, containment, it's the same work of the Universe. Nobody can limit you. So, you get access to, what I call, travel the span of the Universe. And, if you go and find your Moses, or you find your Jesus, you find your Muhammad or anybody else, you find your King, you find your lover, you can take the others to see too. And as I said to you many, many times, "I bring the Soul of the Christ for you to see." And then, when hundred of you are at his presence, and he tells you what he said, who he's been, what he's been done, then you find out how much of the books are history, just fairy tales. And then someone says, "No, this is not the Christ, you found somebody wrong." So, get me to the man, because then he can tell you what he did.

This is the beauty of it, nobody can tell no one. If you remember in the trials in Linz, a guy came and he said, "This is the color of the skin of the Christ, This is the color of his hair, this is the color of his eyes and the..." And it fits, if you are from Palestine. (1:56) And we have to understand these things. And then it comes who has been, and once you get access to one, you can connect that bridge, the rest can connect to your Soul to see that bridge. And if they say, "They were so ??, I found the Soul of the Christ." "Christ has got so many ways of access to his Soul, like everybody else." Then, you all might find, you find a man who called himself Christ. And see how much of what is in the book is... (true). That's why I said, "I take the stones of Vatican back to Coliseum." Because, there is no reality, no fact in it.

So, knowledge has brought us to the point of confirmation of the fact. The technology has brought us to that point, and it brings more and more. And these sessions, as I said last Friday, without you knowing, and I usually don't go into the meeting afterwards, those Knowledge Seekers which were there, they could read the text, I asked, how did you feel, what was the difference between before six o'clock and after. Because, we told no one that we are putting you into a new technology. Totally new science. The expectation would have been so high.

And this is part of the technology. And this is what we have to understand, what is true, (1:58) what is the grandma's tale, and what now we have access to confirm. We'll get you gradually to go shopping. This is one of the most beautiful things you will come across. Gradually, over time of the teachings in sessions to come in months and years, we take, we send you going shopping. Go shopping, don't take anything with you. And we get you to come back from shopping, and we make you to see what you shopped, convert it to reality. Then you understand what is the, what is and capability of the man. And even when they say the guy could change a stick to a snake. Is it possibility? Is it reality? Can you put a Soul into a stick, that that Soul become what it wants to do, and then you put mysticism around it?

As I said, with the knowledge, we make a technology, and the technology can repeat itself, where the man knew what to do. If I put the Soul of a snake and I put a stick in the system, and that stick can become a Soul of a snake. Put it this way, British security systems in Dover confirms their lives in the system, ?? God. So we can create the Souls now, we got a confirmation, even more. Where we knew, now the science, .. the science confirms it.

Q: Thank you Mr. Keshe.

K- You're welcome. (2:00)

Any other question?

Q: ... I haven't received the email confirming my participation in tomorrow's session, is that normal? Thank you for an exciting moment in teaching.

K- Yes, you have to wait, you have to wait. We usually do it the last minutes, because so many people join in the last hours, instead of doing it two or three times, the last time... You got... you should have been used to it by now.

R: ... It's called "ust in time" delivery.

K- Yeah, it's just that we get people joining the last minute, then you have to go and do it one by one. And the IT's wait still the last hours if possible, to bring in the people who registered to be able to join in, and some people don't have it. So, just couple of hours before the session, check your emails, check your Spam, it's there. And if you have a problem, just write to us, you have a problem, you didn't get it, we... the system is live, we watch it and is monitored, and joins you in.

R: They can watch, they can write to info@keshe.foundation?

K- The usual place, they know usually the email, they send to us, where they booked it. ... The, you forgot to explain about your Livestream for this week.

R: Yes, Livestream basically is no more. Livestream has been bought by Vimeo. (2:02) So, the Livestream channel that we had before is, no longer in the same form, or the same link. And we'll have a new Vimeo channel up shortly, and it will include the previous videos that'll be transferred over to the new Vimeo site. So, it'll be much like the old Livestream, but perhaps have some more capabilities as well. We'll see about that.

K- Yeah, it's the development, buying and selling, and I think one has been bought, so they're all... We have to go with them, as the other providers. It's just the migration of everything from the old site, to the new site of the providers. Sometimes it's easy, sometimes it takes years.

R: They suppose, they say they're making it easy, but... I don't trust them.

K- ... You know it's taken us nearly four years to migrate all the Keshe Foundation, keshe.com servers, once they were sold to new company and they left it to us to do it, because they won't do it. For us just to migrate our servers from one company to another, which has been bought out. It took nearly four years, and we haven't even completed some of it. This migration sometimes takes a lot of work and time.

Q: ... Will the Zoom code for tomorrow still be sent, (2:04) or is it the same access as last Friday, and will the same headsets be sufficient?

K- The number is always the same, but if you have registered, they open your line to join in. It's not for everyone, just because they've been once, you... they will not. They will not, because those who registered go on the list, and just open that list to that number, that's how you come in. And the headset, we advise you to use the two headsets, it's much better. One across the ears and back to the front. And if you have the fourth headset, you can use that. But, try to make sure the side which you have, which you consider always to be the one with, the one which doesn't have the microphone is where you send out. The one you receive is the one which doesn't have the microphone. Put that on the back of the head, and the one with the microphone in the front. So you dictate the fields to go from the back to the front.

And we scientifically can confirm, from what the real data and things we collect, all of you receive fields from the back of your head. And if it is physical visualization, it comes from the front to back. So, when you connect to the line of the Universal lines, our data shows you receive everything through the back of the head. (2:06) And that's where most of the density, heavy density and the Soul is. Soul sits very much in the back, in the far end, in the middle. And our data, our research data, especially past few weeks, confirms that.

So, if you use a headphone from the back to the front, the one which is a microphone is a sender. So, it dictates which way you're sending the information. The one which has no microphone is the, what you receive in. Working on that principle, you keep your microphone in a way that comes out, because you send message out, you receive from the other end. And it usually works that way.

In the... you put your microphone in your left ear, say the one which has a, what you call it, no microphone in your left ear, and you put the line which has a microphone in your right ear. Usually you receive from the left and give to the right hand, so, works the same way. This is a very good guideline, for those of you have a microphone and you have a headsets to know how to use it.

And, you see it in a beautiful way. We done some development test on you, on the sessions of last week, and it's amazing the information, which all confirmation of information, the correctness of our system and it sits. Primarily, we control what you receive, and to what extent. (2:08) We open the channels, and then once you learn, we let you go, like after a few hours we let you go, and you have hours and hours. The, what you call, 9 to 5 session, doesn't mean you have to sit there 9 to 5. Once we set you up at the beginning of the day, we control what we want to control in the background. We don't talk to you, we don't do anything. You can come and go when you like. The session is not the do this, do that. We control the do and not to do in the background. And, keep an eye on the chats of your Zoom during these sessions, because sometimes we put the instruction. If you understand it, the translators just translate and put, stick it on "no talks."

And you'll see it, it was very strange last week. 17 people stayed on over the night, because their time was a day time. And some of them were asleep, we know, we see the monitoring of the system. And some of them go into their own dimension. So, what you see, use the headphones to the way it should be. Before we had the headphone left and right and rest, because our system was set that way. Now we work on the Universal system, there is no left and right.

We work on the principle of the, how the man receives and how man gives. One is Magnetical, one is Gravitational. Gravitational you receive, Magnetical is one you give out and on your headphones usually there is a microphone, where you keep the information out. We use that principle very much, in a very effective way, because the systems have changed and it's very, very, very interesting how you Knowledge Seekers participate, will use and change and become the ?? time, what you call it, the Passengers of the Universe. (2:10)

Any other question?

Q: ... Does it make sense to wear the Visual Enhancement Unit and the Communication Headphones tomorrow?

K- Pardon?

Q: Does it make sense to wear the Visual Enhancement Unit and the Communication Headphones tomorrow?

K- No, no, no, no, no. You mean the, the UBESUS (Universal Body Enhancement Spaceship Units) and the Communication ..? Eh, no, we, we try for the beginning of the sessions not to bring it, and very soon, once people start receiving all their Headphones and everything else, we put a session for you, how to use it, and how to communicate. In a way, a lot of you who have these systems, you can start communicating with each other. And then you learn and we expand this more and more. Communication doesn't come in a form of,

"Hello darling, how are you? How is the weather?" You learn how your Souls connect and you connect to each other.

And this will come into operation gradually. We have to wait for all the Knowledge Seekers to receive the second part of their units, which is getting shipped in next week or so. Because the first was, first part was shipped during the holidays. A couple of people haven't received the whole system, then the next batch goes out. The next batch of Headsets goes out by next Friday. We wait for you to come and receive your Headsets. Then we send the next one out and then by the end of the month will another third one, batch of ten will go out. And then we start putting sessions for you, how to use it, how it is there. (2:12) But you can test it, see how you feel with it. But it will not be used in these sessions, no.

If you have the discs (Nano Mirrors), you can use them and see how you feel, how you transfer energy. If you use the system, how to send and give energy, last Friday or on the 22nd, you can use those, what you call, the discs. And you try to send your love, for example, or your attention, your energy to the grandmother and see if you actually get to the grandmother and see how she is. Because you can do that, we know you can do it, and how it is. So, you have to learn it.

Any other question?

Q: ... Three times in the different Friday sessions this happened to me. One, I saw in front of my face, a face of a Chinese woman. 2. I saw the Earth from the Cosmos. 3. I had seen a face of a baby. All images had lasted no longer than 3 seconds. All this happened while the mic was closed. When the mic was open, I could hear the baby in the background. This happened without me setting an intention. It seems I must have seen people who were also in the sessions. Question, "What part of me saw this while my body was sitting comfortably in my chair? And what part of me decided to see this without setting an intention? I don't understand." Thank you very much. (2:14)

K- We have this, what you call visualization through transmutation, is exactly the way you call it a dream. But, when you go through dimension of the fields of the, what you call, transmutation, you actually, without leaving the body, see the connection, the person, and becomes very visual. And this is something you have to get used to. In a dream, your eyes are closed, and so, what comes in the visual condition through your front, you register as a dream, you see. Now, a lot of you go through that transmutation, but your eyes are open. So, you physically see the object. And, this is something that you have to learn, how, what is a real picture in front of you, on the physical dimension, what is the picture in the Soul dimension.

There is a way to do it, we teach you in the sessions, how to control this, to understand the difference between the two. In a way, as you said, you could see a child, but you still see the background, or you are... you don't see the background, but you only see the child. And this is very normal, this you have to get used to. And this shows you have actually entered in dimension of transmutation. The next step would be, if you go walking with the Chinese woman, you still see yourself, walk into the forest for example, and you have no verbal communication, but the communication through the Soul. (2:16) And then maybe, in the position that Soul exists, Chinese invites you. We're talking about going to China, working in China. So, there is a mindset that you want to be there to feel the culture, or we be there.

And so, we understand these things. This is part of learning about yourself. And distinguishing between the two, and start living with both, and gradually, most of the others will do the same. That's why you cannot lie, because the Soul communicates and there is no lying in communication. This is not unusual. You... was your

eyes open? Was your eyes closed? And, as you are in a physical dimension in control, the vision becomes a reality, because it is real. Many of you will have this. We asked from the people who were in Linz to confirm it, and they could, that we know is, is what you see, but in the time of the dream, as you're asleep, most of the information is in, as a information, because you, in a way, you've got a filter of your eyelashes. You blink it. In the transmutation, if your eyes open, you see the physical life, and you have seen what is a reality. But you have to understand, was part of your emotion.

You got to understand something very important, and this will play a lot with you. In the physical life, you spend hours and hours talking or going somewhere. (2:18) In the dimension of the Soul, everything is matter of the seconds, but it can last to you hours and hours. And you will learn it gradually. That, you call it the three second, it could be in reality three hours. Or it could be one second. And how much you need and what was the knowledge, there is no time wasting, as I call it.

So, you're not the only one who reports this, we had a number of people in past few weeks, write these kind of things. And as I said, we have to accept you've been the passengers, we just follow you, in a later part of these developments, we ask you as a group, if you want to be, or connect to other participants, we create a condition for it, you cannot just do it on its own, maybe some of you be able to, to join together to go somewhere. It's like the couple who came to Linz, this, we said, "Where do you want to go?" They decided and they went, went to Paris, and they went on the same streets and that kind of things, and they could share with each other, because they went together, but they never been to Paris, I think, before, if I remember correctly.

So, these are the part where the training comes. If you see a beautiful scenery, you can come and say, Oh, anybody, you know, not actually talking on the line, anybody would like to come and see this scenery which I'm seeing, and see how many people turn up. And then you can ask, "Who are you?" in a way of understanding. He says, "I'm the Soul of Azar, or the Soul of this, or I'm so and so." And then when you come out, you talk and say, "Yes, I've been there, we went together, we saw it." But these are, these are to come, this you have to learn first to walk. (2:20) It's not explanation, it's you learning a new dimension in your life.

Any other questions?

Q: ... I would like to understand well the role of emotions when we address our Soul. I have heard differing views on this, namely that to connect with our Soul, one should not make use of emotions either, on the contrary, that emotions are a requirement to communicate with our Soul. And then, do emotions have relevance to the STP, or do they also belong to our Soul of the Man (STM)? I would like to understand this, if possible.

K- I answer you one simple way. You got two hands? Put one hand in your pocket and try to clap with the other hand. Does it make any noise? Can you show your... if the clap is to frighten a dog to walk away or clap to confirm your joy from what you are watching? Are you clapping to get attention? You have one hand. How can you show emotion? You just shake it. You take a hand out of your pocket, and now try to shake the hand which was in the pocket, and put the other one in the pocket. And see if now the left hand, the other hand can make a noise. And then take your hand out of both pockets and clap it together. And then you see a noise. (2:22) You can show if you are appreciating a play, if you are trying to frighten the dog, or you're trying to get attention. That's what the emotion is.

The Soul and the STP are each on the hand. Cannot show, cannot exist, without having the other to show the emotion. They have to interact. And that interaction is emotion. And how you show it, then it interacts, it shows, it shares, with both hands in dimension of physicality and the Soul. The people say, "You need the emotion, you don't need the emotion." Remember this, then you get a very good, clear idea. One hand is the Soul, one hand is the STP. And in dimension of physicality (P) you have to interact.

In the dimension of when it's the Soul, the STP, within it, The interaction can come within, or the interaction of the STM with another Soul, creates that handshake. And you have to gradually, as you understand, emotion is part of the structure of the Soul's interaction. Otherwise you don't know if you have to get distance, is it a good feeling, or is it a good move, or a wrong move. So, if you find the answer to this, the way I explained, then you can rely on your own investigation and understanding, you don't need to rely on what people say.

I hope I managed to clearly define for you, what you were trying to say, or answer you, the way you understand. That emotion comes from interaction. (2:24) You can't love someone, when someone is not there. How can you confirm the existence of the Soul, if there is no emotion with it? No interaction of the fields, to decide the distance, the place. The emotion of the Earth in respect to the Sun is the distance they keep in respect to each other. And they both feel safe and happy to be where they are. And it's the same with the man, and the same interaction with the others. And then you decide, how you travel the Soul, and how you travel the STP, and how they meet, and what should be the emotion of them.

Any other question?

Q: ... Mr. Keshe, this is actually, I got very excited. Okay, so...

K- Oh, that's dangerous when Azar gets excited. God help the emotion of the Universe.

Q: Okay Mr. Keshe, this is amazing. Because you say, okay, so, say I have a scenario, another scenario, something is happening, okay? Because I play with these two, but I'm just going to explain. So if it is two hands, the two hands together create that emotion, without it, it cannot be. So there is something I go through my head. As I go through my head, I can cry with it, but then I can go with the same thing through my head, but I can see it in a different way. So, what's, what's the interaction of these two, that one create the crying and the other one look at it ... not crying? Like for example, I give you this scenario that makes it clear. You and I standing there, watching something, you start crying, and I come and comfort you and says, "Don't worry, this is not happening this way, this is happening this way." (2:26) And then you say, "Oh yeah, I see it this way." So you calm down. You understand?

K- Yeah, I tell you, it's strange you bring this up. Yesterday I was with a Knowledge Seeker and we were in a meeting with a guy. We were in a meeting with the other people in the room. And my impression of the guy, we met him a couple of times before, was, you know, it was just a waste of time, the guy is not doing anything, it's just, you know, "lip service." We're sitting there, he went and brought folders and folders of what he has done with what we talked months ago about. And I was shocked, surprised to see how wrong my assumption was of him. And the way he put his... he's in a point of authority. He puts his time in doing this. And, when I saw so much work, so much work, it's unbelievable. Done by him, in the meeting of past few months, without him talking about anything, or doing it, telling us anything, he just wanted some more information. I turned around, and I said to the Knowledge Seekers, I thought they just swapped this one(?? under) on the carpet, because, whatever. And I turned around to the guy, he's a man in his sixties, and I said

to him, "I thank you, and I respect you, for what you've done, and I sincerely appreciate and thank you." And this man, we could see a tear in his eyes. (2:28) In a way of appreciating, respecting his emotion, and in a way, confirmation through the Soul. And, it was touching to see this, and at the same time, being in the point of authorities and official, he was trying to hold his emotion back. For seconds, you could see the redness in eyes, you know, when you cry from joy and confirmation, and the tears which are there, he was trying to control.

Maybe in all his life, never ever appreciated and thanked him the way it was said. And this is... and strange enough, when I was sitting in front of him, when I saw this, I said to him, "I've seen what you've done." and the effort you have put into this and to the authorities, and it's my job to make sure I don't let you down. And you get what you need, whatever you ask for. And... It is the way we do. How I was sitting there and elevating his... I'm not ?? permitting , giving to him, he could take anything from me. And you could feel the change of dynamic in the room.

The first time I met him was very harsh, the second time we had a meeting, 5-6 hours was extremely, you know, "I'm in position, I make decisions and I want to." And after months and months, and him bringing these folders, and there were more folders outside, most probably, we knew it could, because numbers couldn't add up. How much he's put in there, trusting to do what he was put in the position of authority, (2:30) could have actually brushed everything under the table. But no, he didn't, and he was appreciated, respected, and... I opened .. the way I know, to... gave enough that he can take whatever he likes.

And it became a point of joy to be there, where before it was a point of regret to be there. And for him, the last thing he did while we were walking out of the room, he following us out, for an official, especially European, he tap me on the back a few times as, "I respect, I appreciate what you appreciate about me." And, you don't need to do anything. It's just transferring that energy, it gives you understanding of the position and time and emotion. Doesn't matter, it's a tear, it's a hug, it's an affirmation with a nod. It's what is given and what is received in sincerity. And you can always make mistakes, you can always misjudge, or the language is not to be understood, But when you do it through emotion, you do it through the Soul, it's amazing what things can be done.

Q: Mr. Keshe, you know, I experienced that, because you see, you know, I saw something, I saw a person creating, say, a group chat or something, whatever happened, I could sense that this person is really on, not ease. So I called a person and I talked to the person and I said, what is, are you okay? The person said, no, I'm not okay. And then, because I knew what's going on, so I just simply talk about some of the basic things that who we are and stuff. And then not much of any philosophy, or anything, just simply the base of who we are and what we are here. And the person is not into so much the plasma technology, but I just simply explain to that person how it is. But then later, I mean, like five minutes later, that person text me, he says, "You changed my day and my life." Because the way I look at the world, it was totally different. Now I just, even my relationship with my loved ones around me, everything just changed.

Because you see, when you talk about the magnet, you see when we have to, you said to us, put the five, six magnet on the table and move them. You see one changes in respect to the other one. Then I was thinking, if I'm a magnet and the other person is a magnet, and five, six pieces are a magnet, and then my magnet, because the magnet is complete because a magnet doesn't have what we have because we have a choice to choose how I want to see everything. For example, if I look at somebody and I, for example, I look at you and in my head I said, okay, he doesn't like me, he's upset, all that. So my field is going to change in respect to what my perception of you according to what I think you are. So I say, okay, so I'm not going to approach

this guy because he doesn't like me there. But then I said, no, (2:34) I'm going to look at this guy, he likes me and everything else. So my field is going to be according to you complete as a person, as a God himself, because you are God, I am God. I'm not going to put you down as somebody else. I look at you as God. So the minute I do that, even though if you don't like me, you start to like me because my approach to you changes. Because I help myself as God I am, not somebody else. Because if you change that, then the other person changes.

So this was my analogy. And actually, when I was thinking about it and I approached it this way, it worked. Because that person was seeing everybody around himself as somebody, people who don't like him or they don't like that person. Suddenly when he changed his attitude, suddenly everybody around him changed. And he said, "It was so shocking to me that how everybody around me changed." It was really simple.

K- People don't change, because he has changed himself. People see a new person, new behavior. And a lot of time raises a lot of suspect, why is he is temporary, or is trying to do something?

In the coming time, I will teach you Knowledge Seekers who are in parts with us, how to elevate the Soul physically, by physical touch. And you will see the change. This is what we say in Bible, "Christ arose the Soul of the dead man." And this is what is. The dead man is not a physical death, (2:36) is enlightenment of understanding, ignorance. And you can do it with Soul. You can do it physically. And when you do it physically, you cannot do wrong. You cannot take. So, it's only one way to give them, to elevate. And if you ever try to take, you take from yourself, not from them. And, it's very easy.

Sometimes, some Knowledge Seekers who are with me, I do that. I feel the Soul is ready, I never follow what happened to them. But, it's the way I told you, I can awaken you last week, with specific position in the physical body, without you ever knowing that you woke up, you can do the same with the Soul. There's a specific position in the physical body of the man, that you can transfer fields of the Soul. And, you are not allowed to change. You provide, and if they are at the strength, they receive and they change.

And you can do the same in the dimension of the Soul. It's letting it, being it, giving it does not matter what happened to me. When you give in the dimension of the Soul, sometimes, physically, you feel exhausted. And sometimes, when you do the same thing, you feel refreshed, because in a way, it's like a dam, (2:38) you feel as you give, but in fact, they had so much, that they could not give to someone at the strength they had to give, by you trying to give, you take from them and it allows them to receive the new. In a way, you went to give, you take, and that taking allows them to receive a higher order, maybe from you, maybe from others.

It doesn't work the way, oh, I gave. Maybe you actually receive, and then you find a change in yourself. Oh, I gave this guy and I feel good. Not really, because you received from him what he didn't need, and that allowed him, the cup is emptied, now he can fill up with fresh. And that's what he was waiting for. And you received the energy you needed to go, and in a way you were the ???. You are beneficiary of your own act. This is what I said, "The more you give, the more you receive."

And this is part of understanding the work of the Souls. How it works, how we really go to give, but we actually, we don't give, we receive and that creates a, what I call, a space for them to receive what they want. Not necessarily what you're giving them, because it's not that the strength they need, it's the guy across the table, it's the guy in another part of Universe, who's made it available and they need it. And it brings it.

Tesla used to have a lot of these emotions. In some of his life stories, you hear it. You see, you look at it, this, that, this and that. But if you look at it, you... He sometimes spoke about his enlightenment, but people at that time couldn't understand. (2:40) They had no clue what he was talking about, so, everybody took it into dimension of physicality, this and that, and just ??.

And, we see this in the work of DaVinci. Da Vinci did a lot of this and that, space and blah, but he knew, he found a way to tap in the Universal knowledge, as much as he could understand, and convert it to his language at the time.

A military guy very recently told me, "You know, you have the knowledge, but you can abuse it. But what is strange to us is, you are only using it to bring that target of you, which is creating peace. And our government appreciates your work, what you are doing. And this is what we understand, in what the Foundation is about. You can abuse this technology, or everything else, but you give the technology to us, but you want peace against it." I said, "That's how it is, how it should be." And you cannot go against my wish. Because I gave it on the condition of the Soul, at the strength of peace. And Souls work that way, you can't abuse it.

And the same is, most probably, if we get everything right in Sanya, if we can get the others on the table, and all the Chinese on the table, scientists and military, they will understand. Doesn't make China a Superpower, because they have. It brings to our wish and the strength we release technology, a peaceful nation out of the nation and with it to other nations. (2:42) But they gradually learn.

And you most probably took more from the guy than you gave to the guy and because you felt that good, you allowed him to receive something that you feel good about it, because actually you received more from him than you gave him, but what you took from him was, was blocking him to receive what he was waiting for.

Q: But Mr. Keshe, I didn't feel better or... because for me it was... because it's just...

K- Hey, hey, hey, you see... No, no, no, no, no.

K- Mr. Keshe, you see...

K- Wait, wait, wait.

Q: No, no, Mr. Keshe, you listen...

K- Wait, look at it, days and weeks down the line. Look at it, why you're speaking about it today.

Q: No, Mr. Keshe, I'm not...

K- It brought you joy. It brought you a confirmation.

Q: No, because you know what, because I realize, you know, we come to a position now, because this is, this is I think, our problem is, because when we think about, when we look at everybody as God, not... because the backbone of everybody is God. Whatever the... whatever is... because I look at, I give you an analogy, we are all diamond, covered in garbage. So, as we go along, this...

K- Can I say something Azar? Speak about yourself, please. We are all diamond covering garbage.

Q: No, no, I mean, not all of us, but you know, the people, like for example, people who are killing all those things, they are all also diamond. What happened, they have garbage on them, but when you look at the diamond itself, rather than the garbage on them, then that diamond, that garbage falls off them. Just looking at them like that, but when you look at the garbage, they stay garbage, when we look at them as a diamond, they change.

K- Yes, it's all how we take it, it's just the way it is, and how much we can change that garbage inside or outside, to shine. (2:44) Doesn't change, the fact how they've been.

But, in so many ways, when you bring those kind of changes to people, look at what change brought to you. It means that the energy you needed, that's why you came across them. And they came across you. But you feel that change, but you put it, "I gave", or "I saw the change". This is what I said, look down the line. What that conversation, what brought to you, what you changed.

This is what I'm trying to get, for you to maybe see, not to understand. You are more recipient from him, than what you gave him. But, with what you received from him, not even language talk in dimension of emotion, because you were put there to do that, your Soul brought you to speak to him. You opened up, you took the fields that he didn't need it, and it was blocking him to receive the love of his friends or whatever. He gave that to you, and you think you felt good because he's... But in fact you were the recipient of it, what you needed, that's why you came across him.

Q: But you know Mr. Keshe, but that wasn't my intention, because when I leave...

K- Doesn't matter, your Soul works on its own, doesn't matter what you planned in physicality. Your intention or not, your Soul is aware that what you need and it's available there. It's like a, you know, that supermarket only sells one item and that's the item I need.

Q: Mr. Keshe, you remember you said always, "The judgment day is not the judgment day, you go in front of the God and God is going to judge you, is you will be judging yourself?" Because now, now, because what happened, like every step, like we live, I usually look at, what is my intention of this action? (2:46) Is it something I want to gain or just like, naturally it's coming?

K- Yeah, but you still are blind to the other half. You come to this conclusion, these points, because your Soul brings you. To test, to see yours. ..

Q: Because I want to move from the grace and humbleness, not from the arrogance and say, "okay, I gave." Because that's not my intention.

K- Yes, but it's not arrogance confirming that I needed it, it's humbleness. You are not taking, you're... It's very strange, always, my mom always, I used to have these discussions deep with her. I said, "You know something, I'm like an executioner." And (she used) to say, "I know what you think that way." Because I said, people come to me, and the things changes for them, and their life changes, it's like that they take energy or whatever from me, for them, they come to get that change. It doesn't mean bad, doesn't mean good, it means, I'm there to receive, but that's when... then they receive, they receive something which balances their life. And that's how it should be.

We never judge, but you see people come and they get. .. Look at it this way, I was talking this yesterday with a Knowledge Seeker, it was very strange. Turned around and said, "That's... Why Mr. Keshe, people who come near you change so much?" And then, they do this and that. I said, "That's for their Soul to be tested." And they change because they need that change. (2:48) And then we see them. And as we've seen many times, they claim everything else with it. But that's something for the confirmation of their existence. I claim nothing. And so how can they claim just being there allows them to claim?

So, we... I always say, we come to a position, and our Soul brings us, and then we make a judgment on the physical condition, for what the Soul has brought you, to do. And then we judge it, and which, this is the wrong way. Ask yourself, "Why I had to come, to make that call, for that man to be there." Your Soul brought you, it's there, his Soul needs it, you have. You are ready for to receive, so tank it up, and I am empty to tank up mine.

This is... the more and more of you go through these sessions, you learn this. We let you, the first couple of sessions, to do what you like, and then, as you've been with me in the sessions in Linz, some of you, we leave you the first half and then run your own in the system, you can put (do) whatever you like. And then we come and tell you. In the following sessions, we guide you how to be able to do things. And then you learn.

And then, if I give you a questionnaire, the following, or during the week with what you did, I'll get 80%, 90% of you confirming exactly what you did. Because now you're learning. I tell you, "Turn right, you turn right." You turn left, you crash, there's no entry. But the moment you're driving, you have to learn where the gearbox is, and what's the clutch and the brake. (2:50) And gradually, in next months, on Friday sessions, we teach you how to brake, how to turn right, and then how to take off, how to interact. And then gradually, next few months you learn how to go and land safely, you don't crash.

And it all comes by the fields, not by talk. You feel the emotion. And we change things by interaction of the fields, and we change it for the betterment, for them to take what they need, not for what we want to give, and they have to use it for what we gave.

I had a... my children were brought up in a very specific way, that I respect them as a being. From the time they could understand. They are responsible for their lives. When they're 3 - 4 years old, they could understand, we go shopping, 2 - 3 years old. We give something and we get something back for it. And if you go to the supermarkets and shopping, children are nagging with their mom, "I want this, I want that, this I want." From childhood, when they were 2 - 3, 3 years old, they could understand what life is and what is dimension and, you know, what you can do. I give them a budget and give them the money in their hand. They go shopping, this is the money, it's the amount of chocolate, sweets, whatever you want is yours, you have to look after your body.

The first few weeks was buying the Crisps, (chocolates) and everything. And in the house, we gave them a drawer. This is your drawer, this is your part in the kitchen, or in the... where everybody else is, (2:52) that is not my room, I take my sweets to my room. And, whatever you shop, you put in that drawer. Till next shopping, that's all you're going to get. You learn about your dimensions. And, when we go to the cashier, they pay for their goods and they get their change back. In their hand, so they understand, they respect. And they always were told, "(may) I have this?" And when they get, "Thank you", and putting this in their bag, they were responsible for their action.

And, we never had children crying, shouting, "I want this, I want that", because that was theirs, they knew what they can do. And in the house there was nowhere, "Can I have a sweet?" "Can I have this?" You had your budget, you shop what you want, this is your drawer. And gradually after a few months, there was no interest to buy things, because the drawer was full what they really wanted, what was theirs. Unless there was something new, they had the money to spend. And this followed their life. Because, we have to be guided, the correct way. And our children follow that way, and our Soul is our child.

I never told my children, "You can't have this, you can't ..." "This is your budget, this is the money, you dictate your life." "What you want to give and what you want to take." And the brothers never went pinching from the other one, says, "Can I have this from your box, I can give you something else?" He said, "No, take it, I don't need it, it's been there two weeks, three weeks." And this brought a lot of things to us, because I watched the advertising on television with new chocolate sweets and everything, had no effect on them. Because, the child says, "Mom, can I have this, can I..." No, he was a... on his own, and if something was little bit more expensive than the money he had, (2:54) "Can I have something from my next week, because this is something I want to try?"

We teach, we guide, and it's for you to learn how to put it, where to put it, how to spend it, how to give it, and it's the same with the Soul. In our physical life, we are caretaker of Soul, we are not controller, or the owner. And the more we learn, the easier we live. We have to respect, teach the Soul of our children from the beginning-ness. And it goes through the action through their life. They learn how to spend, when to spend. How to waste their life, when not waste their life.

And it's the same for everything. They have a budget for food and sweet, they have a budget for toys, they have a budget for lessons. "I want to go to this, I don't want to do that, but that's my budget." "I want to buy this toy out of my, what is mine, which has been allocated to me, that's my Soul. And that was a toy bought." I never had discussions like this, where I see a lot of parents have with their children. Because, children from childhood became responsible for their own conduct of life. Never had any of my children in the streets crying, "I want this, I want that." You want something? I'm going there, I want this sweet there. That's your pocket, that's what you have, from age of 2 or 3. And you pay, I don't pay for you. You give the money to the cashier, and if it's correct, they receive it. Says, "Cashier, sorry it's too... you can't buy this, you are too young." And they've learned what their limitation is.

Now we are doing the same thing with the Soul. And you have to learn it. What you can give, what is taken, how you respect it, and if it's acceptable to buy. (2:56) And this is the same with the Soul. And we are now, you are that child with the money in the pocket. Now you have to learn where to spend it, how to spend it. You've been brought here, but you don't want anything from this shop, because it's got nothing in for you, but you go to another shop, it has exactly the sweet you want. And it's the same. Your Soul brings you to that position, and how you respect it. I just take the child to the shopping center, I take the child to the supermarket, it's for him, if it's the right place, right thing, what he wants, and happy to do that. And you learn by mistakes, or by understanding where you gave the wrong energy to the wrong Soul, and actually you were there to take it.

Q: Thank you Mr. Keshe, taking so much of the time. Thank you.

K- You're welcome. It's very interesting how we bring our children up. And how we bring the notion of correct conduct in them. And how to do it, and what is yours and what's not yours, and what it should be. My little boy, that was the way he was brought up. And one day he found money on the floor, and he said, "Dad, this is not mine, can we find who lost it, he might need it." And he was looking to see who lost the money, to give it back to. At a young age he was walking in the supermarket with the money in his hand. Because it wasn't mine. And this is the way we should be, we should bring, and this is the way the children of Mitra are brought up. And we teach by example and the way they sit with it. (2:58) And what we learn from it and how we learn from what ?? has happened.

Any other question?

Q: ... Hello Mr. Keshe, if one can't be there tomorrow, how can one connect through the Soul?

K- Tomorrow we connect directly through the headphones. We set it up that way. And it is what we scaled up to. A lot of people say, oh, I wasn't there, but I was with Soul. If you have found a way to be there to your Soul, you're quite welcome. We are just tools. And what you think, what you feel, what you imagine is in your ?? hand.

Q: ... From when on in time, (3:00) for the rest of us who cannot pay for the sessions, how will we be, when will we be learning transmutation? So, it's ongoing?

K- It's ongoing, we have at this a lot of time. And, at this moment of time, it's the way we operate. How it'll happen in the future, it's another position to consider.

I'm seeing something very interesting, when we gave things free to people, we were always wrong and we did something wrong and there was nothing we could do right. And there were a lot of time wasting. When you pay for your time, it's not you pay for us, because you paid your respect yourself to be there. You don't pay us because we say you pay us to be there. It's a different way to look at it. And a lot of people come in ...

It's like, as I said last week, the week before we gave you a few hours, the time before on 22nd. Last week we left it open, till the, what you call it, the mobile phones batteries could run. One of them ran out a bit earlier than the other one. And it's how you approach us, than us approaching you. It's how you perceive things to be, and how you perceive it has to be my way. And this is how, at this moment of time, we operate. (3:02)

And as I said, very simply, it's a condition we give, nobody can... we can... you can come to the water, but you cannot drink it, because the Soul says, "This is not what I'm allowed to." The conditions, "I can see it, but I can't drink it." And this is one of the ways which works in this moment of time. And how will change in the future and maybe it's not time for it to be there.

A lot of people, a lot of Knowledge Seekers who are around the Foundation, they complain to me why you work... I must receive how many of these complaint. You're walking with the... talking about the peace and then you talking about defense. And I said, "Till I don't show them that defense is worth nothing, they will do not understand it." They don't understand what it means that the latest weapon technologies we created, compared to the Knowledge of Universe, is nothing and it's worthless. In our work with military is not to create condition. We just want to show that what you are so proud of, has no value compared to what is a new technology, which is not offensive and is not defensive. It's actually way that the things work. It is part of the work of the Souls, fields of the Universe. And this is how we operate. Till somebody, somewhere down the line, things change. (3:04)

And it's very simple, it's like what we talked earlier with Rick, regarding your Webinar, and going to it. They changed the system, they sold to another company, and the new company has brought a new condition. And, they changed the upgrading, so... and migration, till we don't pay we can't get migration, and we can't take things out. So, can any of your Souls, please go to the new owners, and pay them with the Soul, that we can have the services, that you can learn about the services. What the knowledge is. Those of you who pay for these sessions, or those of you who pay for teachings, allow us to run our systems, that the others benefit by it.

This discussion we had with Rick before, just the session of today. There is an upgrade, an upgrade has to be paid for. If the Soul of any of you can pay the computer at the webinar, that we can have an upgrade, you're quite welcome, we'll have an upgrade, we get elevation from your Soul. This is a fact of life, the way it is at the moment. And those who have it, pay for you to be able to use the webinar, keeping the other services going. And it's not that the people who are... can't afford it, even those of you can't afford it and you come and learn every week here, is paid by other Knowledge Seekers who pay for the services of the Keshe Foundation, by donation, buying things and the rest of it. So you're already receiving a lot, from those who have and they support. (3:06)

Any other question?

Q: ... How can we circulate this cerebro spinal flow more effectively? And what is Kundalini? They had a question about that...

K- What?

R: Have you heard of Kundalini before? This idea of the fluid in the spine and brain being circulated and accelerated in a way that people call it a Kundalini awakening or... It's described in some of the spiritual literature, and people have these experiences of Kundalini.

K- No, I haven't heard about it, so I can't make a comment. I know you are searching on your Google, I can hear you.

Q: Mr. Keshe, Mr. Keshe, I can tell you this, because, you know, it's the old way of look, the way we look at it scientifically, the old way, they look at the brain and the spine, that you know, because all the 12 cranial nerves come from the brain and where the Soul is, and they come to the bottom of the spine. And you remember you said the back of your neck, you're going to feel this vibration, you know, they start transmuting. (3:08) So the way they explain it, they have a different vocabulary, different way of seeing, but exactly the same thing. But they didn't know how to explain it scientifically, but they go through the spiritual way of it. So this is actually was in all the China, in India, even Persia, all of them talk about this, but it's the same thing, but now with the Plasma Technology, with the way you explain it, we have a proof and you know how it's explained, it's exactly the same thing.

K- Thank you very much. Anything else? Rick?

Those of you who join us tomorrow morning, we try to be with you in sound for the first few minutes, usual pattern, and then you don't hear from us at all. You come and go as you like, but keep an eye on your chat, if we put any information out. But as usual, we control everything in the background, And, it's for you to learn, and then we leave you like this for a couple of sessions, that you feel comfortable, and then we come in to explain it to you, what we want to do, in a very deep way. And, we go through, we start the process of how you transmute, and the rest of it, as we go along.

Any other question? Or shall we call it a day?

R: Yeah, there's still 14 questions left, so I don't think we're going to make it through.

Q: ... (3:10) How is it that the Soul can take over the body functionality, when the brain no longer is sending signals to move? It feels like dual control centers in operation. Can you explain?

K- It's very easy. You look at the physical connection, but the Souls and the cells have a field connection. And we have shown this, scientifically and in practical conditions. And if you can track it, it can bring back the brain into operation.

It's something... I don't recommend you to do it, but I've done it a few times. But I know what I'm doing. I hope I knew what I'm doing, because the results always has been correct. You know the... when you have a heart attack, and the doctor put this fibro machine and they give you electric shock, to bring the circulation back and give the brain going. You can do, if you know how, the same thing with two hands. In a specific way, you can take the energy of even a stroke from a body. You don't need the brain. You bypass the physical connection to the field's connection. And it's very easy to do.

In many occasions, people who come or ask a question, physically we can be with them. (3:12) They think the material or the system does the work, but with a touch, knowing you exactly where you touch, you can change the structure of the physicality, without actually going through the brain, through the fields of the brain. It's not you who doing it, you just create the connection. And it's very easy to do.

We don't have a brain when our STP is within us, because the brain is made of amino acid (AA). And sorry, in this part of the Universe, if you leave the physicality outside, there is no Nitrogen. So, your AA collapses, you don't exist anymore. By putting your physical Soul inside your Soul, you protect that structure of the origin, till it finds a comparable and a match-able system for it to survive. And that comes through the knowledge of the Soul, to the STP, how you got to change when you appear in the physical dimension, which we do a lot.

We actually do it by changing color, becoming Indian, black and white, and whatever, but over centuries, gradually, we add up to it. And, as I said before, you look at the Indians or the Chinese, and then, look at the time it took them to change to what they are, and if they aren't a part of the race which migrated across, whatever, to get to the position they are, and take the same time and reverse them back to the where they came. Let's say if they came originally from East Africa, or Central Africa, coming up through the Saudi Peninsula up to Iran, (3:14) and then going that way to become, let's say, Chinese. And it take us, let's say, 100,000 years or 50,000 years, what happened if we return the Chinese back through the same time, track and the space, hopefully the environment is not that much changed, would they change to black, if you take them back to Central Africa?

And this is the pattern it is, and you can do that yourself. You can speed up the change, or you don't need the physicality of the brain to do it, you bring it to that condition, I can speak Chinese, I look Chinese. And then, the physicality changes to, it's the creation of life. It's the transmutation, matching with the other Souls. And this has to become a second nature to the Knowledge Seekers, who become experts in it.

Gradually, next few months and years, we physically bring this into teaching. And we show it, during the teachings most probably. One of you, let's say Azar in Mexico, will look Mexican, but we know it's Azar. You transmute live into, let's say China, she looks Chinese, speaks Chinese, understands it, but she says, "I still am Azar, but my Chinese version." We don't need thousands of years. We do it through the transmutation satisfaction of the Soul.

So you don't need a physical brain, but it's there, you have to live with it, and work through it. It's a lot to come in the teaching. Now we open this new Non-dimensional reactors and the emotion, and we don't have mixtures of the things, the way it used to be in other reactors. (3:16) We're working through the Soul of the Universe, and that changes to what you like it to be. To what your Soul needs it to be. And what your emotion dictates.

Q: ... The question is, do the connection and the travel, due to the strength of the system, or due to the wish of the man?

K- Wish of the man. We provide it, but because in our systems we have availability of everything exist under the Sun, as you call it, in the field strength, we hardly can miss them, especially with the new systems coming. We are not dictating or concentrating, we are actually making it directly to the point of what you need and your Soul needs to what it needs.

Q: Okay, and I would like to thank you. At last you thought about the people who cannot join, the time, but you put from 12 to 3 or 4, because a lot of people they are working and they cannot join. So thank you for considering this changing the times for the others. (3:18)

K- Yeah, it's all this way, gradually, this is a prelude to creating what we call, 24 hour access. And you can come in any time, it's like a restaurant open 24 hours a day, the service, the meal is the same, it depends what you want from it. And it had to go that way, everything doesn't go European time now, allows a lot of people to come in. You don't have to be there 24 hours, you can be there in 10 seconds and reach what the others might not reach, about 10 sessions.

Q: Can I work for this restaurant? I can make very good kebab.

K- Ah, no problem, but you ?? sold it. You know something, you talk about the kebab. It brings back a part of the history. This is ... you know the Jehovah, the God of the Jews, when you read Torah. Every time he was happy, every time he did something good, or he wanted something good to be done for him, he asked for kebab. And this, what you call it, he has even in Torah, gives you instruction, how to make kebab to have the best smell and taste. I don't know any other Holy Book who tells you how to make kebab, but actually in Torah it did. And so, as he came from that part of the world, and you and I are from the same part of the world, that's why we compare everything with the kebab. You understand.

If you... And I was... I told my mom years ago, I said, "I know I must have, because you come from Cohen side, (3:20) I must have that part of the Jewish blood which goes to him, because I like kebab only, and that's part of it." In Torah there is more speaking about the kebab, barbecuing as you call it, than anything else. Whenever Jehovah was happy, he asked for a kebab, and how to make it, and how to smell how the good it is. So, that's why you want to bring a kebab. It's part of our genes coming from that part of the world. Even they had a, what we call, Jehovah was partially was called, the god of the kebab too, by his followers. Because whenever he was happy or he wanted something, he spoke about the smell and meat and how to barbecue it, or kebab it, how prepare it.

Any other question?

Q: Thank you Mr. Keshe.

K- ...

Let's call it the day. Thank you very much for being here. And see you tomorrow, those of you who are joining us tomorrow. And we'll see where we go from there on, in the following weeks. Those of you who plan to come to China, or those of you Knowledge Seekers who already participated. We again, as we did with the London Conference, we, and those of you who want to join only for Sanya, we'll put facilities for you to be able to join. And those of the Chinese community who want to arrange to be there. We'll split this conference in a way that, as Chinese for past sessions, years, could not easily join with the visa and everything. (3:22) They can join us to be part of the bigger Keshe Foundation family and we promote it. And you can tell other Knowledge Seekers in China, if they want to join us to have that day marked, till we confirm it. And I hope we have a beautiful conference. And as, in a way, hopefully, the Sanya will be home of the science and technology of the Keshe Foundation. You will see where the knowledge will grow in the coming time. Thank you very much and see you tomorrow or see you next week.

Where did Original M fields come from (Origin of God); Everything has a Soul leads to its creation; Need purpose of life; Sanya show how Creation began; Gas Units ready - Society not; AA created from fields; Create Man in Bottle - fish in tank; Everything created from emotion of Creator - together with Soul of Environment - STM - etc; STC blows life into - emotion doesn't need matter to transfer; Transmutation STM interacts with Soul of Environment create life; How different races created - emotion of environment; Transmute by own energy & Soul; Bring own Cup Life to Sanya - show Soul; World leaders selected by Cup - truth or not; Mohammad not do magic - KF teaches science; Can only create Children of Soul in Space - through fields; Virgin Birth - true believer; KS not prepared for knowledge - easier for children; Blew - created 3 bottles Nuclear; Come Sanya with pure heart; Emotion of Creator constant - no change - Giver; Tells private life - present without P - (omniscient) - transmute have same; Cyrus Great - Zoroastrian Prophet King - Respected woman as center - Islam conquered for women - degraded women to half - ashamed; Lied about Mohammad and Moon; Messengers responsible to get killing out of man; KF operates by love of Creator; More on religion - time to end; STP is Mitra; STM goes to higher order - travels on Cosmic Rays through AA C14; System expands Soul; Love - virus; Harvard - false papers 20 years; Man developed tools - went backwards;

ENGLISH TRANSCRIPTION

(:13)

K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back as usual, and we'll see what is written in the books of the knowledge. That we could read from and share some, is the knowledge we know, so here we are all servants to this Creation.

When we listen to the intro and when we listen to many other teachings and the direction the Keshe Foundation has taken, it brings man to one point, and that is the point of creation. (:14) And the reality is that we ourselves have decided at a certain point in our life, or we will decide, those of us who are not in that position, or we are alive because somebody made a decision, two people to create a Soul and we are the creation of it. And the same way, we create our children, we become creator of other Souls. And then they become the others, and the others, and the rest. But in essence, every one of us, every generation, leaves a connection to us. And then, us to our forefathers. One question to ask is, where did our forefathers original fields came from? And we call it to be the Unicose, to be collection of fields that created. But the question comes to one point, where is the origin? Where did all this come from? And who created the magnetic (M) field?

If we consider ourselves, we as the whole of Unicose, to be, let's say, a ball, a dough, in the hand of another structure, (:16) created by fields of another structure. Where did that dough come from? You can't have a dough without the flour. Where did that flour come from? Where is the origin of that flour? And as I said many times, in one of the final books, we go to, we have to understand the origin of where all this started. How it became about that even magnetic fields were created. What is the science behind it? And where the origin of Creation comes, that led to the creation of the first field, that led to the creation of the interaction of the residual of interaction of itself by itself. And in which environment was created that Unicose could be created in it. Nothing can exist without the containment, without a container, without a space to contain it in. Does not matter if you put in a pot, you make a plastic bag or you just create a fields around it.

This essence, the knowledge of the Creation, man has to understand before he becomes the "Man of Space." Before he joins the Universal Community (UC), he has to understand where his Universe came from, that he's part of community of. (:18) If you as a man or a woman, created the field that led to creation of the another Soul. And this Soul, in the term of time, interacted with the others, the way you were created. One Chinese, one English, two Chinese, two Iranian, one Iranian, one American, and the rest of it, led to a mishmash mixture of the races on this planet. Now you have to consider what mishmash led to creation of man.

We put everything down as, because of the geography, because of the water, because of this, because of that. Everything has a Soul which led to creation of us, or life, doesn't matter where. But, who is behind the original fields which led to the creation of the Earth, and led to the creation of the Sun, and the energies which created the Sun, where the Soul of the Sun came from? Then, this dilemma, this question, has to be answered by man, to know where he is going in Space. What is the purpose of life. And scientifically as men, we are reaching that point. We are reaching to the point of understanding the essence and the origin of Creation.

And maybe, maybe in Sanya, in China, for the first time we'll show the first signs of origin of the Creation. (:20) How life, how fields come together to show this origin. Everything said has to be shown, everything said has to be physically developed and delivered. As we said in the Intro about the gas unit, you all are waiting for the gas unit to come and give you the power generator you want. We have this technology in our

hand and we shown it again and again to the people of the authorities. They shiver and shake. They see the change. We've seen others trying to do the same, but no one creates gases the way it's done through plasma. When, 2-3 months ago, one of the leading scientists of Chinese government was appointed to see how we produce gases in matter of minutes, I could see the shake in his eyes. His education as a leading authority in China, worth nothing. And he knew it. I could feel his Soul that he says, guy your mastership has no master, because now it can be done without mastership by a little boy.

Now you understand the essence of the Creation, we can deliver everything we said. We have delivered everything we said. But the society and the knowledge is not ready for it. When we showed the production of protein (amino acid), (:22) how life is created, which leads to creation of man, the scientists touched the table and they told the top guy, and this brought all their knowledge to zero. When we can run a simple system and with it proteins created from the environment of interaction of it, does not need Earth, does not need the structure of the Solar System. You can create a physical life anywhere in the Universe. And we have shown it. And for the first time in Sanya, we show how life, how protein was created, and how we can create any life in any position, anywhere in the Universe. Because we control the fields of Creation. we control the understanding of the Creation.

The presentation in the next few weeks in China will bring a change in the threshold of the science of man. We leave the systems and we'll leave different environments and you watch what is created in those systems during the conference. One will be the condition of ocean, one will be the condition of something else, and you be witness to it. Then it comes, how we create life. (:24) And then it comes, if fields can create life, where did the field which led to the creation of us came from? Then, in the process, maybe in Tehran, maybe in Washington, we show you how we create man in a bottle, man in a system. Essence of creation of DNA and RNA in a system, without a father, without a mother, without any interaction of the physicality (P) of man.

We have to break down these taboos, that man starts looking logically, scientifically, at all aspects. Then, once you understand this, once you can see how protein is made, converted from fields, then you understand how to convert your Soul as a field in transmutation to entity at the point of you, where you want to manifest yourself. It's not that we can produce gases, we can produce protein, we can produce whatever. The whole point is that we can create life. And the easiest way to structure this life is to use our own Soul, which is already preset as a "dough," it's the yeast to create the next. You do not need egg and sperm. You do not need what they call, all sorts of imagery with DNA. Through the emotion of you, you create the being of you in front of your eyes. (:26) Does not mean to be a child. It's life, and how this life will survive the span of the Universe (U).

You have to understand this process. You have to comprehend the principle of interaction, and understand where it came from, that led to the creation of emotion, with it, to creation of life, entity. Then, many of your questions should be answered. Did man, is man, would man be able to be created, is created, and was created, through the interaction of the fields of the environment and the essence of emotion of the Creator? So the planet became the structure of the DNA, and the essence of the emotion of the Creator became its RNA. And if that is the way it is, then you understand why you carry the whole Knowledge of Creation within you, because it came in the dimension of the fields of the emotion of the Creator. In essence, when the Creator has the presence of His emotion, it only depends on the environment, what kind of fields interact, what creatures they create, what entities they create. That, in that entity, the essence of the Soul of the Creator (STC) blows within them. And gives them dimension of emotion and life.

Now you understand, why all the teaching has been put, in the sequence and the way it has been done past years. (:28) And in some books, they say we blow the life into. In a way, it's the secret of Creation. Your emotion does not need materials to be transferred to someone else. It's not a food. Your emotion by fields, informs the other. The tear of you, the laughter of you, the anger of you, in the fields, transfers to another that they feel it. And this is the same with the essence of origin of the creation of the man, or any being in the Universe.

So man has to find, has to understand, the way the interaction of his fields of his Soul, with the Soul of the Physicality (STP) created his emotion, how his Soul, with the interaction with the STC, creates the emotion of the Soul of the Man (STM). That both the STM and the STC, become aware of, understand and interact. Then, in fact, does not matter how many Souls you have, they all live within the emotion of the same fields. It's how they interact and what emotion they create for themselves, because the origin is always constant in emotion.

Then the question comes, was the origin of life, fields, or emotion? Then it comes the question of Creation. (:30) And this answers to all the mysteries and the questions that what you call, the Holy Books have been put to you, and to all the followers. I answered that question in past two minutes. In this, you have to find, you have to understand, how you've been created. And then, in the essence, in the interaction of your Soul, with the position you arrive, in the essence of the position and time and place, the emotion you create, manifest you in that position. Then you understand, even on Earth, if you change the dimension (D), the strength of your Soul, when you become master of it, you can become a dog today, a cat tomorrow, a man the day after, and a stone the day after.

Then, you understand, it's like putting a pea, putting a stone, putting a rice in the same cup of water. That water is the essence of emotion of the Creator. And how each one reacts in that water, is the essence of the Soul of that entity. If you understood, if man ever understands what is being said, man has find the key to the essence of the Creation and the Creator. And in a way, as I said, it takes one second for one to reach the Soul, the understanding emotion of his Creator, and some bang their heads against it and on the floor, 17 times a day, (:32) and still will never find, never understand, and never reach the point of maturity, of what one second, a peasant, a child at the womb of the mother, we're at the time of birth, and 80 years on this planet, can reach and in a way, does not want to carry the physicality.

In essence, if you don't understand this, you will see everything we show and we do, is just another game, he shows this, but you don't understand where we are taking you. You have not understood what it means. In reality, if you would have understood this, when the very first time I showed you a picture, you would have understood the game of the religions is over. But as you are not aware of what's going on, you never understood the dimension of maturity of man, the dimension of understanding the Totality, the dimension of where the fields come from, where they go, and how they interact. And when I put this in front of you, I ask myself one question. And I ask one single question. Would any of these people understand what is shared? Would any of you understand what this touch of a man on the Amino Acid (AA) means, which is created out of interaction on the matter of steel? And where you see this dimension, when you see this line of protein, (:34) inside it was a piece of wood. And inside and on it were papers. Could not be seen on the paper and the wood, because the structure showed itself different. But on the steel, which is a different environment, it manifests itself as a protein.

So in fact, it was on the paper and on the wood. Each one decided to manifest itself in a different way. Now you understand. On the wood, on the paper, you are not visible to ?? everyone. On the stainless steel, on the

most advanced laboratories of the Chinese government, you see yourself as a protein. And then, as you see it, if you touch it, you still ask yourself a question. Is the lack of the knowledge within the Soul and the physicality of the finger you see, which has brought him to ignorance? But the evidence is in front of you. Interaction of the fields with the environment and steel, I show myself as a protein. And if you give me the right environment within this, I create you any life. Because the essence of life in a dynamic motion on this planet is connected to the protein, which we call, from the combination of the fields of the matter state, (:36) which is created by the interaction of the fields of this planet with its environment, which we call the Solar System.

Now you understand. When you manifest yourself in another position and time, when you go through transmutation, who and how you can be seen, and how you want to manifest yourself, to be, to confirm your existence. This picture and what we showed is so fundamental, that if you understood how it's created, how you will be created when you go through transmutation, will give you the key to the world of Creation. In the essence, understanding the emotion of the Creator. "I made man in the image of Myself." That image is the emotion, not the physicality. It's not even the STM. Because I created the man, I blew life in his existence through interaction of his fields and the emotion of Me.

If you Knowledge Seekers understand this, you'll master transmutation in no time. If you are still in the doldrums of trying to see physicality, you will be searching for rest of your lives and generations of you to come. (:38) The essence of the creation of man, the essence of existence of man, or any being in the Universe, is a condition of the fields of the environment, with the interaction of the fields of the emotion of the Creator, which manifests itself in that position and time. The way, the interaction of your Soul, your STP, or the fields of the structure of your physicality, leads to the creation of laughter, tear and the rest of it. Now you understand, what a teaching and why we teach the way we teach. To enlighten you to the light of the Creator.

But, one question stays behind. That, somewhere in the future I will answer. And that is, who created the emotion of the Creator, that interaction with the fields of us creates man or anything else, in the dimension of anything, physicality, tangibility and the rest of it. In essence, this is how, if you ever understood this, created man in different races on this planet. The emotion, the fields of the environment, and its interaction with the STP of the man, leads to creation of that man to be able to live both with the STP, the STM, and the Soul of the environment. (:40) And man, and the scientists of man, have not understood this, that this is the reason in behind what you call, creation of different races, creation of life on this planet and beyond.

And in the essence of the Soul of the environment, creates the man with behavior. As behavior itself is part of the emotion. Then you understand why we see different people from different part of this planet behave collectively different than the others. Because the environment of that place and that position, in interaction with the field of the STP of the man, dictates not only race, but the emotion and interaction, and everything else to go with it. Why in one country, you call it, on one side of the hill, you have men with different emotion, and one on the other side, with different emotion, and collectively behave the same. We've seen that. This is why the Chinese built the wall of China, to be peaceful on one side, as the others of the same were not the same, not behaving the same, didn't have the same emotion as the rest. And then, when we have what we call, the Soul of those who understand the emotion of the Creator, we come across those who we call, are, or behave like God. (:42) And then we understand, how we have to behave at the point of transmutation, at the point where the ?? glue, where the essence of the creation of us, at the point, time and place, will be interaction of the Soul of us, with the Soul of environment, and the, what I call, the emotion of the Creator.

If you understand this, you can even choose, in what emotion you manifest yourself in anywhere in the Universe. You have to understand these things. If and when you start becoming the trans... what I call, porters, the transmuters of your own energy and your own Soul. Maybe, maybe you Knowledge Seekers (KS) understand. It's not, we just made a protein, many others have done. But, the protein on this table, has the essence, the emotion of the Creator. The fields of interaction. And this, if you understand, creates life, which in essence, is connected to the emotion of the man, and in the same way, to the emotion interaction of the fields of it, with its Creator. And then, you don't need to find the field strength of the what to go where, you'll find in what emotion you want to manifest yourself. That the position and the time and place will take you to that emotion and dimension and manifestation of physicality. (:44)

Then you understand, traveling in the span of Unicose, is a flick of a finger. Then, you don't need the UFOs, the donkey, the leg of a man, or transmutation systems. Now you understand. I hope you understand. I hope you can see why we've gone through all this rigmarole. When we produce that gas, when we produce the protein, our emotion, our thoughts, is not to create this, is to create the fields of it. But with that fields, we decide what to manifest.

I have asked my team to bring systems into Sanya, that it'll baffle the world of science. Even they are not aware what will be shown. They just carry the systems. In a way, you have to understand it. In a way, you have to see it, because you're man, you're so physical that you see by believing. You don't use the sense of your Soul to understand the energy transfer that you do not need to see.

We use these International Conferences to bring light into the knowledge and understanding of the nations. (:46) Because, as I said, "The emotion of the land creates the man." And we change the emotion of the lands with the knowledge, with technology (T) which man can understand, and with it, take away the mysticism. When we show you the production of the protein in Sanya, don't look at it as a protein. Understand what emotion I can put into it, as I am the observer, I am the egg, and this is the sperm, or this is the sperm, I am the egg, that what I can create within it, within a cup I put on the table. Would that cup which carries my emotion on the table, would create a fish? Would it create another being? And would it be nothing because I have not understood the Soul of interaction?

In Sanya, I bring you to see how man was created. If man understands his own position and time. As Muhammad said, "I will never do magic." Because he saw how magic game played with Christ and with Moses. And it's in Koran, he says, "I'll never do magic." And I said the same. We never do magic. We show you science. Muhammad didn't have the knowledge of science. We do. We created the science. And when you come to Sanya, come with a "Cup of yourself" and put it on the table and see what is the true emotion of your transmutation of your Soul, (:48) with the interaction of the system and what you get in that cup. Nothing, or something, or a being.

Don't forget, go back in the past teaching of 520 times, many times I said, with me, even in the labs of Linz, there is a bucket, which I have created life in, and it goes with me everywhere. It's the same. I have blown within it the emotion of me, with the presence of dimension of the fields, life has created. When you come to Sanya, bring your cup, bring your own mixture, and see if your Soul, the interaction of your Soul, with the condition of the essence of fields of Creator emotion, leads to creation of the life which you did. And how your cup next to another, leads to creation of a new child, new life, new essence of creation. We don't do magic. We understand the science of Creation.

As I said a few weeks ago, we bring in a new technology. We bring in new science. And that science is the science of Creation. not another electric generator, another gas production, another god knows creating gold. It's for you, the Knowledge Seekers, to be able to see what they are made of, what they will be, and how they transmute, and what emotion will bring them to be at the time, place, and position. (:50)

So, you have to understand, listen to the teaching of today, maybe a 100 times, maybe one time, but understand the essence of the teaching, and you have found your way to your Creator. And how you have to create. How what you create has to be loved, nourished, and fed on the STC for it to survive. Then you understand how Mitra brought life onto this planet with the emotion of the love of the Creator. She just had the physicality of the Earth and the love and emotion of the man within the man himself.

Now you understand, the whole essence of Creation. The Holy Books and the holy books of the past, have spoken it, but they never understood. Today, you receive the Knowledge of Creation, and you see the evidence of it on the table. You have to decide, even how the fields which leads the creation of this protein on the table, can become a child of you. With the interaction with another field, could be from Earth or anywhere else in the Universe. Man in the dimension of physicality will never be able to produce offspring. Because your DNA and the others interactions will not lead, will not create that dimension. Unless man creates children of itself through the interaction of his Souls with the other Souls, with the other fields. (:52) That in that position, in the condition they create from the essence of the STC, leads to the generation of the new life. Now you understand, when I talk about the creation of the children of Mitra. Where there is no need for egg and sperm. And if you understand, the Universe is the womb of the Creation. And in what condition, in that womb you want to create a boy, a girl, blue eyes, 10 legs, love of the Creator, and the rest.

In a near time, those of you who always wished for a child (but) could never have. You've tested with all the test tubes and everything else, and the answer has been no. You cannot bear a child. Understand the teaching of today. And you understand you are as fertile as the mother who gave life to tens of children. It's just that, and how you know a new way to create that physicality which you can hold to love, to care and nourish. Then you understand how the knowledge of Mary being virgin, as I said, misinterpretation last time. It means the word in the language written as knowledgeable. The one who understands the knowledge, who becomes a believer in that knowledge, and that's "Virgin Birth." (:54) Because now you are the Creator of the interaction with the fields of the emotion of Creator, you can create any being and call it your child. Create it in the atmosphere of your womb, it'll become what you call Christ. Create in the atmosphere of the love between you and your partner, it'll be a child that both of you nourish and each one of you can decide, how long I'll keep it with me and how long you keep it with yourself and how long us together we teach it to become a correct Soul, that it can manifest itself anywhere, anywhere, any place in the Universe, as it receives the emotion of the field of the Creator.

Now go back on the teachings of past years, and put all the words and teachings, now you understand today, why and how. You always wanted a child. Create it, understand it, in the strength of the fields of the emotion of the Soul, with the interaction of the field of your partner, becomes the planet, and the essence of the emotion of the Creator. You shall have that child, you don't need to create test tubes. You have to learn this kind and this way of reproduction, as you become the traveler of the Universe, and you cannot physically interact, make love to another creature in the Universe, but the essence of creating whole life together is so strong, that by participation, by the interaction of the two Souls, and the environment that the Soul decides to nourish itself, and the essence of the field of emotion of Creator, you will have that child. It's the only way that you will reproduce in the Universe. (:56) Unfortunately, most of the created things, animals of the

Universe do not have the penis and vagina. And it does not exist in their structure. How are you going to make love to create that child?

If you do not understand the essence of the Creation and how life was created from the fields of the emotion of the Creator. You just create, you just make available from the field of your Souls, and the dimension is yours. Then you understand, as I said, how "virgin" you are, even after 10 children. Because that "virginity" comes from the believing, and in believe comes understanding that you believe in it, the essence of the Creation. And you can create any child, it's a child of Universe. It's a child of Mitra, as Mitra is across the Universe, is the love of the Creator, is emotion of it, wanting to share with itself, to confirm its existence.

As I said last week, you try to clap with one hand in the pocket, does not happen. One hand is the emotion of the fields of the Creator, and then the other is the dimension of the STM, in interactions, fields with the STC, which leads to creation of life. Then, it's like that drop of water. Give it the environment, it'll manifest itself as ice. Give it the environment, it'll be a vapor. (:58) Give it the environment, will be a drop of water. In essence, the environment leads to creation of what is there already, which you created, in interaction with the essence of the fields of this environment.

If you Knowledge Seekers understand this, you have managed to unravel the secret of Creation. And if you don't understand, you're still waiting for that generator, the gas production, and seeing something. Come to Sanya with your cups, and test yourself, to see what you can create. And we leave it open to all of you to test. Make sure the mixture you make, is the essence of the love of you, and not just the water from the tap. And does not even need to be water.

Remember in one of the teachings I told you? When the Belgian government decided to test my knowledge, they asked me to give them three bottles. Each one had the essence of the emotion of the fields, of the man, the Earth and the Universe. And with it, they saw how I create fields, which baffle them, and they create new laws in the whole structure of nuclear industry. Each bottle is the same as the cup you bring with you. All I did, I blew, I added, I put in there my emotion in that water. All three are the same. (1:00)

Come to Sanya and see the magic's which you create and we do not provide any shortcuts. Then you see truly who you are and maybe you can ask this is me, this is the environment of the Moon, how would I look in there, when I get (there)? And we create the fields for it, through the dimension of interaction of the fields of the Creator. And then you understand, do you still want to see the gas production and electric power, or a system to lift? As I said, I'm a teacher. And the classroom is the Earth. And we teach from the first "Gaga Gugu" to the nursery, to the professors, and to the leaders of the world. One teacher, one classroom, and this village is so small, cannot afford more than one teacher. Then you understand, we carry the whole knowledge. But with you lot, I have to speak, "Gaga Gugu". And for those of you who become knowledgeable in the future, we'll talk about the straight line, blue color and red. And those of you who become more knowledgeable in the use of your Soul, we teach you how to jump, and how to make sentences. And then one day, when you graduate, you will become, you join the world of the Creation we call the Unicose.

I feel sorry for you Knowledge Seekers. You are born and you listen to knowledge, (1:02) which you have not been prepared for. But in time, your children, as more people understand, become a known, and much easier for them to comprehend and to become the, what I call, Passengers of the Universe. Being a Passenger of the Universe is not going from place to place, but becoming the field, the emotion of the Creator, that it can affect the creation of the others when they interact.

As they said in the Koran, Salaam Aleikum, means you have to understand. Salaam Aleikum ?? , we have told you everything from A to Z. It depends where you sit. The A, or you have educated yourself to reach to Z, which from the beginning to the end, without each other, cannot exist, but together make the essence of life. The knowledge and the communication and explanation, and understanding of the feeling of the emotion of the Creator. I hope I gave you a beautiful gift. And I hope you understand the gift. Otherwise, it will be the same as lesson 1, 21, 201, 221, and 520. Any of you could have been enlightened at any point. It's just what you've been looking for.

We see and we explain more and more. (1:04) That you as Knowledge Seekers understand yourself and nothing else. Who you are, what you are, how you have to be, and what you want to become. Now, the true Cup of Life comes with you in Sanya. We gave the Cup of Life to the Chinese with Covid. Now our Chinese friends, bring your cups and see what life you can create out of emotion of your Souls. Thank you very much Rick. And we'll go for a small break and we come back.

>> **BREAK** >> 522 KSW January 25, 2024 (1:10).

K- ... Can I make couple of announcements?

R: Sure, sure.

K- We used to make the announcements at the beginning, so now we do it in the middle, which is much easier. First of all, on the Chinese, the third conference in China, is now fixed for 16, 17, 18 and 19th of March. In the island of Sanya, which a lot of you, some 58 Nations, don't need a visa to come in. And some of you can stay 30 days, some of you can stay 90 days in the island. It's one of the most beautiful places on this planet. If you don't waste your time just looking at the city, go and see the beaches and the island inside. It's where most of the seeds of the food and research in health is done by the Chinese government. It's a bedrock of the science and technology, and has facilities that none has seen in the world. Most of the evolution in the, within kilometers from Sanya City, the research centers, and then you have the big laboratories, (1:12) which the licensing is totally different than rest of the world, and they can test the latest diseases, inventions in medicine in this island. It's given a special license to be able to do this. And it is one of the reasons that Keshe Foundation Corporation in China will have a center in this area. It's full of

scientists, those who have endeavored to go to the next step and they are open minded to develop new technologies. The elite of the sciences of the Chinese in certain section are in this area.

The conference will be from 9 to 6 or 4 days. And, as I said, we bring to show the evolution in science. Our team will come equipped to show this. Do not come to see, you see part of what you've seen in London and Manchester, but you see things which never shown before, never been there, and it'll break the new science and technology. But, be aware that we target, our aim, is the conference in Tehran, for transmutation and manifestation of the Creation. Once we finish with China, we start negotiation with the Iranian government, to hold this conference in Tehran. And then hopefully, by the fall, in September, we negotiate with the American government to show this, maybe, maybe in Nassau, maybe in Florida. (1:14) In a way, I chose Nassau, what we call, in the Bahamas island, for a specific reason. There we will show the creation of life from the oceans of the Universe. And that's what has been a playground for me for decades. And we go back to Nassau to show you how life has come, to come from the seas to the land and to life, that we know it. It's one of my favorite places. And some of the most beautiful memories of my young hood and adulthood comes from Bahamas in Nassau. And then you will see what is called the Paradise Island. It is the true paradise. So step by step, we go from island to island. And we'll bring, we show how our creation shall be.

One point which you have to remember, if you're coming to China, to Sanya, come with a clean Soul. Because if we give you the Cup, you manifest yourself in a dimension of what, who, and the way your Soul interacts, and will interact. The "Cup of Life," given to the Chinese as a savior during Covid, now becomes a true Cup of Life for the nation. We'll take this system across the planet, when we travel. And we ask the world leaders to bring their Cups, for them and for you to see the true Soul, (1:16) within that physicality. And I wonder how many world leaders will attend and even touch the cup. We'll put this cup to Ayatollah Khamenei of Iran, to put to place. We put this to Pope in the Vatican and to the other world leaders. And then we, in essence, understand the true essence of the man. And then you understand, the true game of peace has started. Where the Soul of those who claim to be the leaders and the peaceful men, will manifest themselves in the color of their Soul in their cups. And then you'll understand. When in Arabic they say, ?? Ashadamna, what it means. I swear to my Soul, I be the true me, and nothing else. I swear to the truth of who I am.

And then you understand when I told you, the true game, the reason we started the teaching, and the creation of Keshe Foundation, was done so. I hope those of you come from China, you'll bring the best potteries of China. And come with a clear glass, that you cannot hide in the "clay of the nation," the true emotion of you. Then we'll teach you how to create children of ?? man.

Yesterday, when we turned on the first systems to lead to creation of this life, (1:18) I stood by the system, and I prayed for it as I always do, let it be the system of peace. Let it be that the field of this, bring the Knowledge of Creation to man. And we shall see. It's an amazing system. It can create life in any dimension. And it keeps in essence, in its center, the rays of the creation of the field of the emotion of the Creator. And how it communicates with every position, direction and dimension.

I hope you are that lucky to be in Sanya, to see the beginning of the new dimension of science and technology, which man never knew, and it'll be the beginning of the change. We invite the Chinese military leaders and scientists to join, to come in and to test themselves, and to understand. And then it's for the others, nation by nation, to add their flavors to it. The Keshe Foundation team has posted how you can come to Sanya, come with a pure heart, and no hate, no resentment, and no racism. And then see if truly is you in your own Cup. It's a Cup of your life, and then you have to understand it. (1:20) Thank you very much, and I hope you will see, in a very near future, what all this teaching was about. was not to make gases and

electricity, was to show you the energies which ?? (lives) leaves and how things manifest themselves, according to the environment they're in. And how you will become that gas, that energy, when you come into dimension of fields of another position in space and time, and how you interact with the STC, to manifest yourself in and through that field, to physicality which you desire.

We see how things will change and as I said, we put all the world leaders to test and the system for it has been switched on yesterday and it will manifest itself across this planet, step by step. And then, it'll come to the point, when you choose a world leader, most probably for American election, the American nation will ask your leaders to come with their cup, that they can see the true leader, irrespective of his words. We know the color, when we see the Cup. It's a Cup of Life of a man, Cup of the STM, in interaction with his Creator. And never changes, who wants to take shape. And no one can lie.

Then we see the true leaders, who will become the leaders of this planet, always shall stand this test. Then you understand why we call for Universal Council, to be chosen by the STM and not the man. (1:22) And how the Universal Councils will be cleared themselves through the same. And now you understand how the two process will link up, and how we'll link you up to the system. The new system developed and switched on yesterday, has two dimension of the reaction. One to the Soul of the Creation, and one connection to the Soul of the Universe and Unicose. Specifically designed for these two. The rest comes out of interaction of your Soul, and the interaction with the emotion of the Creator.

I hope you will not be disappointed. And I hope you'll see how you can, you should, and you will create the "Children of Mitra." Thank you very much Rick, and we leave it to you, to come and test yourself, in Sanya. The next time we show this system, will be in Tehran, and the Iranian leadership, to come with their Cup of Life. And then we understand the true man of religion, the true man of nations. And we take it to Washington and we ask the Presidents of United States to sign themselves to the cup. Then we all understand where we are going. Rick, is there any questions we answer?

R: ... You mentioned today the origin is constant in emotion. I thought that was an interesting idea, maybe you can explore that a bit. And perhaps we can combine that with... (1:24)

K- It's not an idea, it's not an idea, it's the truth. God or Creator cannot have a anger emotion tomorrow, or a laughter the day after. You understand? Because we interact with it. It's constant and is a giver. It's man who changes emotion. Its continuity and its consistency has led to the creation of the Universe. The diversity comes from the interaction of the Soul, or the fields which have created that Soul in that dimension. That's all. It never changes. It has never changed from day one. The only way we could put it is how Mitra knew in knowing the emotion of the Creator, played with it to lead, to show the love to Him. To confirm His own existence through Himself.

But it comes to another point that maybe you understood as part of the teaching of today, is it cannot be on his own if there was nothing to show. Is Mitra interaction of the part, parallel, Unicose to us, that the interaction leads to the ?? invention of what we call the love of the Mitra? Or has the interaction of the field of itself has led to the Soul dimension, which is in line, in parallel, but triggers the emotion of love? (1:26) And then this is for us to answer in the future. So, never changes, always has been giver and in interaction with it, a lover. Which is a habit of the lovers and the givers.

Any questions? Or you want to extend your question?

Q: Well that was very interesting, I thought maybe it could somehow combine with the question that was carried over from last week from YouTube, from Dot who says, "How can I know when my Soul is talking to me?"

K- You should have said, as I said just before the teaching, do you have his telephone number? He can only talk to you if he's connected to you. In the coming weeks and through the test to come out, a lot of you will find your path to it.

By the way, before I forget, we announced that the 6 sessions start of every month, the third week. In March we'll move it to the 29th, not 22nd, because we are still in Sanya, a lot of Knowledge Seekers are traveling. So, the 3rd of the 6 sessions, instead of Friday 22nd, has been announced, we'll move to 29th. And, at the same time, the another thing which I forgot to tell you, we finish on Tuesday the 19th. Wednesday the 20th is the celebration of Iranian New Year. And we celebrate in Sanya, the Iranian New Year, (1:28) with those of you who want to be with us.

But, you cannot separate things. You cannot bring things into dimension, if they don't exist, unless you know how to mix it to lead, let it to be created. And this question of how to contact, as you create it, as you have created out of it, you already know. In the world of science of today, you call it, isotopes, with different strength. In the dimension of the plasma, work on the strength of the fields. And as you have seen, as you observe every day and night, when you look into the skies, you see billions of stars. If they were of the same, you will not, or you will see them as one. You see separate, because each one has one isotope strength, of the fields of the Universe and Creation. And so you understand how it works, to subdivision, and then you create one, and then it becomes more of the division of the subdivision, and in different strength. And in that process, you always through, because you're connected, know the connection, you know where it is.

In the dimension of the new reactors, new technologies, which for the first time has gone into test and then they're going to operation in the coming weeks and we'll show it for the first time in Sanya. (1:30) You not only connect to the dimension of your Soul, but you connect to the dimension of Universe. This is a technology never known by man, unknown at all. It's not something you can do and we know it this and that. We have brought the knowledge of Creation of it, to physicality that you can understand it, that you then can control it, then you can communicate through it, then you can create that condition of life. Then, it's very easy, you don't dial, you create the fields of emotion of it, and you'll get there.

Something which is very interesting is, I put this to you as a reality, but with a tint of, what you call it, joy and in a way wisdom, if you understand it, and in a way of, little bit of joking, if you understand what this means. In the teaching of today, in past few minutes, we told you, and all of you in the past days, 24 hours, whatever, you had a dream. In your dream, you are in Tehran, you went to Los Angeles, you went to New York. You're living in New York in your dreams, you went to South Africa or you went to Australia. Have you ever asked yourself one question? Did anybody ask you for a passport? Did anybody tell you, "Sorry, you don't have a passport, you cannot come through your Soul to Australia, or South Africa, or Tehran, or New York?" (1:32)

And, the most important thing of this is, who gave you the number to go there? Who invited you? Or, as you know, like certain countries, they put a filter, certain things cannot be done, you are banned, because you don't understand it, we don't want problems. Has the Universal Community has put a ban on the emotion of the travel of the STM into Space, for you to dream, or to you, to travel through your Soul, to other positions of the Universe, and understanding, and you know, as you know you are in New York, or in South Africa,

you know where you are, and you can go to. Or, through the system that many of you went in the Linz, we have opened that door, that you could go to the Moon, you can go to anywhere, any ocean, anywhere in the Universe, fly the way you want, and come back.

So, it comes to, have you understood the knowledge, or you are just copy-cattig? And, you will understand, a lot of you, will go through this, and gradually become knowledgeable. I was explaining this, in the past day or so, to one of the Knowledge Seekers. When, in a position of my private life, they were explaining things, or they were telling me things, about interaction, or a condition of a person, (1:34) I don't listen, I'm physically there, I see the emotion on the face. I see the emotion of the Soul. I'm present in that conversation, at that place and time. It's the same thing as I told many times, I go inside the atom, I go inside the reactor, I see everything. It's not something that I don't, something I think. I see how molecules expand, how atoms interact.

And it's the same in the physical life. Where I am emotionally involved, I am present. And I see. Even in my physical life, I know after that conversation, they don't, they don't know I'm there in the manifestation. I know they are lying to me, because I heard the truth, I've seen the Soul. I feel the cup of water they drink, I feel the air they inhale. I see the interaction, but out of the wisdom I keep quiet.

When you travel with the dimension of the Soul, you get this. If you're in Tehran and your mother is in New York, and having a conversation with your sister, and they call you, you'll be there with them sitting, you see their emotion, you feel their laughter, you see, they say, "Oh, it's so sunny here, it's actually raining." You say, "Come on guys, I can see it is raining, what are you lying to me?" But you are not here. But I'm there through my Soul, I can see, I can feel, I'm part of you. This is to the level you have to reach. Then you understand how you dial that number. It's the number of your Soul, your emotion, your creation. (1:36)

And when you do this, it's not just seeing. You feel the physical emotion. Your mother is in pain, she's hiding it from you. She's limping, says, I'm so good. I went for a long walk. Mom, you are limping with a stick. I'm with you, I see you. And then you understand the new process of understanding transmutation and transportation.

Those of you who wish to see the Christ, truly bring your Cup with you to Sanya and see if you can manifest, if you can bring through emotion of your true essence, the essence, the emotion of the Soul of Christ, bless his name, and then we understand what is the truth. It's not a challenge, it's for you to understand yourself, and don't challenge yourself, try to understand what needs to be done to get to that point. Then, you dial the number of Christ and see if he responds, in front of the system in Sanya.

Then we understand, maybe we all be, ?? present to it. And maybe a lot of you come with a lot of Cups and you see nothing, because you come with a tainted Soul. Dimension interaction of the fields, ?? . Then, polish it till Tehran, understand it, and then we see what happens.

With the system which now is developed, I put the world leaders to challenge, to create peace. And then you know who is true man of peace. Be it from Ayatollah Khamenei of Iran, to the rulers of the Vatican, and the religious leaders, and the world leaders. (1:38) This become the scale standard for humanity. We don't touch, we don't do, it's you and your own Soul and the truth about this. Nobody interferes with it.

Any other question?

R: ... You talked previously about this idea of a parallel world, a parallel Universe perhaps? There's a question that came up with Malcome in ...

K- I don't believe in parallel Universe. Possibly, has to be that the interaction creates something. But, a parallel Universe the way it's put, depends what you understand of it, is not the same as us.

R: Okay...

K- I'll give you a cup of tea. I can give you a nice cup of tea, if you can taste it.

R: Okay. I'm having some tea here, but mine's green tea. I'm not sure what you're drinking.

K- It's a nice Earl Grey tea from India.

R: Okay, I had an earl Grey earlier today actually, double, double burger ?? mo.

K- But the thing is, did you come here to feel the emotion of it, to taste it?

It's very interesting how these things will change our lives. You know, one of the cornerstone of the ?? Kourosh (Cyrus the Great ??), Shah of Iran, or the man, what we call, the Prophet, was and is still in the dimension of Zoroastrian, (1:40) ?? through Zoroastrian's lies. The biggest crime in time of Zoroastrian and even Kourosh was to lie. Because lies created problems, wars and a lot of other conflicts, and there was no crime bigger than lying. And if you understand the emotion that creates it, then you can understand, why it was forbidden, why it's forbidden. It's a stealing. And those who make everything somebody says to them to a lie, because then it justifies their action, find out it comes to "bite them" themselves, as we say. And then if you understand the Soul of this, then you understand how things work.

And there is a lot of, what you call, essence of interaction of the Souls which come from this notion. And if you understand the true history of time and religions and whatever names they put on themselves, comes from this point, not to lie to your people. But all the holy books are made out of the lies where it was supposed to be no lie. And it's all believed in it. And even if the man who's a top man, who the prophet says himself, such a thing would not happen, because there cannot be no lies. They've written in the book and connected to him to become the truth and then they all believe in the lie which he said, "I never do lies."

Example of this is by Muhammad, bless his name. (1:42) In many verses in the Koran, he says, "I shall never do magic." "You will never see magic from me." Because he saw how the followers of Christ and Moses, or whatever, used magic to show his power, or their power. And Muhammad made sure this doesn't happen. And it's very strict, written in the Koran. But interesting thing is, they connect the biggest lie to the biggest magic, which Muhammad says, "I never do magic." I always said the same, "We don't do any magic, you have to understand the science." And half of Koran's belief, Muslim, doesn't matter what, goes on this lie. According to Muhammad said, he'll never do. So it's a lie. We know it's a lie, whatever they say.

And this is one of the criterion which now puts the Keshe Foundation, head on with the Islamic world. Muhammad, bless his name, said, I never do magic. Never, nothing, never be done. And then, in another part of Koran, which is a cornerstone of present, Saudi, Shia, they encourage it a lot, is Shaq al-Qamar, cutting off the Moon in two half. Which Muhammad promised, I never do magic. And that is a magic. That's what it was supposed to be, that he can do these things. And according to the time and place, if such a thing was done, as

we see in Koran, such a big event, the rest of the humanity should have seen it. Somebody in London, somebody Bedouins in part of Saudi Arabia, the rich people of Europe, (1:44) somebody should have seen this Moon cut in half. It should have had an effect on us. So you can see how lies has become against what the Prophet who they believe in, is. They made a lie and connected to the prophet and they want to accept that lie.

Where, even if you read the Koran, historically, time and place, they connect people who were present in that Shaq al-Qamar. Because, the story behind the Shaq al-Qamar is that, some people got together and went to Muhammad in a full moon, and they said to him, "Show us a magic, then we believe in you, if you show us this magic." And Muhammad said, "Okay, I..." you know, they said, "Full moon, cut the moon to half." And they said, "Muhammad did it to, for us to become his believer." And they give you name of the list of the people who were there. But when you go into the history book of the people, some of those people, two or three of them, were not even born at that time of Muhammad. They're there and they're asking him to show us. And you understand, we don't understand the history, and then we attach to it.

And this is one of the reasons when I start the talks, even with the, as I repeated many times, with the Saudis, ?? Jahan University, was this. And then one person who was actually was in a meeting with Muhammad said, you can see half of the Moon. And the Shaq al-Qamar will come only when it comes the end of the world in heaven. Not now. It will not happen today. And then there's another sentence, word, couple of words after, which tells you, this thing, Shaq al-Qamar, (1:46) will happen in Heaven. But they don't tell you that part of it. They say, "This is connected to Muhammad, Muhammad has done this." They don't tell you, they don't read the whole story. They tell you one half, and because most of these Mullahs of that time, and even today, are so illiterate, that they don't connect the word after.

Yes, we go to the park and then we have an ice cream. So, we went to the park, we don't tell you there's an ice cream. Or, we have an ice cream when we go to the park. Okay, where is the ice cream? But, you haven't gone to the park to get it, yet. Shaq al-Qamar will happen according to Muhammad, according to Muslim ?? Koran, but, in Heaven, is not sign of Islam. And these lies will now has to open up. As I said last week and the week before, I opened the book of religions. Then you understand the true understanding is the faith of God, the Creator. Not these mayhem of books and lies.

Then, you have to understand the next step. When your Soul cleared, the same with your Soul clear yourself, when you travel the span of Universe, your Soul is clear. Your Soul doesn't lie, your physicality wants to lie, you put yourself on the noose in the Space. I like to eat you, oh but because I know I can take fields from anywhere in Universe, I never even think of eating you, that you take energy from me to defend yourself, or you take energy from somewhere else to protect yourself, and create another mayhem. (1:48)

And, the reason, all this mayhem we have, even today's war in Palestine, between the Jews and the, whatever, is part of this. We have split the hair and we talk about which hair is the main hair. And now we get more and more cutting this hair to more pieces and then we call it divisions of religion. But if we look at the end of the hair, it ends up in the same place, it's the same hair, you're tipping, it's just, you know, you have a split hair. This is the job of the religions nowadays. Which one of us is the biggest, so we have more. But, we are all fake, because that hair doesn't even exist, the way we built it.

Then you understand the teachings, the process behind the teachings. And why the teaching is about you, and your Soul. Not about me, not about the systems I make, not about anything else. It's how through the knowledge and the system, you found the truth, the essence of reality about yourself. And you don't need no

Prophet, no Holy Books, and nothing else, because it's you and your Creator. And what, and the condition you have created yourself out of.

We start putting these together, in technologies and science that you understand, and then gradually in the coming time, you will see how we open that door to the Universal Community. Because, if one man ?? withers and creates a problem, this can create a bigger problem for us in the future, (1:50) because we are responsible for taking you into the Universal Community to understand your Soul. Then, the division of lying or killing has to die within the man, and this is one of the cornerstones of mentoring of the man into Universal Community.

And this, with technologies we bring, you assess yourself. Because, some of you will come, and come with a Cup of your life, you put it there, and you wish for a fish, but you get a monkey in the Cup. Then you understand, you haven't understood your Soul. Go back and learn where you lied to yourself. Was it that originally, your Soul wanted a monkey, and you lied to yourself? When you wish a monkey and you get a monkey, then you understand, you are on the path. That first of all, you don't lie between you, your Soul, and STP of you, and in the dimension of interaction with the fields of emotion of the Creator. Then you understand, nobody knows, and you don't need to tell no one, "I wish for a fish, I've got a monkey." Then you know, you have not reached the essence of the truth, not lying to yourself. And when you learn this, becomes the path of your life.

And many of you come with a cup and you don't see anything in it. You might see some protein on top of it. It means you haven't learned how to transmute to physicality. Then you have to teach yourself, find where the correction has to be. But don't read the books, but understand within ... << audio cut ... >> (1:52)

K- ... Yeah, what I said, when you bring your Cups to Sanya, and you wish to see a fish, and you get a monkey, that's not the fault of the system. It means you have not been truthful to your own physicality and dimension of the observation of physical life. Because, your Soul wished for a monkey, and got a monkey. Your physicality was looking for a fish for something else, which was not true to your Soul. So, you didn't get your fish. This is not a fault of the system. It's you, who have not been truthful with your Soul and STP.

These are not the Cup of judgment. These are the Cups for you to understand yourself, to perfect yourself. There are no judges, there is no Cay of Judgment. It's for you to be enlightened, to understand the life of the Universe. And when you get to this point, then you find your way into the Universal Community. In a very easy way. And we are not testing you, if you can go or not. It's for you to test yourself, that you become a perfect being, in the school of "being of the Creator." That's all.

As I said to, wrote one of Knowledge Seekers, in past few hours. We are not here to make money, otherwise we could have made a lot and make a lot. We suffer, we go through it, (1:54) we go step by step as the man goes. But, as said in the Holy Books, "Give us daily bread." And our daily bread in the Foundation comes, we will not stop, because every day our Soul is clear what is to come, what is to be done. And the bread is provided, and that's why we are here in past 20 years. We don't go to target to become billionaires, we could have become billionaires, we've been billionaires. They said, what's the best way to make a millionaire to a, what you call it, a poor man, make him a farmer? And this is the same. You give and you give.

And this is how you should be. We are just bringing new systems for you to test yourselves. And how you manifest yourself, when you understand it, in the position which you manifest. Then you understand, when I told you, "I'll bring you a drop, and there will be a fish in the cup." Now you understand how, because it's my

wish. And that drop carries my Soul, and interaction with the protein which is created by the system, will manifest the fish. Because our wish is sincere, it's not tainted. And you will understand.

Any other questions?

Q: ... Good morning Mr. Keshe, you told us that at the time of Jesus Christ he passed on the knowledge through women. But how did he try to pass on the knowledge to elevate the Souls of the people? He tried to pass on something related to the plasma science? (1:56) He talked about the existence of the STM, or the STP, in the language of the time? Why would he have failed in his mission to pass on this knowledge that you are opening today?

K- He never failed. Man failed to pass it on. Let me explain to you, when you say, give him knowledge to women. He gave an indication of what you call, "Mary the Virgin." Yeah? "Virgin Birth." Where I explained to you in Torah and in beginning of the word, it means "the believer." And the mother was a believer in the Creator, in God, a true Jew, but in a different way of believing Judaism than what was at the time.

I said this a few times, and I don't know if I've explained it here too. What I feel ashamed, absolutely ashamed as an Iranian, is that our women have been put under Islam and devalued, degraded. Before Islam, our women were worshipped, respected beyond. And today in the structure of the life of Zoroastrians the female, the mother, is the holiest of all. Even if you read the story of Kourosh and Darius and before, women were respected beyond in the society, in the Persian society. (1:58) We devalued our women to make them half by the rule of Islam. Why? Because Islam, to keep the life of woman, killed all the men and gave woman to live. We give you your life, but you are half of us, otherwise we behead you. Because the mothers were the light of the knowledge to their family, to the society. And biggest shame for me as an Iranian is to call myself a Muslim because of what has happened to our women, to the mothers.

And then we go back into Christianity. We go back to Judaism. Go back to the Judaism when supposedly Moses, Jehovah, conquered a village. He killed everything, man, woman, child, animal. With Christ coming from the same mentality, with putting that the women are knowledgeable, he brought a halt to killing of women. Because he realized without them, there is no generation.

But, at the same time, 500 years, 700 years before even Christ, in Iran we worshipped, we respected our women. And we have devalued our nation, our culture, to become Muslim. And we have let our women down. Because this is what the Christ said, the true believer, because they create, the child comes from the womb of the mother, they have that love, they understand the love of the Creator, (2:00) they are knowledgeable. And we don't value that. For that reason I always said, if you've been around me, even before I started the Keshe Foundation. I always said, "The next Soul which will lead us will be Soul of a woman." And this is why we created the Child of Mitra. Because you have to understand, man does not create, a woman creates and understands the love she gives. She cannot touch the child inside, but through her heart, transfers that love of the mother to the child, that in that interaction, the child takes shape, becomes what it is.

If you touch the emotion of the mother, if the mother is tortured, abused during the pregnancy, you see that emotion, how it changes, you get a handicapped child, child will be problem when they are born. Then you understand, why God, the Creator, has one emotion. You see beautiful children, you see calm children, you see children born with absolute joy. Look at the time when the mother was pregnant, what love was transferred. It wasn't there was an injection of love. It's the emotion of love, it's emotion of the Creator, the love of the ?? mother ?? to the child. And as an Iranian, we have dishonored, we have dismantled, the

essence of the Creation by becoming Muslims. By first thing first, devaluing our women, our creators, to half. For what reason? Because we came across bunch of people, (2:02) where with Muhammad only beheaded men. He didn't behead children, and the women. Read in all the wars, Muhammad headed, he always at the end when there was a victory, in all the wars. He said to separate the man, they took the man to one side and beheaded them and they said to the woman, "Now you are a slave and you are our wives." How can a woman who loved the man who (you) beheaded now, now has to become your wife and love you?

In Iran history, men gave their life for their mothers to be alive. And in Islamic religion, opposite. And in Judaism, forget about it. Then you understand, why we have to understand what culture, we want our Soul to be created in. Read the whole history of Islam. Read the time when Muhammad went conquering, and he won the villages. He beheaded men all together. And women became slave, and abused by the new man. The .. the men of the Islamic world, didn't go to war to expand the Islam. They went to war to see how many women they can get.

And in many, many books, even the Koran, it refers to it. The woman says, you killed my brother. You killed my father. You killed my husband. And now you want me to love you and to be my husband? (2:04) For you not to behead me and put me into prostitution? I say, "Yes." But this cannot be, because then I'm lying to myself.

And then you understand why we bring an end to religions, because only has been a profit, money making, not prophet to bring a message. The way it stands, the way it is. You read about the history of Iran, 600 years before Christ. When Kourosh used to be. Kourosh, when he conquered in countries as an expansion, even Babylon, and where all the Jews were sent, exiled and the rest of it ?? . When the rule, as tradition was, you kill the King and you take all. The... even Kurosh time, when he took Babylon, he brought the Queen of the nation, and gave her, she said, "I'm yours." He said, "No, you're not mine, you have a husband, you have life." He gave her the same position as a Queen. And, when the King accepted submission to come, went to Kourosh to accept to... that he lost the war, Kourosh said, "First send him to his wife, let him have peace, that we have not done anything wrong." And when the ruler went to his wife and saw her in such a comfort and respect, she explained everything, "I offered myself to Kourosh." He said, "No." He said, "You are not mine, I came to bring peace to your nation, I haven't come here to conquer women." Then the ruler came to Kourosh, he said, "I'm yours, because you are a true man." (2:06)

Kourosh is the only King, who had only one wife, from the beginning to the end in his life. Even though he had access to most beautiful women in the world of his kingdom. And you have to understand, when you read the Bible, as the Bible was written by order of Kourosh, in the book, in the Bible, Jews believe he's a Messiah. And many times, they mention his name in Torah. Because, he lived by the rule. He respected his wife, because it's the culture. And when a wife become abuser, it's her decision to go. Read about the life of Kourosh, and how he became a King. and he is actually the true Prophet, but he never accepted that position of Prophets. And that's why he called the Shah, which in that name means the Prophet.

Then you understand how we should live. If man lives the true life of Zoroastrian and the true essence of the Kourosh, there'll be no wars, because we respect to start with our own creators, is our women. And this has been taken out of the culture of Iran by Islam. We have sold our women to half, where they were equal to us, and above all of us as our creator.

Any questions? (2:08)

Q: ... If the STP is fundamental to the process of transmutation and travel to the Creator, then I am understanding that the physical dimension is somehow essential for the learning of emotions. My question is...

K- Yes, it's your sandbag, is it? You're playing the sandbox, when you play computers you want to write a new program. Physicality on Earth and how it is and how it behaves is your sandbox. You're testing it that if you get it right, on the other side you don't make a mistake.

R: ... Her further question relates to that and you've talked about this before of the perfect Soul and so on. So her question is, "When a Soul is created in the plasma dimension, how will the STP be born, since it won't come through the physical dimension after the interaction of the egg and the sperm? Will the STP come into existence through the knowledge acquired by the Souls of its creators? Could you talk a bit more about this?"

K- STP in a larger scale is Mitra. Where its interaction with the environment creates a physical dimension. And with the interaction with the STM, gives the field which allows to interact with the environment. And in essence, it's the point of reference for us. If you look at, we all said in all the teachings and I've explained this many times. (2:10) We always say, when the STP is in charge, it creates a physical life and embeds the Soul (STM) inside. So, when the Soul expands and brings the STP into, what you call it, itself, there is no interaction for the creation of the physicality. But, you have to understand, in that point, the STM has to interact with a higher order dimension, which is the Universal fields. That's how you travel across the Universe. This is why, embedded in the physicality of the man, the Amino Acid, the Carbon 12, for the STP to allow the STM to connect with Universal Community, it only needs to jump to Carbon 14. Not in a matter state, but in the energy state, in the plasmatic field state.

And this is what our technology, the system does. We allow that C14 bandwidth strength to be created. So, it expands to the new dimension, it finds the STP inside it. It's so simple. This is how you travel on a Cosmic Rays. Cosmic Rays in essence are a combination of the isotopes of C14. And if, if you understand how to cross Universes, you bring a combination of C12 to C60, which allows you to cross universes. This is a technology we shall explain in the future. (2:12)

So, it's very easy, you have to understand, that the technologies we create is not magic, it's just you don't understand it, to you looks magic. You actually been to the Moon, but you never knew how. The way we build our system, it continuously produces, releases, controls C14, which allows you to expand the Soul, because it's energy level of C14, common denominator, with the essence of the line of the fields of the Universe and the Creator, emotion, then you'll go. And then up to now you didn't understand, now you understand.

It's the same mystery as how Tesla used to run a car with energy in New York, but the power supply was in Moscow. Because you haven't understood how. And it's the same. Your... once we expand the STM to the dimension of the system, it super-passes the STP. So now there cannot be a physical life. But, once the STM expands beyond the STP, it still has to interact with the strength of its own dimension, with the Universal Community, Universal transportation system. That's how you travel. We are not doing magic.

Is, we are the Creator, we understand the process of Creation and its communication. That's all. And in time it'll become a "second nature" to all of us. And in time it's part of us. Because we dream every night, we let the Soul go. (2:14) How does our system allows for itself to travel and go beyond? And you go with a full physical body, you see yourself cuddling your lover, you have a wet dreams, you have a fight with your

grandmother, you steal from somebody, somebody runs to you. Well, how do you take that physicality with you? How do you know it's you? Now you understand. There is a science, and the job of the Keshe Foundation is to teach you the science. Then there is no magic.

It's a very interesting thing, if you watch, if you are a British, or you go on the Internet, and watch the programs which are coming out on the what I call, the, what you call it, 'Britain's Got Talent'. In 2023 they've saw somebody you call, magic's, where there is nothing, it appears a child on the chair, or the guy creates snakes, and then disappears them, and he actually picks up the child. But you have to understand the magic behind it, the science, that they create these "visions."

But, with our technology there is no such a thing. The only magician is you, and the only magic is on you by yourself. Understand the science, and I, I'm the worst magician, because I show all the tricks. And I make the system and I show it to you how the tricks are done. The biggest trick that you all missed, and it makes me every day, it's not the day that I say, "God knows when this man moves", is the MaGrav systems. I gave you the essence of transmutation, which is expansion of your Soul. (2:16) Many times in the teaching I keep on telling you, you look for that little bit of electricity, go on top of the system, and see the fields it creates that allows your Soul to evolve. And you're still, "Oh it doesn't work, he said he does 30% reduction." You lost 40% of your Soul, but not understanding. Be a prisoner of man, shackled to the Earth.

This is the difference. This is where the difference comes. Understanding, and not just hallucinating or, what you call it, being uneducated. One of the beautiful things with technology is that there are many women around the Keshe Foundation. A lot of women, because goes back to Christ, bless his name. They are the "true believers." They understand the process of creation, because they are creators. All our men are busy with making MaGravs. All our women try to understand the Soul of the technology. And that's where it is.

I bring women to be respected the way was the time of Kourosh. The way the Creator created, loving the Mitra. And for it, we have created the "Soul of Mitra," in the "Child of Mitra." You soon will understand what the game is about. This is the only way, man will be peaceful in the Universe. Because, as a Soul he'll be still alone and trying to find out, a partner, a, what we call, "twin Soul," will do the crimes man has done for women and love on this planet. (2:18) And that shall not be. Because the love is there from the point of inception, you never look for it (outside), because it's part of you created out of it.

Any other question?

K- ... We have to finish in next 15 - 20 minutes, because I have a long journey to take. Okay, please.

Q: ... Mr. Keshe, when we have a mutation in our RNA to react against some entity that enters into our body, such as bacteria, which has its own emotion, this change is unconscious to maintain our body alive. But when we want to transmute to another environment through our conscious emotions, this occurs in the same way? So, the only way to transmute, must have a big purpose, that is, teaching the knowledge of the Creator, to maintain the Creation?

K- In the transmutation, the STM always stays in the dimension of ?? ... We pick up viruses through transmutation, without a doubt. We'll come across other "energy packs," that's how we know of their existence, and that's how we fall in love with another virus. We become "Soul mates" and we create children of the Soul with them. Anything which is not at the strength of our Soul, is a virus to our Soul. But, we have to understand and change that point to a love, to care, to become, to be part of.

In a way, if you look at the structure of physicality of the man, it's made by this principle. (2:20) You want to be with me, be with me, okay, but we have some surplus (energy). What we are going to do? Maybe we won't get the ?? surplus. Okay, we make the liver. We made the liver, we leave our energies there. Anybody needs, call in and take up, that nobody robs anybody. It's a store, it's a national reserve, we call it. You're short of rice in one department, send, we give you. You are short of vitamin C, liver is kept. How we made that? We all have a lot of bits we don't want and nobody else wants, but others outside of the body might need it. We created the urine and the other bits, and then we make it food and water it. We have a bit which we all need to decide, we work together, otherwise we'll malfunction. We put one division to be in charge of this part of the kidney, to communicate with the brain. Liver puts a section to connect to brain and then comes to the other side, it tells which Vitamins to keep, which one to give, and then, "Okay, you don't want it in a storage, send it here, we get rid of it through the kidney." It's the same. This is called RNA operation. A military regime, with a full control of the principle.

Understanding which energies are needed, which energies are not needed. Don't we do this in our lives? We work in an office, but you are a member of a club of runners, and then you are a member of the chess club somewhere else, and then you are a member of the marriage in a family with the children, and then you are a member of such and such a thing, but all function because you, as a center brain, control it, where you would take your energy to spend, you go to the club, where you're going to give the energy to love, you call it home, and the wife and a child, and when there is something else. Don't we do this? We just become oblivious to it.

But, it's the same structure across. (2:22) Has the gym you go to share or give your energy out, that somebody else picks it up, has become a virus to your life? Yes, it's become a virus to the wife, because you're not home to love and more, you're spending some time in the gym. But she accepts that virus, because you look good for it when you come home. This is how we are, we interact.

A virus, the way we showed even in the Covid, can be used as a energy for the man. That's why you lot recovered so fast with the Cup One, when you had the virus. You took the energy of the virus itself and you changed it to food for your body. How you interact with it? You don't destroy it. The Covid is with you. Those of you who and had the Cup One and you went through Covid and you used it, you will see the benefit of it in the coming time. Because now is, you haven't destroyed it, it's part of you, you already have it, next time come, "pouf, come on, it's a new version, I'll take you, but you won't touch me that much." It's an asset in your pocket of genes, or energy packs, you call it, a virus.

We have to understand the science, and then we understand the technology. And then we understand the technology of the Creation. The DNA, RNA is all made from man, to become ?? real. There's a big mayhem at the moment, in the world of medicine, and, wherever you go on the Internet, you see it. Harvard University has called some tens of papers out, because they're all fraudulent. And, the Head of Medical School of Harvard has resigned because of it, (2:24) and they've been doing this for 20 ?? years, and they forced a lot of people to change their mind, because of these lies, and now the ones who accepted it, ?? regret it. The effect of these papers in past 20 years, which has forced ?? by Harvard has done it, is going to be massive in a lot of medicines, which is faked, and that's why we see a lot of medicines, since early 21st century, have a lot of problems, a lot of diseases, a lot of pharmaceuticals companies going bankrupt, because they couldn't support it, because they worked on a fake paper, originally adjusted to suit the money providers.

And this is the way, it will not happen in the world of your life, with your Soul, you're understanding the energies and the viruses, then you call it RNA and DNA, or whatever you want to call it. This situation, how

many, some very expensive medicines was backed on the back of this, and they didn't come up, the research did not bring the money, hundreds of millions was lost by pharmaceuticals, it's because they relied on a few papers, which was based on the lies, which was made up for to make somebody famous. Read about the Harvard University what's happening, it's a mayhem in there at the moment, with the fake papers and... The same people became peer reviewers to cover their own, what you call it, problems and lies.

When I started reading about this, a few days ago, it just brought back the memory of Stephen Hawking and the Keshe Foundation. Because he never understood the principle, he tried to copy and chase Keshe Foundation to change things for himself. And people believed in him.

Any other question? We answer the last question and I have to go. (2:26)

Q: ... Thank you very much for your presence among us. My question is, why on planet Earth only the human species has the capacity to develop technologies of all types, and other species have not developed in this sense. If all species are fruits of this planet and some are older than the human species, why have they not reached the same development as the human species? Furthermore, why does only the human race need to produce clothes to protect themselves from environmental conditions, and other species are born with the right clothes to live in?

K- Let me tell you one thing, we had the clothes, we changed it, because the others had a better clothes for us, we didn't have to do. We stole from the sheep, the cow, the whatever animals we could get our hands on. And we are not the only species that physical, because we have, we lack << audio cut >>.

K- ... (2:28) Sorry I was talking and I didn't notice I touched the microphone.

The essence of us thinking we are better than the others and making tools, has more or less come out of our intuition, knowledge, and from the other sources, within us. We found the tools we can kill, with tools we can enslave and take from others, what is not ours, and this has become a process. And we are getting better and better in making tools and whatever.

And even the Keshe Foundation now, it works on the same basis to bring you back to the origin. We, when we were, what you call it, in the embryo of the Earth as a fish, we originally created and whatever they tell us, we were the first mammals, as a mouse, hidden under the ground, and then we got a chance to grow, whatever it is, it's a history they made up. We come from this background, of finding a way, and we set our mind to survive, and we've gone that way.

If you look at it, a lion or a tiger or other animals doesn't need a compass. It still knows the direction. Elephants travel thousands of miles, one place back. Birds fly. (2:30) They have a tool. They don't need man's tools. How many birds have you seen with a compass? "Oh, you lot going left, oh you lot going down, oh there is a wind, oh this here is going to be colder, we don't go that far, we stay further South." We chose to become more materialistic. The other animals haven't and that's why they... In a way they survive it, the way they have survived, and the way the more tools we made, the less environment we gave them for them to survive.

We are actually going backwards. If you look at the life of the animals, and then as man knowledge opens up, now that you become travelers of the Universe, gradually you'll see we have the same migration (of) Souls from one Universe to another, because there are fields which they enjoy more. The way we go on the summer

holiday, because we enjoy the Sun and the sea, you'll see the travels of the Universe as Souls, which travel to certain places, but they don't go for a day. With them, they could be a million years of yours. Because you counted going around the planet Earth going around the Sun, they come from the Galaxy, rotates around the Universe, and they are from that dimension.

So, we, the more materialistic we became, walking away from understanding our Creator, the worse we become making tools. Actually, it's a shame how the man went, because if we would have relied on intellect, energy of the inner being of the man, we would have been far, far in travel of Universe, then us coming and making a couple of things, and running it, and putting it together, and trying to get you back on the same horse as you were before. You've fallen off the horse of the Knowledge of Universe. We're trying to get you back on it, to go back on it. That's all. (2:32) You're not so advanced, you've gone backwards. And the more backwards you go in the understanding, morality, the worse you get. The more tools you make.

Thank you very much, Rick. I have to go. I have a very long journey to take today. Please, understand the teaching of today, just don't listen to it once. What I said, the book about the origin of magnetic field, origin of life, I brought it forward for you to understand the essence of the book. And if you understand it, you become gradually ready to become passenger of the knowledge of what is to come. And, join us in Sanya, and start that process. Take what's in there, what you create in that Cup, might be nothing with you in that cup, when you're in Sanya. But when you get home, you might see essence of life in it, emotion with it. And then see, how you transfer this knowledge to the others, and become part of.

As I said, I bring the world leaders to answer to their conducts by their own action, not by summoning by Den Haag, by a Court in Haag and the rest of it. When we ask a leader to put his Cups on the table, the only reason he will not do is the fear of the truth about him(self). When a leader is not truthful to himself, does he deserve to be leading the others? (2:34) And then you understand the word, that no man will take the crown of Kingship. Because the STM, in any direction, dimensions, is tinted ?? with something. Thank you very much Rick. We see you next week, and we'll see where the lifet takes us from there. Thank you very much.

522 KSW Jan 25, 2024

(Auto transcription by Elias)

Created Soul in Non-dimensional system - access to U fields of Creator; Religions don't value life; Took away matter - fields continue interaction; System is Soul decides for itself; Feeds man through emotion; Fish in system - moving by thoughts - fed - means man can transmute with system; Environment effects life; Elevate from matter state - dreams life change; Not crazy - higher knowledge; Soul means Central energy - not religious; Satellite Souls help others transmutation; Energy level at Creator's; New Emotions - need new words; System on - short shocking - change man; Sound when transmute; conquer fear of Transmutation; Fingerprint of Soul in AA - all Souls access; Love is devotion to give; Soul pictures; UFO use Star

Formation; Animals will be fed - fulfill promises; Creators expectation; Love of Father; Physical & Soul emotions; Transmute to Tehran; Schizophrenic - perfect Soul; Siamese twins 2 heads; Common denominator - examples; Teaching on nuclear decay (important) not enough energy; Send emotions to Souls; 400 papers - not mature; Prearranged bombings; Using God's name for destruction; Research Jesus life

ENGLISH TRANSCRIPTION

(:16)

K- Good morning, good day to you, as usual whatever and whenever you are listening to these series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. As usual we welcome you back and see how welcome the knowledge is for us to understand today.

As you have realized in the past couple of weeks, we tried to go back to understand the origin of the fields. Where they are coming from, that leads to creation of life, and different shapes and forms across the Universe and the Unicoise. But as man we are more concern about ourselves, our life on this planet, how we can transmute, how we can transfer, how we can get energies from the environment without destroying or ending a life.

Interesting point for man has been how he is taking life, how he has valued life, how he understood about life. By religions, life has no value. (:18) If you look at all the religions of the past, come from Moses to Muhammad. Life was at the wish of a man and when the man wanted to get it, made the rules for him to be adjustable to his wish and do his, what we call, desire. We saw during the time of Moses, he beheaded everything. Whatever moved, he beheaded. The only lucky ones were the planet, on this planet, with the trees and the plants. Which he, even then, sometimes burned them down. We saw with Muhammad, slaughtering 700, 800 people in one day. And then, if you had a puberty, hair or not, decided if you stay alive or not, if you are a child or an adult. And the waste of energies and life. And when they've done the same thing, as I said before (Jehovah), he likes the smell of kebab, which means he likes the smell of death, destruction.

And in the same process, we'll go with man. Till when do we decide to kill, to destroy? And when we decide to use the rays, the fields, which has no dimension of life, but we still have to respect and honor it. As I said before, when we started a system last week, that it'll revolutionize the whole structure of the Space technology and transmutation, I prayed for it, has ?? it got a soul. But I pray for, that it receives the right fields, that it creates the right plasma, that it can serve the man, the way that he will advance in technology (T), in understanding its own creation. We are responsible for it. (:20)

We are responsible for it. As we have seen in the past tests of past two months, three months, in the laboratories of the Keshe Foundation, when we create that life, when we create that plasma, when we create collection of the fields, it's permanent. We switched off the motors, we switched off the fields, we took everything out, but the system, because the life was created by it, is still there. We see its interaction with other systems, which confirms existence. So, in the knowledge of the man, today we are at the stage that we can create Souls, we can create systems which they decide by themselves how much they give, how much

they take, without the dimension of physicality (D of P). We have data's, we observe their existence through the fields of interaction.

And this is where we have to realize. We have reached a point in the knowledge of the man, that we have to understand the operation of the fields of the Universe (U). What do we attract? When we make these systems, are we taking energy from another being? Have we created a monster of the technology, which up to now man was getting an apple, an animal, but this system does not take energy from the another life. And then we mature into understanding of the next dimension (D) and position.

At this moment of time. When we switch off our systems, when we go on the "stand-still," we see the creation of life, the Soul. The creation of dimension of energy fields, which now we have to understand how to interact with, in... as a field, not as a system. In a way, our system is, (:22) what we call, we create the womb. And the energies of the system and the Universe, and whatever creates that Soul inside it, the life. And now when we switch our systems off, it's like giving birth to a Soul, giving a birth what we call "energy pack," a plasma, a Soul. And now we have to understand how to interact with this.

This will be one of the biggest challenges of the Keshe Foundation Knowledge Seekers (KS) in laboratories. To understand is there. I have to deal with it, I have to see how it reacts, I have to understand what makes it happy, what makes it to give more, what it takes from me. And this is the situation now in the Keshe Foundation we are analyzing. We have set up elaborate observation posts as I call it, and systems, and electrodes, and everything else, to watch its behavior. To see how it interacts. Because it's important for Knowledge Seekers to carry this knowledge. You come across a plasma, has no dimension, you feel it, you feel the dimension of it. When our Knowledge Seekers, when our experts put their hands in the plasma, they feel it, their hair rises, they feel the emotion of the fields. So it's a reality, it's not just something, it's not there.

And then we have to understand how we touch it, how we give it, how we take from it. And this is what I call the sandbag. The "sandbox" for you to test. And we create these dimensions. That this is a new knowledge, this is a new technology, this is what man will face in the Space. We are bringing a mankind to the point to be in a position to deal with the reality of Space not just getting on a spaceship, or aircraft, or transmutation. As it was said at the time in Sharif Tehran University, (:24) we achieved lift. What's next? Now we have created that Soul, we have created that environment of the fields in the system. What's next? How do we interact with it, how do we in a way live with it, and we use it as a station to feed us? As an intermediary between us and the Space and the dimension of existence, that it become a source that we don't kill anymore. It becomes in a way like your supermarket. But this supermarket has access to all the energies of the Universe. And in a way has chewed it up to be alive, to exist in the dimension of man, in the time of man. Which means we tap into it. How do we need? What do we need? I need the energy of what you call, vitamin C. This is a field dimension. An emotion of me, in my brain, in the what we call, the emotion of desire, can trigger for that system to feed me.

Now you understand. When we say the new system will feed mankind without killing, what it is? We have entered into that stage. Today and in the past few days, we have put a fish to live in this environment. To see how it reacts. Does it need any food from us? We have seen the change of behavior. We have seen the change in emotion in past 48 hours. A fish which usually floats or swims (in) straight line, now swims like a submarine up and down. Does not need to swim straight line, I can lift, which is unusual for the creatures like this. This is what we see. (:26) So if the fish in the environment of the plasma is taking energy from it and changes its behavior, because now it does not need to do that, to swim, to attain altitude or position, he can

do it most probably by his thoughts, to go up and down, because he wants to go, even the fish has to learn new way of living.

Then it comes to us, how we break this barrier, how we bring this new knowledge to mankind. It's not anymore playing with the Soul. It's understanding that now we have through a technology which is developed, access to the Universal energies which we have created the position and a place for it. We know where it is, how it interacts. Would it change the cancer? Would it change the emotion of a Fibromyalgia? Would it change the emotion of the abuse, once you come in touch with it? Because it satisfies the emotion. It's a being, it's a living (being).

Most of you who come into the second session of the monthly sessions, for the first time you'll touch this. You have no choice. You volunteered, you came in to feel the energies, the fields of the Universe. We put you in that position. The emotion, the feeling you had up to now with the physical system will change. How much it'll affect you, how much you will take from it, how much you'll learn to live with it, is the decision of you, as an emotion of you, decision of your Soul of the Physicality (STP) and decision of your Soul. The way you make a decision to commit a crime to kill someone. The way you decide that that someone can be a lamb, it can be a camel, it can be individual, a plant, or a tree. (:28) Now you have to understand how your emotion interacts with the fields.

You have to learn. You have to understand it'll take you to places you've never been before. The dreams will change, the understanding will change, because up to now you were in that low matter state, now you move up. And then don't think I've gone crazy. Understand that you have understand more. You have a different understanding of Creation.

This brings me back to memory a guy called "Hot Chocolate." If you go back in the memory of the, what I call, music's and I spoke about him before. He was the first black gay guy who became famous in 1970s. He wrote his life story. Very simple. He came from Caribbean's, hard-working mother, living in a house, two up to down, and in an area which was for the blacks. He wanted to become a plumber, an electrician, and maybe a cook. The mother rented the extra room in the house where he lived, and brought him to his room, and now the extra room paid for him to go to a private education. Now, going to a private education. Coming across a higher knowledge, he wanted to become a doctor and a scientist. The man was the same, giving different environment, expectation, understanding and comprehension of the, what I call, environment, brought him to another dimension.

This is what's going to happen to a lot of you in the coming months. Up to now, you're used to the physical dimension. You came into the reactors and you felt you went somewhere. From this month on, those of you who become part of this, you will experience new emotions, new understanding. Which to a lot of others will be, you've gone crazy, but they don't understand, (:30) that now because of the development in technology, you have access to a bigger knowledge. The only thing, many of you, I know Knowledge Seekers, your families has told you are crazy, put you in the mental institute. How many of the Knowledge Seekers were put in the mental institute for weeks and months and they find out there's nothing wrong with the guy? The guy talks about science and let him go. We have at least 10, 20 Knowledge Seekers like this as we know.

Now, when they tell you this, says, you put a headphone on and you join. And if you would dream the same as I dream, if you live the same I live, now you understand you are crazy, not me. You don't understand the new knowledge. You have to experiment the new knowledge. Without going through it, is what I saw sitting

by the fence and trying to wrestle with a bear. Because this bear is big, has potential of changing you. Because you understand you can handle it. You can fight the bear, which is the energy of the Universe.

Now you understand where and how the new technology will bring you. We are not talking that we put a stick on the ground and the rivers opens and millions cross through it. That's a good dream. Now it's you and the ocean is the Universe. How do you navigate and how many people you can take with you to see what you see? Then you can talk. Otherwise the lonely place of the Souls of the Universe is a lonely place. It's when you share, when you share the emotion. Then you have to learn all this to come.

We have made a structure, we have made the tools, we have made the systems for you to go through that transition. And this transition is for you to understand up to now you shook hands with a man, you saw the man. (:32) In the Space you come across energy fields, you come across vast amount of energy fields that your eyes cannot see even the dimension, but they are gentle. Doesn't matter how small you are, they interact with you. Or your dimension of field energy will be a giant to another one in front of you. Your behavior has to be the same. Just to be a tool. Just to be... I take what I need, I give what you need from me.

And this exercise, this understanding of fields without dimension, has started in the structure of the experimental section of the Keshe Foundation. And many of you who join us on the third week of this month, will go through this. You have the freedom, is your right, you have chosen to become the Passengers of the Universe. You came in to be ready for transmutation. You were expecting to get my body somewhere, see how you use the energy within you, which you call it a Soul, we call it the central energy, to another position and time. The way you decide. I go from London to New York and the physicality (P) follows. Because the STP made a decision and now the physicality... and I did it myself. I went to New York. Why? How? What was the notion of it. Where did it come from?

Now you have to learn how to handle energy fields. This is why we taught you about the Soul. Your physicality cannot even touch them, they don't exist, you put your hand in and ?? disappear with you. I laugh when our Knowledge Seekers who work in the lab says, "When I put my hand in, my hair arises." Of course, because you're touching another being. When you touch your lover, doesn't your hair rises, doesn't give you the feeling of the joy? Now you have to understand the knowledge of the man has come to the position, (:34) and the time, and level that now we can touch energy packs which you created it. Am I touching the Soul of my own creation? I have a child, I hold it, I kiss it, now I have created a child, I feel it. I know of its existence.

Just because the mother gave birth to it and separated from the machine which created it, it doesn't mean it's dead. It's there, it exists. We watch it, we have created tens of monitoring systems to watch every behavior of it. How does it behave inside itself, how creates fields flowing inside it, how it creates currents of fields that it feeds it, to control, to stay, to emotion. And we put tools to measure how it interacts with another system, another Soul. How it interacts with the Souls of the other, are in touch with it. The extent of the systems and the technology we have put together in the Keshe Foundation is so extensive that we can even measure the emotion of single one of you who come into the system in respect to the Soul, in the central energy we created. It's for you to understand this.

One of the Knowledge Seekers says, as long as Mr. Keshe speaks about the Soul I'm not interested. It means you confirm your dead, you don't even understand your creation. It means, I'm so ignorant and I want to stay ignorant. It's your privilege. We don't carry all the scientists with us. The peasants of the knowledge of the Universe still can reach that level. But when they become educated in the dimension of the Soul.

Those of you who move from now on in the structure of the teaching, (:36) you will understand the game of the technology of the transmutation, now has changed. Many of you who became Satellites (Souls) will come to understand, you feel it. They are going through me, they need my energy and then you say, "I want it. Now I know why my Soul chose me as a Satellite." We'll bring you into these systems. We make you to understand, we make you to see it, we let you to decide.

Just because the fields are there, does not mean you have access to it. No desire. A desire is a stealing. Desire to give and then don't give, because if I give I receive. I give because I have and I can. Many of you who have your friends and family who have been pressurizing you with Keshe Foundation and the rest, in the next 2 or 3 months, when you go through the sessions, give them the headphone. You say, "You tell me if I'm crazy or all we have achieved to a new level of understanding." Because they will interact, wanting it or not, with the dimension of the field of the Creation.

In a way, we have created the first Satellites. Connection between the man's energy level and the Universal energy levels. With man to understand what he is dealing with. He has dimension and so he has an interaction field, it has resistance. In a way, I don't want to give to you, I don't want to interact with you. And at the same time, it opens doors, (:38) that you can take what I like to give, and what you need from me, that it gives you the extension of existence of your Soul, in respect of your physicality.

If we have managed to change the dimension of the physicality of a fish in less than 24 hours, in the environment of the system, it means, man's will not run away from it. You'll transmute, you will go with the system. You go with what you need in the dimension of position, in the dimension of physicality. I use the dimension of the system to transmute myself somewhere else. And I use the dimension of the system as a STP to manifest myself at a time, place and position. In a way you're in both positions, both places, in the energy ?? confirmation and maybe both in a physical dimension, if you wish so.

Then it comes a position, do I need mobile phones, do I need communication system of today, where I can be present at both places at the same time to talk? To carry the emotion, to convert it to understanding that I don't need to talk. The emotion (is) understood. Today, when we sit and teach about the transmutation, now you understand where I have brought you to. To energy packs, to dimensions of the fields, that many of you in the third week of February have to. You will come to. You will have new dimension of thinking, emotion, that you didn't even know. My body shook this way, I felt something, (:40) I have emotion of something, I don't understand. you have to, in a way, develop these emotions. And then, you see how, so simply, I have made you Passengers of Universe.

Where you go through the dimension of transmutation, through expansion, through interaction of your Soul with a bigger entity. Up to now, you had the cars and you created the jumbo jets, and the A380, and the rest of it. And you got yourself somewhere else. Now your rocket technology to take you to Moon is in that plasma. Which is created. Which will be like a satellite on every corner of this planet. Those of you who became, to become Satellites, you will understand this very soon. Sometimes when you create the combination of fields you even feel who passed. Somebody just went somewhere else, they used the energy field of it. I have to give more to them.

Then you understand. What we talked about, creation of the Soul in the body of the man, now we have made a system that is there. You cannot deny its existence, because you can feel its emotions, you can touch its presence, you can measure how fields and currents evolve inside it, and you can measure how the fields

inside and outside have no connection. So it's an entity. If you put a probe inside the system and one outside, distance away, you see there is no interaction. Which means there is no production of the voltage changes, current changes, which means it's an entity on its own. (:42)

We created this and we left it there before Christmas, after Christmas, no more, no systems, nothing, just a space where it was created and it was still interacting, changing weight of the system, increasing some, going up, coming down, having interaction with other fields. Now you ask me, why do you teach about the Soul? How? Why is Keshe Foundation going this way? Now you have your answer. Because now I made the system that you interact with it. Has no dimension of physicality. It's an energy pack. You feel it, it's laughter. You feel what you need to give you. And then you understand the change of the game in understanding and comprehension of the science of Creation for man.

Some of the Knowledge Seekers in next few days will start using these systems directly themselves. It's not that we bring you all in mass in one day. We have already started testing. We most probably have seen the first physical transmutation of the fish. Recorded it, is it there? Can it go there? Why does it move that way? And then we see the same as the fish goes up, how you go up and come out in another system.

Then you understand when I showed you the Vertical system in Linz Exhibition Center, now the technology for it is shown. How the same as the fish, as physicality has no control as the Soul goes vertical, then if you understand it's the same with your Soul. And where does it end? The other way you go, vertical down and manifest yourself. (:44) The system we showed, the Vertical system in Linz, now becoming a reality. Transmutation of the Soul of the Man (STM) which follows the, what we call, the physicality of the man. The time, the place and position. If in the receiving end system, I keep the system the same as New York, you come out blue eye, blonde hair. If I change, you want to come in China, to the Chinese emotional level physics, you manifest as a Chinese. A few times you touch your face, is this me? Oh yes, now I look like Chinese, I think like Chinese, I speak Chinese, but in my head, I still think English. It's like when you travel, you go somewhere else, you speak two languages, in your brain, you still think in Indian, but your mouth comes in English, because you're in the English-speaking area. But up to now, you couldn't change your feature. You still stand and say, "Good morning, how are you today?" But the guy can see you speak in Indian accent, and you have an Indian feature. But when this time, as a Englishman appearing in India, you speak the accent, the behavior and understand. And you do it, and we have created those systems for you.

You come to understand, the transmutation will be in the totality of essence of the fields. Not just a few bits, just to show it can be done. This is where the fields of the Creation comes in. This is where last week I started to explain to you about the origin of the fields. If you become pure enough, if you become... understand the essence of the life in the Universe, and find that strength, in a way, (:46) detachment of the Totality, through the system, which is sitting in Linz, you can find your way to your Creator. It's not going to be another system, because it's created by the fields of the Universe. We have created a system that it uses the energy level at the level of the Creator. We don't put in it Calcium and Potassium and whatever to make man. It decides itself how the man will be at the point of manifestation.

It'll be interesting to see how many of you, in the coming sessions of the Keshe Foundation, how you feel. What new emotions you'll talk about that you never had before. And you try to explain it, because we haven't made words in the dimension of the man for these new emotions. It's not anymore emotion of love, it's not emotion of crying, it's not emotion of pain. You'll feel the emotion of transmutation, you feel the emotion of arrival, you say, "I feel I arrived." Because this feeling from now on, is the emotion of arrival. There's nobody in there says, "Ladies and gentlemen, welcome to New York, we just landed in JF Kennedy Airport."

It's your Soul, you feel. Now we have to create new vocabulary in the language of physical man, for him to understand, this is the emotion of detachment, this is the emotion of I am moving, it's the emotion of departure, it's the emotion of whatever. This new language, new word, in the dimension of the Soul, you have to find it in the dimension of physicality. How many of you will go through the point and the fear of not knowing what is, bring you back? (:48) We see this in all the systems. When we put you on the system, 50, 100 of you, every time we've done the test, or even when 300 of you, we see how in the first 10, 15 minutes you jump. Because your Soul cannot, your energy inside you cannot accept that my physicality is not here. We see you going physicality, you go Soul, physicality, you go Soul. And they are so tiny, fine, next to each other. And then, when you gradually, all of you, the energy expands beyond you, we see the graph expanding and opening, and opening, and opening. And gradually, we see all your Souls interacting with each other, and we get a mishmash of figures and shapes.

And then you understand. Then you know how detailed work we have done, we have put in for you as Knowledge Seekers, to understand, to be able to be part of and to be part of understanding of yourselves. When we show you the graphs and the shapes and the whatever, it's very easy because how we understand it and you have to understand it in dimension of your own fields, your own energy, your own understanding. And then you come to understand more, how much more I need to understand about myself. And in a very simple way you can see, you come to understand yourself. And how things take shape and how when all of you start moving gradually you open up. And in that opening up you start behaving different.

If you remember we showed you these (shows graphs). When you look at these figures, (:50) when you can see these shapes these are the oscilloscopes in our system. You see how you change between the yellow and the green. Green is your Soul, yellow is your physicality. And at the beginning you go through this emotion. You go through these systems. And then you see in the second one next to it, how you open up. Does it open up in a horizontal section or does it open up in a vertical side of your brain? We monitor both side. And then in the later on the stages we see how you change.

So, it's not a talk, you we observe you. And the very first ones you go through is amazing, because you have no understanding of how your field changes. Then you come to understand. How you come to stand still. How you as scientists as Knowledge Seekers will come to be, to change, to understand and go through the next step. To the next understanding. To the totality of the system.

One day, one day we'll explain to you in details how your Souls have interacted. How your Souls shown, and what they showed, and how they showed, and in what dimension of physicality we see. (:52) Now you understand the dimension of the Soul, the dimension of operation, the dimension of interaction, that we watch, we see and we observe how you as Knowledge Seekers, start gradually, knowingly or unknowingly, breaking into these grounds. How you gradually come to understand the process of the Creation. The process of understanding your own creation. And how you can transmute, how you can transfer, how you as Knowledge Seekers come to see, to understand.

So when we speak about Satellites (Souls), now you see the Satellites. We created in a dimension of Universal strength fields, and many of you come and up to now we connected you to dimension of the fields of given matter state. Now with the new technology you are in the dimension of the fields of the Universe. And from this session on, in the monthly, what we call, sessions, you'll start, as I told you, to interact with the fields of the Universe. It'll be interesting how many of you who came to Linz and you've been in the previous sessions, go and read what you wrote as a testimonial. I went to the Moon, I felt this, I went to see my uncle,

I was feeling... (:54) And then go through the sessions from next session and the session after and after, when now you go through the transmutation of the fields of the Universe and see what you write. And see the difference between the matter state of the man's Soul and what we call, the Universal strength of the same Soul, the same central energy.

As I said to a Knowledge Seeker, the problem with the Keshe Foundation is the same as before. We used the word plasma, which our plasma is different than the plasma of the man's used to in the blood or in CERN, because we call it plasma collection of the fields of our understanding, how we create it, we have the same problem with the Soul. We cannot find any other word for it, sorry about that. Keshe Foundation speaks about the Soul, which means your central energy. You put it how you like it, because it fits your understanding. As I always said, you take from this technology, from this teaching, according to your intelligence. Your intellect, not your knowledge. And if you don't have the intellect, if it's not matured enough, you cannot understand it. You still stick to the past.

This is a beautiful story when Sheikh Mohammed of Dubai, United Arab Emirates, built beautiful buildings, with mahogany doors, frame, kitchen tables, all made to bring the Bedouin out of the desert and gave them these beautiful cities and the mahogany doors and the furniture. What did they do after a few months? They took the door off, they took the frame off, broke the woods, made fire in the middle of the room, (:56) because this is what they did. That was their intelligence. The wood on the door was for decoration and beauty. Because you don't have the intelligence, you made a fire in the middle of the room and instead barbecued your meat on it. There is no intelligence to understand what the guy was trying to bring you up. The mentality is not there to understand. They're still used to, say, living in a tent and burning fire in the middle of the tent. They didn't understand the house has a cooling system and a kitchen they can cook in. The intelligence is not there, even is given the most advanced living.

It's the same with many Knowledge Seekers. I don't follow the Keshe Foundation, because you haven't understood it means your intelligence is not there. You haven't matured. So you grab the wood, the door, and you burn it on the floor, because (intelligence) it's not there. As I always said, you can bring and dress a monkey in the most expensive clothes of the man, but inside it's still a monkey, he doesn't understand the difference. Till one day he understands, maybe that it's as a button, don't have to eat it.

Now you understand. Where the technology of the Space, in true essence of the field of Universe, is going to take the man. You, as a man, not somebody else. You are the creator of that destiny. And we have provided the system for it. It's like we build the airport. You decide to go to that airport, to go to China, to New York, to Tehran or somewhere else. You choose the destiny. You choose the destination. (:58) You choose, you get on the plane, will crash, you get on the next plane, which land, you get on the next plane, where you'll be on the holiday. Airport builders and aircraft builders are just the facilitators. And you still can go with a donkey. And you can still drive a car to the same destination. It's choice of the method, maturity in it, and being able to do it.

And this transmutation through transfer of energy, now is in the hand of the man. Now is part of the vocabulary of the science technology and the new words which you have to create to, in a way, suit you. Call it the Soul, call it the plasma, call it the central energy, call it a satellite. Call it what suits you to understand the process of the Creation. And not that he speaks about the Soul. Because that's the only word is, to us when it controls, interacts with the physical body of the man, and it has no dimension. The problem with man is that the Soul has to be so big that it's something bigger than him. He hasn't realized that tiny-ness of it, that small amount of it in the center of brain of the man, is bigger than it is. Try it and see how it works.

We have a beautiful saying in Farsi. We say, << Farsi Language >> It means, don't look at that tiny pepper. (1:00) Put in your mouth, crack it, and see how hot it is. Then you understand the size, the shape of the brain of the man's central fields. ?? You haven't even understood. Because you always looked at the physicality of being big, but you never understood, that little thing controls you.

It's like, when you go, as I said many times, to government buildings. They used to build it as big as it was. When people went into it, they already, the size of the building, put the fear in them and the control. Because they're used to little huts and little doors and one room with six people sleeping in. All this big building must be very powerful. And the size of the governmental building controlled the nation. Now when the nation got fed up with it, they burned them down, they became to the floor, they still had their little hut. And there was nothing left of this building, and we call the revolution, the French, and the rest of it. Now man has to deal with that burning of the past dogmas of the big. Now you have to understand, it's inside you. It's that hut which all the love existing in, called your Soul, your energy center. And how you deal with it, and how hot it is, that you never cracked it to understand, because you never had understanding of it.

When we talk about the fields of the Creation, the essence, the origin, because now you understand what it means from last week to this week. Now we have given the system. We have developed the system. We have made a system that it works and is a center bigger, because you always has to have a bigger dimension that confirms there is something there, (1:02) that now can interact with the dimension of the whole fields of the Universe. Now it's your decision, it's your understanding, it's your devotion, it's in your essence of life, that you have to decide. I want to go to become physical in another position, or I go to the essence of the lowest fields level, common denominator, I call the fields of the Creation, the Creator. Now you understand.

In a way, if you understood what I said about new technology when it's come, in a single old Persian game of chess, you've been checkmated. Now you have to realize how you've been checkmated. You are checkmated by the Knowledge of the Creation and the system is in front of you. If you can understand it, you can travel the span of Universe. If you checkmated and didn't get it, hold your head in your hands and think, "How did this happen?" This is the only way to teach man, otherwise we'd have been here thousands of years. Short, shock delivery and now you're there. I cannot change it. I have created it and it's done by another man. I have just given the knowledge that it's not magic. It's a knowledge shared with another beautiful Soul and it becomes creation by the other Souls around it.

And now you understand. (1:04) You wanted to get access to the Universal fields, we have made a system for you to do so. You wanted to understand how to transmute, you can explain it, you can understand Universal transmutation, I gave you the fields in the systems in Linz. Now we have built a system that the fields is for all man to get in. Because it's so small, but it's so big it has access to all the fields of the Universe.

Now you understand where the teaching goes and why we taught to you about the Soul, or your central energy and now we understand why in past few weeks we spoke about the origin of magnetic fields because you are part of that origin. You look at your children and say, oh this is what I made. How many times without you knowing your Soul has made, allowed another life to be created and sustained by feeding it. Because you're busy with physicality and you're one child, the Soul has been busy feeding the whole Universe. Because has the power to be the satellite. To be a system that it can convert, a transformer of the fields of the Universe.

Now you understand. How, now that the systems are operating, man in one leap, in one sweep, has reached the Knowledge of the Creation and the Creator. (1:06) When our Knowledge Seekers tell me when I put my hand in the field my hair rises, my hair on my hand and I feel it. Don't you get that feeling when you touch a being, your lover, your child? When the devotion of the love is so strong that every time you hold your lover you get that tinkling feeling inside you every time you look at it, with your child or your wife, your father, your mother. Now you have to learn that entity has no dimension. And I'm privileged enough to be able to touch, to feel it, and confirm his existence through my own emotion.

You Knowledge Seekers you're in for a big shock. The knowledge and the technology of Universe has landed upon you. And how you interact with it, is your choice. We have just opened a door to Universal Community, to Universal energies, to Universal fields, that you cannot touch it anymore, you cannot create war because of it, you cannot possess it. And it's there to give unconditionally, as is the source and is connected to the source itself of the Creator. Has no dimension. And now you don't need to have a fear of it, because it's part of you. Your Soul is interacting with it. Your Soul sits with it.

And gradually, as I said, in this monthly sessions we put, you'll start feeling it. Write about new emotions. Give it a name that you understand in the physical dimension and try come, in-between all of you find an explanation for it, how you define it. (1:08) What happens when you are half in the physicality and half in the dimension of transmutation? Where does the sound of the birth comes on other side. All of you without fail, when you transmute and arrive in another position, will make that noise. It's like the child born, I've spoken about this before. The first cry, the first sigh, does not need to be in the voice of the man, it's arrival of the fields of your Soul, in interaction with its environment. Now you understand. And from this month on, all of you have access to it. We make it that way, we allow it that way, and gradually we make it available to everyone.

But at the same time, not only we have to educate you, we have to educate your governors, the world leaders, and those who keep control, that they wanted to bring the food control, they wanted to control man for everything. Now we have given you a system that makes you a rebel. Nobody can control you except you. And as you live with the Ethos of Mitra, you never do wrong. Your Soul lives that dimension. And now you understand. A new dimension, a new measure, a new system in the life of the man. In a way you were happy when you discover the cars and the wheels and then the jets and then the rockets. Now you have a system which transfers, takes you as a dimension of fields, energy or physicality anywhere in the Universe. (1:10)

Then you understand. When I tell you, there shall be no, there shall be no, what we call, political, religious prisoners. Because your wish, your understanding, according to the strength of your Soul, will take you somewhere which your Soul will interact with and live with and is in balance. And there are no prisons in the world of the Creation. Except in the man dimension with the bricks and mortar. This gives man freedom beyond imagination. But man has to learn the rules of the game. and gradually move in that dimension.

It'll be interesting how you Knowledge Seekers will react in the coming time. Excuse me, I have to accept this call.

<< Mr. Keshe answers a call >>

K- Hello, sorry about that, I had to accept this call. So we have to understand, how as what we call, dimension of the fields of our existence, we will transmute, we'll transfer. We give ourselves dimension of physicality. (1:12) And how we come to understand the full work of our life in different dimensions, and in a

what I call, the "correct conduct." Sooner or later mankind will have no choice, but to be and to understand the Totality and to in a way, become part of this system. System of Creation. System of understanding his own fields and interaction. How we shall become, how we shall see and how we come to conquer our own fears of transmutation.

At the end of the coming sessions, on the monthly sessions, we open a chat for those of you there, to start creating new vocabulary for your emotions. And how these vocabularies become the dimension that you all understand each other. And in a way that you can even create vocabulary of Souls with no words, that you all understand. This is how the new communication systems will work. Building these systems that creates the dimension of the Soul, will become the responsibility and become part of the work of the Universal Council. That these systems are correctly conducted, (1:14) used and in a way facilitators for man, not only for his own transmutation, but allowing the control and the dimension of the interaction with the Universal Community.

In a way, the amino acid (AA) which created the physicality of the man and it made the fingerprint of his Soul, will be the same with others. Your Soul will carry that fingerprint of amino acid which shows you are the... your Soul, your dimension of plasma of you, was put together on what he call, the Earth environment. That's where you come from. And another dimension of what you are not knowledgeable ?? show to, it shows with solar system. Because it has his own field strength. And another dimension shows which galaxy, which collection it comes from. And another dimension goes from which Universe? Just because you don't see it, you're inside it. You cannot look at it from outside. But it gives you the knowledge, the understanding that when you see another Soul, it gives you the same information.

And then, you have to explain the level of love in the dimension of the Soul, when you come across these, not love as a partner, but love as a devotion to give to. It's like a child, one or two years old, saying I love you mama. And then the same child grows up and he says to another man or woman, I love you. Is it the same love? Or is it carries different dimension of emotion? (1:16) And this is what as Knowledge Seekers you have to understand. You have no choice. Because choosing it or not, your Soul brought you to the Keshe Foundation. Keshe Foundation has built the system and you're in it.

I wonder how many of you will use these systems to change dimension of the physical wellness of you. And how many of you, knowing you have access to it, still keep the same physical condition. Because through it, your physical confirmation of love and attention is needed.

Now you understand. When we start talking about the Soul, when we start talking with the Universal Fields, when we start talking original fields, what was the reason? I told you weeks before, that a new system is on the way. That system now is operational. Now it's working. Now I see it, I hear it, I hear what people say, who are near it and it's just confirmation, another "tick in the book." So we have managed to get people to feel it. We have seen the Soul of a fish to get energy from it. We have seen the material to be produced in a different way. We start feeling the energy fields inside it. And then, and then, and then, more and more and more.

Those of you who join us this month, I would like to be a fly on the wall on your Soul and see how you really feel. And some of you come and say, "I didn't feel anything, nothing happened to me." I wonder why? (1:18) Denial is the best way not to accept the new. I hope you Knowledge Seekers understand where I brought you. And these sessions will be listened by millions in the coming time, because they'll go through the same process of understanding. And when it came and how it came, and as I said, in Sanya, in China, in the

coming weeks, you might feel totally a new experience. And some of you will find out, if you reach to that level by then, that, oh, as one Knowledge Seeker wrote to me, waste of a thousand year of etiquette.

We play the game of knowledge and we build systems to confirm the knowledge. You missed on the MaGravs, you missed on the plasma technology, but you don't need to know it. Do you know every system, every bits and joint and wire in your mobile phone? You're just a user, you just know where to dial, where is the button to listen to, and that's all you need. And it's got a button for camera to record the memory of the time and the position with it. And now you have to learn the same thing, but as buttons. There'll be energy fields, emotion buttons in you and what you record, what you bring and then you can talk.

I wonder how many of you in a coming time, the way you're used to cameras to take a picture of you, and your friend, and your wife, and your children, will create a frame of the Soul of them when you travel at the span of the Universe. (1:20) And you can bring it back and come with you and say, "Oh this is us on this planet, on this position in the Universe and this is the Soul of the mom, this is the Soul of the dad and that's how we enjoyed each other to be together." And the mom says, "Yes, I remember that and I saw that because my Soul was with you."

These are not a dream anymore, because if the fish can go up and down without floating with the, what I call, the fins, now man can do the same. But now he has to learn how to float his Soul, his plasma, his central control. You're in for a wonderful time in the next few weeks and I hope you enjoy. And I hope you understand what Juggernaut has hit your Soul and if you still can keep it together and enjoy what I call, the interaction. Thank you very much Rick. If you want to take a short break and then we come back. And maybe we interact with some Souls.

>> **BREAK** >> 523 KSW February 01, 2024 (1:29).

K- Thank you for coming back. Yes, as usually we make some information available, what's happening around the Foundation. As usual, as you all know, the Sanya conference in China, it's organization in the full swing and many of you have already registered to come in. This conference will be one of the amazing conferences and as I said over the first time to the Chinese community that we hold the conference in China. And we teach the new technology, and some of the Knowledge Seekers says, if you show something we'll come. We are not the what we call, "circus." But as usual as if any of you have joined or been with the last

two sessions of the conferences in Manchester and London, we bring you systems for you to test. (1:30) So you are an exhibit, not us. Your Soul is. We just bring the facilities for you to test your Soul. So the magic show is you, not us. And in a way you are the monkey in a cage for people to see. What you come out with, when you go through the systems.

And on the other hand, the technology, the development of technology, is so advanced that some of you, if you understood the first part of this sessions of today, understood, can understand what happen if you put a number of these Souls in a star formation to create a, what we call, the Soul ?? fat. In a way, you create the spaceship to fly. Now you can understand creating these Souls. And knowing that they're responsible in the dimension of the fields, I think you can imagine what is to come in the following teachings. You understand? You were looking for UFOs with dynamic reactors. Now you understand why we create, why you see the Spaceships without reactors, physical dimension. And this is as part of the teaching to come. And beginning of it you will see in Sanya, in China and most probably the dimension of physicality in that direction will be shown in the beautiful city of Tehran. Where we'll really show what a game is about and how things will go. And then we'll take this from land of Mitra across the world, for the world leaders to understand they have no power. Because the power sits within the Soul of every one of us and how it will dictate and it'll be. (1:32) It'll be an amazing show to see who will stand for leadership, world leadership and how many of your Soul will stand in equal measure as Universal Councils. And how many of you will be elected by your Soul to serve. And how many of you will cheat in the ballot box to get your physicality somewhere in a white or blue building, or a red building, or whatever it's called.

You got to understand how the whole teaching of the Keshe Foundation has changed and how as I said 2023, 2024 will bring that dimension of the teaching forward. And in so many ways, you are the players of the game, we are providers of the Council. It's you who paints and plays the movie on the screen of the Universe, not us. We just provide this. And gradually, the, what we call, humanity as a whole will become that way. It can be foreseen in next few years, now that we have released this new technology in the past couple of weeks, how not only the STM, but the "Soul of the beast," and others will, the same way without education in University and the existence of the Keshe Foundation will tap into. And receive energy from it. And through it, thy shall not destroy another life.

One of the biggest challenges for gamekeepers will be why all these animals are so lazy. They don't run anymore, they don't hunt anymore. (1:34) Because they, through the knowledge of their Souls, extension of the, what we call, the amino acid, will receive what they need. It's not just the man who doesn't feel hungry to kill another, because he receives the energy, the Soul of the animals and the plants will be the same. Now you understand what they came in the promised books. That when it comes, the lamb and the lion will nest in the same nest, sleep in the same nest. Because none is hungry to kill the other, and none is hungry to chew the others.

Now you understand. The actual evolution in science, understanding of the science of the Creation, brings the promise, fulfillment of the promises. And we are at that point. Where, if you understood about the new system, which now we have put a fish in it. We are monitoring its life. How long would it live without any food will confirm this. And then, you understand, all of you will have that capability. And if we put enough of these satellites across this planet, you all don't need a system to lock into, through your Soul will do. And so has the dog, the Soul, the cat, the lion, the mouse and the bird, and the rest and the fish. And then you understand, we fulfill the promise of the past.

And we'll come to the point. And in a way, we have reached that point. How many of you at this moment tap into that system? How many of you understand how to tap into it? (1:36) And how many of you don't need to change your breathing to get different energies? You'll learn how to lock into the system. Not to only get your energies, but transmute across the Universe. ?? cross. And in a way, as I was telling to the Knowledge Seekers and made them laugh, was, if you understand I can create the field of the energy, then you feel the love in your heart and you understand you've touched the Soul. And if you understand what that means, you have managed to reach the essence of the love of the Creator when it touches your heart, dimension of your physicality and then it touches your Soul in dimension of connection of the Universe, and then you understand you'll be devoted to Creator, which is you and to the rest as a Totality of the Creation.

In next few months with what we have physically delivered I'll bring you the most amazing sensations you ever know. You will not be able to even explain it in the word of the man, but you'll feel it in the essence of the emotion in your Soul. And then next time anybody tells you this and that Keshe Foundation, says, this is a headphone, put it on, and then you tell me you're as crazy as me, or we all have learned the way to tap into to be part of. And then hopefully in time to come gradually we start teaching you how to use the Universal fields, in a way of transmutation for your life. For your life as a bigger meaning of the life, means existence of your central energy, what you call, the Soul.

I hope many of you will experience this. We'll bring some systems with us, those of you want to see some magic of your own Soul, (1:38) to Sanya. Come and try and see if there was a difference between what you did in Manchester or London or on your collective headphones, and then the systems which are you actually sitting. And in a way the room is your oyster and the universe will become the shell you'll bound yourself to what dimension.

Join us in Sanya and in other sessions, and gradually start understanding a new transportation system has been made available to man. And you are the only captain and decision maker and you are the only passenger, where the captain takes the passenger is a Soul of flight. One "seater" plane of the STM. And I wonder how, where you landed and what memories you bring us, and what feelings of the flight you bring us. This time there is no knots and bolts coming off the propeller, and this time you don't fly with what I call, the "seat of your pants," as we say in English.

Any questions?

Q: ... (1:40) Does the definition of emotion of the planet Earth match the definition of emotion of the Creator's creation? How to define and explain the word emotion in the realm of the Creator's creation?

K- Simple question, a simple answer. Ask Him. When you mature enough to get there, ask Him. And in asking is through emotion and not words, because I don't think the vocabulary of voice exists, unless man thinks that's the way. Was or is the creation on this planet to His expectation? I don't think, maybe part of it. And maybe not part of it. He learned through interaction of the physicality the emotion of the love. And not necessarily only, it's the only planet in the Universe that love exists. But in different measures and different strength. And most probably one of the most strongest feelings or emotion or fields that triggered him to the, what I call, love of Mitra in so many ways.

But we have to understand that the minute we put limitation on the expansion and the creation of interaction of the fields of the Universe, is the time and the place where we have reached, as I said, the comprehension and intelligence and intellect of the Creation. (1:42) There is one day, some of you and so your Souls, or

Souls which will be created from your Soul, will reach that point to understand the Totality. And maybe they become part of, or they become collection of fields of the Universe, that fields understands the Creation and the Creator. And these are the first steps.

We have to let you understand what it was, what we call, the "love of the Father." But now you have to understand, is there ?? a real Father? Or you are part of that Father? And then understand, comprehend the totality of what it means to be. In that essence, in that dimension, in that motion. And how you as Knowledge Seekers will come to be part of this. And find your position, the time and place in that process.

So, is it to His expectation? Is it part of His process? All is, because we are all in total as part of it. But if you want to understand His expectation, look at yourself. Are you satisfied with what you've done? How your Soul behaves and how you behave .. in the physical dimension here? And then find out what you need to adjust and how much you need to take from the Soul of the Universe and Creator to change that in you. (1:44)

It'll be very interesting that with the new technologies we developed, how we can replicate the changes in man, and the beast and the animals. And how long we observe the existence and confirmation of the field transfer, or transmutation you call it. And how long you can hold on to it. And as I showed you in the graph, what is your fear? Why do you keep on jumping between the Soul and the STP, and the physicality, and jump back? Why can't you from the minute go in, let go, it doesn't need expansion? You do that with your Soul when you call it the dream time. And so you have to learn that in the dimension of physical awareness. And then find out if the Creator is happy with what is, or what man, or other creatures in the Universe have done. Is it to His expectation? Or we are just playing the game?

Any other question?

Q: ... How to use the emotion to create? Is there a specific and defining condition for creating, irrespective of the environment? What are the best conditions for creating anywhere in the Universe the Unicose or beyond?

K- How can I tell you, as I always said, I pay you to love me to create the emotion of love for me that you love me as a lover. (1:46) How can I pay you to love me as a brother? How can I pay you or give you something to love me as a father, when I'm none of it to you? So, you have to understand how you pave that way for you to feel, to be. And what feeling relates to what. And what emotion it creates. And this is all part of what you have to experience. And you learn.

It's like going to a restaurant which have all the foods from different nations and you choose this of this, bit of that. And does it fit? Do I like it or this doesn't go with that? I call it in a way, have you ever been to a sushi restaurant on the belt, where the food floats and you pick what you like off the belt? There is a new version of these things going with the Chinese. They open a sushi restaurant, but it's all Chinese food and the Indian food on the belt and then they add some sushi and whatever on top of it and nowadays it's become international cuisine on the belt, it's not sushi belt anymore. But it's, still called sushi, because people associate with it.

Is this the same with you? Can you carry that emotion from the mixture of the "belts" of the fields of the Universe and identify it? Is this the emotion I feel, is a Soul emotion? Or is this the emotion, a physical emotion? Or is this emotion that interacts with the Soul of the Universe or another entity from the Universe. It'll be so confusing for a long time for all of you, who go through this process. (1:48)

And I saw the first time this in one of our Knowledge Seekers, a beautiful couple who came, and one of them saw herself as half fish and half man, or a woman. And I said to her, you're the first, what I call, Space mermaid. And this is how we want to connect ourselves. We still want to have the physicality and we still want to feel that emotion and dimension of man. And then at the same time to fit the environment. This will be the same with your Souls. Still confirm from Earth, I still can change to what I like in the physical dimension, but I still want to access to Universal fields and energies.

It will be interesting how new creatures will come out of your excursion of your Souls and how much of it you come to understand is real, because your Soul is done and doesn't matter it doesn't fit into physicality. Some of you will go through that with the physical dimension. And in that process, you come to understand more and more. It's a beautiful journey and now we have made the tools for it. And in the coming time, you'll get more as you are man and has to have a machine that confirms it, measure it. You'll have that as well. That okay, it's there but now I can get in it. They made it, they confirmed it, it does, but what am I going to do with it?

In a way, as I said to and I listened to our people who run the test, and it just went through my head that time, (1:50) but it has to mature with our researchers, is that when we measure inside the system, it has its own life, it creates its own ?? life. If you put one system inside and once one outside there is nothing. But the simple question was, bring that outside one so close and close and close that you see something then you understand that's a boundary of the Soul. Not just that there is nothing there when you put one in and one out, it means you are beyond the boundary. It's just like you don't open your arms and your child runs you when your arms open, you close it enough till you feel the physicality of the child. Then you give her the hug, then you give her the love of the father. And this is how our Knowledge Seekers have to gradually understand this. It's not to spoon feed. You have to feel the emotion, confirmation of existence. And then you go the same with the other system. See where you see the fields and when there no fields and bring it forward, close to each other till you feel this is life, because now there is interaction inside within and outside. No connection. Your skin is that you touch it what's inside is yours, what's outside belongs to atmosphere, belongs to the Universe. So it's the same with the Soul.

And as I said, in the coming time you will see how when we start creating these Souls of the interaction of plasmas, of the interaction of the Universe, when we put them in the Star Formation (SF) then you understand how the Universal transportation systems out of the field of the Creation, and the created, and the Creator will take shape. (1:52) And how a new dimension will open up, because these systems will only carry Souls. These systems have the potential to travel the span of Universe as what I call, because they have no physical reactors. They are energies which they, in interaction with each other, create dimension of that star formation where there is no star in the Universe that their fields is not within them.

This is how universal GPS's are created. Not by satellite. And does not make mistake like your GPS, take you to the river to go in because it says there was a bridge here 20 years ago but it's not there, but you carry on, you'll be safe. How many of you have used a human GPS systems and ended up in the rivers and the banks and the roads which doesn't go anywhere? Because it was there one time. This will not happen in dimension of the transmutation. Because there is nowhere in the Universe that there is no field and there is nowhere in the Universe that fields are not connected to each other. Universal GPS system of the Soul is perfect. It's the man who has to understand how to navigate.

And that process is done, is now, is in the hands of man. It's just how we understand it and how we interpret it and how we don't make what I call, mystic things about it. We understand it, we analyze it and we accept it. And then this will bring us a new knowledge. As I said, I'll ask the IT section of the Keshe Foundation to open the, (1:54) what I call, like a testimonial, for the frames, for the emotions that your Soul, your interaction of the fields in transmutation, will bring you. And commonly they'll have to decide in the coming time. When I say I am in Soul going, you need a word for it. That it means I'm moving out when my Soul arrives I can explain. That when I say this word it means I arrived by my Soul in that position. These emotions were created. And these are the things which will come up, slowly, slowly, in next few months and then you will understand.

It'll be very interesting, if we get a chance and we see the situation still solid, how many of you will, will interact and you'll enjoy to be part of the 7 day conference in Tehran. In a way you will come to understand how to handle your Souls by that time. Many of you. And how many of you will choose to pay different airlines to get you there. The choice is yours. But we'll educate you, we bring you a system that facilitates for you to be there. And there is no clicks and clacks. It's always there. It's just you decide, get up, get up. And where you want to get up, where you want to get up, and how you want to react in the position you arrive.

It'll be interesting how many of our blue, blonde, white skins, when they land in Tehran, we look so handsome with a mustache. And the dark skin and what I call, "tanned" and they'll say, (1:56) "Oh, I like this one, I stay here, I don't need to use a fake creams and stay, go to what they call, Florida or California to get a suntan.

It'll be very interesting as we create a condition of new systems, how you as Knowledge Seekers start transmuting and understand what it means. And be able to apply it again and again. When the first systems for this structure of transmutation through fields of the Universe is physically operating. And now it's for our scientists to understand it, expand it and then go to the next phase

Any other question?

Q: ... Can I tap into the emotion field of the Creator and choose what I'd like to be manifested in physically? And accordingly let my Soul take me to the destination? So like when we choose our own clothes and see what position suits the most, rather than arriving there and having the position to dictate what we wear.

K- That is your in brackets "God-given rights." You decide. And you decide according to your understanding.

Very recently, past few months, few months ago, more than a year or two ago, I attended one of our Knowledge Seekers wedding. (1:58) And the day before the wedding, the couple of days before the wedding, decided that I go to the wedding as usually not as in a suit and a tie, but in the manner of the national customs. I went out, I bought the clothing, the top whatever, that when we were in the ceremonies, or in the church, there is not the guy with a suit, but that guy is one of us. Looks like us, but not sure if is this or if it's not of the same nationality. But the clothing with the way he dressed, okay, they know he's not there, but it's part of it. And this is how will be with us when we do transmute. And sometimes I think, okay, in the next meeting I'll go with this clothing. As... This is my habit, as you've seen, those of you maybe in some of the conferences or meetings or teachings, I have built, I have made, a what they call, Keshe Chinese suit. Which is Chinese suit, but it has a dimension, a feature, which can wear a tie and looks like a suit. And it's very beautiful, when I asked the tailor to make it. This is, he said, nobody's done this before. I said, because

we have to fit both. If you can imagine a Chinese suit with a tie and shirt, which they don't fit. But now, because it's made this way, it fit both cultures, both understanding. (2:00)

And this is how we will do in Space. Environment is there, you still want to manifest as a man? Good luck to you, but I don't know how many arms and legs you have on the Moon, but you still might have the understanding, emotion, physicality of the man, but physicality in the shape of 2 legs or arms doesn't fit. Then you decide, it was a good exercise it doesn't work. But it works actually perfect, but it's not to my expectation what I thought.

You have to go through what I call this, test "sandbox" and test yourself and gradually understand yourself. And this is like as I said in the past sessions of the people who join us in these meetings, we'll leave (systems) it on. You can come and go and the sandbox test, see where you do, what do you do. And you're sitting there, your husband says, "This is crazy what you're doing." You say, "you know darling, have a headphone. You see, if you see the same and then you tell." "Yeah, I felt something but how come he didn't feel it before he had the headphone?" How come you have this emotion when it wasn't there?

I said to a Knowledge Seeker very recently, a couple, a beautiful couple around the Keshe Foundation. I said you know something, next time when you come into these sessions, both of you with the headphones, instead of sitting across the table, start making love to each other, and see if the emotion was different than when you do it physically, while you're in there. And they laughed their head off. I said, because you go to a different dimension. Would you both feel the same? (2:02) Would it be ecstasy? Would it be like taking 20 marijuana's and God knows what? Or would you feel the emotion of the love of the Creator? Because at that point you're devoted as a physicality and the Soul together. I wonder how many of you are going to test this. And how many have the clarity of mind to explain to us. Because in a way you make love in the dimension of physicality and the Soul at the same time. I wonder how many of you can bring a new world vocabulary to this.

I told you I opened doors to you in a dimension that you could never understand. And then in that position, and another condition, then you see how the children of Mitra are made. How a man of 80 and a woman of 90 can have children. Then you understand. The whole process of the Creation with this knowledge, you call it a Keshe Foundation, but you say, in a way, you "Keshed" in the knowledge of the Creation, it will change you. It's like, okay, let's both of us take a joint and make love, or get both drunk and make love. Whatever going to happen? Would you remember any of it after you became sober? Or, would this time, because the presence of the Soul and physicality, you enjoy the presence of the Creator? And would you, through that process, if you can perfect it in another dimension, lead to creation of the children of Mitra, which is the dimension of love, unconditional love and perfection. (2:04)

We had the 'Coronies,' which were the children of the Corona, because nobody had anything to do with it, a lot of people made a lot of children because of it. I wonder how many of you will create the children of the Soul, now that you know there is a possibility to be done. But this is not the way to do it, but you can test it.

And then you understand how children of the Universe can be created, perfect Souls, that they decide the dimension of it. And how many Souls would you be able to create out of that emotion? I was discussing with one of our doctors very recently that there is a child, or the person with a schizophrenic, and then they have the disorder. I said, how can I fix a condition of the "beautiful" Soul. Because it's a living thing, it's the father's fault, parents what they don't understand to confirm it. But they call disorder of whatever. The disorder we fix, because it's not a disorder, it's just for the Soul of the two Souls learn how to manifest

themselves in dimension of acceptance by the others. We cannot touch when there are two perfect Souls inside somebody, because I'm perfect. It's just that they have to learn the order of manifestation.

Our children with schizophrenic, our people with a schizophrenic, once they understand, once we teach them inside, not outside, there is an order for humans to understand you, they sit the father down, sit down, I want to explain to you, this is John, I speak to you this way, don't get scared, (2:06) but this is Joe. I Joe, explain who it is. And that you can love both of us, or you can ignore one of us? If we are both respected, we all love each other. The only thing I put the Soul ?? for a physicality of what you call, beautiful people, is to elevate them with our system. There is no other way to do it. And that elevation brings more problem for those who are looking at the physicality.

But showing them the order, raise them to understand the order, they will manifest themselves to their parents. This is the way we have to respect life, we have to respect Souls. Not our ignorance, by injection and tablets and mental institution, but putting ourselves in order to understand the beauty of the Creation. And this is what with these technologies we have, we have the capability to change the knowledge of man and we are doing so slowly, slowly. What I say, by .. slowly, slowly, by you're feeling it, by but you're going through the emotion.

And then you find out, I don't like Keshe because he speaks about the Soul. I change the word to the plasma of your life. Your level of intelligence is that. So be it, I'll teach you what you understand. I can paint it any color that it suits you as long as you like it, because it's the color, you think is the reality. But it's you who's lying to yourself, or is the lack of the knowledge of you, who does not allow you to move forward. (2:08)

Any other question?

Q: ... Good morning Mr. Keshe and all the Knowledge Seekers here, thank you for your dedication patience and love for all of us for your wonderful teachings. In several teachings you have spoken about schizophrenia as you call them, "beautiful people," who have more than one Soul within a single physicality. My question is, what can you tell us about Disassociative Identity Disorder, where a person has several personalities within them which often manifest themselves with the opposite sex, age, even children and nationality. What emotions occurred such, so that a single physicality could have several Souls within it? Thank you.

K- You chose to define the beautiful people in a different words. What you say is exactly what you call, beautiful people. Nothing else. People have different attitude or behavior in respect to the people. That's not a schizophrenic. That's not a disorder. But when you have confirmation. When you see the existence, complete behavior in respect to, or against each other, what confirms in a way scientifically, the existence of two Souls, that's different. (2:10)

But what you just mentioned is another elaborate blah blah blah blah for the words you call beautiful people. Because this way you can explain it, you can understand it, but it hasn't changed the fact. Whatever you call, whatever you mentioned, this, this, this, this, this, this. It means you're dealing with a couple of Souls, maybe more in the same thing, but because you don't want to put stick a word of schizophrenic, or beautiful people, you have created another word, series of words and emotions to explain the same (thing). Having, responding in different way, does not make you a Schizophrenic. Living in certain part of your physical life, different way, shows confirmation of the existence of different Soul. And then you have to respect it. And you have to understand even within these Souls they have their own emotions. That some of it

might match, the other one some of it doesn't match the other one, and then say, oh, you do the same thing there, because they have access to the same physicality.

It's very beautiful, read about the Siamese twins. There was, I don't know if they're still alive, there were two girls and they had one body, but two heads. And the same things. And then they had to, they grew up, they understood the emotion of love, having boyfriend. So they had to share this body with different men. Because one liked this man and one liked another type of man. And I followed their lives for a long time. (2:12)

And it was amazing how they were explaining. And one had to watch the other one making love to the other, because they couldn't go anywhere, the head is there, they are next to each other, or stuck together in the head, and feel the emotion of the other part, what you call it, half, to go through everything and they had to watch it till it finishes. Or eat the food which they like, and they hate the smell of the food and everything else.

And it just brought, when I used to read about this two, three Siamese twins, used to bring me so much laughter. I say, now we have the knowledge shall we move one Soul into another dimension and leave the two heads to one to work to live and enjoy. Or at least allow one to go out and the other one do whatever likes and bring it back in. The knowledge is there to do it now.

But it's us who doesn't understand. When we see the two faces, two halves, we call it Siamese twin, but we don't want to accept that the same thing can be inside one physicality. And we give it all names and some of them fits to both or three or four of them. And this is our fault, it's our lack of knowledge. And I hope with the new technology which is developed and getting developed, gradually we can show the two Souls in the system together. And let the people and the families and whatever loved ones, to see them, to appreciate them, the beauty of it. What was a shame to have, it becomes a jewel to have. (2:14)

Many people in the future will claim to be schizophrenic or beautiful people, and behave to show they are, but in reality they are not. Because, it's a beauty to be able to live within, and be respected and loved within one structure. And man has not understood that. And as you created so many words for it, so many words, and blah, blah, blah. Is there any difference? What's this? It's you defining the same thing in a different way?

I can explain it in a way, I've done this before, maybe I explain it again to understand. You get a man or a woman with two lovers. You get a father with two houses. You get a man with a mistress and a child from, and a man with a wife and children from. His behavior with a lover and a child of the lover, is different than his own children and wife at home. Or the second wife, you call it. It's the same man. The love he gets in one place, creates a different behavior. And the emotion he gets into another, gets a different behavior. But is that man a schizophrenic? Or different characters? Or the emotion of time and the place, creates the manifestation of that emotion, in that time and place.

And then, when you bring the two children of the two lovers, two partners, to be on the same table, you see different behavior. How one child speaks about the father, and how the another child speaks about the father. (2:16) It's the same father. Is that man a schizophrenic? Or is it a condition of the love, the emotion, the environment which creates different behavior, in respect to that position. Then, try to explain schizophrenia, try to understand everything you explained, and then try to understand where we haven't understood the truth about Creation.

I sat with a family, with a father, with one child in the family, and the father, same father, three children in the other family, in the other house. And, the emotion of love, with the second one, with one child, and the child to the father, was so amazing, so devoted. And I watched the other family with three children. And I saw the anger and the stress which was in that house. Same man. And when they found out about each other, it was a massive time of confusion. My father doesn't do this, but the father was doing exactly the same thing in the other house and this has created a massive what I call, emotional turbulences between the children and the women. And do we call it, schizophrenic, or we call it, (2:18) as I said, in China you behave and talk Chinese and in England you talk and behave like English. We do that. A lot of us do that. We have two different behavior in the workplace and at home. In private and in public. And are we all schizophrenic? And the conditions you explained, does it explain that? Or the person is a position of one physicality and life.

These are the things now with the technology in our hand we can explain and open up. Very soon, very, very soon. The way the Vertical Units are coming, when we put a beautiful person into the system, we will see on the other side, we can set our systems on the other side, to be manifested and the two characters. It's very simple, it's not a fairy tale. I want to be landing to look like a Chinese. So this Soul as part of the two, we create a condition of the Chinese environment, mentality and emotion and the other one wants to be Indian. And we create in the same machine a condition of multiple, condition making, and then you'll see the two. Then we give them the freedom of existence.

Separating the Souls of what you call, schizophrenic into the dimension of physicality, it'll become a reality. I see it maybe three to five years. Maybe even sooner, if our Knowledge Seekers, our systems, our technology developers understand the process. And I ask, when I open that door to the father and the mother, what? (2:20) Do you love them any different? Or do you accept these are your creation? Or do you blame one that didn't show itself and now you're aware of his existence?

Our knowledge is so deep, that we'll end with all these lack of understanding of the process of the Creation. There are other ways of manifestation of life and plasmas in the Universe, that man has not even understood. I cannot even tell you, because to you, is something doesn't exist. I gave you the MaGravs, and we use it in different shape and form, for you still is, I don't get my 30%, it doesn't work. But it touches your Soul, it's changed your life in the house, the fighting has gone, there is more loving. I got you, as we say in English, by "short and curly's." But you haven't still understood it.

When you plug those MaGravs in your houses, to see physical reduction, just sat back and watch what has happened, what's changed in the house. I engage you in the fields of it, and you're still battling for the meters of it. And this is the next step in development of the technologies. Because you're physical, you have to see a meter shortage, but you haven't understood how I touched you in a condition of the Souls. Go and take (a look at) your videos before, 10 years before you put the MaGravs in, and look at the videos today. Have you changed the color of the house combination? Have you changed more, calmer? Have you changed your food pattern? Have you changed something? And then you understand, we really touched you. Your meter just was a process. (2:22) And I keep on telling you, look at the fields, not the meter on the wall. You missed the main measurement, which is you and your life.

Any other question?

Q: ... My question is about common denominator fields which you have talked about, but I'm still very eager to know more about it. How can we find them by our Souls? Two, what's the relation with the Creator, the common denominators ??? And what does humbleness does in between all this and their relation?

K- It's how you put yourself. You create that emotion. How you become part of, it creates that emotion. And that's a common denominator. As long as you stay humble enough, not to be above others you have that common denominator.

Something very interesting Azar is in the background. She wrote to me a few weeks ago from the Persian teachings. One of the Knowledge Seekers who came to the conferences. (2:24) (Can you close your microphone? Because getting feedback). Were into the Persian teaching and Azar is there, that explaining how humble Mr. Keshe is with all the knowledge and everything else in the conference, he's like everybody else. That is a common knowledge. That's how the man should be.

Knowledge, wealth, should not be a barrier. It should be a tool to be more humble. Just because you carry something or you possess something, should not become the reason for you to abuse it, but to share it. The more we have, the more we share, the more common ground, the more common we become. And that's the secret to it.

And this creates fear in people, that how come we cannot be? Because we all can be, we all are. But we choose the time and the place. And this is the common denominator, unconditional ?? (love) allow, which means teach, do and everything else with. But to be there, to be as part of everything at the same time all the time. And there is no measurement for it. It's a way of living, it's a way of life. It's the way a man should live. And it should not be just because where you came from, the society came from, the education you came from, the wealth you made or the position you have, (2:26) has to be any different.

Maybe the more positions you have, the more common denominator you find, to find between the people amongst the people. And there is no way that, the common denominator is the love of the Creator. And understanding the devotion to serve. The rest will sort itself out. The rest you learn more and more. There is no way I can tell you this is the (common denominator), or we start looking for it. It's in you, and it's you who have to find it. And some of us, by ignoring it, we give ourselves titles and positions and emotion classification, and I'm loving, I hate this, I do this, and the rest of it. But try to do, to eat and everything else emotionally, and then see there is no common denominator, you are that common denominator because you're aware of all of it. This is the only way to do. We haven't made a machine for it yet.

Q: Exactly what I want to ask is, how to put it in the machine?

K- You have to find yourself. When you find yourself in the dimension of the emotion and understand it you have reached our common denominator. Nobody else, there is no tools, and there are no rules. And this is what we got to understand, there are no rules in world of Creation... (2:28) There is no rules. There is no parameters that we have to be within it. We create those parameters.

It's very interesting. I observed this for many, many, many years. We all go to the airport, nobody knows who it is, in a car, in a taxi, we all get into the airport. We all go to the counters and the airport authorities have decided that we put a red carpet here, a blue carpet there, and a bit of fancy, a bit of a fence, we call this business class and we put a flower at the end of one, we call it the first class, and then the others are economy. All these people get treated to go and give their luggage, it's a tag of wealth, or who paid for it, doesn't matter, you want to be very poor man, but the company pays for it, business class, because they have some extra money, you go. You go through the VIP system, but you end up in the same hall again. All of you together. Nobody knows while you are waiting, who is first class, who is business class, who is economy.

Then again, they say, "Passengers with a business class, please come forward first." And then the first class, and then the economy. You all go to your own bits of whatever you manage to pay and in that space of time in air you have a slightly different what you call it, privileges because you created it. But in fact all of you breathing each other's air for 10 hours. (2:30) They don't bring every few bits of 10 ?? hours, but ?? it's smelling and drinking and everything else of each other in that 10 hours. It doesn't matter you're a business class, first class or economy. Because the air condition has not changed it's all one common, and you haven't realized. And then it lands and you all get out, a business people go out first class, go out, and then you go back to corridor of the immigration. Nobody knows who was in first class. It's us who created those conditions for ourselves. In fact we are all the same from the beginning to the end. Nobody knew how we came to the airport, which class we go in. We made that division because that's the way we want to identify ourselves. And then when we come going out of the airport terminal, nobody knew who was in the first or whatever.

It's just inside us. And this is how life is. How we get, where we get, what we choose, what we paid for, and how we get out of it at the end. We are the beginning to the end the same. What means of transportation we use and what we did to be in it in that class is a condition of our physicality. We arrive from the environment and everything else, we breathe together, but according to our understanding or whatever we do, we live for a short time we are passengers of the aircraft, the body of the man. And then when he finishes, the Soul is back as a field in dimension of the Universe, nobody knows where he came from unless you have learned how to get off the plane as a parachute and get back in during the flight what we call, transmutation.

So, it's very easy, if you understand this, how life is. And sometimes you see people from the economy class, they go try to go into business class or their first class toilets. (2:32) What is the air hostess says, excuse me, you cannot come in, it's for not... You go in the back end, because you didn't cheat enough, you did not work hard enough, you use the toilet in the background with 40 people waiting the business class, or what they call it, their first class it's only two people on four toilets, they can jump in any one they like. But doesn't mean the guy in there, what they call, first class could be the top criminal drug trafficker. He had the money and he got in ... the spending the money. And the guy in the economy is a doctor who served all his life and has to serve the others. This is what life is. But in the level of the Soul, the guy in the business class has none left, because he's done enough crime. And the guy in the economy, in the backseat, a doctor or whatever science, who served his life, carries a high level Soul than the others. So, which aircraft, which terminal, which clearing desk you got in, and at the end we all end up in the same way, getting off the same airport, the same terminal.

If you understand this, you understand the process of Creation. But, then expand this to the dimension of the Soul. Where did the fields of the your Soul came from? What Passengers of the Universe, which galaxy we came, and when it's going back. All ends up from the same to the same. And if you understand this, you understand a lot about man's life and how he carries himself and what the position of Soul is and what we expect of it and how it is.

Q: There are some people, we are all the same line, and when we have to start running some do the best they can but they have a, they stay behind. (2:34) Is it because of the genetics that people don't have the same understanding and they work hard, but they cannot, or the Souls which have been there when we are created and things like that the difference in understanding?

K- There is a... How we understand the word? There is a joke amongst the people with disabilities. We can't call them the "special" anymore. We call them the special people. The special Olympic, a special blah blah

blah blah. And then you see it's all the struggle. But in English, what we call, in English language we have a "special forces" as well, which means the military elite. And the joke between the people we call, physically handicapped is this, they are "Special Forces" because they're handicapped in the Soul. If you hear military terms as British or American special forces has entered such and such an action. And then we use the same word for the special Olympics or a special blah blah. What is the dimension of physicality one is special and has no Soul because he's been trained to kill. It's us and how we stick things into each other, and what we understand of it, and in the word of the Creator we are all special.

Then you have to understand how to play the game. Does the dimension of physicality not to run? Is it special? Or the guy who actually stays behind as a handicap or a special, actually reached the end and won the race long before he start physically running. (2:36) Because he understood the Creation. Don't look what is left behind, understand how they, they are in the level of Soul. A lot of people with handicaps, with a lot of things, because they can't do things, they become very mature in the Soul and emotion. And it's amazing how many of them reach that level. Because the physical disability, doesn't matter if they can, or they fall behind, has stopped the Soul to mature.

And we have the systems now that we can show these things. Gradually you will come to understand. Maybe you start seeing your own disabilities in the emotion and the field of the Soul when it comes. Your disability is that you cannot receive the Souls, which are available which you need. It means you're disabled, you haven't created condition to tap into it. It's what we understand about.

Now if you have physical disability and you have the knowledge of the transmutation, I wonder which one of you will win any race, 100 meter, 200 meter. By the time you do your physical run, the one who understands, .. is standing at the end of the line, and won the race.

A lot of physical, what I call, shows like athletic and the rest, will become very fun, for a lot of people. And then, would we create conditions that the swimmers cannot do a "Soul" run. Or, in a way, you have to swim 100 meters physically, (2:38) but if you learn transmutation, when you jump in, you already jump out the other side, because you used it. There are going to be a lot of new rules for physical races. That, now we check that you haven't taken any drug to enhance it, they'll bring systems (to check) that you haven't used Soul transmutation to get to the end of the (race first). These are the headaches which you as physical dimension of humanity will have to challenge it.

I've looked at this many, many times, as if these guys running 100 meter horses, pass it by a few milliseconds, now they can transmute, who is there, before the guy actually does the first foot to run the 100 meter, the other guy uses the STP ?? (to finish first). We're going to create systems that ?? cheaters of the Soul cannot do. Now you understand gradually, there's a few changes will come and this is part of that process. You have drug cheaters now you have to find there's no Soul cheating when you do marathons and others.

R: We'll have to have special Soul games.

K- Maybe coming up. But this is the truth, this is the fact, which we have to. As we become more knowledgeable about it. You'll have to do. In early, early times of the Keshe Foundation when we're testing systems. I came across a sports doctor, he supported us a lot, we done a lot of work with him. And the sports injuries, instead of weeks, he was using the plasma technology into days. And those, what you call, sportsmen were not up to a point. He was using the plasma technology to bring them up, and show them they

can do. And then because they emotionally became strong that they can reach this, (2:40) physically they built up to it. And then he created using the technology a few national and world champions using the Gans technology. And I always sat with him. He says, I don't know what's in this water, but it cannot be detected, but I see the emotion of my sports people injuries changes. And then with it, even they have the injury, they're running like as like they have no injury. And the injury after time repairs the Soul, what you call, the emotion, is done immediately but the physicality says I still have two, three weeks to get there.

And then national governments got involved. That how these people have reached this point. They never understood that the Soul of the sports people have changed. One of them, two of them I think got disqualified because what they assessed their capability was beyond and they couldn't prove they have taken any substance. They didn't take any substances. They used the emotional strength to carry the physicality. And now maybe for the first time the committee of the sports will understand how these guys became national and world champions.

They didn't take any drugs. We elevated the Soul that he elevated the physicality and they take energies in a different dimension. It's not cheating, it's understanding that you use the potential of both your Soul and physicality. It's done. We've done this for about 2, 3 years, 4 years and it was no more fun. You can elevate the Soul, (2:42) which gives it the confidence to the physicality and then you see what you couldn't do before, you do now. Or we create a condition to teach it, to train it, and to bring it to that point, and age is irrelevant. If we don't tame it we cannot use it in a correct way. And taming it is by elevating it, not what you call, shackling it.

I was watching a program recently about this nine-year-old boy what he saw he did and he saw a guy jumping out of the plane with umbrella, but being young he didn't understand this umbrella was made especially for this guy to hang from it, it is designed to actually become like a parachute. So this nine-year-old boy actually went took umbrella and got his brother to video it, went on the wall and he jumped off the wall with the umbrella and the brother recording it. And the umbrella (folded) it up and he landed on his head cracking his skull and the whole thing was he didn't have the knowledge how the other umbrella was made. So the father thought, this guy is going to be a problem. So he directed his energy, his skill, his ingenuity in something else, and made a beautiful child, with no problems out of it. Because he directed it, he showed where and how is the correct way to do things.

And it's the same with us, we have through our Soul teach our physicality, how to take shape and control it. And then with it, show it, you don't need to kill. I provide the food, I provide the energy, you just enjoy the time. And this is part of the work of the Keshe Foundation. (2:44) In the coming time, as we build more and more systems, which carry this, what we call, "central energy," some of you doesn't like to call it a Soul, then you'll learn to tap into it, and part of tapping into that, satisfies your emotions and make a man of peace out of you. And that's how it should be and that's how it was. We changed instead of tapping to Universal energies which is coming from the light and the day, and the light of us into physicality. Now we're going back to it and we'll learn how to become Passengers of the Universe. It's as simple as ABC when you know there is an ABC existing.

Any other question?

Q: ... Yesterday at the Soul teaching we were talking about the neutron decay. Could you please explain to us again the difference between the neutron decay, the STM in physical death and in transmutation?

K- Nuclear decay is what we call, Fundamental Plasma. Is when the fields of a structure cannot hold on in the interaction with that environment. And by law of plasma physics, they don't annihilate, they don't destroy into pieces, (2:46) the field strength allows collection of each one of the same strength, but with common denominator, to exist in respect to each other, or in conjunction with each other.

Nuclear decay is, in a way, interaction of the plasma with its environment, to exist within that environment. If the environment could give energy which the nuclear material or the what we call, neutron needed, that it could sustain itself or it created a field inside it that it could take energy from its environment as much as it needs, as long as it needs, it wouldn't divide. Division comes out of separation, not getting enough energy from the environment, through the structure of the other fields inside, that allows this separation to exist because now it's two of us we get energy from a bigger environment and we both ?? saw it.

And if we understand this it allows us to do a lot of other things with the fields of the Universe. And this is in a way the division of creation of the Mitra out of the Soul of the Creator, packages of. But we expand and we cover more environment. Because it cannot be a Mitra, it cannot be a Creator, if there wasn't an environment for them to be created in, and to expand into, or maintain them. And if you understand this in the term of the nuclear physics and atomic decay and the rest of it, what we call, nuclear decay, we understand why some isotopes last, some atoms last longer before they go into division and some less. Some of them it's a few milliseconds and some of them it's a million year. (2:48) Because that million year one has learned, has created a field inside it that it can take environmental fields and survive within them. The one who's shorter hasn't got that capability, hasn't had, does not have the field the strength spectrum to get from environment. So it has to divide very rapidly, that it can maintain the structure and then with this bigger field environment, can take more energies now, because it has a bigger spectrum.

If you understand the process of the field transfer and nuclear decay, in true essence of it, not that, "Oh, this atom decays after so many seconds," or whatever, we understand the actual, the, what I explained, the mechanism of it, then we understand we can always decay at the point of where we wish. And then life is everlasting. Because we learn how to tap into Universal energy, take what we need from it, and give what we (don't) need, that we stay always balanced. And that balance does not needs division, because you have always been ?? balanced. And this is how everlasting lives are. The people who live longer are gradually, Souls and physicality, learn balance. And both in emotion and physicality and we see longer lives. And it's the same with other things.

A nuclear, you call it, a decay, look at the time of it, few milliseconds, few seconds, years and hundreds of years and millions of years. Then you understand the system has a field spectrum, that it can take as much as it needs, it gives as much as it needs, so environment cannot have that much effect on it. (2:50) And the one which hasn't created that the structure of the balance, needs to divide, needs to change that it creates that balance in a bigger structure, bigger spectrum. When you're a dot, it's just one point, you, whatever happens in that point. When you divided yourself in two dots, the environment between the two, now has a spectrum. And if you understand this, you understand the world of Creation and life. And how scientifically you can now explain and understand why and how.

I use this a lot in Space Technology. And even as I said in our team which are working on it, we have built this possibility of the interaction of the, what we call, one Soul with another. We bring another Soul inside, we move it up and down, we put it in different positions, we take it out, and we rotate it in its position 180 degrees, different degrees, to see how it interacts. In a way, we can now replicate the process of nuclear decay, or a splitting of the fields. And it's very interesting how they react.

But the decay, you call it to me as a nuclear physicist and what I understand about the plasma is actually creating a bigger environment, not splitting into new atoms. Because once a material splits in the atom it still it's in an environment. So, but they have interconnection. So now they bring in bigger environment to a bigger spectrums of the fields, and now in that division they can work maybe a hundred years, in time of the man. (2:52) Because then the environment dictates the decay more than the material itself and our scientists have not understood this.

And this is what we used in Fukushima. That's what we do in the confirmation of the application of the Gans's. We create that energy that it stops, creates interaction, connection with nuclear materials that brings that balance. And then they have nothing to give because they're in balance, you get no radiation, no nuclear interaction. It's very simple if you understand it. In the real time .. .

Q: ... Sorry to interrupt you, but we were talking yesterday and the doubt is, that have a connection and when you transmute you have a decay like the neutron become electron and when you die this connection like disappears, because you said it's impossible to return.

K- It doesn't disappear, it doesn't disappear. It, you have to find that, you have to understand where it locates itself and what expansion between the two it creates.

The world of Creation is so big, it doesn't disappear or it doesn't get lost. You have to find out where it is. And what it has interacted with. What new clothes it wears. And it's like, you know the children when they start learning a language or speaking, everything to them is a lost. (2:54) They don't say, "Mommy is gone." They say, "I lost mommy." You cannot lose your mommy, it's gone in the kitchen. And the toy is lost. But it's not lost, it's there in front of... "Oh, I didn't see it, it was lost." It... nothing gets lost, it's instead you have to find out where it lands.

In the coming time, when we develop these technologies, and you understand more, future scientists and a lot of you Knowledge Seekers and your next generation, will be able, like when we get a DNA and say this is connected to you, through the field strength of their Soul, which you created, you're part of it, can locate where your Soul has landed. And like the way dad has gone to New York, and you're going to go and see him in New York, your children, your great-grandchildren, through dimension of the Soul, will come to the point where your Soul is. These are not fairytales. Because if you understood the principle, you can see the reality.

And we can fingerprint it by the field strength and then as the 2 matches, you'll find a space and time. In a further time, when you come to it, you can even from your own Soul, as I said, Souls have different emotions, emotion, you can separate that emotion of the love and send it to that position that the mother or the father Soul feel that love which you have sent from your Soul. This is why you pray for your dead. (2:56) And if you understand this, that second when you pray, you pay attention to them. It's the time, that few millisecond, where you actually connect it, to the Soul. Doesn't matter if you pray for your mother, your Christ, your whatever. And you give that energy to, and you connect with. And that's why some people go to church and in a way pray to release the level of energy that ?? father could match. Not necessarily Christ, somebody else. It could be the Soul next to you, but you received something, but you don't know if it was from the guy next to you, or thousands of kilometers away, or in another galaxy. Then you go in that position.

We have to understand the science. I'm a scientist, I'm not a what you call it, magicians or whatever. It has to, now we understand a bigger picture of the Creation within ??, within the knowledge of the Creation. And no fairytales. As I said last week or the week before Mohammed said, "I will never do any magic's." And it's the same. He couldn't do, show how. We have the knowledge, we can show how that nothing is magic. As I said, this week now we have made the systems of the Soul and our people feel it. As he said, "I put my hand on it and my hair raises." Yes, because now you touch, you touch the feel of the emotion of the love you created, it's your child. And then say, "there is no field between the two." Bring the other one in and see where there is a field. This is the dimension of your plasma. Now you don't need to go further.

But if you make your system more sensitive the one outside, (2:58) you can see how much the heat of the body is. Where is the field's extent? And it's different field from it. Some can connect to the next system, some connects to the strength of your electron. And this is what we have to understand. When we teach about the Soul, when we teach about the central plasma, whatever you call it, has to be scientifically done, delivered, understood and replicated. And this is what we are doing now. For you to understand, you learn about the emotion, you went somewhere, you know, now you can do something. That's what are those of you who went away now we give you a tool, a system that you can expand it further on with.

Any other question?

Q: ... I would like to know if it is possible to have an energy exchange between a being incarnated in physicality and their ancestors who have already left, and if this could somehow be harmful to the Souls?

K- Can you repeat? That question only comes from Brazilians you know that. It is a typical...

R: Well you have been talking about this connection with the ancestors or you know grandfather, great-grandfather who had already passed and so on, (3:00) that we can have I think you had a microsecond exchange, or some sort of energy exchange. But could this be harmful to any of the Souls involved?

K- I know, I understand where this coming from. Maybe I understand it. That they think, oh, we call it "jinx" (black magic), they did this and that, and the Soul is taken over. If you understand the work of a plasma you cannot take from it what it doesn't need, and you cannot force it to somebody else to take. And what the interaction is, is a completion of the, what I call, existence, and what is needed to exist. And if you understand this, then there is no need for interpretation. Does it do this, does it do that, can you take it? And what was the need for it to take it and what's the outcome of it. It is all can be understood.

They say the Soul has been taken over by the devil, and that kind of things or the Soul of the god knows this and that has gone into their skin. This is a very common terminology, and in South America it's very, very strong in these things. And it's in Africa the same. They don't let you to have a piece of the hair, they don't give blood because they think can use their blood to get something into it, and the "jinx" and the rest of it. We have to understand the process of the Creation and then the rest we know which one is the reality, one does apply and why if ?? it's taken place ?? applied. (3:02)

Any other question?

Q: ... I'm joining from the USA. How can I get involved with the Keshe Foundation?

K- It'll take over your life. You're already involved if you're here. It's just that, what your capabilities are, what it can do and how you decide to use it. And what, what capabilities and abilities you have that you can use better to serve the other Souls.

Any other question?

R: I suppose they could start with the Telegram group for, for USA.

K- We have a bunch of, what you call it, people in there who understand more than anybody else sometime, but it's good.

R: It's called the Keshe American Knowledge Team. I don't have the link for that, but if somebody has that handy, could you please post it in the webinar chat here the connecting link for the Keshe American knowledge team.

<< Mr. Keshe tries to find the link for the American Telegram Group >> (3:04)

K- ... I think about there are 32 languages if I remember correctly.

R: Yes, there's quite a few and there is the Keshe One World Family and Keshe English Knowledge Discussion Group, it's called, and so on. As well as the UK, which is different than the English Knowledge Team. So, there's a number of options. But getting in on the USA one's a good start.

Q: ... Are there any plans to officially publish the first three books in Chinese? I think it's better to publish in English, Chinese, bilingual version. You mentioned...

K- The books are translated into Chinese, but we have to structure it to get the permission to publish it in China. (3:06) But I think, yes, the books are translated fully in all three. And there are some illegal versions of it on the Chinese network we've seen it.

R: Okay, he also mentions there's many papers listed at the back of the books such as Universal Order of Creation, Cosmic Rays, correction to the Einstein equation, Death of a Star, Life of ?? a cell, Magnetism, Inter Atomic Fusion, etc. But it says there seems to be no place to buy these. Could you put them all the electronic versions ..

K- There are about 400 papers written and some of them few pages, some of them, half a page or a couple of pages. Because once the knowledge transfer does not matter how long it takes to do it. And some has been published. I've seen that there is work going on to make 4 or 5 of these papers together as a hard copy, to what you call it, to be able to purchase in the next few weeks or months you see it. And it's like the ones which is done by Australian team. The three books about the plasma and Nano coating and agriculture. Now they're in hard copy, they're on the website. You can purchase them. But it is a compilation, they call it, of 3 or 4 of the papers, together as a hard copy, is in the process of getting done. Depends how long it will take them to do it. But you might get some papers released. (3:08) And all the 400 papers plus have already been sealed and signed and they have become the property of the Keshe Foundation. And then one day it will be released. Some of them we have, but all of them are in what you call it, digital form kept. They're all kept in digital form in 2 or 3 hard drives that if one gets missing the other one is there.

Some of these written papers have not reached the maturity of understanding by a lot of people. And if it goes public, they look at this physical dimension and they don't understand the totality of the structure of it. And this is some of the reasons I don't release many papers. Because maybe in 50 years, maybe a hundred years, when man even, at the speed we are teaching matures to understand these papers. The knowledge in these papers. And there are some which very, very, what you call it, in-depth of the knowledge of the Creation. Even some papers cannot even be released because it's beyond understanding. A man would look at it as a dimension of physical dimension and they don't understand any of it. In time Foundation and what I call, the structure we... When it comes to the maturity of understanding, they will be released by them.

Any other question? (3:10)

R: Well, there's always more questions. ... Let's see here. Do you want to wrap it up?

K- That's okay. Let's have a question or two and we go, we just ?? go at 12 o'clock.

Q: ... I've noticed that when we have peace, we don't have the hunger trigger, but if at some point there is some emotional variation in the environment and we let ourselves to be connected to that, we run for food, so, is peace food?

K- I presume when you have food you are peaceful, you don't need it, do you?

R: Yeah, it's kind of the chicken and egg thing, in a way, but...

K- Yeah, when you have enough you don't look for some... It just depends what satisfy you and what is accepted to satisfy you according to yourself, what field strength, and what emotion brings you peace. Or what peace is to you according, something which is peaceful to you could be very interrupted to the others. And is that the real peace? And you have to understand why you go for food. That gives you emotional, or is the false emotion when you go for a food? Because you're already at peaceful, you got nothing else to do, you go something to do, to chew or intake. Or you just create that dimension of I need food to create a mayhem that I might find peace because of it.

Q: ... (3:12) What is the origin of this seed that feeds the emotion of creating and staying in a conflict which somehow can be in the emotion of the STP in all of us?

K- Confirmation of existence. Some people create .. conflicts to confirm their existence. And some are there to say, I exist because of the conflict.

It's very much if you look at the 9 wars of the Crusades over 200 years, for Jerusalem. In the name of ownership, they created war. The 9 wars of the Crusades with the Christians lost most of it. From the first one to the last one, the Pope called the wars, to confirm he has the power to do, no other thing. It could have been done so mutually and every time they ran out of, sold everything, they sat down and signed a 10 or 15 or 20 years peace agreement between the Christians and Muslims. And they call it the Crusades, War of Crusades over 200 years. And one man decided it's time to war, because I have to show I have a power and that was the Pope. Nobody else decided on a Crusades, just one man. And different men who took that chair to show they have a power, and every time they tried, they failed.

If you... why did the conflict? Why did you have to have a conflict to confirm you exist and you have power? (3:14) And I think it's in the third or the fourth Crusades war, the Pope actually went to the French and the British were fighting each others throat, as said listen, you 2 stop fighting and get together go and free Jerusalem from the Muslims and come back and start your wars again. And he actually convinced them to do that. He stopped the war between the French and the British, and that time the Germany which was a bigger what you call, part of the Vatican, or what you call it, the structure of the power, (Holy Roman Empire) and he convinced two or three times different Popes over 200 years of Crusades to start fighting each other in Europe. Go and fight the Muslims, and when you finish you conquer come back and carry on. And that's what they did and created that condition of war at the same time fighting to confirm who's more powerful, but now we have another, let's go and do it. And we come back and we fight afterwards, let's go and fight somebody else, and we still are war at each other. And who create a condition of peace. And then when they couldn't win they came back and they had peace with the Muslims, they came back and they fought with each other again in Europe.

So where does a conflict and the war comes from and who decides? And why do we decide to have a conflict with one person, and not with the other? For the same reason. It's us, it's internally we decide. And that's a conflict between the STP and physicality of the man, to confirm our existence. (3:16)

Have you ever sat on a table, where somebody sits with you or two or three people, they turn around and talk so lovingly to one, and then turn around and they talk with such aggression. In many families we have this. The mother or a father, they're always aggressive to one child and loving to the other one. Because it's weaker, I have to protect. They don't understand, if they love and care, the same for them and understand you two are equal, there is no difference, then you have a peaceful life in the house. They are the cause of the conflict, because they created it under the table in every move. Always jump on this older one, you don't know this. Oh, come on darling, let's do, let's go there. Even the younger one does the same thing as old. And what happened, the younger one, the older one tries to mimic the younger one, because he doesn't get punished, so I don't get punished, I can do the stupid things, ?? he does. We are creator of it.

We create the conflicts by behavior, between the STP and our physical life. And it's a root of a lot of problems, even in governments, at home, between relationships, and brings out what we call, at the end of it, in the family level, jealousies. How can Dad ?? love him more than me, when in fact it's the same love, but he tries to create that conflict, separation between two, and you "feed the fire." This is how a lot of mothers become jealous of their own daughters. Because, the same father which is rough with the mother, (3:18) is so soft and gentle with the daughter, which that mother created, and how come she gets the love and tenderness from me, and I get on the roughness of the ?? life? We choose. And we decide. We choose the conflicts, we create the conflicts, to show we exist.

Any other question?

R: Well, if you keep asking, we'll keep, keep the questions coming. There is...

K- Sometimes we get to the end of it. We said there is no more and we go.

R: Well, we're very close actually. But the questions get stranger as we get to the end point. I've been saving the strange ones to the end.

K- Okay. Strangers we don't know, we say sorry, this session is finished, we don't have time.

Q: ... Hello Mr. Keshe, you talked about understanding through the intellect. Is it the intellect of...?? is it common science? I think it means common sense. Or that of another dimension? Is there guidance from the Soul here?

K- Both ways, both ways, both ways. You have to distinguish between which and how. (3:20) It's a skill and a knowledge we gain.

Any other question?

Q: ... The media always emphasizes events and news where the emotion stimulated is fear, sadness, revolt among others, etc. Am I wrong in thinking that this is an intentional manipulation of the masses?

K- It has been. It has been and it will be used that way, of course. It has been. And depends who's behind it and how they are behind it. We see now, the news is lined up to create that there's going to be a massacre and a big war between two countries in Middle East, and a super power, and the rest of it. And they found a fire to, ?? there is a fire. And when there isn't a fire, "Oh, they made fire, they made me ?? sick, because they did this and that." It's interesting something you bring in that out.

At the moment, we are observers, we are advisors, we are consultants, or whatever you call it, and we are part of the structure of understanding. We've seen the American, three American soldiers being killed in Middle East by whatever means, or whoever is behind it. The Biden administration has decided they're going to take an action against this and they are giving a hint where they're going to take action against it. (3:22) And in the backgrounds they are afraid of what the repercussion will be from such action, because the same structure can create some other problems for them. There is a talk in the backgrounds with the Americans and the other side, okay, you hit us this place and we do a little bit of shouting and then it's gone. That you're happy you, you entertain your public, that you did something for the loss of three lives and then we are all happy and we go and we do what we like. And now there is a discussion, where they're going to hit that it will not escalate to a full war but American public's, public opinion is satisfied. Because the press is pushing for it, people behind it are pushing for it, there is no news of Iranian nuclear bombs and nuclear war, but it's what we saw it's become the new pattern. Go back 3-4 weeks ago, there was a big talk of population escalation of the war between Iran and Pakistan, because they hit each other and then when they actually, they agreed who's going to hit where.

Because the bunch of the Iranian opposition for ?? Baluchestan are sitting in ?? in Pakistan, so they said, "Okay, hit here, you get rid of your enemies." And then there were a bunch of people who are against Pakistan. Says, "Okay, they are here, you hit here." When they hit, they got rid of the both enemies, they agreed. The Iranian foreign minister traveled to Pakistan, shook hand, "Oh, we did a good job. We got... You got rid of your enemies, we got rid of our enemies. And we are both happy in public." (3:24)

This has become a new feature of Iran negotiation business. We hit you to show we have a power. And you have to understand there is a huge power sits within Iran hidden technologies that Americans are aware of they cannot, otherwise before they would have gone and shot everything. Now they're negotiating just to satisfy in press or in public. But who that American did something. We can't lose three soldiers and do nothing. They're negotiating where to hit that there is something to do with the Iranians and the Iranians are moving all the people which are connected to their government out of the position that there are few people,

local might be damaged, but we freed the press in the United States to in a way shut them down, or shut them up.

And we see this now, very, very clearly. There's a huge negotiation going on in the background, where and how, and the way to be like to a surprise, but now you as Knowledge Seekers wait for it and see what comes up next with it, or will it run out of control? But they're negotiating who will hit where, that the American public in press is satisfied. And then the press will make a big hullabaloo of it. Oh the Americans hit and they took the revenge. But in a way, it's pre-agreed now, is what we call modern warfare, because Iran can create a huge damage internationally for the whole American structure, and the people who stand behind Iran, in that war.

So, now these wars, what is "press making," is negotiated, let's have a look what we can do, that we keep them shut up, but we're still working, negotiating and doing things with each other. You watch, watch the thing and see how it goes, and if there is going to be an escalation to the next level of it, if it goes out of control, which at the moment they are trying to maintain. (3:26) And we saw the same thing, if you remember, when the Iranians hit the biggest base in Iraq, in 2020. Trump could not do anything, he went and top generals of Navy, Army and Air Force were standing behind him, he was shaking like a leaf. "We're not going to do anything, we just going to let it go." Because, you know you don't have the technology which Iran possesses. America is in that position today. But the press doesn't tell you that one, but... It's put a pressure on the American administration. Let's do something, but this time it's negotiated where we're going to hit. You watch this, what comes up.

And then you understand how much press is watched by who and what will bring for election for Biden. This is very important, but we'll see the extent of it. How many planes will go, what rockets will hit where. And they already agreed it will be offshore, not on Iran mainland, if they keep to it. And we're going to see something a naval ship, or something will a naval base overhead. The two, it's strange how they call it a war, it's actually negotiating and games, because there are other things, they need to satisfy with each other.

So, who makes the news? And as being part of the, or inside the structure, we see it how it's done. It's not anymore, we can tell, "Oh, it's ... you organize something, we show." And even look at the press, so when start the war between Iran and Pakistan, they were waiting (for it ?? out). It was all pre-arranged and pre-agreed. And look, 2 days after, they literally wiped out each other's enemy, in each other and they gave the address of the places where to hit in a way. (3:28) And they went back. They went to each other and they had their lunch. Iran farmers has a beautiful lunch in Pakistan and he came home and it stopped. But it was something to get rid of opposition, both sides. And they knew where they are, they were given the address, they hit it. "Oh Iran hit the missile there." Everything was agreed beforehand. And it's now, it's a new policy. But they don't tell you that in the press.

I'm sitting here watching which place and what is agreed to be the Iranian interest, prearranged, pre-agreed. Most of our experts and everything else has been pulled out that there's not a, what you call, it's just a collateral damage. Two American have done something. And they want more than three people that we can sell, we can kill more than three people. I don't know how many dummies they bring to put in there, but we all hear a few number, more than three are killed, and they've satisfied the American ?? eager for killing. Watch the space, it's very nice how news will be developed, and then you understand how they control.

Any other question? And shall we call it the day?

Q: ... What is the most accurate textbook on the life of Jesus? One that would, one would study if one was to write a novel based on his life.

K- None... Because this is how it is. It's written three, four hundred years after him, (3:30) by word of mouth. And a lot of connection of histories of the area, what to fit him to be and what were the what you call, local heroes that people could connect and becomes him. When you read about the life Moses or Jesus, Muhammad less off, because the Koran and whatever had been ?? it says were written down about 40 years, is the first mouth, what I call, changes. But (with Jesus it's) three, four hundred years down the line. Or in case of Moses, nearly 2,000 years down the line. Nobody knows what is the truth. And so, depends which historian was it in favor of, and what was there.

There is a lot of new, what you call it, new I mean, last 50 years, 100 years, which books written by historians, who actually went and analyzed the old, what you call it, manuscripts, or stone writings, or whatever. Which has clarified a lot for the others. But places like Vatican and the, what you call, the Jewish centers and Islamic centers, they don't let it come out so much, because then it damages their reputation and what their control is.

But in essence, if you want to know about the truth about Christ, go into the history books of the time. Not the, what you call, the Bible or the rest, because it's all made up to fit. Even when you were talking about Noah last week or the week before, I said it was a story of fisherman. (3:32) If you go back, Noah was made out of the old history of a local hero of that time. And they changed the name to Noah. Because he wrote what you call it, with him and then because somebody put the story in Torah and then somebody confirmed it in 300 years in Bible, which was written 800 years after the Torah. And then Islam had to do something with it because Muhammad says he had a say in it, which was written again another 200 years 300 later. All confirmation are confirmed, they are real and it exists.

There's a lot of story books, but like me, if you are that way inclined, find the history book of the time, not the writing of 2 or 300. Then you see the real man, you see the real story, real what happened. Historically is that if is not in historical books at least in different cultures and there are historians who were actually written, ?? going through different cultures of the time, it doesn't exist. Then suddenly appears in Torah, because it's there. It's reality. And this is where the time is. Read the history books you know about the man. Who read the holy books, you find about the fantasy of those who have written it.

And this is the day, this is a big, big difference. Very big difference. And they fitted in it, because it would fit into the history of the time. (3:34) It doesn't make sense to the today's time and place. And not with our present culture. And the worst one I think is written into, because it's done in the time of near time of is in what we hear in ?? Hadiz and Koran. How a man who was supposed to be man of God orders killings of hundreds, and only men because he loved women. And even till last century it was a tradition, because he did it. In all the wars, where Muslims or Europeans were involved, always men got killed, not the women. Because women's are a product of the pleasure and everything, slavery and money. And then you see the truth.

A man of God should not kill. That's how ?? named one name. It's not the characteristics of the Creator. Using the name of God to create destruction that's the characteristics and behavior of the man, nothing to do with the Creator. And it should not come into the books of religions, because it's not the religion. This is the same with Moses, same with Christ, the same with (King) David is the same with Mohammed and the rest. If they had the money to master an army be it physical or the Soul and not to abuse it they've done it.

Christ was good at it. He created the army of women because he enjoyed them. Muhammad was the same. If you read the story of the ?? and the other wars, Muhammad when he killed the men, ordered the men... When... If you read the most famous war, (3:36) which is in Koran, which 800 men were beheaded in one day. When they got the Jews, supposedly, he said, "Separate the men from the women." And for one day, this man just beheading men, in one corner of the same city, same place. While their children and their wives were pulled away from the men. Then the women and the children who were not adult yet, were taken as slaves and part of the harem. And by the Islamic law, 20% belongs to the religion. So Muhammad took the share of women and the children, which was his as we call slaves, and he selled (sold) them to market. This is in Koran, it's not my saying. Read the Koran history of the Islam. He sent these women slaves to be sold in another city that the money from it could allow them to get horses and swords to strengthen his army for the next war. And the other children ?? who were given to the soldiers according if ?? they were horse riders or the walkers soldiers, how many they took. And most of the women became what you call, slaves and most of them was ?? time at war they became what you call it, the wives and everything else. And usually in these tribes the most beautiful women went to the top leaders. And this is how in many wars Muhammad chose the women out of the tribes they won. It's the same leaders with the other leaders.

And so many wars, you know, Koran is one of the nearest thing, because some of the people who were involved in writing it, were actually at the time in it, so they could tell the truth. With Christianity we don't have no trace. It's all "Chinese whisper." (3:38) And whatever be fitted in the local area, in the history of the hero, he becomes that hero. They just change the name to Christ or to Moses.

Go read the story of the history of the time and the beliefs and the religions and then you see most of the name of the prophets is literally from the gods statues. It is not the real name of the man. And they add to it. Read (local) history, not the religion. And then come and read the religion books, see, "Oh, this name is just changed to this, this name has changed to this, this history is changed to this."

The boat of Noah is one of the clear examples of it. Actually, the story goes two, three hundred or a thousand years before even Noah. And they just changed the name of it. (This is Gilgamesh of Sumerian). They've done a lot with Moses. History of the area when they wrote, 2 Jewish guys wrote the first Torah at the time of Kourosh (Cyrus the Great) they added what was historic, because people could accept that's a religion because they were in ?? it ?? and it wasn't tarnished.

And then all of it got made up. Then read the history and then see what's the fact in there in the Holy Books, and then you understand that a lot of this is made up to suit. It's, have no reality. And then read what Christ did and how, what life he lived. Moses had his army of soldiers. Muhammad had an army of soldiers. Christ had an army of soldiers, but the Christ himself, his army were all women. Because he loved women. And he wasn't a man of conflict. (3:40) He never made army of men to fight. He always enjoyed army of women to enjoy. And you see the man who used his name and his things became Crusaders and rest of it, and we still see today.

If the Christians live the life of Christ, planet Earth would have been heaven, both for men and women. Because he loved the pleasures of physical life. And it's in the historical books. Read the Jewish historians who wrote about this man called Christ and you see how far is from reality what you ?? read.

As I said one of the biggest problem with the Holy Books say it's especially going back to Old Testaments and the New Testaments and then with Koran, because they had to follow each other. If you call the God so

kind, if you call the Creator so beautiful and everything else we associate with him, how can such a beautiful generous Creator, order "an eye for an eye"? If it was the truth. If you took somebody's eye by accident, or in a war, you become his eye. We don't take your eye that we have 2 blind men. Then no man will take another man's eye, because he has to spend the rest of his life being his eyes. That's the true rule, this is the true Creator, not the man who changed it.

And one to follow has followed the same name. If the books of the Holy Books are what they are from the Creator, this is the rule. (3:42) Not "eye for an eye." If you take some man's eyes, you have to become his eyes. So you have a burden of life, a blind man for you to carry for rest of your life. No one will do that. So no one will blind no man. This is the rule of the Creator, not what they made up to be in the Holy Books and they do.

If you take somebody's life, you have become responsible for the life of those he left behind. And then you see if he can carry two families and become a wife of a husband of a man at the age of 20 when she is 50 years old with 10 children. No man will take a life. They changed to suit. This is the holy ?? and truth, not eye for an eye. It's just from a weak man, because then he could change blood with blood. Read the history books and not the Holy Books, and then you'll understand the truth about what happened, where they came from, who's their real name and the rest of it.

Thank you very much for today. I still invite you all to join us in Sanya, because I think it'll be a life changer for a lot of you. In understanding new technologies, new change in the life of man. Thank you very much for today, and see you next week.

523 KSW Feb 01, 2024

524th Knowledge Seekers Workshop February 8, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Breakthrough in Cosmic Ray (CR) continuous production - endless supply; System running testing KS in this KSW - unknown; Create pure plasma environment; Proven plasma is DC - matter state switch to AC; Create wave on top DC - travel Cosmos; New Cycle open Arizona - 100 researchers - of new CR technology - financed by Markray; 3 Centers AZ - Iran - China - fields cover planet; Join research 24 hour work; Show CR in Sanya; Because Iran has achieved multiple nuclear warhead T at supersonic - no one can match - biggest fear - only for deterrent - peace to Middle East; NASA obsolete; Americans prearranged bombing for elections; All T to China one-sided - now share with world 3 Centers; Fulfill in 2024; Systems can control Soul - make P follow - Soul control P; Pocket size transmutation device; Fish absorbing energy - transmute; Zebra Fish CR can reproduce heart - use for tests; Scalar Waves - concepts; Connect systems together create environment; CR different than Cosmic radiation - bring change; CR create organs; B12 radiation source U; Fish came back - dead; KS panicked - Soul trusted; Mitra & daughter; Virus like music; Plasmatic computers - brain & Soul - transition; Put system in body as Chip - transmute; Musk copies KF T - works with Israel

ENGLISH TRANSCRIPTION

(:21)

K- Yes. Good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual we welcome you back, (:22) and as usual as many of you been around the Keshe Foundation, February is a month when we bring in a new dimensions. Somehow, February always is a time for change and development and bigger steps which come in.

As you heard in the intro and what we've been saying for past few weeks, is that we have managed to reach a point to produce fields, magnetic (M) fields, and fields exactly the way that it's created in the Universe (U). As you heard in the Intro, we copied the donkey and we made the car with four legs, called it, a car with four wheels, and then the rocket, we even copied the birds. Now we have reached a point, we have managed to understand, partially, and replicate the production of Cosmic Rays (CR), exactly the way it's done in the Universe. We produce it in a manner that it is continuous, does not depend on a source, and in a way cannot finish. As we are at the early stages of this technology development, this will bring a lot of changes. And we have done and we are doing what we can to expand it more. And with this process, we have opened a new cycle of knowledge and technology. We are testing it every day, even some of you in this session today, (:24) without knowing it, we are doing the monitoring, we are watching what's happening, how you're interacting with us and in general, Space Technology has moved into a new dimension (D).

We know this, we work for this for nearly a year. Systems were put in position months ago, tested. Last, what we call, session with the Knowledge Seekers (KS), we put you on that system and it'll be again this system coming up. We've tested with individuals, we tested with group of three or four people, and to check, to see we are correct, how far everything is, and it proves a lot of things.

For example, we have managed to create an environment where, which is pure plasma. CERN, Russians, Americans, Chinese, spend billions of dollars to create a plasma environment, to accelerate and the rest. We have managed to create a plasma very much like Cosmos. And, in that process, where it's a natural and is done fundamentally by understanding, creation of the, what we call, Cosmic Rays. What does this mean? How do we know? How do we... How have we achieved this? In the structure we have developed, and we can change it to any size we like, from a small table top to hundreds of meters diameters, is that we measure the plasma fields within the structure, (:26) outside the structure and between structures.

As we always said to you, that now scientifically we can prove it, it's a breakthrough in the world of science, that the plasma is a DC. For example, if you have go back on the teachings of past decade, I always explain, plasma is a DC. AC comes when it comes into matter state. And, now with the technology (T), with the plasma environment, we have developed in laboratories, we measure the plasma, centimeters, half a meter, whatever, and a meter and two meters, to confirm that the plasma is DC.

So our sensors show, when we are within the system, the environment, we have a DC environment, which means it's a total plasma, there is no matter state. And this is where the Cosmic Rays come in. This is how Cosmic Rays travel the span of Universe, on a DC. In a way, it's a DC of the plasma. Once they interact,

once they come in touch with another field, with another matter, then in interaction and penetration of the fields of the matter state on interaction, they create, what we call, additional wave on top of DC. So, we have to watch both DC and AC. In a way, DC we look at the cosmic, AC we look at what matter state comes into it. This will change the world of Space Technology. And it has changed. (:28) Now we can measure where the parameters of a reactor or a spaceship is, without actually physically having it. We have placed sensors outside and inside. We can measure fields, we can measure how much we are behind our system. And where is the boundary, where is the wall of the system.

For this reason, the breakthrough which the work of the Keshe Foundation to become public, has been for past 30, 40 years, is completed. As many of you know, we always share technology in a way with all of you. And, in doing what we are doing in expanding the science and technology of the Space, and understanding it. As you know, in 2013 we announced the establishment of Knowledge Seekers, that we accepted about 8 Knowledge Seekers to come to the Cinzano in Italy, and we started the first cycle, and with them, working with them, we achieved 129, and many other things that we received the approval of, confirmed a lot of technologies, and we went to the next step.

Now we have entered a new phase, as we have announced before, we have signed agreements with the Chinese government, in a very large scale. And I always have a concern to put all technology in the hand of One Nation. And we invited the Chinese to open a secondary system, what we call, scientific center, for development of technology in Sanya. And, today we announce a breakthrough, a what we call, (:30) a next step in Keshe Foundation work, that brings balance into the power of sharing knowledge, and it does not become exclusivity.

I have spoken with John in Arizona, and we have properties, we have all the structures set. Keshe Foundation announces today, the establishment of the second cycle of Knowledge Seekers to join the Keshe Foundation in United State, in Arizona. You come in for a three year research development. There is no 9 to 5 job, it's a 24 hour job. And, the latest technology which now we have achieved, will become open to operate, to test, to develop, and a center outside China, in United States, will be established. You can join us as a student, the same as the one he did in 2013, we started with you in 2014, and it'll be a combination of 90% research and 10% teaching, if that. You become researchers into the new Space Technology. The knowledge what is gained in China, and secondly we open another section, as we promised in city of Isfahan in Iran, a three point teaching centers of the Keshe Foundation will complete.

We will start this training, or this what we call, research development, sometime around June, July of this year. We only accept up to a hundred scientists as a base core to start with. Keshe Foundation website will announce the... how you can register, the fee for it to be, you pay to become a researcher, (:32) and you join us in developing the Space Technology through transmutation and transfer, and what we call, spaceship. You choose.

The latest knowledge, what is gained, will be in the hand of the, what we call, the Research Centers. This allows us to develop a parallel technologies, that is open to all man at the same time. We have 32 Knowledge Seeker languages. We ask you from each language, up to three people, you can appoint, you can pay to be, or collectively each group, or each what we call, language, pays for one Knowledge Seeker, or two or three Knowledge Seekers, and if you achieve your three, you take a second nation as your child, to look after, and support their scientists to be in the center, in Arizona. We do not need to set up things and use in Arizona, everything is in Arizona. Keshe Foundation manufacturing and Wellness Center is already established and you know the center. So, we are going directly into process of production, testing and evaluating. And we

have called on American government to join us in this new Space Technology. The same as we invited the Chinese. We have invited the Iranians to join us in the same way.

In this way, we break the knowledge through, all in one go. We have reached the point, in the transmutation, and what we call, transfer, and those of you who want to still make the UFOs, to be completed, in collaboration with other Knowledge Seekers, scientists, to break through and bring the change. (:34) We stay away from being connected, but we collaborate with government. For this reason, Keshe Foundation, in its structure in United States, will bring in the support of Markray to be financed, and to be structured for building of the Space Centers. In the next few weeks, we will support Markray to become the backers, financiers of the, what we call, our program in United State and in Iran.

We open our doors to both governments, our hands, and this is done to one reason, which I explained last week, but many of you never understood. This is in a way a handshake for peace between the nations. And we explained how things was going to go, and you saw it how it happened on Saturday, exactly to what we said. And we announced a new development in that cycle, which pushes now the nations to move this way.

So, those of you who want to be Knowledge Seekers, Researchers in the Arizona Center, you can register and we close this registration very quick, because a hundred can be reached very quickly from other Universities, scientists and Space Centers. And we would like Knowledge Seekers to be part of it, because you brought us here, you supported us to be here. The Arizona Center, which is privately owned between John and me, will become part of the operation of the Spaceship Institute, and will go to the market with Markray, to support the building of the first Space Center without fuel, (:36) in United States, and in city of Isfahan, and our signed agreement cooperation with the Chinese government.

I will choose those individuals who join me in the first phase of what we call, Arizona. Europe is too small, does not have the capability and capacity to support such a structure for its future development. But all the nations can be in. German group can, if you want to register individuals to be in, you can. If you want to appoint three Germans to be part of this development and support them for three years to live in the US and pay for their fees, all we can be done, doesn't matter which language you are from. The same with what we call, the Arab nations, with the, what, English, French and the rest.

So, we bring in the sharing of the new technology. We expect you to achieve full transmutation by the end of the year. The group which comes to United States will be backed to the hilt, to make sure, at the same time as with, what you call, Chinese and the Iranians, the three teams work together, sharing technology and knowledge, with the support of the Keshe Foundation in Austria, which the main backing of the technology development will come. In this process, we, by opening the Arizona Research Center, we break a lot of new conditions. This process, within months of his operation and showing the technology, in achieving, fueling without burning, creating Magnetic fields, will make the operation of NASA, Russian Space Agencies, and Iran, and the Chinese obsolete. It'll open a new door. (:38) We will share with all three centers, equal knowledge, and equal, what we call, technology.

It has to be said, why we did this? Why we brought this forward? As I told you last week, if you listened to the teaching, that the... what you saw happen on Saturday (American bombing of Iran), it was pre-agreed, pre-arranged, for what we call, American public, to quiet down for the elections. And as you've seen, heavy bombardment, delivery agreed away from the Iranian border, far away, but in between Syria and wherever, that does not give any indication of any, what we call, war with Iran. You have to understand, a powerful nation like America, does not do such a thing. And if you notice, hardly any soldiers, any military, anyone

who was involved, has been killed. Collateral damage, a few, what we call, civilians, were caught in this, to keep the American public silent.

You have to understand why a nation like United States, can do the same thing on the Iran border with Iraq, or other positions around Iran. But it was chosen far distance for public relations. The reason for this is very simple, that this news will break many, many and create a lot of problems for many nations, but solves a lot of problems. And this shows why we made the announcement of opening the, what we call, Arizona Center. Iran has achieved nuclear weapon technology, with multiple warheads. (:40) And nor Americans, nor the Israelis, no one in the world, can match the development of the new nuclear warheads. As you understand, Iran achieved hypersonic, which is Mach 25 plus. And the Israelis and Americans don't have such a technology. Israelis claim they have reached detection of Mach 21. You still have to match up another 4 to 6 Mach. Which means, everywhere in Middle East is vulnerable. Americans are aware of it, Israelis are aware of it. And, with sharing the knowledge, the way the Keshe Foundation does, we try to bring a control sharing of the new technology, that the wars stop.

Iran, in the coming weeks, will announce the, what we call, achievement in nuclear weapon technology. This was the biggest nightmare of the world to hear. But, as I always give you news in advance of what is to come, you will hear soon, Iran has achieved nuclear weapon. The biggest thing Americans and Israelis and the rest were trying to stop. But, the technology will not be used for warfare, it is a deterrent. And Iran with achieving hypersonic, has no nation at this moment of time to stop (them) using it. We wait for what we call, the opening of the Arizona and bringing the technology forward that all these, what we call, "childish play" of using nuclear to become obsolete and in all nations sharing it, will become available to all of us. (:42)

You will hear, as I told you, explained to you last week, places were chosen and we've seen it. Americans never hit 100 missiles to no injuries, no damage, and collateral. Now you understand how precise our information has been and how correct we were as we are aware of all the negotiations. American government and Israeli government have been informed that Iran had achieved the ultimate goal of nuclear weapon technology. But it will stay as deterrent and would not be used. We have this guarantee from Iranian government. This was the biggest unbalance in Middle East, where the Israelis, with the threat of nuclear, always tilted things toward themselves, and they had the back of the Americans. Now, with Iran becoming nuclear weapon technology balance, this brings condition of peace. And this is the reason the Americans stayed away from Iranian border, because if they would have done, they've been told it'll be used. We heard the same thing coming out of Kremlin in past few days. We will see containment of war, and soon the situation in Gaza with the pressures which are coming through, negotiation and collaboration with Iran, Qatar, and everything else, and everybody else, and Chinese in the background, an end to the Gaza situation of today, and we'll see reconstruction next two, three months.

So, in a way, as a gift, as a response to what happened in the past week, in literally being able to negotiate peace, but at the same time keeping the public in the United States happy, Keshe Foundation responds with opening of the research center in Arizona and in Isfahan. (:44) We chose Isfahan for its closeness to what we call, Iran Nuclear Center, as Natanz is not very far, and can support the Space development in the real plasma conditions. We'll change the use of the nuclear perforation to nuclear plasma Space Technology, using the Iranian, American, and the Chinese.

For those of you who are waiting to come to Sanya, we will show this new technology in Sanya. As we have already come to an agreement with the Chinese. You will see the first, what we call, Cosmic Ray Universal System for flight, and for transmutation in Sanya. A number of you can register while you are there, to sit

with a system, which connects you to Cosmic Rays and Cosmic flights and transmutation system. We are flying these systems to Sanya in, most probably, as most of you know, in the past few months, we have already shipped huge amounts of technology to China for this purpose. A similar system will be delivered to Arizona, and a similar system will be delivered to Isfahan, once we come to an agreement with the Iranian government of the position of the research center.

Those of you who will join us as a new cycle of researchers and development team in what we call, Arizona, be prepared to share the technology with your nation and your scientists. We are not bringing you to Arizona that you become silent. (:46) We bring you to Arizona to teach, while you're learning. What is developed, has to be taught. The same as we did in the Cinzano. We put the test live on, that everybody was hand ?? off (hands-on). So, what we promised, we'll fulfill at this part. And, as I said, if the Americans keep to the promise given to the Iranian government in the background that they stay away from touching Iran. And the Israelis now know they're not the only nuclear weapon technology. And there is much more powerful warheads ahead, which can wipe out the whole state of Israel in one button. We have the assurances from Iran that will not be done. And Iran, all agreements have been kept up to now.

Now you understand what the position is, and in a way, this is a reward for "correct conduct" by the American government. Join us, those of you as Knowledge Seekers who want to be part of it. A fee has been agreed in the background for the 100 scientists. You pay to join us, or as a group, as nations, you're paying to join us in Arizona. As you know, the fee in 2013 was at 20,000 euro per year. And this we'll try to keep the same after 10 years for the same. Something around 20,000 - 25,000 per year, it'll be a cost to be. Governments want to appoint, pay the same. And for building and construction of the new Space Center, we will use our, what we call, connections and the structure we have set up in Markray. The Markray becomes, (:48) in a collateral agreement which is done before scientific development, the research backers, the backers of the development of new Space Technology in United States.

We have to understand that once we start backing, technologically, development in China, in Isfahan, and in Arizona, you as Knowledge Seekers are all be involved in it. There is no sideliners. There is nobody sitting there, "I'm just a Knowledge Seeker." You all are in it, as we say in English, "to the hill". You have to be able, we do not look, if you're a plumber, if you're an engineer, if you're a doctor, you bring your expertise, I'm a medical doctor, I want to be on the wellness side, you'll be appointed, we'll be shown how to. I'm in agriculture, I want to develop the agriculture side, you'll be appointed too. We already have started seed testing in the new systems, in Linz. So, it's part of the same.

We have developed the production of the protein within the system. We see how it's done. Now we see different, what we call, combination structure of protein, in the, what we call, the plasma system, and the conversion. We will bring in, now what we call, transmutation systems into operation, that it can be done, and we have our first two volunteers to go in the Space travel. The tests, every third week of the month, will carry on, and you have to complete, we do not look at race, religion, color, creed, nationality, language. (:50) To us in Keshe Foundation are all the same. And it's your responsibility to join us, in fulltime research work in Arizona.

We need this. In a way, if you look at it, we had to do this. That giving all technology to Chinese would have been one sided. Allowing Iran to become fully developed in that will be another one sided. This way it brings a balance, where we see and the choice of Arizona for us, is the best choice. And I thank John for all his support over the past years. And as a head of Markray, CEO, he's there to see the technology development in what we call, United States. We will work redundancy to open, to start operation of the development in

United States by sometime June, July of this year. You go to the Keshe Foundation website, in next few days, the links for registration will be put in. We will ask some questions, you pay your fee, and we announce to you when you can enter United States to start the program, and how we will develop this one.

Governments in Europe and across the world will be informed of the development and opening of the center in Arizona and in Isfahan. It'll take us a few more weeks to, what we call, put all the "dots and cross all the Ts," And we start the process of the transmutation, you being part of it, you are developing it as Knowledge Seekers. (:52) In a way, we have achieved the point of research and development, that now we can share with the world and change on every aspect.

I always had a big, heavy load on my heart and my head, for past few months, since we signed the agreement with the Chinese, that this is becoming too one sided. I had a choice to go with the American military and government and become a warfare, Cold War structure, or share technology the correct way, that allows everyone to have access, where we have received the financial support of the Chinese. If the American government would like to support the Keshe Foundation, we have no problem, the same as the Iranians, and the rest of the other nation. Otherwise, we support ourselves through the structure we set up through Markray, to finance as a Space Technology Development Organization.

You will hear in next few weeks, as we develop, and our discussion with the Iranians, the Americans, and the Chinese, will bring to a conclusion, and the sharing of the technology. We would not have taken this step, if we have not achieved the creation of Cosmic Rays, that we can show to every nation. We don't play games, and those of you who come to Sanya, for the first time you will see Cosmic Rays, what we call, plasma creation technology, without fuel.

Now it's for Knowledge Seekers and Research Centers, how to use this plasma, for what purpose, and the way it's going to be used. (:54) This is the change and a breakthrough in science, and it's not happened past few days. You were in it, in December 22nd, and in the... what we call, following tests and other tests we've done, you've all been part of it. We tested you, as we said, Keshe Foundation is built on the back of the Knowledge Seekers. And you've been there to support us, and we still rely on you to support us, that we bring that change.

As I said, Americans kept their word in the agreement, not to touch Iran in any shape or form. And as we had 72 hour notice, all the centers in what we call, Syrian border were emptied, that there is no damage except collateral and centers. And Iranians will do the same. There'll be no more attacks on the Americans, or American bases in the control of the Iranian government. Other groups who are radicals, they'll be dealt with accordingly in the future.

In a way, by Iran becoming a nuclear nation, in full capability from what we call, mining to delivery of the Space Technology, nuclear materials to Keshe Foundation in the coming months, we control everything the same in the United States and in China. European nations are too weak to be involved in this, and they are too much in debts to do things. So we consider the Europeans and Americans as one group, the Iran and what we call, Middle East as one group, and the Chinese and the Far East as one group, and the three groups through Keshe Foundation, (:56) as we do not need to get licenses and certificates to what we call, transfer technology from one nation, or one group to another, as it all owned by us, it has made it possible for us to bring this game about.

I invite you Knowledge Seekers who've been waiting for bringing peace and Technology, using what we call, the "Ultimate fields of the Universe," to join us in Arizona. In due course, Iranian Keshe Foundation will announce their work, directly, we accept scientists from Arab nations, even the Israelis to come to Iran, and the rest, to work as one team, to bring a new Space Technology forward.

In a way, we fulfill the promise in 2024. And, as it says, it is "8," and it's a time of prosperity and good luck. And in so many ways, we complete this process, with what we know and what we share. Join us in Sanya and see the first Plasma Unit and enjoy being in it. The Keshe Foundation in China, the group will announce that a hundred people during the, what we call, the course of the session of the 4 days in Sanya, will be, will have a chance to sit in the systems. You have to register for it, a time will be allocated for you to be able to join the system, to sit and two hour session is given to each person. We'll bring the system with us and we show it's power, it's technology in Sanya, where the system most probably will remain behind for establishing the Chinese Space Center. (:58) The first leg of the work starts, then with Arizona, then with Iran.

Now you understand, we have reached the point of completion, what we came here, at least the beginning of the completion, and you as Knowledge Seekers are part of it. Join us in Arizona. I'll be traveling between Iran, United States, and China on frequent basis, to make sure the technology is shared equally. Lines will be set up, that the Knowledge Seekers in China, the minute they discover something or reach a point, can share with United States Knowledge Seekers and those in Isfahan. The same with the, what we call, Arizona group. You'll work on open platform and everything reached, will be shared directly between the three centers on daily basis. Big achievements will be shared instantaneously. Tests will be done commonly between the three points, that we do not create a parity, or one nation ahead of the other. We invite the scientists from Israel to join us in Tehran. The same as we invite the scientists from Saudi and Middle East, from Indians to Pakistan and the rest. Russian will be covered by the Iranian center. And in that process, we'll bring in a balance of what we call power. That the three systems will give us the point of equality, and takes what we call, "race out of the wars."

In the process of the Arizona, (1:00) you need to understand, in the process of Tehran you need to understand, in the process of China you need to understand, there is no nationalism. You work as Keshe Foundation, you work for peace and development of technology for Space. Most of you who work in these centers will travel from one center to another, to take your expertise, to learn from the experts, and work as one. But you have a base, center, those of you are in Arizona, those of you are in Iran, those of you are in China.

China was the first nation who signed agreement with us, for the new Space Technology. So, we showed the technology first, in Sanya. You will see some amazing technologies. And the technology, which stays with Chinese government and military when we leave China. Then it's the responsibility of the Iranian and the Americans to speed up the operation of ours in their country, that they are in parallel leg with the Chinese.

Race for peace starts with the race in technology development. And, it has taken me 40 years to reach to this point. And, you Knowledge Seekers have been on the trip with me for 20 years. Those of you who want to join, what I call, first three years, and most probably you'll stay for rest of your life with these research centers, sign in and join in Arizona. We will set up a structure for your arrival and the rest. (1:02) And from the first week you arrive, first couple of weeks, you go directly into research. We transfer technology to John in Arizona and the Keshe Foundation team in US, that once you arrive, you don't waste time. We bring you up to date. And then you start your research and development.

I hope as Knowledge Seekers, we start the first process and we carry on. In talking with the other nations, we bring the others in. We set up the course and the government will follow the course. It's not anymore 'Gans making' and the other things, its development of the new Space Technology using magnetic fields. And plasmatic magnetic field, and Cosmic Rays, which this knowledge has not been shared with anyone up to now, that we tested in Austria, that we were sure, 100% sure, that we can confirm the production of the plasma, scientifically, and we have the data and all the confirmation of it. And now we are testing.

We have reached, we think, a transmutation of a fish, but we are not sure, so we are testing to go further to confirm it again. And we are in that process, and once we can reconfirm that we have managed to do the first transmutation, the first one was a dog which went to the Space with the Russians, this time it'll be Austrian fish. And, if we can repeat it, to replicate it again and understand it fully, we'll share it with you. And now we are in our process in our labs, in Austria. (1:04)

You got to understand, we promised to bring change through technology, and we are doing it fair-handedly, equally. We had to get the backing of a major nation to start it, and we received and signed agreements with the Chinese military and civilians. We promised we'll never leave Iran out of the equation, and Iran stays as part of the equation, equal in science and technology, that we don't create 'Cold War,' two nations. Iran and the, what we call, Middle Eastern group, will be that balancing point. Where leverage of technology being able and being available to, what we call, growing up nations, advancing nations, allows and brings a balance between what you call, superpowers. This way all nations have access, and does not become a race, it becomes collaboration.

Production of the Cosmic Rays, as I've been explaining to you, understanding a central point of energy of the man, we call it the Soul, which has been with you for two or three years, all has been part of this development. John will head the American operation in research and development. And other scientists which we'll bring in, I'm sure we'll receive scientists from all over the world in different centers, and the beauty of it is, nobody will aspire on the others, because everybody knows the technology, and most probably all nations have a connection, link into all developments, and how they develop it between each other.

In a way, we have set the promise of all the Holy Books. (1:06) All man will be equal, and all man will have access to everything which is in the Universe freely, food, energy, medicine, transportation, transmutation, understanding of the science of Creation. And, I have asked, and this will stay with us, our IT section will make sure, most of the laboratories in all three centers will be live watched by the others, that you can see they make a mistake, you can use their knowledge, and the communication will be as 'One Nation,' there is no race, it's collaboration, between the American center, Chinese center, and center in Isfahan.

In so many ways, we go back to the original operation of the Keshe Foundation, and this time as we did in 2013 - 14, new Knowledge Seekers broke the 129 Tesla, this time you'll break the Space Technology. I'm sure many of you would like to be part of this. Once we open the channels in next few days on the Keshe Foundation, what we call, store, register, sign, and we let you know if you're accepted or not. And as I said, nation languages, which is 32 of you, if you don't have one, collaborate with each other, finance, whatever, per month, to get somebody there for one year, or people who can, ?? don't need another part of the support to do it.

We try to keep out of the hand of the governments to play the game, as we've done with the Chinese. With Chinese we have an open collaboration, (1:08) it is in our structure of the agreement, that other nations are allowed to be. As when I was negotiating, I knew day like this will come. And as we have part of agreement, we'll stay the same. I'm looking forward, before end of this year, when the American scientists will travel to Iran, as the Keshe Foundation Plasma Technologies, to develop and share the technology of the Space with the Iranians and scientists from Russia and China. We are not in a talk anymore, we are in action.

And those of you who've been asking me, "Can you show something in Sanya where a lot of people..." You will see a system in Sanya you could never imagine could exist. And those of you who want to be part of it, you thought you tested it in Manchester and London, you'll go in a system directly, and you can feel, live Cosmic Rays, and understand how you transmute. We'll show many, many other things, step by step in Sanya. And, as I said, only 100 people will allow to use the system during the 4 days. You have to register for it. And, you don't need to pay for it, it's just that you want to register for two hour session to be in the system. And once we reach that 200 we stop. Then you can test it, you can become part of it, and then you understand the future of mankind.

I hope I gave you what I call, the 'good news' of every February which comes up. And now you understand why we did the Soul teaching, why we did the Cosmic Rays, why we did the Gans's and everything else. And we have reached that pivotal point. (1:10) I'll try to be in all three centers as much as possible, once they start going, that the knowledge is first hand across to every Knowledge Seekers in every nation and government. Now upcoming meetings with the Iranians and Americans. I'm sure we'll have number of meetings with the Chinese when we are in Beijing in March. We'll come to this point too. In a way, they finance each other to become better with each other. And this is what's the whole aim of the agreeing, the terms with the Chinese.

I'm sure I will have a tougher negotiation with the Iranians because they don't trust anyone, except themselves, and don't even trust themselves in it. And I'm sure the Americans who will embrace it, because they want to match the Chinese and the Russians, then we get a peace race going, because nobody can come with advanced technology than the Creator. They find out there's something always more advanced (than) they have. So we collaborate, then we make One Nation out of this planet in research and development.

In a way, I thank you Knowledge Seekers for supporting us so relentlessly for past years. And now I have given you what you've been asking for and what we have to achieve. And the rest is in your hand. You saw me, I put 4 years of my life in the Cinzano in Italy, to make sure Knowledge Seekers understand the basics, even though you never understood. You always went after the MaGrav system, and now you understand how important the MaGrav system has been, (1:12) in the Space Technology, once you get to Arizona. John has plenty of them for you waiting. And then you'll see what you did not understand, and where you missed the knowledge and the technology. We go for a break and when we come back we answer to all your questions. Rick, if you like to take us for a break.

>> **BREAK** >> 524 KSW February 08, 2024 (1:20).

K- How do people connect to Vimeo?

R: We had a link there earlier in the ... I posted to the chat. There's one general link to the site, let me get that lined up here.

K- Oh, that one. Can you post that to my private chat, private, what you call it?

R: Sure.

K- ... Vimeo is where the Keshe Foundation TV sessions are held as well. Now you have both, you can listen to the Keshe Foundation TV recordings. And we move from the Keshe Foundation Knowledge Seekers together.

R: Okay, I just... Reposted the main Vimeo link, so I'll put that to your site, is your place as well there Mr. Keshe. That's the one that's to the main site and people can access the other parts depending if they would like to look at the workshops that are already posted and recorded or to look at the live streaming.

K- Yes, it is. The question, is this link static. This link is always there. We've been on this link for past 3-4 years, (1:22) since we started the KF TV, with Vimeo. Now that Vimeo has bought the Livestream, we have brought the two together in one site. And from now on, they all can be, what you call it, on the same license. So the teaching and the TV section have become into part of the same structure.

Any questions?

Q: ... Hello Mr. Keshe, are there any new information about the delivery date to the Power Unit, the Electric Gas Unit?"

K- We're trying to complete it by June. We're waiting for the Chinese side to complete. And, once you see these Cosmic Rays, you understand the system has always been there. Now we're releasing it in a different form for it, yes. We just upgraded it, we're testing a system for it. The system has to be fail-proof. And ... now we change into a much condensed system, compacting. And it makes it very easy for us to produce and to release. The, if what we're looking, if the, before it was, let's say, a suitcase, now it's a small travel bag case, producing the same. and this has to be in collaborated with the generator. (1:24)

But on the other hand, as maybe you understood, today we are going through this plasma system to create energy and gas and everything else. That makes it totally different for the application, and makes it limitless energy source. But that is to complete by the, what we call, in research and development, but we already see the what you call, the work of it. We are ready to initially launch this out in next few months, all together.

Any other question?

Q: ... Does the Home Enhancement Power Plasma Unit, support devices which need small amounts of energy, like PC or TV etc., equal to devices that need a high amount of energy, like oven and heater, etc. If not, would the fit be better to support devices which need less energy?

K- These systems are already made and shipped into Austria, from Iran. And we had problem, and I was told, earlier on this year, that we're going to process of sending it for testing and certification. We had to do some adjustments with the system which came from Iran. And there was a lot of testing done to bring it to the point that we could... our team could be happy that it'll pass the certification. (1:26) And this is going through now, it took a long time. The units were shipped long before from Iran into Austria, they were all there. And it goes up to 3 kilowatts or 5 kilowatts, but it's what you call, applies to anything. It's a normal system, you can use it for low or high usage.

Q: ... Do you have to be a scientist to come to Arizona?

K- No, no. You have to be a researcher. We are not bringing people to stand there and watch.

R: You mentioned 90% research and 10%...

K- They'll learn during the teaching year of the research. This is a "hands-on." And this is there to deliver the technology. We'll get people with their PhDs and professors and 'God knows what,' they'll be on the same level as you, anybody else. I think for a while, most of the time, Knowledge Seekers have to teach the world scientists how to look at the Cosmic Rays and how to understand it. And most of the scientists joining on this level will have to... We created, we bred a new, what type of scientist, with the Keshe Foundation. Where there is no degrees, there is no qualification of being there. Your qualification is understanding and being, applying it. (1:28) And, this does not go with, well with many professors who have to be, you know, the working with other professors and to have a title. They'll find out they work with a man who was a hairdresser, or he's a farmer, but he has more knowledge than them.

In a way it's good for them to understand the knowledge is everyone's. And, just being a professor doesn't, what you call it, 'wash with us.' We're all equal, we share equally and, sooner or later they'll find out that hat they used to wear as a professor and a doctor and whatever, has no color in our structure. Being a Human, sharing it and being equal and that will bring a lot in. We won't have separate canteens for the, what you call it, professors and scientists. Maybe couple of chairs outside the lab in the garden they can sit, if that's their office. This is the beauty with this technology, because we teach what you call the Soul, what I call the 'Central Energy.' And there are no professors in that 'University of Soul.'

Q: ... Hello Mr. Keshe, excuse me, what's the difference between Cosmic Ray Plasma Communication Unit in the Store website and the UBESUS (Universal Body Enhancement Spaceship Units) and Head Unit, or Headphone you mentioned in your teaching? What kind of equipment will provide the experience in the Sanya Conference and how does it work? (1:30)

K- You'll see it when you see it. The Head Units, Communication Units are connected totally different than the UBESUS units. The UBESUS units are connected to the Wellness Centers. And Communication Units are like a network, your telephone company. Just because you have a telephone doesn't connect you to MRI

system in the hospital, does it? They're two different system, two different, what you call it, connections and structure.

UBESUS now become, they look outwardly more or less the same, but the structure inside is different. It's just because it's easier for us when we had the material to use. We still have the, what we call, the MaGrav unit housing. And we are using them for convenience. And we produced many for the American market, which are white. So you see most of them in that proposition, in that level.

Just let me see something one second. Just bear with me please. Let me see if I can share something with you. I know my... our people will go crazy with this, why do you do this? (1:32) But it's part of being a Keshe Foundation, in the way we always worked. I have to check something before I share it with you. Let me see what I have exactly. You Knowledge Seekers analyze every piece of the pictures. So I have to check, I don't give you too much. What you see, as I explained to you, that the Keshe Foundation work, and the research and development of these systems, is very much complete. You've seen this system in ... this is more advanced than what you had, what you saw in the, what we call, London. And, you, this is what I call, just because it's the same structure. This is what you get, as UBESUS unit, and as a Communication Unit. They look the same. But, internally and structurally are different. Connected different as well. And this is the Headphone as you've seen, many of you use this kind of Headphone, and this kind of system, (1:34) and this is a mass production of it. It's not that we have a few pieces. They're getting developed, they're getting... And as we go through the system, as we are developing, we change inside, we change the flow of the system. The original Headphones are nowhere in working the same as these, and the same with the operation of the systems. It's a convenient system, it costs us hundreds of thousands of dollars to make these units, to manufacture them in UK. So, we use that, and it's become like a symbol of the new structure.

And, you have the Communication Unit, it's like a mobile unit, and then you have an UBSUS unit, which is a Wellness Unit. And they are totally different operation connection. And we use them for different applications. The, what we call, the systems are, and I'm sure, that even these units will be reduced in size. I can see this to be reduced to a pocket size in next 12 months, 18 months. So, what you have as UBESUS unit or a Communication Unit in this size, will come into a pocket size, and most probably in the future, like a mobile phones, where no antennas, no satellites, no breakthrough. But totally different emotions. When you speak to someone on a Communication Bundle, you feel their emotion. You sense it, it's like, you know, when you're with your lover and he or she touches you, you feel that touch of love. (1:36) This is what's going to bring. It's not anymore, "Ah, I love you darling." It is, "I touch you, I feel you." And you feel the same.

And it's the same with the UBESUS units. With the development now in the Cosmic Rays, and the way we are developing them, we see this as a... it has to come like this. Because with the... what I see maybe in two years time, your Communication Bundle reduces in a size that you carry it in your pocket. And, you want to go from home to supermarket, and then how you going to get somebody to get you back home? You carry the unit in your pocket. You arrange your ?? own transmutation. And, it is feasible in next two to five years, that the Communication Bundles with transportation system will be all in one. Pocket size and we all carry it.

This is a reason why we went, I decided a few months ago. We went for what we call, cooperation between Iran, China and United State. One of the main things is breaking down the barriers, the borders. And I can see the Americans and the Chinese will force that the systems will have a control that who can transmute to United States, that kind of things. But I don't see how they can do it. They don't want to lose control and everything else. (1:38) And as one of the Chinese securities recently reported, Keshe is in China recruiting

spies. And one of our Knowledge Seekers supported that. And they believed, you know, Keshe is here. I'm there to change the structure of the 'no spies.' And the Chinese security went into alert that he is here to spy and blah, blah. Now they have to understand the spy on themselves, not us. And ... yes we create the spies for the Creator, if you know where he is, find out where the information goes. This is why you'll see some of the top Knowledge Seekers around Keshe Foundation will not be around Keshe Foundation for these reasons of deliberate damage.

And we come gradually to the point of all nations receiving the same thing. And the biggest problem for our government will be this system in front of you. You use a Headphone, now with a mobile in your pocket, or hands free sets, You talk, you use the same mobile in a different structure, with a handset, with the headsets, free headsets, or with a wire connected headset, and you transmute. Isn't this what you lot have been doing on the system, in the past few months? It's addition to the communication, it's addition to transmutation. Now you can see what we set up, and how we set up, and how we organize things with it. These units can be miniaturized, but we have to understand to what level we can miniaturize them to, (1:40) and then go to the next step.

Even while we monitor, we collect, have the... how we will develop these systems, how we will release these systems. It'll bring in a lot of collaboration and cooperation with what you call, government. (Rick, you have to change the screen.) In the systems to come you will find out that communication becomes part of transmutation. The communication becomes part of the structure of moving around. You transmute and communicate at the same time. You could be, we're testing this. You Knowledge Seekers, in past 20 minutes, without you knowing, are connected to the Cosmic Ray. We are monitoring you. We are monitoring how you are behaving, how all of your Souls are moving. (1:42) In the past 15 - 20 minutes, we have put you on the system. Some of you might feel different. Some of you might have felt or feel something. It's what we are doing in the background. And this is how easily we can test, we see, and how your Souls is totally flat.

And this is, I asked our team in the background to update me continuously with what they see in the monitors in the background, and how you are connected. It's not anymore how you see it. It's how we see and how we are interacting with you. When I tell you, you've seen these monitors before, just watch what is about to come. And you understand at this minute, at this moment, you as Knowledge Seekers are monitored through your Soul. And this is what we get in one of our monitors. And you all know the line, which is the line of your Soul. You've been there. You're experienced in it. And look at how flat you are on your green line. You see the green line sits more or less on the flat. Some of you have battled with your physicality and the Soul of Physicality (STP). but the green line in the center line is more or less flat. Means we have reached you, we're touching your Soul.

Now you understand, when we say, "Governments will have a say on this." And we have a say as citizens. (1:44) This is when physicality and your Soul, physicality is running around, dictating, "Yes you want, you don't want." And this is, how many of you? Nearly a hundred of you. Now, if I want, I can transmit information on top of the green line, which we know how it's created, and call you all to go home and have lunch. To call you all, go and have a Coca-Cola. You'll search like crazy to get the Coca-Cola. This is the power of the new technology. Through your Soul, I can dictate what your physicality will do. You call it a dream, I control the dream.

And we have shown you many times, when me tell you go to see your uncle, go to the Moon or whatever. I especially to show you this, I asked the team in the background to monitor. And if you look in your, you cannot see, if you look at the monitoring system on the, what we call, the people who are present, you look

right down the column, you see Unit 4 and Unit 5 operative amongst you. On that, in these list, if you have access to it, you see Unit 4 and Unit 5, which is our system, connecting to you, directly to your Soul, is operative for past 20 minutes. I can transmit on any of these two channels to, for you physically to do something, or for you to change things. 300 of you joined us, last time when we announced it. (1:46) This time I decided to leave it, especially for those who are here.

And this time you are in a plasma system, for the first time. Think what emotion you've had in past 20 minutes, how you felt, if there's any changes. Or see what happen, changes in next few hours and days with you. This was a promise, I'll make a peaceful man out of the man, and I've got all of you on a straight line. Now you understand the power of the new technology, and what we tell you, we'll show you in Sanya. No government can control this. You receive advertising and you went and took a Coca-Cola, now we deliver information through the Soul and you are like a slave to it. The Soul decides and the body follows. And this is what is to come. It is not what is to come, what is here, you are now, in past 20 minutes, part of it. You are in it. Now you understand, how the game is played, and why you have to be in Arizona, you have to be in, what you call, Tehran and in China. (1:48) The technology is so advanced, it will be shocking for many of you to know what we have the capability to do and deliver.

Any other question?

Q: ... Plasma food, is this something that we can eat now? And can you tell us more about that?

K- It's not a food, it's a field. We provide the fields that satisfies the energy needs of the body of the man anywhere in the Universe. This technology, what part of what you see, is the preparation for the next cycle of development will come in maybe next two ?? 3 years. Anywhere in the Universe you have access to ?? Chelab kebab, Sunday lunch and Sunday dinner and Thanksgiving Day, any day of the day, 24 hours a day, anywhere in the Universe. Because once you put the links onto the Cosmic Rays, it's accessible to every part of the Universe.

We promised there'll be no hunger, and you've seen it today, I can deliver it to your Soul. And I always taught you that, by using the Soul of the Man (STM), the central energy body of the man, to absorb energy from Cosmos, from environment, and feed the physicality, the physicality doesn't need to kill for and destroy for. (1:50) And once we do this, doesn't matter if you're a man, the beast, the lion, the cat, the tree, the man in Space, you all get the same. It's just, in a way, chewing it for you and you just swallowing it.

R: Mr. Keshe, we had a question last week from Joel, whether the information and data would be released, on the testing that's being done on these Friday sessions and the transmutation sessions.

K- No, no, no, no, no, no, no, no. We don't do that.

R: I thought you would say that.

K- We look for people, you get invited privately. We've done that in the past two weeks. We have invited one of the Knowledge Seekers to join us individually. I spoke with him this morning. And some of you who are here, you know. We invited four of the Knowledge Seekers into a special session this Monday. For two or three hours. We were looking for testing and seeing the response, what they achieved, how it is. And then, the other parts come. You'll receive an invitation, in a small groups of two, three, four people, in months to come, to join in these sessions. We had a beautiful time with Knowledge Seekers, last Monday, for about

two, three hours. It's not just that we do the big sessions, like in third week. Now we've seen the development, we bring in Knowledge Seekers, we know, we enjoy being with them, and we understand the connection to the work of the Foundation, and you spend two or three hours with us, private. (1:52)

R: ... You won't be showing the behind the scenes of the technology, how to do it, and so that others replicate it, and so on?

K- No, it will not be replicated, no way. You lot could not replicate a MaGrav, why you want to the plasma stuff. You're still at it, six, seven years. The system will be shown in China, is hidden. You will see a sealed unit, you never know what's going on inside it. Only will be opened up to the military and the Chinese authorities. The same will be done with the Americans. The same will be done with the Iranians. These systems are a combination of the flight, combination of living structure, planetary system. They create motion. They'll create food and everything as well. It's like, it's literally like Earth. We have created such a technology. And we're not there just to talk, it's getting tested today. Every day new things are tested. Continuously we add, we test.

Now the same system is feeding the fish, growing the seed, creating power. Knowledge Seekers who are on the Wellness Center side, UBESUS are in it. And this is what the system is. One system, now as we talk, as during the teaching, has been doing it, and is doing it. We don't build a system for food, (1:54) we have understood the concept of the life. And as our team says, "The fish is hardly eating." Because they are getting the energy, compared to when they were brought in before. They used to eat when they were with other fishes, now they are separated. In the beginning they still go through the normal habit and gradually, they don't eat because they learn to absorb the energy. Literally, by coming to the surface, touching the protein levels, they absorb the energy and they go down. So they don't look for food. And we are observing it, we start to see it processes the same system.

We have created a replication of a planetary system, and we are testing it. And you will see it in Sanya. And then you understand. As we do, feeding the fish through the system, we have access to the energies, which now you saw the picture of, we have access to your Soul. The system is with you, if you, I don't know if the, as a, what you call it, participant, or as those who are there, you can see Unit 4 and 5 is working in the background, it is amongst you.

I didn't want to announce like last time, 300, 400 people just come in, just to be in that session. Now it is a session, you're in it. You've been loyal Knowledge Seekers for years, and it's not just for a show, who wants to come and go. And we are monitoring everything, in the background. (1:56) And the whole structure is how we share this knowledge with the others. The whole system sits on this basis. And we are monitoring you continuously in these teachings of today.

Now you see how flat your Soul is, and how a lot of you have come in line in a physical and STP. Much closer than the big jumps you saw before. You can become a rebel, but we bring you back in line. The system does, continuously monitors, satisfies the need, and you can see the difference. How flat you are. Now you understand. You can take a screen back on, Rick... Any other question? You are now, not only in the teaching, you're part of the research at this moment of time. (1:58) In the few next few months, we can separate every single one of you, one by one, and see how your Soul is operating. Because you're all coming on a given channel number. We see who's coming in, we can connect you to a link that separates your Soul.

This is the advancement in technology. And, it could not have happened if we would not be able to make a continuous supply, or what you call, continuous connection to Universal links and Cosmic Rays. You tell me what you're dreaming and what might happen in your head and where have you been in past half an hour or so. Do you suddenly go into a dream land? Do you see something? Do you feel something and why wasn't there half an hour before? Then you understand how much closer we are to you. We don't announce anymore the sessions what's going to be, but from now on when you come into the Knowledge Seekers you are part of the research.

Any other question?

Q: ... How do the Tesla scalar waves compare to the Cosmic Rays? (2:00)

K- Have you ever stood in the middle of a motorway?

Q: No, I haven't.

K- Well, you know, you stand in the middle of the road, some cars come to you and some cars go away from you on the other side. It's the same cars, so it's the same. Are you talking about the wave coming to you, or the same wave going away from you? It's the same wave, we have chosen different word for it, when it approaches us and when it goes away from us. So there is no scalar wave, it's changed the way, changed the word, coming to me and going away from me. Scalar wave is when you're coming to me, and from the other side, magnetic fields, what's going away from you. And the scalar wave, because they're on a higher strength, you cannot stop a car and reverse it back to you. When you have a car, it smashes through, comes through. And that's what they say, you cannot make a Faraday cage for a scalar wave. Because it's coming from different strength, it goes through the system. Faraday cage when you make, because you decide the strength of the matter state, you block it, you can stop it.

When you understand the making of the Nano coating and understand combination Nano coating systems, you can decide if you are a Faraday cage to scalar waves, or to the waves going from inside out. (2:02) Because you built the barriers for it. We are testing this now in Keshe Foundation, in our laboratories, in a very different way. For understanding the dimension of the fields.

As we do not put now people who go through the wellness into the systems. We, as I was telling one of our Knowledge Seekers who's going through the process at the moment, we're treating you like a man in Space. Your system is outside in the Space. And then, as I said, we are progressing step by step, very fast. In the Head Units you use, in the UBESUS units which many people have received, are using with their, what the volunteers with the Wellness Center, we put your heart inside the system. Now we treat you like a spaceman. You're in somewhere in the lab. We can put a million of you on the shelf and connect you to it. Because that's how the real condition is. And now we are replicating it. And we've seen the result immediately.

We don't need to make a system, put you in it anymore. We have made systems that in them, connecting to each other, we use the environment for. And you can imagine, we can put a system in Arizona, a system in Tehran and a system in China. And in these three systems connecting to each other, we can cover everyone on this planet, because you're in the environment. (2:04) And this is very, very feasible in the next maybe three years, five years.

We need collaboration in production of radiation in Cosmic Rays, which are different than Cosmic Rays. And that knowledge is not being shared yet. Once we share the knowledge with the cosmic radiation, which is a lot of knowledge still needs to be learned, then you go through it, then you'll see the changes. This is like we haven't ever shared the knowledge and the understanding of in the world of Wellness. A lot of you take B12 and a lot of you take other things. And I always said, B12 is a radiation source. B9 is a radiation source. And very soon, we start using these in Wellness Centers, but as a magnetic field radiation, as sources of Cosmic Rays, the same as B12. But now we don't need a B12 anymore, because Universe makes these Cosmic Rays. It's in abundance in it, but we didn't understand it.

Cosmic Rays are different than cosmic radiation. Two different things. And this knowledge is too soon to be in the hand of the man. They create mayhem. Unless they understand, they become peaceful, then we teach it. (2:06) You have Cosmic Rays in your body, but certain organs in your body create cosmic radiation. It's different. Has a different purpose.

In the world of physicality, you have the liver, the storage place, you have the stomach, digestion piece, you have the brain, the controller part, you have the intestine for absorbing different fields, you have the kidneys for cleaning out what is not needed. All these field strength is in Cosmic Rays. When they hit a condition of the, what we call, life, not necessarily human Amino Acid (AA), any other Amino Acid, you sustain life, these rays convert their strength to an organ. This is why all animals have these characteristics, because this comes in, not an RNA and DNA, this is part of the structure, field strength of the Cosmic Rays, and Cosmic radiation. And man thinks, blah, blah.

If you know which strength in interaction with Amino Acid, leads to the field strength of getting rid of the fields you don't need, Then in the matter state converts to kidney, converts to the, what you call, bigger intestine. (2:08) If you know you need a place to know how to organize the operation, you call it the brain, these field strengths which control operation, once a plasma is created, is within the Cosmic Rays. But man never understood it. Whatever it hits, it'll have an eating habit, you have a digestion system, you have a rejection system, it has a storage system, because this comes as part of the structure, fuel, the spectrum of the Cosmic Rays.

And then you have a cosmic radiation, which don't carry this, but is a transformer. And Man hasn't understood this, this to you is a fairy tale, but now you understand, where and why, the Amino Acid of the certain condition, which you call it, the living thing, carries, doesn't matter where they come, the heart, the kidney and the digestion system and the rest of it. Because, it's part of the Cosmic Ray. It's a package of the plasma of the Cosmic Ray. And then in the matter state, takes the physicality shape.

And we can control that now. And that's why you can produce a brain, you can reproduce a heart. And, if you understand how advanced we are, we understand this how it works. And when we release, and if you were with us in Ghana, when we did the research with Ghanaian University, we chose to show this with a Zebra fish. You take a heart of a zebra fish out, it'll produce that heart again. It's not in RNA, because zebra fish through its structure is connected to Cosmic Rays, that information stays and it reproduces it. (2:10) In our lab operation now, we're using zebra fish. Because, if by mistake I leave a heart behind in transmutation, once he arrives, he'll create that heart. There is a reason we use it. There is a purpose we're using it. And we can't explain everything to the Knowledge Seekers, because your knowledge is not deep enough in the world of Creation.

Now you understand how we work and how the process is done. And this is what I call, the knowledge is not a magic. You have to understand the science of it. When we started using the Zebra fish in Ghana, we had a purpose for it. And now we are using the same fish in our lab testing, in our research. If in transmutation I miss a brain, within a minutes of arriving, it will produce a brain itself. Then I can see what it is. I can see the operation. Where the mistake was, where we have to adjust the system. I cannot do it with a human being.

We had a case in what you call, one of our tests. A fish literally died. And it was put back into the main tank with the other fishes. (2:12) And I was told that the fishes nibbled at him, nibbled at him. And like they were giving him kiss of life. And then suddenly the fish which was dead came back up. They produced what it needed inside it's organ to get life back. And by all principles, if you... the fish should have died.

Now you understand. Our research is very deep, and that's why now, it's time to share this knowledge with the Knowledge Seekers across the world, that no government can touch. Belongs to the citizens and then the government have to structure how the governing needs to be done.

Any other question?

Q: ... Do I understand right? We are waiting till we better understand the science of the Cosmic Rays. But meanwhile, if there are scalar waves coming towards me, do they reach my DNA and this part we call, junk DNA or...

K- All these are the terminologies man who doesn't understand has created.

Q: No, I mean that. (2:14) So, to activate the other ten strands which man calls junk DNA, are they touched by scalar waves and then would help man, or would help also me personally, to better give away, or give, transfer my wishes towards the other men?

K- Oh, you can use it, or you can abuse it. I cannot control what you do with it.

Q: No, of course. But my aim is helping, giving a helping hand whenever I can. Because over the last, sort of, years and years and years, I've come to the point where I found a sort of tranquility inside me. And try to put my knowledge or my feelings to the others only in a positive way and not in a negative way.

K- Yeah, that's all depends on the people. But with this new technology we can control a lot of things.

The reality is that we monitor... I want to show you something very interesting, because this is coming from our team in the background, they are monitoring you. And you will see something very interesting. As we are monitoring the system, as we are running in, across the system in a, in a different way, (2:16) our team is literally battling out with you, your own, what you call it, fields. We are recording it, we are not doing anything with it. And, have a look at this. I'm going to share something very, very interesting with you. Let me share something very interesting, and you will understand it in one go.

This is really as Live as we can get it with you, and this is how technology, no scientist, no scientific organization we'll share it with you, this way, the way we have done. This is, as I said, these are the live fishes, Zebra fish which is in our research lab. And our people know them, one by one. They've been with us for a few months. And this is how, in the near future, we can dictate them where to go. The setup is set for

them, to decide which one will move out, will want, which one out of the population will transmute. This is a Live fish tank picture from the Keshe Foundation laboratories.

But what is interesting, when we told you that you're getting monitored, this was your reaction, you all panicked. In a way that you didn't know, in a way you're getting a spied on. But, what is interesting, we're still in the center line, we control your Soul. (2:18) Physically you're panicked, every yellow line is your physicality. You're jumping everywhere, within, between your Soul and the STP, and your physicality. But the central line, which is your Soul, it stays calm, because it knows it's in the safe hand.

But you, if you look at the yellow lines, and you look at the purple lines, the yellow lines is your physicality, and the purple lines is the STP. How you're panicking. You haven't gained trust with it. And when I talk to you, confirming to you that this is what you, you know, we are testing you, you calmed down, this is you now, back again now. Your Soul still stays the same. This is you in panic. You thought you're getting a spied on. And you switch, but the Soul, the belief, stays solid. There's no abuse. And you can see what mayhem you created for yourself in a few minutes, when you didn't know, yes, oh, wow, you talk, whatever. And now you calm down, since you're in past five minutes. If you see it, the Soul is more or less on the same structure.

You're short. You take from us. We give you, you take, you balance. And one of these points in the future, we let you to transmute. Your physicality will drop. You become ready for transmutation. And that's it. So we can choose which one of you, (2:20) like the population of fish here, go to transmutation through another link. This is why we call you to come to Iran, in Isfahan, come to what we call, Arizona, and or in China, and become part of the research of the Keshe Foundation into Space Technology, which is the way Space works.

Go back to what I always said, we don't see no wings on Earth. Stuck to it and no rocket and no propulsion engines and nothing. Rotates within the field of the Cosmos, creates life, creates an energy field we call love, and is as real as it can be touched. Now we have access to that technology and now we have to nourish it, and this is the freedom of the man from shackles of physicality, the hunger, the everything else which goes with it, even the kingship.

Even the Kings will come to beg for use of the technology. Because they understand, at the end of it, they are what we call, feeble and they are not immortal. As we've seen, we heard in the news, the biggest one, I call it, the shortest living King of the present time, Mr. Charles has been diagnosed with the Cancer and he don't even want to tell you where the Cancer is. It's hard when you get hit in your testicles, as we say.

And the, what you call, (2:22) the only solution is to find a way, that all these diseases which come to us through dimension of absorbing other energies which is not balanced, the man find that the only solution is to feed through the Soul. Let your Creator feed you, stop pinching on the side with other lives. One of these fishes is the one which was dead in that tank. And now these fishes are moving around with each other. And this is you lot, you still have not gained trust in the Keshe Foundation and then we see it. But your Soul is with us.

Q: Mr. Keshe, does this relate to me personally?

K- No, you're part of those little waves in there. It's on one channel. I don't know. What is the figures on the channels? You have 99 people on one of the channels, it's the Soul of you 99.

R: Incidentally, the number of the names of God.

K- Two of the systems, which are the ones you're controlling the whole scene. If you look at the attendees, you have... If you promote the attendees into number four or five, what you call it, panelist, or you can leave them where they are. They, these two units, you are, they are interacting with you. (2:24) They are taking information on the level of the Soul, and taking information on the level of your physicality. And that's how we are monitoring you.

In the near future, through the same process, field strength, we can pinpoint with a 100% accuracy, even the chair you're sitting in your living room, and where your Soul is. If you are flat with respect to your physical body, you're sitting up, ?? when you're upside down. We have that knowledge now, but if you make it accurate, more detail, you don't need the GPS, the satellite is your Soul sitting there. We can pinpoint it to the accuracy. Even the new satellites don't give you accuracy of pinpointing.

Any other question?

R: ... Okay, I'd like to get to the question that I've been holding back on here from Jefferson, that's probably why he posted it twice in the Q&A.

K- So, we don't answer it?

Q: ... (2:26) My question is, can we take from our Souls for Mitra and her daughter? If so, how should we go about connecting our Souls to their Souls?

K- They connect to you, then you're connecting to them, if I can put it that way. If the desire to be with them, you will see it, you will feel it. When you see Mitra, she's like a light, appears as a light. And when you see Mitra with her daughter, she's always a ?? fridgling little light inside a bigger light. It's like a mother protecting, developing. I have the pleasure of meeting both on a frequent basis. And I know when, even she runs away to play, I can see. She's busy somewhere. And this is, if they chose for you to see them, they are there for you to be, to connect to. And it's an honor and a privilege to be in that point of position. And, is not how you can connect it, if you become at the level of them that they connect with you.

A few days ago, I could see the daughter to play, and the way she was. And I could see the light of the Mitra, how confident was that, "Okay, let the child play." And how it displayed itself into two lights and coming back together, testing. (2:28) It's not a vision, it's understanding through the structure of the Soul. And it's, if they let you see, and feel.

Any other question?

Q: ... In the 104th Knowledge Seekers Workshop, ... you teach us about music. You mentioned about a virus in form of music, a form of noise. Can you explain a little more about that? ... repeats

K- The interaction of the field, and especially when you have the specific strength, when adds or comes in contact with, (2:30) creates a friction. We see a friction as a light, we hear a friction as a noise. When you play a violin, you put two strings and you rub them and they create a noise. Viruses have the same. The strength field when interacts, create a noise, we call it a music, the sound of it. And we get to know these noises very, very easily. They become part of our Soul vocabulary, the physicality. It's like a wind, when it hits you, when it contacts you in your ear, you hear, and with a different noise of the wind, we assess the

strength of it. And what it can do, what we call a breeze, it's not just touching, we hear it in our ears too. When it's a hurricane, we hear it in different ways, the same ?? field but stronger. It's the same thing with the virus, it's the same thing with the energy packs, in the Universe. And how it touches us. And we assess it, how strong are we against it, can we stand it?

I was traveling yesterday, in the car, and the person was driving, "Can you go on the Internet and find out what's the speed of the wind?" I said, "We can feel it, because it's shaking the car." "But I want to know the speed, what is the next, if it gets stronger we can stop." And, as usual, we have our friend called Google, it says it's between 26 and 30 kilometers an hour. And in open, a little bit wider. And the night before, (2:32) we had the same thing. I was with friends in Amsterdam, and it was raining a blizzard, and rain, and then it's quiet .. , and lunchtime, we couldn't go out anywhere. And we said, this... again, we wanted to know how strong the wind is, and you know, okay, six kilometers, but with the rain. And from it, and then it comes summer time, we stay in the same wind, and we call it desert, it brings joy, because it cools you down in summer.

And with the noise of it, and the feel of it, it was the same with the viruses. Different strength, when they touch our Soul, we know what they are. Are they danger to us, are they something nice? And we bring the strength which matches them, that they cannot touch us. And this is how things are, this is how things take shape. And we learn it, it become music to us, we know if this virus, with the noise it makes with us, is dangerous for us, is healthy for us, and the rest.

We know already this, but due to materialistic condition of our choice over thousands of years, we ignore it. It's a background noise to us. But now we learn that it's another noise we have to consider. And we become good at it.

Any other question?

Q: ... The ones who are connected now since 20 minutes, (2:34) that was over half an hour ago, can they also receive food through this connection?

K- No, no, this is for us, we are collecting data. It's for us, and it's, we are learning how you are, the fields react, what we have to monitor. We'll study these pictures in depth in the next few hours and days. What we missed, what we saw. It's not just taken to be there. Every picture is set, analyzed. I spend hours and hours analyzing, changing, because of these things. And...

R: Well, can people expect any particular benefits, or is it more you set up your own trip, and if you have benefits involved in that, you feel in your interactions, and that's up to you? Or, like it's mostly for your data collection.

K- It's more...

R: But people have experiences during this time, they, you know, notate different, maybe even, very profound experiences going on?

K- Yes, I mean, we... when we did a test, this week, with some of the Knowledge Seekers, the test is so, that what the response we got back, after the sessions or during the sessions, is so profound, it's so profound that they realize now they have a capability, there is a second part of their lives. (2:36) And they're still

connected to emotion or whatever, but some of them are becoming aware of the power they carry, which is in their hand. They decide where to go and how to go and how it feels. They decide to be somewhere with it. But we provide the facilities for it to become. As I said, in a very near future, these technologies will be handheld, and maybe in 5 or 10 years time, it'll be like a chip. We put in a body and with the same control that our thoughts decide, our Soul decides, that's it, we go there and it will become spontaneous.

Join us in Arizona from the Western world, join us from Middle East and Russia in Tehran, in what we call Iran, in Isfahan. And join us in China, hopefully with the Chinese in Sanya, where we break the borders. Those of you who want to be part of the Chinese structure, it's the same structure, same thing as you want to be in Iran, in Arizona. But in Arizona we need at least a hundred Knowledge Seekers. That it doesn't stay, it expands and amongst you, you bring more. And the facility is already there. The Wellness Center Arizona Keshe Foundation has been sitting at John's, and he said it's empty for three years. "What are we going to do with it?" I said, "Now you got it." And as you know, he headed the research beautifully in the past. Now, it'll go back to his position. And, we are very, very choosing who we choose. And, the system is as before, you have to complete everything very fast. Because, I'm sure, (2:38) American government will have the same number of people they want to put in the research. And, most probably other countries.

Q: ... What is the process for acceptance in Arizona as a beginner?

K- It's not a beginner, you come in, you get your hand dirty. You got to get in, and you might study day and night to catch up, or as I said, "I don't want to be a tomato, you got to catch up." The link will go up in next couple of days. It's a very straight forward, we get a lot of people like to be, and then this and that, there is a... The fee which we're going to agree with Arizona and with our structure. We, last time was, 10 years ago was 20,000, we're trying to keep to the same structure. Last time we gave a limit of 8 people, this time we give a limit of 100, because it's literally day and night work. You have to bring everything else, you set up your own teams in the background, to work in each group with you, could be ten Chinese and five Americans and two Germans and whatever, to do the work outside in collaboration with you or come up with the problems you have, and then we structure the system that way. And you, with our experience of our past, a lot of people wrote but they couldn't financially support it, it has to be there. You find as a community you sponsor people to be there and you have to support it for three years, or you personally can do the payment and you go through it.

And with setting up of the bigger structure, equipment, machinery and everything else, in development of the New Space Technology, we go back to our investments in Markray. And we have to sort, Markray is more or less now sorted out by end of January. (2:40) And then we go for the next phase of bringing it back into operation. And I'm the majority shareholder in what we call, Markray. And Markray, once we complete, we already have signed intellectual agreements with Markray, so we activate what we already agreed and it's signed into the company books. I'm not telling you a secret, because we have intellectual right agreements with it, now we activate what we signed for.

Any other question? Just wait for next two, three days, sign, make sure your payment is due in, and then we know there is a seriousness, because I like to be, but I don't have a... Do all your work before you come to us. And, I think within the next few, two, three, four weeks we close. The same will go with China, Chinese participants can do the same. And, the same will go with the Middle East and Iranians, and most of the other organizations. This is part of the structure. There is a reason we chose Arizona, and this was a discussion we always had, even the Governor of the State, a few, to few years ago, and with his office that, Arizona being near a desert, allows us to do the testing. Isfahan is literally next to a desert, and at the same time, it's my

fatherland, is where my ancestors come from. And, what you call, Sanya, is the center where we can test in the oceans. And it's perfect for us in every way, shape and form.

But once you open up register complete, (2:42) then if we security-wide reject you, you'll be refunded immediately. Because we do a very strict, what we call, security check. It'll be up, the application form will be up, registration will be up, and we close it very, very quick. Because I know the American NASA people have a few people lined up. We have a very good connection with them. They would like to know, now they are part of it, as part of NASA Keshe Corporation, and most probably we'll see, what you call, the other parts of the American Space Technology joining us in it, and the same with the Russians and the rest. Just give us two or three days, it'll go up. Because I discussed that with John this morning as well. And the same goes with our Iran and the Chinese section.

Any other question?

R: Well, I'm pleased to say no, there is... you have managed to cover all the questions. I believe... I may have missed one somewhere, but I don't think so. I've been through all the questions that have come up. Congratulations.

K- No, it's... we've done that a few weeks ago.

Q: ... Will our conventional computers be replaced by plasmatic computers? And does plasma computer have superluminal speed? And secondly, will they use plasmatic energy to operate? (2:44)

K- More or less, yes. But that is another way, I think it'll be a transition time collaboration between the two, and then till we come to it, how we can break into what senses of it.

I was talking to one of the Knowledge Seekers some time ago, and I was explaining that, now we use computers, and people go and hack and use them as whatever... The beauty of it is that these computers already exist, it's called the brain of the man and the STM, and it's 7 billion of them plus all the animals walking around. You don't need to build, it's already built ready to be used, it's just, it's dysfunctional.

And yes, it's... it'll become instantaneous, it's become a common knowledge. If you think of it in a, in a way, I always said, "you cannot steal." But you can make it open, available to whoever, you know, take it. You do the same now, if you understand it with your Soul. Now you understand how the teaching comes together, in a way. You are Chinese, you are American, you are Brazilian, you open your Soul that, my knowledge, my emotion is available to whoever wants to. So, when I come, when I want to understand a joke in Brazilian, which is meaningless in English, because through English mentality, it doesn't exist in a way, I connect to your Soul, and I understand the full meaning of the joke, the full meaning of what is being said, in the essence of a Brazilian. So, now you understand why we ask for Satellites (Souls), (2:46) and how people will become Satellites by their own choice of their Soul. It's a lot to come, it's a lot to learn. And, we have just opened up this Pandora Box. We have just opened up this Pandora box.

Q: ... My pineal gland has been pulsing since the connection began. I can usually get this happening when I meditate. What is the next step on the road to transmutation? It feels like Qi energy on tap. Thank you for the journey.

K- You're quite welcome. We're going to switch off the systems, and what we call, disconnect them. And let you to have a rest for a few minutes. And then we close the session, because we cannot drop you in one second in the deep ocean. And our team in the background, in the next few minutes, will shut the system, just stay online, and we have you with us, we go through the transition. And what you experienced is yours, for you to enjoy. And how we will see the, what you call, the process takes place. And how you take the journey back. And go through what you felt in past one hour or so. (2:48) We monitor the system that... just stay with us for a few minutes till the units are removed properly and taken out of the system.

Any other question?

Q: ... Unbelievable teachings.

Q: ... I also felt the system working on me. My eyes were closed, lots of movements of light. Thank you.

K- We don't announce anymore when we do this test or when we do these things. And we try to understand how you respond without you knowing, because when we get to know you react different, as you saw it, you panicked and we saw the panic. And we need to be able to do without, and it was good to see how you as participants react to these things, (2:50) without knowing and when you know.

Q: ... A Chip in the body does not sound good to me.

K- You will be asking for these chips. It's a plasma chips, it's not like the way you do it.

R: You don't cut a one inch hole in the skull, like the new ones from Elon Musk?

K- No, no, no, no, no.

R: The first person, you know, just a few days ago, I think three days ago, the first person got the embedded Chip. It's actually, they do, you know, cut a round hole in your skull, and embed it, and feed the electrodes directly into your neurons of the brain. Receiving and transmitting.

K- Yeah, but you have to know, a lot of Israeli high class people like Prime Ministers, and top security people, and some of the majors in the army of Israel, and the spy agents, high rank, have been Chipped this way for a long time. It's nothing new. And Musk works closely with Mossad. It's not his technology. This technology has been, (2:52) what you call it, in the hand of... I was talking to a Mossad agent a few weeks ago. I said, "Where have they put it?" He said, "You know I carry it." I said, "I know you carry it." He says, "I can't tell you." I said, "I know if you put you into X-ray, we can't still see it, because I know how you make it, it's gel type." And he said, "we all are in..." And when they are sending the high risk missions, they are always Chipped. We call it 'Chipped.' And it doesn't have that, as you know, like black things and they inject it to you. It's done the different ways, more advanced, and Mossad has had this, and for nearly 3 - 4 years. And Musk is using his Jewish connections to, for this job. And he is used for different things for the application.

R: In Musk he's hooked up to the AI and the Internet and so on as well. So it's like a... and they hope to help with diseases such as ALS and other... At least that's the reasoning.

K- You have to understand Musk follows the work of the Keshe Foundation very closely. He literally, even Tesla cars Nano, the new batteries, it's all Nano technology we introduced. The Copper plates and other plates and rest of it. And he tried to copy the MaGravs in small packages very recently. (2:54) He called it the 'energy units' or whatever. And he very closely watches what we do. He's got a team working on the Keshe Foundation T, like the Iranians. But most is financed by the Americans, with it. And if you look, how come suddenly he goes to this field, how come he went to the battery, how come he went to the small MaGrav systems? Step by step he follows and he tries to commercialize, but they don't have the understanding of it, that's why they lack a lot of it.

We have closed the systems, now the unit 4 and 5 are out. In just give us a couple of more minutes, I'm waiting for a graph to see the system has switched off and then we call it the day. Yeah, you have... we have said 'goodbye' to you lot in the system, and now you are free agents in your world. And, you can see how you lot calm down, and how you respond. Even as you get the knowledge of security, you are in the safe hand, you all change, in one go. And it's interesting how a whole lot of you work in the same way, get touched emotionally, get touched and then you change in, what am I? What it is? and "What I'll be?" And it's interesting, this for us and the research, (2:56) and how you calm down when you get a word of assurance, through your Soul stays, physicality calms down, and how the STP takes move, and then the STM follows.

It's very, very interesting how you, as Knowledge Seekers, work, and how you do it. I'll share you, I'll share with you a couple of more pictures that you understand what it means. And, you can see how you have reacted in the session, in the last part. This is what I call, before and after. This is you lot, before we close the session. Before we remove the two units from you. You can see your Soul steady and if you remember, the pictures of your STP, which is the purple one, and the physicality which is the yellow one, how much they changed, now they become more centralized. You're bringing two in line with each other. You panic, as the Soul wise, but you come back and you see the last five minutes, on the right hand side, how your Soul all settled, and how your physicality and the STP standing opposite to it, which is the way it should be. That they collaborate with each other, but the Soul is feeding the physicality, and this is when the system is switched off. (2:58) We have no more connection with you.

Thank you very much for today, and see you hopefully next week. And at the same time, next Friday, we have our other session, the, what I call, the second session of the six sessions, you can join and enroll and be with us. And, what I call, to be part of the research development in Arizona, Tehran, or China, you can enroll. Arizona we take 100, China you can enroll as Chinese, to be part of the Chinese research, it's the same fee as it is with Tehran. And you can enroll yourself, and we block this very soon, because we have to structure a lot of things in the background. You will be working at our, what I call, Development Center in Arizona. All the systems are there, the whole things has been there, now we bring it back into operation for you as Knowledge Seekers to join. And we'll bring in the massive, mighty, what you call it, power of the Keshe Foundation sitting within the structure of our investment, into operation. Thank you very much, and see you next week.

R: Just a reminder, the transmutation session will be coming up, well, a week from tomorrow, basically, right?

K- Yeah, we done that.

R: That's it, every third Friday of the month. So, people that are interested in that can go to the Keshe Foundation store and book your flight.

K- But please, those of you who come in for, to be with us in Arizona, I'm sure it'll become a way of life. (3:00) You will never leave, you will be still part of the research for years to come, for development of the technology. And I'm sure every other organization will join or do the same thing, once it opens up and you become the teachers and leaders in spreading the knowledge across and change a lot of things. Thank you very much and see you next week.

524 KSW Feb 08, 2024

END

525th Knowledge Seekers Workshop February 15, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Need different connections of C - C12 common denominator CR - DC line on H - C overloads creates many C isotopes - to matter state; H connected to Creator; Travel U on overloaded energy fields - through AA; Why can't manifest P in transmutation; Need different AA strengths other than body for luggage; Venus Fly Trap - digests fly through fields; gaseous state AA; Sphere C60 has pentagons - same as skin - pentagons access to Universal energy - how to travel to other U - through pentagon; C60 common denominator of all structures in Unicose; Cosmic Radiation different than CR Cosmic Fields; Every creature in U have pentagons access; Connect to Souls through emotion & intention; Enlightenment within seconds - Knowledge of Creation; Have to find it within your Soul - understanding - cannot give to you; AA fingerprint where born; Every Soul unique - fields; Soul & STP cannot lie to each other - cancer; Understand yourself - connect to STM; MaGrav - 3 Kings; All 3 reach Creator; Never steal - always ask first - Soul elevation; Responds to KS - research is slavery; Transmutation like pulling stem of rose through ring; Cyrus (Kourosh) set example - treat women; Valentine's Day not balanced - not know how to love Creator; STP cocooned in STM - feels safe - not kill - pure love - emotions one - reach Creator; Soul of Grandfather; Chinese stole T - copied called own - be punished - give to others; Re-entry - cry of birth; Cosmic Radiation; Nt believe in Holy Books - made up; Personal stories - leg amputate - punishment; Manchester bombing - don't want others to go pain - sacrifice self - bring change; Happiness from correct living - helping others

ENGLISH TRANSCRIPTION

(:11)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. (:12) And as usual, we welcome you back, and let's see what we can share today, and what we have learned from the cycle of life on this planet, that we can expand on. When you listen to the Intro, it brings out a new dimension of understanding. It brings out in how we have understood the cycle of life. How we have joined together in the

dimension of the Creation without knowing. And we change to different dimensions (D), to different characteristics, according to the line of connection to the Universe (U).

In a way, if one understands and one comprehend the Totality, one will see that to live, to exist, anywhere in the Universe, be it this, on this planet, be it in the Space, to manifest itself in a combination of tangible and non-tangible existence, but containing continuity of life, one will come to understand, one needs different dimensions of connection, as we have talked about before. Carbon 12 (C12) is what we call as an energy pack, it's for life existence. Connected in a common denominator to what we call, Cosmic Rays (CR), which usually work on a back of the Carbon 14 (C14). But, in a way, if you understand it, (:14) as we spoke last week and we showed some, some explanation and figures last week. The common denominator, what we call the DC line, stays on the Hydrogen. The Carbon characteristics is overloaded on this common denominator. So, when you come into the matter state, life state on this planet, you get deviation or division or isotopes of plasma energy, not matter state energy, of Carbon. That, it connects you to the source, but it connects you to the matter state, which is carried by the Carbon.

In a way, if you would have understood, and this is for the scientists who understand, or come to understand this technology, in the laboratories of the Keshe Foundation (KF), in the future, is, you have that common denominator Hydrogen, which connects us to the Creator and the Creation, and then we are overloaded on top of that, with matter state energy plasma, at the time, place and point. Which means, we travel on the C12, on the atmospheric condition, gravitational condition of this planet. But, on another planet, another position, we get a conversion of the Carbon, which comes to be on the energy level, what we call as a radiation of C14, to become matter state in that position. (:16) What this means is that, in the Universe, once the line of common denominator is established, and then overloaded by the energy fields, which is the deviation according to interaction of the fields of the environment. Then, that environment dictates how C14, as what we call, Cosmic Ray, is converted into that matter, in interaction with the field, Gravitational Magnetic (GM) fields of the space, time and position. Which leads to the condition of creation of new life in that position.

This is important for our Knowledge Seekers (KS) to understand, and the scientists who work in the Space Technology of the future. What this means, if you want to travel from Earth to another system, another planet, you travel on the common denominator of Hydrogen, with overload of the Amino Acid (AA) Carbon connection of the man, to the conversion of Magnetic (M) fields in a way of Gravitational Magnetical field of the position, that allows you to manifest yourself in that time, space and position. Which means, if you land in a place that there is no Carbon, it doesn't mean you cannot exist.

When man understands this, When the scientists can go through this conversion, so, when we send the man to Space, we send the man with the AA of the Earth to Space, plus the conversion to the time and place and position. (:18) So, in a way, let's say you have 'Mr. COHN,' and in that position C14 in conversion by reflection of the Carbon 60 (C60), of the, what we call, Universal strength, can convert to be Potassium. So, you actually have 'Mr. COHN' plus Potassium, plasmatic magnetic fields. And this allows you to create a new, what we call, as you like it, hemoglobin. That man can survive in that place and position, and can react and live the position and time and the space.

We know this knowledge, we know this technology, we see it on a daily basis, but we never understood this. If you look at what we call, the plants, which eat flies, which eat live animals, they trap them in and then digest them. They go through this process, because once the clap are closed with a fly inside it, now is not any more atmospheric condition, it's the plasmatic condition of the two surfaces which they have trapped the animal in. Is like the jaw of the man, when he closes. When you close, you put a banana in your mouth, and

you close your mouth, that banana is not a banana plasmatic condition (means matter state) anymore, even if it looks as a banana in your mouth.

So, if you understand this, man will learn from this plants, man will learn the ?? Cosmic condition, and Universal condition, (:20) and Cosmic Ray condition of the conversion into existing two dimension in Space, that allows the Soul of the Man (STM), when returns back to Earth condition, to go back on C12, AA, look like a man, hemoglobin and the structure of the man. Then you understand, we call it the AA, But, the AA strength of the hemoglobin, is different than AA of the plant. Is different than AA which created the stone. Then, man has to find out, how to create the same AA, combination of 'Mr. COHN,' that they can coexist, live within each other, and through each other.

What this means? It means when I put you in a system, with your beautiful dress, you're going to a wedding from London to New York, and you happen to be hungry, or you carry an apple in your handbag, or a banana, just in case you go hungry, I have to transfer your AA of your human flesh. I have to transfer the AA of the apple or a banana, and I have to transfer the AA of the clothes you wear. If you cannot get this right, we have a beautiful woman in 'birthday suit' in New York, with no food to eat. Because we forgot to transfer the handbag. (:22) We did not understand the concept.

And this is why many of you Knowledge Seekers who've been with us, cannot manifest yourself. Because we never allowed, we never built this into our systems, even though we know about it for decades. With the new system, which is developed with the Keshe Foundation, all these matters now is complete. Which means, in the coming time, When we put you through these tests, like those of you who join us tomorrow, not only you'll be able to transmute in the dimension of energy of the Soul, you can transfer the plasmatic condition of the AA of the content of your body. In a way, you just had a beautiful steak in London, And, sorry, we forgot to carry the steak. You arrive in New York and you're hungry because, we didn't have the right combination of the mustard and the chips, you had with the food, in London. Because, there is AA of vegetation inside. Different than the AA of the body.

This implication, understanding of this science, it needs to be unraveled, it needs to be understood. And the prime position to understand it, for the scientists, is in the stomach of the man, the same as that plant which closes. How we convert the AA of different structures into what we call, energies of the body of the man? (:24) How do we convert the Potassium, or Calcium, or Magnesium tablets, which is in a solid state, into your body, and then you take the energy of it? Our body does this transmutation of the energies automatically. But, we never understood, and we just do as we've done, ignorance is a bliss. Now that we have entered the science of transmutation, energy transfer, we have to understand, otherwise, unfortunately, you don't want a bride to turn up in a wedding, from another planet, naked, because you forgot to add the AA of the position, connection, of the time and the space and manifestation.

You got to understand, as I said, you have not even entered standing up, let alone walking in the steps of the Knowledge of the Universe, which is thousands of steps. Now you understand, why many of you, all of you, been there, you went to the Moon, but you can't give yourself physical manifestation. Because, in the structure of the technology, even though I taught this 4 or 5 years ago, and it's recorded in Knowledge Seekers (Workshops), you have pictures of it, you never understood. And now, in the new development, new technologies, we have brought this into operation. Because now, our Knowledge Seekers can understand what it means, what it implements.

Where we have to, the next step is to find the condition of the gaseous AA, (:26) which this is another problem. Then, you have to understand, you talk about it, but you don't understand it, or many scientists will talk about it, never understand it, is, what is the game of C60? Why do we have this crystal structure? What is the purpose of it in the universe? If you really want to understand what C60 is, look at your skin. And look where on your skin you see a five-sided hexagonal shape. Then you understand that cell, that piece of skin, is part of the structure of the C60, which allows you to be connected into Universal magnetic fields to be contained in this Universe.

In the future, man even has to understand how to break out of this crystal structure to be able to travel into another dimension, in another Universe. C60 is very simple, it's 5 times 12, which is C12. Then you understand, in so many ways, why you need this. If you don't understand this, go and get yourself a leather football. Older ones, or the newer leather footballs. You look how many six-sided shapes you have, and then you look, one or two five-sided are in that sphere. (:28) Without that five-sided, the shape, the structure of the plasma will not hold. You cannot put a six-sided structure. Now you understand how the Universe works. You want to get to the skin of, to the boundary of this Universe to travel into the other, you have to find that five-sided. That's your line of connection. Because that structure, that point, that spot on the Unicose is common amongst all the Universes. This is your, what I call, connection line between Universes. Even the fields of the common denominator to the Creator goes through this.

Now, you as Knowledge Seekers who are still struggling with your MaGravs, try to understand this problem. in the scientific structure. We are building this up. And as I said many times, just because you carry a mobile phone and you speak your funny languages on it, and the other side put the translator and gets translated too, you don't need to know how the mobile phone and the translator was built. And those who understand it, they value it, they will understand what to do with it.

It's very much like, early .. 2004, 2003, 2005, (:30) the Belgium came out with the automatic translator. The King of Belgium wanted to steal this because they understood it. They 'mucked' a guy and they stole the technology. They put a play recorder under the table and said, "Oh, he's just using a play recorder." And they stole the technology, this is a habit of the Belgians. And now we see what was brought in years earlier, now is a common use with all of us on our mobile phone, we can translate, to the word, to the voice, to the image.

Just because you don't understand it, it doesn't mean it cannot be done. But those of you Knowledge Seekers, who are in the MaGrav and the Gans game, and you're still busy with it, try to understand, try to interact with the, what I call, C60. How you produce it, and how through this C60, you can find common denominator AA of all the structures of the Universe and Unicose. If you don't do, it'll come to your peril. You will lose everything in the Universe, because you cannot convert. You'll be those Souls who are lost in Space. You'll become the ghosts of the Universe. Because, you cannot give yourself the dimension of physicality, manifestation at the time, place and point in Space.

Those of you who go with us through the session tomorrow, for the first time, (:32) you will be, you will have access to what I call, Universal AA condition. Which means, gradually, in a coming time, you can give yourself physicality (P) of manifestation and the point, time and place, if you can replicate it. As I said, those of you who join us in this monthly sessions, we are preparing you for what we call, transmutation, in a full, meaning way.

In developing these technologies, you have to understand, we have to protect you. We have to bring conditions in, that it works, it develops, to a fruitful condition of the transmutation. Many of you, who have

this problem, with too much physicality, and you cannot go, you cannot feel, "I don't know what happened, did I feel anything?" Even what your thinking is part of the process of transmutation, but you are so much want to be (in) control, that you don't even understand your thinking is in transmutation level. Then you come to understand the dimension of manifestation and physicality.

In the process of the Creation, in the process of development of this technology (T), we explain everything. And in the time to come, the scientists who understand this, will come to benefit by that. Will come to develop technologies which can mature to a science and technologies that will help man to go another step. But, in these teachings of past decades, we setting the base, the basic knowledge for you, and at the same time we add to it, that one day somebody, somewhere, on this planet, or somewhere else, (:34) will use it, to ?? mutate the knowledge of the Universe, to the benefit of its citizens.

Now you have to understand, how to produce C60, how to produce C14, how to produce Carbon 28, how to produce Carbon 30, how to produce C12, and how to produce Carbon in a level of 4. Now you understand. When you go back to the original patents of the Keshe Foundation, when I speak about inert gases, and the game they play in creation of ionization, in creation of what we call, creating conditions of the Cosmic radiation and not Cosmic Rays, and not Cosmic fields.

Now, if you understood this, if as Knowledge Seekers you understand the Totality of what has been discussed in past few minutes, you understand, all of you as Knowledge Seekers, gradually are moving towards a full transmutation. But, our scientists have to understand, our scientists have to implement, our scientists have to bring about the condition of creation of the C14 and 60, that in the structure of the body of the system, we replicate the structure of body of your skin. And get a microscope, (:36) get a lens, and look at your skin. See where you find a perfect five-sided structure. And that is the point of your connection to Universal energy.

In the future, scientists will use this to create the point of transmutation through Universes. Every creature, dimension of physicality or energy, contains this, even in the shape of a plasma. You have to be able to create the 4 dimensions of the AA, to be able to survive the Universe, to be able to live. Earth has a gas, has a solid, has a liquid, and it's got a living condition. So is the same with every structure in the Universe. And the man has to understand this knowledge fully before he transmutes. This knowledge is embedded within the STM, not in the DNA of the man. And DNA, according to the structure of the RNA, through the Universal knowledge, creates that little 'five-sided hexagon' on your skin, the same as a football. In a football you might need a couple of them, on the skin of the man, because the curvature and the field forces to be sustained, you have many of them. (:38)

Now you understand, how much more you need to understand. And now you understand, how close we are bringing you to a full transmutation. In the next few weeks, I will ask you to submit a picture to the Keshe Foundation, live online. It could be your uncle, it could be the President of a nation, it could be a dog, a cat. In your presence, we'll manifest that entity in the time, place and a position, which you agree. You haven't seen your mother for 20 years, she's in Australia and you're in United States. With a picture of the man, we can even now transmute the man. It's very easy, if it looks like magic to you, understand the science of it. Once the image is created, energies of the dimension of a connection, has ?? created. And we don't need to do anymore.

Then you understand, when I explained to you, many years ago. I'll bring you the Christ for you to see. We don't need the image. The thought, understanding of the history book of the man, will give us that

connection. Through emotion and intention. (:40) As each have their own strength. Now you understand, how much more as Knowledge Seekers you have to move on. You're just like a flock of ducks, trying to escape and I have to herd you in. There's only one hole to go out. And that's the hole of Knowledge of the Creation. And we cannot force feed you. You have to do it on your own, by elevating your Soul, by understanding the knowledge of. This is not a Chinese duck farm, which there is a hole and the guy grabs the neck of whatever it sticks out, and puts a pipe in, and force feed it, and release it, till it goes on the other side of the wall, and pull it out again, when he's feeding next time.

You got to understand, for completion of the science of the transmutation, you as Knowledge Seekers, have to understand the whole process of the Creation. The whole process of understanding the process of Creation. And, you don't need a lifetime, you can access this, if you understand and apply it within seconds. You call it the 'enlightenment,' I call it the Knowledge of the Universe, become available to you. Does not need you to head bang on the floor 17 times a day, or go to the Great Wall and bang your head against the wall. All it needs is clarity of Soul. (:42) Clarity of understanding the knowledge of the Creation, and no one can give you this in the name of the Prophet, Ayatollahs and the rest, except yourself, in understanding, enlightening yourself, to the energy fields of the Universe by yourself, how to use it.

You do not need to go through the pain channel, because it'll never bring you anywhere. You have to go through the pleasure channel, which by pleasure is by giving, by loving, which opens the other doors of the knowledge to you. Now you understand why I keep on telling you, 'teach the technology.' As you teach, you'll empty the cup and it gets filled up with the new knowledge, that takes you one step further. In the minute you start abusing that, you go back to the beginning, but you still think you understood a lot, but in fact you are still galloping in the, what I call, the puddle of dirt you created for yourself, through arrogance of the knowledge which you never understood.

You have to understand the structure of the Creation. You have to understand the structure of the existence. You have to understand how things are applied, and to where and who, and what they are applied. How do you convert a plasma into matter state. And how you convert matter state into plasma. It's not done by salt and vinegar and sugar. It comes by understanding the science of Creation. And more or less, in past ten years, I have taught you the full knowledge. (:44) You have to go and pick it up and apply it. Pick it up and reproduce it. And all these plasma systems and MaGrav systems have blocked you from understanding the Totality of the Creation.

When you produce a gas, within dimension, what is for? What does it create? Where does it connect me to? Do I need it and how do I need? When you create the AA, in what you are connected? When I come to another position, there is no Nitrogen on this planet. So, I have to keep the AA of me, but here is Potassium. So, I change, I still keep possibility of the Hydrogen, the Carbon which connects me to the Universe, in the dimension of the energy, and that energy of the conversion, Nitrogen becomes Potassium. Possibility, you will look a little bit green. So, on this planet, we all have brownish conversion of the skin, due to Potassium, you have different green condition, most probably. And then, if you go to levels of the, what I call, Plutonium and Uranium, you look a little bit more silver-ish. And more or less, when man becomes visually expert, you can see by the color of the skin, even if they look like a man, "oh-oh, these people carry the fingerprint of another condition in the Universe." (:46) In a way, you cannot find the field strength combination of that five-sided cell. Is a peeping hole into the condition of existence. If you understand this process, and if you understand how to achieve the combination of this process, creation of the plasma in the dimension of Universal condition, becomes a child's play. And if you don't, you're still playing with the children toys, which is a MaGrav.

Now, you have to extend the knowledge. You have to sit down and analyze what you have missed. In the session tomorrow, many of you will go through new experiences. Many of you will experience new dimensions. Some of you might go to the level of conversion into the transmutation and see yourself, physically touch yourself, but don't know where you are. Then you have to analyze. You have to find out how you take the situation back. We sit in the background, we create the environment. You are the dancers, we create the floor. One of you like to dance Greek, and one of you like to dance Arabic, and the other one goes to disco in New York. Shake and shiver the way you like.

It's important for you to understand this, and not for us to force feed and force create. (:48) It's important for you to understand how to create the Carbon connection with the dimension of the strength of the fields of the place, time and position. And if you understood this, you will understand why you, man, changes appearance as it lives in different part of this planet. As the connection conversion of the C14 in connection with the space, time, and area has a different strength, and the combination of the two creates a new dimension for the AA isotope structure, which gives you narrow eyes, darker skin, lighter eyes, and everything else.

Now you understand even how you are, in a way, mutating. If you understand this scientifically, now you understand how man has mutated to so many races, colors, and everything else. A black man moves from East Africa on a boat, ends up in a place called Australia, and his future changes. The black man goes walking down the river of what I call centuries, and ends up in Europe, and he comes blue eyes and blonde. It's the interaction of the C14 of the body of the man, containment of the C60, communication line of the physical condition of C12 of the physical body of the man, (:50) with the same as what Earth's planet has. Is C14 connection to his Solar System, C12 of the matter state condition of his existence, and C60 of the containment of the place, time, and position of the Solar System, the planet, and the man itself.

Now you understand how you mutate. And now you understand when I tell you go from Africa as an African, and you end up in Finland and you got these blue eyes and blond hair and white skin, what happened? If you travel in the dimension of the Soul, this is inevitable. When you travel in dimension of physicality on a first class seat on the Airbus, you still see a monkey coming out of one door, because you move the physicality, you didn't move the Soul. I wonder, when in the future, man will test this. We'll send, as part of energy of himself, in the dimension of the physical condition by the aircraft to Finland, and then the other parts in dimension of the Soul arrives, and wait the other one to arrive and see, "this is me .. and this is me." One came through dimension of the transfer, and one came through dimension of the transmutation. Then, your problem is, how do you fit one in the other? (:52)

It'll be interesting, how in the future, when we come to understand the condition of the transmutation, how our "beautiful people" (Schizophrenic) will look. One will be black, one will be white, one will be blonde and one will be brown. Because the dimension of the Soul interaction with its environment manifest the physicality which satisfies both emotions of the Souls. Now you understand how sweet the life for man becomes and with all these to explore how man will forget about the wars and conflicts because this game is a better magician.

As I said before, and I repeat it to some one of you, some of you, or most of you understand, you have no choice. And in a way, one way or another there, there is a force behind you which pushes you to go through that hole. You might try all to go one by one and get caught on the other side by the neck. Or you totally understand the world does not exist as you travel through the dimension of the Soul and no one to catch you on the other side. And then you understand how some of you can walk through the walls. As you transfer

through the energy transfer, not the physical dimension, you get a bruise, (:54) and a banged head and broken arms as you try to go through something which the matter state does not allow. And in a coming time, as you become experts, you'll find out you can walk through any walls, any mountains, and anything you like.

This knowledge will come into test from tomorrow, in the first phase of it. And in that process, many of you should be able, gradually, in time, to transmute. Transmutation on this Earth is very simple, because you are a man, you end up as a man, maybe as a dog, and say, oh, I was a man on the other planet. On the way, you played a little bit, you changed the energy, you ended up with the AA of a dog. But you'll be able to talk and tell people who you are.

The problem will come for you when we transmute the first couple to the Moon, where we have to go through the dimension of C14 and C60 transmutation. The Universal line of connection. On Earth, you're all within the ?? grasp of the gravitational magnetic field of the womb of the village of Earth. Outside this planet, you are not. And that's why you understand we separated transmutation and those who become the people who transfer across. I explained this to you in the last couple of teachings, where inside the plasma of the Earth, we are all 'flat-liners.' When I put you outside, you are two 'flat-liners.' (:56) One of the flat-line plasma of the Earth, and now one of the plasma line of the Solar System. And these two, when they interact, will create a new sinusoidal shape of the fields, let's say. And then we have to understand how that interacts with the plasma flat-line of the Moon. And then you arrive in one piece.

In so many ways, creation of the fields, manipulation of the fields, structuring the fields, holding to the fields you want, making the fields you don't need to make what you need, it become a game that many of you will start in the coming time. And don't take it that it happened accidentally. You've done it purposely, because you went for it. And this is what will bring you to understand the Totality. This is what will bring you to understand the structure, to understand the possibilities, to understand how you have to behave. And it brings you a new behavior. And it brings you to a position that you understand, I have to handle two things at the same time. And that is important.

Please excuse me for one second. << Mr. Keshe answers a phone call >> (:58)

K- ... Sorry about that. I told you beforehand, I might receive a call, I have to answer.

What is important, what will come to part of our work, in understanding the Totality, is how we progress to this point. How we come to pass the Totality of understanding of the Knowledge of Creation. (1:00) What is the consequences of our action in the Soul dimension and in matter condition, or what we call, the state of physicality of the man.

In the coming days, in the coming weeks, we expand this knowledge, as our Knowledge Seekers understand, and systems and technologies are developed for it. You got to realize how to merge the knowledge of physicality with the knowledge of plasma energy, and how to separate, and how the dimension of physicality has to go into the dimension of flat-line and how you carry that information within this plasma line. To what extent we will go through this? To what extent we will understand this? And how fast you can transfer this knowledge to the others?

As I said many times, I'll bring you a drop of water that when it falls in another water, will create that fish. In fact, that drop is your Soul, and the other water is a plasma field of the Universe. What kind of fish you'll come out of in that new environment? Would you be a shark or goldfish? Would you turn out to be an

octopus or would you turn up to be a whale? (1:02) Now you understand the mythical conditions that you have to understand to bring to reality, not us. There is no blueprint. There is no fixed conditions. Every Soul is unique. And every condition, time, and place, and position is unique. And you are the one who decides it. You are the one, through the dimension of the Soul, and the Soul of the Physicality (STP) will create that physicality (P).

Now you understand what I told you many times. Live by 'Ethos of Mitra,' as your Soul and STP cannot lie to each other, because if they do, you end up with a cancer. And this 'cancer' this time, is you as a nomad in the Universe. Now you understand how the Ethos of Universe works. Because, as a Soul level, connected to the Soul of Creator (STC), "thy shall not lie". The STP plays, in "thy shall lie". You have to teach, this guy, we play the 'God's game,' not man's game.

Then you understand, how you have to process, how you have to proceed, how you have to come to the point of interaction of the fields of the STM. (1:04) I hope, I hope, my sincere hope is, I opened a door into your life. And, I gave you indication and physicality that you can check. In so many ways, by the structure of the physicality of your body, you can tell how close you are in the Soul level, in the STP, to transmute. There is a sign, there is a way for you to understand, by looking at the structure of physicality yourself, to see how close you are to the point of transmutation. It doesn't matter how you feel you are. You cannot take the 'cake out of the oven' if it's not ready. Even though it looks cooked outside, but it's raw inside.

Now you understand. Now you... put it this way. I gave you the MaGrav systems. Use it to understand. Use it to create a condition to understand. As I said to a Knowledge Seeker, next time when you get your MaGrav, instead of plugging into the wall, plug it into your brain and see you get more out of it than what you tried to save a few dollars on the wall. And this is what I always told you, connect to the fields, not plug into the fields.

The ?? ... interaction of all the coils, with the numbers which you have created (1:06) MaGrav system out of, connects you more or less, all the field spectrum of the Universe. But you don't have the knowledge, you cannot understand, to you it's still, .. is it the right turn, is it the left turn, is it 41 turns or 40 turns. It's one human, and so many hundreds of turns, fields, left, right, up, down, and every other, and the central field ?? force of the Universe.

What I've given you as a MaGrav, gives you entry for transmutation into the realm and dimensions of the Universe. If your STP and the Soul do not lie to each other, or be there, "I want to transmute, but I want to get the electricity bill as well." Stick to your electricity bill, be a citizen of this planet. You cannot lie to it. Look at the structure of the MaGrav. The 'three Kings.' Look at the rings of the MaGrav. One inside the other, capable at each level to be correct and not to be ???. Then find out how you have sat on the 'three Kings' that the Jews celebrate, and you are given free, and you ?? suffer. (1:08)

Now you understand. Now, maybe you understand. You think good, you connect to the bottom level. Or do you connect to the top level? You talk good, you connect the top and the bottom together. And you act good, your physicality is a manifestation of your position. Then you understand, you can talk good, think good, but act wrong. Choo-choo, you're going nowhere. Because you cannot cheat between the two, they are aware of the truth within you. You have to accept the responsibility of the three in a correct way, to hit the jackpot. And then you have to get all the strength in every turn correct, emotion of sadness, emotion of joy, emotion of ?? stealing, emotion of blah, blah. In every coil, every turn, everything, every level. And if you get all that right, you've reached the field strength of the Creator.

I don't think I could explain in a much more clarity, the purpose of the MaGravs. Is your test step, don't plug it into the wall. Understand it works, in conjunction with the work of your own life. How many of you have made the MaGravs, and laced it with the energy of yourself? (1:10) Then putting AA, and God knows what, in the center of it, in the ball outside it, and soak it in different Gans's. One day, mankind will laugh at ?? you Knowledge Seekers, that he really played with them, he could have told them from the beginning what is going on, but when you don't try, you don't know, you don't understand. Now, you are trying, you have no choice, you have to understand.

Understand the Totality of the work, of your own Soul, and the STP. And stay correct in all time, with all lines, and then you'll see. Never steal, always ask. You never think it's your right. If you've been around me, you always know, I always ask. It doesn't matter what. Because when it's given, it carries that Soul for elevation. Now you understand the totality. Now you understand the game played by you, by your Soul and the STP, at the same time, place and position.

I hope today I opened your eyes in what is about to come, what you need to do to be, and how you come in conjunction and connection with each other. Tomorrow, when you join us, if you have a MaGrav system, leave it in the room next door. (1:12) Make sure you don't sit in the room with a MaGrav in it. Because in the next sessions, I show you how to use MaGrav, and your Soul will teach you where you're going wrong. Don't bring it with you in tomorrow, but make sure you are nowhere near a MaGrav system. Because, you will experience a new cycle of life. And don't say, "I imagine I went." You imagined you went, but now you have the capability of the physical manifestation of yourself in dimension of energy. Let's see, how many of you will enjoy the trip tomorrow. And how many of you will go through the, what we call, ?? the barrier of the transmutation and transfer.

Thank you very much for today. And, as I said, we join the Soul teaching, the Cosmic Rays, the MaGrav system, and everything else we have taught you in the past. Now it's all coming to the same pot to cook, to make the soup ready to eat. All depends what fire you put under it. And in a way it doesn't need a fire. Or it just need essence of understanding. Thank you very much Rick. Take us through a break and then we come back.

>> **BREAK** >> 525 KSW February 15, 2024 (1:19).

K- ... The usual way we bring some notes in. The Foundation has announced last week about the new research groups for Arizona, and subsequently for Iran and China. (1:20) We had one of our dearest Knowledge Seekers putting a note that, 'this is a slavery, that we be paid for our research, and then the intellectual right doesn't belong to us, belongs to the Foundation,' and the rest of it. And I made a note to it. If we do such a thing, is because we've done such a thing. I spend all the assets possible, I do all the research, and at the end of it, all goes to the Foundation. In a way, I'm detached from the financial side, I'm detached from my own life which I put in it, and detached from the knowledge gained, because it becomes knowledge of the Foundation. So, we live by what we do. And, not asking you to do anything we haven't done. On the other hand, becoming a researcher, allows you to learn new ways, and if you decide at the end of it, to stay with the research, continuing to what is to be added to, then you get employed back on, most probably you pay 25,000 in 3 years, you get 100, 200,000 a year at the end of it, if that's your target.

And at the same time, as those of you as Knowledge Seekers who came to the Cinzano and the rest of it, a lot of money is spent just keeping you as Knowledge Seekers. (1:22) What you pay does not even cover the expense of the maintenance and the rent of the places. Those of you who came to Trani and then to Barletta, as the last second year of the Knowledge Seekers, you have to know the premises cost us about 30,000 a month. Without all other support expenses. So what you pay, 20,000 - 25,000, even 100 of you, does not even cover the expenses of the running. And you go to the supermarket to shop. You pay for it, and then you go home, and you start ?? (practicing) , what you learned to cook, what you want with it. This is the same, but you cook for humanity. So those of you who think you're paying a lot, you have to understand you have paid nothing compared to what we'll cover just to light up the place for 100 of you for one year. Create accommodation, all the scientific tools, and all the bits which you make a mistake in, has to be redone, 3 ?? mil, 3 bait ?? , and the rest of it. So I would love to see any of you would like to take this banner up. We pay you and you do it for that amount.

In a way, what I taught today in the first session, shows you, we haven't even started the process of the knowledge. We just played with the 'blocks of the Lego.' (1:24) We don't even know how to put them together and how they look at the end. So the research is needed and has to be done. Like the Chinese government pays from their side, Keshe Foundation brings 200 scientists of itself, has to pay for itself. It comes through you as Knowledge Seekers paying to be part of it, we pay the other part of it. We have put out the hand of collaboration to the other governments, and we wait for the response, we wait for understanding of what is to come next, and how we shape it. Those of you who want to be part of this research, please complete the process, and how you want to do it, that is done by the September time, you are ready to go through. And then, we go to the next step of development and everything else.

In the process of the material development of the Keshe Foundation, we are processing new, what we call, technologies, in, we'll offer you new systems for trials. That using the knowledge, we can extend the knowledge of the other side of the development of the Keshe Foundation for Space Development. Please understand, I cannot do more than what is. And as I said to one of the Knowledge Seekers, by law, by standard way of the life, and what it is in the, what we call the commercial world, as you're so connected to all the financial structure, (1:26) people at the age of 65, put their leg up and the coat, put their hat on, and start becoming a pensioner, and waiting for the coffin to arrive. Pension time. In my case, in that age, I just started a new cycle, to teach, to develop and to spread. And now I have another cycle of 65 to go, to complete for you lot, before I become a pensioner.

So, new cycle of life has started, and new teachings has to be done, new sharing of the knowledge. And I hope you understand this. I haven't put my foot up, I've done it, that's it. Insurance company and the pension policy says, "65 you retire." I've just started nursery of the knowledge, and I still go to class one. And I hope you as Knowledge Seekers go the same way, because you'll understand, age does not count as the time is non-existence. If there are any questions, we answer and otherwise we are not the slavers, and we don't take nobody for slavery.

Any other question?

Q: ... Do we have to convert ourselves into the shape of a dodecahedron in order to transmute Mr. Keshe?

K- What? (1:28)

K- ... Somebody translate.

R: Do we have to convert, I think, into the shape of a, essentially a football, in order to transmute.

K- That's what I said, translate.

In a way, no. In a way, when you become a plasma of yourself, yes. But on the other hand, go back to Book number two. At two ends you are a plasma, in a spherical shape. In between you are a ray, even though the same plasma. And in so many ways, where do you want to transmute to that shape, at the end or in the middle? Impossible. It's not impossible in the middle, but you take longer time, then your, the losses are bigger. And stretching the ?? ball, gives you a lot of advantages. Because, in the world of, when we talk about the ray, you got to understand, your higher order magnetic fields, goes to outside, the lower, which is the central point, goes to the lesser. A plasma in the direction of the motion, in that state, is very much, is like in a vacuum state. The stronger fields sits within, which in a way, is the weakest, which is the center. This is how it works.

The work of Cosmic Rays is very much like a vacuum, or centrifugal system. (1:30) The stronger fields, the heavier material goes to the boundary, and the lighter, which is the line of common denominator, goes in the center. And you find out, for that, you need to be able to travel in what we call, spherical shape, then into cylindrical and then back into spherical. Even the cylindrical is so narrow, it is not even a cylindrical, it's more like a ?? ring, than the field. Because you are traveling in on the line of the common denominator and it's so narrow.

I explained this once to a child, maybe this means something to you. Give yourself a rose. I should say, happy Valentine to those of you who bought the rose yesterday. Yes, it was so, but if you are still in the process, might be haven't passed the 12 hours to go to the 15th. Get the rose and give yourself a ring. And try to pull the rose from its stem to the ring. That stem, that central line, is the Hydrogen. And all the leaves and the flowers and the rest, which now have to go through that ring, are your life of physicality, your emotions, and everything else. But, you fit in somehow. Make the ring into a tube, and you see when the flower end comes out of the tube, when you're already pulling on the long stem on the other end. And this is how life of a man in the dimension of transmutation is. You are a beautiful rose, and a beautiful stem of connection of line to the Creator. (1:32) You put yourself through a tunnel, pulled by the stem, and you come out on the other side, what we call as the same rose. But you've gone through the tunnel of the transmutation of time and space in the Universe. If you made the mistake about the ring and the size of the tube, you'd come out a

slightly different rose, shivery, shuddery, on the other end. If you get everything right, you come out the same spinning rose on the other end. Maybe because of the color of the shade of the light on the other end, you look slightly different.

So, you don't need to become anything, you are already all of it. Then the Book one is on the end, before you get in the tube, the tube is Book number two, and you end up on the other side, with the rest of the roses, as part of the Universal Community. I hope I explained that to you simply, and if you understand it.

Any other question? (Dr. Gutaua ...)

K- ... (1:34) For those of you who might not, we might put you through a system today, we're off today, because systems are getting set up for tomorrow's meeting. Don't forget tomorrow is at 9 o'clock, 9 AM we start the session. Yes?

Q: ... Good morning Mr. Keshe, thank you for the wonderful teaching today. You spoke in the last couple of workshops about Cyrus, and how he is an example of how men should treat women, and how when the woman becomes the abuser, she has the right to leave. My question is, how should women be treating men in partnership? Maybe it's an obvious answer, I'm curious what your perspective is though.

K- I had a link sent to me by Azar last night. And in that link he says that, in time of Kourosh (Cyrus the Great), Darius, we had a month called like, the 'month of lovers,' and we had a day called the 'day of lovers.' And when the month and the day become the same, that day was a day that the men did everything for their wives. This is a 2,500 plus years tradition in Iran. And men worship their women, buy presents for them, give them everything else for that day to their mothers, to their wives, to their daughters and the rest of it. And, in a way, the point of respect, (1:36) and that day falls more or less about fourth of, what we call, another 10 days from the, what we call, the Valentine time of today. It's that 12 days gap again between the Iranian calendar and the International calendar, the rest of it.

And, it is very interesting, I have a cousin, she's extremely nasty, very pinpointed. She came to see us in the Cinzano, and she said, "do you know Mehran. In all the holy books, they say, that the man can have four wives, can have many things, blah, blah, blah, blah. But in none of the holy books, it says how many husbands a woman can have. So we are free. We can marry as many men as we like. And as we have no restriction, there is no adultery. But the men changed it for themselves. And in a way, being, what we call, 'minded that way,' which is correct. All the restriction of how many men you can have, I've discussed this before, how many wives you can have, is only for men. You women are free. And I said, yesterday, to a friend of mine, you, women, are waiting for that Valentine rose, Valentine gift. Excuse me, it's a two-way traffic. It's not only men who love women, you women love more men than men loves you. What did you give? (1:38)

And, do we need to love only one day a year? Or, can we have it every day of the year? Do you open your eyes every day to your lover, to your wife, to your husband, say, "I love you"? When is the last time you told your partner you love her, or love him? Or, does it have to be Valentine? Yesterday I was driving down the road, and near me there is a flower shop. And the flower shop was like a bread shop. There was a queue of men, all waiting to buy one rose. I thought, "Oh my God." It's come, and there was no women in the line. They're all men, short, tall, and they're queuing to go into this tiny little flower shop to buy one rose, and they were coming out, because I was sitting in traffic, I had no choice, I had to watch it. And I thought, "Where is

the women?" When they're going to love us? So, where does the line comes? Why does it have to be always? Why is not both ways, and all times?

And, isn't the problem with most of the relationship is that we forgot, or we forget, and we are too busy, just to tell our partner, once a day, once so often, I love you too. The strength about, "Oh yeah, you keep on telling me this, yeah, yeah, yeah, yeah." But, you know something, somewhere it registers. It's walking into a flower shop, buying two roses, (1:40) pack them separately, and tell the cashier, "One is for my wife, and one is for my mistress." The cashier looks, "What?" "The second one is for my daughter. Because, the love of me for my daughter is the same as love of me for my wife. As she gave me the love to love." Then you understand. Does it need to be a man only purchase? Or do we open a flower shop next to the one, "Roses for men and roses for women."

Yesterday I was sitting at the dinner table, and two ladies walk in, each one, one carrying two roses and one carrying one roses. And I said to the person who was with me, "Look, these two are lesbians, they've given each other flowers." And, otherwise, if they had real lovers, he would have been with them. And, we joked and laughed about it. And, this is how life it is. Loving a person is the old traditional Iranian way, you can do it a month a year. And then, every month you have that day in the month. You don't need to wait for the 14th of February to become a Valentine's Day. It'll be Valentine's Day, 30 days a month, plus another 11 days on top of it. But, once you get into the habit, every day is a Valentine's Day.

We've forgotten how to love, because we've forgotten how to love the Creator, and now we are entangled with it. Doesn't matter you're a man or a woman. (1:42) How many times have you woken up at night, kissing your partner, "I love you"? And then, don't even ask tomorrow morning, "Did you remember I kissed you saying I love you?" See what reaction you get the next day. And then you understand, it's sleep time, the Soul's hear. It's a long, long path for man to understand the truth about the Creation.

Any other question?

R: Azar put a comment in the Q&A: "Since men cheat, they feel guilty, so they go buy the rose."

K- Ha, ha, ha! So, women cheat, they don't... men don't need to cheat. Women cheat more than men do. Depends what you call cheating. This is the way women convince themselves, men only cheat. All creatures cheat in the two-legged life of man, depends. Does not need to be physical. You see how women turn things towards themselves? All men cheat. More women cheat than men. But, men have a conscious and they suffer with it. Women see the (it as a) natural process. Always called it, 'multitasking.'

Any other question? (1:44)

K- ... Do you know there's a very old joke about a couple getting married? And the husband brings two jars, sealed jars. He says, "We are humans and things can happen. If you ever do anything wrong, just put a grain of rice in the bucket, in this pot. And then when we get old, we open the pot, we don't need to say anything. In that time we had a lifetime together, we enjoyed our life, but we understand what happened." Married for 60 years, becomes her old age, the guy says, "Can you go and bring the pots we bought when we were young?" They open the pot of the man, it's got few rice grains in the bottom. The woman looks and the man says, "Sorry, I'm very sorry, you know, I was young and this and that." He says, "Open your pot." They open the woman's pot, it's nearly half full. He says, "Woman, what have you been up to?" She says, "This is the

third time this jar is full." Now, the answer to Azar is, we never know. It's within us and we only know what we do.

Next question please.

Q: ... Will I please receive an email today with instructions for tomorrow's transmutation preparation? Which Zoom link? At what time? How do I set up the cell phone?

K- The links usually we leave it till later on, (1:46) on Thursday night, even early Friday morning, because a lot of people still register. And to do everything one by one, sometime overnight, tonight, or sometimes a little more morning, one, two o'clock in the morning, the IT team will send you the link. We never miss anyone, if you... If you don't get it by eight o'clock, look at your junks, to start with. Look at your junk link, because a lot of Keshe Foundation, over... If you do over 10 messages through Google, it'll block it. So, those of you who have a Google account, or other accounts, you have to check your, what you call it, your junk as well, to see what a message comes from the Keshe Foundation. And most of you have the link anyway. If you are new, wait till tomorrow morning, most of you will be fully covered. We hardly ever had left anybody out. And the Zoom number, the password is set, and your link is already set up, using the... you have to come in with the email you made the request. If you come with another email, you will not get in. Because that email is opened up to enter the session.

And again, you can use one headset phone which is left over to your ears, or you can use two headsets, one set up, one on the forehead, one on the back, with one pair to your head, to your ears, or some people use a four line connections, the left and right loop of the brain, the central brain line and the ears.

Tomorrow experience will be very interesting, we like to see how you lot react. (1:48) And don't panic, we don't... we used to send out one of them early the week, and then we had late comers, we're still receiving this morning, people who are going to participate. So, everything will be done by tonight and it'll be sent out. And you will see in your email, or your junk, and you can only come in with the email you made the application for. Not with the other one, you will not be able to get it. But we have people on the standby, we check. If people run in trouble, we have one of our Knowledge Seekers, every time she's in trouble, but somehow she gets in after resetting. And if you don't have the connection opened up, you cannot come in. Even you have the link, but it's not set on the computer, backup to open for that specific case, it will not open.

Any other question?

R: And that will start at 9 AM?

K- 9 AM. 9 to 5. Actually we might...

R: It'll open a bit earlier as well, like 8:45 or something to let people in.

K- Rafael usually opens it around 8:30, 8:45. Or the IT team will open it in the background. You have 10 or 15 minutes, do all your coughing and chatting and the rest of it. And when we start. We start the session at 9:00. Tomorrow is, I'll be with you live, for 2 hours, by 11, 11 maybe 15. Then we... I leave the session, because it has to be done by you. But we are monitoring, changing everything in the background. (1:50) And

then we might let the system to go till maybe the lapse time of 30 hours of the Zoom. Or maybe longer, if it allow us, the whole of weekend, you can come in and go.

It's a new system. I was with it yesterday, I'm again this afternoon with it, trying to make sure everything is in the correct way, after you setting everything up. We would like you, as we done with the other exercises, you can write a comment into the chat, live. Don't write, "Oh, I'm this and that." If you reach somewhere to a point, yes, just write down what it is, and watch the chat, because if I come, or anybody comes in to talk, it's distractive. So, while you close your eyes or whatever, try to keep an eye in the chat, see if there is a new instructions, but we don't have new structures. We control everything through our, what they call, systems. How you receive, when you receive. The way you receive, we change parameters frequently, we observe how you react. And, more or less, when we change, what we call, parameters, we look for the first 3 to 5 minutes. And that is our, what you call, cue for the next step. But we allow that to settle, and then we go to the next step.

But primarily tomorrow, 9 o'clock. We still keep on changing systems, till afternoon or whatever. But by 5 o'clock on, you're on your own. You can come in and go, you can go for a dinner, come back in. (1:52) Please make sure nobody touches your system when you're away. Don't give it to somebody else to come in to test, you will understand the reasons. And follow the, what I call, the true vow of silence. Keep quiet, stop coughing, stop jumping, stop all sorts of things that allows us to do our work. And allows us to run our, what we call, testing.

Because tomorrow session is a new, what I call, parameters, it's a new structure. We have worked for this structure, weeks, months and years. And we would like to see it, how it behaves, how it comes. It's the first steps of plasma transmutation. And it's crucial, some of you might go through the transmutation, some of you might see, reach the point of, for the first time, maybe to go through conversion. But, it's for you, in the... Then you tell us how, we keep you connected to our system continuously, which means we are not going to lose you in Space. And we'll see where we go. But it's very much, as I said, the first time we have put you on the 'boat of Noah.' Depends where you go, how far. Now where you're going to land and how you're going to land.

Any other question?

Q: ... Will it be translated?

K- Usually, in the beginning, we have three or four translators, who do translate, yes. (1:54) We have usually the German, the Portuguese, I don't know, French, we have a couple of Iranians, sometimes Italian, and sometimes Chinese, depends if they're in these sessions.

Sometime in the next couple of months, there is a broadcast in Italian, which is getting organized by the Italian Knowledge Seekers, that it'll be an interview, but in a depth in a, what I call, a dimension of the, a new dimension Keshe Foundation work. It's getting set up, our Knowledge Seekers have worked with it, it's just structuring here. The interview will be translated, I think, into Italian, before it's transmitted. But, it's one of those in depth, in what I call, interviews or discussions, we have for a long time. And, we'll see how it comes, we inform you, if you want to listen to both version, the English and the Italian version.

Any other question?

Q: ... Hi Mr. Keshe, you teach us about the Soul transmutation, and start to teach the physical transmutation. But does it exist, the emotional transmutation? (1:56) Could you please say more about it?

K- It goes with it, you don't have no choice, you take your emotion with you. Or you take your emotion with you. That consciousness. In a way, once you expand, you'll understand the point of transmutation.

Because, I explained this to Knowledge Seekers before. When the energy, central energy, what you call, the Soul expand beyond the physicality, physicality doesn't have the needs of the physical existence. Because, it's like cuddled, it's just cocooned, it's in the comfort zone of the field, that I don't have to do anything, I don't need to steal to survive, I'm inside, I survive and in comfort, I don't need to lie, I don't need to do wrong thing and the rest of it. So, more or less, if that panic state doesn't set in, which we've shown you before, you keep on jumping between physicality and the Soul, and physicality and the Soul, when you get to that straight line of connection with each other, you have the same emotion. So, the line of emotion becomes one.

In a way, I don't lie, you don't lie, we want to go there, we go there. The STP through the memory, wants to see the grandmother. And what it is, ask the Soul, "Can you take me to grandmother, because I cannot do... I want to see the grandmother, to see how my grandmother looked like." And, there, at that point, it's the job of the Soul. "I know where she is, we go."

It's very strange, it gives you... It gives you some sort of connections you don't feel, (1:58) unless you're in it. I know I had a... I know I have... I had a grandfather who died years ago. My father was an orphan, with young age, because he died prematurely, in an accident, I was told. And to me it was just a... I had a grandfather. One of my cousins recently sent me a picture. This picture is got a brick, one level brick on the floor, and a flat stone bearing my grandfather's name, date of birth, his title, and whatever you put. And for the first time for me, I was connected to something which before I had no connection. And this stone on the ground created a cycle of life in me, trying to see the Soul of my grandfather. And would I intrude to see him, or would he accept to accept another Soul to visit him? And that's a dilemma for me for past few days. Something I had no ?? I was, you know, you have a grandfather. Now he's there physically. There is a stone. There is a place where his physical remains are kept. (2:00)

Am I, through my emotion of wanting, be able to create that line of connection to see him, to connect with him? And with this now that has been found, the grave, you know, a grave, ??, what you call it, places we found, other siblings and those who are created of him, his grandchildren and great-grandchildren, have the same emotion to meet him. Or is it just on the piece of stone? And would I like to transmute to that level? And now, ?? sound has taken a shape in the solid state matter of stone. And, interesting what's written on the stone, confirms a lot of things, which I was told as a child, about my grandfather. And brought everything together, that how his love was transferred to us, in the ?? emotion of the blood, the father, the family, and how we respect it. That's the dimension of physicality. And, what's the dimension of the Soul? I see a physical dimension, but would I be able to connect to the dimension of the Soul to see the man? (2:02) I cannot intrude, but would he allow that connection? Would the desire of the STP and the STM be in that condition? And, is his Soul aware of the grandchildren, and the great-grandchildren he has? Would they lie to each other, or would they say, "We are not ready to receive"? Or, "Would I be able to strengthen the, find what I call, the field strength of his Soul, that allows him to know the existence of his grandchild"? Would they lie to each other? Or would they, not lie, but don't agree to be truthful, and you cannot complete, because it has to be all connected.

And, to what extent we understand this, is to the extent we can detach from physicality, because we understand the Soul is in the perfect hand of the Creator. And this is where the emotion comes in. There is no lie between the two. It's, "yes I don't, but no I do." And, "to what extent I want?" They cannot lie. STP, once embraced by the STM, has no need to lie, has... the emotion is pure love. And to see the Soul to be...

In a way, if you look at it, I explain it, because I see it in your graphs, I see it in digital form. You know, you work whole day and you come home, (2:04) and the wife says, "you've been working whole day, sit down, have a cup of tea, I'll look after you, I'll bring everything, wait till the meal is ready, and you just, you're safe, you're home." This is the feeling the STP has to receive from the STM. You're home, you're safe. I'll look after you, you looked after me, you kept me within, now I keep you within. Even though you don't ?? admit this to yourself. Now you don't need to kill, because you take from me.

And if you understand this, then you understand, the emotion between the two becomes one. And once it becomes one, you reach the level of the connection to the Creator, because then there is no dimension. One day I'll teach this, and one day you'll understand. It's too soon. Far too soon. How to judge, how to understand the emotion of the Souls as one.

Any other question?

Q: ... Listening to Mr. Keshe's wisdom, it is something that I have never experienced as a kid from my parents, generally on life and love. That's why I am super grateful to experience it now... Mr. Keshe, are you planning to show transmutation in China? (2:06) Would that mean that we'll be able to change physically as different person, can we all then fix any physical defects we are born with, with love?

K- We are testing transmutation, it is part of our work in Sanya. The full transmutation will be done in Isfahan. And confirmation of it and follow up to it will be done in Washington, or in Arizona, depends how we come to an agreement with the American government. The Chinese community is putting a lot of pressure on Keshe Foundation. They organized part of it, that you have to tell Chinese, what you're going to show, and they are coming to see. I said, "this is not a magic show." This is not, what you call, Chicago Fair, when Edison and Tesla come to show the light. We show, by definition of the technology, a number of technologies. Transmutation could be possibility of ?? one partial production of other things. We are there for defense technology with the Chinese government in part of the structure. In space development, as part of the Chinese agreement we have signed, that we are inviting Chinese military and space people to join, to be in. Then, we have extended the invitation, which is very unusual, if it takes place, to the American scientists to join us in Sanya. (2:08) The same will go to a couple of other nations. But in a way, we are not a magic show, we are not a conference to do magic's in Sanya. We bring technologies to show, it'll be...

You got to understand, part of this technology is already shipped, since last May to the Chinese, we have shown part of this technology to the Chinese military and officials. We have done a few tests to confirm a lot of things. And so, in a way, is production of the, what we call, conditions, that shows new achievements. And that's depends on you. A lot of Chinese are asking, "Show us magic." We'll come and (I) say, "If I show the magic, I have one billion people sitting there, I don't need you lot to turn up."

You're coming in for the knowledge, you're coming in to understand, and you're coming in to do, but you have to understand a lot of Knowledge Seekers in China come to steal the technology. They are well known of it. We've seen one of the stealing of one of our technologies very recently, and it's on Chinese media. It wasn't there, we showed the technology to the officials, within three weeks, four weeks, they copied it, and

they put it as a Chinese invention. We'll punish Chinese for this, heavily. You will understand very soon. What the Chinese did, stealing a technology which didn't exist, and within a few weeks after we demonstrated to the military, and to the government, they made this a Chinese invention, and we punish, in scientific way, the Chinese for this misconduct. (2:10) And they will understand soon how much they lost for this behavior. And they had the audacity to send us a video of it.

But as usual, I have patience, but the Chinese government will pay heavily for doing this, and we have informed the Chinese. You come to the conference, coming to learn about technology, not to steal, and your nation will pay heavily for this job. You lose one part of the technology which brings huge payment for you, what we call, industrial revolution. In a way, you lose exclusivity. Now you have to deal with the other governments who will come out and study. So, expect to see beautiful technologies in China, but don't come there to steal technologies.

Any other question?

Q: ... Would mass transmutation induce nuclear decay? Addition of energy could cause an imbalance to the planet and causing it to split?

K- We have a beautiful saying in Farsi. We say, "What is the ant to make a soup with his legs?" You understand? The energy of the human is so small that doesn't make any difference in the whole structure of the plasma field of this planet, or this Solar System. (2:12) It's important to us because it's our Soul. But we are, as old song say, "We are a brick in the wall." And this is the (Great) Wall of China. How many bricks you (need) to make that wall.

Any other question?

Q: ... Why upon transmutation re-entry, it felt like the body is more ... something loading data, as the awareness returns to the physicality? Thank you for explaining my experience scientifically.

K- It's that 'cry of birth' we have, at the point of physical birth from the womb of the mother. We're aware of life within the womb. Once we go through the birth tunnel, we have to learn a new life, instantaneously. But part of it is settled in our genes, in our information data, how to convert. Our Soul does the same when you go through transmutation. It's not downloading, it's balancing that the physicality can support the information, or the travel you had through the energy level.

And more and more of you will experience this. I've spoken about the cry of all of you, you make that sound when you come back through transmutation. That crying sound, that "Ahh". (2:14) Because, it's in a way, you cried when you were born, out of the womb of the mother, to click on the systems. You go through the same system, physicality confirms, "I'm returned, I'm here."

Have you ever been with a child, you go shopping and you come home, and say, the child walks in, say, "I'm home!" "Hello home, I'm home." And you laugh. And it's that way. You come back home and you announce, with that you call it, whatever word you choose. But yes, you all go through it. It's not really adjusting, it's just accepting what I call, lower level voltage. It's like traveling at 140 kilometers down the motorway and then there is a sign, 30 kilometers, "Ee, ee, ee, you have to get there." And that brings that sigh of awareness. And it's very common, it's not downloading, it's just, what you call, balancing to the new condition. And it's nice for you to explain it, because this is exactly what happens.

The more you learn to do these transmutations, the more you learn the 'art of enlightenment.' I was explaining recently, a cycle of Souls, I had to go through, in contact with, and what's going to happen. And usually when I go through this, in a few time in the future, I am in that position and say, (2:16) "Oh, I know why I saw, or why I was aware of, through the Soul, this will come." And part of this, what I call, Soul transmutation was very, very... it's... it is, because I know where I go, how it's done.

It was very, very interesting. I explained that to one of our Knowledge Seekers. I was in Vatican and the Pope was folding the hats and the robe and putting it on the table and saying, my job is done. ?? But I promised I kept. You can take the stones back. I brought the cycle to an end, as I promised, and it'll be the last one. It was very interesting how sincere the man was, and how the emotion was there. In seeing the, what you call it, the frock to come off, an ordinary man walks out, and his emotion was, "It's for the rest to understand, the time has come." And it was very interesting, how would we, or is it part of the beginning of a structure to come? In time I'll explain these things. And then when you come back to the dimension of physicality, who he is, or now what I have to set up for this to complete. What is left to be done. The Soul has taken the track. Now physical life has to bring the dimension.

Any other question?

Q: ... Good morning Mr. Keshe, there's one thing that often moves me, music. If fields and plasma bring balance to the human body, can they also be conveyed with sound, in particular with music, which already in itself conveys emotions and the beauty of the Creator? Thank you.

K- In a way, yes. But, you can listen to music 100 times, it's just noise, and once the strength of the emotion is the strength of the field of that music, it brings you a new dimension. And it has a meaning. And we say it touches the Soul, but in fact it's being at the same strength. Because that sound is made by matter state, by strings, or by somebody shouting the voice of the man. Matches you, you feel it, you touch it, and then it has a meaning. (2:20) And yes, it does. You just, if it touches, and the field strength of your emotion. Which emotion? Joy? Pain? Understanding the time and nature.

And this, it happens to all of us. It happens to all of us. Some sounds brings back certain emotions, certain reflections of life. And yes, it does. Sound does. Because a noise, a sound in music, covers many spectrums. And it just needs one of them to match. It's like a virus. If it's at the strength of the cell, it attaches to it. Music is a sound. it attaches to the emotion which has dimension with it. And then you might get the hair raised or tears and the rest of it, which becomes a sign, what you call it, the by-product of that emotion. We all have it, but how we sense it?

I get this quite often because I travel quite a lot to Central Vienna and... Every time I go to the central Vienna, there is a place in the center where the horses are in these carriages, go around the city, showing the city, it's beautiful to be in. But when you get to the center, there is sometimes 10, 20 of these horses. (2:22) And the Viennese horse show, or what you call it, center is on the same block. And this noise of horses on the cobblestones, sometimes it sounds like a march, because they're all, 10 of them, 4 of them, 5 of them are walking to go off, they got a passenger, they get off. And it brings back to me, I don't know how it does, what connection is, I never understood yet, marching of the German army, which we hear, the way they march. And don't forget, this was the center of the, what we call, German structure through Hitler. And, it's amazing, I have the same feeling, on one street in Belgium. And I have the same feeling, the same emotion in Nuremberg. Part of Nuremberg, when I walk, there's a cobblestones, and this brings the same emotion in

three different places in Europe. And it's very hard to understand what it means, what it touches, why it brings, it just brings a march of German army into my head, the way we hear it, they marched, and it's just a noise. But this noise at that frequency creates a given emotion, which sometimes I have to understand what it means. Why does this noise means this to me? I stopped going to Nuremberg, because it became too strong for me, this emotion in Nuremberg.

And, what does the sound mean? (2:24) The music, the level of it? Is it an imprint of what I've seen in music? So, is it an imprint of being there and connected to something? And it's the same, what emotion it creates. And, I heard many time, I've been on carriages from when I was little boy in Iran. Never had that feeling. My mom used to enjoy taking me on carriages to see Tehran. And it was something I always looked for. I didn't want to go with the car, I wanted to go on the carriage. And the noise of the horse, the clop, meant a lot to me. In, never had, I was a pleasure, but this sound, it's the same animal, the same hooves I call it, but it brings a different emotion and strength. And, this is what we have, it's connected to our emotion, it's connected to our Soul. But we have to find out where it's connected to and why.

Any other question?

R: ... You were talking earlier and in a previous broadcast about how you're creating Cosmic radiation and you're very clear to say, not rays, not Cosmic Rays, and not fields. So, can you explain a little more what you mean by Cosmic radiation, how that's different than rays or fields?

K- Fields is collection of rays in a way, or a field, or a ray which has a structure of strength. (2:26) Rays is in a way, in one direction, and as one ray, as one strength. Radiation is created out of interaction. But this is very, very clear in the world of Creation. If you call it, Earth is a, if you consider it, or the Solar System in the Galaxy, is like a field. The C14 is a ray, but interaction of the C14 with the fields of the Solar System, creates a friction which we call it radiation, or Cosmic radiation.

It's an art to create it, it's an art to detect it, and it needs a lot of visualization of how you create that condition. And, radiation we usually use is mono-energetic, and very much like a laser. A smaller bandwidth of strength. Ray has a slightly bigger and field. It's a volume of it. We produce Cosmic radiation at will, the body of man does the same and we know the process. And we create a field at will at the moment as well. The knowledge of our Knowledge Seekers has reached the point that we can create all three simultaneously. (2:28) In the advanced Space Technology we have passed using ?? answers we have reached creation of the fields, which is a massive step in the science and technology. And it'll be shown in Sanya, for sure.

Any other question?

Q: ... In the Bible it says that death will be coming out of the graves. What exactly does this mean and how do we interpret and understand that?

K- Who wrote it? Who wrote the Bible? What it meant in the Bible? And whose Bible? And what was the purpose of putting it there?

Any other question?

I'm not a believer in what you call, 'what is written in the Holy Books,' because it's all written to fit. None of it has been, or very small part of it has been, deciphering of which side, which part is real, is a different thing.

As I said to Knowledge Seekers, I go for a history. And history does not lie, because it's written by many, and it can be confirmed by many. (2:30) One man writing does not make the history, but what is done by two or three, simultaneously, at the time of occurrence is a better indication. Men have put things in to fit them. Men have brought things to fit them. And men have done a lot of things to fit it, to a lot of things for the rest to ?? believe. And Christianity is one of them, which is full of it.

Literally nothing in Torah is real. Torah is a storybook of many old histories brought back into one history book and given one name for them all to fit. It's actually, if you read the historical time of Torah, what you read as a Torah, is the history of the, what I call, 'grandma's chat,' which has been collected by who said what, and could have had one beginning, and then built up and built up, and it's become the Torah. There's no, nothing, we.

There's a big question mark, in the actual truth, about the whole real structure of the Torah. There was a guy called Moses, he did certain things, but the rest of the book is just made up from history. You are from this village, you brought part of your history, you elaborated, and instead of Mr. John, you put Moses in it. The other guy came, (2:32) he saw an apple falling, rotting, and the worm came out of it, he changed it to this and that, put a Moses on it, it became a Torah. And because there is no historical background to it, but you see it's all, it's all bunch of, what I call, lies, or lies in a way of stories of the time, changed too. Because it had to be made to be fit, for somebody to be good. And this is the same with all the religions. How? What is being written? What is... where it fits, if you look at it, in what you say, the race comes out of the ??, ...

I tell you what, in English we have called, we call it, as most of you know, it's called "the last bell." The last bell was that those days, they didn't know when you were actually dead, so they used to leave your body on the table for a few days, and if you didn't move anymore, they buried you. And then sometime in the future, when they came to dig the graves out, they found out the guy is not the way he was left to be dead, actually he was alive, and now he's trying to dig himself out. They connected the rope to his toe, and they put a bell on top of the grave, and somebody sat there for a few days, that if he comes back, he rings the bell, and they jump in and get him out.

And now, if what happened, a guy dies and alive, they bury him, and there's no bell, and that Soul has to come out, leaves the body, because, just because you thought he's physically dead, he's not dead, now dies in the grave, and the Soul comes out. (2:34) Would that be that meaning? The people who they buried by mistake? Or does it have another meaning? Even today, in modern medicine, every now and then it happens. Somebody that was in the mortuary, all the electronic says he's dead, he comes back. And they hear kicking and bashing into what they call, in the mortuary. Is it that? Are they trying to tell us? They were aware of some people being buried alive, but they put it in different form? This is all part of the... who decided to have a say and... Oh, you know, I managed to get a paragraph in the Torah. I get managed to get a story in... a story of the Bible. And this is what it is. Written 3-400 years later. Most of the people who wrote or told these stories to be written by order of Kourosh, they didn't even come from Palestine. There was no chance they could have ever met Moses. Or Jesus. Impossibility. But now they say, "Story about something, somewhere."

To read about Christ, read the historical books written at the time, during that time. And then you'll see if there is any references, and if there are any magic's, anywhere written by anyone. The rest is grandmothers story, which she made it into the Holy Book. And I can pick up story after story, (2:36) and tell you where it comes from, most of it, how it was put in.

In a way, if you look at Torah, Kourosh got it to be written to celebrate Jehovah, the God of, what you call, people of the area, and with it, in writing it, they praise him in the book he got to be written. It was a self-praise book. But it had to be put a lot of other things to it, otherwise the Torah did not exist before Kourosh, in a shape or any form. And, it is one King writing something about another god, that praises him for being there, doing things. Even though a lot of it was done on a goodwill, And now it's become the ?? pattern and the rest of it, to give the right to. And we see, they haven't changed, it's still 3 or 4 thousand years, they still do the same, what I call, ?? massacres. We see in Gaza, as they've done in the time of the guy, and we've seen the same by them in the past decades and centuries.

As I said before, if we do it, they say, they've done it, when they do it to themselves, nobody can be blamed. And with what's happening to, in Gaza, you will see the end of the state of Israel, by themselves. You'll see, it's coming up. (2:38) By the conduct of the misconduct, by the same as done by Moses, they became Bedouin, and they were left in desert. Now, Netanyahu is doing exactly the same. Because it's the behavior and you see the end of. They'll become nomads again, they do it by themselves. And you will see in coming time. In coming time, I advise the Iranian government to take a step to do it faster, and they're sitting and watching, but they do it to themselves. The way Moses brought with his behavior for... to become nomad, this situation will bring Israel to that point. In a way, they've been trying to destroy Palestine, they destroy themselves. But because they do it themselves, nobody can... and we'll see the end of Judaism. It's come to it's full cycle, it's the time. And they do it themselves.

When you kill 10,000 children, snipers, these Souls has to be answered to the suffering mothers and father's Soul. Excuses does not give a reason to. And nobody could do it better than Netanyahu. You will see the end of Judaism with this, because a lot of Jews will walk away from it, because of it. And you'll see more and more nations will turn back on, and sooner or later, we'll see they've done it themselves, by their own behavior. By the misconduct of the way they were taught to. They made the same, same, same mistake. (2:40) And we saw what happened when Moses was there, this guy has no Soul, so imagine what happens with the rest of them ?? with each other.

Any other question?

Q: ... (not clear .. She talks about her dream .. a doctor who was torturing people. In the end Mr. Keshe was silent) So last week, you know, a lot of time I talk about the dream and those strengths. So this time is a little bit different and I know there is a meaning. So I'm saying if I make the said I'm sorry before I'm saying sorry before that. I saw last Saturday, Bengali teaching about that. I saw a doctor, famous doctor, (2:42) he's a good doctor and he's like 65 years old, strong, and like height is more than six feet, healthy. Maybe he's going to live 100 years, who knows. So everybody knows he's very good. So, it is the real life. So, I saw in the dream, women in the big house, there is a big, big living room type thing, very big, like a palace. And then, they are torturing the man, tied the man in the ... like a bed and then... and then I was panic and ... in panic and ... and suddenly the dream somebody ... the dream. Like ... I felt somebody just moved me from this to ... And then I saw that normal dream, like everyday life, we like those kinds of dream. And then again, that mean that dream. So that time, I'm a little bit mentally strong. So I try to feel those women, they are doing that to that man. The women are tall too, those are two women, like white too, and those are tall, strong, but skinny women. (2:44) And they're 35 to 45 ?? in between. So I heard. And then I didn't feel them anything, just they want to do. They don't have any emotion. It's like a robot. And then they try to punish that man because he did a lot of bad stuff to ?? . And we don't know. But they know they're doing their part. And then I had to feel that man hurt. And then I felt that... like people, normal people. But he knows he did a lot. So it is his punishment. If he wants forgiveness to them, they're never going to understand. So he will get his

punishment. So that was bad. I know there is a lesson. I think in the future, power and we need to forgive the... I think so that was the message. So, I want to tell you and I want to tell everybody. Thank you.

K- Thank you very much. Is there anything else Rick?

Q: ... Just for clarification, recently on Internet media of China, it's widely reported that the National University of Defense Technology of China has invented a cutting edge technology, (2:46) which they call a 'plasma shield.' A lot of bloggers have made videos about this technology, and many military fans and young people are very excited, because it looks like a technology that only exists in science fiction movies, and it comes to be true. Is this the reason that Mr. Keshe just said that China will be punished scientifically?

K- The punishment for what you say, it's not going to do this. It means, we share the knowledge. There is a number of steps the Chinese have taken. We have shown openly to them the technology and they think, they have... We do it now, they can copy it, instead of following what was agreed. So, it's not balanced. And, it's not correct. You got to understand, these technologies never existed. How come suddenly in the past times, where we show technology, suddenly appears?

There is a need for correct conduct. Technology is there to come out. Technology is there, is not there to be stolen to come out. And stolen means without our knowledge, without being there confirming the technology. And this is a habit of Chinese, because it has to be Chinese. But you have to understand, what is taken, or hidden, or what we call stolen, comes with no blessing. (2:48) And this habit has to go out of this nation. Pride of nationalism has blinded the man to the lies of action. And Chinese will face that. They got away with it a lot of times with the man. This time with us, their own conduct will not ... will be left ... what you call it, to carry on with it. And as I said, there are two or three technologies, which we have shown, never seen, and within weeks they come out, they say it's Chinese.

I met one of the Chinese scientists prior to what I call, the Corona session. I was invited to one of the top military shows, what they call, scientific exhibitions in China. And when I arrived they say no one can come in, no foreigners can be in this exhibition. We were invited officially by the officials. Later on I found out why, because part of the Keshe Foundation technology was shown there and they were showing it, and they didn't want us to say this is our technology. But you have the very interesting effect, because I was there by invitation, standing at the entrance door, they had a hullabaloo that no foreigners can come in, and I saw two, three Americans standing there, I think I explained this before, and they told me to stand against the wall, right against, opposite the entrance, that I don't see anything. (2:50) Now I found out in the past few months, when we go back to China, that they're actually showing a stolen technology from Keshe Foundation. That's why. They were shocked that I was there, they didn't know one of the scientists has invented it.

And, there were these two, three Americans, they were told again, "Stand against the wall." And, as I was standing, I said to the Americans, "What are you doing here?" The guy introduced himself to be the military attaché of the American Embassy, he's come to see, and they want, it's the first time they don't let him in. I said, "Do you know who I am?" He says, "No." I said, "I'm your ?? mentist, with my technology." He said, "Oh, you are Mr. Keshe, we know you're in China." I said, "Would you like to talk?" We organized to meet later on, in an empty restaurant, which was very unusual. And, that time, it didn't click on me, why suddenly, receiving the official invitation to go to a military exhibition, which was highly confidential, having a national clearance, I have a full clearance at the highest level in China, to deal with the military, and should be no where, that I could be not allowed in. And, after it's Corona, I found out why. Because, they were showing stolen technology of the Keshe Foundation, and they couldn't say it's theirs.

And, this habit of China has to stop. And the only stops is when they find out they are not the only one. And that's their punishment. Trying to rapid develop, you don't steal. And they have this habit. They've done it in agriculture with us, they've done it in Corona with us, they've done it in Space Technology, they've done it in Gas production, (2:52) they've done it again and again. And then when we caught them, told them, (they said about us) "You're a spy in", they accused of being a spy for Americans. I said, "Now you play the game straight."

And yes, ask yourself, how come China didn't have it six months ago, a year ago? And suddenly, now they have come up. But, they don't understand the essence of it. It is walking with three leg missing of a dog. And we have established a system that Americans, Iranians, South Africans and the French will face China in a bigger way, on equal term, and this is good in a way as well. Their behavior of stealing technology is getting, what you call it, furious. Furious ?? a lot of scientists outside. And I've come across a lot of them doing doggy things, trying to get technologies. You got to understand, China is facing a massive internal financial position. And anything to keep the nation running at the moment is more crucial than anything else.

And I keep very quiet because we're too close, we work very close with this people. And yes, one of the reasons on this is, ask yourself, how come they were not there? And every time, after we show things physically, a few months later, a few weeks later, they come up with. They went to our Knowledge Seekers, prior to Corona, beginning of Corona, saying, "We know you are a student of Mr. Keshe, come and work with Chinese military to make the Gans's for it." And two or three of Knowledge Seekers who are listening, they said, "No, we are his students, we stay loyal." And couple of our Knowledge Seekers, they went to become millionaires. (2:54)

But, look at them, they're listening. What's going to happen to your children in Canada and United States and your family, and how you're running into a problem everywhere. Your Soul is balancing the books. If you haven't understood up to now, soon you'll understand. We have no problem, I don't go and take them to court. We brought the knowledge to be shared. Abusing it, stealing it, it's... you have to learn. Pretend to be a correct, and underneath of it, to steal and be conducting correct is, it's like the adultery. But in time it will set itself. We wish them all the best. But they find out what they stole in plasma, they took a crumb, but they lost the cake.

Any other question?

K- ... Our Iranian team, who are coming to Sanya conference, bringing with them the celebration table of the Iranian New Year, which is on the 20th of March, that we celebrate together. So, you will have a full Persian, Iranian New Year table to celebrate with all of us, fresh from Tehran.

Q: I hope this year will be a very peaceful year for everybody. ... I was thinking that maybe, like in Koran, (2:56) it starts every teaching with saying, in a chapter with, "In the name of God who is enormously giving and enormously forgiving." So, it means that, I think maybe the idea of punishments, is again out of kindness, out of love.

K- We call it a punishment. I call it a punishment in a way, the punishment comes from not receiving, and not punishing the way you say in common language. For some, not receiving the love given to them is more punishable than receiving the love, and not knowing what to do with it. In 'balancing the book' by the Souls, by behavior, without you doing anything wrong, you do everything correct, is a punishment by the STP.

When we talk about punishing the Chinese, the punishment to me is not going to do damage to them, is actually sharing the knowledge with more people. That what they thought they had exclusive, becomes no value.

Generally speaking, it's the same in Koran. In the name of mercy and merciful God. But, sometimes when people receive too much, they forget what they received. And, this is not, not getting, even it's on the table, you can't, you know, it's like, you like a food, (2:58) but unfortunately you have a food infection, and the most delicious food you love is on the table, you cannot touch. You understand? It's not that they haven't cooked it for you, it's not that they don't do it because to punish you, it's there, but you cannot touch.

And it's a very painful feeling. I know this feeling so well, I learnt it when I was a very young boy. And it's this time of year, exactly this time of year. I used to consume a lot of sugar, I was highly hyperactive, they couldn't stop me. Everything game in the world I played, day and night, from 5 o'clock in the morning, till 11, 12 o'clock at night, they couldn't stop me, it was just like a bullet, bullets everywhere, playing everything. And I got injured in football. And this injury came to a point that we became infectious. I hid it, but somehow my parents found out, they took me, not just now, just 2-3 weeks before 8. Your doctor said this can lead to amputation, but it has to be done something. You cannot touch no sweet, nothing for three months, to bring the sugar balance down, and we see if the leg can be saved, that the injury can be sorted.

Now, you understand, it's no rules. Everywhere you go is sweet, most delicious sweets. You know the taste of everyone, and you have to sit there and not to touch. And I understood fully the statement of the punishment. It's not that they are taking it away. You're not looking after yourself. You bring yourself to that point. Not doing the right things. And it's a self-punishment.

And this is how the Creator is. (3:00) Provides everything. It's you who deny yourself in accessing to it, even though it's there. That's to me a punishment, when I talk about punishment, we're going to hit you, we're going to... No, no, no. We make it so much available that you cannot even touch it, and that's your pain. Understand the misconduct.

Q: Yes, or maybe educate them, like I had imagined that those who are done very bad, God make, they become like, like nothing, like a dust. Till, a long time, million years later, they become, they, they go through evolution, and they become educated to become a human being again, or a life animal. So, it takes time that they educate, it's gained it in the process of education.

K- It is process of education, but when you don't have the education, it's very hard to teach. This is the problem. You know, I wonder what happens in the name of the other people. There's a lot of videos on the Internet, you can watch about the, what you call, the tribes in the jungles of Brazil. No one has ever been in touch with them, there are small tribes, 10 people, 5 people, 16 people, 20 people, they never seen man. They still are in arrows and that kind of thing, and now, not to intrude, not to put, what we call, mercenaries (missionaries) in, the scientific world is using the drones, to video them from distance. And they see this, to them it must be a UFO, aliens coming to get them and they try to hit them with the arrows and the rest of it. (3:02) But they don't understand it's a little man made things and it has a battery and he can fall and you know, the rest of it. Because they don't have the knowledge. And we watch them, it's the same.

Man does not have the knowledge and this is their problem. It doesn't mean that the knowledge is not there, just because they live in the jungle with the arrow. Human race at the moment is those people in jungles of

Amazon, where they... you're not even the arrows, they still can throw stones. And, they don't understand what's above them watching them, and what will be the future. And would they understand the future?

And we see this now in the structure of the, for example, Chinese. Chinese at the moment are in such a position that they're striving everywhere to bring some balance. Economically, the situation is not what it looks outside, politically is not what it looks outside. And how they try by stealing other technologies to show they're advancing to do this and that, back for a few of the Chinese, but those who are behind know it's a stolen technology.

And this is one of the biggest problems we see, is with all the nations, not just one. But, the punishment comes by their own structure, by themselves. I use the word of punishment, ?? we're going to do this. No, the punishment is what was supposed to be exclusively yours, to develop it fully, you took it and gave it to ten Chinese men, (3:04) who understand 1% of it, they think they ?? found ... Now 100% goes in the hand of the others, you find out, "Oh shoot!" "Why didn't we do it properly from the beginning?" And it's their problem, not ours. We don't stop collaboration.

Actually, the more they leak, the more allows us to open the technology to the others that they find that they have nothing. We haven't stopped. We would have said, "No, no presentation in Sanya, blah, blah, blah, blah, not here, not there." No! We show more for them to learn to be correct. Then one day when they learn correct, they get full knowledge. This is the beauty of it...

Q: ... We learn from your Soul teachings, we get the confidence, and we get out of the confusion of religions, and we can understand even the religions, the way it is correct to understand. And the places which are not understand, we understand it. So, it gives that confidence, that everything is okay, the challenges are okay. It's for me to better myself, to correct something, to go in front, in a way. And, that's a beautiful life you offered us, in a way, all the time, to be in a, in a happy, happy, happy state of Soul, happy state of life.

K- In a way, happiness out of correctness. It's in a way, if you do something for the betterment of more than you, it comes back to you, in so many ways. (3:06) And I learned that in my business life, I learned that in my private life, I learned that in, even the teaching of the Keshe Foundation. And I set this through personal, what you call, emotional feelings, even during my business time. Because, when I felt something, it was so strong, that I didn't want anybody else to feel it, and it brought me to verge of being killed, destroyed and the rest of it. But to me it was irrelevant, because the principle of, not under personal feeling, but I felt was more important than me.

And it's the same, sharing the knowledge that more people find a way out, is more important than you. And I learned that in a very... in a beautiful way. In 1980s and 1990s. I was traveling quite frequently around the Europe, around the World for business. And I booked my children to go to our Italian hairdresser, on a Saturday morning at 10 o'clock. They always been there from their childhood. He was somewhere, and the hairdresser was, and the hairdresser of all the players of Manchester United, it was an private, so they could see the idols when they were in for a haircut and everything else, and it was very private.

And that weekend I couldn't be in Manchester, I had to be somewhere else, and at ten o'clock in the morning, and suddenly the news came that was a huge bomb in Manchester, in city center, as we all know what happened, the whole city center destroyed. And where they (family) were supposed to be was less than 50 meters, maybe less, or where the bomb went off. (3:08) (silence) You don't know, if you send your children to death. I called Downing Street, I said, "I want a clear answer." Downing Street says, "Mr. Keshe, stand by,

we don't have news from Manchester, we are just working." I called MI5, I said, "I want an answer." MI5, the head of MI5 said, Mehran, just step down, we don't have answer, you have to wait, because we can't leave knowledge out. 5 o'clock, 6 o'clock in the afternoon, MI5 called me, said, "Mehran, your children are not in it." "There's no..." But I said, "What about my wife, they were supposed to be together?" He said, "We cannot give you an answer about your wife, just your two sons are safe." I called Downing Street, I said, "I want an answer, you have to respond to me. You're not letting us to fly in to be in Manchester, you closed all the airspace, everything we ?? could have fly in." And, late that evening, I received a call from MI6, head of MI6 saying, "Mehran, your wife is safe, nobody's been hurt." And somehow they couldn't get in touch, I couldn't get in touch with them.

I, years later, came across through my business, that in Southport there is a bridge, those who know from Southport University, coming into Manchester. I had a meeting with MI5 and MI6, we had to walk on the bridge, because nobody could hear or hear whatever it was discussed. (3:10) It was the situation of Northern Ireland, and the British officer told me, "Mehran, you're accepting a lot of responsibility in coming into this, to support that we can bring an end to the Northern Ireland situation." I said to them, "Yes, I am in." They said, "You're not even British, why you fighting it?" I said, "You don't know what happened to me when Manchester bomb went off, And I don't want no parents to feel what I felt. Let's do it." In that talk, on that bridge, within days we started stripping IRA and the rest, because there was a commitment, not to let another father feel what I felt for those hours. And because it was sincere, Downing Street always said, "It was one of the biggest helps we had to bring situation on Northern Ireland to an end." We planned, we stripped IRA and the other side from every penny we had, they had. And we did right in front of their eyes. And they all knew, everything ends up in my offices. It wasn't that there was something secret. They could follow where they were stripped of. And at the end we won. And now today we have no bombs.

You got to understand how many bombs, they've been at each other's throat for 300 years this lot, killing each other. And with knowing how I felt in Manchester bombing with my children, it brought me, a few months, few years later, to be able to be part of. (3:12) And, when it was done, it brought huge financial rewards for our organization, for our companies. Untold financial return, but it didn't matter. Never thought was, that time we didn't even think it'll be any financial (gain), it was just a matter of getting done in this everyday bombing, and parents losing their children and everything else in other cities and in different part of Northern Ireland.

And this brings a commitment. This brings a commitment to serve, irrespective of what could be consequences of it. If it helps the others. And now, 25, 30 years later, we see how peaceful Northern Ireland has become. There is no more bomb, you don't hear, there was every day a bomb going out, mother losing their children, and parents losing their loved ones, and the same. This is something I've been committed to for a lifetime. Not just because it brings you, it just serves the other not to go through what you've been (through).

I remember the fear face of my five officers on the bridge in Southport, saying, "Mehran, they can kill you." I said, "Let them do." If it stops another father suffering, it's worth it. The hugs we got each other on the bridge, some people must have thought, "These people are crazy passing by." But it was decided and it was executed to perfection. (3:14) And we see 30 years of peace. It's for me the way of living. It's not just to say and ?? go (or do).

K- ... Thank you very much for today. We're still back about our slavery program, as our friends said it is. You can register for, what you call, Arizona. We are not changing anything, stays the same. And you can still

register for Sanya, if you want to join. I know the Germans are meeting tomorrow, or so, to send three people. If you send people from communities, the entrance fee is waived, you just pay for the hotel and the flight of the people to Sanya. And, if you can afford more than the three, nominate somebody from another nation who cannot be there. And those of you who are with us tomorrow, I hope you have an enjoyable trip. It's going to be a fantastic time tomorrow, for many of you. Thank you very much Rick, and see you tomorrow or next Thursday.

(Auto transcription by Elias)

Introduce CR Plasma Material; Gans won't work for space travel; Evolution theory wrong - man came from another planet - further evolved on Earth; STM transmuted here created different races; Billions of relatives throughout Space; All knowledge within RNA; Brain never stops working - work of STM; Isotopes of Carbon - C14 - C12 - C60 - C840 - C860 - connection lines through U; C800 series part of Transmutation; Energy Stations tap into throughout U; New Space materials beyond Gans's; KS transmuting; Organs too intricate - created on other planet brought to Earth in transmutation - further evolution; Started with H add energy to Plutonium; C60 & CR; 5 C12 is C60 - crystal; 60 X C14 = C840 - Universal; Look at star - instantaneous; No gaps in U - solid gel; Truth about own creation; Sanya conference Chinese; Launch CR Material - details - currency of U - need for transmutation - Space fuel; Friday session - receiving Cosmic Knowledge - shut down too early; More on C840; Child created from mother not outside - same as U; History of Chinese theft; Chinese KS upset; Other governments steal T also - list; Second Sun - polarity shift - earthquakes - closer to Sun; About KF Butterflies how to use; Body crystals not CR; Color change due to M field strength - not alchemy; Ghent University light through Nano holes, Why moon effects tides

ENGLISH TRANSCRIPTION

(:15)

K- Yes, thank you very much. Good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers from Space Keshe Foundation Spaceship Institute. As usual, we welcome you back and we try to add to the knowledge.

As you heard in the Intro, we have entered a very delicate subject, of us really becoming passengers of Universe. We thought we got everything done with Star Formation (SF) and everything else, (:16) but now you realize your Star Formation fuel is of the wrong type. You need the right types to be able to make that

span, to be able to travel. You cannot do this with Matter-State, you cannot do this with confirmation of the, what you thought Gans's will give you, because as I said, you have not learned about the conversion of the Fields and Matter and Matter to Fields, and either way, understanding the Totality.

If you listen to the Intro, which is part of the last week teaching, and teachings before that, you must have triggered something in your knowledge. Or the discussion must have triggered some gap, or what was said has not fully been understood. Listen to the Intro and listen to the teaching of last week many times. You will find out I unravel a mystery, unraveled a knowledge that brings a very big question mark on the whole theory of evolution. We have evolved on this planet by immigrating, moving, going from one place to another. By nature of the place, (:18) magnetic (M) fields changed our feature to short, black, white, blue, Chinese, God knows what.

If you understood the teachings from the beginning, and maybe the concept has come to you, in one point or another, the question you ask yourself, which in a way was answered last week. And I'll try to expand on it, that you understand it more in depth. We explained that you manifest a time, place and position, according to its fields, according to the strength that it allows you to manifest. Look at the body of the Man. Look at the intriguing combination of the layers, organs, cells, operation, the design, the shape, the intelligence, the emotion, and the Soul of the Man (STM). Ask yourself one simple question, if you are not prejudiced towards what you've been taught. And that question is, If Man could immigrate and go through evolution, and become so many different races and colors and whatever and animals, (:20). according to the time, place and position, as the Man could physically take himself to, and in interaction of the Soul of Physicality (STP) and of the STM and the STP of the time, place and position, and the Planet. You converted it to short, tall, black, white and the rest of it.

Then, there is a very big question mark. When you look at the intriguing structure of every cell of the body of the man, how kidney has different operations, filters for different things, liver, structure of it. The question for you is, was the planet Earth so clever to produce this structure, over billions of years, and connect it through what we call neuro system and a blood? Or, if you understood the subject of transmutation, was the RNA of the man universal condition, in arriving on this planet in the right place, time and position, having the right field strength, has gone through a transmutation, where this intriguing structure of the body of the man, is actually completed in another time, place and position in Universe. And, depending on how the position and time and the place has been, (:22) has created life due to its moisture structure on upper atmosphere as we've seen from NASA, in the oceans as we've seen in what man calls in Africa, and in Central Africa in a lake, and in North America in another shape of form. And as we know scientifically, originally it wasn't just one race, there were other races, that over time, one has eliminated one, or has integrated one race into another, that now has reached the man of today.

So, as the fields of the Universe, carrying the information, the time and place as you were the woman in London going to the wedding in New York, you're transmuted and you manifest yourself in different color and shape. As these fields of the structure of the physicality of the man, on the back of the amino acids (AA) of the Carbon 14 (C14), in conjunction with physicality of the structure of the C60, manifesting, interacting themselves as man of one race in North Europe, and man in one shape in Africa, and man in another shape in Australia and the rest. But in fact, the information arrived on this planet, at the same time, the place and the condition of the position and time, created different men on this planet. Then this makes sense, because stupidly man does this, this is the kidney, this is the layers of it, (:24) this is the function of this place, this is the function of that place, excuse me, 4 billion years, according to our scientists, is not enough to develop such a intriguing structure of body of the man.

So, man has to accept, he has gone through what we call, changes, evolutions, after arriving on this planet, through the fields of the Universe. If you understand this, this gives you a massive step forward. Which means, if you can go back to the original fields, which is within the structure of the AA of the man, and in the RNA of the man, man can go back, as a natural way, to other time and place and position, where the origin of life was transmitted to this planet. When we tell you, we take you back to Universal Community, you already came from the Universal Community. You isolated yourself and became a village, where the city and its citizens outside, carried on with their work.

The interesting point for many of the scientists of the future is, when we come across the citizens of the Universe, would we look into their structure, to see where our ancestral life, in the depth of the Universe comes? Which one of them has familiarity in the space, time and energy, as us, on a basic level, (:26) that shows we are cousins? We have a forefather and see how they evolved their kidney and the brain and how we evolved ours. So, if you understand this, this opens a new dimension to the knowledge. But the interesting point for you will be that the man, who you are, the spin of his fields of energy of the Universe, has a share in your Soul, connection to your Soul. And interesting enough, as man has created other Souls to penetrate, to become part of the structure of Universe, has passed this information on to the next cycle, the next generation of life in the Universe.

It'll be intriguing how the scientists, now knowing that they themselves are part of the travelers of the Universe, arriving on this planet, going through what I call, no immigration, passport control, arrived and then, in that process, what we call, took changes according to the time, place and space on this planet. Evolution of the planet Earth. But, the STM, the original part which arrived as energy, has gone through the evolution of it, for this planet, coming from another dimension and place. In a very short time, we open that channel. And if you understood that, you understand why, when you dream, (:28) you call it a dream, you've been going places you do not know, some aliens, some familiar, and then you come to understand, the knowledge is embedded with you in your RNA in the original fingerprint of the Universal Energy and you carry all the knowledge. And you're still looking for it.

The only thing you have to do, the only thing you have to look for is the key to that knowledge. It's embedded with you, it's within your RNA, it's within the structure of it. But as you travel through the dimension (D) of the information line of the Universal Community through C14 with the interaction of the what we call physicality of C60, you have, you will carry the knowledge of the Universe, and you travel in this dimension. And once you understand this, a lot of times which you don't remember as part of the dreams of your sleep time, will start making sense, and you find out this brain has never stopped. The time you dream about the uncle, it could be 5 minutes of 8 hours of sleep. Where is the other 7 hour 55 minutes has been spent?

In understanding the new knowledge, in exploring the depth of it, you will start seeing why the scientists, through their ignorance, say man only uses a few percentage of his brain, (:30) where in fact the brain is continuously used 100% by the Soul, for its interaction and memory bank of data, all the time.

As I said to a scientist, when we were doing the condition of one of the coma patients. I'll explained this and if you understand what it means, you have solved half of the problem of your knowledge and understanding. Is that the brain scientists tell us we use 5 or 10% of the brain and the rest of it is not used. Where it shows their ignorance. You put your arm on your side and don't use it for 10 years. It rots. It hangs, the muscles don't move, the fingers go through all sorts of changes because it's not used. Then think, is there any part of

your brain which is dead, not working, wasted just to be there because it was created? Or does your brain stays fresh, working and continuously operating, which means it never stop working. It's in use. It's our scientists, through their ignorance, have not understood. The other 85 - 90% of the brain of the man, while the man says, is not used, is continuously used by the STM, by connection to Universal field strength and other operation of the body of the man.

So, we see how science changes, how much wrong information we are given, (:32) and how as Knowledge Seekers (KS) we have to open these doors, and in a way, walk away from fallacies of the past. Then it comes to you, in how you connect yourself to this C14, how you use the C60, how you open the door of the what I call the knowledge of Universe and you become part of the Universal Community (UC) in the field strength time, place and position. Creating condition of life through what we call the transportation fields of the Universe is different. And in so many ways man needs a step up to do and then you come to see how the Universal Community works by knowledge, Universal technologies and understanding of the work of the Universe, which in a drips has become part of what we call, the life of the man.

Now, is for you Knowledge Seekers, to develop technologies which are connected to the C14, C12, and ?? C60 and then the Carbon 840 (C840). You understand why this 840 will come and 860 will be conditioned on the back of it. These are not the knowledge that man knows and in future become part of the work of intelligence, communication, and life process of the man. It'll be interesting how man will realize this. (:34) There is a common denominator working in a way isotope combination of fields of the Universe. We call it the Carbon, in the Universe known as connection lines. How we change field radiation into matter state. And this has been the dilemma of the man.

On Earth we create ?? the atmospheric condition of the Earth as our scientists tell us. And then we give it Inertia to give it the manifestation of the matter state. In the Universal M fields, condition of the containment and what you call Inertia of the matter, becoming Inertia of the confinement of the fields of the Universe, is done through C60 and in connection with it, the Carbon range isotopes of 800. This will give you multi-facet structures, which allows you to live in a Space, go through transmutation, and then arrive, manifest yourself in the time, place and position.

The Carbon 800 plus, which will come as part of the structure of the work of the transmutation, will be taught thoroughly in the coming time. This material, these kind of the structure of the field energies, will bring about conditions that man can transmute to every dimension in the Universe instantaneously, (:36) and 100% guaranteed that life will never ends, in any shape or form.

In the world of the physicality, you eat food, different combinations, to support different field strength structure of the body of the man. In the Universe, you need to tap into the Universal Energy, to be able to feed every layer energy field strength of your Soul, or your transportation system, or whatever you call it. And this cannot be done by just seeing the fields, feeling the fields. You have to be within the zone, we have to be within the structure, that holds on to these points of energies, and there are huge number of them across the Universe. In a way, they are your "takeaway" in the Space. They are your "supermarket" with everything you need in it, for you to survive any time, place and position in the Universe. It's just for you to know where to shop and from which shelf to pick up the right thing depending which, what we call, taste of the emotion your body has. Do you like a Chinese or would you like Indian? And when you go to the supermarket you cannot buy the herbs of Chinese to make an Indian food. It does not work.

If you understand this, you will find out I have opened the secret of Creation and life of the man in the Universe. But in the coming time, we'll explain it more in detail. (:38) I (will) go through this, in a very thorough way, show you the systems, materials which bring you to that position. Which allows you to understand and walk away from, what you call, Gans's and other things. But you understood the physical structure, of the field interaction of these materials.

As we progress, our scientists are developing these technologies, that it can be shown. In Sanya, you will see one of the most sophisticated advanced technologies that none of you have ever seen and understand. And this will bring you new dimensions. And this brings you a new understanding.

Those of you who attended last Friday, many of you have gone through evolution of life in your cycle of thinking, physical life, and emotional, and the living life. A number of you have started the transmutation by wish, by will, but you still get lost in it, and you don't know where you are, and you go and do things, and now you're getting more confidence to become the 'transmutators.' You find emotion, the strength of emotion of transmutation, which gives you the transmutation. And some of you have not touched that. You're still looking for physical transmutation. But you have to understand, you have to carry the emotion of the time, place, and the position, and the emotion of the STM to give yourself manifestation of physicality.

Now you understand how advanced some of you Knowledge Seekers through emotion and feeling have come and becoming and moving forward with. (:40) You go shopping, you go down the road to somewhere and you come back and you're aware this was the Soul trip, I'm still here in physicality (P) of the man. As I get reports from different Knowledge Seekers since last Friday, as we tested a new system, overcoming, superimposing the field strength of the emotion, and what we call plasmatic condition of Cosmic Rays (CR), over what we call the physical matter state.

So, you have started going through learning and understanding the process. And when you go through the full transmutation, you are not scared. You are not afraid, "What's this in front of me? The body is not what I know, but it follows my instruction." Or it doesn't follow my instruction because I haven't made the right connection to it. Now you understand, how the process of Creation, as you thought, you went through the evolution of time and place and space and position on this planet over thousands of years, applies the same to where you came as energy, to go through the evolution of life in the Universe, to become man of the Earth. As you are part of it, you came from it, and this intriguing structure of your kidney and liver, is now the product of this planet. In a way, it has been served on silver platter. And, the chef of the fields of this planet, (:42) has changed it to a beautiful dish, as what we call, the human body and the rest we see on this planet.

What becomes important for you and in a coming time we'll show, is the delivery of the energies of the Universe, making man to become the passenger of Universe than the 'village of the man' and you cannot do this unfortunately, with little knowledge of what we call, the MaGravs and Nano materials you have. Creating Universal materials in the plasma condition, is the opening of the new science for man. Where you create fields of the Universe, in the dimension of both, manifestation of the fields, and interaction of the fields, and the combination of the fields to create time, place and space.

As part of what I call Carbon 800 plus, in a coming time, you will understand how this works, and how most of the planetary Systems, Solar systems, Cosmic systems and Universal systems, all work through the division of the field forces of this combination. And depending at what level, at what strength you use this combination, will give you from Plutonium to Hydrogen. From materials man cannot even imagine exists, with atomic numbers, by order of magnitude, bigger than what man has in his Periodic Table. (:44)

It's important for you as Knowledge Seekers to move into understanding the field forces of the Creation, not number of turns of the matter state of your coils. Look at the design and the intriguing structure of the brain of the man. Then understand the complexity of the life in the Universe, which this, what you call your brain, is a drop in the ocean of the knowledge and the creation and the created matter ?? life in the Universe. Now you understand, why in the teachings of the past, I have mentioned many times, when you travel from Earth to another dimension, the AA structure of your brain cannot exist, because there is no Nitrogen in that environment. So what happened? It'll be your demise? It'll be conversion in what we call, evolution of life for you.? Or you know how to handle it, and you dictate the position, time, place, and energy strength of your field.

Then if you understand this, when you travel from London to New York, you decide to manifest as a woman in a wedding dress, as understanding the structure of the fields as a dog, or the roses which the lover gives to the physicality of the woman at the wedding party. You can even go into the dimension of becoming the structure of the ring and feel how it feels, emotion, (:46) directly in touch when it goes on the finger.

You need to understand why for past months and years I keep on telling you, "Please ignore the structure of the turns of the MaGrav and look at the fields." Now you understand how those fields play the game. And how you can use them to create the understanding of the evolution in the Universal Community, and not just evolution of the man on this planet. You need to develop technologies that it brings into play, the C12, 14, C60, and then go in understanding of the, what I call, cubical structure of physics, with isotopes of Carbon 48.

You got to understand how the system is nourished. If you take C60, and if you understand the operation of Cosmic Rays, there is a big discrepancy in the energy plasmatic fields, and depends on the angle of entrance of the field into the surface area of the, what I call, containment of the C60, the crystal structure. And that interaction leaves a residual which becomes the energy within the structure of the C60. You have to understand the, what I call, how we explain energy from the beginning in the teaching of Keshe Foundation. (:48) And if you understood that, now you understand this part. We always said, in the plasma technology, energy is considered to be magnetic fields in motion. And when you have 5 ray isotopes of C14 hitting a C60 surface containment, has a residual that, in a way, becomes what you call, field radiation. And becomes the energy essence of keeping the crystal structure in operation.

If you have 5 field strength to 5, what I call, dimension of C12, you understand this clearly what it means and how you can transmute, use the energies of the difference, to sustain life within the crystal. And this is how your Soul works, this is how your central energy works. This is why I kept on saying for decades, that the food you put in your stomach is only 20% of what you actually absorb from outside, because this, what you put in stomach, it once converted into plasma, become precursor, become the source that the higher strength trying to feed, it feeds the body of the man on its way.

Now this brings into focus a lot of teachings of the past, they're all coming together to give you the time, place, position, manifestation, (:50) transportation, transmutation and everything else, that is in your hand, and no one can touch it, nobody can preach you with it, unless they want to find a way to steal it from you, in a way taking it from you, or connecting to you, to use your resources than theirs. And as it cannot happen, you understand, the understanding, the knowledge of the Creation. So, for the first time, maybe in a deeper understanding, you understand that even the physicality in the STM is evolution of the science and

technology of the Universe, which has found its time, place and position, in the condition of the fields of this planet to manifest itself as man, or any other creatures.

And, you understand this, if you comprehended the meaning behind it, means you're just part of an evolution of the Soul of the Creator (STC). And not more, and nothing less. Then you understand, 'I made man in the image of Myself.' Which means, it's Me, you're just, in a way, dressing it up with your physicality. And in that process, with the interaction of field of the time, place and position which itself comes from another field strength of Me creates a new you or what you call your evolution. (:52)

You look at the STM, you look at the physicality of the man and you say, now I understand I came from another planet or whatever connection Soul understanding the fields. Don't forget, this planet came through the same system. It's the interaction of what I call, uncle with the niece. Where the niece was created out of the interaction of the same, but connection to another.

Now, those of you who understood this, should be able to create the first transmutation systems, without the matter and without Gans's. And those of you who cannot, we'll have a piece of news for you after the break. But, you have to understand how you use the knowledge to be part of the structure, and you not use the knowledge to destroy the structure, as you shall not be allowed (to do). Now you understand the purpose of C60, the purpose of the Carbon 800 range and the purpose of what I call, especially Carbon 840 and Carbon 860. This will play huge game in which part of the Universe you connect yourself. And you have to understand this. The scientist of the man has to understand the game play of this structure. And one day, (:54) one day man will come to understand this position. It has no choice.

If you wonder why I brought this subject of Carbon 840 and 860 range, soon you'll understand. This is the energy fields of the Unicos. This is energy fields of the Universe in conjunction and interaction with each other. We speak about ?? C60 (C16) which is the combination structure of the physical matter of the C12 and the point of the place and the combination of manifestation. Then we speak about the dimension of the C14 which is an energy pack system, not the physical dimension pack system. Then we speak about C60, which gives the structure of the matter state confirmation of the existence, in a crystal structure of the time, place and position. Now if you take 60 of the C14 with the C60 itself you'll find you reach a new dimension of carbon 840, which this gives you another dimension in the Universal energies.

But man has to understand the formation of the ?? C16 (C60) and how C16 plays the, what we call, (:56) imprisonment of the fields, conversion of the fields of the Universe into the matter state to be able to survive in the ?? tent in this crystal structure existence, but at the same time to be dynamic fields and not a solid state diamond on the ring of the man. If you understood this and you understand the confirmation of the C14 Carbon, what we call, 840 and 860, then you understand I have given you the key to transmutation across the Universe. Given the strength by the order of magnitude to the whole structure.

And then you understand why Universal field forces communication within the structure of it brings into play a new cycle of life for man. Transmutation at higher speed, instantaneous. And then you understand why I said many times, when you look at the star what you see, is already connected to you through the dimension of the zero time place and position ?? and energy. As it is there, you have the same strength in your body that you see. Because what you see as stars in sky is the fraction of total lives in the Universe. In the empty space gaps between what you call planetary system and the stars is actually dimension of another plasma which has been blind to man through the strength of his AA plasmatic magnetic fields. Otherwise the Universe is a one solid gel. There is no empty spaces and you only see what your AA field strength is in parallel with the,

(:58) what I call, energies of the Universe open to your AA. Outside you say 5% of the Universe is made of planets because they never understood the 85 is more solid than what you see as your stars, but it's the gel connecting, holding all that together and as you don't have the knowledge you are, as I said, 'ignorance is a bliss.'

Now the job of you as Knowledge Seekers and the future scientists is understand the key of transmutation, understand that you're part of what arrived, and not were a part of created all in, and you have in a way converted some to fit, to live on this planet, and you've gone through mutation. As I said at the end of the Book one, 'God is the Creator of all and man converter of some, because he doesn't understand the rest of the other 'some,' through the lack of knowledge and his total ignorance of his own existence.

So maybe today for the first time, you have the confirmation if you understood the process of evolution, if you understood the process of C16 and C14 and C12, you and your friends are all Passengers of Universe. You immigrated without passport to the field strength of this planet by your ancestors some time ago, and you claim it to be yours. Now you understand the truth about your own. You're nomads of the Universe, and everybody else is in the same shoe. (1:00)

We'll go through a break, and we'll come back. But now open your eyes to what is to come. And the new cycle of technologies and sciences that we opened for you to be able to go through what is your wish, to remember life in the dimension of the man, and at the same time, have the emotion of the Universal Community that you are part of, and you're just finding your cousins. Have a wonderful time, that these cousins are billions of them. And they all look different as they went through their own evolution of time, place and space, and position. Rick, take us through a break. We come back and we carry on.

>> **BREAK** >> 526 KSW February 22, 2024 (1:06).

K- Oh, very easily as usual, as before. As is our tradition, we make some announcements here that we will bring the Knowledge Seekers up to date. First of all, is that the Chinese Knowledge Seekers, it only applies to Knowledge Seekers because you have to have a QQ connection and the WeChat and whatever it's called, to be with us in a, what we call, meeting of tomorrow at 8 o'clock Beijing Central Time. We have invited

Knowledge Seekers across China to join us in this QQ presentation. And, in a way, to what you call, answer some of the questions and other points, which is concerned with Sanya and what we call, the upcoming conference in China. And our collaboration, cooperation with the Chinese community. And we try to give the same, one more QQ, before the conference in Sanya, and to bring up to the position of what it needs to be known and what is there to be done.

Our work will carry on the same. (1:08) The German community has managed to appoint the three, raise funds for three members of the German community of the, what we call, looks like an Austrian, Swiss and a German, that will be sent to Sanya as a representative of the German community and they've raised funds for the extra one or two which the Foundation is organizing for them to be present from other communities. It still goes on with the Italians are busy to send their representatives and we haven't heard anything from the Americans because they are a rich lot, they are a stingy lot, they don't like to spend to put anybody there because most of them they go themselves. And we'll see what happens with other communities, even Chinese who will sponsor some people to be present in the conference.

As we see, as we explained, new dimensions in technology will be shown. And some of it might baffle you, some of you will bring home a lot of knowledge. There is one interesting point. This we have had for quite some time, but as we enter the dimension and interaction in the fields and the working of what we call C14, plasma C16, and to understand the work of it, and what it has a value in the Universal structure, then what we call, matter state, Keshe Foundation has launched a new material which is a Plasma Cosmic Ray material. This material will become the backbone of the, what we call, the currency, the existence and the work on this planet and in the structural development of the future. (1:10) We have put this material on sale on the Keshe Foundation website. We will not release the method it is produced is converted into Cosmic Ray as a plasma and due to his reality and the way functions one gram of this material has been put a thousand Euro. This become very much like a gold backed by currency. We buy, we sell, we exchange this material. It's the same what you had as when you bought the Keshe Coins as donation.

This is the first time we start the structure of the Universal structure, which means this material, if you want, you can use it to create the conditions of the Space travel. In a way we sell the Space fuel. It's not easy to produce in different combination, domination of this will be released in coming time. Every package will have a sealed registration number on it, which means we know it's produced by us, refers back to production and we know how it is. In a way, you mine the gold, you mine on the Internet for Bitcoin, now you have Space back material. This structure, this work will become part of the Universal working of many governments in the coming time will follow. You will understand the potential of it as it comes and this brings us back to Keshe Coins and the rest of it which now we have produced and we release material to back. You can purchase this and you can sell it back in the future according to its price. We leave it to fluctuate in the market. This has a huge military and Space applications. (1:12) Government will give their arms to get hold of this material. And this is part of the work we have reached and it'll go through with the what we call, the Chinese.

This is a backbone of the material into space travel. And in so many ways it brings a new dimension, a new fuel, new what we call, energy pack into the structure of the development of the upcoming science and technology. This material has the capability of the interacting with the STM in the dimensions, if it's used in the appropriate way and in conjunction with its strength. We launched this because it's the time to launch it. Even though it's not, will not be understood by many ordinary men. But some of you who are working and trying to become part of the transmutation, you need this material. You cannot do without it. It's one of the impossibilities. And you will understand in time why. We give you a massive option of the different isotopes

of this, and according to, they'll all be the same. Compared to what it is and what will bring, the price we put on it is a 'peanuts.' But it needs to start from somewhere. It'll be one of the strongest developments in the Space technology of tomorrow.

When I showed the physical structure of this to the Chinese military, it baffled them. This material used in the right way, make everything within fields structure invisible. (1:14) But you have to know how to use it. And you have to know what you do with it. In bringing it into structure of a home, will bring a new dimension of fields. Will change a lot of things, and in the structure, will bring the new change many people have been waiting for. Transmutation becomes much easier, because this is the field within the structure of the house.

We gradually feed this as production around the world, and now you understand why we closed all our Gans operation around the world. Because it was no use producing something which had, has moved to the next level of the technology. Do not touch it, if you ever break into the seal, use strong gloves that at least you can't absorb some of the energy of it and not direct touch it. It's a breakthrough in the world of science. And you will understand it. And touching it will bring you a new dimension of thoughts, energy, and in so many ways, a lot of other things. But we advise you, never break the seal.

In the coming time, we will show you how this material is used. And hopefully, in Sanya, for the first time, as I said, you'll see the revolution, evolution in science through development of this material.

You will come to a point that we run into this point of saturation. (1:16) And many of you went through the transmutation on last Friday session because of the presence of this material. And then we had to stop the session probably on 10 o'clock on Friday night. As we saw changes, we had to take steps. And we were going to run the session for a couple of days, but the saturation of the fields, conversion of the fields, forced us to abandon after what we call, we are supposed to be until 5 o'clock. We were until 10 o'clock at night. And then, as we informed the Knowledge Seekers who were present, we had to close the session to what we call, bring everything into conformity and understand what and how things switched over. Without us wanting, and in analyzing our system over the weekend and there on, we found out that where the evolution has happened, we knew, we know this knowledge, but through a mechanical failure brought this about.

And many of you have moved intellectually and what I call understanding wise, one or two notches up. You know it, how it changes you, how it's changed you. And it's has been primarily because of this new field energy, which was used and brought into operation. And we told you it'll be different on the, what we call, last Friday session.

Those of you who join us in next month's session, you will feel this in a much bigger way. As we are preparing you for transmutation as well as Knowledge Seekers wrote, now I understand the process. Now I can see how you're educating us. Because I've been through it and I see it. And I can do it. (1:18)

You got to remember, we are not magicians. We are scientists, scientific organization, and we have the same way on teaching. This material we'll bring in the next cycle of technologies. If you remember, Mr. Keshe jumped from Nano into Gans's, and from dynamic reactors to the other reactors. And everything was a step by step to bring it. Now with this, we bring it to the next step of what we call, Universal energies, Universal understanding of the fields.

You will understand this in the coming time, and you will see how this will work. Putting one or two or three of these across in the house you will feel the energies and the frequency that you transmute. And how easily you manage to and gradually becomes part of the structure. Please do not break the seals as atmospheric contamination once this is sealed, can change a lot of things inside it. We go, as usual, with our work. And if there are any questions, I try to answer. And we move on to the next part of the teaching.

Q: ... Why did the machine lock up and did not want to give any more in last Friday's session? (1:20)

K- It didn't lock up. We locked it up. We withdrew the material from the system. We withdrew the communication systems out. It locked in too good. And in the coming months, you will receive, you'll understand new knowledge's which you never had before. And then you understand how you have connected to Universal knowledge. And some of you have already started since last Friday going to the beginning of that cycle as we get the, what we call, your testimonials.

We had to bring the system. It's very unusual for me to turn up in the lab at 10 - 11 o'clock at night. I had to go there to literally stop the system, because Knowledge Seekers reported that they can hear from certain channels which are closed. And they turned up, because we were on the Cosmic Ray level. And I had to go into the lab and physically terminate. And as I told Knowledge Seekers, we bring the session to an end. Because there was too much in what I call, Universal fields, and what I call, knowledge was coming through, which was not supposed to. It's too early. Far too early. And that's the reason we closed the session. We are, as we agreed, what I remember with you was 9 to 5. And usually we leave the lines open, or whatever we can. But the systems moved in much (more) powerful level, and we had to interfere. (1:22)

Any other question?

Q: ... I had a couple of questions occur to me, towards the end of your teaching this morning. And, the first one is, you were talking about these higher energy structures, like 860 Carbon and 40. Does the Earth environment permit the physical manifestation of these higher energy structures?

K- Of course it has, otherwise we won't exist. But, it reduces in field and the strength. In a way, we take weaker strength of it, it gets diluted. As it interacts with the... in a ?? magnetic field, as it interacts with gaseous energy of magnetic field, it reduces in space.

If I can answer you in a very simple way, I love the video of NASA, because it opened a lot of things for us to explain easier, because it can physically be seen. The living structures above us on the higher upper atmosphere which has been recorded. They are the same amino structure as us on Earth, on the physical side, and the same as the fish in the ocean, and the living things in the gas in the center of the Earth. (1:24) But due to their lesser interaction with the magnetic field of the Earth gravitational Inertia, they keep a, what we call, a more dynamic translucent energy. But in their lives they still have the same, the same structure as kidneys, brain and everything else, they absorb fields, they release fields, they are intellectually very powerful that they can decide position, time, place and whatever we see. They are much more intelligent than man in intelligence, in understanding, and their life is much, much longer than man. They live into hundreds of thousands of years, where man is limited. Because they don't have that dimension of physicality, but they absorb huge amount of energies. Without the existence of this layer of life above us, life would not have been the same on this planet. They are the creatures which allow us, in a way they shadow us. We're under the shadow of their field forces, they absorb a lot of things which our body would not be able to exist, to maintain and to hold on to.

In the future you will see these kind of things because you can develop it these structures ?? used. So you've got to understand how C14 in structure with the fields create this position. You have a combination of the fields like this and in the future you'll understand how the physical structure of different layers of for example your kidneys produce if you understood this. (1:26)

You have a combination of C60 crystal structure. When we talk about C60 is not that you have a Carbon with 60 side, it's the plasmatic field of 60 Carbon structure of atomic structure which makes C60. That's what it gives us a structure. 840 is a 60 of C14. Which that 60 structure taking shape in the structure of the C60 in what we call, structure of Universe, will create a new dimension. And that dimension can hold, can contain, the totality of what we call, Universal Knowledge. It's like a microchip. And we are in it, we are part of it. Now we have to learn how to connect ourselves into it, to be able to do instantaneous, the way your brain works.

So you have a C60, which is a combination of the C12 manipulation energy. And then you have, for that 60 point, 60 of the C14 energy, which gives you the manipulation of 840. And this allows you to transmute between 840 and C60. Then you have a manipulation of 168, which is the combination of another combination of the field forces, which this on its own will create another dimension in the field of science of man, which the 168 is again creates, (1:28) if you understand it, another structure, which is a combination of C14 and 12.

(I have to go on to a call, urgent. I'll come back if you can take it, please. << Mr. Keshe answers a call >> (1:30)

K- I am back ... What was the question? What was the discussion?

Q: I was just, extrapolating on what you were just now teaching in answer to my question about whether this environment of the 860 Universe, the 860 energy, that creates a Universe of Universal Knowledge or something? (1:32)

K- 840 is in that dimension. 860 is a combination link to the next structure. In the future I'll teach about that.

Q: Is there a physical structure?

K- Yes.

Q: ...Actually available in that universe?

K- It is not a physical, it is a field structure. You have to understand that you keep on looking into what I call, the MaGrav and not the fields of the MaGrav.

Q: Well, no, that's what I was thinking, is that it's just an energetic structure, a field structure.

K- It's an energetic structure.

Q: But so, physicality is not even available in that kind of Universe.

K- In its own strength, yes it is.

Q: Okay, I understand.

K- In its own strength, you have to be in it, and have the fields of it. It's in the dimension of the line of the communication, or interaction of the fields of the Creator in a different strength. You got to understand everything started with Hydrogen. The whole life started with one field energy.

Q: Well that brings me to my second question... Okay, so how do these higher energy structures relate? What is the relationship and the purpose of these higher energy structures in relationship to the common denominator of the Creator?

K- I call it a DC. DC, the base continuous, is the Creator, line of Creator. In interaction of the fields of it, due to residual resistance of what I call, field interaction itself, has created fraction and friction. And then the interaction of these fractions and frictions, created a C14 and Carbon... (1:34) And then, in the interaction of this, has led to creation of crystal structure, which has become the creation of the physical Universe.

Q: So this is just a natural development of the interaction?

K- It's a natural development. The whole concept that we were bigger and we ... divided, is a fallacy. We started from very little, but a continuous field structure, that the interaction of itself, by itself has created another dimension and strength. We haven't come from Plutonium to Hydrogen. We started from Hydrogen, and depending on the condition field interaction, we became Plutonium. This is the difference between the understanding of the creation in the present world of science and the reality. And that's why man has so much problem in physical understanding the totality of the structure.

This I explained, I remember clearly, on the table to a couple of Iranian scientists, while we were sitting in a presidential conference room in Tehran, because they wanted a meeting there. We usually used to meet, and that day they wanted to meet at Ahmadinejad's presidential office. And I explained to them, and maybe some 15 years later I explain to you. The creation comes from the same beauty as nothingness and generosity to be in ?? awe. (1:36) So, when you get an atom, when you get the first double structure, you call it Hydrogen, a proton, and an electron, in what we call division of fundamental, what we call, particle. And then you get the structure of the Deuterium and then Tritium. And then you move up in understanding, absorbing energy into Helium.

It's the same process as the egg in the womb of the mother. The egg is there. In creating the right condition environment on receipts of the right field strength, you have sperm, and it becomes that proton and electron. But the environment of the womb is that galaxy, is that Universe. Then you divide absorbing energy from the division of itself to another cell, and then another cell, and then you become a human. When your parents, or when the creation of life had the first interaction of the egg and the sperm, there was not a human being becoming the egg and the sperm. The initial fundamental base in amalgamating, interacting with the field of itself, was created by itself. That field in the womb of the mother doesn't come from outside. It's created by the mother itself, by the interaction of fields of itself, which matches to the field of the egg, which matches to attracting field parallel in the sperm. And it's no difference between the cycle of the life in the womb of the mother and the process of the creation in the Universe. (1:38)

Creation of, by division of, by creating the environment from the itself, fields, leads to the creation of life. But in essence, it still is that information came in, in the egg and added to the sperm, created the first structure. If you understand this, when we look at in protons or neutrons of atomic structures. Or when you look at the electrons, atomic energy structure, you see they're all different. They're not the same. A layman says a proton's got two protons in it, and so that's it. To a scientist, to man of knowledge, these two protons in Helium are totally different from each other. They have different combination of sequence of energies. Even the base is the same. That's why they stay separate.

And this is the same with the world of Creation. C60 is that seed in the structure of the C840. But it still needs a connection to the other Universe, which gives it to partially by the division structure of 860. It's not on its own. It's a confirmation of Unicoise, and ?? not a Universe. You cannot be a Universe a part of, if you don't have connection to the other part. You cannot just be a kidney and be on your own. (1:40) You have to be part of a structure of physicality. You have to have a connection with it, energy wise and physically. And this is the same. This is why in the teaching of last week and the week before I refer to the football and five-sided edge into it. It's the field energy, not the structure being different in the world of the Creation. And if you use it right way you can bounce on it and bounce off it.

If you understand this and understand the material which is on the screen and will be delivered in much bigger ways in the future, we use it as a Universal currency. You want to travel to such a planet, this is the combination of it. As I said to the Chinese military and to the Chinese government when we signed these huge contracts with them. I'm not interested in Gans and food. The resources to expand the technology will come from its transportation, transmutation and they couldn't understand. And now you see it on the table.

You want to go to Mars, you need the key combination to... is on the table. You want to go to another dimension, you have to have, you have to have what you call, the 'toll' we call it in English, you .. you have to pay for it to go to a destination, you go to... You have to have the road. This material is that road. But, those of you who bought the two discs (Nano Mirrors) from us, (1:42) you are going to have a wonderful time with four or six of these in your possession. Then you understand what the next step is.

I showed this material and I laughed. When Belgium officers came to my lab and confiscated the nuclear material and put in the nuclear safe in my lab. I said, "You stupid guys, you don't understand the dust on the table is what, is the work, not what you locked up."

It's understanding, now that we taught to open the next chapter, in 840 and then above. In teaching of few weeks, so I explained to you, I open new doors of knowledge. This knowledge is nothing new, it's been with us for decades. But you couldn't understand, we had to teach. Now you have to understand, with this technology, with this material. You are the STM, you don't need the physicality of the man. Now you understand how we are teaching you to understand the energy center, what you call, the Soul of you, because it works with this. I can't put your physicality here, because this is a field transfer. I can't fit you into as a physical dimension. But, I can condense you in a Crystal structure of the physicality, in this material in the fields and transmute you instantaneously anywhere else and you manifest yourself, you pop out. You go in as a man you come out another planet as a monkey because the monkey in that shape can exist, a man cannot. (1:44) You have a red blood here and there you have a purple blood.

Now you understand. It has a value. Today we put a thousand Euro per gram. In a coming time we're not after the funds, we're after energies that you participate to make a bigger structure and become part of and then by enlightenment you receive. That's how... It's not a payment, that's how you receive. What I put on the table, what's on the screen, once man understand it, will give life to be able to use all these properties and the knowledge it connects to. You will understand.

A couple of our Knowledge Seekers went through this last week, two, three, four of them. And they have started transmutation of the energies by will. And it's taken them a few days gradually to understand, "Oh God, now I can do this." At the beginning they were, what you call it, panicking. Now as they do more of it, they understand, they become in control of, they do. But they cannot transfer it to anybody else. It's elevation of, what I call, where one man is standing, the last man is standing. What you see in the picture on this

screen, has changed and will change the life of every living things on this planet. You will understand. You thought computers changed your life, mobile phones? (1:46) Everything you ever thought is on that.

Any other question?

Q: Thank you, Mr. Keshe.

K- You're welcome. I hope to see you in Sanya.

Q: I'll be there.

K- Thank you very much. Ed has a beautiful Soul, you feel it when he's around you. It's amazing when we met him.

Any other question? ...

K- .. I was talking about you to one of the KS this morning carry on.

Q: ... I have a question concerning what we're seeing here on screen. The Knowledge Seekers coming to Sanya, can they take it from Sanya back home, or because I think when it is valid to 1,000 Euro, it will be stuck in customs, when you send it. (1:48)

K- If you pay for it, we'll bring a few pieces. (1:48) If we can get it through customs, forget about you. But, yes.

Q: That sounds good. Okay, so then I will order... I will pick it up in Sanya.

K- Yeah, you need at least two pieces, to have the interaction of the fields.

Q: Okay, but 4 is better, then you can do a Star Formation?

K- 4 then you can do a different thing... yes .. 4 gives you, but you have to understand what you do with these things. You cannot open them, don't open the seal. Yeah, we'll try to see what we can bring with us and how, what is the limitation.

... Any other question?

Q: ... The question is, if she puts saliva on her dress, will she land in a different location? (1:50)

K- If she what?

Q: Saliva. When you swallow in your mouth. If you put it on your dress, because then she thinks it's a different AA.

K- No, it's all part of the same.

... Any other questions?

Q: ... Hello Mr. Keshe, I want to ask a question that may be presumptuous. You have been developing the systems non-stop and seeing that China seems to be suspected of stealing the new technology again. Is there not much time...

K- No, no, no, let me, let me clarify. The Chinese got battered by this last week when I told them they... It's not the government, it's the Chinese community people who are Knowledge Seekers. Even... you got to understand, part of the technology given to Chinese... I explain to you very simply. We have Knowledge Seekers, they are here, they listen to the translation of it, or they're live online. When Corona happened, at the beginning time of Corona, when we gave the Cup 1 and the Military tested it, the military, Chinese military,

went to our Knowledge Seekers and asked, those are very close to me in China Keshe Foundation, (1:52) and asked them to join the military to produce the Gans's for the military and the government, but they don't want to contact Mr. Keshe. And as they are close Knowledge Seekers to me, they refused. They said they stayed loyal to the Foundation, but they can support. A few Knowledge Seekers who are around the Foundation, just for the money of it, joined the Army and went into production with the Army. But they never put anything back in the Foundation. And they took the glory and the Chinese army went silent.

We have the same situation in the Mongolia. In the Mongolia, I worked four or five years in the Mongolia. The tests with it, the harvesting, everything, everything else with it. And then one of the Knowledge Seekers behind our back, has gone taking the work of the, what should have been stayed with the Foundation. And then we have a Knowledge Seeker who was being with the Foundation for a long time, was asked, "If Mr. Keshe is not there, would you take over and we deal with you?" And we have Knowledge Seekers who have sold us recently to securities. We have all types. And we have Knowledge Seekers who worked with us. Some knowledge was given to them, or they took from us in different shape or form, and used it in their name in the military.

I was in... I think I've told you this before, for you to understand how theft is done in ?? science, by government. Prior to Corona, and I am working close with Chinese officials. (1:54) They couldn't clear out, so how are they going to do it, but they were doing, working with us. Wang Lin and I were invited to one of the most exclusive surroundings in China to go the next day to meet China Space people for what they wanted to do the next development of the technology in the Space. In the morning, we were told, sorry, they don't want to meet you. But we, as intelligence officers, we go to them and see what it is. And we come back and we tell you what is the concern or what they want. So we made the trip, going to this place, hanging around for a couple of days, being served the most beautiful entertainment and luxury you cannot even imagine exists in the Western world. We waited till the intelligence officer came back. And we were told, in a simple way, the Chinese have made your flight system. But they can't fly it. They would like to have the fuel combination. I said, what? In a way, our Knowledge Seekers Chinese scientists are sitting there making the structure, but they cannot fly the UFO because they have not understood the essence of it. They have not been shown the way to do it. So they want to get benefits of it without actually us being part of it.

And I know for a fact this is why I forced the military and the others to sign the agreement with us to get access directly to the top. Chinese ran into a problem with Corona, (1:56) because our Knowledge Seekers are the ones who went with the military, are copycats. They don't understand. They're just saying, oh, Keshe does this, so this is it. And when the Corona mutated, they couldn't come up with a solution. And we saw how it took over China. If the Chinese government would have stayed with us, we gave the Cup, they stole a gift, and they paid for that stealing. That's... if they would have stayed. How we worked out.. The same happened in Iran when we worked with Tehran Defense Military University. The gentleman who was supposed to be the government, then we found out he was actually stealing technology in the university, was part of this structure.

And then what happened? The Knowledge Seekers are here. The offices in Iran, Defense University, came to us. Says, we give you 1% of the Keshe Foundation in Iran, 99% is for us. We register the Corona effectiveness, because we tested it on 200 soldiers, within 30 seconds most of them responded to it. I said, what? And we took the case to the Iranian authorities. And they told us these guys were bandits, which happened to be there. And they're not there. If these bandits were not in the Tehran, Iran National Defense University, which we're collaborating, it would have been a different story totally in Corona.

Look where they are. Look how those in China who betrayed the Foundation will live. We spend days and weeks developing in Inner Mongolia. And this Knowledge Seeker now has become... (1:58) We realized how they're doing when the National Security officer in charge of the communication with Keshe Foundation went to one of our Knowledge Seekers. If Mr. Keshe is not there, can you organize it and we can do it without him? And they started doing that. And we did the punishment. It's for that National Security officers and the member of the Keshe Foundation who set up the things to make this for us, to put it right with the Chinese government, national security.

We brought the Americans in a hard way to play with the Keshe Foundation to share technology. Because you stay loyal to people as long as they're loyal to you. You don't betray them, and then trying to steal it. And this has bothered the Chinese community heavily last week. You talk about the new 'plasma defense' (shown on Chinese Internet), you don't even know what they've taken from Keshe Foundation. And with the new technology materials we put out, we change the dimension of the reaction.

You have to understand, you have to realize. There's an old saying in Farsi, we say, "Hand washes hand and then it washes the face." And you cannot wash a hand on its own, you just wash one side of it. The backside is still dirty. And, for Knowledge Seekers in China, is, don't look to us, look inside, look at those who took and did not put back in. And, this will go on, is not a Chinese disease, we have seen this in France, we've seen this in Italy, we've seen this in South America, we seen this in Iran even. (2:00) So, a lot of Chinese got offended last week when I explained, as I wrote to them, if you take all the praise, be strong enough to take the criticism and weed out those who do this. One of these Knowledge Seekers in China, we can't reveal his name, he came to me before Corona, he says, "Mr. Keshe, I do everything to become as rich as you, even if it means I have to steal from Foundation." And he's doing that. But I said, "Watch what's going to happen to your children and your family. How you balance with the Soul of all the Knowledge Seekers that stood, and you steal from them." You all know who he is. So many time I wish for him and his family, and those who work with him, walk away the right way. But you will write the history of his life. The same, the ones in Italy.

When you steal the gift, it's your habit. And you will not be happy. And even you come to the Creator, you want to lose, and to steal from the Creator, and you lose. And this is what is life. We hear Chinese are doing a lot of things with Keshe Foundation. Bless your work. But put back into the Foundation. Not just, 'I'm ok, Jack, I took whatever.' It will be short-lived. All of those of you who went with everything else, see where you are. We had a doctor in Canada who took everything, we taught him directly. We had a couple of more people like this, where are they? (2:02) How are they playing their lives?

We work with the Soul of humanity, now with one man stealing his pocket. And I'm sure the Chinese community will have a lot to say in the QQ tomorrow. And those Knowledge Seekers who were and worked in different Chinese department sections, join us and work with us and you will see what it is. Don't get offended, understand, this is a reality of fact. I was written that Chinese don't steal. Chinese don't steal, but they're in China are those who actually steal. We're talking about those, not about Chinese.

It was very intriguing for me when I met this few Chinese before Corona, that the guy's ambition is to be richer using my own technology. I thought, boy, where are you going? How would you answer the cancer of Soul for your loved ones? And then say, you blame everything else for it going wrong, but you don't want to understand it's you who brought that wrong to it.

When Chinese security tagged us, this officer, that we are a spy and we are here to recruit, and the other Knowledge Seeker accused us of for them to believe in it, and went out with all the bullshit. Excuse my French. You trusted one who betrayed. Now you have to trust the Americans to play fair with you. (2:04) We work clean, clear. And they thought they can steal. Now we put a stop to that in a different way. We still carry on working with the military and those who are in concern. But Knowledge Seekers gradually .. will have to learn. Will start learning.

Any other question?

Q: ... Hong Wei went on to talk about why he was concerned about that. He's mentioned an interview with Camelot that you had in 2016, where you said that our twin Sun will actually affect us for 20 or 30 years at most. And that if mankind has not widely applied the Plasma Technology that you taught to make a new "Noah's Ark" or learn to transmute our Souls, then mankind or other creatures on Earth will all face extinction. Is this the case? Is his concern.

K- This hasn't changed. Part of the Global Warming is that approach. And, if you go back as you read, we said in 2016 about talking about transmutation and taking man out. Now you're getting the tools of it. And how you do it. And the way you do it. and the procedure you do it. All gradually sets up and it'll come to what it is. (2:06) The approach or closeness of the Global Warming, as you call it, had nothing to do with CO2. Actually, the more CO2 we release, the more we prolong the suffering of man as the fields forces the Earth to move into a new orbit in the coming time.

Every time we have the approach of the second Sun, not only we get showered by new meteorites out of nowhere, from deep space or on the edges of the solar system, that pressure pushes Earth closer to the Sun. It's just outside gets pressurized, so new levels has to be adjusted to be done. And that is part of the, what you call, global ?? warming thing. This pressure is gradual. And if pushes us closer, the first planet near to the Sun will pop in (to the Sun), and we'll jump in (to its place). And we have to take its place. It's a natural. Get yourself a balloon and hang things in and see when you push from outside what's going to happen. And this is inevitable. And we are going through that. It's time for it.

But this time, there are two things happening at the same time. The pressure from the twin star is coming in, it's time for it. But at the same time the solar system is going through a magnetic field pressure that has delayed the Earth polarity change, due to this fact. And sooner or later this switch will take place and Earth will jump in by hundreds of thousands of kilometers forward. It'll be a switching time.

I can explain this to you in a very simple way. (2:08) The switch time through magnetic field when it becomes converts into physical change. Those of you who were in a meeting of last week on Friday, how we had to interfere very rapidly, you could not hear anything from Unit 4 and 5. Around about 9.30, 10 o'clock, you start sending messages to us that Unit 4 and Unit 5 start making noises. It was impossible for these units on a switch off button, to change. They were on the secure, on the platform, and they could not change. Because there was nobody in the office. You all have a mobile phone. You have to go and physically press the button to switch it on. Or to switch the microphone on and off. Those of you who were in a session, you could see these units from 3 - 4 o'clock in the afternoon, were put in the off mode switch, because we did not need it, the matter state connection or communication line, because we already established the plasma line with you lot.

And at 9.30 - 10 o'clock, you made contact with us, and I was contacted by a team that unit 4 and 5 have gone Live, somebody has switched their microphone on. And this cannot happen. Unless a physical force, or a magnetic field of the plasma has forced the switch. That's why you could start hearing noises. Plasmatic magnetic field has such a field force that can switch anything. (2:10) And if it pressurizes it, can change the characteristics of the structure.

You all know this knowledge. Those of you who worked on MaGravs, how many times I told you, go back into the original time of when we introduced the MaGravs, when you plugged it to the wall. I said, take the wires out of the building and watch, it's black coated. It's a plasmatic transformation, Nano coating. It's the same. If your plasma can switch a matter into Nano in the plastic cover of your wire, this is what happened in our transmutation session last week. That's why we stopped the session. We could not keep the switch off that you stay on the plasma level. It was switching back on to matter level.

And now we see the magnetic field will bring that pressure, will force the plasmatic field polarity change which is due now, which means for some time. And this by itself would trigger a lot of earthquakes. We saw this pressure coming on and going on like a heartbeat. A few years ago, we announced a problem in, you'll see in California. Now we see that building up. Next few years, it'll become more. The prelude to the, what we call this, magnetic field pressure approach of the second sun. Earth's gravitational magnetic field switch will set up a series of earthquakes, because this is the way how Earth handles its vibration. Will set out a new volcanic eruption structure, because underneath, things will move. (2:12)

And if you listen to my talk in the past few weeks, I keep on repeating, why Mr. Keshe is moving the Keshe Foundation conference instead of glorious city of Tehran into Isfahan. My dear friends, if you come to Tehran, you're sitting on a time bomb of the earthquakes. Isfahan is safe. Now we see how much we know and how much we care without your knowing. Did I invite you to a conference in Tehran? Why Isfahan? Isfahan has hardly earthquakes. You're safe. If in demonstrations of the Iran cycle of conference, we hit in that section into the ?? of what we call, field strength and do something, we'll be blamed for it. Because we know the power of this. We showed this power of change of climate, change of condition, to the Chinese government and military last summer in Beijing. Two times, within two - three weeks.

Now you understand. It's inevitable. It's coming and we see the signs of it. If you've seen the sign of tsunami, you read what is going to happen around you when it's about to come. (2:14) This is the tsunami of magnetic fields, plasmatic magnetic fields. And every indication is the delaying the switch of the polarity of the Earth has to do with the approach of the second Sun. It's no other way for it. Because the field pressure from center and out have moved, reduced, or changed the position of the fields inside the core of the Earth. And delay, we've seen it. We are expecting it. Scientific world is waiting for it. And when that happens, you will see... usually happens with no effect, but this time, two things are combining, three things are combining. We can have a devastating effect on the structure. Not only Earth, all the planetary systems have to absorb this huge energy.

It's like, you know these soft balls you have? Now you sit on it. It bulges out. But what's hanging inside goes more to the center and finds a new position. That second Sun is seeing, is you sitting on that ball. The content cannot change and the structure has to hold. So something has to give. And the 'tale tell' sign of it is we see. You understand?

Any other question?

Q: ... When organisms die, (2:16) their physicality often gets buried. After some time they become coal, largely consists of Carbon. Is this in a way of transmutation of Carbon?

K- Maybe. Depends .. on the pressures, field pressures. In the world of diamond business, where they say when the volcanic eruption happens, the heat and the temperature will, you know, creates diamonds, and because of the force of the forces and the pressures and the temperature. If you understand the creation of crystal structure with diamond is one of it, you understand it has nothing to do with temperature and heat. It has directly to do with the field strength of the Carbon change, it just pops.

But, this is explained that way, and we accept it, because that's, there's no other explanation. Now we understand it's not. It's very much like, if you're in diamond business, I was talking to a Knowledge Seeker about it a few weeks ago. Now you can buy diamond 10% of the value of five years ago. Because cultured diamond has come into market, it costs very little to produce it. And so why should pay people 1 million dollars for a 10 carat diamond when they can buy a pink one, 20 carat for 50,000 dollars. And even that 50,000 dollars, is .. 49,000 profit.

Q: It doesn't take a million years to make as well.

K- No, if you look, this, I can't get the name right, is it Swarovski? The crystal people. (2:18) They have shops everywhere. They will start introducing, they have already started introducing, these diamonds, and diamond burse, and diamond organizations cannot tell the difference, which one is real one, and which one is laboratory made. And now, having a certificate for the diamond, which they were trying to control, is gone, is dead. You can buy the most delicious, beautiful diamond for 5% of the value of 20 years ago, 10 years ago. Don't buy a diamond, just wait till it's 'nose diving.' There is no other... what's it called? I cannot get the name. They have shops in every airport, everywhere. They sell crystals, jewelry and that kind of thing. Because of the reduction in the price of diamond, they start going to actually give you crystal diamonds, structures from these laboratory diamonds. We cannot tell the difference. We gave the original production of these two diamond burse in 2004 - 2005, that this technology is now available. They wanted also some, we gave also guarantees we don't produce it. But now, another way has been found and it's getting produced.

I'm getting told about IT people, people ?? stop putting orders for this material on the screen. (2:20) We can produce a limited amount of it. So we go on what we can produce and how it is. And serve on the list of the order. But this, we'll buy this back in the future on the value currency if we need to. And ... or you can exchange it with the other scientists, or other organizations, or other people who buy it as an investment. This has a huge, huge values. You don't... we can't even explain to you what you can do with it, what you can do with it. Ekmer thought was, he can use it in the Star Formation. But you have to understand what you do with these things. Do not open it, do not touch it. Once you open it and touch it, it evaporates to dust. You don't have one gram, and then the combination changes. Then you understand why.

Any other question?

Q: ... Mr. Keshe, regarding the (Nano Mirrors) discs, can you expand on their uses, other than holding one in each hand, or placed either side of the head, or front and back, connecting to the fields?

K- Please, I have to spend time to teach you people how to use it. Those of you who bought it, just try to keep it in the way we used to use it, and then I show you one day, how a solid one with a whole one, and how

a combination of them will create amazing structures, physical structures, (2:22) and creates energies for specific conditions to be achieved.

If you understand the process of the fields, and if you can see it. These discs if you use in the right way, in the right combination, you know you get a prism and you direct the Sun to a point and you stop burning the paper, if you done this when you were young. This time you don't burn, this time you bring different technical development into it, but you have to know what you are doing. And it's extremely... These are the toys of the Space travel, if you know how to play with it. You have a Nintendo, these are your Nintendos, but you don't know how you play with the console, which is your Soul and your brain.

By the way, if you know or not, in the past few weeks, a new museum has opened up in Vienna, which is the museum of what we call, gaming. All the computer console games, now they have opened a museum for it, see how people actually game. It's an interesting place to go to.

Any other question?

Q: ... Could you ask Mr. Keshe about the 'Butterfly' technology? If you want to place them in an open space or gardens, what distance between them, for them to operate efficiently? (2:24)

K- Planet Earth. There is no limitation in their connection. Most of these butterflies, especially those made in batches, come from the same process structure and are connected. If you are lucky enough, get the same batches of the large, medium and the small, and set them in that way, in a specific formation, you will see amazing results from it. Amazing. When you buy these butterflies, buy them in a large, medium and a small, and then set them up in a pattern from each other. A pattern like you can walk through it, the pattern like you can put something in it and observe the feeling.

Protect the house from all sorts of things. These butterflies have, what you call it, have a specific... You... we call it a butterfly because it's easiest way, it's actually a double loop and it's specially designed, in special material used for it. It's a two infinity inside each other. It looks like a butterfly. We call it butterfly. But scientifically, it's one of the most amazing things if you know how to play with it. Put on one wall, a big one, with a medium one in the middle of the room, and put a small one on the other side, and walk in between it. And then you tell me how you feel. You people are too physical, because you... what you do it, you have to learn to play with the fields. (2:26)

All these things we put out, is playing with the fields, for you to get, to walk away from physicality. It's like the paintings. If you put a butterfly, a big one on one side, it's the same as what we call, you know, you put Gans's of different strength on two walls to create heat and whatever. If many of you have done that, this is the same process. The size of the butterfly creates, if you put them opposite each other. Put one unit in the house on the bottom floor, just a big unit, a big butterflies on four walls or in different positions, and put a smaller one in a further position from this upstairs, and then you see how you feel across the house, how people change in the house. How behaviors change. You're looking at a butterfly, I've given you some of the most advanced technologies. And you're still after, does it stop the G5 and what happen when the G6 comes?

Any other question?

Q: ... Hello Mr. Keshe, I would like to know why some babies are born at 7 months, and if there is any difference?

K- Not really, the guy's in a hurry to get out, to suffer more. Not much. It's the evolution of the completion of the Soul. When the Soul matures to a point of fields, the body rejects. (2:28) They look at it different way, but scientifically, you're dealing with a Soul as a magnet of the mother, as a plasma of the mother Soul, and the Soul of a child. And at a certain point when the field comes, it goes. Nothing else and then the physicality of Earth is a consequence of maturity of the STM.

Q: ... Good day Mr. Keshe. Transmutation took a tremendous amount of energy and left me drained. Why does it take so much energy to transmute?

K- It shouldn't take. It means you're pushing it. Or, you became a provider of what we call, Soul Satellite to other Souls. Those of you who took part in the last week session, please send us your experience. We received from a number of you, but not all of you. And those of you who can, join us, because we stop by giving numbers, because it's too much. But the process of actual setting up started, and it has to go through.

What you see on the screen, the new material, it'll bring a evolution in the world of science. And that evolution has to be understood by those who use it. We touch the energy fields of the Soul structure of the man, (2:30) in a way elevation. And you will understand, you'll find massive changes around you. In intelligence, in calmness, in... Do not take them that, "I'm going to do this and that." Take them and just place them in the house, in your work, in your car. And use them in two's to create the fields, you will feel a difference, changing point. And these materials will never vanish unless you physically touch them, or you tap in with the system. They inherently absorb energies they are not supposed to, and then you get the changes.

Any other question?

Q: ... Apparently a company called Intuitive Machines, with its Lunar Program, Odysseus, today connected somehow to the Keshe Foundation? The chairman ?? Kaffarian is a born Iranian.

K- I have no clue. I don't even know what you're talking about.

R: Yeah, me neither. Okay, well we'd have to look into that more.

K- You look and let me know. (2:32)

Q: ... Okay, in before earlier years your teaching, when I was needing something, I find it after 2 or 3 days, when I coming across your teachings. And it happens that now I find things and then you speak about it. Today, what you taught, I think I came across a condition where the kidneys produce such a thing. And it was amazing for me to understand how exactly. And I think it's easy to produce that.

K- I don't understand what you're talking about.

Q: I understand Mr. Keshe, I understand.

K- That's good. Well, I don't understand what you're talking about. But it's good if you understand what you're talking about.

Q: Okay, you speak, the kidneys produce these crystals (kidney stones).

K- No, no, no, no. (2:34) We're talking about the kidneys physical structure. Not producing this material. The physical structure of the kidney is based, for example, it's the same with the liver, it's not just kidney. Your heart has the same kind of structure.

Q: Yes I understand.

K- It's not that it's producing the structure.

Q: Yeah, but when you are out of the fields, you see the manifestation of the materials as a crystal. I think...

K- When any material leaves the body of the man is not in a crystal structure. It's in a matter structure of the material. Even kidney stones or whatever stones we call it.

Q: Ok, but what if you see it in the crystals due to a condition of this?

K- There is a lot of... body produces a lot of these crystals according to... but they are not the Cosmic Ray crystals. They are 'physical body' crystals. If you eat certain fruits, your body produces them naturally, like sand. If you, for example, what's the name of the fruit? When you eat more than five or six of it a day, your body produces like crystal grain sands. You feel it. (2:36) And this is not plasma crystal, it's a matter state, which is totally different. We produce a lot of material crystal in our body. Part of our work is a system of digestion creates it because it uses it.

Q: Okay. But, in a way I understand the creation of it.

K- Yeah, that's good.

Q: ... Thank you very much Mr. Keshe.

K- You're welcome. I think you're going to have fun with this, if you understand what to do with it.

Q: In the picture here?

K- Yeah.

Q: I know.

K- And your secret society testing. I wish I'm a member of, without knowing. It's okay, no problem.

Q: We can bring you in again, no problem.

K- No problem.

Any other question?

Q: ... Hello Mr. Keshe, you said the Gas Electric Unit was modified and further developed, can you say more about it? Thank you.

K- We prefer not to, because we are actually testing it yesterday. (2:38) And what you call it, we are testing. And as I said, we reduced the package quite a lot. And we most probably come up with... We try to show you this in the... before, after Sanya. To see the system and see how it works. And then we go directly into production, hopefully with it. The development technology has brought new, strange advancements in the Keshe Foundation. And this is one of them.

Any other question?

Q: ... How come I felt a spinning sensation when the Enhancement Unit was operational in the previous workshop? Is that the system charging up the Inertia of the halo above the head? What's the cerebral spinal fluid?

K- I don't know, depends what you were short of and what you received.

R: You weren't inside Ed's body at that time, to notice?

K- No, it depends how you feel. A lot of people are feeling a lot of things, in this new, what you call it, tests. (2:40) I said many times, people go to different organizations and go to governments to get finance or whatever, with a meager, what you call it, incomes we have, we do tests and you are part of this test, you are the guinea pigs. And you have to tell us what you feel and we see what we set up to achieve and what was achieved, and then we see who got it right, where. And to what extent we have progressed.

Any other question?

Q: Crystal in the Universe are the ones that make us contain our physicality?

K- Which crystal?

R: I think the crystal of the Universe, perhaps. Crystal in the Universe, she says.

K- Maybe. As long as we keep our sanity, I presume so. Maybe.

If there are no more questions. I have a couple of questions sent to me by Knowledge Seekers, which I try not to bring into the teachings. And please put your questions in the sessions, that it can be answered as it is. Because some of it is very fundamental, and some of it is just personal curiosity. If you have any questions, bring it into the teaching that everybody else can understand and share.

Anyway, thank you very much for today. Chinese community join us in the QQ tomorrow. (2:42) We try to be there and we have asked the Chinese community to come in with your, what I call, headphones, because Chinese never had this opportunity. And we try to give you some experience of what we call, communication in different strength and see how you enjoy the session. Because the big session we had with the rest of the world and Chinese couldn't join us. Now we set everything up that we can go through QQ that they can experience part of this what we call, beautiful joy of transmutation of the fields of the Universe.

And those of you who are so interested, join us in Sanya, it will be an amazing experience and another winter that we go forward to. As I said, we celebrate the 20th of March in Sanya as it is the Iranian New Year celebration. And we'll see how and the way we progress to the next step. Thank you very much Rick.

Q: ... Hi, I've been participating on and off with your Knowledge Seeker workshops for about a decade now, and I've replicated lots of the Gans, the Gas Atom Nano Solid State, (2:44) acronym as you call it. Others call it Ormus, or the Monoatomics, or the Plasmid. And I've also replicated and built a couple of your MaGrav coils, and have several examples of that black Nano coating that covers all of the wires that are attached to it, even while they're sealed with the plastic coating and all of that. And so basically I have many, many...

K- You've been through the 'run of the mill,' as we call it.

Q: Yes, but I would like to, if possible, schedule a follow-up interview, as well as opportunity, if you would be willing, or if you could get some of the Keshe Foundation Knowledge Seekers presentations together for an APEC conference that I helped co-host. It's an alternative propulsion engineering conference and it's an open source alternative energy, free energy and anti-gravity research collective with lots of ex-NASA and

different North American researchers and stuff. But it would be a very good platform to get your plasma field knowledge out there into the mainstream, as well as myself. I do YouTube now and have started this agricultural alchemy series where I've been using the Gans water. (2:46) Lots of people also call it colloidal water, or colloidal silver sort of stuff, but with gold, copper and zinc in it as well. It's basically identical to what I saw the agricultural group is in the KFSSI organization. There's just a lot of opportunities in different communities that are understanding and experimenting and working with your Gans, your plasma, as well as these toroid coils that you make and have taught. There's actually a platform of researchers in the Americas that are open source that can actually comprehend what you're trying to teach. If you could or would be willing to do a whole day of KFSSI Plasma and field physics, it would... that just change things overnight pretty much.

K- Thank you very much. For talking, or arranging a time to give interview, you're explaining this, send a request to info@keshe.foundation. And put in there that you mentioned. (2:48) Regarding the agricultural side, you have to speak to Jim in, what you call, Australia.

Q: Well, I've got just a couple of quick questions for you in regards to the color of the Gans, basically the oxide or hydroxides that form of the different metal elements. In my own alchemy research experiments and tying it to Sir Isaac Newton's recently released and translated alchemy writings of the colors of the different transmutational states of metal, basically the difference between the white, the blue, the purple, the red, the yellow states and the black.

K- There are many, many colors. And it depends on energy absorption, or percentage of energy release into the environment, they change color. We've seen that. We go from blue to black, and back to yellow and then blue again.

Q: So, it's the black like Deuterium, dihydrate.

K- No, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no. .. Cu goes black.

Q: Sorry, the yellow is sulfur, right? Sulfide and then the ancient alchemists say the red is mercury state.

K- No, no, no

R: No, no, no, no. You have to listen to the word, no. He said it many times, you'll get it eventually.

Q: I'm trying to explain what I'm getting at.

R: You're mixing up technologies.

Q: It's not actually that.

R: That's something we don't use in the Keshe technology. We don't use color coding.

Q: It's a metal material, and it's a hydride. And that's...

K- No, you see, let me explain to you. It's beautiful what you brought up. It's fantastic what you're putting across. Let's extend the knowledge. (2:50)

Q: Yes, and sorry, I'm not trying to get specifics on that.

K- No, no, no, no, no, no, no, no. It's beautiful what you brought up. It's good for Knowledge Seekers to learn.

Q: The white, the purple, the blue and the green, each one represent different states of the metal and whether the amount of oxides or...

K- No.

R: Again, it's no. Let Mr. Keshe answer, because the answer is no, no, no, and no to everything you're saying.

K- You see, the color changes in the matter state comes different way, than the color changes in the plasma state. And, if you go back to, I think it's Book 3, I put a little glass tube with different Gans's colors in it, and I say they never mix. But, they never mix, but if you have percentage of them losing energy, the appearance and the color changes. And then they gain the energy back and they go back to it.

In the world of matter state, this hardly ever happens. Because once you take the color and shape, it stays. Because you are interacting with different fields, the interaction of the fields create different lights. This is what happens in Plasma, in Gans technology. It's not a permanent color, it's different field strength which manifests itself. So, you cannot say, you can have a Copper going yellow, and you can have a Zinc going yellow, you can have a Zinc going black, as Copper goes black. It doesn't mean that they're the same black, they're different field strength. (2:52) And this is the manifestation of understanding the creation of lights in the Universe, or radiation. So, when you speak change of color, it's nothing to do with the chemical effect. It's to do with magnetic field strength changes.

Q: Sir, I absolutely agree with everything you just said. It's... we'll have to continue this conversation at a later time, as I believe I've discovered an additional part of the solid state of the metals in physical color, and that it is a lost ancient science of alchemy and the color scale of transmutational metals written about in all the different ancient alchemy science texts, specifically Sir Isaac Newton's and that it might be a key in unlocking the connectivity of the plasma color light state which, and the field forces of that specifically, and creating the physical manifestation of that color state in...

K- Let me... I understand what you're talking about. Let me explain to you something very interesting. If you manage to make a Nano material sheet, in a way, if you can...

Q: Yes sir, the latticing, the crystal Nano layer.

K- Let me explain something. If you take, let's say, take a sheet of whatever, Zinc or Copper or whatever, and make a Nano layer that you can separate this layer from the Zinc. (2:54) Hold it in your hand and put a mono color underneath of it. And look above it, into the material. You will see different colors. Very much like a prism. You will see the white changes to different colors in different holes. And sometimes, all the colors are the same in all the holes. And then one by one they start changing. Once one changes, the balance of the field changes. It's the same hole, it's the same light. You're not moving anything. Because the field interaction of that hole position, creates absorption of certain colors, or adding of certain fields that it changes the colors.

Then you understand what you're trying to say even in alchemy. It's not alchemy, it's understanding why they change color. The energy from the matter underneath of, going through reflects according to the size and position of it. When you make Nano layers with it. We saw this one for the first time in Ghent University with the professors from electrical engineering department. It was amazing how we hung a piece of wire, copper was melting inside you could see it floating like a water. But the Nano tube was holding it. And then we start observing different colors coming from different holes. The professor brought all the system the

maximum current we could put on this wire it would not bend, it would not ?? , it would not break, but we could see the holes in it, even if it go, the material, liquid, copper, would not go through the holes, we could see light through, because it's a field strength is different. (2:56) Because the copper inside is in a plasma condition, even though it looks as a matter.

This alchemy you talk about change of colors, materials, we understand this. It depends what hole is there. This is the way the head of your femur decides what, what you call it, Lymph come out as a white cell, red (blood) cell or whatever else. This we know. It's not alchemy we don't understand. This is a physics now with producing Nano materials we have seen ?? in Belgium 15 years ago, plus, physically. So you haven't discovered a new state of matter. When you create this condition you get this condition, you get the light reflection from the images of the matter going through these holes. And so it manifests itself as different color.

R: Bernie was just suggested to share his camera he has several jars of specific Gans materials of specific colors.

K- Yeah, I have tons of... Yeah, they keep on changing colors. When sometime I go to the lab, I see some Gans's which were a different color before, they are different, and observed this one for years. They change, because they transfer energy from each other.

If you put your Gans's bottles next to each other, see sometimes your Gans's start going up the side of the jar. Which should not do. All the waters, all the materials should be on the same level. You see they start creeping up. It's like the moon night time, you know when you get the cycles of the rivers or oceans. Put your jars of Nano material, Gans's next to each other and see how they change shape, not only the color. And how they change shape, it changes the color in them or the others, because they give energy, they absorb energy.

R: Do you want to have a look at those jars Mr. Keshe? (2:58)

K- No, no, it's okay. I understand, I've seen these a lot, and we understand that. The color changes with it.

For your agriculture, write to Keshe Foundation, we put you in touch with Jim, because he can give you a lot of knowledge. Working collaboratively with what you're trying to do. And you can talk to Dr. Gatua in that side. Regarding if you want to share knowledge with the scientists and scientific world in US, write to info@keshe.foundation. Explain you have talked to me to the meeting (KSW) and you want a meeting with that. And it will be a pleasure to share knowledge. It'll be fantastic to do it.

Something which I have to explain to you, next week, Keshe Foundation will give a presentation (interview) to the Italian structure. We don't know how long it's going to be, which will be translated to Italian. It's not a Live presentation. They do the whole, what you call, like, interview. And then it'll be translated into Italian. And it will be presented in a professional way to understand more about the technology and different aspects of technology. So, we will give you the link in next couple of weeks, after they actually do the interview and they translate it in a correct way. It's not a Live translation, it'll be recorded, translated, and it's with somebody who's famous in Italy apparently, with that, will do this interview. Then, maybe some of you learn as Knowledge Seekers, it's an English version of it, some will learn the Italian translation of it.

Thank you very much. Send the information to us and then we'll see how we can collaborate with your people in different platforms. (3:00) Thank you very much Rick.

And we'll see how we take shape in the coming weeks. And I hope those of you who take this material have fun. But please do not open it, everything comes with a serial number. These are literally live currencies. Because you will understand why and how in a coming time. Keep them safe, it's not just Plasma Space material. It'll be a lot more, it's an investment that you will appreciate, in the coming time. Thank you very much and see you next week. And we'll see the Chinese community tomorrow in a discussion with them. Thank you very much.

ENGLISH TRANSCRIPTION

(:19)

K- Yes, thank you very much. And good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We're here again to share knowledge and today is a very exciting day for us. I'll explain to you later on, what is going on. And I think, it'll be a historical day for us, as part of the Keshe Foundation, as 'One nation, One Planet, One Race.'

At the same time, our team, at this moment of time is in negotiation with the leaders of a nation. We wish him and the team the best of the best, that they reach a new understanding for the development of the Keshe Foundation in that nation. (:20) It's one of the most powerful nations on the planet. And our team has been negotiating since early hours of this morning. And I hope we all give our Souls to the team. It'll bring a major breakthrough for Keshe Foundation, it has brought. And I hope we hear a good news, or whatever is next step in this development, which will bring a huge change to structure of the Keshe Foundation worldwide.

As we heard this Intro, it brings a lot of things to us. It brings a lot of knowledge to us, it brings a lot of changing the taboos, which the scientists never understood and brought to us. And we accepted it because we thought they know what they are talking about, and in fact, they knew nothing what they are talking about. It's just that, what I say brings me credibility, and brings me whatever, and I'll be a good guy and intelligent. But now as I said, the intelligence of you, Knowledge Seekers (KS), super-passes many scientists. And many of the leading, what I call, authorities in the world of physics, and any other. Because, they read from the book, which they copy, you understood the process of Creation, and you are the master, one day he has to read yours, and then he becomes your student. So, it changes the clothes of the monkey from one to another.

In the world of physics, as the whole structure of this technology is based on the physics, (:22) in a way, how two things interact with each other, which creates a world of physics. We have a lot of, a lot of, what I call, false belief accepted to be the true science, and with it we have made everything to confirm the fallacy, which is brought in. In a way, as we are in dimension (D) of magnetic fields, as we are in dimension of Cosmic Rays (CR), as we are in section of understanding the knowledge of the work of the Universe (U), one of the biggest taboos, and one of the things which cannot be discussed, and billions of dollars has been spent on it, and in a way, we all say, "Yes. It's true, it's correct, because they've done this research, they've done that research." It's the fact about the light, the fields of the Universe. If you listen to scientific papers and lot of work of a lot of other scientists who never understood the true physics of the light, they tell us you cannot bend the light. And then they measure how light next to some stars bends. And then they try to prove it.

But, you Knowledge Seekers with what you know, you understand from the Book number 2, that the light is, or has two characteristics. It's a photon or it's a ray. And, when it's a ray, because of the smaller, more powerful center, moves faster, and then, in one point, interacts, (:24) and releases its energy, we see it as light. As a photon, it has a plasma inside it, which interacts with a planet, which it's passing, so it creates what we call, magnetic (M) field positioning, and it bends it. But then, in balance of the fields of the Universe, travels to destination, which is your eye, your equipment you're trying to detect.

But this brings you to a fantastic point, if you know where I'm going. You travel to another position in the Universe with a system, with your Soul, which is a ray or a system like UFO, which is a photon. And then, what happens to you? Do you bend as (you) cross every Galaxy, every star, every planet, you are traveling to? Or, do you directly go there? In a, what I call, nowadays for example, when you go from Beijing to New York, you go up, you don't bend anywhere, you land on other side. On upper atmosphere or higher levels, distance from the Earth.

How does your Soul travel? When you go to see the Soul of the grandma, which was at the level of a very good lady, did a lot of good things, and became a center of a star, beginning of a seed, some 50 years ago, and now it's the size of a, what you call it, a football, and it's on its way to grow up to become a star, as it gathers more energy. But you know it's the Soul of the grandma or your mother. How do you get there? Do you bend it, like 'Beckham'? (:26) Or do you go to it directly? Does your Soul twist and turn in the Universe till you get there, like a "Formula One" racing around the bends of the course? What happens if you lose

control and you smash into the wall? Or you end up in another Galaxy or in the Universe. This cannot be, it's never happened, and it will never happen, if one knows what is in the hand of the man. So, if you understand the process of the interaction of the Soul, and you have to bend it to get there, and we see it, all the knowledge about the light travels on a straight line, goes right to the wall. This is important for you as Knowledge Seekers, in strength of dimension of travel, in dimension of the Soul of the Physicality (STP).

In the Space travels of the future, with the structure and the systems we develop, in having a non-dimensional Plasma reactors, like a Sun, and we manage to control them in a Star Formation (SF) position, which create literally three stars in the base and a star on the top, but no container, no reactors, but field forces of them, keeps the interaction and creates the dimension of the, what you call it, Space of magnetic fields, which you can live in, as a, what we call, UFOs. Then, it comes for you to understand something important. Is, or has, or will your Soul, (:28) or your UFO of your creation by Plasmas, will bend, will dive, will go through? Would it travel on a straight line or bend somewhere when it needs to? Does your Soul acts as a ray and the UFO as a photon? And would the future of the man reaches the point to, in a way, collectively create interaction of the Souls, which become one of the, what we call, Plasmas of the Star Formation for collective transportation of the Souls from one point to another, and maybe through the creation of that, carrying the Soul of the others.

Interesting point, as I pointed out to some scientists years ago, is the reactors inside a UFO, an aircraft, whatever, are inside the system. They're not outside the system. In a jet plane we see the, what we call, the jet engines on the wings, we know where they are, because they're physically outside. But, when you look at the structure of the, what you call, UFO's, in a Star Formation, which many of us have seen it, when we look underneath, there are three lights in the triangular formation, they're inside. How come we see them from outside? How come we are aware of their manifestation there? (:30) What happens? And what haven't we understood about this? Maybe for the first time, you come to realize, how come we see these lights, not outside the structure, but they're inside the structure? And how come we are aware of their existence as a light? Do these systems have a containment, a reactor, which the fields goes beyond the boundary of the reactor and creates this light? Or is a single Plasma which has created this light, and in dimension of the dynamic Plasma, it bends it somewhere, it connects it to somewhere else, and in some places needs to be delivering a straight, what we call, field strength, it moves as a light. And there is no reactor inside, there is no containment.

This goes back to some teachings, some years ago. Where, I explained, and in the recent past few weeks, and I explained the Keshe Foundation Knowledge Seekers team, are reaching a point of creating reactors without a dimension. And, we have seen it, we have seen in that interaction, without any motors, anything running, the weight of the larger scales moves up and down in kilograms, and some other points appears and some other effects we see and we can measure.

This brings us to a point, (:32) that in creating the new line of the interaction of the Cosmic Rays with these non-dimensional reactors within the structure of the Soul of the Man (STM) as a dynamic Plasma, or as a flying unit as you call it UFO. What game would the Cosmic Rays play? Would we design, would we understand that these engines, these Souls can interact with two energies at the same time. Two lines of reaction. And then it comes to understand furthermore, that a straight line, what we call rays, is primarily made of Hydrogen (H). And those lights, which are like your photons carry Carbon combination with the Hydrogen. Which is in a way Carbon 14 (C14) or C60 energy backtracking on the field of the Hydrogen. And in a way has a higher strength and when it passes the star because of its gravitational magnetic (GM) field, it has to create magnospheric position, or MaGrav position. Then you can explain as a simple man, as a

housewife, or as a child in school to your physics teacher, that the reason some rays bend around the planetary system, is as they are part of the Cosmic Rays, (:34) and those which don't carry higher order energy, with little field interaction, but all in the field strength of the motion of the Plasma.

Once man understands this, then you understand why we see galaxies rotating and creating light and all the light is not shine like a torch on Earth, but is dispersed across the Universe confirming the existence of a plasma which holds hundreds of millions of stars within it. One day man will understand as we see the galaxies, as we see the solar system like our solar system with Sun in the middle. But in his Plasma there are many bits called Earth and the others, and in a bigger dimension we see the galaxies with hundreds of billions of stars within it. Once man educates itself and goes out of this Universe in part of Unicose, and look back at our Universe you will see the same. A big dish with a lot of bits in it and all emit light at a different field strength that confirms the existence and the position of the galaxies and, God knows, the whole structure within that Universe.

Nowadays we look at our Solar System we haven't managed to get out of it yet fully to take a picture of it to see how it looks, but we take a picture of the galaxies and we see how they rotate and all those systems inside it. When a man manages in the coming time to go outside this Universe, (:36) you will see the same structure but in a different dimension as of our Universe within the Unicose. And then the fields of the light of what we call, Cosmic become what we call, Universal light. Because these are the lights from the Universes. It becomes a Unicose light. These lights are slightly different than the lights we are used to as Cosmic Ray. These lights are a slightly different that we are used to as a light. Colors are slightly different because more magnetic field powers are in interaction than the weaker one. And then the enlightenment becomes totally different. Once man becomes the 'child of the Universe' as the Unicose, the level of understanding and the knowledge will change, because a higher order intelligence, higher order fields come into play.

Now, why I brought this subject up, is because as many of you have started going through this, what we call, dimension of the travel of the Soul, which is yours, no one can touch, no one can control, you can donate it to anyone, you can become part of somebody else's field, we will observe, when we become wise to it, the dimension of the enlightenment and the light which we have denied ourselves, we shall see in the fields, we shall see how the Cosmic Rays is absorbed by this body, by the Soul, and how the Soul travels in the dimension of the, (:38) what we call, the ray.

Our physical dimension, as I said, absorbs 80% of its energy from environment, and primarily most of these are Cosmic Rays. They are photons. And, they are not Cosmic Lights, which is singular, in a field strength, with the central acceleration, which man has not managed to understand yet. But, in some cases, when the Cosmic Rays become part, you, then you understand, how you, if, open the dimension of the absorption of higher order fields, gets enlightens it. Understand more. In a way, you are in a dark room, and the torch is in your hand. If it's running out of battery and dim, you see very little. If you increase the power of the battery, you see more. And the light becomes more powerful, and you see more of the room, what's in it, and you become aware of the knowledge of what you have in front of you.

It's the same with the enlightenment. If you learn to absorb, you learn to switch the STM with the light of the rays of the Hydrogen, you will see more. Because it has no dimension. As long as you stay absorber of the, what we call, Cosmic Rays, which includes the C14 and 60 and all these combinations, then you have that dim light, you are in the dimension of physicality. (:40) You are not clear to see the Totality of the light, which comes directly from the Soul of the Creator (STC). The true enlightenment, and nobody can control your Soul, nobody can deny your access, no, it's not for sale in the market. And as some people say, "he's

going to get your Soul and he's telling you lies." The only lies you're saying is to yourself, because you are the controller of it. You have to decide the enlightenment, you have to decide, how much of the information in front of me in this room I want to see, and how much I want to make the light dimmer, to in a way conceal my own ignorance and lack of understanding.

Then, if you understood all this, you understand the lights, which is on the line of what we call, Hydrogen, the primary light, which is the light from the Creator, does not bend for nothing. No Galaxy, no Star, no Universe and no Unicose. And, if you understand that, it means your Soul is connected directly to the STC. In the line of the strength of His interaction and understanding of you, from the dimension of your own existence. And then, you substitute it by the, what I call, division of the division of the fraction of the division of the collusion of the light which is started you receive part of it as a connection to the STC, as a Cosmic Rays to feed your physicality (P). Then you understand if man reaches the point of purity and if you manage to bring enough Souls to collectively to interact, (:42) then you can make a UFO, which is destination, would be the STC.

Then you will understand how to answer that professor from MIT, which light bends, which light goes straight. And the reason for it, and the sharpness of it, and the strength of it, and what it carries, dictates how it bends. As the STC never bends, it carries nothing but the love of the Creator. This will come to 'bite' you, if you don't understand it, and try to be the traveler of the, what we call, the Universe and the Unicose. And the more you understand this, about yourself, about your Soul, that no one can control it, there are no Prophets, there are no rabbis, there are no churches and mosques in the Universe. And we have that as evidence that NASA, which we believe in everything they tell us, they've seen many Galaxies, they've found many stars and planetary system, but none of them up to now have reported any churches or mosques and synagogues in the Universe. So, the fallacy of the belief, has come with the man lack of understanding of the Creation.

And this, will bring man to the point of demise, if man does not understand his own potential, his own connection to the line of the Creation, and how much he likes to bend it to get there. But, you have to understand, even the Cosmic Rays, if you go down the line, connect to the STC, (:44) but in a less attachment, as Carbon field strength attached to it.

But, you have to understand, now you understood about the STM, and the STP. In Space, you'll become aware of the same position. A line to the STC, and a line to the interaction of the STC, with His own fields, in the dimension of the fields of the Universe. The dimension of physicality. In a way, feed you from the center, but you can play and eat a little bit, here and there, as you like, in dimension of physicality. Be it eating from the energies of the Universe, or the knowledge which has come from ?? their interaction.

As Knowledge Seekers, you, as I always say, you have no choice. If you are in a position, and you are gradually becoming to the point of traveling without the physicality, which a number of Knowledge Seekers now report to us they can do. Then, you go to the next step of maturity. Try to connect to the line of the STC. Then, every knowledge in the Universe is at your disposal. There is no limitation in the knowledge, and nobody can enslave you, or those who pretend to save your Soul. Anybody who tells you, "they are trying to control your Soul." It means, "I (they) am trying to control your Soul, because they (we) are making it free." As is said in the Intro, "you have to decide." You have to understand, there is no possession and there is no control, (:46) except your intelligence in understanding the truth about yourself and your creation.

And this brings you to the next level of knowledge. And in the past few minutes I explained in a soft way, but in the future we go into it in a much deeper way. How to understand what you receive as a line of the

connection of the fields of the Universe with your Creator, and how you receive the Soul, from the STP of the Universe as Cosmic Rays to, in a way, confirm your existence in the dimension of physicality.

In a very simple way, you are like that puppet in the (puppet) show, pulled by two strings. And you are that puppet hanging on the bottom of that string. One which controls the head and the whole body which is the rays of the Creator. And the ones which twist and turns your legs and body and arms to say, "this is what I am." But in fact the central ?? being holds you there, to show you are there. And when the guy let the frame (strings) go, the puppet collapses on the floor. The end. And it's your job to keep that line of connection at all time. Does not matter in the dimension of physicality of the man, or dimension of physicality on the Moon, or a passenger of the Space in the Universe. You have to understand the difference between the two. And keep that line, which is the line to the Creator and does not bend, always on focus. Don't believe none, and don't trust none, except your own judgment. (:48) Because when you believe and you trust, you manifest yourself at that time, and place, and position, in the dimension of physicality. Be it you going home while you're sitting in the office, doing the cooking, food ready before the physicality arrives, or going back to the point of birth, and feeding the whole process of the womb of the mother, to birth tunnel, and to be born, and the whole rest of it. Birth in two dimension and two direction. One the birth through understanding the knowledge of Creation, and one birth in understanding the process of physicality of birth, in the dimension of this planet.

One interesting point for many of you Knowledge Seekers and your children will be, are there any delivery rooms in the Universe to deliver your child? Or, you have to go through the process of the birth, the Universe, the same as your ancestors did, or the mother lies in the hospital, which there is none in the Universe. Then you can come to understand, the children of the man in Space will be 'children of the Soul.' Where the interaction of the fields of the emotion of the love of physicality and the love of Creator, in interaction with another of the same love and fields without dimension of physicality, will lead to the creation of new life. Without any delivery notes, and without any delivery rooms. As it takes its shape and process of its creation, in the dimension of the fields of the love of the two parents, and the environment of the Universe.

Teaching the Soul of the new infant of the STM in Space, will be very different than what we do on this planet. (:50) In the coming time, man will come to understand, as the speed of the process of knowledge is becoming faster, that now, one by one of you, understands the dimension of existence of your own Soul, using technologies which we have developed, to in a way, exercise and train yourself, that when you go outside, you don't become prisoner to no magician. And in any way, in the coming time, once man understands the interaction of the fields, and man stops killing, destroying another life as he knows it itself, become can become part of it. A fool, as I always say, shoots itself in the foot, and tries to win a marathon. This marathon, the winning point, winning post, is reaching the STC. And man shooting itself in a foot, is trying to stick the dimension of physicality on the way, on the path of the Cosmic Rays.

In the coming time, and especially in Sanya, we will show the difference in the dimension of these two rays. We bring into operation, some of you who can reach, or have reached that point, will see the rays of the light as a ray, which in a way, is visible to your Soul. And dimension of physicality cannot be manifested itself, because it's too weak. On the other hand, you feel the dimension of the fields of the Cosmic Ray, that part of it might enlighten your Soul, increases what we call, field strength and bring you to a new dimension. (:52)

We are a scientific organization and not Rabbis, and Priests, and Mullahs, and Methi and the rest of it. Everything has to have a scientific base. Everything has to be scientifically shown and proven. Even though

sometimes it might take a little bit longer than others, because our scientists have to understand what the path is. And then even they understand it, they have to show it to you, that your ?? knowledge understands there is such a thing. And that thing is me.

Next time, those of you who stand in front of the system in Sanya, don't look what's inside it. Look what you're absorbing and what enlightenment you receive. And how the rays which are near the field strength of the Cosmic Rays and the strength of the fields of the Creator has enlightened you. If you come to Sanya and you try to see matters and materials, you're still doomed to dimension of physicality. If you next time stand near these systems and look for enlightenment within yourself, then you understand you have become a true Knowledge Seekers. Seeking knowledge for betterment of the Soul of you and nobody else, as once you enlightened and become knowledgeable in that field, you become part of the others, correct, just, and by the deeds of Mitra and Mehran. And then you understand, even, how the, what we call, creation of the Prophets, confirmed the existence of the Creator, has become mysticism and the rest of it. (:54)

Where the descendant of Mehran became Mitra. And then, ?? when march of another, we became to believe in, and we converted in different names and shapes and forms, to show how much we want to hide the beauty within us, which is in our Soul.

When you come to Sanya, when you stand in front of the systems, when you look for materials, you look for weight reduction, note one thing, you have not become a true Knowledge Seeker. Because it's the story of the MaGrav and the meager electricity, or understanding within the system, you are enlightened to receive, to open your own Soul to the dimension of the Creation. And we are just the facilitators, we are just the teachers, who knows how to bring the blackboard and the pen. And it's you who has to write the words, the sentence and the knowledge on the board. On the board of your Soul, and then you will understand.

When you come to Sanya, As many of you did, when you came to the first exhibition center in Linz, we put three stacker unit, three vertical units, and some of you stood in the middle, to see what you feel. This time when you come to Sanya, we bring you three systems, stand in between. And then, see what enlightenment you receive. One is set in the dimension of physicality of this Earth, (:56) one is set to be the STP of the man, and one operates totally in the dimension of the STM. And then you decide, what you see, what you understand, and how your intellect changes and evolves while in that area. We give you system headphones to connect to one or two. But in a way, when you stand in between the three, find out truly about yourself. And see where in the dimension of universe you can travel to, what knowledge you'll see in, maybe some of you would like to see the Soul of the Moses, or Christ, or Muhammad or whatever, or maybe even the Soul of your future child, in what you are putting in, and would there be another which matches the love of you for the Creator. That's the time when you find a match, if the true lover is of the same essence.

In the dimension of the Soul, we don't fall in love with the physicality, and with the beauty of the eyes and lips, and how good you are in one thing or another. But we fall in love with the purity of the Soul, how close it is, how much has managed to unravel the secret of the closeness to the Creator. And that, and that strength, if it's ours, we match. And a new child will be born, that in the future, that child become better than you to become closer to the Creator. That is the true heaven, and not what the man imagined.

As I said, step by step, (:58) we teach without our Knowledge Seekers knowing, even our research team, preparing everything for that final point. Even they think they put something together, but they are working on the same course which is set.

<< audio cut >>>

In different shape or form. And let's... and you stood between the three in static condition just what the fields could flow. In Sanya, I put you to face your own Soul. Understand your own strength. And with it, change the future of your life by ?? elevation and no slavery. And never accept no one's word about the Creator, as you establish your own line of connection with the whole world of creation. The systems are very much dynamic, as is the Universe and creation of the fields. Search in it for what I call wisdom, and don't come in it, what I'm going to see. As long as you come, but don't forget I'm a very good magician. I set up everything to distract you that you don't see, you don't understand it, what I call the process set up for you. I give you a system to make you gold, and I give you a system to make you Gans, and show you a system to be protein, and you get all baffled by what you see. But, you know how the magician works, and distracts, for you not to see the true magic. And this is what you look for in Sanya. And, it'll be the only time we'll show this. (1:00) Till we see the full transmutation, in the beautiful city of Isfahan, later on this year.

And then you understand why we invited you to China, and why we brought you into the land of what they call, "Yin and Yang," balance. For you to find a balance in your Soul, that you're ready to go through the process of transmutation of your Soul, and not the dimension of physicality. As you decide on a point of arrival, what shape, color, race, language, in which shape or form, as a cat, dog, man of Space, and maybe an alien. Now you walk to your child and look like an alien, and tell your child, this is daddy. It's like, as you've seen, many time when the daddy shaves his beard and mustache, babies don't recognize, and they have a problem to recognize this is that. And I wonder, when you manifest yourself in a dimension of the new physicality, with your loved ones, like those babies sitting on the sofa, watching you with a shaven beard and mustache, even inside is you, but the appearance is different and they don't recognize and they cry, because you don't exist in that dimension.

This will become part of your life. And in a way, when you appear in that dimension, or whatever, you don't need what I call, 'blonding' your hair, shaving your mustache, and the rest of it, and painting yourself a bit browner or whiter, and keep on shouting, This is me! It's just, I've 'blonded' myself, and I've shaven myself. Then, the true, what I call, witness, what you knows, he changes the hair color, but the physicality, the Soul, (1:02) the Soul I know as dad, as a mother, as a friend. And then, building a trust. And then, understanding the Totality.

This is the transmutation time, not transportation time. And you have to understand, transmutation does not always has to end up in the dimension of physicality, unless you wish for. You transfer and transport your physicality, but you transmute your Soul. And nobody's in control of it, nobody's selling it, nobody's buying it, and all the rubbish you heard, they want to control your Soul, tell them, we don't even understand what a Soul is. Let alone controlling it, and you're not connected to no one, there is no affiliation, there is no union, there is no faith, and there is nothing.

And, if you go back, to the teaching of Mehran, was that way. And, if you don't know who Mehran is, it's not me. Mehran is the forefathers of Mitra. The first time man ever believed in the belief of Creator. And he was there long, long, long time before even Mitra appeared. In another word, you know Mehran as Ibrahim (Abraham). And Ibrahim in the Ibrahimism path of belief is Mehran in the culture of Iran, where Ibrahim was copied from. Ibrahim was copied from Mehran because every indication we have in history is the first path of belief. And the way it was set for man to manifest itself, believe in self, in the Creator, and not any other. (1:04) And those of you who understand the history of religion, you'll understand Mehran, the first Prophet, the first Messenger to understand the creation of the Creator, which then he became Ibrahim in the Arabic language in the Middle East, is the true, the beginning of the understanding, the process of Creator. And now the same name appears, this time to show how the man not to make the mistakes of the past thousands of

years. Name is now coincidence, but understanding the knowledge, in a way, to go back to the Creator, is the same in essence of the knowledge and creation.

But you have to understand how your fields work as a ray or as Cosmic. Are you a photon denying the line of the light, the essence of creation which you are traveling on? Or you can detach yourself from the photon and become the light, which nothing can stop, and never bends to no one, as is the will of the Creator.

One day, in the very near future, as many of you are getting prepared and understand your Soul, will take this step and bring us a lot of stories, as we did with you in Linz, and it's still going on. I hope I opened your eyes to a new dimension, new understanding. And then you go forward with it to the next step, to the next understanding. And enlighten yourself to the truth of the Creation, and nothing else. Don't accept no one as a Prophet, except your own understanding of the creation, which brings 'profit' to you to understand your own creator.

We create the systems for you to do that. Sanya will be one of the most beautiful times when those who are there will feel it, will understand how the essence of the three levels of the Soul, the STP, and what we call the physicality, will manifest, interact with every part of you when you stand in the middle of the three systems. When I stood in front of our system yesterday, I thought I don't need to tell anything physically. I give the knowledge in the Soul, and the Soul makes it a dimension of physicality. And it's wonderful how you transfer knowledge through the Soul, and you see it in the physical dimension. And many of you will be amazed in what will be shown in what I call, Sanya. Next weeks, if you understand it, otherwise you come to see a gas production, and you come to see a metal production, then you say, this guy knows something. And that shows your ignorance, lack of understanding of what we are about, what is about to happen, or you come in there and say, I'm enlightened, I don't need to feel it, I just know the knowledge is transferred. And I've seen the light of my own Creator, I understand the path to it. And, don't need no religion, no prophet, and no Methi and the rest of it.

We go for a break, we come back and we have a beautiful announcement for many of you, because it'll bring a lot of changes into the structure of the Keshe Foundation and many of you working and being around us. Thank you very much Rick, if you can take us for a break and then we come back. We have to finish around about 11:30, quarter to 12 today. So we have a short second part. Thank you very much Rick, if you want to take a break.

>> **BREAK** >> 527 KSW February 29, 2024 (1:15).

K- Thank you very much. I hope you enjoyed the first part. And now that we come to the second part, I hope it'll be more interesting. As you know, we have set out and we are, we become part of what we call, 'One Nation, One Planet, One Race.' This means we are responsible for each other, as One Nation. (1:16) As we've seen, if for example, there is a flood in China, all the Chinese forces get together to help, and to help their own nationals. Now as One Nation, we are responsible for the whole of the citizens of this planet. And when the time of emergency comes, we have to respond.

The second Keshe Foundation, *(This part was cut on the Youtube video, but it is on the original video recording of this teaching: "few weeks, and some Knowledge Seekers have been working in the background to support, to bring things about. And as we relied on the government to, in a way, to take action, to bring, to stop, to alleviate the problems we see in Gaza, we've seen none. And as our responsibility with the technology and knowledge we have, it's our responsibility to respond to this. And to alleviate some of the problems,")* till we see the end of the present regime, in what we call Tel Aviv, or Jerusalem, or wherever they call it. And we see a new structure arises in Israel.

As Knowledge Seekers you came here to learn and you learn that we are One Nation. And as part of our responsibility is to feed and supply medicine to these people. And I had a laughing and sorrow position this week, which I explain and you understand. For past two, three weeks we are working on trying to get to open channels through a couple of governments to support the, not the Palestinians, but people who live in Palestine and there are under the heavy bombardment, no food, no water, no medicine. And I traveled to Vienna on Monday to meet with the representative of the Palestinian government to open the door that the Keshe Foundation with its technology (T) can deliver through what you join us on third week of each month, and a group of Chinese will join us tomorrow for the second session of the system testing, to deliver food and medicine through lines to Palestine. (1:18) That there will be no hunger. And we can support the ill people, the sick people, with everything possible, from painkillers to antibiotics to latest medicine, which Keshe Foundation has at its disposal, directly to the hospitals. Nobody can distort, stop the delivery. You have a mobile phone, you can reach us from Palestine and be fed. Be given medicine.

And don't forget, this has been part of the Ethos of the Keshe Foundation. We want to feed the man in Space. We have to support man in time of trouble. I traveled to Vienna to see... ?? I am going to see the what we call, Palestinian delegation. I made a call to them, that I'm coming to meet, to see, to find a solution. The first thing, question was asked, when I said, I want to help. How much money do you want to give us? We give you our account number. I said, this is not what I'm calling for. There is an email. Send us an email and explain. I sent an email, and I traveled to Vienna. They won't even open the door of the Commission. We are here only to collect money. If you want to help with anything, go to Red Cross. I said, but it's your nation. Oh, we have nothing to do with that.

I went in the car and I said, what a sorrow. That this is not a war, this is money mongering. And I set out to get in touch with different group of Palestinians and different routes. (1:20) We are establishing a line. And the Knowledge Seekers who know, and are close to us in past few days and couple of weeks been busy making all the materials and everything ready to support, to feed the Palestinians on the line. We said it does. We have to deliver because it does. We said we deliver food to man in Space, medicine to man in Space. Now it's an emergency. We have to deliver into Gaza. From Monday, Keshe Foundation opens a line. We can accommodate up to 80,000 people to use the line at the present time. All the material for it will be ready

by Sunday night. We open a Zoom link and a telephone number line that anyone from Palestine, from Gaza Strip, can dial through satellites freely, and access food, and access medicine.

You Knowledge Seekers donated to us, money, your time. Now we need your donation to spend time to find the Palestinians in corners of Gaza that we can reach to. Find Palestinians who know, who have places, who have people who need help. And we are there to do. The telephone line and the Zoom line will go on front of the Keshe Foundation website, keshe.foundation, that only Palestinians can come in. Don't forget, don't come in to test if it works. (1:22) You could be affecting the life of a man who needs it in Gaza.

You know Palestinian doctors. If you have connection to groups who have access to people on the fire. Give them the telephone number and let them test it. We have made a feast of fish, meat, and chicken, and vegetables, and bananas, antibiotics, painkillers, anti-inflammatory, and everything else we could, to be available on Monday morning. You claim to be a Knowledge Seeker, it's a time of disaster, it's your responsibility. We still need donations for the funding of this project in hundreds of thousands, we can bear as much as we can. But we need the time. We need you to find Palestinians. That gradually builds up. In a month time, we should be able to add to 1 million Palestinian support.

If we see anyone comes from different lines, we disconnect you, we block you, and you're block from all activities of the Keshe Foundation in any teaching. Our team is ready, and the material which comes into production by our Knowledge Seekers will be ready by Sunday night. Monday morning, 9 o'clock, Central European time, we open the lines. Do not come in. Try to find as many Palestinians in Gaza. Not Palestinians somewhere else, (1:24) or not somebody who's sick in New York and is looking for... you have all the facilities. Go and look with your doctors and the food. This is set up for emergency. It's not there to be stolen from. It takes a lot of energy, it takes a lot of work to get this sorted, to be done.

And don't forget, we are on the verge of going into conference in Sanya. And this is additional burden on our team. But we have accepted it because we had to take that step. Israelis with the sharpshooters are shooting the doctors that the sick people die because of it. Not ever in any war, even in the Second World War, the genocide of the doctors and medical people has taken place except in the state of Israel today. Deliberately shooting doctors, deliberately destroying hospitals. As we said, this technology should be there equal to every man in the remotest part of this planet.

As I said, we introduced the C14. We introduced the Cosmic Rays we introduced, MaGrav system. And now is the time to deliver the technology where it's needed. There are hundreds of thousands of children sleeping hungry because of one man, he decides. There are hundreds of thousands of people wounded, which cannot even get access to a paracetamol to reduce their pain, or antibiotic to stop the infection which can kill. We have to test this knowledge, and today is the time. Keshe Foundation is ready. (1:26) It's your job to find the people. I have done everything and I still do everything to connect as many lines with the Palestinians. But once it takes hold and people see the result and the effect, it will become a 'virus.' But still, you will not use it because my brother is hungry, or my sister has a pain which never been sorted. Now I use Keshe Foundation. I tell you why it doesn't work. It doesn't carry our Soul, and 'thy shall not steal.'

The lines will be opened from Monday 10 o'clock Central European time. The first step, if every Palestinian uses for 15 minutes a day to receive the materials they need, and they time themselves accordingly at the same time, same hour every day, could be a family of four or five, we can accommodate 80,000 Palestinians a day with our present system. The Zoom channel does not accept more than 1,000 people at a time. So we expect it to build up. And if you can create, connect with the Palestinians, doesn't matter where you are, find

a Palestinian group who is active, but it's not just a bunch of Europeans shouting what about Gaza. But the Palestinians who have connection into Gaza that we can, you can give them the number and let them try. And then they give it to each other. Our IT team will put everything together to be fully operational. We are short of a few materials which is supposed to be delivered by tomorrow night, plus another bunch of materials to be delivered by Sunday morning, (1:28) that will be brought in to our central operation. And we are there to deliver the power of the technology.

And we need your help. Donate your time to us to find, to create connection. Go on the Internet, see how you can make lines establishing with people in Gaza. Give them the number. Give them the connection. Explain to them what to do and leave the rest to us. Our job is to share knowledge equally and technology equally by all men. And we are there to stand the test of time. We are not ashamed to fail. We are ashamed not to be able to help, even we have the technology. It's taken us time to reach that point that we can do this, we can support this. And in so many ways, now it's all of us in it. The way you Germans got together and raised money to send 3 people to Sanya, get together, find ways to open channels that you can give just this number to the Palestinians. And not to your uncles and your son. I had a pain that just went in for a few minutes. Our Soul is not in it. And you will not find any remedy in it. The same with the Italians. The same with the rest.

If you're Jewish and you really believe in what you believe, you know where to find the Palestinians and you have some friends. (1:30) Open the line to help them. There is no helpline for the Jews. You have the best hospitals ?? kill yourselves. We have announced and delivered this support to the Palestinians in Gaza, to the officials in the Iranian government, and to the American government. We are not doing anything but to help those who need. And one day, somebody might come and tell you, I saved, I had no pain, I received food through a telephone line because you are a Knowledge Seeker, and you made it possible. I can provide the technology, and I can make it accessible to the Souls. It's you who have to do the next step.

Please get in touch. Open the channels. Use the telephone number and a Zoom number. Give to the Palestinians and tell them you're in Gaza. Use it. Feed yourself. Receive the antibiotics and the rest of it. And there is no charge. It is absolutely free. And once this dilemma is over, we switch the line off. And we report to you if one person, 100 people, 1,000 people, have used the line. Our failure is your failure, because you have to establish these lines. You donated thousands to Keshe Foundation. You supported us in every way and every shape. Now we call for your donation of time and bringing people not to die.

In a way, what I said to a Knowledge Seeker, we've become 'technology without the frontiers of food and medicine.' (1:32) And I hope you as Knowledge Seekers can support this. We will see the action. We will see what the response come. We are doing our best ourselves in the background, because the Palestinian government, so-called, is not prepared to help their own people. Unless we pay them cash in their accounts, they can put in their pocket. As we hear, head of Hamas has \$5 billion cash in his private account. And sitting in the most luxurious places in the world. We have a little money, but we can do a lot. We still need huge financial support to go into one million and plus, and maintain and support this support to the Palestinians.

And God knows, maybe next one will be earthquake, a flood, a tsunami in your country. And people around the world learn, this number is there for SOS, for food and medicine and energy. And even psychological damages which these things bring. I thank you in advance. And we are doing everything I can, everything Keshe Foundation team can. And as Knowledge Seekers, it is your responsibility. As it has been your wish to be One Planet, One Nation. And this One Nation is in dying need to support one million children, women, and all people who have, out of no fault of themselves, trapped in this. Thousands of children have been

killed. Thousands of women have been killed. The mothers, children who'll be brought up in the next 30, 40 years without a mother. (1:34) Fathers who'll suffer with the image and memories of the children, which bombs paid by the Americans to kill.

One day, the justice will be served, and that day is going to be very soon. It's not just the Israeli prime minister, which has to go to Den Hague and their life sentence. It has to be those who supported it, provided it, and supplied it to create such a murder. One day you'll understand when I say, the end of the nation, the end of the race of Moses has come, because they do it with their own hand. During the Second World War, the Jews hid their signs and names and everything, not to be killed, this time they hide it and forget about it, because they were ashamed of it, to be. I thank you very much. Trying to help us. Don't come to us and say, I found this group. These are the people. Get in touch with them. Find out. Don't give them to anyone. They are connected directly to Palestinians in Gaza. We can feed them. We can deliver medicine to them and just tell them. We put a manual in Arabic and English that you just give them a link. We give them instruction how to use the headphones, the way to use it, and everything else will be there. They read the instruction and they do it. The Arabic-speaking group, Jalal and your people, support us to do the translation. Support us to have the papers, everything ready for Monday. Then, you don't need to explain. (1:36) They'll come to a link. That link, there'll be a page with Arabic, English, to explain what to do, what number to use, how to use it, to receive the needs of the man, every right of the man, the water, the energy, as food, and to medicine.

We have not entered the world of medication, medicine. We provide the medicine which is available in the science of the man, to the man as an energy, and we do not need license. Because it's counter-based, and it's scientifically based. We deliver the energy of it. And we have a technology to do it. We've done it, and we know exactly how it works.

It will be a pleasure to be able to save even one life, to take one Soul out of the physical pain with the systems. And it's your responsibility. You're yearning to become One Nation. This is the beginning of opening the Keshe Foundation internationally to those who understand. And in the future, it becomes that. 999 (911), you dial for ambulance, for a doctor. 999, you dial. Or 111, you dial. 11213 in Europe you dial to get the emergency services to help you, you get emergency help to feed you. Maybe after the Gaza situation we become the source of feeding those who are homeless and the rest. And we need a huge amount of financial support.

If we are not allowing, the way we are, any government to dictate to us in how to develop the next structure of One Nation, One Planet, One Race. You've been here a long time, and Gaza is our test. (1:38) In not only start at the beginning of the One Race, One Nation, because you're a Jew, you're a Christian, you're a Muslim, you're a Sunni, Shia, Buddhist. Doesn't count. Humans, children are suffering. That child of one year old has no religion, and believes in no God, because he doesn't come to understand the fallacies of the man. We ask for your support, to spend your time, support us, to bring us to that position.

I have to go offline, this is important, I'll come back, please one moment.
<< Mr. Keshe answers a call >> (1:40)

K- (1:41:16) Sorry about that, thank you very much. As I said, our team, I have been waiting for this call, as we negotiated with some of the nations at the highest level, and they just came out of the meeting. And, the news is good, and we will see the future collaboration with one of the nuclear powerful nations of the world, as they agreed to support the Keshe Foundation in many aspects, as I told you. Knowledge Seekers works in different way, and they support Foundation, we're in this meeting this morning, has been very crucial for the

future of the Keshe Foundation, receiving the support of the government, and has been a great... and we'll see what the future brings. (1:42) I thank our team and all the work, and especially the guy who's been there and had to go through the process, and they're highly emotional, and we'll speak to them after the teaching and see how we can set up the next course for Keshe Foundation, as part of his work, his International work.

What I ask you, please consider and don't wait, I'll do it tomorrow. Try to find, find on even directly on the Internet, Palestinian companies, factories, offices in Gaza, who used to be on their phone, and still works. Try to get in touch with them, one by one, reach. And from Monday we do, we get in touch with. It is the job of, what we call, the Arab speaking, that he can speak to Gaza direct, to help us. If you have a problem, you cannot explain in Arabic to what they don't understand fully, get the support of the Arabic community of the Keshe Foundation to support you for communication with them.

As I said, this is a test of time. We put ourselves out to the test it. We are not afraid of failure. We are hoping that even if we can get one person out of pain, one child out of hunger, we have served our purpose, and the beginning of another step. And we have to see what is, and what we can do. We need your donation of time. We need your donation of supporting us, now that we are reaching completion of system. We don't need your Soul, we are not enslaving your Soul. We need your time, physical time, to help the other peoples, not to suffer in dimension of physicality. I thank you for it. As I said, we need the donation of time. (1:44) If you support us, donation by financially, to build the next system, to support, Another 100,000, 200,000, we thank you for it, we have to do it. But if we reach that target of 80,000 a day, then we need to be ready for it to support the next 80,000. System has a certain limit, and we need to back it up. Our team takes a few weeks to build up the next system, to support it, and it costs a huge amount of money to build the systems. We have a delegated team, who actually are there every day, to see the advancement of the technology, and I thank them, especially our team in Austria, relentlessly developing, working, changing things every minute, so versatile. Even some of them are of the Arab background, I thank them for all their work.

The other part of the call is our... from the Wellness Center in Germany. The doctors tell us, due to the success on what they had with the emotional and some psychosomatic, they will accept 20 cases of Fibromyalgia, Depression for very small amount to support their expenses and everything else, to be tested to finalize this session, this section of the work to confirm and to complete. So, if you have a Fibromyalgia or you suffer from clinical conditions of the Depression, get in touch with them and see if they can help you through the Wellness Center. It's not a medical, but it's a change of the wellness. (1:46) It has been successful in these two sections. We want to complete it, that in a way, hopefully after this, the first scientific report on the working of the system through this part will be published by then. I thank the people in Germany, they put their life on line and everything else. And after 20 cases accepted, we close the whole thing, or they close their sessions. And we need that. And they have put a charge of like, I think 5,000 or 10,000 per case. Has to be done, and once we accept it, we stop it, because we'd like to expand the more extensive depth of knowledge in other cases.

This is a wellness and how you, through wellness, change your behavior and the conditions. As usual, you send an email to the wellness in Germany or through us. We send it to them and the doctors will take over. This is out of the part of the Keshe Foundation. We supply the technology and understanding. The whole thing is run by the doctors and the scientists behind it. If there are any questions to answer, we are here.

Q: ... What is the Gaza phone number? Is that going to be given out publicly, like, or how do people...

K- Go back on the... Sorry, go back on the keshe.foundation, sometime on Sunday or Monday. We are still preparing, we have to be sure everything is there before we open the line. We already have, we can release it now. But we are going into more detail, that everything is 100% correct. If we get a flood, the system doesn't crash, (1:48) we have enough material in the background to support. As I said, we announced it, go on Monday on the keshe.foundation, with Gaza, you will come to it, is, or Palestine. We are trying to create a email called palestine@keshe.foundation that allows you to communicate, people communicate, then we need Arab speaking Knowledge Seekers to respond to these requests from Palestine. We could release the numbers and everything, but we have to make sure our systems are in a full operational condition by Monday morning, that we don't fail and then become sorry this or that. And just please go and hopefully, keshe.foundation on Monday morning, and the number, because the Zoom sometimes allows numbers to come in. We try to set that up, because Palestinians cannot go and lock into the Zoom and then come in, some can come in through the Zoom. And the instruction of how to use the headsets by the doctors and by people, will be explained there, it's already, we have it, it'll be pinned up there for them to use it. And they connect directly. Do not take more than 15 minutes to half an hour, and leave the line. You can come back later on in the afternoon if you are hungry to do it again, Or you have more pain coming, you can come in to use it, but we can allow 80,000 use a day at the moment. Then possibly we can increase it to 160,000, but that again brings in a dimension of pressure financially, which we cannot afford at the moment. We need huge financial support to support these things.

And then we start with little, (1:50) and then we come to you. If we go under pressure, or nobody get in touch with us, we've done our work. But it's your job to bring awareness. And then maybe in the future, your country runs into problem. And then we are there for you and your people and your loved ones. Monday morning, after 9 o'clock, 9 a.m., the lines will be opened. All to our use, and both on Keshe Foundation website. We try to put it right on top of the page. Palestinian or Gaza need, and then you follow the procedure.

R: ... Cristiano had a suggestion to how to find Palestinians, to guide them into the Zoom room to feed themselves. He says, through paid campaigns on social networks, it is possible to direct a video guiding them on how to access and behave in the room.

K- You got to understand, there is a lot of ?? aspects, some of them they don't believe it, or whatever, but once people start using it, see the benefit of it, it'll build up. This is a... don't expect just because you have it, all they all jump on it and... No. Because it's the nature of the man. So, it'll be build up into numbers in next weeks. And then, we go back to it. But if it picks up, if you Knowledge Seekers do everything you can, talk to each other on the chats, if you find a way, post it up on the chats, we found this way, this Palestinian, this... Get the help of the Arabic speaking language people, to support us too. You can't understand them, but you found them. Ask them, put it on the Arabic language. Please get in touch with this team. This is what we did in Iran. This is what happened with the Chinese team in, what you call it, the Corona time. (1:52)

In Corona time in Iran, people just came and posted, I'm so and so, I'm suffering. This is my address. And the support team just rushed in, delivered the material, saved lives. And I've seen that, how it worked. One of my closest relatives was isolated in a room to die in Tehran. I asked the Iranian team if they can deliver. He has children, and he was there, doomed to die. Within a couple of hours, I never told them they are my relative. They delivered the material to him and they saved his life. And we did that again and again. And this is the same.

You find Palestinians who need it, go back on the Arabic language. We try to open a Palestine at Keshe, what we call, Telegram by Monday. That you find a team, Arab speaking, Arabic speaking people, become part of this and respond to the need. We have to build the trust. We have to see. We are not going to be successful every time. Some people might not be or connect to it. But those we can, that's what it counts. Be prepared for good and bad. So when people come to you, you try to help will die, because it was not the right time. You arrived too late. But we take this, we had this, we learned this in China. When loved ones were lost, Knowledge Seekers lost their relatives, and we were too late to reach. This is a time of disaster and we are there to respond. (1:54) And it's the first time we put ourselves to test, we put ourselves to success, and we put ourselves to failure to find out where we fail, that in the future we can make it better, we find the fault. We will release the Telegram chat line for Palestine on the Telegram that you can get in touch with. You find them, you don't speak, you find a number in Palestine you want to speak to, (you) don't speak Arabic, sit on that line. And next day, next week, the teaching will emphasize more and more on this.

You prayed for One Nation, One Planet, One Race. This is the beginning of establishing that dream, to reality. And people only believe in it when they say it is there to deliver what they need. And we are there to do. We are not afraid of failure. When we fail, it means we haven't understood the process. We have to get better to understand it. And hopefully, we can be successful in many cases as well. But a child, when the father puts a headphone on the child who's crying, hunger, goes to sleep peacefully, because what he needs arrived. The child who's in pain from a bomb, a bullet shell, received a painkiller through the phone, and can sleep in peace without the pain. This is my job and that's why I came here for. And now we start delivering. And that's why you are here as Knowledge Seekers. We need your time to save life of children from hunger and from pain. And the mothers and the fathers, if we can do. If the line can stop one amputation because of the infection, (1:56) you have served your purpose making that call, and being here for 10 years to listen to teachings.

Any other question?

Q: ... We did pray, and I was sure that it comes true, it's just a start. Just first of all, how we... is there a connect line you can put on the chat?

K- It'll be put... all this will be put out on Monday morning. We have to make sure our systems are fully working, and people get their, what you call it, their effect, when they come in. Not, we find out, "oh, we had a problem here, we had a problem there." We have to be able to do, to have all the material as a food ready. All the materials as a, what you call, elevating the pains and suffering ready, all in one system. And our main structure can stand such a traffic. And this all been happening in past two weeks, not something we just started yesterday. Our Knowledge Seekers start making the materials for it, since last week. It'll be ready this week, and it needs a lot of preparation. And we'll be ready, when we are ready, we think by Monday morning, we announce it on all the chat lines of the Keshe Foundation. That the line is open, we give all the details, and all the Knowledge Seekers links that we have in 32 languages will be announced. And then you can use it immediately to go public with it. (1:58) Send it to the press, send it to the newspapers, send it to social media groups. That this is open for Palestinians. And explain to them, do not just come in because I have a headache. Because it can cost the life of a child in Palestine.

We had all your headaches and others, after we resolved this matter in, what we call it, in Palestine, with a forsaken man, the heinous man. I called him the 'reincarnation of the Moses, ?? defeated Soul.' And this man will go to prison, for life. I said to an American very recently, "would you do to him what they did with

Saddam Hussein? Bring him to a court, and proven correct for genocide, do what you did with Saddam and Gaddafi." And, (he) smiles, 'how can we hang one of ours?' Let's see.

We announced it on Monday. Once we have everything 100% working the way we want, we'll release all the information, cover all the Palestinian. Try to get to Al Jazeera. Al Jazeera are just there for their work. They're not there to do much support, as long as they can get news. And try to see how you can get through the Palestinians, and us, all our Palestinian friends, all the Arab friends, that we don't leave any stone unturned to support. And if you can support us financially to support this, we thank you for it, as you have always done. (2:00)

And this is going to be what I call, a change of game, game of technology for peace, and in a way, the next step for us will be disarmament. And we will show you the way we cooperate with the Iranian government and the, what we call, Chinese government, will bring the disarmament in next two years. We have the trust, we have the financial backing, and with what you as Knowledge Seekers will bring, will bring this disarmament that we don't see anymore of this mayhem by an idiot.

Q: ... I have a question regarding the same thing I had before that I wanted to ask you when you said, after the transmission with headphones, you said you continue and use these fields. I use the fields which I had tried in the session to eat, and then after it was working wonderful, and then I told to the physician about that, and little by little it goes away, or maybe I had some stress and needed to eat... How can we keep it?

K- You are part of that group which comes every month. This is why we do it on this month, process by process. The first time last a few days, next time lasts a week, after next. You'll learn, it's just a matter of testing, it's just, what you call, strengthening it. These sessions of once every month is not done just for the sake of doing sessions. (2:02) It gives you time to, what you call, learn about yourself. How far you can take it. I have Knowledge Seekers who write to me as part of these sessions, that, "today I could do this, it lasts longer, it's more powerful, it's less powerful." You know when you go for a physiotherapy, They give you a physiotherapy and then they say, "come back in three days or five days." Because the body has to work it out, till the next time, you can't come the next day for it. You understand? Body has to repair itself. Same with this, you have to learn, "which part is my Soul, how much energy?" Next time will be a week. Doesn't matter, you see your physician, you take ten tablets. Doesn't work, because that's the physical side. And then you learn more and more.

In the part of the teaching << audio cut >> ?? pain to change dimensions. This is an art. And it's a knowledge, it's not magic. And we done that with some Knowledge Seekers who've gone through the process that they go and they touch their liver, their kidney is sick, they hold it, they change it, and then physically they see the change. A number of Knowledge Seekers have done that, but you have to learn. It goes away, wait for the next session in March, and then go to the next session, see if this time it lasts longer.

There are two things I have to mention, or three things. Next week teaching will be at 12 o'clock, not at 9 o'clock. Due to, I have to be present, (2:04) for somebody is trying to create problems for Keshe Foundation, but they will be in a bigger problem. So we start at 12 o'clock. The 22nd of March meeting, the third month, third week meeting of the Keshe Foundation, which falls on the, what you call it, 15th, will be moved to 29th for this month, because of the conference in China. We are too entangled with it, so the process of the monthly meeting will move to the 29th. And please remember, there is no session of the monthly meeting till the 29th. And next week's session will be at 12 o'clock. And the third one, I forgot, when I remember I tell you.

Q: ... (2:06) I saw a teaching from 2015, that you showed an image with Nano layers, and a liquid between all the Nano particles. You explained that this liquid involves all the Souls in this Universe, but we can't see it with our eyes. So my question is, when we sleep our Souls expand and go through this dimension, where I can interact in zero-time with all the beings in this Universe? Could you teach us more about this liquid? And, is my emotion like a boat to travel in this dimension?

K- You remember that 'magic liquid' of the Keshe bottle which was on the Internet for years, and everyone was trying to guess what it was? And there was a lot of discussion, "what is the Keshe liquid?" This liquid is the same, but you have to understand the knowledge behind it. Why is said that? It's very simple.

Every Plasma in the Universe is connected to each other. And if you have one atom of Hydrogen or one molecule of water, that bottle, it is connected to every Soul created in the Unicose, through the fields of dimensions of the Creator. If you don't understand it, buy yourself ??, about 30, 40 magnets, and big ones, the ring ones and everything else, put it on the plate, and go and buy a tiny, tiny little round magnet, and try to fit it in and see the big ones move to accommodate this little chap, connected to it. (2:08)

So, this is the essence of the knowledge. Not everything is in some way or another. But, the understanding of the Nano materials, Nano Gans's and the liquid in between them. It's very easy. You have, in the world of computers, if you use your iPads and laptops and everything else, you have filtering. You filter what you want to receive, and filter what you don't want to receive. In the world of creation of the matter on this planet, there is a... you can filter it, it's the knowledge, that only receives the strength of the STM, the field of the STM. And these layers are those filters, which makes it easier to connect, in a way, in energy levels. And this is not something very strange, this is what your bone marrow, and the top of your bones does, it's a filter for the different energies that when they come out of what we call, the bone, become the energy of the T cells, B cells, white cells, red cells, and the rest.

So, we understand the knowledge. As you don't understand, it looks like magic, but your body does it 24 hours a day. But, the strength of the fields we make, because we connect it to the emotions in our system, we connect directly to your Soul. We connect to the emotion of the Soul, to the Soul, not... Very hard to connect to the Soul, if you understand how to do it. Even those of you who try to transmute, we teach you how, to connect through your Soul, through emotion, that's the gateway to it. (2:10) You want to see the mother who died years ago, connect to the emotion of the love of the mother. She'll be there like a flash. Those of you who understand what I'm talking about, you'll test it and then you'll see.

Many of you are sending requests for this, what we call, Plasma material. We start the production this week, and we try to bring, if possible, as much as possible, to Sanya for those of you who actually have purchased it. And, if not, it'll be sent. There's a matter of containment, that we can transfer and issue, what we call, the code numbers for them, that is unique, and it's been purchased from the Keshe Foundation, and it stays a unique number, with its own field capabilities. And we'll see how things will take shape, and how we go to the next process.

Any other question?

Q: ... Is the UFO that was seen in Jerusalem, showing the transmutation from a photon to a ray, when it left?

K- That is not a transmutation, that's a transportation using, what you call, vertical takeoff. I've explained this before. And you create... (2:12) because of the speed, if you find a high speed camera or low speed camera, whatever they call it, and take a snapshot picture by picture, very, very high speed, you see the conversion. How the fields are narrowed, and the craft will not fly in a dish-like vertical up. The craft turns to its side and moves up. This is converting from, like as you say, a photon into a ray. And in some papers I've written on what is available, we have written, it's... Trying to take a vertical takeoff it's like a man jumping off a high altitude plane with no parachute on, hoping to survive. You don't create a cylindrical upwards. You turn the craft to the side, and you, in a way, you work against the vertical, and you go up as a ray. This is the way it's done. It's a ?? flipping.

It's understanding. It's... We tested this without our Knowledge Seekers knowing in past few weeks in the lab. And watching which leg of the system shows reduction, and which way .. I keep on telling you, it's just you trying, falling on one leg. This is when you turn the craft on its side. And then it becomes like a ray. This is what's the difference between Cosmic Rays ?? Cosmic fields and rays, and the ray of light. And it's very special. But don't forget, as you are traveling in the dimension of the STP, you don't feel anything as a passengers inside. (2:14) You feel a tilt and it's not like you're going through the speed of sound or you go through G changes. You just change because field strength internally stays the same. It just tilted sideways. And now to you, it looks like it's changed from this, but it's not actually.

If you take a very high resolution, slow motion film of it, you see if it's a very good pilot, knows what he's doing, he just flips it over vertically. And I thank the Iranian scientists who did this. It's amazing when it's done. And if you know how to do it, it's very, very interesting in how things will take shape.

Something which came up as you remember three or four weeks ago we announced Iran becoming a nuclear power. And in past week, we've seen different presses announce this, that Iran has reached capability. The IAEA announces Iran has capability to produce three nuclear warheads, even though they're reducing the capability of the reduction in the stockpile. Iran is in excess of 30 nuclear warheads plus in the operational phase.

And we congratulate Iranian nuclear physicist, achieving this position, because we're going to use these materials in the very near future for deep space travels. And I have instructed my team and my family, (2:16) as I, through inheritance, I hope, own, the position of the large plot of lands in the place of birth of my grandfathers near to Natanz, we'll build the first Keshe Space Center, or Plasma Center, in the town of Keshe, in Iran, which is about 6 kilometers from Iran nuclear power stations, or what we call, refining. And this will bring huge advantages to what we call, Space Development. Now they have reached the enrichment, we can create pure field strength from the pure 99.9 enriched materials. And it'll give us a huge Space advantages in Nuclear power nations, they have another leg of advantage over the other nations, as they have their, they will understand, they have the nuclear energy as a Plasma, for Space travel that they have to share with the others, but the others can produce it in a much easier way. And this will take shape in the coming time. We hope that this is set by the time we take it to the Iran Conference.

Next question.

Q: ... In the last teaching Mr. Keshe elaborated about the Carbon 840 (C840), which is made up of 60 C14's. My question is that, if C840 is a molecular like Fullerene, or a single big atom, (2:18) can we create...

K- It's not an atom, it's a Plasma. It's a Plasma condition. And if you take a shape of it, in size can contain a Universe. This is the problem with our Knowledge Seekers, they have to stick, they're always physically trying to imagine it, that how it looks, is it what you call it, crystal cut, is this cut or that cut. It's the energy, is a Plasma, it's a dynamic sphere, with the characteristic of holding energies within it. It's not a aircraft that you put people in it. It's a field, which everything, this is like the atmospheric condition of the Earth, everything in it. And this is important for you to understand. It's not, you know, cut crystal. It's a field, which creates its own condition for the barriers.

If you look at it from outside, it looks like a football with 60 patches on it. But again, as a fields. Which makes that football, which is a Universe. And if you understand this explanation, there should be no question in what's next. It's a containment by fields, it's not containment by physicality. And because of its shape, it reflects its fields back into itself. Has no external connection except at the seams with the outside dimensions. (2:20)

If you want to understand the work of the fields in dimension of the field process, how they connect and how they separate, very easy. Look at your own lips and your skin. And see the line of the red in the skin. That line is exactly where the separation comes of your internal system and external skin. And it's an energy field. It's not sewn together. Separation of your lip line and your skin line is not a sewn thing, is not a football sewn with a leather thread. It's a field gap operation. And because it's a field of magnetic gravitational positioning, some fields which can penetrate, that are at the strength of it, is like you get a, what you call it, meteorite getting into Earth, can penetrate this gap. And as a virus they do. Herpes is one of them.

The reason we get herpes is that gap they can go through. The strength is so fine. It's like, you know, nowadays you buy 10 years ago, 20 years ago, you couldn't get rid of the stain on the shirt, because it was a stain, it wouldn't come off. The knowledge is now that we produce chemicals which are fine and they can go through the fabric and take the stain off. It's not magic. In the room temperature. You literally wash it in the tub and it's gone. It's the same with this space gaping.

The herpes virus in energy level is so high, in a way, high energy, that can go through this gap of the magnetic field gap between the skin, (2:22) between the lips and the skin. And it has an attraction point, equal balance field, which calls it in, it cannot just go in. There's a part of the brain of the man which produces a balanced field equal to the herpes. And this, because of the connection, magnetic field connection like a twin stars, transfers energy and sits in the brain. And later on, and every time some field changes in your brain, you see the herpes on the lips. Because the energy transferred to where it came has a fingerprint on the ??.

Many women, during their menstrual cycle, because they go through hormone changes of the same, get this, what you call it, herpes like on their lips. Or they get spots on their skin. It's the same process. Where the field is the strength of the magnetic field in the brain, through hormones, triggers this off the ?? cuff. And that magnetic field gap between the layers of the skin, then you see it as an infection on the skin. We see that in the youth, when they go through hormone changes, as the field changes, we see boils under the skin and on their face, in the same spot, and moves. It's where that gap of the skin is, and allows change. And that field change, changes the salt level in the middle layer. And then it becomes like infections, you see. If you change the emotion of the child, if you change the certain energy fields of intake, no child will have a single boil, and the suffering they go through. But use all the creams. The problem is not the cream. It's understanding the fields.

And it's the same with this C14. (2:24) Because C840 and plus, there is a higher order. We see that in the dimension of the galaxies, which man is not even aware of. These, it's like crystals hitting each other in the Universe. We never understood it, but we see some effects of it. And then, this is part of structure, hold within as an energy, not as a crystal structure shape. It's magnetic field strength dependent.

If you have the last question, I have to leave to attend the meeting.

Q: ... I want to ask, is a person that's located in other parts of the Universe, after his or her physicality death, and then manifests as a star, a galaxy, etc. Is it still limited by its new physical body, just like we were created and lived on Earth? (K - yes) Does this existence that has become a star or a Galaxy or a Cosmic dust, have the opportunity to learn the transformation knowledge, to become a free Space traveler?

K- You are a free Space traveler, but the magnetic field strength of you decides your position. And once your position is decided, the environment decides your size. and how you position, are you... I can explain it in a simple way. If you land in a desert and looking for water, (2:26) or you land on a river full of fresh water. Would you land in a part of a Space, which there is very little high strength field, magnetic fields, or your Soul lands on the river of fields of the same strength as you, your Soul, and then it gathers, it absorbs more and more faster and grows faster. And this is the structure, the way it works.

And those Souls, it's like, you know, it's predestined according to the .. what the Soul is evolved in understanding of its process of creation, in its infancy on this planet. The seed is sown and the field strength is decided, and you decide what you take from it and what you put on it. No one controls your Souls, and no one take your Souls to slavery, unless you don't understand and you want to fight ??... Anybody tells you, "they are slaving your Soul." Understand, we call them the 'devils.' That's how they want to enslave you. You have the total freedom for the first time in generations. In generations. Because you have the freedom to decide for your Soul, nobody wants it, nobody has to do it, nobody can touch it, nor wanting it.

And one day I explain to you in the teaching about what we call, the God, or what came originally as ?? Mehr, M-E-H-R. That is the first time we talk about it, man talked about it, and we have statues from the time of... One statues left that we know about, where we see Mehr trying to slaughter a cow, or, and then there are two boys, one in the front, one in the back, (2:28) one with a torch pointing to the North and one with the South. And changed in Arabic word to the name of Abraham with two sons. And slaughtering of one son and then the other cow comes. But this comes from the mythical condition of Mehr, which is the original, of the ?? very first time. Man, with the information we have, speaks about God, the Creation, the Creator. And, one of the teaching of Mehr is, there is no slavery, there is nobody can do. And that freedom is there for man to decide, to slave himself, to become slaughtered by the wish of the others. Not necessarily physically, but in a way, become.

One day, go into the history books, learn about Mehr. And then, you read about Ibrahim, ?? and you see it's actually the name of where, which is changed into Ibrahim. And again goes back to the time of the long time, long, long time. And the two appear about the same time, where the teaching went across the whole of the Western World. and now became ?? Abrahmaism and because of the way they attached and tagged themselves with it. It's the first time we know about the Soul. In teaching of Mehr has been the cornerstone of all the path of beliefs and then they made the statues to celebrate his existence.

Thank you very much for today. Join us, if you are Chinese, tomorrow in the session. And join us in Sanya, if you want to understand a new, (2:30) ?? fields impressions and expressions. And enjoy your trips. And we

have some latecomers still registering to come to Sanya. We welcome you, to the beautiful land of China. And those of you who would like to take it further.

This statue in Sanya is beautiful when you stand in front of it. One of our Knowledge Seekers, I respect him and I love this guy so much. As Knowledge Seeker he lives not very far from the statue, from his house. You're not very far from this. And you see how things come and go. It's... from his house you can get, drive and see these and the islands, they produce other things and it's beautiful, one of the most beautiful islands I've seen and I've seen many islands around the world. This is a symbol of Sanya in a way. We meet him in Sanya and it's nice to meet him again, after 2-3 years after Corona. He's one of the Knowledge Seekers who has done a lot of research. He is doing research, and he's years ahead of many other Knowledge Seekers in his knowledge.

Thank you very much, see you next week, I have to leave. And we release the data, then the links and everything for the Palestine, by Monday on all the channels, and we leave it to you to raise the awareness around the world. Thank you very much.

R: Okay, thank you Mr. Keshe. Great workshop and we'll see you next week. Hopefully.

K- 12 o'clock. (2:32)

R: Yes, right. Thanks for the reminder. 12 o'clock, not 9 o'clock for next week's Knowledge Seekers Workshop. We'll put that up in the notices as well.

K- Yeah, thank you very much. See you.

R: Thank you Mr. Keshe, good luck in your meetings and I hope it all goes well for you and the Keshe Foundation.

K- We hope so. Thank you very much.

527 KSW Feb 29, 2024

528th Knowledge Seekers Workshop March 7, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Cosmic Rays (CR) -emotions; Intentions create emotions - go there; Emotions transmit CR; Create taste orange juice - through emotions; STM & STP create P - go anywhere; Correct intention - pleasure to be; Israelis blocked KF to help Palestinians - feed them without phone lines - them knowing; Everybody

connected through energy; Soul has fingerprint; Knowledge transfer faster - more T released; Sanya - freedom from planet; Create 'second skin' - UFO with own emotions & fields; Skin connected to brain & lungs; Sanya create environment to see Soul - no headphones - won't repeat; STM creates UFO; Sincere KS create UFO in building of Sanya; Star Formation (SF) see only 3 reactors on UFO - inside craft; 4th reactor is Souls of passenger as a whole; How stars create P; Fake UFO don't have Soul; STC - STM - Soul Environment create body; STC is H; How skin made - CR & C together with H - AA - create all life in U; If nothing happens look inside; Trust Soul to UFO captain - all Souls as one; Constantly change skin cells - receive new energies from U - evolution; Souls not pure - block creation; Tainted Souls cannot unify; Gift - how P made; Lucky to be in Sanya - change; Beryllium - nuclear info - behave like C14; Update on Gaza - large contacts made - advance T start feeding; Neural - Nerve systems connected to skin & brain - don't short-circuit; Nano coated acupuncture needles dangerous - even some Gans; Neural pain - change shape; Test purity of Soul; Don't us T to make others love you - not steal; Second Sun - conditions changed - signs of nearness - Global Warming; Look from Sun to Galaxy; Disasters spread seed of STM; Enlighten yourself in Sanya

ENGLISH TRANSCRIPTION

(:16)

Yes, thank you very much. Good morning, good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back, more or less, to the 10th year anniversary of this teachings. This week, more or less, we walk into our 10th year. And, I hope we can teach for another 10 years, If the situation and the time is there for us to teach. But it's thankful to be able to share and hopefully we learn more.

Going through Cosmic Rays, understanding in the Cosmic Rays, understanding Cosmic Rays and Fields are essence of the transportation, connection, transmutation, and in a way, replication systems of the Universe. Man soon will find out that what we call Cosmic Rays (CR), is in a way, connected to Man's intention, to Man's emotion. What I gathered and what we try to make you see and understand gradually, is what you should have gathered by now, and what we call emotion. and within the Emotion created by intention. You should have known that in a very near future, (:18) if we give you a connection, through Emotion of intention, or intention creates such an emotion, a specific emotion, You can connect to the point, to the emotion, to the feeling.

So, one of the biggest problems, which has been, "How do you know where I am?" "How can you get me there and how can you bring me back?" And, one interesting point will be, for many of you, which some are learning it through the process of the teaching, and some already have some understanding of it. But, in some of the teachings, I have touched on this very, very, very slightly, but in a deep way, according to, if you paid attention to it.

In the process of past few months, using the systems, we give you the intention. You create the Emotion and you land up in the destination or the intention. In a way, you're sitting in the house, you make an intention to go to the cinema, you create the Emotion of what you might see, what you might enjoy, and you walk, get in the car, and you get to the cinema to fulfill the intention. And then the emotion created in you. In a present

day, we transmit information. And if you have the right receptor, (:20) the right system to receive the specific channel strength, 9 megahertz, 2 kilohertz, or whatever, then you can listen to what was sent.

The beauty with Cosmic Rays is that you don't need that transmitter. You can create the intention, you can create the emotion and with it according to the way it's intended and emotion is created you can connect to the source. And those souls who understand this and get to that point and the intention and the emotion of intention is correct way, they can see Christ, they can go to the dimension (D) of the, what we call, 'seat of the Creator,' or they can receive a banana.

This became very interesting for a lot of you some years ago, and then you lost because it was just fun. One of our loved Knowledge Seekers (KS) made a banana, the alcohol, and the other parts, and as he wished, he got that feeling. In the morning he wanted an orange juice, he created the emotion, and the feeling, and the intention of having a orange juice, and he received the taste of energy. And we know what he did with the others.

In this process, we come to understand that your source, up to now, in a dimension of the, whatever Emotion of the Soul, (:22) was to find your way to Christ or to the Creator. But, if you would have created the right intention, and the right Emotion, which we said Emotion comes from interaction of the Soul of Physicality (STP), and Soul of the Man (STM), and that intention is created by dimension of physicality (P), which brings in the game of the STP, you can, in a way, through the STM reach anywhere. I hope you understood what I said.

And, this is the same way that we will teach Knowledge Seekers, and a Man of Space, to keep in touch with Base, to understand the source. For you, it's difficult, because you don't know the smell of the Creator, you don't know His feature, you don't know where He is, so, that's out of the question. But, Keshe Foundation has created a system, it feeds me, it can give me the medicine of my Soul, and it can bring me the wellness of my P, and emotionally can balance me. So, if my intention is the correct intention, to be, to enjoy the pleasure of, to allow it, to give me the pleasure of existing, I can connect to that system. Which means, I don't even need a headphone. I need to connect to the dimension of the fields of the Universe (U), and I receive what I need.

This has become very apparent, in the last week, we're trying to set up things with Palestinians. We go out to reach, but they are not aware of. So, we change our technique and tactics, that we deliver direct. (:24) And we let them to come to, to satisfy. And this is in a way, you wish of a banana, I have made a channels banana will come to you. But that you are not aware of. How it came, the way it came, because the strength of the field of emotion of the hunger in a banana, is at the strength that we have created in the spectrum of every motion. And every motion, and every emotion, and every dimension of the Soul of every individual has his own fingerprint. It's like what you have on your finger, not two can match. And we can have a spectrum of these as we see in the number of the stars in the Universe, in one galaxy, in one Universe. And God knows what is in the Unicose.

Now, maybe you understand how we connect. Maybe you need the connection to connect in dimension of understanding. But you've got to understand, it comes as energy. I cannot feel it in dimension of physicality (D of P). But in the dimension of physicality, my life has changed. I don't need to eat. I don't need to get depressed. I don't need to do something for wellness of my headache or my cancer. And if now one understand this, you have truly become the 'man of Universe.' You have truly understood the process of the Creation. (:26)

In a coming time, in the coming weeks, as now we are on a what we call, scaling up of the knowledge very rapidly, we will introduce more and more of these technologies (T). And we give you the opportunity for you to test, not for us to bring it to show, but you delivering to yourself, building of the trust, building of the certainty that, "I can do that, I can reach that, I'll be part of it."

In a way, as those of you who come to Sanya, you'll be one of the most fortunate creatures on this planet. I have set up a system, that if you reach the position of absolute clarity, you will feel the dimension field forces of the Universe. You'll feel to be part of it, and the world will be your 'oyster.' In a way, we have set up a scene that in the island of Sanya, in Hainan, man will celebrate his freedom from this planet. And those of you who enter this space, and you are sincere, and clear with your conduct and your emotion, you will know exactly what we talk about. In London and in Manchester, you had a headphone, to go to those dimensions, and some of you two. (:28) In Sanya, you enter an environment. And, if you find the right spot, for the strength of the field of your Soul, you will feel the ?? (detachment) attachment. In conference in Sanya, we'll let you loose, to find, possibly, if you are sincere enough with yourself, the strength of your Soul, the position of the opening contact, the position. The position of you understanding, being in touch with, and some of you might go through a transition. We give you the condition, we create the environment, that, in that environment, is not anymore headphones on your head, it's the air you breathe, and the environment, atmosphere you walk in, it's part of that structure of expansion of your Soul. What we call the 'collective,' and with it the creation of life.

In teaching of the last years and in the psychological, and biological, and everything else which man has written understood about himself, it says that the skin of the man is the brain of the, it's connected, it's part of. And the same is connected to your lung. But you have a structure of the center fields, (:30) different fields, which makes the physical structure of the body of the man. And then you have the STM, which interaction of these with the dimension of connection of those, creates the skin of the man.

If you understand this, then you come to understand when we give you the structure which is set up for you in Sanya, and if you touch the right field strength, right position, in a way 'hitting the arrow on the red ball of the dart board,' you will create that skin. You will feel, you will see physical structure of what you call a craft, which your Soul is creator of.

In Sanya, as I said, I bring you something that you've never seen. But, to see it, you bring your Soul. It's not taught on the teaching, I don't need to be there. And we will never repeat this again. The systems will not be set up to create this condition, that the man can see through the emotion of his Soul, with the environment dimension of interaction of the fields, the creation of, materialization of, the system which, in a physical dimension, you create another skin, another craft, another body, to confirm the existence of your physical body in two dimensions. In a way, you become the STP, (:32) because you still have the brain and thinking, and the craft becomes the center interaction of the emotion, and the physicality of the Soul, which is within the brain of the man.

If you understood this, I explained this a few minutes ago to one of my beautiful Knowledge Seekers, because I knew it's going to be taught today. And I embarked on this. And I explained this in a very, very direct way last week. I explained to you that when you have the reactors, the 3 reactors of the base of the Star Formation (SF) system, and it has no physical dimension, because by creation or understanding of the new technologies, we don't need to create containment, but it's a Plasma with a free boundary. There's one secret, which many years I wanted to explain. And I open it up, because you will understand exactly, you have been the most misfortunate man, not be in Sanya.

When you look at the UFO, as you call it, the dream of the dreams of the man to travel the span of the Universe. And we always talked about the Star Formation (SF). (:34) When we look, and we have seen no other reports, because those who have been through, and I said you can always identify, you see the base of the SF, the 3 reactors, the 3 lights which are inside, they're not outside, as I explained last time. We never see the fourth one. We only see the physicality of the machine. Because the fourth one is made from the Soul of interaction of the whole inhabitants of the system. And as what we call, the dimension of the fields of the emotion of the man's system, we call it the brain, it creates the physicality of the man. The fourth reactor, which is the emotion of the STM, or the creature, or the structure, which has no light within it, because it's the way it operates in a different dimension, creates the physicality of the craft, the way the physicality of your body is created.

In so many ways, today I have given you an insight, understanding why we teach about the SF. And man, for centuries, for decades, for whatever, whenever they report seeing a UFO, they see three, which in fact should be four. Where the fourth is the dimension of the emotion of the Soul, which in interaction with the three creates the physical boundary of the system. You call it a UFO. So for the first time you understand the captain of these systems is the collective Soul of its inhabitants. (:36) Then if you understood this and you understand the physiology of the Plasma interaction in the Universe, you should understand how planet, stars, galaxies, and universes give themselves through the dimension of the Carbon 14 and 840 and the other dimensions. The dimension of existence, dimension of physicality, dimension confirmation of it.

And if man one day understands this knowledge, one day understand what Mr. Keshe explains as the SF, but now up to now we never understood that when we look at these UFOs, where is the fourth one. If the other three can be seen when they are in, why can't we see the fourth one? Why can't we see the STM? But we see the physicality (P) of the man. Then you understand the secret of Creation. When you understand how the Creator has given the man dimension of physicality, being created by the interaction of the Soul of the Creator (STC) itself. Where the other dimension of the fields create the dimension of existence, in interaction of the fields with the STC. And then you understand every ray, every condition in that UFO contains every essence of its passengers. Then you understand there is a big difference between the craft which man makes from steel and iron, and he has limitation of the weight. The UFOs, the physical dimension of the transportation in the Universe has no material, (:38) and has no dimension, but is created out of the intention.

Then, now you understand how you work, you live, and how the dimension of physicality of the man is created by the interaction of the field of the STM, and the dimension of interaction of the fields of the matter states of the environment. Then, if one understands this, one can be passenger of both the dimension of physicality, and the dimension of Energy, transmutation and the Soul, in connection with the transmutation dimension of the STC.

Maybe, now you understand. When, for decades I've been explaining, I can tell you which picture is fake, and which picture is true, are the UFOs. Those who are fake have no Soul. And, if they have a Soul, you can feel it, you are trained to, you know it's the real. The reality of existence, the way the STM in interaction with the energy fields of the, what we call, physical dimension, with interaction with the Soul of the environment, ?? in the field of the environment, leads to the creation of physicality of the man. Without any matter, God does not have a factory building skins and bones and bringing it and sewing it together. It's interaction of the fields which creates the skin of the man. Which itself is made of fields. (:40)

And then you understand why you have Carbon 60 (C60), as I explained before. Why you have interaction of the fields in dimension of 840 and why you have the connection and the dimension in C12 and C14. Then, if you understand this, if you come close to understand the interaction of the STC, which you call Hydrogen, in interaction and connection with the Carbons of the man, what you call C-H bond, creates the dimension of life in any corner of the Universe, 'Mr. COHN' Then, man should understand, the dimension of the physicality of the man is connected to the matter state interaction fields of its own amino acid (AA). Then, if you understand this, if you become wise to this knowledge, you can manifest yourself in any dimension in the Universe. And, in collection of your own Soul to create the 3 base and freedom of the STM, you can create UFO's in the dimension of field of the man. You don't need no Prophets and no Gods and Messengers as liars and cheaters, as was made by man.

Knowledge does not need prophet. Knowledge only needs is understanding and comprehending, and being able to look at the knowledge in a true way as it is, not as one wants it to be. Now you understand where 'bits of the bricks' is coming together to build that castle. (:42) And how the knowledge is putting together brings you that change. In Sanya we'll bring a course, we'll bring game changers. And, as I said, those of you who were fortunate, will meet some of you, your Creator, by yourself. We just create the dimension of fields of transfer, transmutation of connection, depending on the strength of your Soul.

And some of you, who have no understanding, but you went to be part of the show, 'nothing happened to me, why don't I feel anything?' Because your own Soul understands, you're not ready in the dimension of physicality to reach that point. No one to blame, except your own prejudice, understanding, and your own, what I call, misunderstanding, or 'greed to reach,' where you already possess. In a way, the hunger makes you blind and actually the food is in your own (hand). And what are you hungry for? Look within, understand the process of your own creation, how we keep on talking about the Soul, keep on talking about the STP and the creation of physicality, your skin and then you still don't understand, you called yourself this Chakra, that Chakra, Vertical Chakra' creates the figure of the man, 'Triangular Chakra' creates the figure of the UFO and the rest of it.

And now you understand, again I tell you the biggest mystery, why you don't see a fourth reactor in any of the UFOs. (:44) And if you see the fourth, what's the reason? Has a generation, has a race understood, like man tried to make a machine, a fake Soul? Or you don't see no Soul, but you understand the emotion of the fields, and you know what you're dealing with. And if you are sincere enough, you can create the three stars the way you created your fingers, the way you created your kidney, the way you created your physical dimension, you will release the STM in the dimension of interaction of the environment to create and change the physicality of the man as it was created in the skin through emotion of fields, ?? of UFO.

Then you understand. Go back into teaching years ago, and I explained many times. When you leave, you give your Soul to a trusted captain. That captain is collective Soul of the passengers of the system, that is just and correct and is the same to all his passengers. And the interaction of the fields of their existence leads to totality life, and the creation of physicality. As we see in the body of the man, in collective field strength of the same race, we make the kidney. And of the same race, we make the lung. And of the same race, we make intestine. In collecting their interaction through the fields of their own dimension of existence, (:46) we give the, or we create the, or we bring about the creation of the STP, that in the interaction of the collective fields of the creation of the totality together, we create the dimension of the skin of the man. And we change it because every man have done, will do, as long as it lives, changes the skin. Because a new dimension of fields needs to be. It's like when you clean the window because you can't see through it anymore. It sheds to leave the clear window for the energies of the Universe to enter the body, to interact, to confirm, to connect.

Man thought, "Uh, I go to the sauna, and steam, and I get this thingy, wash it, and my skin comes off, and I feel good." Now you understand what you do, even with change of the skin. It gets tarnished. It gets damaged. It gets, does not absorb enough fields from the Universe the way it does. So it changes. Then maybe, maybe you understand why people do the same job, have the same behavior. As their skin absorbs only the field strength of, because it's tarnished, it's coated by the fields of the work. Now you understand. Now you understand even why evolution comes into operation according to the environment.

In so many ways, get yourself, understand the process of creation of yourself, and you'll unravel the mystery of Creation. (:48) Does not matter where in the Universe. It'll be one of the biggest pleasure, to see how so many of you, as Knowledge Seekers, in Sanya, reach the point of maturity to understand your own Soul. And then it's your decision. How you transfer, how you transmute, or how you stand in it up, "Nothing happened to me. It's something wrong with the Keshe Foundation work." Because your Soul is not pure to reach that point. Have not understood the process of creation. "Why am I the only one?" Because you block it, because you're too attached to the dimension of physicality. Show me something physical, where I don't need that, I need the emotion of, to allow my Soul to interact with the STP.

We opened this door in a dimension of, in London. Now, we create the environment. For the first time, we create an environment for you as Knowledge Seekers to walk in. And that'll be the last time we ever do this. Because there is a reason. And soon you will understand this. Those of you who have now more or less completed, you're going to be in Sanya in a week, 10 days time, you will experience the most amazing cycle of life and creation. While you're next to another Soul, while you stand amongst the others. This is not 'psychedelic' or whatever. (:50) This is the essence of the Creation, where we create dimension of connection to your own existence in the Universe.

Some of you will understand how privileged your Soul has been to be present in Saniya. The gift it has given you to bring you to that position. And those of you who come with a tainted heart, you'll find out you go with a very heavy heart. Because you carry the emotion of the physicality, and we have not set the system for that.

It'll be interesting to see how you as Knowledge Seekers, build the blocks of the knowledge together. And, I hope I don't even have to teach in Sanya. The emotion, the field extension, the desire of the man in the dimension of the Soul, will create the eventuality of the presence and confirmation, of the knowledge, the existence, operation of the Soul. And if one of you gets lucky enough and close enough, for a few seconds or a few minutes, hits the 'jackpot,' in field strength of the emotion of the Soul, will create that UFO in that building.

I fell in love with Sanya and Hainan, because of the love of one man, his purity and his understanding. And I have one of the highest respect for him. (:52) He's a man of Sanya. And in a way, whatever he touches, he reaches. And I hope, and I hope as he is present in the conference, the way he advanced, understood, his Soul will lead to the creation of ?? why the man has ?? (?? written) (risen) here. But that has to be seen. How many tainted Souls are amongst us, than the totality of the creation of the unified Soul, will not be taking shape.

Many of you will wish you could be there. Many of you, if you create the intention of the dimension, shall be there to feel it.

Try to understand today's, what I call, the 10th anniversary of the teachings, which I gave you one of the biggest gift, to understand how your physicality created, and how you can instantly travel in dimension of the fields, or material condition of the UFOs. And then I hope you achieve that, because if you manage to do that, in no time you'll manage to meet your Creator in the dimension of Soul, the fields and energy.

And I hope, and I hope those of you who come to Sanya, understand this. (:54) And I'm waiting to see if ?? who says, "Nothing happened to me, why am I the only one?" Find out within your Soul, what you have blocked to yourself and nobody else. And some of you will achieve that. How much... how some of you will reach that point of confirmation and manifestation? As I said to our friend in Sanya, "When I'm ready I come." Because I know it's the time. And we are coming. And his Soul is there, and let's see what magic's man (will) create for himself. We go for a break and we come back, and if there are any questions, we try to enlighten each other with the knowledge of the Creation. Rick, if you'd like take us for a break, and we come back.

>> **BREAK** >> 528 KSW March 07, 2024 (1:00).

K- Not much today, we are all in the same position as before. We are preparing to move to Sanya. We'll put a four day seminar and conference in Sanya, and there on move on to the next, what we call, presentation in the beautiful city of Isfahan later on this year. It is our intention to bring one of the biggest Space, or what I call, field presentations to be seen in Sanya. Very few of you are lucky enough to be there. As what Chinese said, "We don't need to come, because we listen and we learn everything in the teaching." It's quite perfectly okay, it means your Soul is not ready, and will not be ready to reach that point. The rest is all .. what it is, because those who are there, who feel it, you'll understand it. (1:02) As I said, those of you who are there, say, "I was there when it happened."

The, what we call, there's a lot of question about the material we introduced last week, a lot of people asked questions, and some of you who have (Cosmic ray Plasma material CRPm) purchased material we try to deliver, and the production has already started this morning, or yesterday morning if I'm correct. And in so many ways this material we put out, as I said, is what I call, the 'currency exchange,' or 'life exchange' material in the Universe. Those of you who get it, you play with it, because it's got fields and everything else. And some of you will understand its power if you use it, place it in the right way. It's not my intention to teach you what to do with it, as so you've been in the past, god knows, 10 years. You'll test it. You'll come up with a new bits with it. You come up with a new theories with it. And you will, in a way, gather the knowledge. And how you can use the knowledge for the, what I call, elevation of your own existence.

This material will change the dimension of man's existence on this planet. And you will understand how and why, gradually we'll explain. Please do not put it in the reactors, and please do not play with it. It means you have not understood the value of it. (1:04) It has certain ways to be adored, and the way, where the beauty creates. That does not need what man wants to push with physical dimension. You will understand, this is created out of the fields of the, what we call, Universe, from Cosmic Rays (CR), in the evolution of it to matter state, is in the hand of you. The way you put the Gans's in the jar and you saw it's color, it's height, and it's dimension changes over time. Those of you who manage to get these materials and connect to Universal fields, you will see the same as you saw in the liquid. Material, the fields around them, the strength of them will change every hour, according to how you feel, who is touching your emotion, and how you touch the emotion of the environment. And then it'll be a fascinating time, how with these, becomes the thermometer for man's condition of mental health, and physical health, and happiness of the emotion. You will feel it, you understand it, and you understand why we taught about that Soul of the flying machine. If you understand and comprehend what is on the screen.

Any question?

R: ... (1:06) I think I'll start off with a mail in question from Bente. Bente is one of our older Knowledge Seekers, she's in her mid-eighties I believe.

K- No, she's in the age of you and me, we just covered it up.

R: For the old timers, all right.

K- Oh we are the... we are becoming the youth of the future. When a man lives for thousands of years, we are just become toddlers. Carry on.

Q: Well, she's a Knowledge Seeker, she's studying Archeology and Geology, and has been on some trips to Siberia and such places, and she's interested in what they call, 'Cosmogenic Testing', which is when cosmic rays interact with certain substances, specifically, I think she mentions, is it Beryllium? Beryllium, yes. When cosmic rays hit a rock, like with Beryllium in it, the Beryllium will decay, and they can measure that Beryllium to know how old that area is. So she has a question. Why does Beryllium not decay all the time, but only when exposed to cosmic rays.

K- Can you go to your beloved friend, Google, and bring this mysterious material up, and then we understand. (1:08)

R: ... Beryllium is a chemical element, it has the symbol 'Be', Atomic number 4. It is a steel-gray, strong, lightweight and brittle alkaline earth metal. Let me see, what do we have here in regards to its radioactivity? Let's see. It says, it's interesting, it's Beryllium, because of its low density and atomic mass, Beryllium is relatively transparent to X-rays and other forms of ionizing radiation. Therefore, it is the most common 'window' material for X-ray equipment, and components of particle detectors. So, you've been hanging out with Beryllium since you were a kid Mr. Keshe.

K- Oh, I know this material inside out, it has a lot of beauty with it. Can you give us the atomic mass and atomic weight of it? Do you see it?

R: Well, we've got the atomic weight is 9, and the atomic number is 4.

K- So, he has one extra, it has one extra Neutron.

R: ... (1:10) Naturally occurring Beryllium is a isotopically pure Beryllium-9, which has a nuclear spin of 3 over 2. I see it's a large scattering, or it's Neutron moderator and so on.

K- Can you see this material in the body of the man? Wikipedia. Do you find Beryllium in the body of the man?

R: ... It's a component of several dental alloys. .. Biological effects, approximately 35 micrograms of Beryllium is found in the average human body, an amount not considered harmful. Beryllium is chemically similar to Magnesium, and therefore can displace it from enzymes, which causes them to malfunction. Because Beryllium is a highly charged and small ion, it can easily get into many tissues and cells, where it specifically targets cell nuclei, inhibiting many enzymes, including those used for synthesizing DNA. Its toxicity is exaggerated by the fact that the body has no means to control Beryllium levels, and once inside the body, Beryllium cannot be removed, (1:12) and it talks about you how you can get it through inhalation or other exposure (K- Do you see.) .. the good points of Beryllium in the body.

K- One of the reasons this material reacts this way and it's something we... The nuclear weapon technology uses this property.

R: It says specifically that way, that Beryllium Oxide is being studied for use in increasing the thermal conductivity of Uranium Dioxide nuclear fuel pellets.

K- Yeah, we use it extensively. This is why I wanted you to read it. Because of this property, it's extensively used, but we use it in a different way for absorption. Because once you absorb a flying neutron, you reduce its energy, and you absorb that energy, and you create heat with it. And in the Cosmic Rays (CR), or Cosmic, or what we call, Universal Fields, we have this property with this material that it transfers fields, but it (also) holds fields. And in the Carbon 14 (C14) combination, and Carbon, what we call, C60 combination, it creates an inhibitor. It creates a condition to hold on (to), but then, because of its structure, it shakes, (1:14) it literally vibrates, and like a quartz, it releases its energy. And if the energy is not, in a way, held in position, it goes to the dimension of the decay, or separation of the molecular structural connection.

It's one of the biggest nightmare of the nuclear physicists, this material, and use of it in ?? cladding, and use of it in what we call, the rods, absorption rods, and creation of the heat is very fundamental. It's one of the game players in this process (creating heat in nuclear power general stations). But at the same time, if we do, it's not an 'if,' in interaction of the nuclear materials, we create certain types of Cosmic Ray. And we create certain Cosmic Fields. It's a natural process. And one day, when man understands, man will move to the next step.

We talk about what we call, the structure of this material. If you look at it, it's two Helium with the floating neutron. If you manage to get that floating neutron opened up, you'll break the system up. And in a way, by releasing energy into this neutron, you create that heating bubble of the fields, that creates what we call dimension of the fission and splitting. And C14, Cosmic Rays in certain spectrum go down to ?? 9 in the magnetic field strength. (1:16) In C12, we always consider up to 30% variation in isotope energy. And C14 plays a 40% to 45% variation. And even if you work with 25%, or round about 30%, energy field absorption and release, you'll find out fields conversion will allow the decay of this material. In a way mostly splits into a very uneven, or creates a heavier element, depending on the field environment it exists in. This material plays a very good part in nuclear industry. And, it's one of those materials they teach you, you have to understand it, because, especially if you heat, working with the control rods, in transferring heat, and bringing a reactor under control, when you release the reactors on the high speed, ?? at the bottom of the reactor to stand out of all the energies and the, what we call, the neutrons and the rest of it.

Part of this comes through this, but, Cosmic Rays in the spectrum of the C14 to C12, with the dimension of the diversity of around about 30%, which is matter state needs that to hold on to itself. It comes to the factor of, in the spectrum of this material, which itself has 30% up and down. Which means if you get 2.7, with the 9 you come around about 12. And if you come down by 25, 30% with 14, (1:18) you'll see sometime these two fields interact and balance, and they allow the transfer or... Not a decay, but splitting of the fields of this material.

When you deal with Cosmic Ray, you look at the field strength, not as a ray, the energy transfer. And then you understand why it does. In the nuclear industry, we spend part of the, what we call, our studies, is about this material. Because of its use in certain parts of the nuclear material industry. And in the X-rays, it does the same. One of the reasons it behaves, allowing the X-ray to go through it, because of this extra one single free bits in it, which opens a window for it. But then again, by structure of it, it creates a vibration or a window, a space gap, that you get a... you, in this, especially in X-ray, you absorb some of the energy, higher order energy of the... when a beam hits the solid material, by this material. The way we use it in nuclear industry for absorption of the heat and what we call, radiation, the whole part of the creation of X-ray before it comes out of the tube, is absorbed by this material. It's not just its transparency, it has... it creates a, what we call, filtering of certain fields of X-ray. Which just lies within the band of the structure of the body of the man, the tissues don't get damaged. (1:20)

R: It's interesting they note here, I think is a partial answer to Bente's question about radioactive cosmogenic 10 Beryllium is produced in the atmosphere of the Earth by the Cosmic Rays spallation of Oxygen. So, Oxygen when it gets hit by the Cosmic Rays produces this 10 Beryllium. And that 10 Beryllium accumulates at the soil surface, where it's relatively long half-life of 1.36 million years, permits it to sit there for a long time before it decays to Boron. So, that's how they measure this soil erosion and different layers of soils, and that kind of thing, apparently.

K- It has a lot of use. If you walk away from matter state, talking about the neutron and electron and proton of these elements, and bring them into dimension of the fields, you'll find out the behavior is totally different. And, sometimes due to the energy they carry, they go usually, two, three times by energy, in matter state compared to what they are. So, what it means, as you say, it gets a Carbon, if a Cosmic Ray hits on Oxygen. In a way, if you give enough energy for absorbing it, and (it gets) absorbed by this material, it can behave like Oxygen. (1:22) And then because it behaves like Oxygen, it's in the same environment. So it doesn't decay in the ocean and surface of waters. Because it's a different energy spectrum than the, what you call it, Oxygen. Because Oxygen itself is, again, in a spectrum, is and come down to what we call, C14 strength in the upper atmosphere. Which again, that spectrum behaves like this material, one of these isotopes. When you play with energy of the elements, you understand they are made of Plasma. The game is very different than when you speak about the same element in matter state of condition. This material literally can go and behave in certain conditions like C14. And in isotopes of Oxygen, we see behavior of C14.

Any other question?

Q: Well, Bente has a second part of her questions here. And she wants to know more about Cosmic Rays. So she's been looking up Cosmic Rays. And they say that Cosmic Rays mostly composed of high energy nucleons, such as protons, neutrons, and atomic nuclei. And that Cosmic Rays are essentially normal matter that has been accelerated by near light speed, by the shock waves produced by the supernova. (K- What

rubbish). So she's asking, why are Cosmic Ray high energy rays? (1:24) And how are they actually produced?

K- It's as I explained, we have, we call it Cosmic Ray or Cosmic Fields. and what you call it, if it's a photon or is it energy, as a field, as a ray. It's not its production, it's in its travel, it's in the state of Plasma. In interaction with Inertia, converts into its matter state. And if you have the condition of Inertia of it, it can convert, otherwise it goes through. It plays a 'good game' and it fits into transportation structure.

If you read the patent, you understand I speak about the Helium, ionization of Helium, through ?? scintillation. Then if you take this up with understanding, you have a free, what I call, free Plasma extra, with what sits in the system, you'll find out you have a behavior of a nitrogen in the amino acid. And this gives a lot of variation in the game this material can play. It's something on a base material in the nuclear industry. (1:26) And as a matter state of it. But if you consider a nuclear reactor to be the Plasma ?? condition, because there's so much fields. The matter in the nuclear reactors behave like they are in their own environment, of their own gravity and their own field strength. Then you see this material behaves as a Plasma in a field environment, and not as matter. And then it explains all these behaviors, why and how we see it. Hence why in Space as a field, it behaves like, what you call it, a photon, or a particle. Depends on how and the shape of the central field forces.

Any other question?

This is a very, very intriguing material. Always been. If you go with it and look at it in the construction of the physical body of the man, it plays a huge role in transparency at the skin level. And it plays huge, that transparency of amount of fields, you absorb from the environment.

R: It must be able to move so easily through the body, being such a tiny particle. It's basically like a Helium particle, which could move right through things.

K- .. It's a very erratic material. Because of this extra neutron, it 'kicks a lot,' and it creates a space gap that energy can be absorbed within it. (1:28) It very, behaves very much like a Nano material.

Any other question?

Q: ... We have a couple of questions about updates from Gaza and from the experiment to produce the food for the Palestinians in Gaza. Will there be a Zoom ID or a phone number for... Some sort of number release?

K- Yes, it's been... It's done, it's released in Gaza, in mass. Many, many chat rooms, which people from Gaza are connected to, have already been flooded with it. (1:30) There ... we start seeing the uptake on it, in the next few days. You have to understand, the lack of energy, lack of telephone communication and use of the Zoom. And at the same time, we've been upgrading very rapidly, to be able to reach for them, to receive a lot of things. The system from our side is been ready since Monday, 10 o'clock, but we had to upgrade, we had to add things to it, to reach, but the lines are open, and we have made intros with large number of, what you call, groups in Gaza. Very large number of groups in Gaza have... as I have received the knowledge. Our friend Jalal has been supporting, and he's been translating everything to Arabic and... we are going through the process, we need a little bit more to add from our side. It is everlasting addition of technologies that it makes it easier for them.

And all the details are in the right domains, right chats in Gaza. We keep this very tight, because apparently the Israelis didn't like what we did. I explain to you why, what happened later on Monday. And they are trying their best to block in every shape or form. They wanted to bring a nation, you know in olden days they used to encircle a castle till people are starved and they submit. And that technique is used by the, what you call it, the Israelis. But we, we're trying to find, we've found a way to reach in a much easier way by circumventing the Israelis. (1:32) The minute we talk about it, they go for looking for it, so... We'll let them as they say, ?? what they ?? ... But we developed and we're still developing it.

We did not... we expected part of this, but not to this extent, and at the same time, Palestinians have a problem getting access to charges, to batteries, and they... All the, what you call, telephone lines from Palestine, goes through the 972 number of Israel, so they control everything. And we are trying to bypass it.

We'll explain that. It's a good thing for us, we are learning a lot how to overcome the problems in the future in this part. But, systems initially were turned on around about 10 - 10:30 on Monday. And we're still going. We see how it goes and how the, what we call, the process takes shape in Gaza and how we can bypass the Israelis to stop the Palestinians to gather. But a large number of the Chats in Palestine have already received the full detail and translated by Jalal for us.

R: It's a bit of a funny coincidence that the cable undersea, cable connections were cut for the Middle East apparently.

K- By the Houthis I think.

R: Well the Houthis are claiming they did not do it, they're strictly in favor of the lines.

K- Most probably, most probably the Americans did it, blaming the Houthis for it. That's the usual thing.

R: Yes, something like that. And it's funny because the Knowledge Seekers are doing an experiment with Ethernet cable and Nano coating it, and then cutting the cable, to see if they can carry on the communications, (1:34) even though the Ethernet cable is cut. And the next day after they were talking about that, the cables are cut in the ocean.

K- Tomorrow at one o'clock I'm invited to this, what you call it, show.

R: Yes, right.

K- I'll be there when it happens, I'll be one of those who watch. As I explained, we developed this technology in a different way, a long time ago, and we use it for our systems, and especially military defense. But let's see, I'm waiting to see, they want to see if they can connect to our friends in Africa, by cutting it. It'll be very interesting to see. I already know the answer, but let's see what comes up. And as one of them said, "Oh, we'll try to connect by the Soul, till we find out how to do it with the wires."

Any other question?

Q: ... Good morning Mr. Keshe, I want to ask how the human skin affects the nerve system. Is the nerve system responsible for the spatial gaps in the body? And what is the difference between the nerve system and the neural system?

K- I'm not a doctor, am I?

If you... I'm trying to... Go back to what we explained earlier. (1:36) They said the skin of the man is part of the brain of the man, it's connected. And then, if you look at the physical structure of the inside, the nerve system and neural system are connected to the same brain. So, they are directly connected in the structure, but due to different environment they behave different. And, if you look at the neural system, and we accept neural system, I mean, we don't see any cut between the brain and the nerves. It's all one extension of one, it's like pulling spaghetti out of the pot of spaghetti. But at the same time when you look, the spaghetti is in the pot, which is the skin of the man, which is made of the spaghetti itself. ...

The neural system and the body skin have a very, very direct effect on each other. Because they are made of the same thing, and what you... If... Maybe we should not open this, maybe we should open this chapter, because I opened this chapter in a very harsh way with Elyia Kostova, and she didn't like it. Hmm. The skin of the man is Nano material. And it's connected, it's part of the neural system. When, for example, like in acupuncture, you put a needle through, you bring a short circuit, you bring a cut into connecting the, what you call it, the skin to the wire. (1:38) In a way, let's put it this way. If you make an electric wire, and instead of putting a plastic coating on it to cover it, put another of the same copper on it, on that copper wire. You understand exactly what it means, what it does.

So, neural system and anything to do with nerves, is part of the skin of the man, and is more or less all connected to the 'head office,' which is the brain, and they come back down in a way. And if you cut between the two, you create mayhem for the system. And this leads to neurological problems we see in the world of the life of the man. And many, many of you have suffered neurological problems, but doctors give you all sorts of chemicals. They put some people in every pain.

If you find, let's say, example, a pain, a neural pain on your arm or a hand. If you just, not by rubbing it. If you change the shape of your skin, you'll see the pain changes. Because the distance gap interaction of the two releasing energy in the muscle tissue will change, which we call magnetic field in motion as the energy, or ?? the energy is the pain. And then this creates a lot of conditions, because the information is transferred to the brain, the combination of feeding back the same thing to the nerve and to the skin at the same time, leading to a lot of neural complications.

And as I said, earlier we had this discussion when they started using Nano coated needles, (1:40) which we brought the short circuit of the one Nano material into another and then the mayhem with the nerve system, which is connected back to itself, is the same thing. And you have to watch and understand. And in how you position when you deal with Gans materials and the skin and the nerves. They are all made, connected all together. It's part of the same thing but different branches of it outside is your skin, inside is nerve. But it's all the same, 'pot of spaghetti' as I call it.

Any other question?

Q: ... (1:42) Is there any way to figure out the purity of one's Soul by oneself? Thank you.

K- Yes and no. Has a lot of misjudgment, and a lot of, what you call it, observation.
And ..

<< Audio from Mr. Keshe cut >>

K- ... I have a call coming in, disconnected.

There are ways that you can do. There are ways that you can bring and test it with your intentions. And there are ways where you can test it with the reaction of the others, and reaction of your own physicality, dimension of your Soul. Many ways you can test the clarity, how good, how close you are to your Soul. How do you know it and what is its position? (1:44)

In English we say, "Look within and you find it." And if you can... There is a way which is done, it's a very unorthodox way, but it comes from looking within. And then you can see. If you can see your Soul with the eye of physicality, energy, not itself as physical, and you see what light you see of yourself, then you understand how your Soul is. Do you see it red? Do you see it whitish? Do you see it reddish? And then understanding of the emotion of the man in respect to the light, then you can, you'll understand, where you stand in the evaluation of your own Soul. That's what they say, "Look within." If you understand the terminology.

Any other question?

R: Well, Jalal, I'm not sure if he wants to put his hand up now. He says, "God do not want" in the chat. So...

K- No, I think he's trying to tell us God wants tomorrow at one o'clock. I'm sure he's part of that gang, it's that we call, it is a 'secret society,' isn't it? They do all these tests. Let's see what comes, if he can get in.

Have we finished? Or shall we call it the day?

Q: ... (1:46) Good evening Mr. Keshe, is it by putting Nano Copper and Nano Zinc together, that we get C14?

K- What? We say a very good thing in English, "Dream on." ... Not really.

Any other question?

Q: ... Thank you very much for your presence among us. My question is, sometimes we love a person, a Soul very much, but that person does not reciprocate with the same intensity, or does not reciprocate at all. This causes suffering in the person who has love, and can oppress the loved one. Is this because the Soul energy of the person you love is not on the same level as the energy of the loved one? We know that each person is free to love whoever they want, but I would like to know if it is possible, through our intention, to generate the seed of love for us in the Soul of the person we love. Can the Plasma from the Cups of Life, in interaction with our intentions, help in this process?

K- I want to ask you a very nasty question. Who are you in love with, or who are you trying to tell you are in love? Thy shall not steal. You can make it available, till one day, something will happen that it comes in.

I knew a woman with... (1:48) she was never married, in Manchester, and there was this guy next door, they lived next to each other for years, they're always 'wall-to-wall' neighbors. And she had no intention and he was so much in love with her, that he couldn't, he was afraid that she refuse it. Till after about 10, 20 years, he builds the courage and goes and says to her, "You know, I love you and I want to..." She says, "You stupid man, you should have told me 20 years, I've been waiting for that from you." But I was too scared to ask. And they finally got married. And it was an amazing feeling of these loving each other, but being afraid of

telling each other, and they lived 20 years, secretly being in love, or not telling to the other one. But if they would have known how to transfer the energy of love to each other, the way we know, and it was there and it received, it would have changed a lot of things for them. And we have to be able to speak our love. If we cannot, we're afraid of the... we hide behind the Soul.

And, it's a very strange situation with these things. Loving in hiding and elevating the Soul that it becomes to know you love someone. This is the eating the food, will go halfway around the mouth. Just because you think you have a mouth, you can feed it with the hand. (1:50) Try to be straightforward. Elevation, you can elevate as much as you like, but that Soul doesn't elevate to the level of wanting to love. What you will expect as a love. And sometimes you keep quiet with it, but you'll hope it'll happen. Sometimes you put it on the table, and it happens because it's mutual.

And don't try to raise the Soul of the person, because he might raise it and love somebody else more. I have a rule, and I used to always live by that rule. Always ask. And you never know what's hidden and what's the reason for, to receive that love. And it can change your life. And you get what you've been waiting for all your life. But don't try to raise the Soul that it reaches to understand your Soul. You might raise the Soul, still raises, but falls in love with something else. Ask, and if you are of the same strength, when you are together, then you can raise the Soul to be, and you'll love through the Soul. And if you are lucky, you reach that point, to be loved and to give love with it. But don't rely on the Soul just because you know a way to do it. It might work in the counter effect. (1:52)

Any other question?

Q: ... Hello Mr. Keshe, regarding the Solar companion or second Sun. I checked and scientists say the cycle is 26 million years and the most recent one was 11 million years ago. And you say it's coming in decades, so are scientists missing any other factors? And do we find this star, how bright it is and in which orientation? How do we find the star? How bright it is? And what, which orientation?

K- Yeah, I've seen this question on a private chat and I asked it to be brought into public. We are going, we are in the verge of, or we are in the process of cycle of interaction of the, what we call, the Solar System, a twin Solar System. We know, when we extend this to the knowledge, the scientists tell us 26 million years and we are 11 million in it, we are actually very much close to it. The reason for this is that we see certain things which are happening in the Universal dimension. And at the same time, the 26 million, whatever they say, was kept to a cycle, but as long as the environment was kept together.

We have, as we know, (1:54) a Galaxy pushing on us, in two dimensions, which we expect is, I call it, collusion, in so many millions years, or whatever, to happen. It just doesn't come in, it creates condition. And that interaction of Galaxies, has pushed the Stars close in compression. And this is the reason that the normal 26 million years, in the normal condition of the, what you call, our Solar System, does not apply anymore. You can't take 'one piece to suit,' you have to look at the total picture. I think if you go on, on, what you call it, on Wikipedia, or whatever, and see what, what they call, our Milky Way is on course of collusion, It just doesn't hit a lot of fields, a lot of things, a lot of stars in the structure, start moving, and change the normal pattern, and we are in that phase of abnormal pattern.

And it will reduce quite drastically. If you look at the position of our Galaxy and the Galaxy which is coming into it, which is a normal situation, what we call, 'battle of the giants.' This just doesn't happen, it's not 'a car appearing' from somewhere. This interaction of the fields moves a lot of things back and forth. And partially,

in a way, this, what we call, Global Warming, pushing the Earth in by fraction, is part of this process. As the report is out, this February, we just passed a few days ago, (1:56) is one of the warmest ever recorded. Global Warming is not just you create and you produce a lot of CO2, it's the other factors. And this is the reason we explain this. It's not going to happen tomorrow. But it is a magnetic field, a huge magnetic fields which is on the motion and direction of our Galaxy. And it's a balloon, when you press, everything inside moves with it. And this is the reason why the 26 million does not apply. That was in normal condition. Or we have to deny that there is a collusion of the, what you call it, the Galaxies in the coming time, million years. And then say, "Okay, ??, why you think it's not ?? time." It's a bigger picture involved.

R: We also have 'Beetle juice' is ready to go supernova, virtually any day now, apparently, so it could be... It could be thousands of years, or it could be every day, any day.

K- Explain to people what is Beetle Juice, that they understand.

R: It's one of the stars in the Orion constellation. And it's been observed for many years, and they see the light of it going, sort of dim, and then getting brighter, periodically. Which is the indication (Mr. Keshe comments in background ??) of the 'red giant star' getting ready to blow, basically. And when it does, they say it'll be as bright in our sky as the Moon is now. So, that'll be a big change, big event in our history for sure. (1:58)

K- Yeah, but we have to understand, look at the bigger structure, not a piece of it. It's even if we say that the collision of the 'twin star' with the Sun, you have to understand it's not just a.. It's a dynamic system. We put pressure, as much as that puts pressure on us, and in what do we, what do we get pushed in? Are we the one who's taking the pressure, or the one which is exerting the pressure on the 'twin system?' And then we see a different effect.

When it's dimension of twin, us, our Solar System putting pressure on the other one, we'll see creation of a lot of new, what we call, planetary system on the edge of the Solar System. When the dimension of the field comes from the other way, that the other Star Formation (SF) is putting pressure on our SF, we see a lot of material floating into the center. So with the float or creation of the, what we call, large number of satellites on the edge of the solar system, in one position, we can tell the direction where the field pressure is coming in from. And if we get too many satellites on the boundary of our Solar System in certain sector, we can even say which direction is this 'twin sister' coming to us. Is it over the, what you call it, the left, the right, the top? (2:00) And if it's vice versa, we look at the growth of the meteorites. And all these rocks which are moving towards the center of the, what you call it, the system. Because they are trying to go through. The 'balloon' is pushed on the wrong side.

But... We are nearing Easter. And you all have played Easter egg game. Depends which egg is stronger and which one will crack, and which one is putting pressure. So if when our scientists become knowledgeable and keep observation of the boundary of our Solar System, in planetary system and what we call, a small creation of a huge amount of bigger size, what we call, planetary structure, or debris, we know the pressure is coming, which way it's coming, and how it's created, and the same. Are we putting pressure, or are we receiving pressure? It's many things, but what we see at the moment is, it's not so much the 'twin system', ?? no more (normal) rotation, this is the absorption, exertion of the fields from the Galaxy which changes things.

You got to realize that when you look at, we look at this Sun and we see certain lights. When you sit at the Sun in a different field of strength and look into what, what you call it, fields of the center are, we see totally different view of the Galaxy. (2:02) We are on the fringes in the dark. When you sit in the center with the field Plasma of the Sun, you will see the Sun, which our Sun is lit, due, because of. And one day I explain this, this is a... As you see the Sun to be bright with the interaction of fields of the Earth. When you're on the Sun, you will see the center of the Galaxy, which lights up, and how far you are from it, and how you get lit in what direction, dimension, will give you exact position of you in respect to the center, or to the center of the Galaxy. These are the knowledge man will gain very soon, as you become Passengers of the Universe.

Any other question?

Q: ... If life is interrupted, such as an earthquake, will the overall evolution of the Universe lose anything?

K- No. What's a speck of dust?

R: So, a few humans here and there, don't really make much difference to the Universe?

K- Not much difference. Not really. The STM does, what will be created out of it, but not as a physical structure of things will go changing, because of ?? what little dust in there, what you call it... You know, it's like you carry a sack of seed. It's there, it doesn't do anything. Till somebody bumps it and the seed flow out of it, and once they hit the ground, (2:04) they start creating flowers and whatever. That sack of seed on its own has no meaning, it's just there, it is a sack. If you understand?

So, when the seeds of it, when the STM is released from it and it spreads on the ground, in the grounds of the Universe, then you will see what flowers will come from. And it will not make much difference, that sack of seed. On its own, it's just on the shelf, sitting in the middle, doing nothing on the shelf in the kitchen, till you actually sow it. And if the sack ?? drops up in a bin and it goes away, you won't see it. But if it tears apart, then you see what seeds, what flowers will come out.

R: .. So in a way an earthquake, or some of the traumas on the planet might be actually beneficial for the evolution in the Universe. It'll help spill those seeds and get them out there.

K- Yeah, more or less its' there. So create more accidents to get more people out.

R: Well, humans just tend to sit around as like the bag of seeds, and not doing anything until necessity hits, and all of a sudden you have to spring into action, and perhaps it'll take a trauma for us to do that.

K- It comes to it, it's the amalgamation of a lot of things. It's bringing a lot of things into open. And sometimes it looks bad, but it end up to be good. (2:06) And it depends what joy it brings you. Is it just a seed on the floor? Is it dry land, nothing happens? Or the seed falls in the water, in the right land, and then it becomes flourished as flowers? So much is not to do with the seed, .. it's the same environment the seed lands on, and what it creates. And even at the end of it, when you create that flower, the beauty is in the eye of the beholder and what it can get from it.

Any other question?

R: Thank you, Mr. Keshe. I think we've covered the questions for today.

K- Thank you very much. I think we'll celebrate our real 10th anniversary in Sanya next week, next Thursday. And we try to, what you call it, share more knowledge and understanding. And to come to a point of full understanding of what it does and what it can be done. Thank you very much for today. And I hope I open your eyes to your own capabilities in the first part. It was very much self-enlightening you, if you understood, that your dream of creating what you wanted, to a UFO in the dimension of physicality, it cannot be if it doesn't carry the Soul of you. And then, what would be manifested from its interaction? Thank you very much, and we'll see you, hopefully next week.

R: ... (2:08) Best wishes for next week's activities and how it all presents to the world.

K- Yeah, we have people coming from all over the world. And Chinese coming from their world, and it's a meeting of China, what we call, people, in love of the knowledge and the culture of the Keshe Foundation. And what it is, we have officials from the government and from different sectors, who will be amongst Knowledge Seekers without them knowing. And are there to observe their position and the condition from number of cases. And hopefully we'll have some other people live online, so whatever which might come in. It's going to be a fantastic presentation. As well, I'm looking forward to Sanya, because I know it's a game changer. It's a true game changer. And some of you will understand when the games are changed. Thank you very much. We'll see you next week.

R: Okay, thank you Mr. Keshe. Next week will be the regular time, I presume at 9 AM?

K- Yeah. Yes, yes, yes, yes. Today we have to be present in somewhere, because of the action of some of our people. And business on the side of it, nothing to do with the other things. Keshe Foundation, the bigger it gets, the bigger problem it creates for itself in different ways. Thank you very much, and we'll see you next week.

528 KSW Mar 07, 2024

529th Knowledge Seekers Workshop March 14, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Plasma has 2 states Matter & Energy - learn difference - go between; Neutron is a plasma; Neutron divides into 2 plasmas proton & electron manifest atom (Adam) - same as STM and STP manifest P; Same knowledge different interpretation; Matter energy is potential difference - in plasma its M fields in motion; Creation through M field strength; Light - single Ray doesn't bend from Creator - photon is plasma bends; Plasma inside another creates Crystal Structure - STP inside STM - fusion - transmutation; Star created from H plasma - STM - create gravity - keeping adding plasmas; Light of Enlightenment; Problem with Einstein;

Mehran - matter & energy; Environment is emotion - affects Mass; Penetrate through Pentagon; 2 plasmas rotating create pentagon - North Pole; Today essence of teaching; Nothing more powerful than emotions; Sanya - systems to discover Soul - Creator; Top of MaGrav; Basis for next 10 years; CRPm - create fields; Gaza - systems running 24/7 - no Headphones; Vatican accepts defeat in Ukraine; Leave rest to Daughter of Mitra; Satellite Souls - create connection - Gaza - deep Space; Final Act - new beginning; Important new brain research - liquid flush cleans cells - transmutation;

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers programs from Keshe Foundation Spaceship Institute. And as usual, we welcome you back. Today we are considering and looking back at how technology develops and how man understands more and more. And how we become to understand more of the science of the physicality. But, at the same time, we teach, we understand the science of, not only matter state, but the energy state.

In the teachings of the past few weeks, we're building it up, for you to understand more and more. We spoke about what we call, Cosmic Fields and Cosmic Rays (CR). And what's the difference, how do we understand which one is which, and how do we associate our work with, in respect to the other? (:18) In a way, if we as Knowledge Seekers (KS) understood, and as good students of the school of the man studied, the world of physics, we talk about the neutron and we talk about then Hydrogen (H). Which means neutron is just individuality and then Hydrogen, which is the split nuclear decay, the, what we call, the fundamental .. division of the fundamental elements of the energy pack, into two, to sustain its existence. And we call it Hydrogen, which is one neutron splitting into electron and a proton. Now we change the name of it to an atom, because now it's two pieces. Then we play all sorts of games with it, we put another neutron with it, we call it Deuterium, and then we push in another neutron, and we call the same Deuterium, because it's got one electron in it, it must be Hydrogen. But, different isotopes, different shape of it, different characteristics of it.

So, let's go back and see where and how we match. That we bring the two knowledge's together. Don't forget, the life of the man today is a matter state. And, energy state is considered when something falls, we call it potential difference energy, when something does ?? something else becomes a jewels and become crowns, we burn it, we find only material that we can burn and release the energy, to be the power supply, like a coal, like everything else, (:20) like whatever you call it, and then we call it the oil and gas we burn it, and then we got a little bit wiser, we found out we can stop some of these things moving the way they want, and we can gather the energy, and we became the brain of the humanity, we called nuclear physicist. Nothing but a hole in the head, man needed.

But, it's all matter state. What happens, when we consider now, parallel to this, the energy state of the same behavior? A neutron shows as a neutron, as an entity, as a man would like to call it, matter state of, because it's conditioned by and forced through magnetic gravitational (MG) atmosphere of itself, to show itself as a single pack energy. And we call it a neutron. But, when you take the conditions of the magnetic (M) field, or what we call, atmospheric condition of this planet, from that energy pack we call neutron, now it's energy. Does not have a name, now it becomes a plasma. So, goes back to how many times in past ten years I explained, we choose too many words for the same thing. It's the same now, we have one name for two states

of condition of the environment. (:22) Different magnetic field strength. And this is weird, our scientists, Knowledge Seekers, all are baffled. This is plasma and this doesn't make sense, but it's similar to the other one, but what's new? And what is the difference? Now we become energy people and not matter state people.

So, if our Knowledge Seekers understand, that in matter state we call it a neutron. In the environment of Universe (U), where the condition of the environment, magnetic field is different, we call it a plasma. Or, we create that different condition of magnetic fields on this planet, or anywhere else. So, we don't have the tangibility of the matter to touch, but we observe the strength of the field of. In a way, when we burn the coal and we get the heat, we observe the energy of the coal, but we just talk about the heat of it. But in fact, is the energy, is that coal which is heating, We see, we state the same matter in two different conditions. Now we have to learn the same. We call a single plasma in the matter state of the man, a neutron. But, when we bring it in a different dimension (D), open spaces of the Universe, where the fields are weaker, so it can expand or it can narrow, or decides the condition of strength, we call it a plasma.

Then, we come to the point of ray and photons, or fields, or whatever you want to call it, which is the characteristics of the light, we call it. Then, use the name of the Hydrogen, (:24) for the other one, particles, they call it, photon. Or, is it a ray or is it a particle? Because now, you had a single field, or single plasma, with a division of the neutron, or two packets of plasma, you call it a matter state atom, now you have a magnetic gravitational field of two, making it a new one, which now it gives you the bigger dimension. Variety of the strength interactions, and then you call it, and you say, it's a photon, it can, it can create, it bends with the light. Because which one is, sometime light behaves as a ray, sometimes as a particle. Now for the first time in the world of physics, we understand why.

When it goes on its own, when it doesn't bend, because it's dynamically itself, and it interacts with Totality, is a ray. And then, when it's a combination of two, as a plasma of an atom, it creates magnetic gravitational positioning, in respect to any magnetic gravity. So, it has to find a position and the scientists say, "Oh, light sometimes bends and sometimes doesn't." My God, you scientists never understood you're dealing with the atom of a plasma, and not with a plasma singularity. Because, when it's singularity, it finds itself, it's like a sponge, it dictates its motion, and it can keep to its direction of motion, and it's called a ray.

So, for you as Knowledge Seekers today understand more than Einstein did, (:26) more than any other scientist in the world of science understands, what's the difference. Why the light sometime bends and sometime it doesn't. Because when it's the singularity of a plasma interacting, due to its speed, due to its position, due to its magnetic field strength, it follows the same path, it cannot be changed, because it has common denominator of the light, the Rays of the Creator. But, when it's two, they have to twist and turn to find a position, then, now they find a third thing, which is the magnetic field of the Star, or a Galaxy, or another atom, and they find a position in it. Now, you tell those scientists who tell you, how can you bend the light? How can you bend the light even 90 degrees and 180 degrees? Now you can explain scientifically, what is the difference. And if our scientists, our Knowledge Seekers understand this, we have entered into the world of the, what we call, plasma physics. Matter state of the plasma, or a plasma in, on it's own, in respect and interaction with its environment. Once you, Knowledge Seekers understand this, once the world of science understands how much mistake he has made, and scientists like Einstein, who had no clue, but were bookkeepers, would have never, what we call, 'flamed the fire of ignorance' of the other scientists and become great, to the ignorance of their own.

Once you understand this, once you understand the change in the environmental magnetic field, dictates the size, the shape, (:28) the strength of which part of a plasma to interact within its environment, then you

understand in a simple way, how gravity is created. The mystery of existence, how the creation of the fields comes to create separation, or what you call, magnetosphere. If man's scientist, the knowledge of man, is taught at the outset, at the beginning of the time when the child understands, 'what is what,' and explain, "My dear, my loved one, my existence with you. When you see something, this is the matter state. When you feel it, is the energy state. And the two exist, coexist and always have existed within each other and together."

Then, it comes to the point of another ignorance, another, what I call, stupidity of the scientists who never understood, how do we create Carbon? How do we create Carbon 14 (C14) and how we create C60 and how we create C760 and the rest of it? If man understood the amalgamation of the two fields, one existing within the other, creates the condition of manifestation of the physicality (P) in a crystal structure, then man understands the whole world of science has changed, in understanding the condition of the plasma.

In the world of Creation, when we put Atoms together, we call them molecules, and different molecules of different strengths, create alloys. We cannot put one inside the other. (:30) In the world of plasma we can. And the interaction of one inside the other, creates a condition of manifestation of one in respect to each other, or the environment, which you call crystalline structure. Which means, existence of a field within another field. And then how and where these are positioned, dictates manifestation and interaction, once the weaker is outside, and once the weaker is inside. When the weaker is outside, it's a manifestation of electron, and a proton, and atom. And, when it's inside, it becomes what you call, life of fields within each other, and then a crystal structure of energy. This can be size of one energy of the plasma of the electron, within the plasma of a proton, and what is known as, what we call, the dream of the scientist, a fusion. Or, on the other hand, in the world of us, life, we call it transmutation. And then, when the little pack of energy is outside, and it's in the condition of environment, it becomes an atom. We call it the body of the man. When the Soul is within, and the physicality outside.

So you understand, we are using the same language. But due to the lack of our understanding, we have created a mayhem between the matter state, and Mr. Keshe call it, a Soul. Your ignorant scientist call it a plasma, they call it fusion, they call it everything else, because they could never explain the truth, (:32) and they could never understand the reality of the physics. How it operates. And then it doesn't become baffled, Mr. Keshe does feed this and do that, and he wants to transmute us, and he wants to travel with the speed of light and beyond. Because that's all it is.

Just because man's scientists are ignorant, we do not become whatever name you want to put it, magicians, it doesn't work with the law of physics and everything else to reject it. Except rejecting their own ignorance of understanding the two states of the same plasmatic magnetic field, one in the dimension of man creation of environment, we call it, whatever reactors, and one in the condition of the matter state Inertia of this planet, we call it, matter.

Then, if you understand what we told you from the beginning, How the 'magic liquid' was done, the KF liquid became the mystery of the Internet for years. What is this liquid and the rest of it? Which you Knowledge Seekers now, it creates matter into energy. You call it a Gans. And then you ask Knowledge Seekers, because you can't see it, you are still in the doldrums of the same problem as before, When you had the matter, now because you can see the Gans, it's still matter state. My friend and my dear students, this is not the case. You have put it in a liquid, which shows itself in another atmospheric condition of inside the bottle, but it's the same 'guy' outside called Copper. (:34) Now you deal with the energy of it.

And this is where this science, where this technology, shows to be something strange and people say, "You're mad because you're following and talking about this." Because I'm not mad, you're ignorant to the Knowledge of the Creation. As simple as that, you talk about the matter state of it, I talk about the energy, plasma, matter energy. What we call in definition, 'energy is magnetic field in motion.' In the plasma science. Energy in the dimension of man is position dependent, potential difference and the rest of it, and burning it, 'Mr. Jules' and Mr. Stupid and the rest of it. But, in fact, it's the same.

And, once you understand this, then you understand how in the world of Creation, a single atom of Hydrogen leads to creation of Stars. How the positioning of another plasma, in respect to the plasma which started it, leads to creation of gravity, dictating the condition and position. And that single plasma which starts, is the Soul of the Man (STM) who was born on this planet and he's found his known position. On this planet, you are the physicality of man as you are. The minute you die, the minute you leave the physicality, the STM, which is the dimension of strength of the fields of his existence, in dimension of physicality, amalgamating into the central energy of the body of the man, you call it the Soul, and whatever name you want to put it, finds its position in Space, and in that position, you start interacting with the environments and the fields of it, and creates its own atom. When, while you are within it as a Soul of the Physicality (STP), (:36) creating the crystal structure, the dimension of the energy of it, within it.

How strength? What's the ratio of the strength between the plasma within and plasma outside? It gives you five sides, six sides, and every other crystal sides you like. You made the terminology for a man to show him, "I'm more clever than you." But we are talking about the same thing, I'm a magician, so I change the name, you don't understand. (So you) study, to understand, if you understand what I never understood myself, then I become professor and the rest of the names we've given to our most stupid people in the world.

Now you understand. If we teach our children, if we teach our Knowledge Seekers, from 'day one,' that this is the matter state, in the Inertia condition of the Earth, and this is the same matter, but in the field strength of itself, but in a different field strength environment, then a neutron is what you call a plasma. In the interaction with the field of the Universe, which itself is a bigger plasma field, it behaves like a ray. And if you allow it to interact with another one, and in interaction with the environment and the other gravitational magnetic fields, it behaves like a particle. Because, one is two pieces, electron and proton you call it, In the plasma physics, it's the magnetic field positioning of the energy of. It has no clothing on it. When it finds Inertia, field forces of the environment, we put a jacket on it, we call it a winter. In the environment of the Space, (:38) we don't need any jacket, it stays as an energy.

And then we understand how simple the world of Creation is. And how easily man in the coming time will create magnetic field systems, gravitational field systems, which travel beyond the speed of light, because one is connected to the fields of the Universe in an open plasma, and one is in a matter state. And if you're clever enough, go back to the first patent we ever put in. Read the first few inputs, entries of the first patent. We brought gases, we brought radiation, and then we created gravitational system. As the biggest company in Belgium called it, "The first energy generating magnetic field gravitational system."

Now you understand. The knowledge hasn't changed. Now you understand what was released 20 years ago, as a patent. In the world of matter, we put the Helium in, but in other hand, we inject the radioactive material as whatever, to change the condition of the environment, that that matter state does, is not under the condition of the Earth's Inertia. And now you understand how gravity is created. This is the essence of the creation in the Universe. We don't bring Copper and Zinc and create the first seed of a Star. We bring Hydrogen and Hydrogen and Hydrogen, (:40) and more Hydrogen field strength plasmas, that interaction with each other,

in finding position, in respect to each other, they create a motion, that they bring more in, they become a Zinc, and then, after a few billion years of man's life, Superstar, Supernova and whatever else you want to call it.

And as I always said, "If God is creating, if the nature of the Universe creating one million stars a day, it must be so simple." It's so simple that man has become ignorant to it. So, I can do the same. Now I understand the secret of the creation of these. Does not make me a magician, and doesn't need for me to be killed by the King of Belgium, and the rest of the idiots, in the name of religions. I understood the science of Creation as a nuclear physicist. And those who are ignorant, could not understand it, do every game to play to abuse the man.

If you understand this, you change the combination of the fields, instead of becoming a Star, it's becoming a Moon, it's becoming whatever else, it becomes orange juice, the beef meat and the banana. Now you understand, how much, how correct, how the science from the first patent put out 20 years ago, is valid. It took 20 years to open your eyes to the truth about what is written. Those days, I could not explain this, it took me 20 years to teach. So many of you to understand the two states of the interaction of the field of the Universe. (:42) One in a different environmental condition called the plasma, and the same thing in a Earth gravitational magnetic field called matter state, of whatever.

In a way, as I explained many times, if you keep a drop of water in the room, freeze the room, you see the water ice on the glass. Heat the room, you feel the steam in the room. Keep the temperature in the order of the outside, you see a drop. Take the same water atom, change the environment of its magnetic field, its environment magnetic field, not matter state condition, you'll get a plasma. If you reduce it enough, this plasma will take the shape of the whole room which it is in, and you change and choose another dimension of field of environment with it, it'll become a speck of dust size of the plasma. Then, in this position, if you introduce another position of the fields within the room, it has to interact with it. Attracted to it, will come faster to the speed of light to reach it. Distracted, it becomes worse.

Now you understand as Knowledge Seekers, you are all the most advanced scientists in the world, and all your families and the friends, they ridicule you, because they haven't understood. 'Ignorance is a bliss,' and those who are ignorant make fun of the others because this way covers their stupidity and their ignorance. We are no Messengers of the blah, blah, we are no religious group, but those who understand the essence of the science of Creation. (:44)

And then, you put it in different environments, you call it, this is the Mars, this is Earth condition, this is the body of the man, you call it the Soul, this is the middle of the Space, you call it the Sun. Choose any name you like for it. The truth does not change, because you never understood the science of Creation, now you become the ridicule of all the people around you, because they were taught by the same idiots, by the same ignorant people like Einstein. A bookkeeper should have stayed a bookkeeper and left the job to the scientists of physics to explain.

I always said, the Americans doing their best to wipe out any connection with Van Braun (Head of NASA former Nazi SS). The hero of the American Space Technology became zero of the biggest killer man in the world of the science, who killed as many Jews in Switzerland. They are trying to wipe his name from everywhere. Soon man will come to that point. Einstein should not be anything anywhere, because he's the biggest criminal in the world of science, and if he wasn't a Jew, this ridiculous position would not become acceptable. The same we accept what the state of Israel is doing to the Palestinians. One idiot, and the rest,

we are suffering with it. This blood has to be taken off this land, that man start living peace in science, technology and life. They have to do it in their own hands, and we always look at it. The science has to be knowledgeable, respect of the Soul has to be, does not matter what. When you have no respect, you destroy anything. (:46) The STM, the intellect of the man, and the rest of it.

Now you have to understand, we're coming to a watershed in the world of science. We are in the beautiful island of Sanya, in Hainan. And in the next 4 or 5 days, we change the history of man, in science and technology. Some of you will come, as I call, the same as you went out, because never understood. And some of you will understand, will change the course of your life. Because you understand the difference between what you call, atom and what you call, a plasma. And then, nothing will be magic. And then, you decide the state of the plasma of your Soul, in respect to the plasma of the environment we create, and then you find a new position, New York, Mars, or anywhere else in the Universe, instantaneously. But, through what we call the emotion, which is the field interaction, you decide the place, the time and the space, and that's what many of you have done in past year and a half, with the new technology, when you join us.

Now you understand, how simple the science of the life Creation is, and how, if one day man goes to the next step, will find itself in the field strength of the first line of the fields of the Creation, what we call the Creator. Then, you don't need to see a light, and you don't need to see a fire on the wall, and in the woods, and in the bushes, and God knows what in the mountain. (:48) As the light comes from understanding the truth about the Creation and the Creator. The more ignorant you are, the bigger mountain and bigger fire, and more stupid man, you need to go and get lost in it, to come back to say what I saw, and as you are ignorant, you accept it.

Any of you, who understand and understood the teaching, even this morning, you understand the reality of the light. That light is the light of enlightenment, not the bush fire, and God knows what, to whatever you want. And those who don't understand it, have to battle with the bush fire, and the mountain fire, and the rest. And those who understand, understand the truth about the interaction of the plasma of the Creation at the time, place and point, in essence of the Creation of the man, the two fields of the interaction, one is the neutron and one is the electron, and the interaction of the two in respect to each other, creates an environment which shows that we are in touch with each other, we are working together, we are an atom. And the same thing, we are the Soul and we are the physicality of the man. Two plasma of an electron and a proton, you call it an atom. And how hard is for you lot to understand, you call a plasma of a proton the STM, you call the electron the Soul of the physicality of the man, and you accepted that, that atom, but you can't accept your own physicality, "This is me."

As Arabs have a good say in it, << speaks in Arabic >>, which means, how stupid you are, that you don't even want to accept the truth. (:50) You accepted the atom. There is an electron and a proton, we call it the Hydrogen. "Oh, it's a sacrosanct of it." But, my dear, it's called the Soul and STP makes that man. 'Mr. Keshe is going into religion, God forbid.' You call it whatever you like. It hasn't changed the fact. Only those who see you, you putting a stop to the abuse of you, understanding the interaction of Soul, which one you need to energize more, which one you need to become closer to live in the dimension of the Universe, you call it the STM, you live in the dimension of the physicality, you go to the STP of the man, because it's both ?? has ?? .

Somebody asked me, that, "If it's this, why do you come to Earth?" I said, "The beauty and the pleasure of physicality, sometime is so good, that we would like to taste it." But we are still connected to the Universal Energy, which is the Soul, which is the dimension of the fields, without dimension of physicality. Who doesn't like to touch the most beautiful, gentle body? Who doesn't like to kiss the most beautiful lips of a

child, to understand the love. When you kiss your child, the love you receive, how can you feel it in dimension of the Soul? When you hold your lover and understand, what you want to give the whole of what's inside you to it, you can't feel that in the dimension of the Soul. It's too energetic with no dimension. Then you understand why we choose the dimension of physicality. (:52) Because then you can put a word into it, you can put the emotion into it, and you can explain it, what it is.

Isn't this, wasn't this the essence of the creation of Mitra? For man to understand the dimension of interaction in the emotion of physicality. When Mehran was created as the first god, go back to the history of man. And if you change it into the Arabic, which you call it 'Abraham.' the 'brahim' at the end, is the same as 'Mehran.' That's why you understand how much everything is copied from the origin of the belief. Then that's all it was. He was alone and lonely. Then he created the condition of the two children, two fires, to show the interaction, the separation, the difference that leads to creation of life and love. And which one does he have to kill, the physicality, or the energy, that confirms its existence? It wasn't to be the son you kill, it wasn't to kill a cow. It was to kill the prejudices of man in respect to confirmation of the two dimension of life, physicality or energy.

And now the time has come that to merge, to understand, to not to merge it, because they travel between the two. They always change from one to another. Man never understood. Then we come to the next process of understanding. Then we come to the position and the time and the place, where we will bring in the knowledge of the interactions, and man become a 'Passenger of Universe.' (:54) Then, man shall not kill, because man does not need to kill. I travel in dimension of energy, I take what I want, and then, I go back to the dimension of the matter state Inertia, I am in physical life, okay, I don't need to kill because I already fed myself. Do you eat when you are full? And when you get it wrong, the physicality becomes sick. And then you do not know how to sort it out, you make it a chemotherapy and you do every other thing, except if you look inside to the dimension of fields, and then you find the matter state of it to itself. And then, if you understand this, then you understand why, emotionally, we create most of our problems in physical life. Where in the Soul dimension, there is no sickness.

When you put two fields against each other, you have a 'Mass.' When you bring it in condition of environment of the other, you get 'Weight.' In that environment condition, you call it emotion. And then, how do you interact it, how you create that emotion, affects what Mass show itself. On Earth is lighter, on Moon is heavier, on the Moon is lighter, on Earth is heavier. Which way you want to do it, it doesn't make any difference. Because you haven't understood the principle of Creation. Everything else is a hassle and what I call, God forsaken people like the Einstein, create the fire and laugh themselves. (:56) They are stupid, (so) we do it. Call it Christ, Moses and the rest of it, the same in the Soul dimension. Einstein used your physicality as idiots, the rest use your Soul as idiots.

Now you understand, how simple the life of existence in the world of the Creation of the Creator is. Now you understand why I start teaching you about Cosmic Rays. And we call Cosmic Fields. And what is C14? What is C60? And why do we have a C12? C12 is for physical dimension of the man. Sorry you accept the physicality, only matter state of Carbon works in you. If you accept another condition, which is in a dimension of the Solar System, and in a dimension of Universe, you call it C14, which means you are a bigger strength plasma as an individual, not in a matter state as an atom.

And then, if you immerse this field, this whatever, inside another, you create an environment, because it's a containment, you call it crystal structure, which means, it's the fields dictating condition of. And if you rotate one plasma, inside another plasma, in a given specific dimension and fields, you will get that pentagon, the

crystal structure, hexagon, and the rest of it. You don't believe me? (:58) Ask your scientists, go on the Internet and see why, in some of the pictures taken from the North Pole and the South Pole of some of the planets, we see hexagonal shape. Because the plasma of the two entity inside the two reactors, create this condition. You see by the shape of the hexagonal shape on the North Pole of the planet, the energy fields, the combination of the fields of the center of the core of the planet is. But you are ignorant, "Oh, these are fields we don't know, nobody does." Now you know.

Now you know you're on the North Pole, and how this crystal structure, fields, and covers the planet as an atmosphere. If you go far enough and you look at it from the side, you see the same crystal structure, the same hexagon. And then, if you find in a position, the condition of the pentagon, which is the confirmation of existences of Totality, then you find how you can penetrate. That football I was teaching you. You understand, nothing has changed in my teaching, it's just that you do not understand the principle of the Creation. Now you understand. And all those professors have to deny you, because then they don't exist. And why do we need people like this to confirm what we know? Because we do what they cannot do. We achieve things they cannot achieve. And even us have to confirm our own subjects.

They say, "You have to prove it to me to accept it." No, you have to educate yourself to understand what I'm talking about. It's the other way around. And we allowed ignorance to run. We allowed thieves like Stephen Hawking to steal everything, (1:00) to keep itself to itself, till he came to understand his stupidity. You see on the screen, within seconds Rick has found it for you. These are the, most of the North side planets of the systems. Two Plasmas inside each other, Crystal structure. Now the science of physicality, now you understand the science of energy, what we call plasma, fits.

This fitted on to me when I was 8 years old, I understood this. In 60 years I'm trying to teach man, how you've been fooled. One day, I used the terminology of the name of Einstein in Farsi. I gave that name to him that day. Go in the alphabetical Farsi and find out what Einstein means. It's very simple and that's worthy of that man.

You have to understand, the world of Creation, We are getting so close to understand the free dimension of motion of the fields of what we call plasma, to what we know in the matter state, that will shock and shake the whole world of the science of the man today. World leaders knew and know it's about to come. (1:02) They all talk about the new technology, new science. The science is here, it's in the hand of you as Knowledge Seekers, because you understand it's so simply. And it will bring the change. Because, when you use the energy, you don't need to rely on the matter state. When you want it, you change it to matter. When you want ice, you turn the temperature down, you collect your ice on the window. You want to warm it up, you make a steam and the same water appears as the mist on the window. It's the same water drop, it's the same knowledge. You want to change the field of the environment, you bring it to show itself as a matter, if you change the environment of it, the way you want to behave as a field, as a ray, because it shows in that dimension.

It's not hard to teach that from day one to our children in the school? To show them that man lives in the dimension of the Inertia, condition of the matter state, or lives, can live in the dimension of the fields, where this matter Inertia, behaves as a fields. But it's the same. Do you want ice or do you want a steam? But it's the same drop (of water). It's the same amount of fields, magnetic fields. In the matter state, you call it potential difference, whatever energy, and an idiot calls it MC^2 , which is nonsense. It never worked that way. It'll never work this way. But we are stupid, we accept it, (1:04) because it shows we don't want to show we're stupid.

But, on the other one, you define energy as magnetic field in motion. Because, fields cannot have a different, or a constant motion, in different and constant magnetic field environment. They move according to what environmental fields allows them to. And if it's working on the lower field strength or higher field strength environment, I go faster or slower. I dictate how fast the speed of the fields inside my plasma are. Am I squeezed or am I released to expand? Then you understand, the world of physics is as sweet as honey. The world of Creation is physical. Does not matter in what direction and dimension. And you understand why we come, manifest in dimension of physicality, to enjoy its beauty, because when we go in the plasma, it just fields and emotion.

Now you Knowledge Seekers, understood for the first time. Maybe I should have taught this the first day I started the teaching, not keeping you going for 20 years and now the 10th anniversary of the public teaching. The reality is that we came in, we showed you how your matter changed to Gans's, to Nano material, and the energy fields. In Sanya, in next 5 days, I change the course of history of man in science and technology. (1:06) That we start to become the Passengers of Universe, by the conference in Isfahan, in beautiful land of Iran. Some of you will come, as we say in English, you come in as a donkey, and you go out as a donkey, because you never understood what kind of hay was put in front of you to chew. And some of you come as a man and leave as Messengers of the Universe, understand the process of the Creation. And those who do not, they say, "Nothing happened to me, this thing doesn't work." Because ignorance is a bliss.

And now you understand how your emotion controls you seeing, allowing the fields of your interaction of the body of the man with his environment. There is nothing more powerful than emotion. And that emotion trying to prove, blocks you to see. And some of you come in because you understand, you understood, you have interacted with the fields, go to all positions from Moon to Mars, uncle and auntie, and everywhere else, and they understand and look at you. The guy's crazy, this can not happen because it doesn't happen. Because your emotion is controlling the dimension of the field flow of the energy of the plasma which is the STM. Or, you create the condition that the plasma of the physicality, the STP, controls, changes the environment, that the Soul cannot expand, the central energy cannot expand.

Then, you come to understand, (1:08) how much we as Knowledge Seekers have to battle these, what I call, idiots of the science, ignorance of science, because, they don't want to understand, they call it 'Yin and Yang.' But when it comes to the science of Creation, no, no, no, no. We stick to Yin, Yang doesn't exist. And we are in China, and we have to handle so called, idiots of the science and technology as experts, for them to show their ignorance. And no man like to be ignorant, or to be told he's ignorant.

Now you understand, that we are on the verge, we are on the eve of change of the history of man. Massive amounts of systems have been shipped into China, into Sanya today. That even the people who brought it and put it together, have not even understood 5% of the capability of what they have created, to bring man close to their own Creator. And in time, this knowledge will become part of the essence of the teaching of man, from the first day in the school of the education of the man. That no prejudices and no ignorance can be created. You do not to make it the controversial word of today. You cannot be this and you cannot be that, because there is something wrong and then you become racist and the other. The science of the man in the dimension of matter and the energy, (1:10) or plasma, or whatever you call it, has to be taught in the first day of the school of the man. That man becomes, as part of his life, to understand which and what, and bring with its interaction, the Knowledge of the Creation for the rest of the humanity.

I hope today I open your eyes, to the true essence of the physics, to the essence of the Creation, and how man, delivered by itself, has shot itself in the foot, and wants to run a marathon of the Knowledge of the Creation, where one foot doesn't exist, which is one side of the science, is not accepted. Not understood, due to the ignorance. And from now on, we bring that change. And from now on, we show how that fundamental plasma leads to creation of the Supernovas, and the foundation of that plasma leads to what you call the Black Holes in the brain of the man understanding of his own creation.

In Sanya, in the next 4 days, 5 days, we show technology in a way, nothing to see as a system, but to feel the energy, the plasma. And that's the whole purpose of Sanya Conference. We have not brought you here to see systems. We have brought you here to feel the energy, to understand the emotion of your Soul. How, what feeling I have, which I didn't have before I entered the zone. What was my wish, and what is my wish while I'm in the zone now. (1:12) And that is the change man has to understand. Otherwise, as I said, you come in as a donkey, and you go out as donkey, because you came to see, how green is the grass. What is the machine, and what does the system.

It's exactly the same situation as when I gave you the MaGravs. You plugged it in, 10% reduction, Mr. Keshe You never understood, I gave you the most powerful conversion of the matter state into the field state. You plugged yourself to the bottom of it, and you ignored yourself, the fields above it.

And now, it's time to bring that change. And now, in the system, those of you who are in Sanya, and you come across the system in the next few days, close your eyes to what is, what you see. Open your eyes, what you feel, with the fields of the system. That is the purpose of the conference in Sanya. And this is the reason we have brought this point. Because in Tehran, and when you go to Isfahan in the conference of Iran, you'll fly with the Soul. And then you understand it. And man needs that time of maturity in the next few months to complete the cycle.

It's very easy, once you understand it. And it's very hard and impossible, when you want to force matter state conditions of emotion, to fields condition of emotion. (1:14) And once you understand the two are the same, how you play with it, decides which one, then you become true man of the Space. Now, as Knowledge Seekers, I hope you understand why sometimes the light can be straight line and sometimes, as we said, you can 'bend it like Beckham.' Because you understood the difference between the plasma singularity and the plasma as a, what we call, 'polarity,' which is two of them. And now you understand what all those top scientists measured, and saw refraction and the bending of the light near a Star, because that light is made of the matter state of the Star itself. But, once it's the same, and the other one is the, what I call, amalgamation of two. And this is the difference. The scientists of today have not understood the difference between the plasma as 'fields in motion' as energy, or what we call, as a field, which is a combination of.

I hope I have made you to see what I should have done in the first days of teaching, some 20 years ago. But in a way, it was fun to see when one of you will 'jump the gun' and understand it. But not many of you have jumped the gun, and not many of you have found the gun to jump it. So I gave you the 'gun' today. And any of you walks into the, what I call, experimental room in Sanya, and you still want to see the system, (1:16) please walk out, because you are as ignorant as you came in. And those of you who come in to feel the fields in four different experiments we setup, then you have become mature to the next step of evolution.

As long as you're looking what this system does and what that system does, you're as ignorant as when you came in from the womb of the mother. Nothing has changed, just you've learned some noises to make, to call it Arabic, English, God knows Chinese and the rest of it. And if you walk in and you feel, you look for the

fields, how do I feel in this position of the fields, how do I feel in that position, and what emotion it creates to me in different position in the room, then you are maturing to understanding the process of the transmutation.

Let's see how many of you are still making MaGravs in your brain and your physicality by the time you leave Sanya. Thank you very much. And I hope I have enlightened you to the truth about the Creation of .. And some of you already understood, but you couldn't put it in .. to perspective ?? and see and understand what it means and why it means. Maybe today we start the basis for the teaching of the next 10 years, as this week we already passed 10 years of teaching. Thank you very much Rick, if you can take us to a break and we come back.

>> **BREAK** >> 529 KSW March 14, 2024 (1:24).

R: Okay, hello everyone, we are back again at the 529th Knowledge Seekers Workshop. And because it's the second half, we do have a question and answer period, but usually Mr. Keshe has something he would like to say before that. And we do have something we would like to present briefly from the Brazilian Keshe Foundation. How would you like to begin Mr. Keshe?

K- Oh, let the Brazilians have their say.

R: ... So, this is a message from Rafael from the Brazilian team. And, it's regarding the Sanya Conference. And, what's happening is the Brazil Knowledge Team and others who wish to participate are meeting in the Brazil Telegram group, at the same times as the Sanya Conference. So, on Friday March 15th, that'll be tomorrow, and Saturday and Sunday, at certain times, according to where you are, they will be getting together in the Telegram group. And the idea is to show support through intention, at the same time that the conference is being held in China. So, people around the World will participate by helping support it, in their intentions. (1:26) It was also done for the London conference apparently. And he says, "Many Knowledge Seekers from around the world had very meaningful experiences and that all are welcome to join." So, you can see the days and times there. It's also on Monday, I understand as well. Monday from 8 PM to 9 PM New York time, and from 1 AM to 2 AM Central European time. Besides those other times.

K- Where is the link they have to go to?

R:... Okay, yes the link is in the chat here, in the Telegram chat. And I'll put that also, thank you Rafael for that. And I'll put that in the YouTube as well. That's the link to the Telegram group, the Brazilian Telegram group, yeah.

K- Thank you very much. I would like to thank all the Knowledge Seekers who are on the way, got a stop on the way, or have seen all sorts of obstacles, but they found a way around it to be in Sanya. And I hope we all gather together on time to be in this beautiful meeting. It's the first time the world meets China in such a way. We... it's the first time we encounter direct interaction between Knowledge Seekers of the Keshe Foundation worldwide, and Chinese Knowledge Seekers. And the organization done by the Keshe Foundation team, is so beautiful, I was in the conference hall today, (1:28) and it's getting ready for the Saturday opening. And, it's beautiful to see how much work is done, and is there, just to share knowledge and bring things to humanity.

But the more baffling thing for us has been, you hear the Keshe Foundation in conference in Sanya, but you have to understand what some of the Knowledge Seekers have done to be here. It's been a challenge and the, what you call, the message from the Chinese authorities has not reached the airlines. And those who are determined to be here, have bought two or three different tickets. They have moved to different airports, they've traveled half way around the world, changed everything else, just to be here for the conference. Because the Americans thought, and the others that, what we call, 'Visa Free', is what it says, and apparently it does when you follow the rules. But, the airlines don't listen, they have the head of their own, don't want to pay heavy penalties to the Chinese government for bringing foreigners in. And, some of our Knowledge Seekers had to buy two, some three, some never got to the airport, they had to go back and buy another ticket, but they're all making it to here. It's a near equal balance of the Knowledge Seekers from outside, than inside China, Chinese are more of this time. And, it'll be a wonderful, what we call, test of time.

The purpose of this week, coming week conference, is literally bringing an end to the matter state understanding, and moving on to what we call, the next generation of life. And hopefully in Iran, demonstration will show what this means, (1:30) and how it'll be. And we hope to see in the end of what we call, the amalgamation of the two sciences of the matter and energy in this, what we call, conference is coming up.

Any questions?

K- ... There is something, sorry, something just came to my mind. A lot of Knowledge Seekers are asking, sending messages or whatever, regarding this material (CRPm) which we have put out, and it's very hard to produce it, it's an elusive material. And, what is it good (for), what we do? First of all, this material has been put in, as what we call, a Space currency. You'll understand in the future what it means, what it brings in. Secondly, as it's a Cosmic Ray, those of you who bought a combination of them, in placing them in a specific form or formation, which you should have known by now, you create in that environment, as I was teaching in the first part. You create a new condition of the plasma, for the other plasmas inside, to show and manifest themselves.

With the central heating in your room, you change the temperature, the environment of how you feel physically. With these, you open the spans of the dimension of the fields of the body of the man. You expand, or you, what you call, (1:32) interact with the fields of the inner, fields of the Creator, what is inside the man. And because it's a Cosmic condition, you directly connect, or you are connected to your containment, it's part of the Universe. These materials, once you understand how to use it, you never touch it. Because, you understand, it's a key to both dimensions of the matter and what we call, field energy. You'll see them as the matter, but the fields of them is as important ?? seeing it. We don't have such condition. And this is one of the most beautiful things that Knowledge Seekers, and in the future mankind will find out, I have ever given as a gift to humanity.

Try not to look at its matter state, understand its position in respect to your dimension of the fields and energies. Walk out of the room with whatever intention or whatever, and walk back in the room where you put a few of these and you change the environment. See how your emotion even changes and how then you can connect to the position ?? inside. These new materials are not and will not be taught outside the Foundation to be made. And some of you will give your life saving to hold a gram of it in a very near future. Because it's made and it'll be made in the position and dimension that creates that condition of interaction of the Cosmic Rays. (1:34)

Try and go back to what I always said, don't look at the MaGrav, look the fields which it creates. Now with a combination of these, see what field you move into. I gave you the MaGrav to feel the field around them. I gave you this material for you to feel inside the fields. We'll explain more and more about this material and it will take us next two or three months for those orders which come in to be manufactured to be precisely what I want it to be. And then you will understand a new dimension in life, a new dimension in emotion, new dimension in what we call, creation of yourself.

The process is not easy and the object is not mass production. Object is creating condition for so many of your holding that in the future you become the center of the what we call, fields which you're working on in the coming time. Try to understand how you feel in the man matter state, and how you feel as a man in the energy state when you go inside it, when you are in, within it. And, as I said in the first part, if you don't feel it, you don't understand it, you go in as a donkey, come out as a donkey, the donkey doesn't still understand, as long as there is some hay. And hay is, but hay is this, I don't get it. (1:36) But some of you will get, will interact it, you'll understand.

I hope those of you who come to Sanya brought your Cups with you. And then you will drink from the, what we call, the field of the Universe. We have organized three tables for you, that you can leave it, you decide when that Cup is ready for you to drink from the Cup of the Universe. And if you don't feel anything with it, God bless your Soul, and watch what's come. And if you do, then you understand the process of the transition.

The whole process of work from now on, is for you as Knowledge Seekers, to interact with the fields, understand them, live with them, and know how the differences between the matter state and the field state. And how you can use it to change one to another, and use it that you don't need to kill another.

It's very much is, you go to mom's house and she says, "I have a beautiful dinner, what do you like? I cooked for you." Says, "No mom, I'm married, I'm going to my wife, I eat at home." In a way, home is to eat from the dimension of the fields of the Universe, that you do not eat from the table of the mom, which killed the lamb, or sheep, or whatever, to feed. You understand soon, what is on the table. And then you understand soon, what needs to be done on that table. Bring your Cups and see how much you understand, and how much you understood.

Any other question?

Q: ... (1:38) Mr. Keshe, just wondering how the people in Gaza are responding to the plasma solution? And are many beginning to use it to feed themselves? Or are the Israelis trying to block it still?

K- We will not talk about this, we work on it, the system is running 24/7. And we keep it in that way, and you will hear soon about how it's done, and how we are working around it. The process, more or less, majority of huge number of Palestinians know about this. and the system is set up totally different way. And we will explain to you very soon, because we don't want to run into a problem with those who thinks they can control everything.

This is, as I said, we know our way how to get in, and as some of you know, or you did not know, you know today, the Iranian military forces have landed inside Gaza and are feeding the nation, without arms. And, soon you will hear more about this operation, as we hear, we see, that they are in, as even though nobody could get in, they managed to get in and they have open feeding centers all over Gaza, feeding the Palestinians. They put their lives on their hand, because they even bombed, what we call, the transportation, and they dropping food, they killed more than actually they fed, Americans. And now we've seen, (1:40) and I'm sure you've heard, that the Iranian armed forces are within Gaza, and they have opened feeding centers. And this is what I call, the 'white flags,' which has shaken the Israelis, how these ?? , we blocked everything, we bombed everything, have appeared inside. We know how to appear, and we know how to work, and we know how to feed. And you'll hear more about this in the coming time.

There is something interesting which some of you have heard or not. If you remember, we will see very soon the end of the Ukrainian war. The reason for it is that the Vatican accepted the defeat and has thrown the towel in, as we call it in the world of games. The Vatican, the Pope has instructed the Ukrainians to find a solution for peace with the Russians, as Vatican cannot afford supporting the war anymore, you used everything we had. And we'll see, as is in the news, and as we were aware of this, some six weeks ago, that Vatican has accepted defeating, fighting the, what we call, the Russian Orthodox Church. And, for the first time they are defeated. But, we have to see how they gather together and come back in a few years time, trying to do another, what we call, 'Coup De Tat.'

But, the good news is, as you, mostly all of you know, the Pope has thrown in the towel of peace, and instructed the Ukrainians to accept the conclusion very fast with the Russians, that what we call, "we can't afford sustaining this anymore." (1:42) And we'll see an end to it, and it had partially to do a lot with the pressure from the European farmers who stopped the grains to be imported as they ?? moved all the Europeans nations literally filled up all their reserves as much as they could with the cheap, what we call, grain stolen from Ukraine. And we saw the farmers going on the streets and brought everything down, that you cannot do this. Because, the only people who make money from what we call, Ukrainian cheap rice or grains, has been the politicians in the European countries, and nobody else. And they robbed both. And when the Russians do it, it's a criminal act. When the European countries stacked up their grains silos, is nobody should know. But, we saw the reaction of the farmers and we'll see how this comes up and what the penalties needs to be paid by who, in dimension of what we call, the things ?? have taken shape.

There is a negotiation going on in the background, that Russia is asking for a compensation. And this compensation is what the Americans, Europeans, and Vatican have to come up with, are prepared to pay to Russia, for Russia to stop. And this is a very big package, and we have to see how, how successfully they will go around it, to bring this package down. Because, in a way, the losses are too heavy for Europeans and Vatican's to sustain against the Church of Russia. It's just how much they agree to pay damages, what terms of condition will be, in less than three months or so, we think, to settle, and then we'll see the end of it. (1:44) But till they don't compensate for the war to Russia damages, and the whole thing which that they wanted is done, The Russia will control the grain out of Ukraine and that was the whole objective. Then the Ukrainians do the farming, grow the seeds, and the Russians dictate the price of it and they control it through,

what we call, export. And we'll see the change, the Ukrainian war is over, as the Vatican accepted defeat, as it's in ?? Minsk and now it's in public.

Any other question?

Q: ... Last week you spoke of connecting with the collective Soul for Space travel. during transmutation while in Space, that encouragement you hear, can be our collective connection, yes?

K- What?

R: I'm not quite clear on that. During transmutation while in Space, that encouragement you hear, can be our collective connection, yes?

K- Encouragement? What is the encouragement?

R: I'm not sure what encouragement means, maybe have been with other Souls?

K- You have to understand, you have to understand something very simple, and I was spoken about this a number of time over past years. Soul travel has and does make noise. We know this and we call it 'dog whistle,' when you blow a whistle nobody can hear it, but the dog goes crazy with it. (1:46) The owls hear this, what you call it, departure of the Soul. Because it has to go through a physical body, it's the interaction of the fields, it makes that field. And owls are sensitive to this interaction of departure of the STM from the physicality. So, it makes a noise.

So, your Soul, interaction of Soul and interaction of the collective Souls, when man become knowledgeable, will detect this noise. And, in a way, we look for a fingerprint nowadays, we'll look for a Soul print. It'll not be easy, it will not be very easy to, you know, kidnap a child or whatever. Because we become wise to it, science will become to understand this. We will use it as a fingerprint. You want a criminal, he can hide under ten tons of rock and in another planet. It's there, you pick it up through his fields. That's why I said, no man will do the crime, because it's not worth it. There's nowhere to hide.

And so, when we travel, when we go through amalgamation of the Souls, as one Soul, because of... that's another teaching, how one Soul can accept so many other Souls. Then I'll teach you more exactly how it's done, the way it's done, how you recognize, nobody can fake it, as we call it. It's a process of understanding, who are the passengers of this containment. And that's another topic, maybe in 5 or 10 years time we can teach, if we are still here.

Any other question?

I wrote something very interesting to one of our Knowledge Seekers in the past few days, (1:48) and it's what the truth is, and what in time, you as Knowledge Seekers and the humanity will come to understand. And one day, one day, it'll get to that point, that we'll reach this point, that mankind will be, what I call, collectively understand this. And not just for mankind. And, we've come to the point, that you as Knowledge Seekers, have to face what I call, the truth. Have to understand that what is and what it will make, and how the future of humanity sits in this one paragraph. One day, we'll, what you call, you as Knowledge Seekers, will come to understand how things work, how things are set up to be. And, a brief of it. I read it to you if you understand it. The Knowledge Seeker, because I know he's listening, but it's a purpose, it's a totality of

what we are waiting for, and what will happen. (1:50) It's what you, as Knowledge Seekers, it's not foretold, it's planned to be.

This is part of the message. It says, "And then, maybe, I have achieved to save mankind. And then leave the rest to Mitra's daughter, to take man to deep Space, as an energy of Universe and not the body of the man, and with all its faults and problems." In a way, we are setting up the scene, we are completing educating the man, to understand and then that angel, which is the Soul of the daughter of Mitra, will take man with a new light into Space. And a new beginning. And, in a way, we have set the scene for a beginning of a new course, and end of the past. And, we'll see how things will take shape. But, it's not a matter of today and tomorrow, will be changed. It has to be collectively changing every parameters.

In a way, if you understand it, as the teaching of today, as I said, we change the magnetic field of the room, (1:52) or temperature of the room to be steam or ice on the window, and we change the environmental magnetic field of the plasma, to show its new dimension and strength or condition. I create that condition for man to enter a new dimensions of the fields of Universe. Then, it's handed over to the most beautiful Soul. To guide, not just humanity, but the whole of the Universe, into that dimension. And, we'll see what will be the next step, for how the humanity will go through this transition. And, as I said, once I'm complete, to take man to Space. It'll be left in her hand. And she's amongst you. And it's time for it, you will know where and how, to take that next step.

Any other question?

Q: ... It's very interesting Mr. Keshe, what you've said about the Vatican. And why did they have the meeting between the Pope and the head of the Orthodox Church in Cuba years ago, after never having met beforehand? And after that, the Orthodox head went over to Antarctica with 90 ships, (1:54) Russian ships, to construct a church here in the little Argentina, here in Antarctica.

K- Ask them why? You heard now, America has claimed it to be their 52nd state, I think. And, in return the Iranian leadership has called, they're claiming it too, in a different way. And so, this is what I call, part of the work of... Depends how you look at it. They're building a church and everything else for what, penguins? Now they want to make the penguins religious too? Or as Al Gore said, he forgot that the bears are from the North Pole. So, this is part of the game of claiming properties. In the future to be. And, it's more or less... Now, this is the situation with Vatican, it's more or less... The Ukraine war has bankrupted Vatican. You will see, you'll understand, because they were so sure, they go with it. And they're more or less, now losing. It's the first time Vatican has lost, since the German time of Vatican. And how they... how much more they're going to, what you call it... (1:56) They're going to sell, or in a way, put pressure on the churches to collect money to recuperate these losses. Americans and the support of the Americans and the Europeans, French and German, wasn't there. We are there to support Ukraine, they were paid for everything.

Remember one point. And some of you, I think, a few nations still are under that position. Americans, when they sent soldiers to Europe in the Second World War, every chewing gum, every shoelace, every socks, every shoe, every tank was valued, registered, to which country it's gone, and who used it, and what happened to it, and it became inventory of war, and they charged the nation for it. British till 1980s were paying, still Americans, for the chewing gums American soldiers had in Somerset. Till we saw, sold the oil and gas companies and water companies, and from that, paid the Americans off. All these rockets, blah, blah, blah, blah, you see in Ukraine, coming from America, it's all inventory. And Vatican has signed a check. And

this is where the wealth will go into the part of the American structure, but not the American nation. So, the Europeans will, or Vatican's and all the Christians, will pay for this, for years to come.

And it's the same with Israel. You will see very soon, the Jewish communities around the world, will start paying the American government, the debts, (1:58) the guns and the ?? battles (bombs) they gave to use in Gaza. America is an industrial nation, and industry runs on money. And no thing is done without paying money, because then it becomes very funny. So, you got to understand, the Jewish community and the wealthy Jewish people in the background, have written and underwritten what goes to Israel, and you see they're bombing their way out, because they're hoping all these villages got to be built again in Gaza, and they'll get their money back. And this time it's not going to happen that way, because you will soon understand why, in the next few weeks.

And both the Vatican and the Jewish, what we call the... and even the rest of who is behind it, will ?? Russia, probably will lose a lot of it. Because they wrote the check, because they thought they're going to make a lot of money out of it. But this time it's not going to pay back. So, how Vatican spends money is trying maybe to find some gold in the South Pole, that they can, what you call it, compensate for the losses they received in the North Pole. And what they will do, how many penguins they can make to believe in their way, and that's another way. And as ?? children always say, "Vatican might have to learn how to bubble, like penguins, for a long time, for what they've done." Let's see.

Q: I'm told there's a tunnel from Vatican over to Israel. And they've had an enormous golden bullion there, which has been taken away now.

K- I don't know. Maybe one day we know. They had 2,000 years to build that tunnel, haven't they? (2:00)

Q: Yeah, it's a thousand, one hundred kilometers long.

K- Yeah, but if they have found a way. They built that tunnel. They must have been much more advanced than the, what we call, the British going under the (English) channel. But it's possible, they know the way to God, so he teaches them a lot of things to do.

Q: Yeah, well, there are many of those tunnels going underground, that we don't know about, especially the ones that start there in Area 51.

K- Oh, there's plenty of them between Tijuana and LA. There's also everywhere. Depends on who wants to put their neck in it and do something with it. I'll tell you one day a story. You're welcome. I'll tell you one day a story, not a story, a fact, about these tunnels in Mexico. You'll be shocked. But we'll see. At the moment, we don't want to touch the, what you call it, the white guys, in the shape of the powder ?? (cocaine) on the skin. The time will come.

Any other question?

Q: ... I'm trying to explain to people how this technology works, with the mobile phone, headset. And really that, should I be telling them that this is only a location device, that you wear by having a phone? (2:02)

K- It's a ... This week in Sanya, we show a beautiful system. Nobody has seen it, it is just been put together in the past week. And I want to know how some of you, we haven't, we don't allow anybody to sit in it or play, but a few people will be allowed to go through it, because we know what the test result will be.

Explain to the people in a simple way. That's what I do, is that, if you can transfer my voice to you as an energy, and it changes to you and you understand it, we can make package of energy and transfer the same as a sound. You might lose a little bit in exchange, keys, whatever, you might end up on the other end. If I use your communication line as what you call it, a finger missing, a little bit damaged. But, with the use of the new communications systems, which we have developed, what you call, the Plasma Communication, everything will be intact. So, if you accept, you can send my voice as an energy pack, and the code 01, now we have developed a technology where we do the transfer of the energy fields. Your headphone, as you said, is just the establishing the location. It's easy.

In Gaza we have moved this to a new dimension. (2:04) We try to keep it away that does not come public. We have brought in a new technology to establish the feeding of people in Gaza without, or with headphones. And I'm monitoring what is happening and how we collaborate, who we collaborate with. The way it is, we... The Israelis have found, I mean, they didn't need to find out, we announced it, they are sitting in all our lines. They try to intercept and do a lot of other funny things. But, as I say, I know how to play with these children. I've played these games thousands of years ago, so, they think it's still time of Moses, they only wear... You know, it's like wearing your... You go to ?? Yves Saint Laurent , and you buy the most beautiful dress, and you put on a monkey, doesn't change anything, it's still a monkey inside, you understand? These people are in that state of mind.

So, we don't... they've been sitting around, they're targeting Keshe Foundation, and we have our own ways of doing things. And, they don't have the technology, so, it's what you call it, it's a 'dead end' for them. And as they cannot see, they can't even, ?? ignorance. But, we will... this is developed for a Space, not just for Gaza, but, we are putting a new dimension in a new materials have been added to the central core of the support for Gaza. Actually, our team has developed a new system totally for it, to support it. And, we'll see the change.

But, telephone lines is just a locator. And the rest, once we establish it. (2:06) One of our Knowledge Seekers, I'm more or less in touch with him frequently, daily, and using, going through the system. Say, the first day it was hard, now I just sit in and I connect immediately. It's just like the Souls are connected. And it's just a locator, because we're running different tests in the background, And it is very interesting how .. We have to understand this, it's what the teaching of today was about. We have developed the material side, why should we ignore it? It's the same knowledge, in... one in matter state, one is in energy state. Mankind has ?? one Soul how hard ?? can it be to bring these mobile phones, communication lines in. So, now we use and connect immediately. And then, it just needs to fine tune itself, and you don't need the mobile phone anymore, you need, if you're thinking on the matter state, or you can use the energy state, which is now available.

Q: When you're in Space, how do you connect?

K- Oh, that's so easy, that's easy. Here we have to ?? rely on the atmosphere of the Earth. Outside we are in a span of the Universe on what I call, Cosmic Rays, and no man is anywhere outside this communication line. It's not just here because we have the satellites, we go from New York to Washington, or we have our system in Austria, and you people in Germany, or Australia pick it up. Now, instead of using satellites, we use

Universal lines and Cosmic Rays. (2:08) And I have the knowledge to know how to connect, it doesn't matter where you are. I can find you in the center of a star.

Q: Is that because there's no distance?

K- No, no... It's a science, it's a matter of science, of understanding the field interaction.

I come from Middle East. I run a blood on one side from Jewish side, and one side on the Islamic side. And my Soul, my being is connected to the dimension of the Soul of the area. And it comes from it. Do I need a satellite? By blood I'm connected to the land. You understand? We ask you to become Satellites. I have become a Satellite.

Q: That was your purpose for the Satellite system, for people to become Satellites?

K- Yeah.

Q: ... I did come in and then I went out again, and to come back in again as a Satellite, is that still open?

K- Still, always is... man dies physically, the Soul needs to stay. We opened a new channels of support in... I don't want to talk too much, because this literally screws up the head of the Israeli government, but we are deep in it, (2:10) and we are in a deep heap of it.

Q: We are just waiting for the world to catch up to you and change. Then the change will come.

K- We have to do it. We have to do it in the right way, but at the same time, our right way should not become advantage to others to abuse.

It's possible, very, very possible. I return to Iran in a very short time. And we'll see the development of new technologies. And depends how we understand it. And then we prepare the ground ready for what we call, the presentation in Isfahan. And we have to have the work in China completed. And then we move on to the next step. And part of it is this. And then you understand when I explain to many of you in the past teachings, that many of those who walk on this planet are not from here, they are aware of the operation of their Soul, they become Satellites for the races in the deep Space. That's how it works. if you understand the process.

So it's not just a ?? satellite for the ?? one , but because the knowledge is there, it goes across the whole. This is the way we're working on it, and this is the way it's going, but what you call it... Everything needs its time, and it cannot be just because we started 10 years ago. (2:12) This is the, what we call, the final act, the final show, before the curtain comes down, before the new life starts for man.

I used to explain this to my children in a very beautiful way, because a child can understand. When we go into a show, and when the curtain comes down, we say the show is finished. But actually, if you think of it, the show has just started. Because what message did we get from that show? That becomes part of us, become part of the way of our living, or part of our memory, which affects our life, or changes our life, or bring changes into our lives. So, and when the curtain comes down, it's not the end. It's the beginning of a new, but with more people watching that curtain. It's one curtain comes down, but there are 1,000 people sitting in the auditorium.

Q: It's like the end of one age and the beginning of a new.

K- It's not one, it's understanding. Understanding that... it's not prejudices, it's the ignorance we have to put aside. And how we, what you call it, how we use this, to betterment of our lives in both dimensions and the ones around us. Strange enough, anybody who came to harm the Foundation, they got harmed themselves, by themselves, through themselves. And there are many regrets in this, many, many regrets. (2:14) And one day it should complete. And then one day it should start again. And this, as Freddy Mercury said, show must go on. But this time the show will go on by understanding the totality, not just ignorance and what you call it, one-sidedness.

In today's teaching, I tried to make it as easiest to be understood and bringing the two sides together, that Knowledge Seekers understand. Because once you understand this, it's much easier to transmute. It's much easier to live in both dimensions and understand it. Then you don't need to explain it. You don't need to explain it. Thank you very much.

R: Okay, are you ready for some more questions Mr. Keshe?

K- As the song said, "Are you ready for this?" Are you ready? Yes, one more question or so, we call it the day, we are nearly three and a half hours, are we? No, two and a half hours. I have to be somewhere at seven o'clock, 18, 20 it takes me half an hour to get there. Okay, give me the question and I try to answer the last one.

Q: ... Mr. Keshe, regarding Soul and animals, (2:16) an Egyptian doctor Abraham Karim, mentioned the animals perceive both worlds, and sometimes foretell what's to come. Do they know when they are going to die or transmute?

K- We all know. We all know. It's just that we try to, to ignore it, or say, "Oh, it's not going to happen." We accept accidents, even accidents, how it is set to be, whatever part of the whole scene. But, as a human life, in normal natural life, Our body knows when it's about to go, and what it's about to do, and how little it needs to take before it goes. We are all aware, without the shadow of a doubt. It's just that we call it to the old age, and cannot walk, cannot do this... It's just all preparing, gradually cutting the legs and arms off, that's, you know, just give me enough, the last bit, that I charge up to where I need to go. And no fountain of youth can help.

And I always said, if you know, .. not a destiny, but you know you, you have to do something. It goes step by step, and it's a process we all know. It's not just the animals. (2:18) The understanding of Totality is, and how it is, and how our brain is done to identify the strength of the field of the Soul. The more it clogged up, the more separation with the, what you call it, the STP, the more bits are stuck.

There's a new research which has come out, it's amazing this research. and it's opened up a new dimension, and even in... for us to be able to explain the work of the plasma. The scientists in trying to do another research, they have, in a way, punned on a new discovery, which was never known, and now I'm sure billions of dollars will go into this research. One of the research scientists has been trying to look at the behavior of the brain during the sleep, physically. We never done that, they build a system, it's like a telescope, but you look inside the brain, live. It's a lot of gadgets to it. But, in a way, they... you know, the way you go to a dentist, they sit you up. But you go to sleep, sitting up, upright. And they have developed this telescope which looks in the brain. Actually, exactly live.

And what they discovered is that, they want to know, they wanted to see the protein which produces Alzheimer's. They were looking for that, but they just fell on this new discovery. And it explains a lot of things. That, our brain carries a liquid in it, that our brain sits. And we say our brain has no veins, if you cut the brain is white, you don't see any blood, so it doesn't bleed. (2:20) But, there always was a... We ignored it, because we couldn't understand it, how this thing works. How this thing gets rid of its bits, and how we create a brain cancer, and the rest of it. Now we understand a little bit of it, but it's fascinating what they found out.

At a moment when you go to sleep, which we call the circulation of the blood changes, becomes weaker, even though it creates a... That's a weakening of the magnetic field of the blood. Not only it allows the Soul to be more freely expanding out, and now we understand and we're implementing this into work of the Keshe Foundation with the new headsets. That, the... as you fall asleep, your... the liquid in the brain, in the half which is not working, is supposed to be on repairs, like opening a sink at the bottom of a bath, loses all its liquid. It goes literally dry. And the brain cells literally shrink, like they've been inflamed in the liquid, like a balloon in the water. They shrink. And in that process of shrinking, as this liquid going through the brain down, like a sink, it washes all the energy, whatever the cell of the brain didn't need.

Now we understand how brain cleans itself, gets rid of it. And when you do not have enough liquid or rapid flow, bits gets stuck. (2:22) And certain protein in that dry time is like a ?? leach, it sticks to the brain. And this protein start the process of the Alzheimer's, brain cancer and the rest. This research is amazing, how much information we gathered about this research. And I'm sure leading Universities now will go for this to find out. Because we never knew that our brain, literally like a balloon, deflates. All the veins become like a sieve, and the liquid goes right through it, washes all the energy, all the surplus, what's not needed, out.

There are two questions now the world of science needs to answer, is where does this liquid go? Because they haven't managed to find out the sinkhole yet. And then it gets filled up with fresh water till you sleep next time. Then we have understood with this research and others which are following in it that how crucial sleep is. Sleep is not so crucial as you need to, what you call, refresh your body, is how much your brain gets washed and cleans up this mess of the day work. And if you don't cover it with... it takes to do this, because it's done in a synchronized matter, if you don't get 6 hours of sleep, minimum to 8 hours, you get all the problems of emotional and everything else.

And this has opened a lot of things in the work of the Keshe Foundation Research and Development. And we understand this change. (2:24) And the point for us is that the shrinking of or washing of the brain, at which point is the best time to put the headphones on you. I noticed this a few weeks ago, in past 3-4 months, many of the Knowledge Seekers who come on these sessions, they fall asleep. And, in a way, we're hitting a dry land. There's no water in the brain, depends on which part of the... It's mainly because we run our sessions, many Canadians and Americans are in their sleep phase. And we hear them snoring. And we put them on the silence. But some of these sessions goes for six or eight hours. We start looking at the behavior of the Americans, because we always catch them asleep. And some Europeans fall asleep too.

But how much the Soul is affected or behave during the dry time and the wet time? And how much and what kind of dreams become to reality for these people, in that time. If it's the four hour session, we're looking for that four hours. Are they in the middle of two hours, is when it's absolute ?? minimum liquid in the brain. And with that, there is no interaction between the cells. But that liquid is a communicator, connector, ?? for part of the system of the brain. And this research has risen a lot of interest for me, to find the right time to put people in the machine, the right way. (2:26) And how much the intention of the emotion has to do with it.

We are filling you continuously with the fields. Does not matter if you're in Australia, in Palestine, in America. But, how do you, how can you tap into our system to take what you need from it? And how our system is set to tap into the Universal ?? servers. Which means, doesn't matter how much you get, we can feed every living thing on this planet, and it'll still be that little bucket. Because we're just channeling the fields to you. You want energy for two tomatoes, I don't have any, but because I'm connecting you to the Sun, that's where all the energy comes, it gets tapped in. I never lose, I never become one tomato, I'm ?? still energy of two tomatoes in my system.

This is the way the new understanding of technology is taking shape. When is the most vulnerable? When there is no interaction between the liquid and the brain, it's at the driest point that the Soul rapidly expands. And is this why some of you click on and you're on it, because you're so tired at the point, and the brain has gone through draining system. And this is why some of you, doesn't matter what we do, cannot get through you, because that liquid is so thick. It doesn't matter how we do it, how we play with you. And have you learned minutes of sleep than four hours?

These are the things which will come up. Now we're developing system to handle this. It's actually in operation. Some of you in Sanya will go through this. (2:28) Because... it was interesting. This is why in the test, in what you call it, past few months, those of you been with us, we switched the microphone off, we switched the microphone on. And I've been trying to understand how many of you sleep time are there, if we can see the behavior of those, how they feel and how they behave, what they talk afterwards.

It's very interesting, this, this new research which has come up is, it brings a lot of things into Space Technology, clarified and how we can use it, where we can use it. When is the best time to get a transmutation done. When is the worst time to do it. Would you like to do a transmutation in Tsunami, when the brain is getting filled up with liquid and you're all over with the energy? It's very interesting science.

I call it the day today, thank you very much for being here, being with us. And we'll see how things start shaping in the coming time. Thank you very much Rick. Hopefully we'll meet each other next week after the conference.

R: So there won't be any broadcasting or information coming out of the conference really for the next few days? It's a sealed situation?

K- No, no, no. I know some of the Brazilian ask, "Can you send us some pictures of the place?" Whatever, I told Knowledge Seekers... We'd like to keep it as it is, the way it is, and as usual, I know we ask Knowledge Seekers to not send any pictures, or anywhere from the conferences. But, primarily it's for security, and a lot of things that the people do with, whatever they get in their hand. (2:30) Thank you very much for today, and see you next week. I have to go, I have a meeting at 7 o'clock. Thank you.

529 KSW Mar 14, 2024

END

530th Knowledge Seekers Workshop March 21, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Sanya Conference what happened; About physical seeing - Only see matching M field strength of AA of eye; See very little of U; Each strength sees only itself; Systems to adjust M field strength spectrum - see other entities in front of us; Eyes cannot be relied on in U; Space Glasses can see other strengths; Empty Space filled with beings; Like upper atmosphere intelligent beings live - NASA; Mature Soul can see other strengths; Iranian New Year; Brazil Intention support Sanya; Plasma Room - field environment; Materials gold made; New head of KF China; Best conference ever; Isfahan - magic show; Governments have 3 years for peace - force release of T; Bahai Faith went wrong - federation nonsense - T makes every individual equal; True equality - serve others - work out of joy; Not make new temple - worship your own Soul; Never understood Merkaba; Coke Bottle - DC plasma - different height - same with people; Don't fear pain of transmutation - become addicted; Sanya amazing success.

ENGLISH TRANSCRIPTION

(:12)

K- Yes, thank you very much. Good morning, good day to you. As usual, whenever and wherever you listen to this series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. And we welcome you back to the beautiful city of Sanya and one of the most beautiful coastlines in the world. The teaching of today bears with us, the continuation of what we talked about in the past weeks and how and the way Cosmic Rays (CR) will affect us. What is the Cosmic ?? Rays? The field of the Plasma, which different tentacles of it, reaches out according to the strength which manifests itself, or can spread out, to be and to be part of.

What we see, as we always explain, is a small part of the Totality. And, in a way, it's what we call, the dimension (D) and diversion in Plasma. In our, what we call, in teachings, or in our works, we always look, we always produce magnetic (M) fields which are in a way part of the structure of the mixture of elements.

(:14) And so we only see one, one shape, one magnetic field strength. We see one structure and this bring forward...

<< Mr. Keshe here have problems opening the whiteboard >> (:18)

K- ... And, this is, we usually define the Plasma this way. And, but in reality, when we look at a Plasma, we see a spectrum of the strength (draws a spiral). (Now, I remember what the problem is with this pen. This pen has become directional recently. That's why). And then, if we go the same way. (if I would have become Picasso, I would have been bankrupt, forget about it. How it will come).

If you put an eye here (Looking into the opening of the spiral). This eye, this point of observation, only sees the magnetic field in the center of the green (line) light. (:20) It cannot see the magnetic field in the strength of the other light. Where the eye here only sees the strength of the red. And the same way the black sees the strength of the black (draws 3 eyes looking into the spiral one green, red, and black).

And part of what we, as human, always considered, that we see the whole universe (U), we look at our telescopes, we look at our naked eyes in the sky, and we see everything. Where, in fact, our eyes are trained, our sense of observation of the vision are trained in a mono-energetic band of a position of the magnetic field strength. And this is what, by us becoming man of Space, will become one of our biggest concern and problems. Because we observe the structure according to the field strength of what we call, magnetic field strength of our own vision material, which is primarily, as "Mr. COHN," magnetic field strength. If in one point or another, we change, we cannot change these primarily as they are universally on Earth. (:22) If on Earth we change our Nitrogen to, let's say, Calcium, or Potassium, we will see, maybe, on a field strength, very much, let's say, at this strength. (I have to change it because I'm sure you will not be able to see it. Ok, we go to the blue).

I create a field at the strength of the blue. Then I cannot see what's on the strength of the green and I'm totally blind to the strength of the black, or the red. But once we start traveling at the speed of magnetic fields and our Soul becomes in a dimension opening up to different strength like this, or this or this one (red, black), then our vision sees different. The stars, the galaxies which are visible to us now they don't exist. We can't observe them, but they exist in the totality of magnetic field of the Universe. So man in space become aware that his vision dictates the strength of the magnetic field of his amino acid (AA), the structure of his life, depends what he can see. (:24)

And you come to understand very, very fast that now that we are becoming Passengers of the Universe, and we travel in the dimension of the central field of our existence, what we call the Soul, with different magnetic field strength of it, different dimension of the creation in the Universe will become manifested to us. And this will create another major problem for man who only see through their eyes, what they see they believe. Now the eye cannot see. Eye has to rely on the emotion, on the confirmation of the existence of whatever it is, through its Soul.

In the coming time, we will start developing systems, created through dimension of the, what we call, combination of magnetic field strength of the Cosmic Rays, systems that allows man at least to ?? stay (in), one or two dimensions. That he has the ability to recognize where, for example, with the blue line today, he will see one third of the physicality of what is in the Universe. But if you add, the one on the green line could be 1/20th, and the red will show 1/5 of, (:26) and the black most probably shows 1/30th.

So we change our speed. We have different emotion of the strength of the wind, which we travel in, or the wind we displace. In the dimension of the Universal transportation, transmutation, the speed that you travel dictates, in a way, by the magnetic field, the strength of your own amino acid (AA). And then this dictates in the speed category of whatever you put it down, what will be visible to you. Because the interaction of the fields of your AA dictates the visibility of what you see and what you don't see. What will come and stays in your, what we call, 'blind spot.'

So it'll be interesting how you as Knowledge Seekers (KS), when you'll be going back as a KS, you'll go around the Universe, even traveling from one place to another on Earth. One travels with the speed of the green, one travels with the speed of black, one travels with the speed of the red. Each one of you will only see what is in the magnetic field spectrum of your AA and, in a way, dimension of creation of you. (:28) Therefore, do not be surprised that when man becomes a Passenger of Universe, he has to decide from the outset what magnetic field strength he wants to travel in and to be within. If your very high speed created due to high magnetic field strength, you see different things than the one which travels in lower speed of magnetic fields and lower field strength.

So many of you have to open your eyes to this fundamental point. Because, if you don't understand, your eyes can play with you, your eyes can fool you. And try this. Try the production of these kind of systems, different magnetic fields, and see what you can observe. Or are the images missing from the screen? Or are they in it the wrong way? Therefore, when we travel with a spectrum of magnetic field strength, we will see different stars in the sky. We will see different dimensions of the sky. Everything is not so sharp. Everything is magnetic field strength dependent. (:30) And then you will understand what you see as a being, as creatures, in the line of the blue line and in the line of the red one is totally different. And you decide in what you want to observe and absorb.

This is the beauty of the new knowledge. We have to understand it, we create the speed, not out of rockets, but out of magnetic field strength. And we have to understand, in the process of travel, in this dimension, you have and you become across different entities occupying the same space, time and place. I've seen in past few weeks people getting agitated. And they talk, how they talk and what suits them. But in fact, you understand that what is written by the pen of the Creator will stay the power of the man. The limitation of its extending it beyond the time, place and position.

In the coming times, we'll introduce you to what we call, Space ?? glasses, where you can see what magnetic field strengths are available and where they are and how you can use it. (:32) A few Knowledge Seekers already use method like this. Knowledge Seekers, developed, tried to, but they never understood the concept, and we?? see them after three months, hackling, trying to find, to understand, then, nothing happens. But, we change the fields within the system, remote, and suddenly new life appears in front of your eyes. And this is what you will face with the highest speed travel, if you choose the physicality, or you choose the Soul, and you let it ?? grow to what it should be, and then you will see what comes out, what it'll be, what it'll deliver.

In the systems which we bring out in the coming time, very much like the glasses, when you put them on, according how you adjust the strength of the magnetic field of the glass, decides what you see in the Universe, what you see in your environment. It's not a difficult thing to make, but providing that such a system will bring addition to the present Space Technology, that's another problem. (:34)

We have to be able to deliver systems that can bring the changes in the structure of the magnetic field strengths that with it, within it, allows the development of a new system. New vision system, new system that we see the entity. We see the Universe through the plasmatic magnetic fields and not through the eye of the man. In the eye of the man is just controller of the physical dimension. Looking left, looking right, up, down. The preset to this was when we showed systems that can run on their own. And when we showed a ?? lady ?? became apparent that this has a new dimension, this has a new understanding. And this needs to be developed in a way that we all see the same vision, the same light, and the same magnetic field strength of the material at the same time. But we are aware of the other dimensions. In the blue line, we might see emptiness. In the green line, we might see material condition, which in the blue line we haven't seen. But now we feel the energy of. And by changing the magnetic field of the glass, by changing the gravitational field strength of the glass, by changing dimension of the, what we call, material condition fields, (:36) we can dictate, we can understand, and we can progress to the next level for Space Technology.

Why we need to understand? Why we bring condition of the effect of the magnetic field strength to confirm the vision, what we see, for detection or whatever? Now, nothing can be seen except what is in the new dimension. And this will change a lot of things for many people. You can dye your ?? hair black, and then sit down and make a black clothing. But when you want to use it, they say, oh, no, you can't use this. You have

to come very, very ?? you don't wear a black. It has to be the gray. And then we've seen, sewn it together, and then we see how we can change dimensions by, we can change observation by simply changing the strength of the magnetic fields of a glass, and not necessarily the eye of the man. But in that process, man still will have limitation of the magnetic field of the Earth and what he or she can see.

In the future, when we progress in understanding of the Space Technology, we will understand that the vision is not the sight, but the emotion, the magnetic field strength, the speed of the field will give you every information you need to become Passenger of the Universe, (:38) to become travelers in ?? different countries. So gaining the knowledge of Space is not the exclusivity of the man. And this will come to be one of the cornerstones of man, recognizing objects, entities, lives in the Space, in the deep Space. You stand in the empty space, in the red color, you change it to gray color, is mayhem of lives moving everywhere. And you're sitting in a traffic jam, which in the strength of the first original ??, magnetic field strength, has no dimension of physicality.

This will become part of the work in the next few months, in the next few sessions of the Keshe Foundation. That to produce systems that makes the skies, the depth of the Universe, fully visible. That it's not just, we see what we see. I gave an example of this before in some of the teachings, where, for example, we have the clouds. We see the clouds. Because their magnetic field strength is that the strength of our vision. But when, I always refer to, when NASA took picture of the Space from top ?? bomb (upper atmosphere), (:40) At the bottom we see the man, but on the top we see creatures moving with intelligence, because they have replicated many of themselves. But we don't see them. We have looked from time of Galileo to today. We never knew they existed. And by refraction and deviation in the light in the Space, accidentally we have to come to understand there are lives above us.

But if man, if our systems that can see in their magnetic field strength, we will see we are a bottom eater of them above, living, and whatever they want, whatever they don't want, handed down (to us) and we are happy to (have) it. We breathe this, we drink it. So in the coming time, as we don't see these creatures, we have now managed to see them for hundreds of years, we've been looking out now, that we are looking down in different magnetic field strength, we see them. That'll be the job of the man, to see how densely this atmosphere of the Earth is populated and polluted, and lives live within it.

If we go through this process, if you understand the process of creation of variation of magnetic field strength, leading to observation and confirmation of new lives, our skies are not black (of night). Our skies are teeming with life, but we have chosen not to see. This has brought us just not to want to accept, but in most of the work of the Creator, man has been only discernment. (:42) If we manage to create a spectrum of the fields, magnetic field strength, then we'll be able to observe everything which happens around us by just switching from given strength to another strength. And to how much it will feel to be part of it, because of it's not being ignored to be part of it.

Creation, maintaining and dimension, and control of the magnetic field, will become one of the cornerstones of the man's space travel. As we said, it will not be long that man will go through this phase. Man has no option, as I always say, because we have opened the doors of the knowledge. And we have to live with it, we have no choice but to live with it. But we have to understand it, that we can accept it. We have to understand it, that we can analyze it and develop ways, not necessarily systems and machinery, ways that our Soul can adjust to it, that does not need equipment, but it recognizes according to its own strength, what it sees, what it's got to do with it. And maybe one day, through the, what I call, strength of the eye of the man, man,

instead of taking the images of the Space, will print the images of Space, to say what he sees. (:44) What I'm observing, that with the naked eye of the man on this planet, cannot be seen.

Then new cycle of technology and knowledge will start, which will change the present understanding of the Space Technology, the way we are. Vision, observation of the environment, will come through the field strength feeling, and not by vision to see the sight. As I said many time in past months, we have moved away from the MaGravs, electricity and the saving, into the energy, which the magnetic fields of these Units, these entities will deliver for us, to us, and allows us to enjoy new dimension in the science and technology.

So, next step for us, will be in a way to open a spectrum of vision, lights, confirmation of existence, that all of us can enjoy. And not to be blinded to one shining star, and we call it, it takes so many millions light years to arrive on Earth. And in the way, bring our ignorance of our own knowledge, to understanding of our own joy, of being able to see more of. And to enjoy, to see what we have missed, or what we can create to enjoy that we do not miss. The dimension, (:46) variation in the magnetic fields of the vision of the man, then has to follow with the magnetic fields of the hearing, then understanding and detection through the field of the emotion of the physicality of the man.

In these all needs to be trained, you need to see who's standing in front of you, when you land on the Moon. As I said to the army people, we have developed the system, that with one switch is visible, and in one switch is invisible, even though it's in front of you. Then you have to understand, how many beings have been in front of you, and they've been on the invisible switch. Because you don't have the magnetic field strength of it, to be able to observe their existence.

A man has to become knowledgeable into understanding the spectrum of the fields which gives him vision, sound, emotion of the environment, that he can survive anywhere in the Universe. One day, in the near future, we go to that phase. We are about to, as I said, developing the, what we call, non-tangible Space systems. Which means there are no reactors. But create condition. And in that process, we will create magnetic fields that while these reactors are operating, creating dimension of vision that continuously every man can see a spectrum of the light and not just one mono-energetic, (:48) which we call the white light which is the beginning of, and the rest.

So next time you come to look at the Plasma understand all that single line of what I call, the spiral was one magnetic field strength that you can see. Now you have to understand you're observing many, many, many. And how you use this for the knowledge of the Space travel, and how you use some of these ?? lines (light) to travel with the, into the depth of Space by converting and using your sight, to be the vehicle for the transportation and transmutation of the body of man. What you see, you can do. What you don't see, you cannot do. And now you have to see, to be able to see, that there is nothing that you cannot do. We go for a break, we come back, and we have a short day today teaching. And answer some questions and let's see what comes up. I hope you understood this, because if you haven't, you're going to be in big problem if you become Passenger of the Universe. Rick, take us for a break and we come back.

>> **BREAK** >> 530 KSW March 21, 2024 (:54).

K- Yes, first of all, Happy New Year to not only the Iranians, the Chinese, what you call it, the Japanese, the ?? Kazakh, the Uzbekhi, the Silk Road belt of Knowledge Seekers. But, to all of us that this celebration is, for all of us. It is the beginning of the spring for all of us, who are in the Northern Hemisphere. So, it's not a national holiday, but we celebrate on behalf of all of you. But, it's celebration of New Year, And I hope it will be a wonderful New Year for all of us, as Knowledge Seekers. And I hope, one day, we become mature enough to celebrate the New Year for our Universe and the New Year for our Unicose celebration. But that takes time, man is still got problems with what he has. In general, I hope, or what I call, scientists and leaders become mature enough to understand. And bring what we call, unity, and not just by name of nations, but by, as a human, as One Race Nation. If there are any questions, we are prepared to answer, and let's see where we go.

Q: ... (:56) Did the Knowledge Seekers in Sanya feel the intentions coming from the Brazilian meetings held at the same time as the conference?

K- You should ask them. I cannot tell you.

We were busy, it was one of the very nice conferences, very unusual. As one of the, what we call, dignitaries said, "I've never been to a conference like this." Where there is no program, and it's four days, and everybody is literally part of the conference. And, we had a beautiful session, especially after the third day and the fourth day, where Knowledge Seekers in groups of 10 every hour, would go into what we call it, the 'Plasma Room,' and test and try every way possible to test themselves, how they can elevate themselves, or what they feel. And, we... I know a number of people have had, what we call, 'touching emotional.' Some people have already seen physical changes in their, what we call, physical life, and there are many, many, many, many, many things. We watched how, in a way, unique materials were created. We watched how unique emotion was created. (:58) We observed how some can have a physical feeling from the interaction of the emotions through the system. And it's very generally interesting. But, you have to ask them, you have to ask them.

Because, was your support, brought a, what we call, elevation of the Soul, that we all started with a higher, to understand more. It has been one of the most successful conferences Keshe Foundation ever held. In many, many ways, many ways. Primarily, it brought in Knowledge Seekers China back together again. It created a condition there to put a new, what we call, 'blood' into Knowledge Seekers of China, to be part of, to be in it. It has brought military and officials that, as you know, if you've spoken to Knowledge Seekers present. Some of the most elite scientists, academicians of the nation were present, and they stayed the whole time. People from the armed forces of China were present. And, this was the show of knowledge and technology.

As I said in the conference, uniformed officers, military officers of Chinese forces, cannot appear in conferences like this, when especially there are tens of tens of foreigners in. It's against the law of the military. But they stayed with us two, three days and they listened and understood what the change is. And in

the same time it brought what we wanted, which was mainly to bring the Knowledge Seekers together. (1:00) In a way from Chinese Knowledge Seekers always been isolated, maybe one or two ever came into conferences, a very few handful of, but now it was literally one big family. And it was nice to see, how even with the language barrier, they sit amongst each other, there was no problem. And they understand the knowledge and that was the main thing, and they carried the spirit of the Soul of the Keshe Foundation, understanding the knowledge is more important than color, race and religion.

It was well organized. I thank to the new head of the Keshe Foundation for China organizing such a flawless presentation, absolutely flawless and it shows his strength, his what we call confidence in holding it and I'm sure this will show in the future works of the Keshe Foundation, with the new head of the Keshe Foundation, for operating China. In coming time we will announce, and you'll know, as Knowledge Seekers start setting things up, that how the new systems which has been brought to China, will bring new dimensions for the Wellness and the rest.

I'm sure your prays and your supporting us has... there's a reason, part of why it was so successful. It's been one of the most successful Keshe Foundation conferences I have attended. I've attended in a few of them up to now, but generally speaking, extremely well organized, extremely, what I call, precision. Every hour in the second day, and the third day, ten people moved into the Plasma Room and ten people came back in. (1:02) But, one thing is strange, is the one which went out, never came back in. We don't know why they were transmuted, but they appeared somewhere later on in. And it was interesting, how people come back from the Plasma Room and how some of them gets touched by what they feel. And some of them tell you, "I didn't feel anything, it was just in..." But later on they tell you or send, write to you, a day later, whatever, .. this and that thing has changed in me. So, what they could not feel inside, later on they've seen the physical dimension. And so, in a way, for the first time, we brought in the pre-, what we call, transmutation system, into operation. And a number of people, sat in it, a number of people tested it. And it's amazing some, how people feel, going through that transmutation. And very interesting, what we hear, some people say, "Nothing happened." But later on it did happen, because they found it physically in... because of what they did.

And the .. generally it was a successful meeting, a successful presentation. Our next meeting will be in the beautiful city of Isfahan. The old capital of the, what we call, the Persian Empire. And it will be fantastic. What we have already as of today started the work, repairing (preparing) systems, testing systems, and understanding the boundary, ready for Isfahan meeting. In Isfahan for sure, 100% sure, we will not start Isfahan conference without it, (1:04) and we will show the first transportation, transmutation systems, ever seen by man. The Iran conference will be a double conference. The conference we finished in China was a triple conference. Manchester, London, Sanya. The second package of the conference is the beautiful city of Isfahan, where we will show the true transportation, new technology and science. And we try to even show you, if we can, a flying car. What you've been dreaming. We will show new breakthrough in technologies, which we could not even talk about it in Sanya, which we close. Then we move into Washington. In Washington we bring the position of no borders.

In the conference we announced, if the government do not make effort to bring world peace by 21st of March 2027, the technologies in the hand of the government will be released in the hand of people. You will be able to transmute, the technology will be taught. You'll be able to create energies which brings down the limitation of the energy. The food supply will become part of the technology of the Keshe Foundation delivered in 2027. What we ask is, for the governments to come together, to start the process of world peace. That if not, as you've seen we did, with releasing the patents, the blueprint which we... of the MaGrav, which most of you never understood, to release the technology to start the process of world peace. (1:06) Then

every man can produce as much gold, every man can produce as much food, every man can produce as much as he needs to survive, irrespective of the time, place and position on Earth, on the Moon, or anywhere else in the Universe.

The systems to guarantee this process has already, this morning, has gone into motion. We are preparing to show the transmutation and transportation in Iran. Once we come to an agreement with the Iranian military, especially military and Iranian government, the Isfahan presentation will be a magic show, very much, where the man, for the first time, saw the light in 'Chicago Fair.' In the Keshe Foundation Isfahan conference will bring a new dimension to Space Technology.

As I said in the second day of the conference, the first day of the conference, we introduced, we brought all the technology ?? balances together. And in the second day, we introduced the new Space Fuel, which is a plasmatic condition of Cosmic Rays. The system was brought into auditorium and was shown and delivered. And now we are in the second phase. Now we deliver systems for it. And Isfahan will be a magic show for those who love to understand the Space Technology. We are not showing you a UFO, that's too old, and that belongs to the aliens. And if the man wants to have an alien technology, you're quite welcome (for it). But we will show you systems that bring transmutation and transportation together. (1:08)

As I said, the Knowledge Seekers are on the run to find out how, and in Isfahan we will show. And we announce in short time, very soon, the entry, the registration for Tehran conference, and the Washington conference. And it'll be very interesting. In the phase of the Iran conference, we will invite the world leaders through the offices of military of Iran to see the change. And then we take this to Washington in a way, we'll bring an end to a lot of things and beginning of new things. But we show to some very few people new materials, new technologies, which has been developed and delivered. And those who saw it, those who felt it, they understood the change. And soon, in the next few months, we will see.

Any other question?

Let me tell you something, the Isfahan conference will be very limited to very few people from outside. Those of you who are from outside, once we announce it, you want to be in it. You'll have a few hours to complete, and we close. Isfahan presentation is for... the way it was for Chinese, it'll be first of all for Iranian Knowledge Seekers and Iranian scientists, and world military and Space. (1:10) We will present Chinese, what we call, the Isfahan Conference, with the presence of Chinese military and some part of the leadership. So, it'll be a combined, combination of the things, and then, majority of the seats will be given to the Iranian scientists and Knowledge Seekers. It'll be on the same basis, no different.

And, as you've seen the pictures, most probably of you as Knowledge Seekers of the conference, it was held in one of the most prestigious hotels on the island, in the city of Sanya. Amazing place, well orchestrated, well kept. And, I think the Knowledge Seekers hardly had any sleep, because they attended the conference during the day, and they went eating and whatever they did, till early hours of morning. And it become, it became actually, bringing many Knowledge Seekers of different nations, nationalities together, to enjoy the time and the place.

But, when you come to Iran, you understand the love of hospitality, and how it means to come home. Where the humanity started from. And now we start from the same place, a new culture, a new way man to go to Space. And I thank those who made, facilitated that we could celebrate the Iranian New Year together with the celebration of ?? in the conference the last day. But be prepared, once we announce the Isfahan

presentation, will be one of the biggest magic's ever man has seen in the world of the science. But this time it's reality, it is not magic. (1:12)

We've given the world governments three years, from 21st of March, which is today, to find a way to sign a Peace Contract, and bring world to peace, otherwise we'll force, we bring new dimensions. And, we have shown in the conference, the production of gold, unlimited. We finish with the old, which was gold, and we started the new, which is Cosmic Rays, and understanding of the travel in the depth of the Space, with the energy of Universe, and but not burning fuels and killing others.

Any other question?

Q: ... Thank you Rick. Thank you Mr. Keshe for a very, very, incredibly beautiful conference. Can I ask a question about...

K- How do you know, you didn't attend? How do you know?

Q: I didn't attend, no Mr. Keshe, no I didn't know. Did you manage to collect Mr. Keshe, or receive all the information's of the Souls that went into the system? Did you get all the information you required?

K- We will get it, don't worry. We let it go, we picked the ones we want, we observed the ones that we want. And, it's very interesting. The data we'll analyze later on, because it's done, it's recorded, hopefully. And if it's not done, we've seen what we wanted to see.

It's amazing when Knowledge Seekers change, the weight of the systems changes too. (1:14) By variation of you lot going in and out, it creates a different weight ?? . We observed it a few times, and the thing was closed afterwards. So if we can change the weight of the system by just bringing people walking on Earth, not touching the system, so it means you are interacting with systems. We watched on monitors on our oscilloscopes how you people change the fields, how Souls move.

It was very interesting. But the most important thing is how many of you took the experience of going into the Plasma Room, or in the other room, being able to use the five systems, which were put on the table, and it should be four. And somebody actually... Three of the systems were a normal system, communication system, and two of them were Wellness Systems. And somebody in the conference says, "This, this happened to me, regarding my condition." And so we knew the guy has been on the Wellness System. He hit the jackpot and he saw the result. And now with the new technology coming up, these Wellness Systems will be amazing. The new materials we are producing is amazing. I tested one on one of the Knowledge Seekers last night, and it was, it was beautiful to see. Materials which we never brought out. Yes, we'll see, we'll see how it come up, and we'll tell you when it comes. (1:16)

Q: Thank you Mr. Keshe. Can I ask a question about...

K- Are you on the beaches still?

Q: Yeah, I'm actually on the balcony overlooking the sea, with a couple of very wonderful Knowledge Seekers. I know many Knowledge Seekers all around us, that have spent some wonderful times together. And that... I'd like to thank the Chinese community, for a most incredible, warm, really beautiful, warm people.

And they welcomed us and they gave us the most incredible conference. And it was a pleasure to be in their company. May I ask a question Mr. Keshe? One last question would be...

K- I think most of you Knowledge Seekers had a problem by the Americans and the Chinese to get into China, non-Chinese. But once you got in, it was worth it. One of the Knowledge Seekers was on the way for four days to get to China. He wouldn't give up. He went from one airline to another to get in. Some people had to just go back home and come out again. And it was very interesting how Knowledge Seekers were so resilient, and they managed to get themselves in.

Q: I think I could reach out and touch him in physicality, Mr. Keshe, right now. He's very close. So Mr. Keshe, I noticed or it was spoken about that some people seem to have a definite glow behind their eyes, a difference in their eye structure. Would this be so?

K- Are you talking about now?

Q: It was mentioned by a couple of Knowledge Seekers that, like a brightness in the eyes, something changed and they were just asking some questions about this.

K- We had, (1:18) we have a Knowledge Seeker who says his eye has changed and it was this and that. And we had this for a couple of people because the fields are the, what you call, what the strengths are, that they could interact with. But, I can't tell you any more than that, because I know one Knowledge Seekers was persisting, that he's received very dark eyes around, or marks around his eyes, where, when he went into the system. We saw people physically, we saw first time people were shaking in Manchester, but we saw by their system, again, two or three people who were physically touched in the process of the, going into the Plasma Room.

Q: It was mentioned Mr. Keshe about, like, I saw one of the Knowledge Seekers and when it was spoken about, I actually looked into his eyes. And he did look like his eyes were very, very shiny. That was my real question.

K- I don't know. I didn't look the Knowledge Seekers, I'm getting blind. I don't see that good. So I'm getting blind with the knowledge. So it's... I don't know. It all depends.

Q: I'd just like to say, Mr. Keshe, to you as well, is thank you very much for that knowledge, of very incredible knowledge that was shared and I do thank you for that. That was a special time. Thank you Mr. Keshe.

K- Thank you very much. We didn't let anybody to record anything in the meeting, in the conference, and this primarily is that none of the Keshe Foundation conferences are recorded. (1:20) It's the knowledge given, and the knowledge is there to reach others through the Soul and elevation of the whole knowledge, by whole humanity and beyond.

But it was generally a good meeting. You're going generally... now, it's the first time in Manchester and in London, you just had a headset. As we promised we created a room environment, I don't know, 6 meters by 10 meters or 10 meters by 10 meters, where people could walk in. It was very funny. I... one of the Knowledge Seekers was standing outside the room and was like... You see the ones they go to the Wall in Jerusalem and they bang their heads? She had her hands open saying, "Oh, ?? I hope that we haven't ??"

opened another Wall here yet." And many Knowledge Seekers, when they go in, they feel the fields. And, it's very, very interesting, how we create the environment of the Spaceship.

Q: Sorry, I didn't mean to interrupt you. I was going to say that I know that when the people are around this room, from the outside, many people were feeling the energies from outside, you know, from the other side of the wall, and were experiencing it and holding their hands out and feeling the energies that were, you know, that were behind this, in the room itself. And then once people went in, they obviously experienced it as well. But you could definitely feel it as you were a present outside the room.

K- A strange thing is that many people when they went in, they fell asleep. (1:22) They found peace. There were people lying on the floor, people sitting on the chairs, and with their legs in, one was, I thought she's going to, what do you call it, take off, like a, what we call it, Buddha pictures. We promised we create the environment, and to see how you react. And we delivered what we promised. It wasn't just headsets. It was a full system. It cost a lot of effort by the Keshe Foundation team, especially by those who bring these things and set it up to create this condition. And as you've seen, it was system in the center and system around to enforce the dimension. We kept what we call, a Star Formation with a number of systems, very powerful systems. And we brought in other system in the background to do. And some systems connected to the observation point of the weight or whatever. And some were observation of what we call, the field, the material, creation of materials.

But as we said, we kept Manchester and London ???. So the, what we call, Communication Bundles. And you used the what we call, the UBESUS (Universal Body Enhancement Spaceship Units), ??? pre-rolled to them. And we promised in Beijing, we'll deliver the environment of the plasma. Many of you were touched by it. And in Iran, we'll deliver the flying system. And that will bring a new dimension to Space Technology. (1:24)

Q: I think Mr. Keshe, many of the Knowledge Seekers are definitely looking forward to Iran. That is for sure. I'm sure it would be a wonderful conference, the same as China. Thank you very much Mr. Keshe, I will let someone else now. Thank you Mr. Keshe.

K- Thank you. Any other question?

Q: ... In order to get sustainable peace on this Earth, Bahá'u'lláh envisaged a world federation. What do you think about the actual situation on this direction of the international politics? And what are the perspectives of the international system to get unified into a world federation, taking into account all these conflicts and troubles made by big powers in politics? Thank you.

K- Can you explain what you're talking (about)?

Q: Yes, I try to ask you if federation, this political entity, it's enough to get sustainable peace on the international level. (1:26) And if not...

K- We don't, we don't have a federation. And I don't know what federation you're talking about. But primarily life on this planet will change to, through everything that we have done and the others do ??? for it.

Q: Bahá'u'lláh said that a world federation will solve the problems and we have to find only spiritual solutions. And federation is a political solution, but maybe we need a spiritual federation. This was my

question. Of course, we don't have yet, but how we can help as a foundation to get new solutions, to get sustainable peace on the Earth, which is our aim as a federation, as a Foundation, I mean?

K- First of all, we don't have, I don't believe in federation. And it's a nonsense. Secondly, we come to a point that individual life sustainability, which means I can sustain my life the way I want, nobody can value it. But I serve that, in that serving, I do it out of pleasure. At the moment, we become like what I call, donkeys and dogs in the circus. (1:28) We perform something, we run around the circus ring, we come back, they give us a sugar lump, we call it wages. That just we can afford to survive till the next sugar lump that we get. Life should not be dependent on a sugar lump or a carrot, that every time you do a monkey work, done. Life has to be on the process of sustainability. I do to serve, to do, because I enjoy doing it. Because I have the food, I need the energy, I have, I need the medicine I have. I want to travel. I have the ability of it. I don't need to pay no more for it.

That then brings a different dimension that everybody becomes to serve, to be, to be part of, that be proud that I do something good. I don't get paid to work. I work to pay the others, to serve the others with my work. And this game of nationalism, 'wageism,' that you have to get wages to survive, you have to whatever, has to come to an end. A life of a man starts from, let's say, when you open his eyes till he closes his eyes. And how, what is the difference between the cleaner and the doctor? That somebody reading some books, whatever, has to be paid more for the same time of life reading and being part of this society. We have created this fallacy. And again, goes with those who want to abuse it, create federations and the rest of it. (1:30)

To me, when I used to run my business, end of each year, I used to give bonuses to staff. The manager, the CEOs, the cleaner, the doorman, the drivers, all got the same amount. And sometimes the ones who were lower got more than the ones who were higher. And not only in one occasion, few occasions, the high ranking guys, managers or CEOs, whatever, came to complaining, you know, we got a problem with the management team. They're bringing the same bonuses as the cleaners, and this doesn't work, it's not good. I said, do you know what's not good? If that guy is not there to clean your room, you come in to live in a pile of a heap of rubbish. His work is more than you, because you can't do your work if he wasn't there. But he can do his work anywhere, without you.

So, when we value a life, for life, and not to paperwork and reading something, in having a name and a title, till that time, the abuse will be there and federation has to be created, because we plan it, and we so work to get it. When we go to work, when we do something to help the others to, what we call, evolve the life of the man to a higher order that it is not dependent on somebody else doing something for me that I have to have, then we have changed, then the man will reach peace. (1:32)

At the beginning, when we get to this stage, it'll be a lot of greed people who didn't have, will want to have everything, but at the end they get satisfied, there is now, everybody has the same thing. This is not communism, this is equalitism, where you become equal. We breathe the same air, we drink the same raindrop as a water. We share the body of this planet. Why should be one man higher than the other? Except when the man serves. And that has to be at the level of the Soul of the Man (STM). Not in a visible way, "Oh look, I'm cleaning, I'm serving you." This is not... This has to be of life. This is...

If even those of you who were in the conference, any of the past three conference of this cycle, I don't sit back, I don't stay in the back, just because I might know a little bit more than the others. I take the microphone around people who is there. Yesterday serving sweets for the Iranian New Year when he was

there, because we are all equal. And when man comes to that point, then humanity has become peaceful. We need no federation and no generation of federation. This is abuse set by Bahá'u'lláh and has to stop. He set the scene of future abuse and it doesn't work.

As it is in his writing, he favors kingship. (1:34) Who says one is more than the other? Some of the teaching of Bahá'u'lláh is so wrong, that is fundamentally, that's why it hasn't succeeded in 150 - 160 years. Separation and somebody being higher and... The work in the Bahá'í Faith, most of it is wrong. And that's why they haven't managed to do some (thing). The fundamentally, is equality in the race of the man. And cannot be .??. Encouraging somebody to become, favoring kingship, federation and these things, are the job of the old system. The way that they could rule, they could run. The way it should be, is all man, doesn't matter on Earth or outside, all creatures of God are equal. Does not mean the cat, the dog and the ants, means what we call, aliens too. Respect and honor is different thing than leadership and kingship.

Any other question?

Q: ... Is gazing and opening to these new, to this new vision, to new vision or audio fields. (1:36) He defines gazing as trying to not focus directly, but to expand the perception to be receptive to wider observation.

K- What does that mean? Can you explain?

R: Well, I think it's if you're sitting and some people meditate or just sit, and the choice would be to either focus on a dot on the wall, let's say, or one particular item, or you can diffuse your vision, and diverge it so that you see more in your peripheral vision, and sort of look at the whole totality, rather than focusing on one particular point. And it, he calls it gazing. And I think maybe it's a, probably Shamans use that technique and that kind of thing... In the old days, in the movies they would say going squinty-eyed. You go, you squint your eyes and you see a gaze rather than, you know.

K- You know, yesterday we had many sessions, groups of 10 going in, and sometimes there became 10 or 12. And then, we're standing and suddenly I went into the room, and I saw a few Knowledge Seekers hanging on the systems. Because, couple of systems are tall, and standing, we put... We put papers on the floor, on a circle, circle of wood, and we put the system in center of it, and we put papers around, to see what materials we see, what changes we see. And, these Knowledge Seekers they came and they stood on the papers, on the wood, (1:38) and were hanging like God, their life depends on it, on these machines. I had to tell them to get off, this is not a ?? pain ?? system, and they're trying to get energy. And there was another one, saying, seeing them doing it, was another system, hanging on to the machine. I think they were waiting to take a lift off, you know, the flight. People do these things. But it was amazing. I wanted to take a picture of it, but they were literally hanging on the system.

And we are not building another what you call, worshiping or any of these ?? systems. We're trying to teach you to worship yourself, and teach yourself, and understand that you are the center of, you carry that Soul, which is the center of existence of you. And if you think of it, look at your heart, the structure of it, your liver, the structure of it. This thing in the center of you is so powerful that designs, brings, and controls this every second of your life. If I was you, I'd worship my Soul. Then worship means somebody else's world of rubbish. And don't make another system, that this time people actually can hang on it.

There's no use to gaze. Need to understand. What do I understand about myself. And then you're successful. You succeed, because you understand the truth, who you are, what you are. And how you'll handle the

situation in your life, does not matter on this planet, beyond or in dream or sleep, or awakeness. (1:40) I know what you're talking about, but we had them hanging on it this week, it was fantastic. I said to him, in face, what is going on? ??? Why are these people hanging, you know, holding on to the life of this machine. If you leave it long enough, it'll become another Mecca, and they'll start, you know, revolving around it.

Any other question?

Q: ... Mr. Keshe, I see the blue layer and sometimes other colors, also a shimmering field extending high above people, and the light in inanimate objects. Can people or animals that are past, step back into this realm?

K- In which way? But you have to understand... I explained something very interesting, maybe for the first time I put this in public, but it's good for Knowledge Seekers to understand and in the future scientists to understand. We know as much as you're asleep and you happened to go and visit in your dreams. Said, I had a dream about mom last night. I know she died 20 years ago, but it was so good. I seen her and, you know, whatever, whatever. What happens when it's daytime and you suddenly feel like, (1:42) ok, the weather came, or your feeling goes towards the mother who's at home, or, the Soul of the mother at home comes to you, come home, there's food ready for you, and say, oh, I've got hungry, and I go, how many of us have you seen the change in the aura or the shimmer or whatever of the man, in the daytime? When the Soul of the people alive or being on this planet or not with us or not, touches our Soul?

These things don't happen (just) when you sleep. It happens 24 hours a day, every day. You only remember the ones you call a dream, because you had no time to play with the physicality. You're locked in between the sheets. The same thing that happens in your sleep time, happens in your daytime. What aura would that change? Would you see the blue light on top of your head? Is the aura of the dog you had died 10 years ago? Or is it the aura of your dog on the floor trying to say, I'm here. It's not just I love you with ?? my tail. I'm here because my Soul is touching your Soul.

There's much more to all these things than man thinks. But we only think we dream at night, and when we dream at night, our Soul goes away. Things happen during the day to us. We touch our Soul with the others, and us touching the other Souls. What auras do they create, blue, black, yellow? But only the blue sign you see is actually the Soul of the cat on the floor, touching your Soul, in dimension of your physicality. (1:44) Man has to start thinking much deeper, deeper to these things, than just a play on the ?? .

Any other question?

Q: ... Good day Mr. Keshe, when we transmute, and we travel with the physicality inside the Soul, is that what our ancestors were trying to convey with the explanation of the Merkaba?

K- I never understood the Merkaba, how can I tell you, yes or no?

R: Ok, fair enough. I would like... I have the same problem with that one. We'd have to look it up. If we have to go to Wikipedia, it's not worth it.

K- I think Merkaba has changed in Arabic to ?? marhaba. Rubble, if you can do it, whatever it is. But it's the reality. When you don't know something, you don't know. I never understood this thing.

R: Mr. Keshe, I wanted to take you back to the past here for a previous drawing that you did.

K- Oh, my God.

R: This is a five minute clip, but I'll play one minute of it. And I want you to look at it and see if there's anything new you can add to this ... concept.

K- No, no, no, no.

R: Ok... Give me one chance. (1:46) Okay, I'll just play one minute here.

K- Let's do it.

<< Rick plays one minute of the video where Mr. Keshe explains about the experiment done in the past of the empty box with the parachutes inside it. >>

R: ... I thought that might jog your memory, and perhaps... it came up in our Keshe Plasma Reactor Group yesterday, and Brett in particular was bringing up this topic of the Cola bottle reactor experiments that you were doing, and the explanations of that. And this is the 'empty box of the Universe,' I believe you called it. And perhaps you can explain a little more, or maybe you could annotate on this picture. (1:48)

K- No, actually this is very much the process of picking up energies at different levels. As the Universe, in the Plasma. When you do these tests, you mainly see DC. Which confirms, what we call, a Plasma state. Not the AC, which is a matter state confirmation. And, in a way, you pick up energy levels, because, don't forget, this is a box, all the parachutes are the same. The only difference is where they are positioned and what fields, other fields, they interact with. Some of the pins have a plus energy, some of them have minus energy in certain levels, and same of two levels in one side of the box. So if the minus, the other one is plus. When they change, and this, when we put on the oscilloscope, there is no sometime AC at all, or ?? on it.

And this is how the energy of the Universe is. How taller people have different intelligence than the shorter people. How certain heights have the certain behavior in respect to their features and life. It's very interesting. If you look at this, what I call it, Universe, box of Universe, (1:50) why do all the certain height people of the certain color of the skin and certain color of hair have a specific behavior. It's exactly like this, what you see in the box. The boxes are measured from distance from the bottom. That's what the position. And you see, if you put two system in the same line, you get the same behavior. And some of these were deliberately done that way, to micro millimeter we checked that we are in, and we get the same result. So it's the field lines.

And when we put this box out, or shown for the first time in Eindhoven, if I remember correctly, was to show the energy in respect to the bottom of the box. Reference was the bottom of the box. In the Universal condition, the electrodes measured space gap between the distance from the center of the box, or what we call it, the bottom of that box. And if you understand this, you solve a lot of problems to answer these questions, how fields are created and how they generate, and how you can make AC out of these parachutes. But nobody has tried it, and I keep quiet.

Any other question?

R: Ok, thank you. That gives us a bit to go on there.

K- You should have gone much further than that.

R: Yeah, that's what Brett's trying to convince the rest of our crew in the Plasma Group, (1:52) that we missed the point, and it's time to go back and refresh.

K- Press the refresh button.

R: Press the restart.

K- Restart.

R: Well, it's a good day for that, being the first day of spring, and the first day of the new year.

K- Yes, I hope so. It's a fantastic time, it's what we've been through in past four or five days. And the changes, and what has come up, and what is being delivered is amazing, absolutely amazing. It's a new year and a new cycle. Let's see what it brings. As they say, the clock is ticking from today for three years. Three years time if the governments don't deliver what were given to bring, deliver world peace, we will force the world peace, by teaching and making everything irrelevant.

Any other question?

R: Well a few more have popped up, but I'm not sure if you want to carry on here, I'm going to call it quits. I know you're quite exhausted from all the action this week.

K- You know I was telling a Knowledge Seeker, in 2014, 13, 14, actually 14, I think 14, 15. (1:54) I taught in Italy, a 12 weeks session, 5 days a week, 9 to 5, non-stop. And, every day, teaching is all recorded. But this time, 4 days teaching from 9 to 5 or 6, the energy is not there. It's exhausting. And I don't know if you can do this in 10 years time or 20 years time. Holding 3 days, 4 days conferences and standing and being there for all that time, more or less it's not easy, because we all teach, that we all sit in the chair. It becomes hard, and we say, "Age is catching up." You know what they say, "What I used to do whole night, it takes me whole night to do, reading." It's that difficult.

Any other question?

Q: ... Mr. Keshe, you had explained transmutation as a birthing process. Is there a pain, more of a physical or emotional process? And is this something we need to be concerned about?

K- What? (1:56)

R: I guess he's worried about the pain or emotional process of the transmutation process. Is it like childbirth? You know, childbirth, it's wonderful, except for the pain.

K- I... Oh, it's a separate pain, but I have watched it happening. And it's very interesting. When the Knowledge Seekers panic.

Before I forget, the trial of what we call, the monthly program will not be tomorrow, will be next week, next Friday. As we all are traveling, and a lot of people are going back and forth, and they're still on the way.

And... If you could feel the pain of transmutation, you'd love to have that, it's addictable, you want to have it. You want not to miss it. And, once you achieve it, the pain is not going through it, the pain is sorrow of leaving it, because it's a different dimension of work.

Any other question?

R: I think we should probably wrap things up here. There's a couple of more questions if you really want to cover them.

K- Yeah, then we go. Yeah, just one more question.

Q: ... This 378th Knowledge Seekers Workshop, you talked about copying people using shadows. Can you say more about this? (1:58)

K- Nope.

R: Okay, perhaps you can...

K- I know exactly what he's talking about. Nope.

Q: ... What's wrong not being able to see the Soul-mate in the realm of the Universe? How many tests this person should pass?

K- This sounds like somebody who's very much in love with someone.

K- ... We call it the day. We come back next week, and we'll see how we change things. But we'll keep you posted, and the session will be next Friday. And I thank all the ones who made this conference possible. Some 10, 15, 20 volunteers, Chinese community, were there to make sure everything goes smoothly. Especially the head of the Keshe Foundation work in China. I think he needs two months holidays for what he did in the four days and everything he did before it. And all of those who have traveled across this planet to be here, to learn, to experience. We promised to show you, we created a room of Plasma, and you all be testing it. Promise you when we meet you in Isfahan, you will see the flight of the man without propulsion. Thank you very much, Rick. See you next week. (2:00)

530 KSW Mar 21, 2024

KF knowledge beyond UFO; Problem of missing knowledge - all races; Aliens still have to eat energy; Plasma is Universal Fields - CR; Iran Conference change Space T to Energy state - end matter state; Live without killing need CR; Knowledge never knew existed; Talk through Soul; No containment in U - suns; Isfahan flying systems no computers; Transfer energy of STM; If don't feel - not mature - not connected;

Your responsibility to learn - don't hold others back; All 'roads' fields lead to Creator; Also teaching UFO races about CR; Light of stars see now - instantly; Matter state M fields - 8 minutes get to Earth - CR instant inside you; Scientists only accept matter state; Mr. Keshe secret of living millions years - gathered knowledge of emotion; Cry upon transmutation; Preparing for Iran - Military & Government - show UFO T - Fall 2024; Selling old KF stock around world - government will produce 50K new products 2 years; Magnetic - M fields different than plasma fields - defined; No patents - ask for percentage GDP; Markray; Takeover Tesla cars - new Plasma Cars - no engines - batteries; KF defrauded millions - best thing - saved 20 years time advanced T - now work with Governments; CO2 Buildings stopped - use AA absorption feed directly humans - animals - plants; AA for farming; Protectors of T; Make Gans with CR - never settle; Gans settle from gravity of planet; Only 5% knowledge in public; Special way to make Gans; Humans violent - how T change - concept of Choice; Washed AA out of Gans - no connection; Always connected to M fields of Sun - mother; Man not mature to control Non-dimensional Plasma; CRPm Customs

ENGLISH TRANSCRIPTION

(:16)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers programs, from Keshe Foundation Spaceship Institute. And as usual, we welcome you back, we're back again to share some knowledge and to understand more and add to the knowledge.

As we said in the teaching of the past and the course we have taken in the past few weeks and months, has brought us and is bringing us more and more to understand the, what we call, methods of functioning of our Universe (U). All the teachings we do, it's not just about the Soul and Cosmic Rays (CR) and everything else. Is in fact a book and knowledge of how you Knowledge Seekers (KS) and humanity and the rest of the Creation, (:18) in the future will use the knowledge of the fields of the Universe, for its benefit, for its, what we call, elevation, and many other things. As I said before, in somewhere down the line, come to be comprehended, and extended, and understood. Is that, we thought and we think at a moment in the realms of the science and technology of the man, if we master the knowledge of those who we see as light in the sky, as UFOs and the rest, we'll be highly educated, we'll achieve a lot of things. But you've got to understand, as I said, there is no difference between a man on a donkey, and man on the rocket space technology of today, and what you call, the UFO passengers, people who manage to travel the span of galaxies and universes, if you travel in dimension of physicality (P).

So as you all understand, and more or less start to understand, the knowledge given to man, what we understand today, what is discussed on the table of the knowledge of the Keshe Foundation, so simply and so maturely, is a knowledge even beyond the, what you call, UFOs. When you carry a craft, you're still tangled in the dimension (D) of physicality, Where once you learn the 'Art of Transmutation,' there is no dimension of physicality. (:20) The Creator transmutes His love. He does not send it with a craft. There it is, a 'ship of love.' Here it is, a 'ship of caring.' And this is what man has been gifted. You have had a magnets, and we knew about some material being magnetic for decades, centuries, till somebody moved it, and then it rotated it within some materials, and the energy split of it, became electric current, and now we found a new energy. But magnet was there, and a copper was there, and in some mines are next to each other. Nobody realized the energy.

Now we have come to understand what is inside that magnet. That we make it, we put energy into to make it. We put energy into the copper to make a wire of it. And somehow when we move one in respect to the other or whatever, energy field cutting creates energy that we use as electric current. But in fact, it has always been there. I'm sure many of our ancestors found magnets, found the property of the magnets, and they must have had something, cutleries, pots and pans, next to each other, and never realized the energy. Because the science of man was not reached to that point. (:22)

Now it's the same thing. As now we open the mystery of the matter state of entity to its energy. So, it's not that we have found something new. No, we have just understood what we missed up to now about the Creation. And this missing of the knowledge is common in the Universe. You got to understand, if somebody on 'planet Zeus' had the knowledge to come to Earth through transmutation, and spend few seconds on the way, would it (they) have made all these crafts traveling? How many of them lost on the way? How many tests were done till they got it right? And most probably, these ships somewhere, they call UFOs, who, we make a mistake, and then all passengers gone. So you understand the difference between UFO and rocket space technology of NASA or 'Mr. whoever' who's getting into the competition or nation's space technologies like Chinese and the Russians and the Iranians is nothing but another dimension of physicality. Nothing has changed. Man has not moved into the dimension of energy. And it's for the first time this knowledge, this way of sharing knowledge has started.

We are setting the cornerstones for man to be able to have an option between both dimensions of the energy of the matter and the matter state of matter. (:24) You burn the candle to create light, to create heat. You burn that fuel to create heat, to burn it, to run a generator, to create electricity from it. Now you can make the Gans of that fuel and get more energy out of it to his fields, than actually burning it. You don't need few millions of gallons of it to create megawatts of energy. You need grams of it to create megawatts of energy. This is the change. This is what we're talking about. This is where most of you Knowledge Seekers are getting lost. "Mr. Keshe speaks about Cosmic Rays," now it's a new fashion. It's not a new fashion, it is understanding. You have matured that now we can talk about the 'birds and the bees.' Up to now was 'boys and girls be good.' This is about the 'marriage' of the man, amalgamating the life of the man into the Universe. Not, not just boys get on the UFO, we take you somewhere else. We haven't changed your donkey with a UFO. Where both needs energy to be fed, to be taken, to be positioned. Even the UFO uses magnetic field positioning of being attracted and going somewhere and all the games in it.

So, now we have to understand this, because this Cosmic Ray, which is the magnetic field of the matter state, has become a dilemma for many of our Knowledge Seekers. (:26) Because us, in Keshe Foundation, before used the plasma and confused the scientists. Now we use Cosmic Rays and we literally 'stirred it up.' So, you've got to understand what is, and what separates the two methods. Even in dimension of UFOs, in the dimension of rocket technology, you're still relying on matter state of magnetic fields. Where in what we call, Cosmic Ray, in the plasma technology (T), you work, you operate on the length and the strength of the Universal magnetic field, and not its matter state. Because all the matters are connected to each other through Universal magnetic fields, or what we call, Cosmic Rays.

We start explaining this in a much more detail, as we enter and we're preparing everything to be able to show the whole extension of the knowledge of the man from UFO travel, from lift and motion to Cosmic Rays transmutation in the event to take place in Iran in hopefully this year. Where we finish with the dimension of the matter state and we bring in the dimension of energy state. And this is what is on the way. This is why we bring the dimension of what we call, magnetic field patterns. (:28) What we call the line of the connection of

Cosmos together. Where up to now we used the matter state magnetic field pull of the Earth respect to the Moon, we haven't even got there. At the moment we still find what we call, 'Mr. Tesla, and we look for another guy who's made a car in his name,' trying to save you are advanced.

Does it matter if we see a UFO on the back of the Moon? We define another colony of creatures on the dark side of other planets? Or we find something else in Space? Which is all matter state confirmation of existence. And, or would we live in the dimension of energies of the Universe, and magnetic field connection of the Cosmos? Either way, it's a way of transmutation. It's a way of getting from A to B. It's a way of living a peaceful life. Because when you are in the UFO, you still need to be fed. Unless you learn how to use the energy field that does not need to eat. I'm sure those of you who had the pleasure of, or are part of the structure of what we call, Universal Community, (:30) you eat too, in different shape or form. Otherwise, you don't exist. You cannot continuously take energy or give energy without replacing it or sustaining it.

So, does not matter how we ?? find (define) ourselves, they must be of a higher strength knowledge, or they know more than we do. Then they come and stand on top of us. We call them UFOs, and we salute them. We wish our knowledge would be like them. But at the end, did it matter if you traveled on a donkey or a jumbo jet? In the end you had to be fed. You had to rely on the matter resources. Or do you consider to move into condition of the energy resources, which has no matter condition of it, is the plasmatic field dimension.

In that process, in that structure, now you find out. Now you understand, there is a vast amount of knowledge which we have no clue of. Once we open the dimension of transmutation in the field strength of the Carbon 14 (C14) or Carbon whatever, we have just opened up the first step towards what we call, hyper-light system, that we travel in the speed of light beyond imagination. To what extent would our Soul be able to stand the transmutation line? Our physical body, with the high speed, suffers in the dimension of what we know as G's. (:32) 11 G's brings you 'bip.' 50 G's brings you 'bop,' and you're gone. Is there a G limitation for the Soul of the Man (STM)? Is there limitation in how fast we can travel this speed or what the content of the STM from A to B?

Now you understand that the knowledge of what we talk about, Cosmic Ray, is traveling on the line of energy. And when we talk about the UFOs, what we call, 'MaGrav positioning,' we're talking about matter state. Would the future of mankind change so rapidly that we put aside anything to do with transfer of matter state, be it our physical body, be it the means of transportation, be it the means of communication? Do we need any more sounds to make that makes us intelligent because we can put the sounds together and we call ourselves the 'king of animals'? Or are we still animals in the dimension of the Universe? We still need to animate it.

Now it comes to a point that we have to understand, now that we understood we can transmute our energy field, as we call it, the Soul, we need to understand the rule of the game. (:34) How the rules, how the game is played in the Universe, in the dimension of energy. There is no more matter state, it is understanding the essence of the Creation ??. You have to feel the other energy, you cannot see it, there's no tangibility.

In the flight systems which we'll show in Iran, on the matter side of the energy, you will see there is no containment, there are no reactors. Once you create a reactor, you come down to the limitation of the matter state. But, once you create the plasma fields, you are in the dimension of Universal fields. As I said in the talks before, we don't see a containment around the Sun. We don't see a container around the Moon, we don't see a container around the Earth, or any other planetary system, any tangible system in the Universe. We

don't see the Sun in a container. So, till man gets his knowledge to the point, that he can make energy sources like Sun, without a container, then man has achieved for the first time to understand the process of Creation.

Now we're still fighting how much gases or whatever we can blow from the back of a rocket to get us further up. (:36) In what we call, the Plasma Energy System, there is no containment. There is no containing except fixing the field in respect to its environment. And for the first time, we will show such a technology in Iran. Space reactors without containment. Because the fields does not allow such a condition. Then, in a way, in the palm of your hand, if you can hold it, you carry the Sun. You carry the essence of the fields of Creation. In reality, in Iran, we show technologies that the man could not even dream in past thousands of years. We always talked about the rocket. We never spoke about the fuel the same as the Sun. But the beauty with it, it has no heat. It has no limitation of the matter state within it.

In the flying system, transportation, transmutation will show in Isfahan in the coming time. We bring in a new technology, ??, with forcing man to abandon all the behaviors of the past. The systems are in process of development, for our scientists to understand that they can go to the next step. Don't rely on containment, but rely on maintaining, in bringing and supporting. (:38) The systems which will be shown in Iran, it'll be so advanced that world of science will be baffled. How simple the technology is. The technologies are advanced that there's no computer to control it. We don't have such a connection, such an advanced knowledge to be able to control these things. The same as we made the computers, we made them with so much memories and connections, but we haven't got them to working even in a fraction of the dimension of one single brain of us.

Now you understand why we are introducing the Cosmic Rays, why we are bringing in a dimension of connection of the Cosmos, not the dimension of connection of the matter. The fields of the universe are connected to each other through magnetic (M) fields and up to now we have managed to do. 'Hello, I'm here, would you like to come for a lunch'? Because we can just manage to transfer energy of the sound of the man across. Now in the coming time, we transfer the energy of the STM, which is in a different dimension, which physics and knowledge of the day has not even come to understand or comprehend the existence of it. So you Knowledge Seekers are jumping, separating from the dimension.

When we give you systems, (and you say,) 'I don't feel anything,' which means you haven't matured yet. Those of you who get into the Universal system, UBESUS (Universal Body Enhancement Spaceship Units), (:40) you get into systems with a headphone with us and tell us, "I don't feel anything", it means you have not matured. You have not come, you have not reached to the level, to be able to connect, to understand, the field interaction of the Universal lines of communication, what we call, Cosmic Rays.

As I said, a new game, a new way to work, to reach, to achieve it. And, as is the habit of man, those who cannot achieve it, there is something wrong with you, not with me. But not this time. You cannot reach to understand transmutation, you cannot reach to expand the expansion of the Soul. It's your problem. Our system works. Your physical dimension has not matured to the level. Has not reached the point of understanding the expansion of the fields of the Universe. It's not anymore the British way, you have to prove it to me, that then is correct. From now on is your job to understand it, because it's your own lack of knowledge and not mine.

As I said before, I said to the Chinese military, in a very simple way, I said to the guy, you know the French cooking, then how can you be put as somebody to give an opinion about the French cooking when you have none? (:42) How can the matter scientists of today try to give verdict to approval of the knowledge of the energy, which they have no clue of it. You bring a piece of metal in front of a leading scientist of today, and

you say, give me energy from it. Is it coal? Is it uranium? Is it oil? Is it candle wax? I said, no, it's a metal. This cannot be done. Because we put energy in the metal to melt it. We put energy in the metal to form it. But no one in the world of science of today has considered that metal has so much energy in it that it's holding itself to itself as a metal. If you can open this energy, just using the energy of them holding to each other, can feed the whole mankind.

And then, an illiterate scientist tells me to explain to me, then I can approve it. Because you don't even understand it. This is the problem, as I said before, with you Knowledge Seekers. You're at the verge of that point. A lot of you feel it, know it, now you can find a way to do it. But you don't have the means of doing it. You don't have the means of transferring this energy. You don't have the means of using this energy. And, in a simple word, because up to now, you never understood the Cosmic Rays. You never understood how to connect. (:44) It's very much like me, you, in two different cities, and you buy a car on the Internet. They send it home. You have to assemble it. And once you assemble it, you can't get to me unless there is a road. If you live in Rome and I live in London, doesn't matter what kind of car you have or what kind of car you bought, unless, first of all, you don't know how to drive it. Secondly, you don't know how to put it together. And thirdly, if there is no road or a way, direction to get to me, how do you want to get to me? You have a car, you bought a car, you put it together, you bought a brand new car, but you don't know how to drive it. Stays in the garage, stays in front of the house. And even if you went to classes, you learn how to drive it, if there is no road, you cannot get to me. On Earth, to get from A to B, we use roads, air flight, shipping lines. To travel the span of the Universe, you need Cosmic Rays. That's your road map. This is the paved road for you to every point in the Universe. And if you are clever enough, as the Italians say, and I have said it many times before, 'all the roads end up in Rome.' If you understand how to use the Cosmic Rays, all the roads ends up with the Creator.

So, on Earth you need the road. In the Universe you need the Cosmic Ray, that's your road, that's the way to go, and every direction these roads go, it's you who have to decide. (:46) Even those who are the, what we call, advanced technology of the UFOs in Space, now that they understand this, they have been using the same as you. The same condition of the matter state fields, not the plasmatic fields, not the Cosmic Rays. This is why from the beginning I said, when we teach, we teach .. for not only the man. You thought as humans now you have to learn new things. Those guys above with the UFOs, they're banging their heads, why we didn't see it, why we couldn't do it that we're still using this system.

Now it's coming to the point that the creation, the created things in all dimensions of the Universe, will have one common way to travel, through the direction of Cosmic Rays. They will think one way, they will understand one way, and they'll behave one way. Because when you become a Passenger of the Universe, when you travel in the dimension of transition in the STM, the energy fields of the banana is no use to you. The energy fields of the meat is no use to you. That was good to feed the matter energy state of your body. In the Space, you have to learn how to tap into Universal fields to feed that hungry STM with all the dimensions of the knowledge of the Creation. (:48) Now you understand. The extension of the knowledge is beyond man understanding. And unfortunately, you have a few months.

As I said in the conference in Sanya, on the 19th, or what we call, on the 17th of January, March of 2024, we finished with the past. And we started with the new. The beauty was in what we did on the 16th. The reality came that whatever we achieved on the 16th was nothing to what is on the table on the 17th. It was promised that the March of 2024 will be what we call, the watershed in the life of humanity. And it was delivered in China.

Now, you have to understand, to you is Cosmic Ray, to me is fuel tank, to the other it's the UFO. All has to find its place and understanding. Once man understands the use of the energy, he will think 10 times using the matter, unless you want to hold it, to touch it, and you love it in a dimension of tangibility. (:50) We come to Earth, we take the dimension of physicality to enjoy what a physical life gives, because on the dimension of the Soul is just fields, there is no tangibility.

Now you understand, why the whole structure, the whole confirmation and completion comes to the point of what we call, the Knowledge of the Creation in the dimension of energy, which energy is translated as "magnetic fields in motion." And if one day all the created things put their energy together and bundle it together within it, and as collective energy of it, they'll find what we call, the origin, the original field, the origin of the Creation.

This is one of the biggest problems for humanity. Now, to separate these two points, separate and understand the difference between these two points, come to the point that man become wise to everything. Now you understand, how the game is played. The game is simple. Is man, lack of knowledge, (:52) has kept the man to the dimension of matter state. Now, gaining the knowledge gives man the accessibility to everything created within the Universe. And everything is within the reach, and everything is reachable. You don't need thousands and millions years, light years, to get to somewhere. Excuse me. 'God does not have Earth light years in His horizon.' So He should not exist. If this is the principle of what we call, the religions of today. That's not just a religion by faith. That's a religion by science.

Now, we have to understand why we are introducing the Cosmic Rays, why we are introducing the fields of the Cosmos, and why we talk about how faster you can go, because there is no limitation on it, is no restriction on it, as the physicality has a restriction. Then you understand what I always say. What you see in the sky, the light, the Sun, the stars, what you see is exactly what is happening that second now, that moment, and not millions of years (ago).

You've got to understand that a plasma has a spectrum of fields. (:54) As I explained last week, with the eye. Those which are in the matter state field strength, takes them 8 minutes to get to us from the Sun. Those which are in the Cosmic Ray fields, are instantaneously within us. Because, within ourselves, which is in a plasma condition, we have that connection and characteristics. So, what we see as a day, light or the light or the field, which takes 8 minutes to get from the Sun to us, is what it takes in the matter state energy fields. Not in a Cosmic Ray energy fields, which is instantaneous. If you decide to travel with the donkey, that's your problem. The rocket technology and the jumbo jet is sitting next door. And if you don't like it, Cosmic Rays are next to them. So we measure with our present technology and knowledge the donkey way. Anyway, not even a donkey, the 'stone age' time measurement. But the light has been there, the donkeys are there, the rocket technology is there, the cars are there, everything is there. If you want to still live a 'cave life,' it's your decision. But now that we have the understanding of the fields of the energy, then why are we measuring it in a matter state? (:56) Why have we been convinced to accept that, this is what it is and all of it? Where in fact, yes this is what it is, all of it for your understanding to the matter state. Not to understanding and work of a Universe in a plasmatic magnetic field state.

In a way, I always compare it to when the cars came, they said if you do over 25 kilometers an hour, your eyes pops out, you bleed and you die. So the car manufacturers had to produce cars that doesn't go faster. Even if they could, because nobody would accept it. But one thing which I said once to a scientist, I said, you know what's the strange thing? Man going on the back of a car 25 kilometers or whatever, would have popped his eyes out. But man used to travel on the back of some horses and donkeys much faster. His eyes

never popped out. This is how they fooled us with the knowledge. But we have to come to understand, if man wants to travel in the dimension of the speed of the Universe, man has to convert his matter state to energy state, that he can transmute. (:58) And this will be a big dilemma for many, many Knowledge Seekers and many scientists and humanity to come up with. Till we transmute the first man. Then we see how the whole world of the man will change overnight.

I hope I resolved this matter of Cosmic Rays last week and this week, emphasize them again for everybody to catch up. That, when we go into the next phase of the travel, there is no tomatoes left, and everybody has ketchup. It's for you to understand the truth about the Knowledge of Creation, and not for us to be wrong, because you don't understand. This British way of explaining to me, otherwise you are wrong, has changed, you're a stupid, catch up. You don't understand, catch up. It changed that you have to slow me down till you find out. It's your job to speed up to catch up to what is coming up and what is available. And if you don't understand, 'tough luck,' live in the body of the man and go through all his sufferings.

And this is not just for you, the teaching of today. It is very simple. And it's as 'simple as ABC.' (1:00) You have to understand. You choose the matter state, or you choose what we call, magnetic fields dimension. I wrote a paragraph to one of Knowledge Seekers this morning. And this will answer a lot of you in a lot of dimensions. As part of the communication, it says, this is secret of living for millions of years in all dimensions of Creation, as I have, and gathered so much knowledge of my own emotion. God's knowledge is free. And he says, "Gold has no value, as you understand the secret of gold of Creation and Creator." And it's the secret we are trying to teach you. Then you understand that you can even use that gold in the dimension of matter state to add to the Soul of yourself, to elevate, to understand the position of transmutation from one to another.

Then you understand, when you transfer from Cosmic Rays states from the field of the Universe to the dimension of matter state transmutation, (1:02) to be visible, tangible, you shall cry. And you cry the same as when the child is born out of the womb of the mother, to accept the life in the dimension of physicality of Earth. There shall be no difference. But in different ways of crying, in different ways of loving what we call, the Creator.

We go for a break and try to answer you back. At least resolve some of the mysteries of the Creator in dimension of the Creation, not in dimension of matter state. Would you like to take us for a break, Rick? And we'll come back.

>> **BREAK** >> 531 KSW March 28, 2024 (1:08).

K- Thank you very much. As we finished and completed the Sanya Conference, and we are preparing gradually for the Conference in Iran. We're working on, in a way, to keep you aware of what's going on and how this conference in Isfahan will be organized. Because we have full cooperation between the Keshe Foundation, International Keshe Foundation, Iran Keshe Foundation, and the Iran military forces, Iran Space Development Forces, and the office of the leadership and the Iranian government. The Iran conference is not as simple as it was done in Manchester, or London, or Beijing. The Iran conference, it will be so comprehensive and so extensive, that will bring forth a new dimension in aspects of the life and technology.

Those of you who planning to come to Iran, you have to understand, the conference in Iran is not a game changer, is a change of the Space Technology as a whole. We, as I said, created the room for you to experience the environment in Sanya. In Manchester was a system on the table. In Iran is a game changer of the development, showing of the technology, and delivering technologies which makes the present space technology obsolete. (1:10)

Those of you planning to be in Iran, we have set a very high fee for Iran and Washington as a twin conferences. The reason we have a lot, but be prepared. We are looking around about 25,000 Euro for entry for 2 conferences. And your admission is with us. As happened in all the 3 conferences, we try to facilitate your accommodation, but you pay for it. Your transportation, you're getting there, and your accommodation, both in Iran and the US, is your responsibility. We try to be as clear as possible in next few months, how the conference in Iran will take shape, that you understand. And it'll be present (attended) by Iran military, by Iran Space Officers and Government Officials, as is a show of change and development of the new technology. If you are planning to come to Iran, getting the visa for you and everything else, will be arranged internally through by us, that you don't have the mayhems of what we saw happening for those who came to China. But be prepared for presentation of technology which will baffle the what we call, not only the world of science, but the governments. (1:12)

We will not accept any restriction on what we show by no governments and no military forces. We will show pure raw technologies, they use their advantage, and what is to change. And Iran conference will be the beginning of the change from matter state to transmutation and show of the technology in what we call, you like to call it, the UFO technology. Those of you who are interested, as normal, as usual, register with the Keshe Foundation. We have not put it on the website. We will not do till very late, but you can put your, what we call, booking or what you call, your registration, with the Foundation as of now, through the connections you have. This is only for the Knowledge Seekers, because once we open up, we close the Knowledge Seekers' door. Even in Sanya, we tried to accommodate everybody till last minute. Still, our agenda is around October, November. We have to see how the development goes, and we have to see how we can facilitate and arrange the Iranian government, everything else.

Those of you who attend the Monthly Sessions tomorrow. The Monthly Session tomorrow is another part of the Space and transmutation. (1:14) And it'll be a unique way that we split the session into two. If you do not accumulate for the first part of the session, you'll find out you'll have a problem with the second session, or you'll not understand, or can't catch up with. Because in the first part, we prepare your physicality in different dimension. And then, in the second part, we'll let you to use our system for your physicality. You will know

what I'm talking about, when we go through the session. Tomorrow's session will finish at 5 o'clock, 4, 5 o'clock, promptly. It is not like before, we leave it open. So, please join in at 9 o'clock, and please stay in for a whole session. You cannot leave part way, you will know what I'm talking about, those of you who want to leave half way. Don't forget, you are paying us to test the new technology, and it's our job to tell you, what you can do, what you cannot do, during the test time. This time there is no half way passengers, you sleep, you eat, on board. There is no extension, there is no doing any other ways.

Other point which will come up, as we are signing and we're closing a lot of our productions to go into international way with governments and military. Keshe Foundation next few days announces we are clearing all our stocks, in all facilities and we will try to provide the list. Those of you in China who want to buy the stock, you're quite welcome. Those of you in Europe, you want to buy the stock, you're quite welcome. We have a stock in Arizona which we want to, more or less, sell out. (1:16) There is some stock left in Iran, there is some stock left in what we call Mexico. I don't know how much is left in Mexico, we can ship that. And, those of you who are in electronics and understand system control, Keshe Foundation has about 600,000 US dollar in electronic system control, which sits in Canadian section. These are automatic section systems. If any of you have any knowledge about it, or you can use it, they have for sale. It cannot go to countries like Iran.

Just one second please, I have to answer it.

?? always say, The postman brings the wrong thing. You have, we have these materials for sale in Canada. We paid for it, is a...

<< Mr. Keshe have problems with his audio >> (1:18)

K- ... So, what I'm saying is that we have about 600,000 dollars of electronic systems for control, which are sitting in our stock in Canada. We would like to sell these, if any of you have or know anywhere it can be used, all the data can be provided. At the same time, we have a lot of coils, a lot of (Pain) Pens, a lot of other materials, which are again, part of the stock of the Keshe Foundation, which is coming to an end. So, if any of you like to look at the stocks, which is on the websites and make an offer for a whole lot or part of it. We are prepared to look at and we put in more material which is not, is part of our stock we want to get rid of. (1:20) We have hundreds of kilos of dry Gans's which we would like to sell, can be shipped anywhere. We have a lot of manufacturing material systems, machinery which we would like to sell, any of you would like winders, automatic winders and all sorts of things. Gans manufacturing systems, all sorts. Any of you would like to, or would like to buy those for a training or teaching, we have those all available to clear out, and we try to make a list of it, for those of you who are interested. As Keshe Foundation, as a manufacturer of what we used to do, has finished and we're literally moving to the next steps of the Keshe Foundation development worldwide. That's all I can tell you today, up to now, unless there are some other questions we try to answer. Are you there?

R: Yes, I think I'm probably in shock a little bit there. That's interesting.

K- No, this is part of what we said. Keshe Foundation is moving into a different operation altogether. And we are in that path, we have to. And we are clearing literally the stocks of the all our productions and the stocks of factories, the manufacturing which we set up. (We are) moving, working with governments and military, has literally changed the course, as I said, hopefully next 2 or 3 years, you will see different dimensions on the Keshe Foundation. (1:22)

Q: ... What is the difference between magnetic fields and plasma energy fields?

<< Mr. Keshe have problems with his audio >>

K- ... Magnetic fields are part of the structure of the work of the Universe, it's the same as the others, even the plasma fields. It's just that, what we use it, magnetic fields, is for matter state, and plasma fields is for when we're using, we use the dimension of fields of the Universe. So...

<< Mr. Keshe have problems with his audio >>

K- ... Yes, now we're sorted, I moved into the sound, soundproof area. This is a problem, when we are traveling, we don't have the freedom of our choice. (1:24) We are in the hand of the ?? situations.

And, this is what the Cosmic or whatever is, when we use the term magnetic field, it's when is matter state. And I think, overall in the future, this will be, this will be used to categorize what we are talking. At the moment we say, Earth magnetic fields, and we call, the magnets ?? of magnet. To understand it on the, what we call, ?? cosmetic way, in a bigger expansion of the Universal work. It's a ?? separation we have to make, we know what we are talking about. In this, there is no choice that, to make this clear, that which side we are talking about. When we're talking about plasmatic fields, we're talking about Cosmic Rays, we talk about Universal fields by entities. When we talk about the Earth, the magnet in our hand, we talk, because it's a matter state of, we talk about magnetic fields. But, the magnetic field of the Earth has a Cosmic direct dimension to it as well, which how it position itself, in respect to other matters, in the Solar System, or our Solar System positions itself in its Galaxy. And we're trying to make it very easy to be understood.

Any other question?

Q: ... Can you speak more about the first Gravitational Energy System and how it works? (1:26)

K- Gravitational System is when it's a matter connected to it. In a way, when you have fields which can end up in the manifestation of matter state, we talk about magnetic fields. In the dimension of existing, in a, what we call, Universal condition, we talk about the plasma field. You have Gans's in your hand and you have a magnet on the other hand. When you put a magnet to another magnet, you use, you feel the physical 'pull and push.' Your Gans's are all collected in the glass, you don't feel any push, pull and push, but they all move to position themselves. If the Gans you have is made of Iron, you get the same position, but that's the plasmatic condition field, than the Iron which is magnet in solid matter. In the point of magnets, we talk about magnetic field. In the point of the Gans's, we speak about the plasma fields, or Universal fields, or Cosmic Ray fields. And it's as simple as that. Both have gravitation (G) in respect to, and both have repulsion (M) in respect to. And in some cases, (1:28) they interconnect because they have a common denominator in magnetic field spectrum.

Any other question?

R: We have a request in the chat here from Dolores, but I don't know if you, maybe you should read it and see if you want to... see if you want me to read it or how we want to deal with it. It's a, a health issue and she needs some support with that.

K- Where? ... Yeah, yeah, I see it. We don't answer such a thing, .. no way. No way. Ask her to go through the Wellness Center in Germany to Dr. Kern. This has to be answered through them, not through us here.

R: That's at the health@spaceshipinstitute.org, I believe. That she can write to.

K- If she goes to info@keshe.foundation. And, I think they will forward it to Dr. Kern. or it goes to the German center, either way. (1:30) Send it to info@keshe.foundation and then we send it to one of the doctors to look at it. They respond to it.

Q: ... What about the products that have not yet been delivered?

K- We're completing those. Whatever is ordered, is on order, like the power generators, whatever. They will be delivered, because they're already in the process. These are the products which we made last year, or the years before. Surplus product, we made in thousands, and we are cleaning out. There is a few pieces left, there's some like pillows people ordered. The pillows were stocked in China, we have 1,400 of them. So, in shipment of the goods back from conference, we ship. So, those of you who ordered pillows, now you'll get them in a whack in next few days. And those other bits which were small pieces, all been getting done and completed. The big products, like the energy production, those will be completed as well. But we don't produce anymore these little items, like, you know, the butterflies and that kind of thing. We do not get involved in it, and we fulfill that part, till the governmental side of the work completes itself.

There's evolution in the science, in that we kept a lot of things delayed and delayed. As I shown before, if you look at the size of the UBESUS, we showed two years ago, three years ago, in 2020, (1:32) now we are in 2024, has reduced to a Headset and a Head Unit. And it's the same with the development of other systems, which were now, as we showed, the... we showed in January, what you call it, last, in 2022, 2023, we showed the gas production unit, those big boxes you saw at Linz Exhibition Center, where I showed you with the heavy jacket in the winter. That huge box now fits into a small, small hand carried suitcase. It's a technological development. And, it's taken two years delay, but now we are at that point. The gas production units is now literally fits into a suitcase. As we showed it in Sanya. And this is a big change with the gas energy power generation ?? rates. We'll reduce the same to that kind of sizes in the next few weeks. Then we can put in the market in a very rapid way. Building those big units which we demonstrated is colossal. You see, you would have received, God knows, a big box of. Now, it's just a suitcase, it's a gas production unit.

But, at the same time we have to watch a lot of things from security bits and other things, now that we put these things in the market. You got to understand Keshe Foundation doesn't patent anything. So, we have to structure a lot of national securities around our work from now on, and you'll see that what we're talking about. (1:34) This is ... in a way, accepting, and a lot of work is getting done in the background, I spent a lot of time sorting this thing out. That, the new technology cannot be patented. By the time we patent, get the patent application, which we don't believe in, it's a waste of time. We have to make agreements with the governments, that our technology is kept and is funded back to the Foundation. This is what I'm doing in the background at the moment, in past few months.

And the same goes with the operation in, what we call it, Markray. Which we said how we operate in past few months, and you will see how we reflect back in, what you call, in the company in the coming time. As I said in the Sanya conference, we can explain to you as Knowledge Seekers, the situation about the Markray, because Keshe Foundation is the owner of the stock, I'm the trustee. So, we work as a collectively together and we do that collectively. So, when we discuss something, it's not to affect the market, it's for you as

people who support it to come to where it is, we inform you. Because you are the company, you are the Foundation. And so, in the coming time you will see how we, we channel things through in different ways.

Q: ... Will the Gans related products disappear? And what KF tools we Knowledge Seekers will have left to work with? (1:36)

K- What do you mean tools?

R: He's worried that the tools such as Gans products, or Pain Pens, and so on, all the, all the various tools that are offered through the Keshe Foundation store. What will Knowledge Seekers be left with, if all the tools are gone?

K- ... You have to realize, there'll be around 30, 50,000 new products. In next 2, 3, 4 years, will come out on the back of the Keshe Foundation. Keshe Foundation operation will... it changes in a different way, as we are a shareholder, because we are not the owners, it makes different position for us.

R: Yes, and we understand that some things can't be discussed until they're actually revealed, so...

K- No, the problem is that these are the products which were made by the Keshe Foundation in different ways, but now the Corporation will be involved. I cannot give you much information at this moment, because there are a lot of things entangled in this, (1:38) once we move into cooperation, collaboration. We kept the Keshe Foundation research independent, it will stay independent, we will not share with no government, no shareholding. But, we allow governments to develop, to expand, what is in conjunction with them. We still keep the, what we call, the independence and integrity of the Keshe Foundation as an independent research development company. But, we bring in connection with civilian, military, space, in 3 or 4 nations together. And then there is a bigger structure behind.

And, you will see, we learn by experience. I was just talking to one of our, what I call, one of our closest people to me in Keshe Foundation this morning about this. That we bring in... we relied a lot on Knowledge Seekers and Knowledge Seekers we trusted, they did a lot of good things, they brought some good things, but overall Knowledge Seekers are not business people. Knowledge Seekers are not production people, they are enthusiasts, they understand. But, them in their understanding, it's not complete. So, the structure will be run by experts. Not necessarily, we make Knowledge Seekers out of expert, not bringing Knowledge Seekers to do what they cannot do. We have few Knowledge Seekers who are expert in certain fields, certain things. But, they don't have the expertise of, what you call it, running the structure of the manufacturing and the rest of it. (1:40) We tried to do it, we tried to bring the Knowledge Seekers in Ghana. We saw what happened, same in Italy.

Now we bring in international management. We bring in people, who their target is delivering a new technology worldwide. And have the support of the government, scientific structure. So, as I said, very soon, in next few months, we make an offer to take over the Tesla cars. The Keshe Foundation will reach that point, all Tesla cars will shut down. We are in that position of the structure. Keshe Foundation, as it's International organization, will get an option to Tesla cars in a very, very soon, very, very much sooner than you can think. Because, nobody needs electric cars anymore. The time of electric cars, these huge batteries, to a country like United Kingdom, needs at least 5 factories, to produce batteries, to support only the cars in United Kingdom. Each factory costs about 9 Billion dollars to build. They found the first sites, but they

couldn't complete it, because they couldn't raise 9 billion finance for it. Electric cars are not a reality in the world of, what we call, automotive.

And Keshe Foundation has already developed and is developing further, that in next few months we replace battery cars. That's the evolution in science. So is Keshe Foundation going to sell cars? (1:42) Or we bring in one line by line, international cooperation by change of science and technology. This is not something new which we are going to do. We went to take over General Motors car in Antwerp in 2010, 2011, to bring this car out. Then we couldn't understand how it got... I mean, we understood the King of Belgium went against it, because we didn't give the thing, and we know the whole story. And then we found out, actually, the mole of the Belgian government (ex-wife) was sleeping in the same bed as us. They knew before us, how they going to assassinate us.

So, this time we are not going that way. We give International Governments time to adjust. All these battery factories which are getting lined up, all these charging stations which are getting lined up, for electric cars, are obsolete. And for us not to be in danger, we have set it up in a way it goes to governments. And different governments. So, those of you who talk about what's going to happen to products of the Keshe Foundation, this is where we're going. This is where the situation will go. Very soon, gas business for gas production, cooking in the house and everything, will change. Maybe 2 to 5 years. Then, what happens to all the other bits which are involved in it? To gas, whatever, production nations like Iran and Qatar and the rest of it? (1:44) How fast the government go to it?

So, yes we are finishing with, yes we are opening a new dimension. One of the first organization which will be hit by this new development in technology, is Tesla cars, is electric cars, not just Tesla. But, it keeps the old tradition going, car, automotive cars stays. No engine, no batteries, and nothing else. So, yes we are finishing with bits with it. Any of you have any products from Keshe Foundation, keep it, it's historical. We go into transportation, we go into what we call, whatever you call today, transportation, aircraft and the rest of it.

So, new products, is not what is going to come, just keep your ear open, into what Keshe Foundation will announce in next few weeks and months. We are not sitting back, but we are not releasing anything out till we sort ourselves inside, completely. So, where does Keshe Foundation goes? There will not be, maybe in 10 years from now, that you don't go shopping on the Internet, in the supermarket, on the high street, that somehow, somewhere, (1:46) your life, your what you buy, is not touched by what this technology will come.

The game has changed in past few weeks. And we're not talking out of arrogance, we're talking out of hard work, delivering, and we showed what is to come. And in Iran we'll show more of. And you Knowledge Seekers, you've been with us, the sessions of tomorrow is part of that. We are perfecting the art, we are perfecting the technology. And this time, we bring professionals, we bring experts, we bring governments in partnership, and (if) they don't want to, we'll find there is so many others who are at the moment in the market, in the pot.

But, what am I... to bring, to show the technology has to be there to change. And, we show, we will show the end of the automotive with batteries, fuel and the rest. Europe has accepted, by 2030, 2035, there cannot be no cars produced in Europe, which has a fuel engine. So, we are going through that transition, with fuel engine cars in about 10, 20 years, the rest of the world will be obsolete. The transition is to the battery cars. But, battery cars have more problem than the fuel cars. So, to go through the pain of the completion to

battery car, we introduce a new technology for cars, which has no need for battery, has no need for engines, and literally, is what the future is. (1:48)

I don't give electric cars more than two years life. You buy the luxury of a car, but you all have the same process. All you need to do, take out your shock absorbers out of your car, place the new reactors, a new control system, take your cam shaft out, take your transmission shaft out, take your fuel tank out, take your, whatever you call, gearbox out. Because it's not needed anymore. And, most probably, third world nations will benefit by this, faster than Europeans and Americans. The cost should not be maximum 500 dollars. You can fit it in a cardboard box and make a transport system out of it. Technology is there. Two years.

So are we going to new products with us? No, we just go for a different dimensions. This is one of our plans. We'll go for Tesla car, because it's a symbol of. It's already there to strip it. This car was in a structure shown to be shown on 26th of December of 2011 in what you call it, in Holland. Which, what we call, the Belgians thought they are very clever. (1:50) They thought they stopped it, but there was ?? they stopped it. Some 12, 13 years later, this car will come out. But, and you will see it, and you understand why. Tesla cars and electric cars are obsolete. This is gone. This you see, fuel tank, all down the knees, transmission, is in the boot of the car, is in the back of the car. The center point here is where you receive the new control system, you put it on the ceiling of it. This as you see, is just where your car mechanics, your understand, where still sit your shock absorbers. This is where the new reactors will drop in, to replace the shock absorbers. And, this is underneath of the car, this is where the transmission pipe is. It's not there anymore, because it's not needed. And, this is where the engine was. You've all seen these pictures before.

It's how much more of this room, which you put an engine, you bring forward. more space in the cars or we make smaller cars, very compact system. So car prices will drop drastically, by at least 80%. When, you paid 50,000 with all the luxury things in it. You should buy it for less than 5 or 10,000 dollars now. (1:52) Brand new from the factory. This is what we set up in 2011. When we were given the factory in Antwerp by General Motors. And we received the support from the German government to the tune of 500 million to set up the factory complete. That time we had two big enemies inside the Foundation, one is dead (Red Circle) and one is gone. So, it's inevitable, the new technologies will come in.

What you felt in the room, some of you, some people say, "Oh, I went in the room, nothing happened." We had people in the room that they went through all changes and shakes. We had to bring them out and the rest of it, nothing happened. Of course, you go in there, soon nothing happened, because then you say, "I was there, nothing happened." Because you set up for nothing to happen. Because the sooner we ?? adapt, then everything happens to everyone.

Those of you who have ordered and bought the new material, you'll start receiving in next week, two weeks gradually, as the production has started. And then we, you know what to do with it, how to handle it. Then you understand the change is coming. It's the same as those of you who bought Communication Unit, and you bought UBESUS Units. Communications are nothing to do with it, because they are not connected to the system. They are communication systems, and they are connected to each other. (1:54) You have to learn how to work it, and how to connect it. It's not a satellite, it doesn't need frequency changes. These things don't exist, those are matter state. You have to learn how to connect, and we're trying to teach you how to connect to your, what you call it, Cosmic Ray Bundle Communication Systems. In a very short time, we start... Now, once the number increases, we start teaching how to use it. They cannot be used for UBESUS, UBESUS Units are totally different structure of work. This is communication, UBESUS are for different purpose. They are for Wellness Centers. It is a different structure.

When we go like into this motor industry, the effect will be huge. We're in the game to change and we started the game to change.

Any other question?

R: It's nice being reminded of those pictures Mr. Keshe, I haven't seen them for quite a while.

K- Now they're back, now it's a reality. We are working on it. It's the same with the Power Units, the new Power Units is on the development, it's just that the more research we are putting in, the more advanced we are getting, the more easier knowledge technologies become. And we don't show it in public, we don't need to show it in public. (1:56) We had one of the best thing, as I said in past few months, one of the best thing happened to Keshe Foundation, was the loss of millions. We were planning to raise funds to open factories and do this and that, and the expansion plan was on. And with this fraud on us, with this fraud on us, we went back in, ?? so expanding, we went into development. And we just went up, massive. And all the changes, ?? that were going to take 10 or 20 years, now it's here. Why should we wait? And it changed the course for us. Nothing. I mean, we suffered a lot. Some of you Knowledge Seekers supported us a lot to get out of it and... or get in it, but it wasn't meant to be. But now the result of it is what is on the table and we showed, what is coming up.

It brought us back to the root of what we are, research development in Space Technology in... But now we become supply of technology in a way, (in) the old licensing way, but we are licensing to governments. And we give it to all the governments, not one or two. We'll ask for a percentage of GDP in the long term. Because we will affect the GDP of the nations. It's a long plan, but maybe in 10 years, 20 years, Keshe Foundation receives funds through its work. No licensing, no patent, but collective agreement through support development of new technologies across the world.

You'll understand how it takes shape in time to come. We have put in our coins in position, on the banking side. We have put the Universal Banking side with the new materials. We told you, don't sell and don't open these, keep it, it has a huge value. (1:58) It'll gain new values, and it's like a Bitcoins. These will have huge values for those of you who understand. And at the same time, goes back to the next steps of what we call, Universal Health, Universal Feeding. And part of these trials are with you tomorrow. You'll understand what is set for tomorrow. And then the following month is another extension again to our research and development.

So we are not going to run out of products. We are just changing. Instead of being a producer, we'll leave the production to the others. We let market decide on how much they would like to pay for the knowledge. And that money will be spent back on you lot to create more knowledge of Universe.

Any other question?

Q: ... (2:00) And yeah, wow, that's quite a monologue to follow, Mr. Keshe. That was something and I'd certainly love to put my hands up for any of the CO2 sequestration technology that's available, because for me that seems like something that is immediate and needed in society with the new Arctic methane leaks. And I just sort of wanted, you know, I've got a million questions, but I just want to ask, it seems like the most scientifically proven aspect of the Keshe Technology, but why haven't we been able to gain any traction on that from an international perspective during this point in time?

K- We have, but the way we set out to do the CO2 and open up CO2 absorption and the rest of it has become obsolete. A year ago even, two years ago, we set out to build these, what you call it, parking lots in the cities, to absorb, to extract CO2. In places like Tehran, the Keshe Foundation Iran received orders from the government, 5 ministers, or vice ministers, cabinet ministers, turned up at the factory of the Keshe Foundation in Iran, last year, to push this through. (2:02)

And we have moved in technology in a way that, we got two choices. Extract the CO2, and then use it as a Gans. Or with the new technology, convert the CO2 in air, directly into food. Directly into protein. We don't need to make these huge Gans plants absorbing CO2 anymore. And we have shown that in, what you call it, before, in a very simple way, which making Gans's, extracting Gans's and Gans production to the work we do, with the knowledge we have today, is obsolete. It's too much hard work.

And so, this is the reason, as I said, government don't take it up because those who understood it, they want money for it, to do it, and those who tried to push it forward, never understood. We set up a huge factory in China, ?? 17,000 square meter. And because of all the things which happened around us, it was closed down. But it was a beautiful thing, because now we have moved the technology not into converting to CO2, with converting it directly to food and energy, is much cheaper, much affordable. And you can feed the whole nation with it instantaneously. And this is one of the things which we will advocate in our work with the government. (2:04) It is the creation of CO2 and what we've done, we've shown, is obsolete. Why do we, why should we do it?

Don't forget the creation of CO2 in Earth's atmosphere was backbone of creation of life. We've made so much of it, why do we need to bring it down to Earth and then change it back into food or whatever. So as I said, this gap of Corona and what happened to the Keshe Foundation with the massive fraud on us was a blessing. Now we can convert the CO2 over a city in a very simple way. A fraction of the cost of before, the citizens of the city get fed, the plants of the city get fed, the animals of the city get fed. I reckon feeding... but at the same time, you have to understand, if we go too much into it, we deplete so much of it rapidly, we create new diseases. But cities like Tehran, which has huge populations, is like New York, which have a lot of people on the streets, children going to sleep hungry. Now the knowledge is there that we can directly convert in air, into protein. We've shown it, it's not a theory. And it costs a few hundred thousand. And you feed on the run. (2:06) You produce the protein on the run.

You want to produce high quality rice, you do it on the top of the farm. You feed the protein directly into the plant. So why wasn't it taken? We went that way. We went to build our factories. And what happened was a blessing. When I look at the Keshe Foundation sitting here, after all the pain I aged 10 to 20 years in past two years with all the mayhem which was created by this fraud around us, and we thought, oh, it's a trick or whatever. It allowed us to concentrate, to centralize our research, to get rid of all the, what we call, 'bits hanging around,' and bring a new dimension, and work with the Keshe Foundation, which you and your generation will benefit by it.

When you see these pictures, if you understand what it means, that's a conversion of CO2 in the room into protein. That's protein. That's the food. We showed this for the first time in the grains in inner Mongolia, 5 years ago, how the environment was changed and the protein in the wheat reached 20%, which is the highest ever. Now we can show how we've done it. How, where the protein came from.

So, is this the end of? Or is it the next step of development in this as well? (2:08) Which I think it is. I can see a lot of developments from production of protein. But again, creation of CO₂, appearing of the appearance of the CO₂ was the backbone of creation of life on this planet. Now we create life with that, that protein is life, is living. So, don't worry about what happened, where it's going. It's going exactly where it should go. Every time we went wrong, while trying to become manufacturers, and those who are protecting the technology above us, they put the track right and created a new dimension for it.

Q: Sounds good.

K- This test was done in... It's not 'sounds good.' It is good, because we have shown what we can do. And now it's cheaper to produce protein than actually produce Gans's.

Q: Oh! Really?

K- Yeah.

Q: So it's \$5 to produce Gans's and you're saying proteins are even cheaper?

K- 5 cents.

Q: Wow, okay. Well I love seeing all these pictures you pull out and put on screen, but I hope, you know, as we move into what seems like a quantum leap in the technology, we can see more video and the interaction of the fields in play on screen. And I just wonder, Mr. Keshe, whether I could take you through a little thing that takes five seconds, but can last for 10 minutes. And I wonder if anyone who has a bottle of Gans next to them or nearby could go and pick it up, (2:10) and hold it in their palm and the second hand on the neck of the bottle and twist it anti-clockwise. And I reckon we need to have a competition on Gans tweaking. How long can you tweak the Gans and see it turn around in the bottle? You made a statement earlier in the session that we can, you know, you only need a few milligrams of Gans to create incredible amounts of energy. Well, watching some Gans float in a bottle as the Sun sets looking out on a beautiful horizon, I must say, is incredible. And when I twisted it tonight, it's one of my daily practices, I noticed that I finally put a stopwatch on. I noticed that I could spin the Gans for about three or four minutes and the larger particles would start to settle down. And then after that, I sort of, with my poor eyesight, I squinted and saw that there were actually Nano particles in the water that were still spinning for up to 10 minutes later. And this is from a 5 second twist, like, you know, a 180 degree twist of the bottle. And I just wonder, how long have you been able to keep Gans particles floating in the water for?

K- It depends on the Gans. CH₃ most probably take about a day. CO₂ pretty rapidly, Copper will go down much rapid, (2:12) but CH₃ will last a long time. Hydrogen and, what you call it, Deuterium, Deuterium sits fast, but I think CH₃ and all the CH combination, or Carbon combination, will last a long, long time. Maybe CH₃, that's maybe an hour or two.

Q: Wow, that's amazing. And then you talked about magnets before and putting them next to each other and putting two Gans bottles right next to each other. They get a little shaky when you get about five millimeters apart from each bottle. And I have always wondered what's, how could, you know, I took an amazing photo of some CH₃ from above and it looked like a snowflake and I just wonder what Gans's react really well next to each other and show the fields reacting in time. And you know, I'm perhaps from today's sort of adventure

I was thinking maybe I need to be looking at the smaller Nano particles for those reactions rather than the big, biggest sort of Gans flakes?

K- It all depends, it all depends. I produce, like all of you, Gans's which never settle down. I have produced Gans's for health application for myself, which I carry around the world with me. They never settle down, because they're tuned to my energy. I produce Gans's totally different than you lot. (2:14) There's technique to it. And which has effect on me. I can give the same Gans to you with the same problem and you say, "it does nothing to you." But to me, that's exactly what it's supposed to. It's built that way. And I carry wallets with me of Gans for different applications. Months and months they never settle, at all. Because they are made by Cosmic condition. You can suspend the material.

There's something you better understand. If you look at the structure of the Universe, if you look at the structure of the galaxies, if you look at the structure of the Solar Systems. You never see any of them falling to the bottom of the galaxy, do you? You never see any of the galaxies falling to the bottom of the Earth, or Universe, you understand? So, there is a dynamic flow, and they're all flowing. If you look at a bigger scale, you see it, what's happening, that jar of Gans's, you hold. You see clusters which react together, you see clusters which move together. And you see, in one Gans bottle, if you mix a few Gans's, which doesn't take over everything, but you can separately see it. I've shown it in the book number 3, you see layers of Gans's, you see this. When you have Gans's settled to the bottom, it means they have a field, common denominator with the gravity of the Earth.

When you make Gans's which never settle, I can take a picture of one now and show you. (2:16) This means you work with the Cosmic Rays, they are like Galaxies. I carry two, three bottles like this with me.

Q: I bet.

K- I can show you exactly, it's about few meters away from me. These Gans's never settle, but they carry specific dimensions and properties that I built it for me. I told, we put 5% of the knowledge, even not that, into public domain. People are not ready to understand what this technology can do. Scientists, world leaders don't understand, but in time will come and you'll get them ?? . We haven't come here to open shop for a few days and close it and go. We come here to do a change for life of this planet.

So, you can make Gans's that will use what we call, Universal field forces, what we call, Cosmic Rays, which gives you what you need from them. And I produce them when I need them for myself and I carry them because I'm not always in one place to do what I'm making, to do whatever, when I need it, it is there. And they never settle. Never ever, and it's full of Gans's, not just a bit of Gans's, but full, they're stack on top of each other.

K- So do you want me to test it, how long it takes for us to settle?

Q: Yeah, well God, that would be a great...

K- If I do not ?? with your bottle, I'll be there the whole lifetime, watching it settling, it won't settle.

Q: Wow, I'll have to keep working towards that, but I...

K- Cosmic Rays Gans's... (2:18) If you make Gans's, understanding the work of Cosmic Rays, Cosmic Fields, and how they lead to creation, you can make Gans's, which they do things the world of science today say is impossible. Carry on.

Q: Just quickly, as the Gans settles, as I hold it in my palm after twisting it, I find that, you know, often you give people some Gans and they can't connect with it. and it takes that quantum connection to believe in it, to give to it, for it to work.

K- No, no, no, you're wrong. I have to come in here.

You give Gans's to some people, they connect. We put people in system, they don't connect. Yeah? Because it is two reasons. Firstly, emotionally, they don't accept. Secondly, the field strength in that material, is not (at) the strength of theirs.

Q: Yeah, that's right.

K- We're doing a test now, we're doing a test today. Ongoing, since Beijing, what you call it, Sanya Conference. This was deliberate testing, and I'm testing it because I had to confirm certain things on the design point of view. And the people involved, they don't feel anything with it. The people who have used it, has changed their life.

We monitored people who, in, what you call it, in Sanya Conference, using the system. (2:20) What happened to who when they came in the room, if anything was, what they tell you later on, what they felt, there were systems on the other room, they did. And there is a reason. In a way, we're testing something now, tomorrow will be part of, another part of the same understanding is, that, you are, by nature, violent. And your violence can lead to a lot of harm to the other people, or to yourself. How, with the new technology, I handle this? Because of your violence, you have set a different standard in your energy field. How do I get to you? Does not matter what condition of emotion you create. You set yourself to have a cancer. How can I overwrite or how can I bring it in to, for you to think about, if you want a cancer you can have it, you can even die of it. There is no difference between a cancer death and MS, or others. You watch what happened to them. ?? .. ??, no energy, paralyzed, always the same characteristics of the cancer and the other people who died with MS and the rest.

So, we have to find in a new technology, a concept of choice. (2:22) I choose not to. I choose to be violent, but to myself, but as long as I don't damage myself physically, and I don't damage other people. How can we through this technology, change violence? How do we change those who are getting together and hungry for control? These are the tests which are going on and you can do.

And those of you who say, "The Gans's doesn't make anything to me." You have to find out how you made that Gans. I hold the Gans in my hand, I can taste it in my mouth. When I hold CH₃ in my mouth, I get that sweetness taste. When I carry CO₂, it's the same. When you carry Zn, I carry Zn in my hand, I feel the calmness in the body. I love it, "Oh, it's nothing, it's just there." If you don't connect, always go in the back room where you made it, add a few drops of Amino Acid into your Gans's. You washed it too well, it has no human connection, it's just the fields. You need to give it a direction.

You Knowledge Seekers, wash your Gans's so good, that in a way you take all the meat off the bone, and you just put the bone on the table to eat. You need to give it direction of connection, even with yourself.

(2:24) Always, when you make anything that is connected to life, animal, plants, yourself, any being, you need to create a line of connection which is to them, to their Amino Acid. Now you know why some people don't feel it, and you feel it. Because you touch the Amino Acid when you clean it. You already have the connection, it stays. Now you understand why?

Q: Beautiful, thank you Mr. Keshe.

K- Thank you very much. Try to understand the logic of the connection. Understand how an Amino Acid works, and why it's created. And repeat the structure in everything you do. You still, or you always, get what you want. Doesn't matter if you feed it to a plant, doesn't matter if you feed it to an animal, doesn't matter, you feed it to yourself. Otherwise, it's what they say, it's a box of complex, which the Copper has more vitamins and energy than the complex inside it. Thank you very much.

Thank you indeed. Any other point?

Q: ... Mr. Keshe, thank you again for your teaching of today. (2:26) My question is, does the Soul of the Sun's energy step down into Earth's Soul, and then into man's Soul, and down into animal, vegetable and mineral Souls? Is this the way it works?

K- You call it a Soul, I call it a common denominator. And that Soul of the Sun is connected to the Soul of the Galaxy, which is connected to the Soul of the Universe, which is all connected to the Soul of the Unicose, which is connected to the Soul of the Creator. So, you know that old children's song? It says, knee bones connected to the... what you call it?

R: Hip bones?

K- No, thigh bone is (connected to the hip) bone, and it goes up. It's all connected to each other.

R: I think he's alluding to like a step down transformer. The Sun's energy steps down into the Earth's Soul.

K- No, it doesn't step down. It doesn't step down. It doesn't step down. You always have to remember the law of plasma. Always smaller amount, the smaller amount carries lesser energy, and so the bigger tries to give to the smaller to grow, as to be. But there is a factor of gravity included in it. That in giving it, it gives a connection not to lose it. In feeding it, it ?? put it back itself. It's a 'phoenix' effect. (2:28) So, birth is created out of the fields of the Sun, so it's connected to this itself, it's the mother. And the umbilical cord never breaks. The Sun never lets us go out of Solar System into Space. It keeps it without the umbilical cord, or magnetic field of it, connected. And it feeds us through it. But in a way, it's a weakened state, less of. So the same, the less of, the same, the lesser. But it all has one common denominator.

Any other question?

Q: ... Hello Mr. Keshe and to all Knowledge Seekers. Since the Christmas meeting I've been able to walk through the doors to my Soul. However, I have only ever seen bright white light. That has changed since Sanya. Today I see a beautiful bluish light in one corner. Can you explain to us what the colors are all about?

K- Can you repeat that again, please?

R: He says, "Since the Christmas meeting I've been able to walk through the doors to my Soul. However, I have only ever seen bright white light. That has changed since Sanya. Today I see a beautiful bluish light in one corner. Can you explain to us what the colors are all about?" (2:30)

K- Colors, I'll go back to the teaching of years and years ago. That when we meet in Space with other plasmas, the color, the field, as we look at it in the vision of the man color, it'll give us the indication of what is our position. Is it love, is it separation, if it's distancing, is it... or whatsoever it is. You call it the aura. And you have to understand the aura of the plasma, which is partially in the body of the man, in the physical dimension, the skin creates that separation.

Any other question?

Q: ... How much time it should take to deliver the Cosmic Ray materials?

K- It's in production, this... it goes by the queuing, our people keep a queue. ... It depends, we're still getting orders for it, because there are people who have, want to use, understand different use of it. Maybe maximum, 4, 5, 6 weeks, depends as the orders come. These we're trying, one of our problem with this Cosmic material is now, we asked our team in China to find us small crystal bottles, that it can be sealed in, that stays and you can use it as a three dimensional, (2:32) otherwise we have to ship it to you as a, what you call it, as a sealed, like tubes, and all these have a number, serial number. They have a value, hold on to it, don't just get there and just get into it, and see what you can do with it, it gains value. Is a, what I call, currency you need to become Passenger of Universe, you'll understand in the coming time what it means. It is not there for play, to open it or whatever. Don't ever touch this, we seal it. If you open it and break the seal, has no value to it. Because there's other things we can tell you what to do with.

Q: ... How do we position in our Space a non-dimensional free plasma? And he also mentions, "What happens when you mark a Ray?"

R: ... So, I guess he's asking about the non-dimensional free plasma. You've talked about the idea of reactors being a container, and now the new concept is to not have a container. How do we contain that free plasma? Or how do we work with it on a non-dimensional free plasma in Space?

K- What do they call it? (2:34) What do they call it in the modern economical language? This is a trade secret. We will not release it. You know what I'm saying?

R: Trade secret.

K- We will not show this. You're too immature. Man is too immature to get his hands on such a technology. Too immature.

R: Yes, if you look at all the headlines in the world news these days, it seems pretty obvious that we've got a ways to go.

K- Any other question?

Q: ... What will happen if, at a customs, because many countries, they want to know what's coming in a vial or whatever. If they open that and they start sniffing it and touching it, because they want to know what it is. Because they think it's drugs or whatever.

K- Oh, we cross that when we come to it, don't worry.

Q: Because that'll create havoc.

K- We'll come into it. Secondly, we use different methods of transportation. We have to find a number for it. We'll find a way. KF always find a way. (2:36) We shipped hundreds of kilos of Gans's dry. If you open it, it looks like cocaine. They tested everything. They don't understand what it is.

Q: Yeah, I had an experience with some small bottles of aromatherapy. And it took me three weeks to get the product out of the customs.

K- I get stopped sometimes. I sometimes get the stopped in the... You know, I carry sometimes liters of these things with me in suitcases, packages, and they do the test on radiation, and everything, it is clear. But what is it? I said, this is a plasma. What is it used for? It's a Space Technology. Who are you? I say, I'm a nuclear physicist. Oh, it's, pack it in, and you go. Every time, it happens to me, every one out of the three, if they get down, they want to know what it is. And there is no...

Q: They wanted a bite of it?

K- No. They can eat it, I open it, and usually put it on my hands ...

Q: Bite is ... don't they want some dough (money)?

K- No, it's just the way things are, we don't get into these things. I've learned this from years of working in the stones (jewels). I used to carry stones in my pocket, in, you know, the traditional way we used to carry, and many time in customs, (2:38) they stop you, "What are you carrying?" You tell them, you open the wallet, if one goes missing, you pay for it, 20,000, 30,000, just tell us what it is. You know what it is. Do you have documents for it? Of course, we own it. And it's what it is, all you can go through. There's a rule in the world of customs. If it doesn't show what we know, it cannot be any harm. And this is the way they work. They tested it on nuclear, they tested it on drugs. So it's a natural water. So they let it go through.

Shall we call it the day?

R: Ok, sure.

K- ... Think about if any of you want to sell any of these products of Keshe Foundation, or you want a package of it, make us an offer, or ?? we're not giving it away, because it always has value somewhere. And we are clearing all our factories and resources around the world. Or if you know what you want from it, you get in touch with us at Keshe Foundation, or directly to the factories and see what we can help with. (2:40) Thank you very much indeed, and see you next week.
