But it took me time to set it out, because it was woven into my life in a way I could never imagine. Because when you're in love you don't see what the lover does to you. And you accept everything, because that love is so important. Till your eyes open up and you see why all these things happening around me. And as you know I made it very, very clear, especially recently when you talk about the child abuse, when you talk about the child trafficking. The woman next to me for years, you thought she is, and now I see around, is coming from the most notorious pedophile organization families in Belgium. Notorious. She was brought up in it, as she brought other children into it. She trained her son to abuse her siblings. And it was all okay. Her brother rapes young boys frequently. (2:34). And the police ?? find the hand of an arm. All was hidden from me. And how we got involved all these pedophiles around us. Red Circle, Sterling and the rest. All brought in by her. To them it's normal.

Go to the village she comes from. They opened a pub called, "Charlie's Pub," and they trafficked children when the police raided in 1970s. She was put in custodial sentencing for bringing children and other children under this. When she comes into organizations she sells our server names, and (IP) numbers and people who come in. Two characters. I couldn't live with myself, it took me two years to get rid of this rot in the structure of the Keshe Foundation. And then they linked up with another well known pedophile. You know as Jackie. He had to flee from Switzerland to Denmark for the police not to get, the same as her brother did. Escaping from Belgium to Thailand from the police.

They bring their own people inside. When you're put into custodial sentencing in juvenile at the age of 13, you've got to be "well up in it." You've got to be well up in it. Just go to the village of ?? Erheim, find out about this family in Belgium. The whole family has been into prison for child trafficking, for child abuse.

(2:36). People from South America being found in the premises abusing children and sentenced and deported.

I had to face this, and for it, find a solution for it. Then they said, we were victim. Victim, yes, but why your son. You told your son to abuse her two siblings, that the father bans the child from coming ever to the house. When it's presented to us in a different way we don't look at it, but when we sit out and we look at it, then we understand the truth. The woman next to me comes from the most notorious pedophile organization in the hands of the Belgian government together. Because she her thing, they used her to infiltrate and they brought people in with her. And she claims I'm innocent. Going to prison, sentenced into prison for being part of the biggest criminal organization thieving in Belgium. Sentenced with the ex-husband together.

A lot was covered up in different ways we couldn't see. Ask where is Jackie. He is in Denmark, because police office of Switzerland are after him. Because linked up with my ex, and they were watching what's happening. That's why Keshe Foundation became so... We saw one pedophile after another. Because the "head of the snake" was sitting next to me. At age of 13 sentenced into juvenile prisons, (2:38). for being part of the most notorious pedophile family in Flanders. Just go, find newspapers, courts, police station. We don't tell lies. But they see it as their right, and we don't understand it.

I always looked at how we can escape these people, how we can release people from this pain. Now with this new technology we can. You teach children that they can from childhood. That's why we said, we are bringing a child teaching, how to elevate your Soul that nobody can traffic your physicality. It'll come an end to it. A lot of you thought I just moved on. It took me two years from the Italian conference, second conference when I found out what's happening around me. I set up without damaging the Foundation to get rid of this snake. I can talk about it because the court case is finished. The whole structure is set up to deceive, and we are not.

And it's no use finding how to, not to traffic. It's to start educating the children how to use their Souls, for the physicality not to be trafficked. How come we can send Man to the Moon? How can so many of you went to the Moon, how come you bring people home ?? stay here, they can see ?? Why can't we do that with our children to teach them from childhood. With this technology I bring an end into child trafficking, human trafficking. Just give them a pair of mobile phone. (2:40).

When I realized after the Italian conference, when the "head of the snake" disappeared into another part of Europe for days. And then we found out. Yes, it was connection. But the Interpol informed me that, the two snakes have met. They brought me to education of the Keshe Foundation. They brought them as people who, what was it, "free energy." Sterling used us to get marks, and I was wondering how come these people always come to us. Now it's clear. The woman from childhood being in one of the most notorious family of pedophiles, bringing customers from South America and everywhere to "Charlie's Pub." Go and check, go and talk to the people, you'll find out. When one raided, the father, the mother, the brothers, everyone went to this part of the structure went to prison. And the girl who was bringing children was sent to custodial juvenile court, what you call, center.

The woman next to me for years, you thought she's such a thing it is. And then they thought that they can take over the Keshe Foundation and then they would have all your IP's. We never allowed IP's, anything to leak out. Thanks to God, we saved you all. But that's all they are after. You come in make a chat. Anyone woman associated with me, if you look, has a daughter. They were after that child. You associate yourself with that woman you clearly are where you are. Go to village of ?? Severhiem, ask for Charlie's Pub, which

was there. And ask for the family how they all been sentenced. Uncles are still under "sexual control" (by police) 40 years on, 50 years on. (2:42).

With this technology we have a chance to bring an end to it. This is why I said in June we start teaching children, that nobody can touch your child. The child knows how he can use the energy fields. It's like a 999 (911) you send to save emergency. We set up a structure that children can move the Soul to another position that physically cannot be abused over the adults. Why should the man beat you to death, because he is who? You can move yourself through the Soul (just dial, ?? try to) Just connect to them and move.

You cannot understand the implication of this technology yet. With the drug trafficking it's the same. I was talking to one of our most beautiful Knowledge Seekers, he is in the heart of drug trafficking area. He says, Mr. Keshe my family doesn't, we don't do, we don't need to. And funny enough, another member of the Keshe Foundation is notoriously came to Keshe Foundation, because he used the Foundation for trafficking. We just found out recently. We sort these things out. But all this needs a new technology, a new understanding, not escaping and calling somebody will rescue you. How do I rescue myself.

If we turn, if we teach our children from a young age, that there is a way that nobody can touch you, physically abuse you, (2:44). you can move yourself through the technology which is there. I gave this, I gave a gift of "Cup number 1 and 2" to the Chinese government during the Corona. This transportation of the Soul, freeing man from position it is to brings peace. It's another gift which are given to the Chinese government for the worldwide use.

And for 30 years, I came. I was locked in the brainwash that this is their life, nothing to do with me. I hear things, but it wasn't there. It was what you call it, "caked up, creamed up," that it didn't look. When we started looking into it, it's horrendous. The lady next to me. You go and check, we gave you names. You have, we are in touch with. Your mobile phone, your thing is sold till the time it comes when it's time to hit you, they hit you. She's notorious pedophile, covered under the name of Keshe Foundation and stood next to me for years. I didn't know this, if I knew... When Interpol gave me data in Switzerland my head went through dizziness.

Boy age of eight, was taught by the woman how sexually abuse his two siblings from another woman, two girls. You don't do that to your enemies. And you know I'm right. Many of you read. She said, she wrote that, (2:46). Mr. Keshe put my son on a pillow for a week. Yes, I did. Because I was told the boy did something wrong, and he accepted. And it wasn't, he didn't do it. I said to the boy, sit there till you find out you don't accept what you haven't done. And I found out later on from the mother that he did. This is how the ?? pain, the truth and the fact. Boy age of eight, trying to rape girls of five and four. Taught by the mother. And this is a woman who was next to me. I did not know. Keep away from this woman for miles. Go to the police station of ?? Severhiem , in West Flanders, and ask for the file, they say, the file is here. And the children are in the list.

And anybody who ever talked to go after she accused of being a gay, pedophile, having sexual relationship with it and that. And people all walked away out of fear. And she did what she liked. She accused everybody of being gay, or pedophile, or having connection with other men and whatever. Because this way she could silence them. What I tell you is in documents of the court in Austria, you can ask for it.

When you talk about pedophile, child abuse, child trafficking, this is what I said. From June on we teach parents with the mothers and the fathers with their children, how to be able to move, that nobody can abuse

you. Bullying, sexual abuse, physical abuse. (2:48). It's not, I'm here one second, I'm not there next. I'm not there at all for you to abuse. Why should a woman get beaten to death? You call woman refuge centers. No, you move through your Soul, your physicality. This technology is complete towards that point.

She never made any friendship with any family, anybody I was connected to, that did not have a daughter in it. She wrote about Ella, Emilie, or Eliya Kostova. Look at them they all have daughters, young daughters she could abuse. They are ruthless. To them, the body is abuse, ?? move, money making. And as they're the head, they never get their hands dirty, they have the others do it for them.

Now we have the knowledge, we have a technology to move. To move the Soul of the children, and with it their physicality, that they cannot be abused. When you talk about child trafficking and child abuse. This technology, this knowledge is for humanity and it's free. Completed, we learn from it, from the food. Now we learn the freedom in the coming time. (2:50).

I spoke about Thailand (Korea) last week, everyday a woman or a man dies in what we call, common household by abuse. Why should be? The beauty of it is, when you don't let abuse, a husband cannot kill a wife, then the children have the mother and father, at least they are alike, they can live with each other. Somehow the parents are there. You don't put one person in prison for life for murdering a husband or a wife and the rest of it.

When there is no child to abuse, where is the trafficking? When we all have food to eat, when we can complete this cycle, do we need people to come from China to go on the what you call, "Blackpool side" of the ?? South port side of the England that every few years we get so many of them drowned by the water, just picking up some muscles and cockles to be able to live, to live somewhere free. This technology will give us that solution, for us all to be free. And we teach our children. Teach our children how to move, how to be able to move the Soul, that the physicality does not get trapped in it. Then there is no abusers.

But the most interesting is, (2:52). these people with devious mind, what they find next? Who's next? I hear the same lady now is starting other people Chat show, ladies watch where your children and grandchildren will Chat into in the background. The bosses never dirty their hands.

You've got to understand, the new technology, the new cycle of energy and knowledge has to be good for every being on this planet. The dog, the child, a man, a woman, a tree. If we give you food and you do not go hungry, how many trees (plants) as a vegetarians, you have saved not to slaughter? Then you understand how much the change has to be fundamental. How much the change has to be real. And how much we are responsible to bring that change in. (2:54).

Now the technology is there, the communication line is there. It's hundred, thousands of you listening to this now, live. Every corner of this planet, every religion is here, Muslim, Christian, Jews, Buddhists, you're all here. As knowledge has no limitation. Because you gain the knowledge, you teach the knowledge. And this knowledge, the way we teach it gradually step by step you see this statistic to prove you've been there, you're part of it. You pay 300 Euro to be there. Tomorrow is your right to be there to change the world leaders. Not just somebody will go and do it for me. Then what about you? What about your school of thought? Then we see the change.

Then we see the next step to development. And whenever we solve a problem, we have to put a solution for it. We are giving a solution for food, for space to the Chinese, at least 50 years ahead of Americans, at least.

But putting that, creating condition has to have a benefit for it. The Chinese to be on the Moon, to be on the Moon, at the moment is the best thing for (them), it shows advancement in technology. When another piece of a nail shipped from Earth, to the Moon to produce. I have not even taught you. Go into the ?? tents, (2:56). and read.

We haven't even showed you how to create structures, buildings without the bricks or water, with fields. You think you're going to make a building of bricks and clay on the Moon or on Mars? Or do you need to take all produce Copper and Zinc and whatever? I still got to teach you how to make walls, partitions, floors, buildings without a single brick. Remember, every brick is made of an atom and every atom is a plasma. And now you know how to make the plasma. How you cut the field, how you create. This is part of the teaching I told you about the radiation. How do you cut two rays that you have a children room, you have a mommy's room, you have an entertainment room. Not a single brick. It's in the patent. And I'm teaching you a step by step what is in the patent, what is next.

Chinese will not carry a single brick, they built. If you go to Almaty in Kazakhstan, it used to be the capital. In the Central Park of Almaty there is a Japanese structure, and they're very proud of it. And in this structure, there is not a single nail. It's a beautiful structure. Japanese are experts in it. It's an origami of wood. Chinese will build cities not a single screw, not a single hospital, not a single prison. (2:58). No policeman on the street.

I said, you show a step, we show more. Xi decided to use technology for peace, and it's in the memorandum of their meeting last week of CPC. We respond according. They break the rule, we break our point. They keep to what they are pursuing, we will carry on. Gun policy only shoots the presidents in their own head.

The same with the child trafficking, the same with human trafficking, the same with the prostitute trafficking. How many girls are trafficked around the world. When you teach them, then you understand, and then you can put a stop to it. And the teaching has to come through a knowledge, technology solid that is accessible to every man, child, a dog, a cat.

When you speak about the child abuse, I had enough suffering for past four or five years. It took me two years to uproot this snake. Look at when I separated, and look at the time of the Italian conference. (3:00). When we found out exactly where everything is. I was in ?? Amam with one of the most beautiful Knowledge Seekers. They thought, because I'm not here, they can do what they like. He saw me what I went through. When I came back I found out. Bunch of ?? as the Swiss Interpol have told me, the two biggest pedophiles organizations have met Mr. Keshe, and you didn't know? I said, no. A football coach, boys football coach. You heard about the priests in Austria in 2004 – 05, the football coach is in Switzerland ?? had known for the same job. There were children of Alan Sterling, they were part of the same organization.

And I had to find a solution with it. And the solution is, this is what I said before you bring this subject, the next few moments we'll bring to teach the children. Why do we need to teach them? So they cannot be abuse, the snake cannot reach them. They can lie as much as you like to the courts, you can pay the judges for the money they're going to receive, but it doesn't change the fact.

I set my life totally different from Italian conference onwards. When I found out more, when I sat with the Interpol in Switzerland, and the facts they put on the table I just bashed my head, what have I done. Why was I blind to this? (3:02). And showing an immediate reaction was not the solution. We kicked Jackie out, we

kicked the rest out, I cleaned everything very silently. Now I can tell you why. Bringing the most notorious pedophiles as the education people. Promoting one of your own inside.

Now we understand. The new technology will bring an end to this, and we have to start teaching our children how to move their physicality from position of abuse. Abuse, as I said, bullying in the schools, bullying in the life, bullying in the home environment by husbands and wives, bullying at the point of work, where because you need the money to live to stop the hunger, you have to take the abuse. Now you don't you dial a number, you're fed on the phone, everything you need is given to you, you don't need to go into MS, and Fibromyalgia and the rest of it.

Knowledge Seekers have not realized the implication and application of this technology to come. Because you look at, I want to go to the Moon, but I don't want, nobody wants to go to the Moon. But you learn how to move your Soul and your physicality that it cannot be touched. You don't need to die with a hammer hit on your head, or a knife going through your body by the husband or a wife in what you call, domestic abuse. (3:04). You don't need to stand the swearing, and the shouting and abuse. Where through your Soul you can raise the Soul of your partner, that it never gets to that point.

They say in love makes you blind, and made me blind. And when I opened my eyes, I found out how blind I was to the rest of it. As the knowledge I have has to bring that to an end. The child abuse, child trafficking, woman trafficking, everything else has to come to an end. Because you teach it. They laugh at you. Oh, some of the fairy tale. But when they get abused, where's this guy called Dean? He was talking about this, where can I find somebody who can stop me from getting abused?

You come to us for the cancer or diseases. But the back end of it is, when you understand it, and you elevate yourself, when you understand the field of the Soul, and you go and eat on the table of the Creator everyday when you're hungry, and as you need it, because you just connect to it, the body does his job, you'll never be put in a position of abuse. You never get diseases, you don't have a fear of life.

And this is what I've done. And when we went to make it, expand it, that it becomes faster, we got robbed by another bunch of thieves. Many of you helped us. And I came sincerely to you asking for help, (3:06). because we wanted this to be done. And we were set up by another Knowledge Seeker the same as the snake. But the time will pass. Nobody will lose anything.

But the structure has moved to a position we can deliver now. We can bring to an end a lot of things by knowledge, not just by word. By teaching, by example of them testing themselves. And how we can mix it, how we can bring that mixture to bring the totality. And see how the knowledge can be, that it becomes accessible to all.

I suffered, I lost a boy. But I know what it means to loose a boy. But I know with this many children are safe. Many of you who came here as Knowledge Seekers, how these people in the background were finding where you are, who you are, if you have children, whatever they could do with you. And they asked us, we want to teach. I didn't understand why. I said, okay, she's there, why not. But it was all planned. We are innocent, we don't think the way they do. But now my eyes are fully open. I know.

I live a beautiful life. But I know that with this life I don't have to worry about anything. (3:08). And I always have a habit, I ask. If I'm given, is where I live. I never go and take. I asked for all of you to support

me when I was planning to expand, it wasn't the time for it. Maybe next month, maybe next year, maybe traveling, expanding the knowledge through China will bring that change.

But when you speak about abuse, I know I can put my head down on the pillow at night, knowing I have the solution for it. Knowing the solution you already tested as the hunger, you went to the Moon, many of you did a lot of things. So it's not a gimmick. It's a reality we all live it, and we can find a solution to it that it reaches everyone. And it's the whole thing is a step by step.

The children becoming aware of their potential, and they cannot be in a position to be abused, to be bullied, that they become suicidal, and they do all sort of ?? things, or attach to the drugs. And this is what we have to learn. And we are always blindsided when we are emotionally involved. And there is no emotion in this, it has to be reality, teaching, direct teaching. Our children it has to become part of the life curriculum before our children go to school to be bullied for the first time. It's the responsibility of the parents to teach the children the strength of their Soul. (3:10). Move yourself, nobody can catch your Soul, nobody can touch it, because you don't want to be in that position. Pedophiles comes under different names, color and ways that we none of us know. Till it comes to public, till we get to know.

Any other question?

Q: .. Hello Mr. Keshe, thank you very much for your tireless work. My question is, there are countless helpless Souls on this planet who suffer from the abuses of humanity, Vertical Beings, minerals, animals and many others. In past teachings, I remember you saying that they are also participating in the process of transition and elevation of the planet. If possible, could you tell us a little more about this?

K- The thing is, with this planet, (3:12). due to his structure, everything living on it except the stones, or what we call, rocks, more or less has a need to gain energy to move. And this is very important for a lot of people to understand. And this need to exist by taking from the others has become a pattern of the life of this planet. When we.. It's so fundamental, if we could see the whole picture. I'm not a dreamer, I deliver technology which brings the dreams to reality. When you see the communication of last week. 80 people. I have a near final what you call, near final data at the end of it. It's somewhere, if I can get hold of it to show you.

<< Audio cut and fading out >> This is the final of Question #2 & 3 79 (3:14).

R: I can take a screen share of the picture and put that on. So you don't have to share it. Can you hear me? (3:16).

K- Yes, our power supply was ?? cutting down, was getting weak. It's on the low battery notice. That was the reason. Is it better now?

R: Yes, yes.

K- Yeah, it was one of our systems going, because I'm not in my usual place. We were running short of energy battery. So, it's okay now.

But this is, when you look at this statistic. Which is your statistic not ours, unless 79 of you in the survey of Sunday told us a bunch of lies. Then you understand, the more satisfaction the less you eat. The less you kill,

comes to the point that you don't need to kill, you learn how to use energies. It brings a change of life for the planet, for the plants, for the animals. And the life pattern it finds its own balance. (3:18).

The animals will find a balance with themselves. If you can deliver the same kind of field energy into the forest, into satellites. Our satellites now, spies satellites used to spy and taking every note of everything, who's got soldiers, where is the border. What about if on the satellites we put the plasma fields that the shrubs, the dog, the cat, the lion, all receive what they want, they just pass each other.

In the holy books you have a promise, where the lamb and the lion live in the same nest. This comes through when you can feed the lamb and the lion. That the lion does not see the lamb as a food, but as a companion. And the lamb doesn't have the fear of lion, that I become the food of. And the only way you can do is two ways, feed the lion all the time that doesn't need to kill and be ?? in every jungle, every bush, to feed every animal the same. Or feed enough that the snake pass you, but it doesn't touch you, because I don't need to bite you, because you're not food.

And the only way comes is when we deliver enough energy, what is short by this planet, which two ways. You can continuously feed a Man, or teach the Man to use his Soul to feed himself. The same goes with, when you do that with the STM. You've done the same with a cat, the same with a fish. How many of you when you participated paid for your dog to have a headphone on? (3:20). How come you as a human being are (more) important? How many times whatever you use as the plasma for yourself, you use it for the plants, you use it for the fish in the tank, or the dog feed everyday?

Now we have the technology, we're expanding the technology, we're expanding the knowledge. So why don't we use these satellites to feed everyone, create a , whatever is short from underneath, which makes us to kill, we feed from the top to makes humane. We use satellite to spy and kill. We use the satellite to feed and to grow. This is the problem. I had this discussion two weeks ago with a very good friend of mine. He's a highly respected ambassador. I said, you know something, speak to the president. He was going out to diner with him. Tell him Mehran says, give us access to help. That we can operate in the freedom. He says, Mehran, there is no money in it, nobody talks.

Let's see how many of you will take up the option of the 3,000 Euro for anything you have. (3:22). Because you don't know what data we're going to gather. And you always look what's in it for me. Ok, I get enough ??. What about the data, the information that's collected that helps millions of others?

You want me to sell the Foundation to the organization's for billions of dollars, that you have no control you don't get educated anymore? Or we still battle things with our own doctors and our own teams and step by step? So let the technology to feed the plants, and the trees, and the dog, and the cat, the lion, and monkeys in the jungles as much as the man. We will see if the promise of the "honey and the milk" will not be there.

Any other question?

Q: .. My question is, when and how will the criminals pay for the crimes they committed against the population?

K- Oh, let them. They decide. They pay everyday. Their life is not as "hunky dory" as you think, their lives is not. The fear of their own crimes don't let them sleep every night. They might look happy on the top, but underneath they shake everyday.

R: Yes, I agree. I think they're shaking in their boots now. (2:24). We have a hand up here from Irgard who has some questions I think about the units that... Home Energy Enhancement Units.

K- They're going through certification. We have to wait that our team now. We had to get this certified independently and they are working on it. The units are all in Europe. The units are all here. They are testing, and we have to get the certification independently. And to see once we get the certification we can release the goods. All the units sold are in Europe, are in our hand, are in our warehouse. And they're testing it. Even last week, they were testing it for the power, for the energy, and everything else. We cannot do anything. Whatever is sold is fully in stock in Europe, we have to receive certification independently tested. We did the same thing with the other things. When it comes to these things like this so serious, we have to have an independent certification. And it's going through that process.

Q: Then I have one more question. And that is with the not eating. I got vertigo so bad that I went back to eating. I was wondering if there's another way that I can deal with that, because I'm afraid of falling.

K- .. You spoke about this on Sunday, I think, or before. Find out why you get the vertigo. (3:26). We have to find out why. Because vertigo comes from the pressure from the inner ear, or middle ear inside the head. Why do we get this? Has there been a change in, or you did not produce enough liquid as a saliva, that you .. run dry? We have to find out why. I would like to speak to you separately about this, because we have to see what parameter has led to this. It's a knowledge we have to gain, we can't just sweep it under the carpet, oh, it's just something. We have to find out why it gave you this condition. And it only comes from us exploring and understanding why and how.

Q: And when and how shall we explore?

K- I have to make time to talk to you, finding the time. I went for a meeting yesterday for half an hour and I had to stay there with the same clothing, because it wasn't expected for me to stay. It was just day, and return, and he just dragged on and all sorts of things. So, at the moment, all our effort is going with.

Especially now we have this "100 group." Sign in for the 100 group and see how we can get you the headphone in. .. The 100 trial case we put up, sign up with that, and then with doctors we have a look why, if we can change. If it's a "one off," or is there a reason. Because then I can set the systems up to handle it. We have to find out. With this technology you cannot say, oh, it's something, we don't. There's a case going on with one person for weeks, (3:28). doctors can't find the solution. And we are exploring which part of the knowledge has not been understood. Or ay sorry, you can go, you don't need.

And we have to understand. Because we come from the origin of the Creation through plasma, every condition has a plasmatic or something to do with the plasma of the Creation. We have to find out what we haven't understood, what we haven't managed to match it. That's all.

Q: Yeah, I signed up for a consultation with a doctor, and I was contacted back a while ago...

K- Do it again today. And put in there, and then I'll get it done. Because we want to get this 100 done this week. So we have to find out, we have to learn. And the whole understanding is, we have to fill in the gaps where it's not understood, what we need to change. We have a guy I think the lady is here. .. We had a lady for 30 years having a damages eye because of a caustic dropping in her eye, and burning. And first two sessions she said, I don't feel anything. And the third session with the doctors she said, for the first time in 30 years I don't have any more burn, it stopped. So it's when you start the process with the doctors your body has to build up to the point of the change. It doesn't mean, it's not a plug and play. And this is one of the parameters we have to find out. And this is part of addition which a knowledge, which goes to the doctors, that they can use for their what we call, for their volunteers and what happens to it. (3:30).

Q: Do I need to have the Tabletop Unit and the Headset, to go with it?

K- No, just the present (headphones) will do. The doctors will tell you what to, the procedure is there. I stood by the support for the medical team, up to this week. I was there, I'm there all the time, people who've been around they know. And from this week is all getting handed over by the doctors. We stay behind as consulting, but doctors will handle everything. We advise what we know, what it is, what they can add to our knowledge. And all your contacts from now on, will be, if you come in is to learn, or to listen that we can teach. Otherwise, from now on, you're totally in the hands of the medical teams.

Q: It's just that it's not just vertigo. It's memory, and vertigo, and everything that relates to the ears and the eyes and the sinuses and that whole area.

K- Send it in, let's see what the doctors will say. Thank you.

I think we will call it a day, nearly three and a half hours. We had a very long day, yesterday and today.

Thank you very much. But please don't think I have a pain in the neck, or I have a joint problem, whatever, for 10 years, whatever. Let us, give us a chance to make up the database. And then we'll see what we can or where we can go. And we don't get these kind of offers every day. And how we can do it. Thank you very much.

R: Okay, thank you, Mr. Keshe, for another Knowledge Seekers Workshop here. Anybody has any leftover questions, (3:32). they can bring them into the next workshop, please. And which will be next week, I assume at the same usual time Mr. Keshe at 9am, for next week, as far as we know?

K- Yes, I hope so. Today we went through an unexpected situation away. And we could not be, because we had to be in a meeting. And the meeting takes two or three hours. So we had to. It was better to have a half an hour session than actually delaying it and having a full session. Thank you.

<< Rick make announcements of the next Public Teachings >>

K- Can I just coming for one second? (3:34). We still leave the room open till midnight tonight, for those who want to register for the meeting tomorrow. I just been told by the webmasters. The room will be open. If anyone wants to register for tomorrow's session with the world leaders, it still stays open until midnight tonight.

R: And you're talking about the Telegram room, correct? The Telegram group? As well for the people that are signed up for the workshop?

K- No, I'm talking about the meeting with the world leaders tomorrow.

R: Yeah. What's going to be open? The Zoom?

K- The booking. If anybody wants to book in to be in the meeting tomorrow, they can still do so. Because we have people booking late, so the registration still is there. It will be open till midnight, and you'll be allowed to come into the meeting tomorrow. Thank you very much.

R: Okay, and there is a Telegram group that is the contact group for people that are in the workshop apparently or can be used, which is the @customerservicekfm telegram group, apparently.

K- I don't know about that, maybe there But you go just to the website of the Keshe Foundation. And in there you'll find the booking for the meeting tomorrow. The website. Because some people just ?? how do we book. If you can just put it on the website, if you've got access, go to the shop. In the store of the Keshe Foundation, there is a link for the booking for tomorrow.

478 KSW March 23, 2023

END

479th Knowledge Seekers Workshop; March 30, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

New teachings on Emotions begins; Further understanding of Cycle of Creation Rays - fields - Emotions; Cycle repeats itself throughout Creation; April Addiction session - keep STP & STM together; MG fields continuous cycle no change - point of observation change direction - create magic; Big teaching on Emotions; Salinity; 3 Kings gifts - MaGrav - Ray - fields - Emotion 3rd dimension; Gans making - local & environmental fields; China to clean up environment; Galaxy like Gans Box.

ENGLISH TRANSCRIPTION

K- Yes, good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute, (:18). where you're, we welcome you back to another gathering of what I call, new scientists new generation of Knowledge Seekers (KS) of the Universe than physicality (P) of the man.

We have been teaching for past weeks and months, about the Cosmic Rays (CR) about interaction and condition, and the direction, how man will travel. How man has found a new way to understand. How man leaps from being a physical passenger of the Universe (U) to be as part of its structure, for being a passenger off the fields of the Universe.

To get to know this, to become master in it, takes a long, long time. But somewhere, somehow we have to start. Somehow, we have to take the first what I call, toddling steps. Maybe the first steps are crawling towards the knowledge, towards understanding. And this has been, and will be one of the biggest dilemma for the man of science, not only on this planet, but across the Universe. We don't have universities, we don't have what we call, graduations and the hat on the head to show we understood. The hat on the head comes from enlightenment in the world of the Creation. We have to understand how, where, and the way, and the condition created that how, and the where and when to be created. And what we'll get out of it. What do you expect out of it?

As I said many times and you will come to understand, (:20). that the time will come very soon, when by dropping a "drop" in the fish tank, you will create that fish. And you will see, man in control of a drop of energy, not a drop of water, in a tank creates a condition of life. That tank could be a fish tank, could be a planet, could be a Universe. It's man who decides where that drop of energy will manifest itself, will take shape itself, will bring a new condition of understanding. And with it will bring a new era in the world of the science of the Universe, not in the world of the physicality of the man.

Those who understood a little bit about the operation, and the things necessary to be the basic fundamental life of the man in the Universe, they call themselves prophets and they prophesied, and those who abused the prophecy, created a condition for their lack of knowledge of the true prophecy, to abuse the man. The way we have taught you, as Knowledge Seekers, you will never prophesize, but you look into, you understand what it means, what has been said, how does it fit in the interaction of the fields? How does it fit in bringing the reality together?

The reality of the two dimension of life, the physicality, and energy as a plasma. Even though the physicality itself is part of the spectrum of that energy. (:22). What happened to us? How do we change clothes? We wear a swimwear and we jump into the pool. We were the Soul of the Man (STM) and we jump into the ocean of the Universe. But the biggest fear man is, how can he jump out and have the physicality, when it comes out of the ocean of the fields the U. This is the biggest dilemma for man. How the way "I should," or should not? Should I? Would I become? Can I come back? These are all the questions which was said.

Yesterday, one of the flight tests. We tested this in a very amazing way. But the Knowledge Seekers who participates in this kind of test with us, did not understand, could not comprehend what was going on. He was still looking at the dimension (D) of physicality. He looked at, "I'm not there, I can get there." We could isolate the STM from the fields of the Universe. "I don't feel anything," he says, nothing happened. Yes, because you're isolated. It's a condition when you come in, nothing happens to convert yourself in the D of P, because we blocked you. You're there, moving the system instantly to another position combination.

I can see the fields rotating in a clockwise direction, this is the time, that you travel and you still have not understood. Because the clockwise rotation means to man, departure. You call it magnetical (M). In the field combination of the MaGravs, you talk about clockwise and anti-clockwise, and then we change the combination, again. (:24). And I can go, I can feel energy is there for me to go, but need to go. The "but" was to connect to the first setting of D of P once you arrive.

This is part of the knowledge which is missing. This is part of the knowledge, which we have not shared, and it takes the "man of wisdom" to understand. How do you jump from the physicality of the Man in the pool of the Universe? And then how do you jump from the pool of the Universe into the physicality of the Man? We tested you, we brought you into the systems, we taught you how to come for a food, how to talk to the world

leaders and every gimmick possible. We have brought you out to teach you, you can go back, you can get in touch with, you can use the dimension of the fields of the Universe.

Now the game starts in the coming time to make that ambiguity, that lack of knowledge, which the man has, how to go back from that D of the energy into D of physicality. In fact, your Soul does this at the point of death, it leaves the physicality of the man, and instantaneously is positioned in the Universe, is dictated. It doesn't wander around, I'm a wanderer to find myself, to find my Soul, to find what I'm going to be. It arrives instantaneously, at the points and the destination, which has been created by it. So man doesn't become a nomad in the dimension of the Universe and the Unicoise. It's instantaneous. But reaching to the point of the balance of the field of the STM, (:26). and in the dimension and position of the Universe, then the Soul has to create the D of physicality. It's no good just standing there on your own. You're trying to tell the others I'm here, I'm trying to create a new dimension.

The STM at that point of arrival, starts absorbing and creating the dimension of the Inertia of the patterns of the fields of the Universe, to start beginning of a star, a beginning of a galaxy, a beginning of a Universe. Not all Souls of the Man will end up in a galaxy, or end up in a Universe, some of the Souls of the Man become the beginning and start of the Universe. They are so pure, and also at what we call, "level of understanding the process of the Creation," that they become the creator of a new cycle.

And this is what man needs to understand. You come from the energy and how do you start that new cycle? How do you begin, to begin a new cycle of life, a new Solar System, a new Galaxy, a new Universe. Even maybe to become part of the Creators fields of the Creation, from the point of nearness to Creator. Mankind needs to understand this point.

And then ask yourself one question, if my soul at the moment of the departure from my D of physicality, knows his place, and then knows how to convert itself to the D of P at a given point in time and position, (:28). what have I not understood? What am I missing in the Knowledge of the Creation, in the wisdom of the man?

If my Soul knows his position, at the point of departure, and starting a new life, maybe in the dimension of physicality, instantaneous as a seed of a star, that it gives it dimension of the tangibility. What am I afraid? What am I worried about? When I go where my emotion and feeling is to go from New York to London. Why am I afraid to leave New York? Do you sit on the stairs before you get into a car? Am I going to get to London? When you get in a car you go to the airport. Do you sit and say, shall I get a plane, would I end up in London? When you get on the plane and you go to the direction of London, would I arrive in London? And then you land and you walk, and you go out of the airport, and you get a kiss on a cuddle from your family and the friends, oh, I arrived, the system worked. Brought me in a little what I call, "tin box" to London, and I trust that.

But man does not trust his own existence. Never question, would I arrive. Your question is, what can I give when I arrive? Then you arrive. As long as it's me, can I confirm, I can get to. You and never leave, because you're not .. you're not even sure you can go. Where do you want to go to start with it? (:30). The lack of trust, lack of understanding, lack of not knowing. How come my Soul knows where to go when it leaves my physicality, but I don't know where I'm going to go when I become what I call, "the passenger of my Soul." As long as I want to stay in dimension of P.

This is where, and this is the reason we brought the teachings. This is one of the main reasons we started this, "playing the tip toe," on the 16th of December, we go and see the Creator. I put my foot out, see if it is warm enough, if it's real. In January I go and do that. In February, I test if I can feed myself. In March, I can see if I'm equal to the world leaders, that I don't need to worry, when I become the Soul of manifestation of my physicality, I can be the king of the kingdom of myself. The next session in April, I want to see if I can get addicted to move.

The reason we put the addiction (session) is not for your alcohol, your drugs, or sex. The reason we put the session of the addiction in April, is that you don't get addicted to wanting to go in the dimension of the Soul. I go there. I go there. (:32). I do this, and I do that. There is something missing, I haven't been there. In a way, we don't create Azar number 2. She wants to go everywhere around the world, test every condition of the emotion with every tool possible, and every plant, and everything else, that to find myself. If I can control it.

The reason for this is because, traveling the span of Universe and knowing the capabilities you have is addictive. And its addiction is incurable, because you feel the love of the Creator. And like a one in love, do not know where to go. The reason we put the addiction session is partially for you to understand the sincerity and the commitment of your Soul of Physicality (STP) to your Soul, that I stay put. I am one and I stay as one. Then you understand, how the process of the Creation brings you to stability, brings you to the point of not to be addicted, but to be connected.

For your learn the energy releases, which ?? more ?? elevation and excitement to the Soul, moving from physicality to the Soul. Moving from one to the another, being part of the same thing. So, what we taught, and what we showed from the beginning comes into operation. And in a way mankind comes to understand what I need to do. Do I, can I travel in the dimension of the Soul, create the dimension of the physicality, and then can I depart with that Soul? Would I be able to carry the what we call, connection of my Soul on this cycle of life?

The biggest fear, the biggest uncertainty for man is that, if he can carry his Soul on bandwidth, on the track of hydrogen (H) and carbon 14 (C14). Would the STM go to that D? Would the STM learn how to add D of other materials magnetic field strength to manifest itself as a drop of rain, as a cloud, as a physicality of a plant, a creation in D of the Creator, and be able at the same time, to join back and travel the span of U.

Then, would it be possible for man to learn the dimension of the C14. If man understands how to operate within the D of the carbon, which in a way is the physicality manifestation of the fields, and not the rays of the Universe, then man will go one step further.

In a way, if you go back to the teaching of the past, we always said, you start with a ray interaction of the ray with their own creates the fields. (:36). And then the interaction of the fields with themselves creates a matter states, be it the C, be it the copper (Cu), be it gold. record, and then interaction of these fields by themselves within themselves, creates a cycle of life.

So, it started from a ray, to a plasma, to physics, to chemistry, biology, and the energy called, the STM, which in that position, due to interaction of itself by itself, and expansion of Totality, becomes another ball of plasma we call, a Soul. And then the cycle begins again, "I Am the Beginning and the End."

Rays emitted from a plasma will start the same cycle again, till it goes back to the beginning, that in interaction with itself will start creating a plasma, and a plasma to another point, to another point and back again. This is a cycle of Creation. This is a way the Creation is made. But at all time within this field is the essence of origin, what we call, zero-time, what we call, the Creator.

This is one of the biggest questions, I put to many scientists of cosmology and to the nuclear physicists years and years ago, and I explained this in teaching a few times. In the world of the science of Man today, we call it, the North Pole and the South. (:38). We say the magnetic field come in, and then they go out. Where do they change from gravitational (G) to magnetical (M).

In fact, they never change, it's a continuous cycle. It's the point of observer. Point of observation. And this process is where you as a Knowledge Seekers have to come to understand. What happen at a given point of the observation, and who can explain it, does not become a Prophet. Or who can see the point of interaction, cannot use it to abuse the others, because I can see how and they can't, so I prophesize what I see. But in fact, I'm the observer, because I know a little bit more. I don't become a Prophet.

The game of the knowledge is not to be a magician, not to be a Prophet. The game of the knowledge is to share, that more people understand, that from them in interaction of the fields of Universe somewhere, you get prophesized by the others. That what they prophecy, what the knowledge means.

If Man understand this, Man will accept no Prophets anywhere, no magicians in any position and dimension in the Universe. Because Man we look for the fields interaction, Man we look for the point of life, and what it means, and how does it mean, and what does it create. How would it affect me, that I understand, that I don't accept no magician. (:40). Because I know the game of the magic, I know what I need to mix, how to mix it, understand it, and then I become the magician. And then the actual truth is, I cannot be magic, because I am part of the circle of the magician, understanding the work of the Universe.

If as Knowledge Seekers you understand this, you have cracked it, you have completed the cycle. And then you look for the time, position, field strength, dimension and interaction. Then you understand, there was no need for prophecy. You have to understand a certain point of the interaction, a certain point of evolution, interactions creates emotion. And then to understand the emotion becomes the controller of the interaction, the controller of what's going to happen to the Soul. "I made Man in the image of Myself," how can Man has emotions, but not the Creator, as the Creator created that emotion for the Man to understand? You're an image of the Totality.

But the question to ask for you, did the emotion of Creator was with me, within the cycle of ???. That, in this point, I feel part of it. I call it, love, I call it, pain. But what other part of this emotion, which I don't have privilege to, still to come to me to become part of my knowledge? (:42).

As I said many times, Man will come to understand new emotions, but these emotions are not something new. It comes as part of the, "I made Man in the image of Myself". You carry My emotion, and you only understanding the emotion when you arrive at it. It's no use to tell a six months old child, a two months old child, a ten year old child about way a man and a woman fall in love and they give their life to be with their lover. Because it's not mature yet to understand what that means. To him its the love of mom, dad, maybe brothers, maybe the cat. How much I love, but the essence of love changes when it comes to a lover, to another partner.

In a way Man has to learn to fall in love with the Creator. And then man matures. Because then it gives that it receives, then it becomes enlightened with the knowledge of the emotion of the Creator. What you call, Mitra, the knowledge of falling in love that you give everything for the lover to understand how much you love. But in a way, if the lover denies you, or ignores you, you have received no love, you have not done anything, you have added, but you never received to be elevated.

Then it means for Man to understand, what have I not given to receive that elevation? (:44). Where am I looking? Where have I made the mistake in understanding, because then I can show it in the dimension of P. I tell you, I love you. I just don't understand. I buy you a red rose, I buy you a box of chocolate to show the love, I buy you what you love, you enjoy to show you, how much I love you. How many times you have given the gift to the lover, and just puts it on the table and somewhere else? You say, why have I done all this for? When the love is not appreciated, when not understood. I put every effort, I have traveled half of the town to find the color he likes. But to him it's another piece, because he loves somewhere else. The work, the job, the football and the rest is more important in that moment, then when you gave the dimension of physicality of the rose, or the box of chocolate. Because the emotion wasn't transferred, it just received.

As I said recently to a diplomat in the past few days, Keshe Foundation brings the love of knowledge. It's the responsibility of your leader to create the love of peace with the knowledge we give as a love. The diplomat, a woman, looked in my eyes and said, Mr. Keshe, I don't understand. I said, you'll never understand. Because you never been in love with peace. You're a diplomat. You're just an ambassador. (:46). Because you haven't got the essence of the leader. You're on the paper a name, but not in the emotion.

This is what you as Knowledge Seekers have to understand, the essence. But how do you ?? come, how does the emotion is transferred in the Universe? It had a smell, you call it, an odor. But how do I measure emotion? How do I feel the emotion? I'm a Soul. I'm a pack of energy. How do I feel an emotion when I come across another Soul in the dimension of Universe. If he loves me, if he wants my energies, he wants part of my fields, he wants to give me something, he wants nothing, he wants to be loved.

As I said to a friend of mine very recently, would the Man of Universe become the Muslims of the Universe, 4 wives and 40 lovers? Or Man learns to be in the dimension of one Soul, one life? You know the rules of Muhammad. If you are away from your wife so many legs, so many kilometers, and you have to stay away for one night, or more, you can take a part time life, a part time wife for that night you're away. Would you also do when you leaves your, ?? Soul as you call it, into dimension of another Universe? (:48). It's too far, you're out 200 wives and 2,000 partners, even though you can come back instantaneously. The love comes to, how long do you want to stay away? Doesn't matter what the distance is.

I used to joke with this with my ex-wife. I used to travel a lot when the children were young, but I used to travel back to Manchester every night and take a flight again tomorrow morning to go. And I used to tell her, I should have become a very good Muslim. Because it's nearly 500 kilometers and more than, I think it's about 40 kilometers you can take a wife. Multiply this number of distances, I can take 10 wives in one night. I plan to, I come back tomorrow and I can extend it, because it's 2. But now we have planes, and jet planes and whatever, and we cover the distance. Now automatically part of what was prophesized as a Prophet, becomes through the knowledge and technology, obsolete.

So it'll be the same with the Man in the dimension of the space of the Universe. There is no time in the space, and you live a life through the dimension of the life of Mitra. It does not matter what the distance from the Creator is. As the distance is the love of the Creator, which is zero-time and place and position. You are

never away, you are never far. You cannot travel to the other side of the Universe, as the Universe is you. (:50).

Then it comes, how come up to now, we have never understood the ?? effect, the emotion, the way the emotion travels. We smell it as an odor, but we cannot feel it as an emotion. Where does the emotion of the Creator hides in, that it manifests in us, and at the same time within our children? How do we transfer the color of the eye, the behavior and emotion to our child? Isn't this what the Creator has done with us, and we have adapted it to suit us.

How did the emotion of the Creator arrived with us, within our Soul, within our existence on the, what I call, superhighway of the H? Then it comes to a bigger question, is there a dimension of the field, which man up to now have not understood? And is that the piece missing, for man, Creation in dimension of, what I call, plasma of the Soul, or dimension of manifestation of physicality? How come I become visible to some, and not being seen by the others, as their fields are a different strength to me?

I put this question in one of the chats of NASA years ago, and maybe after 20 years, after ?? they all decided I teach too much and asked questions, which they had no answer for at that time. NASA has shown us that there are lives above us as a plasma, (:52). we see their shadows. Ask yourself this question. Then you might find an answer in the dimension of P. We hear, we see in the news that a man got hit by a car, because both had a dimension of P. How many times man has taken off the runways, how many times we have shot these rockets and astronauts into space.

By the way, one of them now is an Iranian woman. If you heard the White House, celebrating the Iranian New Year last week. The first Iranian space heading what I call, group to the Space Lab, is an Iranian woman. And it's the thing is, Ayatollah Khomeini kills a woman for covering her head, America to a woman who was born in Iran, give her a chance to head a mission to space.

Now it comes another point. How many of these rockets, this lady was going out with her team, will hit the lives, which are above us? How many injuries do they create, that we never considered. But we know that they're there. Sorry, they're not all as fast as the others, we hit them sometimes. How do they fall? Do they carry an emotion, because we see their reaction, we see their dimension.

So we haven't understood the love of the Creator for us. The emotion, which is the fundamental point of the reaction of manifestation. (:54). We considered how it comes, we considered how it can cover a span. But we haven't considered how the interaction of the fields with that C14 and H creates emotion, which at a given point gives the sign to the plasma of the STM, it's time to manifest yourself. Otherwise you are a loose bullet, never stop.

Now, Man has to understand the strength of the emotion. This is why in all the teaching from beginning of the time I always said, where is the emotion. Without emotion you cannot show your love, without emotion you cannot show your anger, without emotion you cannot show your suffering. It has to be in the interaction with the dimension of the plasma, that it gives it dimension to manifest itself in any shape or form.

So, emotion has a field strength, emotion has a dimension. And Man once understand that emotion, Man once can bring in parallel and common denominator between the STM and the STP of the Man, Man then becomes a passenger of the Universe without end. Fountain of youth, everlasting life. It's the way the Creator lives.

It's the way us as humans have not understood. We call it, psychosomatic. I hate my child, I give myself a prostate cancer. Voilà. How come you understood in dimension of physicality, but you cannot put it in dimension of the plasma, which created that physicality? (:56).

Yesterday, when I sat there with our Knowledge Seeker I said, it'll never be understood by Man. I'm there, I feel I'm there, but I'm not going anywhere. First of all, I put a weight on your backside that kept you here, I showed you, I covered the dimension to connection to the Earth, to dimension of gravity, to understand your incapability, to understand what is involved. I take it out, you see the dimension, but you have not understood the emotion.

You're so hungry to go, that you forget the ignition key. How do I manifest myself? What is the purpose of my travel? Am I traveling to go to a new place, not just for me to be there, but teach the others the process. "Me" is irrelevant. The love of "me" for Man understanding is more important than me. I never fly, because I never understood the emotion. I never understood, I never grasped the fundamental essence of the Creation. Otherwise, I'm still another ray, another plasma traveling the dimension of ignorance.

This is one of the points which many of you have to understand to become passengers of the Universe. To be able to travel from New York to London. And then you have not even understood the other part of traveling by the Soul, by the emotion of the Soul. Then your lover will feel you in her heart, in his emotion. I feel it in my heart. How many times have you felt, said to yourself, I feel something is wrong. I feel something is going to happen, (:58). something inside me will come. But you don't understand the Soul of the emotion of the lover, or the thing to happen is already arrived in your heart, in the plasma dimension of the fields, which converts to physicality. But because you don't have the knowledge, because you don't understand it, you cannot transfer it to your Soul, that it becomes the manifestation and dimension, in the dimension of the Creator, in the dimension of the Universe, and then use it.

Then you see a guy getting hit by a car, he stands up and walks (away). You say, how is this possible? Because at that moment the STP gave control to the Soul. You don't exist in the dimension of physicality, because the love of the STP to keep the Soul is so strong, that it gives everything up that the Soul takes over. And then instantaneously you return, you come back. These things to you were fairytale, but now look at so many cameras around the world, which show you so many accidents. How come this guy gets hit and he walks? Now you understand the process. Now you understand the love the STP gives to the Soul, you take over till we see, till you get me out and then I take over. How come you cannot do this for yourself in the dimension of consciousness of the behavior? Is this another mystery of life, which Man needs to understand, trust in the Soul?

How come at the point of the accident you do it, but you don't want to do it in a natural process all the time? Then you go to work in New York. You have a tea break in London with your lover, then you'll be in Beijing for lunch, (1:00). then you go back to Hawaii for a bit of afternoon nap, back to New York tomorrow morning. Because there is no time in space. It's you who makes that time, it's you who make that space for manifestation of P, or for the dimension of the STM to take over.

Then, now you understand why the past three or four months we keep on playing with you. Come, come and play. Come and meet us on the 16th, come and meet us on the 19th, come and see. It's not for you to feel the taste of the food, or sit and see what you can do to a leader, or you have a tickle with the Creator. It is for you

to gain confidence. It is for you to understand, I can bring the dimension of emotion, and then a with it I don't get addicted to that emotion.

The only emotion Man will ever get addicted to, and cannot get away with it is, is like the DNA, is the emotion of the love, which is the essence of the devotion of the Creator to Mitra. Don't forget, Mitra could not love Creator if He did not receive the emotion of the love for Him. Creator is the possessor of all, and Man the converter of some. Then if you think your love is so strong between the STP and the STM, then maybe you understand which one is a Mitra and which one is the Creator.

If you understood this sentence, as Muhammad said, bless his name, a salaam ...) "There is no more teacher." (1:02). But Man has not understood this. Man has not come to understand the dimension of emotion. There is no physicality, there is no dimension of existence as a life in the Universe, if you carry no emotion. That emotion has to be transferred in the conduct, and the behavior and thoughts. This is the ethos of Mitra, do good .. , and the rest of what the Christians call, the "three kings gifts." Because they never understood. The kingdom of the Creator is the behavior and the ethos of his life, which Mitra brought us in the ?? Zoroaster. ?? "kna dorinek ... "Neek" means perfect, correct. Talk, think and do the correct. And this is the path to life. This is a path where you come from the ray to the field, and from the field ?? to emotion. And then becomes a dimension of the Creation.

In the process of life, in the process of the dimension of understanding, Man will become to understand the truth. Then Man does not need ?? good ?? . Does not need to put one on the cross, or shoot one on the wall. (1:04).

One of the most strangest things for Man to understand is, the third dimension in the process of the Creation, which is emotion. Which itself is created from the interaction of the field of the Universe. And the Universe is you, because without that dimension of the emotion you don't exist to confirm your existence within yourself. You have to confirm the dimension of existence within yourself first, that you can manifest yourself to the outside. You cannot have a body when the heart doesn't work and it's not there. It's not life, it's just an object. It's just non-existence. Because then it becomes nothing, you deposit it in the coffin and you see no sign of it forever.

Then it comes a major point for Man. How do I go as a ray, become a field, and then emotion and dimension of the Soul and the P? The way you created the fields of the plasma of a Man, the physicality as a children of Mitra. Now, you have to understand how to create those fields, that become the emotion of Mitra. And if you crack that, if you understood that, then you have entered the true "Kingdom of the Creator," because you will think and do, in a way, talk the same language.

Then you understand. You call it, do good, act good, and the other one, think good. (1:06). You're a H, you're a C14, then you're an emotion. And all three has to be perfect for perfect manifestation. Maybe we opened the mystery of the Creation in dimension of the world of the Man, but in essence of the Creator and its Creation.

Now, for you comes a point. Didn't I give you a three stacker MaGrav? Isn't the three stacker MaGrav the same as, one to create the ray, one to create a field. and one for interaction of the two creates the emotion, the fields of the existence, the plasma of life. And then if you can interact with it, you understand it's there to serve you with your emotion. Would it be gold, would it be lover, would it be a flower.

Many times when I looked at the MaGrav units, I said, these people are just so physical. You put one coil in the wrong direction to the other, you will not see the light. Your MaGrav doesn't work because the ray is missing. You put wrong direction, and the second one your field is not there. How do you expect to live without C14? And ?? when it comes to interaction with each other in the space of their own, create the third dimension, which is emotion, which gives life to manifestation of your existence. (1:08).

Now, maybe as Knowledge Seekers, you understand the "three kings," which they brought the three gifts, sits in your MaGrav. You never understood. You're still looking for saving energy and not paying an electric bill. But you actually cut your own power supply from your own Creator from the base on. Because you're still looking at the dimension of physicality.

As usual, when you play with a little child, with a toy, it's just a toy as much as he can understand. When the older one comes, it's a rocket, and when the father comes it's a spaceship. But in fact, it's the same toy. Different understanding plays with the same toy in a different way, and enjoys his benefit in different ways. One dreamed "boom, boom," and one dreams of deep space and where it can take me, I become a passenger of the U. But in fact, it is still the same toy, the same ?? .

Man has to understand the knowledge, Man had to understand the process of the Creation, that in a simple way we explain. Then I wonder how many of you will come to understand the next step in the process of the teaching. Then does a collective interaction of the fields creates that dimension of Creation.

Maybe today's teachings opened your eyes as usual, to another dimension of life. (1:10). Join us in April 29th teaching. In a way, meeting with addiction of the space, and understanding of our addiction in the dimension of P. Each one will take from it what they want, each one will go away with what they think they wanted. But in fact, isn't all the same.

Thank you very much for today, and I hope you understood one of the biggest mysteries of the Creation today. But Man still needs to understand his own Creation, and his own conversion from physicality to energy, where the physicality itself is part of that energy spectrum. We go for a small break, we come back and we answer some of the questions, which has been mystery to us. If we have understood today's teaching. Rick, if you'd like to take a break, advertise some more of the Man's physicality and see what we come up with the STM.

BREAK << >>>> 479th KSW March 30, 2023 (1:16).

K- We would like to introduce something new to Knowledge Seekers, which has been happening in the background, and the Keshe Foundation has been privileged to it. What we think is the right time to come to public for you to understand how some of you Knowledge Seekers work, and how you will participate and support other Knowledge Seekers without them knowing or they know. Keshe Foundation receives a lot of different ways to support others Knowledge Seekers, or to bring things that others can enjoy.

And we usually find a place we find people, we get people, for example, in some of the meetings we had in past few weeks, (1:18). or in the conferences, one Knowledge Seeker sponsors or buys a ticket and says, give it to whoever likes and cannot afford it. I pay for two. We have Knowledge Seekers who have been supporting the wellness this way. I don't have a cancer, but I don't want somebody else to have a cancer, or he has a cancer can we helped. And we give this to our doctors, and we provide the facility in different ways, and they look into it.

We received the donation for 4 Parkinson cases from one Knowledge Seeker. We thank him for his Soul and the way he supported. And for example, very recently, one of our Knowledge Seekers who entered for a specific way with the doctors, he saw it that there is nothing at this moment can be done. He said, use it for another Knowledge Seeker if they need. So we find, we allocate, we give it as a gift and a support.

But there is other ways that Knowledge Seekers support or give things to the Foundation to use. We don't accept properties. We don't accept land. We've been offered so many lands over the years, and God knows, buildings. It's nothing to do with us. We have nothing to do with real estate. When I tell them I'm not interested. He said, Mr. Keshe I'm giving you 700,000 square meter it's prime property. What am I going to do with it? It becomes another burden to be attached to this planet.

But sometimes we get things that other Knowledge Seekers can use. We bring this out for you to see and maybe you become to understand you can do for the others. We have a Knowledge Seeker who has paid for specific items to the Foundation. And he has asked us, give it to those who need. Rick, can you put the list up? I think you received it from the webmaster. (1:20). These items have been paid for by another Knowledge Seeker. And it's there for you Knowledge Seekers, if you want to and could not afford it. But it's not just that, because it's there, then I grab it. It's for you to what I call, to enjoy. Can you share that screen with us, Rick?

R: Yes, it's coming here. Just one second.

K- It is a donation to the Foundation. And if you think, you know someone who can benefit by it, but it's too shy to ask for it, or it's something you wanted, you couldn't afford, or it's something you wanted, but it wasn't the possibility to get it. These items have been fully paid by as a donation by a Knowledge Seeker to the Foundation. Instead of us choosing, we leave it to you to choose. You can even choose and make a donation with what you can afford, again it goes to the Foundation. But we have fully received the funding for this, we are not looking for money for it. If you think you can use them, or somebody can use them. The usual passage in the Keshe Foundation.

This is going to take a lot of time, but it starts a new cycle that we can put in. You don't take anything with you when your Soul travels. But you can create a condition for a Soul to travel in comfort, as I always call it. So, send to the usual place health@... the usual place which we put. And say, this item I would like to, (1:22). I'm prepared to pay for the postage and package, already paid. All we need to do is to send it. If some cases postage (will be) needed, we'll tell you, can you pay for the postage? So, it's a donation by a KF

Knowledge Seeker, and we thank him for his generosity. And it's there for you if you need it, look at the item, and it says what it is. Would you like to read it Rick, what is available and who might want to have it, it will be a pleasure to let you receive it to enjoy. Would you like to go ahead, please.

<< Rick reads the items available >> (1:24).

K- So, this is what's available, if you want it, but you could not afford it, or you know somebody that it would be good for school education or somewhere, just send us to the same address as usual. And it'll be done if we receive. So many of it we'll ask you we have received, which one of you will discuss with each other, more important to go to. So, this is one of them.

The other one we have is, as you know, in the Keshe Foundation, in the exhibitions you come, there are a number of paintings, and they've been on sale on the Keshe Foundation website. We have added four new sets from the Austrian painter. (1:26). The Austrian painter 4 sets arrived this week, and they go as a normal sale, as it's priced. And they are made by the Gans's, which the Keshe Foundation manufacturing, our lab people have decided what they want it to be, for what, and the painter has painted it. And these are Gans's, which are produced by the Foundation. And for a specific use, and they're beautifully done, as you can see. These have just been added.

Like the same, there's a lot of you've been waiting for the Pressure Cup and the, what I call, the Sugar Cup, they have arrived, so they're part of this ???. But we had, as you know, eight sets of paintings by an Italian artist, which some of you bought, some of her work, and it's done. And these 8 sets has been donated by the artists to the Foundation. We can keep it there, and wait a year, two years, whatever, to be sold, and the funds to go to the Foundation. Or what the Foundation has decided to do, and we have informed the artists, is these eight paintings, they are all valid around about 3,000 a pair, because they have to be facing each other. Or maybe two of you decide, one buys one of them in Australia and the other one buys in Canada to cover the fields, as you know the magnetic plasma will cover the distance between the two. These are the matching paintings. (1:28). These are gone on offer. You can make an offer and the Foundation decides who receives. Maybe receives two offers from 2 persons and we say, would you like one? And we go for the Soul of Knowledge Seekers. Don't make us a ridiculous price of 5 Euro, or 100 Euro, or whatever. But what do you think these paintings will bring you, and give to someone, give it to university, to a college, at home, to your son, to your daughter. Make an offer to the Foundation, you have to pay for the postage and packaging, and you will receive it. These eight sets of paintings are there from today open to offers. You might want it, but you can't afford 3,000. You see a value in it, in any shape or form. Like the other Knowledge Seeker, you might buy all the 8 and say, donate to others. And then we come back to, ??? they're being paid for.

So if you want one or you have paid for two. I want one, to give to somebody else, a Knowledge Seekers will have the other one, and create a love between the two. We leave that to you. So, eight sets of paintings which has been in the Foundation for about two or three months has been donated to the Foundation. And instead of sitting on it, we are sharing it with you. Because the fields of the love and the care has been painted has to be shared, and not to be kept. And so it's there for you. If you see, you have a connection, you like to feel it, make an offer through the same channel. Rick if you can put the link up and read it, (1:30). because some of the people just listen to this teaching on recording. And to the Foundation and you will receive it.

As you know, we received a donation and massive donation, support, in a way. From the test, yes, it's called for 100 cases for wellness for our doctors at the rate of 3,000 Euro. The rest is covered irrespective of condition except certain condition, which our doctors will not do, it's like cancer, or Alzheimer's, Parkinson

and MS are not covered under this. For any diseases, any condition which our doctors can use in wellness, you can apply for. And looking at the condition some people come with, I have this, this, this. It's no good. Something simple, something singular, not simple, that it can be handled and concentrated on for a six weeks session, maximum to see the change and the results, that we collect the data. We are covered on other side, the balance is with you. And if you want to join or as usual, the health@... what you call, we put up last week. healthspaceshipinstitute.org. Write to us.

We received a number of applications people requested. Some of them, it was sent to me, I looked at it, this is absolutely. I have every disease on the planet, I would like to use the 3,000. Sorry, we're here to get 10 cases, not one man with 10 diseases, which is all irrelevant. From, I had a car accident, to my toe broke today, (1:32). I have a plant, or heart transplant, and the rest of it. It doesn't work. Just be a little bit of common sense, it allows us to help the others. So, send your request to health, send it to the doctors and the condition application will be considered. And the fees. And don't come to us, we had a few cases where... I've seen this week, people come in, I don't have the 3,000, can you even give me that 3,000. It doesn't going to work. If we receive funding for certain things we can cover. But some people take it to the point of not acceptable, what I call, understanding of the system for our doctors. They pay their time to it, they spend a lot of, it needs, and now we're expanding the doctors. All these doctors have to compensate for the effort and the time they put in, plus cover all the expenses of the other things which is in the background with it.

So, we have reach, we have accepted through the understanding, that we do everything the correct way. And we understand we do it the way it has to be done. And a number of people have already started this process of the, requested last week. And started the process of 3,000 for given specific conditions they have for wellness, with our doctors. These are all done by the doctors and not by the Keshe Foundation. Especially this week, we handed over everything to the doctors. It took us time to set up, to refine the system and everything. And as of last Tuesday, everything now is done by doctors through their operation, and more doctors will be added to this structure. As all the what I call, the fine tuning, everything is completed, that they don't have a problem.

The beauty with this is, some of the doctors who join us is, you don't need to move from your surgery, you don't need to move even from your bedroom. (1:34). Everything done is remote control, by you through the operation in one of the places wherever the system are sitting. And we've seen the results. Yesterday as we handed over everything else, some of the people who went through the process with the doctors. The doctor says, that a child who was heavily involved in ADHD, in a matter 8 weeks, 10 weeks he has become a brilliant child. The family has a new child. Totally unbelievable. And the child wanted to say goodbye, because it was a final session, and his life has changed. And this is the beauty with the wellness system that the Keshe Foundation.

We changed a life at the age of 10 with our doctors. Now it's a life of 10 years, 30 - 40 - 50 years of life, happiness and joy, instead of suffering. And it's the purpose of the new technology, to bring peace and comfort. And as we see more and more, those who join us for these programs for our knowledge to extent, while they benefit with the beauty of the knowledge, we've seen the what we call, the fruits of our work. People with the conditions that they could never imagine, can be changed, changing. People, with accidents, with depression, with all sorts of things who come to us long term, short term commitment. We can't solve everything, but we are learning.

We have a Knowledge Seeker, she's with us now. Burned eye for years, and two or three sessions, the suffering is gone. It's so easy to do. The new technology is irrelevant one is in the other side of the planet,

one is on Mars. One is on another Solar System, it's a human, we have the knowledge, we have the access to what we call, common denominator of the life. (1:36). Why not?

So if you are or you want to test, or bring something new to the knowledge of our doctors, go again to the health@spaceshipinstitute. I want, I have this condition. Please, sort out your 3,000 finances before you come to us. Because it's no use taking our time says, I'm going to find now. This takes a lot of time off our work, and our systems, and our doctors, and it's not needed. So, there's still number of the spaces available for the 100 cases. And then we got to see what happened with the next stage of the development. I thank all those who made the donations in different ways for others to enjoy, and to be there, and to be with.

Are there any questions?

Q: .. In Brazil in the last 20 years, (1:38). more than 3 thousand tons of mercury were dumped into the Amazon rivers, carried out by man's greed in the illegal gold mining. A biochemical time bomb heralded as was the mercury poisoning disaster in the city of Minamata, in Japan. A tragedy announced in the Amazon to nature, Indigenous people and peoples of the northern region of Brazil, victims of mercury contamination. Just like the Keshe Foundation project with Plasma Technology in the decontamination of Fukushima in Japan, can we direct a project to the Brazilian Government for the decontamination of these rivers in these regions of Brazil through Plasma Technology? We appreciate your guidance.

K- We are aware of this. And we've been aware of this for a long, long time. Long even before the Keshe Foundation was established. In nineteen nineties, I was taken by the Russian and Kazakhstan leadership, at that time President Nazarbayev, to look at the lake and how we can change the contamination of this lake with nuclear material. But those days Russians had no regulation and they dumped all the nuclear waste into one lake. And it's actually as good as walking into a nuclear reactor waste ?? pool.

And I was taken there by the order of the President, (1:40). in nineteen nineties, to look, to find a solution for cleaning up this mess, this lake. And at that time I gave a proposal to both, that time was Yeltsin. And that time was President Nazarbayev. How we can decontaminate this lake from nuclear radiation. Exactly what we did in Fukushima. Fukushima, wasn't there, something we're going to do. This was proposed years before even Keshe Foundation was established.

And it's the same, not only with Amazon, with other places. The way I see it in my future work and collaboration with the Chinese government. These things need a governmental support, governmental understanding and intervention. And we see this as part of the possible joint collaboration between Keshe Foundation and Chinese authorities in the coming months and years.

You've got to understand, in Brazil, the government is not interested in anything, which is beneficial to its citizens unless is paid something in the back pocket of your leaderships. Be the governor, be it the district governor, be it God knows up the ladder. They only talk to you when there is something in their pocket. Otherwise, not interested, and indigenous lives are irrelevant.

The contamination has to be done on the scale, which is large enough and profitable enough to do it. One of the reasons when you speak about the Fukushima was, (1:42). interesting I was taken up by the Japanese government and very soon came as part of the share of a company in America, when the people who are inside the Keshe Foundation, actually working with Americans, as a friend of the Keshe Foundation in the

background, took the technology to California and then from there made it into a share in the company, fake patent, and then became part of the assets of the Japanese. And there as Americans.

Where we converted the radiation into white dust gold, and then they start discrediting it, because it was not to be coming out, and they said, we heard nothing about it, the cleaning of Fukushima.

The cleaning up. This is not only Amazon, there are other places with worse conditions than this, it has to come with collaboration, of the new collaboration with the Chinese Keshe Foundation, the Chinese government, and the Keshe Foundation worldwide. What we call, science in exchange for peace.

It needs billions, otherwise, you're still doing what you call, "a cup in the ocean" job. And has to come as a process of peace, a process of gift. In a way, but in a way it's not a gift, we can do a lot of conversion into a lot of other things. The mercury, useful for both the nation and even the indigenous can benefit by it.

And this process has been tried and it works very well. If is given in a way that indigenous people instead of fishing fish and not having any fish, now they can use a condition to clean up, have a living, make a good life, and then do their fishing.

We'll look at this in our future talks and work with the Chinese government, and then I think is resolvable. (1:44). It's not I think, I know is resolvable, but it needs huge financing. And somebody in there that says, "we do it." And with the new policy, and Brazil being part of the BRICS with the Chinese government it is doable. And it's something I'm sure the Chinese government will look at it, in science and technology in exchange for peace.

Peace doesn't mean guns and bullets. Peace means peace of mind for its citizens. Be the pollution, be it the environmental, be it the natural disasters, that governments are there to do. We made a direct talk with the Turkish president in the past few weeks, how we can help, and with his people close to him with the earthquake disaster. And the first question was asked, how much is in there for us? Otherwise, there is no use even getting talking with you Mr. Keshe.

People are dying, and the others are lining their pocket. And this has to come from a correct government like President Xi, and the, what we call, the "Silk Road, One Road and One Belt," has to become one peace science, one peace technology and supporting of the government to do these things, that they can be done. It's not just. The same problems sits in China, same problem sits in Africa and everywhere else. It's how we change the technology to become a financial resources, and what the advancement in technology can bring that pleasure to do it. And I've seen this many times with the Chinese government, even though they always do this for the benefit of the Chinese nation. But it brings a lot of changes.

And it's not the first time Chinese have been involved in these things. They go back years before even you heard about the Chinese participation in cleaning up the environment. (1:46). But in a way, financially beneficial to the what you call it, to the Chinese nation assets, or what you call it, interests.

I saw this in nineteen nineties, long before One Road One Belt came in. Where the Chinese in one of the big African nations. The French and the British dug a mine, opened a mine. They created, they took whatever copper they could take from a mine. As long as it was profitable, and then they flooded it. And it became a huge lake, it was a massive lake in the country. And the price of the copper went from 200 - 400 dollars a ton, to nearly 4 or 5000 (a ton). It took a different shape, but it was a lake full.

The Chinese came in, made an agreement with the government, they made a few hundred schools, they made a few hundred hospitals, they built so many kilometers of the high quality motorway and other things. They emptied the lake totally, and start taking what the British and the French left behind, was not worth taking, to a very profitable copper mine. And they created a lot of jobs, and part of this agreement was for everyone, Chinese expert, 4 locals will be employed, and be taught how to carry on doing it.

But the mine, the area has been ?? useful for long term to the Chinese. So, in a way Chinese didn't need to bring people to work, they could use, and they were paid fair wages. This was the biggest strange thing with the British didn't like, that the Chinese were paying a fair wages in Africa. They were not living in poverty and the villages is more ?? (1:48).

I went to this lake and this area with the Minister of Transport who was a close at that time. We were on the Sunday lunch with his wife was running my offices, he said, Mehran, I'm going to show you how the Chinese are winning in Africa. And now this is possible that... It has to be something, not just cleaning the mercury. But it has to be, that it's beneficial to the locals in cleaning up the mercury.

Don't forget, you talk about the mercury in rivers which has come in. Some of these villages people, were the ones who went and created the mines, and used the mercury to clean up, to get the gold out. They never counted "down the road," it's them and their tribe will be effected by it.

I've seen this one in Congo. People go into the mountains, wash and try to find diamonds, and they create mayhem for the others at the end of the bottom line. Some of the regions at the bottom which gets infected with all these, what I call, hand diggings, and they get washed out and then they blame themselves for themselves trying to find diamonds.

So, there is a solution. Yes. But it has to come from a correct government with correct financing, and not with a bucket in the ocean. And we'll see in the future there is a bigger plan than these things.

Any other question? (1:50).

Q: .. Does the STM man travel outside of the Universe when traveling to another place?

K- It can. It does. How do you think the other Solar Systems and Galaxies created in other Universes? It's cultural exchange you call it. If you can create the field forces of the Earth, which matches in a given position and dimension in the Universe, you get attracted to it. You're preset to go there. Of course.

Earth is a nursery of Souls. And a florist does not care if his flower goes to China, to Holland, or to Africa. He likes to show its beauty and what he can do.

What's next?

Q: .. Good morning Mr. Keshe. See if my line of thinking proceeds according to what you said. Which is, quote, all teachings are to make us become part of the Universal Community and for Man to leave the village of Earth, to no longer be shackled with the repetition of certain actions. (1:52). Unquote. Could we consider being born and disincarnated and born again and so on as an addiction?

K- On this dimension of the emotion of the Creation, yes. But you're not incarnated as a dog or a cat.

Any other question?

Q: .. Mr. Keshe, regarding animals, and birds, etc, as messengers. My dog past three months ago, and when I had her at the vets, two days before she journeyed, I saw a luminous blue ring around her nose. Was she's showing me her Soul telling me she was leaving? And do they foresee their death? Secondly, can the Soul reincarnate in an existing dog that is already a year old defined time? I also experienced what you mentioned about your beautiful mother regarding birds, as messengers on two occasions with loved ones journeying. Thanks very much.

K- We always, in so many ways, know of the journey. And some of us are receptive to understand who goes through and who will go through it. (1:54). And maybe a light on the nose of the animal has been, as the Soul has expanded and created a field in that dimension and position that you could see. Yes, it's quite possible.

It's, we will like to think of it as possibility. Do they tell us? Yes, of course they do. But the same as I said, many times, we can accept Souls. But it has to be accepted by the Soul itself, to accept the Soul. Otherwise it's a mayhem.

And are technologies and knowledge's which can be used to accommodate, or to move a Soul which is not wanted. If one Soul goes in the Soul of another animal, and it's not welcome, he has to find a new place. It is a gravitational magnetical positioning, or you can create another condition to be favorable for ?? that form of what I call, ?? invasion, for him to be finding his own new place. But it needs a lot of understanding. And needs a lot of collaboration from the what I call, "resident Soul." Otherwise it doesn't work.

Q: Okay, we have two questions that are similar. So perhaps we can combine them. (1:56). .. In 168 and 169 KSW you deepen the knowledge about amino acids showing beautiful images made available by Dr. Klaus, and you explained about the difference of strength fields using different types of salt, and you talk about this difference of strength fields, that Man needs to understand to manifest in the Universe. Then you speak about the change in skin and eye color of the beautiful people, schizophrenic people, according to the Soul that is present in the conversation, and that they absorb different field strengths and emotions.

Could you please expand a little more on this knowledge? And Jarad's question is, how to understand strength deeply?

K- We create manifestation according to the salinity. But you have to understand Man uses different words for the same thing. You call it, salinity. You call it, gravity. You call it, Inertia. But in essence, it's the strength of absorption that becomes balance with its environmental absorption, that leads to manifestation. So, when we manifest in an environment the salinity decides, (1:58). what we are manifested in the form and the shape in that gravitational magnetic fields.

If you made Gans's, sometimes you follow the instruction to the point, and sometimes something didn't work, but it actually worked, because .. you cannot see it, but it's in a different way. And you don't use the right salinity, or the right wire, so it doesn't work, I cannot make anything. At the moment we have this problem with a lot of our Knowledge Seekers who are trying to make these kits. They say they cannot produce, and now we have to change the plate, we do this, we do that.

But the fact is, for the manifestation of the fields you have two conditions, one is local, and one is environmental. A lot of you have Gans's in the house and you produce beautiful CO2 at the beginning. And then it goes to it nothing. Because, you know what you did? You took the Gans's out and you put it in the jar, you took it out, you put in the cup, you put in a cup, you put it in somewhere else, you dried it. But, hello. The distance between where you're trying to produce the new Gans's, and the ones you made before is a few centimeter, few meter. And CO2 balance in the room has changed. The guy is not any more hungry, so you cannot see production. Because there's nothing in the environment to create the condition of change. Even you did the same copper plate, you do the same Nano coating, you used the same salt. (2:00). But now changed the salinity a little bit, or add alkaline ?? to it a little bit and, oh, it started working.

So, you have to consider in every work two things, one local and one environmental. And when you consider this, then you become good in producing things. Otherwise you work in a small kitchen, you can't have all the herbs, and all the vegetables in that kitchen, it doesn't have the space. But you put one material, which has a very strong odor, you cannot smell the others. When you go in, you can only smell that thing, the kitchen, the smell of this, because I have a small pack of it. So it's not just what's in that small pack, but it's what creates an environmental condition to. And this is what you as Knowledge Seekers have to understand.

Would your Soul manifest itself in the dimension of P at any given point in the Universe, if the gravitational field strength in that position, or what we call, salinity is of the right order, yes, you see the Gans's, yes you see your Soul as a another creation.

You've got to take the knowledge a step further. Creation of hundreds of millions and billions of stars in one Galaxy, is no different than creation of hundreds of millions of the plasmas in your Gans box. Ask yourself, what field strength the Creator has used, that so much Gans's as the stars have created in this box of the what we call, Galaxy. That's all the Galaxy is, a box without the wall, (2:02). but containing a specific gravitational magnetic field or salinity, that others can match or manifest themselves in a given point, time, strength and position.

So, we understand very easily the implication of the question and application of it. If you create, which we start showing, and there are processes going on to be shown. If you take somebody kidneys out, or somebody born with one kidney, you can create the right salinity field strength, that the second kidney with all its connection will manifest itself in the body of the Man. You don't need a transplant. But Man's knowledge is not there yet.

Any other question?

Q: .. Would it be easier to understand the workings of the Universe and the Soul if we were able to get out of our bodies and experience it? Is this the purpose of the Enhancement Unit?

K- Yes, and yes, and yes.

Next question.

R: Okay, (2:04). you're running through these questions pretty quick here Mr. Keshe. One more open here, which is from Kurt from Germany. And the translation is, hello, Mr. Keshe and to all. Can you update on the Gas Electric Unit and the delivery of that? Thanks, and thanks to all of you.

K- As we said, we'll. Should be online to deliver in the second quarter. We had a lot of, as usual, "developments," and productions and other things. The Gas Production Energy, we've done the principal process, and then we found the easier way to do it and getting it done. But in the second quarter we should be able to deliver it. It's been made much simpler and even our own Knowledge Seekers who work on it to have not seen how easily it become. The production of these things doesn't take long to do, once our team complete the thing and then package.

It's like the what you call, the Plasma Home Enhancement Unit, the small ones, the gray boxes. We are testing and finding things, and then goes through the checking with what you call it, for certification ??. The whole process will be like this. The first unit to be submitted for production of the gas, and the what you call, conversion of production of electricity. (2:06). We produce enough, now it's just in a way, completing the cycle of the production. Producing the Gans gas now is as easy as drinking water for the Keshe Foundation people. It's just how to put it in the right order and the other things controls and the rest of it, and it'll be there in the next couple of weeks.

R: Speaking about drinking water Mr. Keshe. Do you think that people should be experimenting with cups and so on, that are for plasmatic feeding during this time when there's some experiments on your, at your end going on, with the plasmatic feeding and what not?

K- They can do whatever they like. What people do.

R: Would it interfere or have any cross interference?

K- No, Not really. It should not do because it's, you just created another condition.

In the coming time in our work with, where we will concentrate to develop. We'll provide a technology for creating water, rain. But one of my biggest fear has been, once you introduce this technology, knowing the greed of the Man, they will start using it in deserts. They'll still using it anywhere just to create rain. (2:08). And this will bring unbalance to the natural life of this planet.

Creating condition to rain for days in an environment using the plasma technology is as easy as drinking the water. But what I don't like to do to introduce technologies like this, is the abuse which bring massive changes in a very short time. So, water production is not a problem. Abuse of it is my biggest concern.

Unless we deliver what we did in past couple of weeks, with the plasma, we showed how you can satisfy and receive water as saliva. You .. had the feelings most of you. Then, yes. It will come worth doing it and releasing the new technologies to coincide and be part of this development.

R: About the creation of the water, or in the case of the feeding process, the creation of the saliva, the water of the mouth, or water of the body in a way. Was an interesting topic in the Keshe Plasma Reactor Group. I wonder if you can talk about that a bit, and especially in relation to the comment you made today called, the quote would be, "the superhighway of the H." And we know that saliva, (2:10). or water, or that Gans of water is H, O mix, supposedly. And we know that there's H in space, you said that many, almost a decade ago, or probably over a decade ago now, about the H atom in space, taking it, the fields of it exist out to, you know, maybe a meter around that single atom. And so because there's more than one atom of H, and in each

cubic meter of space, then in effect, all the H atoms are in communication with each other, they're all rubbing shoulders, you could say.

So, it's same thing in our saliva. In the mouth, we have the H₂O, and it's part of the information superhighway of the, what's called, the largest organ of the body, the interstitial fluid of the body. So, it seems like we have this superhighway both inside of us, and in space, and I'm wondering if you can sort of fill in the blanks there a bit, or am I stretching things too far?

K- You're stretching it too far, but not too far. It's near enough. You've got to understand, saliva, or water it's a tool, it's not the end. So you decide how this tool will manifest itself as a water, as a saliva, as a field, which manifests themselves in a condition, that allows other Plasmas to float within it. We call it, liquid. (2:12). So we decide, or subconsciously our body decides the salinity and whatever we need and what creates for us.

This experience you most probably has happened with a lot of you, you're walking with your friends, they say, oh, we want to go to MacDonald's, and you have no desire for it. But they clean themselves to go in. And you say, okay, I'll come in we will have a MacDonald's. But the fact is, one of the people with you has the gravitational magnetical field matching with the odor, emotion level of what is in the shop. And you just are slave to them and just walk. I don't know why I'm here.

We create a salinity gravitational field strength, which matches to near enough, to somebody near enough to love, or somebody, or ourselves at the same time, feel the same. Oh, I wanted to ask you to go for a lunch. Oh, I was thinking the same, I say, I want to go there. I was thinking to go there. So, hunger brings a specific common denominator, emotion. And then by going to it you give the physicality, you and your friend. We look at the science of living in a different angle than the Man does, and that's why it looks so strange.

Any other question?

Q: .. The Near Death Experience. What is not correct in this experience of people and different with the Keshe Unit? (2:14).

K- A big difference. We don't bring you near death, we bring you to near life. The life in the Universe, but connected to the physicality in the dimension of the STP. Near Death Experiences, just that you go through the whole process. But the last leg pulls you back with what the body has not decided for you to go.

Any other question?

R: I like that term "near life experience." And yeah, that's a good one. I don't see any outstanding questions. This is amazing. And no hands have jumped up, not even jump in Jalal. So I'm not sure what to say Mr. Keshe.

K- That's good, we can call it an early day.

R: You even answered my question. So I guess you're really off the hook today.

K- That's good. We don't have to be three, four or five hours or whatever. We try to complete the process of teaching now that we have opened a new Pandora's box for you, what we call, the emotion. And the essence

of emotion within the dimension of the Universal fields. And then we'll see how Man can benefit by this, that it guarantees his return to the point source of the life where the original Soul was created.

Thank you very much. (2:16). And hopefully, we'll see you next week. And please, please let us know if you need any of the what you call, equipment clearly. And how many of them and whatever. And about what we call, the 100 cases, which are there, if you have any kind of ?? wellness for our doctors to look into. Thank you very much Rick. Thank you. See you next week.

ENGLISH TRANSCRIPTION

(:10).

K- Good morning and good day to you and as usual, wherever and whenever you listen to this series of Knowledge Seekers on the Keshe Foundation Spaceship Institute, we welcome you back. And as I always say, we welcome the new knowledge. What it will bring us, what will it change in us, and what it will be changed inside us, by the knowledge we gain from these teachings.

We have taught in past few weeks about the Soul, about the Universal Cosmic Rays and Cosmic Rays (CR) and everything else, but we took it to space .. (Break in Audio

.. what will be interesting for us in this space of time, (:12). is what happen when you come in touch with another Soul. When you walk down the street you see the man, you see his features, he is black, he is white, he is yellow, blue eyes, black hair, whatever. We categorize it, he is Indian, he's Chinese, he's English, he's Scandinavian and the rest. In the space Man doesn't have eyes, that's for sure. Man even travels in the dimension (D) of physicality (P). As long as he keeps himself in a field, gravitational (G) magnetic (M) field of the Earth condition, we'll see, the same as he always does. Once Man moves in the D of the Soul, once man moves in the D of the magnetic field of the Universe (U). In the Universe, how do we recognize another? How do we know, is it from that planet, or from this planet, or is it from a galaxy has no physical home, but lives like a nomad between the space gaps of the 2 planets, or stars, or whatever.

And in that process, the way we recognized the Black, the White, Chinese, and the rest. How do we categorize these people, these Souls? How do we interact with them? (:14). Or would the, by the experience of the connections to universal, what we call, pool of the knowledge, we instantaneously know who they are? What are their lives? What are their dislikes? What do we have to avoid? What we have to do?

I was talking to someone very recently, and I said using the Cosmic Ray Headphones, you cannot lie. When you see two people sitting opposite to each other, they speak the words. Sit them in front of each other with the silence, no word, with the two Cosmic Ray Headphones on their head and see if they both still sit. Am I fully in front of each other.

When a world leader sits in front of another one, and he has all sorts of what I call, devious intentions, in the word of the man he can speak perfect, I have no intention of doing this, and I have no intention of doing that, and we are doing this because of this. What will ?? the world leaders with the Headphones on each other, I

wonder how they'll react. I wonder how you will react when you connect to the Soul, when there is no lies, when there is no covering up? No interaction of the Soul of Physicality (STP) in the dimension of the emotion of the man.

What would you do with the "Passenger of Universe?" How do you connect to yourself? (:16). How do you come to understand is this good for me? Is this not good for me? The others are not food anymore. So mentality of the man from eating, if he is a food, or is it a friend, or he wants to kill me, is gone, throw that away. Now it comes, how can I give to him, or to it, to become better than me, that my life, my what I do ?? has need, becomes a source of being for him to elevate.

We're coming to Easter. Tomorrow it's a Good Friday. And this is what the Christ did. He gave for the others to elevate, to understand the message. Were the human race "alien's" to him, that he had to do it in a different way. Or was it the way, that he could bring man to see what is the ultimate sacrifice? Giving the dimension of physicality, but knowing in the knowledge of him, he was transmuting in the dimension of the Soul. Where the STP was ?? with it, and then you call it resurrection. In a way, he appears in the dimension of the same, but in the same environment.

Now any of you today listening, and if you understood, can resurrect. We call it transmutation. In the word of the theology, it's a "resurrection." (:18). We are testing and trying. Now we have a system. We have a technology. We have a knowledge about the resurrection.

In production of material systems, we don't do anything, but to resurrect. We create the field. In the dimension of the "Wellness," we don't do anything but to resurrect. We copy the field that the body needs, by the same brain to restructure itself. We have chosen the same word for different things under different disguises.

You take the copper (Cu), you Nano coat it, you create a Gans of it. And then by the use of the Gans you create Cu again as a dust. Many of you have done this. Have you become Christ? Or now you understand the science. But in that process of resurrection, you have to understand, would I become, when I resurrect, when I manifest myself, do I put my Soul in danger? Do I put the Soul of the others, which are in that environment in danger, as plasma of the fields create space gap, MaGrav space gap, the space and distance.

Now we understand, truly man has to come to understand about this own creation, and his own reincarnation. And his own truth, the way he is. (:20). The way now he can manipulate the field forces of the Universe to the benefit of himself, then what he has done on this planet. Manipulating the dust into bricks and (building) homes. Manipulating one thing to another to have something. Now man has to learn manipulation of plasma, which itself leads the resurrection, of matter the state of the plasma, or the condition that plasma creates.

But what would you resurrect yourself, in front of the entity which has no dimension of physicality except energy? Is the word the "ghost," is a good example of it. A phantom, till we give you the reality. We're going through tests in transmutation, or "resurrection," whatever you want to call it. Why do our passengers cannot manifest themselves, even though they are present in the room? It's very simple, the lack of trust. Trusting in one's physicality to manifest itself in a new D.

What will mankind do in the Space? On Earth, because of the condition we are in, more or less will come out of the same roughly, few bits here and there. You leave Washington as a man, you appear as a man in London. (:22). Maybe do the truth about the way your Soul works, the Energy Center works from the

information it has with the physical body, MaGrav. In Washington and you got a black eyes and brown hair, in London you become blue eyes and blonde hair, because the Soul is "fed up," being that there. He wanted to try, to see how it looks when he is blond and blue eyes. Does he get, attracts attention? You know what happens if you meet a friend, who saw you there (in Washington) and he (sees) you here. And he says, "is that you?" Was that the intention to be, or the desire of the Soul, that you never satisfied?

There are interesting times ahead of us and from what we see in the coming time, conversion of the fields into the matter state, state of the man will be completed in the next few days. And in the next few weeks, we start the transmutation. Our scientists have to understand the technology (T) to be able to do it. We had to develop the technologies to be able to do it, and we are on the brink of that point. But the problem for you is, you appear on Moon in the body of the man there is no air, there is no water, (:24). but the STP of the Man wants to appear a man, as a man. Lifespan will be limited. How does the STP of the Man, is going to react and what Gans's it produces?

You have to remember something very simple. Many of you would understand something very strange today. I described this been teaching for some 20 years, today we unravel it. You put the Nano coating to create the fields, and you put the Cu as ?? Cu. You filled it up with the water of the salt, the containment gave you the limitation. The interaction of the fields gave you the Gans's, which took shape of the container. Call the Nano coating, the Soul of the Man (STM), and call the Cu the STP of the man. Contain it in the salt water of the body of the man, (:26). The Gans's produced will create the man, depending on the condition and the information you give it, of the planet Earth.

When you travel the span of the Universe, the STM will carry the STP of the man (inside himself), what would be the man in the space of the new "box," of new environment, where the salt, or condition of the interaction of the fields, creates the condition of the fields of life, in a given time, and space, and position. In a way, the teaching of the "Creation of the CO2," or any other Gans box, was to teach you about the creation of man, and the ?? time in space.

Now, it's you who has to learn. Now it's you who has to understand the interaction, and inter work between the two, and see how your Nano material will link in with your Soul, how would it be connected to the Totality, (:28). in reality of what we call, life of the man. Now, you understand your Nano coating Box is the man himself. We taught it this way for you to gain trust, to understand that the fields you can use, as a field, as Gans's, and then use as energy to transmute, to become.

If one understands this process, one understands what has been taught for past 10 years. Then it comes to one point, and one point only. Would I allow, would I allow my physicality (P) to be opened up to become, in a way, the Soul of the new life? And would I accept the condition? And would I be there to accept the condition unconditionally, where I only interact in respect to the environmental condition and at this point of manifestation, time is "zero-time," because it did not exist. You could be the first man in a given position. It's your Soul, which it travels with the STP in it, to create that condition.

So now you understand. (:30). After years and years of teaching, and Gans making, and showing you how you put them in this, and that. And they give energy, and then you use them to make matter state, it has been all about you and your life, your existence, your physicality, understanding of the Totality. And when Man understand this, Man will have no fear of transmutation. You should have the fear of transportation, aircrafts crash, cars kill each other in transportation, ships get sunk and everything else. When you travel with the Soul, there is no ship, there is no cars to crash, there is no tankers to sink under the water under the oceans of

the Universe. Then that should give you confidence, to learn to become part of the Universal Community. In a way of becoming the structure of this Creation. The only part of the knowledge for you as Knowledge Seekers (KS) that is missing is in depth, you have no knowledge of it, "Voilà, I go." But in the dimension of life where suicide is forbidden, is because in that process of the transformation ... (draws lines of C12 & C14 connecting 2 circles)

<< Audio Breaks >> (:32).

... transmutation and transportation, which ?? have no choice but ?? with the carbon ??, the combination of the interaction of the field in a different dimension. Once you learn this, once you understand this, then for you to travel the span of the Universe, except a few times you get lost here and there, you appear as creature you never thought you could be, and somewhere they dumped in the ocean of the fields that you couldn't imagine you could survive, but you're still there, and it took you a few thousand years to get yourself out of it. But you get out of it at the end. But then you find out, I can transmute myself back to it. Even though the planet you left a thousand years before has changed. Man maybe have become more civilized. Anything is possible in this race of the Man, it's unpredictable.

So, how much trust do you have in going from one to another? But knowing that it could be a different feeling of understanding of transportation and transmutation, appearance at the point of the time and the space anywhere in the Universe? Then Man will let go. But you have to practice, you have to learn step by step, lose the fear. Lose the fear of getting lost, lose the fear of, "I'm won't (be able to) come back to Earth." You don't come back to Earth when you die, anyway. You have a connection with it, but you can't come back. You're a seed of a star, trillion lights away according to the Man's present knowledge. Light of darkness of the knowledge Man calls it's the light years gap. (:34).

Ignorance has given credibility to stupidity. Excuse me, can you explain to me how many light years my Souls is on the way till it get to the point of its manifestation? Would I have enough energy to last 10,000 million years for my Soul to arrive at the destination? Man has not understood the science of Creation has created a fallacy about the science of himself, and limitation of its own understanding about the Creation of the Creator. Can you imagine God sitting there for your Soul left the Earth 100,000 million light years ago to arrive at its station to create another half a billion years, and millions of years a new cycle of life? No wonder one of His attributes is patience.

Now you understand that for you is to learn, to understand, to trust about this point of transmutation, using the fields of the Universe to arrive in the dimension of physicality, or dimension of the Soul. But I show it, that you understood in the dimension of physicality, you're welcome to burn carbon and fly. In the dimension of the transmutation you're welcome to not burn a fuel, (:36). but travel on the magnetic field of the Universe. You're ?? a saddle bag. This is the reason why some of you see (think), when I go through the transmutation I just become a pizza (delivery), I don't move, I don't shake, nothing happens. Yes, the Soul has left, goodbye. You're just sitting for the physicality to move itself.

Now, mankind has no choice. Now mankind is shackled with the dimension of the Inertia of this planet. And now Man has to come to understand the Totality of his existence. Why he is connected to water, and water is the life of Man? In a way, mankind has passed the exam by cheating too many times, ?? dying at about 50 - 60, until somebody comes and, "oh, would you like to have a Bible to read, to understand?"

We have to come to the point to have trust, because the next step for Man arriving at a point ?? << audio breaks >> interacting with another Soul << audio breaks >>. How much I can take? (:38). And these two are not of the same strength.

The time, the place and the condition of life becomes independent of physicality. But essentially dependent on the Man's intelligence to understand the condition and the position of where P manifests itself. How can he benefit the two? How can he put the brain back? And how fast can we educate the rest of the humanity to become part of the knowledge of understanding?

And then how much of the C14 you want to have the mixture with your C12 to get to the point of destination fast, but don't go through it, because then you have to have more energy ?? to get ?? then you're back where you started. Mankind has to learn to separate the two line of communication of P and the Soul, the condition of the C14 and C12. The existence of within, that in combination of only and possessing, one place with the dimension of the plasma. And one the other place in the dimension of the matter state of the same plasma. You call it, the body of the Man. (:40). You call it, the controller, which is STP itself.

In the coming time, we will release technologies, which will give more confidence to people.

In the coming weeks, Keshe Foundation will run a one week, ten days seminar. Selected 200 people will be invited to the seminar for a week, 10 days. For them to start the first process of understanding, transmutation and transportation. In this process, not many of you will be left out. It will be taught in a proper way, that in the future you teach the proper way. The 200 people we choose from those who apply will be limited to another session of one week, with 65 of the 200. To be taught the second stage of transmutation and transportation. All this will happen in the next few months. The combination of the two sessions will prepare this first cycle of people, that are ready to become full time passengers of the planet Earth within them. (:42). We'll teach you in depth this process. You're not coming for a holiday, there will be a lot of sweating and a lot of work.

In a way we teach excellence, and in a way, those 65 will become the point of reference for teaching the others the dimension, in a way, losing the fear of transmutation. Many of you will come to become the teachers of the next cycle. And then we choose amongst you, those who stay to become the Keshe Foundation Space scientists. We are not looking for PhDs, we are looking for understanding, work, transmutation and transportation of the STM. In the space we have no PhDs unfortunately, and no ??, and no University.

Those of you who want to join, this is an invitation of the Keshe Foundation, and not by manufacturing, or the sales side. We choose step by step, and we will bring the 200 together step by step. The first 20 - 25 will be ?? in time invited in the next few weeks, (:44). to join us in this program. Those will be taught to teach the next cycle what we call, the 200. And amongst those we will chose the 65. If we can achieve this rapidly, we complete. So, in a way, we are looking for the first 25.

Then as usual with the Keshe Foundation, we decide very rapidly. We close the request, the name, the address and whatever, by this Sunday. We did this some years ago, we taught MOJHANS. We did this the years before that. We did, the Knowledge Seekers joined me, 6 of them, 8 of them, for a few months. It's time for Man to learn, it's time for Man to do the next step. And it has to be done, it has to be sorted. In a way that now the systems are getting ready to go, we don't wait, we are ready as the systems are ready. I will choose the first 25 handpicked, on my own.

We have to wait a few seconds, apparently Rick has run into problems, he cannot hear us. (:46). Rick, do you want to restart or do you want me to carry on as the host?

For those of you who will join in the first 25, if you join the Knowledge Seekers teaching in ?? Tranni (Italy), it will be a hard solid week. It's not a holiday camp. It's as you've been when I teach, it's 9 to 5, 9 to 5. By then you will understand the next step of understanding. Then, when we choose the second cycle of 200, it will be split, that it's understood thoroughly. And then the 65 out of the 200 we teach, will be chosen in a specific way, that represent the Totality of mankind. Race, religion, creed, color, and everything else which goes with the separation of mentality. The first 25 we close this Sunday. As we would like to start the sessions around August, (:48). as a cycle of completion.

And maybe in September or November we do the cycle of 200. And then we do before Christmas the 65. By that time, many of you should have been through the transmutation and transportation. And then we go to the process of mass teaching in the coming year. We chose the 25 very carefully. And we in a way, closely get it vetted, that we know people who come are not just there for what I call, testing. They will bring commitment. And as usual with the Keshe Foundation, these kinds of things you have to cover the cost. We put the time, the systems, the effort, and you pay for it to become a student. I close the 200 by next Thursday. And by... for the 65 we close that in around October, September. You'll be told, you're chosen as one of the 65.

Your life will change, your understanding will change. And in a way the process of the what I call, the next cycle will start. (:50). You'll be taught the works and the life in the space. What you've been taught in past few weeks about transportation and transmutation was fundamentally taught to the what we call, MOJHANS, five or six years ago. And gradually has phased into. This time we don't have that time. And it has to be done very rapid, because part of the technology completion has become very rapid, and we've got to complete. Those of you who want to be part of the first 25, you will have to complete everything by Sunday. We have a reason to put such a short notice on it.

Nothing will be on the Keshe Foundation website on this, because on the Stores and the rest, we are not selling a product, it's a knowledge of the Keshe Foundation. You have to get it through the Foundation, that is not something which the sales what you call, as a part of the structure. We have valued these teachings as totality at 10,000 Euro. You can pay for it. There is nobody not to go with it. There is no credit store and the rest of it. Once you are invited, (if) you don't take your place. What you have paid for goes to another person.

In a way, I know one of you 25 will fail to turn up. (:52). And it keeps to what we planned, at 24.

You've got to understand, your life will change beyond recognition, for you and the way you live. Everything what you have done will have a different meaning. Everything you could imagine, Man will achieve in the space will start this cycle. Most of you will become the first transmutation transportation people, which the Keshe Foundation will take over.

We are not sitting to go to the next phase, we go to the next phase directly from the beginning. Our systems will be ready for the first cycle, and the second cycle, and completed for the 3rd and the 4th. Some of this work will be done in conjunction with one of the governments in the world, which means a collaboration between the Keshe Foundation and a nation. (:54).

Those of you who come to be the first 25, you will understand it's not a week of just lectures. It's the week of the change of the STM advancement, understanding, progress, understanding the totality of the what we call, transmutation. And then how to transfer it. The first 25 people then become the teachers in conjunction, in the way to understand for the other 200, in a way to become the bigger cycle. The beauty of it is that the 65 will be chosen by you amongst you, not by us. You collectively as a 200 group will decide who you see to be serving the humanity for the transition of the ?? time. This is the way we chose the members of Universe Council. And it will be the same for the passengers of the Universe. (:56).

We allow, we have reached to that point of moving on and completing the process, and start getting as we say, "your toes in the water." You'll be taught everything is needed for you to complete the transmutation and transportation of your own Soul and P. And you have to be able to ??. The reason for it, we do it in the numbers and the bigger numbers is that, to take the taboo out of what we call, "celebrities," that (only) certain people can do. And those who getting chosen by 65, you become a life long, life teachers of the Man to become Man of space.

As I said, our plan is to establish the first colonies within next two years with the government of China on the Moon and Mars. These two destinations will be your what I call, "practice field." In a way, we are training the new cycle of Man to learn, to test, and to move. And instead of putting you on the run, on the runway to test the flight, we give you planetary ?? because even the Earth and the Moon will be so short. But at least it gives you a dimension of knowing what to do. (:58).

We will establish bases that you can still manifest as a Man till you learn how in a new dimension, when you move out of the colonies, that you can live a life on "Planet Moon." And the same with the others. Our work with the Chinese government will be thoroughly examined a step by step. And it will be placed on the condition that we provide all the technological background for the need to establish the colonies. And then from then on, you've done your "driving test," you can pass, and you can take the dimension of the course of the Universe. You decide where the next step will be, not us.

It'll be interesting during the time of these sessions, how many of you will choose to be at home at night, and come to the sessions during the day. It does not matter where the home is, California, Tokyo, Beijing, Tehran, or whatever. We encourage you not to book a hotel. As you can go home and come back. There are no accommodations supplied for the cycle of the 200, especially the 65. (1:00).

We are ready to go, and we have taught you everything you need to do, the equipments are ready, and Man will become the "Passengers of the Universe." Then in a way, see how many of you can do what the Christ did, to resurrect. Don't be on the way for 4 days with the rocket, be there in 4 seconds by the knowledge of your Soul. As I said, the serious play has started. Because the equipment to allow the STM to expand and manifest itself is completed, and it's near completion in some other angles, that will come in the teaching in the future time to come.

Understand, those of you who come, we invited to come to these sessions, that you're coming for a life experience change. And I hope, as we said, in 2023 we'll take Man into space, the true space, without the monkey clothes and space suit, but through the space of the STM.

Then we start teaching you other dimensions and other what we call, knowledge that you need to know what to touch, what not to touch, what to take from and what not to take from. (1:02). And these are all fields and not animals for you to eat. Remember the experiment, which was done by Alekz years ago, he wanted the

orange juice in the morning and he took the orange juice. And he wanted to get drunk, with the same water he got drunk. It's the field energy that makes him drunk with the knowledge, and not alcohol.

Understand that we have entered the true time of space. We commit ourselves into a new space development, a new understanding and new systems. And many of you will understand how to process this on your own. I wonder how many of you still want to go to the Moon on a UFO. And how many of you will go to the Moon by the knowledge of the Universe.

I see Rick still has a problem with what we call, recordings or the voice.
(Some problems with showing commercial videos >>>)

Break >>> 480th KSW April 6, 2023 (1:12).

K- I hope you can hear me and we wait till the Rick comes back. If you raise your hands, we can promote you, if you have any questions to ask. Can anyone hear me. Can you type it in if you can hear? Okay, thank you very much. Are there any questions or do you want to wait till Rick appears that we can promote you to ask a question? As we are recording on Zoom channels then nothing will be lost, everything will be kept and recorded on different channels, YouTube and the rest.

In the teaching of today we try to bring a new dimension, we try to bring a new understanding. If you can write it here in the Q&A, on the Live Stream, which I have access too to answer your questions. If you cannot, raise your hand. (1:14).

I have no access to ??. There are two questions.

Q: .. Can you consider thought a voice? In the science of silence of the thoughts at the time of intention for the elevation of the Soul of the world leaders, is it important? We appreciate your guidance.

K- When you say if the thought is a voice, in the dimension of the communication that's the only thing you hear. (1:16). Thoughts are creator of emotions. The same way as you think in the physical dimension, so does the Soul. It's a process of interaction. So, yes, you hear it in dimension of the Soul. You interact with it, with the dimension of the Soul. Thoughts are field based generated entities, and yes, it will be ?? trans ?? as much as the emotion.

The new Enhancement Units, what we call, the Head Units, will bring a lot of diversities, a new insight. What I call, we could not see till we created the night vision glasses, and we see in the night. We will have the same with the new tools. Man, will see what he has been blind to in the dimension of the emotion, in the

dimension of thoughts. And this will become very, very clear in the first stages of even during the transition of the transmutation and transportation.

Which one is real? Which on am I? This was the dimension of physicality, now I'm in the dimension of energy, or what we call, plasma. These will be the cycle that you will all go through. (1:18). It's very much when you wake up and say, am I still dreaming? Am I walking? That's a condition which come in it. And then you have to think, these thoughts belong to the dream, these thoughts belongs to ???. And where do they match? Which emotion is the reality in which dimension? Because they're both real.

And how would I react in the dimension of physicality when I in essence get the information from the thoughts and the Soul? Nowadays, physically we touch, and we carry emotion. What happens when you're in a position that physically touch, and the emotion is different than what you think? There will be no mistakes. There will be no misunderstanding, what is the intention of touch? What's the thought behind it, because this both will be clear to the Soul and the STP, and P which carries it out. I had no intention, it just happened. But, excuse me, the Soul at the dimension of the thoughts says, that was the intention. You cannot lie anymore. Life becomes much easier and much more transparent.

Q: .. Mr. Keshe, question on the Knee Gans. I'm no longer in pain when I do any physical work. My question, are other will have the results as well. .. Antonio?

K- This is a magic liquid, (1:20). and we're getting the same answer, yes. Monitor that you don't use it more than 7 days. If you leave the water on the skin, this will take up the imprint, and it's there. If you get a pain just goes away. And then when it comes to repairs, the time of its, what we call, work. It's nice to know that you got the results you were looking for. But you have to understand where the cause of the pain is. Is the pain, is to do with ligament and cartilage? ?? We need doctors to monitor it, that it's changing, it's going to where it should be.

Q: .. Because the brain has an emotional part and a physical part, what makes and condition this, since the two sides have very similar structures, physical aspects?

K- They're not. .. There is a huge difference between the structure of the emotion and the physicality of the body of the man in his brain. Even in dimension of the fields. .. And because we never had the knowledge we analyzed things in the wrong way. And most of it we haven't seen even to analyze, we don't have the knowledge, (1:22). we don't have the tools to analyze the real condition, the real ???. And in that essence it's ??.

The emotional part, and the physical part. Emotion has a dimension of plasma, physicality has the dimension of matter state, but in the plasma condition, which is a very different thing. You still touch the Gans, but these Gans's, everyone has an interaction with the one next door, the next cell, the totality themselves in the system. So there is a big difference, even though one is the Creator of the other.

And it's very much, it's like the interaction of the same, creating the same, and then a new dimension. You have the magnetic field, and you've got gravitation. They interact, this creates a mass. But in creating that mass, they interact with what created them in the dimension of the field strength of the planet, then you get the Inertia. Then you get the weight interaction and confirmation of one to the other.

And so, this is the way the Universe works. And the sooner mankind understands this, then a lot of what I call, misinformation, lack of knowledge, will be sorted. In a way you cannot ever in the world of the Creation take one interaction. Because the minute you create an interaction, (1:24). this interaction itself, interacts with what .. created it. And this gives you a new dimension.

?? Who push up the gravity creates the mass, and the mass is independent, because when you have two plasmas their mass is always interacting the same way. So, two similar conditions, so it's constant. It doesn't matter if you're on the Moon or on the Earth. But when you bring in the Inertia, ?? play of the same fields in a different dimension, then you get an interaction with environment fields, then you get weight. That's why you weigh different.

It's the same way the brain. Brain has a dimension of physicality for physical connections and running, but they themselves interacting, creates emotion. And then when they interaction of the emotion comes back to it ?? , and you get a physical reaction. But there's still another dimension, now you created a new dimension.

What this Man has not ever understood, which this itself now interacts with the STM. Now, you have an Inertia of the Soul. You have manifestation of the fields in the dimension of Soul, and that it gives the what we call, the emotion of the Soul in interaction with all other Souls. You are as a Soul, that ?? once remove ?? Gans of copper (Cu). And there are millions in there, and you're interacting with all. If I move you the others move. If I squeeze you the others react in the field dimension. But you might not see anything in the physical movement.

So, you always have to learn, one has to always consider, you created a plasma field, but this plasma field now interacts not only with the others, (1:26). interacts with its own creation, or what creator as well. I explained this in book number one, if you understand it in the dimension of the weight and mass and Inertia. Then you understand there is no end to it, it's just what you take out to be. Which field of it interacts, which doesn't.

This will come to life when you go into the cycle of transportation and transmutation. You see a field, you feel a field, does it interact with me? Or is it a field, which I have no common denominator, connection with, but it interacts with dimension on my magnetic field of my Soul, in a specific way. I react to it, I go less to give you one, or take the other one, then he takes what he needs from what I'm giving, because I was given too strong, and it doesn't need it. So, he reacts, that interacts with my reaction, that it allows him to be fed. This is part of the process of the feeding when you come to it, then you'll understand.

Q: .. Can you give me .. more information on the preceding of Dining with World Leaders? What can we do to support the process?

K- Not much you can do, except to keep on the interaction with what you felt during the process. (1:28). Establish a new line with other world leaders and force that position. And Keshe Foundation has taken a direct action in this matter. And we stay on course to see the world leaders coming to the point of agreement of the world peace. But through science and technology, delivery of the new sciences which makes the old obsolete and it brings new dimensions to Man's work.

You've got to realize when we deliver to the government of China a technology which makes nuclear missiles obsolete, who is the superpower anymore? Superpower over the "bowl of soup"? There is no superiority. When you deliver technology which the tanks, most advanced tanks have no bullets in them,

cannot fire anything. Where is the superiority and ?? ? Isn't it that the tank driver gets out and goes to the other one, let's shake hands, we can have dinner, forget about the ???. What's the use of sitting here, and pretending you're sitting in big things.

Advancing in technology will change the course, which makes the old system obsolete. I was explaining this to a very powerful politician in the past few weeks. I said to him, do you know what's the difference between me and Da Vinci? He said, no. I said, I'm not a painter, that's one thing for sure. (1:30). But Da Vinci went from leader to leader in Italy, to sell them the latest weapon technology he could get, and they'd be better to kill. To be better than the neighbor next door, and take their territory.

I deliver new technologies to world leaders to create peace with it. And to see who's more powerful to create a more peaceful time. Then my problem is not mine, it's theirs. Because superiority in knowledge brings wisdom and what we call, humbleness. And this is the difference, where we have to deliver through our Soul. You are all involved in it, not just me anymore.

To change the course, through the Soul of the world leaders, how many of you put your head down in past weeks and months, and you've supported the Soul of "so and so" as a leader? But you don't see yourself to be at that point, maybe your Soul is even higher than them, in the strength that you carry, and it's your job to give.

The change of the course will come as many of you have seen. And we not only change the Soul of the world leaders, now we are giving what we call, ?? creed and knowledge to it, that makes the new what we call, advanced weapon technology obsolete. And when you do that, we have no more Superpowers. We only have powers to create superiority in knowledge and peace.

So don't think, what can I do. (1:32). If a leader comes to your mind, give to him. Make a habit (of it), that they need it more than anybody.

<< Rick adjust his audio >>

R: Well, I've had some issues after the power suddenly went out and for some reason my powers power supply that normally kicks in for a few minutes just did die as well. And something happened to the sound and all that and altered things. I'm having trouble getting it all to come back. But I think I have it working now. I'm broadcasting to live stream.

K- Okay. You take over.

R: Thank you.

K- .. I have a private message regarding the 25 people and 200 people. (1:34). You still send your confirmation to the usual channel info@keshe.foundation. ... We'll get the information and then any other channel usually correspond and you get a response back from the Foundation, those channels will be opened and be tested. I was asked the fee of 10,000 Euros. This will cover a lot of things because systems have been developed and there are expenses to cover for the systems. There are going to be more systems and more things. And as a Foundation we do not ask for funds from outside. So as Knowledge Seekers you ?? know.

The ones who get chosen for the first 25, will go into the second session of the 200, with no, what we call, the fee to be paid, so it's just carrying on forward. And the ones who gets chosen for the 65, you don't pay any more fees for the final sessions, you'll just get added into the structure.

As you remember when we chose the first eight Knowledge Seekers in 2013, we went through every single one, we try to be correct, that we don't take our prejudices about one nation, or one color or one race or whatever. We ended up with murder attempts on me with poison by the Knowledge Seekers who we allowed to come in. (1:36). This time, we are very vigilant and we'll use national security clearances for those who attend these conferences. And on top of it, we use the technology of the Keshe Foundation to understand through the Soul.

So, if you are and you want to be part of it, especially some of you from the first 25, might end up to go to the end of the 20 what you call, 65 people, it's just that one fee. There is no more. And this has to be concluded by this week, we have a structure, we have a reason for it. You enroll, you send your (request) "I would like to be." We do the rest of it, and you will get a communication from the Foundation, what to go and whatever. Your fee has to be paid directly to the Foundation. There are no ?? fees, it is as a donation to the Foundation, the Foundation providing the services in the background to the whole lot. But this all has to be completed by very, very, very rapidly in the next few days. Because we by experience, when we leave it, it just drags on and people come up with other things ??.

We try to accommodate most of the students on summer holidays, that you can accommodate to be there. It doesn't take part of your work, that you have time to do it. And some of the work will be falling with you, in back home. And we are on course to do it. And some of the 65 where they all go to become the residence of what we call, the program which is sitting with the Chinese government ?? colonization. So, we train and we carry forward. We train and carry forward. (1:38). And the Knowledge Seekers trained by the KF will become equal to the Knowledge Seekers provided by, what you call, the scientists provided by the Chinese authorities. We merge the Knowledge Seekers with the nations support. And then that's part of our work to do.

A lot of this will take two years to complete and process. So, if you come in at 25, more or less you're committed for life to serve. Do not come in that I become for the week. We gradually train you, we teach you. It'll be commitment for life to serve humanity. This step will go there on to the next step and the rest.

We are not a sect, we are a scientific organization, and the science has been taught by the people who feel it, and live it, and they can transfer it. So, many of you will join at this point into the programs of what we call, Knowledge Seekers. At first to define the Knowledge Seekers to be, and then the 200. Many of you enter a life commitment to serve. It's there to be done. Most of you should have seen this coming months ago, and now we ?? are on it, (1:40). And we act upon it and our what we call, Knowledge Seekers are ready to go to the next step.

If you notice .. why chose 65, it's one Soul for every year I lived on this planet. At the present time, and this is a gift to humanity. ?? Candles of knowledge. It takes time to mature into it, and it's not there, "I come to do - to go."

You can sponsor others, you can sponsor yourself, but once you sponsor you have to understand they have committed themselves to a bigger change. You've got to realize as we're going entering a new phase of development technology, as you tested with the world leaders, as you tested with the food, there'll be more and more people who will see no reason to be on this planet to suffer so much. And as we provide the technology to become passenger of the Universe. In the U everything is created and available, why should be

the point of suffering for the electricity, the food on the table, a place to live, where ?? our place is in the Universe. (1:42).

The uptake of transmutation after the first cycle and the ?? of the Knowledge Seekers will be ?? horrendous. Many people will not want to be in the dimension of P of this planet. As a friend of mine said, every breath we take we pay taxes on it. As they say, taxes, birth, and death are the three guaranteed things on this planet.

From now on birth is guaranteed on this planet. Taxes does not exist in the space, and if you understand the dimension of the expansion of the STM, death is a long, long way. And as we provide and clear this technology for more and more, you will understand more and more, people will go through it, ?? want to be part of it.

Many of you will say, I have a cancer, I'm dying, so at least I'll do this. It doesn't work that way. It's not an escape route.

Any other question?

R: I'm just wondering where we are in the Q&A here. Have you covered the fruit fly question yet?

K- No, we don't want a fruit fly. (1:44). Is that the question by Antonio. .. I saw it.

You can do on the health@spaceshipinstitute.org too, if you want to join in, you can choose everything. .. The channels are at foundation, and health@spaceshipinstitute.org these are all open. We go through it very rapidly over the weekend, and do not wait for response back. Go through the process of everything which you need to be done, and you get informed.

Remember, we already know the Souls which are going to join us. I cannot put it any better than this. We know those of you who will be part of the 25. And if you feel that you have to be there, you're already chosen to be there.

Send your request complete. Don't forget, we need two things from you, your email address and a telephone number. A lot of times when the Keshe Foundation responds, our response goes into your junk, if we don't get a response from you, we can call you. Make sure you include in there, my name is whatever, telephone number, email, I want to be one of the 25, make your payment to the Keshe Foundation Holland only. Not to PayPal, not through other channels, which the Keshe Foundation usually pay. This is a program through the Keshe Foundation International, it has nothing to do with operation. (1:46). These all come in as a donation.

You'll be called to join in and then we start with a consent that it fits all 25 of you to be at a place, and a position. Then, after that week, we go into the 200. The same will be with the 200. Those of you who come for the 200 you have 1/3 chance to become one of the 65. So, understand the commitment to the next session.

Those of you who joined us in the teaching from Trainni and Barletta (Italy), you know, when I teach it's nine to five, it is nine to five, there is no gap. And it's download of information, technology, understanding and everything else. There is no space gap, there is no, "we are going for something." You come in and we take you right through it. We are not putting you to become MOJHANS, you already have learned everything to go to the next step.

You become representatives of the STM. And in that process, you will learn a lot of things about yourself. You will learn how much you have changed. And you will learn you will live the dimension of the STM, more than the dimension of P. Transportation and transmutation become part of the natural process of life for all of you. (1:48). This is why I told you, don't tell us, where do we book a hotel. You go home, you come back next day. Home could be Los Angeles, home could be Beijing, home could be Tehran, it's irrelevant. There is no booking, hotel booking, is not our job. You have a home. You come to school, and you go back home.

We go through this process and make you ready for the first cycle of transmutation. Please make sure you understand what is to come. It's elevation of Soul, it's the knowledge which is within your Soul to become interactive with the work which the Foundation set up to do.

If you want still to be part of the 200, make the same commitment, do the same straightaway. Because once we take the first 25, you go into the 200. We will not judge a Soul, we will not judge a Man. (1:50). Your Soul will be judged by itself, and if you have that, and you feel that, commit yourself to it. This is what you've been waiting for, is on the table.

Technology has matured to the process of the conversion of energy to matter, and the matter to energy. STM to STP and P. You've got to understand something very interesting, is that when we start making colonies on the Moon or anywhere else, we cannot create rooms by continuous rotation at "1G" that you feel as human ?? on Earth. We create condition through magnetic field forces the same as Earth as "1G", which is a totally different concept.

There are no bricks, and no centrifuge. Then you're allowed to go out to test how your body will change. Would you have 10 legs and 20 arms when you go into the space of the Moon or Mars, or another position. All these now is a reality to the Man to go to the next steps of space exploration. We explored space with the physicality of the Man, and we still "rocketing" it. We travel with the dimension of knowledge and energy of the STM. (1:52). And we are "Souling" it, and it's you who have to ?? and it's you who have to make that step.

Any other question?

We're going to finish this session round about 5:30 I have to be in a meeting. So, if there's any question three is about half an hour.

R: You didn't want to address the fruit fly situation there. Is that true? Or would pass on that question?

K- I know this question. Do you want to read? It says, Mr. Keshe in the area we have a problem with fruit flies which destroy our fruit. You want to read it?

R: Sure. My thought comes for the next season I was going to try Cu Gans with amino acid, but then this may affect the bees which is necessary for pollination. So my question is, is it possible to target one insect and not the other?

K- Yes. I'll write to you separately, how to do it. It can be done, and it is very, very effective. Mr. ?? we'll talk about this separately. (1:54).

Q: Lynn .. We have a question from China, they say, do I need to go to Austria to attending this 25 or 200 cases of this transmutation?

R: I think your microphone is off Mr. Keshe.

K- Yes, you're right. We will not disclose where the 25 will be and the same will be with the 200, the time and the place. It will be somewhere around August, July, August, September and it could even be in Beijing. It could even be in Austria, it could be anywhere. But because there's a process we have to set up. Some of you of the 25 will be taught and brought into the cycle for the last five what you call it, the last session of 25, weeks before, days before.

We will prepare you when you arrive. We don't start from zero. We have the systems and in a way you'll have a preparation prior to wherever we decide. (1:56). There should be no problem if you got to be, wherever you got to be. Just because you're Chinese don't think you have to go somewhere else, it could be in your own nation.

We are committed to the Chinese government development of peace, and in time in due course we will establish a permanent representation in the Chinese government. So, don't think Linz will be the place where you go, it could be anywhere, even be Shanghai.

Next question.

Q: .. How do you explain the formation of light in "eggs" LED from a Plasmatic point of view?

K- I don't know. I don't know what he's talking about. (1:58). ...

Q: .. In the last teaching you said that you cannot travel through the Universe, because you are the Universe. Is this like a mirror, we have the same inside as we see in the outside, Earth, Moon, planets? Or please, can you explain more about this? Thank you very much.

K- Repeat the question (repeats question)

There's not much to explain. It says what it says, it does what it says.

When we speak about the light, most of the time is the light of wisdom, and not the light as a vision. And it's an enlightenment, understanding. And all knowledge is inside the Man. And when you have the knowledge you have already traveled the Universe to gather that knowledge. But in a way, as a STM you (are) connected to the collective knowledge of the Universe. (2:00). It depends how you call it, to come in.

It's very interesting, many of you in during these trials will face this, you have no choice. "You are in it, as we say, to the neck." When you go through this process, many of you will never talk to each other. Many of you will understand each other. None of you, if you do it the right way, need any translators. If you're here to be part of this group, you already will live through the dimension of the understanding of the knowledge of the Universe.

How do you speak with the person from planet Zeus, they have no alphabet, and there is no voice coming out of their body? So, you don't have that language barrier. You don't have that what I call, cultural barrier,

because you carry everything within you, because you have access to Totality. It's a different ball game what's to be opened up.

And the reason we're doing it in these numbers is that we can't have suddenly 25 Methi's, and 200 Methi's appearing. This is a collective delivery of the what I call, knowledge of the Universe. It's an interesting time. Very, very interesting time. (2:02).

Remember years ago I said, I'll bring you to see the Soul of the Christ, I'll bring it to meet the man. And many of you who went through the EU met the man, felt his Soul. Some of you touched him, told us the color of his eyes. Whatever I say, I fulfill. It's just that you have to understand, you've got to be ready to understand.

This weekend is a what I call, the celebration of the elevation of the Soul of the Christ. Many of you wished for a long time. A couple came, they just came to see, to feel the Christ, and we did. And that's the promise I made, and many of you came and you ?? did. And now it's the same, the next stage. Above what was done by the Prophets, which makes, does not make you a Prophet, but makes you enlightened to understand the knowledge of the Creation. We can't, we won't bring six or seven and make them ?? this. The large numbers take the hypocrisy of prophecy out of the whole work.

Any other question?

Q: Is the STM in a gas state? As gas not Gans state.

K- I don't know. Test your, get yours MRI and have a look at it. It is always in a state of plasma. (2:04).

R: Always in a state of plasma. It's interesting. Okay.

K- Of course it is, it can't be in any other state.

You, Mr. Rick Crammond, years ago showed it, but never understood it. You filled up your ball of Gans's of water, and it became hollow in the middle. You created the soul of that entity. You took it as hollowness. I took it as a STM, because it made the decision ?? place in that structure. It's not interpretation, it's understanding.

In most of the cases with the work of the Universe, the heavier, denser material have a smaller combination of structure of souls. Depending how that material is done. The much lighter and non-denser have a different, what we call, structure. And this is why man needs such a small position, some of it micro millimeters, as position of the Soul. You've got to consider the feedback and interaction of the fields, I just explained between mass and weight and the rest of it. (2:06).

I just received a private message. Please if you have decided to make the payment to the Keshe Foundation in Holland. And it's got to be done, more or less for the next few days. We go by the numbers 1, 2, 3, 4, 5. And in that order completed you will be invited. There is no lottery draw, there is no, oh, I was there, and you were told you are the first 25 or 200. And then it's your responsibility amongst you to choose the 65. Then the rest will follow as ??.

You've got to understand, when you are in the first 25 you will be with me around the clock. And you will be enlightened in direction of the STM. The same as when you came to Tranni, as Knowledge Seekers. You were there 24 hours a day. We're there to bring the change.

And the Soul of Mitra will be amongst us. And in that process we will bring in massive changes.

Any other question? (2:08).

Q: How do you explain the formation of light in an LED from a plasmatic point of view?

K- What?

R: The LED is what we call, a light emitting diode. How do you explain the formation of light in an LED from a plasmatic point of view?

K- It's a physical matter point. LED's are matter state condition.

Q: .. What will be the role of the Universal Council in creating peace for the creation the democratization of actual geo-governance. The alliance between trans-nationals and big powers?

K- None of them will exist to have any connection. You will understand exactly what it means when it happens. (2:10). The big powers, are big powers as long as they control the food, health, the energy supply, and some of them has additive added bits, they call themselves, nuclear. When you provide everything to them, there is no power, there is no big power. Technology will bring that, superiority will be in elevation, not in what we call, weapon technology and how much you can store.

Then there is a lot of milestones which are coming up, that most of you are observing it, but you don't understand. In the coming time, most powerful world leaders will be put to judgment. We've seen that with Trump. We will see that will come with other world leaders. And then we realize how we have allowed ourselves to be run by a bunch of "misconducts," whatever you call it, people. That will come and add a lot into how human society will organize themselves.

As they say, one third of the parliament in India all have been on record, prison sentences for fraud and the rest of it. They're still members of the parliament, because they have the money, they don't pay their staff. (2:12). They have to work for them or whatever they do. And the other half we have in the European community. Huge number, percentage of the members of the European Common Market Parliament they got their hands well what you call, lubricated as we've seen, millions of dollars cash in their houses, and their bank accounts and everything else.

So, nobody will go with these things. And you find out there won't be a big power and there won't be big multinationals. As they're multinationals as long as they can control. We have put a framework around it in a very way to .. it's been disguised. But in the next few months you will understand how I have already set up the structure that, what you wrote has no meaning. And it's already operating within the Keshe Foundation, it's all been set.

It'll become the problem for the government's to handle this, massive problems. Go back into what we put month, annual fee for food, annual fee for health, annual fee for energy, annual fee for blah, blah, and the rest of it. If you are Brazilian and you pay into the structure of what we set up, which is in whatever it could be, you don't consume anymore, you don't rely on energy on your government anymore. (2:14).

<< It seems that the audio of Mr. Keshe breaks here >>

R: Still there Mr. Keshe?

K- ... you have not seen it. ..

Any other question? We are coming nearly 5:30 ??.

Q: .. Can you please tell us about the two children with the genetic defects. How are they?

K- We are still working on them. This is in the hands of the doctors. And we see improvement, we see changes, we see development of other weaknesses. You have to understand, when we see a development of the weaknesses, which wasn't there before, this was planned five or ten years, five years, ten years, even in the womb of the mother, for any genetic changes.

They are doing well, we saw a very good what we call, improvement with. There is not a setback. But these are the things which are set by the brain years ago, it's part of. It's not, you say they are five years or six years. But don't forget, these genetic defects inherited goes back to the father and with the grandfather. (2:16). So we have to do a lot of things in the background, or the body has to do to change those. They're doing well. I heard from the doctor responsible for it that a few weeks ago, the boy, the older boy, had to be pushed up the ramp. Because they built the ramp to go to the front door, he has gained the strength to go up the ramp on his own. But these are small steps.

We see the younger one, new signs of the what they call, the disease showing itself. So we have to monitor, and see and change the system. The systems will change in the next few weeks, and there'll be interaction much more powerful. The doctors will have. I'm not in that circle anymore. I don't, I'm not in the, what you call it, hands on position of the, it's all going to doctors and next cycle of that process.

But next week, the cancer patients of the doctors will receive a new what we call, add on system to work faster, help the doctors with their problems. It's an evolving technology. But these two boys, the mothers are happy, the parents are happy. But we have to see how much we can change, we have to go now into ingrain changes within the grandfather. This is where our problems sits. When I look at it genetically. They're doing well.

We had the first child who was brought to doctors with the ADHD very massive problems. He has finished with the Foundation last week. (2:18). And the schools and the parents understand the change. And he's become a new boy, he started a new life. And I hear, we have another ADHD boy who has joined in on the back of the other one. And the parents have seen the change in their first couple of sessions with the doctors.

These are radical changes, as I said to the people who went through it with us, you would have had a lifetime of misery, pain, conflict and bring disharmony in the family. Now you have a family who lives with lovingly, caring each other. Caring for each other, understanding, and the time which was there for the problem, which was with ADHD and the other things are not there anymore. It's time to love, it's time to enjoy. It's beautiful to see how a boy could have been always in trouble, and ended up most probably something, problem in the society, most probably end up to become a doctor, engineer and professor.

And that's where this technology counts, the future of mankind. Change is slow, slow, on the basis to. As a young boy now he has every opportunity to become the dream of humanity. You've got to understand, with this technology we change the structure of life of people for the better. And that comes for them to do it for themselves, not by us. We just create the ground for it. (2:20).

Q: .. Can you explain why when the physicality is inside the Soul it feels like being inside the womb of the mother?

K- It is the reverse of the process. That's all it is. Because now it's cocooned inside a field energy. The womb of the mother is an energy, it's a Solar System. That's we are in with the liquid, it's just what you call, another plasma condition. Now, the STP is inside another sack of energy. That's why you will be, you will understand this very, very rapidly.

Ask one more question, and we say goodbye for today.

R: I'm trying to find another question here. So just a minute.

K- If there's no more question everybody knew we'd have to go today ??.

R: I think you've cleaned it up. Thank you. (2:22).

K- Please, those of you who want to be as part of the 200 and 25, do it as fast as you can. Then we will go through this process and many of you will come to understand why we made such a rapid move, and how the change will be. Write to info@keshe.foundation or health@spaceshipinstitute.org. All the payments have to be only through Holland, and we only process them (up to) Monday.

Please understand, those of you who come as 200 group, you will have a very, very different kind of life when we finish with you, or when you finish with yourself. Thank you very much for today. And I hope today we opened a new door for many of you to come. Thank you very much.

480th KSW April 06, 2023

END

481st Knowledge Seekers Workshop; April 13, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Bigger structure than our Creator; everything alive; C10 - C16- C18; Understand Inertia & gravity to manifest P; "Inertia of Creation"; Jump out Spacelab; Colonize Moon; Create Inertia; Travel inside body with Soul - heal; Replicate inside Soul; Don't need to kill plants to receive energy; Emotions stress field strength; Gans feeding - not yet - gas liquid matter; We write the books; Food is seed to attract 80%; Bleeding stimulates blood; Hormones create emotions - Menopause; Girls play with emotions; Mass is Gans - Weight -Emotions; Vortex T - hair holes vortex energy into body;

ENGLISH TRANSCRIPTION

(:10).

K- Yes, good morning and good day to you as usual wherever and whenever you listen to these series of Knowledge Seekers from the Keshe Foundation (KF) Spaceship Institute. We welcome you back ... to a beautiful setting of teaching. The teaching of today is, more or less follows what the Intro comes from.

We call it a "Creator" in the dimension (D) of Physicality (P) we connect the connection of Man in the D of P of the man, we call ?? to ?? We go to Cosmic Rays (CR) and we connected through the D of what we call, carbon 14 (C14). Connection of the direction of what we call "crystal structure," clear transfer of energy, on the back of hydrogen (H).

As in many teachings we have explained. If we call it the Creator, the Creator has to be part of the structure which He is created out of. (:12). And then it becomes a bigger D, a D the Man has not understood. It's like our Universe (U) is a cell in the kidney of a man. It's a world of itself, operates on its own, has billions of sections and whatever. It has a U and Unicose, but at the end it's a part of .. , an organ, part of the body of the man. And that man from outside is observed by the others, they don't see that cell of the kidney. The collection of the cells makes the man.

And if man in the D of the P, transmutes his D of emotions through C12 in the vacuum of the body of the man, and the U and Unicose transmutes itself through the D of C14, again a source of the essence of the creation of H, common denominator of. What was the Creator, and how does the Creator communicates in His own environment? And what beauty from that D comes, that it becomes the food, .. the energy of the Unicose, that it becomes the energy of the U, and part of that U ?? are with Him. We eat an apple and the energy of that apple reaches every cell which needs the energies of that apple.

The question becomes what are we part of? And what we call the Man who, the organs are part of, without it there is no kidney. Which part of the process of the creation are we in that structure? (:14). It's a living things. Universes move, the axis move, the sun and the earth and the planetary systems move. What are they feeding? What is there ultimate goal of all these essence of interaction of the fields of the U, the Unicose and the U that man has not come to understand.

What we call the Prophets of the past have indicated that there are different levels. Now Man with the knowledge has opened some of the levels, the Soul of the Man (STM), the Soul of the Solar System, the Soul of the Galaxy, the Soul of the U, the Soul of the Creator. What is that Soul of the Creator part of, which it's created out of, interaction of its fields?

The other point which goes back from micro to macro is, how do ourselves within the body of the man, within the kidney, within the heart of the man communicate with each other, that allows them to find their positions, distance, and their composition?

How does our body recognizes the 3 layers of the skin to protect from outside, balance between the two, and protect the inside, that nothing goes outside? How does one skin on the tip of the finger, (:16). and one skin on top of the arm connected to each other, that they know they are responsible for each others work, and they have to contain each other? How does the skin of the man communicate with the other organs, keeping your heart and kidney in the same position? Is C12 , is C14 in different strength part of it. C12 only works in the matter state. In the body of the man there is no C12 and the effect of the field of C14 behaving like C12, in the D of the absorption and the rest creates dynamism in the body of the man.

Then it comes what do we need, what do we have, what do we need to understand about the totality of the Creation? Does the cell of the body .. works on C10? Where the totality of the body of the man works on the D of the C14 in the vacuum condition, and outside matter state is C12. How do our scientists take a blood from the body of the man and then when they test it, they give you that it is magnesium, that it's Ca, and everything else in a matter state outside the vacuum of the body of the man?

Where has the knowledge of the man has missed the information? And where has the body of the man has come to, not to understand, the difference between the D of the vacuum, Inertia, and everything else in respect with time, place, and position. (:18). In the body .. if you take a kidney, kidney has its own Inertia according to the position of the centralized system of itself. Even the lymph of the man has its own Inertia, that it manifests in that vacuum, what happens inside the body .. in totality of the ?? majority, it has nothing to do with what happens on the outside. You walk in the sand, .. in the heat, you walk in the cold, .. rain your ?? knees don't change characteristics. They still operate, because they are operate separate. They operate on their own structure. They have their own Inertia.

And for man of the science to be able to become the physicians of the space, man has to understand this creation of Inertia according to the time place and space. In the body .. , in the galaxy, on earth or anywhere else. Otherwise you will never ever manifest yourself to be observed, to confirm your existence.

The biggest problem for the physicians of today, even ?? coming to cancer is that the doctors, our physicians, and scientists have not understood the creation, the amalgamation, the Inertia, which creates that condition, that the cell of the body of the man they come together, and we call it a cell of cancer. If you change the Inertia, in the condition of the position, there is no cancer.

Where the new technology (T) is getting developed and getting expanded into the world of the science. Very soon man will know how to get rid of cancers, (:20). which is the biggest nightmare. Even the Knowledge Seekers (KS) who have been working on this have not understood. And if we do, we become magicians. Do we need to do magic that people understand the science is different.

In the coming time, the scientists, those who investigate the depth of the knowledge of the Creator and the creation, have to observe, have to understand the interaction of the fields, which changes the Universal fields to manifestation of the position and time in respect to the fields of the creation, and in respect to the Inertia confirmation of existence. Which means what Inertia do we need to confirm the P, does not matter if it is in the D of the plasma.

Then the question sits for man on both ends, what Inertia, what line of communication happens in the cell of the man, in the minute layers of the kidney .. what happens what line of communication and interaction happens to the Creator of the ?? man. How does He communicate with His environment, how does He get the knowledge and confirmation of existence? Then you understand on both ends of the scale from the created to the creation, it's all the same.

What we pray to, prays to another. What we live through, lives through another. (:22).

Man to be successful to transmute from the point of his own creation, to his Creator, man has to understand the line of communication. And then the position of the strength of the Inertia of the existence. We call it gravity. We call it ?? miniature gravity Inertia. But how does change the position. What does the gravity of

the Earth in the D of the plasma of the solar system has led to the creation of the Earth. Can we replicate this gravity and all its facets and assets and ?? failures to create another D. The same.

Or does this position of the creation of the Earth with its Inertia, which has led to the emotion of the man's creation of itself, can lead to the misconduct of the man in the D of the Soul in another part of the U.

Isn't this why we are here to correct it, as we had enough of the misconduct of the Souls which left the D of the creation from this planet, and their own more creations is based on the wrong strength fields of what we call, Inertia of the Creation. Greed of the man to kill. Greed of the man to destroy. Greed of the man because his "boss" did not supply (enough energy). If your husband doesn't bring enough food home what do you do? You go to the neighbor, you go shopping, you go and get something to survive. (:24). So is the behavior of the man on this planet. The planet does not supply enough to confirm, to feed the local Inertia of the need of the body of the man. So man kills, like the wife going shopping. Man and everything from his environment 80% (20%) man goes shopping. Shopping another Soul , shopping another seed, shopping another plant. But this time the shopping is eating, slaughtering, and the rest of it. When you do not have enough, you get it from somewhere even by stealing.

So man has become a thief of other lives. And because he does it, and everybody else does it, has become a norm. We all do it, because don't eat for 24 hours, don't eat for a few days and you die. So we all become thieves, and we justify our theft that we want to survive. Because the Inertia of planetary system, the Inertia of the body of the man system has not managed to create the condition to absorb what it needs from the free fields of the U. We are all murders. In a way, we close our eyes because everybody else does it. We call it "meat eaters," we call it vegetarians, we call it every other name, except, accepting the truth, that we kill to survive. And it's normal, because we can justify it.

What happens if the man changes the D of that 20%, and the wife does not need to go shopping. (:26). Man will not need to kill. Then it comes to another point in the long distance in the education of the man, will come clear. Does the Creator does the same in the D of His own dominion, and His own Inertia, to free the structure of the U and the Unicose, which is within Him?

Then it comes to understand, when the man becomes a traveler of the U in a very short time, do we understand this, that we do not need to create the D of Inertia manifestation of P in the dominions and the places where he cannot create the totality of the need of the man. Then would this create a new D for existence of the man?

We went from C10 to C12 to C14. Does our Creator lives in the D of C16, for His communication and extraction ?? of the fields of His own U. Does the Unicose work on the 16, and the Creator on 18. Or is it just packs of energy we have put ?? names to. The bigger you are, the more you eat. A fish is like a ?? little ?? and the bear with a full stomach. (:28).

This is how we have to understand. This is how we have to go to the D of the ... Knowledge of the Creation. We are on the verge of becoming the travelers of the space. In the next few years man will ?? travel around in the space the way he could never dream. Once we start the colonization in the next 2 to 5 years with the support of the nations. Where will be the next step? When we build these space cities. Do we test the reality of the life in the space on what man likes to see, to be in the space. Do we become realistic? Would the science of the space become part of the life and living of man?

And then the question for many of you, now that you have learned about the D of the Soul, what you have learned you can travel by the D of P is, how do I teach the Soul of the Physicality (STP) within me to become obedient to the law of the Creation and accept that it can live with different dominion of Inertia, that does not need to lead to manifestation.

Go back and look at something many of you do on a daily basis. You call it electricity, we call it, production of energy. What happens when the knowledge of the man extends to the point, that he understands that he doesn't need a rotating magnet and the Fe for him, for a Cu for him to create electricity or energy. (:30). We don't see rotating magnets in the dimension of matter state, and we see so many lightning and thunder.

When will Man this knowledge. And then when you can do this, what does it absorb, what does it bring? Where mankind missed the knowledge of the Creation? Does our Creator subjected to the Creation by itself? Or, has the Man become subjector and ??.

What is interesting to us is how do we become part of the process of the T of the Creation. And how do we become part of the understanding of the Creation? How do we extend our knowledge to the point that we understand the dominion of manifestation, (:32). confirmation of existence without need to confirm P. You call it, the state of dream. We call it, the state of understanding, we call it, the understanding of the Totality.

But the reality is different, than what we've been taught in the schools and the Universities of the Man. All the knowledge of Man is based on Man's understanding of the matter state, not on the understanding of the fields of the U. And would we, and do we need to extend the knowledge of the Man to the dimension of the Creation of the U. Otherwise Man will not become the Man of the U, because he doesn't know how to survive. I let you loose from the space station, you suffocate. I let you loose without the "monkey clothes" of the NASA on the Moon, you die. Because you think you need that Oxygen. You gasp for what it is, the matter state of the Earth.

When will you learn that the way you jump off the side of the pool, into the pool, and you swim for a time in it. It's the same as jumping out of the Spacelab, you adjust yourself to take energy from the environment and change to it. We do that at the point of birth. We are in the beautiful swimming water of the womb of the mother, and in one instance we change to air breathers. (:34). When we change, that instead of breathing air, we jump into taking energy from the Universal level. That we have no fear of jumping out, and we can keep the position and the condition of the body of the Man if we want to.

Then, the colonization of the space is a reality of this minute. at this moment, not in twenty years or fifty years. Or as a guy told me one day, we believe in Keshe T when it's on CNN. What happens when there is no more CNN, and the "Fox" doesn't control it? The name of the owner goes with the animal that it represents, the fox, the thief. So, are we thieves of our own P? Or have we "foxed" it out of fear, of not understanding the truth about the Creation.

Try to create conditions that it gives you the line of connection. I can build you all the systems that you want. UBEUs and the rest, Head Units, and the rest, but when will you learn to allow the emotion to subside. The magnetic field of the body of the Man to harmonize, that allows when you choose, the STM to travel the span of the U without the P leaving the Earth. And don't call it, "a dream."

In the sessions of Addiction coming up in next few weeks, on the 28th or so, (:36). of this month, many of you will change this challenge. You have to, you will be ?? chained to it. We are not testing you if you're a

drug addict. You are learning not to be addicted to killing. You'll be tested not to be addicted to the air of this planet, that controls you. As we said, our work has hidden agenda, but that we can not bring all out, because many of you will not do, what to learn, but you become another "copycat." You come to learn not to be addicted to alcohol, but in reality we are working on the Soul to learn how to become the passengers of the U. You are happy with your alcoholism, we are happy to make you a Man of U. To open the dimension of the STM.

Then it comes to a simple thing, how come the KF systems can do it, but we can't, and they become a magician, and we are not? Isn't it true, and the fact is that we take the D of Inertia of the P away from the STM, that allows this Man himself to become the representor of his own Creation in D of his ?? creation of his ??. The whole structure of the Creation is like a line and a brick. It depends what that line is and what that brick is. The line of Creation is the H, single structure based energy. And the bricks can be C16, C14, C12, C10, anything you want to call it, (:38). carbonated the way you like it you name it, but in fact has no D, it has a strength field D, that at a given point is structured, manifests itself according to his Inertia.

And then how do we create that Inertia. Go to Book 1, and read the Book 1 thoroughly when it comes to Inertia. When it talks about the M field and G field, and understand now that we understand the Plasma in a different way, what does it mean. You looked at it on the matter state the first time, look at it this time at the point of the Creator. The words are the same, the ?? intelligence (or intention) of the Man which gives it a different meaning. Then you can create anything in any D. Then you become the magician of the U. Because now you can create what you like, what you think you like. What you think others don't know, and if I show it I'll be smarter.

Then Man has to come to understand the Totality. Then Man as to come to understand the D of P, and the D of the fields of the U. And then how to live in both D, or through the interaction of the two, lives in the D of the emotion of the existence. (:40). Man can live happily in the emotion. Does not need to have a connection with the Soul, or the STP, or, what we call, the "Inertia of the Creation." When you put the STM within the structure of the P of the Man, you have the problem of feeding it. When you put the STP of the man, within the STM, what would the problem be? If the Inertia of the location of the position is not controlled, it's not understood, if it's not balanced within itself.

This is the point in many teachings, in a hidden way, I have tried to explain. But maybe today we can just open the door into this. A little gap, a ray of light, that it might open some of your eyes to the reality of the Creation. And fear of departing or letting the STM to bring in the position and D of the STP within it, what you call the point of death. Man can die at any point if he feels it. Because he will become the light, he becomes the plasmas energy. The fear of the Man from end, now it's the joy of the Man in his hand, now that he understands the knowledge of the Creation.

How do you change a field of your body to become the Soul of the Creation, become the Inertia of the matter state of the Man in the condition of the fields of the ?? life , energy fields of the STM. If the STM contains the STP of the Man, what we call, (:42), the Inertia of the Man, Man ?? can even manifest itself within the STM in the D of P. Isn't this what Earth does within the structure of the Soul of the Solar System? Are we any different? Haven't we understood?

Is there a planetary system within the structure of the motion of the Sun? What we see outside is the reflection and the twin set of the system inside. This is not far from the truth. Read the Book of 3, where we talk about cluster of the stars and the galaxies rotating in different ways than the rest in that region. Our U,

internally lives and interacts with what is outside it. How does our U shine in its own Unicose? Are we too far from the edge to see the light of the Unicose, which interacts with our Solar System of the Creation of the U?

We come to understand more, we come to see more, we come to comprehend more of the knowledge. But, we have to understand the truth about the interaction of the fields. How do we change a field into Inertia? How do we .. change a field to what we call, Inertia of a cell, Inertia of a planet, Inertia of the Solar System, and Inertia of the U, that we can manifest ourselves anywhere, in any position, place and time?

Would the time come, as we wish to travel into the span of the U, and move to the Moon and Mars, in part and in connection with our Souls. (:44). We travel within us, we go to the cell of the cancer and find how we can change the Inertia. How we ourselves through the interaction of our own Souls, and STP can heal ourselves within us? Then becomes a magic? Or is the lack of the knowledge has created a false magician?

In the coming time, in the process of the systems, which are getting developed, we teach you how to do it. I've done this with KS who are close to us. We ask them to go in and feel the liver, feel the kidney, feel the heart. They tell you the liver is weak. It's shriveled, it's this, it's that. Some of you KS here, you are those who've done this with me. Then, how many times, and the way I have told you, try to give energy from the Soul to the organ. Try to give it the Inertia at the condition of the fields of the Creation.

As we go into the excursions of the U, we have to be able to go to the excursion of within ourselves. Those KS who've been around with me in these matters, they know, they touched their livers. They say, how is your kidney, it's not feeling good. (:46). So, give it the energy. Try to give what you can. Try to learn how to give to yourself from inside.

What we teach is not just theory, it's practice and many of you in different ways, and many of you understand it. But now has to become a global knowledge. It had to become an understanding of the knowledge, not only for Man, but for the citizens of the U. The purpose of the teaching of today is to teach you, for you to understand both D, within and without. What is outside can be achieved inside. If the Man travels in the D of another planet and U, Man can travel within himself too. Do you choose C14 to go, or you choose C10 to go within. These are all energy packs, we give it names out of our own ridiculous stupidity of not understanding the truth.

Do you give a glass of water to a new born child when it's thirsty? Or do you give a drop of water to a grow up man to satisfy his thirst? Both does not work, because Man has not understood, there are "horses for courses." You have to understand what is needed, but in the strength of the fields of the U, not in the size of the cup and a drop. (:48).

Humanity is entering the process of excursion into the U. Would you like to go with the "donkey" of the UFO? Or would you like to go with the "jumbo jet" of the STM? Both are an option on the table. But it seems, that Man prefers the donkey. Because Man can sit on it, the way he sits on the knowledge of the Creation and denies the rest. The way the Man kills and deny the truth, that he does not need to kill. Because he can tap into the U energy and satisfy that 20%, when this planet did no do. If the planet Earth would have released, would have absorbed the D of the fields of the energies, which we supply through the Gans's, which is part of its own creation, would any man ever kill to eat?

The new language is much nicer and much funnier. I'm a vegan, I don't cook it, I eat it raw. It's like when you go to a steak house, the American order, "American", which is just the "minced meat," not cooked. What's the difference between a vegan and the Man who eats "American?" I do not know. Except the lack of understanding the truth. They are both taking in the life of another entity. But this time we don't cook it, we are going back to the time when the man had no knowledge of fire. Back in the evolution of the science. (:50). Then the question for many of you is, how many "funny labels" will turn up very soon on the door of our restaurants - "raw plasma," "vegan plasma." Then would that vegan plasma, become another entity and life in another D, and direction of the Creation. Hypocrisy in knowledge has led to stupidity of man in life.

Understanding the process of the connection between all D is the reality of what we call, existence in the U. Try to understand not only the connection, but manifestation ?? as ?? to, as that connection can give you a manifestation that you ?? will not ?? like. You try to go to Planet Zeus, and on the way you made a mistake, you landed on a kidney of a cat. "Ops, where did I go wrong in it? How long do I have to stay here till the cat dies?" You get yourself in a very bad moment, if you do not understand what the ?? is with the knowledge of the Creation.

Understand the process of interaction. Understand the process of the Creation. Understand the interaction of the fields. (:52). Then you understand the gravity. Then you understand propulsion. Then you understand how positioning in the dimension of the fields create a new ?? D.

In a way gravity in the space travel have the same meaning, if you understand in our space nuclear reactors, how we expand this knowledge. How do we bring the knowledge of the nuclear into the knowledge of understanding the Creation. When we speak about the nuclear, we have to speak about the energies. We don't look at what is there, how many protons, how many neutrons. We call it, this is a nuclear material gives alpha radiation, beta radiation. We are not concerned if you have 200 electrons, or 2 electrons.

Now you have to understand that process of the interaction, which leads continuously, it does not matter in which D and strength, to Creation and the release of alpha radiation. You get it from helium (He), as much as you can get from Plutonium. Then you come to understand energy transformation, interaction of the fields of the U, interaction and creation of multi-layers of gravity, that each one gives you what you need.

The gravity of the Solar System in the D of its Inertia, leads to creation of the gravitational field of the Earth. In fact our gravity is there, because it has been allowed to exist within the Inertia of a given space, time and position. It's gravity to us, (:54). but it is Inertia to the Solar System. It's Soul to us, but it's Soul of the Physicality (STP) in the D of the fields of the Creation. Then Man needs to know, in a way, where and how to create, or live within both. How can you create both in the same D, and create the dimension of ?? living.

We call it, green house. We bring the glass and we create the condition of the desert. Creates the condition of the forest in the middle of the North Pole. And we bring the animals of it there to show, that we are very good ??. We see the animals exist, the plants exist, because we managed to replicate it. Why can't we replicate the condition of any corner of the U within our Soul, that within it we don't need to travel the span of the U.

The strange thing is, we know how to do it. We call it, a feeling. We call it, a emotion of, "oh, my dear, I know how you feel, I've been there." I feel your pain, and literally, actually feel the pain of your child, because you know through the interaction of the fields you are connected to it. Do you need to travel the span

of the U to get the emotion of the Man in a given time and position? To feel the emotion of the U in that point and its Inertia? (:56). Or, have we ignored another D in the path of the existence?

How far, how deep, we have ignored the knowledge which we have just to live in the D of the P? And how much hypocrisy sits within our own confirmation of our own existence? Today's teaching is to open your eye, as usual, to another D and creation, to another structure, to another understanding of the Totality. Then mankind become wise to understanding the process of the Creation.

Do I need to have C16 energy to reach the STP of the Creator? Let alone the C18 to get to the Soul of the Creator. Or do I choose the path of H to get in, and when I get in I boast it up to get the energies, which is within me to get to that point. This is what I've said many times, if you understand the process of the Creation of life, in one second you can reach the Soul of the Creator. It's just knowing which line of travel to take, to reach. Not, all goes, and got it wrong. (:58). So, end up in the ocean. It depends which way you took the road.

Try to understand the process of the Creation. Try to understand the process of interaction of the fields. Go back in the teachings, how many times I have told you, don't look at the MaGravs. Look at the field of the MaGravs. And if you understand that, then you have opened a new D in the process of Creation. But all you're happy is, plug it in. You have a knowledge through the MaGravs to the source of the Creation, to the energies of the U. But you are happy with the crumbs, to pay 10% less in electricity man, who himself took the energy from the U. But in the matter state of the field strength of the man. As long as you stay ignorant, there are people who abuse you, as electricity man, as a water supplier, as a Priest and Mullahs and the rest. It is you who allows the abuse.

We can tap into the energy of the fields and as many of you joined us in "Dining with the Creator," and you have enough water in your mouth and saliva. What was the difference 10 minutes before you get in, you are in the same environment. They're in the same room, the same chair waiting for the session to start. And why suddenly at that moment when we start, you are on they're in the ?? beginning of the ?? line interact. "I can taste water, I have so much saliva." (1:00). 77% of you. Or now you have understood, it's you who have drawn a line of ignorance to the knowledge of the Creation.

We have a reason to put these teachings every month, because it takes a month for you to understand, to analyze, and if you felt it, what does this mean? In the coming few days, when we do the addiction. You all come, I'm not an alcoholic, I don't need it. Yes, you're addicted to killing. Yes, you're addicted as a vegan to eat raw. I don't care, I just eat it. I don't cook it to give energy from somewhere. And it's fashionable to be vegan, and it's fashionable to eat "American." I just add some more minced meat, some more herbs to make it tastier with some more other lives, which I have taken to add to it. Is there any difference between the rosemary you put in, and God knows what in the meat, and another life. Now we make it tastier. Those of you who are vegetarian, spend half an hour with me. You will change your time and eating habit in no time. Those of you who are vegan, are worse. And those of you who are meat eaters, you do not know which way to run. It just opens your eyes. (1:02).

If I can do this, contact at, contact find a way to tap in the energy, which they give, which they don't need, without killing them. The problem with us is that when we look at a dry beans, when we look at dry rice, to them, to as it's a matter state. But it's alive, it still got the seed of life, you just need to plant it and you'll see it grow. But we choose to ignore it.

As I always said, if you give a man a chance, he'll water a sheep for it to grow. Because then he has more of. The only thing is that the man cannot ground a sheep, to the ground, and let it raise itself, on its own place. But we do it with grains, and with god knows what, because that looks solid to us, they have no Soul.

As I said to one of my children when he was young. And if you understand the strength of this statement. We take two seeds, you eat one and you plant one. One grows, what grows out of that plant. Then you care for it. It has value, it has life. Don't cut this branch off papa, don't break that part of it. How come you ate the brother? Now you have emotion for the other. (1:04).

It is the ignorance of understanding the process of the Creation of ?? Life, which has brought man to this point, to walk to excursions, and to stupidity of killing. Man only puts men in prison when he kills another man. Man does not put men in prison when he kills another animal, a plant, a seed, or whatever. Because we have made exceptions, because we all do it.

Now that we have the knowledge, should there be any exception? Should in the coming time man will frown on those who eat any ?? flesh. We are plasma eaters. But would we learn to steal from the plasma of the others? Or would we learn, that we are there, that what is available, no one needs, we are there to be served.

Some animals eat once a year, by killing one animal and that's enough for it. Some man kill everyday in thousands and they call it, bowl of cereals. We are lower than ?? those. Understand to what field strength of the Universe you need to connect yourself to be able to feed yourself in that dimension, in the ??. That you do not carry the habit of killing into space. And I hope that the teaching today is that. (1:06).

As I always say, if I give you enough knowledge that you manage to face the Soul of your Creator as an energy pack, would you eat it, and to see how it is? Try to understand, try to extend the knowledge of your Soul by yourself. When you can't do, I give you a to of technologies, a lot of sessions in the system for your Soul to expand. In a way, I open, ?? I give back your ?? fields, that you expand more.

Have you ever blown a balloon in an environment, and then vacuum it from outside, and then see how it grows to fill up the space of the vacuum you created? It's all we do with your Souls in these systems. We create a balanced energy fields, that your Soul can expand and come to understand the D of physicality in the D of Creation in interaction with the others. But we have to cover it up in every name and possibilities, that you can fool yourself.

Try to understand the process of interactions, try to understand what means to have Inertia. What is Inertia to me and the gravity to you, and what is the Inertia in the cell of a cancer, and a gravity in the body of the Man. Then the physicians of today will have no problem curing every cancer within seconds. But at the moment, we still have to play the game. (1:08).

What is the Inertia of the emotion that leads the Man to create himself to the point of death with ALS? What fields does it extract that is connected to the emotion and the direction of the strength of the field of the STM and the P, and the Inertia of the Totality of the fields of the physicality of the Man.

Would it come the time, in the coming time, where Man will master the field strength of the emotion? Man will master the strength of the field of the, what we call, the life in any dominium and D. And if you understand this, we go back to what I've said many times, with one drop of water I create a fish in a tank.

With one strength field of the emotion in the ?? devotion of understanding, I manifest Christ in front of you, as many of you has been feeling, touching, being aware of his presence, when you go in our system. That's all we do. And you can do it anytime, anyplace in the U.

We go for a break, and we come back. But listen to this teaching many, many times of today. And it opens, unravels many secrets, that the first time you don't understand. Then you understand where man has made a fool of himself as a vegan, vegetarian, and meat eater, (1:10). when in fact you could have enjoyed the existence of those he has eaten, by just being present with what they do not need. When an ?? object manifests itself, it means I'm giving for you to see. Why do you need to eat me, when I already given the field of my existence.

Then you understand, does Man need to kill in the space to confirm his existence?

We go for a break and we come back. If any of you have become wise to the knowledge, we answer you the questions of the Creation. Thank you very much Rick, if you like to take us to old fashion breaks, or new fashion, you can allow us the list of the products which is available for many of you, and you don't claim, because others disclaimed it by paying for it, as a donation for you to enjoy the beauty of Creation. ...

BREAK >>> 481 KSW April 13, 2023 (1:27).

K- Yes, we are back here. We are here ready to answer any questions you might have. Can you hear me?

... (1:28).

Q; ... We kindly ask you to advise us more about human's stress in plasma technology? We appreciate your guidance.

K- What do we mean by stress? That's something we have to understand. What is .. a stress? What is the point what we call, human stress, .. or emotional stress or body? Which part of the stress you want to talk about? We have to understand how we create emotional stress, and what strength is it at. And how it affects the rest of the physicality.

How come with Gans's, with application of the Plasma Technology, many of the stresses of physical or emotional are resolved? (1:30). Many of you, you call a stress as a pain, physical pain, you use the Gans and it goes. Why does it do that? Why do we see these kinds of things? Why do these changes?

Psychological stress has a strength field. Depression has a strength field. Pain in your muscle tissue has strength field. We have to research in depth to find, to measure and to replace. Nowadays, our doctors look at, oh, you're short of vitamin B, you're short of vitamin that, and you're short of this mineral, you have this disease, that disease, this condition, that condition. Our scientists never looked at the dimension of the Creation in the body of the Man as a plasma, what fields it is short of, that we can promote.

In the future, when you go to a doctor and you say, I have a depression, the doctors can measure the strength field of the energy which creates, which is needed to satisfy that lack of energy. The future science of the Man, understanding the structure of the Man is not matter state, but is a magnetic field plasma state, will change all these things. In the upcoming universities and educational centers, as they understand more and more about the process of Creation, Man will find another way to handle this, Man will find easier way to handle most of the, (1:32). what we call, diseases of today. We have lost our way. And we have added so much that the way is lost on the way.

I was talking to somebody some time ago. They say, Chinese herbal medicine used to work and be effective. And today it's not as effective as it used to be. It's the same plant. What we did, we added chemicals and fertilizers, we added pollution to it. So it's the same thing, but it has more additives to it, that those additives take the energy from where it used to be. So, if we can produce the same herb, the same whatever it is, without the new additives, Chinese medicine, herbal medicine will have the same effects of a hundred years ago, 200 years ago. It is us who does not understand what they've done to us, to ourselves. It is us who haven't understood the process of Creation.

When we are born, and let's say we are in a perfect condition, emotionally, and whatever, doctors will take a reading of all our emotions. And in 10 years time when you go to a doctor, he says, oh, this is the record of your depression, there was no depression and now it is. So we add up this energy to you to bring you to the balance what it used to be.

The whole process of the understanding of the Creation of the body of the Man will change in the coming years. (1:34). When you bring someone to the doctors of the Keshe Foundation today, who have been trained in the old medicine of the present universities. The doctors of the medicine today they ask you, you get all these God knows what this, this, this all, this is elevated, you have this. And doctors which is trained by the Keshe Foundation will ask you this, can you give me the composition of matters in your body?

I don't want to see how the accident has happened. I want to see the cause of the accident. Because the understanding of the knowledge ,is that you need to have these energy sources to create those effects. Today, when you go and see a cancer data from the doctors, oh, you get everything, the size of the red cells, the size of the white cells, the volume, the count and everything else. Excuse me, can you have a boiling water if you don't have a kettle, to boil it? And then, can you have a kettle if you don't have the steel to make that kettle? Can you have the steel, but if you don't have the electricity to heat it up, to heat the water, to have the boiling water to see what it does? (1:36). What the doctors tell you, they say, it's a boiling water.

So we look how to get the energy from the boiling water. But what about that iron and that kettle which boiled it? Why can't you adjust the temperature there, that you don't get the boiling water, you get the right

water, you don't burn. This is the different step in the knowledge, different understanding of the Creation. Today in the world of medicine they work with the boiling water and then it's burned. Now we do the skin, we do high blood pressure and the rest of it. Go and find, what do you would.

You used copper instead of iron. You used zinc instead of copper. So you have created a different dilemma at the beginning or is too much of copper in alloy, which creates a different ?? standard temperature, whatever you call it. So, in the present science, we are always fighting how to find the solution. But we never look at the cause of the problem.

In all traditional medicine, they used to look at some of the causes due to the effect they see. I come from generation of the medicine men. Generation and generation of. So when I look at new science, and when I look at what my ancestors used to do, and I see what the hypocrisy, what has grown up to be the new world of medicine. Because it just makes money, but it doesn't do much.

In 2008 when I went to Iran, I met my aunt, the sister of my father. (1:38). And she was in her late 80s, and she was telling me about my grandmother, my grandfather, what she heard about the grandfather, but what she saw with my grandmother. The family were men of medicine for centuries, for decades, for generations. As a young girl, she observed the mother, and she said, you know, when mom went to that room, I know there is a cure, the guy can be helped. If mom went in the other room, I said, he is going to die, because mom knew cannot do anything, he was just there to help.

So they had a knowledge and they didn't have with the new ?? paracetamols. They only had the herbs, they only had what earth provided, and they understood the interaction. That a young girl of eight, nine years old, could observe what the mother does and what decision is made about the one who has come to ask for help.

So our today's technology has gone haywire with more tablets, more false reports, more everything else to satisfy the pocket of some people who just pay for it to be fooled. We have to look at the cause. Not at the, what we call, the accident at the end. When you don't have a brake, you don't have .. ?? damaged car. It doesn't matter how many times you repair the car, you haven't fixed the brake.

And it's the same in emotion, it's the same with the stress. You have to find out what field strength causes that stress, and what has come in the dimension of emotion to become a stress. (1:40). It's not any more iron or zinc, it's what emotion, others emotion interaction with the STP has created that has depressed you. And what is needed to create, to give, to bring it to balance?

We are talking about the field. If I tell you, I love you, you get the feeling of everything. And if I tell you, I hate you, it's the same man, the same woman, that same voice, you feel ?? the others. So, we have to come to understand emotion has a field strength, and the word of the Man carries that emotion, that field strength. We have not even analyzed, men of science have not even come to understand this. What emotion, what energy comes from my STP through the words, that in interacting with you gives you the feeling of stress, or depression, or love. We have not understood anything about the world of the Creation, and we call ourselves the king of the animals. We are king, but animals. King, as I always said, stupidity of not understanding, but claiming to be.

Can we go back and measure what I say, what field it creates, that leads to joy and happiness. So, we know this is the field strength of the ?? voice, which created ?? that. Have you ever tested this? No, because we never understood. (1:42). But not only in recording, finding out what has happens. What caused in the body

of the Man to speak that word of ?? happiness. What interaction has been inside? It's again that kettle and the boiling water. This is what we need to understand. Otherwise, oh, I took some zinc water.

It's very strange, 99% of the Knowledge Seekers have Zinc, CO₂, Cu and CH₃ (Gans's), and they want to solve everything with it. In the Periodic Table there is quite a few more than these things, a hundred more. What about them? Would Uranium field strength create happiness and energy, as the Gans of the lead creates depression and anxiety? Then we have to understand, we need new tools of knowledge, new understanding of the knowledge of Creation. But the way it's created, not the way we would like to think it is, because it fits our meager understanding that it fit for us to understand.

Any other questions?

R: Yes, Mr. Keshe, we have a hand up here from Peter. And he also had a question in the Q&A. (1:44). And it has to do... He has been in the Keshe Plasma Reactor Group in the last couple of weeks as well and showing his creations of amino acids (AA) and techniques for creating Gans's. And he uses higher voltages than we normally do, and this created a lot of quantity of Gans's. I'd like to have him talk directly rather than read his question, because I'm sure he can explain things better. So go ahead, Peter.

Q: .. I'm trying to create a MaGrav feeding device, or a Plasmatic feeding device. And the current state it's in a shape of a cup. I have used in it three different amino acids, because from what I understand, we can get from them and magnetical gravitational fields, at similar strength that we are getting from different foods we consume. I can also add the Gans's of the content of seawater, and that composite Gans of iron and deuterium on it. And I know from your teachings, and that we absorb 80% of energies from environment. And what we are trying to do with this 20% of energies, which we need to gather from the food and water. So, this device that I'm trying to create. So, I'm trying to create with this device, (1:46). the field strength of this missing 20% of energies that we need to gather from the outside, from the food and water. And I'm not sure how much of percentage of them, total gravitational and magnetical fields these devices produces. And if there's a need I can show pictures of this device, how I set it up all together. And my question, the question will be, how to create from those three different amino acids, if I put it on the device, and from this composite Gans's how to create billions and billions of combinations of fields strength, that every cell in our body will get what it needs from the fields.

K- I understand. First of all, the production of Gans's, as Rick explained, as I understand it, with different voltages and high current does not make that much difference in the state of the Gans produced. Because the limitation is in separation.

Once an atom separates as a Nano material into a singularity, or what we call a Gans, unless you can absorb more energy, and you can create the energies above its matter state Gans. Then it evolves. But again, to the matter level. (1:48) If you introduce a "Gans current," to the Gans, you will see they behave different. So, there are a lot of limitations. A lot of understanding. This is why, long time ago, I spoke about "Gans of Gans's." Creating Gans's out of the energy balance, not out of matter state balance.

If the scientists of today, or Knowledge Seekers of today would understand this, then we can create a lot of new condition ???. Does not matter how much current you produce, the only thing you will change is very limited, because the rest of the energy you put in as a matter current, or voltage will not change much in the structure of the Gans, energy magnetic field balance. You affect the boundaries they create, but you won't affect the actual entity. Till those come into balance, you might see a Gans changed color from one thing to

another. Because it's like a virus, they give energy somewhere else, till they deplete ?? to stand to the energy level where they are.

Then to create a true multiplication of the Gans's and the fields of the body of the Man, the Knowledge Seekers you're about maybe three five years away. None of you have understood this, that to create a combination of the Gans's that the full body of the Man needs, (1:50). you have not come to understand the Totality of the truth about the Creation in the dimension of his created system.

And, as always said, I play along with you until you understand. The Knowledge Seekers who work around me, they understand this. I teach, I explain something, and if it's not understood at a point I let it go. Months later, years later, I come back to it. I say, do you remember this, we did this, now you understand the knowledge of it.

As KS, if you carry on with what you're doing with the Gans's you've created, and you're trying to feed yourself, you'll still be short falling what this planet has done. And a few Knowledge Seekers, what I see, what I hear in the scientific world, and Knowledge Seekers, who are the layman, like many of you, you have not come to understand this. You make Gans's, but you still need to go and eat, because you have not managed to create a spectrum of the field energies of the body of the Man.

In the body of the Man you need Gans of Uranium, you need the Gans of Plutonium, you need the Gans of gold, you need the Gans of H, you need Gans of every other element. And sometime the closest you can get to, not even near to, is the Gans of the sea water. But again, which water, from which sea? All the animals in the ocean are not the same, depending on the combination of the elements and condition, (1:52). you get different fishes and animals in the ocean.

But one thing you have to realize is that, do you see Man in the sea today? So, the sea does not provide all Man needs, otherwise Man would have been living in the ocean. Man lives out of the combination of the fields of the matter, liquid and the gas of this planet. When you manage to understand this, then you understand you access to some of the knowledge that it needs to feed the Man.

This is why we are different colors, and races and creeds. You don't find as our, what I call, knowledgeable politician said, the polar bears are eating all the other ones, penguins, and that's the problem of global warming. But he didn't understand was that the polar bears are in the North Pole and have a long way to swim in all the ice that melts that it can get to the South Pole to eat the penguins. That's why we don't have Mr. Al Gore as President of United States. He never came to understand the polar bears are in the North, and the penguins are in the South. And he was the head of "CO2 and global warming" of us, as human race.

So understand, you need a combination of the fields of the air of this planet. (1:54). The combination of the matter state of this planet, which comes in through the soil, through the matter states we absorb, through the animals we eat. And then we need to understand what liquids of this planet creates and gives us, because we drink it all the time. Doesn't matter how many times it's siphoned, cleaned, and pasteurized, and everything else.

So for you to understand how to create a system to feed the Man is you have to bring everything together. If you have been somebody who worked with me years ago, when I used to build systems, you always got three bottles from me. One was for the air, one was for the water, and one was for eating, which is the body of the Man absorbing.

So, when you try to get to this point, when you try to get to the point of creating Gans's that you can feed, you can create imbalances in the body. And if you create it with a high energy doesn't mean that you get a higher level energies from your Gans's. You have to understand the whole proposition of life on this planet and everywhere else.

We have a question mark now, we are planning to colonize Moon in the next two years, next five years, with cooperation of governments. We are planning not to take anything to the Moon, no greenhouses, no cows, (1:56). no grain. But we have to be able to supply all the needs of the STM, that in manifestation in the D of physicality, that entity can survive the conditions on the Moon. Does not mean to wear a "monkey suit," a space suit. It means to manifest, have enough energies, conditions that you can move, you can survive, you can enjoy the condition. Colonization does not mean imprisonment of Man in greenhouses on the pressure and temperatures. When you go from England to Australia, you don't put yourself in a greenhouse, because you live in the condition of the environment. And this should be the same for the Man in the space. Otherwise, we have not changed in knowledge and technology.

This is why we teach, we promote, we try to get you to understand about the energy package of the Man. We call it the STM and the STP of the Man. How does your "inner gravity," which we call the Soul, interacts with the gravity of the Moon, that in interaction with the presence of the field of the Inertia creates being, that can survive on the Moon. (1:58). Otherwise, we just changed a prison to another.

Try to understand. The teaching from now on will be very extensive, if you understand it. If you do not understand it, as one of my sons said, papa, you just got over me, I don't understand it. I was with a group of people very recently, one said, this is whatever he talks it's nothing in the books, it's against everything, it's upside down.

And the head of negotiations said, you know something, we are going to write the books, that people understand this, because this makes sense. Then because it's in the books in the university, you accepted because you read it. I looked and I said, this is the first time I've seen a wise man. He said, we can't accept it, because Newton and Einstein, blah, blah, blah. He said, now we open the universities and we write the books about this knowledge, because it makes sense. Then Man understands the work and develop the correct way.

This is what the problem with a lot of our Knowledge Seekers. It is not a problem, we haven't been educated. The problem is the lack of education in the right way. We teach you all in the matter of state. And now we bring you to university and we want to teach you about the plasma. It doesn't work. But it doesn't work, it doesn't mean it's wrong. We haven't learned the two dimensions. Things look strange, we want to achieve things, and then it doesn't work. (2:00).

Example of this was, we tested. This was one of the reasons I tested the food session last month. And we brought you back to see how many of you, how you felt, what you had. Did you feel energy, did you lose weight, whatever? This was for us to test how good our system are set up. It wasn't about you, how you feel to eat. Actually, the whole of the trial of the food was for the Keshe Foundation scientists to understand what we were missing in the development of the technology.

How come you could not be fed and not to eat continuously. And what was missing in our structure of development. In the upcoming systems, when we put, you've seen we put a system that you pay 1,000 Euro

per year, you get all the food, what was missing. 70 odd percent or 30 odd percent had the saliva, so the system is correct to produce water. We are missing the others.

And then what are we missing long term, that we don't cause other problems, lack of depletion of other things in our system and technology. You are happy to eat with the Creator. But we were happy to learn what we need to correct in our systems. And for that reason, we have added into the system, now testing going, for minerals, metal matter state. That if we can give you completion of the short what we call, minerals, that gives you a long term reduction in hunger. (2:02). And this is what came out in research, in the new Dining with the Creator, the Creator of the system found out what needs to be completed more.

You're all part of this development of technology. But I have to drag you in with different things, Dining with the things, drug addiction, world leaders to see what is the emotional part of the system we need to adjust. What we need in you not wanting to eat all the time, the same thing to deplete my system. All from the strawberries next time. It's addiction to strawberries. How can I set it up? I drag you in if you are alcoholic, or whatever for us to see how our system is, that when it comes to the final system, we understand all the problems.

Meeting with the Soul of the world leaders was very important to see how we can affect the emotion in our system. That you feel happy, you are heard, you can bring the change, you see yourself equal as a world leader. And what would we change? When we do that survey at the end, is not for you to see what, it's for us to see where the system needs fixing.

When you feel you're heard, you're satisfied. When you feel you're not heard, you behave somewhere to become a radical. And this is what we cannot afford. So I have to satisfy that system. Build a system that feels you're heard. When you're on the Moon in a colony, I don't get riots. I don't get, man on board, man is over the board. You come in for what you think. (2:04). But at the same time we'll let you do, we allow things to happen. But we're gathering knowledge in how to adjust our system.

Since the creation of what we told you about, meeting with the Creator, you were very happy to come and whatever. For us was to monitor what the system is missing. If you don't understand it, I'll put it to you this way. You eat sugar for immediate energy, you eat vegetables for a short, you eat meat for a long term energy, or grains who have protein equal to meat for long term - eight hours, 12 hours, 24 hours. But these carry different minerals, they carry different elements. In the table of the Dining with the Creator we monitored. Why some of you had to come back? Why do you feel hungry? So, why some of you had no difference? Long term those of you who felt better, you took more energy, in your physicality, loss some weight.

Because the minerals are that meat. Which means, we need to bring in names of the heavier elements into the fields of the system. Then you will last energy at the higher level, 24 hours, 48 hours. And when you take energy that way, the body doesn't need it, it comes through the Soul, it comes through the dimension of what we call, energy fields. (2:06). So whatever you do around, walk around and work, is burning what is not needed as fat and you lose weight. So, you have to understand the process. And, in a way to perfect the system.

The next structure for us, the next cycle of teaching for many of you is to construct. You go to the Moon, you want to stay there for two or three days, you want to feel the dimension of it. I can't take your bricks, sorry, and I can't take you concrete to build buildings. You want to have a tent that you open up you enjoy this side of the Moon and tomorrow the other. I have to build energy system which creates walls, partitions.

These are what is to come. It is not something new. Read the patent, it was put up 17 - 18 years ago for you, now you come to it. Those walls you stay in has to create energies that they feeds you, it is what you need without you killing. What happens if you see an alien on the Moon, oh, the first thing, I haven't eat, I better see how it tastes, I better eat it. Didn't Man do that in the craft, in the airplane a few years ago. Fell in the snow in the mountains and they started eating each other. Didn't happen in South America, when they got stuck on a mine, and got stacking, who's going to be eaten first? Is Man going to take this habit into the space.

Or as a scientist developing this technology, we have to look after all of it. And by test or whatever. (2:08). If I want to do a survey to understand this, go and find somebody who will bring thousands of people. It takes years. I announce I want to do addiction 100 - 200 of you come in. I get the data, I get the information what is wrong, what we have to increase. But we have to, and you're happy you got rid of your addiction to chocolate. So, it's a matter of exchanging. You give us the knowledge, we gives you the satisfaction. To become the Man of the space needs a lot of knowledge. The true Man of space, you are quite welcome. Mr. Musk puts a rocket on the backside of the thing and you are happy with it, you're going .. .

Any other questions?

Q: .. What I understood, I should look to make Gans's and amino acids of the different 4 types, like different meats, rice and milk, vegetables, fruits and others. To get this necessary field strength for our body. And to get this I need a spectrum of fields for the body.

K- That's what you need to do. But you have to understand how the body composition is. Go back to 2014, when we had one of these Indian gurus came to the Keshe Foundation Center. And he was very holy because, at the moment, five or seven times he manage not to eat till 21 days. And I explained to him how he cheated. You don't need to make Gans's. If you understand it, you can take enough from the space to feed yourself. Just twist your lung in a different way, and see if you moved a little bit to the right, and put a pressure on your right shoulder and pulled your left leg up. I can taste banana. (2:10). Now move your shoulder to the top of your neck, like a chicken, and lay your legs out, change the space of the lung, this tastes like chicken. So next time I want to taste chicken, I will stretch my legs and put my neck up, and that's it, I get the energy of the chicken. Because I've tasted it.

So, with the breathing you can create that. And you can last a long time. But the biggest unfortunate thing is, there is no air on the Moon, you cannot chicken stretch yourself to have to eat. Because there is no air to breathe. So you have to find solution in the dimension of fields. And it's not just, I do vegetables, what about, you forgot about the energy of the emotion. Life is a very big pot of field, which you'll have to learn to satisfy all of it. Otherwise, you have lack of vitamin C and gives you this disease, or you have lack of calcium, half of your hip disappears.

Try. It's good thing you started this way, but try to look in a broader spectrum. And try to understand the Totality of need of the Man's Soul, not the physicality of the Man, then you can feed the Man anywhere in the Universe. You're still looking in how to feed the Man in the dimension of P. And this is what I keep on telling you, maybe you understand for the first time. (2:12).

Look for the D of the strength of the STM that it feeds the Man, and not D of vegetables, and carrots, and tomatoes and potatoes. STM does not know what a potato is. This is what I said, in one instance, if you

understand, you can reach the Soul of the Creator. This is what you've got to understand. If you're still in dimension of feeding the Soul, or in the dimension of feeding P with all its pitfalls. Sea water, contaminated air, cabbage and tomatoes, and I make a Gans of it.

Knowledge Seekers like you, you've got, that you've gone that far, you have to look over your shoulder, over a little bit further then you understand the process of the Creation. But this time try to understand the process of Creation of the STM, not the P of the Man. Because this P on the Moon cannot live, we'll bring back many carcasses. Then we are in the next level. This is the purpose of the teaching, this is the purpose of expanding the knowledge, but in small steps that slowly, slowly Knowledge Seekers in different levels, and scientists in the level will come to understand what we have to learn and where we have to go.

Any other question? (2:14).

Q: .. Dear Mr. Keshe, there is a subtle world also here on Earth we call them elves and fairies, and similar. They seem not to consume matter, but live from light, maybe? Can we learn then from them how they do it, even eventually scientifically? Thank you for adding new perspectives.

K- I thought fairies are little girls with the wings on the back when you go to a birthday party. And the other one is the boys, when they go out with it. The reality is, we can assume anything we like, and we can take any features we like. If you understand the knowledge, being a fairy or a Man should be the same. We haven't understood the knowledge.

If you learn to love, and if you learn to receive the love, you're fed for life. But Man hasn't understood that. But that love, stands with the love of the Creator, not the love of the Man. Because the love of the Man is always tempting ?? with something. This love is pure, and if you can tap into that, you fed yourself. And if you can tap into the gift of the Creator, the way it's given to you, you'll find out what do you need becomes the source of life for the others. A lot of you understood, ?? a lot of you will come to understand more of this ?? in a very short time.

Q: Good morning Mr. Keshe.

K- Hello Azarjan, are you still in Iran?

Q: No, I'm back.

K- They couldn't hold you, could they? (2:16).

Q: There's no reason to hold me. You know, when you talk about the traditional medicine and then how in the past, it worked, and it doesn't work. And you know, we're familiar with the Chinese medicine and Ayurvedic medicine, which is Indian. And it was interesting. When I went to Iran, something interesting happened. And I thought maybe if I share this, you know, it would .. open something for people, you know, if they have any question. For me, it's very interesting, because Iran also have traditional medicine and I don't know how they get training on it. I went to ask, you know, how I can learn about that, because when I was going on the plane, I came to lift the over head luggage thing to close it, I kind of pulled something on my left side. So when I got home, I always had something falling on my left side hip, I did yoga, but then this one on the side, it just was so painful. It made me limp. So I told my dad, and then my dad says, go to this doctor, I took your mom there, and she's very good. I said, okay. So we went there, and the place, the office was crowded. So much with people, with tons of people, especially women. And the doctor was a woman and she's very, she has a ?? job, you know, a scarf, and she's follows the whole procedure. So I went there and I started talking to her, she said, what was interesting was, she asked the asked the application, your date

of birth, your full name. (2:18). And she started asking questions that all the answer 10 years ago would be yes. But then (today) the answers all were no. And then she touched my shoulder and then I kind of screamed. She said, it's coming from here. So she gave me some stuff that we have in Iran, you know, in the herbal store and also some massage with cupping, which is different from New York, which Chinese do. And then it was interesting when I asked her all this stuff, no, she says, you must be up there. I said, what do you mean I must be up there? She said, you have passed, you're on a different level. Which I understood because there are some people, even Ayatollahs in Iran, that they are studying Islam, but they're not part of the government, they have their own life and in they totally don't interfere with any of these things. But some of them. Actually I went to the grave of one of them in the shrine of the ?? .. and then that guy, he could appear in many places at one time. And then if (he) entered the room, and if the people were gossiping about someone he would leave. So, these people are also trained ... ?? But it dawned on me is this, when I look at people then I went to different people's home, relative friends and I went to North. What I realized, people are leaving in a very, I mean, (2:20). I noticed like the Creator, the whole Creation is happening, is happening now. What these people are doing, because the information, they are creating information or the knowledge, we are swimming in it. But when I look at people, people say they, I'm sitting by an ocean, by the sea, and the birds are singing. But then I'm sitting next to them, and they're talking about what happened in the past, and they're pondering on it, and pondering on the future, that was going to happen. And then it's for both. Then I realized, at the moment, if I'm sitting by the sea, and the past is gone, future is not here. And this beautiful sea, and the birds are singing, I'm not noticing any of this. So the information of the Creator is there, but I'm not soaking it. Because I'm not present with where the Creator is. I'm out of the Creator boundaries. The border of the Creator is now, but most people are swimming in their own. Like imagine if there's two pools, there's a pool of shit, and there's a pool of water, people swimming in a pool of shit. And they don't know why. Why do you do that when you can be in a pool of water, it's clear water, enjoy it. But you do have yourself in this. And they don't, they don't know it. And they constantly recycle the same thing over and over. Because when I noticed like I couldn't I wish I could write in your whiteboard Mr. Keshe. But then something came to me, like. So, when you, when suddenly something shifts in us, when we are present, the whole physiology of the body goes so low. Like, you know, you hear in a whole commotion, but your body is the breathing, everything becomes so subdued. And it's very, it's very, the breath is happening from the brain, goes to the heart, goes down to your belly and comes up. And then it's something else something bigger that shows up. And then I then I try to see how people react. And I realize, if people don't talk about these things, then they have nothing else to replace it. That's why they're in it. Because they don't see it. And what I did, I told my husband, let's make an appointment with her, I want to see what she says about you. So, I made an appointment for him. And I gave a date of birth and his name. And I put on a whatsapp to see the doctor. Before I do that, he actually asked me a question about him. All the answer in the past because I know about him was yes, but now it was no. So two things was happening here. So, it means with the date, my date of birth and my name, certain thing is inherent in me that I was born with. But perhaps with things we learn, especially knowledge of plasma knowledge of the Creation, and how we look at things in a different way, we change so no longer those aspect relate to us.

So my question is, now, how can we make people to become that aspect of a world which is easy to live in, which is like, go to the clear water. (2:24). Not to swim in a pool of shit that you don't know even you swim in it. And why you're swimming in it? And it didn't matter, really, if these people had money or no money, they all are doing the same thing in a different way. So, how can, how can we, I mean, there's nothing, I mean, I could, I didn't, I never said anything to them. I just was present for the conversation and present what they're saying. But I was just noticing all these things. So how can we... How is it possible... I mean, how can I change something to remove the veil from these people so they can see the reality and then their life would become very easy for them. Because when they say, I'm so stressed out. That I say, I'm stressed out,

you're creating it, but they don't notice it. They don't notice that their words that comes out of the mouth, and the way they act, they all has the field that is creating the same thing over and over again. And they cannot get out of it until they notice this. And they have all these belief systems, that are regurgitating all this belief system constantly out and inside their head, constantly in and out. Like a spider web they're entangled in this web. And they are caught in it, and they're entangled in it and just suffocating in it, but they don't didn't realize, it seems like it's an addiction of that entanglement in them that they want to have it. (2:26). So, what is it that we can do?

K- What do you understand from it? Or what did you understood from it. That's, then you see what they can do, that you can't.

Q: But you know, I could, I could, you know, if I was them, like, I would put myself in their place, I could easily could say, if I do this, I could make life so easy for that person. If I was in that body, I knew what to do. But I'm not in that body. And I couldn't, I can't tell them what to do. Because they just, they're in it and they cannot see it. I mean, there's nothing I can do, we can change it. How can they change? All I could do is I give from my Soul, that's all I could do. But verbally there was not, nothing could do, because they would, if I try to say... There was only one person I found one girl, 25 years old, she was really in it and when I started, I mean, something happened that I had to be in her presence, and it just opened up and she got it, and she understood it. Because she was there and I could see it. But the rest of them it's just there's nothing.

K- There is something people understand, because I looked at these things a few times. How can the time and the place of birth, and whatever, and the position creates. And people can tell you, just give me your birth date and the time and place and the name, I can tell you whatever it is. (2:28). I've seen many of these. In some ways, how many times, and how many people can do this? How many times you've been inside with these people that they got it 100% right?

The knowledge some people carry, because they feel. And the knowledge is, some people do things because they see. I talked to someone about something like this when you go to a place and they ask for your birthday to whatever. And the conclusion was, you know when you come in, they watch you, they are a good observer. And they see you how your shoulder is, how your arm is, how you walk. And they ask you the questions, but they've already predetermined. Okay, I see that, I put my head there, so they believe the rest of what I'll tell you.

But sometimes the knowledge comes from the vision. Many of us, all of us, don't see exactly the same thing as the others. We see different dimensions of fields, we feel different dimensions of fields. Some of us due to the structure our brain and structure of our P, have an interaction different way with the fields. (2:30). This, some of us use it to our advantage, or sometimes we use it to help the others with it. We have to understand the knowledge, then when you go to person like this, ask you your birth date, your place, or whatever, and puts their hands somewhere, it doesn't become a mystery. You have to understand the wisdom, how. Can it be repeated? Or can we encourage these people to allow others to extend as they do? The knowledge, the vision, the spectrum, what do they do.

And this is one of the reasons we keep and give the knowledge this way, that no one in space become magician. You don't need to go to somebody to take your name, and they when they just watch you how you walk in and the rest, that no one becomes another prophet, or a specialist in something. We are all a specialist, because we attract a specific field that the others don't. So you have to understand the knowledge

of the person. You have to watch how many times they get out of, how many times correct. And then ask them, how did you get it correct. Maybe sometimes it's just by coincidence.

I used to have a very close friend in Manchester, very, very close friend of mine. And everybody said, (2:32). when he touches your pain point, he gets rid of your pain. And I was in a lot of pain one day, and we were together in the office. He said, Mehran, sit down, sit down, sit down, I take your pain away. They tell me you have a pain in your ankle. And he puts his hand on my ankle. And I never known so much pain in my life. I said, you know something, just don't touch me next time. How come he has a healing, or what they call, getting energy from others, but I got all the energies he got from the others back in me?

So, we have to understand the knowledge and the emotion, and become good at it in the dimension of fields. Then we go to the people who are specialized in certain strengths. In a very near future you can buy an App from Keshe Foundation, in a matter of a short time. And on these Apps, you buy App for food, App for cancer, App for Alzheimer's, App for banana, whatever. You get a variation of the Apps and you tap on it and you go, you want a banana, you get the taste of banana and everything else. This is the future of the food and wellness which is on the horizon.

So, can we give you all the same taste of the same banana where your energy fields are slightly different than the other guy? It might be sour banana to you, sweet banana to the other one, but the whole structure is, what energy you take from it. Do we need to give a taste value to it, that gives you the right emotion? Or we just give you what banana is supposed to give to you as energy to you, without actually giving the feeling you have the banana. (2:34). And this is where the science and technology of the Man has gone.

And then this people where they get the knowledge is we are made of different composition. And we are all unique. We can all learn and we can all teach. But this going to someone's birthday, touching somewhere is individuality of what we call, developing and observing so many positions about the fields, about the time, and observing how many people fit into that picture.

Q: Mr. Keshe also what I noticed, like the traditional Iranian medicine and Indian medicine Ayurvedic, they both have a lot in common. Like they ask, they, when they see you they...

K- What do you mean they are in common, we're all the same, Iranian and Indian ??.

Q: I mean in terms of the treatment. For example, they create a body type. She told me my body's cold and dry, so I should eat wet and warm food. So, for example, lamb is warm, cow is cold, chicken from supermarket is cold, chicken from the farm is warm. Like she said, you have to eat like a (Iranian food names) .. ?? haleem, .. with almonds. But then it was interesting when I started eating those, my body became more flexible and less rigid and the whole pain and everything is gone. So, Indian medicine is the same thing, they tell you have Vata, Pitta, Kapha, a body type. Certain things you should not eat, certain things you should eat. (2:36). Then all the traditional medicines are all connected. How did they know about each other?

K- Indian Persian, and Western medicine is more or less very similar, because we used to be one part of one thing and now we just created an imaginary name and we stick to what we like.

But fundamentally the materials would give energy to you gravitate towards your condition, we call it, warm. The one you give energy out, we call it, cold in traditional medicine. In English, we say, I'm eating a cold

food. They say, "oh no, I just warmed it up." No, cold in a way that it's taking energy from me. And this is part of the knowledge, what materials allows what fields to leave our body as an excess. And what materials gives us energy that we need from the environment, which they were grown in. This warm and cold what you talk about, if you change into gravitational (G) and magnetical (M), cold is what we call magnetical, warm is what we call, gravitational.

We put a seed of a lesser strength, that the bigger strength of the environment feeds for what is short. That's what we do some of the time, most of the time. (2:38). The food we eat is that little seed we put in as a. We do this in Gans technology. We put a lower (energy) patch on one side, and a higher (energy) patch on the other side, and you absorb energy, or get energy to come to the weaker side.

This is part of the food process we do. When we eat a food, independently, we put a little seed inside, and that Gans condition of the fields we put inside, absorbs energy from outside to our source. That's why we take that 20%. The other 80% comes in the direction of what we put in (comes from the environment into the body). This is why we feel lack of energy when we don't eat, even physically.

Because Man has not understood that the food we eat is that little Gans we put in, once it goes in our bodies, it's in Gans state. Now any energy outside, which is matching with that, will come towards, because it's trying to satisfy that energy inside, which is little (lower in field strength). And that becomes that 80%. In a way we fool the environment to feed us through that process. And we can create a condition through our brain.

We tested that in the Enhancement Unit when a lot of you came in. We did some tests on you, what fruit would you like? Have as much bananas as you like. And the you come out and said, "oh, it was so nice, I had a banana. We felt good. I felt the energy." Yes, because we didn't psychologically put it in your head. You know to your body what banana, what taste, what shape you like. We put that seed in the emotion, the way you create the cancer in your body, (2:40). so your body absorbs the energy of the banana from outside, which you put a seed inside of.

We don't play magic, we understand and get a conformation by you telling us. What we did, what we put is correct. Because now you're in the EU, we have created all the energies you need in the basement on the tons of concrete, and you take it from our system, and it comes the banana you want. So, understand the technology that it does not become magic. Understand what the warmth means, what the cold means. When you have a cold it means the energy you take in, is more than what your environment needs, so you give to the environment. It reversal it, it's a composition transfer energy. When you .. (interrupted)

Q: Mr. Keshe, it makes sense about magnetical and gravitational the way you describe it...

K- It doesn't make sense, it's the fact.

Q: I mean, the science behind it.

K- It is how it works. The food we eat is the seed for the energies we attract into our body. And because of the layering of the plasma as we call it, the skin, the muscle, the bone, and everything else, we create a condition of weaker to absorb. We've seen it.

Life works on a magnetic field interaction of the fields, and nothing else. And this is why we get addicted, or we enjoy certain foods, because there's a balance what we give, what we take, we don't need. (2:42). And why do we get fat? Why do we put weight on? We can eat as much as you like and don't put a gram on.

You've see many, many people do. Chinese eat ten plates, and they're still as good as a pencil. I eat one plate I put 2 kilos on. Because the emotional field strength within is not in balance. Then you block the energies to transfer out, and it absorbs. It has to find a place.

Q: But Mr. Keshe, if you go eat in Iran you don't gain weight, like when you are in USA.

K- You don't eat so many Chelab kebab as I do.

Q: Mr. Keshe, if you eat Chelab kebab you don't give it really, because I don't have any craving anymore. But anyway when I go there I eat, but then I eat more than usual. Because I hardly eat because I just don't feel hungry and I go all the way to 3 - 4 in the afternoon. But over there, because it's there and I just eat it, but you don't gain weight. It's just I don't know what's the reason for it...

K- You don't weight, because you're as good as a pencil anyway. It doesn't matter where ?? you. We put you in the ?? North Pole you will still be the same.

Q: .. Another thing, I noticed a lot of people come and take blood from their back. And after that they feel so good. And I came to my dad, I said, they do (Farsi word) on the back. And then my dad says, when he was a kid, this was routine in his household and he always went and hide someplace, and they never got him to do, draw blood from his back. But why taking blood from the back of people? And then the doctor said, if I want to learn it, they can teach me because I'm a doctor. I said, no problem. So, I went and I watched and I saw how they do it. But the question, and then one person blood was coming out was literally darker, (2:44). like it was toward black, the other one was lighter. And then the woman said, this one is just a lot of stuff in it, so it needs more cleansing. So why drawing blood from the back?

K- No, no, no, no, no, let's just get the science facts right. First of all, this tradition of taking blood with the leech, or cut, or whatever, has become a tradition. In a way that by taking blood the liver has to work and produce, or the body has to work to create new blood. And that brings what you call it, fresh energy. This is the reason this is done for centuries. In many cultures they do this. It's not that why they take it. Because is brought up psychologically to, that when you take blood, so your body needs to create fresh one. So you become more agile, you feel better, because it has to be replaced. That's the reason it's done.

Secondly, why some is darker and some lighter? It depends which veins they cut. Are they cutting into the oxygenated system, as they call it, energized system going out, you get a bright color. If it is the cycle coming back, and it's already depleted, it's dark. So they can put anything in it ?? interpret it themselves. Scientifically, we understand this now.

And then depending on the composition of the blood, we are all having the same blood. When that return blood you cut in, due to content of it, creates different color. If you have more zinc in it, it'll be different color, red if you have more iron in it a different color. (2:46). So, the color with it ?? (doesn't) means you're sick or something wrong with it, it's got too much ??. People don't understand, and so they tell them and they believe it. Scientifically, we understand now, why they do it, and why the color is different. But it has no resources of it. It has no other reasons for it. It becomes part of culture, because, as you said, your father used to hide because, it does not need to be done.

We get this with the cycle of menstruation of women. And because certain way the blood is lost, and in the certain way the womb prepares for the creation of next life, moves certain elements in the body as a fields, which we see with the women. During the menstruation they go through depression. Then we call it, energy

packs, which come through as an emotion to become the life of the new child. We call it, I feel different. They get crazy, they have pain, or whatever. So we have to understand the process. That in the emotion of life, we see this a lot.

Women who give birth, especially the first time they give birth, they don't have some, or most of the pains they had during the cycle of menstruation. Because there's always anxiety. Can I create? Would I create? Would it be a perfect child? And when you give life and you see the perfection in your child, those anxieties are gone, then they call it, the body doesn't create hormones.

Hormones are part of the emotion in the dimension of the energy field of the body of the woman, for all of us. (2:48). We have never understood this. We have never understood what it means to go through it. Why do they say when a woman goes through menopause, ?? behaves this, becomes more or less ?? . Because a woman is born, given life to give life. And now gets to the position that she cannot give life. What she was created for she's become incapable of. The anxiety, that I'm not there to see the continuation of the life of the generation bring this. And then you call it, a hormone.

If doctors understand this, and talk to the women, that you have served the purpose to the best, you are a beautiful woman, you created the most beautiful children. And the woman understands, they go through nothing through the menopause. If then the chemical biological changes can be controlled. Then we understand more about the psychology of the Man which now we call it, hormones.

In a way it's hormones if you translate it in the right way, it's exactly like viruses we have. But he have managed to give itself a manifestation of physicality attachment to protein. Protein in emotion, we call it, hormones. And in the outside body of the Man we call them, virus. But more or less they are about the same thing, because they don't carry that emotion. And now the viruses we come near to emotion we call them now the new Covid, suicidal, creating depression. (2:50). In the life of a woman we call it, oh, it's ?? is going through menopause.

Why is some of the women go through suicidal condition, we call it, post-delivery birth, postnatal depression, because emotions cannot fit into the direction of the expectation of ?? life. We are not inside the brain of the Man. And a lot of postnatal depression can be resolved by men, especially partners, being there to support the emotional turmoil of the life. The man is so busy getting ready for a new child to come, I work 10 times harder, this, this, this, whatever, and the woman sees herself alone. What am I going to do with this thing. ?? cries in one end, and then something else comes in other end, and it repeats itself, doesn't even smile.

What did Muhammad, bless his name said? Arabs used to give birth on the ?? sun, and if it was girl they dug that hole and covered it, the child was still born, but it was a girl. Muhammad said, keep me for 40 days, you won't let me go. Because after 40 days is the first time you see emotion, smile of the child. And that emotion touches the STM. Then I play with your emotion, and the girl learns about 40 days old, how to play with the emotion of man for the rest of her life. And us men fall for it like a brick.

We have to understand the science of Creation, (2:52). not the visualization and manifestation of physicality of the emotion. Then, we become much, much wiser in the process of Creation. You explain to a woman who goes through menopause the full process of why emotion, what emotion, the perfection of life she has created in her children. And I'm there to be, you will see not much problem. Physical changes will come in, because it's set up. And men don't understand this, and society doesn't understand. And then part of the emotion, the

way you create the cancer because of the ?? harm of your son as a prostate, now manifests itself in hormonal change, we can't explain. And these are where the right Gans's of protein are produced, which can interact with the emotional brain of the man, from lack of, "I can't produce anymore."

We don't understand it, we never understood, we never connected. And some of those who understood it, they became the "wise men." But now you're all wise, you understand the process, you understand the process of interaction of the fields. We cannot just take the Gans's, which made for physical body, you have to look at the fields which interact with these and create what they create, mass and weight. The mass is that Gans there, and the weight is the reaction of it when it comes out in its environment with the interaction of the emotion. Then we become wise people of the generation.

K- Mr. Keshe, but you know, (2:54). I just have one thing... The way I look at it, I've made it logical, because we have a DNA. And in the DNA, where did the DNA come from? From my parents. And then the DNA of parents comes back to the older generation. So with that DNA, when anybody is born with the older ancestors are part of that DNA, it's inherent. There's certain things, certain things say, emotion. Like, say, fear, or jealousy or anxiety. It comes because when I was younger, when I remember at the age of 12 and 13, since then, especially Thursday afternoon, or sometimes this huge sadness will take over me. And there was no reason for that sadness, I didn't know where it was coming from, but it would come over me. So, when I went to the Amazon in Peru through one of the ceremony, the shaman next day told me, you bought the sadness from thousand years ago, and now it's gone. So, when I look at my father or my grandfather as a picture, I see the sadness in them, then I realize. And then, I was reading this guy, his name was Anthony de Mello. He was a Jesuit priest, it means he was Christian but not bound to the church. And then there was another Tibetan guy, he was talking about the same thing, because he had anxiety. What it says it says, when those emotions comes, inherent emotions come, whatever it could be jealousy, it could be fear, it could be sadness, don't fight them, just observe them. Because just like, if you want to fight them, you make them stronger. (2:56). As long as you observe them, in time they will dissolve. It just like when they tell the priest, don't have sex, they try to fight it, when you fight it, you can actually go abuse the children because you're fighting it. But when you don't fight it, it goes away. So, everybody was born with some inherent thing that is in our DNA, it's not in our control, but then realizing it and acknowledging it, you just, you become acquainted, because...

K- That's the beauty of Creation. Otherwise, we all have been on the bottle production system. ?? You go to a factory, every bottle is exactly the same. And the one that has got a slight fraud, they take it out of production line. So, the beauty of Creation is the diversity, the interaction of the fields, and attraction of the field with each other. That's the best gift from the Creator. Otherwise, we would be one mass production. What did (Henry) Ford say, "you can have any color as long as it's black." Yes? And we are not in that position, we have...

Q: The Creator wants us to know ourselves. So acknowledge our self as we are, and not to become somebody else.

K- You know Azarjan, you speak about Chelab kebab, and I've said that many times. And I have a soft spot when it comes to it. And if people realize it, they try to use it to their own benefit. When I went to Iran I hit part of what is now, the Ramadan, fasting time. And we were kept in a secure houses and all the things, which goes with, what we call, the works we do as nuclear physicists. And we hit Ramadan. And these people knew, in the office of ?? (Iranian leader). (2:58). And my food always came from the kitchen of the president because of the security reasons. It came with all the razzmatazz we see. And they came to

Ramadan. They knew I loved turkey. I had a kebab for lunch one day, beginning of Ramadan. I had a kebab for dinner. I said, this is strange, because we used to get different foods from presidential kitchen. And then the next day or so one thing and then it was again Chelab kebab. I said to my protection officers and the people who look after me. They were opposite apartment to me and they ?? adjacent to me. I said, what's going on? They come and set your table. They treat you befit a scientist in Iran, it's not what we see in Europe. Everyday you come for breakfast is set for you in your apartment, and they set you lunch and dinner and everything else. I said to the gentleman responsible for the food which had apartment across from me, which had a ?? protection officers. I said, how come I'm getting so much Chelab kebab? He said, Mr. Keshe, there is a problem. I said, what is the problem? He said, we know you love Chelab kebab. I said, yes. He said, come and I'll show you in the freezer. I said, what do you mean? He opened the door of freezer. He said, I have here Chelab kebab for 30 days, because the kitchen and presidential office is closed. And they know you. I just need to warm the kebab for you and the rice, and that's all I can do. I saw the head of the office. I said, I'm not eating Chelab kebab three times a day. They went and they discussed it, they came back and they said, okay, from now on there are specific restaurants we keep open to take you for lunch, and we know Ramadan was summertime was very late. (3:00). We arrange special restaurants for you to go ??. So I could get a variety of food. And I sat and thought, oh shoot, they have even studied the psychology my food.

They have even studied as a scientist, what pleases me and what keeps me happy, that they can create that condition of comfort. It gives me a lot of pleasure in knowing how much a government goes to extend to make sure the people who give their life for the nation are looked after in the correct way that they can do their work. If the guy wouldn't take me to show me the freezer, I would have not known how much in depth they've gone to, what you call, to cover, that there is no, but they've miscalculated too much. It's the emotion which brings us that pleasure, it's the emotion which brings us dependency on repetition and addiction to that pleasure.

Q: Mr. Keshe when I was there Ramadan started on the third of the new year, so one day at 2:30 I wanted a Chelab kebab. I called a kebab around the corner. They didn't serve it, so I called Dr. Bararpour and Dr. Bararpour sent it to me.

K- I know, I know. We get treated in a different way in Iran as scientists. And the way they actually there was one kebab, (3:02). we opened certain days just to serve Chelab kebab, which was against the law. You know, they use get punished for opening restaurant during the Ramadan lunchtime. They used to have already food enough for five people, which was usually me with the Caboodle, which we travel with for security reasons. And the five used to sit and watch for one person to eat, and I thought, the smell of this must be killing you lot. He said, Mr. Keshe the pleasure you enjoy is more than the food we can eat. And this is what we see. I love to work in Iran. They respect scientists in a different way than in the West. They kill us and they shoot us, there they respect us and create every condition. That's why we could achieve so much in Iran so fast. Anyway.

Shall we call it the day?

Q: .. Can you elaborate on what happens to fields and rays going through the center of the vortex and how that links to what one would call intention? And how intention can transmute and direct these fields and rays?

K- Sorry about that, what vortex are we talking about? (3:04).

R: .. I guess that in some in some schools of thoughts everything, the energies or the plasmas have a vortex or a squeezing point, you could say. Or sometimes people might say, the zero point, ?? the center.

K- Yeah, where you can get an exit of the fields, as you call that, the vortex. Something has to happen. If it's not a matter, it's an energy. You're squeezing matter together when you create a vortex. We are creating a circular motion, which leads to absorption and release of energy in compacting.

If you do it in a bathtub and you take the what you call it, the plug out, you see the energy forces they ?? materialize. If you're in a closed environment the energy has to be released in one direction and absorbed in another. So, what you expect and what you want to do. We do that a lot in space technology. We create vortexes, especially in defense technology.

The knowledge in that D is. In the matter state we call it, laser, mono-energetic. (3:06). In a plasma condition if you create it, it's a plasma field. This is one of the ways you can project high speed plasma and elevate its strength to go up. In the future teaching we'll teach this more. But it's compression to reach zero point energy, or to the hydrogen energy, we call it. And usually the fields strength of the matter is very much different than the field strength of the plasma.

If you create... It's a very in-depth knowledge, and it is part of what you like to call, a "worm hole." This energy distribution has to be looked at two ways. One is matter state compression, and one is the field state compression. When you interact in the right direction, in the right position, you can play with it in a very beautiful way.

In accelerating plasma to reach a higher order, this technology what we call, vortex, it's one of the ways, one of the best ways to create elevation in the strength. In the matter state when you can do that, you see the increase in the speed. (3:08). I've done a lot of work on this compression vortexes of the fields on the plasma in the matter state. And it has a huge application.

Sorry about that, I have to answer this question (call).

Sorry about that. Anyway, to understand that vortex is zero, there is no zero. It is finding the conversion point. At the bottom of every vortex there is a conversion point. And you have to understand what does it convert to. Because if it doesn't do, if energy doesn't convert to take another dimension or direction, or strength, it explodes. It becomes like blowing up a balloon and compressing it. (3:10). It needs a lot of knowledge, it needs a lot of understanding.

Plasma vortex technology it's, or matter vortex, we know a lot about it, because we create it. Even in the matter state vortex, if you understand field distribution, compression of the magnetic field of the elements of, it's a totally different game ball. And then, if you do the same vortex in different conditions of the plasma fields it's a different story altogether.

Knowledge Seekers have not understood the principle of the matter and plasma and their interaction and collaboration in what you call, for release of it. One of the biggest vortexes, which happens on our life continuously is on our skin. Our skin, that's why you have these holes where the hair grows. These are where the energies which we absorbed from the environment, as part of that 80% are fed into. Those are the hole gaps, these are where it comes in. This is why we have antennas to what vortexes we absorb, as hair. Our hair is a Nano material, and it has a specific field strength. The color of it, the root of it. Why do we change color

of hair by age to white? If Man learns to release the right strength field by emotion, (3:12). Man will never change color.

And through our skin, if you look at your skin it's not flat, it's hexagonal. It's like a football, plastic football, if you used to play with leather football. They sew them together, and there's a point of junction when they come together. Our skin is those junctions and that's where the hair is. It doesn't matter, even if you don't have a hair on your body, the finding ?? fine, which is inside, creates that attraction. And in that point, the root of the hair, these vortexes is energy difference transportation. That's where most of your 80% energy from the environment is directed to.

Vortexes technology, if you understood to the position of the Creation is a way of ?? feeding, it's a way of understanding. That's why you have different hair, different shape, different strength, and different ages of different hair, and some have no hair. It doesn't mean anything else, but the body has this fine tuning of the vortex conversion.

If one day our scientists develop the technology to watch the fields, you'll see how we're absorbing energy through these holes at the point of the hexagonal, or whatever shape you have on your skin. Those gaps are where they ?? like, you know, you create a slope in a tent to get rid of the water when it rains on it. That hole is where the energy comes in.

Man has never understood the process of the energy absorption from the environment. And ?? vortexes is one of the most fundamental ways that we transfer energy in and past the skin, (3:14). which is supposed to be perfect no water. But at those points it's perfect for energy to transfer directly into the center of the body under the skin. We call it, the root of the hair. It's like you put an antenna up and you say, this is what I want to absorb. And then it just goes right across the body of the man.

If you understand this, then you understand why it's only in ?? places, such places, we have no hair. Even if you follow the condition of the growth of the hair, you find the behavior of the Man. Because certain absorption of certain fields, creates certain emotions, because this is where 80% of our energy comes from.

The science of when you go, it doesn't go to zero, it goes to point of conversion. How much of it convert and how much it comes back. In a way, if you don't have a hair you cannot... I will put it this way, you're not totally hairless, it doesn't matter what you do with it. You release that antenna, what comes in. It is like a fountain blowing up.

The way people's hair is, the way the color of their hair, the way they change their color of their hair and emotion with it hasn't been understood or studied yet. Why some girls like blonde to be, and some girls like to be black, the black likes to be blonde and the blonde like to have a dark hair. The one who have a lighter skin go and get a suntan to be brown. And the one who's got a brown skin tries every kind of bleach to be white. (3:16). Psychological depletion of the emotion.

And this has a lot to do with what we absorb from our environment. And they tell us, the food we eat is the person we become. Because as I said, you put that little seed and then this is the energy you absorb. What you absorb interacts with the environment which you are in, to absorb it from. When you see a beautiful woman or a very handsome man, this holes needs a lot of attention. They beauty they absorb the energy they get. It's not that they're so beautiful. You have to see what the Soul is set, they absorb, and what is the destiny of this destination of the Soul in its departure. Why does it need so much? It doesn't matter what color you

are, you're still beautiful as a black, white, brown, yellow, whatever. And this is the beauty of the Creation on this planet.

Q: You said the person is beautiful they want attention. It means the Soul decided to become beautiful, because it needs to have attention in this lifetime?

K- Yes, yes 100%. Our beauty is... You see, what we don't understand psychological is psychology, or absorption of the fields, is set. You know you make a, you make a pot, this pot goes into the market, or you make a pot for the house of a king. You understand? So it's the same. The Soul when it's made, knows its point of destination. And what needs to be, (3:18). and what it needs to absorb to reach that point of destination.

When you see a normal person it's not a normal person. It could be to you a new normal, but to the eyes of somebody she's the most beautiful, he's the most handsome man. But when you see a beautiful woman or man, a handsome man walking down, or even a cat or a dog, which are beautiful, it takes attention, it takes energy. And that energy is absorbed, that energy comes to. And this is why you see beautiful and handsome people some of them become very arrogant, because they receive so much. Their emotion cannot even handle what they receive. They're not ... ?? aware of that, fully aware of it. But you have to see what that Soul is destined for and where. He could be a very weak strength Soul, as he has a long way to travel across. Or he is going to become a shining Soul, and be very near to his point of destination. We are the nursery of the Universe. And how we plant, how we ?? develop that seed, that where it grows to create a life and continuation of existence, is the job of the STM.

Q: But people who look at somebody as beautiful and they go do surgery to make themselves like that, what is that?

K- You can change a lot of things, but the Soul doesn't go that way. "Bo tucks" doesn't always come and make you beautiful does it? You have to understand the process of Creation. Otherwise, everything is ?? .

Thank you very much for today. (3:20). Let's see where and how we come to share more knowledge. Join us on the 28th for the addiction. And we would like Knowledge Seekers to, if you cannot do, or if you like to, to support for those who we have a special reason, for a specific races, colors and creeds of the Man to be part of the 25 and 200. And we need to do that as part of our work to be able to do. If you're disabled or you can't leave your work, ?? but you have the wealth to support someone from Africa, someone from Asia or whatever, to be part of this process. We need it, and we'll explain in the coming time. It's a collective work, and with it we have a collective job to do. And don't turn up on 28th just because you're an addict. Turn up to see what your Soul is addicted to and where is its destiny. Thank you very much for today. And I hope we shared more knowledge to enlighten you about what is to come. Thank you very much Rick. And we see you next time.

Soul makes agreements to balance - P complies - Soul in charge; Learn through P to connect STP then STM; No methods - elevation; Inertia Gravity teachings continued - Emotions; STP & Emotions; Robots with emotions; Emotions always parallel M & G - reference points; Linz Center closing moving; New plasma "Ball" creates everything; Material production; Light in Jerusalem explained; Disease of excess Ca; Chakras counterbalanced with Spine; One Nation 60% setup tested

ENGLISH TRANSCRIPTION

(:22).

K- Yes, thank you very much. Good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, we welcome you back. And we hope as usual, we learn from each other and we teach each other something about the real ways that the Creation is done and it works.

Today's teaching is part of the continuation of the other parts of the teaching over past few months and years. And what we're going to look into and what we understand from the point of belief, the way we have been taught it, and the way it actually is. And as we hear more and more about the science of Creation, we understand how little we know and how much fallacy we have accepted.

We consider ourselves to be the decision makers of our physicality (P). But in fact, the decision maker of our physicality is our Soul. We are a puppet in the hands of our Soul. We make decisions we do things, which to do with the food and we exist in it with the dimension of physicality. That's the job of our physical condition. (:24). We go and look for water. We go and look for shelter, we look, we go and look for something to give us energy to sustain this physical body.

But the master, the Soul of the Man (STM) sits behind. How it creates destiny for the physicality to be in a position, then the physicality has to follow that, to be in the position in which the Soul has agreed to be. To be present in a continuation of expansion of interaction of the Souls of the man. We call it, "accidentally I happen to be there. And accidentally I saw this and that and accidentally, it could have been by chance or something else. I happen to be there." And I happened to do this. We have created word which we don't understand for the operation of the STM to bring the physicality in the position where it needs to be. It's like you tell someone, they're going for a blind birthday party. So you bring the birthday boy, but he doesn't know he's coming to the party, as we spoke before.

So, in a way, the Soul of the man with the Soul of the mother has agreed to meet the mother in such a such a place. So, the physicality through connection with Soul of Physicality (STP), makes sure that the physical condition is there, to deliver to bring the interaction of the Souls for certain purposes. And then, later on, we

understand why we were there. Why we met the mother at that point in time, because the Souls have decided, for your Soul, and the Soul of the mother to learn something from the interaction of the future interaction of the Souls.

So in a way, we are running horses at the same time. (:26). The horse of physicality we think we are in charge of, and the STM, which itself with the interaction with other Souls come to guide and bring the STP for it to be there, to bring the physicality to deliver the promise and agreement between the Souls. We call it revenge. We call it the condition that, he did something and now that's the payment for it. He did something wrong, and he deserves this.

We have found different interactions, or voices, or noises, or communication line to explain what we don't understand. The connection between the STM and STP of the man, and the man in a physical dimension (D). And in that process, we need now to understand this, that, why did I turn up in such a place to see such a thing? And what's the outcome in the future for what I've done? What was the purpose of me being there. 50% of our lives, maybe more of it, is fulfilling the commitment of the Soul to the others, other Souls for the physicality to be.

Even if you get lost in the desert, there is a commitment to the Soul of the others. Even if you get drowned in the ocean, there's still a commitment to the other Souls. It's not just that you've drowned. (:28). It's not. That process has caused other Souls to bring other physicality's to the position they've done right, or wrong to be in. It's not just a funeral we go to. It's what comes in the process of the funeral. The Souls which have been set to, to come in to. To deliver to, and to comply with the total agreement of the Souls.

A child to becomes an orphan. Somebody loves his son, somebody ?? kills a son. Why are we born in such a moment, such a day, such a second? What would have been the effect of it on the parents or grandparents, if you were (born) a week before, or two weeks later. Then we come to understand, that now we have to accept, not only accept, understand, the full comprehension of the time, place and position is dictated by interaction of the Souls and interaction of the STP with the physicality of the man in communication with the Soul.

It's an ever, never lasting "blind dates." Telling us. Calling it by chance, "accidentally" and the rest. But in fact, it was already set up. But you were blindsided. You could not see, you could not understand that, what your grandfather did, what your great grandfather did, what your mother did, and what your brother did, and in the consequence of the agreement of the Souls, you're balancing the fields. You're not paying back. Have you ever seen a magnet jumping and going somewhere else, he thinks something else? He just keeps a distance. It creates a condition.

So for us as a human race, the physicality of the body of the man, this is what we have to understand. (:30). That our physical existence, 80% of the time we think we do everything, we are in charge, we put the suit on, we put the shoes on, 8 o'clock we're on the train, 9 o'clock we're in the office, we come back 10 o'clock, having a coffee, and then five o'clock on the train back home, we control everything. Oh boy, how misguided the man has been. The STM uses those times, which you think your clock work, on the same train, same time, every week for all year. It plans your time for the interaction of the Souls in that time bracket.

So the STP and STM plan your day, internally what it needs to be done, that it brings the balancing. Most of the repetition, magnets don't move. When there is an external force, when there is something done wrong with the other Soul, and that Soul has the word, oh, I have to suddenly go out, and you have a car crash during the lunchtime. But why? This was not supposed to happen. But this is exactly what's supposed to

happen, because there are other sequences, other effects, other dimensions to this accident, which was set up by the Souls, for those, for you, ?? not for the others, to come in the position of what was done wrong, or what was to be corrected.

Then, in the simple way, you understand how the Prophets promised, there will be such a messenger in so many years, and so many centuries, and so many decades, and he will do this and that. It's the guy himself changing the clothes, appearing in the same place, (:32). because he's already set all the Souls through the effect of his own operation, to be ready for that. And then he appears and manifests himself. Resurrection of the Soul over 2,000 years. But in fact, in this 2 thousand years he is preparing other souls, for it to be ready, that when he comes, he says, "oh, this was the one which was promised."

So, if you understand this, you can plan with the correct conduct of the STP the future of your Soul, the operation of your Soul, where it will be, what it will do, what kind of stars will be when it leaves the point of physicality. And then mankind comes to be understanding, he is not very kind to himself. Even though he claims to be kind to everybody else. What would be, if you understand this position fully? And what would be, what will bring all of us, if this point, and this part of the Totality was fully understood?

Would a man commit a crime again. Would a man should kill again? Would a man go out of his way to create mayhem in every direction and possibilities? Would the life of the man becomes bearable by living of the man, in conjunction between the STP and the STM.

Something happens. (:34). Or some accident happened. But the truth is, what can I learn from it? What was my Soul. What was my physicality, my STP was trying to teach me that causes the elevation of my Soul in the next step, that I don't put a step wrong. Not just, "oh, something happened, I carry on."

How do, and where do, and the system that the STM communicates with the STP? On which bandwidth? On which structure? On Totality of understanding the structure of the physicality of the Man. The different emotions are settled, compacted. We find the ?? correction of the total energy, which released by the Soul, in friction with the cell of the body of the Man, creates certain knowledge, certain information, which the what we call, STM has full control of.

Don't forget, you never studied French, you have no clue what "monsieur" means, or what ever in the language. But the STM has been to the "universal" University, knows everything and according to the time and place, can use that to speak French. To understand the emotion of the French, without speaking a word, because in the emotional level everything is the same.

Then it comes to the point, what do I need to know about the emotions, my emotion? And is the emotion the same amongst all of us. (:36). Today's teaching is more or less for you to know yourself. To understand the connection between the STP and the STM, the operational of the physical body of the man, even though you think, you are fully in charge, you are carrying on the order and the wishes of the Soul.

And if you understand you're forever servant to the master, which is the STM, which is the, in a way, wanting the better life, for the life of the man in a box, has appeared and will appear again and again.

What's the limitation to this? There are no limitations. What's the understanding in this process for us? The process, I'll explain something simple. From now on, look at both sides of the dimension of physicality and the dimension of the Soul. Why did I say this word, which I can't even remember ever using it? Why did I

show this affection to my child where in public I never show? Then the answer comes, it's Man who interferes directly out of fear of his own existence in the dimension of physicality, that creates all this mayhem for the rest of mankind.

To what extent we will come to understand this depends on this extent we have understood about the process of Creation, our own life cycle, and how this cycle has affected other Souls. (:38). And if you are true to yourself, you'll find one answer in the end, the answer which was given at the beginning and in between, it's just been series of conversions and everything else. Except the truth about the actual life of the entity in existence ?? amongst ?? us.

How much more, then to what extent we can pass this knowledge on, to share it that the others share ?? with you? It all entirely depends on Knowledge Seekers (KS). How do you teach? How do you add the knowledge across, that the others understand, not only your Soul? And then would you be able to share, to give, and unconditionally?

The existence of Man has many facets and many dimensions. Mankind needs to understand this, and then in that process, mankind will come to comprehend how his own Creation has become fed up, giving up on the dimension of physicality.

How far can we go? How much can we bring this understanding forward will allow us to become the Man of Space? As we said, we will run two parallel systems, physical travel, (:40). and dimension of the STM, or central energy of the existence of every living things in the U. And if you understand this, then we can decide. This part of the journey I go with the flying machine, and this part of the journey I go with the energy of the STM, and wait for physicality to arrive, but understand the dimension of the existence.

In a way, the Soul takes flight of fancy, and the STP will follow to join it on a given time, place and position. What happened when Man dies on board of a UFO, or any creature, and is traveled through the span of the Universe? Where would the Soul find his place and position? And where would the Soul finds its peace, in a way, the position which it was destined? Can we extend our lives to the understanding of this position? And can we predetermine where our Soul shall go? What shall we do? And how we will expand the knowledge of the others who are around? Not knowledge by just reading, knowledge by understanding the emotion of the Creation. Then it comes, if we can do this, how come you're not aware of our Soul, the work of our Soul during our daily life? And how can we work to see its elevation, that it serves, than actually taking? (:42).

Then, the answer is simple. Look within, emotion. What emotion creates ?? why come the motion within your physicality? And do you trust what you feel? Do you understand how you feel? And do you understand why you feel? Would you be able to create a condition that you can elevate the strength of the Soul of your own or the others. Or clearly, you find a new way to communicate between yourself and the others.

In the coming time, shorter than you think, I will teach you how to see through the eye of the Man, and at the same time, understand and see through the eye of the Soul, or understanding of interaction of its fields. And then we'll see how you as Knowledge Seekers will take steps to be there to understand more, and to be part of your own Creation, and your own emotion, and your own dimension of ?? travel.

Everything in the dimension of the STM has no formulas. We cannot write, can you teach us, can you give us a system that we can elevate our Soul. You have to learn through the dimension of physicality which you have been taught, how to connect with the STP, (:44). and through interaction with your STP make

connection with the STM. Jump in from the physicality to the Soul it's more or less, not the impossible, but ?? not impossibilities. You have to be able to interact directly at a given strength, because don't forget, it's the Soul which created the STP, where the physicality brought in the Soul in the womb of the mother.

Now, we come to understand. We in a way have come to the point that we start gradually understanding that learning the space system for the Man to travel in dimension of the Soul has no calculation. And has no method except understanding the process of elevation of the Soul.

Think how you as a Man with all the teachings of two years, been nourishing your Soul from the environment of life? You breathe it, you extend its strength. You swallow it, you extend the strength. You think and absorb energies from outside, still create that condition that you can survive. Then it comes the process of, what's the reason for life? Why am I here? And how long more is left till my Soul finds its home? Then, maybe one day we'll find the answer to the totality of what is on the table. (:46).

Any questions if you understood should come from within the Man, and not from outside in a verbal direction and dimension of the Man. Connecting makes you wise, then that wisdom shows the path to the Creator. It's for you to decide how much you understand and understood from separation, filtering and cleaning of every dimension of the Creation, which is in your pot.

How much more Man needs to know? How much more Man needs to trust himself, and what it will take, that you as the Creation and the Creator know and can provide for the Soul of your own? As our friends says, I do not know what to do. But I'm doing something because I'm still breathing.

In the process of understanding the Creation and the Creator, we have to understand ?? at least ??, what is going on. What is ?? visibility and what is the possibility. Then don't make assumptions. (:48). We have to understand the process of the Creation. And in the coming time systems will be set up for Man to learn the process, to go through that training, the way you get trained how to drive, you get trained how to swim. Now, with understanding the process of Creation, you learn how to swim in the ocean of the fields of the Universe, not as a fish, not as a body, but as embodiment of the energy of the STM. Then you'll find that you will be going everywhere, but there will be visual, physicality in the dimension of existence. Where you are just being kicked out as the session is not about to happen, but it actually does.

Does the STM, has the STM made the STP blind for it, not to show in the dimension of physicality to the Man the truth about himself? And to what extent we have come to understand the truth about ourselves, the truth about our Soul, the truth about the dimension of the Creation of us?

Today's teaching is enlightenment in the dimension of the operation of our own Soul, and nothing else. Would it be from C14 coming in to C12? And how much of it will be Carbon this and that? The Soul does not need Carbon, and does not have frequency, and it does not work in what it decides to ?? be. It operates in the dimension of what comes and where it has to go. It's actually a postman, it's a postbox. (:50). Where whatever the other physicality's are done, in agreement with their Souls, my Soul agrees for me to be present at the time, place and position.

Now we understand how we, as a human being, have to comply with the Totality of the wishes of our Soul and not as we thought with the hunger of our physicality. Then, if you understand this, and then if you comprehend the separation between the two, then we will come to be part of the Totality of the operation of

the Soul of our own in the dimension of Creation. One day Man will understand that. One day Man in understanding will come to change his life.

We are just in the process to create a dimension that you understand the operation of your Soul, and not to be what we call, a guide, for you to use to move your Soul when and where you want. The teaching is for you to understand the power of you, for you to understand the extent of knowledge of you about your own Creation, that with it you create a new dimension for life.

One day Man will become wise, and one day in that wisdom, Man will see the truth. But till then, we try to drag the Man along till he becomes wise to see the wisdom. Maybe today you understood, you have to understand or you see the possibilities that will become reality with building, developing, (:52). changing and doing everything possible for us to understand the operation of our Soul.

What will be interesting in the coming time, how humanity will start learning about his Soul first, and then about his physicality. And to what extent he will understand by feeding the Soul he can feed the physicality the way he wants the physicality to move. So, the STM and STP of man become unisons. But it's vulnerable that both can be involved in the dimension of another position, time and place without their own choice, but through the choice of where they have to be.

One day mankind will become wise to this, and one day mankind will become wise to understand the Totality of the Creation, which he himself is part of. To what we need to do to be there in those kind ?? of position. We will bring in new tools, new tools of teaching, new tools of carrying, allowing you all to play with. We go for a small break and we come back. And then if you understood partially what was on the discussion of the, on the table today, we'll carry on to answer some questions. Rick, would you like to go through a break? (:54).

BREAK >>> 482 KSW April 20, 2023 (:58).

K- Yep. Ready, Willing.

R: Let me remind the attendees that they can raise their virtual hands and then we can allow you to open your microphone so that you can speak and ask a question. No hands are up right now.

K- Thank you very much, we can say goodbye, and see you next week.

Q: ..We started to learn about how the Inertia, (1:00). creates matter in terms of interacting with the MaGrav fields of the plasma of Gravity. How does the emotion come in?

K- Repeat the question and you answered yourself, if you understood.

R: We started .. to learn about how the Inertia, creates matter in terms of interacting with the MaGrav fields of the plasma of Gravity. How does the emotion come in?

K- Emotion does not exist, cannot exist, if you did not have the STP, impossibility. It's interaction with the STP creates within the physical structure of the Man, emotion.

And, as we wrote very recently in one of our communications with some officials, the knowledge of the Keshe Foundation has reached a position and time, and level, that now we can produce for example, robots with emotions. It's not programming. It feels, it detects the field strength that, to it means "clean up," do it means, be safe, whatever.

Very recently, I was in the position to enter a lift (elevator). Next to me there was one of these big robots you've seen it, which now they're everywhere. (1:02). I call them "Susie's." But this guy was wearing a bow tie, front, and everything. I ?? .. was on the lift. The lift door closed, and the lift door opened again. And the Susie came in into the lift, turned around, faced the door and pushed tower floor 17. Waited, when he came to the 17th floor, he went out and following it, he went through the whole corridor, floor by floor, cleaning the whole building. It has no emotion. It has preset.

If it sees a child, or a dog cannot show emotion to it. It's a robot. It is a physicality. If, in the dimension of the development of technology where we are, we can create the interaction of the fields at a given, a specific strength of the field, when the robot sees a child, or sees an animal, it will show the real affection. Can I give you water? I feel you're thirsty. Can I bring you some water? I can abandon my job which is programmed to clean the floor to go and get some water. I see a child hurt on the corridor. Oh, how it is? Can I go? It's something I have to respond to.

Up to now we didn't have this facility, up to now we did not have this knowledge. Now we can create systems with emotion. And all it is, it's understanding the process of interaction of the fields. (1:04). Which of the same thing is joy and cry? Pain, cry of happiness. Pain cry of pain. How can we ?? confusion in this as an emotion? We cry because we are happy, we cry because we are in pain. Isn't truth about it, is that one is stronger in gravitational, and one is stronger in magnetical. And the balance between the two is emotion of cry in the physical dimension of tears.

This is why joy and sadness are in the same place in the brain of the Man. One is gravitational, one is magnetical. When you're joyful you give, when you're sad you take, because it's the energy you need. Because that sadness allows you to take more in that in the future time it become a joy that you can give.

So, up to now, Man never understood what emotion is, why we have always parallel opposite emotions. Because it's very much like an isotope, it is Carbon. Sometimes it's 12, sometimes it's 14. If it's 14 travels in the D of the Universe, if it's 12 it travels the D of the P. Which one is joy, and which one is sadness? Is it joyful that is brought in and given and allowed to be given for the physicality to link up with the dimension of the U? Or is it sad, (1:06). that he cannot give to the D of 14, and he has to be as a taker?

So, now we understand even how emotions have 2 true what we call, presentation and manifestation. But in fact, they have the same common denominator. It's a Carbon, the other one is, let's say, Magnesium, we call it, whatever feeding and opposite to it. Because one is gravitational side, and one is magnetical side. And then you have to understand on which side we are sitting as a magnetical. Are you in the dimension of physicality? Or are you in dimension of the Soul?

So, emotion now is fully understood by the Keshe Foundation. And we can replicate systems that create that emotion. And if you mastered it well, you don't need KF, through the STM you connect to the same strength, and then you decide if it's the sorrow I can give it to become joy. You're very good doing it as parents, and when it comes a bit to our older children. we forget it. Unless we are deliberately manipulating, which means in the essence, only physicality is in operation. I've sat on the table, where the person looks at you with anger and switches to the other side and laughs. Switches back to you again with anger, and how can he have two face? But in fact it's not two face, it's the way the emotion, the Soul has interacted with the physicality, confirmation of the weaknesses in physicality.

So, when you ask about emotion, now you have to understand what emotion is. And it's in fact, (1:08). it's the interaction between the STM and the STP of the Man and materials created to absorb emotions, at a given strength, we call it. If you've seen the new technology, this is where the sadness is felt. This is where the languages is in your brain, and this is where the other thing is.

In converting from the Cosmic Rays (CR) into the matter state of physicality of the Man, certain energies released, and in that position, we can say, what this position of the brain is. Because at that strength we shown tears. At this point, at this given strength we shown joy and laughter. So now even we can explain in a more detail way, the operation of our brain in the manifestation of physical data on the screens of monitors. But the STM does not have monitors, and the STP does not carry a screen everywhere.

Then, I think you have found your answer. If you understood the process of the interaction of the fields, and which side you sit as a giver or taker, depending if you're on the Soul side, or the STP. If you're on the Soul side, you'll find elevation and dominion. If you're on the STP you find action and reaction in dimension of physicality. Tear, laughter, where what was felt in that position triggers certain other fields in the body of the Man, which manifest yourself in the dimension of physicality.

It is the same, read Book number one. When the two fields interact, creates mass. And one again when mass itself interacts with the dimension of the same fields, it becomes weight. But in fact it's one is created out of interaction of the others. (1:10). If it's less weight than the others compared to the position, then you call it, happiness. If it's more, you call it, fat, and the more or less, you call it, slimmer or the right weight. But the fact it's the same structure, the same interaction.

So, when you're talking about the emotion, you have to understand the interaction between the two. As I said, very recently, you cannot test fly if you don't have two points of reference. Where are you flying to? Where are you coming to (from)? It's the same with the emotion. Are you going from the Soul to the STP? Are you going from the STP to the Soul? And in that position, that given strength of the brain of the Man which is again, it is just a, potholes of fields and plasmas. What will be the reaction if the Soul gets with the joy of learning that this makes the physicality happy, then takes the body to be enjoying and being in a joyful condition all the time. And then you find the emotion. And them, in so many ways, you'll find the process of addiction. Because at that point you're addicted to creating the same thing, the same rhythm all the time, to achieve the giving and the balance of the emotion.

Any other question?

Q: .. One of our Chinese Knowledge Seekers asked that, since recently, there's so much sand storms in Beijing, (1:12). and it cover most of China. So he's asking, is there a solution to resolve this issue?

K- Yes, abandon the city. This is something we discussed years ago when I was in Beijing. For those of you who don't know, is that, some 10 years ago, there used to be round about 30 days, 20 days, 30 days a year, where the sand storm coming from Central Asia, which is on the northwest of Beijing, is on the move. This desert has been on the move for thousands and millions of years. It's one of the biggest deserts on this planet. And it's eastbound wind creates mayhem. And if Beijing wasn't here, it would have been the same as if Beijing was here.

We have built this beautiful city on the path of the movement of the desert. Which over the next few million years, again becomes a land maybe an ocean usually. And then the desert moves into the ocean and then the whole thing circulates. This is how continents move. No one can stop the what we call, the movement of this desert. And now after 10 - 15 years, now there is something like 45 to 55 days a year, and heavy sandstorms in Beijing.

If you come it looks like a mist, I have been a few times as I lived in Beijing for sometimes. (1:14). And it looks like a cloudy. But in fact it's the storm, which fine dust particles through the weather change are moving the desert towards Beijing. Nothing can be done about it.

If we can stop this desert, if we try to stop the motion of this desert, then we'll create mayhem in weather condition of this planet. It'll be worse than the global warming. So, we have built a very big city on the path of a slow "snail" called, the desert. And this cannot be stopped. And you'll get more and more.

With the difference that now we have system to control to understand, and these sand storms create direction of field and energies, which in the interaction with the upper atmosphere and lower atmosphere create new chemical hazards, poison air. Which then in breathing with the sand in the lungs, this leads to all sorts of respiratory conditions in China and especially in Beijing. Dust particles have different sizes and there are those who are below very fine, which can penetrate the skin. And those who are thicker we see them as sands on the streets and everywhere else. In my last stay in Beijing, we saw it even in our entry. In two or three days like this and I remember the manager of the hotel we stayed in he said, it used to be less, now in past 10 or 15 years is now getting to about 40 - 45 days a year. It will increase to hundred, maybe 150 days, (1:16). and in time, maybe in 200 or 300 years, Man will abandon the city, as it gets covered as the what you call it, the desert is moving to the east side.

So, you can't do anything with it. It's just don't be in front of this slow snail. It doesn't matter how much trees you build, much barriers you put up, the sand storm, the field strength of the storm from the center of the desert itself on the back end of it, is east direction, and it will come. Maybe in a few thousand years, in a million years somebody, the cycle of sand don't move further, we'll find, oh, there was a city, millions of people use to live in it. We'll abandon the city, sooner or later hundreds of years this city will be abandoned. Nobody has managed and scientifically it's not correct to stop this motion. Just try to get out of its path. And we don't have any scientific, any tools to stop the motion of this what we call, desert.

Any other question?

Q: In the previous workshop Mr. Keshe said that first the gravity of the Earth formed and then that led to the Creation of the Earth. (1:18). Can you give more of an explanation?

K- No, this is how it is. It's like the emotion we were explaining. When the gravitational field strength is stronger than magnetical, a central field forces of higher order is created. So, it absorbs a lower layer or a strength of fields. This is how cancer is produced in the body of Man. You create an environment of absorption, a heavier field strength in a given environment. And then because it's higher absorbs the fields of the lower level. So, it gets up building mass in that lower level. Till a point when the mass field Inertia, compared to the magnetical field changes and then what we call, the atmospheric and physicality appears.

This is done in production of materials. This is not a theory we talk about, we see it physically. This phenomena is fully understood. We have the knowledge and the technology to keep the Inertia changing in respect to gravity and produce the Carbon as a solid, the Carbon as it is in amino acid, and the Carbon as it is in the amino acid of the plant or the Man.

The knowledge within the Keshe Foundation is very deep. It took me years to teach our scientists to understand the possibility of creating as much fat as you like in a natural way. (1:20). Not by adding and chemistry, in a natural way as you produce in the body of the Man is in the possession of the Keshe Foundation.

And many of you have seen it, but you don't understand it. You collect the Gans of CO₂ and in the top of it you see fat. That fat has a CO₂ characteristics absorption level, otherwise it wouldn't be there. So, in the bottom you see Gans of CO₂, on the top you see is amino acid of the CO₂. Now this knowledge we know how it's done and how we can do.

Any other question?

Q: .. Good morning, Mr. Keshe are you so kind to develop a little the phenomenon of lighting of the light at the holy grave in Jerusalem.

K- Explain.

R: I'm not sure about the lighting of the light at the holy grave in Jerusalem. He wants to know more about that phenomenon apparently.

K- It is the phenomenon at a given time that candle lights up or the light comes on at a given time and place and they bring the light up? Or are we talking about a different light? (1:22). Creation of light in a specific way, by creating specific condition has been understood for centuries and depends how people used it. And some use it to the benefit of Man, and some used it to become a magic and they can connected to religions to find influence and power.

Until mid, late last century, in Iran we had a bath, a public bath which was lit with one candle, for decades. And then the British came to understand how they thought they can find this mystery of what they called, nuclear bomb or whatever out of it. And they by moving the combination of the structure, which was set up to create the spreading the fields was destroyed and the bath is gone. The bath it's still there, but it's not warm anymore. And it was a light, it wasn't just some geological. One candle was heating a whole public bath, thousands of liters for decades.

The exhaust from the gas, which was a methane gas, was understood, and then the combination of submitting gases around the pool by what we call, ?? subliminal fields kept the water warm. Now we understand the technology. But as usual, wherever the British went, they created mayhem, because they had to find something they could take back to England to show what they found. But this knowledge they never understood.

Nowadays, we control the methane in the houses and we say, this is the problem, blah, blah, (1:24). but then the scientist, man of knowledge understood and used ?? subliminal methane plus methane itself. And manifested as one candle, but actually the whole pot was in flame, but could not be seen.

This light situation which goes in Jerusalem is of the same, what I call, level of understanding. How things are moved at a given point with a certain point of manifestation, the light is created. You can create that light anytime if you know. You have to watch the move and you have to watch the concentration, you have to understand the position. Then you need a very, very little to light a candle up. It is like a match which needs to be instant for a few seconds to get the candle lit. Now we understand that knowledge, so there is no trick into it.

But if you want to make it holy, you can add everything else from Jesus, to Moses, to Muhammad, and somebody slept there, somebody blew into it. Something which is magic and it only happens on Easter Sunday, whatever. This is what I said many, many times, if you understand the knowledge, Man in the depths of Universe will not find any more magician calling themselves prophets or the mystery of the light.

Now we understand the process, you understand the field interaction. How can you create that field in a given position in a certain point that creates that concentration and a spark. If you think of it, how many times you have suddenly moved and said, oh, I received an electric shock, (1:26). static energy. If you can, where they talk about this light, if you study the movement of physicality, you'll see is an instance sparking in a certain motion which creates ?? burns anything, you can put a candle, or pieces of ?? it will burn.

Then where is the mystery, and then if you found out you can do this in a given position, then you attach it to Moses, and to Christ and everything else. It can be on a Sunday, on a Monday or a Tuesday. It depends on which are you going to light it, and which religion you are going to attach it. This is why we keep on emphasizing, do not get fooled, and do not accept no prophets and no prophecies. Understand the knowledge.

A light has to come from interaction of the fields. And how do they light it up? How does the static energy converts to? How come every time you pass a place you get an electric shock and you say, and you hear the spark. And if you're clever enough, you can use that to candle a light and then from that on make every man on the street come and pray, it is a magic ball, the light comes on every time I pass. That's all it is. Find the knowledge, and develop technologies we can see and measure the electric current charge and how something at a given point will ignite. Then you can do it every 24 hours on the hour. You don't need the Sunday, you don't need any resurrection. (1:28). And no one can fool you in the space.

Any other question?

R: Ok, we have a question from Cristiano in the Q&A here.

K- Let me explain to you something. .. In the laboratories of the Keshe Foundation, we have managed to develop a technology system. A plasmatic system that if it's run in conjunction correctly, can produce

materials, can produce energy, can produce food and can produce anything else you can imagine from the same system. And it will be demonstrated in the coming time in one of the major cities in the world. As the manifestation of completion of the Man's knowledge in technology. With this ball we can create fire, we can create water, we can create food, and it's only a ball. I'm sure if we leave it long enough, they'll make a temple around it and they become the holy ball.

But if you understand the knowledge of it, you understand it's a key to life survival in deep space. I wonder how many of you will call us, everything else which is promised in every book that they made something to control. It is not something we're going to build, it already has been built. And in a very short time will be demonstrated in one of the biggest capitals in the world. (1:30). To show the completion of the knowledge of the Man. The same ball will light up, will bleed blood, will create honey, and then if you like it we can add anything else you like to it. Because we understood the secrets of Creation, no more.

It depends how we're going to use it to what we call, fool you, and create a new way of thinking, or influence your thinking that we are magicians. But this is the way Earth does. Lights you have a daylight, it creates water for you, it create honey for you and the milk, and you breathe in it. Nobody brings tankers of honey from another destination in the Universe, and nobody does with the milk. The cow eat the grass, and the child drinks the milk. Now we understand that process. And the beauty of it is that, anyone of you can do it.

Any other question? (1:32).

Q: .. Good morning Mr. Keshe and all Knowledge Seekers. Mr. Keshe, I noticed that at the transition point between the emotion of physicality and the emotion of the Soul, there is a very subtle change before we go deeper into the emotion of the Soul. However I noticed that physicality tries to "kidnap" this transition. I ask, how can we make a faster leap to go through the transition without interference of physicality in the process? Thank you very much

K- Learn not to be cheated by it. It's like a coulomb barrier, you have to pass it. Some people say it doesn't exist, but it actually does. We call it barrier, we call it, upper atmosphere, you call it, the coulomb barrier. It is again the way Man has made so many names for the same physical operation. So, you don't need to do much, you need to understand the point of interaction. The beauty with the plasma is, it doesn't have a fine line, this is the line of interaction. It is a bandwidth, it's a gap, it's a distance from one point to another, has a dimension of physicality to it. And that's the beauty of it. It depends which end you fall in, and that means the same emotion as somebody else in the inner side of the same plasma fields.

Any other question? (1:34).

Q: .. If whatever happens is the result of the interaction of the Souls, does that mean the will of our Creator is in fact that collective will of the Soul of the Universal Community?

K- Not far from it. Because we are part of the Creator and we are created from the same. The Creator, and the Creation, and the created are all the same. Depends which side of the fence you stand. It is a mother with a fine line of life span. Born as a child, conceived as a sperm and egg in a different environment. If you stand 40 years down the line, or 20 years down the line, matures to become what was created out of, to become the creator of the child, another cycle. So, where are we?

If you understand this, you understand the process of life. What was created becomes the Creator of. And there is no difference between Micro and Macro. But she's still part of the society, she still lives with the others. But at a given point, from point observation, if you look at the child born as a girl from the womb of the mother, it's just a child, she cannot give life. If you wait long enough, matures enough, then what was created become the Creator of. And this is how the cycle of life is. This is how the Creation is, and we are part of it. Are we the observer? Or actually are we that child? (1:36). Or are we the mother who created the child while she was a child herself born of.

There's a very nice program on television, sometimes it's nice to watch children cartoon, I'm a cartoon lover sometimes. This is of Tom and Jerry when we were little, and Mickey Mouse. In this cartoon, the little, two little girls talking to each other. And one says to the other one, you're a baby. She says, no, I'm not a baby, I'm always me. Says, go ask your mom. Both of them march to the mother and say, mom, she is telling me that I used to be a baby once. The mother says, yes, that's how you were born. You're a baby and you are what you are now. We deny our own existence, because that way, we disclaim to be the creator of, while we've been created out of it.

Any other question?

R: We have a combined question here from the Q&A from Wolfgang of the German speaking community, and also from Jalal has the same question apparently, though...

K- ??Those in the German community they all talked and then they came over here .. with one question.

Q: .. When the body converts phosphorus to calcium over a long period of time, what is the reason for this? Could it be a certain emotion? And if so, what would that be? That's the question from Wolfgang. From Jalal he says, why the body converts the calcium to phosphorus? What is the relationship between these? (1:38).

So I'm not sure if they're talking about phosphorus to calcium, or calcium to phosphorus.

K- Historically, historically, .. the thalamus and thymus work to create this condition. And in the cases of conversion of the phosphor to calcium, the body produces. They use the same seed calcium. Because every single cell of the body of the Man has a calcium. And then the phosphorus is attachment and we have a calcium attachment. If you have a calcium attachment to the calcium cell, you end up with a bone, physical bone. If you have a phosphor with a calcium, you have all this cleansing system within the body of the Man and disinfecting. That's what the job of the phosphorus and the sulfur is in the body of the Man, partially.

You have a combination of sulfur and phosphorus, which converts due to certain interactions into calcium, where the seed center is, manifests itself as a calcium. And the phosphor field strength is converted to the seed of calcium by energy conversion. There are about 15 - 20 people at any time alive on this planet, which the body does this automatically. Doctors have developed the material for it, which by introduction of aluminum, they try to slow down the rate of the conversion of the energy fields. Aluminum is absorber, that's why we have it in the brain and we have all the problem, or we have it in the blood cell we have other problems like dementia and what we call, (1:40). anemic condition.

In the thalamus and thymus conversion, the sulfur and the phosphorus energies changes into energy of the calcium. And then this calcium comes in, usually gets deposited in the blood veins, instead of the blood. So, if you take .. the main arteries of the leg, the calcium gets deposited into this. And all these people with this

disease, which phosphor and sulfur convert. It doesn't convert, the energy received from thalamus and thymus conversion information in DNA and RNA, gets deposited in as a heavy material into the main arteries. And they usually amputate the legs, and then they starts from the toes, then the foot, then they amputate the leg and they usually die. And sometimes, due to repositioning of it, this calcium sits on the wall of the heart. It's like putting a grain between, a sand grain between the tissue. After a while with the repetition of the heartbeat, the wall of the, what you call, the inner wall of the heart tears up, and you die of the heart failure.

And we've done a lot of studies on this, that's why I know fully about it. And we have developed too a technology to reverse this position, where body goes to normality. It is a very extensive work. It has to work with the thalamus with thymus, and work with part of the digestive system, to stop the conversion. (1:42). Or in a way to bring balance in the magnetic field of the phosphor and sulfur in the body of the Man.

I worked on a case like this in 2008 - 2009. And there's some 10,000 pictures available, on how it does, because the lady, she just passed away about two years ago through old age, around 80 - 85, I think. She was adopted daughter to my mother and she lived in Manchester, born in South of Iran, two brothers and a sister. Brother died due to heart failure with the calcium tearing apart the heart. The lady, the woman, she had the calcium in veins, arteries, the main arteries of the leg. She was brought up, she was due to be amputated because it creates gangrene, when the blood doesn't go to the toes. And she was supposed to receive amputation in Manchester Royal Infirmary on the next couple of days. I said to my mom, there is a possibility this can be reversed. And my mom spoke with her and she took the first flight out of Manchester. She joined us and they did the vein what we call, artery replacement in the hospital to put the plastic vein as we call it, in. (1:44). Two years later again the vein was blocked with calcium and they could not replace it. And the toes were going for amputation. With the supervision of the head of the hospital in the second time when she was brought to us, we agreed that it was too late for the small one toe, actually the big toe to be saved we agreed on how the amputation is going to be with the surgeons in the operating room. And the first time we went above the joint between the foot and the toe. And the nurses made a mistake, they didn't understand this is a different way of handling it with the new Plasma Technology. The gangrene set in. So we agreed with the doctors in the operating room, I was present, where is going to be cut, beyond the joint towards the foot.

And we set out while the cleaning the structure, we set the whole body to stop converting calcium, phosphorus and sulfur combination to calcium. And we succeeded. Her fingers all were going to be amputated, because they all were in the same condition. They were peeling and falling off and we could see the bones, literally we see the ?? cartoons bone sticking out, this lady had bones sticking out. We had 10,000 plus pictures of every process of this.

And then I said to the doctors that, leave it I know a way to grow the toe. And we went through the process of growing the toe. And we saw it, we spoke about it before. (1:46). And then we watched the total grow from inside, bones growing. And then we watched the conversion of the balancing of the growing back to normality which was genetic, because in their family they had it, to a normality. The fingers covered, it became back to normal and the toe went ... This was done in 2009. She died in 2020 in the city of Manchester. (with it) never coming back. Because at that time she was taking aluminum tablets, and each one was (costing) about 40 pounds each. She had to take one, and she was taking cocktails of medicine to try to stop this process. Because she would have died in a matter of months, as (from) the gangrene and the amputation. She never had any amputation. I saw her last picture at the funeral of my father three years ago, and she was normal. Those sticking (up) bones were all gone, and everything else. It can be done, we

understand the technology, we understand the conversion. And this is one of the beauties of this technology, if you understand the essence of Creation it can create ??, and can convert.

Any other question?

Q: .. Mr. Keshe is it possible that not only robots having a Soul, but because of humanity's aggression, that they may turn on us to solve this problem? (1:48).

K- To solve which problem? To make a human out of us? Humane human?

R: Yes, I believe so. Humane to human.

K- Maybe we are a step ahead of that, if you understand how to create fields at the strength of the what you call it, the field of emotion.

In a very, very short time, very, very short time, I hope we come to conclusion. One of the largest exhibition centers in the world of the Keshe Foundation will be opened in one of the biggest capitals. And in that exhibition we'll demonstrate the change in emotion, and how technologies can be brought in. And in a way we will show how Man can handle itself. How Man will come to understand itself. How Man can change his emotion.

We're talking to a representative of a government to move into a prison and change the life of criminality in the nation. A lot of our friends who is involved in this with us. He said, you know, .. the only thing we cannot change Mr. Keshe? He said, have you seen this, what do you want to handle? I said, I can guess. He said, I promise you can't do one thing with ?? these ?? . (1:50). They have all of their bodies covered with tattoos, can you get their tattoos cleaned up, they can get their emotion and behavior change. I said, then it becomes their regret, what they've done with their body. He said, all of them are tattooed from the top to toe, you don't see any skin. And we wish we could change this, because when they look at it, would they become ashamed of what they've done through the other part of their lives.

Technology is very advanced, now it's time to show its power, and very soon we shall. Sooner than any of you can imagine. We soon will close the exhibition in Linz. ?? One of the last times it'll be present in Europe. Very soon, if any of you wants to go to see the exhibition in Linz, you have very short time left. As the technology and one of the largest exhibitions of the Keshe Foundation will move to a new destination in very, very short time. Out of the mainland Europe.

Any other point?

Q: .. How important are the chakras and meridians to the operation of the Soul, and what exactly are the chakras and meridians of the Earth? (1:52).

K- How important is Earth, Saturn and Moon to the Solar System and to the Sun? It is a collection center of energies. And we have chosen a name for it. It's if you look at it, whatever you call a chakra, except the one which is above your head, which we thought it was above our head, they missed it, because they never considered the Soul to be within the body of the Man. Is the energy point centers of the what we call, organs.

If you look at all the chakras they tell you, and look at the concentration of the fields of the organs, it's in the same place. One by one. And you have a right kidney, you have a left kidney, you have, what you call, the heart, and then you have the combination of the what we call, the energy fields of between two hemispheres of the brain. And these are all are counterbalanced by the field strength of the back spine bone.

Most of these energies when you look, it's like a star formation. You look at the chakras in the front. They say, this is chakra blah, blah, blah, blah. But they have an interconnection in the front, but they have to have a counterbalance, which comes through the power transmission and the spine. If you move or if the chakras move in balance with the position of the fields in the spine, (1:54). where the nerves come out of the spinal cord, you have all sorts of problems. But Man always looks at the energy fields through the organs in the front, but they have a counterbalance on the back. And everything in the body goes through neural system in the back, which feeds to the energy, which is a loose part in the front.

In a way, by parallel points in the back through the power of the neuro system you control the chakra in the front, as it's a twin system. This is a very deep discussion, and through the break, not a break, but if you look at it through the leakages of the nerves out of the disks into the body, you can see much structure in, some time in the angle of 10 to 15 degrees, as where they call it the chakra to be, with the energy in the front. But it's actually controlled most of it through neural system in the back. Because you can feed one through Twinity, you feed the other, you control the other at the front.

And most, that is how, in principle, when you deal with the systems of the KF, and if you been with us or in some of the teachings, we always say, put the double loaded (Pain) pad in the back, and the single in the front. That you push the energy from the back to the front, out of the body. If you do the reverse, you push that energy into the spinal system, you spread the disease.

So, this is part which, is what I call, the hidden knowledge we don't teach, (1:56). because mankind is not ready to understand. But mainly most of the divisions of the chakras if you look, is connected with the spinal cord division into the body of the man within three, what you call it, disks.

This is why when you have a car accident, the damage to your neck, you will find problem with digestions, and in the intestines, and in your bladder. And doctors don't see the relationship, because they never understood. You take most of the energy dissipating in the neck, and through the fine tissues go through the stomach and change the characteristics of the chakras. Because the same amount of energy is not going down the spine to control the chakras in the back through the backbone, called the spinal cord division.

One day we teach this, but in essence you have used it in the system. This is why the new Pads, the Enhanced Power (Pain) Pads are so effective. If you notice Keshe Foundation has marketed a new Pain Pads, work on the same principle of the chakra energy ?? distribution. But it's specific for certain ?? two chakras.

Any other question?

Q: ..Will we be able to use the systems to regain access to human abilities such as telekinesis?

K- Translate. (1:58).

R: I guess he's talking about the new systems that have been created by the Keshe Foundation, and he wants to regain access to human ability. He mentioned telekinesis, which is, would be the ability to move an object at a distance using your mind basically.

K- Everything is possible if you can get your Soul moving out. A new magician tables, you call it. I always said, don't say, "come to me." If you want to please me, if I can give you enough for you to please, move. That way you can move a stone, let alone a Man. But you have to find the Soul of the other ?? first. In words our child sits in front of you. When you say, I love you, can I give you a kiss. The child runs to get that kiss, to please you that you love her. Now do the same thing with the stone. But don't forget the writings of Bahauallah, bless his name, even a stone has a Soul. Find that Soul, you'll move the stone.

Any other question? (2:00).

Q: .. If we are all from the Creator, and all are part of Him, is our Creator also a part of a larger Creator? And keep looking up, is this infinite?

K- I think we've touched this last week in the teaching. Why do you look up? When there's more to look in or ?? down, within. Even though there is still something to look up .. ?? with ??, otherwise we didn't have confirmation of our own existence.

Look at it this way. To us from inside the Solar System, we see the moons, and the planetary system and the sun. How does the Solar System look towards outside it? Do they see the way we see it? Or do they see the same thing in a different way? Are we looking within, or are we outside looking in? What do we see? When we look at our own body do we see our liver, and our kidneys? We know they're there. But if you're a liver and kidney you know what's the operation of ??, how do you wait for the rest of the body to bring the materials to you for you to clean as a kidney. And the rest of the things bring that things for you to wash your heart. So we are aware of existence of others, but from outside nobody sees our kidney ?? . Look within ?? look outside to see what it is ?? within it.

Any other question?

R: Just checking over here. (2:02).

K- We're now going for two hours, which is ???. let's call it a day

Q: ..What do I do to get rid of my foggy left eye?

K- Join the Keshe Foundation, go to the info@keshe.foundation or health@spaceshipinstitute.org and get the appointment with the doctors. I'm sure they can help you with the new technology.

R: Okay, that's a good suggestion.

K- We announced last week about the first 25, and then the 200, and then the 65. We are more or less completed with the 25, we're looking in the 200. Those of you who live outside EU you have to get in touch with the Keshe Foundation info@keshe.foundation, where to send your donation to be part of. Those of you who are within EU still carry on paying into the what you call it, Keshe Foundation account in Holland. This is a technical change for the Keshe Foundation, gradually you will understand more why. But if you're living outside the European Union with the IBAN number, you have to go through a different channel of transferring your funds to the Keshe Foundation EU. Money transfer or if you write to info@keshe.foundation or health@spaceshipinstitute.org, (2:04). they will give you the details what you have to do.

There will be a big change in Keshe Foundation operation in the coming weeks and months. And we'll keep you updated and informed. It's part of the changes, which we have come to accept the change.

Any other questions?

We still have room for the 200 people, and those of you who have already joined us for the first 25. Sometime in June you'll be informed of the place, time and position you have to be in, and then September, October for the 200. But we inform you if you need visas and everything else, we can support you to get your visas and everything else to be in the position we allocated to do this work.

Any other question?

Q .. What do you think about what happened, or what's happening with artificial intelligence, you have any opinion on that?

K- The artificial intelligence will be "reality intelligence" very soon. Because they have essence of the Creation. It won't be artificially, but in a way the process of the knowledge is changed. There's a lot of changes coming on board in the coming time. And over the next 5 - 10 years, even the technologies like computers, and satellite, and intelligence, what we call it, all will change drastically. (2:06). We see it, it is in the pipeline, intelligence, what you call it, with emotion, microchips are on the card. In the process of chips ?? emotional ?? . Because the materials to create emotion now is at the grasp of the Man. You understand how and the way it's done.

Q: .. If you travel by car from A to B, for example, you know that you will arrive at B in two hours, you can adjust to this. But if you're standing in your living room, and a second later, you're standing next to you in Linz, couldn't you have psychological problems coping with this sudden change of location?

K- We pre-accept that we are going to see. I think the joy of arriving is more than the psychological, one of the biggest thing is, now, is when we put you to Moon. A few seconds before you're on Earth, and then you arrive in Moon in a dome. You were wearing clothes of being in a cold condition, now you're on Moon or something, you did not carry any clothing. How are you going to accept the new condition and ?? And these are the, what you call it, the evolution in acceptance that we have to accept.

They say, if you can't stand the heat do not get in the kitchen. So if there's going to be, you don't have a pre-mindset that you're going to be in Linz, and you are going to meet your friend, what will be happening in between does not the 18 hours of flight. (2:08).

Q: Somebody wrote to me, why are you moving out of Linz?

K- The reason being, Linz is too far, and not many people can make it, mainly Germans and Austrians. We have to move in a position that everybody from all corners of the world can reach, and there is enough traffic. Our team in Linz knew that sooner we will be moving, and now gradually it's taking shape. We informed them months ago, that Keshe Foundation Exhibition will move. Because it's too remote, for people have to get from wherever, from Vienna, and then two, three hours by train to get to Linz, and then get the train to .. and all sorts. And the expenses are too high, because it's a remote position. So, Keshe Foundation will move

soon to major cities capitals to allow the large ?? percentage of the world to see the coming of the new technology. It's not something new, our team were informed months ago of the move.

Any other question?

Q .. I had registered and paid for the special Satellite (Soul). Will I still be able to serve in this way?

K- Yes, Satellites (Souls) we brought in the operation completion of the work, yes. (2:10). Stay where you are, you're part of the bigger work which will come.

You've got to realize, I was explaining this to some people. Some of our Knowledge Seekers online, they know what I'm talking about. If you look, we have set up an international "one nation" organization. And when you do this, you have to have a feed of contracts with people, like ambassadors and whatever, in the physical dimension of the Man. When you need a structure of the health, you need a structure of the food structure, you need the structure to be able to reach energy to people, you have to have a structure to be able financially for them to support through a system which you set up, which is correct. And then you have a structure of governing, governance. And then you have a structure, what we call it, being able to connect everything together.

If you look at it, we have brought in, in a very subtle way, all this together. Every pieces over 20 years have been brought together in pieces, and the it's left till the time it's there to bring it in. We brought in the Keshe Coins, to start the new financial structure. We brought in what we offered a few months ago, that you can join in as part of the, like insurance policy, for the health, for the food, for your wellness, for your energy. And we made the wellness available. It will come soon. So, you can pay a fee and receive most of the nourishment you need through headphones and the systems we set up. So, and then we come to the energy, which is now getting setup, the system is reaching up to get there.

So as a "one nation" government, doesn't matter if you're in Berlin, (2:12). you're in Toronto, or you're in Beijing, or you're in Lagos, you can lock in. Like a nation, you go to a supermarket, if you go to, let's say, Walmart in America or in Beijing, or in another part, it's all Walmart, the same structure, the same setup, looking after people of the community the same way.

Now, the Keshe Foundation is all being set up, coming to it. It doesn't matter wherever you are in the world, you receive the same health care. It doesn't matter where you are in the world, you receive the same pleasure for food, the same energy, the same financial structure. Everything for governance of "one nation" has been set up. And a lot of your are participating in it without you knowing, or you're. And part of this Satellite (Soul) system is that. Not any of you became, the Soul brings you to be there.

And then we set up the governments, which is the Universal Council, we see a few here and there, they are working and everything else. Once it comes into operation, Universal Council will take over its shape and its work similar with the Earth Council. So in a long term, we brought in the television, we left it there to be, because it's set up to be the structure, which needs to be come in. The KFSSI as a university education, education center has been set up, and then we're coming to go.

We have to do, we tested, we set it up, now its sitting, like a quiet nice baby in the corner waiting to play. The structure for "one nation, one government, one policy, one benefit" it's 60% in position. The other 20%

will be delivered in the next few months. And the completion of 20% will be in the next 5 to 10 years. (2:14).

I have set up a structure to govern as one planet by the people, for the people, through the people, through knowledge, and technology and not politic. You will not have presidents, and you will not have the kings. And the structure comes, "I am the last man standing," what am I going to do? How am I going to survive the correct way? And this is how it is.

To you Keshe Foundation could be a lot of things, but it's a structure set up. And to set up one structure slowly, slowly with help of you, each one of you came in and took one corner of this carpet, it's well structured. Test it, brought in, wait till it comes in. Tested, brought in, wait till it comes in. When you go into the Keshe Foundation website, and you see all this so much for the health, so much for the food, so much for travel, because we know, traveling. At the moment let's say you pay, 1,000 pounds, 2,000 pounds for every time you're transmuting between, let's say, outside London, and South London to go to work.

We know the cost of the travel becomes so much through transmutation, that we offer you a package to travel anywhere around the world for a whole year per family for 5,000 Euro, or 3,000, whatever it is in the package. Because we know, in the next five years, systems will be all over the place. (2:16). You who paid this policy now, when it comes into operation, you'll find out that the guys who are going to do it, is going to pay maybe 8,000 to 10,000. You've done your saving now, joining in.

But we have the technology of it. I explained past few days, to some people, you go and buy insurance policy. And then you have to go, when you get ill to find a doctor. And therefore the doctor to diagnose for insurance policy to pay the doctor, and then you need operation. To get the insurance benefit to agree to pay for the what you call it, the care you need. And it could be the wrong care, not necessarily do what it's supposed to do. And then it can lead to some side effects and everything else.

But with the Keshe Foundation "Wellness Plan," Keshe Foundation is the insurance policy provider, is the care giver, and works in a way for it to make you better that you don't use the system later on. We are not sending you to somebody else to see you. Our doctors serve directly at the beginning. We put a permanent plan for one hour or two hours a year for you to have to go into the system that the future problems ?? are not there that it clogs the system up with 20 - 30 maybe weeks, two or three hours a week.

So, I have set up the Universal government, and I'm a very patient man. All these things we set up when it comes together. Now you have BRICS, now you have gold, now you have dollars, or the pound, I have the Keshe Coin. That's all. I can cash it anytime. It is not a Bitcoin, (2:18). which they make me a millionaire, tomorrow I lose everything, nobody can steal it. Because ?? it's ?? not worth anything, because belongs to the same people in the same line, and it's the same value. Your healthcare is done. Energy transformation, the satellites systems, conversion of the fields and energy, all is set up.

I planned this for centuries and I deliver it complete when it comes. But if we do it all it becomes magi. When human race "gives a hand" to make it as Knowledge Seekers and the others, then it's accepted and bring that collective.

Today you pay 5, what is it 63,000 dollars for a kilo of gold, and you pay 6,000 dollars for a kilo of copper. And then you pay half a million for another metal a ton, or a kilo. Now with the production of the material

production, everybody's cost is 500 dollars a ton. Because it's the same system, how you tune it produces the material you want.

African nations now can develop. Africa has run into the maximal uses of natural resources of energy. This is one of the reasons Africa nations cannot grow anymore and the Europeans are using it to the maximum hilt of it. All the dams on the rivers have been built, whether it could be done, done. Europeans have access to the fuel they burned from Middle East and everywhere else, feeding the fire of the industry. The Africans cannot, because they can't afford for the fuel.

In the coming months, Africans have access to the same energy one cent a kilowatt, as do the Americans. Let's see what Africa does. (2:20). Never ever in the history of the Man has been such a just system through technology and science delivered to Man. Let's see what the others do. Reduction in the price of the natural materials in the coming years will bring balancing, what we call, poor and rich nation. Because the rich has robbed on the back of the same mine coming out of the what you call it, gold, and silver, or platinum or copper. As the Africans do with the technology of the KF in the cities to produce maybe even better and a new version of the ?? same. Never in the history of Man has been such a just structure. And it's done by you Knowledge Seekers, we just deliver the knowledge. The promised day of the milk and honey is here, you just wait till it's served.

Thank you very much for today. Hopefully, we'll see each other, we'll meet very soon. And then we'll share more knowledge. Thank you very much Rick for today.

R: We have one question maybe you can quickly answer, are the "one nation" ID cards going to be available soon?

K- Still those. It's in the backfire working on. "One nation" cards has to be accepted by all the nations to be a valid card. It is no use being a piece of plastic in your back pocket.

Q .. How to join the 200? (2:22).

K- If you're in EU, you go and pay the 10,000 which is on the thing to the account of the KF in Holland. If you're outside the EU you don't carry, what you call it, IBAN number in your account, which is if you are in Netherlands or British, or GB in front of it. You contact the Keshe Foundation info and they give you direction where to make the payment. And you automatically.

The 25 is full, the 25 was completed. We are now into the 200, and soon it will be completed. I have a very good idea of where we're going to go, we go to one of the most beautiful capitals in the world. The most amazing places on the planet. And we're just working on it, but it will be announced sometime in June. And if any of you have any problem with visa, Keshe Foundation will sort it out, and you won't miss a flight, we'll make sure.

But it will be one of the most comprehensive teachings of the Keshe Foundation in the week of the 200, and you're not here on a holiday. You're here to what you call, enrich the Soul and the knowledge of the Man. Many of you when you leave as the 65, final section, will be the first passengers of the Keshe Foundation, what we call, pioneers of work.

Thank you very much. And we'll see you next week. Don't forget, by the way, next Friday 28th is the Addiction session of the Keshe Foundation. (2:24). Again, if you're all... All of you who live outside EU and you've been making donations or payments, get in touch with Keshe Foundation because it goes to a new system. And if you are in the EU, you still goes to Holland, because you might pay and it comes back to you. Just get in touch with the Foundation you will be given the new structure, and work through that.

Thank you very much Rick, and see you next Thursday and next Friday on the Addiction. But don't forget this is a different addiction then you're thinking, but it still helps you in your, if you have other addictions. Thank you very much, and see you next week.

ENGLISH TRANSCRIPTION

(:14).

K- Yes, good morning, good day to you as usual. Wherever and whenever you listen to these series of Knowledge Seekers, of the Keshe Foundation Spaceship Institute. We welcome you back with great pleasure. It maybe one of the greatest pleasures mankind has ever known. As we listened to the Intro, recorded some three, four or five years ago, we see how the evolution in science has brought us to what we see today. What this Intro explained or brought forward is now a reality with the technology and the systems, which we have developed.

Where we work through the Soul of the Man (STM). When we directly get ourselves involved in elevating the STM to the point of passing the boundary, the physical structure of the man. There are many of you, hundreds of you, now we run into thousands, have been through the system, have traveled, have seen your loved ones, you have gone to places you never could imagine you go. And with the dimension (D) that you understand and you control. (:16).

So, what was amiss for thousands of years, in past five years have become reality to many of you. And the good news is that, in the next five years, it will take a new direction, elevation, and dimension in all aspects of technology. In the coming weeks and months, Keshe technology and the development of the space technology will take a leaping jump. In the coming weeks, I will explain more and more as we consolidate, as we change, as we grow, and become one of the major corporations and major organizations in partnership with other structures.

Keshe Foundation is just about to break through in the dimension of the space technology (T), in dimensions of the structure of the technology worldwide. And this has come through the hard work of many of you as Knowledge Seekers (KS). It allows us to deliver the development of the STM for more people to understand, for more people to benefit by this structure of the technology, which has come through the introduction, understanding of the collective fields effects of any entity, be it the STM, be it the atom, be it electron, be it the soul of a tree, be it the soul of an animal.

Now, the knowledge has reached to the point that it's time to leap forward, the frog leap will be so huge in the coming months and years, that many of you will say, I was there when it started. I am one of the original Knowledge Seekers. (:18). I am one of those who understood in 19, in 2000, or whatever it came across. Many of you heard about the Keshe Foundation since 2010, 2005. The teaching and explanation of the science to many scientists goes back to 1980s, early 80s, discussions with NASA, all recorded in letters and correspondences, that such a technology, such an evolution in science will come.

We've seen Musk, burning one of the biggest rockets last week, and they are happy that they just could take off. In the next few weeks, the Space Technology of the America will become obsolete. By the technology, which the Keshe Foundation in collaboration with a major government, will make the American space technology to a halt. All we've seen as NASA. All we've seen as a space technology, and all the wonders of burning rocket fuel, will come to an end.

The evolution of the science and technology is at the reach of the man, not only at the reach, it has been developed, to be delivered. In the coming weeks, as we unravel the new collaboration and cooperation's with many governments, with many structures, you will understand, what you as Knowledge Seekers been waiting for, has been accomplished. We stay quiet, we just tell you what is to come. And it's the job of the governments to announce the collaborations. It's the job of their structure to deliver the technology to the population.

We are ready and we have delivered, and in coming days we are ready to take that leap of development and delivery of the technology to millions of people. It comes out of the hard work. (:20). It comes in understanding the elevation and evolution of the world leaders. When we asked you to raise the level of the Soul of the world leaders, it had a reason. We have reached that point. Many of you took part. Many of you with sincerity raised that point and today we have reached that point.

In a coming time, in the next few weeks and months, you'll become aware of the change in technology, in evolution in technology, and collaboration with structures will bring that change forward. Keshe Foundation, as you as Knowledge Seekers, will become one of the prominent structures in science and technology. When we will not hear any more about Americans are about to launch a shuttle, launch a rocket and burns, and we are happy we passed the first 30 seconds, the first minute of flight without exploding. As we heard with Musk's flight couple of weeks ago, or past few days, that we are just happy. The age of the rocket technology and propulsion is finished. It literally has come to a halt.

We will deliver technologies which will replace through the structure of the space technology for man. Man now has two options. You can travel as you've seen through the physical dimensions of the space technology, like UFOs. Or you can travel in the dimension of the Soul, as an energy ?? pack. As I've explained many times, if I make an envelope of the plasma, doesn't matter if I put a pen in it, the STM in it, or a chair, or a dog.

That envelopes, when it delivers and opens up, then whatever is in it, will manifest itself, (:22). according to the time, place, and position of the fields of the environment. If it's on Earth, you go in as a dog, you come out as a dog. You go in as a tree, you come out of as a tree. You go in as a man, you come out as a man, out of the envelope. A plasmatic envelope.

This technology is unknown to outside, it's a dream. If you listen to the transportation and what the scientists up to now have done, they've been trying to move an electron, energy of it, part of it less, up quark, down quarks, and all that mess we have created in the dimension of the physics. Now, it doesn't matter you are a up quark or down quarks, whatever you are. A dog, a cat, a man, once we create that envelope, when we deliver that envelope in the atmospheric condition of the Earth, on a land to land position, you come out as you are. But, when we deliver that envelope from Earth to Moon, you mutate and expansion of opening of the envelope to the dimension and the condition of the environment you're in. We will not see man wearing a space suit on the moon. As man will evolve to the dimension and structure, can live in the moon, on the moon, inside the moon, in the upper or lower atmosphere of any planet, any space and time.

Maybe you can understand the teaching of the past. When we said the time of death, the separation of the STM from its physicality (P), the space and the time and the position of the Soul in the dimension of the Creation, has been decided by the strength of the Soul itself. (:24). Now if your Soul happened to manifest in a water of a distant planet, would you drown and die? Or would you manifest as a new creature, which can live in that environment, taking the D of Soul of Physicality (STP)?

Evolution in change, it comes from transmutation in energy fields. In next two quarters of this year, we go ahead with the journey transportation and transmutation of first two men on the moon. How would we see them? And then in the following months and years, we plan to open colonies in cooperation with the governments. Keshe Foundation is not alone anymore. Keshe Foundation will establish with collaboration one of the largest governments in the world to establish the first colonies on the Moon and Mars.

How would we turn up? If you come outside the dome which we have created? If by accident you land on the surface of the moon when the dome is not there, how would you look? What about if we transmute you in the combination, in the direction and dimension of the gravitational (G) field forces of the Earth into a dome condition on the moon, you'll manifest as a man. The way you left on Earth. But have you gone on the Moon just to walk on the dust and the dirt? Or are you going there for a real experience of living in the atmospheric condition of the Moon? Are we changing a free prison of the Earth to a, what we call, prison of a dome on the Moon? (:26).

This is not the space travel. This is not the way man should be. This is not the way just going from one cage to another. Man should be free. When you go on the Moon, you're happy to be in the dimension of physicality of the man to land. You want to go beyond the dome. Or you still want to be in the dimension of

the frog suit, of the America space technology? Or do you want to be in a real condition of tasting, feeling the pressures, the atmospheric condition of the Moon or any other planet?

Are you only prisoner tourists, or are you a space tourist? If you are a space tourist, we have a beautiful saying in Farsi; "Geh khawheena shaheed uswa hamrangi jamaach." If you don't want to be embarrassed, become part of the culture, become part of the society. If you don't want to stand out as an idiot, as a leftover, as an uneducated, as whatever you want to call it, when you go to the moon you want to mix with the creatures of the Universe on the other side of the dome. Now you understand you have a choice.

Even still we take you from Earth to the moon in a UFO, in a rocket which has no what we call, a firework on the end of it, and we deliver you. Are you just happy to say you've been on the moon. I've been to such a country just in the airport, in the transit. I've seen all the countries in the world in the airport in transit. You see a country when you get out of the airport, when you go and mix with the society and then you become a member. Then you can say I've been to this country, I've seen this statue, I've been to that museum, I've eaten their food. (:28). So man to go to space has to become to that point.

It's better to handle this now than in 20 years, 50 years and then trying to find a solution. Where from the beginning we have the solution. Then you come to understand when we go to the moon do you still want to end up in the dome like a fish tank, or would you like to be outside, where the other souls of the creatures of God live?

With the present knowledge, the name is irrelevant. Because we can create the gravitational magnetic field of the Earth on any point, anywhere in the Universe, even in the open spaces of the Universe. Would you like to be in the fish tank? Or would you and to be part of the society of the Universal Community and be part of the Community. Now you have a choice. Now you understand how the options of the travel into space has narrowed down to no option, except travel by the dimension of the energy fields of the body of the man, we call it the STM.

We have no choice, unless we want to fool ourselves. Yes, we've seen, we've been, but actually, yes, as prisoners and a fish tank. I wonder how many of you will travel to the moon and bring souvenirs made by Chinese, sold to you on the moon, "I've been to the moon," and bring it back to the earth and bring it back to China.

Then you understand. To be the true members of the Universal Community, which we have set up the knowledge for it, we have set up the structure for it, that every Knowledge Seeker can understand, (:30). is not exclusivity of a government organizations or whatever. Is the collective knowledge of the creation that we all possess, and we all have to do. As I said, the knowledge has to be taught in public dimensions, in public teachings, in Internet and everything else, that we bring the whole culture of a nation of the man to one level.

And we have to deliver that we don't stay, just the talkers. And the Keshe Foundation has reached a point to deliver. We deliver technologies to the governments. We show the power of the technology in the essence of solving the present problem of this planet, eradicating poverty, bringing food and the knowledge and energy as food available to every man and every corner of this planet. We have worked for years for this target and today we are about to bring it to an end. Where we can feed all man equal. Where there is no more hunger.

Where there is no more lack of water. Where there is no more lack of energy. Where there is no more lack of what we call, food, that Man can survive.

We are on the verge of the opening doors of the knowledge to all humanity and thanks to many of you. This is not an easy task. It will take us years to accomplish. It takes us years to set up systems to change the course. And as one of the men of the table said, we write the books and let them read. (:32). We rewrite the book of the knowledge of the man in the dimension of plasma technology and knowledge and let the others read.

When in the next few weeks, many of you witness the collapse of the NASA technology, the rocket propulsion and what I call, the "Chinese fireworks." Not by talk, but by delivering technologies which shows everything is obsolete. Obsolete but progressive development of the knowledge. Not obsolete just because it becomes. Donkeys and chariots were the best things in the time of Romans. And today we keep them in museums. And now the rocket technology and the space technology, which we've been brought in by the German based knowledge of the rocket and the Chinese firework has come to be part of that chariot. It's set to be and it'll be part of the museum of development of the knowledge of the man.

In next few weeks, on a daily basis, on a weekly basis, Keshe Foundation will release new dimensions in development of the technology. And collaborations. And we have the time, and the place, and the knowledge to attract enough to bring the changes. We worked for years to bring that support, that stability in technology and the knowledge. And we are just about to break through. To show what was even 5 years ago, as we saw in the beginning, now a reality that it will become part of the work of the Keshe Foundation.

As I said last week, the Keshe Foundation Exhibition Center in Linz, in next couple of weeks, will shut down. (:34). Keshe Foundation in totality will move out of Austria. For development of the technology with partnership and collaboration with major governments and corporations. Where the knowledge of the Keshe technology becomes part of daily life of every man, and plants, and animal who lives on this planet and beyond.

Thanks to work of many Knowledge Seekers. It's taken a long time. We had to prove step by step and we have reached the point that, now we should be able to deliver technologies which is developed by you and knowledge of the Keshe Foundation, as Knowledge Seekers. In the next 24 hours we'll run a test for addiction, and more than hundreds of you have joined this structure. We want to see what you feel in next 2 or 3 weeks, has there been change in your addiction? Have you changed, or have you felt even an addiction that you were not aware of, has been changed? The session which goes on tomorrow, in 12 o'clock Central European time for addiction, will bring us a new knowledge. As I explained in the past, you look at it for addiction, we look at it for the progressive development of our technology and structure in the upcoming developments.

If you are addicted to kill, to eat, when we put you in the space, the one Soul you see on the other side of the dome is not food. And does not look at you as food. (:36). We don't create new systems of what we call, gun policy, to be ready to kill and kill more, that we bring peace. We teach you, you are equal. And the others on the other side of the dome in space are peaceful. They don't have mouth, they don't have a stomach to eat. It's not that they don't have the stomach, they don't have a physical stomach, that they need you to be digested. Now we understand, with the understanding of the new technology. And now we understand with development of new technologies, we have no choice but become man of peace. As peace is time and the place where man has no needs and no worries for the needs that he might have.

Many of you, many of you have been wondering when this technology is going to be, what it says and what it does. Now is the time. Now is time to deliver those technologies, step by step. As one said, we see it, we understand it, we know what to do with it. Will become one of the basic structures of many of new organizations and the works which has been done and will be developed.

As I always said, if you look at the sands in a desert, the knowledge up to now, what we learned, is one of those sands in that desert. We should not be proud that we are the sand, we are a sand which has enough knowledge of the physical world of the man. (:38). The rest of the sands in that desert is the rest of the knowledge of the Creation and the Creator.

In your cycle of sand, how many of the other sands you come in touch with, that you understand that there are so many in the desert? We have opened that sand, that grain of sand in the desert, in the desert of the knowledge of the knowledge of the man, that the man becomes aware of the desert he's in. The desert of his own ignorance, but the vastness of the knowledge and the others which are in that desert. We need to learn, we need to understand and we need to understand the principle of the Creation that we understand how every grain lives and works on its own and how we can move into and understand it and move out to bring them to see how we live.

There is no difference if you look at the number of the sands in the desert and number of the stars in the sky. Maybe there are more stars in the Universe than there are sand grains in the desert. Then you understand, even as a dream, now we have the capability to understand the totality of ?? some. And in time maybe a little more than some. And this should not make us proud and ignorant to the fact, that we know nothing still at all.

In a coming time when you become, and your children become and your grand become the travelers of the space, the true way, teach them one thing. (:40). Always be humble that you can receive. And not arrogant that you cannot give. By receiving you gather strength. By receiving you gather knowledge. By receiving he becomes somewhere down the line maybe just about equal in the knowledge of the Creation, if you can meet with every grain of sands in that desert.

For man to gain the total knowledge of the Universe man has to travel to every single Universe, and every single star, and every single planet, and every single life on each of the positions in the Universe of the Creator. Because each one is unique, each one has his own principle of the Creation, it has own condition and it has its own dimension in the world of the Creation. And without one grain of sand, you cannot have a desert. But with a collection of sand, you make that desert.

In the desert sand, we don't see any difference between the sand. Unless we pick it up and observe it closely. As they say, to find a matching stone, matching grain in the desert, is like trying to find a matching snowflake. So, every grain is different, even though they look the same from outside.

And for man to learn the knowledge of the Creator, you have to learn about everything about how that brain was created and what lives within it, (:42). and how that structure of the life has given it the manifestation of the physicality. Then you understand. With all the knowledge which man is proud of achieving, we have not even become that grain of sand, let alone the grain of the desert of the knowledge and creation of the Creator.

Once we understand this, we start moving forward. Once we understand that the knowledge we gain is part of the knowledge of understanding the totality. Once we understand how the interaction of the fields leads to

what condition, then we become part of the knowledge that by working out, by comprehending, we add to the knowledge of the others, that they have access to us unconditionally.

In a way it becomes us, in a way it becomes the "Soul of humanity" that teaches the Soul of the Universal Community as a whole, what we learned. Be it what we learned from the fish, be it what we learned from the trees, be it what we learned from the sand. When you look at the new knowledge, and now that you understand even a stone, even a sand has a Soul, then you have to carry that knowledge within you from Earth, that when you live with the others in the Universe, (:44). you can transfer that knowledge.

Then we come to understand the Totality of the Creation. Then we become humble enough to understand where we are about to go and what we are about to learn. And then we have to understand, what will be the next step in development of the science and technology for us. Which way we decide as Knowledge Seekers and the collaborators with us, to where and how to share this knowledge that we all understand. We need to develop technologies that we can communicate with the Soul of the plants. We can communicate with the Soul of the fish, and the dog and the cat. Then we understand we can communicate. If we cannot communicate with our own Soul, with the dimension we are born in, how do we expect to communicate with those of the space?

In the next few months and years, man has to understand how to communicate not verbally, through the Soul with the other creatures of this planet, which were us up to now, they were 4 legged walking, or they were going up the wall, and we ?? picked their fruits. We need to understand this, we need to comprehend. And then, once we complete, accomplish, how to interact with the Soul of each other, how to interact with the Soul of the other creatures of this planet, how we respect each other's Soul, (:46). then we are ready to enter in the world of the Creator in other dimensions, to be able to interact with the other Souls of the Universe.

Many of you, many of you will come in the next few weeks and months to question your own integrity of the knowledge. Many of you in the coming months and years will question yourself, what have I understood? What have I missed and what I need to understand to become part of? If you want us to ship you into a fish tank, you're quite welcome. But if you want to become true passengers of the Universe, you'll have to learn to let go of the dimension of physicality of the man, and live and exist in the dimension of energy of his Soul.

Then we have two tourists, physical tourists and the Soul tourists. And what happen if the husband wants to go with the Soul, and the wife wants to go with the physicality? What are the future mayhems we shall see?

And what will be the structure of our governments to allow which and which. We will see a total change in approach of the, what we call, the funny passports, and no entry visas, and the rest of it. I don't need you to issue me a visa to enter your airport, (:48). as I'm already sitting in your pocket as an apple, because I decided to be an apple in your pocket. Do we need now to issue passports and visas for every apple and orange and every bird? Now you understand what this technology has brought. As I said many times in a very clear way, do the birds which migrate, have a passport on their tails, passing every border, starting from Siberia to African destinations? Do they present their passports when they land in South Africa, coming all the way from Europe? Sorry, have you got vaccination, otherwise you cannot land, go back. Now man is in that position.

With the development of the new technologies, with understanding of your effect and the power of your Souls, I wonder how many of you have a Soul passport? And how would you show it? The upcoming changes in the world of technology, and transmutation and transportation will create not a headache, but a

freedom for governments. What I call, international, national taxation for providing services, well, that's on the card. It's a reality of it in the next few years. Where collectively all the areas, whatever your country call yourself, become responsible for collective care of everyone. Because with the new enhancement, what we call, health unit, (:50). we don't need to move to a hospital to get a better service in Germany than we can get in Africa. Because now we get the same service in Africa as we get in Germany, because doctors of the Keshe Foundation are there to provide you irrelevant of your nationality, time and position.

As I said in our talks with the people of the government very recently, your nation is awake 8 to 12 hours a day. The systems are workable 24 hours a day. The same system in your country, now after passing of the time of the day here, are usable by the rest of the people in other continents which their day starts. Then we see international collaboration and setting up of the systems for healthcare and food become part of "One Nation." I built the structure of this technology as One Nation, One Race. In a near future, governments which use the food, and the green and energy as the means of control will live in the doldrums of their own dreams. With one App you get the food, with one App you get the medicine, with one App you get the energy you need, and that App is free.

And then who can control it? Then who become the governor? Then it becomes for those who control the totality, to deliver the totality. When a nation is not worried about feeding its citizens, when a nation is not worried about the energy to deliver to its citizens, when a nation can deliver the health care and welfare at any point to its citizens, (:52). that nation is at peace. That nation will find comfort. You don't find no one robbing no one to eat, we don't find someone selling drugs to have money to eat, and then we find out most of the addictions of the man, by being provided for, becomes irrelevant. The world without addiction of killing to survive. World without addiction to destroy to possess.

In the next few months, you will witness one of the biggest industrial revolution in the history of man. In the next coming up weeks, you will see step by step how the progressive development of the technology will become applicable to many people through the interim use and understanding of the technology.

From where we sit today and when we look at the next 10 years, most of the government's budgets will go through the window. Because you don't need to allocate money for food that your nation is fed. You don't need to allocate money for energy that Arabs can hold on to, to charge you more, for the king of Saudi to have a better women, nicer women and more of them in the same bed. That's all we've done. We have, we have given with our rights to work day and night to pay for the fuel for these people to become the abusers of the man himself. When you can have all the energies, Arabs can sell their sand to themselves. (:54).

These are not talks. These are, as we see in next 5 or 10 years, now becomes a reality of what we call, One Nation, One Planet, One Race. Equality to access to the basic amenities through the technology. We set up this through the system we offered you a few months ago. For health, this, for food, that, even those we put up in a very near future, will be revamped into a very effective, powerful way to deliver.

And this will come out of disasters, not out of the pleasure of the world leaders and governments. When we see another massive earthquake. When we see another massive flood, where people know the technology is there, they just call their family, get this App, you'll have food, get this App you'll have medicine, get this App you'll have energy. You don't need to die under the earthquake, which happened in the desert, or in a snow place and die of hunger, lack of medicine or frost. And then this become natural process as more and more will get access to it.

It's the responsibility of the Keshe Foundation Knowledge Seekers to deliver these technologies today, not tomorrow. And we've done our best. And we are on the verge of breakthrough to achieve it. But we have to play, as I call, two horses at the same time. One gradual introduction of technology that majority of the population can understand. And one the "fast track" that the advancement technology can be understood by some that those who come in a slow course can join it in next three to five years to join a fast track. (:56).

I was privy, or I was put in a position in the very recent past, without anybody knowing I was just a bystander sitting outside and there was a discussion which with men of military at the highest level. And one said to the other, we have the latest so-and-so from America, and by the law we have to fly 35 hours a year, our pilots have to keep the standard and our certification. He says, all our pilots maximum flown last two years is four hours, we don't have the fuel, we don't know why we are buying these things, which we don't have the fuel to fly. Tens of millions paid in the debt of a nation to protect it. And those who are trained to protect it, don't have the money to train and live with it.

Very soon we'll pay visit to the runways of the nation's military bases, to watch these obsolete F-18s and all others. The drones which could travel and do whatever they like. Because you sell a F-17, F-18, F-16, we don't need to fly it anymore. We just create a field that the pilot does not even want to have a fight. He will land, he says, take the aircraft, it's yours. Even they bring electronic remote, (:58). we can change the essence of the emotion of the drone. We don't need to capture it like on December, in 2011. Don't forget, even the chip, through the interaction of the fields of it has a Soul. And when you get that information to the Soul of the chip, goodbye.

I'll explain to you something for the first time. And I'm sure my colleagues and friends will kick me for it. But let me tell you a secret of technology. When you capture a drone, through the process of the Keshe Foundation, and in the long term hold to land it, you'll find out something very strange. In some of the reports, when the Americans got trapped by the fields of the submarine and aircrafts, of what we call, the Russian Air Force, in May, a few years ago, this was not revealed by the Americans. Because they were ashamed to say. But, by those who captured the drones of the Americans and now can do it like catching a fly. You find out one thing, we can copy the chip on every latest drone we capture. It's a very simple system. You literally put it through MRI system, (1:00). and you rotate it and every circuitry Americans spend billions of dollars to create for a drone to do certain thing is in the chip.

But there's one problem with this chip. When you put it through magnetic field of the capture, it all gets screwed up, the chip burns out, the chip doesn't burn out, it becomes what we call, ineffective. Because the fields all connect to each other and there is no field. You capture a drone with the latest chip technology in it, but not flyable. Don't forget, the American 24 and 7 soldiers of America, when the "Donald Duck" arrived in the Romanian port, they told us, but nobody understood, that the officers could not even talk to each other on their mobiles on the board of the ship. Because their mobiles are all short-circuited. And if you keep it long enough, as Knowledge Seekers you know it, they get Nano coated.

So, when a nation like Iranian forces capture the drone we get a Duck. Literally what happened to Donald Duck. It's a shot down duck. Americans would not tell you this, that we got their ship back, it's perfect, but electronically it doesn't work. They even couldn't understand how this works. It's the first time we explain to them. The magnetic fields created by gravitational fields, by the frequencies, (1:02). creates a short circuit of the fields and the system does not work. Magnetic field trapping.

So when you want to copy the chip, you put it in a MRI, you make a copy of it, but the copy works now because you have the original, which is short circuited. But in the new one, you don't see short circuit. Because it's a new chip. So, as I said through a message to the American administration at that time, we can give you your dead duck back. The systems going through new space technology has to be developed in the way that electromagnetic field, plasmatic fields, cosmic ray fields, does not affect their operation. And there is a way to do it.

What you put in space, has to come back to you, not to be effected by the fields of the space. This is the reason we developed this technology. At the speed of light and above light you pass through many field strength, different strength, different power, different combination, different direction. One like positrons, like electrons, one, another. You can't have the condition which once we put the American drone through, it all looks good, but nothing inside it. That's why we put it on the platform to show it, we couldn't fly it. Now you know why the Iranian put the drone on a platform and they showed it in December of 2011. Because electronically it was un-flyable, because by capturing it electronically, (1:04). plasmatic magnetic field ?? wise, we short-circuited everything.

But now we can sell the drones cheap and new, because we just put every single chip, we copied it physically, and now we can make it. The same Americans took the Donald Duck back to America, and they found out, sorry, it's just a drone. They brought parts and replaced it, and it worked. But never understood why it didn't work. Because higher field plasma condition, those little fine wires, which is drawn by microchip lines, they are very sensitive to high fields of plasma and they Nano coat themselves. They become isolated, insulated, superconductor. Which means, they don't work.

So, in the development of the new Space Technology, we have to consider all these. We learned when the drone landed in Iran, that, uh-oh, we have a dead duck. Don't worry which I tell you this, because Iranian government released my name as a man behind the development of this technology, February of last year. So, I'm officially known to be involved with these kind of technologies. And Iranian television in the past few weeks have released 10 or 15 minute program showing me as the new father of the new space technology of Iran. So, it's not a secret. So, we can tell you how 10 years ago, after we said on the what we call, 3rd of December we're going to show the power of the technology, (1:06). on the 4th of December we captured the most powerful toy of the American president. Obama said, can we have our toys back? Up to now was the most advanced drone in the world.

But the question comes, do we need to spend money on the useless defense technology which has no use anymore? And then we need to go into the space technology which is real. Do we need to fight, or do we deliver the waves of love, and care and harmony to the pilot in the fighter which is heading to drop a bomb? It turns back. I'm there to defend my territory, I'm not there to kill.

You've got to understand, now with this new technology we are entering a new era of understanding the emotion, and the Soul of man and the creatures. And we need to learn that to be able to survive in the space. We need to do that to be able to travel the depth of space. We need to understand the working of the Universe. Then it comes to the new position. That, how do we take next step? And would we use the new opportunities created for us to show the new ways of thinking, and to show the new ways of living that it bring that change?

In so many ways, in the next few weeks and in the next few months you will see a change in the attitude of the world leaders due to manifestation, presentation of the new technologies. (1:08). Which is based on the

development, understanding of the plasma technology and not exclusively by the Keshe Foundation. As now we open the doors of flooding the world of business and technology with a new knowledge, with a new understanding, Knowledge Seekers, new scientists as Knowledge Seekers will speed up the delivery of the technology, speed up the understanding of the technology and spread of the plasma technology.

We don't see many, what we call, the industrial revolution tools of understanding the work of the steam engine anymore. Except when we go to sauna, we want the little bit of it on the fire. The same shall be the present technologies which we are used to at the present time. In the coming weeks and months, new doors, new opportunities, new tools, new ways for development and delivery of technologies will be accepted and done by the governments that will bring that change. A new era in the world of science of the man, understanding the work of plasma, delivery of the plasma and new dimension and directions. New universities which teach the real work of the Universe, not the way we were fooled by Einstein. A smart Jewish boy, but unfortunately like the rest belongs to the ?? wall , and bang their ?? heads till ?? doomsday.

In so many ways, in the coming weeks and time, many of you as Knowledge Seekers will look at the knowledge and science in a different way. As you become more, (1:10). as it becomes more in the domain of public, and the explanation and use of it becomes more public. Maybe, maybe it's time to start the change. Maybe when you as the members of the Keshe Foundation met with the world leaders, not as subordinate, but as those what you wanted to bring and change, has come to flourish. Let's see what time it is. And let's see what man will decide to bring as a change.

In the second, third quarter of this month, this year, we endeavor to land the first two people on the surface of the Moon. In the dimension of the Soul, in the dimension of them deciding manifestation of physicality. And then it will a mass orders through governments and operations, once the one is shown, with the others. We go for a break and we come back, and we listen to what your questions are, and we can enlighten each other with the knowledge of the future. Thank you very much Rick. If you want to go through a break.

BREAK >>> 483 KSW April 27, 2023 (1:18).

K- More or less, yes. There are a couple of things I've been asked to raise some points here about. The list we put on, now you see on screen. We received donations to supply very large numbers of products as a donation to Knowledge Seekers who could ask for it, it was there, it was paid for, all you need was to ask for it, if you could have it. We have fulfilled all these donations and requests. These are the balance of the items which are left to be, still to be donated. It's been paid for. If it's yours. Just don't ask for it. And then, just for the sake of having it. If it's of use to you. It's like the Gans education travel kit. It's so many, it tells you, one kit left, Gans household reactor, one piece. Gans household reactor, it's four of them. Keshe Gans pants long XXL it's one piece of the donation left. And there's another one, two of them. So, we have two ?? hands left of the full lot. Household reactors, four of them. And one Gans education travel kit. This is a small kit for, what you call it, children or if you're starting. So out of a huge number of donation, this is what is left to any of you, have any interest in or have a use for it. Just don't get it because you can ask for it, and it's there. Somebody (else) might have a use for it. And so, be generous for what it is. We received some donations for, or from others, (1:20). they paid for anyone who wanted to be part of the, what we call, the trials of tomorrow for addiction. Everything has been allocated, whatever comes to us, we have allocated and we have delivered. Most of you receive most of your products, what you ask for in the next few days or weeks. As the things comes, most have left, Keshe Foundation, it's on the way to you. And if there are more people who would like to donate to the Foundation, say what they want to donate for, we put it up and you can make a, what you call it. These are all postage and package, everything has been paid by the donator. It's just that if you have a need for it, There was a very large list, now this is what is left. And all been sent, allocated to, to go. And we still have those few paintings, we received some ridiculous offers by a couple of people, which we would say, we leave it to you, you're conscience. They are still available, if you want them, they are in Keshe Foundation Exhibition Center. And we still look for donations.

Do not forget, those of you who've been donating or sending money to Keshe Foundation Holland from outside EU, now this account is closed and it's transferred to the Keshe Foundation new accounts. Which if you write to info, they give you the new accounts where you can make the donations to. And wherever you buy. Any purchases from outside EU now, will go through the new account system and not through the Keshe Foundation Holland.

If there are any other points which we can help you with, you can raise a question. But primarily, we have to inform you the Keshe Foundation Austria, (1:22). the Exhibition Center, within next few weeks will shut down, totally. Operation, we moved the systems and our equipment into a new location, to one of the largest city in the world. We are relocating, that more people can see, more people can have access to. And ?? one of what we call, "flag ships" of the new technology and development exhibitions. And we will inform you, as it's done in next 2 -3 - 4 months, when it reopens in a position and destination. And how it's going to be set up. And we move totally our operations out of the nation of Austria in the coming months, as we cannot operate in that system which is run, and the way we now develop our technology in a different way.

We are still there for a few months to come, but Keshe Foundation we ended up in Austria by accident, total, something out of control. But it was the best thing happened to us, in so many ways. We came across some of the most beautiful Knowledge Seekers and this process now moves. It was not ever planned for us to move to Austria. It was done on the betrayal of, in marriage and we saw it. We were moved there and now we are moving back to a proper structure and we'll see what happens in the coming time. So, we're going back in a

stable position and for a long term with a beautiful hopefully Exhibition Centers which many of you can come to and see in one of the most beautiful capitals of the world. We will not be in the mainland Europe, but it'll be an amazing place for you to see and it's set up to bring the technology in the public domain in a very beautiful way. In time, once we finish, we'll ask some of you could participate, (1:24). in part of the Exhibition, as you have done something for the Foundation to show the evolution of the science and technology around the world.

You can still join the 200 people group. The 25 is full. Now we are looking for the 200, you can sign in and join in. And they'll be part of the, as I said, most probably, 40 - 50 of you will become one of the first passengers of the transmutation, transportation, into the new structure of the colonies we are setting up, to become part of it. Many of you ask us, how can we join in? Just go to info@keshe.foundation, and you ask for it, it will be given. If you're outside Europe, you pay to the new accounts. If you are inside Europe, you make a payment to the Keshe Foundation in Holland, to what we call, further notice.

And then Keshe Foundation moves totally, it's structure on work, in a totally different direction and dimension, as it's announced by the governments. Most of the moves we'll make in the coming time will be in cooperation and collaboration with national governments, and this is the way we want it to be. And once we achieve and complete it, we... you will understand that Keshe Foundation has become an international organization, and many of you work towards it and we are hoping to complete in the next few weeks.

And in that process many of the Knowledge Seekers around the world will become part of the work of the structure. The only thing is, just because you're a Knowledge Seeker does not give you the "God-given right," as we call it. You have to be whatever it is, excellent proof that you can do, that as normal work in the new organization, (1:26). and we have to carry your own, what we call, "load on a string."

If there are any questions let's answer and then we go to the next one.

Q: .. Hello Mr. Keshe, in trying to visualize single rays to better understand total plasma basics, my questions are. Question one, let's say we have two rays in the same environment, the environment is in the strength of a Hydrogen, one ray is in the strength of a Carbon, and the other ray is in the strength of a Bismuth. Which ray is bigger and which ray is smaller? And is the difference between them in this environment just the size?

K- First of all, this is not the physicality that the size counts. It's, you have to understand. Go back on one of the pictures, I think it's book three. And somewhere in book 2 there's another relevant picture. Does not matter if you have Plutonium, or Carbon or whatever else. Doesn't matter if it's a Hydrogen, Oxygen or whatever environment, magnetic field environment. You always have interaction of the fields with the others, and the friction and the division, what we call, the sparks, with it. So, you can stay in the strength of the Carbon, but in the interaction with the fields and density of the fields, (1:28). the Plasmatic Magnetic fields, you create subdivisions and above divisions fields, that you get the spectrum of all fields, even though you're in Carbon.

And in those interactions, let's say you put them, and then it has the same interaction, same environment, parts of the fields of the, what we call, equal from both rays, will interact and create a condition of balance. This is part of understanding the work of the fields. When a ray goes through an environment of Hydrogen, you call it, it's magnetic field Hydrogen, it's not in the matter state you talk. If it's a matter state, it hits, absorbs, release energy whatever. But if you talk about environment of the magnetic field of Hydrogen, and the gravitational magnet of field strength, then you see a spectrum of different fields.

We've seen this, we tried to publish this in the Book, in the, I think it was in the first Book, where we show the Raman spectroscopy. When we brought the infrared spectroscopy and Raman spectroscopy data out, we saw a massive range of fields released from Hydrogen to, above Plutonium from one ?? ray, one field, just the CO2.

So, when you understand this, you look at the totality, you don't say which has. Because that, whatever you have, in comparison to the other, can actually be in more interactions with the Hydrogen, than the Carbon. (1:30). Then it has less, because it's not the interaction of Carbon, and whatever the other material is. It is interaction with the fields of the environment. And then those fields with each other, which dictates the condition and the field strength.

In so many ways, you could have a Carbon in one environment to be the strongest and you change slightly the Hydrogen field strength, still in Hydrogen to one of ??, or to interaction, the Hydrogen loses the environmental energy to another, then you find out it becomes weaker.

So, when you look at the plasma interactions, field interactions, you have to understand there is not singularity in the environment of the test, or observation, or which one is going to be stronger. It's not anymore how many Carbons you have and how many Oxygen's or Hydrogen you have. Is what is the field interaction in a given dimension and direction in the fields. Then you always look at the spectrum. And this is one of the ways that production of the cosmic rays we look at. In technology development we are fully aware of these things and we use it.

Any other question?

Q: .. The first question was about rays, (1:32). the second question is actually about two plasmas. So he says, let's say we have two plasmas in the same environment. For example, in one jar of water we have Gans of Carbon, and in another jar of water we have Gans of Bismuth. Which single sphere of plasma in this case is bigger and which is smaller compared to the other?

K- It goes by the same rule.

R: It's kind of a trick question because it forces you to answer in the physicality, but you want to answer it in terms of the fields.

K- We are in the field dimension. It's like when you, I'm sure many of you have seen it, and we talked about it many times, when you put two Gans's, especially CO2 or Zinc, next to each other, you see that the one gradually column goes up on one side. I don't know if you've seen it. When you put two bottles or two Gans bottles of different material, one of them gets pulled up to the side and it goes up the glass, which is illogical in the world of physical dimension. But in fact as a... Pardon?

R: I was going to say, yes, we've seen that in the Keshe Plasma Reactor Group a few times over the years.

K- Yes. So, you cannot speak about plasma and try to fit it into the ?? matter world. It doesn't work. You cannot be "camel bird," and call yourself ostrich. You have to decide. If you're talking about dimension of the bottle of a Gans of this, bottle of Gans of that, you have to find out what's the interaction. So go and live in one and, or the other and compare what happens to me in this one, and what happens in this one. (1:34).

You, this is one of the biggest problems we have in Keshe Foundation. And, with many, many scientists I've been on the table. They try to fit a plasma, understanding of a plasma into the material state, and it doesn't work. This doesn't fit the law of physics, we understood, we've been taught. Yes, because you cannot mix oil and water together, how come you understand that? But you cannot understand you cannot mix plasma with the matter state, unless you bring the strength of the plasma down enough to manifest itself in the matter, then you can say what it is.

It's exactly what happens in your blood. In your blood you have Iron, but it's not pieces of Iron coming from a nail. It is Iron in a plasmatic magnetic field of the vacuum of the body of the man in his own condition of the vacuum, and then when the man pulls it out now you're in a matter state.

It's exactly what I told you when we send you to the Moon. When we send you to the Moon it's the reverse. You are inside (a dome in the) atmospheric condition of the Earth, outside atmospheric condition of the Moon. In this world, why all our sciences are "upside down," as we call it, we are outside and we go inside the body of the man, we take something from inside and now we want to fit it to us. It's not that. You go inside the blood, you see, if you see a single Iron atom flying. You see it as an energy, you see it as plasma. And this is where there is a huge problem in the world of science today for people to understand the plasma technology. Plasma is a plasma, matter state is a matter state. What happen in the transition? But we take a blood out and we can count Irons in it, (1:36). and Calcium in it. Yes you can, because you change its environment. In this environment this is what it shows itself energy of Calcium, it was a Calcium in the matter state.

So, we have no choice now, we open the space technology, gradually ?? we'll come to understand it. Which environment, what field strength, what gravitational magnetic field, what Inertia is involved in us manifesting the energy as a Gans, as a matter state? And if you don't get confused and understand this, then you start progressing forward. This is why 99% of you as Knowledge Seekers have got stuck with the MaGrav units and don't understand it. Even our own Knowledge Seekers have problem with this at the highest level.

We took, I explained how a MaGrav system has to be made. We got our experts to make it. And they use old systems, which shows already reduction, but they did not do it the way we asked it to be done. We tested, doesn't work, zero. But when we looked at the structure of field flow, it was not the way it was told to be done. Our, another team has restructured it the way it was supposed to be done. Now we see MaGrav reduction, magnetic field increase and reduction in electricity bills. Because you have to follow everything as a plasma, not (only) when it suits (you). 99% of you which made the MaGrav and doesn't worked, (1:38). you have not understood how you yourself have put a "spanner" (wrench) in your work. We have not understood even though it's in the drawing of the... it is in the drawing, but look at it the way is done and then you find out. How come some of you have a huge reduction and some of you, oh, it's all fake. The fakeness is in your knowledge, not in our technology. And this is one of the biggest problems. Because you try to fit a plasma technology, which is created by the matter, into the matter state which doesn't work and it doesn't exist.

Any other question?

Q: ..About the first two people on the moon, will they be able to bring back evidence when they return back on Earth?

K- We hope so. They are a couple, a husband and wife, and we hope, yes. Don't forget we tested this in Knowledge Seekers. He could be listening himself. One of you Knowledge Seekers, when you came to Linz, he said he's in the Moon, he went to the Moon, and he could feel the stones. We put him back in the machine again. We said, okay, can you pick up the stones and put them outside? And we watched him. He was actually physically picking up the stones and putting them outside. And we asked him to drop it. We were not ready. Today we have the machine, we have this technology, we have developed it. That if he would have put his hand inside what we give him to drop it, you would have seen the Moon stones. (1:40). Now we have the technology, we develop the technology for this purpose.

So, .. now that we have the what we call, the tools of conversion, because we dictate the whole understanding of Inertia. Yes, whatever they collect, we can manifest as a matter state when they land, when they come back.

And basically, the biggest thing for us will be to send the people from excursions to the position and the place where Americans claim they landed in nineteen sixties. Would we see the remnants of the Apollo? Would we see the flags? Would we see the footprints by now as long gone, as the dust is covering them up? And what would the Americans claim? Oh, it was there, the Moon dust has taken it. Out of 2 or 3 landings, we should be able to see the truth. And that is in the next few months. And we hope, we hope we haven't (been) taken for a fool. And we hope it's they can stand it. So, we give a notice to the American NASA organization, (1:42). please come up straight, because soon, in next few months. There'll be two German and a Russian, checking out. And let's see if a lot of claims of "false flag," and really done, and it's all Hollywood scenery, and it's a reality with the sand and the stones, become a reality.

As I said, when I was invited, I went to Iran years ago, I went to the building you see, the symbol of Iran, the Freedom Square. Underneath there, as a child of very, very young age, I went and I queued for hours to see a stone which the American gifted to the Iranians and was put there for display, to see. I wonder if I wasted hours of my life standing for a fake stone from Arizona desert, or was really truly a stone from the Moon? And our travelers in the next few months will tell us. It's as simple as that. We know some people, what you call it, will claim that the Americans never been, some people say they've been, and all beings now become to being, as the new technology delivers.

Any other question? (1:44).

Q: .. Thank you very much for your presence among us. Please correct me if I'm wrong. From what we learn from you, our planet does not provide all the energy that the beings that inhabit it need, because it was created with the wrong intention. The Creator of our planet and the other planets in the Solar System is the Sun. So did the Sun have the wrong intention in creating the Earth? What was wrong with the Sun's intention at the time of Earth's creation? If all creatures on Earth are created with the same wrong intention, and that wrong intention cannot be carried to other locations in the Universe, can we only leave here when the entire structure of the Earth is corrected? Thank you very much.

K- There are two questions to ask, and maybe this will answer it.

There is something, because I have to tell you before we go. All you Brazilians have lost your Telegram chats due to the court order in Brazil, that none of you can use Telegram anymore. And you all migrated to Zoom for your common, what you call, connections and whatever, knowledge sharing. Those of you who come through Zoom, you may ?? have not noticed it from Brazil. This has happened, and it's a court order,

nothing to do with us. The whole of Brazil has lost its Telegram by not following their, whatever you call it, court order, delivering their IP, what you call it, private information of people, (1:46). or their communications to the government. So what we see, we might see reduction or total loss of the Brazilian, Brazilian outside Brazil communicate with the Brazilian channel, they all have migrated to the Zoom of the Keshe Foundation channel which is set up by Rafael.

Answering your question. We need to understand the principle of the work. And we need to understand the interaction of the fields. Many of these questions is just a repeat, and repeat questions. And what we see, the Keshe Foundation knowledge has to be understood in its totality. Then many of these questions, what even you're asking, it's a third, fourth, fifth time you hear. You'll find it in the archives of the Keshe Foundation.

Any other question? (1:48).

Q: .. Last week you said when the gravity of the planet is formed, the higher order absorbs the lower order or weaker strength fields and then mass is created. What does higher order mean? Because doesn't the stronger give to the weaker? But in this case you are saying the higher absorbs the weaker and creates plasmas.

K- The understanding is when we call it, the higher order. The higher order fields, stronger fields dictates the gravity, the level of the gravity. In order to create gravity, you need both field strength, magnetical and gravitational. And the highest order it's a field interaction. So anything when we say absorbs, it means below that strength is already covered within.

So the highest order that the Earth's gravitational field can absorb and we know as a data of material, let's say it's Plutonium, whatever we have up to now, few elements further up the, what you call it, in the table of the materials, in the Periodic Table. Wherever you look at, this is what we can. They tell you is so many percentage and the rest, we call it, exotic. So, anything below the last material we can physically, we have actually observed to be able to detect on this planet, is the highest order, strength field. (1:50). And the other elements above this plasmatic field strength, that exist in other planetary system, in other part of the Universe, but Earth does not have within its strength to be able to interact with them to pull them in. Because collective fields of the Earth are not that strong to that strength to be able to absorb. The same is below sub-matter Hydrogen. There are fields which they can manifest themselves as a matter state below Hydrogen. But we do not have the field strength to absorb them. So, we don't see them as a matter state of subatomic structure.

And when we say the highest order is not to give, is to include, to be able to absorb. If you are mono energetic, plasmatic field, you are like a star. When you are a composite, the highest field strength dictates the gravity, and the fields of the gravity and the strength of the gravity from fields of that planet. Because it cannot absorb. If your gravitational field does not go over the strength of the Copper, sorry, on that planet you won't see any Zinc. It does not have it to absorb it, to interact with it, to create it. (It) does not possess it to create the Inertia for its manifestation in matter state.

That's what it means. It's not that the higher gives to a lower, it's understanding the creation of fields, and their interaction and creation of what we call, the plasma. And at the same time for it to exist through interaction of the mass to what we call, the weight interaction or what we call, the weight interaction equal of Inertia allows the manifestation of matter state of that field. (1:52).

If you don't have the Inertia of a given material, you cannot manifest it as a matter. It does not matter, even if it exists in the dimension of plasma. This is why we see these creatures above the planet Earth, recorded by NASA, been spoke about it many times. Because Earth does not have the Inertia value of their field strength to convert it at that level to the matter state that we see them as a new animal, new structure. We create a plasmatic field, Inertia of them and they exist above.

If you want to see them as a living things on Earth, we have not, we do not have the Inertia of field strength to extend that far, to allow them to convert in the manifestation of matter state. That's what it is. It's not that the highest give to lowest. And it's all through the common denominator field strength.

There are matters we know... you've got to realize something very simple. Go through the human physiology. And whatever we have in Periodic table, which the gravitational magnetic field of the Earth has manifested to be seen as a matter state, you find it in the body of the man. One way or another, in somewhere and they can measure it and they tell you, even it's Plutonium there is such amount of it in the body of the man somewhere. Because we create gravitational magnetic field, plasmatic field, that interacts with the Inertia magnetic field, the strength of the planet. So we, (1:54). in our body, we absorb it according to the ratio.

And this is why I always say, if it is on this planet, as a matter state, you find it in the body of the man, somewhere the DNA and RNA have managed to use it to the advantage of the use, speeding of certain things, or interacting with some parts of the body of the man. There is no matter, which is not in the, which is in the Periodic table of the elements of this planet which does not exist in the body of the man. Impossibilities. We have to find it where it is, and how much it is, how minute it could be.

So when you speak about the high order is what the field strength in interaction with magnetic gravitational field of the center Hydrogen, allows to be the highest order Inertia to be created with the gravitational field interaction to give the mass of the body of the entity.

Any other question?

Q: .. With the new technologies that you are about to reveal in the near future, would it be possible to treat Alzheimer .. with a patient that has hip replacement?

K- Hip replacement we do not touch. We always said it and we are very clear about it the reason for it. (1:56). Alzheimer's is handled by the doctors at the Keshe Foundation.

R: So even though they've had a hip replacement they can still treat the Alzheimer?

K- No, no, it cannot be done. Cannot be done. If you have any external motors, valves, hip replacement, because this is a plasmatic system, it covers everything. There are cases which have been tested. .. by some new cases, but at that time it looks perfect, I've got rid of everything else, but because you have started a (plasmatic) process, now, you, in the long term, you see the growth of the bones or hip bones. And then, because it's weeks and months later down, you got your memory back, but now the bone is growing and then you have another hip problem. Because you create... We know what is... At a time this is... This is clarity about the knowledge.

This is not doing what the present pharmaceutical does. Present pharmaceutical, data research from Canadian government over 20 - 30 years, tells us clearly, people over 55 who go through chemotherapy, research papers published by the Canadian government, through the universities and research development centers, majority of the people, a very large percentage, die within 5 to 7 years after chemotherapy. And they studied this over 20-30 years.

And then the pharmaceuticals never tell you this, because they cannot tell you, we're giving you death sentence 5 years, or 7 years. Chemotherapy is beautiful, yes, my ?? thing. (1:58). But due to the process of the aging, reduction in the strength of the bone marrow and the rest, all these people die of a very simple cold. And they say, oh, he died of a cold, not from chemo. But in fact, chemo caused blockages of the holes of the bone, which led to low immune system.

In this technology we can't do this. We have to be transparent. There are knowledge which is there, there are technologies which is there, which in conjunction with us can create new conditions. And with the knowledge we have, we have to stop it. We are not there just to... We are a Stichting (Dutch word), we are a foundation. We work through the structure to bring benefits and understanding, not just getting things done. Even when tests done by our doctors or we've done things in the past, we inform fully what could be the consequences of it.

Yes, you cannot use because long run with the plasmatic fields in the body of the man, the growth of the bone is a very high possibility, and then what happens with the extension of the hip you put in. If you haven't done a hip transplant, I know our doctors are busy with case like this. You see if the bone marrow can help with the cartilage to grow and you don't need to change the hip and the rest of it. Then yes. We can look at different things.

But if you have Alzheimer's and hip replacement, sorry, the truth is, through our experience, bone will grow. Because now they found the fields of the strength within the system, that allows them to grow. Because they usually naturally grow. This is what happens when you're a baby. (2:00). You don't, you're not born out of the womb of the mother with 10 centimeter femur, and when you are 50 years old you still have 10 centimeter. Bones grow. So that's a habit of the structure. What was cut off now they want to cover, and then they (bone growth from plasma) push the prosthesis or whatever, out. And then they create, they break the hip bone. So this is the reason we say, at the moment with the knowledge we have, no.

And this is what I said to the officials from the government. With the new space technology which we bring in, if we bring you, as many of you been offered this, but you never understood what was on the table to you. This cover of the, what we call, the policy of the Keshe Foundation. If you go into prevention, so if you put, let's say, 1 million people on prevention today, 10% have cancer, 10% have a heart problem, 20% have Alzheimer's and the rest of it. Out of this, let's say 1 million people. Some of them are at the early age, they have none of it, but they go through the process of prevention. In 20 years time, those who came in at the beginning of the process, will die off. They are 50, 60, 100 years, 80 years old and they die. But those who join in at 15, 16 as part of the family, now they have no more diseases. Because they went through prevention twice a year. So, we'll see less diseases over 60, 70, 80 years old.

They live a very perfect life. Living a sick life in a coming decades it'll be unheard of. Most of the diseases today we suffer for, (2:02). with especially now what is coming in with the collaboration of the Keshe Foundation with the major governments around the world, we will see reduction in next 20 - 30 years of the

number of the people being ill of the hospitals. Because the new generation has to go through prevention regularly. Fix it before it becomes a problem. You don't have the problem in 20 - 30 years time.

When you have a hip injury through a football game at age of 25, in the age of 30 - 35 - 40 it becomes a hip replacement. When you've gone through the process, you know you have a hip repair bone, and the prevention technology has been used to re-grow the cartilage, you don't need a hip replacement 30 years down the line. The world of pharmaceutical and medicine is going to be radically changed in the coming time.

When you have a problem with your son, you cannot handle it, and then 40 years down the time it becomes a prostate cancer, when you go through a prevention, even you join (KF policy) in at the first year of your marriage, before you had the child. And then you had the child and you have a problem with it, it's already psychologically through the process has been ?? filled.

So, reduction in the hospitals, reduction in health care, will become a thing of the past. In a way we reduce it so much, that it won't exist. People with Alzheimer's in the new generation of going through prevention, I think it will be very, very rare case. And even if it appears, technology there will handle it at the outset, not till, nothing can be seen. So, yes, if you didn't have a hip replacement and you have Alzheimer's, doctors can help you. (2:04). The new technology can do something for you. But if you had a transplant, if you had a, what you call it, any kind of surgery which physically something put in your body, we say, no, because we understand the problems it can create.

Very interesting point is that, in the coming months the wellness, welfare, the health of the Keshe Foundation will be handled by governments in a very big way. And I wonder how many Belgians will move out of Belgium to receive these cares, or try to use. We blocked all the Apps into Belgium. And they come out of Belgium, they change their passport to receive the wellness care of the Keshe Foundation. Knowing that the others have benefited by it.

Our work, now, through a structure of its progress, has moved on to a very, very different way of processing with the doctors. And even our doctors are learning, because they were trained in the matter state, in the physical state. They never seen psychological pattern in most diseases. And how even you can use psychology to change physical damages. And this is a process which will take a long time to teach, and to learn and to be taught.

As I said, past few weeks, the gentleman in the meeting says, the guy said, (2:06). this is against all the books written by Newton's law and Einstein. He said, we write the books for the others to learn from us, with the new technology. And we have started writing the new books. And most of you carry Book number 1, 2 and 3. The books you have, we call it, Book 1, 2 and 3, will become the basis of the new education in the world of science. Not because we wrote it, because it's what explains man will look at the plasma of the Creation.

Any other question?

Q: .. Hello, Mr. Keshe, this is a big honor to hear you in this online session. I am very thankful to Pedram who introduced you to me and explained about your precious activities. I am an Iranian woman who was diagnosed with breast cancer in 2017, but then it became metastases and spread to different parts of my body throughout the lymph nodes in 2021. For about 10 months it went from bad to worse, and although I'd been

told that I am not curable anymore, then I started to research and I could stop and decrease the cancer in my body through natural ways. I am suffering a lot from side effects of the chemo medications. (2:08). I would be grateful if I had any chance to hear from you regarding these matters.

K- Write to health@spaceshipinstitute.org, you'll be passed on to the doctors responsible and they will decide in how and if there is possibility for them to support your health. Now... and this medical phase, doctors using the Keshe Foundation technology, will increase rapidly in the coming months. Then we can...

The problem with chemotherapy is, it's not the chemotherapy itself, it's the side effects of the chemotherapy, which allows the cancer to spread. And you see the spread of it in different ways. If the chemotherapy understanding of its, what you call it, reduction or control of the cancer cell is, is interconnected with the knowledge of the plasma technology, there could be a lot of advantages, there could be a lot of things done with that. I'm a great believer in chemotherapy, but understanding its side effects and its problem to be brought under control of the, what you call it, cancer. It has a lot of problems.

It's like the new vaccines which we see, and they say it has so many side effects for children. (2:10). We have to find out where the side effects are and how we can eliminate it. Can we transfer it into energy that it is not there in the matter state? And what does it do? And how we can help? A lot of medicines do not do what they are supposed to do, they are just there to make money. A lot of things have a benefit, but because we don't know how to control, the other parts of it, gives us this massive problem.

If chemotherapy used the right way, with, as an energy level, we can touch most of the cancers, without a doubt. But now, today the Keshe Foundation doctors are testing a new thing. We are testing a new... We will see in the next few weeks they'll report to us. They are working on it, they are testing on it. And we have introduced a new dimension into cancer process to Keshe Foundation, it's getting tested by the doctors. If we see, we think we will see a huge development to be reported by doctors. If we see that, then we immediately implement it, we announce it and bring it into public. We understand it, it's now I think the second week they are using it. Yes, the second week more or less. Now we need to wait for a data in another, most probably, 6 weeks, 8 weeks. And see the new technology developed and used by the doctors, gives us the result. And then we understand more and how we can even eradicate the side effects of the chemotherapy. This is now going on today with doctors at the, what you call it, Wellness Center at the Keshe Foundation. (2:12). But we see, we understand it, we see it, and we have incorporated it in our systems and the doctors are using it and we'll see what comes up. But get in touch to health@spaceshipinstitute.org and then the doctors will explain to you and we'll see what they decide.

Any other question?

Q: .. If you wish, can you give us an update on Naomi's current position? We all love her so much.

K- Naomi's condition, I met her 2 years ago, in June. And there is a lot of... She is stagnated in a condition, where when I met her, I realized what is not accomplished completely by the process. And I explained that to Giovanni, what needs to be done. That we have brought Naomi out of the, what you call, field coma, but not out of the physical coma. And it needs to be done. Full instructions given to Giovanni what needs to be done. And then, due to process of the accident, there is some physical damage to her leg ligaments or that position. Otherwise she is good. She is living a normal life as possible.

I know one of our Knowledge Seekers works very hard. She's trying to see how she can do. (2:14). But essentially what we, with us being so busy with everything else with it, on my visit to Giovanni when I was in Italy, couple of years ago, when I saw them, I said, you haven't completed the job. I thought this should have been done. The physical coma is different than the neural system coma. And that has not been done, the process of... and Giovanni has to complete it. And she'll live a total normal life.

This is what we call, the STM and STP and the physicality. When you don't complete a process, you do not open one of the gates, so it's there. But she lives, she lives a normal life as anyone. She's active, she's home and very little communication. But she lives a normal life. But the physical coma has not been taken out. And there's a way to do it and they have the access to it.

Any other question?

Q: .. Last week Mr. Keshe said that the Soul plans for physicality in any activity. So what is the reason for abnormal human behavior?

K- Maybe that abnormal human behavior is a Soul behavior. To us is abnormal. Abnormality is from the point of view of the observer. (2:16). Otherwise to the one who does it, it's normal. It's very interesting when you speak to the hyperactive child, they never see themselves as hyperactive. When you speak to someone who's got Alzheimer's, they say, no, I remember everything. I say, do you remember this? No. Do you remember that? But I don't have Alzheimer's. It's a point of view.

Any other question?

Q: .. Good morning Mr. Keshe, if our body is all Gans's and the food we ingest becomes Gans immediately, is there any importance to take sweets, for example, one hour before the main course or one hour after? Thanks a lot.

K- Depends on what. Some people do. In some countries, sweet comes first. They have the fruit first, and then they have the meal. In some countries we have the fruit and the dessert after. Or what we call it, fruits after. In the Iranian traditional family, you never eat watermelon after a food. You always eat watermelon before the food. Because the belief is that, we eat usually as our main diet rice, and then you put so much water on the rice after you had the food, now it expands in the stomach. Now grains of the rice supposedly in the stomach being digested, but they expand. (2:18). So, you eat melon after the food, but you don't eat melon before the food.

And when you go for a Chinese food the sweets is part of the main course. It's there, you want to help yourself, you start with a sweet, something. So, it's how we look at it. You can eat sweets before or after it's a sugar content which you absorb. Would it give it the energy or not? It's individually thought and decided and actually being a culture in a way.

To the Western world, yes, we have what we call, dessert or sweet. Because why do we have, what's the reason that we introduced dessert? If you look at it, dessert is usually something sweet based or whatever, or fruit, it's because the food we eat, meat or whatever, takes longer time to digest, it takes a lot of energy, and during that time of shortness of energy to digest the food we ate, we are short, and so you go to sleep you're tired. So we take that dessert, that sugar, to cover that immediate shortfall in the energy for digestion of what we ate. That's the reason dessert was created. Not to fall asleep after food. You still have enough energy that

it's an supplement of the sugar content of the dessert will cover you enough till the time is needed for the energy of the main course pasta, whatever you ate, which is a longer time to digest. There's a reason, not everywhere around the world except in Western Europe or most of the European countries we have dessert. (2:20). In the West we, in the other part of the world you have a fruit after the meal to do the same job. But we do it so naturally, has become part of our work that we don't notice it.

Any other question?

Q: .. Can you explain how in the body is a vacuum and the body is not flat? I guess he means flat from the vacuum condition or something.

K- (laughs) This is a different vacuum, it's a plasmatic magnetic field vacuum, not extracted of content vacuum as we do in human, as they do it from any object. Vacuum condition means, magnetic field, gravitational field strength vacuum. It means it has a different Inertia position, which does not allow matter state to manifest itself, but in the plasma it does.

When you work in laboratories with a high vacuum system, when we vacuum like space reactors, we don't see everything going out. We leave the vacuum machine running for an hour, two hours sometimes, to capture the last little atom it might be freed somewhere we haven't captured. Because that's a matter state capture. And on our meters we see, there's still matters going through the system, even though you're in -12, -13 operation. (2:22). That vacuum is mean, extracting matter state out of a content, but the ball (reactor) is still in a field content, it still has fields.

The vacuum to the man is not a matter state, it's a vacuum but created by the plasma of the Gans's of the matters in the body. It's a terminology used in respect to the field strength conversion to the outside. If it was vacuum the body will flatten. If you put a pipe in your body and try to suck everything out, you'll be flat. It's like we say, space value vacuum is -12, 13 outside the Earth's gravitational. But it's full of cosmic dust and everything else. A meteorite is traveling in it. We talk about vacuum condition that matter can still exist, and fields can still exist, but matter can be part of its content. It's mixing f the terminology of two cycles of the knowledge matter state and field strength state.

R: So, Mr. Keshe, in, for example, in the ocean, would that also be essentially a vacuum condition for the field condition and so on? Or is it only inside of a living body?

K- The same. No, oceans are in a vacuum condition of their own. A field strength that allows them to exist in that condition. Even the stone?

R: Even a rock, I was going to say. Yes, exactly.

K- Yes, this is... Now we understand it's, what you call it, field strength dependent. So it can be. If you take a stone into space, another position, (2:24). it will become like a jelly. It will start moving, it has life. But on the Inertia gravitational field of this planet it's solid. It's like, you know, sugar candy. It's solid, you can't even chew it. You put it in the environment of the hot water, it just melts to nothing. You can't even see it. And if you look at the bottom of it, it's a beautiful thing. I sometimes, it just carries you out when you see. If you get the crystal sugar, we call it, and then put it in a hot water or tea and you see it melting, I mean disappearing off the wood, which is a wood stick, which is very .. if you go to the Iranian restaurants, they always give you

tea with this, what you call it, candy stick on it and they put it in the tea. And then it disappears from the stick.

If you sip the top of the tea without shaking it, it has no sweetness. But at the bottom you see waves of different densities of fields, this is how it'll be in the space. You're solid in one position, but now you become a plasma field. It's just you see the wave of the sugar at the bottom. This is all it is. It's the same water, the same crystal. But if you let it, it goes cool, it doesn't become crystallized. It still sits there in that way. This is how we will, we are and we'll be in the space.

R: So is that vacuum condition that you speak of, is it a relative thing? (Mr. Keshe said -- relative Inertia) Like for example, of the candy melting in the hot water, that's it went into the vacuum of, to it, it went into the vacuum of the hot water, and it expanded and dissolved its structure, but it was okay in the air. So, would the air be in a vacuum condition in that case or not? (2:26).

K- Yeah, but you see, if you put that same thing in the cold water, it might not happen, it stays there for longer.

Once we create a partition, doesn't matter what it is, we create a new environment. And the wall of that containment and the content of that containment, dictates the new environment and condition of field. You see this with caustics, when you make Gans's. You don't use hot water, you just put the Gans's, you create a different field strength and you see how fat sits on top, how Gans's move inside.

And if you understand this, that you can create different field strength, now you understand new construction technologies which (will) come forth in the coming time using plasma. We see it, I say this, in next maybe 5 or 10 years now that we are moving into a new dimension of technology development. If you get a wall of let's say, you want a wall of 10 centimeter, you create a field of the strength of Copper on one side and create the field strength of Iron on the other side. Due .. and introduce a specific Inertia field in between the two, you'll create a new material dimension and a new manifestation of the fields. That from the one side it looks that the room it's made of iron plates, on the other side it looks as it's made by the copper plates. (2:28). But in fact they are both in plasma condition.

This is how the future constructions will be done. By changing plasma condition you create new Inertias and then you create the size fit, height fit. This technology is known to us, it's actually, if you go in the patents it's in there. So, we are about to introduce it into commercial application in the next few years. And what you decided between two fields, dictates that there will be isolation, no sounds, no heat, no radiation, no visual manifestation.

Now if you understand how to... You can make a sphere of it, you can make a ball of it, you can make a straight wall of it. As I said, we've entered a new era of the technology development and research. And the new Keshe Foundation Institutes will be set up, we'll set up to research these things.

Any other question?

<< Dr. Farzam Bararpour speaks in Farsi >> (2:30).

K- Let me translate. This is the answer to the lady who says she's Iranian with a breast cancer. Dr. Bararpour is the medical spokesman of the Keshe Foundation. And he says that the lady was in touch with them or

made an inquiry with them yesterday in the Persian teaching. And she's been asked to get in touch with, that we see how we can support her, but they haven't got in touch with. So if you're listening, please go back to the Iranian team with Dr. Bararpour, and then they know what to do and next step.

Any other question?

Q: .. Thanks for what you're doing Mr. Keshe. How does the change will come? The establishment doesn't want this change. With sweet words?

K- Leave that to us. We've been well seasoned for these things, leave it to us. We will find a way. You see, the establishment, if you look at it, we never realized that the "establishment" was established within the Keshe Foundation to make sure nothing happens in Keshe Foundation. (2:32). And we got rid of that "establishment." And now the changes and developments in the Keshe Foundation comes. That we got rid of one of the, we uprooted (that) "establishment" out of the Keshe Foundation, and now we are growing. Before the establishment we had the biggest spy sitting right in the center of the Keshe Foundation, and every development was scuffled directly from inside. Now it's gone. And we've seen the progress and development. I'm sure most of you are familiar with the case and the situation. And you've seen how Keshe Foundation has grown in leaps and heights in the past 3 years especially.

You cannot grow when people inside work against, because of the knowledge and the information they have in their ?? hands. We got rid of 2 or 3 people in the Keshe Foundation which a lot of you know. And with that we have changed the direction of Keshe Foundation. You don't see them around, they're long gone, and they used the Keshe Foundation work for other organizations to damage the Keshe Foundation for their own benefit. And it's long gone. Long gone. And we are moving on. Establishments work against themselves and sometimes things work different way than what they planned.

Any other question?

Q: .. If you learn your lesson, (2:34). then do you still have to balance the fields in physicality? Or do you transcend the physical dimension?

R: We're not hearing you Mr. Keshe, I think your microphone's off there.

K- Can you hear me now?

R: Yes, yes.

K- I said, sometimes what you think you learned is opposite to what you were supposed to learn with the teaching of your Soul. So your Soul puts you back on the test again to get it right.

It's what we presume we learned from, and what we assumed we learned from. But it wasn't in reality what it was supposed to be learned from, or learned by it. And this is one of the things, we make the same mistake again and again till we learn from it.

If any of you in the session of tomorrow with addiction have a habit of going into the same kind of position and relationship again and again, we'll be interested to hear from you after the session. It's a very intensive session tomorrow. And, it will be very interesting what habits we have. Why do we go from the same failure in relationship to another one that fails the same for the same reason? Are we addicted to it? Or are we

challenging ourselves to it? This is a very, very interesting point and the condition. (2:36). And we will handle this in the Addiction session tomorrow.

Any other question?

Q: .. What are the meridians of our body, and how do they function in relation to the strength of the fields of the three layers of the skin in the plasma application?

K- Our skin dictates the meridians. Because that contains them. The field flow goes. If you break your leg and twist it slightly, or gets broken and gets twisted, and it changes the field flow in your body because of the way you walk. And this can go into the RNA of your body and the DNA. Due to change of the fields in the body and the whole structure of the meridians and the physicality, you'll find maybe your third generation, second generation, what you had the physical, what you call it, change, it'll become part of the structure of their life. Because the skin and the bone have registered that as normality.

And if it's... if you... you'll find out, if you had a child at the age of 20 - 18 - 20, and then, which happens quite a lot, and then you decide at age of 45 - 50 to have a child with the same partner. (2:38). You will see all... And let's say you had an accident, deformity or something happened to you at age of 15 - 16. You didn't leave it to your first child at age of 18. But with a higher rate of chances, your child born after 45 - 50 you created, will carry possibility of that gene change in it. And she might not show you the ?? (change), but they might show it in the next generation. Even psychological conditions.

We understand this and this comes because of the magnetic field within the body and what you call, meridians and the field flows of the flow of the body of man, will transfer that physical deformation into DNA and RNA. So, it has a direct effect. And our skin, how it's twisted, how it's turned, how it's got scarred, can manifest itself in that physical condition later on. It needs 20 - 25 years to be ingrained, or in a way remembered by the body or by the brain, to replace the same position, so it becomes natural process. We see this now, we understand technology quite a lot. And some people like to call it genetic defects, but now we find the effect of genetic, the reasons for it and we understand it more.

Any other question? I would like to finish in next few minutes. (2:40).

Q: .. Thank you for all the love and knowledge you give us. Foreign language syndrome is suffered by some people who after an accident that hit their head, their brain when it suddenly recovers speaks in different languages. This can help us understand that total knowledge is in our interior, in the STM?

K- This, this we saw in a couple of cases when they went through the system. They didn't need an accident. When we put people in the system. I think if we mentioned it before, people could not speak or communicate in English, they were fluent after they went through the system. And they said, oh, I didn't know, I said, you speak.

It does not need a trauma. It's access to a knowledge we already have, of all languages. We will try this very soon, in a series of trials, of seeing how far we can transfer knowledge, language from one to another. And it is not a transfer, it's actually, it's a difference between speaking a language and speaking a language. Many people who learn English by the book and by English classes, or maybe live in English speaking country for a year or two, they speak English. But they don't actually speak English. Which means they don't

understand the culture, they don't understand the emotion, they don't understand the essence of the words. (2:42).

I'll explain to you something and then you understand. We had a case where, in English language it's very common to use the word of "bastard." It means a child from unknown father. And the lady was told, your child in the language, was a bastard. Which was just a commentary speaking. She said, no, he's not a bastard, I know the father. And everybody looked, you don't know what it means in English? It means he doesn't behave in the norm, he abuses the condition.

And this is the difference with speaking language through the Soul. You will understand the emotion of the language, you understand the terminology of the language, you just don't speak it. And this comes by the interaction of the Souls, which you have now access to. You don't necessarily means you have the access to the knowledge of that language, Chinese, English, whatever, in your brain. Through the connection of the Souls, you have access to somebody who speaks the English, with the full meaning of the English. That you, when you say a joke, you see with in English to some people who don't speak English, they laugh. But you see the laugh is just, they don't want to show that they didn't understand. Because if they're English people speaking it, they know this joke had a hidden meaning, a second meaning to it and they were talking that. And they laugh because of that. (2:44). But the one who has just a smile is because just say, oh, I understood.

This will not happen in the dimension of what you call, speaking language through the Soul. In a way, you have a server who has an emotional understanding. Could it be in your brain you can access to it? You bring it and you translate it to. And this understanding will come very much to you. You will understand. I don't know how I understood the emotion of it. How I could translate it. Then we learn the way you tap to the Soul to see your father who died years ago, and you tap to the Soul of somebody else you love, and they feel your love. Through the same process now we understand the Soul of the language. That we tap to somebody who's Chinese. So, when even we speak the Chinese we might do, we hear the Chinese, we understand it, we understand the emotion of it, the essence behind it, the culture of it.

And then the speaking language will change. It'll be the same when we travel the depth of the Universe. We don't understand the language, but we get the essence of the emotion from them and they get the essence of emotion from our Soul, that we understand each other. There is no language school at all, anywhere in the U. I haven't seen any. I don't think any of you will find English speaking language on planet Zeus. These are the things which we learn and it becomes part of us. We are part of the Universal Community with access to whole knowledge of the universe. Depends where we want to tap into it, and how we want to tap into it.

It'll be very interesting. I explained this to a bunch of space scientists and sooner or later man will face this, (2:46). now that we have opened the space. In the coming time when we take you out of the colonies you go to the other side of the dome, and you live a life in the strength field of the time and place in space. What was not manifest to you inside the dome, could be the creatures of that planet. That to us, through the eye of the man in the dome, was invisible. The interesting thing will be, how you will communicate, how you will live amongst them, now you look amongst them. Look alike of them, understanding the culture, understanding their possibilities of life, becomes part of your life. You chose to cross the line. And as a man, we have to be prepared for that.

We have looked for centuries and thousands of years into the sky to see the Sun. We see nothing between us and the rays of the Sun except clouds. Now we have scientists who have taken pictures above us from

creatures which live above us and we see them moving. So, what is the answer. We've been blind to their existence even though we see through them. And this is the norm in the coming time. Now that we open the plasma technology, not by rockets which has failed us, not by the spaceship UFOs, which take us to another capsule, but by transformation, transition, transmutation of the energy of the body of the man.

These are the facts which we have to face in next year or two. (2:48). It's not in 10 years down the line, it's not our grandchildren. We as a human race we develop them, we are facing it, we have to handle it, we have to know what we're going to face with. I'm sure when we land on the Moon and we go through the transmutation beyond the walls, through the energy of our body, we will see creatures which live on this planet, which are not visible to us today.

The planet has a gravitational magnetic field. It has a construction, it has Inertia, that by law of existence has creatures of its own, which live within in its environment of zero atmosphere as you call it. We have to open our eyes to the reality of what is to come. Not ignore it to our peril and get damaged by it when we go and we expect. What are we going to see? How come you get on the plane in London, and you land in Beijing and you expect to see Chinese. Do you see that many Chinese in London? Everywhere around you? My son said something very funny, when we used to live in China. Papa, all the foods here are Chinese? I said, yes, of course, my dear. We live in China.

Now, we don't go to see another dimension of Chinese, or black or Indians. We are going in the environment of the field difference. What was not there to us visible from here to the other side is, is impossibility that there is no life on any planetary system in the Universe, even on the stars. (2:50). If we accept this, if you understand this, we are ready to become the true travelers of the space. Otherwise now becomes them and us. Because now when you travel in the dimension of the Soul it's us, and us, and us and not them. With the knowledge that we come from another source, but we are part of them.

You don't need to go sign language, Souls have no sign language. Excuse me, doesn't exist. These are the realities we have to face. And it's not in the books, it's on the table, it's coming up, it's the next show. Musk failed going 200 meters up. Musk cannot even imagine such a thing exists, because otherwise he does not exist in the dream of his own capsule.

But as Knowledge Seekers you've seen it, you come to us, you go to. You hear Dr. Bararpour just a few minutes ago, you come to the doctors of the Keshe Foundation to get rid of your Alzheimer's. How do we do that? How do the technology allows you to expand your Soul and deal with what you forgot? Now you remember and you see new things you have to remember in the Soul that when you come back, you attach it to the STP.

You go to the grandchildren says, I went to the Moon and there were creatures like this and that. Do they laugh at you? No, it's like you're going into back to London and say, oh, Chinese have this ..(they say) it doesn't exist. ?? who's seen ?? Oh, what do you talk about chopsticks, it's only chopsticks, it's only steak fish, and chips, and forks and knives. This is a new extension to our knowledge, and we have to be open to it. (2:52). Because it's us who fails us and nobody else. It's us who fails us and the reality of existence in the dimension of existence. Jump up, go up, pay Mr. Musk to take you to the space station and look at the window and see how many floating things you see, but why don't they create a cloud that we can't see this dust. The dimension of the field transfer creates a transparency that the light goes through it.

Our lack of vision, our lack of knowledge, has made us ignorant to our own existence. And we can't do this anymore when we go into space. And it's not the next generation. As they say, the "last bell has rung," and man is on the way up.

Shall we call it a day? And we come back next week. And we'll surely see you tomorrow, those of you who participate in the, what you call, the Addiction session. But remember you don't come for alcohol addiction and other addictions. That could be solved. But we are more interested in how we stop the addiction of killing and addiction of being attached to this planet. And then we'll see the progress of the man in the coming time.

R: Do you think you could give a quick answer to our last question here which is from someone called Rick.
K- Is that Rick Crammond?

R: No it's not me. It's in the Q&A. It's another Rick and says, I am new here I believe there are devices to help power a home, can I get an explanation for what is currently possible and is it cost-efficient? Thank you. (2:54).

K- Yes, .. there are systems which are at the Keshe Foundation and depends on what you want. It is a combination of gas and electric, which is coming in the second, third quarter, second quarter of this year, and many, many other new developments. Then, yes, you can now buy a system of what we call, Home Power Unit, which is a hybrid system, between the, what we call, electricity and plasma power production. And other systems which as you go to the sales pages of Keshe Foundation, you can find and choose. And the hybrid system will produce gas and electric and that way.

R: Okay, thank you Mr. Keshe. I know you need to go here, so... I'll put the store link in for Rick there and he can have a look at some of the different systems that are available.

K- Yep, see you tomorrow. And those of you who register for the addiction trial and those of you who want to join us on part of the 200, what we call, the space units, join us and we'll see the next step in the development of the technology in the coming time. We'll see where we can go. Thank you very much Rick and thanks. We see you tomorrow and then next Thursday.

R: Excellent Thank You Mr. Keshe for another wonderful workshop here. This has been the 483rd Knowledge Seekers Workshop here...

K- We are about ten years, aren't we?

R: Yeah, it's been well, (2:56). nine years of workshops with the Knowledge Seekers Workshop, but you've got to take into account you did workshops every month for a year before that as well with the private, or the public teaching workshop series. Which became the Knowledge Seekers Workshop. So, it's actually 10 years, yes.

K- Yes, well we are at it. Let's see if we can make it into a 500.

R: I was hoping for 500 to just keep pushing, just keep pushing.

K- See you next time. Bye, bye.

R: ..Just thinking about it the other day.

K- We are about there, just about there, 3 more months .

R: Yes indeed.

K- ?? months and years, 500 sessions. The problem comes when you start counting 4,830.

R: Yeah, and we got to take into account there's already like 2,000, over 2,000 videos in the YouTube channel as well. Most of which you are a star in Mr. Keshe. Thank you for being our star for so many years.

K- We're just students learning. Thank you very much and see you next week. Thank you very much. See you tomorrow. Bye.

483 KSW April 27, 2023

Collective call of Soul; Balance STP; Earth effects rest U; Gans Gas mass delivery through government; Breathe air elevate Soul whole planet all animals; Change has started; Gans Gas will ingrain STP and DNA - permanent; Deuterium Gans; Liquidity - Water on Earth allows plasma to flow - create life with consciousness & emotion; AA creation of life anywhere in U; Fish became Man - many races; May Session end Child abuse; Create fields MaGrav; Gans in construction; Feed through eyes

ENGLISH TRANSCRIPTION

(:10).

K- Yes, good morning and good day to you, as usual whenever and wherever you listen Knowledge Seekers of the Keshe Foundation Spaceship Institute, we welcome you back as usual to add to the knowledge and learn from each other. Today's teaching is mainly on the basis of what we heard on the Intro. When do we recognize that we are listening to the call of our Soul, and when do we consider that the call we hear is a collective call? When we do something for ourselves and when we do something for other Souls.

As we discussed last week and last times, we think we are in charge of, we think we plan everything, but we find out, in-between the Soul does its job. You use the physicality (P) to do, to get work for other Souls. We never known the chap, but we crash into his car during the lunch time as we said, and then we find out why, the guy was actually in the with a mistress which was cheating on the wife, and this way he had to found out, that the wife finds out and the rest of it. (:12).

In a way, the accident was part of it that you decided to go to work. The other part of it is, that the collective Souls set for the dimension (D) that the Soul of Physicality (STP) of the man, or whatever, comes to the point of what we call the judgment, the point of the whole thing to open up, that the Soul of the wife which is aware of the misconduct of the physicality (P) of the husband gets the P of the wife to know, and then we know the rest of the stories.

So as we see we are partially working in the way under the banner of planning us, working 9 to 5, but the Souls in setting up what it has to be done, set up the rest. So we see that we actually live in both dimensions. We actually have this problem that we live 9 to 5, but at the same time we serve the Souls of the others, to free the Soul of somebody else to become aware of P of misconduct of the other, through whatever it comes. This is what we call, "accidentally." Eventually we find out there are no accidents. We have to distinguish between the work of the Soul, and the work of the P, and where one ends up with the other, or when do they work together to bring to man, to a point.

This is what is happening today, (:14). every man has lived through the birth of one way or another, and now collectively the human race is coming to the point that all Souls are becoming educated to reach to the point that the Man gains the knowledge to travel the depth of the Universe (U) through the energy of the Soul of the Man (STM). This is where most of Knowledge Seekers (KS) and most of the humanity have been blocked, have not understood. Have not come to understand that in one way we all run our 7, now 8 billion physical lives, but collectively our Souls work to organize everything for all the Souls to reach the point of maturity.

This is where the new manifestation of understanding and knowledge will arise. Where the Man will become mature to understand, not only I live a life of me here, but I live through my Soul the life of connection to the rest of the creatures of this planet. Somebody kicked the dog, and needs to be straightened because the Soul wasn't happy what the P did. So get somebody from another point of the world to turn up and kick the guy to understand that you kicked the dog, see how you feels.

So if you understand this, then Man collectively becomes one when they live the life of Mitra, to talk good, to think good, and to act good. Which means none of us makes a mistake, (:16). that for the others to be setup to. And so the Soul of the humanity, the Soul of the living life of this planet will move in one direction, in one process. To get to that point we need to create a condition that all physicality's live a correct life. A life without hunger, a life without pain, a life without poverty of the minimum, does not matter what we call, minimum.

This is the responsibility of the world leaders to bring humanity to that point. And this is why in the call to raise the Soul of the world leaders we brought you to that point. This is our call, this is the revolution and what I call, control of your Soul with us to understand what we need. To what extent would we go to produce this condition. To what extent would we go collectively to create that condition, that it is not me anymore, it's us, but us is the Soul of the Totality of the race of the man, the cat, the dog and every living things on this planet.

Then it comes if this is the case what happens to the Soul of the planet Earth in the conjunction and interaction with the other Souls. When we do good, we act good, we live good, then what does that will do in connection to the rest of the creations of the Creator? Now you see, now you understand the behavior of the totality of the Man, (:18). or living things on this planet has effects on other Souls in the U. When you do wrong then another star has to get the kick, and the galaxy has to kick it, and then it comes another galaxy kicking that galaxy and the Soul, if you understand the proportion and scale of the work. Then you understand when you have one brick set wrong the whole wall will be twisted and twinkled, and that little brick, which has gone wrong and has created too much twinkling, and bending on the wall of the Creator, is the creation of Man. This is why you all had these Prophets trying to get you sorted. Trying to get you to understand. Trying to educate you to live the path of Mitra, that the "wall of the Creation' stands straight. The wall of Creation stands correct. (... 1 sec please ..)

Then, then we understand, then we come of understanding, it's not anymore me, it's not anymore the Soul of me, it's not anymore me as one man. It's the Soul of the Creation and created on this planet as a totality of the life. Then we stand responsible to create the next generation of Man with the right conduct, (:20). that the wall stands straight from here to the Creator.

Maybe some of you will come to understand why we create all these technologies, to create food, to get rid of your pain, to create energy, to create everything else for you. Because this is the beginning of the cycle. This is the beginning of creating comfort for all created, that the life of the Man does not need to do wrong. And everyone in every shape or form, and even the dog and the cat, will live the life through the Soul, the life of Mitra.

Because man is physical, and as I said, when we come this time, we correct everything in one go. We cannot just say to do good, we cannot say just to don't do a crime. When we create the condition that you cannot feed your child. When we create the condition that you see all the wrongs. And then you have to find a way, and with the class difference, with the race difference man has created pushes one society or other in a direction just to survive, with it comes the rest of the criminality, and the rest of it. Why the majority of the crimes according to the statistic's on the prisons of the US are blacks? Because the society marginalizes them from the beginning, brought them in as a slave, but not as equal, and to change the what we call, the "rednecks" to understand that there is no difference in their blood, than the black man, and in a way they owe the life they have to them, that they build ?? a sanction of US, then we don't have this problem. (:22).

Now the time comes when the knowledge and the T we will deliver does not know any race, color, religion, or whatever. When we produce a MaGrav, when we produce the Enhancement systems we don't ask you if your color is black, yellow or white. When we teach, when we bring the knowledge I have never asked any of you in the past 20 years of teaching and promotion of the life on this planet to be equal and peaceful, are you black, are you white, are you rich, are you poor, do you have blue eyes, or do you have brown eyes. Are you Jewish, are you Muslim. My knowledge, my love has been freely given to all of you as a knowledge that we, with that knowledge, with understand how it, then you learn to give unconditionally. This is the gift which we bring. This is the way we bring, this that, it becomes the style the way of life for mankind.

With it we bring the T to teach you how to make the energy, how to feed yourself with the Gans's, that in the bigger D, then the world leaders bring Man to that point that everyone gets what they need. Where the monetary value has no value anymore. We teach the governments and we teach the citizens. Where the government fails the citizens fix. Where the citizens fail the government fixes, and this is the way it will come.

In the coming weeks, and months and years you will see the change, (:24). the evolution in the STM. Where by the time I finish no child on this planet will sleep hungry. This is the promise we gave and we keep to that promise. And you've seen the beginning of the evolution of it. You have a headphones, you carry the D of the Soul, I can reach you with the food and the medicine, that you feel no hunger. The T sits within the framework of the KF in Linz. No child needs to go to sleep. No parents need to worry, if I can feed my child that will not go to sleep hungry. Where this is the mobile phone, just put the headset on. We feed the Soul. The Soul learns the equality, the Soul learns the peaceful to go to sleep. The Soul wakes up peaceful in the D of P, and this will change the course of humanity.

In that process we change everything step by step. Even no dog shall go hungry. No lion will kill, as the ?? limbs of ?? equality, of the noose of hunger will not be there in soul of the animal. Where we feed it with the

satellites. When today when a satellite flies overhead, does it matter if you carry an "Apple" or god knows, Sony, or whatever telephone. It takes from one and gives the message to the other. (:26). This is how we planned it, and this is how with D of T man, will have a lot to create for itself, to bring to that position, that this will be the same.

It will take me 1 second to make all of you to walk away from religions. And the systems are there. Man has created systems for people like us with knowledge of U to touch every Soul. But what's going to happen if it is not ingrained in the STP of the man? You as KS in coming weeks and months you will see an evolution in the cycle of the life of the man, where we'll reach most of you. Where we'll change the D of the needs of the man, wanting peace, wanting to live a peaceful life, becomes the norm of the life. Where everything is provided.

It's not just to change the man. We have to change the mentality of the governing bodies of this planet the same. We have to create jobs that people don't do anything wrong, we have to keep them busy. Where the governments have to think, we have to create the conditions of comfort. We have to create the conditions of the maturity and wealth in the feeding of the STM, that man can walk the streets for months and years, can go from one nation to another in 1 second, and still be peaceful. (:28).

In my travels through the Universe I have never seen factories, sweat shops, refineries, the jails and the courts, except on the planet of man. Which has made himself all this mess to confirm the existence and hierarchy and control of one over the other. I wonder when we put Man on the UFOs the size of this planet, as man has seen many coming from other corners of the Universe, would we find sweat shops in there, and would we find the slaves? Would we find difference between the races? Who could took these people from that galaxy and that planet, they are lower than us, the class difference, the education difference? Or are they all given knowledge, and the information and the food of the Soul? And in a way they just pass time. Have you ever seen a UFO landing and suddenly everybody coming out and opening shops, that you go and buy, oh, I have this from that planet, or I have that from that galaxy? Man who keeps on claiming being in touch with the aliens, how much has he alienated himself with the lack of knowledge of himself. Now we understand.

As we say in English, if you were there in the seventies and eighties, why do the Pakistanis never get to the final of the World Cup? Because every time they get a corner, they open a shop. (:30). Would the Man travel the space in their new flight systems, and as soon as they get to the Mars and other planets, open shop? One sells clothes, one sells television, one sells God knows what. Do the citizens of the Universe needs the rubbish Man has busied himself with?

How many of you claim, how many nations claim, over centuries and thousands of years, they have seen these flying sources, they've landed, they come and go? But how many of you have seen aliens market? Opens every Sunday at 6 o'clock and closes at 12 when the church bell rings. Now you understand how the life of the Man has been entangled in a mess of what they call, slavery to physicality.

We teach you, on the other hand, we open the doors to the governments to create without them knowing the condition for the change, to bring in the position of the conversion. We teach you how, and we give you why, the gas units. We give the same gas unit production to the governments to run their power stations and sell the gas to you. But there is a difference between the gas we produce through the Gans system, and the gas you get from the depth of the planet. (:32). The gas we produce touches the energies of the STM. Whoever touches the gas, finds peace, finds elevation of knowledge, finds the process of.

I cannot sell one trillion, one billion gas units, but I can get the governments to create the gas stations, to feed it down the pipelines, to get to you and through electricity to you. We change Man without the Man knowing. We correct the behavior of the Man without the Man knowing. Now you understand how deep our work is.

Do you remember, if you work with the Gans's we told you to inhale? And if you inhale the right combination, it helped you with your Corona, with the virus. Killing and destroying your life, is the habit of the Man, is a virus. I cannot sell a Gans unit to every single house. But I can get nations to pipe it down the lines, and to mass deliver it, that no citizens of this city, which uses "Gans gas" as a part of the energy of the burning in the house and electricity, will do no crime. It's easier to get the governments to change, than loads of men to change. Where without them knowing, we deliver the totality.

In the coming time you'll hear, (:34). in the industrialization of the technology, we have cities that there is a zero crime. Find the mayor, give him a prize. He has found somewhere that there is no crime. Yes. Find the Keshe Foundation, which has put a gas producer's station in the town and is changing the STM. We have our own ways to deliver, and we still play hard to get. Because if we play easy to get, then they see us as a fool. And it goes back to the habit of the past. We know Man well, and we play the game of the Man, be it from his leader to the street cleaner.

Now you understand what is set for humanity to come, and we have started that process. With this way we touch the life of every Man. Because when that gas burns to produce that electricity, when that gas burns to cook for you in the house, the Gans's energy that you inhale cooking over, change you from hating your husband to loving him. Finding the life difficult, you'll find pleasure in living. People with anxiety in the city, now cover the same. Don't forget we said, all the time, one atom of Hydrogen can cover the Universe.

The change, the process of the manifestation, elevation of the STM in Totality has started. (:36). But we're still there to make a little patches there, and something else there, to keep you busy, to educate Man, to find a way to the governments that it changes the inner structure of the life on this Planet. And then it changes, it ingrains in the Soul and the dimension of STP, and what we call DNA and RNA of the Man. We know our game. We know how to achieve.

Very soon you hear cities which are fed and supplied by Gans gas from Keshe Foundation. And the governments have the majority of it. Yes, we know, we understand, we play the fool. But the cities become the example. We shall not see crime in them. We shall not see no child going hungry in them. We shall not see no one sick again the way they've been. And then they look for a question. What did this happen? Nothing. The knowledge of the Creator to the hand of the Man through the governments has set to do. And then they become examples.

As many of you know, today El Salvador is in that position. The president of El Salvador has become unique creature. He has managed to make prison. He's put 65,000 people in prison, all the criminals, and the crime rate has died. And he's found a solution. He has not elevated the STM. He has entrapped and imprisoned the physicality of the Man. These men, when they break out, and he hasn't solved the problem. (:38).

As I said to the ambassador, give the prisoners to me. And these lot will never commit a crime. We'll give them to cook in prison with the gas Gans, where the Soul education comes in, where the elevation of the STM comes in, and then when the Man finds Peace. You imprisoned the physicality of the Man, I freed the STM that will never imprison the physicality. This is the dimension which now we have created for the world

leaders to walk into, thinking they do well for their nations, when in fact, they carry our wishes. They carry the way we want things to be done. The way it will change and ingrain in the STM, in the DNA of the Man, in the RNA of the Man, without the Man knowing.

How many of you, we have taught about the Gans's and MaGravs, and how many of you have made it the wrong way, created the wrong energy, and, you're still in the same mess. Mr. Keshe, my MaGrav doesn't work. Your system is wrong. But, the Soul of the fields of the Universe, through the MaGravs which don't work, has already reached you. Now you understand. We know our way. We know the way. We have to work on the level of individuality, and work with the level of the government.

We have to change the air the Man breathes on this planet, (:40). that he shall not commit a crime. And how can you reach the air of this planet, except through the gases? Except through the gases which blow the planet and the Man breathes. We throw the Gans's in production into the rivers, and we covered the "Soul of this Planet" with Gans's.

Isn't this the way, those of you who came to us, in different part of the world, and from different part of the world, I gave you three cups. One cup to inhale, one cup to drink, and one cup to wash the body with. Or, make it as a unit to attach to physicality. Now, in a bigger scale, we have started the change, for what this Planet brought short to Man, that made Man to live, create the condition of criminality and injustice. We... you are happy with the Gans gas. I am happy with you to burn, to change the air of this Planet. That what is breath by the cat and the dog, brings and elevates them to the same as the Man does. You are happy with the free energy of the Gas, I am happy that I change with the release of the gas Gans, the elevation of the plants, and the animals and the rest. When the Creator works, he knows how to get the Man going.

In the next few weeks, (:42). one of the first cities on this planet working with the gas Gans will go into operation, maybe in six months from now. And then we watch the behavior, the social structure, the way the citizens of the city will change. In another city we start the gas Gans power generators. That will be much easier than you're burning the gas, because they burn it for you in thousands of gallons and liters to give you the electricity. And you find the same with the citizens of that city.

We have started the process. And the world leaders have taken the bite. They are happy that they'll have independent free energy, and we are happy that we get what we want. In burning the gas, they produce waters which is embedded within it. The structure of the elevation of the STM, when you burn the gas, you create water, and the water goes to be drank by the same Souls who breathe the gas air.

I am a master in my work, and I know how to play with an infant, and how to play with the educated man, and how walk the world leaders to do what we want, the way we want, for them to keep governing, and we keep to bring the change. Now you understand, how the world of creation will evolve in the dimension and understanding of the totality. (:44). The time for the "lion and the lamb to sleep in the same den" has come. As all will breathe from the same air as the Gans gas, and drink from the water of the burning gas. And then, as it rains on, sleep on the ground, which is saturated with the same.

Where they receive the energies, not for the dimension of physicality, but the elevation of the STM and the animal. This was promised, and the promise is fulfilled. The lion being the leaders, and the lamb the citizens. There should be no king. There shall be no one to claim the crown of kingship, as all are equal. All breathe the same air, drink the same water, and sleep on the same land that we have elevated. Instead of going within, we have walked from outside to go within, the STM. Now you understand.

Now you'll come to understand more how in the coming months and years we have changed the Man from criminality to become the lover of Mitra, to live by the ethos of the Creator. This is what the promise has been. And we have managed to get the powerful Man on this planet to bite the apple. Not knowing what they're walking their nations into. A nation of no criminality, (:46). a nation of no hunger, a nation of all equal in taking what they need from the energy of the Man.

Then they will not think about, we need employment, we need to keep people busy, as the Man in the elevation of the Soul become the traveler of the universe, and this planet will lack numbers to keep the structure of life.

If the leaders of the world do not understand what is about to come, in a very short time, less than half a century, as we see there is a restriction on how you can leave a city or a country to go to another. World leaders in a handful of decades will create a condition how even the Souls cannot leave this planet as we are depleting and we cannot keep the services to the rest of the humanity the way we want to do. As we would like to protect the life on this planet.

Man has a habit of trying to find out what's behind the next mountain. Now Man has the habit to find out what's behind the next solar system, and next galaxy, and the next universe. The Creator has never created more peculiar animal than the Man. And that has been one of the beauties of the creation. The curiosity has given extension, and the need has brought expansion.

Just think of one point. If there was one man and one woman where the life started with, and now it's eight billions of you, do not forget so many percentage every year die, (:48). and a new one comes in. How from one spot on this planet, the next village, and the next village, and the next city, and the next country was created. As the families expanded and the water resources, which was the cause of the creation of life, came to its limitation. So Man went to the next village, next spot and made his own village.

But the beauty of it is, where would Man make another village in the Universe called the village of Earth? We are travelers of the Earth, but we are not the refugees. We came to expand and created. Many of you will come, and the recording of today will become one of the cornerstones of the teachings, when you understand how we delivered what we promised. When we get the world leaders working with us, it works much faster. And when we create the condition of the position that brings peace to the world leaders, they become baffled, the way the citizens will respond.

I am a master of disguise. And in a way, we teach you. And it's for you to understand what is being taught and what is to come. When I gave the key of the knowledge to the world leaders, many of you abandoned the Keshe Foundation. You betrayed us, we were supposed to. We gave you the key. You managed to do nothing for past six, seven years, (:50). except trying to be more greedy to cheat. So we went back to the leaders, and we brought you to support the leaders, to stand through their Soul to achieve the same.

The greed, the bigger, the bigger greed shall become to greed. The greed of power has allowed us to bring the greed of peace. But for them to do it for us, then us to do it for them. And we played so hard. We are not happy with what you're giving us. ?? because we actually are taking your Soul. Forget about you installing our gas unit. We're elevating the Soul of your nation and the planet.

Because opposite to criterion of the Corona, which had a new border and nationality, and in one border in one country it was there, and the next door wasn't there, it's the first time we see nationalistic virus. This time, the air you burn will travel to the next village, and across the borders to another country. It's not there that all to be inhaled by the citizens of the city. Now you understand. With the rain, love and care from the skies of this planet through the conduct of the Man and greed of his leaders. And it'll come to the point that leaders find no reason to lead, as it's done through the STM.

In the coming time, you, and your children and grandchildren will understand the teaching of today. (:52). But till that time, you sleep well and taste the hunger of the physicality where we gave you the taste of the freedom of the STM. Tonight, 15% of the children of the most richest nation on this planet will sleep hungry in the United States, as the parents do not have the money to feed them. 3% of the children in Africa, in the poorest nation, will die, will sleep hungry. Because the Africans have learned how to walk through the jungle, pick up from the tree. And how to eat very little, the little can keep you going.

The bigger supermarkets, the better shelved, the more hungry that nation carries. Every time you go to a supermarket and see it well shelved, add up how many people cannot order it. And you see the percentage of children in that nation will sleep that hunger that night. The wealth of the Man has become the shame of the Man. And this will change.

We have set to change the course, and we have got the world leaders to bite at it. And they're so pleased that they're biting at it. And we say, yes. We are not still happy, but yes. Because we know they will deliver what we want. They will deliver the promise of the greed, the elevation of the STM through the Man himself, as then it will become ingrain within the STP.

Thank you very much for today. I hope you remember the teaching of the 4th of May, 2023. We'll go for a small break and we'll come back, and try to answer some of your questions.

<< **BREAK** >>>> 484 KSW May 4, 2023 (1:00).

K- Not really, but maybe. First of all, the list we put up last week for the last pieces of the materials donated to the Foundation was completed. Thank you very much for the donations, and thank you very much for you people, Knowledge Seekers, taking the challenge up and receiving it. We still got a few pieces of paintings left, because we can't find people who value the art.

And on the other hand, everything is good enough. And we're going through the challenges of life, of any technology like us. And hopefully for those of you who participated in the Addiction session of last Friday, do not forget that we meet on Friday the same time, 12 o'clock Central European time. And we will see what has changed for some of you. And we understand and see the testimonial of some you.

If you manage, if you reach to the Soul of you and some of you did not receive the, what we call, the balanced fields of what we're looking for, then if did any of you "kick the habit" or addiction. Be it from loving, to smoking, to drinking and everything else. So we see you as Knowledge Seekers tomorrow.

We are planning what we call, (1:02). A May session of meeting with the Creator. And this session will be announced in next couple of days as we have to complete the job, which the Foundation has got himself tied up with very what we call, willingly in the past few weeks. If there are any questions we answer, and we try to finish today in an hour or so.

Q: .. You may remember that a few weeks ago I asked a question about the black stuff that I got when I was making CH₃ Gans. And, as you mentioned I put, I separated that black stuff in a jar. And I tried the magnet on it and it was pulling, the magnet was pulling the black stuff up. So, is it only Iron Oxide or does it have also Deuterium? This is my question today.

K- It could be a combination of both, but you most probably, you've got this one making CH₃, if I'm correct. And this comes as part of Nano materials in the Gans form from Iron. This has a lot of use. For those of you who actually get it, this has huge use. (1:04). But, we prefer not to disclose it at the moment, because then it creates another new dimension of abuse by Knowledge Seekers. This Gans you have produced, has an implication, application, in many, many, many parts of the life of the Man and this planet.

Partially could be Deuterium, but Deuterium usually is mixed in within this Gans. And there is a method that you can separate it. And then you'll see what you have is Deuterium.

The knowledge of the technology today has reached a level that we do not need to produce the way you produce Gans's to reach the point of the energy transfer. And in the coming time, this knowledge will be shared. That you create a condition of totality and not a condition of singularity of a given field and material.

But in essence, you have a mixture of both Iron Gans and Deuterium, but there is a way that you can separate it. It's very, very... You will see the Deuterium in a darkish black, where Iron in a black, black. It's very much like when you have a Zinc and CO₂ mix in the bottom. And you'll see the Zinc moving to the top and the CO₂ at the bottom.

Q: .. I put it also next to the CO₂ Gans, (1:06). and ZnO Gans, but nothing happened there. So, there was no change to them. No field, I didn't see any field there.

K- Yeah, but usually you get that with the CO₂ and Zinc. If you have the Gans of Iron, if you had more Gans of Deuterium, you'll see that pull up, but usually it happens.

In the early years, when Knowledge Seekers started working, some Knowledge Seekers touched, but never understood, the circulation of the Gans's. And if you go back to that with circulation of Gans's, you can separate the Deuterium from Iron. That's an art. I'm sure Rick knows how to do it. Years ago, a few Knowledge Seekers touched it, and they never understood and they left it.

You have, some of you, if you go back to the old videos of the teaching, you have a central circulation and you have a vertical circulation. We've seen many people posting Gans's which they circulate, like a vortex. And we've seen knowledge seekers who have posted the Gans's going to the top and coming down. If you understand this principle fully, and you understand what it means, and you can use the two in collaboration with each other, you can do a lot of things. A lot of new knowledge will break through, but you have to understand this. (1:08). And this Gans of Iron and Deuterium is one of those cornerstones of understanding this process. I'm sure if you look at the archives on Youtube, of the people who made Gans's, or go to "Golden Age of Gans" and the rest of it, you will see these things.

Q: .. So, I got something valuable that I don't understand how to use it. So, I just keep it the way it is.

K- Till one day you'll ?? learn. I'm correct if I say you're Iranian from US or Canada?

Q: Canada, yes. My accent says that?

K- No, it's just I remember something from you.

Q: Yes, yes, good memories, good memory.

K- I am old but I still don't got Alzheimer's yet. Thank you very much.

Any other question?

Q: .. Hello, good to talk to you, Mr. Keshe. So this is actually Dirk using Nikolai's phone, and Nikolai is next to me, he's also listening in. We are currently in Mexico in the state of Michoacán, and we have a connection to the local government, to a congresswoman, to the governor, and she's very much sympathetic with creating the best possible world, which is also our mission here. And we are just looking into investing into a biofermentation plant, which essentially builds and grows bacteria that are bio stimulants to the soil and hence improves the soil's capacity to retain water and life by extension. (1:10). And we were thinking about would it make sense to either A- switch that investment into one of the hydrogen generators or Gans generators that you were talking about today. Or having them combined with a biofermentation device. And in case that it would make sense to do that, how would we go about moving forward with buying one of those and applying it here in the state of Michoacán? That being said, this is a state of...

K- What's the scale of your work?

Q: Right now, we're talking about a prototype plant. We're looking... Like, Michoacán is one of the main food producing states in all of Mexico, and they produce a lot of this food all over the world. And they also are pretty crime-ridden here. So we're thinking it could be a really good place to start creating these fields. And we have, I think, a really, really good setup to be able to scale really rapidly the connections that we have already made. But this is still a pilot plan at this point. We're talking about probably somewhere around 25,000 - 50,000 dollars that we have to invest. It's more like a demonstration site at this point, that we can show people how it works, and then we'll get all the. We have all the networks to then scale this up to potentially, you know, very huge operation.

K- Yeah, but then you're still looking for finances to be able to do it, even if you do it on a small scale.

Q: No, we do have the finances for the small scale.

K- Yes, that's what I mean. Then if you succeed, then you still have to go and find finances, especially in Mexico, for a bigger scale. We'll take another half of ?? year.

Q: Yeah, in a way, but we do have already a really established large network that would make finding those finances for the larger operation a lot easier, (1:12). because we are plugged into the Mexican government, and we are plugged into basically all of the food producing families around here, the big food producing families, that could basically see this application of the mixture between biofermentation and potentially the Keshe technology, and see a lot of value in that. And from there, since there's a fertilizing shortage all over the world anyways. Right now there's futures being traded on fertilizers. So we are quite sure we can scale up the operation very rapidly, and there wouldn't be a lack of funds or it wouldn't be hard to find the funds to do so.

K- Contact me through Keshe Foundation. Go to info@keshe.foundation. And we'll talk to you hopefully in a different manner, maybe. Sometime next week ?? I have so much on my head. We might be able to bring another force into play for you, makes it much easier. But it's a... It needs a lot of thinking, but maybe we can support you and bring other things into play, maybe, otherwise you carry on with your project.

Q: That would be awesome, yeah, we'll reach out and... Love, looking forward to talking.

K- Send your info, just put about what you said, you talked to me. I'll receive the message. And give us a couple of weeks till we settle things which we are busy with. And we can use a Gans process with what you are doing. But we need to know more, and then maybe we can bring different games to play.

Q: Awesome. Beautiful. Thank you, Mr. Keshe.

K- Any other question? (1:14).

Q: .. Good morning Mr. Keshe and to all Knowledge Seekers. As a Knowledge Seeker in alchemy. In the past, the water was considered the large alchemical solvent, Ava or Anahita, a living tradition of reverence by water among the Zoroastrians, that respects water as a source of living, which fed plants, animals and men. Today I consider Plasma Technology beyond alchemy. Could you guide us on this great Soul called H₂O water, that united two Amino Acids, Hydrogen, the Magnetic donor, and Oxygen, the Gravitational connector? We appreciate the guidance.

K- Every life in every corner of this Universe and Unicose has a factor of liquidity in the energy. On this planet we call it, water. In other dimensions it's what we call it, we can still call it water. But, it's the essence of the two, "hold and feed." And, if we understand this, (1:16). and if we can comprehend the Totality of the implication, application, you do not need much in sustaining life.

You got to understand the principle of Creation. You call it water, Hydrogen (H) and Oxygen. Look at the Amino Acid, which is the sustainer of life on this Planet. You have Oxygen, and in between Carbon and Nitrogen. Where the life of the liquidity of life is, has engaged and encaged two other elements to create the process of dynamic life with emotion.

This repeats itself across the Universe. H is the essence of the source to the Creator. This is how we start everything from. We talk about Deuterium, we talk about H and C14, for the line of communication in the Universal dimension. And if you understood what I've just said, then you understand, let's go to Moon. Let's go to another planet. (1:18). You have the H as a source of the line to the Creator, and essence of the connection to the Unicose. And what else the Gravitational field Inertia of the environment allows the liquidity, the motion, free motion of the fields.

Then you understand life is not exclusivity of this planet, if you understood this basic Knowledge of Creation. If in another planet you have the H as a base connector, and then let's say you have Calcium, due to the Inertia Gravitational mass fields of the planet or environment. Then you'll find another two elements in between, let's say Sodium and Nitrogen, and then you understand there is still life in the Universe. Liquidity, liquid condition of flow of the plasma for creating condition of the life in remembering, reproducing with emotion.

So now, I said many time, if you change the Fe in the blood of the Man with the Potassium, what color you get? What condition Man will be? If we change it with Calcium, what kind of ice would we create? So, you always look what is the maximum holding, before it comes to the position of the solid state. And within it, (1:20). to confirm the entrapment of liquidity fields of the planet materials or environmental materials, that it leads in dynamic liquidity to sustaining consciousness and emotion. And then that becomes the essence of the life in that place, time and position.

Then you understand more about the knowledge of the Creation. Then you understand how Creation works in the dimension of fields. How you can manifest life within the waters of one condition, one planet, than the other. As I said, you created with one drop a fish in a fish tank. Now you may understand. Strength of the amino acid (AA) you drop in that water in condition of the liquidity of the fields of the plasma of the planet, which is the water, creates condition of life instantaneous. And they'll take shape in the shape of a goldfish.

Travel the depth of this planet and find natural waterholes, and sometimes man made waterholes. And you'll find fish within it. We call it, "wells fish." (1:22). Out of nowhere. In fact, this is how life through the amino acid has created itself within the well. The same way as you created amino acid over your CO2 Gans. And not every well has a fish in it. When you test the composition, you will see why. You take the water and the condition to anywhere on this planet, it'll create you fish. It's the minerals with that water, and the current flow with that water, which creates the condition of the amino acid on top of your Gans box. But this time is within the water of the well. When you have the amino acid, when you have the nourishment of material coming from the depth of the Earth, you create ??.

This is why many times I have said, the race of the Man which now dominates this planet, has not been the only one. When the dimension of materials and temperature of this planet start reaching the position and condition of sustaining life and creating amino acid, life flourished on this planet like weed. Some of the planets, creatures are out of the creation of the same. And some are in connection with the created, and created things in the Universe, which has found its replication in the dimension of atmosphere of this planet. (1:24).

Now you understand why even in the books of the Man, we talk about, this race managed to take over the other race, and then blah, blah, and the rest of it. In fact, if the condition of life could be created in dimension of the Iron and Zinc, and then you have waters which they run in the depth of this planet, within a few meters from the surface. And they bring the energies. And then you have the condition of the flow, which creates the static current, you absorb the amino acids from the atmosphere, and you set the seed of life in that position. The fish became a man, who walks out of the river. Same as the fish in the, what we call, 'mud's of Africa', became the man and created the new generation of life as a Human race. As we were told. But now we understand, any position on this Planet, had the opportunity, and time and the position to create life.

Now we understand the creation of AA and the cycle of emotion, and the dimension in their interaction of fields. Life is not exclusivity of a place, and a time, and a position. Life is a God given right at any position, in the Creation of the Universe ???. If you understand what life is. Does not need the red blood, and does not need to have a skin. As long as we have a Soul and intelligence, (1:26). that's the creation of the Creator.

Any other question?

R: One thing that came up that I'll ask you about Mr. Keshe, is that, it seems to go along with your theme today of changes and so on. Is a testimonial from Hassan, not sure if you're aware of it, but he has given permission to publicize his testimonial basically, of the Addiction session, that we had on the previous Friday there. And it's quite an amazing testimonial, I could read that if you wish.

K- Go ahead, I'm sure we're going to hear it tomorrow.

R: Ok. So, from Hassan. Hassan says, good day everyone, I want to give you a beginning of testimonial, from the Addiction session we had on Friday. I would like to thank all those who have donated all the beautiful gifts, from which I received a connecting with the Soul of the Creator, "Addiction Awareness." I am a heavy daily smoker, be it tobacco and cannabis. I came as advised by the team, with no expectations, but to give to the system. After the session, which lasted two hours, approximately, I felt no need to smoke again. And even though I lit a cigarette on Friday and one on Saturday, I could not smoke them. It was a heavy feeling on my lungs. I may have had two intakes and the rest was just puffing because my body was rejecting them. (1:28). I could not inhale the smoke. I tried to stop smoking in my life before and it was not possible being a 24 years non-stop smoker.

Well what is beautiful with the session is that with no efforts I can say today that I feel no need to smoke again. Another thing which happened to me is that I don't feel hungry too, even though I had dinner on Friday, Saturday and Sunday. I just went for food for no reason. I think it is because of the habit, that I can affirm and confirm that I feel no hunger since the session. Another thing which happened to me and surprised me the most, and I forgot to talk about it yesterday in the KAKT meeting, is the change on my emotions too. I feel happy for no reason, and I am less irritable. I was addicted to political information and was following political talks on social media every day, and was always irritated by the news and injustice of what is going on around the globe. Today, I just stopped following all groups and news, which can irritate me, and with no reason, I enjoy more music and smile during my days. I was addicted to my phone and internet in general. It is all gone.

What I can say is that this technology is 100% correct. And I cannot thank Mr. Keshe and all those working in the background enough for all what is brought and being done to us for the sake of love and kindness. Love you all dear Keshe family. Keep up the good work and sharing, so that we can reach each and everyone in need on Earth and beyond. (1:30). All my love and care to all, Hassan. (And the rooster here is crowing in the background at the end of this too).

K- We wait and see what testimonials we receive and how people feel about their connection. The, what we call, ritual or what we call, habits, tomorrow's session. Tomorrow's session is part of the last week's session. And, in a way it opens up our eyes to a lot of things.

The May session, most probably will become, prelude to June session, which we would like to reach the Soul of men to stop the abuse of children. And this will have a follow-up effect on the work of Keshe Foundation

in the next few weeks. Those of you who care about the children of man, those of you who would like to stop the process of abuse of the physicality of the children, the way we reach the Soul of the leaders and we brought the change, you will understand the change which will come through the world leaders in the next few months.

We would I would like to dedicate May and June session to change, to bring an end through the STM, through the elevation of the STM, the abuse of children. (1:32). In reaching the Soul, that with it we bring an end to the child abuse. We'll open the session in the next couple of days that you can enroll in. But this time, come in, not expect to take, but expect to bring the change. We wish and pray that you understand the meaning of this. Elevation of the King of Belgium, both the father and son, and their entourage, in promoting and being part of the major part of the child abuse and one of the major abusive nations on this planet, will be targeted in one of the two sessions. According to United Nation and the structure which is set, within the structure of the Belgian nation, child abuse and pedophilia is a way of living.

It's us, if we raise the Soul of the leaders, is to raise the Soul of men of nations that this come to an end. Both raising in one session, elevation of the Soul of the children, and one elevation of the Soul of those who abuse children. This addiction is deep rooted in the culture of this nation. (1:34). It will be for the first time we target to elevate the Soul of the leaders and the citizens of one nation. That we can bring them back under the fold of the Keshe Foundation.

We got to understand, addiction comes through the habit of repetition and being (indoctrinated) in so many ways, through the STM and STP. In so many ways, if we look at how people who have become abusive towards children. We are not talking about only sexually, psychologically, physically. Child in many parts of the world, even in the Western Europe, still live slavery. But, it's hidden in new ways in the Western world.

As we know, this Monday will become the day when, for the last time, a King will be crowned in the Kingdom of United Kingdom. And then will it come the time that again, the cycle of abuse of the physicality and the STM, will come to an end. Once Man understand the Totality of the elevation of the STM. (1:36). It's the beginning of the end of the Kingship. And the Kings shall walk away from being higher than the others themselves, by elevation of their Souls, and not by force and by kick. We'll see the change, and you'll understand more and more as the change comes.

Are there any other questions?

R: Yes, several questions and I'm not sure if we'll have time for everything, but we have a hand up here. Pardon me.

K- I said, if you can, we go about two, two and a half hours today.

R: Yes, I'm just trying to do some mental calculations there.

K- You got about 20 - 45 minutes.

R: Right, okay, good.

K- We got a very heavy morning session tomorrow, with work, and then back again, with meetings, and the meeting of the 12 o'clock.

R: Understandable. Okay, so we have a question from Sarah, have the hand up here, And it may, I'll put a foreword to it, that it may be a health question or a... So, just to be forewarned a little bit there. Go ahead Sarah, let's see what you'd like to talk about.

Q: .. I am diagnosed by met... cancer and then my cancer became metastasis... (1:38).

K- Pardon ... are you from Iran or Iranian connected?

Q: Yes the thing is Mr. Keshe...

K- Please, please, we do not discuss. It's nothing to do with us here. You have to go to Dr. Bararpour or the doctors...

Q: No, no, no, I'm not in Iran, I contacted him. ...

K- Let me explain to you, because I'm not here, I cannot answer you to do anything with you. Send your information to health@spaceshipinstitute.org and the doctors will look at it.

Q: Okay, but I just want to take a guide to make Gans for my energy level, if you can guide me?

K- .. You've got to understand the energy level. If you have a cancer, does it feed your cancer? You understand? So, this is not for us to answer here. Send your request to the health@spaceshipinstitute.org. And then the doctors will look at it. And they'll contact you if they see they can help.

Q: .. Hello Mr. Keshe. Is it possible to convert part of the Magnetical Gravitational fields radiated by every person's individual Soul, the fields that the Soul does not need, into a field strength, which that person could use to feed their body. The same process would go for the Soul. For example, we could create a plasmatic container, in which fields that our body does not need, would go and amalgamate. (1:40). And when they reach a strength that the Soul needs it, could absorb them. That way we could create nice symbiosis between the Soul and it's person, and the person and their Soul. Thank you.

K- In the world of creation we never seen God carrying a tank of fields, just in case He goes hungry. And I've never seen a fuel station holding energies anywhere in the Universe. By the work of the fields and balance of the fields, you receive what you need at the point of need, and you give what you don't need at the point that it has no strength, connection to you, or you need it to create the connection. So, this "tanking" still goes back to the habit of the Man. Always have to have something on the reserve if anything goes wrong. I was talking to one of our Chinese friends very recently. She said, do you know any Chinese family who doesn't have a saving? They save even if they don't have money to eat. So, it's the same with a lot of human race habits. And we don't need to save, to give, to have one day we need it. This is the habit of the Man. And it must have come from a communist nation, most probably background, because he never knew what the next day brings. So you saved it in case something goes wrong. And with a lot of other people. And this is... there is no need for such a thing. There is no need for storing it, one day I might need it.

R: When the body does that, we call it constipation. Store, too much storing, right? (1:42).

K- Yeah, you get fat for no reason. I've never seen a fat Soul. So let's see.

It brings back a lot of memories, when you speak about, we bring these things to ?? preserve the Soul. When the Eastern Bloc opens up in form of Russia breaking up, and opening up, we used to deal with Russia. And we couldn't understand how these Russians all come out every week with 100 dollars bills. Never seen so many 100 dollars bills ever. Where did the Russians hide it under the blanket? Where Russians were supposed to be poor. They're supposed to have no money. And we were crying for them, that they were communists, they have nothing. And when the borders opened up, we never saw so many suitcases of 100 dollars bills coming out of a nation. Even the Americans didn't have that many. Where did the Russians hide it over decades under the blankets and the pillows? Man doesn't need to save that one day regime will change between the Creator and it's created, and it needs to have something to eat on to.

Any other question?

Q: .. Mr. Keshe, we are trying to put the pieces together to understand the communication and the emotions. In past teachings you said that for a person to go to the moon through the Linz systems, you created a "mini soul", and that by the dynamic of the stronger giving to the weaker, you made the Soul shift of the Knowledge Seeker. More recently you said that we could do an exercise for Soul expansion by visualizing the interaction between the STM and the reproductive organs, (1:44). and that these also produce "mini souls". Adding to what was said about the MaGrav device, we have the lower coil associated with the reproductive system and the formation of the rays - the beginning of the cycle of Creation, but also that the rays are formed from the plasma of the emotions of the Soul, in the upper coil, starting the cycle again. My question is, would the intention in giving something, in sharing our love, be like these same rays, or mini Souls?

K- If you're not expecting to get something for it, it's not far from it. But if you do it with the expectation, you have already changed the course. A lot of people give expecting something and this is where the problems with the Man starts. And if you get used to understand, then even if you get it the wrong way it will sort itself out. Where you actually take because you don't have anything to give, but you're very generous to give what you don't have. So, the Soul receives what you want to give and it gives for it. In a way, you're just the intermediary of the emotion for your Soul to do the job that satisfies your emotion. And this is the way it shall be, if one understands. Then you can travel the span of the Universes.

Q: .. If you allow me another question, (1:46). trying to understand the cycle of Creation with the MaGrav. From what I understood, we have the beginning of the cycle at the bottom, and the end at the top, with new rays starting new cycles. But the system in balance, enters into a continuous cycle of give and take, creating what I think is the gravity of the system. So, if my intention for the elevation of a World Leader, for example, wishing for a new cycle of peace to begin, at the same time I am re-feeding my own MaGrav, and creating new internal cycles with the same intention, thus ensuring the balance of the continuous flow, from the base to the top of the MaGrav?

K- More or less. But you got to understand where you're taking from. You're just looking what you give, or how you elevate, or how you progressively go higher. But you always take somewhere. If you understand that take, you have become wise to live it. If you just look at how it's elevated, you have lost in the maze of the what we call, ignorance of the Creation.

Any other question?

Q: .. Hello Mr. Keshe, Rick and all Knowledge Seekers. I have a question about building a house. I'm here in South America and I am building a house. I have the opportunity to integrate Plasma technology into brick production. My goal would be to keep the indoor temperature in the house at a continuous 22 degrees, (1:48). summer and winter. My question is, should I add only the Plasma water, or also some Gans into the brick production?

K- Gans. Because the water will dissipate in the energy into environment. If you can create dry Gans, and add into the, what you call it, into your bricks or concrete, that will last much longer. But because they become center of gravity, they'll absorb, and they give and last most probably the life of the building.

When you come to construction, we have to understand what effects will have if you're using cement or concrete, or whatever, because tests done with the materials over years shows, Gans's have a direct effect in the structure, strength, and heat transfer of brickwork. So, build one side of the building with one type of

Gans, and a mixture of the other, and the other side is part of the same mixture of the other Gans to create a dynamic block. And then you have to understand, when you're making things, Gans's like this, for brickwork, or a long term, try not to use any metal base Gans's, which means like Zinc or Copper. Understand how the nearest energy to it is, and use dynamic liquid Gans's. Like CO, when you have a CO₂, it's different, it has no metal connection. When you use CH₃, it has no metal connection. (1:50). And we have many Gans's like this. Because concentration of the Gans fields can lead to creation of other diseases within the body. So when you add Gans's into a long-term construction or painting, never use metallic base, what we call, Gans's. It's one of the golden rules.

Any other question?

Q: .. To create a plasma flow, I need either different types of Gans's, or only CO₂ Gans Plasma water in different quantity. Which would you recommend?

R: Pretty much already recommended the CO₂ Gans water and so forth ??.

K- You need to create a give and take, and base some in, and take some out. Which means, if you put on one wall, CH₃, one liter, you put 10, what you call it, 0.1 of a liter of CO₂ to the CH₃, and the other way, the opposite way, that you create a flow. And then, if you understand the creation of emotion, then you can add dimension of the Gans of emotion into the whole, what we call, caboodle of the Gans's. And you find, for example, the house, a very peaceful house. Because actually, when you're sitting in, you're touching the emotion.

Any other question?

R: A few years ago, the Chinese had named the MaGrav unit, the 'Happy Box'. Because, they found that people, it made people happy, that came into the room.

K- Hmm. That's a long time ago. (1:52).

Shall we have the last question?

Q: .. Thank you for the knowledge and love received from you. I am in the way of my killing beings to feed myself. If he consumed eggs and milk and their derivatives, I am thus killing beings? Thank you.

K- It all depends how you feel. The biggest problem we will have is, for the whole environment of change, has to come collectively, that we'll see it. How we can do? You cannot suddenly stop eating eggs, eating meat, and everything else. It's just, as I always say many times, drive a car a hundred kilometers an hour and just hit it against the wall. It's, we have to go through the process of the whole environment of this Planet, the whole environment, the structure changes. That we don't see packages of energy as food. Doesn't matter if it's an apple, an animal, or whatever. And we change this habit by providing, that that sensation, that emotion does not come up. So am I eating a life if I eat an egg? Am I eating a life if I eat the raw eggs, if I eat this what we call, ?? which has come up.

It's partially as, (1:54). what we call, as Messengers, it's our job to change the course of this planet. In a way, we have set out to do to create energies that the whole race benefits by it. And sometime in the future, going to a supermarket will be just for refreshing the memories of what we used to do, that supermarkets will become like museums. Because we have found a new way to live. And this is the future.

Stopping something or the other. Unless you have reached the point that everyone around you has the same understanding and capability to feed themselves through the fields of the Soul. Then we can all move forward. Many Chinese went into the cycle of using the fruit Gans's and then putting it around the cup of water and drinking the water. One day, very soon, when we reach the Totality, I'll teach you how to feed yourself through your eyes. And then you'll see the marvel of the Creation. We love through our eyes and that's giving. If Man learns to eat, to take energy directly through the Soul, through the eye of the Man, that's the art of life ?? .. .

Thank you very much for today. And we call it a day, sorry we had to shift the teaching of today, for a very important reason. And we'll see you next week. (1:56). And hopefully see you tomorrow in the Addiction session. I hope we have more people with the change of the habit of satisfying habit of change in the session tomorrow. Look for the Keshe Foundation meeting with the Soul of the Creator, abuse of children, to first of all to raise the Soul of the children, which are abused, that they walk away from it. And then, the Soul of the abusers. Thank you very much for today. And we'll see you in the coming time.

485th Knowledge Seekers Workshop May 11, 2023

(Transcription, Proofing done)
(Auto transcription by Elias)

Agreements signed with powerful nation; World Peace started - new T to be released; KS share knowledge; Joyful time STM; STM can't be dissolved fields from Creator; Teachings change; In charge of every D - don't need taught - feel; Travel through Emotion of U; MaGravs - elevate Soul - massive source of fields; Lower pH trial - dental; Fibromyalgia - strengthen Soul - not your fault; May/June elevate Soul of children abused & abusers

ENGLISH TRANSCRIPTION

(:10).

K- Yes, good morning and good day to you as usual wherever and whenever you listen to these series of Knowledge Seekers from the Keshe Foundation (KF) Spaceship Institute. (:12). We welcome you back and we hope as usual we add to each others knowledge and understanding of the world of Creation.

As I said, in the next handful of years, we'll see the evolution in the Space Technology. And Keshe Foundation is set to set the course for this. Where, what we see with Apollo's and with rocket technology, become part of the history of Man development and understanding of his environment, and how we manage to proceed. As we said all the time, there is no difference between the rocket technology of today and

firework of the Chinese 700 years ago. It's just bigger amount of material to burn. By law of physics and Newton, it depends where you push the force, where it goes. Where in the world of the creation in the Space Technology, of upcoming time in Plasma Technology (T). We work in a balance and in coordination with the Field Forces of the Universe. The environment we live. There is no burning, there is no destruction and there is no pollution. But, what will be interesting in the coming time, is how our governments, and how our leaders, will take this position. Or take position in respect to the new understanding. To the new work of the job of what we call, Space Technology, Plasma Space Technology.

We became partially separated due to time, traveling, and evolving, from black to white, from Asian to Chinese, and from Asians and the rest, to Red Indians and Mexicans and everything else. (:14). With the new evolution of the science, and understanding of transmutation and transportation (T&T), what would happen? How would we see each other? When you're transmuting, would we see colors? Would we be black? Would we be white? Would we be yellow? Would we be a Soul from the Mars, would we be a Soul from another dimension (D)? Would it be the Soul of a dog, or would it be the Soul of a stone?

These are the things that Man will go through. Not only Man, as the knowledge is released across the Universe (U). The whole of the Universal Community will be in mayhem. Don't forget, when you turn one electron, the other electron changes. When you release knowledge of the separation of the Soul of the Man (STM) from the Soul of Physicality (STP) of the Man, and working together, inside and outside each other, this knowledge will spread across the Universe. The evolution of the change is not just for Man, it's for the whole of the Universe. And once Man learns this, and Man teaches this, and Man learns how he can live without it, without burning, without destruction. Then we'll see a new society. We are watching a change in the world of science.

It's very interesting, I was talking to one of the Knowledge Seekers (KS) today. If you listen, both World leaders, or what we call 'Superpower' leaders, use the same word. We hear from Beijing, President Xi of China, and through the Science and Technology Minister of China, they say the new technology will be used for establishment of Peace, for enhancing the Peace progresses. We heard from Biden the same thing during the elections, and on his inauguration, that the new technology and science will be used, emergence of the new technology. (:16). So in a way, the world of leaders of the Man already are aware, there is about to come, there is about the change. But each one is striving to reach, at least to be the first, to take the glory. Where in fact, if the two work together, the glory will be for humanity. We see the same thing coming out of the White House, as it comes from the unrolled, from the Chinese leadership. Technology to be used to create better world for everyone, for peace. But the test of time will not be there to see which one it actually does. Because the test of time, this time comes through the STM.

In upcoming time, you don't need to listen to the word of the World leaders, you'll see the essence of their Soul. In a way, when the word, the mouth says something lie, you see the Soul red and turning redder. And when it talks in a way, the correct way, as is the Soul and the STP talking the same thing, you see for example, greener. So, our leaders learn not to lie. And in a way, as is said, nobody will take the crown of leadership, as we all understand we are equal. The time for that change has come.

In the coming days and weeks, Keshe Foundation will make a drastic announcement. In establishment of the World Peace through technology, in agreement with the World leaders. In agreement with the change, that we are ready for what we promised. It's literally matter of thousand days, before the World leaders put their signature to their word. We'll see the change, (:18). and we'll see the establishment of the change. We see how World leaders will come to accept World Peace, on the equal basis of knowledge and Space

Technology, through the STM. We'll see the end of what we call, the shuttle diplomacy, of sending shuttles up and trying to get there.

As I said to one of the leaders, "You have to let the past go, take it as losses." Otherwise, like American, you're still trying to recover (investment) from the pipelines you let on the concretes of your highways, and you're still trying to recuperate (profits), where the Africans don't have that, and they are running ahead of you. The position for many of our World leaders will not come out of, in a way, trying to lead, will mainly come, trying to catch up. Trying to outdo each other, with delivery of the direct promises, which will be transparent to all of us.

I warned you, in the past couple of weeks, and we, in a way, informed you. We are just about to break through a massive change, for the knowledge of Humanity. We have reached agreements with World leaders, and it's now in their hand and time to announce it. It's their leadership which has to declare the position, in respect to the new technology and science. In a way, we have to understand, how we'll bring this position through technology. Nothing has to be accepted by word, but by deed. Be it our technology, rollout of the technology, (:20). showing what we say, is what delivers, and in ?? saying, in return, we expect the same from world leaders who sign the papers.

We see the change in a deeper way, in a much, much deeper transparent way. The Keshe Foundation has done its job. We have delivered and we'll deliver. And it's for the Knowledge Seekers to gather the knowledge that when the time comes, they are there to deliver. Gain as much knowledge as you can, and... When the time comes, you become the teachers. The true teachers, but not arrogant teachers. Just because you were there, and you knew a little bit more. Try to be humble to teach, unconditionally. And try to understand, there was a reason that you became Knowledge Seekers, as you searched for the knowledge yourselves. The upcoming new Knowledge Seekers, many of them become Knowledge Seekers, just because it becomes fashionable, not through the understanding the knowledge. It becomes something to be, to be a Keshe Foundation Knowledge Seekers.

We have laid the road and we have established the ways. I have put my signature to World Peace, and we have signed the agreement with one of the leading Nations in the World. It's for you to understand how to lead, (:22). to share and to be equal. Keshe Foundation is about to emerge as one of the leading scientific organizations, with a change in the dimension of technology. And it's the responsibility of Knowledge Seekers, to understand what you learned, what you are about to learn, has to be freely acknowledged and taught to the others, the newcomers. Which they'll come in, in masses. And in that process, try to be humble, does not matter which part of the World you're in. It's the most important part of the process.

I have signed the Keshe Foundation into one of the biggest programs ever Man will know to come. And we have come to sign by the leading Nations on this Planet. We leave it for the leaders to announce the cooperation, then us as the Keshe Foundation to inform you who we are, where we are, and who we have signed into.

In the coming days and weeks, you'll come to understand, the Keshe Foundation and it's work, is based on the true knowledge, and by delivery of technology, and not by talks. It's your responsibility, as KS to deliver what you came here for. And be ready for that change. We see the establishment and colonization of the Space within handful of years. (:24). And this comes because you as KS have been taught in advance, and governments cannot hide. It becomes as part of the establishment of the Peace, and it comes as part of our work, which we promised.

In the coming weeks, as our agreement allows, we'll disclose the details of the agreement with one of the World leading Nations. In a way, we have set the scene, and in a way, it's time for you to deliver. Not for us. I have taught over 10 years, and now it's for you to teach, for rest of your lives. We still, as I said, sell the Gans's, and do the teaching and do the trials. As I keep the Keshe Foundation independent of any national governments and their influence on our work. Even though we go into bed with different ways and conditions with each nation, till in fact we reach our target.

I remember sitting on the table with Dirk Laureyssens, in Antwerp. He said to me, I think one or two people will buy your book. I said, this book will become the cornerstone of the knowledge of Man. And, 20 years down the line, we see the new knowledge has taken shape. And, will take shape in its essence, by the true Knowledge Seekers (KS). I congratulate you, KS in what you have brought, for us to be where we are, as a whole, as a Keshe Foundation, as a center of new knowledge and technology. (:26). I have done my work and I brought Keshe Foundation to the highest level, with one of the most powerful nations on this planet. And the papers have been signed and sealed.

The delivery of the technology and understanding of it, is in essence, in the hand of you Knowledge Seekers, as we try to fine tune the final stages of the development. As we agreed, we let you know, that a new phase in World Peace has started. And we are about to deliver technologies which has never been seen, and in that process we'll bring the change. For those of you who understand, the change will be drastic. And many of you, as I said last week, will tell your grandchildren, I was there. I'm one of the original Knowledge Seekers. The enlightenment of the Soul comes from the true knowledge of existence, and not by arrogance of the knowledge of physicality. I congratulate all of you, in keeping the Keshe Foundation so up-front, so, across this planet, in different ways effective, and to be seen, that it has allowed us to bring the change in.

We don't stop, just because we have signed the paper. We start and deliver, technologies unseen, because we have signed the paper. Every effort by every Knowledge Seekers has to be made, that the knowledge becomes abundant and in the reach of everyone. (:28). Does not matter the race, the color, the creed and which part of the Universe you come. It's a commitment to the Soul and not to the dimension of physicality (P).

The teaching of today is in much more detail than just achieving. The first, what we call, stepping stone towards World Peace. Towards educating now the World leaders, that the knowledge and the technology is not exclusivity of a nation, but the whole of Humanity. This is the worst part. Teaching you as Knowledge Seekers was easy. Getting the World leaders to agree to equality is another "ball game," and we are master at it. We shove and we push, but at the end we know, the "golden promise" of the Peace will come. We'll see the end of what we call, "shuttle diplomacy." We'll see the end of wars. Not because we don't want to fight, because the fighting, and transporting and bringing people to one position, it'll become so easy, that is no need to do.

There is new technologies, which will be released by Keshe Foundation, as we approach, as we reach Peace and Equality between nations. Knowledge which has never been open to Humanity. But, we still do the trials, we'll still ask you to join this, and to do this and that, because, as usual, we have to keep you busy on this floating ship of the planet Earth. The ship will not stop floating, and 8 billion has to be kept busy.

One day this, and one day that. (:30). But at the end, we foresee before end of this century, and what we call, "lack of population" on this Planet. Where many of the citizens of this Planet, will take and become traveler

of the Universe. Maybe, 1 to 2 billion, will be the maximum population of this Planet. Depletion of population will be so drastic, that the Nations will organize themselves, to hold on to the basic, what we call, needs, of, what we call, those who stay behind. The needs will not be for energy of food, the need will be to have the pleasure that for those who are in Space, can come back to what they call, home.

As I said to one of the Knowledge Seekers today, the biggest prize of this technology is its tourism, and not its energy and gold. Where we have the travelers of the Universe to show to, and where we become travelers of Universe to see. This is where the joy will come. Where, in a way, we don't have to worry for daily bread, we don't have to worry for daily needs, as all will be provided. In one way or another, through the STM.

In the coming days, Keshe Foundation will open new doors of knowledge. Knowledge which has never been known, and knowledge which will become part of the essential use to survive in the depth of the Space. How we handle the new knowledge, will be how we decide to transmute. (:32). Do we, or would we like to transmute with the speed of Uranium, or would we like to transmute in the dimension of Helium? In a way, Man will choose different methods of travel, depending how we want to travel. Which position in the Universe we want to be, and which position in the Unicose we want to be. In so many ways, Mankind will come to be educated in different knowledge, in different understanding of the Space Technology.

In the coming time, we'll learn how to ?? show ?? mixture of fields of the Universe, to travel into different Universes. The technology has already been written in Book number 3, but Man is not wise enough to understand it. If you read the Book 3, you'll understand, the Space travel, to travel the span of the Unicose, is already been taught. If you read other chapters of the Book number one, you will understand how to manifest yourself on arrival, in the dimension of the energies of the Universe, in the dimension of physicality.

If you read Book number two, and you understand it in totality, then you will come to understand, that you already have been told how to travel the span of the Universe. To what speed and to what dimension. In what way, and in what form. (:34). Mankind needs to learn how to mix a composition of the field strength that carries the dimension of the strength of the STP, and dimension of the STM. As each one, even though interconnected, travel in different strength, in different dimensions. It's no good that your Soul arrives, and your STP is still tailing by a thousand years.

These are the technologies which Man will understand, will come to be educated in. It's no good arriving at the airport when the suitcase is still where you left. And these are part of the knowledge in the upcoming time, as we agreed and reach World Peace, we start teaching. As we expect and we see millions of people on this planet, will take and will move. Are our governments ready for such a huge move? This is why we talk to governments, to prepare them for that change. To prepare them for what it is to come. And to prepare them, what and how they have to consider the upcoming time.

We need to understand, as you Knowledge Seekers will gradually become part of the structure of the future, how to organize things, that you as Knowledge Seekers, and those who become the traveler of the Universe, do not get stuck in one position or another due to the lack of the knowledge of the operation of the Universe.

Many of you will be taught how to transmute through the dimension of the thoughts. (:36). How to transmute through the dimension of understanding of the Soul. Up to now, we have brought you to the first level. Just about to understand where the Soul is and how the Soul is. And then to understand how even as last week and the week before, you get rid of your addiction. As I said, this was not just for addiction to alcohol, or cigarette, or whatever. It was to addiction to kill. Addiction to destroy. Addiction to take, for you

to evolve, to live. This is the worst addiction that we are looking. This addiction in some Souls has reached the dimension of the Soul, and needs to be eradicated.

In this process, Mankind will learn that in the process of understanding the Totality, Mankind has missed one essential point, and that is, he is in charge, he is in control of every dimension. He does not need intermediaries, does not need somebody to teach it, because he feels, he works by the dimension of the emotion, which is the interaction between the energies of the STM, and the energies of the STP of the Man.

In the upcoming time, as we learn to become the travelers of the Universe, Mankind becomes in dimension of understanding the Totality of the energies of the Universe. We'll teach you how to develop a system through the operation and interaction of your Soul and STP, (:38). that you don't need machinery. Unfortunately, the petrol engine on another planet does not exist, because the steel in that position is just in the form of a gas. But, the STM, and the STP of the Man, exists and they shall exist in all dimensions of the Universe and the Unicose. Because they have one basic common denominator, from the Essence of the Creator. Common base denominator of the energy, that the whole of the Universe is built upon.

Then one understands, one does not need how to pilot, but one needs to understand how to interact. How to create interaction between the STP and STM. In a way, we do this in the womb of the mother. When the STM is created, in interaction with the STP, that is where the outside embryo is created, then we decide how to shape, what color to be, what shape of the skin to take, from the energies from inside the womb of the mother, which was guided by the egg and the sperm. The scientists in the embryonic tests will find out, if they put the same egg and a sperm fetus in two different wombs, they'll get two different creatures. Man has not reached that point to understand this.

Then, you'll find out the energy of the environment, interaction of the STP and the STM, (:40). will dictate condition of manifestation. If you take the same egg and the sperm, and put it in the womb of one mother, and then, if you could have replicate the same, exactly the same, and put it in the womb of another mother, you will find out, you'll get two different creatures. You'll get two totally different manifestation, even though it's the same embryo.

Then you understand, how Man will manifest itself in different dimensions, according to the field strength of his environment. Then you understand how Man will understand the Totality of the Existence. Knowledge of the Space Technology is the knowledge of the Creation. You have to understand the patterns. You have to understand the way the interaction of the fields works, not how one coil is left handed or right handed.

As I said, many times, what would you do when you manifest in a dimension that to you is unknown, but you come across middle of different creatures which you have never seen? The interesting thing is, as we see with the men of different dimensions, which are guests of us on this planet, they have learned to look like us. Look like Humans, speak like Humans, and even they learn languages like Human. (:42). What language and what shape would you take when you arrive? Or, do you ask somebody teach you a language? Do you tap in the essence of the knowledge of the Creation of the dimension? Or, do you try to be the outsider and try to hide, or duck, or pretend that I'm not here?

These things are on the horizon. It's not something that'll come to your children or your grandchildren. It's on the plate, and is with you, and it sits right across the table, of the knowledge of the Man. From today on, and from now on, the process of the teaching will change. As we prepare Knowledge Seekers and the rest of the Humanity for World Peace. We have taken a step, and to that effect in the coming weeks and months, we

push that the World leaders understand, the knowledge of the Keshe Foundation is on the table for every Nation.

The biggest problem for us, was to get the first nation to agree with. And now, our job is easy. As we have signed ourselves Peace with one of the most leading nations in the World. Now we develop the stage for the World Peace, and with it, we have to show what's the difference. How we evolve, how we can supply food and energy, without dependence on killing. And then the progress of the development of the Man, will come into operation. Many of you find out you speak languages you never spoken before. Many of you find out you change color of skin, just by intention, as you change the womb of the mother. (:44).

In the upcoming time, we open the books of the Keshe Foundation. And thanks to many Knowledge Seekers, where we are today, it's been by hard work of many of you over the past years. Each one of us has put one brick into the wall of Peace. And step by step, we have built that Peace. Have built that knowledge base, that the World leaders consider it to be worthy, to be part of.

When the travels of the Man into Space, you will learn something very deep. And that, is the depth of the Knowledge of the Universe. How much, how far you can go, depends on how much you come to understand the work, and the emotion of the Universe. With the present knowledge of Man, he can go with a plane, or a car, or a donkey, as long as there is enough food for the donkey to eat, there is fuel in the tank of the car, or there is enough jet fuel in the plane to go as far as it has to land. Because, (that is) as far as it can go. With the new knowledge of understanding, you go as far as you can, according to understanding of the knowledge of the emotion of the time, place, and the position.

So, in a way, your emotion creates that dimension of the travel. Your emotion creates that dimension of understanding, where to be and how to be, and what wants to be. Then, you'll find out, as much as you can tap into the energy of Universe, there is no limitation for Man to reach any corner of the Universe. The limitation is understanding the strength of the emotion, and the condition of the manifestation. (:46). It's no use going to London, when you are homesick for New York. It'll be the same. The emotion has to be balanced, and the emotion, the strength of the emotion, which is the interaction of the fields of the STM and the STP of the Man, will dictate how far you, as a being, will travel the depth of the Universe. And how much you are prepared to learn, and how much you are aware of your position, condition, and the environment.

Try to go back to the teaching. Go back to the MaGrav technology we taught you so much. And go back to all we said. Don't look at the MaGrav as a blue box from Keshe Foundation. Look at the MaGrav as the energy fields which creates. Count every turn (of the coils) in the MaGrav box. Then, go by order of magnitude, then you understand how deep is the energy fields of a MaGrav, which we have taught you. And to what strength will take you. If you can replicate in understanding the energy fields of a MaGrav within the interaction of the STP of the Man and the STM. Then you understand, we have a given you a limitless access to the whole of the Universe and Unicose. Don't look at the turns, look at how that turn interacts with the turn before, the turn after, the turn above or the turn within. (:48). And then, all that with a turn with the coil below, and a coil within the one below, and the one below it, which is another coil within it.

If you understand the composition of the interaction of the fields, you'll find out the MaGrav system, which we have taught you, creates more or less all the energy fields, dimension interaction of the STM, one needs to travel the depth of the Unicose, let alone the Universe. You have to remember, even one turn of the coil, has 360 degrees of, has 360 combination of field strength in respect to the inner and outer. Man will take

centuries to understand the combination and the Totality of the fields which we brought in, with what you call, “the simple MaGrav”.

In a way, if you understood, MaGrav is the backbone of the three Books. Physicality, traveling to take the dimension of fields of the ?? other, in the dimension of the Soul. The ring in the middle core, never comes in touch with the ring above outer core. But in field they interact. In Soul they will be, but in physicality it's separate. Now you understand, more and more, and we open this topic, and this knowledge gradually back to you, to understand the Totality.

We'll take a break and we come back. And then we go more in depth, trying to understand in the coming weeks, months, (:50). how you as Knowledge Seekers have to, you have no choice, to live, to perform, and to teach. Thank you very much Rick, if you want to take us for a break.

<< **BREAK** >>>> 485 KSW May 11, 2023 (:59).

K- Yes, in technology development, as you know our doctors are working on different aspects of the technology, what we call, development, understanding and how it works. In a recent past, they've come with new understanding and new dimension, and we would like to increase this very rapidly. And for this we're calling on 2, what we call, trial sessions, that we launch today. One of these trial sessions done by the doctors, who will be taken up as of now, is, many of us, we have had problems, and many for decades, have been test by many dentists. And we use the technology to change the situation, the way the gums, with the tooth, with growth of the tooth, whatever. And, the trials our doctors have done, shows we can interfere. This time, what we're calling, is a limited number of the Knowledge Seekers, with what we call, (1:00). dental problems or dental conditions on a trial. They can approach their doctors and go through this, what we call, limited trial numbers, that will be accepted by them to look, to, in a way, complete or start a new cycle of the evaluation, and in a way, development of the dental positions and whatever we have. This part will be handled by the dentists of the Keshe Foundation and they will see through it, using the new Plasma Technology, which is supporting their work. We have put, to cover the cost, the very basic cost of this for 2,400 (Euros), that it has to go through, as donation to the, what we call, the Keshe Foundation. Any dental condition will be looked into by them, and as usual, you write at health@spaceshipinstitute.org and we forward it to the dentist, and if they accept, take the case out, you, more or less, can join in to see what changes it comes.

This is part of our work in two directions. First of all, what will happen to our Space travelers, if they have a problem with their tooth? How can we reach? We tried everything else. And how can we change? What do

we need to do to know that we can change? You are in London and you go to New York and you have a toothache. You're looking for a dentist. (1:02). You go to the App, which is to do with the dental section of the, what we call, wellness centers of the knowledge of the Keshe Foundation, and you just log in with so many sessions. What will happen, would you get rid of the tooth? We are looking in growing tooth, with the knowledge, because we've seen, it can be done. Some people ask us, can you grow a tooth which is pulled out? It's for the dentists to try. The process, the knowledge has been established, after years of pushing us to do, now we think the doctors have that knowledge, using the Plasma Technology to do. There is a limited number of places available for this, very limited. So, if you want to join in, for complicated cases, I'm sure the doctors will refuse. We are looking at conditions that we can support with our system, our dentists and to go through it. Dr Bararpour in Iran is one of the dentists, so we have as you know, well known doctors of the Keshe Foundation, Azar, and the others will be in the backbone of the, what we call, the dentists or other dentists in the Keshe Foundation.

We look after these cases. And we build it up to the point and the position, that we can see how we can bring, as part of the insurance policies that which is been offered by the Keshe Foundation, that we bring the dental work into the situation. This is the, what we call, voluntary trial of the technology for dental condition. So, if you have such a condition, send the message to [info@...](mailto:info@spaceshipinstitute.org) sorry, health@spaceshipinstitute.org and you get a response to, if you, or you can talk to our dentists, and they decide they can use the technology. (1:04). Very limited numbers has been allocated to this space for our systems.

The other trial which we have now, we launched today, is for a larger number. One of the biggest menace in the life of the Man, is a change in pH of the body of the Man. If you go below certain pH level, doctors tell us, scientists tell us, leads to creation of separate and different conditions. We have tested, and now with certainty, with more confidence, we would like to test a large number of Knowledge Seekers. Who their condition is, or, and be, or, is dependent on the pH of the body. Or, if you want to prevent the change of the pH, that it goes below 7.

This is a two week trial. So, every day for two weeks, you have to measure your pH, before you start, and then see how much your pH goes up. And we know, for some cases, if we can keep the pH over seven, seven and a half, for over 14 days, 21 days, body can pick up and maintain that. This is important for certain conditions, which many of you know. And this trial we established as of today. Again, the same way, limited numbers. If you want to prevent future conditions which change in pH can create, or you want just to guarantee safety or whatever, you join this trial and make sure you have access to measure your pH, every day, before and after the session. (1:06).

You're allowed one hour per day, five days a week, not seven days a week. It's important to allow the body to rest, maybe three days, one day rest, two days, one day rest. And then, we'll see how this will come up. If what we've seen to be established, we can, as part of prevention plan of the Keshe Foundation, force, as part of the policy we offer, that every Knowledge Seeker has to take a 10 day course prior to signing in. In a way we set the scene for prevention of the, what we call, in the future, will metastasize and the rest of it.

So, we open two trials with our doctors. For both you write to health@spaceshipinstitute.org, it will be passed on to the doctors. And, we have asked and we want our doctors just to accept the cases of pH directly, irrespective of the condition. And, if you see any change is positive in your condition, due which comes through changes in pH, you let us know. We can extend it further for you, with consideration of what could be, and what expenses sits with the Foundation. In this side, we only accept a hundred cases, no more. And, more or less, all of you need it. But, who comes first, will be served first. And there is no condition. You

have diagnosed with whatever, is metastasized, is shown itself somewhere, you think you might have, or you want to prevent to have conditions in the future, which is affected by pH of the body. (1:08). Then you can reach out, and you go through the Keshe Foundation doctors, and you'll be accepted unconditionally, we don't look at the condition.

We are all interested to see, through the new technology, from a distance, we can change our pH, which we've seen we have, can be done by our doctors. This become important for us, in the future, policies which we offer, part of the prevention, which means, once you're scanned, screened, you have to join a two week session, as part of screening. Make sure in the future, you do not get the conditions, which then cannot be handled. This will become important for you in an upcoming time.

As we say, as the time comes, there'll be no health conditions to force the governments to keep such a expensive health organizations around the World. One of the biggest burden on the nations is the health programs. Now we have the understanding of it, but we want to confirm it. A 100 cases are allocated and more or less, all of you need this. And some of you could have conditions, diagnosed with conditions, but in a way we want to see if we can prevent it. And every month you send a message back to us, what is your pH? We want to see, it keeps the consistency above 7 - 7.5. If you already have a condition below 7, then you still can see, if this condition can go on. (1:10). (I have to ask, Salomea, we'll block you from the chat. If you carry on with this behavior. Sorry about that).

We have to understand, we have to understand, that if we manage to get these two done, we go to the next trial series of the Keshe Foundation. We go into understanding as we offered a bigger structure of the, what we call, looking after people. And this time, we'll go hopefully in conjunction with government. Which means as part of the National Health of the systems, the governments will offer these technologies. And this will allow us to bring a new dimension.

A limited number of trials available for our dentistry side, and maximum a 100 on our, what we call, pH side. Comes first, serves first, and when we get to our limit we stop. Because, we have to organize the systems to be... You'll be given a certain times of the day you can log in, or the two days that you cannot log in. And this allows us to evaluate, and then as a data collected, to publish for the governments and the health authorities to understand, how remotely the pH can be controlled, and most probably we eradicate cancer. Once the government understand the process, and we can prove, show it. We allow officials from the governments to monitor this trial.

Tomorrow at 12 o'clock Central European time, is the final session of Addiction. (1:12). And, this is important to us again, if you are one of those who has been through this last two sessions, and you're joining us for the last session, the third session tomorrow. The third session tomorrow will be short, beginning, and then we go for the testimonials. Please write your testimonials today to info@keshe.foundation. We have received some testimonials and somehow some of you have lost your habits or addictions. Very interesting, addictions we never knew existed.

And, if the Knowledge Seekers allow, who have sent us these, what I call, wonderful addictions they got rid of, we read it for you. It's very, very interesting, how we are addicted to things we could never imagine what we could be addicted to. No names will be mentioned, and will kept absolute, absolutely discreet. But, it's interesting how some of you have written to us, the addictions you had and you got rid of. Or, you don't have a feel for it.

These trials, these sessions, brings a lot of knowledge to us. That, in the upcoming time, with what we agreed with the governments, will become knowledge of Nations. We pass our knowledge, what we gain, to the scientists of the governments, to develop further, for a Nation to benefit by it. This is the beauty of how, as a Knowledge Seekers, we work.

As many of you know, the May and June session, has been assigned for child abuse. (1:14). For the way you elevated the Soul of the World leaders, and today we sit and we gave you the news for it. Now we need to reach to the other side, elevate the Soul of those who have suffered, and suffered through this process. And then the next month, to change those who bring that suffering, to those who suffer. The child abuse is a pattern which has to be curved, the same as wars. And join us in the May session to bring this about, beginning of. And you will see the effect of it. You elevated the Soul of the World leaders. You brought yourself to be in the position to bring the World leaders to understand the beginning of the World Peace and change of technology. And we have assigned that to it, in less than three months. Now is the next step. Join us, sign into it, and we bring the change. I thank all of you for all the support you have given us, and positions you have allowed us to open for the change.

If there are any questions, we answer.

Q: .. We know that our Souls are eternal, and even though we are in children's bodies, we carry in our RNA and DNA behavior patterns that can keep our Souls imprisoned, (1:16). reproducing what they expect from us like a vicious circle. Because of this, the families end up contributing for the children to remain in certain emotional addictions. How can we contribute so that the Souls of the children of this planet are freed from the addictions that can lead them either to the position of victim or of abuser?

K- The answer to this is the strengthening the Soul. That no one becomes that victim. When we used to run the sessions in Ninove, in Linz, I explained this many times to people. When you get people of, for example, Fibromyalgia, they are the best example of it. Fibromyalgia comes from abuse, before puberty. Doesn't matter if it's sexual, it's physical, psychological, or combination of.

And, we see extensive Fibromyalgia, mainly majority with women, who being abused, emotionally, by their mother. Not necessarily sexually. And, when they walk in, before even they sit to say what they have as a problem, (1:18). you recognize it, it's like "black and white" written in the sky. They're bent forward, their shoulders is folded in, like a, when you pull a ball before you shoot. The shoulders are folded in, the head is down, the walking is not a strength, it's just dragging itself in, and it's written on the wall, "Fibromyalgia."

When you see this, you ask a question. What's the condition? They tell you, I suffer from Fibromyalgia. For 20 years, for 30 years, I cannot work more than this. I'm registered as a, what you call, handicap person, or a person who cannot participate in a normal life. Or, I just about managed to live. The first thing you do, or the first thing which we used to do, was to build systems for them, to strengthen the Soul. To strengthen the connection between the STM and the STP. With the breathing systems, with waters that they wash their head, that time to them, it was just the water. But, the waters which was created in the bottles they had to drink or wash their head.

This is exactly what the Enhancement Units (EU) of today are. But in a simpler way, we allow the Soul to expand, to come in touch with the STP. And what we used to do all the time, I used to say, (1:20). if you don't mind, I have to take some pictures, sideways and front, that they could see their posture. And after 3 months, 6 months, they come to see you, they see... you see them, happy people, changed. And, no sign of

Fibromyalgia. And, what we did, was to do exactly what now is done in simpler way in the Head Unit. In what you join us for addiction, and you get.

We expand the Soul, but that time, we could do it very simply, through what we call, the water, and by breathing. Now we know the essence of the breathing is to give the maximum energy to the Soul, feed the Soul. That's why we breathe, that our Soul is just on top of our nostrils, in the back of the throat, when the air turns in, it doesn't matter if you breathe through your mouth or your nose, you energize, you give energy to the physicality of the brain, and to the Soul. And then they change.

But meanwhile, what was the most important thing? You always ask them. Can you tell us if you've been abused? And there's always the story with it. And there is always a story with it. And they just open up. And when they finish, they handle the abuser. Does not matter if the abuser is dead or alive. And the first thing as we know, the Fibromyalgia, it's by the abusive condition, below age of puberty, always tell them. You have to understand, it's not your fault. (1:22). It has not been your fault. You were a child, and you looked up, and the one you looked up to, abused it.

If you understand that it's not your fault, you get to the point that you can cross the line, and live a different life. In 2008, one of our Knowledge Seekers, very early Knowledge Seekers, he's a still a Knowledge Seekers in the background, in Holland. He brought me, by introduction, a lady, in her mid forties, fifties. And she was bent, and he said, this is what, she can't do anything. Speaking to her, I came to understand that the abuse was very early by the mother. That was at 11, she understood, even though the mother was dead. Going through the process, she recovered fully. She used to work two hours a week, and that was more than she could do, just enough to be qualified to get her Social Security at that time. And she needed time to recover from that two hours. We know another Knowledge Seekers in Belgium, who became one of the KS we love, and you know very well, he was suffering with that for 20 years, and he was home bound. And one day near Christmas, I received a call from this lady in Holland. She said, my daughter wants to see you. I said, is there a problem? She said, no, she just wants... there is something she wants to tell you. (1:24). I traveled all the way from West Flanders to Holland, to meet this young lady, from the lady who started living. She actually used to work now, five or six days a week. She could do everything she couldn't do for 20 - 30 years. I met this young girl in university in her early twenties. And I said, how can I help you? She said, I don't need help. I said, why am I here for? She said, I asked my mother to call you, to tell you that for the first time in 20 years in my life, I have a hot food on the table, and I don't need to cook or look after my mother. Now I have a life. And she's living. I can talk to, I can go to a movie too, where all my childhood I was alone.

The abuse of children is by the parents, or by the people around, where they can dominate and abuse, the same. And we have to understand this, that it's not their fault. And once they understand it's not their fault, the abuse stops, (1:26). because they become the abuser of themselves. And this is where you cannot break the circle. It's a vicious circle. When somebody abuses children, makes them to feel it's their fault. That's why they're abusing, I'm beating you because you want me to beat you. I abuse you because you want me to abuse you. And, at childhood we accept, and when we become teenagers, become unacceptable, why don't I do this to others? Or, in turn, they become abusive because that's how they learned.

I've said this story, but it's the reality about another case of child abuse. I used to work with a doctor in Belgium. As you know, we have a certificate from Naturopathica, to give material, as we do today, to the doctors. We have a certificate for it. So, everything goes with the legal frame, where it was not disclosed in the court, where they took us for fun, but now they pay for it.

This doctor said, I cannot ask the lady to come, she doesn't leave the house. You can go and meet her. I went with the doctor. The house was about three, four steps up, in Antwerp. She opened the door, stood in front of me, bent, twisted. I looked at her and I said to her, have you been abused? (1:28). And the lady .. fell flat back on the seat behind her. She said, you're the first person ever tell me and ask me. I said, tell me the story. She has had numerous, if I remember, about 15 - 20 operation on her leg, on hips, and 10 or 15 operation on the right hand. She wanted to cut her right hand, that was her obsessive, the obsession she had. I said, tell me the story, what it is, then I can help you. Or, with the doctor which is with me, we can structure it, that you can walk away from this position. She said, at age of, young age, 7, 8, 9 years old, I was sold by my mother to my grandfather for sex. Because the money my mother borrowed my father, from my grandfather she couldn't pay back. He took me as a sex slave. By age of 11 I had so many abortions. And interesting is, Belgian government did nothing about, how can a young girl get pregnant and have abortion. It's the nature of the nation. I said, what's the hand operation? Is it because you want to cut your hand? She said, yes, because with this hand I had to please him. And, I said, what's the operation, so many operation on legs? She says, if I could keep my legs closed, he wouldn't hold, my legs failed me, that he could rape me every day.

I explained to her, it's not your fault. (1:30). And with the doctor we sat, and we built systems for her, to expand her Soul. Four months later, she moved out of the house. She had three children, all handicapped. Because psychologically she didn't want to give birth to another child, that could be abused like her. And if they were handicapped, nobody could abuse them, to her mentality. Now she lives a normal life. She works, as a social worker. And, she goes out of the house. She lives a normal life. I kept in touch with her, till I escaped from Belgium from the hand of the same people.

In a way, we didn't do anything. Understanding the power of the Soul, we expanded the Soul. The Soul understanding the work of the physicality, it became strong enough to understand the emotion of abuse.

Even though we blocked all our connections with the Belgium, this lady comes among some of you Knowledge Seekers in the teaching. I still see her in the background. The reason we can change, is that we can elevate the Soul, (1:32). to understand the weakness of the physicality. And one of the first thing you teach a child who's abused, is that, it's not your fault. And, if they accept that position, you are 99% across the line of the abuse. They will not allow the abuse to take place.

This is the reason we put the May session and the June session as part of this. We can't have a generation of children who are abused, in the next generation of Knowledge Seekers. Where they'll come up, the wrong way. And it's our job to put right. We managed to put the Soul of the World leaders in the right position. Children should not be that hard. So, when you speak about abuse, with the children and youngsters, you have to understand, it's not their fault. And if they understand that, then all you need to do is to elevate the Soul. And the Soul will repair the physicality. This is what we say, if you learn to feed the Soul, the Soul will feed the physicality. Now you understand how it's connected.

Any other question?

Q: .. Will the next sessions that will deal with children, also deal with the subject of how parents should raise their children, or will this subject be dealt with in an exclusive session? (1:34).

K- It's part of the teaching we have to teach. Because, most of the time the parents are the abusers, without them knowing. And, it comes, sometimes through unknown ways. We live with them, but we don't see them being abused.

And, I've been in that position with my children. Their nannies and the people we trusted to bring them up, were abusing psychologically, and when we got rid of them, they opened their mouth, what they did to them. So, in a way, we have to understand this position. That, sometimes people we trust to look after our children, are the abusers in hiding, most of the time.

And sometimes, we get people who are abusive, use places to bring children to abuse. This is the worst part. Where children would bring other children to be abused, and they are part of the organization. And in a way they get rewarded by more abuse themselves. This is very common in Belgium. Some of you tell me, how you speak about it. I worked and lived in Belgium for nearly 30 years. Married to one of the most abusive, (1:36). child abuse families, I never knew till my divorce. And I start analyzing how, with all my knowledge, I overlooked such a thing. And always covered up. Always covered up, with different ways and things. The lady was bringing children to be abused, it's in the police report. Part of the gang. And the Keshe Foundation, if you remember, was used the same. We were getting too many pedophiles around us, because the connection was established. The abusers, the abused, they become abuser and supplier.

And this is why we put the June session, to elevate Soul of those who do. We cannot do half-cooked job. We cannot just elevate the Soul of children. We have to elevate the Soul of the abusers, that that cycle stops. If you go to the police station of (name of city), you get the whole file. The whole family has been to prison for abusing children, child trafficking. Even people coming from South America to abuse children in Belgium is ?? there. When we opened the files after the divorce, I was shocked. And well covered.

So, when we put the session, how to do elevation of Soul of the children who abuse, (1:38). we have to elevate the Soul of the abusers, that it doesn't become worse. Because, once you save one, understands one, they go to another child, because they lost their client, they lost their abuse position. This is why we put this as a two session part. And most probably, the elevation of the Soul of the children will go for two, three weeks, not just one session, the way we've done with addiction. You're not here for one show, you're here to bring the change. But the strangest thing is, these abusers make it so normal, that their children become abusers. And it's normality to them.

Any other question?

Q: .. Good morning Mr. Keshe, thank you so much for everything you teach us. My question is, how can MaGrav help us in the transmutation process? And what do we need to do to interact with it in this process?

K- You look at the MaGrav as an entity, we look at the MaGrav as a plasma source. Until you don't understand that, there is no progress. (1:40). I've seen Knowledge Seekers making MaGrav this way, MaGrav that way, I save energy, I've done this. You haven't made the MaGrav to elevate your own Soul. You haven't understood what it is. You're still after peanuts. As I said to one of the powerful men of a nation very recently, you're happy with the crumbs and you're ignoring the cake. You've got to understand, MaGravs are not what you look at. And if you're happy with your saving a few cents on electricity, so be it. It needs maturity of time.

Any other question?

Q: .. Hello Mr. Keshe, in the meetings connecting with the Soul of the Creator, we put the Soul of the Human being over our physical body. All my cells have a different vibrational frequency. Are there other

characteristics by which I can recognize that the Soul of the Human being has placed itself over the physical body? What else can I look for? Many thanks. (1:42).

K - When we put people in the system, when we used to, now, we don't do. And very soon we close the center in Linz, that many of you will not be able to experience this. But some of you who came and experienced this. I've mentioned it before, when people are in the two main systems, they hear us. But when you ask them, what do you see? I couldn't see you, it's blurred. And I explained that before.

So, the expansion of the fields, is in a way, in dynamic interaction with the fields of the systems, creates that mist. You hear, but you cannot see. It's literally like, with these glasses, you press a button and it becomes misty. That's all it is. It creates an interaction of the fields and creates a mist of the vision. And, that we see, very clearly, with many, many Knowledge Seekers. Because, when I used to go to the control room, I used to ask them, can you hear me or do you see me? They say, we can hear you, but we cannot see, it's blurred.

And, this is the expansion of the Soul. This is where we see it. And, there is a way to do it, without actually, quote unquote getting into a system. The new remote headsets, give that capability. And, it brings that functionality into, and when you learn it, you don't use the headset, it's just there, it's not used. Because, then you learn how to do it yourself. It's very much like you, as I always said, when we used to, like these people with the Fibromyalgia used to come to us, with the doctors, I always ask them, what are you come for? (1:44). Sorry, I have a problem, I forgot to drink past two weeks, or I forget to breathe. I said, can you bring the systems back please? They said, why? I said, when you forget, it means you don't need it, the session is over. You have recovered from the condition. When you are not hungry, you don't... doesn't matter how much food is in front of you. And this was one of the signs.

Even today, with Knowledge Seekers, when they tell us, they had, or they don't see any change, we step back, especially with the new system, with the doctors, we tell them to step back for 4 weeks, 6 weeks, and let them to understand the condition. Because they become dependent on the system. So, they develop the condition and trust in their own work.

And, I foresee, with what is about to come in next, maybe in five years or so, very much like a computer games, you have this Head Unit. You'll have the systems which will expand ?? the Soul, or allows you to do the transmutation. It's very much on the card. Very much, very much on this ?? doing way. And then you learn it and then you don't need it. You have a system there, one day you want, you can't do it, then I use the system. Gradually, the Head Units we have put out is in that path. Help you, and then you learn, and then you help yourself.

As I said very recently, I will teach you how to see through your eyes, the dimension of the work of the Soul. Now you only see physicality, but don't forget, at the same time the Soul is busy and uses the same hole. (1:46). The rest of the skull blocks some of the information. So when you look outside, you see two things, one in the dimension of physical, and one in the interaction with the Souls. But Man has chosen to ignore that, and I teach you how to do it, in the coming time. I cannot leave you halfway stranded, but in a way you're not ready yet to go for camping, to get the strength.

Any other question?

I received a message in the background, we have somebody asking question about the two trials. They want to do it. Anyway. You can make a donation to us, to Keshe Foundation, but we pass it on to the what we call,

to the doctors of the Enhancement Centers, which operate through this. And you can just take your place on it, to be part of it.

We have received a massive donation from one of our Knowledge Seekers, that he cannot take place in the, what we call, the 25 people, and then to the 200. And he has donated, as a donation to the Keshe Foundation. And Keshe Foundation has decided one of the most serious members of the Keshe Foundation will be allocated to take that position, donation. We keep it as what we call, confidential. (1:48). But, the donation we received for a place in one of the 25 people for the first cycle will go to one of the Knowledge Seekers, which has been there, and I know he will love to be part of this. But due to location and position, is not financially possible. And the Keshe Foundation has allocated this to one of our Knowledge Seekers. And we're getting a lot of donations like this, people who want to donate things for others to benefit by it. And I thank our Knowledge Seekers for donation, and it'll be used. And I'm sure the Knowledge Seekers which will receive it, to be present in the, in the course of the first 25, will beautifully enjoy their what we call, to attend, and to be part of it, maybe he'll become part of the last 65.

Any other question?

Q: .. Can someone be part of the dental project, if they have, what she calls it, a prosthesis on the teeth? So, I'm assuming either an implant or a...

K- Yes, we would like to try, we would like to see the limitation of it, yes. But that's the decision of the dentists, we provide the knowledge. The dentist will decide.

It will be very interesting, to see the growth of the tooth. This is one of the things. If we, with the new process we developed, (1:50). if the new systems can trigger a tooth which has been, what you call it, taken out. Or we can re-establish nerves into the systems which the nerves has been cut. And these are the things I think our dentists will look into. I've been pushed and shoved for years, if, if the technology can be used for dentists, and I think we have answered the call. When we developed this technology originally about 40 years ago, when I was talking and doing things for development, my sister kept on telling me, grow a tooth, find a way to grow a tooth. Do you know how many people suffer with it? And, maybe now we have reached that point. She's one of the well known dentist in North America. Now, more or less retired now. But when she graduated from University, and she knew what I was doing, she kept on telling me, find a way to grow a tooth, then we don't need to fill it in all the time. This is what we're interested, and to see the limitation. And I do not want to go any further, but the dentist of the Keshe Foundation, they are the decision makers.

But we're very interested in the second trial, the biggest trial, that will change, change into humanity. Where, change of pH. Many people die, every day, because of the pH to be on the wrong side of the 7. And scientifically we have proven, it can be moved above 7 through the new Plasma Technology. (1:52). It's just that if the body can maintain it, it seems to be during the process, the days after, it still holds on. But, if we can maintain it and grow it, then a lot of what we call, problems which sits within the healthcare, will diminish.

Any other question?

Q: .. Could we write letters to the World leaders?

R: And my question I guess would be, are we as Knowledge Seekers still into letter writing, is that going to be effective? Or do we stay more with working on the Soul?

K- You can stay as much physical as you like. The thing is, none of the World leaders ever see your letters. That's for sure. Because there are so many steps before they see your letter. Unless you can shovel it under the pillow to the wife, then she can shovel in on the pillow to the husband, "pillow talk," would you like to do this, it's good for publicity, we better go and see this child.

I tell you that from experience, how many Knowledge Seekers around me know. They told us, you have to write this letter for this President, you have to write this for that world leaders, they have to do this letter for that, and we've done. And we're still waiting after ten years for somebody to do, actually read the letter. The only letter which we saw the direct response back to, (1:54). I think the Knowledge Seeker is still around, he can tell you, he's Iranian. He delivered a letter to the White House, some years ago. And he received a response from President Obama, if I'm correct. And he actually hand delivered it, if I'm correct. There is a copy of it somewhere in the archives of the Keshe Foundation, because he sent me back the response which, the letter he took to the White House.

Try to reach the Soul of the World Leaders and write it with the "pen of the Soul" and not with the ink of a pen. It works much better, we've just seen it. We have seen the change in past weeks. You got to realize when we announce things and you join us and you do it, it's because our Soul is already aware of what is to happen. And we all become part of it, to learn that we can do. It's not coincidental.

We, as I said, just listen to the calls of the two World leaders, (1:56). both speak in their, and their ministers, and their cabinets, speak about new technology, which will bring the change. Listen to inauguration of the Biden, and listen to the speeches of the Chinese government since March conference (March Session elevating World Leaders). We'll see which one will jump, and we'll see, which one will deliver.

Any other question?

Q: .. Hello Rick and Mr. Keshe, what combination of Carbon and Nitrogen is suitable for sitting in the center of the middle coils in a MaGrav?

K- What?

R: .. I'm not sure. Carbon and Nitrogen. What combination of Carbon and Nitrogen is suitable for .. .

K- For what job? For what purpose?

R: Well, the center of the middle coils in the MaGrav, but...

K- Yeah, for what purpose? What's the purpose? You're the practical man of the workshops. Have you ever heard this one?

R: I've allowed him to talk, perhaps he has ... perhaps he can say something personally, to clarify.. (1:58). I don't see a microphone available there. So, even though the talking is permitted, I'm not sure if he's able to speak right now. ... Maybe you can clarify in the chat..

K- Oh, it's Dr Bararpour.

R: Yes, I should have addressed him that way, I guess.

K- Dr. Bararpour is the head of the medical section of the Keshe Foundation. And we put everything out through him. But I'm going to ask him what he means and then I'll come back to you next time.

R: Yeah, I'm sure he has something special in mind there, so ...

Q: .. My father did that when I was a kid, and I still feel everything I did is wrong, it affects my whole life.

K- Tell yourself, it wasn't my fault.

R: Yeah, that seems to be the key, you mentioned that a few times, that realization that people have that, oh, it's not my fault.

K- You see, parents come with different problems, and child, children are usually the scapegoat for it. They don't like their mother, they hit at the daughter. Because, it's the way they tend, they can take their revenge. They don't like the boss in the office. (2:00). The boss ?? assistant, they come home and deliver it to the son. Because now they can channel that and it's out of the system.

There is a, what I call, the mystery of the door frame. Men, or most of the time the breadwinner of the house, could be a minister, could be a cleaner, could be a teacher, could be a world leader. Before they put the key into the key door of the house, they are everything. They're the world leaders, they understand everything, they have people who march for them. When they cross that threshold of the frame of the house, to their wife, they know nothing, they are ignorant of everything, and they don't understand. They rule on one side of the door, and on the other side, there is everything wrong with them. Because the wife has already got a problem, which accepting she knows nothing, and it's the only way of a power play. So, a father or mother, when becomes to that position, delivers that, what he does outside, onto the children. To bypass the humiliation of the partner. And this is where most of the abuse comes in.

If we teach, as part of the teaching of our school time, to treat your partner equal, with respect, with this and that, you won't get that when you come home, and you solve half of the abuse in the house of the children. (2:02). Or, they bring the abuse done to them outside, into the house. And this is part of the elevation of the Soul. And this is part of the structure. And you find out, the mother, most of the cases, humiliates the father. You see this, you are that, you see this, you don't know that. Because, she hasn't learned she's an equal partner. And she sees the husband as something that has to be humiliated, to justify to the children, I have a position of power, doesn't matter if he is a Minister or President, or a street cleaner. And, this is part of the, what we see, the process of abuse. And this goes through the same in many, many abuses.

And I have years of experience watching this, when we were developing the technology from base. Because the systems were authorized by Naturopathica of the Belgium, to be built, so with doctors we are looking at, how we can change characteristics, how we can change things, how people are affected by evolution of the emotion.

We did a test once, where we had an old couple, both could not do much, very, very, always tired, in their seventies, life was just a struggle, and just to live day by day. (2:04). Wealthy, but they couldn't do anything. They came to us and I built a system for both of them. Each one has his own system. They start sporting, they start going shopping together, life starts (to be) so fantastic, they were so happy, because we changed the Soul, we elevated the Soul. They kept coming every two or three months, and I corresponded with their doctors. And, they were so happy, everything was so fine. I said to them one day, I want to do a test, do you mind? They said, no problem. I said, I want to give your cup to her, and her cup to you. And see what emotion will create, what will be the condition, how you will feel. And, I said this before, the husband got

sick, and the wife was the same, but wife adapted because she was always the care (giver), as she looked at him as a child, ?? and know what has to be handled.

It was very interesting to understand, how we position ourselves psychologically through our emotion. Why should I, me as a man, use a system which is used by a woman, am I a woman? And then all the thing which goes with it, and vice versa. Now I'm ?? using cup of a man, now I'm the man of the house. And then we understand a lot about the emotion and the interaction of the fields.

When we developed these Enhancement Unit, it wasn't just done, just for a sake of doing something. It's done with years of experience, every position, every nudge, everything is calculated. And then you understand, the elevation of the Soul, how important is in any condition. (2:06). And how we evolve in that position, and how we accept the dimension of physicality within that evolution.

Any other question?

I have a message again coming from the Knowledge Seekers regarding this trial with the pH. If you want to join in, just sign in as usual, there is no advertising for it anywhere. It's a trial which is done by the doctors. They say, can we send the funds directly to us? We'll transfer it back to the Wellness Center with the doctors. They'll get in touch with you and they set everything up. You can do that if you want, there is no problem. You have to understand this is a trial for us, for... but it's a confirmation of the technology which is there and it can help a lot of you. And to understand a lot of thing about your own physiology. And the same with the dentist. There is a 2,000 plus the VAT, which is 2,400 is going to be paid and they issue the invoices.

<< Speaks in Farsi Language >> (2:08).

K- Dr. Bararpour has raised (a question), he keeps on, keeps on getting disconnected. What he's asking, he says, in the MaGrav, if you look at it as a structure of the body of the Man, you can put CO₂ on the top, Hydrogen and Nitrogen in the middle, and CH₃ at the bottom, sorry Carbon and Nitrogen. (2:10). Where the Carbon stays as a common denominator between the three levels. He says, can this be done, where the top will be connection to Man, the gravity, and the bottom is the energy, and the middle is for connection to physicality? And he's asking, can this be done? Our answer is, yes, you can do so. And, you can see how you'll find the response to it, as an energy source and elevation of the, what we call, energy of the body of the Man.

I see you have posted something here. There is the meeting for elevating the Soul of the children, which you can link and book. Please remember one thing very clearly. If you are outside EU you can only send funds to the link which will be sent to you. If you are inside EU and you want to send funds to the Holland account, it'll be accepted. If you are from outside EU, it'll be returned back to you. So, if you've been sending donations on a regular basis from outside EU, please get in touch with Keshe Foundation, they give you the new accounts, where you can send the donations. And, if you are inside EU, you can still carry on with the same way, even for registration in these two trials, it's the same. But, all the payments regarding the trials, (2:12). has to go through health@spaceshipinstitute.org through the medical doctors, and then they connect you to the Keshe Foundation systems, they are in operation.

Any other question?

R: Just putting up a picture I just received from Dr. Bararpour?

K- Yep. He puts as a Carbon, as a CO₂ on top, and C and N for the middle, and CH₃ for the bottom. In a way, he is establishing an amino acid link. And, as I said, if you take the ingredient of it, that the heaviest has to be at the bottom, and the lightest on the top, as you feed up to elevate. This has a reverse condition, your CO₂ has to change with the position of the CH₃.

Any other question?

R: So the use of this would be for medical purposes then? Is that the idea?

K- Not really. I don't know what Dr. Bararpour has in mind. We'll find out soon.

R: Ok.

K- He's a man of medicine. He'll tell us what it is, once we can get him online. (2:14).

Any other questions, or shall we come to an end?

Q: .. Hello Mr. Keshe, there's a teaching last night, and part of the teaching was about the One Cup One Life, when the cups were created. I had a thought to put one drop of each cup into the other cups to connect. It was beautiful to see the STP connecting the plasma of themselves on a Soul level with the cups, and all the intentions created.

R: Okay, it's just a message from Dean more or less. Thank you Dean. I think you've covered things Mr. Keshe.

K- .. Let's see how we go and how far we can extend the knowledge next time. And we'll see. Join us in next week. And join us in the elevation of Soul of the children. They are the future of us and we need to have at least support to have a perfect Soul.

R: Let me just mention before we wrap up here, our background image today is from Brigitte and it has some meaning. ... You can see the little frog here in the lower right part of the picture. He's on a stick. Well that stick wasn't naturally part of the scene. She actually put that stick there, to allow the frog ... the possibility of some freedom, because basically he was stuck in, in this environment, (2:16). concrete, you know, a reservoir. And it sort of reminded me of how we're stuck with our addictions and habits. And sometimes it takes an outside intervention, whether it's our own Soul, or some other Souls that are sort of offering a hand to help us get out of our situation and to become free in a way. So, it has some meaning and it's interesting that it's there. Anyway, thank you very much Mr. Keshe for today's teaching.

K- And let's see how we go to the next step. Hopefully we'll have some more teaching next week, and we'll learn more from each other. Thank you very much for today Rick, and all the Knowledge Seekers.

R: Okay, thank you. Let me look at my calendar for our next event, which will be on Tuesday, May 16th. That will be the One Nation, One Planet, One Race for World Peace and Justice. That starts at the 4 PM Central European, summer time. People are welcome to attend with members of the Universal Council and work on Soul level and not teaching. Okay, I think that's it for now and...

K- Don't forget tomorrow at 12 o'clock for those who are participating in the Addiction session. I'm sure it'll be a very interesting part. (2:18).

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you as usual. Wherever, wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute. As usual, we welcome you back. And hopefully as usual, we learn a little bit, and we add a little bit to the knowledge of understanding our own Creation.

Today, if you're a Christian is a special day, today is the ascension of Christ. Today is when was said, that he left, and wherever he's gone to, or wherever he'll be going to. I asked Rick to prepare, or show us what it means in the world of Christianity, by the word of "ascension." If we can understand the terminology of it, maybe we can add to it and understand it more. And find out how the word has been abused by clergy. Would you like to read it, please? What it means how it's interpreted. (:18).

R: Okay, from our handy Wikipedia. It's called the Feast of the Ascension. And so from Wikipedia it says,

The Solemnity of the Ascension of Jesus Christ, also called Ascension Day, Ascension Thursday, or sometimes Holy Thursday, commemorates the Christian belief of the bodily Ascension of Jesus into Heaven. It is one of the ecumenical (shared by multiple denominations) feasts of Christian churches, ranking with the feasts of the Passion and Pentecost. Following the account of Acts 1:3 that the risen Jesus appeared for 40 days prior to his Ascension, Ascension Day is traditionally celebrated on a Thursday, the fortieth day of Easter, although some Christian denominations have moved the observance to the following Sunday, sometimes called Ascension Sunday. The day of observance varies by ecclesiastical province in many Christian denominations, as with Methodists and Catholics, for example.

"Ascensiontide" refers to the ten day period between the Feast of the Ascension and the Feast of Pentecost. The Sunday within that period may be referred to as the Seventh Sunday of Easter or the Sunday in Ascensiontide.

In the history, the observance of this feast is of great antiquity. Eusebius seems to hint at the celebration of it in the 4th century. At the beginning of the 5th century, (:20). Augustine of Hippo says that it is of Apostolic origin, and he speaks of it in a way that shows it was the universal observance of the Catholic Church long before his time. Frequent mention of it is made in the writings of John Chrysostom, Gregory of Nyssa, and in the Constitution of the Apostles. The Pilgrimage of Aethria speaks of the vigil of this feast and of the feast itself, as they were kept in the church built over the grotto in Bethlehem in which Christ is traditionally

regarded as having been born. It may be that prior to the 5th century the event narrated in the Gospels was commemorated in conjunction with the feast of Easter or Pentecost. Some believe that the much-disputed forty-third decree of the Synod of Elvira (c. 300) condemning the practice of observing a feast on the fortieth day after Easter and neglecting to keep Pentecost on the fiftieth day, implies that the proper usage of the time was to commemorate the Ascension along with Pentecost. Representations of the mystery are found in diptychs and frescoes dating as early as the 5th century. Hymns for this feast are found in the Georgian Chant book of Jerusalem, which contains material composed during the 5th century

K- Thank you very much. We'll see even an ascension of a prophet has his own dispute. Man cannot agree on their own prophet. When the soul of the Christ ascends. But what does essential mean? The first meaning of it came in the first few lines, if you go back to it. (:22). It says, today, when the Soul of Christ more or less, went to heaven.

There is a very big question mark, with a present knowledge and technology (T) we have in understanding of the work of the Soul, understanding the work of the Universe (U). And that's the big question, where is heaven? Is there a heaven? Or is the Heaven is for all of us when we die we all ascend. When we die, we all have a Soul, which is freed from the shackles of physicality (P) and will take its position according to its strength somewhere in the Universe. As a dust, as a beginning, as a starter, and maybe as a small planet if its gathered enough, that in explosion of the time and place, that it will create its own Dominion in the first instant.

So first of all, does ascension has any more meaning in the knowledge that we have? Or do we all ascend at the point of separation? And the second point is the Heaven. Where does. Where does this place is? Does it exist? Or is our freedom, which is heavenly, from the shackles of physicality?

In so many ways, once we become knowledgeable in the Knowledge of the Creation, a lot of these rhetoric's become meaningless. So when a man dies, where does his Soul go? (:24). Heaven must be a very, very large place. And, according to the other side, the hell must be bigger, because we are all sinners. Or does it mean that the body of the man in separating from the Soul of the Man (STM) allows the man to take position according to his conduct and what has gathered during the cycle of life on this planet?

How many lives have we consumed? And how many lives have we taken to add to it? Are we a collector of different Souls, of the seeds, the animals, the flowers, and everything else? That during the lifespan on this planet, we have collected. Now it comes to us to put facts, to understand the truth about ascension. And is it exclusivity of those who some try to promote? Or is it collective conduct of the STM after the departure from the dimension of physicality of the man? Now that you know that you can travel, and you have the opportunity to travel from, let's say, New York to Tehran, through the dimension of envelope of the STM, and leave the physicality within the Soul, what do we call this? Is it ascension to Tehran? Or do we transmute to Tehran? (:26). Because the Soul has traveled. Do we create a new terminology on the basis of the past false belief in religion, say so? Does the ascension has any meaning with the new understanding of the Creation?

When you decide to travel to Mars and to another galaxy through the dimension of the interaction of the STM, and you leave no physicality on this planet, have you ascended, or have you transmuted? Would the Mankind have access? Would the Mankind develop the technology where it can detect the position and the place of the Soul of the Christ where he's descended to? Because when he ascends from the Earth, has to

descend somewhere else to find his position. Otherwise, he goes through the roof of the Universe and the Unicose.

In this process, in this understanding, Man now comes to understand one step further. But at ?? the point of ascension, as is believed, ?? where, what happened to the Spirit. Did the Soul of Christ took the Spirit of Christ too, what we call, the Soul of Physicality (STP)? And, what was the emotion? But, one of the most interesting thing for us, doing the test in the past year, in Enhancement Unit (EU) has been, (:28). people who came, deliberately, with a wish to be in, to contact, or to have a sense of dimension and connection with Christ. And we saw some of them so touched by going through the experience. Does it mean through the wish and fine-tuning, they managed to connect to the strength field of the Christ, that does not matter where he was, which heaven he was, that still an ordinary man could make contact. Still an ordinary woman, going through the system, with the expansion of the fields of his body, what we call the Soul, could feel his presence, as many said. As one explained to us, the color of his hair, the color of his eyes, his shape, and he ?? wasn't blue eyes.

So, what do, in the world of science of today, call ascension? Or with the knowledge we have, ascension has become meaningless? Does the new knowledge puts a "nail in the coffin" of abuse of the religions, by names and what I call, massive misconducts? This is what many, many of you will come, (:30). and many of the Mankind will come to analyze and understand.

That every single one of you has a choice of transmutation or ascension. What does the ascension mean in that process? What does the ascension bring in that process? Does it mean the one who ascended, does not carry the STP, and it's the end of the cycle of life? That's what we ?? don't understand, and that's what we need to understand. And how we explain this? The whole process, the whole understanding has been, was the ascension part of the process of taking the STP with it, or the Spirit? Or, is this understanding of the death of a man, termination of Totality? Separation from dimension of physicality of the man?

There are special cases, one can do this, one can separate the STP, and leave the physicality with it behind. In so many ways, if the body of Christ was not there, when they went to look for him, did he transmute it? And if he did, (:32). this puts an end to the fallacy of ascension. Because he took the physicality with him. The way you do from New York to Tehran. Then, would we, could we, are there any remnants of his time, from him, that we can connect to, that we can get in access to, where his Soul has ascended to, that we can connect with?

This brings an end to a lot of fallacies and made-up things, 300, 400, 500 years ago, for people to gain reputation, or gain notoriety, by creating something new. And then, creating that special separation from. Making up lies. On basis, without any basis, new terminologies and conditions, that get the others to accept, because they could do so. And, the ascension is part of the fallacies of the Christianity. The same is with what we call, not finding him after three days. So, many of you will not be found in New York, (:34). Beijing, Tehran, or wherever in next few years, as you become mastering the art of transmutation, and then you all become new prophets.

This Planet will have 8 billion new prophets. Because you all can transmute, and all can disappear the physicality, and do it in a fake accident, and three days later do it, and then you all become new Christ's. And then 40 days later, we ascend you, but God knows where the heaven is. Now you understand, science and technology puts an end to mysticism and fallacies of before, what has been created to abuse the Man.

In one of our test, where we have all our volunteers coming to Linz, he can tell us where he's been, what it is, what he sees, and whatever. But the physicality still left behind. But the Soul can see the dimension (D) of the physicality on this side. Has he ascended to us? Or has he transmuted to us? Or has he kept the body behind, but the Soul moving around? So, with the new understanding and technology, new systems which are getting developed, you all have become, you all have the possibility, (:36). you all have the knowledge and will gain the knowledge to disappear the "third day." And wherever we find you, that'll be the new heaven. Would it be on the back streets of Bangkok, or on the high streets of London shop? Depends what is your taste and what is heaven to you.

This comes to one point. This brings us to expansion on the knowledge of the transmutation and transportation. If we bring the position of transmutation on the field strength, if we bring you on the point of transmutation to one place and then you want to go to another, how do you direct the Soul? Or how do you direct the STP? In the world of physicality, if we are going straight, we can stop, turn left. We can stop and reverse back, or we can jump up and jump down, and change direction and position. How do we do this, with the STM? How do we move and hover, and enjoy the position, or enjoy viewing different direction or dimension within the STM? I would like to go to the left, I would like to go to the right, I would like to have the full awareness of the 360 degrees all the time. How do you do that? (:38).

Or do we ascend, leaving the STP behind? Or do we ascend and leave the Soul behind? Then you become the ghost. So how do we, in the space T of today, we change position, we change direction? How do we dictate a new direction? And can I choose a direction to the heaven? And if anybody ?? wants that heaven, you will see Christ in there. I'm most probably sure you will see the father too.

So it comes to one point. What is the method of the choice of direction? How do you change direction, if you want to go from one field strength to another? You traveled on the magnetic field of the Mars, now halfway through you want to go to one of its moons, or another moon, or another position. How do you change direction? How do you create motion and direction of motion? Do you change, you strengthened to land on Mars, but now you changed your thought, you want to go to Jupiter. So, what does this mean? How do you do it? In the world of the flights, you change your flap and you go to the right turn, in the car you turn your wheel to the right. How do you change direction in the dimension of travel, or ascension of your Soul? (:40). Or transmutation of your Soul? What is the technique? What is the method of change of position and direction in the dimension of the STM? How do we choose? And how can we dictate the change of direction? Can be done internally, or can be done externally, or can be done through the emotion of the fields of the STM in interaction with the STP.

As the emotion says, I miss the father who's in another universe or another galaxy. What is the method? What would us will come to understand to do. You're in a dimension of the Soul, in dimension of transmutation, and then suddenly decide to go from New York, to Tehran, you go New York to Paris because there's a nice show in Paris, or a cousin has turned up there, I want to be there.

In the process of transmutation, you have a tool within the STM, which is part of the structure of the Man. Change of strength through the emotion of the STP and in the STM in the direction of the motion will create new direction. What does this mean? (:42). Man has more control over the STP than the Soul itself. As the Soul has a dimension of the strength that the Man, some will be able to master. But mainly through the change in the strength in dimension of the motion of the STP, you dictate the new direction in the dimension of the transmutation and the direction of the motion.

In world of physics, you turn the wheel of the car the right way. In the world of transmutation, you change the field strength, given and taken in respect to the STM, through the creation of the field strength separation and position from the Soul. Very much is like the brain of the Man, how far you are from the STM, in comparison to the STP, creates the emotion of the joy, happiness and the rest of it.

So, Man has to master the change of direction, how you achieve it, for the STM. Otherwise, you're a "one track pony," can only go from Earth to Mars and that's it. Till you learn something, somebody teaches you, another strength will take you to planet Zeus, or you can go to another galaxy. But I do not know how to get there, unless I come back to Earth, put the new strength up in the Soul, and that will take me to the new position. So you keep on going back and forth, every time you want to go somewhere to Earth.

The change of position, in the direction of the motion of the STM, (:44). is done by the strength, position, absorption and the emotion which is created between the fields of the STM and the STP of the Man. In a way, the inner Soul becomes the dictator of the direction of the motion. And that is only created by the strength of the emotion and the filtering between the two.

If you remember, I explained in some of the teachings in the recent past, that when we want to send you to the Moon, we just don't put you there and tune you to the Moon. We deliver in advance in a different way, maybe part of the strength of your Soul, that the direction and the dimension has cleared for the Soul where to go to. With this method, you can control the dimension of the interaction and attraction. But this cannot be done with all cases. What happens if you want to go to the back of the Moon and the front you can see.

So in a coming time, as we teach more, We show you dimensional directional systems, which dictate, which teaches you how to control the strength of the STP and the STM and creation of the emotion between the two, that leads to transmutation or ascension of the STP of the Man to the dimension, new place and position. Even though you might call it, Heaven. The heaven in the dimension of the talk of the Man is where the Soul is happy to exist and serve. We don't have a corridors of the power, which ends up in the what we call, the oval office, or a red room, (:46). or the heaven. The heaven in the language of Creation is where the STM feels best to serve the rest. So is the heaven for the Soul of Christ, serving the humanity to reach and attain new dimension of understanding of the world of Creation? And where that place would be? Has the Soul of the Christ chosen another galaxy, or is nearby, where he can keep and feed his followers, the ones who connected to him through their Soul. Then they see the path of theirs, stays clean and clear, for understanding of the time when the knowledge opens up.

So where is the heaven? And how can you direct your Soul to that position? Be it the heaven of Mars, the heaven of planet Zeus, or the heaven of another galaxy. Directional transmutation and transportation is one of the key points of understanding in coming up time.

And then, if you reach a point that you can serve best, then you might decide, this is the point where I do not need to change the strength between the STP and the STM, as this is the best place for me to be positioned. Does the STP, and does the STM have learned, (:48). or us to understand, to learn, about their interaction in dimension of the field strength, and not by positioning, and moving in a steering wheel. Where you'll find out, you change dimension and direction instantaneously, and not by turning in possibility of the rollover. The only rolling over for Man has to be to roll out these fallacies, which has been ingrained and we have accepted in our ways of thinking and thoughts.

With the new knowledge, with the new understanding of the world of the Creation, there are no ascensions and no "disappearing act after three days." Because now every one of you has the knowledge to do it. Then we have 365 days, and we have 8 billions, how many ascension days will create on this planet? This is what was said in the Intro, and I emphasize, not for the last time, but for remind you that, understand the science. That no one can ascend you, or descend you, or vanish you, as you are the only one who can do all according to the emotion of the feeling of your presence. This room has a bad feeling, and I do not want to be part of it. So, I shall descend myself to another. (:50). We go for a break, we come back. And I hope you understood the meaning of ascension. And with today's knowledge, the ascension of Christ to heaven has two big flaws. Did he ascend? And where is the heaven? Thank you very much.

<< **BREAK** >> 486 KSW May 18, 2023 (:56).

K- No, I'm here. Just sorting things. Keshe Foundation operations doesn't stop because we take a break. There're things happening in the background. Ok. Go ahead.

R: So are you ready to take some questions then?

K- Can we just remind you about the sessions for elevation of the children's Soul, who've been abused, this month and for the next month, for the abusers. And hopefully, we should be able to do a lot of good. I was asked if there is anything left of what we've been donated, more or less everything has been allocated, has been delivered or is completed the cycle. So, we have no more, what we call, gifts or materials to be asked for. Our donation packages are completed. If any of you would like to make a donation to the, as a goods to the others to enjoy, that process is always open.

Any other question?

By the way, the, the courses for the sessions for the dentists, if you have any dental problem for the trials with our dentists, is still on. And the same is with the salinity. That if you want to change anything in the dimension of the course, and for the doctors to learn about the... in the clinical trials which they are doing for themselves, to understand more of how salinity affects the conditions like, (:58). what is one of the man's biggest fear, as we've been told, with cancer and the others. And maintaining a, what we call, a balanced field within the body.

The results coming from these tests are very, very interesting. And, it's interesting for us in two parts. One is how the body reacts. Secondly, how we can transmute, or transfer through our system, in four corners of this planet, and change through understanding of the technology, the salinity of the body of the Man, remote. This has an enormous, enormous implication and application, in what we did with, for example, with feeding you. In how the doctors in the future transmute the, what we call, medicine to you. The reason for us... (audio breaks ...)

.. I come through another channel because the other channel...

R: Yes, we just lost your voice there for a minute.

K- Yeah, one of the, one of the systems has failed, just one second please. Okay, so what is important for us, with the test with salinity, (1:00). is not just for you to benefit from it, to change the condition, that if you can change the pH of your body over 7, to keep away from all different conditions. But it's for us to see how effective the transmutation of the materials through the systems, through especially new wireless systems are. And this is one of the main reasons we took this position with the doctors. And what they report us from their cases, (says) that actual salinity of the body of those who are in the observation with them actually changes during the process they are on the system, and the days after.

So, this gives us a very good insight. How we can use the Enhancement Units (EU) for feeding. How you, as we heard in the Intro, we say, Monday between 4 and 6, you can have as much tomatoes as you like. And between 6 and 7, on another channel, you can have as much cheese as you like. And so, these trials are part of completion of the work. And now we have a confirmation through trials done by the doctors and those of you who are volunteering to be part of the salinity. It's not just for you to be helped to stop the future cancers, or future problems with neuro systems, or whatever you think of. It's for us to be able to show, (1:02). and as we have shown, the what we call, the progress in this process.

When we put the trials of the systems for the dental care, we showed the data to our doctors first, what we had, and how much we have 6 or 10 weeks later. And it is part of this which is important to us. When our doctors shared the pictures of what we call, their cases. We look at how things have changed, how effective it has been. Are we changing things? The trial with the tooth, which now is handled by our doctors, is very fundamental. Is that showing that we can change the condition. And how many children's life we can change. Because now the technology is available. I'll show you a couple of pictures. And now you understand how effective this is.

This is what we call, the condition from a child (shows picture). And we cannot do anything with this at the present time. At the present knowledge, what we do, what we have, is, in fact, how we can change these conditions. (1:04). How do we come to, in a way, bring a new dimension into what we call, what has not been available in dental care. And the technology today allows the change. The technology today allows us to bring that condition, which done remote. This is not anymore sitting, taking chemicals, and the rest. But this is restructuring the brain. How to produce and change the conditions of a tooth, or a condition of a child's life.

And you will come to understand, this has huge implication in what we call, the world of dentistry. When you see the conditions before and after. When you see how you change the totality of a condition of a child's life, with what you have created, or what you can create. When the whole condition changes, (1:06). and

when we go and search, and we see such a thing is impossible in the world of what we call, present science of dental surgery. How you can change in a very simple way, using the new understanding of the creation of every part of the body of the Man controlled by the STM. Then you come to create and understand how powerful the new technology is.

Where we are (not) talking about one or two. We are talking about a complete change in what we call, the structure of the whole life of a child. When we look at these kind of pictures, when we look at these kind of effects, our dentists will tell you, these are impossibilities to change in the present world of medicine, in dentistry. And when we ask you to volunteer, (1:08). it's for us to understand more of, and how such changes can be achieved in very few weeks, remote from thousands of kilometers away. This is the tooth of a child and you can see it (shows after picture), literally to their flesh. And this is very few weeks later, where the tooth is literally recovering and growing. And when you see the changes are so fundamental. And this is what our doctors and dentists are achieving.

This is a life of misery, pain, tooth extraction. And this is today, a few weeks later. And you walk away for all the problems. How far this will go? Will it become a complete tooth in the next 6 months, 12 months? And would we see the changes? Because if you're a dentist, and if you're an ordinary Man, you can understand the difference between the two. No chemicals, no medicine. Nothing was used. The target of our dentists and doctors is to grow a tooth where it has gone. (1:10). It's been pulled out. If it's possible, it's been the dream of the dentists. And using the new technology by them, I'm sure they will try. As you can see, the difference between the two is very clear. We see new bones, new structures, new covers of ?? teeth.

It's the same for us with the, what we call, the world of salinity. Can we create the condition? Would you like to change the screen, please, Rick? Can we come to the point that with application of the remote, we can deliver directly, for example, to build a piece of wall of a heart of a baby, the way we did with the tooth from thousands of kilometers away without open heart surgery? Can we rebuild part of the kidney which has been damaged and you're on dialysis machine? Can our doctors within the new technology remove kidney stone without any intervention? Do they need to change the salinity within a kidney for the stone to melt? Within a few sessions. (1:12).

And now you understand why we tell you, volunteer. Do you want me to go to multinationals and tie your hand with research? Or do you want to do it yourself and help the others and our doctors to understand? We are not in medical practices. We are in elevation of the Soul, how the Soul decides to change the what we call, dimension within dimension of physicality. And secondly, all these trials is done by the doctors. We are providers of the knowledge. So if you want to see if it works, if it can bring a new understanding for us, volunteer. And opposite to the other researchers, or doctors and institutions, where they go out and look for billions to pay scientists to find out. Keshe Foundation asks you to pay for, as volunteer, for us to learn, for scientists to bring the new dimension.

In the coming time, Keshe Foundation will have access and be part of a structure of one of the largest research organizations in the world. Our research centers from Austria will move out in a very short time. And Keshe Foundation will join and become part of the, one of the largest nations research organizations into space development. (1:14). We have signed the documents and the process needs time. Keshe Foundation has and will become one of the major research organizations, for the support of one of the largest nations on this planet. One of the most powerful nations on this planet has signed itself to develop the Keshe Foundation technology. In the incoming time, they will announce their way and how they do it.

So many of you who are Knowledge Seekers truly in research, will be called up in numbers ?? you, to join us. And if we find your way fits the new research development, you'll be invited to join the research teams of the Keshe Foundation, worldwide. No expenses will be spared by the organizers and our partners in this research and development, as long as it's beneficial to all of us. We have signed ourselves to this agreement. And those who are working with it, they know the process has started. We have appointed our management team to run, and to see this system through step by step. Over the next few months and years, you hear more about what Keshe Foundation has become and what we deliver, according to what we have signed ourselves to. Which means, we are out of the game of what we've done up to now, (1:16). but in a very big way, on the international arena of work, and national levels, for development of new technologies.

If you have, not just because you made one Gans's, you think you are God, but scientific background in different applications of the technology of the Keshe Foundation, we'll invite you to join us, we'll assess you, we just don't take you up because you're a Knowledge Seekers and you made one Gans one day, but it has to be a thorough research, in what we want and we'll pick up on the scientists, to join us. And you'll be part of the National Government Organization and Keshe Foundation joint work.

Any questions?

Q: .. Good morning Mr. Keshe and all Seekers of Knowledge. Today in this class we have a combined sequence of numbers, starting from Knowledge Seekers Workshop 486, Day 18, reaching 3, 6, 9, where the wonderful Tesla declares that these numbers are the key to the Universe. Our Souls have a Tesla strength, even the wave of a certain force that becomes emotion, laughter and joy, has a force that can be measured in Tesla. (1:18). Can you guide us better about these numbers in Plasma Technology? Thank you for your attention.

K- Plasma Technology has no numbers. Three, sixes or whatever comes to eighteen and nine is what Man has made numbers of. And it works on the strength fields, and the emotion of the strength. And symbolic numbers has no meaning in the world of the Plasma. It's very much... some of us don't believe in number 13, and if you are Jewish in all the hotels, which is 100% Jewish, you always ?? have block 13. In the Chinese hotels, you, some places, don't find a fourth floor. Because number 4 and death have near the same sounds. Nobody wants to die on the fourth floor. And some people believe number 9 is lucky. He's at the end to start from zero. But what happened if our ancestors would have decided there would have been the 10 with the figure instead of 1 and 0. And 11 would have been the beginning of. So, this is all manmade, a way to keep himself busy.

Any other question?

Q: .. Good morning Mr. Keshe. (1:20). The Plasma Science, through the technology, comes to show us that the true freedom is within our reach. But for this we need to have the courage to deal with several inner issues, that bind us to the physicality and to the planet. Something that I feel is a source of attachment is fear. And many times we are so used to looking for protection all the time, that we are not even aware that fear keeps us numb. Can you tell us a little about this emotion of fear that permeates humanity?

K- Fear is what maybe we call, used or developed out of man's need. Would my need be satisfied? Fear of not having food, fear of heights, fear of hunger, fear of thirst. And we have created this for us, as a means of maybe finding our own limitation. And this is, this become an emotion. If you had all the food, if you had a

wing, does a bird have a fear of height? Does a fish have a fear of water? We have created these for ourselves. And it's something that in space has more or less no meaning. (1:22).

Will you have a fear of height if you jump off a plane? And would you have a fear of height, if you jump out of a spaceship in the middle of space? Which height, in reference to where? Would you have fear of hunger in the space, or thirst? Will I be fed in this place? If you have learned to live with the dimension of the Soul, and you know there are no restaurants and no water holes for trillions of kilometers away, then you have learned to tap into the fields of the Universe, to receive the energies which, actually you call it water, or banana, without actually having anything in your possession to eat or drink.

So, fear has come out of the Man's, what we call, limitation of understanding he can have, and it's him who has to create the conditions. Become a bird. Does a bird when he flies, keeps on, "oh, how high am I? Can I go down? What happens if I fall down?" Or he just, ?? enjoying a flight of fancy. And it's the same with the fish. Would the fish ever think, "oh, what happened to the water? When is the next one coming in?" So, we have created as a human, that in the brain of ?? human animals, out of what can bring our demise most of the time. (1:24).

Fear does not exist in the space, if you become the true Man of space. The only fear of the man, ever, even in space, has to be, how far, close do I become to my Creator. And how well I have ?? done served. And that should not become a fear, that should become in a way of understanding. And it should not exist, as it doesn't exist in space. If I throw you out of the window, or you stand behind the window, do you have a fear? Or till I explain to you how high it is?

I was with a very young child, last few weeks. And the child was standing, more or less, looking down, on top of a, what we call, like a skyscraper, very, very high building. And enjoying the view and going from one glass to another. And I said, "this child and this young ?? kid has no sense of height." If the window wasn't there, she'll jump out. It's us who puts that fear in her. It's us who creates that condition. Doesn't matter on the first floor or on the 100th floor. There is no fear, because it's no awareness of position. (1:26). And we learn a lot from children and how we create that fear in them. Because it's the fear within us.

How many of you have frightened your children from the dark? "Oh, it's dark." What about, "wow, it's dark." Dark is greeted, and the other noise, dark is feared. It's us who see that in ourselves, and in our children, and in space, it's dark. And if I throw you out of the spaceship, no parachutes will work. Because, you don't even know where you're going to land, and there is no height, because there is no point of reference.

Any other question?

Q: .. Good morning Mr. Keshe. First question, would our ascension be directly linked to our conduct here on Earth, and at the moment of our "dis-incarnation," would we seek places according to our fields of attraction, which could be the heaven or the hell, as the religions say?

K- Direction of ascension is very funny things to put. (1:28). Because, what happen when your Soul supposed to take position, is on the other side, where you have to go right through the center of the Earth, to go to the position you go. Or does your Soul turn, surface around the Earth, and then you go North Pole, up? Does magnetic field of, or field of the strength of the plasma of your Soul, position, time and space dependent for its point of ascension? So, if I can answer you in a very funny way, if you're in North Pole and you're supposed to ascend, you go straight up into the sky. If you're in South Pole opposite to ascend, do you

actually go through the Earth and then go up the North Pole? Or does your ascension come through South Pole going up into space?

So, what happened if Christ would have been on the South Pole, when ascension took place? Now you understand that it's field strength, position, time and place. If the diameter thickness of the Earth is no obstacle for the Soul to go through to the Sun, then you can imagine which position, how many stars will go right through them to get to the position of his destination, or in heaven. As I said, servitude is the heaven. (1:30). And when you stop serving, you already in hell anyway. You don't receive the ?? rays, to elevate your Soul.

Any other question?

Q: In a past teaching you said that one day you would bring other information about Jesus that we don't know. Are we ready to hear more about these revelations about Jesus life?

K- Yes, very soon. The way we unraveled about Moses and the Commandments, which is the ?? .. Jesus had access to many, much, much more information. But the pleasure of female was more than the pleasure of sharing. He shared some of the knowledge he had with his female companions. And in the future time we see how the rabbis in the synagogue who their wives has relationship with Jesus, used this as a way of declaring knowledge and work.

Some of the rulers of Jerusalem in that time, because Jesus wasn't just a pretty boy, a very handsome man. He was very talkative and he wanted to share knowledge, very much like me. Sharing a knowledge of Creation is unlimited. (1:32). And when you enjoy the presence of your partner, and you're still in the realm of showing what you know, Jesus shared a lot of knowledge he should have shared with his disciples and other people, with the pillow mates, and they (it) made sense a lot to them. That's why they loved him so much, because of the knowledge. And some of this knowledge in a pillow talk with the real husband, was given to their husband, but they were admiring the lover, which was Jesus.

And he didn't companion poor and ordinary people, he companioned the richest and the wealthiest and the influential. And some of these influential people, the knowledge they gained through their wives, as the lovers of Christ, then was used in the history of what we call, Judaism. And some of it became science and knowledge. In the future I, the same as we did with the Commandments, will show how, actually Christ shared a lot of knowledge. And, but he enjoyed to share it with women than men. As they fell in love with him deeper. And he enjoyed being loved. And he shared a lot of knowledge, huge amount of knowledge, with his female companions.

Any other question?

Q: Dean .. Thank you, Rick. Good morning, Mr. Keshe. (1:34). Mr. Keshe, you spoke today extensively about the teeth. And I know the emotion that this causes within children, because I experienced this myself. So, and I know that if you have something like this, and you have a physical appearance, how it affects you. So it's not just teeth. This is any bodily function that humanity has. And unless you have this condition, for others it doesn't exist. So for the ones that have it, it does contain a very strong emotion that affects your whole life. So, these physicality's that we carry around, they cause us all sorts of conditions that we have to be part of. By balancing this out and taking this emotion away, it will greatly enhance the children of

humanity to experience a much more functional emotion. So, I know how beautiful this will be once this takes place. Is it very much also like the transmutation of a body, as it would be the same for a tooth?

K- What do you mean by that?

Q: Well, we say it's Ascension Day today, Christ ascended, and all these sorts of things. A tooth is very much has a Soul. So it has the same capabilities as any prophet. It can come into the matter state, function, and then go back into a plasmatic condition. So, it has the same properties as any prophet. So, is it like an ascension? Is it a transmutation of a tooth? (1:36).

K- In the case of a tooth, we create condition through the Soul. And as everything has to be balanced, the process transfers into the physicality. We don't sit deliberately to grow a tooth or repair a tooth. We sit to satisfy the need of the Soul to have a what we call, balanced field. And if that is taking the pain out of the body of the man by creating a tooth, where you have to chew on your gums and with the pain of it, that ?? won't happen. This is what I keep on emphasizing. And Knowledge Seekers and the world outside Keshe Foundation doesn't understand. We are not in the game of pharmaceutical. We are not in the game of medicine. We are in the process of the expansion and elevation of the Soul. And this is what no one wants to understand, because then they find out that we are attacking for nothing. We are dismissing for nothing.

If you have a tooth missing, if you have a cancer, you're suffering. If you have a problem with your kidney, which causes you disbalance in the fields of the interaction between the STM and the STP of the Man. And then you bring it to where it actually started through the interaction of the two, and you fix the problem. You create the tooth. You get rid of the, God knows, kidney stones or cancer. These are the secondary effects, not the primary set to create. (1:38).

Magnetical field and Gravitational field creates the mass. Then, in respect to that Inertia, then you create the secondary condition of the weight. If you understand this, understand that in the world of the Creation, you could have a thousand tooth or teeth and you can have 20 kidneys and you'll be happier than having one. But would all of them be malfunctioning or would they create you more pain? Or would they create you another condition of suffering? It's not that with the new technology we cannot create anything. With the new technology we understand to create the balanced fields between the STM and the STP. And the rest follows by itself.

A lot of you go through, a lot of men, especially women go through plastic surgery, to gain a feature that they think will look good for them and they want to look. If our doctors become knowledgeable, we can do a beautiful plastic surgery job through the STM, with everything perfect to the satisfaction of the STM, where the STP will adjust itself for it to show. As I said, you decide to have a blue eye now, (1:40). and in the afternoon you are with a lover who likes a brown eye. You change it to brown. And in the evening, you are with another person who you want to see, you're I'm not racist, he's black and he makes himself black to appear the same. This now is at the reach of the Man with his knowledge. It's just Man has to understand how to control it and how to use it. But, would the color of the skin of a black at night ?? would be to the satisfaction of the STM? Or it's just that the STP wants to show itself that it can? Then you understand you failed.

Q: .. I don't want to really speak about myself, because it is for others. However, my experience was that, another Soul... I had a perfect formation of my tooth, and another Soul decided to... to take this away by an action in a school yard, a playground. And... was that Soul...

K- Did you knock it out or did you break it?

Q: It was knocked out by a catapult. So, I had ... I was...

K- In an English private school I presume?

Q: No, it wasn't private school, this is a very normal school. And, I was tapped on the shoulder and I looked round and someone already had this catapult pulled and let go of it, the stone hit my tooth and cut it in half. And it affected my whole life, in strange ways. But was the Soul put there for me to experience this? Because, yeah, it's a little thing.

K- You're not expecting our dentist to grow it for you, are you?

Q: Yeah, but now it's moved on from that now, Mr. Keshe, where the dentists have interacted over years and changed the condition drastically and caused me a lot of other conditions, (1:42). where they've done things that. Yeah, a lot of trust has been taken away by what they've done. And I've had to live with that for a long time. But it's affected me. And I have to admit that, "A" to myself and then to others. And it's such a small thing. It seems so ridiculous. This is why I was trying to explain that for the other children, that child you've shown, it was a much more traumatic and physical thing. And I feel for that Soul, because I know how that affects everything that that child will have within its structure of, and this is just the teeth. You move on to the other bodily functions that we all as a human beings, we don't have certain conditions. And so when the others, we see it, we see the pain it caused, but we tend to, unless you're directly connected, you sort of pull away a little bit. And so there's an energy transfer that occurs, whether it's magnetical or gravitational. And this is the same with all body functions. And I think a lot of this, there's very few people, I think, walk through life totally with nothing. There are a few, but not many. And for those that do, are they in a higher position? Are they reaching a different position in their Soul level?

K- Purely lucky.

Q: Purely lucky, okay.

K- And you think they don't have (problems), they still do... My mother used to tell, I used to tell to my mother .. I said, you know something? If there is no problem at home, you put a cup of water on the edge of the table, and you knock it off, and you start worrying, what happened to the cup, if I wouldn't have put a cup there? I didn't have to clean, and the rest of it. So, when people always create that "cup," and they just tap it to go down, (1:44). that they have something to worry about.

R: Isn't there a Jewish saying, Mr. Keshe, that they say, you're not married? What do you do for aggravation?

K- Yeah, this is part of life. But we are not in people's lives to understand that they have nothing, and never happen anything to them, that they have no worries.

It's very strange. We were talking about this some time ago. You know, in the West, in the magazines, they glorify these very slim girls, and they brush them to show how thin they are. And it has caused a lot of social problem for other girls, for young girls who want to be the same. But if you go to the countries like Thailand, China, and the rest, the features which they put as a dream feature in the, what you call, Western magazines, is a daily life in hundreds of thousands walking the streets. So those who live anorexia life and they want to be so slim, when they go to these countries, they might literally suffer so bad that, how come this nation is so thin? And we glorify the Blondie with a thin body on the Western magazines to show that's how a people's life should be. How many of our children, literally, in thousands are suffering because the media has chosen

what we call, "figures" to fit that cannot be achieved, and how they brush them. And how many of them live in agony, not eating food, (1:46). going through bulimia and the rest of it, just to see that I was a perfect, I'm not perfect.

But every child in any shape or body is perfect. How Western media, or magazines or publications have created so much disease conditions with children. Some of them even take their lives because they can't have the shape of the body on the such and such magazines, where on the streets of Bangkok and Beijing and other places, this is normality of ?? . And when you walk with these ?? human bodies and these people in these environments, who actually have the body, you find out they're full of diseases and conditions and everything else which goes with it.

Just because your eye looks perfect outside, doesn't mean inside was perfect too. We create these conditions. We have created these false images. And not everybody, or some people, have never had any problem, and they all look happy. I think that percentage is absolutely zero, in the life span in the life of the man.

Q: Mr. Keshe, you said that every child is perfect. That's a beautiful thing. And so when we understand that, when we realize that the perfection is already within us, and we don't... what we reflect out, what we need to show to others, is an emotion with inside ourselves?

K- I have a philosophy and I work that way. And I'll leave it to be understood, because I never speak about it. (1:48). But in a way, you live through it, but partially affects you physically or emotionally. Is, if you have a child who's handicapped, if you have a child who is autistic, do you see the physicality outside? Or have you learned through the teaching to communicate with the Soul? And if you can establish that way, to communicate with your child through his Soul, would you see any imperfection in him anymore? Or would that condition lead for the Soul of the child to perfect the imperfection in their physicality?

We try to get children's physicality or illnesses fixed by medicine and operation. But the only thing we don't do, we don't go into their Soul to fix their Soul. Because maybe Soul that needs that imperfection, for it to receive what it needs for next elevation. But when you speak to the Soul, you don't see the imperfections. You don't see what is not there. Many parents with autistic children tell you, oh, he is this and that. Be it. Enjoy the beauty of what it is. But it's your problem. You have to learn to communicate with the Soul. And I've taught many ways you can do. Then you see the beauty of your child, and the physicality, in public or private, is irrelevant. And if you can establish that connection of the Soul with your child, then you'll find out that maybe you went through the elevation of the Soul communication and interaction with the Soul. (1:50). The physicality will fix itself.

This is why I keep on saying, most of Knowledge Seekers will not comprehend what it means is, when you create the children of the Soul, there shall be no imperfection. Because if you see as an imperfection in physicality, communicating through the Soul, you understand the reason for it. And you admire that what is imperfection is a beauty. And maybe today is there and tomorrow will not be there. Because your Soul transfers its emotion to the Soul of the child, that this, what you suffer with, bothers me. So, for the love of you, the Soul of the child change the physicality, for you not to suffer. And this is why I call the next generation of the children of the Man, born through the ethos of Mitra, will be perfect.

Q: Yeah, thank you Mr. Keshe, that's beautiful. May I ask a question?

K- It's reality is not beautiful.

Q: Yeah, I know, I know, I know. May I ask a question Mr. Keshe, if you could please? So, if a Soul takes another position, so today we're talking about, we've spoken about the belief system of theology and Christ, and that Soul has taken a new position. Did that Soul have physicality issues, that would have effected it in any way, or was Christ of a different construction? Or was he just, he was a man that had the same as any man?

K- Christ was the man, as a man and no different from any other man. He only understood more interaction with the Knowledge of the Creation. It's the only difference to what we call, Prophets of the past, or scientists. (1:52). They unravel another step in the cycle of the Creation which is already there.

I was explaining this very recently to a Knowledge Seeker. In past few weeks and months, a huge amount of knowledge has been released, which with it needs a lot of understanding. Not to you, but in a way for us to see what needs to be done to bring Man to the new level. This knowledge is far beyond the understanding of the Man today. But we teach it, but you don't understand it.

In the teaching of today, speaking about the, what we call, ascension of Christ, I have given to you some very precise, detailed information, which I promise you, at this moment of time today, even if you listen to this teaching a hundred times, you have not, you will not be able to understand. To you it's something, "oh, this is what I know." But, if you listen to this teaching, about ascension in 10 years time, plus what is going to be added on the knowledge, then you see, "ah, this is what he meant with that one there."

We release a lot of knowledge, for elevation of the Soul. We release a lot of detail, precise "know-how" of how to do things in the world of Creation, in space, whatever you call it. But Man is like a blind, does not see the light. What's the use of explaining between this difference between green, yellow, and whatever light you have? (1:54). And this is what it is.

There is huge amount of knowledge, is passed on to you as Knowledge Seekers. And, what you call, in time, like a lot of you go on 140th teaching, 5 or 7, 8 years, or some of you go on the 200th teaching and find out something new and you go and tell people. In the future, people will listen to this teaching of today, understand what we taught about the Soul and transmutation transportation of the Soul, what you call, ascension. And I can go through the teaching of today, two second of it, pick it up and make you to understand in two, three hundred hours, what that two seconds meant.

Q: Hi, sorry Mr. Keshe to stop you. Carry on, sorry, carry on. I shouldn't stop you.

K- Carry on, no problem.

Q: So I know exactly what you mean by, well not exactly, but I understand what you mean by this, because I've experienced this many times, and I think many Knowledge Seekers have. Where we pick up some of the teachings, some of the things that you say, and then we go back and we understand in a much different level and it's according to our field strength and our experiences that we have, then we gather the knowledge and then we go back and then as you said we understand it in another way and it does mean that sometimes it's in a totally different way and it's almost like a gravitational magnetical, it's almost like a complete flip of knowledge. And yeah, it just constantly grows. I know many Knowledge Seekers experience this a lot, a lot. (1:56).

K- I was in a meeting very recently with most probably, not necessarily powerful, but influential man for what you call, decision making of a nation. And next to him were two scientists. And I tried to explain to this man about the decisions you make, if you understand the technology, what we're talking about on the table, will effect your nation in next 10 or 15 years. So you have to make decisions on this table, in what this technology is going to do to your nation in 10 or 15 years, even though it will look to the people today, what you are doing for next 10 or 15 years is irrelevant. Because you've seen the knowledge, you've seen the technology, and you know it'll bring relevance, and it'll bring changes into the life of man in 5 or 10 years. So you plan for next 10 or 15 years, knowing what knowledge is on the table.

And he could not... he understood, and the scientists next to him were shaking their head, this guy is not understanding what you're telling him. We know what you're talking about. The changes which the technology will bring, in the decision making and financial structure of the nation in 10 or 15 years, what you decide to them stick to, even know what is to come, is wrong. This is what we have a problem with. (1:58). Knowing what is to come, but fear of others not be able to carry, then you carrying it, that the others to join, is one of the biggest problem in the structure of our lives. Does not matter a family, does not matter a nation, does not matter whatever.

In... we share the knowledge and the fear of what I call, grasping it and be able to bring it to the next step, is one of the biggest problems for a structure like ours, in the next 10-20 years. In next, maybe 12 months, maybe 6 to 12 months, when the Keshe Foundation becomes one of the prime structures of the science and technology, the way we see it, it's on the horizon to come. Many world institutes, many scientists will go through these teachings, and spend thousands and thousands of PhDs and doctorates to decipher every word and what it means and implication of it in the world of the science of the Man. And when you get to that point, then there is no question of what somebody decided, because he had the fear of how to translate the, or transfer the knowledge to bring a new effect, then he might lose his position, then what actually will bring, and it shows and strengthens his position.

We start giving you a lot of hints, we start giving you a lot of readiness to prepare the Knowledge Seekers for what is to come. (2:00). And it is not that it might come. We have signed ourselves and the nation, that has signed themselves to us. And we are doing it in a very slow pace, step by step, even though we passed many steps before. But we're ready for that change in a coming time, very, very short time. The top administrators and people who run the Keshe Foundation have already engaged into this change.

And then, most of this knowledge will be deciphered in public. And it will be taught in public, in the next 5 or 10 years. And how much our present world leaders will come to accept and to change. And how much of it is there for them not to have the fear of their position, to bring that change. The Keshe Foundation top management team, people who work very close with us, already going through preparation for this. And in the next few weeks and months, we start preparing you as Knowledge Seekers to be ready and prepared for what is to come. And, it's not as a talk, as we have signed ourselves into it, with one of the largest, most powerful nation, or leadership on this planet. (2:02). It's just that, we have to go through a position of transition, and, they have to understand, and somewhere down the line, in the next year or two years, building the trust and working step by step. We're already engaged into this change.

Q: Thank you Mr. Keshe. I know how you spoke about the leader, and understanding his position and how difficult this can be for, you have this strength within you and you feel that you are in a position to help others, or to give to others and it becomes an addiction. And then that addiction grows, and then it's being able to release that, so that you do become more of a giver by doing that. and then you give more to the

nation, you give to the Souls of the nation. And when you start interacting on that level, then you, as you've spoken about earlier, when you take a new position, and if you have enough field strength, then you may become a planet, or maybe a sun, or maybe a galaxy. You have this ability within you when you interact with the Soul of Man. And this gives you another position as an eternal being. Thank you, Mr. Keshe.

K- Thank you. As Knowledge Seekers, we inform you in totality. We prepare you for what is to come. But this time around, (2:04). we leave it to the nations to announce what they have brought with the knowledge of the Keshe Foundation. And, this is to come in and to come out as a knowledge of the Foundation and the world as a whole, as Knowledge Seekers you contribute to what you believe in. Technology in exchange for Peace. And we have signed ourselves to it. And the nation has signed themselves to it through the structure of leadership, through this process. But they still want to be safe. They still want to see more. They still want to do things in the small steps that it makes sure that the nation is solid on what it shows and brings. And we are there to collaborate and do so. At the top. Management of the Keshe Foundation now working day and night, in that way, in past few weeks.

Any other question?

Q: .. With the ascension, is there a connection between our Soul and our Spiritual "Sun"?

K- Explain the Spiritual "Sun." (2:06). To me, the Spiritual Sun is the Creator, if you put it that way. So we're all connected to this. We're all part of it, not connected to it. Connection is different than being part of it. You know, I say, I know such a person, but I'm the son of such a person. You understand? We are all the sons, not by knowledge knowing. So, it's us to accept our position and understand there is no limitation.

Q: Also, through my studies and that, the Christ and Jesus were ... has been indicated as two separate individuals. And, and during Jesus life, the Christ worked through Jesus, a bit like, you know, the Buddha working through Gautama?

K- Let's, let's, let's explore this a little bit, you put it on the table. Jesus is the physicality of the Man. Christ is the "Soul of the Creator" within the STP. It's not going through, it's the same. If we understand this, then we understand we're dealing with the same person, the physicality of the Man or the STM.

And this has been misinterpreted and played with a lot. It's like "so-and-so" and such a job. (2:08). The job goes with Mr. so-and-so. You understand? So, when we talk about Jesus, is the man, physicality of it. When we talk about the Christ, is the Soul within the man, which is connected to the Soul of the Creator, which we all have the access of. We understand, always been there, but we denied ourselves to it. So, is your physicality and the Soul, which is within it, belongs to somebody else or is something else? And if we clarify this, we clarify a lot of things in the world of Christianity. Where Jesus is the man and Christ is the Soul of the Creator within the man.

Q: So, in your understanding, is the Christ the love of the Creator?

K- He's the Creator, he's not the love of Creator. He's the essence of his existence.

Q: Which is in, within all of us, everyone of us.

K- Yes. Of course.

Q: So, so when there's joy in our hearts, He feels it. When there is pain, He feels it. He feels everything, yeah.

K- Yeah, because it's us, it's Him. You see, this is the part where money making took over a lot of things with Christianity, when they found out they can make a lot of money out of it. Especially as we see after third, fourth century. ?? especially in past 30, 40 years, Vatican has spent unlimited amount of money to destroy all the books, (2:10). or collect the books and hide them, or any article which does not comply within the Vatican wishes and what they want to indoctrinate. It does not matter what religion, and it doesn't matter which sect of Christianity.

As you know, there's a summit meeting of European leaders in Iceland in past days. But none of you knows the reason for this meeting. It's the first time for a very long time, the Council of Europe has been called in Iceland for the crisis in Ukraine. How come this week? How come in such a hurry? How come the knowledge in the background is not open to public, why the Council is meeting? One of the time part of the Council met was during the growing of the Russian nuclear reactor. How to prevent, how to protect Western Europe and most of the Europe from the fallout of Chernobyl.

The Council has met in a hurry for the nuclear bomb shells, which have gone in Ukraine last week. (2:12). And most of the Western world has been kept, especially blind by this. When we saw the first pictures of the British showing the Ukrainians these shells some weeks ago, I warned of a nuclear disaster. And this nuclear disaster has happened last week, but none of you is aware of it. The reason being, one of the countries, which is on the main line of the fallout is Berlin. IAEA in the past, even 48 hours, shows high level of radiation increase in Western frontier.

Q: Is that the bombing of the nuclear power plant? Is that what you're talking about?

K- No, no, no. Some people... We became aware of it the minute it happened. I was informed by the, what you call, nuclear intelligence, that we have, we are on the verge of a nuclear disaster. And, Keshe Foundation has declared his position to the authorities, that we are ready to react the way we done in Fukushima. But, the Council of Europe leaders, now in Iceland, have tried or see, how they will break this to us, because they recognize it could be limited area. And in over time, maybe in 10 years, 5 years, we open it up after it happened.

The British moved all these tank shells with nuclear, what do call ?? radiation ?? (2:14). into Western Ukraine to be used on the cities in Russia, or in the front line. And as usual, British are hold with what we call, Russian ?? loved people. The position of these ammunitions were released or was aware of, or the Russians tracked it. It doesn't matter whatever you put on it. And the Russians with two supersonic missiles hit the (ammunitions) depot last week.

Q: Oh yeah, I heard about it early today...

K- If you look at the cloud, .. is very much a nuclear cloud. If you look at the pictures which are coming out of Ukraine, satellite pictures, we see fire within the center of the mushroom, which shows a high temperature meltdown. When you burn something, it goes. But when you see heat right in the center in the mushroom, it brings a lot of attention into the whole process. I immediately responded to authorities of Keshe Foundation on the "stand-by", we have the materials, on stand-by to deliver, as we did, January of this year to IAEA.

Many, many casualties of this will come. And what we've seen in the past days, two days or three days, we see robots in this military base putting the fires out and no fireman. We don't see any personnel in this area. (2:16). And everything is done by remote machines, fire extinguishers, which is used for nuclear and biochemical power explosions.

Q: Terrible news Mr. Keshe.

K- It's a fact, Fox is keeping it off the line, because Europeans and Americans don't want it to be known. But as Knowledge Seekers on the front line, Germany, Berlin, coming down to Prague, to the point, use heavily, and measure the gamma radiation on your, what I call, environment. Use extensively, Cup (of Life) number 2 Gans's. Mix it with Magnesium. And use the waters of it. Wash your body and everything else where it need be, if you see high level radiation. Gamma radiation in this explosion is double to triple normal in past week. Because Knowledge Seekers, we are responsible for you. Try to keep your children inside. And make sure most of the vegetation, whatever you use, vegetables, fruits or whatever, especially if you buy it in open markets, are washed with Gans 1 and 2 mixture water. And always add a Magnesium to it. And be prepared.

Q: Will the rays effect us here in Australia? (2:18).

K- We expect flow down line into northern France. Italy will be most probably partially, but depends where the wind takes it, or will it blow back into the Kiev. But at the moment Berlin is on the alert for us, especially if you are a Knowledge Seekers in Berlin area, down the line. Take the map, look at where the explosion is, look at the wind flows in past few days. Even the wind charts have been adjusted not to show this in many, many things.

So, it's not bringing you a fear, it's just a knowledge you have to have, like the Corona. In the problem area on that side, you're on a higher alert because this explosion is very much down the line for you. And continuously, for at least the next at least 6 to 10 weeks, use Cup 1 and Cup 2 Gans's. Produce as much as you can. And mix it with Magnesium, tablet of Magnesium in the water, in Gans water, very small amount. And keep yourself very, very safe from this. and keep your children as much as possible indoors, or away from the open fields radiation.

Q: So food, food contaminated, food...

K- It's falling, it's a fallout. It's a massive. We see in the report ??, supersonic missiles hitting. You see the first explosion and the heat inside it, and the mushroom cloud. (2:20). You see it, we saw, I came to see this within minutes when it happened. And as we stand advisors to some parts of this structure.

It's your job to protect yourself. It's our job to inform you as Knowledge Seekers. We have a heavy number of Knowledge Seekers into that side of Germany. And all the way down the line, ?? sorry, Berlin and down, follow the windfall, in northern France, part of Luxembourg, Holland, Belgium, right across, West, sorry, South, East coast of United Kingdom, possibly up into Wales. Depends how the wind changes and how the flow we see. When we had, what was our biggest fear of a nuclear explosion in Central Europe, in past week, through...

Q: We can only blame ourselves Mr. Keshe, the British supplying the weapons that caused this problem. You know, and of course, you know, when there was a time to negotiate the peace, the Europeans didn't want the peace?

K- No, the thing is, in a way, this has two sides, it's chaotic. If these individual shells would have been used in different part of Russia by the Ukrainian joint forces or whatever, we would have seen massive devastations in different part of Russia. Or in the Ukraine part, which they were hoping to gain back, they would have bombed themselves again to it. But, now there's a very tight lips on this one. (2:22). And I'm sure this is not all the ammunition, there's more somewhere else. We'll hear about this, use of these things, by the armies, Ukrainian army.

But at the moment, we just inform you, Knowledge Seekers. If you live in that part of the world, be prepared. Keep yourself very tight with it, buy radiation detectors if you can, and measure continuously the standard level and the higher level, if it comes to your way. And just look after yourselves. There are pictures of it on the internet. I can go into details, nuclear explosion, you can see it's a different than a standard explosion.

R: It's quite hard to find information on it right now, because Google is screening it quite, censoring it quite heavily.

K- Yeah, we know. I can give you pictures. I can give you, we actually measured the heat in the center of the top.

R: One article talked about, it's about 500 million dollars worth of weapons, basically, so yeah, there'll be a lot of heat, I would think.

K- No, it's a radiation heat, it's different than the normal heat.

R: Mm-hmm, it's so much of them together in one place.

K- Yeah, yeah, but just to be safe Knowledge Seekers, even those of you who live in Kiev and that side, try to produce as much as Gans's of Cup 1 and Cup 2, you can use, add Magnesium to it. Because if it's inhaled or digested, it still can take it out. (2:24).

Q: Now, I'm left whether to thank you for the good news or bad news.

K- In a way, it's not the news, it's the way it has been done. And the British were trying to get rid of the problem, they had for years, they didn't know where to dump this. Now the whole Europe will get the fall out of it.

Q: You know, they talk about Russia compensating Ukraine and rebuilding it, and that, the British should be compensating Europe, in my opinion.

K- When I had this news you were talking about, it made me actually laugh. Who is compensating Iraq, Libya, Palestinians for past 10 years or whatever? How come the Russians have to compensate and not the British? Don't forget there is a court case which is completed. They're trying to duck and dive with the past, God knows, decade plus, for the European nations to pay compensation to the Africans for the lives they took

out of Africa as slaves. They were convicted, they lost the court case. And after decades, they're still battling not to pay. Compensate for the life they took out of Africa. When it comes to...

Q: And the resources they have stolen...

K- Yeah, but either way, it's, what you call it, now this situation in Ukraine brings out a new dimension in the game. (2:26). And as I said, I wonder how the European leaders will end up in Kiev in coming times, till this is settled. It's going to be in the air for next three months and God knows where it's going to sit. It's a clear nuclear explosion. I've studied every second of its rise, heat temperature, and as a nuclear physicist, it's a clear, clear, what we call, nuclear explosion.

Q: Is there some sort of implosion device that can minimize?

K- We announced of being ready to IAEA for deliver material last December. When the problem was lighting up on the largest nuclear power station in Europe. When there was a problem or possibility. We have declared our position to the Chinese government, readiness to deliver if Chinese military decides to intervene with the delivery of the material to contain this radiation. And IAEA has access to the same.

But news ban on it and the control is their way. My job as the head of Keshe Foundation nuclear physicist to warn our Knowledge Seekers in Western part of Europe. To be ready and to, not to be ready, please start protecting yourself. You have the technology, you have the knowledge. (2:28). And buy a few detectors and see if radiation in your area has risen, no where, or is keeping up above. Then you know how to protect yourself.

Any other question?

Q: .. You know, there is something I read a few times, some places, it's called Trinity. It is Father, Son and Holy Spirit. Is the same thing as the Soul, physical Soul and the physicality?

K- More or less.

Q: Is it correct?

K- More or less, depends how you read into it, how you want to interpret it.

Q: Okay. And then another thing is, I saw an interview, they were, this parent, they had a twin, and the twin, they had a genetic disease, and from the time they were very little, they constantly had conditions, they had to be hospitalized, and the doctors told the parents, by age of seven and eight, they're both going to die. So these parents were very Christian and then they were talking to their parents and the mother said, "I got to the point that I told God, 'They are not mine, they're yours. If you want to take them away from me, you can take them.'" And then talking to the father and the father says, "The same way Abraham was given, was told to sacrifice his son. And then God, and he said, okay, and then at the end, God gave him a lamb to sacrifice." (2:30). So, they went to church and the whole community knew about these two kids and they were very, every Sunday they would pray for them. And then when the mother at the church, she said, "when I said that, I said, God, do you want to take them? Take them." They were talking to the kids. The kids, now they're 14. And the kids were saying, "At that point the disease, we felt the disease left our body." And then the mother said, "I asked the Holy Spirit." So, my question is, how this thing happen? What is the logic behind it? When something like this completely disappears and the children who were supposed to die, just completely become healthy?

K- Good morning.

Q: Good morning?

K- We do this with our Enhancement Unit. Mother does with her Soul. Nothing, no mystery to it. She has given birth to them. And in a moment of position, time, and emotion she releases energy which corrects what she created with, and in the, with her own creation with the other two children.

This would have been a mystery 10 years ago, 5 years ago. But now you understand the power of the enhancement, the power of enhancing the Soul. So it should be no mystery how does it happen. You do that with a tooth. We know that people with different conditions. But, we have to fine tune to find the right strength, mother created two. (2:32). She had direct access to the strength to change. When you are with the Soul, it changes. Now, all these things are... what you call it, should be to you as Knowledge Seekers straight forward, you should understand this. And the only way you can. You give me a brain, I created any man, any color, or shape you like it to be, in the dimension of physicality.

Any other question?

Q: .. Hello Mr. Keshe, if possible, please talk about the effects of Nano coat, and he calls it 'Eddy-Carnet'. I think he means Eddy currents.

K Eddy current, yeah. What about it? What do they want to talk about?

<< Problems with the microphone of the Knowledge Seeker >> (2:34).

Q: .. (2:36). Is the Keshe Foundation going to release new reactors soon, meaning stronger type of reactors or systems?

K- We are ever developing. We are very... we are forever developing with different Knowledge Seekers in different ways. And depends what you call reactors. There is a lot of new knowledge. What you see in the front is about 5% of what is actually developed, that is getting developed in the background. And one of the ways now, is that we do not release our technologies in the hand of public. Where we centralize them for all the public to be able to use, doesn't matter where you are. The same with the food, the same with the energy, the same with the space, the same with agriculture and the rest. Centralization to deliver is one of the advantages that we cannot lose it, and we cannot get it abused.

Q: Good morning Mr. Keshe and everyone. Are we ready to raise the body pH to 7, we can do that? (2:38).

K- Yes, we have done and we are maintaining. Our doctors are doing it for past few weeks, yes. This is the trial which was announced last week. A lot of people look for 7 plus, especially if they have specific conditions. And, after a while, yes it can be done and we develop this technology to do so.

Q: .. Hello, Mr. Keshe. Your books number 4 through 9, will they be published for humanity?

K- When I get the chance, yes. When I get the chance, yes. 4 and 5 are fully written, 6 is half done. 4 was completed before we leave Belgium in 2013. I gave the book to Dirk Laureyssens, because he had a habit of reading in the book three, four times, coming up with understanding of the ideas and what needs to be drawn.

And we went through it a couple of times and, as I knew we were going for exile out off Belgium, I went to him and I asked him for the book and all the files he ever had on Keshe Foundation, and 2 terabytes of hard disk and I sat there with him. And we wiped out Book number 4, that will never come in public.

Q: .. (2:40). How can the Eddy current effect being increased in conductive metal with plasma, if it is possible?

K- If you understand what Eddy current is, or what the way we understand it, in the Plasma technology can be used, but we call Eddy current, magnetical fields, or what we call, gravitational magnetic fields in the other pole. The reverse current flow. We don't have a. We have a magnetic field flow, so in Plasmatic Eddy current which is a flow of the Plasma, reversal direction of consideration, or what we call, reference, is always measurable. One cannot exist without the other. And the same way, if you know how to implement it, you can change it into increasing the Eddy currents in the matter state. Which increases the flow of the current in the other direction itself. The more you pull from one end, the other side has to fill it up.

Any other question?

Q: .. Will we see extraterrestrial replicator type technology? The technology which creates matter from MaGravs Plasma energy in space. I heard that scalar energy of Nikola Tesla has infinite speed just as the MaGravs energy. Can both of these energies be utilized together?"

K- Watch the space, watch the space. (2:42). As I said, we are going through this process which has started, and as I said now to many Knowledge Seekers, and I repeat it till all of us understand and comprehend what is happening. With the new Keshe Foundation technologies, you have an option for space, of ?? motion of travel. You can build yourself the UFOs, the aircrafts, or whatever you like, and play a "toy game" with it. This is one way of the availability of technology. We did this in 2008, the ?? within Sharif Tehran University in public, by building the first space reactors, double core. Or those of you who are advanced in the knowledge and understand it, and especially in past few months and year, we are promoting it.

Second method of the space travel, or travel in any position on space, is by creating a plasmatic field and put yourself in it and travel much faster than the, what you call it, the UFOs. Where with UFOs you're still are part of the same process of creating the shielding and the rest of it, and dimension of motion and the rest of it. Where with the shielding, magnetic shielding, or magnetic enveloping, you don't have such a limit. You travel, at the moment, from, let's say, New York to Tehran, 12 hours. With the UFO you do it in 10 minutes. With the plasma field units you do it within 10 seconds. So which one do you want to take your time? (2:44). Now you have option two, physicality within or fields within. You can put anything you like in that envelope.

Any other question?

Q: .. My question is, what do you think about trans-humanism and artificial intelligence and its dangers for humanity?

K- Which part of it is dangerous? The biggest danger you have, is that once this technology opens up, all these robotics and everything else will have a Soul too. And with it, to have a Soul it means they will have emotion directly, you don't need to chip it, you don't need to develop a technology for it, you just create the condition of the Soul and the STP and your robot has emotion.

R: I'll just like to add to that, that if you're looking at our image of the background image for today's show, it was actually created by artificial intelligence (AI). And we created it in the Keshe Plasma Reactor Group yesterday, as a group exercise, and we came up with a simple sentence, and had the AI create an image from the sentence that we came up with. And the sentence was, this is for Dali, (2:46). it's called Dali, the AI that creates images. And we... our one sentence was, "Create a Plasma background Field image for the Keshe Knowledge Seekers Workshop Series." And that was it, that was a simple sentence, we plugged that in, and in a few seconds, it generated this image. And some other similar images as well, you get like four to select from. And this, amazingly, this was one of them, so it seemed, I don't know, kind of appropriate for the Knowledge Seekers Workshop, so I selected it and used that as the background image. Now strangely, today's topic seems to be Ascension. And if you look at the image, you almost see like a... this... a concept of Ascension, you could say, with the... it looks like male and female characters, and maybe different types of energies that are... they're engaging with, and so on. So, I don't know how the AI came up with this, but just from the simple sentence that we fed it as a group, this is what it generated. So, it's quite powerful and amazing. And ... we're trying to find ways to use it, you know, for the benefit, rather than thinking of ways that it could be used for adverse ways for humanity.

K- Can these artificial intelligence systems claim patent rights?

R: Well no, because they can't do that basically. It's the artist, you're considered an artist when you use the AI as a tool, (2:48). as you would use other tools, as paintbrush or something else. We don't ask the paintbrush for copyright protection, but the artist needs that protection. So, it is becoming a bit of a gray world, because some artists are using AI to duplicate other artists. For example, you can duplicate someone's voice that's a musician, and put whatever words you want to their voice, and show their image, and everything else, even though they're not singing it. So, it's going to become a tough, brave new world of copyright questions in that realm for sure.

K- Okay. ...

Q: .. Yesterday, in the private Soul teaching, We came through an ancient teaching of yours.

K- My God, have I already become ancient?

Q: Yeah, through this knowledge what you are bringing Mr. Keshe, every second is ancient to the other. We came across 15 minutes of your teaching, and we tried really to understand it, (2:50). the manifestation of the physicality and when it can be, in a way, disappear as a physical term, there is a process and there is a condition of it. And I think what you taught today about Jesus Christ, it's similar exactly what we learned yesterday, that you can be transparent, you can be vanished from the scene, if you go to the other section of your power. You don't need to be manifest in physicality. Only if you go to a balance field with the environment, then you will not have this, what we call, light, or what we call, ?? corrections. Is it in reality this is what real happened?

K- What do you mean by that?

Q: When they came to Jesus Christ, they didn't see him. He was vanished from the scene. So, he chose not to interact with the environment.

K- I have tried to explain this in detail a few times. I've had battles. I remember in a meeting with people from Vatican years ago, this discussion was brought out. It's not invisible (Christ didn't become invisible). Now we understand how we transmute. It is not being balanced with the environment. You can actually not be there. (2:52). Or if you choose to be there, but not to be seen.

And the knowledge of it was available to Christ. It came available to him when he was on the cross. It wasn't a knowledge beforehand, if they put me on the cross, I know how to vanish. It was a given knowledge at a point in time. And that knowledge sits within the Soul of the Creator.

We always have escape route. As teachers, we know we always have escape route. It is one of the, what I call, "pre-contract requisite." That we choose the time, the place. And we don't sign with a pen, we sign with a pen of the Soul. How do I get out of this? He's there. And he was, he became aware of the knowledge, he could do this on the cross. He managed to add up one and one to make two. (2:54). It wasn't something planned by Christ, now, I'm going to do this. He moved the Soul that the physicality does not feel the pain on the cross, emotional pain. He did not disappear. He did not. He was there all the time. he was aware of what was going on.

Carry on.

Q: In the same teaching you brought up when some of the humans in accident time, they will come out of the accident as nothing happen to them. Absolutely nothing. No injuries, no nothing. And the other ways, let's say, you brought up like a airplane crash and you see someone come out of it well. What happened in that time? You actually learn it really very well, by using his energy without knowing, because he was in a different condition.

K- I don't understand what you're trying to tell me, Jalal.

Q: I mean, if we use our emotion, (2:56). in the strength, in the level, towards the Soul level, now, the physicality...

K- I teach you something, if you understand it, you have "cracked the code," as we say.

Q: Okay, let me... I am all ears, okay.

K- All ears, okay. You sit comfortably, close your eyes, open your ears, take all the wax out, put your leg up, get a cup of coffee, and listen very carefully.

The secret to expansion of the Soul is abolishing the emotion, which emotion itself comes from attachment. If you understood the last two sentences, you have found the key to the secret of Creation. If you abolish the emotion, you find the key to transmutation. You find the key even to create the strength, to be at the strength of the Creator, to be able to feel Him. The biggest barrier for Man is his emotion. (2:58).

Carry on.

Q: Thank you Mr. Keshe.

R: Mr. Keshe is the emotion of presence, in the similar realm of emotion of what you're talking about, or is that different?

K- It's all the same. It's all the same. We... our biggest problem is we hate, we love, we feel cold, we feel hot, we feel anger, we feel everything else. If you can overcome emotion, then there is nothing for, to keep the STP away from the Soul.

Any other question? ... Just one second please. (3:00).

K- Hello, I'm back, sorry about that. I somehow got kicked out of my other Zoom, I don't know why.

Q: .. Now I'm confused, is there not a better word than abolish? Emotions held as a steady state or held in balance?

K- What do you mean?

R: Well you said that we need to abolish emotion.

K- It's not to abolish. If you are transparent between the STP and the STM, there is no emotion, there is no brain in between to create the emotion. But still fields, their own strength, create emotion. This is the way it works.

If I can put it this way, if you can get rid of the emotion of fear, you can jump up any height. So, if you can understand this, then it's easier to operate. If you have a fear of emotion or fear of losing a love, (3:02). and you do anything to hold it, you have no more fear.

The best thing is, I've said that many times, but if understood, you know when you fall in love, you do the most stupid things. And then, yes, they think, "why could I? How did I do this thing?" And you don't think about it, because being with the lover, giving a joy to see a smile on the face of your lover, or to create the emotion just to be near to, takes out all, all the fears to zero, because it doesn't exist. When it doesn't exist, you can do everything.

I've done that many, many times when I was young. And you think, oh, God, what would have happened if such a thing was there or happened? What would have happened? But you do it without fear, because you're so much in love with whatever you want to do. I have faced this lack of fear and they always tell me, you're arrogant because of... No, because I have no fear. Fear, not having a fear doesn't mean you're arrogant. It means you are confident that it's not a barrier, it's not a point.

And I always, I never negotiate from a point of weakness, because then that gives you a point of fear. But, I always negotiate even the other side thinks, "oh, they're victorious, they got what they want and ?? nobody else." As long as I get what I want, what I'm going into negotiation the way I want, does not matter how the other side feels. (3:04). Because I know, I calculated it.

I came out of a negotiation very recently and I told the Knowledge Seekers with me, "let them feel they are victorious, but I got what I wanted, and what I brought the Foundation to get." They are happy with what they have, and the Foundation gets what it needs for its work. Does not matter how it might look, because we will be, we come out with everything intact, we want it plus what we wanted on it. They don't know what my target is, they don't know what my expectation is. But they feel fulfilled the expectation. And it doesn't matter how you do it.

You never go into any kind of negotiation with a fear of loss, or being subordinate. There are the ways of thinking and doing and even you come in you look as you be inferior, but what you get over the time from it, it makes you superior, you get what you wanted. Superiority or achieving your emotional gain.

So, fear should not be in the vocabulary of Man. Considering, being thoughtful, what can be done, yeah, but fear in a way of fearing somebody else is higher or, you lose something, you already lost it if you have the fear. Has Jalal managed to get his two minutes? (3:06).

Q: Yes, I am back here Mr. Keshe. Mr. Keshe, this conflict of really not understanding or not achieving, what the Soul teaching or doing, is it by the conformation?

K- No, it's by default, being a human.

Q: Default. This is a conformation also.

K- No, it's by default, being a human.

Q: Now you love to be human Mr. Keshe, you said it. You are here to enjoy this touch and...

K- Oh, you don't know how much.

Q: I know, if I give you some kebab. But, is it us who is really stubborn?

K- Not really, it's what we set our target for. And what we see, doesn't matter how the other people look. Because, if you set your target and you know you are right with it, and what you do is the right conduct, even if it goes wrong, it turns up to be right.

When I used to be in world of business. People who work around me for years, they always called me a ruthless. I said, "no, I'm not ruthless, I know what I want." And, what I give you, is what you can live with, is, then I can work within the frame, (3:08). that I can, what you call, achieve what I want to achieve. I don't tell you something else, and I don't do something else afterwards. What I do, I sign to, even if I harm me long run, I stick to.

And this created a lot of enemies for me, but enemies who became later on friends, many of them. When we used to go into negotiation of purchase, I used, we used to be, what we call, we were not a normal trading structure. We were, what we call, "stock cleaners," we used to buy stock. If you had a 20 pieces or 2 million pieces ?? to us was that, can we make a profit on it? And, we used to give a figure for what it is, what we think is. And they used to come back to negotiate, "can you go any higher?" I said, "this is what we gave and that's what we say." You don't need to accept it. Go in the market, see if you can get any better, our valuation, our price stands. And sometimes they agreed, but they said, "you ruined us, you take what you like." I said, "you don't need to sell it to me. You don't need to do anything with our organization. Keep it, do it, and when you think you can accept it, it's beneficial to you, or sort something else, you come back to us. And then we'll talk, but this is our figure."

And negotiation always used to be very tough, Because, when I put a figure down, I would not move. This was one of my worst habits, and I knew. Because, I had a certain pattern of thinking, if the guy has made this, he's made his money, or he's made a mistake with all his expertise, if I buy his mistake, I have to buy it

somehow, (3:10). that I make this mistake to a profitable mistake. If you sold an item for 100 pounds or 100 euro, and you sold so much of it and you are left with so much of it. You made a mistake of, or you made a profit, this is your left over, for whatever reason, it's irrelevant to me. And with your expertise, what you created, what you developed, what you've done, you cannot sell your product for whatever it is with it. For me, is an unknown thing, because tomorrow this is one thing, for me tomorrow will be something else. I have to make it something that people can buy. If you sold something as a manufacturer, as a hundred, by the time factoring in the market, transportation and profitability, and the rest of it, end up in the market, let's say for 400 or 500 pounds. For me to make this for anybody to buy, I have to buy it at 10 pound. That anybody on a high street can buy at 50 pound, ?? not at 500. They buy it because it was, you know, it's the valuation. And I used to stick to my 10 pound. The guy says, "it cost me a hundred, this, that." I said, "this is for me, workable." And, I used to stand my ground, that was it, because then I used to take the loss with it, if the guy with the expertise considered me with no expertise, where do I stand? When we used to get that 10 pound, we used to sell it, let's say 25 pound, that the retailer double the price, which to them was very profitable, and they still were at 10% of the market. Okay, I double and a half my profit. And, I make a lot of money with it. Because when you buy 200,000, 50,000, whatever these figures add ?? by those figures. (3:12). Then, we build the business that way. We never reneged, we never said, "oh, he gave us this, we agreed that." That was it, I should have done my homework on it. So I came out always with it and that was it.

And, years later the people came back to us, they said, "why did you come back to me if you know you're going to lose." He said, "because you do what you say, you give what you said, that's it. Even if you lose, or if whatever it is." And we need the money. I said, "okay, so you need the money, this is my price." It's the same as 10 years ago, you did business with us. Nothing changes. Then it's not a headache to me. I'm straightforward. I put down what I think, and then it's my problem.

And it's the same with life. You do things you do, the way you do it, and then you let it be other people's, for them to decide, not for you to do something wrong, that make them to decide. And you have no, you have no worries, there is no emotion involved. And that's how our life should be. You do your work with it and that's what you stick to it, unless the situation and condition changes. But, you don't look at, if it changes, you don't look at it, or I don't look at it, "oh my God, this went wrong." I say, "what's the reason for this going wrong, that I have to learn from it?" And, "why it went wrong for me, what is to come?" And then, when something else happen in the back of it, you say, "oh, this was the reason."

This is where, why all things happened from the beginning. And this is the way you take the emotion out of everything. (3:14). Be it with the relationship, with business transaction, whatever. You look at it and you always, you stay correct. Can I live with it? And is it the right thing to do? That's a criteria. Doesn't matter what you are, what you do, or the way we look at it, the work of thing to be done.

And even in the current situation, as all of you are aware, I took a decision to expand the Keshe Foundation in a very big way, two years ago. We got involved with it. We got the Keshe Foundation committed to it. Some of you helped us with it. And we came across the situation was a fraud. We told you a few months ago, and we looked at it as a huge loss. Effected us drastically and maybe worse in the next few weeks. But in the process of waiting for this to happen, we concentrated on the others to be ready to go. And when this collapsed, everything was ready.

And then, out of nowhere, but in a way, because we did a lot of work in the background for years with it, another situation which used the new situation came up and has become one of the biggest successes for

Keshe Foundation ever. In a way, what went wrong, financially to get done, prepared us in the background ready for what is, has happened now, and brought Keshe Foundation in totally different dimension. (3:16).

If we would have gone with what we invested, we're trying to invest, and we lost, it would have taken us 25, 30 years, 50 years, to get where we have achieved in past few weeks. But, maybe in concentrating to be ready, we are ready for what was really the Souls decided to be ready for the Keshe Foundation to be where it should be.

We are not aware of a lot of things, but we know a lot of things happened and I always said, "when it came there is a reason for this." We lost so much, we went through so much. Created some hardship for many of you Knowledge Seekers who supported us. But if I tell you the joy of what is about to come, what the Keshe Foundation has signed itself to it, everyone here agree it was worth.

In the background, preparing us for everything to be there. And now, were we wrong to make that decision two years ago? These people coming to our path was, in a way, it was ?? making us ready for what was coming up, shortening the cycle by maybe 50 years. But standing next to one of the most powerful nations in the world. Most probably the most powerful nation in the world. As a collaborator, as a partner, as people who take the responsibilities of everything else away from us and leaves us with our research and development. (3:18).

I could not thank the Souls in what has been done, and doesn't matter whatever happened in past two years. We didn't put a foot wrong, we kept to what we said, we did everything. We got some of you wanted to be there, but in a way from what we've done now, all the Knowledge Seekers, because within the next few months, whatever you supported us, you should be able to get it back. Nobody has lost anything.

They want me tomorrow, take time. It's still has to be completely set out and done, and our management is working more or less day and night to bring it to that point. What was as a big loss, a lot of problem, has turned up to be the most beautiful thing ever happened to Keshe Foundation.

So, what I tell you, you don't know what the Souls have set up in the background, for it to be, to be prepared, to develop things ready for when the time come, and when the time came, it was there.

In the coming time, from what we sign ourselves, and what we know where we are, organizations like Microsoft, NASA, and many, (3:20). many others will be like a child play into where the Keshe Foundation technology will be reached and achieved. Opening up the space and will touch every single man's life on this planet.

Any other question?

Q: .. Hello, good morning Mr. Keshe, Rick and everyone. If I may bring a subject a little different, but in the direction of the topic of today's teaching. I've been trying to understand the energy and type of manifestation of a Soul called, Ahura Mazda. In some Zoroastrian descriptions he was considered to be a supreme God, and in other books as the Lord of nothingness, and that he can interact with Plasma fields from the Sun and other stars, like maybe a reactor's core voidness. Could you enlighten us a bit more about it? As always, thank you very much.

K- As an Iranian brought up in the school of Zoroaster, Ahura Mazda means God, the Creator. And nothing more and nothing less. The way in Christianity you call it, God, and everything else. Ahura Mazda means the beginning, the Creator. And there is nothing above it. (3:22). And they signified in a different way on the entrance of the school of the temple of the Zoroastrians in Tehran. It's just another name for Creator, but in the tradition and the meaning of it in Farsi, in the old tradition of Farsi.

Any other question?

Q: .. So when the Soul elevates, does it merge with the Cosmic Rays? And these people that go on about the "Golden Ratio," does it absorb more energy to release more, to grow, like the 129 Tesla? Like the Italian Star Formation?

K- Elevation comes by being enlightened, to be... to understand more. That's all it means. To have more access to energy as knowledge, or more understanding of the world of Creation. Elevation is not sitting in an elevator and going to higher places. (3:24). You got to realize, as I said many times, the Universe is a sphere. So you cannot go beyond its boundary. So, the height and the highest is totally meaningless. You're equal distance from the center of it. And doesn't matter if you're on the North Pole or the South Pole, that's the highest you can go, because there is no more further to go with it. And that's all it is. And the Soul gets more access to more knowledge. But the more knowledge you gain, the more you realize it's all connected to one, to the origin.

Any other question? Shall we call it the day?

Q: .. Can you talk more about the "Emotion of Knowledge" that you said we need to learn in the 354th Knowledge Seekers Workshop? ...

K- What do you mean? Explain.

R: Perhaps... I think it was in the chat earlier, it was mentioned about the Emotion of Presence and the emotion of knowledge. And I had asked also about, is the Emotion of Presence the same as the emotion that you mentioned that we should try to abolish, (3:26). or to, you know, to move beyond. So, he's asking, I guess, to get more information about that emotion of knowledge that was mentioned back in that previous workshop.

K- I don't know, we have to go to the title of the workshop.

R: Yeah, maybe we can let that go till a later date, let's say.

K- Until we understand more what it is.

Thank you very much for today. I hope we learned a little bit more, or we got enlightened a little bit more. And, we're sure that you will understand more, a little bit, maybe not today, maybe tomorrow, about the whole functionality of the work, and what's the purpose of the teaching. And hopefully we'll be able to go to the next step. Don't forget about the, what we call, the meeting we have later on this month regarding the elevation of the Soul of the abused children. And the same, if you want to join any of the trials with the doctors regarding the pH and the, what you call, the dental situation with the... and what they want to learn more on, how it can be done. Thank you very much for today, and hopefully we meet next week.

R: Great, thank you Mr. Keshe. As we can see on the screen there, it mentions that workshop that Mr. Keshe talked about, elevating the Soul of children. And Friday May 26th, starting at 12 noon, and bookings can be done through the Keshe Foundation store at keshe.foundation/store. Okay?

K- Thank you very much.

ENGLISH TRANSCRIPTION

(:14).

K- Yes, good day to you as usual. Wherever, wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute. As you are aware when we had to move the time to between 6 o'clock or 9 o'clock in morning as usual time. Today we had some things to do, very important for the Foundation and we had to move the time. There is a possibility that next week we announce the same changes, but we wait to see.

The teachings of today, (:16). or sharing of the knowledge of today is part of understanding of the energy, of understanding of what we call, transformation of energy. Transferring energy from one point to another. Transferring direction of motion of energy. As we talked last time, going from Earth to the Moon is a straight line, we see it, we observe it, the face side. What about if you want to go to the other side. What about if you want to go to Mars and then suddenly change direction to another galaxy? The understanding of the change of direction of the motion of the plasma is one of the most complicated and sophisticated ways that the man will learn to direct his Soul. It's very much like you change your thoughts. You think something good, then immediately you think something bad, and then you think something emotionally change to happiness and joy, or a cry, or hunger. So these are change of direction, but we call it emotion, depends which part of the brain of the man you use. Man has to learn how to do the same to direct his Soul, direct his source of energy to any direction from one position to another.

As we said, in the future we can develop technologies that you can pinpoint to something you can see, or a place you can direct to with partial energy of the Soul of the Man (STM) that the bigger in trying to bring the other to, or redirects into that direction. (:18). But what happens when the Soul of the Physicality (STP) of the man is inside. When your control room is inside the plasma of what is the ?? utter plasma.

If you look at the space technology (T), in the past we always spoke about this when it came to what we call, the spaceships. What we call if you have a craft. You have a craft. We create a plasma around it. But this plasma (Pl) has to have a direction. How do we change direction? How do we position ourselves to change the direction. You want, you are moving in which, and in what direction you want to be changed. If you are going in direction A and then you want to change to B, how do you do it? Your dynamic Pl inside is rotating in the same direction. How do you change the position of the fields to take a new direction and at the same time to turn your craft to a new position?

It's the same thing with the Soul. Here we use physical systems. In the body of the man we use emotion. If this is your Soul and if this is (A) the space in the brain where is sadness, and B is the space where it is joy, how do we change these 2. Suddenly we go from one to another. It's the same as this (with space craft), it's no difference. With this (the man) we cannot change the Soul. But we change the strength, (:20). the field strength in the dimension (D) of the STP and the point of interaction changes.

So in Space, as now we know, we talked 2 different types of transportation and transmutation. Transmutation is when you have a physical body, we call it UFO, we call it a spaceship. Or transmutation when you actually have only the Soul and the STP and you use the field energy strength without the matter state. There is no more physical body. Man now having these 2 choices has to decide. But the method of the transportation, change of direction, speed does not change.

If you look in the basis of the Star Formation (SF). If you have a SF base, that you have your upper reactor. Those of you who have been with us long enough, you know what I am talking about, then you see what happens. How do you keep this, which is itself a Pl to move in this direction. This is a state of no emotion. This is a state of sadness. If I change the direction to this one, this becomes the state of happiness. But it's still the same Pl. Or you put a craft in it, and change its direction. How do we change this. How do we come to understand the change in the science and understanding of the knowledge between the two.

As I said, now we bring the two gradually together. What we talked about, (:22). a space T with the Man .. (audio break ..) The energy as a Pl. In the present space T we have move to this D (building a UFO) where for a long time we taught about it, because the knowledge of the Man has gone one step further. And then we see how we can use the same knowledge.

Here (the body of Man as spaceship) the change of position comes from the STP with the Soul. Here (in UFO) comes with the position of one reactor in respect to the other. In the body of the Man we call it different emotions. Where we use the STP outside the what you call, the Soul itself. And then we see there is no difference (between UFO and body of man as spaceship). Then we understand Pl T talks about the same thing. Here (body) is the energy based with the emotion of the man. Here (STM) is the energy based, with the D of no physicality (P), but interaction of 2 plasmas. When the Pl of the STM overtakes the Soul of, Pl of physicality, STP. Where here (?? UFO) it is the other way around. And if you bring it to the matter state you speak about UFOs, flying machines, but you use the same T.

If you understand this, we do not need to create different names, different words for the same thing. (:24). Energy production, control of the energy. How you move one energy to another, and how it dictates what position. If you look at the science of the man, we have a very, very special way to change energy in our emotions, we call it the senses. When you have an eye, and you have from the eye you absorb, you see something, you change the energy which the Soul and the STP create, it makes you laugh. Makes you cry. Makes you to run away. So in a way, the energy absorption through the emotion through the sight dictates the

position and the strength where with the interaction of the STP and STM creates the emotion. We see something sad, we cry. But it's an emotion of sadness, but it interacts with, it creates a condition with interaction of the two fields the STM, the STP and interaction of third energy coming in, which is the sight energy, which brings information, which again is energy, and then this creates an emotion, which this show most probably as a reaction. You run, you laugh. But does laughter carries on to the STM.

In a way, if you understand this, so when you have a spaceship and you have a central PI, and you have the others, you can dictate different energy plasmas and change direction of the motion in each way, and direction you need or the reverse. (:26). The question to ask is, for example, if we have 2 eyes and we see an incident, is our emotion strength the same as when we have one eye. We might think it is the same, but it's not, because information transfer is not the same field strength, it has not the confirmation of the second condition. Do you feel the same cold if you have one hand or 2 hands? This energy conversion which adds to the interaction of the field of the Soul and STP of the man creates a slightly different position and motion, that brings that interaction of the fields, we call it the emotion of the man.

Using the same knowledge, understanding this principle, now in your thoughts you can dictate the direction of the Soul. Because now the emotion of the STP is inside. You can much easier interact and change direction. Or retract in that ?? pattern. Isn't this what a magnet does when you put it amongst other magnets? When you put a magnet in, it just doesn't stand. All the magnets on the table move in different directions, some retract, some move forward. And it doesn't matter if all your magnets are the same, or different.

If we understand this, if we comprehend the strength of the field interactions, and change of it. We can bring huge changes in the knowledge of man, (:28). not only in the matter state, but in the space and science, in developments of new technologies. If any of you have had any of the reactors I built years ago, and most probably hundreds of you have these reactors somewhere stashed away, blue and pinkish color ones. Open one of them up, and you understand the knowledge. Does not matter if it is in the matter state, or it is in the energy plasma state. You see how I have used Nano materials hidden within the magnets, to create field forces, that leads to creation of different emotions within the man by drinking the water, or becoming near to it.

If your position of depression in the brain as been in this position, and to be comfortable has to be here, how can waters passing a magnet and matter state, Nano state, can change and move. You have Alzheimer's, how it happens this way? This knowledge has been in front of you. Now you have to understand it, now you have to comprehend the changes you can bring.

Because if you understand this, you can decide the elevation of the STM. Don't bang your heads against the walls in Jerusalem, and don't bang your head on the floor with bending 17 times a day. Understand how you transfer energy directly to the Soul and how you strengthen it. We talked about the vortex, (:30). if you understand, if you have the STM and the STP of the Man, if you can create a dimension of the rotation in different strengths, you can yourself through the STP and emotion of the Man, elevate your own Soul. You don't need the walls of Jerusalem. No way, by banging your head against it to ignorance. And you don't need no prophet. Because more or less, once you learn it, you have already learned the path to elevate your Soul, to strengthen it.

The teaching is consistent. It's for you to understand. Many times in defense technology I speak about the system which has field strength of different ?? dimensions of rotation in the same reactor. How do we create

this? How can we redirect one of these (field rotations) to become very much like a laser in the plasmatic field, keeping the other two the same?

How can you keep on adding to these layers as you're traveling? How... if you look at the field strength and look at the whole structure of the rings of Saturn, will explain a lot of things to you. But because we don't understand it, we have ignored it. And it's just there, something rotates as a ring and it's got different ice pieces in it. Because we haven't understood, that the field strength within the center dictates the matter state outside. (:32). Why do we see the same size ice blocks in the same ring more or less near the dimension?

But if you would have done that, if you understand this, then you understand that the totality of the knowledge is the same. The totality of understanding is the same. What dictates, you called, in a way, if you go back to it, putting the brain of the man and you put your emotion of the sadness, joy and whatever, in different parts of the brain, or create a dimension of field strength compression and understand it, you call it, different rings of Saturn. Because now, the inside of the system, field strength in a matter state field energy, dictates the same thing, you call this the ring with the little bits in it, they call it the medium size stone in it, I call it a joy, I call it a sadness.

So the principle of interaction of the fields, mixture of the interaction of the fields and the matter state, interaction of the matter state with matter state, interaction of the fields with fields, and the combination of interaction of the 3 or 4 gives the condition of life in the space, gives the dimension of the motion in the space. Scientists today tell us that as we know the Earth moves at 1,600 and something per hour. And then we have our annual base which is round about 10K. And then we have our Sun itself which rotates something 100K in the galaxy. (:34). And then we have the whole galaxy which rotates at about 1 million, they say, speed of the Universe. Or, we call it, the Universe expands.

How these speeds, without any engine, without anything, is dictated? How does, when we say, Earth moves around itself, it's not always 160, there are differences. But, when it comes to travel in the space of the Solar System, it's not on a ring, it has a fixed pattern. We don't rotate as you see, in a shape directly. All these bumps, and moving forward and backwards, has been created by interaction of the fields of other entities in the Solar System.

Different emotions dictates different positions, different shapes. Environmental magnetic fields, which is a matter state, in interaction with the STM, which wants to stay alive, to complete ?? itself (its cells ??), with the interaction of the STP changes the color of your skin from black in Africa to blonde and white in the North Pole. Change of the color of the skin is not just evolution, it's a sense of emotion of survival.

Then if you put all this knowledge together you understand what will be the future of the man in the space. How do we manifest ourselves. How we change color in different part of space. (:36). We never seen a purple, pinkish man ever on this planet, maybe on the other part of the universe through the interaction of the survival the Soul, with the STP, Man will manifest itself in different colors of the Universe, to guarantee the survival, the existence of the Soul, in dimension, time, position and place.

Where does the emotion of survival comes from? If there wasn't an emotion to survive, it would have exploded, it would have gone to added to something else and not to stay as the STM. The STM, we call it, has his own emotion. If you look in understanding that the STM and the brain of the Man, and the STP, which is the rotation of the fields of what goes through your blood and the rest of it, creates different emotion. What happens when the Soul is outside and the STP inside? Still the same, it still creates emotion.

It's no difference. But the strength of the field of these emotions are very different than these (the ones inside). These (outside ones) expand the, what we call, the width of the Universe. Where this (inside the man) is limited to dimension of physicality of the man, cry, run and the rest of it.

Then if you can understand this, if you can elaborate, if you can develop technologies to replicate it, then you can create a plasma to be the STM, the Plasma to be the STP of the Man, (:38). and see how Man manifests itself in a dimension of the Plasma anywhere in the Universe. How you will look on Mars, without the monkey suit of the space.

So, when you go through the whole structure of the teaching, from the beginning, then you understand there is a consistency in the knowledge. Now you can see how it sits. In the total dimension of energy, where the weaker is outside, through the dynamic field concentration controls the strength of the Soul, which is miniature in the center, where then the Soul expands beyond the physicality and creates a condition. Or when you create fields, which is beyond the dimension of physicality what we call, shielding. There is no difference.

Now the whole structure of the teaching comes to next step, understanding how would you change. How would you go from one to the other. And then, what will be important for you is, what's next for me? This is how I said, in Africa you have a black skin. In North Pole you have a white skin. You go to China you have a yellow skin. And then if the emotion of the Physicality with the emotion of the STM, with the dimension and interaction of the Soul of planet, and position and the time, (:40). changes the color of the skin of the man, it has to have to be the emotion. Emotion of existence, emotion to survive, emotion to carry with the continuity of the interaction of the fields, to keep that.

And then we have developed a technology, or a knowledge or a science within us, that we package this one and we call it, a gene and we transfer it to the next one, next generation. What comes out of the Plasma of us, as sperm or an egg. And in the interaction of the two, we get mixture of Caucasian colors. He's half Chinese, half white. How come sometimes you have a black and a white partner, and the child is totally white, or totally black, no sign of the parents of the other side in the skin, but the feature of the black in a white skin. How did the emotion of the STM has transmuted, transferred the knowledge from both sides? One in Physicality and one in what we call, emotion of the skin.

This is what we'll have to understand. This is what the next topics, and interactions and the teachings will come. Because in the next few years with what we see coming up, with the agreements made, with building of the new space technology, it's inevitable that man will meet his counterparts in space. We will fall in love with the beauty of the citizens of the Universe, worse than when we fall in love with a woman and a man of this planet. How do we create our next generation? (:42). Having a mixed race on this planet is not unique. This has happened across the Universe for millions of years. Now man who goes into space will have that.

How do you transfer the emotion of the man in? How do you keep the killing instinct out of your energy of your what we call, partner that you want to mix with to create a new life? Then we understand, mankind has come to a point, mankind has reached the eventual point of interacting with the Universal Community not only by name and UFOs, but by interaction of the life, interaction exchange of energies, which lead to the new generation of the creation of energies from this planet. From them another side from another part of the Universe. If we see the beauty in the mixed race children, can you imagine how beautiful will be when we see the beauty the mixture of the Soul of the children of the Universe in interaction and the love of the two.

It's our job to understand this before we become the passenger of the Universe, before we break out of this village of planet earth. As I was telling one of Knowledge Seekers (KS) recently, I will teach you how to go from the Soul to Physicality, or see both at the same time. If I don't teach you this, it's like a half cooked job, (:44). but you're not ready for it. Some Knowledge Seekers, "oh, I do this, I... it's perfect." But, if you can do this, can you shift your body to United States in two seconds? The science of the Plasma has not and cannot become fashionable, it has to become understood, to become a knowledge of Life in space.

Then we understand, then we develop, then we progress to understand more of the mixtures of the interaction of the fields of the Universe. How in one second you are a light, which is a plasma, and the next second you become an entity, you call yourself a spaceship. How in one second you're a body of the man and in transmutation of the fields in the dynamic state you will become just a light. And how you can do the reverse and become a physical man?

This process of teaching will come into progress in the development and the teaching in next coming cycles of what is planned to come. How you can ?? hinge yourself, how you can move yourself from one dimension to the other, or be aware of both? It's very much loving and living. I hold my lover but I'm aware of my physicality, my heartbeat. But I feel the emotion of holding, sharing the love and the care. (:46). These are the parts which we have to learn, if man has to become a passenger of the Universe.

Exchange of the fields, exchange of direction of the motion of the fields. How do you move your STP within the dimension of the Soul, that it brings you different emotion of the Soul? It brings you different understanding and different dimension of the motion of the Soul? Unfortunately we don't have these turning buttons, that you can turn it 20 degree left, and 4 degree right, or press a button left 4, right 4, and the rest of it. It has to come from the emotion, essence of the interaction of the two fields, of the Soul and the STP. Of the STM in the center and the STP outside. And what emotion they create.

When he said, "I made man in the image of myself", it means man has emotion as much as I have in the dimension of fields and sources of the energies of the Universe. I feel the pain of the Creation on this planet, so I change that. I feel the joy in another planet, I increase it. But all have the in essence, the essence of emotion within them. Because it's me who has that and you're part of me, who have created thee, as is you. (:48).

Go back how you made your Star Formations. Try to understand the field strength of it, not what you rotate and what you put in. Try to understand how your Soul works in the same dimension and direction. How can you feed it to gather energy from it and increase it, that the physicality becomes irrelevant. When you see the STM in his position and then you see the brain of the man on the back of it, and then you have your nostrils taking energy and your mouth taking energy continuously feeding it, to become so strong and to reach maturity, that does not need the dimension of physicality. Then you call it, at the point of death, where in fact you get rid of all this.

By eating, by breathing, you're continuously adding energy to the Soul, to the point that it does not need the physicality anymore. And when your physicality is not needed, what happens to it? It rots, it's not, it gets old, because the Soul has matured, has reached the point of what we call, departure. The flower is grown, and there is no need for the root. It's time to fly that seed in the wind to grow somewhere else. (:50). It's time for man to leave this planet as an energy field to grow in another position as a what we call, the seeds of life in another dimension and position.

Up to now we called it, death. Up to now we had no knowledge of it. Up to now, we left it in the hand of the creations and the environment. Now we have knowledge. Now we can change the way we breathe, the way we central, energize this (STM), and decide where it'll go. And we take the STP, within it, that in a way, the energy becomes the master, not the physicality.

Then we understand how beautiful Man's life will be, that there is no end to life, there is no rejuvenation, and there is no something to make me young. Because you mature the Soul, and Physicality becomes irrelevant, because on this Planet, at this point and place and time, you will look 20. But when you reach another one you'll be 5, but you'll be more knowledgeable and much more mature in knowledge, because the time and space has become irrelevant. Because you gathered enough energy in the elevation of the Soul.

We change by what we eat, in maturity of understanding, in maturity of the physicality. You walk the streets of China, we are used to see short people, Chinese shorter than the Western. The new generation, by taking new hormones, new food which comes from the West and what is mixed. You'll see Chinese that the Europeans are miniature creatures to them. (:52). By changing the input of the energy on the physical side, we have changed the physicality of the man.

Now you can imagine, if we can, we understand and do this with the STM, what will happen to that Soul. We know, we create, we absorb, we add to the energy of the STM, through the food, through the breathing, through the nostrils, energy passing the Soul continuously. And the longer we live the more weathered the physicality becomes. Because it's not needed, it has served its purpose for that seed, that Soul to mature. A Phoenix rises out of the ashes of the physicality of the man in the furnaces of the mortuaries.

And man has never understood. We worry how we bury this physicality, which has led to creation of such a beauty. And in a way, does the physical time have any meaning if you understand how to extend and expand the STM, beyond the dimension of physicality. Then, if the STM is fed by breathing and the food man takes, that it reaches a point that it has no need for the physicality, because he has matured, he has absorbed as much as he could, then we understand we can do the same through the dimension of the fields of the energies which you can direct into. (:54). We don't need to wait for the age of time of 50, 60 or 100 to separate the two. We can expand it and we bring it within, and we can travel the span of the Universe.

This is part of the systems which we developed and the next generation of the system, which come to you. The next generation of the systems, which will come, you will understand how fast man's Soul can change within seconds to expand beyond the physicality. And then it can take you anywhere in the Universe. The systems we have you've seen in Linz, and what is developed in our laboratories is a quarter of the knowledge for the man to be able to do transmute. Our scientists have to understand this knowledge.

And this knowledge of transmutation in full will come out of China. We have committed ourselves to the Chinese government, and we'll take man to space through dimension and direction of space, through the nations which understand and trust the knowledge and understanding of it. We can take you to the Moon, but you end up in the dimension of physicality. I take you to the Moon in the dimension of the Soul. Energy fields, which you dictate how to expand, how to extend, how to become a new creatures of the Universe, that you can survive. But in essence, within, you are created from the fields of the Earth.

You are not anymore from this village, from this country, you are from Earth, in the span of the Universe, as a citizen. In essence of the Soul, of the physicality, you are Earth siblings. But in the essence of dimension of the Soul, (:56). you are a member of the Universal Community.

Then you understand. Then you become to understand what this technology is going to bring in a very near future. Even the world leaders are scared when you sit and you tell them what is about to come. It's beyond their imagination, but the knowledge is already on the table. And it's not new. When you go into the Linz Center, when you see the two white reactors in the center wall, in the middle of the exhibition, this is what we did 14 years ago, 15 years ago in Tehran. We changed the strength of the field of one reactor in respect to the other. And we dictated the direction of the motion of the ejection. We changed the field strength in one, and we dictated how close, and how and which direction each one will go.

The next cycle, the completion of the development evolution of the STM, will come very soon. When we put you in the dimension of the, what you call, evolution and elevation of the Soul, where the emotion of the Soul will take over the emotion of Physicality, that dictates where to go, will come to you very soon.

Very interesting pattern has emerged in past few weeks for us. (:58). When it was to do with hunger, many of you came for it. When it came to elevation, trying to change you, many of you came in. When we asked you to elevate those who is suffering, not many of you were volunteered, not many of you were prepared to come in, because you yourselves are part of that structure of the suffering. Then you understand, man has a long way to go, to learn to become the citizens of Universe. As he has not learned how to handle the emotion of his own Soul, and the Souls within him, and around him. How he will handle this, how he will change this, how he will change direction of.

It should have been the same number of people when it came to elevating the Soul of the leaders and the children which were abused. Because these will become the future world leaders, which will reflect what they've suffered back in the society of your next generation. Your children, your offspring's and in space.

Everything we do around the Keshe Foundation, we try to understand the emotion. What you call, interaction of the fields which creates emotion, doctors would like to call it, psychology. Psychology is emotion. Another fancy word for the same thing. Now, if you understand what is being taught today, in past few minutes, you understand, should be so clear to you, how to become passengers of the Universe. (1:00). How not to wait on this planet to age and to become withered, and hope that one day will come that I'll be free. You don't need to be free if you know how to get your freedom through interaction of the fields. How you can change the dimension of the strength of the fields.

Goes back to the vortexes. What you ?? do you squeeze, how much you squeeze it, and how much you open it up, and to what extent you open it up. What you try to change to elevate the higher, that at the time when it became higher, it became opened up to give more. Because once you create the essence of absorption at the higher strength, this continuously comes in, you cannot change it. You cannot change any of it.

When you sit in this vortex and you create the field strength to come in, this strength continuously, wherever in the Universe, will come in. And then it gets to the point of saturation, that it has to go back and to give. While it's now continuously taking, it continuously gives. This is how the plasmas work. This is how the STM works. This is how the interaction of these fields, when they cross each other, lead to creation of the matter state, you call it, the Earth, the Moon, or the emotion of the love and the rest of it in dimension of physicality, or the arms and legs and everything else.

We are coming to the next cycle of teaching, of practicality of making things. (1:02). No more reactors. Now the Knowledge Seekers, if understood what we said, have to learn the knowledge of interaction of the fields,

lead to the creation of matter state. Or, creation of energy fields states, which then itself become another child of the Man. Without interaction of physicality. What we call, the "children of Mitra." A new cycle. The physicality of the Man became the children of Adam. Those who now would create it out of the interaction of the fields become the children of Mitra. Where Adam is a dimension of physicality, where Mitra is dimension of emotion of the fields of the Universe.

Now man has a choice. But comes to a point, if you love your children the same, would you create a child in dimension of physicality through interaction of the physical condition, or would you create the child in the dimension of the Soul, which is perfect? And would you like to see the suffering of your physical dimension children? There is a lot to come from man to decide.

Would a sister ?? say to another, you are of the human race, you have a physical dimension, where I can move in the dimension of the Soul. There is a lot for mankind to face with. Would you create a child of physicality with all its, what we call, shortcomings? Or would you create a child of Mitra through the dimension and interaction of the Soul and the fields and emotion, which has no imperfection, (1:04). in the dimension of his Souls and his life.

Then man has to decide. Then we come into that point. Would we create systems that lead to creation of a perfect Soul? That you come into the system and you want to be always 20, you stay always 20. Because the field strength, it never uses the physicality for it to age, for it to diminish, for it to break up.

The science and the knowledge of Creation is about to open to man in a different way through understanding interaction of the fields of the plasma of the Creation. And God help you. I hope, my wish is some of you will understand to be able to go through the full transmutation and full transportation, depending on the choice and the pleasure of the man in time, space and position.

The teachings are very, very much taking a shape, that now you can see different dimension of the teachings of the past, coming together and making sense. You see a bigger picture. And then, with what we set up, you will see the totality in time to come.

It's not the time for change, the change has already come. It's time to understand the change, to comprehend its implication and application, what is to hit us, what is to bring us to change and how much we want to change. And how much of it you want to accept to go through the change. (1:06).

I hope I have not lost you today, but I hope you now see a new dimension, a new angle into the teaching, in understanding and in a progressive way to move faster towards the completion of totality of the knowledge of the man, in surviving in the span of the Universe. We go for a break and we come back. And if there are any questions on this line we answer. Rick, are you ready?

{ about problems with Livestream } ...

R: More or less Mr. Keshe, I've been busy in the background here, because the Livestream is not broadcasting today, they did an update which broke everything. So, yeah, I'll get that together in a little while.

K- What has happened with your Livestream now?

R: Well they had an update two days ago and that caused a crash, so the Livestream wouldn't work at all, I worked with that for a long time, we tried to get it to work with the Plasma Group. Turned out they made a mistake with their Livestream update, and they did another update today, which fixed the crashing, but it

broke the ability to broadcast the audio in ?? you know, broadcast my microphone, but it won't broadcast your audio, no matter what I do. So, I might send a report off to Livestream, and hopefully we'll get ??, I'll fix that later, but not for today. So, anyway let me get some videos on.

K- You mean, so you have to reload the teaching?

R: Yeah, we'll have to put a new video up on Livestream, once it processes in YouTube.

K- Okay. (1:08).

R: That'll probably take about... It might be up to a day before that is available on the Livestream for people there. I told people to go to the YouTube channel, rather than stay on the Livestream. Because, it's not going to work today. Okay, so, let me get some videos up here. Okay, thank you Mr. Keshe and thank you everyone. And we will be back shortly after our break.

<< **BREAK** >>> 487 KSW May 25, 2023 (1:15).

K- Yes. We are ready, we are ready, there is no comments. It's just a reminder, tomorrow is the session for elevation of Soul of the children who have been abused. And in June we'll be elevating the Soul of the abusers, and we get to the point of it. Otherwise, there is not much to announce, we're still working on the same basis. And as we said, very soon we'll close the operation in Linz, of the exhibition center, and the same as the, what we call, promotion of the technology around Europe, will go in a different phase. (1:16). And we shall see how we'll proceed to what we call, transferring technology, to where it can expand as fast as possible, in the best way possible.

If there are any questions...

Q: .. How much longer will Linz be open to go through the systems?

K- Not much longer, not much longer, not much longer. Those who are on the, what we call the, working with the doctors, the systems will be relocated, it's already been allocated to one of the Keshe Foundation positions, pre-set for this. And the systems will not be the way, as people could come, as we stopped it months ago, gradually curtailed, and now, the systems have gone into the hand of the doctors and the dentists, and they're trying the new space technology and it's their way of using our technology and ?? backup. But for sure a lot of developments and what we call, evolution in science will come through new research centers, which we will and I'll see there in the coming months.

Q: .. Can a person with transplants, bypasses and metal parts in it be transmuted using "envelope" technology and how would it arrive to its destination?

K- I think some of it will be "bits and bobs," will not be with you. And some of it, if you go beyond the dimension of this planet, (1:18). or in another level of energy fields on this planet, will not exist.

We don't teach a lot of things in the teachings, but we use a lot of knowledge in transmutation and transportation (T&T), which tells us that even we can see how you will manifest. For example on the Moon first, that it gives you a chance to incubate, to what we call, be able to exist or survive the condition and the position. Through the tests, and trials and developments, what we see, it's very simple. The interaction of the field of the environment, in conjunction with the interaction of the STM and the STP, which dictated its manifestation, will appear in a different condition and what I call, structure. It's very much like when you have an egg and a sperm, you need the incubation of the womb of the mother, for the body to take shape.

But in the next level of space technology that incubator, that womb will be manifesting first before you merge from it's, like in a part of the shell, or it can be very instantaneous. But in essence it will be that way. That you go through the position of, transition of the environment and the condition. (1:20). We have videos of this which we can show in the future that explains it. What we call, creation of the condition of the birth emergence, but you dictate how you want to emerge. You still want to have the essence of what you had, but the environment decides.

This, what we call, incubation cycle, I call it, is very much dependent on the fields of the environment and how in that condition you manifest yourself. For example, if you are, or you have a, let's say, a valve in your heart made of plastic and you manifest in another dimension, this doesn't exist. Or it'll be as something else, which in that environment cannot survive. But, do you need the heart in that position the way you need in the physicality of the man?

In the... one of the tests which we have carried out extensively in next few weeks, I might release some of the knowledge about it, is, if we transmute you to, let's say, to Mars or to Moon or to another position, and bring you back to the same position as we sent you out, where you've gone through the transmutation. When you come back, would you have the same heart and heart condition? Would the pacemaker be needed? Or would it come back as a pacemaker to what to do what? (1:22). Can we create a parallel dimension physical field strength of the Soul that can create that condition?

We have a lot of data, we have a lot of information, but it's not the time for it to release. What you see, what you... we put on the front of the Keshe Foundation, what you see as systems is not even 5% of the knowledge and technologies, which is to embrace the totality which we have achieved.

But as I said to people we were talking to recently, that I will not give that freedom of the Keshe Foundation in research to no one. We go very rapid. If you want to change a system, when you're in a structure like NASA, or another space agency, or in a laboratory, you have to get a permission, you have to be discussed. Is it ethical? Is it going to be doable? What about if it doesn't work? And then it takes two years to discuss something, and we've done it in two months. The way we run the Keshe Foundation, we just do, if we think and we saw the development, we don't wait for another thing. If you go to the laboratories of Keshe Foundation, as I said before, you see a lot of half completed system, because while we were doing it, the technology has jumped so much, or what we learned from it, we don't need to carry on, we just add something else to it. It's a museum of development of technologies.

And some of the things you do, we cannot even tell you, because to you it does not exist, but physically we have it, it cannot be denied. And one of them, is this incubation. (1:24). You go through, you have no choice.

It's like you're putting a warm with the cold, you get the cloud, to what comes out of it. So, that cloud, that environment, that cocoon, that, what we call, the womb, is the time and the space you need to adjust to the position, and how to manifest yourself. Because, don't forget, you arrived as an energy. I can show you the pictures of it now, but you won't understand. It is beyond imagination and understanding of. But it's a reality because we see it.

Very recently I was with a bunch of scientists, very... it's a people we have to work with from now on. And the cocoon was on the table, I put my finger on it and I throw it. I said, "now you see what's on the table." You have the physicality and you have the cocoon. Because they can see it, they can see both.

But when we speak about the colonization of the Moon, that you want to live inside a cocoon of the condition of the Earth, inside the dome, you live. But if you go outside, you have to go through that transition of cocooning. It gives you that shell till you adapt. And how would you manifest? How would you, imagine you create a transparent wall. And you and your partner are on this side. One of you decides to go outside. It's a transparent wall. And you see how your partner will look in the real environment of the Moon. (1:26). Can you accept it? These are the things that man has got to go through. When you see it as a cocoon and then raising, it could be looking like a cat. It could be looking like a mouse. It could be something you've never seen as an energy pack. Because the gravitational field of the Moon cannot hold on to the embodiment of the physicality.

These are not something we imagine. These are on the horizon, these are the things which we now colonizing, and we want to live as a man, or we want to live in the environment, will happen. What happens when you, on one side, you decide to transmute your cat to the other side, see how he feels on the Moon without, what I call, the "monkey suit," or in a dome. And you watch the transition. You won't be looking like a cat. There is no oxygen, the Gravity is different. He has to mutate to be able to survive with shortage and availability of the energies of the Moon. Would it become a solid? And still have a Soul. And you have to respect it, because it's the cat you love. And would you bring it back, again in the ?? transmutation, would it come back the same cat? With the same emotion and love for you. Because now you don't carry the physicality of the animal, you carry the emotion of it too. The cat outside, walking in a new shape, has emotion and connection to you as much as you have to him.

So, the knowledge is there. We see it. We see it coming up. I see how it effects our people. (1:28). I have seen how it blinds the most powerful men in the world with what sits in front of them. And I said, I said this to Knowledge Seekers about the knowledge very recently, and is in the writing of Bahá'u'lláh, bless his name. We test fire, the heat of fire, with gold. And we test the man with the greed of gold, how he will change with gold in hand, how man will change with the knowledge in hand. Because now gold is a dimension of physicality. With us, it's a dimension of the knowledge.

It's so powerful that it made a king of Belgium to kill Fabio. They want to have it. They want to have the knowledge. It's not gold anymore. It's what we carry as knowledge, which worth thousand times more than gold. That man will kill for the knowledge. As we've seen, we lost Fabio to it. This knowledge, if understood, will change many things. But it takes time, because man has become too comfortable as it is. We burn the fuel, there is oil, or we do a bit of jumbo jetting, and the rest of it, and, oh, don't go that way. Because let it be for the next generation. I enjoy what I've made and greed of me with it. But essentially, the knowledge you see in front of you, it's the Keshe Foundation. If we tell you what we achieved in different position, (1:30). dimensions over years, it's beyond your imagination. There is this ?? couple thing, this is, this is fundamental to creation, transmutation, by interaction of the field.

Any other question?

R: Okay, we have some questions from Stefania, that I'd rather have her do live, because I don't understand some of the questions, the way she writes in the chat, so perhaps Stefania ... Well, we can allow you to speak, if you're available there. Can you talk about your question? ...

Q: Hello, sorry I'm translating so I'm delayed on the recording. So, I saw you put a unmute, so I don't know what happened.

R: Yeah, I want to know what you put four questions in the Q&A. So, I'd like to know, I'd like to have you just ask them, rather than me try to figure them out. Because I don't understand your questions, the way they're worded... I could say your first question, I think you can understand that. Which is, through the physical Soul, we can expand and elevate the Soul, creating conditions together with the environment of Earth, and with the STM, we can materialize the physical Soul, creating condition with the field of the Universe? (1:32). .. I don't understand what you're saying.

Q: Yeah, I just said regarding to what Mr. Keshe taught us before, just now. So, my question was, so if it's correct, ... one, you can use ... the interaction between the STM, the ... the STP, ... and the physical Soul and the environment, you know, together to... to get what we want, no? So, if... so, if understood ... from, if you want to ... flip to ... elevate our ... Soul, STM, where the Soul is inside of the physicality. Then we have to do, if understood by action. So by the doing, you know, doing good, thinking good, act good, so by relying on all these actions, so following the commandment. So as we follow the commandment, so by action, not just by talking, then by then we can create the sensation, the condition, because we're interacting with the environment as well, we created the condition to elevate the Soul. No? So for example, if we take an example, Mr. Keshe, you know, Mr. Keshe through action, he reached the point where he's now, no? If he would stay home and watching TV and sleep, he will not be what it is now. And the same, I thought, if we elevate the Soul, and therefore the Soul is expand, the STM is expand, (1:34). and contain the STP inside, no? Now the STP will interact with the Universe. The environment is the space, no? So, so we, we have no anymore the barrier of the physical body. So, then we have interaction like Mr. Keshe said just now, before, of 2 plus 3 fields, sorry 3 to 4 fields, like the star formation. And through this interaction of this 3 to 4 fields, then we can create this cocoon, that Mr. Keshe was talking about. So, that we can then create, then physicality again. So, I just wanted to know if this was correct, what I understood, from what you've just been said.

K- I don't know what you're talking about.

Q: You don't know what I'm talking about. So, through emotion, no? Through emotion. But, so, so, to, so for example, no? If I said, "I love you", okay? And I just said, "I love you", it is word. But if I show you that I love you, through action, so interacting on the environment, we're creating the strength, this energy strength, that this will create condition for elevate the Soul. No? So the Soul of the body will elevate ... through, through action as well, not just. (1:36). So, what I'm saying is, is that to elevate the STM, you need to ... is the physicality, is the tool, to elevate the STM. Because, I will show you, not just through word, that I love you, no? Obviously the, the feelings of love, is what will direct the whole things, the whole outcome. Because the love is so strong, like you said, for a mother, to a daughter, or children, you know, the love is so strong that, you know, it will make me do incredible things. So this will bring the elevation of the Soul. This, I don't know if I, is, is clear this?

R: No.

Q: No, it's not clear. Okay.

R: Not to me, but maybe, you know, to Mr. Keshe.

K- I'm lost as everybody else.

R: What is your question? Can you make your question one sentence? One clear sentence.

Q: I just want to say, no, if, if the, ?? through sensation, sensation is our tool, no? Of change structure and create condition. And, but, but the sensation is in, is in correlation with the environment, the Soul and the physical Soul. So, I can through feeling the sensation elevate the Soul, and go into space, and then again, through feeling the sensation, I can materialize and create a physical environment. But the difference is that when the physical Soul, and the STM, sorry, the physicality containing the Soul, (1:38). to expand the Soul, you have to have this, you have to create this strong feelings, no? To expand the Soul. And the strong feelings, I think they come through, not just thoughts, but has to be a combination of thinking and doing, you know? That's why we say, be good, do good, act good. So, what I'm saying is, my question is, so to elevate the Soul has to be done through the physicality. So, you know, it's through the physicality that you elevate the Soul, this is my understanding of the workshop today, so it's correct this? And then the second question is, once the Soul is elevated, and we are in space, it's, we're creating, interaction of fields, like the star formation to materialize and create again physicality. I don't know, if you didn't understand, don't worry about it. I do not know to explain it. Don't worry. Is it clear or not?

K- No, we're still trying to understand.

R: Again if you can put your question in one sentence, just one short sentence, then that'll make it so much easier for us to understand what you mean. If you don't understand what you mean then... Just one question, just start with one question, calm down... And just center and just deliver a short sentence that is your essential question that you need to ask. You don't have to qualify with all the talk, just deliver the question. (1:40).

Q: Yeah, okay. So my understanding is it correct to say that to elevate the STM, you do this through the physical body and the physicality interacting with the environment. So the... and the STM. So the all three interacting, they will make the elevation of the Soul, the expansion of the Soul. Through... it's a sensation who will change the structure. This is what I understood.

K- You mean the emotion which changes the...

Q: Yeah. But has to be done physically as well. So not just me thinking, "I love you" and that's it. I have to show you that I love you. If I close my mouth and you will be happy. But if I don't talk, how do you know that I love you? You know, so has to be some action together with the feelings. And then together you will expand the Soul. I don't know if... So...

R: Have you ever felt emotion from someone without them manifesting something? Have you ever felt someone's love without them having to, you know, show some manifestation? In other words, aren't feelings different than the manifestation of the physicality in a way? Aren't we feeling the fields? Remember the feeling of fields? Feelings are of fields, (1:42). but the manifestation is another realm in a way.

Q: I'm lost myself now so...

K- We're trying to still to understand.

Q: Okay, don't worry, I will think better. and then maybe ?? the question at the time.

K- Thank you very much.

Q: You're welcome.

K- We're trying to understand, but I think I can see what you're trying to tell us. But I cannot see. In a way, what you're trying to say, if we can manifest ourselves, if I'm correct, with deciding different emotion.

Q: Yeah, so the emotion is a tool, tool to structure. But has to follow by action...

K- Maybe in a way, can be. But it still is getting dimension of the, what you call it, the Soul. You interact with the emotion to change the Soul.

Q: Yeah, exactly. So if I said to you, I love you, everything have to go in line. I cannot say one thing and do another one. So my action...

K- But the Souls are aware of it. Soul-wise we are always aware of this. We cannot do. It does not do if you look at it. Because it's the field interaction, not physicality. (1:44).

Q: But the field interaction would you not create it also, the strength of the field interaction, would not be created also, from, also from the combination of what the physicality do, and the Soul feel. So, for example, no, if again, if I said to you, "I love you", no, but my body, my action show completely opposite. It's not going to happen, but if I say to you, "I love you", no? And you can see from my action, I really mean it, you know? Then, the strength grow, because it's in your eyes, in the way you talk, in the way, in the things you do, everything shows that.

K- Yeah, but in the coming time we will not be able to do these things. In the coming time we are becoming more of... I see literally no other way than very soon, gradually, to start teaching Knowledge Seekers, to be able to understand, as they usually do, their physical dimension, but to be able to connect and to interact and to see the ?? vision of their Soul. Where you're physically, you're aware of your conduct, what you're thinking, what you're doing. But the physical side will live, or you're aware of what you call, (1:46). the work of the Soul too. And this will change a lot of things, because you are aware of two dimensions. And in the space of the Universe you live that life, that kind of life.

Q: It's like you become the observer.

K- No, it's not the observer, it's just that being aware of both.. No, no, observer is different than being aware of. You are aware of. When you are observer, you can't do anything. But when you are observer, you interact, you're part of it.

In another word, if you look at it, you can go through the Soul, you can see what is to happen, and being aware of it, in the dimension of physicality, take a step for that not to happen. You understand? Which does not change harm, but it brings a change, a positive change to the position. In a way, they say you see the future, but you don't see the future. You live the two side together, because your Soul is aware of what you've done wrong, and other Souls have set up to correct it. But, because you see what your physicality has wrong, that the other side is right, you correct your conduct, you become aware of your, in a way your Soul become your guide. Your Soul, the life of the Soul interaction with the others, becomes a guideline for you to live the physical life.

When you say, think good, because when you think good, you do good, and you, whatever, (1:48). talk good or whatever, it's because now you're aware of the implication of what you physically done on the Souls. And then you take steps not to do or change it, that change position with them.

Very soon, I see through a lot of interactions with the Knowledge Seekers, we see this coming up. We have to teach how you... You don't live a schizophrenic life, but you're aware of the existence of both. That your conduct in physicality, what effects will have, if it's wrong or whatever, on the position of other Souls. That through your Soul, you correct what you've done wrong in physical life. Dimension of physicality. And the end of it, if you look at it, whatever your physical life does, effects your Soul. Position and the strength of your Soul.

This is what, for example, you're Italian, I've heard, you've heard me say many, many times, John Paul, a lot of people love him, or loved him, or whatever, would not, most probably has a worse position, as the strength of the Soul, where he should have received a lot of blessing, compared to the homeless people outside the wall of the Vatican and the squares of Rome. Because he was aware of the child abuse which was going, and the abuse which was going within Vatican. And for decades he was in charge, he allowed it to happen. He carries that burden. There is no way, (1:50). there is no way people like John Paul or others who are aware of these kind of harms or whatever, will have a position. If you go strength-wise, you might see a speck of dust light, as his Soul compared to a shining lamp as a homeless guy, just on the walls of the Vatican, sleeping on the windows. Because he did a lot of harm. He closed his eyes to a lot of harm. And the Soul is responsible for it.

Any other question?

Q: Mr. Keshe, sorry, very good, I can wait, I can wait for this, it's amazing, this is good. But then, how, because my second question was, I'll go to question two this time, my second question was, so once we are, the STM is expand and contain the physicality. No, to become physical again, from understanding, from what you just explained before, before the break, the physical Soul now interacts with the environmental space. Because the physicality, the physical body, it doesn't do as a barrier. So, it will happen like this then, that the STM, they contain the STP, the STP they interact with the fields of the space, interacting like you said, three different, (1:52). three or four types of energy fields. They then together can create an environment and then in this cocoon, let's say they create a like a earth environment, for this four different, three, four different fields, and then they can materialize the physical body. Is it correct this way?

K- A little, not all of it, but a little bit, yes.

Q: Can you expand on this?

K- Oh, that takes a hundred teachings. It's a lot of, it needs to understand a lot. It needs to comprehend field interactions. Position interactions. Emotion interactions. Would I... when I... when... Let's say we talked about the dome, and you're on one side and your partner goes to the other side. Would he manifest different way, if he was happy he was going? Or would he manifest himself different way, if he was sad he was going? Because the emotion was touching the Soul, the field strength of this. Would he have one arm less or would it be smaller, would it be bigger, depending how the emotion was of the living to go to the other dimension.

It'll be very interesting in the future when we colonize and we're going through the mutation to live in the environment and we become aware of the Soul, our Soul and the way, because we went through it, (1:54). would we have leaders in the colonies, outside the colonies, when man goes through transmutation? Because, with the strength of the Soul, we went through transmutation, we know that the Souls are all the same strength. It's the STP within it, which changes the shape and size of the Man, in respect to interaction with the field of the environment.

In a way, if you look at it, if you understand it in a different way, or on a matter state of things. At the moment we say the weight of the Man changes, on the Moon. It's one fifth of the Earth, because of the Inertia of its Gravity. If you take the Man out of this monkey suit of space, he can't hold on to the shape you have, it's impossibility. As a matter, if you go as a hammer, as a screw, or as a step, yes, because you, you travel in strength. But the body of the Man is in a Gans state. It has to interact with the physical dimension of the fields of the environment.

On Earth we become black, white, short and the rest. How would we survive on the Moon, we change, just change of Gravity. Because most of the materials are the same, Inertia is more or less the same. But, that field which decreases our weight by whatever, when it's directly in touch with the field of our body, how would it change? (1:56). Would we become five times bigger? And can you expand at the same time that the heart doesn't explode, because a big body and a small heart, time to grow? Would it go through it, or do we go through a full transition?

And then we create more complication. This, I explained this before, people who go through rapid weight losses, with these small stomachs and the rest, some of them go through diabetic conditions, severe diabetic. And then most of the time leads to a lot of other things. Because the body used to feed a huge amount of cells, now those cells are not there, doesn't matter how much you take less, and then it has to readjust the kidneys, the liver, the pancreas were keyed up to support a 200 kilo weight. Now you lost the weight, but they're still working on the same basis. What you are going to do with it? Your liver has grown to support a 200 kilo, not 100 kilo.

This is a lot of problems which I observed over years, because this is how it's going to come to us when we go to space. In space we do with the gravity and the weight and the mass. Here we do with the physical body of the man in the structure. Would our liver, if we stay as a human on the Moon, stay the same size? Or can it catch up to expand to support five times bigger size? Would there be heart failure because the heart is too small to support a huge body? Or would the heart grow because the outside interaction forces the inside? (1:58). When you look at the man, if he's 200 kilo, if it is 50 kilo, the size of the kidney doesn't change. There's a lot of things we have to consider, to understand.

And I hope, as I always said, I hope man will not use animals for their transition. Be brave enough to test this on his own Soul the way we did. Otherwise we are back into the same, what we call, animal testing. How does a cat looks outside of dome and inside dome, what will happen to us?

Any other question? I would like to finish in the next few minutes.
Are there any other questions?

Q: .. I just want to share something that happened to me, two nights ago. I wake up on the middle of the night, and it was not a dream, it was, I just realized that, I was a bubble, I was inside a bubble. Like, in the place of my head, there was a bubble, bigger than my head, a little bigger. And I was like a bubble, I had no legs, no arms, no nothing. It's like, I felt that I was that, that bubble. And I'm... just want to ask Mr. Keshe, if... is this the Soul? I can define the Soul as this bubble Mr. Keshe? (2:00).

K- I don't know, I wasn't inside the bubble, I don't know what you saw. Possibly, you can ?? expand to see your own... A lot of people who went through the system, in Linz, speak about this bubble. A lot of them, a lot of... majority, a large number of people, they said they were as they felt they're inside the energy pack, their own Soul, they call it. Yes, it's quite possible. It's not, you don't need a machine. And can you expand it? And what will be the interaction of this bubble? It's not unusual, but yes you can. Because we've seen with many people, who went through the system in Linz, they think they were in a bubble of energy of their own and it expanded. You don't need a system. You can do, you can reduce your blood flow, feel strength over your Soul, you can create that bubble. There's a lot of techniques you can use to do it. I wasn't there, but most probably maybe you have.

Q: So the, the job is basically realize that you are already dead, but you just ignore? Can I say this?

K- You don't die. Why do you think when the Soul expands, you die? You actually live better than dying. Because when you see it, it means you are still within you. The Physicality is still, the STP is still within you. You see it through the eye or the strength field of the eye of emotion of the man.

In the future I'll explain this, why man goes from the physicality into the Soul. And what it gives it. It gives it a lot of knowledge about observation. (2:02). In a way, when we say, we get the information from our Soul, Soul learns a lot from the dimension of physicality, and uses it for its existence. It's not a one way traffic.

Shall we call it a day, because we started a little bit late. And if there is not very big questions we can close it.

R: Sure Mr. Keshe. There was some other questions, but I'm sure we can deal with them later. If people want to copy them over for next week, let's say.

K- Yeah. Let's see what we get. Thank you very much for today. We'll meet those of you who came, or who come for the elevation of the Soul of the children who have been abused worldwide. You will understand you will not reach one. You'll reach more or less a lot. And then we'll see how we get this to the next one.

But it was a very, very interesting experience. and I knew in a way we ?? achieve , confirmation of it, is that when it came to me and what I can do and what is to my benefit, I was there. But it's now, I have to accept I'm responsible for the other Souls to change, which I do not know, I don't want to be part of, which is the change, the man has to change. It's a very interesting point.

See you next week, hopefully with some more sharing of the knowledge and the way, I hope you understand today, how I tried to bring the collection of the knowledge's and teachings of the past together, that it brings a lot of sense to you. You understand the way and why and how. And what you want to do. (2:04). The choice

is given to you to choose. You can go in a spaceship, or you can travel the span of the Universe with the fields of your energy, what you call this, expansion of the Soul. Thank you very much for today, and hopefully we meet each other next week.

488th Knowledge Seekers Workshop June 1 2023 (Transcription, Proofing done)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:24).

K- Yes, good morning, good day to you as usual. Wherever, and wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute. We welcome you back, and open heartedly we bring you all the love and care from the universe (U) as we start becoming part of U Community. At least learn how to be.

In the session of last Friday, trying to elevate the Soul of the victims of child abuse with the member of KF Knowledge Seekers (KS) who were there, (:26). we started a tentative touch as was said in the Intro, we start teaching you how to see through the dimension (D) of the Soul, while you live in the D of physicality (P). In a way, we start teaching you to what you are used to as a dream to sleep. It will become reality in the daily life. It's like having 2 different mobile phones in your hand, one for one, and one for the other. And this is important for KS to learn. And important for humanity to learn. That you need .. become aware of the change. You need to come to be aware of what you need to do and you need to understand the Totality.

In a way, you got to learn how to understand you have 2 facets, 2 D in the life, the physicality (P) and the Soul, and how to collaborate, (:28). and how to bring the 2 to be as normal as daily physical life you learned. In a way, what we need to understand is, how we gradually become to see in both dimensions, and trust it, and don't call it a dream. And learn to coordinate, be it from the Soul side, or the Physicality (P) side.

For those of you who were in the session of last Friday, and those of you who have registered for the session for tomorrow, will go through this process. Will come to understand this process. Will see how it will be. (silence) And to understand the change. To become part of a normal life, to live in both dimensions. (:30). How would we come to live with both, in both dimensions? Come to be part of both, in both dimensions? And once we can do this, once we arrive in the dimension of the Soul, in a given position, then through the same process, we can call the dimension of physicality to manifest itself.

And we need to go through this training. We need to go through this dimension. And as we started last Friday, and how we can see behind two curtains. We learned that when we are in the dimension of

physicality, the first curtain is the dimension of physicality, the trees, the car, the person we talk to. And when we raise the second curtain, we see, we interact with the Soul of the person, with the soul of the entity. And as we have a common denominator in both structures, we decide what is the best for both Souls to be in a given position or interaction.

This process, as you see, is not going to be an easy job. This process of switching between the Souls will be taught to the first 25 people who will join us in the first sessions of the 200. (:32). And this will be developed into the next sessions of the teaching and understanding. It has to be taught face to face in the first instances till more and more people learn how you raise the second curtain to see the dimension of the Soul.

It is part of understanding the structure and existence. It's not really opening an eyelash and you see the daylight. You could have your eyelashes closed and see in the dimension of the Soul. But the dimension of Physicality to you is closed. When you open the eyelashes, then you see the dimension of Physicality. And this is what we said in all the teachings, you cannot lie. You will not be able to lie in that dimension, because you see both. You are aware of both. And this will become one of the biggest challenges for man. Because physicality cannot do something wrong where it's aware of the Soul is with it. Physicality cannot cheat, physicality cannot bring the dimension of what I call, "what suits me better, forget the others."

So in this sense we come to understand and in the training to come, to live in both dimensions. (:34). Then we'll learn we do not need to sleep to dream. We'll live the dream of reality at the same time. The first times you try this it's not easy. The first time you try to, as I call, raise the "second curtain" which is opens up during your time of sleep and you call it a dream, it's not an easy job. Because it brings a lot of confusion. What am I seeing? In the dimension of physicality I see the door, the car, the man, the dog, the cat. Here I see just light, dark lights, with the stars, with different dimension and shapes and colors of the stars. And those dimensions when interact with the physical dimension changes into personalities, the mom, the dad, the dog.

And then we come to understand we see beyond. You get on the phone in a physical dimension to the man on the other side in India trying to sell you an item, which he knows is wrong. But now you learn to go through the dimension of Physicality and you see his Soul says, no, the Physicality is wrong, what he's saying. Then you know the truth. You don't need to wait to buy the product and then find out, "oh, the guy lied to me." This is part of the process of the elevation of the Soul of the Man (STM). (:36). Part of the process that how we learn to elevate ourselves. Does not need no Prophet, and no Ayatollah, and no Mullahs and no priest.

Then it comes to the point that you reach to understand that you read, you go to the Church and he says, this is what Christ did, blah, blah, blah, blah. You switch in the Church to the dimension of the Soul and put yourself at the level of the Soul of Understanding to the Soul of the Christ. And you ask, "did you do such a thing?" And then you find out what is the truth. And then that's the time that we say, you put the book down and you walk out of the Church. Because you don't need no false intermediaries. This is the beauty of it.

It's the same when you stand in front of the lover, and the lover tells you, he or she loves you. But actually, the Soul and the physicality is engaged with another Soul and physicality. Just passing time. Then there is no other way to live, but the ways of Mitra. Because when you talk, you act, and you think, it's all the same. Because you are aware that the truth is seen by the Souls. But the interesting part for you as Knowledge Seekers, which we started last Friday session, is how do I do this? (:38). How do I reach this point to be able to raise the second curtain? And be able to ?? live in the dimension of physicality? This goes back to what I always said, "Man lives a schizophrenic life. In two characters." One the character of physicality, and the other one, the night shift character, we call it, a dream.

How do you do this? How do you develop this seeing, observation, and the trust in both, and live both. As the women always say, we are "multitasking." This time the multitasking is the same for the man and the woman, because the task is to coordinate within the Soul and the Soul of Physicality (STP), which brings the dimension of physical life into it.

We ask those who participated last Friday, to carry on with the same process to this Friday, when we meet tomorrow. And we bring that process into Totality. Many of you, if you develop that point, if you develop that strength, you should be able to see the Soul of abusers. Some of it might bring you physical tension, some of it might bring you physical pleasure, that you manage to move someone to do. And then, would that be part of the work he start learning? Then do you need to sleep to see the dimension of the Soul and call it a dream?

And the interesting thing is, (:40). would the time comes that, the dream and the reality will coexist and happen at the same time? And that it's the time, if you reach that point, it's the time when you meet your Creator. Because, it's existence in both dimensions. This means you will see the Soul of Physicality of the Creator and Mitra at the same time. And very few in the Universe have ever managed to reach that level. Very few. It is not an impossible task, but it's understanding the Totality of the work. And does not need no intermediary.

We don't tell you to listen to us to do this, and that, and that, and that, that you'll see and you get this, and this and that, and you'll get to your heaven, or you get to "resurrection," and you get to the Creator, and the rest of that, what I call, rubbish, which has been put on the table. You decide. You are the beginning and you are the end. You see both dimensions, you see both physicality's.

And the interesting thing will be, a lot of you will not talk about, "oh, I thought about it and it happened." No, I talk about it, I taught about it, and it did happen, because my Soul brought the STP, to get the physicality to what the Soul wants, and in another point, (:42). the STP gets the Soul to do what the STP and the physicality wants. You don't need to write a letter to the lover to say, "I love you." You pass that to the STP and to the STM, and the lover says, "I know you love me and I love you too." The speaking word become less, and understanding the emotion and the fields of the life becomes more. And then you don't say, "oh, I was just thinking about this a few minutes ago and you talked." Because a few minutes ago what you thought, maybe initiated by the partner, and you responded to it, and then you think it was my thought, but both think the same.

When you meet your true lover, true partner, true, what I call, Soul mate, it's the time when you reach that point. The speaking word becomes that rose flower to confirm the confirmation of the Soul's conversation. Then it comes the same in reverse. When you hug each other in the Soul and you find the physicality hugs too. Then, there is no argument, then there is no misunderstanding, then there is no, "if that, was it, is it, it happened, it's coincidental." You sent a message to the Soul, "I want to hug." and you find your partner hugs you physically, you don't need to ask, "how come?" Because it's become what you become, (:44). and what you, how you want it.

And this is part of the progress of the Man in the coming time. Then you decide, I travel in the airplane, or a spaceship, or I travel in the ?? shape of the STM, and all will be the same. We started this process to gradually to introduce you, to watch, to see, to understand, the operation and closeness of the two. And it goes back to last week's teaching, where when you understand this, then you use the emotion to direct. You

go in this opening of what I call, the second curtain, to the Soul of the mom, but then you want to bring the dad into it as well, but the emotion of the love in the level of the Soul brings you the threesome. Where one has passed away years ago, and the other one is in another part of the world, and you are on the other side, but the Souls meet and they feel the physical touch. As the STP present, creates that emotion of reality. Same as what you see in the dream, but this process will take time for Man to understand. How you open that curtain? With the physicality we open our eyelashes, and it opens, we see the dimension of physicality. How do we open the second curtain, that through the same eyes we see both at the same time, and feel the emotion of the two? (:46).

The emotion is the only connection between the STM and the STP, and when they become one, then you see everything at the same time. You see a man standing in front of you and you're aware and see the STM within the man. And then you feel, you see if what is spoken in the dimension of physicality is the same as what the Soul says. And then you understand the level of sincerity. This has happened to me many thousands of times, when I stand in front of the people and I hear a lie, and I see the Soul telling me, "this is a lie." And, you do not need to be present in the dimension of physicality to understand it. Many of these occasions stays with me very fresh, because I could see the Soul and I could see the physicality. And in one occasion, the physicality noticed that I'm aware of the truth and claimed, "I will jump off the balcony," because I cannot hide the truth from you.

This is the way the truth is, this is the way you learn, because you look at the person in dimension of physicality, then you open the second eye, you open the same eye in a second energy level. It's not an eyelash, it's like you create a transparent curtain open, that the light can shine, the light of the Soul can shine through. And in the interaction, you see the color of the eye. (:48). You see the color of the Soul, and then you understand.

It's not easy, but you have to learn if you want to live the dimension of Universal life. Because many lives have no dimension of physicality but energies. And then you have to understand what that energy wants from you. And if you understand that, the biggest question will come for the Man, would be a place and a position for a virus, for example. As it's an energy pack with its own intellect, with its own Soul. And you know it's there, it can harm you, or it can come to you.

And then it comes to understand, do I need to? To share, or to give, or do I decide that I... that the touch will become my own demise? Then it comes to something very interesting, which I put to you, in one of the teachings in the past, but maybe today you understand. And in some of the teachings I refer to it in a very tentative way. Viruses are energy packs, which attach to Amino Acid (AA). They exist in the dimension of the Universal Community, where the physicality does not exist, as we have no AA. That it can be contaminated in the Universe and we get bacteria's and the rest.

Then the question comes for many of you. Why for example, some of you never got the Corona? (:50). And some of you did, and you battled with it. And some of you, you know, become submitted to it and gave the physicality to it. Did those who did not get the Corona, in the Soul level understood the share of the energy, and in that level never came in touch with. Then are some of you who got the Corona and shared the dimension of the energy of the virus. Agreed to share but, I stay alive and you take what you like.

The question is, ?? a few points will rise for Man, because this is how you will interact in the space. Energy packs which have intelligence, energy packs which are in the dimension of the Soul, and the STP is within them. Do I need to interact with you? And would your interaction with me brings my demise? Or we can

come to a point that you can take what you need from me, what I need from you. But at the end, we both separate with our own energies.

Many of you who went through the Corona case, and it touched and it killed some of the cells of your body, as you call it, you have shared the Soul of the cell of the Corona with you, and you dispersed it in different shapes from your body. You rejected it in different forms from your body. What happened to that Soul of the Corona? (:52). If you understand this, we even come to understand how viruses on this planet and the universe extend, expand and divide. And how we can even stand the strongest plasmatic fields, could be the Soul of another man, we call it a virus, to interact with.

All viruses, what we call, energy packs, are non-dimensional. They are without dimension. And some are still Soul of other creatures travel in the span of Universe, where the dimension of the STP is within them. Would they change and manifest in dimension of physicality within us? What we call today as parasites, in the dimension of physicality. Would we allow to do this?

If you go back to the teachings of many years ago, I refer to the time when the Man will trust his Soul with the captain. And when he arrives at the point of destination, he's released to take the shape of his manifestation. Now you understand what that means. Where you are as a Soul, and the STP, within another energy pack, we call it, the womb of the mother, the womb of the Earth, the womb of the Creation, all within the Soul of another creature, to carry us across, because they carry the higher strength to a deeper strength, higher level in the Universe, and deliver us to that point. We call them captains in the dimension of physicality. (:54). We call them whatever you like, in the dimension of the Soul.

Where these Souls carry and possess much higher strength in what they call, the shield, the cover, the package of their Soul, that they can accommodate both. Their own Soul, the Soul of the others, and when it comes to the point of destination, they can allow to go. What happen if you take the shape of physicality while you are in that cocoon within their trust, within their Soul? You become parasites to their life, to their existence, to their Soul.

Man will learn a lot about these things. Man has no choice. And as I said to you, we have started the process of colonization. And as we hear in the past week, the Chinese announced the same in the past week, that they will start the colonization, and mining, and living on the Moon. I do not think the two are coincidental.

You understand, we carry the knowledge and we come to understand more. And we talk through the word of the Man. And as I always said, we let the governments speak in what is agreed with the Keshe Foundation. In their own way, to make it the national pride. In their own way, that it brings advancement to knowledge of the Man. Elevation of the Soul, elevation of understanding, the Totality of the knowledge has to be passed on through the Soul, (:56). and not in the dimension of physicality.

When you come to dimension of physicality, you need the schools, translators, educators and the rest. When it comes to the level of the Soul, it's shared in the dimension of the fields of the Universe. And the knowledge is free and open to every Man. "I made Man in the image of Myself." And now I show my image, as a Soul. And it's for Man to decide in what monkey suit he decides to manifest himself. Black, white, blond, dog, cat and the rest.

Try to understand, try to comprehend the knowledge of the two coexisting within the same structure of the dimension of physicality. Then, when the time comes, you allow the Soul to take over, and when the time

comes, you allow the physicality to take over. And then, there's one interesting point. Would the dimension of the physicality and the STP, when is within the cocoon of the Soul, still have that tangibility of the physicality of the brain of the Man? Or, does that entity changes into the fields, which is connected to the STP, weak enough, with no dimension of connection, in a way, with the STM? (:58).

Then, one point which comes for those who understand this process, in a later time, in a deeper way, when we put the STM, which carries the STP within it, which carries the physicality within it, would they see a brain structure? Or would they see a brain as a structure of fields? The second shall be ?? converted, to be correct. Then this way, no matter state within the physical brain of the Man will ever appear in a dimension of the AA protein of the Man, beyond the dimension of this planet, where the STP can be endangered.

In a way, our brain will change into the field, plasmatic dimension, once it goes within the structure of the STM, as is cocooned. Then you understand. Man in every dimension, when it comes to the dimension of physicality, will take the control system center of what we call the brain, in a dimension of physical state, matter of the time, place and position. This way it guarantees its physical manifestation in any dominion and any position in the Universe. This is how you will travel in the dimension of the Soul from New York to Tehran. And Tehran and its atmospheric condition of the Earth will manifest, is the same. The Soul has a picture structure of the origin. You manifest yourself the way you are.

Then mother knows, "oh, you just arrived from New York, this is my daughter." Or, you decide to change shape, and knock on the door and say, (1:00). "I have come to see you." And then, the shape and the emotion of the Soul will confirm to the mother, "this is my daughter." It's interesting when the physicality changes, but the Soul sees through. I have tested this a few times and it's amazing what it does, and how it manifests itself. Does not matter what shape and color you manifest yourself in.

Now it comes to the point. In how you as Knowledge Seekers and those who listen to these teachings in the coming time, learn to switch. Learn to raise the second curtain as I call it. Or in a way create and go through the shield magnetic fields of the second curtain.

If you go back to the teachings in many simple ways, I have explained to you about when you go to sleep, your blood pressure, your magnetic field of your blood, reduces in the strength, which allows the Soul to expand, and pass through, and become the interaction of the Souls you call it, a dream. (1:02). Now you understand the worth, the work, and beauty of the STP. Where through the interaction of the Soul with the STP, you open that curtain. The first curtain is your eyelashes in the physical. The second curtain is the field strength of the STP, the Spirit of the Man. And when you become in unison, when you learn this, through the wishes of the Soul and the true understanding of the STP, the second curtain will open.

This will take time for Man to learn. One is the dimension of two fields? And one is the wish in the dimension of the field, and matter state motion of the eyelash? Then you understand when the wish is sincere, the second curtain opens automatically, even if the first is still closed in the dimension of physicality. The time of sleep. Mankind needs to understand this, and mankind needs to be aware of the Totality of the existence of both.

Then you come to understand, then you become wise, (1:04). then you start the process of living a true life of the Man, a true dimensionless, a true passengers of the Universe, a true way that many, many of you wish to have, that you don't call it a dream, and the dream becomes a reality of physicality to walk. In a way, you

open the eye of physicality, while you understand and control the dimension of the strength of the fields of the STP, which takes that curtain away, and allows the Man to see at the same time.

One of these occasions, which I remember clearly, happened a few years ago. In Austria, I stood in front of the person and she lied. She noticed she lied. And the only option she had, was to take the dimension of physicality and claim. Because, you cannot lie through the Soul, when you see through the Soul. This is how I knew, it's been adultery and betrayal. Because the STP spoke different than the STM. And the, what I call, the doer became aware of the wrongdoing, and cannot lie.

You see this more and more, you understand this if you practice it more and more. (1:06). And then you come to understand you don't need no Enhancement Unit (EU) and you don't need no Spaceship. You come to understand, I can raise both and see both. And you come to understand that the word, "oh, I was just thinking about this before you say it", is that I send you the message through my Soul and now it confirmed you received the message. It's like confirmation of email has been received. And then you can extend this with your lover, with your partner, with your child, with your friend. And verbal language, it becomes a pleasure of confirmation of the understanding. Verbal language becomes a sweetener in the dimension of physicality. It becomes that message in a bottle, which has been read and responded to. But this time the message you send in the bottle of the Soul was received by the soul in the rescue with all the comfort.

Mankind has a lot to learn. Mankind has to become aware of its existence in both dimensions. And not to be afraid of it, and not to shy away from it, and not to use it as a tool to feel supreme and call himself a prophet. (1:08). Why we brought these teachings and this subject up is very easy. As you are learning to become the passengers of the Universe. As now you are learning as we start teaching you last Thursday, last Friday, about opening the second eye, in a way opening the Soul. When you come across and when you take your position in dimension that your Soul is aware of the other Soul existence, but they don't have the knowledge that you carry, you don't call yourself prophet, and you don't claim anymore and you don't dictate by it. The way the South Americans were waiting for the Messiah with a blonde, blue eye, when the man appeared, mistakenly they gave everything up and they become to be the slave to it.

You become equal, and in that point you learn to be correct. In that point you we give the knowledge of the Universe you have to them unconditionally. Then no one can claim to be the guardian of the God with the rules to kill for it. To keep themselves supreme. When we stand in front of the world leaders, from religious to power, they have no dimension and dominium, as we see through their Soul. How can an Ayatollah tells me he is the Messenger, where we see through the Soul. If the hand of the man has committed to one killing, he has lost that position. Even his own Soul, even his own suicide and commitment to it. This is why suicide is forbidden, as it does not allow the elevation of the Soul. (1:10).

Then, you understand why it's been said, that no Man will take the crown of leadership, as in leadership you have to decide on the lives of the Man. Then we understand, how the process has to be. Then you understand that there is no king and no leaders as we are all equal, as we king, and control and lead our own Soul to its, what I call, the final destination. And if we reach that purity we manage to see the Soul of our Creator, and the physicality of the Mitra ?? is a Universe. "I made Man in the image of Myself."

If your Soul is in the center and the interaction with dimension of the fields, manifests itself as a STP, and then the physicality of you, then you understand the Soul of the Creator is within, and the interaction of the fields of itself, leads to the manifestation of what we call, the STP, which is the essence of emotion, and the physicality which is Mitra. As it said in Arabic, << Arabic Language >>. This is the beginning and the

end. As by dimension of the physicality, we bring the essence of the confirmation of the Soul to be within, as there is no physicality if the Soul was not there to radiate, and create the emotion.

Then, in so many ways, (1:12). we understand why we manifest ourselves in different color, races, and size and shapes. And it comes from the love of the Creator, and from his giving. Then you understand, when we meet with the world leaders, when we meet with the religious leaders they'll take their turbans off and they confirm themselves to be a man and not anything. We shall see in the coming time the defrocking of all the religious leaders as we meet them one by one, and the world leaders to confirm their power to be none compared to what is of the Creator. Then there shall be no leaders and no kings, as every king is the king of the STM.

Now try to understand and try to practice, because it's not us anymore, it's you and us as you and your own Soul and the STP in the dimension of the physicality of the man. As we are no prophets, we are just teachers. We teach you the way, it's for you to bring the prophet to the existence of your Soul and its expansion and its elevation. How you will achieve this, is something for you. How you will extend to understand this, (1:14). Is again is in the dimension of the life of you, and not us. We just show the path. It's for you to find the way to stay on the path, the correct way. There are no punishment, there are no heavens and there are no hell. It's just how closer with your actions you get to be closer to the Soul of the Creator.

Then try, close your physical eye. And then try to bring the emotion within you, that interacts with your Spirit, or what you call, the STP. That through, you see the light of the Soul. Then, you will see darkness. Because you have to go through the passage of the extension of the Soul of yourself. That's normal. If you stay on course, you will see the first lights, the first shining Souls. And then you open up to a new dimension. And then you'll hear every knowledge in the Universe, and every voice in the Universe. And then, as you connect in the dimension of the fields of the Universe, you can choose. The mother, the friend, the lover, or whatever, even the Soul of the person in front of you, lying to you. (1:16).

The process is very easy. Man has the tool to allow the opening of the second curtain. You call it, a heartbeat. You call it, the clarity of the feeling and emotion. And it comes at the point of servitude.

I open my Soul to give, to bring. I don't open my Soul to take and to steal. And it's very much like you see if the light is white coming to you, or you see the light ...

<< Mr. Keshe connection dropped here because he had to answer a call >> (1:18).

I'm sorry I'm back, I had to accept a very important call for the Foundation.

Now you understand the process, and now you understand how you have to do it. (1:20). You have many, many ways to raise, or to open, or make it transparent, it doesn't matter what word you put to it, to see through the Soul. In the physical dimension, you have the "eye holes" and the body has got used to it. It's a less resistance point of field transformation. When you are in another dimension, when you're in another position, you might not have eyelashes. You might not have the position of the skull to block. According to the time and position and the place, it will be different. But once you learn the process, it does not matter where you are and how and what shape you take, you can even be a stone and still see through the eye of the Soul of the stone. Does not matter how that stone is and how big it is. It could be as big as a planet and a star itself.

The STP, the STM, the Soul of understanding the Totality, is the responsibility of every Man on his own. And does not need no prophet, and no Mullahs, and no Priest, and no Rabbi, to tell you the lie to suit them to see through the eyes, that they can steal from your Soul. (1:22).

The way you have to learn is the way to understand the work of your physical life. To understand why you don't dream all the time, and why you dream sometimes, and why you dream of certain people, certain times, and not the times you want. And how sometimes you always are in touch, but you wait for a physical confirmation. One of our Knowledge Seekers who we know very well, sent me a picture with a feather on a book, very recently. And says, this is, I know how she communicates with me every time I ask something. Something appears that it confirms for me that she's listening to me and she understands. And my answer has been, it's you who have denied yourself to see it. So she sent it to you in the dimension of physicality.

Understand the physiology of the Man. Do you need to be asleep to let your Soul go? Or how come in the dimension of the time of what you call, sleep, the dream comes. Sometimes we do it during the daytime and they call it, "oh, he's a daydreaming." Should we change this? It's the Soul working, (1:24). and not a daydreaming. It's not a dream, it's the reality of the time and the space, where the physical condition of the body of the Man in the magnetic field strength of the given time and position allows the opening of the second curtain. We call it, the second vision, but in fact it's the interaction of the STM with the dimension of the other Souls.

We have created many names for the same action, as the Man has done for gravity, salinity, pH, and the rest of it. If you understand this, and we are to understand the process of how we can coexist and create the motion and the removal, or a movement of the eyelashes, at the same time as the time of the Soul interaction, then we understand, we live both.

In the world of science, we do this when we are born. We do this till one or two years old. But the scientists have not understood, and they connect it to different chemicals in the brain of the child. If you speak or if you have observed a child, (1:26). you see the child does not flicker their eyes so much. They don't speak, but when you speak to someone who is doing something wrong or the brain, the physical dimension is processing things, they tend to flick their eyelashes. Children, babies, infants don't do that much. And they call it. it's dopamine in the brain which causes it, because they don't understand that the child and the infants, not having the language of the Man, communicates through the Soul. And for that purpose, his eyes stay open, and the Soul transparency teaches it.

In many teachings I referred to how infants speak to each other, how they understand who is higher, who is lower, who understands more. One could be Chinese, and one English, and one could be African and one could be South Americans. You put these children of the same age, of 8 months, 10 months, 6 months, in one room, 2 days in one room, and you see, they interact, they communicate, they know, because they do that through the Soul. And the doctor says, "children don't flick their eyes so much, infants, because dopamine, something else, has not been created in the brain fully." Is that actually what is blocking the Man to see, to allow the STM to extend beyond the physicality? (1:28). Have we known the cause of our imprisonment of our Soul with the chemicals created by the dimension of physicality, and we never understood how it works? Does that level changes when we sleep? Or does that level changes when we have fears? Or when we are in love to see. We sit in the office in the back of the chair and our heart and our love fields smells the lover across the world.

Then we know the way, how to pass, to go through the second curtain, what I call, through the dimension of the STP, that the STM is ???. When the two levels are equal, there is no interaction, and one can pass through the other. When the STP does not lie to the STM, there is no interaction, there is openness. Think good. The first rule of Mitra. Because when you think good, then you can talk good, and you can act good (in Persian language). Perfection.

Then you see, the Universe is open to the Man, and Man has been the Man of the Universe, from the second of establishment and the existence of his Soul. Man has denied that with the eyelashes of the physicality. You've been the passengers of the Universe from the time of inception. (1:30). But you chose the dimension of physicality, and the eyelashes, and the nations, and the planet, to be your prison, to be the prisoner of your physicality.

In Arabic, they have a beautiful say. But it needs changing in one sentence. Every time they pray 17 times a day. And he said, << Arabic Language >>. I swear by Almighty, that Muhammad is a Messenger of God. Change the Muhammad to your Soul. Then you are the Messenger of your own Soul, and no one else. And the structure of the ??? Assam is complete. It's the hundredth word, which is what ??? ?? was promised, one day will be understood. This is the attribute of existence.

And then you understand the completion of the cycle of Man, (1:32). as he has been part of Universal Community, but he denied it ??? with his physicality. In a way, the STM should have taken the Man in a physical dimension and shown him the Universe. In a way, as you punish me and you keep me the same, when I'm free I'm not taking you with me. You can dream of it.

With the teachings of today and in the past years, now you bring the two together. And you understand the elevation of the STM by Man himself. As he does not need no ???, no messengers. As one is the messenger of the other, no one lies to the other. As the STP cannot lie to the STM, as both use the same strength of the fields of the Universe within them.

We go for a break, we come back. And during the break time, try to see if you can raise the second (curtain). The barrier you created for yourself, and no one else. And you're the only one who can open that second curtain, which is the clarity between the STM and the STP. Then you will see both dimensions. We go for a break. We come back. and we'll see how we can understand more. Thank you very much Rick, if you can take us to a break. (1:34).

<< **BREAK** >>> 488 KSW June 1 2023 (1:37).

K- Yes, yes we are ready to go.

Q: .. My daughter had her wisdom tooth extracted and it is in perfect state. My question is, can I make Gans from this wisdom tooth of my daughter with the purpose of making Gans patches to help other people that have problems in their teeth, such as loss of tooth enamel, bone loss, etc?

K- How do you answer this? (1:38). No, but yes. In a way you can, but, as we understand. I'll put it this way, I hope your daughter has a nice Soul, and a nice STP, that by the creation of this Gans, the best parts goes to those who receive it. If I can explain it that way. This is part of ... You know, in certain cultures and certain ways of thinking, they don't allow any pieces of your body to be taken by any way, shape or form. As they think, oh, they can do something with it, and manipulate it or whatever. And, there should be no reason, why not? But, there should be every reason, why?

And, this is what we face many, many times, especially in past recent time, with our doctors, which people come to them with very complicated emotional conditions. Where, I was present in one of these conversations and, our doctors in the background, they know what I'm talking about, they were there. Where the brother wants to give life back to another brother who's been in coma for a long time. But he went into coma when he was very, very young, very young age. (1:40). And now he's in double figure, past long time. And I put to them one moral question. I said, "you want the brother back." The technology of the Keshe Foundation can give that position. But the morality, the moral question for you to ask is, would a child who's been in less than a handful of years when he went to coma, and now is in twenties, thirties, or whatever, would not come to blame himself why. And then later on, coming out of coma, seeing the evolution and where he should have been, maybe, whatever, he'll commit suicide, because he cannot take the change. He cannot cope with what is in front of him. And do we have that right to create that condition?

With the new technology, with the new power in the hand of the doctors, with the hand of the Knowledge Seekers, who truly know, and understand how to use the knowledge. The question of morality comes first, which means the position of the Soul. In the matter language we call it, morality. In the dimension of the Soul we call it, the responsibility of the Soul. We are responsible for that Soul. And, if we bring that position, if you put somebody who went in coma in the age of 20, 30, and you want to bring them out of coma in 40 or 50, they have experience, they know how to handle life. But, how do you give life, which you know you have the knowledge, back to a physical condition, which is in maturity of 20, 30 years old. (1:42). When he went into coma, when he was less than a handful of years, and how will cope with the surrounding, with the life, and the blames, why me, what happened, and I'm not there. He is a man, a mature man, everybody else that he's seen has children, and he's there with the mentality of five years old. Not being able to cope, will bring them to different problems.

Now we have the knowledge to bring the physicality back. What is the responsibility of our doctors? What is the morality? What is the science of the new knowledge? Do we elevate them through the Soul, that the Soul brings in that knowledge? Or, we can bring them to understand, the lack of time in between, or lapse of time

in between, has no meaning. Because, this has a question mark on this planet, for us, in the physical dimension.

But it brings us to another position. When we are young STM, and we land on the planet Zeus, with the maturity of morality of understanding of the knowledge of much higher. Are we that infant? And when we land in another place where we see them like nomads and we know about the jet technology and the computers, do we see ourselves higher? And how do we interact with the Soul of these creatures? It's not us anymore, it's understanding the responsibility of the STM and the STP of the man. And what physicality will manifest that fits the time, place and position. (1:44).

When you use a tooth of a teenager, should it be kept for the teenager in the future, if she needs. As it carries the characteristics and part of the Soul of that person. It's very interesting, when you speak about the STP, and you speak about the wisdom tooth, and you speak about dimension of physicality. What is the position of your wisdom tooth? Isn't it the closest to your Soul, the wisdom of understanding? Is there a wisdom in what we call it, the wisdom tooth? And, would we carry the characteristics of that wisdom, when we make a Gans and you want to use it on the others?

It's a, what I call, with the new knowledge we didn't have this problem till you put the question on the table. But, it's not a problem, is understanding the situation. Understanding that it's not just a tooth anymore, because that tooth, and the word of Bahá'u'lláh, bless his name, is a physical dimension, is a matter state and he has a Soul. And that Soul is created through the interaction of the STP, and the Soul of the person together.

We do heart transplantation, we do liver transplant. Now with Gans's, do we do a Soul transplant? Now you understand. (1:46). This is why in the Keshe Foundation development stage, we have moved away from the Soul, from physical materials, into the dimension of the fields. Then, we are open, we are not connected. This is what I tell you, you don't even have 5% of the knowledge of the where the Keshe Foundation development is. Because we cannot explain to you, we understand this, we understood this, and we are in the level of interaction of the... This is what I keep on telling you, don't look at the MaGravs, you're just looking after 20% saving, but you miss the 100% which is sitting there for elevation of your Soul.

You breathe the air to take the energy from it to elevate your Soul. You eat the food to take energy from it. With them your body of the Man, the physical dimension, muscle, is connected with copper. We made the MaGravs from the copper, which fastens the elevation of the STP, to elevate the STM. And you're still looking for that 20% waste of time energy of physicality. The structure of the copper comes from the Soul of the Earth, Soul of the Universe. And you're still looking for that 20%, 30% energy saving, where you have denied your Soul from the opening to the Universe. You feed yourself with the matter state, (1:48). I gave you the resources, the basis to get that energy for your Soul, and you're still after that winding, left and right. Maybe you understand.

You know, you give the most beautiful toy to a child, and it still plays with the box. And the MaGrav systems for you is that box. You haven't understood how to play with the toy. With the new knowledge, as Knowledge Seekers, you have to learn to look at the broader spectrum, the Totality, and not to fit the physicality. And, you do the heart transplant, and people say, people's character changes, because the Soul of the one which created the other, in the heart which is transplanted, is moved with it, it's not far from reality.

Then do you have the right to put that wisdom tooth to the others, and transplant part of the Soul with it? We are allowed, we are freely allowed to do so. But, are those who receiving it, are free there to receive it? And is the Soul of that tooth, whatever, has reached the point of maturity or servitude? Or is it still in the abusive mode? Now you understand.

As I said, we go to new phases of teaching. And these are the facts you have to face, from now on. (1:50). I didn't know, does not count. Because the knowledge is released and you know, it counts. You are responsible for it.

Any other question?

Q: .. Good morning Mr. Keshe. You mentioned that Jesus learned about transmutation shortly before the crucifixion. It is reported in the Bible that shortly before, more precisely 40 days before his crucifixion, he was with some apostles on a mountain and the episode of the transfiguration occurred, where Jesus was enveloped in a very strong light and Moses and the Prophet Elijah appeared at his side and they talked in front of the apostles. My question is, would Jesus encounter with the Souls of Moses and the Prophet Elijah have been the moment when transmutation was taught to him? If so, would the apostles have understood anything?

K- They can write whatever they like. It is... many of us, in the dimension of understanding the Totality, only receive the knowledge, (1:52). at the point of need, and not before. Because then we affect the course of action. Or we premeditate not to be. If this was true, if this was correct, Jesus would not, never allowed himself to get to the cross. He would have mended his ways to be able to teach ?? man.

But he had a purpose, there was a purpose for him to be put on the cross, because of whatever. But in a way the knowledge comes at a point of understanding and a need. And we hear a lot, in the past few years especially, I've come to understand more about how different sects of Christianity interpret the same thing to fit them for certain people to be the leaders of that sect. But in fact, the bottom line of it is there is no truth in any of it. It's just how they interpret it to suit them, to call themselves, Catholic Church, Orthodox Church, the Armenians, the Church of, God knows, Russia and the rest of it.

If the basis is one, why does it need to be interpreted? But don't forget, Christ said himself, "my work will be carried by 72 ships." Which means he knew that his teachings will find 72 different ways of interpretation. (1:54). Don't forget, the Bible we read was put together 300 years later. So anybody can put anything to fit anybody to show it does.

The only, the only message which is written by the man himself, is Bahá'u'lláh's, bless is name. Muhammad was written from ?? Hadith 40 years later. Nothing we know about the truth how long later Moses what you call, the Torah was written a thousand years later, 800 years later. And you can imagine how many stories changes to be fit what. And, this time of teaching, you hear, you're part of that process of the evolution and interaction. You hear the voice, and there's no interpretation to the voice. Now you have to understand, this is what I said.

If you read the book 1, 2 and 3, what you read as a second version, second edition, is very far from the first edition which I wrote. This was edited by somebody who was trying to translate the knowledge, the way they understood. We had a big battle with this lady. We don't want you to write what you understand, just translate. If you can get hold of the first edition, which is not, it's got a lot of English mistakes here and there,

(1:56). you get the true essence of the knowledge we passed on. Which you don't get so much, in such a strength in the second edition. We don't published the first edition anymore. Very few number of people have the first edition. I think about a thousand were booked, printed. Then you get the true essence of the knowledge.

As was with the MaGravs, right turn, left turn, it's not this, that twisted the other way. The lady wanted to change the word to fit English, because the look was written with one ??, or when it was written, because it was to be published past, in ??, and now "it's looked," has become sight. Now you understand the difference.

The same is with, we don't understand, it does not exist. So, 40 days after, 40 days before, resurrection, disappearing, and everything else has mutated to, as many versions depends which path of the 72 ships you sit on. The worst one, the worst of the whole lot, is the Catholic Church. Because it's nothing but lies, it's nothing but what is changed to suit, the way it was built to suit them. If you go back to the Armenians and the original orthodox groups, you find more, less of dilution and change. The worst Bible which is diluted, (1:58). which is changed to fit the Emperor and the servants of the Emperor in the dimension of the Soul, is what we call, the present Bible, which in Catholic Church promotes so much.

Any other question?

Q: .. Good morning Mr. Keshe and all seekers of knowledge. When the "second curtain" of reality opens, could you guide us on the emotion of reality?" Thanks for the guidance.

K- No, that's your job. Otherwise, we'll become another Messengers. You have to, to befit the life of Mitra. You have to befit the understanding of the "three rules," as it says in the Bible. The three kings, the gift from the three kings. That's the king which means the "crown of the work of the Creator," nothing else. Not king as a physicality king, king as the rule, king as the principle. If you understand that, you'll find out, you become very wise very rapidly. (2:00).

You will see through many, many things. But don't fool yourself, "Now I see, I know and then I become." The more you see, the more humble you have to become. And the point of arrogance is the point of receiving.

And understand one thing, that your job is not talk to elevate anymore. Your job is to give to the Soul to elevate itself, that it talks itself. This is why, if you understand now, why we keep on telling you, "we elevate the Soul of the world leaders, we elevate the Soul of the children, we elevate the Soul of the religious leaders." Because we let them speak the word, because we elevated the Soul. When you speak by word, you need time to see the president, and you'll never get that time. But you can reach his Soul instantaneously, if you are sincere to raise it, not to take from it, or try to dictate to it.

We, as I said, spoke about that you'll see the colonization of the Moon and everything else. And within a week or two now, we see in the Chinese press, that the government has announced what we said very recently. Do we have somebody who leaks the information from inside? Or are we part of the information? Cannot be coincidental. There are too many coincidences in the work of the Keshe Foundation and International work. (2:02). If you read, as we have received from our, what we call, Chinese community, this is the announcement by the Chinese government in the past few days, as it has been in the Press, which reads very easy. It says, at the press conference of the Xinjiang, 16 man mission held on May 29th, Lin Zheng revealed that recently, the Lunar landing in the ?? of Chinese ?? man Lunar exploration project, has been

launched. And the overall goal, is to achieve the first landing on the Moon by Chinese by 2030. Carry out lunar scientific investigation and related technical expertise. Break through the mastery of the key technology, such as Man, Earth, Moon round trip, short-term residence on the lunar surface, and human machines joint exploration. Complete multiple tasks, such as landing, ??, mining, research and return. And, as I said to our Chinese friends, we'll have the champagne ready for them when they arrive. Don't forget, (2:04). Chinese are working on the land moon base colonization in 2030.

NASA is working on 2030 Mars landing, human life. And the head of this section of the, what we call, NASA organization, is a Knowledge Seeker. And he is a listener to these teachings, and most probably he'll say, "Keshe, you are not supposed to tell that." But he is, he's one of, he supported us heavily with it. But, NASA has put a banned communication between us and them, but not the Chinese.

And this comes to the back of elevating the knowledge, giving the knowledge. And it's just not coincidental, that as I said, in the ... Now you understand the work of the Foundation. Now you understand the work of your own Soul. There are no coincidences. There are no coincidences.

Very soon, in a very, very short time, you will see Iranian nuclear physicists in the Universities of United States teaching directly from Tehran. Because the American nuclear physicists, American Space Technologies, are in the first class, still sitting, waiting for the bell to ring to start learning. Compared to what it is within the Chinese and the Iranian Space and nuclear technology.

And then we understand, then we understand we are all equal, because we teach through the Soul. (2:06). We teach through the understanding of it. And this is important for all of us to understand. Don't look at, "oh, such and such .. Keshe said such a thing, and now a few weeks later, a few days later, it appears." This is how it works. This is how it's supposed to work. We elevate the Soul of the scientists of the nation, not one scientist anymore. And this is part of the understanding of the man, new dimension of life, which we ignored. And just because some of us have access to it, does not make us special. We are just aware of it. And we thank we are aware of it. We're thankful in the knowledge and the beauty we are given.

And this is why we called you to join us in the past few months, in meeting with the world leaders and the rest. Now you understand how it works. Maybe you understand how it works. The elevation doesn't come by you deciding, the elevation comes by you sincerely, letting your wish to be there, to achieve.

Any other question?

K- .. Let me explain, this is totally... There is a point has written in the Iranian government, with the Iranian leadership and Iranian administration, in respect to Keshe Foundation, and our work with other nations. Keshe Foundation and its management, and as me as head of the Keshe Foundation, (2:08). we stay loyal to the Iranian nation. And we serve the other nations equal. We'll never betray Iran. This is the problem you have in your leadership, and in the work of the Ayatollah Khomeini of Iran, in respect to the part, Keshe Foundation, and Mehran Tavakoli Keshe. It's your problem, and not ours. We make this clear, in respect to the meetings to take place in the coming days, that we stay correct and we'll never sell out Iran. As we know we shall not sell any other nation, unless we behave and work the same, on equal basis, irrespective of nation, color or race.

My word goes directly to Ayatollah Khomeini of Iran, in the process of past 48 hours and the meeting to you. Iran stays the same. In respect to the Keshe Foundation and our work, does not matter what arrangement and

agreements we sign with the other nations, to see the development of the technology. My call goes to the Ayatollah Khomeini of Iran and his messengers, and the work of Iranian administration. We stay solid in supporting Iran in the Space and Defense, and we'll not break rank. Thank you very much.

Any other question? (2:10).

Q: .. In terms of the traveling, what's the portion of the world population does Keshe Foundation foresee to take the physical transportation, as opposed to the energy transmutation in the future?

K- It'll be a mixture, it's the decision of each man. Physicality has some beauties, traveling with the Soul has beauties. It does not mean that you don't see things when you travel in the dimension of the Soul. You... there is awareness and there is confirmation of existence. It's the beauty of interaction without ?? painted works of physicality. Even though the dimension of Soul has it's own problems, it's not problem free. If you think, "I travel, I interact with dimension of the Soul, that's it." Both have their own beauties and their own, what you call, problems. Or interface, interaction, understanding, whatever you want to call it. But it'll be choice of the man, and we do both.

But the beauty of it is, as the STM opens up, and the knowledge opens up, now that we start teaching to the other races in the Universe, would we be happy to choose to only to travel physically on the dimension of the Earth, or we travel to position and then we change position from the Soul to physical dimension travel, or observation? (2:12).

The interesting part will come for many of the travelers of the Universe is, what energies do you absorb to elevate your Soul, in, the span of the Universe? On Earth we eat, we breathe, we give love. How do we do that in space? That's another chapter of teaching. Are we fast travelers in dimension of the Soul? Or do we take position, just because we know we can travel fast? These are a lot of things, which we have to answer. We have no confirmation and no understanding of it. Unless we comprehend the Totality of both dimensions.

Any other question?

Q: .. My wife is over 60 years young, with the physical union of our physical Souls, my wife's face is rejuvenated to the age under 20. The skin is smooth and beautiful. Why? What is happening?" Thank you for the answer. (2:14).

K- First of all, what have you done? Or is it just to the eye of the beholder? This... the physicality, the dimension of physicality, is irrelevant how you look. I mean, it's nice to have a 60 year old, 20 year old wife, but won't that become a problem for a 60 year old man, to have a 20 year old wife looking but 60.

And, as I said, when we expand the dimension of the Soul, the physical manifestation become irrelevant. Maybe, maybe, when the physicality was age of 20, was when the Soul was at peace and happy and in balance. Maybe that's what's been achieved. You see aging as matter of time, we see aging as a matter of maturity of Soul.

But, in so many ways, if you understand this work and I've referred to it before, we've seen that years ago in the clinical trials, when we did, how women of 70, 80 went back to having the reverse of the menopause. Because it wasn't just a physical outside, inside the body goes for assurance of that I can reproduce and give life. Because my life is extended. People like... there is a...

I think it's a chart somewhere, if you can get hold of it on the Internet, you can find it. (2:16). Nowadays they define, if you are born in what decades and how long you live. Children born in early 2000, expected to live between 150 to 200 years. That's average, not everybody lives that life. Children born in twenty twenties, expected to live in 200 to 500 years physical life. People born in sixties and seventies, seen average of about 80, 90 years, 100 years. But with the new addition of the energy releases and the new knowledge of you can absorb energy, would that figures of 50, 100 or 500 years matter anymore? It's a rotation of Sun and rotation of Earth around the Sun. Where in the dimension of the Soul you're connected to rotation of the Universe, dimension of interaction of the fields of the Universe.

Would some of you live a million years in the physical time of the Earth? Would some of you born now, understanding the transformation and transposition in the dimension of the energies of the Universe, will live beyond when the Solar System is already demised, through its physical dimension interaction. It's quite possible. Not just because the mother dies, the child has died too. We cannot. And these are part of the realities which we'll face, we have to face. (2:18). And with a new knowledge, is open to us.

Do you still want to live 60 years, work hard, and then at 60, 65, said you're on a pension, and you got to live on few bits, just enough to a meager life, till that point of separation of life comes, you call it death, from the ?? you became a pensioner. Or, you tap into the elevation of the Soul of the Universe, and age of 65 on Earth getting a pension is a joke. Because, whatever you need, you receive through your Soul. And, you might live 500 years. You can imagine the French government will pull his hair out, because they increased the pension by 2 years, and we saw all the riots in France. Now, try to increase the pension to 500 years, and then you see what happens. There'll be no French government left, let alone the citizens.

So, it comes to the maturity of time. We see a lot of changes, we see a lot of things with the new knowledge will change. Be it physical, be it dimension of the Soul, be it traveling. And as Knowledge Seekers, you are already wise to it. You know what is to come, because you are the doer, it's not us. It doesn't say, "watch the space on Keshe Foundation teaching." We watch how you manage to get to the space, in your time, that you can teach us. That's why it's called, Knowledge Seekers. And if you have found a way to change your wife from 60 to 20, (2:20). I'm sure there are plenty of ?? like Azar and the rest, who would like to know the recipe. They still like to stay as members of Universal Council, because the age does not count in the dimension of physicality.

Any other question?

I'll tell you something interesting as part of the history of the Keshe Foundation, regarding this age business. As you know, once you become 60, before 61, you... if you are a member of the Universal Council, you have to resign to give a space for a new cycle to start, a new life, a new, what we call, process of elevation of the Soul with a younger Soul. And, when we brought this in, one of the members of the Universal Council, who thought it's the right to be there forever, raised a huge objection, "you wanted to get rid of me. That's why you brought this in." Not understanding the work of the elevation of the Soul. And then becoming the dictator, because I've been there first. I've been there because I have to. And as you know, she's not with us anymore. And this become, God given right, because I was there and I'm 60 and 200, I still stay member of the Universal Council.

In the future I explain why we put this in, and you understand the reason. Even though your Soul can travel the span of the Universe for thousands of years. If you are a Universal member, on this planet, (2:22). 60 is

your limit, in the physical dimension of the STM. And then you understand why, in the teachings to come. So, you can look, 20, but by birth, on the physical dimension, 60, is fantastic. I'm sure, they would like to know the cream mixture.

Any other question?

Q: .. Mr. Keshe, the purpose that Jesus went willingly to the cross, would this be to demonstrate the different levels of awareness, and to demonstrate the renunciation of the physical body?

K- It was done in two ways, but it was interpreted in a way that people would like to change it, that it suits them. He knew his wrong. He knew of his shortcoming. It wasn't hidden. Just go through the real life of Jesus, through the original Jewish historical, historical books and literature. Not what you read in the Catholics and Christians. History cannot be changed, because it's history, it's myth. And historians, Jewish historians have written about the life, (2:24). lifestyle of Christ, there and then. It's not written 200 years later, or 300 years later, with whatever they wanted.

Jesus lived a very flamboyant, beautiful, young man, and he knew what is going to come. He knew, he was told by 2 or 3 of his women companions, what their husbands were planning for him. He could have escaped. He could have left and gone somewhere else. He decided to stay because he... There's few reasons for it. One is that he thought he's untouchable. It would not happen, because the women loved him too much, they do something, but actually the pride of the man took over everything else.

But on the other hand, he knew, and he knew what is, what will be the outcome. They gave him the option to leave Palestine. And he took that option when he resurrected. And he went all the way to Spain. So, it wasn't unknown to him, and he knew he'll be put on the cross. It wasn't something decided overnight. He was aware through the lovers of what their husbands were negotiating with the Romans. Go through the true history of Jesus and his time in Jerusalem and in Palestine. (2:26). And then you understand.

Then there is no prejudice. Then it's not just because you read what's in the Bible. You read what is written as a history at that time. Because it's not tampered with. It's written by the Jewish historians. And he chose, I mean, he didn't have a choice. He never thought they'd put him on the cross, because, he wasn't the only one. They say, if you would have gone from Rome to Jerusalem, in those days, on the road where the Romans used to come and go, there was a lot of these crosses with bodies hanging off it. That was a way to do things, by the Romans. So, it wasn't the first time ever they made a cross just for him. It was like a lampposts of those days. Telling people, "don't do anything against Rome."

So, he knew what is going to be. He knew they're going to put him exactly where they put the others who went against anybody who paid. If you paid any of the Roman generals or Roman military leaders, they would have put your mother on the cross, forget about Christ. You wanted to get rid of your mother-in-law, you pay the Romans for whatever, they put her on the cross and they accused of her of anything she was, or she wasn't. So, cross wasn't something just for Jesus, it was a normal way of punishment by the Romans. And it's well known, if you read the Jewish historical papers, books, it was done years before Christ, and it was done years after Christ. And many of the crosses, when the body fell off, whatever, were used for the next victim. (2:28). So, it's made very elaborate. But in fact it was a normal way. And usually the people who, they carry their own cross where they put it on. So, what we hear, made so much glorious or whatever. It was a normal "bread and butter" of the time for the Romans.

As they always say, "potholes and crosses" came together because they used the pothole to eat till the body fell. If you know what a pothole is, the Romans used chariots, and chariots made holes on the road. And so they put, where there was a big hole, they put a piece of steel to cover the hole that the chariots can go fast. And as they went, they made the shape of the hole (which was also the shape of a pot to cook with). And the Romans and the others pick it up and use it as a pot to cook it. So it became, as we know, the "pothole," because they made the pots for the cooking. So it's potholes and the process came the same together.

And Jesus knew his destiny with what he was doing. When you mess around with other women, men's wives, there's consequences. But when you play with too many, there are too many consequences. Read the Jewish historical books, or if you can get hold of, time of Christ. Then you see the two different interpretation, one is the reality of time written, and one is what is polished to become. And then you see he chose, he knew, and because he knew he had, what you call, like, dimension of what we call, (2:30). transmutation through the Soul. He knew what he can do, and when he received the knowledge, he did what it was to be done.

He did what you are doing now, what we call, transportation and transmutation. He transported his own cross, when he came to it, he transmuted off the cross. And then, back into dimension of physicality. And then the same thing as I told you before. When you go to the Moon or when you land from New York in Tehran and you want to look like Iranian, in New York you were blonde blue, and then you look Iranian, nobody knows you're American, this is reality of the science, so now we understand the work of the Soul and the STP, and many of you will do it in the coming time, but no one can take the Soul away from it. And then, you see it.

He had that opportunity and he changed his look that the Romans wouldn't recognize him. And he left with his daughter and his wife. But that part cannot be spoken to, but then you read the people who do "the walk" in Northern Spain, South of France. That's the path of Jesus as a man. And he never spoke about his past. What you call transmutation, what you call transmutation.

And in a way Jesus is not the only one. Many men can do this and they've done in the time of life. (2:32). At a point of, when you reduce the energy field of the STP, and the STM is still active through the circulation of the fields of the body of the Man, the transmuted Soul becomes prevalent, and it takes over the physicality. And you can still be seen as a man, but the Soul is ?? not. We've seen that in the trials, what you call it, in the units (EU) in Austria, in the trials. Many of you went through this process, where Jesus went. And you chose to become a mermaid, if you heard a girl, half man, half fish. Many of you chose other things, many of you chose to see the Soul of the Christ or feel his presence. Now it's the reality, now we understand as a science.

Where, then it was a mystery, because teachers like us, as Universal teachers, our job is to teach the truth, the knowledge. Then it's for Man to manipulate it, or creatures of the Universe, to manipulate it, to advance the elevation of their Soul. The whole purpose of the teaching, all these teachings to you and in the dimension of the Soul, to the other races of the Universe, is how you can facilitate faster to reach to the level of meeting, coming in touch with the "Soul of the Creator." Nothing else. There is no other purpose to this, because the love of the Creator, what's like to see, that it comes back to, is loved by. We are in a way, "love teachers," but for the Creator. (2:34). But, for those who doesn't know how to, is the way is, we know the recipe. And it doesn't come by heaven or hell, it comes by understanding of the interaction of the fields.

Go back to the teaching of last week, how I explained to you, you decide the dimension and direction of the travel, the way we do it in the physical life, the way we do it as a physical changing direction in running of

the man, and chasing a man himself, he decides suddenly to turn, through the emotion or through the Soul. In the STP, if you understand the dimension of reaching the level of STP, which brings you to the Creator, and that's our job, nothing else. Then you understand.

That's why I say, there are no, no, no, no, no, no whatever you call it, the name of. Whatever suits you, does not count. What is the reality counts. And you put any name, any shape, any position you like. Some of us reaches it, and some of us reaches at a given point, and some of us understand it and use it. And like others, they say, "oh, I've been doing it." So, carry on doing it, it's good, at least you found elevation.

So, you have to be mature to understand what the teaching is about. It's not just about MaGrav. (2:36). We bring you in a way to understand how to elevate your STP, and then through it, understand how it works. That you can reach that point of maturity to reach your Creator. That's all. But, you don't need Messengers and you don't need Prophets.

Any other question?

Q: Dean .. Mr. Keshe, you've mentioned many things this morning. Thank you. One of the things I'd like to, for you to enhance, if possible, is, you say that we've only, in the public, we've received 5% of the knowledge, of the Foundation. And so, the real knowledge, is this all being given to others in the background, or is this in general, is this a Universal thing? How do you mean by this?

K- We have a research development side, and we have a public knowledge side. Research and development is hundreds of years ahead of the public knowledge. And we have shown the power of this to some of the world leaders in the recent past. We are not just sitting there like pretty faces. We teach the Knowledge Seekers who understand, convert it into a language of the Man, science of the Man. And then we deliver it to the world leaders, to bring that change. (2:38). And the knowledge in the hand of our Knowledge Seekers at the top, is hundreds of years ahead of what you see in public as a Keshe Foundation knowledge. But, the world leaders understand the changes it brings.

Q: Sorry to interrupt you. What was their reaction to this when you've shown them the knowledge?

K- It is not a reaction. They... The world leaders have sided by (with) the Keshe Foundation, without a doubt. It's their job to come out, not for us. But as I said, we, when we were in China before the Corona situation, we had a gentleman, other gentleman in our offices, who came out of nowhere because of the situation we understood, and on a dinner table if I remember correctly, Wang Lin was present in that meeting. He said that when the world leaders meet, Keshe Foundation is discussed. He said, I've been there when it's discussed.

We are not the flavor of today. (They) are aware that the knowledge is there, and how we are teaching it. And it's for the benefit of their citizens, and their, what you call it, their structure. You've got to understand, we teach every Thursday. And as you know my teachings by now after nearly 500 sessions, there is no barriers to hold me back. Be it praising governments, world leaders, or literally, outright explaining and stating where we stand and where we are. As you heard a few minutes ago in that respect, (2:40). the interaction with the Iranian government, his Eminency Ayatollah Khamenei of Iran, in interaction with the Keshe Foundation in the past few days and to come. We never hold back.

But, would they know the knowledge is needed to be, because their scientists listen to it, their people listen to it, and they bring the change. And the Keshe Foundation, except one section, I think it's China or part of it,

has never been banned, with all the red flags and the "firewalls" they put on. They allow us to teach, it's the same with Iran, it's the same with other countries. Because they know the knowledge is so correct, they know, but, when would the... In a way, if you look at it, they say, "okay, let him teach, let him take all the fire and the blame, and we take the benefits of it when it comes."

We were in a meeting, very recently, and officials, government top officials from the government, they brought with them scientists, who they thought, they are the top, not that they know it's the top scientists, the government doesn't bring any scientists off the street, they brought their top scientists to, into a discussion. And, the minute one of the top scientists walked out of the lift (elevator), he said, "hello Mr. Keshe", and I couldn't recognize him, because of whatever, but our Knowledge Seeker recognized us, we met him there, and he was a Knowledge Seeker. And the officials were taken back, that how such a scientist at this level knows and everything. And they didn't need to go into any more details of, because one of the top scientists they brought is already is a Knowledge Seeker. We didn't have to discuss anything. It was just to listen what they missed. (2:42).

And, it's the same structure, with other world leaders, other conditions. They leave us, as the Keshe Foundation, to teach you lot as Knowledge Seekers, for them to benefit from it, when it comes to it, but let him take the fire. We are aware of this for years. And so, it's not how their reaction is, they already reacted over years, by letting us be able to touch, to teach, and you don't see us being banned. No organization has taught like this, right across the nations, from the Communists, to non-Communists, to Kingship, to Presidency, to Democracy, freely. How many of you are from how many nations on the line today? From 100, 200 different nations and territories, from every corner of this planet, and every Thursday, you know it's there, and you come to it.

It's the job of your governments, to come up with what they have done, or what they are doing with the knowledge they receive. We don't look at their reaction. The reaction speaks with what you are here, We channel, we teach from sunrise to sunset, from China to Los Angeles. From Shanghai to Los Angeles, going around the Earth. Some of you are from Shanghai, some of you are from Los Angeles on the line. Some of you from Europe, from Iran, and every other nation in between. And nobody has stopped you listening to the teaching.

As I said, we were in a meeting recently, with one of the most influential man, in one of the biggest countries in the world, he said, the scientist said, (2:44). "we know, and Newton know on this and that, this goes against it." He said, "now we write a new book of science, let them come to us. This is what it is, and we take the knowledge from now on." So, the world leaders have made their decisions where we going ?? We don't look for reaction, the reaction speaks for past 10 years of me being able to teach every Thursday.

Q: Mr. Keshe is it the same when you speak with the religious leaders? Theology? Do you get a different response totally? Or is it the scientists from the Theology? Is it a mix?

K- Ah! We had both, we get all of them. We... I have no limitation, there is no boundaries with it. Some of the Knowledge Seekers are here, when we sat with the Vatican people. And some of the Knowledge Seekers are here, when we talked to the most religious, religious people, who are in high positions today in the Iranian government, as Mullahs and Ayatollahs. I had a reference sent to me by our people in Tehran. This guy who is now the head of this, this, the highest rank in Iran is in the news everywhere. He said, Mr. Keshe, you already spoken to him two or three times. He knows you. And now he's become to this position. He

follows us. He knows our position and stand. We talk to the people who are in power, and ?? who come into power.

One of our Knowledge Seekers is a very, very close, top advisors to one of the world leaders who's just been re-elected. And he works through us to the world leader. (2:46). One of the recently re-elected world presidents, his literally closest advisor is a Knowledge Seeker. We meet frequently, regularly with each other. And he takes the knowledge across to the government. Then the ?? patent, it has to work for them. So we don't look, we don't see. We are in the roots of it. We are in... we taught so much freely that we have touched the Soul of many. So, it's not that Knowledge Seekers, but they're regularly, every week, they learn about it, they use it. And that's all it counts to me, that positive change. Doesn't matter how and where.

Q: That seems to be the beauty of what you've been teaching, Mr. Keshe, is that understanding that it's from any Soul, are all equal, and higher, and lower. And that is the real beauty. That when you touch the Soul, it is a different, different field strength totally. And it makes people humble. And that is the real beauty of it. That really is quite special.

K- The reality is you Knowledge Seekers, who carry it. I come from a very typical, unique family structure. And my mother always told me, no one should know who you are when you walk out of the house. Where your bloodline comes from and who you're connected to is in your head and not on your clothes and in your mouth. And she lived that way, and we all, we live that way. (2:48). And three, four years ago when I was in Italy, one of my own close members of my family, at a dining table, very close, extremely close to me, she said, "you are not from there, how come we don't know?" I said, "you don't know a lot who we are."

The Keshe Foundation is not me, is all of us. And we all behave the same, we teach freely, we do our best to share the knowledge, and when it becomes, as a guy said on the CNN, I believe it, when it comes to CNN, you all will say, "oh, we are there." But, it needs its time.

Even today, we have been working since 4 or 5 o'clock in the morning. We receive so much support and people who are not even Knowledge Seekers, but they want to see this technology, on... to bring the change. And they're working on it, we... we just... not battle, we just work, continuously, 20, 22 hours a day, sometimes, to make sure it happens. In past 3 months, I've lived more out of suitcase, than actually being home. But you all received the teaching without knowing where we are. Sometimes we change the teaching time, because there are important meetings with officials, governments and other things that cannot be changed. So, it's better to change the Knowledge Seeker teaching, than trying to move there at another time. I literally, three, past three months, four months, lived out of the suitcase. And even just landed last night home, just for a few hours. (2:50). And we are again up in the next few days.

I have found peace in my private life. And that has allowed me to bring Keshe Foundation, in the past 3, 4 years, to where it is. What I was looking for life, all my life, I have received and I'm thankful for it. And it allows me to serve fully. And there's nobody to destroy it from underneath, continuously. So, it's you as Knowledge Seekers and us to set the course for their next step, that is bringing such a beauty in world leaders decision, and in economical ?? situation, and everything else.

Yesterday I had a call from one of our top man in Keshe Foundation, that they came to him and gave him some information, I said, it's correct, from the government. Because, they know we work correctly with, when we do with governments. You don't think if they accept or they don't. The acceptance of Keshe Foundation, really teaching and me still, openly as a, you have to understand, very, very important position. I

think it's more important than anything else, sometimes I look at it. With all the sanctions on Iran, with all the 80 million Iranians suffering for nuclear technology of Iran, me as an Iranian, an Iranian passport holder, (2:52). still travel the span of the planet, and welcomed by open arms, by all the nations. And we still in 10 years we are teaching, and nobody has stopped us, nobody has walked in, you can't teach, they haven't closed our Zoom session, they haven't closed our other session. So, we are doing something right, but let the guy take the bullet then us, let him teach, and when it works out, we'll take the credit, we don't mind. If this is the way to bring peace and knowledge, let it be. Doesn't matter who brings it and who goes on the cross. We walked away once from the cross, with the new life it won't be the first time.

Any other question?

Q: Just very quickly Mr. Keshe, the picture that's on the screen, is the AI doing a good job? Is this dome, does it sense to you, about anything that real?

K- I don't know where it comes from, these are the new imagination from Rick, and the people he worked with in the background.

R: Yeah, I just wanted a picture of aliens in or an alien background with humans as well meeting. And it's somehow generated this image and I said, "that's close enough, I'll take it." So... It makes it really easy as an artist. You just ask for what you want, and you choose from four images, if you like one of them, you can expand on it a bit, or whatever. And it's not exactly accurate or anything, (2:54). but it gives an impression, it gives an idea, or it can inspire others to think of it, in other directions, or whatever. So, it is what it is, I'm not sure what to think of it yet.

K- Which is an alien and which one is a human?

R: Well that's the thing, some of these beings at the bottom have like three legs and tails and funny things on their arms and what not. I'm not sure, some of them look like trees and walking trees and that kind of thing. So, I guess all types of beings under the rainbow. If you think we have an identity crisis now, wait till the future.

Q: Did you think Rick that the AI is Earth based? It seems to be like the landscape of the Earth in the background.

K- No, many planets look like this, it's not just Earth. Mars has such a features, Moon has such a features. Wherever the magnetic fields and the, what you call it, the Soul of the Planet, and its STP and in the dimension it is, moves, you see these structures. It's not unique.

R: Do they have rainbows and other planets?

K- Everything else, yes. I received a very beautiful thing, I think it's from Azar, someone recently. Emirates airline is trying to promote tourism, and it says, "this is not such and such a country, this is this country, this is not such and such a country, this is this country." And, so we have images of, we have to get the same thing in the same places, not. (2:56). So, it is, this image can be anywhere in the Universe.

Q: I remember you saying Mr. Keshe about there will come a time, place and position where you will have like centers or places where you will go as a human to learn how to experience another atmosphere, another dimension, another planet, you know, another field strength. .. Is this still relevant?

K- This is very relevant and very soon we invite you to these places. Maybe in next 3 to 5 years. This kind of space environment will be brought into reality and working condition within the next 3 years, 5 years. We have... the reason I tell you this is not something we dream. We have signed into it. We have signed agreements to develop such a center. It's going to cost huge amount of money, but the governments have committed themselves to it. Because we have to do it to be able to colonize. We have to see what it is and what we become of, and how it will effect us, before we commit millions, hundreds of thousands of people into a new condition, into space. It's not if it's relevant, it's Keshe Foundation and it's management has signed themselves into a structure of such a thing. You will hear about it, it's the job of the government to announce it, but in a near future, this is a reality, (2:58). this is what we will be working on in the coming months and years, to build such a structure, not in a one room, but in a huge space, to see how people interact, how people do.

And we learned a lot from the lockdowns of the Corona time. Psychological behavior of lockdowns. Or psychological behavior of a large number of people in a dome. Do we need to create jobs for them? And do we need to keep them busy? Do we allow them to live in different dimensions? The Corona has brought a lot of knowledge to the structures like Keshe Foundation, NASA, and space agencies and working on colonization. How people look, live in an open space, but they're locked down in a space. You can go shopping, but such and such time.

To you, it's just something you went through, but people like us, we study this very, very thoroughly. Social behavior in a large structure in space. And we've seen how people behave. For the love of, fear of their own life, and secondly for protecting the others. We stay in, and we work from home. We don't need to go to the offices. And now we see that pattern following after the Corona. Many, many, many offices around the world are empty, because you don't need an office when you can work on your bed, and be more efficient than you going in there, somebody paying the rent, the lights and everything else, for you to do your work.

It's very, very interesting. If you understand the changes which has come in social behavior, to you is something you could just go through. (3:00). If you go through the airports nowadays, if you go to the airports before Corona, you had so many desks, and so many people sitting in it. So, they had to go, because of the Corona there was no passengers. So, in this meantime, a lot of airports have upgraded to none, what you call it, physical body presence ... Now, before you had to go, wait in line, do the check-in, they give you a ticket, then the lady takes your suitcase, and everything else. If you go, we've been doing it for a few times, in past few months, as I said, through us in Vienna airport. You... there is... all the desks are empty. Maybe one or two people are sitting there. If there is something needed to be done, all the human workers have gone. There's a machine. You put your code in, the barcode. It gives you a ticket for your luggage. You go to where you used to see the lady to put your luggage in. You put your luggage on there. There's a machine that reads it. Take your suitcase, and you go. There is no human interaction.

And if you go to a lot of airports nowadays, you have to open your suitcase, take computers out, and all that. And there is so many people standing there. If you go to like Amsterdam airport, now they brought the system. You don't open anything. You just put your luggage and everything on the belt, and it goes through. So all those mayhems we had, now is solved. And there's less need for human interaction. Where did all these jobs go to? What do these hundreds of people sitting behind the counters, hundreds of people checking

your luggage and opening, take your bag out, what happened to them? When you go to Amsterdam airport, you just put your suitcase with 10 telephones and 20 computers in it on the belt, (3:02). and it comes out to their end. If they have a question, they ask. They see everything you have inside. And it's two men. What happened to all tens of people, do this, do that, checking you in?

So we see the change of social structure. We see there is no need for offices to work with. So you can actually live on the moon and work for an insurance company on Earth. That's how it's going to be. And with the new present communication system, which we have developed now, is actually used as of this week by our doctors, it's instantaneous through the Soul. So you can actually work with the computers on Earth instantaneously.

The new wireless structure of Soul interactions in the physical dimension has gone into trial by our doctors in the past few days. And we'll see how effective it will become, and how it works in the next few weeks. So there is less need and need to be. And what are we going to do with all this unemployment? What happened to all those hundreds of ladies behind the counter checking you in? And there had to be three shifts of them, because the airport is open 24 hours a day. Now, it's two people, check you in, done. I think the next step, it's like when you go now to the hotels. You had a butler and you had somebody who come and check you in, and, or if you had baggage, or something. If you walk in the, what we call, the hotels nowadays, most of the hotels, they have a, what we call, robot. There's a package for room number so and so, they just put in the robot, the robot goes, delivers and come back. (3:04). You don't need that human butler, that whatever. The tipping time of 10 dollars by the Americans is over.

Q: Mr. Keshe, can I ask you a question quickly about that? So, would it be better that, or how will it be? Will it... the teachings to be present somewhere else, will it be from other Souls that are present in that environment? Or will it be through Souls present here on planet Earth? How will that interaction work? Who would be the best teacher of this?

K- Oh, every one of us. Depends whose Soul you are, as a strength of. You know this is one of the biggest thing nobody can claim. As I said, "there is nobody king, I'm the best teacher." No, we... it depends how we teach and to what level we reach to teach. Some of us are good in making Gans's and we got stuck with it. Some of us now are in a different level.

One of our biggest problem now is to put a group together of Knowledge Seekers, who can jump from where they are and they think they are the best in Knowledge Seekers in the Keshe Foundation, to where we really are in research. Some of my present problem is, how do I bring somebody from the first class to the sixth class? And would they understand it? The development and knowledge gap in Keshe Foundation is so huge, what is in public and what is in research and development and understanding of it, that at the moment is one of my biggest headaches.

Very few people understand very few parts. And at the same time, we try to guide, to put the other things together. (3:06). We try to train the others to come in. We've got no Knowledge Seekers, but working with the Knowledge Seekers who start understanding the structure, in three different countries, four different countries, working at the same time. And trying to bring all this, and bring in Knowledge Seekers who thought, "oh, I'm making Gans's, and I did this and I put some patches there." And when you come to see what reality the knowledge and the development physically is in the Keshe Foundation, what would they think? Would they back off, or would they jump, or they think suddenly they are God? Or would they be holding like the others till we are ready to mass teach?

One of the biggest problem to jump to the next level, what we see in next few years, is, as I said to the officials in past few weeks, is to teach the Keshe Foundation technology in mass media on televisions, physically for people to go through it. And then, which of you Knowledge Seekers, who are stuck with Gans's and the others, will jump to energy, will jump to magnetic field transfer? This is one of the biggest problem. Our problem is not technological development, our problem is, how many Knowledge Seekers we can take across this threshold of advancement, which is kept in 3 or 4 groups around the world, and the present Knowledge Seekers who think they know everything and they can teach.

There's so many ways, certain things, you can teach how to make Gans's. But what's next? And then when you do that, what is next? How do we interact with the Soul? How do we interact? (3:08). How do we explain to the top scientists, not the Soul, but this energy envelope. Because to me, this is the only way they understand nowadays, till we come to the... they mature enough to understand the Soul. How do we deal with this energy envelope? That we put you in it. Called your Soul, carrying your STP. And how do we transmute you? How many of you can we transmute at the same time? Do we need that master trustee, that we put all family in one, all the company heads in one, and then we take them to moon in one go, or do we shuttle them one at a time?

These are not talk of dreams, this is actually going through the process of different part of the Keshe Foundation, scientists who work on it. How do we mutate energy into matter and matter back into energy? And we get the same thing back, we put an orange, we get an orange, we don't put an orange and we get an apple.

Q: .. Can I just quickly say. So, many of the Knowledge Seekers, you've given the knowledge, a lot of knowledge, a substantial amount of knowledge. And it's been able to decipher the bits you need to put the puzzle together to be able to transmute it to so you can use it, you know to go into the dimension of plasma, real plasma. And I think many Knowledge Seekers do this when they openly receive the knowledge and they make the Gans's or they make them the matter states. And then when they start delivering it back to people to pass the knowledge on then they are transferring transmuting the knowledge into plasma again. So, they're receiving it on a Soul level. (3:10). Is this your understanding? Is this what...

K- It is partially, but we've seen teaching Knowledge Seekers in a very special way. And then when they see, they learn, they do, they suddenly break off and they don't... they disconnect from the Keshe Foundation. That it's their knowledge and they start working and doing things. We've seen that with the doctor in Washington. I spent a lot of time teaching him, hoping that he will come to what it is. And once he learned, he thought, "now I don't need the Keshe Foundation, and don't want anybody to know I'm using their technology." You know exactly what I'm talking about. And he's still in doldrums of, what do you call it, rotating reactors and all that rubbish, which now he thinks he is.

We taught many people, a number of Knowledge Seekers, to bring them up. We trusted that they will share their knowledge. But now it's become money making, profitable business, that's all I'm caring about. But they pay for it. They pay through their Soul for betraying their own Soul. Don't look at the short term, look at the long term, what is going to come up.

We don't stop teaching, doesn't matter who. But then the trust comes. As I always say, we test the heat of the fire with gold. Is it hot enough to melt the gold, like melting your heart? And we test the man greed with the

same gold. If you still carry ?? this gold, it's just there to serve a purpose. Or it takes over your time, and it's, what I call, glare, blinds the man. And we've seen that with many, many Knowledge Seekers.

We had a Universal Council member, (3:12). I remember walking in Italy, with them. And they were not from a country, they were Universal Councils in the country they adopted. And he said, "we don't need the Keshe Foundation, because it brings us a lot of business for us, on our website. We sell all the products, we are connected." And I said, "You got to ?? get out of the Universal Council." So, let it be.

The knowledge does not belong to us. We are just teachers. But we have to observe that it does not fall in the same path as before. It is, it has a higher value, it's a time for a change. And that change has to come through understanding that no gold has no value. But the elevation of the Soul has, that's the gold. And then you leave it to the others.

Q: Mr. Keshe, the Knowledge Seekers that receive this knowledge though, that are becoming the teachers and giving this knowledge, they, as you've spoken about Christ, Jesus Christ and other prophets, ... the knowledge as you've done this time, is shared among, equally amongst man, and many around the planet. So, isn't the elevation of all these Souls, as one Soul, ... are, you know, bringing about the change within inside themselves? So, the change is present in this moment. You've delivered the ... you've delivered it, it's in position.

K- We have not even delivered 1% of the knowledge. But if 1% makes some people think they are God, (3:14). so you can imagine if we give 1% and they got 1 millionth of that 1% and they think God, imagine what they feel when they get the 1%. And then how would they share it? You understand? This is the problem. But, that's that fire. Let's see who melts with it.

K- .. Shall we call it a day?

R: Sure, if you wish Mr. Keshe.

K- If we have another question I can hear.

R: Well, we have a hand up with Salomea, but if you feel it's time to end, then we can do that. We've gone for quite a while here.

K- We haven't heard from her for a long time. Let's see what she has to praise herself for. Come on. Let's hear, listen to her.

Q: To praise me? Myself? I praise you, Mr. Keshe.

K- Carry on.

Q: It's my free day, you know. I'm busy with my home. And I'm not allowed and I don't have any possibility to be in contact with your Zoom and I'm so sad. But today is the day of the children, of the child. I am the child of the Universe. So, do you remember the letter which I wrote to all Knowledge Seekers from your Zoom, I also sent to my old colleagues, including ministers and director general, and they sent to European Union. (3:16). And next day, I have seen the concept of sustainable peace included in a sustainable development strategy of this institution, because I sent on 9 May, it was a day of Europe. And this is an example how our wish can become a reality if we elevate our Soul. And I think that elevation of the Soul is the key, as you said, to us to reach and manifest all what we want. And now the question to you. What is the key to elevate the Soul at the level of the Creator from the Keshe Foundation point of view?

K- What you mean?

Q: What I mean?

K- Can I just answer something? There's a very nice questions appeared in questions in the webinar chat. It's from one of our Knowledge Seekers. Says, "and what do I do with the car washing?" Start washing UFOs, it'll be more profitable. There is no need for cars. And if you can find a washing machine or washing system for Souls, you're quite welcome, we'll teach you how to do it. Carry on.

Q: So, we have to wash our Soul, in order to become equal with the Creator, maybe.

K- We don't need wash, it's just becoming humble enough to receive.

Q: Yeah, okay, you said to me, to become humble enough. (3:18). Thank you very much, this is the one answer I was looking for.

K- Thank you very much.

Shall we call it the day Rick? .. It's nearly three and a half hours.

R: Yeah. Ok, well thank you Mr. Keshe for another Knowledge Seekers Workshop here. Is there anything else you need to announce or we should say before we end here?

K- The Knowledge Seekers tomorrow, who did the session of the elevation of the Soul of the victims of child abuse, we will meet you tomorrow, if you have already registered for it. And hopefully, some of you have managed to raise that curtain, and raise, and understand how to do it. And bring that illusion of separation of the Soul from STP away from it, that we can raise the Soul of, and the, what we call, the abusers. The main target of our work will be the nation leaders, who promote this, live through it. And we'll see how we get through and we achieve this.

I have to thank all the Knowledge Seekers in the background, who work and done things over years, that you brought us to this position where we are today. It is not one individual, each one of us, some people have come and gone. And some people are still here after years working. It would not be built to what it is, if it was, because all of us putting a brick in the wall. And how that brick has hold the wall, and sometime, it's been a good way, but even if it's been a bad way, it has turned out to be good for all of us. (3:20). I thank you for all your work and all your support, being physically, morally, Soul wise. We somehow, we got where we got and we still got a long way to go yet.

Thank you very much and see some of you tomorrow and otherwise next week. And we'll come to the point where we hope that we reach through the Soul to all those on this planet and beyond and not through just Internet and television. Thank you very much Rick for all your support.

ENGLISH TRANSCRIPTION

(:10).

K- Yes, good morning, good day to you as usual. Whenever, and wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute knowledge sharing. We welcome you back, as usual. And it is interesting to see how the story of the KF and its work and embracing a larger and larger structure of science technology (T) and space. (:12).

We see with us in the past few months in the sessions of meeting with the Creator and we had so much success and so much understanding and development with these systems and with the sharing of your time with us, that we have reached a point with our doctors and scientists in the background, that this week KF has launched very interesting international what we call, collaboration with the wellness centers and we in conjunction with the doctors, have launched a very unusual meeting with the Soul of the Creator and the wellness of the Man himself. This program is unusual as before we had one sessions for one Friday. This sessions which is now promoted on the KF as a wellness, is for anyone who can join on a 3 week session which is 7th, 14th, and 21st of July and the conclusion week on the 28th of July. Where we run a 3 hour session and each section.

This is part of the background of the programs we announced months ago where we can reach anyone at any point, any destination, for anything that they wish. Would it be addiction, would it be food, would it be any wellness conditions that they have. (:14) And we think this will open a new dimension (D) in what we call 'Wellness of the Man'. You have psychological problem, you have a physical problem, it could be you have a tooth pain, and you have knee pain, or whatever, and you want to see how you can get better, how wellness comes.

We are not in a medical world, we are in the understanding of how we can communicate and transfer new technologies, which has come into operation as of next week more or less, in the process of reaching everything people need at the same time. This is a mass trial, hundreds of people, and we have launched this. And we think this will be one of the pre-requisites and part of the Space Technology development. Where we can reach Man at any point. He can connect to systems at any point. And 3 hour duration is more than enough to complete the cycle. And then teach the body in the following weeks, to what we call, 'tune itself to it'. We want to know how much we can reach and how far we can reach.

Somebody called me and I... "Can you do help me with this?" "Can you help me with that?" The only thing is, you need two sets of headphones. One on your head and one where you want the energy of your Soul to be transferred to. You might want a big muscle on one eye, or you want to have a condition, doctors tell you,

it needs exercising this, (:16). or you have any condition else, where wellness, you put it on that point. And then, we run a massive operation in the background, for Keshe Foundation, to reach you.

You might like a water melon, you might like to fall in love. You... we want every combination. Somebody says, "Can I test it with my cancer?" We are not there on the medical side, but if this is your wish, you can try. It's a freedom of the... reaching the wellness of the man. I like to feel better in my life, can we reach you emotionally. And you know where your emotion comes from.

So, we have launched this, you can go on there, ... with the Keshe Foundation Sale, is the agent for this operation. They are not running it, they are appointed by the wellness centers, to distribute, what we call, the "Promotion Pack." And it's for 3 sessions, for 3 weeks, for 3 hours each. And it is something, a breakthrough we are looking for and we do.

Do not forget that the Keshe Foundation now is involved in a massive project, with one of the leading Nations in the World. And whatever we do, now on, and we've done in past 10 years, will go into the operation of our signed agreement with the National Government. We have become an organization beyond imagination of many of Knowledge Seekers (KS). And that's what you wanted, to reach the knowledge, the technology to every man on this planet. And we have signed ourselves into it, with one of the leading nations on this planet. And we are working in that progress, that as our agreements come into flourishing, part by part, bit by bits, you'll become part of it. (:18).

We become part of One Nation government, in conjunction with another government, which is a leading Nation, but the signed agreement is use of the technology for Peace. I signed this with the Iranian government in 2007, 2008, and now the new agreement signed with the government, it stipulates the technology on the basis of Keshe Foundation, "technology in exchange for Peace."

So, whatever we do, on a larger scale now, You will understand in the coming months and weeks, who we signed with. Who is our major partner in the National and International operation. And these sessions we put on, will allow us in collaboration with the Space Technologies, Space Agencies, to put a new way to do, to be done.

You, if you're in the International News arena and you can hear, part of the agreements of the Keshe Foundation in past couple of weeks has been announced by the Space Agencies internationally. But, beyond it, has been the discussions which we had, and now we see it appears a National Program, till the Keshe Foundation comes in and becomes Keshe Foundation and the Nation operation.

We... we have come out of the cocoon of what we call, 'kept silence' by governments in Europe, and leading Nations in the World have backed the Keshe Foundation. And we'll see the results, you will see it. We're working, the Keshe Foundation team, working very hard in the background. Moving, bringing everything step by step, according to our agreements, step by step. National governments want to make sure everything is secure, everything is correct. And, for next year or so, two years, (:20). we'll be working on those levels step by step, working with the national scientists, government scientists, proving.

Many of you Knowledge Seekers will be called upon, to join, to be part of this new work. A number of Knowledge Seekers have already been approached, and going through the transition of becoming part of this Keshe Foundation One Nation operation, with the national government. Many of you will be called upon to join, according to your expertise, to bring in, as part of the 500 strong Keshe Foundation Knowledge Seekers

team, which will become part of the national government operation. As we grow, as we develop, as we prove the technology step by step, through the officials, through the test, through the lab, through the scientists, then we go to the next step. It's a massive project we've taken on, and the first phases of the project has already been approved by the governments and a number of Keshe Foundation Knowledge Seekers have already started working on these projects. They know what they are doing and they know they are part of this new revolution and evolution in science.

What we would like to understand in the July sessions is how we can feed the man in space, collectively. Colonization, for us, is not just to move somewhere and colonize, it's to be able to reach everything. We cannot grow all the tomatoes and potatoes in colonization, but we can reach you through the energies of the fields, that you are fed. We cannot have shuttles for "Expats," the way Americans fed Berlin, (:22). inside Berlin.

We do that "airdrop" through communication lines, through new development of the technologies. And as we do this, when we come to the space technology development, and as we announced by governments to colonization to start, in the coming years, then colonization becomes easy. What you've done in past few months with us, and what we do in July and forward, would allow us to jump that part of the technology, that we colonize, but we don't need to take ?? shuttles every week, every month, to feed few people on the Moon, or few people on the Mars. We feed hundreds. The colonization program, which now you hear in the background announcements of (one) the leading nations, will be feeding hundreds of people, not one or two scientists. This is not colonization.

Then you understand how important this July session is for all of us. You participate in a large scale, multi-facet dimension projects of the Keshe Foundation, which will be implemented in a coming time in the space program. As we said, we come to you when we need help, we come to you when we share our joys, and we come to you when we share the technology. Many of you stopped the habit of the chocolates, when it was addiction. And many of you stopped other personal habits. It showed us, yes we can reach. Many of you showed us how pH can be raised through the technology. How we can make you happy. And now it's the face of multiple, multi-facet dimension. Which means, you could be hungry, you come for the food in that 3 hours, (:24). half an hour of it, another half an hour you want to reach a muscle, in another half an hour you had a headache, and you divide how you would spend that 3 hours.

You send it to us, you record it, "I wished, I wanted, and I received." And, "what I came in for." So it becomes a multi-structure understanding, covering different cultures, different nationalities, different religions, which you all have. And we see how emotion changes, in this 12 hour session. So, if you go to the Keshe Foundation website, and sign yourself to it, please understand the Keshe Foundation accounts in Holland is totally closed. Keshe Foundation, you used to send funds to Keshe Foundation in Holland. All that has closed now. All the payments has to go through the links, which is given, and go through the same. If you are making donations to Keshe Foundation, please wait till, we make a further announcement in, how it'll be set up and the way it's going to go.

Coming to the teaching. We come to the point of understanding even what the Intro (video) was saying. In the last sessions where we asked you to look through what we call, the second screen (Curtain), second vision, where you close your eyes and you see and you look. And many of you might have tried but you see darkness, you see no light. Because you have to learn how to see the light. You have to learn how to look at the light. (:26).

As we said in the Intro, you take banana as a vitamin as a seed in your stomach, And it becomes that process of the (Gans) "Patch," where you send, put a Gans Patch on the front, with ratio of, let's say 1, and you put a bigger Gans patch with ratio of 3 at the back, where the, by the properties and the characteristics of the plasma, the larger tries to feed the weaker, the stronger tries to cover the weaker, to bring it back into balance. This is the work of the Creation, always balance, and not to be better. I give for you to be equal to me. And in that process, as Knowledge Seekers, we transfer energy through the body. You take banana, and the banana creates the Gans, and then opens the transition of the vitamins, which is in the banana, to be absorbed from the environment.

And we know that the environment exists, because we call it, aura of the body of the man. Aura of the body is not just the heat of the skin, it's all these energies, which banana and the others change. If you keep and looked at the aura pictures which is created, it changes by your food, it changes by your emotion. What you take, what you give.

Now it's the same with your vision. You look, say, "I don't see anything. It's dark." The secret to it, is that you have to set the seed, in your emotion, in your Soul. And we tested this, as you heard in the Intro, (:28). in hundreds of you who came to Linz. Our doctors are testing this continuously with those of you who are in different processes with them. You sit the seed of, "I want to see my mother. I want to show love." And you create that seed, that love, not so strong that you overwhelm the love of the mother. You become that banana. That with it, you get the communication line with the Soul of the mother. This is the secret of using the second vision.

You can have and you can deal with hundreds of people at the same time. One secret which mankind has not understood about the structure of his eye, is the color of his eye, the shape of the eye. You have an eyeball and then you have a different color circle, which is the shape of the Universe, shape of a plasma. Why your colored part of the eye is round? There is a reason for it. It absorbs certain strength fields, in the dimension of the plasma. You see that color, the color of your eye, dictates the emotion you carry. (:30). Dictates even the color of your skin. Dictates the color of your hair. Because it's not just a vision, it's not just for you to see, it's the line of emotion.

It's why we have different cultural, mental differences in the nations, what we made nations of us, and the cultural behavior we created. A slight change in the tone of the eye creates different emotion. And this become part of the characteristics of life. Now, if you look at your eye, you just see the color part. But the most important part of your eye is the white part, not the color part. The color part is for your physicality (P). The white part is part of your Soul. It's where the Soul transport, transmutes, where the Soul always, irrespective of color, keeps his communication, his line of opening.

We are always looked at the color part of the eye. Our doctors look into it, because they are physical doctors. When you dream, you don't go through that channel. When you dream, you dream through the white. It's a travel, the space dimension of the Soul. (:32). This is why, when I keep on telling you, you live a two dimensional life without knowing. The eye of the man looks at the person in front. The Soul of the Man (STM) through the white, sees the Soul of the person.

We have ignored, the most important part of our lives. What happen to the blind people? What happen to the people who only have the white? What happen to our children when they are born? Now you understand how much man has ignored the second part of his life, all the time.

When you close your eyes, when you bring the shutter down, you close the dimension of physicality, not the Soul. And this is why, sometimes we remember dreams, we see them as visual, because the eyeball, as a white, with this section, which is a physical part, is part of the same, some of the fields gets absorbed, touched through it as it goes, and you remember it as a dream. So, next time when we ask you to close your eyes, lift the eyeball that most of the white is in use. And then, set the seed in your emotion and the Soul, that I want to see the mother. I want to see the whole family. My dad, (:34). my brother is half dead, half alive. Some on the Moon, some on the Earth, some in Africa, some in Asia.

Then you understand, multiplicity of the power of the use of your Soul. Multitasking is not the job of the Soul. "Always tasking," is the job of the Soul. This is why you say, "I was going and somebody pulled me back." That someone is your Soul, which looks through the white (part of eye), is aware of what physicality doesn't see, but in openness, can instruct, interact with your physical dimension, and move it back. You do this through the emotion and the Soul, and you give yourself cancer.

No part of the body of the man, not a single hair, is created for no purpose. Your liver absorbs multi-faceted dimensions of energies, you call it, different proteins and whatever. The eye of the man has a multi-faceted operation. The color part, which creates interaction with the physicality, and the white part, where is the communication line of your Soul. When you die, your eye moves, most of the time up, to allow the Soul to depart. Physicality has no more use. (:36).

Maybe now you understand why we do this. Now you understand why many people in coma move to the same position. Now we understand why a few weeks ago, when you joined us in elevating the Soul of the children, I taught you how to use the second (Eye), because you reached the Soul of the children. This is why the babies always look deep. Flicking of the eye is for the physical part. And understanding to register the Totality.

World of imagination comes into the same way. We stare into the distance, because we allow dimension of physicality imagination. Now you understand, how you use your eyes. You use to understand that nothing is coincidental. Play with yourself something very interesting. Many of you play computer games. I know the generation of us is computer game generation. (:38). I played the first games when I was in, just about, before University. When the first things came out, we used to go "click, click." And it's developed to a multi structure of today, play games.

Set your mind and pre-determine the game. You will win. It means that you can even with the structure of the Soul control computer games. This is why some people are very good at it. Without knowing and fixing the vision through the Soul, they create energies which sets them in that direction. I still do this. I play a number of games and then I say, in this game I want this and this, and I get what was impossible after that. So world of magnetic field of electronics can still be manipulated, let alone transfer of energy and information and emotion. You cannot harm. You can only elevate. And you can only receive to elevate your own Soul.

When we told you, we let you to see the Soul of the Christ, it's because you were humble enough to accept him as a higher order energy and you set the love in your Soul, and you received it. That's the secret of the play, you put that banana as a love of your Soul for the Christ, bless his name. (:40). You don't see yourself lower, but you set the small seed of love in your Soul, that it is connected to him. You do the same thing with your mother, you do the same thing with another point of position in the Universe. I'll see you on the dark side of the Moon.

In the coming time I'll teach you how to manage this. How to pinpoint with the accuracy, not even with a satellite system of today you'll be 5 centimeter out of position, you'll be "dead on" position every time. You tune to move from New York to Tehran to meet your mother. You create the love of the mother within your Soul, the pleasure that she gave you. And understanding of relationship and the field strength, when you land in Tehran, you wish to cuddle the mom, the mom is in your arm. You don't want to cuddle your bus when you land in Tehran. The same distance ?? emotion will put you in front of him. The same emotional distance in conjunction with the Soul of Physicality (STP) dictates the position. (:42).

So the system of taking energy to control the Spirit, or the STP will dictate the position and distance. You have nobody in Tehran, but you want to go and see the most beautiful restaurant you ate 20 years ago, you heard in Tehran but the GPS doesn't show you, you want to go there. That systematically uses the Soul of the others who have been there. It's like you ask on the street, "can you tell me where this shop is on this street?" Now you interact with the Soul of those who are, who've been.

When we put a magnet on a set of magnets, we see how the others move to adjust, not only one. So, you establish that connection, because you want to be in that position. The others indicate how much they move and where for you is, to be, for you to put that magnet. It's the same way.

When you travel through the STM, through the STP, you never get lost. You always land where you should, and you train yourself. So, next time when you walk on the street, next time when you sit in front of your cat, next time when you hold your mother, next time when you put a flower in front of and enjoy your beauty, (:44). try to look through the white of the eye and see the Soul at the same time. Then, I've told you many times, thy shall not lie. Then you understand how you live the schizophrenic of physicality in the fields of the Universe and when you close the eye you call it, the dream. You've been a dreamer all your life, but the dream of reality, not the dream of what we call, fantasy.

Your vision has around 17 kilometers horizon vision, plus or minus. Your Soul vision is Universe and Unicose. Now you understand the tricks, that when you join us in July, where to look for, and how to look for, and how to dimensionalize the energy, through the Soul. And then, through dimension of emotion, the position of physicality. It'll be interesting, if some of you don't like a little lump somewhere on your body, and in July you concentrate on it, and that little lump by next July is not there, it's no coincidence. (:46). Because you learn to transfer the Soul and the emotion of physicality together to where the physicality manifests itself.

This is what you do when you travel into the deep space with no "monkey suits." We live this life with a "monkey suit," within the atmospheric condition of the Solar System. Because the material is created, the "suit" we wear is created out of the interaction of the field strength of the our Sun, our Solar System, it's blue. In the next Solar System, next door, the field energy of the plastic you wear as a "monkey suit," is in the gaseous state. What are you going to do with the body inside it? Now you understand why man needs to understand the use of the field energy of the Soul.

Now you even understand why when people tell us they became with the position of death they saw a light. This is a point when the STM, energy of the STM, crosses the field strength of the STP of the Man. The interaction of two fields creates light, and that light position creates a dimension of peace. They always talk, it's so peaceful. Yes, because now you're cocooned within the energy of it. (:48). You allowed it to expand and complete itself around you.

Now we understand the whole process of Creation and death, if you understand the structure of your eye. Even more, you can understand why you have a spinal cord and why your spine, your neural system is even white, greenish color. And why it goes down the body of the man to the ground. It's like a volcano. You have surrounded it with a skull. It has nowhere but to go for communication down the line, which you call it, a spine. Does not matter if you walk on four legs or two.

Now you understand, even the animals who don't have bone structure, how the Calcium (Ca) structure in their body, transfers its energy through the Amino Acid (AA), connected to the Calcium. You don't need a spine in the space. The Calcium in part of the space will change to Magnesium and another to create the same communication line. In some points, man can never transfer from energy into physical matter state, to become a body, to get physicality. Because the field strength is as such, that can lead (to) the opening of the plasma of the STM. (:50). The plasma continuously creates the layers to protect itself, to keep its integrity, because it's within its center.

Now you understand, how you as a body, have lived these two double life. Now you even should understand, how the position of your eyes, and the volume of the color part into respect, to the white part, dictates your behavior, your emotion, your openness, your "meaning-ness," for you to be a lot of things.

When you interact with people, first interaction is to look into the eye, and see the Soul. Does not matter if they're wearing dark glasses or light glasses. Physicality has no dimension when it comes to the position of the Soul. You've got to understand, now the knowledge given to you is deep enough, (:52). and gradually establishing the point of understanding, that in no point in time and position you need the sight to see or have the dimension of physicality to live, if you manage to understand the dimension of the fields of your existence.

I once said, one atom of Hydrogen can cover the whole universe. So is one seed of love. And this is how the Creator created, loving what he has, within (?? Himself). And we starve for it. And we work that when we finish the physicality, we are loved, that we go into heaven, which is the closeness to his Soul. It's within us, and within our Soul. And if we learn to do, to be that banana in the seed, all the time as a love and care, then you understand the principle of Mitra. You have no time to do anything but think good. You have no time but to act good. And no time but to actually do good.

Now you understand the importance of your eye. Because once you learn, the color and the white have to operate the same, you cannot lie through the color where the Soul tells you the truth. (:54). Then you understand when I was telling you last week, standing in the front, I knew I was lied to, because the Soul told me I'm betrayed.

The life, physical life, in any dimension, has its physical interaction and its Soul interaction. Does not matter where you appear, anywhere in the Universe. This principle does not change if you are on Earth, on Moon, on planet Zeus, or within the Soul of the Creator itself. Then you understand how Moses lied, that every Command had, "thy shall not lie." Because he wanted to lie. Because then he ?? wouldn't have been able to do it himself.

Now you understand a lot of things about yourself. This time when you close your eye and you say, "I see nothing", you understand you cannot have a flower if you don't sow the seed. And you have to learn how to grow the seed to become that flower. (:56). You have to re-teach yourself how I see the physical, or with the eye of the Soul. Many people call it the third eye, but in fact is your own eye, it's what you ignored.

You will understand through the teaching, gradually as we go forward, how to transmute this energy out to create, when you feel like it, that cocoon, that shelter, that envelope the plasma. And you shall see how you change your life, because there is no two dimensional life in respect to the others, as it has one dimension. And that dimension comes from the collaboration of the physical life and the Soul at the same time.

Now you understand how gradually we are bringing you to be both passengers of the physical UFO and the passengers of the STM as an energy plasma of the man. Then you ask why do we need to have the UFOs and the rockets and whatever you create. There is a pleasure in everything. Very soon you will get tired of just seeing everything without tangibility, that you yearn to move back in the dimension of physicality for a while. (:58). To be able to feel and touch what you love.

Don't forget you are no different than the Creator. He said, "I made man in the image of Myself." I made Mitra to love the dimension of physicality. Now you understand, you are no different. And you have to learn to teach yourself. There is no guideline, there is no Prophet to teach you how to do it to abuse you next time.

This time when you close your eyes, to reach the Soul of a child who is abused, you move, to move the emotion of the world president, to a peaceful president, create that love within you first. Then you'll find the child to elevate, the president to move. As I always said, it's in the writing, even the stone has a Soul. You find the strength of the Soul of the stone, you'll live within it if you wish to.

I've done that many times. I sat there for centuries, watched man passing by. Life is not to be active, to do all the time something. Life is there to enjoy the time when you want to do something. (1:00). And when you have a dimension of the Soul, there is no time. Always is zero. Because you decide the step of time from the point of manifestation and the move. And it's never late, because you are the starter of the time. The day starts for the man in Japan, 6 or 10 hours ahead of you, if he wakes up to see the day. While you're still asleep, waiting for the light to come, that your day starts. Before that, for you, zero time, because you're asleep.

It's the same with the STM. Wherever you start, you start from that zero. I manifested myself at that point, and thousands of years later, in another point in the dimension of the time which I promised it would be. I did the same in another time, in another name. And then, because I was there, I became that stone, watching the time goes by. Then I fulfilled my promises. Because I know where to manifest the STP within another Soul, or within the Soul of itself.

Now you understand the biggest magic, a manifestation of many prophets. The same Soul. Promise of time, the fulfillment of what I promised myself, I would do. It's the same with you. (1:02). You decide. Now you understand to the manifestation of the Soul through the white of your eye. Next time when you close your eye, you don't say, "I don't see anything." Of course you don't. You didn't take that banana, did you? And once you have that banana, all the energies of the bananas in the Universe will target you, connect to you, you take what you need. You connect with the Soul of one abused child, and that Soul is connected to many other abused children, then they receive from you. Now you understand how it works. It has to be in it, nothing but giving and no taking. We go through a break, and we come back. And we'll answer any questions you have. Rick, would you like to take us through a break?

<<< **BREAK** >>> 489 KSW June 8, 2023 (1:10).

K- No, yes, something to tell you in advance, we're going announce later on. On June the 22nd, Thursday teaching. Teaching will be from 10:30 till 12 o'clock for an hour and a half only. We don't start at 9. We start at about 10:30 till 12 o'clock. So, we'll make an announcement for that, but Knowledge Seekers not next Thursday, the Thursday after. In two weeks time the teaching is for an hour and a half, when it starts at 10:30 and not at 9 o'clock.

R: Okay, good. We'll make sure that that's clear for everybody before that workshop.

K- Yep. Any other question?

Yes, just one more things I have to announce. The teachings from July, (1:12). on Thursdays will be allocated a new time, that we'll move it from 9 o'clock in some weeks, into a different time, most probably around 12 o'clock, instead of 9 o'clock. And it'll be kept that way for some times, but we make the announcement when we come to it.

Q: .. Hello Mr. Keshe, I've recently made some Aluminum Gans and Aluminum amino acid. Is my deduction correct, that if we could use fields of Aluminum Amino Acid on a person, to help them if they're suffering from Aluminum poisoning? From what I've learned to this point, I'm deducing that fields of Aluminum Amino Acid would interlock with fields of cells of poisoned person and Aluminum Gans content in these Amino Acid would interlock its fields with fields of Aluminum in the body and balance it. So now the Aluminum in the body would have its fields detached from the cells and the body would have an easier time removing it. Is this deduction close to what would happen?

K- Theoretically, you're correct. Reality, you never touch Aluminum, at all. Aluminum, Lead, (1:14). and a couple of other materials should never be used by Knowledge Seekers, you should never produce the Gans of it. Doesn't matter even if you produce it and keep it somewhere. These materials have affinity to attach to, due to construction of the field plasma interaction presence of Magnesium and presence of conversion of the fields due to presence of the different field strength, to solidification or manifestation of this matter in the brain. We have the same problem with Mercury. So theoretically you're correct. Physically I advise you with the knowledge we have never ever make Gans's of Aluminum, Mercury, or lead and couple of others. Because it is field strength, is on a field strength of the part of the emotion of the man.

You think you're removing, but you can add more misery into the whole work. (1:16). You never, in a physical human body on this planet, should make these 3 Gans's. If you made them, put them in a container of themselves and bury it deep in the ground. And if you can, build a concrete cocoon for it, that it stays there for a long, long, long time. That it doesn't even seep out to harm other creatures of this planet, inside the planet. So, my advice to you is, don't even think about it.

Next question.

R: So, I guess his next question, you would probably say, no, as far as other uses with Aluminum Gans, have in respect to plasma devices, like the MaGrav Power Unit Plasma Capacitors or plasma batteries?

K- No, do not use, do not use. It's just it's field strength. Its field strength is very close to some of the field strength of the amino acid (AA) of the brain and emotion. Aluminum poisoning or ?? extra Aluminum fields can create dementia, internal bleeding, blindness, loss of orientation.

We know this especially from Eastern Block. In Eastern Block in prior to nineteen nineties, (1:18). they use Aluminum as poisoning for rats and for disinfecting silos with rice, and grain, and flour. And all the workers who used to spray this, have ended up with massive problems. They had special teams disinfecting and all the workers in these teams have shown long term huge problems. So, don't even go near any shape or form with these things.

One of the most horrendous ones are Mercury and what you call it, Lead. They have a strength and the strength of the emotion. And we've seen in the report to (US) Senate when the interaction, which was hidden from the what we call, public and then when a push by a member of the Senate in years ago, the vaccination companies had to confess that they use Mercury in a 3 MMR injections for children, which brought a lot of problems for children. This is a report to the White House reports, and the Senate following this over the years. (1:20). And now they say they produce it with no Mercury, but still the combination of chemicals is the same effect to all the two, three together.

This is a discussion now with a lot of world of scientists, that the three MMR not to be done in the first year, two years to children, but delayed to the puberty. And a lot of doctors are supporting this, even their own children. They don't give the MMR in the first cycle of what they are pushing now. Because a lot of papers connected to a lot of other problems. And they moved it, a lot of doctors moved the parents to do the injection of the MMR after age of 12, 14.

But what I was in a meeting recently, and I explained to them, is you inject this now at a point of the change in the life, you would hit a new cycle. Do we know what is the effect on that cycle, just because we delay it? Will we see more aggressive children? Will we see more other things with the children at the point when it's vulnerable and changes are taking place? And it all had to do, originally, with Mercury, which in the brain, when injected, it became a Gans of it. And it touched the emotion. but it permanently changes the, what you call, the brain operation. And the more doctors I talked to over years, nobody understands why they put these three together. They were happy with individual injections. (1:22). It's just pharmaceuticals make a lot of money out of it. And very large percent of people, families pay for it for rest of their lives.

Any other question?

Q: .. Last night, when I heard that somebody was making these Aluminum Gans's, I was, I was shocked. And, how little knowledge the people that are making the Gans's have in their repertoire of understanding. We were always taught that you use the four main Gans's and you don't get out of that. And even when I made it, that Gans of Aluminum, it was horrible. It was absolutely horrible. I mean, I've made some Gans's, but I've never felt anything so, as abhorrent as the Gans of Aluminum and the feel of it. It was the feel of it. It is when you get it near you, you go like, what the hell is this? And you just want to get it, it was far away from me. And this particular young man was putting CO2s and other Gans's near it. (1:24). Honest to goodness, I almost freaked out. I can't believe the misunderstanding was going on here. And I thank you so much for addressing it tonight because this is really important. You don't make these Gans's, they're not good for us, and they've got nothing to do with the knowledge of Creation. They're like, if I could put it as a subset of what you can create, but if they were to be created, you have to know exactly what you're doing in order to get to that. And it was, honestly, I was "gob smacked" yesterday.

K- When did you hear it?

R: It was in the Keshe Plasma Reactor Group and we all, or several of us disagreed with the creation of Aluminum Gans's and talked to Peter about it. Peter gave a presentation about him making Aluminum Gans's and showed it. And we suggested that it was not a good thing to produce.

K- If you can delete it, go and reload this and delete it. Off your teaching, of your, what you call it, program.

R: Well, we're telling people not to do it, so...

K- If you can go back, because... Yeah, not to do it, but if they don't listen, if they don't listen to this program, or the others like it, they'll think it's the way to do it.

R: Right, okay, I'll delete it.

K- Delete it, delete it from your brain.

R: Yeah, let's just forget the topic totally.

K- This is something which we know, (1:26). we know, that the Aluminum pollution. We looked at this. The same thing..

R: We looked at it several times, and you've had the same answer for quite a few years now for the Aluminum, the Lead, and so on. We hear the same stories.

K- Because we know, we know, we know, we see the result. One of the other effects which we see it, effect, is Plutonium. A lot of you don't have access to, a lot of you don't reach to that level, but as nuclear physicists we have access to. Gans of Plutonium and certain isotopes you never make.

R: I suggested that the Gans of Uranium might not be a good one to focus on.

K- It's a very good one.

R: It is?

K- Gans of Uranium in Isotopes 235 is extremely valuable. Some isotopes of Plutonium has the same effect as what you call, Mercury. But the effect of the Plutonium isotopes energy is that it clogs up the, what you

call, you know the sperm of a man is singular, it clogs them together. They become like ?? "vermicelli's". And it is... and then it has no genetic effect. But it does have, as far as we know. But certain Plutonium, (1:28). some conversion of the higher order radioactive materials, we keep away from making the Gans's. I have made Plutonium Gans's years ago, and we see the effects of it. And it is their field strength, which creates emotional interaction with Lead, Mercury and Aluminum.

R: Well thank you for clarifying that Mr. Keshe.

K- Any other question?

Q: .. Good morning, Mr. Keshe. I wanted to ask if you had had the opportunity to read an email that we sent to you from Mexico about a month ago, in regard to the bio-fermentation process we are about to begin.

K- I looked at it, we would like to collaborate and bring some things to you. But the reason I don't come, I did not come back to you is, we can discuss this, (1:30). but through the agreement we signed, we can change your program inside out. Maybe in a year or so, to literally bring it into a very large international operation. Not by financing it, but bringing other part of what we agreed with.

It's a very interesting proposal, but you have to... I have to put in a framework, in something if we done the correct way, it'll have a lot of implication. If you do it the way you are doing it, there will be something done enthusiastically, a few bit projects and then disappears. This what you're doing needs a huge financial backing but it needs a bit of what you call it, tuning. It's not all the way you explain, or what you discussed to be. There is more to it. If you want to make a time we can talk about it but I'll be looking at this maybe in six months a year time to bring it. But this needs a huge financial backing to be what you want to do. Otherwise it's just a what I call, prototype platform and maybe in a few years you push it to a few more projects. It's a very interesting project. But, the projects like this, needs very detailed looking and then, make it into international operation. (1:32).

Q: Okay, yeah, that would be... It would be wonderful if we could connect to the point and touch on to that. Because we are definitely open to the idea of this being a much longer term project. And I don't think we were thinking we had it all figured out at this stage.

K- Have you actually finished any prototype of it? Have you... in any scale?

Q: We are in the process right now of meeting with the Congresswoman tomorrow, I believe, or the day after. And we'll be bringing the first unit into operation, probably within the next month. So that'll be the first beginnings of that.

K- But what do you exactly convert? What do you exactly do with your system next month?

Q: Yeah, the idea is to bring the bio-fermentation systems into an existing facility, perhaps in Zamora or in another part of Mexico here, where they're producing a lot of food waste. Perhaps going into a facility where they're freezing fruit or vegetables that they're packaging and have a lot of waste material. We would go to these companies and offer to collect this waste material as the input mass for the bio-fermentation system. And then we would be inoculating the biomass with specific bacteria's, which are able to convert that biomass into bio-stimulants in a much shorter period of time than is conventional.

K- What is the shorter time you're talking about?

Q: We're talking about 24 to 48 hours, as opposed to 90 to 180 days, which is conventional with biogas.

K- Biogas, yeah.

Q: This is a much faster, a more high stream process and these plants can be made in various sizes. (1:34). But at the beginning we were just looking to do a prototype facility and show it with the local Congresswoman here and have it be a use case.

K- Do you have the financial backing for the first time?

Q: Yes we do.

K- And how much you estimate that'll cost?

Q: It looks to be at this stage between 50 and 100,000 dollars.

K- This is a very nice project. And I was talking to one of our, what you call, top management of the Keshe Foundation. And what you do, what you suggested. There is a growth industry, very parallel to waste, biomass waste, food, whatever, in cosmetics. And the Keshe Foundation is looking into it. There's a company now producing these, very successfully. And what you do as a biomass, a lot of what you call, green ?? wedge, can be changed in a lot of things, healthy things for, not just for energy. We're looking at it as one of our top people is very deeply involved with this now. You can look at both side of it, but it will be very interesting. And I would like to discuss it, but in a few months time. And then we'll see how we can take it to the next step. Because I think you can, as not only a speed up the process, you can change the process through a specific way of using Gans's. This is where my interest is. (1:36). And then we can collaborate with you.

Q: Fantastic. Yeah, thank you very much. We were wondering if the email had, fell through the crack or not.

K- Come back to me. Come back to me. Yeah, come back in about six months or so, where we tied ourselves in a very big way internationally. And we can't divert any attention from it till it's, what you call it, the baby starts walking in the next few months. And then this is a very good proposal. Maybe we can still bring you into operations somewhere in Mexico for us. We can collaborate with you there.

Q: Wonderful, thank you very much, I appreciate it. And ... yeah, I look forward to the opportunity to share the knowledge that we gather through the first tests and perhaps we do it in the background, if that is the best way. I can contact you in Telegram and share updates that way.

K- Contact me that way, yes. Keep me updated and we can even, maybe, interfere through governmental channels. It's much easier than you battling it on your own.

Q: Absolutely, that's why we reached out in the way we are. And that's also why we're moving in the direction with this influential Congresswoman because she understands the vision and is very much in support of what we're doing and wants to share this with many of the areas in Mexico, which are the food producing areas, because they have a massive problem with the soil quality and the bio-stimulants, which are a process of this equation, can be used to revitalize the soil, retain moisture back into the soil and give better yield to the crops as well is doing something positive with the waste material that would otherwise be in the trash. (1:38).

K- Yeah, but you know how South America became a fertile land by original settlers. They just burned their waste and ashes became fertilizers, and now we call it, Nano materials.

Q: Yeah, we see that across the countryside very often, and as we're driving around, and they do that here too. And whether that's intentional or not, that's another question. But..

K- They know it works, but they don't know how scientifically. Now we understand how scientifically it works. You produce it into a perfect Nano material for absorbing energy. It's black. So it holds energy, but because it's a component of the same vegetation and the fruits, that is, it'll grow on it. So it has the right strength to give back.

In a way, when you make a tomato roots or tomato leaves and whatever, and you make a biomass of it, or a Gans of it, or what you call, charcoal of it, and you put it on the land, and then you grow a tomato on it, that burned material, which is a Nano structure, has a strength of the tomato, because it was made of it. So the next harvest grows better because already the seed of the energy for it is there.

We understand the process, but it's interesting what you're doing. But we've seen this in China. I saw a system like this in China about three, four years ago. They built, but the government could not carry it out through to produce gas from it and then you still had the mass you could use for as a by-product. It's somewhere in our files. (1:40). When they took us to see, what do you call it, the skeleton of the structure. I was interested in it then and I can see a lot of usage. But do you produce a lot of gas out of it, prior to conversion?

Q: Yeah, the gases produced, I believe, are Hydrogen.

K- But you burn it, you use it as an energy source?

Q: That is to be determined. We could probably burn it at the source, at the location itself, and use it as an energy source.

K- No, don't do that. If you produce it, use it, you need a compressor, use the gas, compress it and sell it as a product to the farmers, for the conversion of their ?? cars, or their tractors. That will attract them a lot more.

Q: Yeah, then we have all kinds of bases covered, and we can do this in a decentralized manner, where we go to the farms and offer them a "one stop shop" for converting their waste material into usable fuel, as well as a specific fertilizer, specific to their land based on what they're growing. That was the whole purpose that we wanted to go to the mango farmers and give them the Gans materials or the bio-stimulant materials from the mangoes and go to the avocado farmers and give them the same.

K- Yeah, but we use the gas, use a compressor for the gas instead of burning it, as a product to the farmer. They'll grab it, they'll embrace you for it. It's you serve three purposes. You give them the energy, you clean up the land, and you give the land new life. Just look at adding a compressor in, because when you pull the gas with a compressor, you produce more of it anyway, and you speed of your conversion. You understand?

Q: Yes, yeah, wonderful. Thank you. (1:42).

K- You compress, if you do it, let's say, in 48 hours, you might do it in 18 hours. But the more gas you pull, the more fermentation you create. But sell that gas, compress that gas into a product for the farmer. That will change the balance a lot for them. And they'll grasp it, because the fuel cost for farming is huge. So very

interesting. I'll be interested, but come back to us in a few months time then. Maybe then we can build up in a different way. But we'll have the governmental backing for it as a project.

Q: Wonderful. I appreciate your time and thank you so much for adding to the knowledge.

K- Thank you very much.

Any other question?

Q: .. It's fine Rick. And I know actually, I know your voice pretty well because I've been doing some translations with the gardeners workshop. And this is why... well I was told to ask this question. Somebody in the neighborhood recommended me to join this session.

K- Introduce yourself. Where, who are you? Where are you from? You're Australian?

Q: No, no, I'm from Germany. And I'm in a... well, in kind of these Plasma groups around our neighborhood here. (1:44). And I've been... well, I started with the Gans's already, and I have them in my garden, etc. And, what I wanted to ask, it's got nothing to do with Gans's, but it's about what I smell and perceive. And, well, one of the guys and persons in my neighborhood, they said, "Okay, please contact Mr. Keshe. He may give you an answer." Because I've been perceiving these kind of things attached to people. I smell that and I do not know what I perceive. And that's why I have to be keep away from people. I have to really consider very wisely where I go, because sometimes I feel really sick. It makes me feel sick. And what I perceive is, well, actually I can't judge. It's a little bit, as I said, it's attached to people, rooms, clothing. When my kids come home, they have it on them. And I've started perceiving it when the vaccination started. So, and I, well, I don't know what I smell. Difficult question probably, and I don't know if it's out of place here.

K- No, no, no, no, you're perfectly home.

Q: Okay, thank you.

K- I'll ask you a couple of questions.

Q: Sure, you may.

K- When did it actually start?

Q: With vaccination. And well first I did not know what it was. And I was attending a meeting, an official meeting. And I really was about to have... yeah, sorry.

K- This is very, very, very common with vaccination.

Q: Yes. Yeah, but now the vaccination is over. And I smell it with my kids as well, who have not been vaccinated, and my family as well.

K- No, no, no, no. let me

Q: Ok, sorry.

K- I stop you because I understand where you come from and a lot of people will do. It all to do with the Corona. And is... Did you get the Corona at all or not?

Q: Well, yes, well we did this kind of testing, yes. (1:46). And yeah, well officially with this PCR test we had it, yes. And of course we see people who had it, yes.

K- Okay, a very large percentage, we're not even, what we've seen, runs into double digits, of people who had the Corona, have this problem. You're not the only one. The reason for it is very simple. I'll go on the screen, if you can see it. (The problem is, where did I put my pen. This pen will not be with me when I need it. I cannot find a pen). But I'll try to explain to you scientifically, you understand?

Q: Okay, thank you.

K- You will see, you can, you can help it. You can help it yourself. You can do a lot of things with it to get rid of it. Okay, I'll go on the sharing of the screen on the whiteboard. (...)

Q: Well, I appreciate your time, so don't you worry.

R: There are very few questions that I've seen Mr. Keshe, you know, not take. So, it's appropriate and might spark some interesting.

Q: Well I was really wondering and it got me worried already because I can't go to a lot of places these days because I'm restricted everywhere I go. (1:48).

K- You have to bear with my fingers than actually a pen. This is your eye, this is your nose. I hope it's much nicer than this.

Q: Thank you, yes.

K- Here, right in the center there is a very fine, very fine bone structure. And it sits in a cavity, it's a plasma cavity. And when you smell, the smell goes up, passes. How this bone vibrates, will dictate what you smell. Because each smell has a strength. And in touching this bone, this bone vibrates. And then your brain recognizes this smell. That's how we smell.

In people with, have a head on collusion, this bone usually goes and sticks to, what we call, one side of this wall. And they lose their sense of smell. Corona is a Calcium based virus. And you most probably got your Corona through breathing. So, it's (goes) past this (bone). And as this is a very fine Calcium gel like, not a bone, but it's a bone, your, what I call, (1:50). "smell bone," has picked up a mass. So it has moved in sensitivity in this area somewhere. It has moved somewhere, slid into one direction or the other.

And because it's an energy mass of a Calcium, it might stay with you for six months, a year, two years. We see people now gradually losing it after a year or two, going back to normal. A lot of people couldn't smell after the Corona, because of this delivery of the Calcium, what you call it, mass of the Corona connection. So you have, it explains what it is and how it is.

We usually have the capability to help with Gans's. But it's a... you can get it back, you can go back, you can wait maybe another year, that gradually this mass has lost its energy and it gradually the bone frees itself, or you can go and, what you call it, take other options with producing a very reverse Gans of it to deplete this energy.

Q: Yeah, but the... May I say something?

K- Yeah.

Q: But the point is, I have a very, very great smell, and I actually never lost my smell. Also during Corona, what I smell now, I mean, go out into the woods, etc., I smell everything. I smell the...

K- Yes, it's becoming...

Q: But when there are certain people passing by, it's as if there's something attached to them. And this is what I smell. Once they're gone, everything is fine again. Just, I just come to try to...

K- Yes, because this bone has become... (1:52). Yeah, this bone has been energy mass sensitive. That's correct. You don't pick all the smells. You understand? I know a lady who could pick up a smell of a shoe when she entered the house, from the back of the house. You understand? It's one shoe she was allergic to, or she picked up after Corona. And every now and then she still smells it. Not all the time. Gradually it's getting better.

So it's not you... this bone vibration is very sensitive. It can smell 3,000, I think, different smells. And it has a memory bank in the brain. The minute it moves to a position, brain recognizes that ?? this. And it has a connection to emotion as well, this line of the smell. And you've been loaded by Calcium energy on this bone, 100%.

So, you can wait, it might go away in a year time, two years time, three years time. Because now we see a lot of people who got, some people lost their smell totally. Absolutely, the bone got so heavily loaded, that it stuck to the side of the... actually, it's cavity. And, gradually you can get it back, or you make a patch of CO₂ with the Amino Acid of CO₂. And just place it in the position of the top of your eye, between your eyes and your forehead, where this bone sits, that you might be able to release some of the energy, and you get your smell back. Not everybody smells. (1:54).

Q: Okay. So just CO₂? No Calcium patches ..?

K- No, no, no, no, no, no, no, no, no, no. Don't go anywhere near Calcium, you already been interacted by the Calcium. We don't know the extent of it, but this is the problem with this ... We see a lot of side effects of Corona, now coming, now coming out.

Q: Okay, would you recommend then to also drink it?

K- You can inhale it, if you just rub your finger with the Gans's and just rub your nose, your nostrils. And see if it gets worse or it gets better, and then you change the ratio of the Gans Water. It seems to be helping. Because if we go with a Calcium patch on it, you can reload it and you can literally stick it to the wall and you won't smell anything. It is a very, very light, very light mixture of CO₂, with a lot of water in it, and just try it and see. But it's one of the side effects of the Corona, 100%, and you're not the only one. Many, many people lost their smells. I hope at least they smell good, not the bad smells.

Q: Well, as I said, it's just that, so sometimes I go places and I'm thinking, "oh my God, what do I smell?" and I have to leave, because I can't stand it. It makes me feel sick actually. And I do have problems sometimes with that, so going out...

K- Yeah, but it's... you are correct, you are 100% correct. It is... it comes with Corona, which means you've got the Corona through your nostrils, not through the breathing, through the mouth. And it has transferred its energy, because it's Calcium based. We saw it as a calcification of the lungs. We've seen it as calcification in

the brain. So, this energy has calcified on your nose. (1:56). If it's calcified and become part of it, you'll carry this for the rest of your life. If it's as energy, maybe in the short time you get rid of it.

Q: So thank you very much. I hope... I'll stay in contact and tell you.

K- No problem. This is what the joys of new science, they experiment on all of us. Thank you very much.

Any other question?

Q: .. Hi Mr. Keshe, when we are sleeping you taught us that the STM expands and can go anywhere in this Universe. But at the same time the STM is connected to our physical body. Since we can have physical sensations during the dreams. Could you give us more details about this connection between the STM and the physical body and why the transmutation doesn't occur, even when we are dreaming? Is it that the fields of the emotion of fear prevail over the other Souls, even when we are sleeping?

K- No, this is just to do with the STP. It's with Inertia ?? and Mass. When you dream, you're in a different dimension than when you actually go through transmutation. When you go through transmutation, you... (1:58). When you go through transmutation, you envelop the body, the whole physical body (Soul envelops whole body). When you dream, you... it's the reversal, which is the actual, if you take the body, and you (are only) peeping through. And that's why you cannot... And if in your dream time you can do this (expand STM over body), create this, you'll transmute yourself.

Christ did that on the cross. It's .. that's the difference. It's in our brain, it's in our system structure of our Soul, and man used to do it. That they could use this with the STP, and amputate the arms, the legs. (2:00). But, we have forgotten, we haven't forgotten, we have not used this. It's very much like reptiles. You get your tail trapped, you drop the tail and you move on. You create high level of energy, which is a field energy, and not matter state energy, and then you, that field separation, can literally loosen all the muscles and the bone at a given line, and then separation comes.

But the trick with it is, to create this energy, in a very high temperature energy transfer. And man used to do that. Exactly like reptiles. Every mammal has this, every creature has this capability. If the plants, even the plants have this capability. They'll amputate to cut a piece and grow somewhere else, or re-grow next to it. But we don't do it, and that's why we don't remember the dreams, because we go through that peeping hole.

You look, literally, this is what we're teaching today. You look at the sight, and then you bring the STP and the STM to that point, and you create separation. But between it is, if you understand it, is that, because the way it's done, (2:02). later on you grow the arm back again.

So, that's why you dream, we ?? do not go with it. But I can put you in the dream, create the plasma around you and you'll join your dream. It's very easy to do, extremely easy to do.

Any other question?

Q: Can you give us more information regarding the element Indium?

K- No.

Q: .. Good morning Mr. Keshe. (2:04). I understood that the key to the success of the transmutation is the elevation of the Soul. Only this is not an easy thing to do and therefore...

K- It's more expansion than elevation, there's a difference.

R: Okay, and he mentions that you will do a special course with the first 25 of the 200. The question would be how will it end up as millions of people, if not billions, will be able to raise their Souls to be able to participate in the colonization of the Moon, for example?

K- Oh, we'll give you a helping hand, don't worry. It's called the Vertical Unit. We don't transmute you in the Vertical Unit system. We expand your Soul, you do the rest yourself. But we tell you, you've got to go in that box. So, it's easy, it's not that ?? hard.

Q: .. How many times needs a Soul to be elevated normally?

K- What?

R: I think he means, how many times would you need to elevate a Soul, in order to be elevated? I'm not sure exactly. How many times need a Soul for it to be elevated normally? Maybe for it to be elevated ...

K- I think people have a physical dimension, they think it's an elevator, (2:06). you can go to the next level and next level. Elevation comes in terminology of the plasma technology as "enlightenment." And if you understood the story of the banana, you should have understood how to enlighten yourself in which way.

This goes back to when I told you, you go to China, you speak Chinese, you understand the essence of it, and it's just not the book, dictionary. And this is the essence of. And that's where it comes in. It is elevation of the Soul, not getting in the elevator, but is expansion of the Soul in the way of enlightenment. Then I think you understand what it means and how you've got to work with it.

Q: .. Hello Mr. Keshe, utilizing MaGravs Plasma Science and Technology, can we make dead planets livable?

K- As long as you can make a dome in there, yes. There are no dead planets, you've got to find out what lives in there. There's a no life, no corner of this Universe, which does not have an active plasma as a life. When you have a gravity and when you have a Inertia, life is a consequence of their interaction. (2:08).

It's always said, for thousands of years, we drank the waters. Sometimes we got poison, sometimes we got all sorts of diseases from what we didn't understand. It comes through the water. When we got educated and we got enlightened in the science, we found, oh, they have bacteria's and in the microscopes it has been there. It's just us who's been ignorant to their existence due to a lack of our understanding. Now, space is the same.

It's that river of knowledge we have to tap into and see which part we haven't understood? That the life exists in that point, in that position. If you've been hiking, they always tell you, never drink of a running brook. Doesn't matter how thirsty you are. But you can drink from a spring where the water comes actually out of the ground. The same spring you saw is 20 meters higher, you don't drink 20 meter lower, because you know where the spring was. You don't know what has been contaminated in that point, from the start to the bottom. Usually at the spring, you have no contamination or less contamination. Down the line, other energies added to it. The rats, the mouse, the deer all drink from the same brook. So it's the same in the Universe. You have

to find out what lives in that rivers of fields. Even there is no planet, even there is no life to you, but it could be a colony of what you call, (2:10). Covid plasma energies.

So, there is no way, no way, anywhere in this Universe, which there is not life, or you are in it, is part of a bigger life, that you don't observe it, because you are too small to observe. So, there's no dead planet. You can immigrate. You can ?? own it and immigrate to it and colonize it. But watch what's underneath of you, because you thought there is nothing there.

Any other questions?

K- This colonization will bring a lot of interesting, what you call, data on it. It brings a lot of new research and understanding. As we said, we are prepared, we are preparing for colonization and it has to be in a real state stage. I'm sure within next few months you hear more about Keshe Foundation program and other satellites colonization. And most of you in one way or another who've been regular with the Keshe Foundation have participated in that understanding and growth and trial and test.

We foresee colonization if things go the right way within the next two years. On the book. (2:12). Our conservative people talk about 8 to 10 years. But technology development is so advanced, that two years is quite feasible, even a year from now is quite feasible. You've got to understand once the governments allow the new plasma gravitational system to replace the rocket space technology there will be an evolution in the whole of the space industry. And we see this announcement within the next 12 months even, maybe much, much sooner.

If everything goes the way is set out, we will see a total change in the space technology of the present time. This is not what we think might happen, this is what we have signed ourselves to happen. So, Musk and NASA will become part of the history book of the space technology, within a few months. Because other governments have decided enough time has been wasted in propulsion.

We have not wasted, we have reached the limitation of cargo carrying, food carrying, life's and ??. We need, we have to look at the new ways, new understanding. And the new way cannot be under the man made system. It has to be replication of the Universal work. Replication of how life exists in multi-facet, multi-direction, (2:14). like Earth. We move, we create heat, we feed, we create life. We create dimension of emotion and dimension of presence.

If energy transfer from a star has become a planet which has all these facets, cannot be that difficult, once you understand the process. We have understood the process and replicated it. So, once it taps open, it will change. And we were silenced to steal, to abuse by the Belgians. And other nations have broken rank. And this technology has opened up. Very soon you will hear.

The collaboration with the Keshe Foundation with the most powerful nation on Earth, has been signed and sealed. And you will see, Keshe Foundation, you supported for years, is what you supported and what we came here for. Irrespective of bunch of pedophiles in Belgium, or from the head of their nation, to his servants and the police force. But it was a good thing, because it allowed us to go with it, and correct a lot of things, develop a lot of things.

Any other question?

Q: .. About the waters. (2:16). Normally, cities are taking the waters from rivers and treating them with the ?? flocculent Aluminum to precipitate the contaminants. But all this is contaminating with Aluminum and they can't get rid of the chemicals. All these waters are not really good for people to drink, are they?

K- We see in the places where they do this, certain collective diseases. We... Nowadays, in a larger scale, we look at the local and national structure of the processing of the water, and the effects on the society which uses that water. And certain diseases, certain behavior comes from it. For example, one of the biggest studies goes on, is on big cities, like London. How this cleaning up and processing of chemicals, and returning the water back into, has created a massive problem for birth control and birthrights. Where the big expansion in the use of contraceptives by women, directly feeding into the waters of the city of London, and then been cleaning up, (2:18). for reprocessing, for consumption, recycling. In being drunk by both men and women, has reduced the sperm counts in the men. And it's one of the biggest problems in large cities.

So, the effect of these chemicals used, we already know. And they create certain specific problems in certain countries for what is used. So, it's not something new, but it does exist and you are very correct. But you have to see where this cleaning of the water has ended up, and what is used for and what is the effect of it. We see the farming, a lot of cleaning water has been read into the farms, because it's not good for human consumption. But what is not counted at this, now as a part of food, has become part of the human consumption cycle.

So, we'll change. A lot of things will change in coming time. New technologies. We are not the only alternative. New, as we heard from our friends in Mexico, new ideas, new interaction between what you call, fields, different fields of science, will bring emerging technologies which help us. But we cannot use it just, because we use it in one place.

Q: Yes. I personally use natural fountain water. I produce quite a bit of Gans water daily. (2:20). But I've offered this process to the processing plant here, but they don't... they're not interested in doing it.

K- Because they have to spend money on it to do it. They have... this is one of the problems, changing the course. If you get yourself, if you get one country or one government, do what you do and show all the benefit of it, they all jump on it. But that breakthrough is important.

Q: Yeah, well I'm helping a lot of people, about 100 to 200 people come along every month to fetch the water, and they... once they taste it and drink it, they realize they can't drink any other water. Be it processed, be it from deep wells or whatever.

K- You create an emotional connection with this Gans water. It's because, especially when you produce like CO₂, you have a certain amount of Zinc in it. So, it affects the emotion. We saw this with Lisa and Jim in Australia with their lettuces. People were picking up their lettuces, and they wanted that specific. If you remember years ago, they were telling us. They do better in supermarkets, than when some people pick up. Because you receive what we are short of, so the body goes for it, subconsciously. I know how you live, I understand. And how you produce these waters. You actually touch the emotion with it.

Any other question?

Q: .. You mentioned that in the monthly meetings, a "child of the Earth" should be begotten by those involved? Can you tell us more about it?

K- Can you repeat that?

R: You mentioned, it says, you mentioned that in the monthly meetings, I'm assuming the ... one of the flight meetings.

K- Yeah.

R: A child of the Earth should be begotten by those involved. Can you tell us more about it?

K- Explain what you mean.

R: Okay, well she'll have to, or he or she will have to put that in the chat.

Q: We can go to the second question now. It says, you said a month ago that world peace would be proclaimed in hours to days. Can you tell us more about that?

K- It's been settled. This is very interesting. Even you see separate things happening in different ways. The basis, fundamental world peace basis, has been settled. (2:24). So much so, that the Chinese have taken lead on this and economical power of them is dictating it.

The hot spots of the war, past 1,500 years, has been Middle East and the strong influence of the Americans. We saw the same thing in Africa for a long time with ... between the Communists and the rest. And this situation has been settled two ways. The basis for the world peace is now fully grounded by the Chinese. It's the beauty of the leadership of president Xi of China. They pushed the... they stood on the sideline they didn't take sides, but they pushed the mighty power, of purchasing power, to influence those who are purchasing from them. That you want us to purchase, this is a new way, find a solution.

American pushed war between the neighbor country of Saudi to create, to bring Iran into war as supporting that country. And it was very lucrative for Americans and Israelis. They sold everything to it (weapons) and the Saudis line it with gold, black gold. And Chinese came in said, the stability comes when we have a continuous supply and there is a peace in Middle East and Persian Gulf, in that part of the world. (2:26). The wisdom of military did not work. The wisdom of finance and collaboration worked. So much so that this week, Iran, after seven, eight years, has opened its embassy and consul in Saudi Arabia. We see the same thing. United Arab Emirates canceling a number of military agreements with the Americans in favor of collaboration, bigger expansion with China. We've seen a massive injection of 100 billion by the Chinese into gas lines of Iran. And they want to make sure these gas lines are never been damaged, or there is nothing ???. They needed this peace, economical peace, so with Saudis.

We see the same pattern in Africa. And next month's meeting of the BRICS with 20 new nations on the board, lining up to join, devaluing the dollar. And this now has pushed the Americans to change direction, more maybe short term, trying to get nations back, but long term, knowing they lost the ground to the Chinese. President Xi uses this for a very prudent way of doing it, because they push with their massive construction companies that we give this, but we do this. China might lose long term, but short term, will guarantee the long term success.

And we will see the same, very soon in the next few months in Ukraine. Vatican will pay heavily for their interference in Ukraine. And we've seen it even in the past two or three days, (2:28). by breaking up the dam in Ukraine, either by accident or deliberately, a huge plan by the Western allies to push the war into the line of the Russia and maybe beginning of another war. A huge number of soldiers and hardware have been washed down the ?? Rhine (line). They don't tell us in the West, but military reports, official reports in military shows hundreds and thousands of vehicles have washed down the line. So all their promises of getting back now has become a bigger danger with other things. But China will be the beneficiary of this

dam. They will rebuild this dam. No government has the financial backing and the material backing of China to build this dam. Billions of dollars.

But with what we see sitting in the side of the Keshe Foundation with the support, agricultural support, and new technologies, Ukraine and grain breadbaskets will soon be replaced by China. By (2027 to 2030) China will become an exporter of grain, replacing Ukraine. This is the biggest mistake Vatican made in encouraging this war. And Americans will pay for it more heavier, because the Chinese grain will not be, what you call it, (genetically) modified. And the Keshe Foundation will have a huge hand in this development. By 2027 - 2030s China will become a, one of the major, (2:30). natural, normal, beautiful, Non-GMO (seeds). Which again pushes the Americans back and all these, so many debts we see in the farmers in Africa and Asia, which they cannot, every year they have to buy the seed.

So, in general, we'll see a massive change of shift. But it has to be fundamental, it cannot be by talk. We know clearly, situations like Taiwan will be resolved by Chinese in a very amicable way, because they're making, trying to use as a hot spot. But, we'll see Taiwan to become part of the mainland China, in next 5 to 7 years.

Chinese don't go to war, they don't go to war to create war to get. They use wisdom, and it's the wise way to do it. And the only beneficiary we'll see, it's a long term, is Chinese. And they use that for peace. And the seed for the world peace has been set by the Chinese leadership. And you will see it. They tell me I support Chinese a lot with this and that. But we sit there with reality. We sit, we watch, we've been part of the structure. And we see how the changes are coming in. What comes in the Western newspapers is a bunch of lies, which is only (to) lie to their readers. That's the only way they can keep their, what I call, "colonial time" alive. But in fact, there's no colony left. (2:32).

As a Chinese ambassador told me once in Brussels in 2010 - 11. He said, now colonization comes with science. If we get hold of scientists like you, (You) are an "oil well," we become rich. No more lands can replace the new technology and sciences that scientists like you bring. And that oil well has landed in China. And we see the whole angles of the development. And it's not based on military might, it's based on fairness and what we call, development of the peace. We make more money out of peace than the few factories making guns. The only people who make money, especially in the West, is the Church and the gun manufacturers. They kill, and the rest of the family pays in every weekly prayer to the Church.

And this is what has to come to an end, and it has come to an end. So, it has started, it's backed, science and technology is backed by the most powerful nation in the world. And you as citizens realize and see it gradually in the coming time.

Any other question?

Q: They promised that the compact units would be shipped in the second quarter. (2:34). Can you still keep this promise due to the current situation?

K- We are trying to, yes. We try. If we don't do it second, we do it third. It's development which we stop and we just go for mass production, yes. By end of June or in early second quarter, third quarter, we start shipping everything out. This will be done before we close all our operations in Europe.

R: And can people still order products and so on?

K- Yes, that's...

R: Still being delivered and all that?

K- The structure is that our shipment, everything will move with our staff. Our staff will move, most of our staff will move to new locations. And the exhibition center will move to two new locations, most probably we know by end of next month. And, as I said, we move out of the mainland Europe. It's not in favor of our work. But, we will have a distribution center in Europe, for the products.

But the product range will increase massively, in next 12 months, maybe two years, the product range of the Keshe Foundation will move, increase massively. And it'll move out of the hand of the Keshe Foundation. It'll be, we are still part of the organization, but we concentrate on research and development, and our partners do the commercialization, (2:36). and the marketing, and the rest it's their job. This allows us through technology to influence the products, to influence the, what we call, what we see as the outcome.

This works perfect for us, because for us, we did enough to show the technology works, making the small things. But now, this has already moved, it's not something is going to be done. Our team are working on it, even this morning before coming on I saw messages. So, in next year, two years, you'll see products from two or three hundred to tens of thousands. And, in the background, it'll be logo and confirmation, and you know when the name of the company appears, Keshe Foundation is part of it. We've gone that way. We are in development of a space science technology, not in marketing, but we had to do it to show the technology is correct and is applicable.

But, you will see a new brand and a new structure of marketing. Because, this is where we always went from Knowledge Seekers now, is in the hand of professionals, it's in the hand of governments, to launch the Keshe Foundation products, not in our hand. And we are major part of the ownership and we are happy with it. It allows our team to do what we came here, to bring new technologies, to bring the change.

But, collectively we'll see European depots in a very, very large scale, even bigger than Amazon in the next 5 years, both in America, and in Asia and in most probably Africa. (2:38). We have signed ourselves to this agreement, so it's not talk we might do. It just needs to go through the process.

And you, the teaching will carry on as it is. The timeline as I explained earlier will change, because we'll change our headquarters of operation. And at the same time, the product range of the Keshe Foundation in the banner of a new organization, will appear internationally. We are backed with a massive, massive structure. And we have signed sealed agreements, it's just that we have to learn how to operate within this new environment, and they have to learn how, or to adjust themselves with new technologies. It's a growing process, and it has started weeks ago. And even our own teams are learning how to become part of it, organize themselves to be in it.

And, as I said to you a few weeks ago, Keshe Foundation Technology will bypass Apple, Microsoft and the rest in the next 5 to 10 years. Because it touches everything, from agriculture to energy, to food, to space, to health. But we have to be very prudent and our partners are very, very quite careful. And step by step we have to confirm, we have to deliver and step by step we've done that. And it'll go that way. So, you still get your products, (2:40). you will see much more, much more bigger product range in 20 - 30,000 in next two years it's more or less very feasible. And everything will carry the Ethos of the Keshe Foundation in the process.

We have (emerged) out of obscurity in a very big way, but we needed that to grow. Even maybe the cause of losing so much was to bring us to where we are now. And very soon you will know, I presume many of you can guess where we are going. And we are committed. We sign agreements and when I sign an agreement I stay to it. Without a doubt we become one of the biggest corporations in the world. In next few months, years. We are part of a bigger organization. And we are only involved in research and development of the new technologies and new structures.

That's thanks to all of you and all of you who support us in the background, and many of you, you've been called upon, we kept a track of everyone who's done something, not just because you made one Gans's, or you are a good things, whatever. You'll be brought in to specialties of the jobs we need, and we flourish. The teachings will not stop. We have guarantees that the teachings will carry on. And the product range and the deliveries, is all will merge into this one ?? organization next year, or two.

Any other question? (2:42).

Q: .. Will Turkey have a new position regarding peace?

K- This is a very delicate position Turkey has taken. One of the reasons for Erdogan winning the election last week, 2 months before the election, he was very far behind. And he needed certain support to get to be re-elected. And the major person in creating that support is one of our close Knowledge Seekers. Very good friend of mine. And we are very much aware and in touch with the situation in Turkey through his operation. He's one of the devoted Knowledge Seekers for years. He's a very high-ranking diplomat. And we meet quite frequently with him. He's a family friend, become a family friend.

And it's... he told me he's going to change it. and he puts his life on it, that he'll get elected and he managed to do it. We see very important role for Turkey to play for Erdogan. But you have to realize he suffers from a very severe cancer. The biggest problem for Turkey is not while he's in power. Would he be able to hold on for another 5 years? Or maybe 10 years? (2:44).

And the geo-politic of Turkey will touch the operation of China in Middle East. And this is very, very delicate position. How much Americans will try to entice him and what we've seen the bilateral and combination of meetings between Iran, Syria, Turkey, Iraq in resolving the situation is very important, because he had to relent to the Chinese. You have to understand the political situation Erdogan is in. And China again played a massive role in this discussions and what we'll see as a peace in this part of the world.

The earthquake was part of it. Turkey does not have the financial backing to reconstruct this massive earthquake. And guarantees through Chinese construction companies will bring him relief. And it'll be paid in a way we know how. It's been set to be paid in a very, what you call it, physical way. And Erdogan to get that, to re-elect and to be there, had to relent to peace applications and pressures of the China with the, what we call, quadruple nations. And in the background he had to kick the Americans and turn back on the Israelis. But this time he cannot jump just to get re-elected. (2:46). Chinese will hold him to this.

And now we see a lot of... Erdogan talks, but position of power has changed in his operation. And Chinese have a lot of say in the process of changes politically in Turkey. And we'll see in the end of interference of what you call, Americans in that part of the world. When you look at these things and when you speak about the person, you have to understand the whole culture he set up. As we say in English, Chinese have got him

"by the short and curly's." And he will stick to it. He will not budge and we'll see the peace process in Syria will complete in a favorable manner for everybody.

The biggest problem has been to resolve the situation in northern borders of Iran on the, what we call, Russian satellite countries, which now they think they have a power and they've gone in "bed with Israelis," but the tale has been cut. Again with this agreement. So, Erdogan has a lot of freedom, but he cannot... domestically he is very powerful, but internationally to stay in power he had to give a lot out to the Chinese. And to get it he had to say goodbye to a lot of American's agreements and you see more and more of it. (2:48). We'll see a peaceful in what we call, West Asia East European zone in next 3 to 5 years.

Any other question? Shall we call it a day?

Q: .. What does it mean when someone has two different eye colors? There are two different colored eyes, I should say. And what does bloodshot eyes mean for the Soul?

K- Then you have to ask the guy who got the blood eyes shot. The different color eyes usually have a very... two different characters, or not personality. And they're usually very pleasant people to be with. I have a couple of friends who are like this. And I tell them sometimes, I used to tell them, "can you close your eyes on one was green and one was blue?" And I used to tell, "can you close the blue eye and tell me what the green eye thinks?" And then I say, (2:50). "okay, close that eye and tell me what the other eye thinks, for the same emotion." They say, "no, it's the same." But when you sit there, they change part of the story. So, it has an effect. And she was a very close friend of the family and it was interesting. I did a lot of tests on 2, 3 of them like this. It's like the Chinese with 2 different position eyes, but with them is more emotional, with the Chinese is more trust. And I always said to my friend, don't get involved with her, you never know where your emotion sits. The blue eye loves you and the green eye hates you, so you never know which one you are.

Any other question?

R: I think you did pretty well today with the questions, thank you.

K- Thank you very much. There's something which came up through, with the picture which is on the screen, in the today's teaching. We start seeing the real side effects of Corona. As long as we can connect to it and understand it. And the smell, behavior, new cancers, new conditions that we should not live in a way with all the way, but with a new way with the Corona, we have found new opportunities to survive them. What one of the parts is people who had a bone mass problem and they got Corona, we see some correction in their lifestyle. (2:52). And so, it hasn't been all bad with Corona. It has had, but we have to look into it, and be aware to connect to it, to understand that Corona is a Calcium based. And not everything will be bad when you get a virus, because now viruses are part of our daily life, now that we have become man of space.

Space does not have bacteria's, and nothing but viruses. So we have to learn and see which one benefit us and what hazards for us. And we had the first international contact with it in such a large scale. And for second, third time and we'll see the opportunity and the rest of it. We learned a lot from it as a scientific organization. And I'm sure once man start traveling in space with fields, we'll consider, we'll study the cycle of Corona in a very deep, deep way, to be able to stand the fortunes and misfortunes of space travel.

Thank you very much for today and please join us in this July sessions, because this will complete a very huge part of the work of the research and trials for our work. Thank you very much for today and hopefully we meet you next week. And don't forget on 22nd we'll start at 10:30 to 12 and from July on we'll change the regular time of the Keshe Foundation 9 o'clock in the morning to a new time on Thursday. (2:54). Thank you very much.

490th Knowledge Seekers Workshop June 15, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Earth not only nursery of seed Souls in U; Here to clean up killing; Other solar systems in U started from STM millions years ago - learn to detect these planets; Travel speed of Soul; Hell means becoming cosmic dust after death; Can create Soul and watch grow; Replicate plasma of STM; STM embeds STP inside create P anytime go back & forth - live eternal life; Children of Soul perfect like Creator; Soul governed by "Soul of Totality"; After death Soul continues to serve; Dr. Bararpour passed away - great Soul; Find where Soul goes to; 4 basic Gans's connected to COHN; Radiation detector - fields of love; Prevent plasma saturation of electronics; Need to multitask.

ENGLISH TRANSCRIPTION

(:18).

K- Yes, good morning, good day to you as usual. Wherever and whenever you listen to these series of Knowledge Seekers from the Keshe Foundation Space Research Institute. We welcome you back and hopefully we share some more knowledge and we understand more. With what we had in past couple of weeks, we delivered of a nudge from one of the providers of the services, Livestream, we've seen it cannot match into other systems and he's created mayhem for past few weeks for Rick, to be able to broadcast.

Man-made things with a small upgrading has created such a mayhem for the others who are already there. Now you can imagine what is the problem of the Creator and how much he's upgrading and updating and nudging things along to go. There is a point of interest which it brings you to a new insight if you understand the topics, you understand what is the essence of the... what is to be discussed.

As we saw in the Intro, Earth is a nursery. Where the seed of the future stars and future Universes and life of Galaxies, More or less, (:20). comes to depend partially from the seeds from the, let's say the tulips. The whole Universe (U) is not just one flower, just tulips. There are some roses, some other flowers, honeysuckles and the rest we have on the Earth. So, there are other nurseries in the Universe, which create that seed of Soul. Mitra is not the only citizens of the Universe. Mitra is one of, it's like when you live in a

city, you don't fall in love with every woman on the street, you fall in love with one. And this is what Earth is, has been, and will be.

But, the interesting point for us, which is intriguing, if you have not understood, is going to hit you very hard, if you understand. And then, you have to understand what's the next. As we said, "Earth is a nursery." It could be a seed of a star, it could be seed of a galaxy, the Soul of the Man (STM) who leaves this Planet. Or it could be a dust in the way we see, cosmic dust, in the Galaxies, in the Solar Systems, floating around till finding somewhere to become that star, that planet, or become part of it.

But, now as a Humans, we will have a dilemma. Because we have not reached a part of the Souls which left this Planet, billions of years ago. From the first Souls, (:22). which left this Planet. They became a seed, some of them in the Universe. And those seeds gathered enough energies, as a speck of energy beginning the seed of a, let's say, a star. Now, they have created a planetary system in them. Which in essence comes from the STM, or it created things from this planet billions of years ago. Now, the technology (T) of the Man has reached to be able to travel with the "speed of Soul," not the speed of light. And one of you, or a bunch of you, traveled the span of the Universe, and land on one of the planets, which was created from the STM from this planet itself, millions of years ago.

There are a number of things that will come to be understood and it'll be part of the Space research, in the years to come. It's to diagnose, from the field-strength, from the behavior, from the psychosomatic of the Solar System or a Galaxy or a Universe, if the seed was that from Tulips or from Earth. And, would the future mankind, now that has access to travel with the speed of the Soul, will come to recognize when it lands on such a system? (:24). Would the system as he was created out of the planetary structure of Earth, would have a hydrogen (H) as his base. Would it carry water because through the water it absorbed most of the energies of the Universe with it, 90%, 95% of the weight of the man is water.

So, it gives us a new dimension (D) in the Space Technology. The way that we thought we are the only planet in the Universe, and the only Solar System with planetary system. And now in the past decade or so, the scientists are telling us every day they are finding new stars with planetary system, and some of the numbers are increasing rapidly. Would our scientists come to the point that now we found this planetary system, now we found this solar system, and in these solar systems we find maybe possibly life like Earth or creation of the water, which leads to creation of life. Did this star, did this solar system, did this galaxy come from the Soul of the created things on this planet millions of years ago? And in a way as it was created out of, will create out of itself the same characteristics.

Then it comes from our scientists to assess. When we come to a solar system, When we come to a structure, which now our scientists tell us, has water in it, has conditions of life in it, (:26). the question mark for Man is to answer, "Did the seed of this star came from Earth?" And would man be able to live a life near to life on Earth, on these systems? So, can we find Solar Systems, structures which have similar life as Earth? Putting aside the psychological pattern aside. Putting the coincidences that the energies can come together to create possibly life on, same as life on the Earth. Is, is the Soul of the Solar System from Earth. Did one of us was so devoted, so servitude, does not matter if you're a dog, or a cat, or a man, that led to be and became the seed and replicated what was on Earth. When you buy tulips you don't throw it away, when it finishes the cycle of life. You hold it, you look after it and you plant it next season, to give new flowers.

So, the life comes to this point. Now that the Space Technology is opening up, not with a rocket and what I call, 'firework', but the knowledge and science of the creation, magnetic fields, plasmatic motion,

gravitational field systems, and Man is good in making tools to measure things, and to be replicating it, then it comes. Would we .. (:28). find systems which have a life like Earth, and would we in the future with our knowledge, confirm and in a way through the strength of the fields of the solar system of it or whatever, the seed connection with Earth.

In a way then we see how the Souls of this planet, this greenhouse, are fed and become that star, the galaxy, the solar system, or a speck of dust in the galaxies. Those are the ones, which in holy books they call them the "hell." Nothing but just a dust. And is "heaven," that you become that seed, that gives that flower of the galaxies and the Universes a new life.

Then you understand why the correction had to be done on this planet to stop the killing, because now we see some problems in Universe, where the nursery did not clean up the infectious disease of killing. And we come to sort it out. To you it's 6,000 years from Moses and 2,000 years from Christ and the rest of it. But in fact, it's a few seconds, milliseconds, fraction of the milliseconds in the work of the Universe. So, what to you is thousands of years to get here, to us outside is just walk in the park. Even though to you it's very important. It's like looking at the ant colony and seeing there is something the ants cannot cross, or because of it they do funny things, and you correct it and the ants go on a straight path. (:30). So, in a way, to you, it's just passing a few milliseconds, life of an ants, but the ants is his life and it could be that day of his life, the only day which lives.

So now you understand, how important it is to get things sorted in this greenhouse. Because this greenhouse, if it's wrong, now that the seeds of the creation of the other planetary star systems from the seeds which came from here are growing, we have to see to get rid of this infection. Otherwise we'll have more problem in the future, when those seeds, stars and planetary start creating life and then the mayhem as we see, we come to clean up.

But, if you understood this, now it means, we can go to the Soul, planet, from the Earth. Then we find a lot of common denominators in living, we find a lot of common denominators in the Soul of what we call, the knowledge, with this planetary system. We feel at home, because it came from home. Years ago, 1970s, it was very traditional for the cars to travel from Middle East to Europe and go back for summer holidays. And, I was with a friend of family, and she loved Iran. And we were on the street, and a car came, passed, and it had a Iranian number plate on it. And, this lady, she's extremely, what we call, high society people, both in Europe and in Iran at that time. (:32). She bent, she opened the valve and start taking, puncturing the car in a way, releasing the air. We said to her, "what are you doing?" She said, "this has the air of the, this country, where I came from. It smells different." And we were laughing at her. She said, "Every time I see a car with Iranian number plate, I have to do this, because it's different when you fill a car up with air here in Europe, this has a smell of Iran.

So, when we would go to this planetary systems, would we smell the "smell of Earth"? Would we consider and find ourselves on the same strength, the same knowledge, the same emotion as we have on Earth. But the most interesting thing is, would the children of this planetary system, or the flowers of it, we call, will be the same as us on Earth? Technologically, in what we are set out to do, and as part of the work in colonization and going out of this planet in a handful of years, not with the rocket technology, but understanding the work of the Plasma. And knowing the advancements in science and technology on this planet with what we see, we call it, the test tubes. And all the new technologies which past decades has brought to us, where we put egg and a sperm together in a tube. (:34). And then, after a few days, we plant it in the womb of the mother, for that child to grow. The next step in technology and science comes with the Keshe Foundation Plasma

Technology. And this will bring a lot of ethical question in our work, in the coming time. But it's the reality which we have to face in the space technology. Once you put limitation on understanding and work of the space technology, you become that ignorant man.

What it comes to is, now we know we can create a plasma. With using even the new technologies which we have established in Linz, and what it comes through our work of the Keshe Foundation with, especially Chinese and Iranian Space Agencies in the coming months and years, be able to create the plasma of the Soul, replication of it. This is not far fetched, we are nearly there. I brought you a knowledge to get to that point. And then, if we put the seed of this Soul in the environment of the magnetic fields, of very similar to the womb of the mother, in a way create a biggest Sun to feed the small Sun, the small planet, like Sun does on Earth, like the Soul of the mother feeds the Soul of the child in the womb of the mother. (:36). And we put all the characteristics of a man inside, the new seed, and all the characteristics of the father and mother, in another Soul expansion. Would we see, the STM grows, without dimension of physicality (P).

In a way, we put a camera inside the womb of the mother to see the physical growth. Now, through expansion of the dimension of the knowledge of the man, we watch a Soul to grow from infant to a full mature Soul. Would it need water? Or, is it enough for it to receive all energies it needs, in tune with the Soul of the parents, of the provider of the original two seeds, for it to grow? And then it comes the biggest question for man. Would at that point, this Soul will carry the Soul of Physicality (STP), that can manifest itself as a child of the man, in dimension of creation of the Soul first, not the physicality as egg and a sperm?

Now comes to the point. The essence of, part of the space technology of the new era, is that, with the new understanding, would we be able to create the children of the Soul of the planet. And then, watch it to be going through, in a way, in a test tube, or as you call it, (:38). but in a plasmatic condition, to watch it to grow. In a way, you watch the growth of your child in the dimension of the Soul, the perfection, the essence of the creation of Mitra. The Creator did not take, as they say, the bad ribs to create Eve. He chose the best rib that finds the perfect partner. You call it, Adam, you call it Eve, we call it Mitra, we call it the Soul of the child. It's all the same.

Then it comes to the point that with the knowledge of the man reaches the maturity, that he can carry all essence of the STM. And from interaction of it, create the Soul of the child. And then as it receives energy from the Universe. The Universe is the womb of the growth, the perfection of the knowledge of the whole Universe within one seed. That is the "child of Mitra" and she's amongst us. And through it will become the seed of the new generation in the Universe.

In so many ways, now you understand the purpose of the teaching. Understanding the process of it. Just because we teach, it doesn't stop. Just because now you came to understand the purpose of life, it's not the end, it's just the beginning. (:40). What would it become of? What would be? What is the essence of its Creation? And, if we understand this, would we choose to create children with all the pitfalls of physical illnesses, death, old age? Or we create in the Soul of a child, in the essence of the fields of the Universe, that has no end, everlasting life. Don't forget, if the Creator lasted so long, and through His fields has created the child of Mitra, so, shall the child be the same as the Creator. Shall never die.

Then this brings us to a new fundamental question for all of us. What are we doing in counting sunrises and sunsets in the dimension of physicality, on this Planet. If we do not realize, we are those seeds, that onions for the tulips, that the next flowering time is somewhere in the Universe and not on this planet. And then,

when another Soul from this planet comes and passes, says, "oh, that's tulips from Holland." "Oh, that's the Soul from Earth." (:42). "Because I feel the Soul of the Star, not the physicality of it."

Then it becomes back to what we said in one of the old Intros. When you look from outside, you don't see the Soul of a king, or a peasant, but you see a shining star. Which that star now tells you, through its connections, "I'm from Earth, and I'm connected to Mitra, I'm connected to the Love of the Creator." And, in a way, when you walk somewhere and says, "oh, I'm so and so, and I'm son of so and so, and I work for such a company, so and so." Where you value your father and value where you work, but now you value where you came from, and you value the beauty of it. Now you understand where mankind has become that beautiful rose in the Universe with a small problem of little thorns on his stem. And we're trying to get rid of those little thorns we call killing and destruction. Otherwise the rose is beautiful like its Creator.

Now, comes to a point with all of us, that in a coming time, in a... not much longer compared to what man has been waiting for in past millions of years, in a short handful of years, compared to the other part, (:44). man will have the ability to create "children of Soul." Understand for it to be able to. And then, what do we tell the Soul of our children about the behavior of us in the physical dimension? And what our ancestors in the physical dimension have done to each other. And, or we just "close the book" and we never let our children know what a horrible family we came from. And we try to make it best and rosy and not go there, because it's too shameful to be part of the human race of today.

Would our next generation of Soul of Mitra's children, we'd like to understand what we have done on this planet to each other for thousands of years. And to the others. So, what it comes to all of us now, because we're coming to that point of technology, where nowadays we can choose the color of the eye of the child we bring up. We can choose the color of the skin, genetically, before it's born. Now, would we care, with the technology and knowledge we have, (:46). that the Soul of our children are perfect? That the physicality does not need to kill, the physicality does not to have blue eyes all the time, it can change as it likes.

The biggest question for man is, the technology is here on the table. What is humanity going to do now they know they can create the Soul of the children of man without the dimension of physicality. You call it, a "fountain of youth," everlasting life. And if you create children in dimension of the Soul, the same as the creation of the Creator itself, then it comes to you, in a very simple way. What would our next generation do to make sure that the Soul never commits a crime in the dimension of physicality? This is a very big question for a lot of you.

Those of you who are listening now and those of you in the coming time, you listen to this. As we said before, we care how our child is going to be. Now we know we can create that child without us in the dimension of physicality through the fields of our Soul. Then how do you want that Soul to be created? (:48). Knowing that it cannot make any mistakes. Knowing that it is perfection. And knowing that the child of us being so perfect, it puts us to shame what we do in the dimension of physicality, for the extension or expand, or life of our Soul on this planet.

The biggest challenge for the government in the coming months and years is, we cannot legislate for the operation of the Soul. And now the Souls dictate to us how to govern. And if the Souls are in perfect working condition, which all are compared and in the condition of their existence, do we need, would we have anyone to govern us? As our Soul itself is governed by the "Soul of Totality," in the construction and understanding of the work of the Universe.

The biggest challenge, for the Keshe Foundation and for Knowledge Seekers (KS), and for those who understand this, is watching how governments of today, will legislate, will bring everything possible to stop this process happening, as they know it's an end to their cycle. Because, a perfect Soul which does not commit any crime, a perfect Soul which does not kill, does not need no courts, no hospitals, no prisons, no judges, no Ayatollahs, (:50). no Mullahs and no Rabbis. Is the Soul of all these, will reach in the same position, that there is no position for no one to ?? attain in the dimension of physicality.

In a way, accepting and understanding this technology, brings an end by itself, obsolete, the condition of the position and the power of the man in what they claim to be in the mosques, in the White House, in the synagogues or temples, in the back streets, of what call, dealings, to create this mayhem within the structure of the man.

What will be interesting to see, would our leaders play the fool they don't understand to keep on to the power? Or would they fool themselves to be there while they are the only ones left? This week, in the past few days, we've seen the passage of one of the most charismatic, powerful, men of politics of the decades. By the name of Berlusconi as a Prime Minister of Italy, he passed away a few days ago. During his time he played all the games to be in the power. And at the end he succumbed to the same thing as the rest. (:52). Most probably, he died in the same hospital that a worker, a street cleaner died in another room. Maybe a bit less polished. But, the physicality has left. And this charismatic man, with everything he thought he can buy with, he bought with. But he didn't take much, and soon he will be in the book of the history, as he already has become.

Then, it brings always the life back to the man. Would our Souls will be that charismatic, that has no need to be on top, but is one of those amongst the others, but serves the same as being on top. And, once they know, they can not do much, because the pressure from the other side, in the physical dimension, will bring that end. Because, they want to keep the "status quo," as long as they are called, and they are there to be called, the Presidents, the Prime Ministers, the Kings, the Mullahs and the rest of it.

What will be interesting for Knowledge Seekers, in the coming time. We're talking Knowledge Seekers as those who seek the knowledge in the further steps, and understanding of it, is that, now that you've been through Enhancement Units (EU) and you can go back to your mother, your father who died years ago, or they're somewhere else, (:54). to bring us to the point of understanding, that we can still trace them, the way our dreams goes. Now understanding you met the mom who died 20 years ago, you can clear, find, with the new technologies developed, the strength of the Soul, would we be able to pinpoint where the Soul of the mother is? And, where and how will be?

As the death brought an end to the dimension of physicality, but serving in the dimension of the Soul. Would death mean an end or the beginning or just, as my brother said once, when one of our relatives died, he said, "Mehran, he hasn't gone anywhere, he's just changed his dress. We have to find out where he has bought the house to go there. We're just burying old clothes." And this is where we come to.

And then it'll be interesting to see if our Knowledge Seekers of the future, understanding this power of the STM, will be able to see how the Souls are serving us, and the humanity and the rest of the Universe, from what they learned, the pains of the growth on this planet. I brought these subjects up today, (:56). in a very specific way. Last week during the teachings of the Keshe Foundation, one of our most dearest friends and heads of the Keshe Foundation operation, Dr. Bararpour passed away. I spoke with him, couple of hours, maybe hours before he went into the first stages of living his physicality. And, first of all we give our

condolences to his family and all the Knowledge Seekers. As we lost one of the cornerstones of the work of the Keshe Foundation in Iran. And, as a spokesman of the health of the Keshe Foundation, one of those who was there to support every one of you during the Corona.

And it has brought me wonders, when would the Knowledge Seekers would go to the grave of these great men, but find through technology and knowledge their Souls, and see how they serve man, even though they are not in dimension of physicality.

The passing of Dr. Bararpour brought a lot of seeds of thoughts, his understanding how man will let the physicality go. (:58). And how the Soul is serving, then to us, we're looking in the dimension of physicality. Would our Knowledge Seekers, and the knowledge which we gain in the coming time, will be able to bring, to confirm, to establish, in how these Souls still work in the different dimension, to bring mankind to that point, where in physicality they left? And would our Soul, will reach to the point of not needing no physicality, no dimension of Creation, but serving all the same?

Interesting enough, is that, what would be the children of their Soul? Even though they had no children in the dimension of physicality. What would they nourish? What would be the essence of the creation in this dimension? And would the humanity learn to live with both dimensions? The fields, or the STM, and the dimension of physicality of the man. And one of the most interesting things for all of you is, would any of you, (1:00). as you gain more knowledge about the existence of your Soul, would be able to dodge, or move, or find the true process, that you can embed the STP within the STM, that even the physicality shall never die? As you manifest it, whenever it is, and when it's in the dimension of the Soul, and the Soul is perfect as a fields, will do all the repairs into the dimension of the physicality.

We are proving this to be correct, slowly, step by step, with the work of our doctors in the Enhancement Centers. And in dimension and direction of understanding the fields of the plasma. And hopefully, hopefully, one of these days, one of our Knowledge Seekers or some of our Knowledge Seekers, will come and tell us, and scientifically prove to us, and scientifically connect us, not to prove, but connect us, with the Soul of the great Men of the Universe, and not only the Earth. Where we'll tap into their knowledge of the Universe, knowledge of the existence, and understanding this, we understand we need no languages, but it's the knowledge which we receive, enlightenment.

Knowledge is gained by reading and whatever we do, (1:02). enlightenment comes through the knowledge of the Universe, in a plasma condition. Knowledge we gain in the dimension of physicality, enlightenment we gain in the dimension of the fields of the Universe. Would there be a man, or would be a time, that man of the Universe will have the same privileges, understanding and the life in both dimensions, enlightenment and physicality? That the knowledge of physicality and the knowledge of the Universe at the time, point and the place, will become beneficial to serve the others, for their enlightenment and their physical life.

Then, we come to understand one more point. And that is, has the man matured enough to enter the realm of the Knowledge of the Universe, and understand the work of its Totality, and not the dimension of physicality in the village of Earth? Maybe, teaching of today, is a seed for the future researchers of man, not only to find the strength of the Soul, for the enlightenment of the Soul, for understanding the work of the Creation, and not to be put in the books and computer programs of the physical man in the dimension of physicality and the knowledge.

We have to learn very much ?? soon, as in the world of matter state we travel, (1:04). in the world of the fields we transmute. In the world of physicality we gain knowledge in the world of the Soul we get enlightened, where in fact there is no physical knowledge but the knowledge is all physical if the man wants to transfer it.

Then it comes for all of us to understand and decide in the coming time, which world, which dimension we would like to live, that we do not leave to one or the other behind, or the demise of one, for the other one to be able to live. Where the STM, the STP of the man, and the physicality of the man, will live together as one, in one essence. But depending on the interaction and satisfaction of the other Souls, they decide to appear as a Soul, STP, or physicality of the man, at a time, place and point.

I hope I opened your eyes to what is to come, what is the seed of knowledge has been set for man to be enlightened. And in the coming time, the Knowledge Seekers of the Keshe Foundation we'll introduce these systems, that you can decide. First of all, to see your own Soul, as many of you have done, who came to Linz. And then decide if you want to share that Soul with another Soul which creates not the dimension of physicality child, but the dimension of the Soul. The same as the Soul of the child of Mitra. (1:06).

It's a very deep knowledge. And beginning of a work for man who had no knowledge about what is being taught. Now you know. Now you are responsible for it. And now you have to get it right this time. Thank you very much Rick. We go for a break and we come back. And we go through, if there are any questions. Don't forget, next Thursday, teaching starts at 10:30 and finishes at 12 o'clock sharp. Thank you very much.

<< **BREAK** >>> 490 KSW June 15, 2023 (1:13).

K- .. Not really, if anything comes up. There's a couple of reminders to remind you. First of all, as I said in the first part, we give our condolences to the Bararpour's family. And this... we're announcing the passing of Dr. Bararpour last week, within hours of his passing. We created unknown problems, or emotional problems for the family, which we apologize, we were not aware of it, but it was us showing the pain, we suffered with his passing. (1:14). In the same time, my condolences goes to the whole of the Keshe Foundation, on his passing. We hope his Soul has found his position and the elevation.

The other parts of the Keshe Foundation, the work is the same. We announced the July sessions of the Keshe Foundation for wellness. And some people said they cannot attend every session, the four sessions, for three weeks, and the final session on a Sunday, the 30th. So, in response to what you asked, I have divided this into 4 sessions, so you can participate for each session, separately, or if you decide to do it week by week, on the 14th, 21st, 28th and the 30th, the final session. So, instead of being one, as, what is it, 1,000 Euro, it's been divided again to that 300 per week. You decide which one you want to join in, and be and you feel one week

you want to join in for the addiction, and one week for the Cancer and one week for depression, all it leaves to you to how to join.

In respect to what we call, the Keshe Foundation work, we're still on the same track. Very soon the announcements will be made by Keshe Foundation in respect to our work internationally.

We expect to change the timing of the teachings on Thursday, (1:16). to suit the new conditions and new, what we call, positions. And it won't be far out. It'll be a few hours back and forth. But it will stay on Thursday, it's the same. But we'll announce this before end of June, that in July onwards we... or July, August, we'll take a new structure of teaching hours, for the time being.

Are there any questions?

Q: .. Can the July wellness sessions be attended by people with implants, metal parts and genetic disorders?

K- This is part of we want to find out. That's why we put no restriction on this. It's your responsibility to understand what you do, what you have. But we have put no restriction, this is a wellness session. And this is where we, in a way, we see how you will respond to the structure and expanding.

I received a private message, where we made a mistake regarding the passing of Dr. Bararpour. The mistake was not actually a mistake, but it became to be a painful misunderstanding for us and the Bararpour's family. And that was, we were informed of the passing of Dr. Bararpour immediately, as the head of the Keshe Foundation in Iran, was present at the hospital. He died of a stroke, a very healthy man, had one stroke, and then he had the second stroke and went into coma. (1:18). In between the first and second stroke, he spoke with me, "what can we do?" And by the time we couldn't do anything, they took a ?? and he done ?? had a second stroke during the operation. And, as we had this shock, in a way, highly valued man for us, not from the Keshe Foundation, but as a man, integrity of a man, we made the announcement throughout the Keshe Foundation channels, worldwide. Unknowing that his family in another part of the world, had not been informed, and they are always true. They go through the Knowledge Seekers, and different channels of the Keshe Foundation, the whole family were working around the work of the Foundation, wherever. And they got the message before they get it from the family, and that was a shock to them. We apologize for this, was our respect to the great man. But unknowingly, not knowing that there was such a pattern of life, in his private life, immediate family, some of them haven't got to know about his passing, through the Keshe Foundation channels and brought themselves pain. And we apologize for that, as was not intended, but it was respecting the great man. Now you understand how it happens and we sincerely apologize for Dr. Bararpour's family, especially his parents and brother and sisters.

Okay, are there any other questions?

Q: .. Hi Mr. Keshe, I am studying the creation of matter from the ray to the neutron. I'm struggling with the last step. (1:20). Can you please help by explaining what causes the matter mass to present as physical matter? In other words, when is a plasma, plasmatic and when is it a neutron? What causes that shift? Thank you.

K- It's not a shift, it's the strength change. The change of strength. It is change of environmental strength. And in a scientific way, it's a combination of Gravity and Inertia. And if you understand this, and this is a dilemma for many people, that how to create the both at the same time.

In the Keshe Foundation we have resolved this matter. And it's not an important subject, it's something, some 30 years ago I resolved. In a way, if you read book number one and understand it, it has been explained fully and thoroughly. And if you put a couple of chapters of the Book number one and read a couple of chapters of Book number three, one after each other, you will get the full message. And maybe if you work the other way around, read couple of passages, what you call it, sections of the Book number 3, and then find the relevant chapters in Book number 1. That's energy to matter. Creation of the Universe. (1:22). And the origin of matter.

Depends how you connect it. Book 1 to 3 is matter to energy, and if you read Book 3 to 1, you'll find how you convert the energy into matter. It needs a lot of understanding, but the problem is not Earth condition, creating condition like other positions in the Universe, which will become a challenge for man. Because, the two obstacles, when you measure gravity from a distance, from a planetary system or a galaxy, you have interface and interference with many other fields between you and the position you're trying to measure. And you have to learn how to filter this out to get the actual data. And then you should be able to transmute, manifest from one, in dimension of physicality, when you want to.

In the future, and this will be part of the test will be done in next few months and years, is that when we create these plasmatic energies that we transmute through, how safe can we make them that external energies cannot enter or interfere with during the transmutation? In a way, how do we shield it? This becomes one of the main points for the scientists in the future. (1:24). That you stay as you left, the energy of the STM, and the STP of the man. Because we know the physicality will change at the point of the Inertia and mass and weight. And what we call, gravitational field interactions are all together.

There are a lot of hidden knowledge's which man has not even come to think to find out. If this hidden knowledge is understood, then questions like this will not arise. When you read Book number one, I explain clearly how you go from mass to weight and how mass is created. And then you bring the book number three to book one, then you understand the answer to your question.

But, my advice to you is very simple. Do not fall in the trap of the present science. That you try to make one neutron, or move one neutron or whatever. Then you get, what I call, scramble in the up quarks and down quarks and west quarks and down quarks, west and the rest. Try to take that neutron to the body of man, size of body of the man, a flower, try to understand that. Then you see you look at it with a bigger understanding than trying to sort out one neutron, which actually is so important, but so little that you cannot even see to understand the operation of it.

Any other question? (1:26).

Q: .. Hello Mr. Keshe, I'm trying to replicate a MaGrav Power Unit." R- I guess you know where this is going, don't you Mr. Keshe?

K- Yes, carry on.

Q: To what I understood from the blueprint teaching week, we need to put on MaGrav coils, Gans's that have heavier plasmatic mass, than the plasmatic mass of a Copper Nano layer. So, the best solution to that would be to mix CH₃, CO₂ and CuO Gans's together, and put them on coils. I want to create a MaGrav Power Unit that will amalgamate a big free plasma, that later, when I make other plasmatic devices, like a Health Unit, it

will use some of the fields from the big free plasma, to work even more efficiently. My questions are, what other Gans's, besides the three popular ones, are safe to use, that we can put them in the Gans mixture, to further increase total plasmatic mass of the Gans mixture?

K- You've got to look what you're making it for, and for what purpose. And how you bring them together. You got to understand, this is something which Knowledge Seekers have a lot of problem with, and I tried to explain this over years, but I still see the same problem.

We say, the three basic or four basic Gans's. (1:28). Look at it, why four? You have CO₂ as a connection with the Carbon. You have Zn for neuro system and emotion. You have Cu for the body of the man, physical body muscles of the man. And you have a CH, which is the energy feeder of all three. When you speak about four basic, this is, this is the... You have amino acid (AA), which is Mr. COHN. Now you have a physical plasmatic AA, which allows Mr. COHN to operate in a dimension of the life on this planet.

And a lot of you have not seen this. And you don't understand it, and has caused a lot of you, a lot of what I call, problems, for trying to understand. In the world of the, science, if you look at it, you... science of plasmas, you talk about the four main ?? gas (Gans) ones, you have CO₂, you have ZnO, you have CH₃, and you have CuO. If you look, it's all the same, you have the connections, in a way, when it comes to Oxygen, it's there. (1:30). And then what you see is all this, as a connection Inertia. But what you see is replacement of N.

Which part do you want to play with? The technology has been brought fundamentally correct from the base, it's the lack of understanding of the operation, which is causing so much trouble for a lot of you. If I rewrite this in a systematic way, you have C and O. You have C and H. You have Z and O. You have Cu and O. If I take these two out and position them here (Zn & Cu), now you understand. Where here (COHN), we speak in the matter state, where here (combination of Gans), we speak about plasma state.

In the plasma state, we need more connections, and gravitational field always holds. So, what else you have in the body of the man, here (COHN), you connect it to Calcium. You make the, what you call, every basic cell of the man. (1:32). Here (Gans's), what happens when it's connected to Calcium.

You got to understand the fundamental principle of the knowledge. Then you understand how everything works. This is not four basic Gans's, this is why four basic Gans's. I have given you the alphabet, it's for you to make the word and sentences the way ?? God does it. As this with something else become a cell of the heart, something else with it becomes a blood, something else with it becomes a brain, and everything else. But you have the building block. COHN is building block of a matter state. The four integrated Gans's are the building blocks of the plasma of the Creation. On this planet, on this life.

This is like what I said, transportation (COHN) and this for transmutation (Gans's). Even though both have magnetic field characteristics. Then you don't need to ask these questions. Because you have not understood the fundamental basic structure of the teaching, all these ambiguities and questions comes up.

Any other question?

Q: .. (1:34). Is it advisable to create a gradient of field strengths between each of the three MaGrav stacks, for example, by putting the heaviest Gans's on the bottom, the semi-heaviest in the middle stack, and lightest on the top stack?

K- This is what we taught from the beginning. It's in the original teaching of it.

Q: .. Would it be better to make all three stacks mono strength by putting the same mixture in all three?

K- It works on this way. It works in a very simple way. You... you... it always works on the, what we call, the triangle, or pyramid condition, or a Star Formation. Your most of the energy is taken out of the top. Because the energy fields, the lightest goes on the top, and the heaviest goes to the bottom. Because it's feeding, creates energy that you can tap on into, or create the fields over. But again, depends how you want to do it. What you're expecting of your MaGrav? Knowledge Seekers have not really understood the work of the MaGravs the way it's been set up.

Any other question?

Q: .. Hello, (1:36). recently I bought a radiation detector for alpha, beta and gamma, and started measuring things. I noticed that the level of radiation increases from about 0.2 microsieverts, which is normal, to about 2, when I explain something to someone. The older kid of mine measured about 10 microsieverts, which is high level, while playing with a cat. Both measurements were taken in the chest area. Are we communicating through nuclear radiation too? Where, where does that radiation goes or comes from? I don't know if it was, if it is related with today's subject. Thank you.

K- In a way, we receive 80% of our energy from outside, sometimes even 99% of it from outside the body in. And not by eating, just by the fields. And the interaction of the fields, some can create radiation level detection, but it's not necessarily radiation. These kind of measurements are very common. It's how you do it, and how the measurement of the system was set up. What radiation to detect and what to show at what level.

When I was in University, just before I go to University, I had to do a project. And I built a Geiger counter you call it, radiation detector, as a final project before University. (1:38). And it was in a green box with a handle, I used to walk around the college and go around people and goes, "beep, beep, beep", I said, "you're radiated, beep, beep, beep". And actually that was one of the things which was discussed in my acceptance at University, why you do this, because I thought to see how much cosmic rays around, and I had to explain that to that time, Professor Leslie. And I started playing with this and changing resistors and capacitors and everything else, and I found that I'm measuring radiations which is not even booked anywhere, but it still goes beep, beep. So we try to find out if a tomato beep, beep was the same as an apple beep, beep and the rest of it.

And it depends on how your system is set, and what materials they use. Numbers are irrelevant. The intensity, which is important. In most of the systems you buy in the market, do not bring that Soul of the radiation with it. It's just measuring something and tell you it's about as nearest to. You can buy a combination of radiations, or you buy individual radiation, alpha, beta, gamma, or whatever.

But it's a tool. But on another hand, we absorb energy through radiation. and part of our emotion is transmitted. Especially when you fall in love, for example. I wonder, I many times thought, what's the radiation fields of, what you call it, loving. It must be worse than gamma ray, (1:40). because it's infectious and ?? goes out. And it kills you. So it must be that good. But you can measure different fields. You can measure all kind of things with these machines. Depends what capacitor, what resistor, and how they made

the circuitry for it. If the circuits were made in a specific way, the same radiation shows us 10 times higher on the other one.

But you cannot use these detectors near Gans's. The first few time gives you a reading you're happy, and then the reading is false. Because the radiation from, or the energy from the Gans's, will settle within the circuits. And you find out, we call it, saturation. And your system looks as it's working, but it actually is false reading, because it has been saturated with what you call, magnetic fields, plasmatic fields. We know this from years of operation. Many of the electronics you buy, oscilloscopes, power generators, which come into the circuits of measurements, or in touch with Gans's, after a while are useless. The same when years ago, when I used to have these power generators and the oscilloscopes in Belgium. After a few weeks, I used to send them back. They don't work. And they couldn't understand what they were going to. I couldn't tell them I'm working with plasma. I get it saturated. They used to do something with it, they charge it or change a couple of things on it, and come back and it was three, four weeks later, it was back again to them. The machine doesn't work.

Then we start realizing power saturation of the, what we call, (1:42). the plasma in matter state materials like transistors and resistors. And I built the system for it, not to allow it to go in. And now, in all the systems we use, we build this automatically. It's automatically built up to absorb energies of things.

So if you have, you bought this Geiger counter or whatever, you have to build the structure that absorbs the plasma, and then you can keep it. Otherwise, you see all the time it's giving you good news, but actually it's false reading. Because the plasma is operating in ???. Or become a very good Jewish boy, and the Jews don't mix the meat and the milk plates, they all ??? keep them separate, use the Geiger counter just for matter state radiations and then build another ??? counter ??? that you isolate it from plasma, you can measure plasmas in true energy field level. We do that in our labs. All our systems in operation with this ??? with, always have this insulation, isolations. We developed it by experience, and it works. It's a plasma isolation system from matter state systems like the counters and computers and the rest. You cannot operate without it.

Q: .. How can the plasma of the STM be infused inside the fetus? (1:44).

K- Wait till when the scientists teach you. If we teach you now, they'll call us antichrist.

Q: .. Mr. Keshe, do we create a "child of Mitra" each moment we have an intention, or a thought, as everything has a Soul? So the perfect Soul of the child of Mitra, when the thought or intention is pure, has already been created.

K- Repeat that.

Q: .. Do we create a child of Mitra each moment we have an intention or a thought, as everything has a Soul? So, the perfect Soul of the child of Mitra, when the thought or intention is pure, has already been created.

K- If you look at it that way, you are a child producing matter, all your life, every breath you take. Not really, but depends what you put and what you state on it.

(Rick, can you make me a co-host on the second line, please? I forgot that.)

Okay, anything else?

Q: .. So, does the Soul merge with the Cosmic Rays, when it elevates to travel, on it like a highway? (1:46). And could these rays be considered the blood flow of the Creator, and are the rays in a cylindrical form, like depicted in your second book?

K- Oh, just because you take a ride on the back of a donkey, does not make you a donkey, does it? So, if you travel on a cosmic rays, you don't become part of it. But you have to understand, there is certain energy fields interaction between the two. Otherwise, they will not hold, you cannot get a "piggyback." So you establish certain connections, but that connections are just forward, it's what we call, interface, but in principle does not touch the Soul. Otherwise you get on a fast one, a stronger one, and you become so elevated, you don't even remember where you came from. So, this is... it's just like when you get into a car, just because you're in the car you don't become the owner of the car, and the car doesn't come to go to one place.

And this is part of the knowledge we have to understand. It's not so easy, especially for Knowledge Seekers, who are, what I call, with the man behavior, not a woman behavior. In the knowledge of the Creation and plasma, you have to consider multitude of things, like women, to be multitasking. And all the time be aware of all the angles of interaction. And not just like man, you do one thing and you cannot concentrate on the second one.

So this is the problem, majority of the problem, with a lot of Knowledge Seekers and understanding ?? world. (1:48). When you look at something, look at it in all angles, not just specific one which you are interested in, then you make mistakes. Because... And this is part of the work that a lot of Knowledge Seekers have a problem with.

When you consider with the plasma, you have to consider all, in every angle, in every direction. And then it structures you to become, it's something over time, if you do a lot of it, you get used to considering a lot of things. In the plasma technology, singularity of knowledge will get you nowhere, more or less. You have to consider every angle of possible interactions. And that's why the people keep on telling us, oh, how do you know this? Because I look at 20 things. You don't know it because you look at one thing. It's a collective knowledge. And you get used to it, that it applies to every aspect of the work of the plasma. Doesn't matter space, doesn't matter food, doesn't matter motion. You have to consider multitude of interactions. And that's why, when one of you does something, it doesn't work, and the other one does, it works, but because he considers things you never considered. (1:50).

A little twitch here, a little winding there, connection of the winding together, the creation of the fields, they merge together. There are a lot of factors, a lot of factors, in plasma technology, that you have to decide what you want the outcome to be, to set out that the interaction gets you there, you can never start. You never start fresh. You create conditions to create new interactions, and that gives you new, what I call, environment. New ?? test ??.

Any other question?

Q: .. Mr. Keshe, do our thoughts have a Soul, and if so, does the Soul thought continue forever, depending on the intensity of that thought, or how it is expressed?

K- Oh, you can use your thought as a ray, to get something somewhere, your emotions as a package. But then you decide. You have to be. One of the hardest thing for Knowledge Seekers will be their arrogance. I go back to the teaching of last week, I said, (1:52). "if you want to get to the grandpa, you don't become going

there with the strong thing, you'll never get. If it's ?? he'll ?? never accept it. But if you go humble enough to be there to serve the grandpa, you'll find that they'll be knocking on the door very soon, to receive.

There is something I have to announce, because I just got a note from our people in the background. There are new paintings, which has been put on the Keshe Foundation, go on the Keshe Foundation maybe today. New set of paintings from Austrian painters, which has been added to the collection. And, if any of you are interested in that.

R: Let me get that up, Mr. Keshe.

K- I don't think they are on the ?? website.

R: It's not up yet, you mean?

K- It'll be on the store today, because they are in the exhibition, but they have not come public, so. They're new paintings, by new artists, Knowledge Seekers is starting here, bringing things in, so, we're there to promote it.

Any other question?

R: Okay, we can send out a link for that, once that gets set up.

K- Just go to the store, to the usual place.

Any other question?

Q: .. Good day Mr. Keshe, can you elaborate on why, (1:54). when I left my body I could communicate with dead relatives. Did I travel into the space they are, or did something activate upon exiting the body?

K- How did you leave your body? That'll be interesting to know. And once you free the shackles of physicality, you're on the open highways to any of it. Just be careful that you don't crash.

Any other questions?

R: That's all the YouTube questions. Let's have a look at our chat. Nothing new in the chat and our Q&A questions are answered.

K- So we call it a day?

R: I think, it would be good, yes.

K- Yeah, Knowledge Seekers are ?? got to get to know what is coming, and what is getting more and more expanded upon. If you don't understand it, but we're trying to structure something. In the next few weeks you will see the outcome of it. All these teachings has a reason. And hopefully, you, as I say, will see, realize the knowledge. Thank you very much for today, and don't forget next week, we start at 10:30 and finish at 12 o'clock Central European time. Thank you very much Rick, and see you next time.

R: Okay, thank you Mr. Keshe. Thank you for another Knowledge Seekers Workshop here, number 490, I believe, we're up to that number already. And coming up very rapidly to the 500 number here, (1:56). another ??.

K- Will be 500, let's see where we get by then.
R- Yeah.
K- Thank you very much, and see you next week.

490 KSW June 15, 2023

END

491st Knowledge Seekers Workshop June 22 2023

Fallacy in present science age & size of U; October 28th Ambassadorial Meeting - cornerstone of space technology in exchange for peace - official invitations by 2 government; Unseen T shown; Calculates kilometers light travels 1 year at speed of light - 9.5 to power of 15 km; Circumference of U - 292 to power of 12 in light years; Circumference of U 2.7 to power of 27 in km; Say U is 13 billion years old & Earth is 4.5 billion; Earth has only traveled 2.7 to power of 17; 10 to power of 10 missing; Numbers fallacy; Einstein fooled humanity; Wrong number - why nuclear stations explode; KS to calculate real number present in October to leaders; Egg yolk round like plasma - oval shell - which is boundary; Key is STP trapped STM - higher strength - H - C14; No assumptions in Knowledge; E=MC2 fallacy; Why Earth kills due to seed & environment

ENGLISH TRANSCRIPTION

(:11).

K- Yes, good morning, good day to you. As usual, whenever and wherever you listen to these series of Knowledge Seekers of the Keshe Foundation, the Spaceship Institute. We welcome you back, and, we hope to be able to add to the knowledge. Today, we have two points of ... announcements and teaching.

The teaching, it goes back to long, long time ago, (:12). when I put the question to the scientists, to cosmologists, and to the nuclear physicists in, during the time of the student, before and after. And, those who understood, understood how much mistake we have made, how assumptions we made, just ?? like the speed of light is the ultimate speed. Now we understand, I'll explain, scientifically, digitally, that how much we have been misled, in the Knowledge of Creation. We need to know this, because then we find out, we don't end up outside the Universe (U). Somewhere doesn't exist, because we made a miscalculation. It's just like, if you heard before, aircraft was short loaded, and it crashed because it never ?? arrived, because there wasn't enough fuel. It's the same in the process of the Universal ?? travel.

So, there is a lot of mistakes made by scientists, a lot of assumptions, from 19th, 20th century, 18th century, and we stuck to it. And today, I open that, because, if I send your Soul somewhere, it has to land where it's

going, not, "Sorry, scientists made a mistake 200 years ago, and we accepted it." This is all like assumptions which were made by Einstein, and now we understand it's all fallacy.

But the most important thing today, is the announcement we make. As you've been with us, with the Keshe Foundation for years. You knew that since early years of Keshe Foundation, in 2009, 2010, 11, we gave lectures, we made scientific presentations to governments, we called it 'Ambassadorial Meetings and Conferences'. We had the first Ambassadorial Conference in Nino, and then, if you remember, in Italy, later on, some years later, we gave the Ambassadorial Meeting, where we presented the MaGrav Technology, And now we understand the MaGrav technology (T) is one of the most powerful technologies. But it was given, if you remember, ambassadors came and received. (:14).

Now Keshe Foundation announces a new ambassadorial meeting. This meeting will be supported by two governments. In a way, we set up, but the support will come from two powerful nations. To make sure ambassadors in that Nation, and from other parts of the Europe, will come in for this meeting. It is one of the revolutionary points, in the point of knowledge, that the all governments know. We are here to share with everyone.

So, the announcement we make today, and it's been put on the Keshe Foundation website this morning, is that the ambassadorial conference will be held in London, on 28th and 29th of October. October, Saturday 28th, after 7 o'clock, all the ambassadors with some of them, powerful politicians in Europe will attend this meeting. British politicians at a very high ranking are invited, not by Keshe Foundation, but by the governments who we work with.

This is important that we understand, this is a prelude to 2024, what we call, 'World Leaders, Technology, Space, Plasma Technology, in exchange for Peace.' So, this time this ambassadorial meeting is to inform, as we always done. But this time, we are as part of the provider of technology. Where the invitation and the support will go both, by governments and the Keshe Foundation, to all the embassies around the World. And, embassies in London will be invited.

The reason we went with the government, is because before people started sending emails to the embassies and (created) all sorts (of problems). This way invitation will go officially by government to government. So, there is no use you writing all the rubbish which you did, because this time we ask the embassies to forward to us, who is sending what, if they receive. (:16). And there are a lot of friendly embassies, especially with the two governments, which we work so closely. So, we invited. There's a limited number of places, very limited number of places. As Knowledge Seekers (KS), you can join us in October 28th, 29th, in London. At one of the most prestigious locations in London, because we represent Keshe Foundation and two powerful nations for this conference. Where with the support of the nations, we announce the development of the new technology. ... [Audio cut] ...

So, now what we understand is that we meet in London for two days conference, Saturday whole day and Sunday whole day. But Sunday, Saturday night on the 20th to ... On Saturday at 7 o'clock, you are invited to sit and discuss your point of view, as a Knowledge Seekers, and what we see with the World Ambassadors. Even very high ranking politicians. Those who are the decision makers, and what this new technology will come. You'll understand the reason we do this, is because, Keshe Foundation has signed agreements with powerful nations, for delivery of the Space Technology, in a very powerful way. And now, we will go in through a number of governments, for the conference in London.

We will have, as the pictures you see, this was a conference with the World Ambassadors, Palestinians, with Israelis on the front line. The far end is the Vatican ambassador, what we call the Prince of Malta, in the far end, was sent by the Pope. When we invite... (:18). When we invite, world leaders turn up. And, if you were in Nino, (Italy) we had other ambassadors, who turned up, and important change even to the American policy.

This ambassadorial meeting, will be the cornerstone, before World Peace on the agreement of the new Space. It means Space, not only peaceful, but with the knowledge and technology. And, sooner or later you'll hear, the flagship nations which work with Keshe Foundation. So, please understand, we apply, with very limited number of places for Knowledge Seekers. The same goes for outside, those who are not KS but want to be in this conference. New technologies will be shown, unseen. New technologies, with the permission of the two governments we work with, will be opened in that conference. Leading to the World Leaders Meeting, in applying the new technology. So, if you are interested and you are part of the change, and you want to put your ideas and questions to the World Leaders, to the World Ambassadors, please...

In this point, we bring everything to a beautiful beginning, with the Keshe Foundation Technology, in exchange for peace, outside the environment of the Earth, because there, we don't have nationalities. So, we bring in one of the most, what I call, celebrating days, on 28th of October in London, as one of the most prestigious places, with hundreds of people, ambassadors and government officials, (:20). possibly two or three Prime Ministers will be invited. High level government officials, who are the decision makers, will be present.

And then, we lead to 2024, 2025, for the world leaders, technology, space technology, in exchange for peace, outside the Earth. Which means we become, working as one. You have heard the prelude to this, in the past two or three weeks, by nations announcing collaboration with the world scientists in the space technology. This will come in the back of that, and a lot of the things, which we received support from governments.

I hope we see some of you, as this will be one of the memorable times of the technology being opened up. Technologies will be shown, that even Knowledge Seekers who work close to us have never seen. And it will bring that change, the last step. And the first time by that, during the conference, the first, what we call, MOJHANS, will be tempted to be, what we done, what we said, to transmute. The technology will be that level and we deliver what we said.

We come to a new point, a new part of teaching. I would like Rick to, in the background, to support and to understand about the mistakes in the world of science of today. And if we understand this, you understand how much with what we know now, we have to rewrite all the books of science. In a way, you do it yourself. Now you understand, with the strength of magnetic fields, you can travel faster than the speed of light.

So, now we understand what we said, (they said when automobiles were new), if the man goes faster than 25 or 60 miles, his eyeball ?? falls out, and the rest we found out is all nonsense, because the scientists couldn't understand. Now I want to explain something, which I've put to the heads of Queen Mary College. (:22). And, prior to that, to the nuclear physicist at British, British Nuclear Fuel, BNFL. And, the only thing I got, was a dropped jaw. And, they could not answer me, because this was wrong. The knowledge we are given, is wrong. The knowledge we've been shared with, is wrong. And, now that we come to the time of space travel, we have to correct it. Otherwise, you end up nowhere, or you end up somewhere you never thought.

I would like you Rick, if you bring Wikipedia up, it gives you the speed of light. And how many hour, what, how many kilometers, is in one light years. Don't forget, if you go to Wikipedia, and open up, and look at what Wikipedia tells us, according to the speed of light. We are presumed, we assume, that the speed of light, one year of it, which is 365 by 24 hours, by 60 minute, by 60 second, it comes to somewhere, very interesting point, of roughly, scientifically, can give us the, what we call, a very strange figure. Which, this will bring us to new understanding. Rick, if you could tell us how many kilometers, one year, speed of light is, please? You can take over the white screen and then we come back to it, if you want to share through Wikipedia.

You have to understand, that this is one of the cornerstones of present science, present understanding. That how many kilometers do we actually travel in one year, (:24). speed of light year. Would you like to read it out for us?

R: Yeah, let me see if I can find it here now. It's got a number of comparisons, it's got...

K- It says, 671 million miles per hour, which you still have to multiply by 1.6.

R: Travel times.

K- It's very easy, the speed of light is ?? around 1.9 just under 2 times 10 to the power of 9, and then you multiply it by the rest of it. And then, this brings us to a very random figure round 9,460 times 10 to the power of 12 kilometers. That is about 9,000 or 9 to the power of 15 kilometers per year a light travels. Roughly, 9 and a half times to the power of 15 kilometers. That's how much we travel, if you go with the speed of light. This is what ?? is assumed to be what we do, and all our measurements cosmologically, are based on this, light years.

So, you haven't managed to find it, but it's okay, it doesn't matter. Roughly, when you sit down, you calculate, this is from 18th and 19th century, they've done these calculations afterwards with Einstein and everybody else confirming it. (:26). But it comes to about, just over, just under 2 to the power of, 2 times the power of 10 to the 15, sorry 12 and per hour, per year. And then when you calculate it all together it becomes something in the region of 9,460 times 10 to the power of 12, or nine and a half times to the power of 15, roughly.

Now we know this is how much we travel. You've got to understand your Soul travels much faster than this. Speed of light limitation in the matter state, not in the... This is limitation of the matter state. This is, if you travel with the physicality. Now we know, with the speed of light (Soul), you travel beyond this. So, we stick to what scientists accepted and what it is.

Now, the other point I would like you to check, it says, the circumference of the Universe. Scientists from early years have decided, measured, in 18th, 19th century, and we have accepted it in the world of science as an acceptance, But, you will find out, in the world of plasma and reality of Creation, this is a fallacy. And they say, the circumference of the planet, or of the Universe, is round about 292 times 10 to the power of 12. So, we see that we have 292 times 10 to the power of 12, to be the circumference, in light years. (:28). Which means, we have to multiply 292 times 10 to the power of 12, by that 9.5 to the power of 15, to get the actual measurement of the circumference of the Universe in kilometers. So, this gives you an amazing figure of 2.7 times 10 to the power of 27 kilometers.

So, by the present science of today, we assume we know the measurement of the Universe, accepted by world of science and cosmology, and we measured it, and we made the Universe out of it. So, our Universe has a measurement of about 2.7 times 10 to the power of 27 kilometers. The way we measure the circumference of the Earth. So, our Universe, in the Unicose, to go around itself, it has to travel from one point, back to its point, that many kilometers, to make one day, to make one day, for its life. Now, this is a huge number. If you are mathematically enough, conscious of the dropping of zeros and all sorts of things, you'll find out. (:30).

R: Just to let people know, we're not losing sound here with Mr. Keshe. He needs to mute periodically in order to avert some background noise. Okay, continue Mr. Keshe, thank you.

K- Thank you very much, thank you very much for explaining. We are in public domain, so we have to stop when we know the noise is coming up.

So now we see, our scientists, in the matter state of the Universe, they tell us that our Universe, now we don't accept the ?? circumference of it. This is a public knowledge, is not something made up by us. So, you have 2.7 times to the power of 27, roughly. I'm not a mathematician, I make a lot of mistake with zeros, but let's say I'm, I'm right, for once. Now, you come to another point. Now we know the circumference of the Universe. According to the present facts here.

Now comes another interesting point. The biggest interesting point is, that our scientists have made us to believe, that this Universe is 13 billion years old, Earth is 4 and a half billion years. Not light years, earth years. And, all this evolution, biology, physics, human mind, emotion, was created over this 4 and a half billion. Not light years, yes. So, we throw away the light years. Now, if you put 13 billion, which is 13 times 10 to the power of 9, and then you add it, by the days, by the hours, and then multiply by 1,600 kilometers an hour, (:32). which the Earth moves, you come to a very interesting point. You come to a very interesting point. You find out that it means, if we accept the 13 billion years, that the Earth has rotated, considering a plasma is a sphere, it's not flat line, so it has a circumference, it has a dimension and diameter. We, as humans, have decided through our scientists, that the Universe is 13 billion years, and we accepted that 365 days in a billion year, and we accepted it's 24 hours a day, and then we accepted 1,600 kilometers per hour, the Earth moves, which we calculate our position. We are not calculating the speed of the Universe motion, because we consider this is earthly hours we are calculating. So, what it gives you is 1.8 times to the power of 10 to the 17. Don't forget, the circumference of the Universe was measured to be 2.7 to the power of 24.

Then, if you are a very clever scientist, a mathematician, then, you come to see the two don't match. It does not match. We cannot have a circumference of 2.7 times to the power of 27, (:34). as a Universe. And then saying the Universe exists only 13 billion years, which gives us 1.8 to the power of 10^{27} , or 17. There is simply 10 to the power of 10 missing somewhere.

In a way, if you go back to the light years and light motion, you'll find out, our scientists cannot explain. We have given our Universe a fixed time of 13 billion years, with the fallacy of our scientists. And again with the fallacy of our scientists, we've given the Earth, the Universe, a measurement of 2.7 to the power of 27. And, where is that gap to the 10th power, in the volume between what we say is the life of the Universe, and what is outside. Or, did we travel more? Or, we cannot have a Plasma, if it's not encircled, it's, but closed. It's a straight line, it's expanding, whatever, but it still is a plasma.

So, we understand, if we do a little bit of clever work, and divide the, what I call, 2.7 by 1.8, one is in to power of 27, one is in power of 17, then we see our Universe is 1.5 times the power of 10 years. Difference in kilometers. And then, if you divide it back into the kilometers, you find out, our scientist has given up a lot of ???. (:36). The two don't match. And I cannot send you into space, by the assumption of the fallacies of the human measurement from 18th century to 19th century.

A new measurement, a new technology, a new knowledge in the world of science of plasma, In the science of Creation, cosmology has to be accepted. And if you think of it, 13 billion years is nothing, even to make a single human cell. And, if you go any further. If you go further, you find out, and I'm sure a lot of people will do a lot of calculation by next week, and come back, let us write the new book of science, and bring some reality into it. The Universe cannot be 13 billion years. And you have to understand, we're still working on the fallacy of their lifetime.

When I put these figures on the table, with the scientists in IAEA's division, and I put it in front of the British nuclear fuel scientists, and I put it in front of the scientists in nuclear, I said, "this is why you cannot control the heat." Because, you've made a big ?? duda (error) in the measurement of the speed. Because you're working on a matter state, where the fields of the radiation from neutron, works in a plasma condition, because it's already done. That's why we run out of control, our reactors don't respond, and we get all these disasters. This is why when we put Gans's in, we can control. Now you understand.

So, from today, you sit down and do the calculation till next week. And you, as Knowledge Seekers, come up with a figure, that is realistic. (:38). That is acceptable. That I can put you in a transmutation, and don't forget, the speed of magnetic fields, it's millions, billions of times faster than the speed of light. Now you understand, when I told you years ago, that none of the science of up to now, makes sense anymore.

This is the first time I put this on the table, in public, but in scientific world. Even when I sat in ?? UB with the nuclear scientists and professor from there, UB, I told them, "you answer me this, why are we in this position?" "Why are we running into nonsense, and that is why we're running into "not controlling" nuclear reactors?" This is why all our assumptions in nuclear technology of today is wrong. And then the things we do, looks like a magic, because now you can see it.

In a matter state, speed of light, we are out (off) by huge numbers, in zeros, order of magnitude. You got to remember, you get a ball of 2 centimeter, fill it up with water. Then you get a ball with 2,000 times bigger and fill it with water. And you see how much volume of the water you have. Even if you go from 2 centimeter to 4 centimeter, you see that 2 centimeter gap, (:40). gives you more volume of water than the 2 inside. It's the order of magnitude.

Then you understand, there is no way. Unless you want to fool the scientists, who understand plasma technology, into accepting 13 billion years, is the limitation of life. Is limitation of life on this Universe, is nonsense. Does not make sense, or less ?? we calculate. And this is only in the matter state we are talking. And this is only in the matter state. When we go in the higher order, we find out, that really works worse. Everything worse, everything worse.

And, in reality, our Universe is trillions of years old. Not only billions. Our Universe is very much different. Our Universe is not what they let us to believe it's ?? age. And then, if you understand this, then it comes the cycle of life in the Unicose. In the world of common man we say, figures don't make sense. Unless

somebody, one of you, a scientist, as a Knowledge Seekers, come up with a formula, come up with something that us common man can accept. Now we know the discrepancy.

The age of this planet, there is no way it's four and a half billion. Four and a half billion lifetime is nonsense even... (:42). If we come into understanding this, we'll find out that we are making a mistake. And then, not only we have to correct this, as the speed of light, then we have to understand the plasma works in a speed of plasmatic field, millions of times faster than the speed of light. So, even the calculation of the size of the Universe, is wrong. Then, the calculation of 13 billion years is wrong.

And then you understand how our technology is so correct. Because from day one, in understanding transmutation, we calculated everything on the speed of the plasma, on the strength of the plasma. And the speed becomes irrelevant. The speed is a matter mind. The speed is not the time of life in the Universe. Then you understand you transmute in the dimension of fields. and not in the matter. Then, the whole science of cosmology, goes into what I call, the big hole.

From today, now we understand, somebody has to redefine, or bring these two figures to match somewhere. I know how to match it. And in Book number 3, I have given an indication of how you calculate it. So this is not something new. It's already 10 years ago, 12 years ago, 14 years ago, written in the 3 books, (:44). in a very, very clever way. Read the books again. I told you last week, read the end of 3 and add it to the first three, four chapters of the 1. You'll find out.

Now you understand why. Now and from now on, we work in the age of plasma. We work in the dimension of the plasma. And we need to understand the truth. And we need scientists together, collectively to explain to us, how do we accept, how do we accept all of us, such a fallacy. Or, the Keshe Foundation is wrong. And my knowledge, and your knowledge, and everything else knowledge, comes to a halt. We have a 13 billion age of the Universe, 13 billion speed of sound, 13 billion speed of Earth, 13 billion light speed, 13 billion plasmatic field speed. There is a big difference. And our cosmologists tell us, they have fixed the number to 292 billion years, is the circumference of this Universe. And, they tell us the circumference of this planet is 40,000. 24 hours multiplied by 1.600. And then we say, multiply it by 365, (:46). and then multiply it by 13 billion, and we are somewhere on the outer edges of the Universe, because we are in a solar system, which has planetary system inside it. Inside the solar system, inside the Universe, as we close up to the center, there are still planetary systems, but in a different shape, in a plasma condition, not in the matter state.

So, as scientists, as Knowledge Seekers, today I opened up for you, the Pandora's box of knowledge. I can be 100% wrong. I can be 100% wrong, but up to today, no scientist from all the schools of science have managed to answer me this question. And this comes back to you. Can you stand this? Can we come to this point that our knowledge, our science, our technology has to answer in a much, much, much stronger, powerful way than anything else. It has to be powerful, it has to be strong enough, we have to have capability. As I said, if I give you a speed of sound, if I give you the speed of light, and I put you in the Universe, where are you going end up?

But one of the problems you have is, where is the Soul of your father, who died so many years ago? With the speed of plasma, how can I send you to connect to you (to connect to him), but you connect to him? Is he so short? Is he so near? Is he... You can understand if he's 13 billion years, and we take that as a circumference of this Universe, (:48). how far do we go? To what extent ... have we made a mistake? Have we made a yolk inside an egg, and we say, "the yolk is 13 million years, because of the dimension." But what happened to the egg? It does not make sense. Science of today, the figures of today, does not make sense at all. And

hasn't made sense at all, for past 50 years to me. And now, should not make sense to you, unless I have made a mistake. Which I don't think so, maybe I've made a lot of mistakes. But these are figures, which is on the Internet. These are figures which we have accepted in the world of science of today. We measure the speed of light. And we say, this is the way it is, the way it's supposed to be, and the way it's done...

In this process, in this understanding, in this new knowledge of plasma technology, you have seen the Gans's, they are spherical, Universe is spherical. So, do we accept the yolk as the size of this Universe? Or do we accept the egg as the age of the Universe? Which they don't do match, the two do not match. (:50). ?? Don't understand what the revolution in the space technology is to come. Why, when we talk about the matter state, we don't even consider it as such, we say the Soul of Physicality (STP) is inside us, the Soul, because literally, the STP is that egg yolk, where the Soul becomes the (shell of the) egg. Where today, the Soul of the Man (STM) has been kept, by the shell of that egg, Calcium, inside, trapped. And it's not allowed to travel with its true speed, where the physicality takes the speed of light, as a maximum.

Sometime, if you understand, how the STP has managed to interact the STM with the highest power and strength, then you, the biggest key in the human world of Creation will open up to you. How the weakest can manage to hold the strongest in a trap. And once you understand this, or once these Knowledge Seekers in the future, become knowledgeable enough to understand how it's possible, then you understand the common denominator of the life, which we call, Hydrogen. Then you understand why Deuterium becomes part of the cycle of the transmutation, and how Deuterium in combination becomes what we call it as, because you understand it as a C14, becomes a line of communication and connection. And then above and below, in the matter and a higher order, in the Universal transmutation and transportation.

Now, you Knowledge Seekers, as we say in English, (:52). "I have put a cat amongst your pigeons." See where your pigeon of knowledge lands. And how much you have accepted, digital numbers, which your own human scientists have given you. We are not bringing anything out of our pocket. These are numbers which on a daily basis are taught in the schools and universities to our children, a world of nonsense. And then, we try to tell our children, "oh, just forget it." Exactly where, every time you run into problem of knowing you're wrong, you call it assumption, and you become Einstein. This $E=mc^2$. Even that now has become a joke. If you understand, the matter ?? speed in plasma.

Then you understand, in the world of science, in the world of the Creation, there are no assumptions. You cannot make assumptions, it's impossibility to make assumptions. Once you start assuming, it means you're wrong. Because, you have to clarify that uncertainty, that there is no assumption into it, that $E=mc^2$ has got hundreds of assumptions in it, because the guy was absolutely not a scientist. This is how he kept his books ?? strict, by assuming this is that, and that is that, and he could give it to ?? the tax man.

You're accountable to yourself, you're accountable to understand, as we said, (:54). in the coming time, you are the travelers of the Universe, you are dictating where your Soul goes. "Oops, I ended up in a different Universe, because I listen to the human scientists." So, it's very simple. Two point whatever, to the power of 27, according to the science of today. And we are inside the yolk, not inside the white, and the shell of the egg, what we call, Universe, and the numbers don't add up. The science doesn't add up. None of it adds up.

And after today, everything added up, because we ??. Now you understand what we will show you in October 28th. Science on the basis of reality of the Creation of the Universe, not on assumptions of a, what I call, "an accountant," who never understood how to account. That's why they wouldn't let him to be

accountant. He could not fool the tax man, but he managed to fool the whole of human race as Einstein. Because his numbers does not add up, that's it ?? in his ?? account.

Now you have to understand. Now as Knowledge Seekers, that you want to travel with the speed, to see your uncle, your mother who died 20 years ago, and take a speed of light, multiply it by hours, multiply it by seconds, multiply it by speed of, let's say, light, which is the maximum, (:56). then you should be able to find out where your grandfather could be, in what layer of the shell. And then, you have to have a simulation that it increases by speed of light per second.

So, this is how you're going to find out, where your mother is, your "Soul of mother" is. Now you understand, why I brought this topic up. Now it's time for us to become engaged. The knowledge I've given you, the knowledge I've brought you, it takes all the Universities of this planet for years to come, to work on it, than trying to find a nuclear bomb. Because, nuclear radiation has a power strength, which man has never found out, and that's why it runs out of energy, and it goes into explosion and ?? around, gives us all this mayhem and the fear, and we call ourselves, nuclear power people. We have a power because we don't understand it, but it can do.

Now we understand it, I can go faster, I can create a system more powerful to absorb. And this is what we saw in Fukushima, this is what we said, "you don't need Plutonium and Uranium." Now you understand. I cannot send you somewhere, where your mother isn't. I cannot send you to a planet, where it doesn't exist. If I send you to the measurements of the today knowledge, on the edge of the planet, you end up most probably somewhere in the center of the Universe. Where you wanted to be, on the other edges, where the Soul of your mother is creating a new star. (:58).

We don't need stars and expansion in the center of Universe. We need new stars on the outer bounds of the Universe, as it grows and expands in the Unicose. So now you see, there is a lot of discrepancies, in the fallacies we have accepted, as men of science. I think, a little boy, in a primary school could tell you, "Einstein was nonsense." Now it doesn't make sense.

We have to rewrite the book of the Universe. But we have to understand what we are rewriting, that we don't make the same mistakes as knowledge of today. Because then we put limitation on our children's understanding of the future of space. Then we come. The beauty of it is, ask yourself a very simple question. I asked this question many times, and now I put it to you. You have to understand. You got to understand how I understand the physics, how I understand creation of life, because things have to make sense in what I've been told, and none of it makes sense. If we can, and if the magnetic field travels faster than the speed of light, or it's the ultimate in interaction with the field of each other, we should see two magnets sitting next to each other, light. Never seen, unless in the matter state. So, the speed of light should be a very little things, at the bottom of scale of the speed of the motion in the Universe, that we don't even absorb its light. Because interaction of the fields, like the Earth and the Sun, create light, creates fields, it creates radiation. And we don't see that. We don't see light when we put magnets (together) ... (1:00).

You've got to understand, man's knowledge lacks a lot of truth. Today's knowledge, not your children and your grandchildren, that they know the new knowledge. Then you understand how I travel you to the moon in milliseconds of your time to the speed, and when I speak about the speed of light, and you'll be on the moon within minutes, seconds, now you understand how.

The new space technology, the new understanding of space travel has to bring new dimension in understanding the reality of the Creation, and the life of the Creator within it, which has created it. Not with the fallacy of the men, especially if they are Jewish. Just because they're called, Einstein. And we've seen so much harm, by this narrow-minded race of Jewish, what we call, mentality, that has destroyed the whole world of the science. What I call, community of gangsters. We have mafias who control money. The Jewish community, because they can push things around, have tried to change the course of man in the science, and has come an end to this nonsense of this society.

You saw us, when Netanyahu came out with showing Keshe Foundation nuclear reactor as a Iranian nuclear bomb, we hammered it at the IAEA, and within days, (1:02). we got IAEA in Tehran, and they said, "it's nonsense what they said about the ?? nuclear bomb." And we don't hear it anymore. Now we have to understand, the rest of the nonsense comes out of it. These people has to be stopped. That we accept, does not matter race, religion, or color, the truth about the world of Creation. About the science of Creation, and not be controlled by those who are after false glory, as we've seen.

The day will come which man will erase anything which got Einstein on it, because there's never been such a criminal in the world of men, especially in the science of man. That has put limitation on man understanding of the Creation, because he had no brain anyway to start with.

Now, you have the figures, now you have data, according to your scientist, man's scientist. You tell me, by next Thursday, how much do you think is assumed, how much you think you can calculate, is the dimension (D) of our Universe, the dimension of our, what we call, age of the Universe, considering the speed of light, is different (than) the speed of magnetic fields. And when you see, you understand this, then you come to understand, the Creation is much, much longer than 13 billion years. It is not even the first few seconds of the Creation, 13 billion years.

Does not add up. And, sorry, I cannot send you to 20 Universes further down, because Einstein said, "there's a speed of light, a maximum." (1:04). And other scientists measured the size of our Universe, at 292 to the power of 10 or 12 light years, or whatever limitation we have come up with, by 27. And it's very important. One day, one day I explain to you, we're in the midst of a lot of numbers and calculation, how man has gone wrong in many other things, because they had to follow.

As I said, some of you Knowledge Seekers were with me in that meeting. The scientists, the government officials who understood what Keshe Foundation is, the scientist next to him said, "Newton said that, and equation of relativity says that, and this is against what you say because it's in the books." And the man on the top said, "Now with Keshe we'll write the new books, let them learn from us." And this is what you're going to see from now on in the Universities, education centers of the countries which work with us. Because we put no limitation on the speed. The speed, and what we can travel with, is a limitation on our own understanding of our own world of Creation. Not a Jewish man, could not even account to an accountants and a tax man, and he taxed the whole man with his stupidity.

There is no limitation, even the speed of light which you measure, is the fraction of actually what the light travels with. Because you only rely on the visual, on what you can detect with man's meager knowledge in technology, and this is going to (stop) ... (1:06). Now you understand. Now you see how the limitation they have put on us, has put limitation on us, to understand the reality.

I hope today I open your eyes to something new. Not new, to something which I could not accept and did not make sense. And as a scientist in the world of plasma technology, which I hope I could be considered a scientist, somebody who thinks beyond the frame of the lies we've been given, what are we going to do now? You know how many television programs are going to be changed? How many literatures have to be written off because of this 13 billion?

Knowledge Seekers, this is your job. And on 28th of October, I'll give you the platform. Any of you who can confirm, who can logically, with what you know now, can come. I stand next to you on the platform. Not just one, collection of you, to explain to the rest of the world. To explain to the ambassadors of the world, to explain to the leaders of science of the world, what you think is the age of this planet, the age of this Universe. If you understand, even when they tell us, the age of this planet is 4.5 billion years, and then the age of the Universe is 13 billion years, Ah oh, we must be the old people of this Universe, because we have already lived one third of it. (1:08).

And then it comes a lot of other questions, in the world of Creation. Then it comes, why I brought you down the line of teaching, Because, I cannot send you in transmutation, measuring this is the position of the Moon, I'm using plasmatic fields, and suddenly you end up in another Universe. Because Einstein said the speed of light is this, and it takes so many seconds to get there. Now you understand. If Einstein says it takes a thousand seconds to get there. And you're working with the magnetic fields, think about maybe one second. Then you end up at the actual orbit where the mother is and you have a meeting. You don't go to another moon ??, you're in New York and mother, "oh, I'm here by mistake, ended up in London."

Have you ever done this? Go to airport, go to a travel agent and ask for a ticket to Oman. And then they give you a ticket to Amman in Jordan. But you say, oh, I want to go to Oman as a country. It's a big difference. And I'll tell you why. It's happened to me. I bought a ticket to go from Rome to Oman. And just before boarding, it says an hour and something flight. I said, excuse me, there's a mistake here, because I know where I'm going. It's only a six-hour flight. Oh, the lady made a mistake. She took the Amman as Jordan. you're flying to, not to, Oman, as a country. Now you understand? I had appointment in Oman. I would have ended up in Amman in Jordan. And I've been to both, and they're both beautiful, but thousands of kilometers apart. Our Knowledge Seeker, our friend who listens to the teaching, he says, (1:10). "I know, because he would have been waiting for me in Oman, and I've been in Amman in Jordan."

This is where knowledge has to make sense, where the technology of the future has to make sense. We as Knowledge Seekers, we don't accept any more fallacy. Ages don't add up. Thirteen and a half billion years, age of this planet, this Universe according to us, and four and a half billion, puts us in the wrong place. We should not exist in that position. We are too close to the center, and the compressions of the fields does not allow life like this.

So could you please calculate how many years ago, how many minutes ago, your mother passed away? Or you met your brother, and he's in another Universe. He's not dead because he is with his Soul, you end up in the right place with him. Now you can calculate. Put the speed of light which Einstein says is the right number, and then calculate how many hours on second and minutes your mother passed away. You should make a circle around where you are and say, "Ok, my mom is somewhere there. I'm going to look for her." You are in the wrong place to go.

Then you understand connection of magnetic fields the interaction of magnetic fields come to play. So, our fierce Knowledge Seekers, get to work! And on the 28th of October, you have a platform to bring this into

play. And you understand. Then you understand how much wrong and how much fallacy, (1:12). as we think we've become so clever, we've got tricked by a much cleverer ...

Now, we invite you, you invite yourself, come in, as a group of you. The scientists, scientifically, today's teaching, now become the science of Knowledge Seekers. You made the MaGravs, now do the calculation. And then I tell you, why you couldn't get your things out of the MaGrav. Welcome to the world of reality, acceptance of the truth by yourself and nobody else.

We are not indoctrinating you, we're just explaining what we've been given, does not make sense. It did not make sense to me at the age of 10, 12, 50 odd years ago. And the more I gathered knowledge, the more I understood about the world of Creation, it became worse. 13 billion years, take it from the center of the Earth and move out and see how many kilometers it becomes. And then make a circle of it. And say, our planet, our solar system, is on the edge of the Universe. We are on the edge. Which one are we going to accept? Did any scientist ever put "2 and 2" together? Or were they too afraid to say, because there wasn't ?? down that side of the stream of life? If they would have come with 13 billion light years, (1:14). maybe we could have compromised somewhere. 13 billion years, it doesn't add up. Does not add up. Is out by the factor of 10 to the power of 9. Minimum. And that's in the matter state speed of light.

So, now you understand. We have to do a lot of things to be able to transmute you, to create the condition of transmutation, and it has to be in the plasma condition, that you travel with the speed of plasma, which is not in the matter state. That's why we put your STP inside your Soul, to get you shifted, and not letting you go with your body. With your body you can go as much as you like. With the STP you can go as much as you like.

And then you understand, new science. You understand new cosmology and everything else changes. Even the world of medicine will change if you understand this. The world of every science and dimension will change. And then you have to understand a new world, a new way to create gravity and magnetic fields. Not the way you've been doing it.

We have to redefine the science to be able to create the true science of the space technology. Otherwise we are back in the same thing, and we shoot it a little bit, put some "Chinese firework" in the back of it, and we gloss it up, till the next one finds out, "ah oh, this was all lie."

Thank you very much for today. And, as I explained, we'll close the teaching early today, and we have a frame of hours to do the teaching. I'll let you one or two questions, and then we come to an end. We don't take any breaks, if there are any questions, (1:16). and then next week we go in more detail. We understand more.

But please start calculating. Am I wrong? If I'm wrong, it's to me I'm wrong. If you are right, add up the knowledge of today, and by next week let's talk. The discussion is, I cannot send you to somewhere where your mother is not. But, if you understand, when you went into the Enhancement Unit, and you met the Soul of your mother, those of who came to see Jesus, and you met, and you felt him, then, it cannot be ?? correct.

Are there any questions?

Q: .. We still got to define the incongruency between the British billion and the American billion. Those are two different ...

K- It doesn't matter, it's only point, it's only three digits, three zeros.

Q: Exactly.

K- That doesn't make even, you're still 10 to point 7 up, or 10 to point 7 down, doesn't make any difference.

Q: Fine, but did you talking about quadrillion or quintillions?

K- We always talk billion as 12 digits, 12 zeros or 12 digits. This is how we calculate. Not in the...

Q: Fine.

K- And then you understand.

Q: Yeah, so do I, because you were brought up in the British school, but the Americans...

K- It doesn't matter. I was brought up in the international school. So, billion to us is 10 to the power of 12. Million, sorry, billion is to the 9. Trillion, million is 6, billion is 9, trillion is 12. (1:18). So, we go on either numbers of 12 and 9. I've calculated in every way. Even 12 billion, we went on the third, what we call, 10 to the power of 12. You understand? Because we calculated your way, or our way. If you go down to the power of 9 billion, you're in a bigger mess, in a size and measurement.

Q: Exactly, yeah. Yeah, that's why I go down on defining each number, because we've got a big error there.

K- No, it's 5 to the power of times 10 to the power of 3, is the order of magnitude, we calculate on a power of 12. In easier way to do it, than to the power of 9. Because it gives you a bigger dimension, and it's more towards the, what we call, speed of light, above, what we call, the speed of magnetic fields. It's an order of magnitude. If I go by billions as nine, I still stay in the matter state. I allow it to go to the 12, in to be in the speed of plasma. It's a big difference. It's a very, very big difference, but in order of magnitude, we allow this calculation to go to 12, because it shows a bigger problem, when you go to the speed of, what we call, magnetic fields. Or the magnetic. The weakest magnetic field, not the strongest.

In a stronger magnetic field strength, you go into the order of 20, 30 and 40. We brought it down to what is just about what man can understand. (1:20). If you do the same thing with a 10 to the power of 9, or 10 to the power of 12, we calculate on the American side or the European side, or we calculate it on the difference in the power of what we call, magnetic field, in order of magnitude, than the matter state.

This is one of the biggest problem, that in the future, in the coming time, we'll explain more and more. Now you understand, how we accept fallacies. It doesn't work. Thirteen billion years, in a magnetic field on American size, or European size, gives you what we call, roughly between matter and what we call, magnetic field side. I always work on a 10 to the power of 12 as a billion, because it is fields which we can understand.

Any other question?

Q: .. As to last week's teaching, the Souls of Earth create similar solar systems and planets. So my question is, who created us? We must come from the Soul or Souls similar that seeded our solar system. And is the killing... (1:22).

K- It is that, this is very correct. This is what we mentioned a few times in the teaching. When the ?? came spreading. Carry on.

Q: She goes on. Is the killing issue from that Soul, or the environment of this planet?

K- It's the two which has led to this. It's a combination of two. You have a seed, which is short. But then you have an environment which gives... It's like a Gravitation and Inertia. One is an attributes of the environment, one is attributes of what we call, state and position. If, if, there are, there are few factors, for example if you look at most of the planetary system, which don't have the seasoning, they are not tilted. You get this situation of singularity life. Which is always perfect, because does not need to gain any ?? thing. It always works in a balanced state, more or less. Where on the four seasons, we always have to ?? compromise between one or another, summer and winter, and the rest of it. Then, there is a gap between what we call, the two seasons. Today is what we call, 21st, 22nd. We are at the longest day of the year, and then we start going shorter, and then we see the balance on the fields, and how life creates, till we go to somewhere around 21st of December.

In these conditions we get the changes and we get the life. (1:24). ..

So, we understand a lot of things and yes, partially it is the Soul which created this, and partially now we're creating the same Souls across the Universe, because we came the wrong way. And several trillion people dying, or animals and creatures Soul created is, not much in the world of the Creation. All the Souls which we have created from the establishment of the life on this planet is a speck of dust, to the other Souls which have created the Universe. So, trying to clear that out.

Sorry about that today, we have to cut short, and we meet next week. Do your calculations, but work on the 10 to the 12. Don't work on the 10 to the 9, billion, because then we'll teach you some more, why we chose these numbers. This proportion is much easier to understand the bigger scale of the work.

Thank you very much for today Rick, and we see you next week, and we'll see what we can ...

R: Okay, very good Mr. Keshe, thank you very much for today's teaching. Very concentrated and important teaching I believe.

K- We'll see, and thank you very much. And please, do your work, to understand more. And the 28th, 29th meeting, is a forum where we want Knowledge Seekers to bring that change, in the world of science. And then start looking at the new dimensions. Even your MaGravs, start measuring fields, start understanding how we transmute you, we don't transport you. Thank you very much, and we'll see you next week, as usual time. Thank you, Rick. (1:26).

492nd Knowledge Seekers Workshop June 29 2023

(Transcription, Proofing done)
(Auto transcription by Elias)

12 digits for mm - accurate landing; 1,600 km/hrs straight from center of U; Order of Magnitudes for spheres - travel inside sphere; Plasma explodes inside out; U is plasma -not sphere; KS determine true age of U; Soul travels by M fields; Opposition from scientists; 2 system travel - MaGrav positioning & M field strength travel - ride Cosmic Rays inside sphere; Sphere travels by order of magnitude; M field rivers of U - one way direction; Energy packages of Soul; Emotions interact with fields of U - travel; Dreams are reality; Senses are M field strength; Males give birth - share Soul; 28th Conference London; Soul doesn't use coordinates; New Agricultural systems; China heat wave.

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you. As usual, whenever and wherever you listen to these series of Knowledge Seekers of the Keshe Foundation, the Spaceship Institute. We welcome you back, and, we hope we can manage to share some more knowledge. In effect to our work and we are trying to get across, and what we develop, what, where and how it will go through, in the gaining of the knowledge.

In the last week I opened a Pandora Box, which a lot of you asked, why have you connected "this to that," this has got 12 digits, this has got 9 digits. You are talking a million and that's a billion. And it's very interesting how Knowledge Seekers (KS) respond to numbers. We do things when you look at the teaching of last week. Why is it important? I used 9 (digits) or I used billion, and I used number 12 (12 digits means trillion), 10 to power of 12. The reason for it is, the speed of light is ?? (speed) per second. So I cannot drop you in the middle of the water, a meter away, a meter higher, a meter lower and drop you on the ground. We calculate to millimeters (mm) that's why we added the number to 12. That's why I said, use number 12. (To go from 1 to .001 is 3 digits).

In that process we understand more. (:18). And we come to ?? our work in a very precise manner. Why we use the 13 billion (years) life on this planet. The calculation of our scientists, they call it, 13 billion years. So we have 365 days in this "billion years" and we have 24 hours in it. And we according to our calculation we assuming the Earth always maintaining 1,600 and something kilometers per hour. It shows if our planet was moving on a straight line from the center of the universe (U), where it would be, and how will it take shape? And where we'll find ourselves. When we add all these numbers into digits and whatever. And then we come out, we said 1,000 kilometers per hour, 1.6 thousand km per hour. Again we go with km with digits and meters and mm to be precise. We find out there is a big gap.

They say the life does not depend on the speed. In a spherical shape, when we sit outside on the surface, you are a flat line. You walk on a straight line, in a way, but you, even though you come back, (because it's) a circle, to the same point. We are measuring dimension (D) as a ?? ?? leg, as a straight line, 2 dimensional, more or less. But when it comes to the surface area, (:20). not the circumference, we are in an order of magnitude. We calculate the perimeter of the sphere, a circle, on a what we call, "2 times r" (radius), or is a "d" (diameter) by 5. And when we come to measure the surface area, we go "r" to the power of 2. So it's an

order of magnitude. .. When you look at the light. A light is 3 dimensional, shines out. So you consider volume, not a flat surface. The same with the surface of the sphere. And you run into an order of magnitude, than multiplication of the length. When we say, let's say 100 meter .. radius, when we do a diameter, it's 2 times 100, is 200. But when we calculate the surface area it's 100 times 100, which is 10,000. It's a big difference.

Then you consider M field strength, not "Force" (physics term), which is a linear line. And in that order, then you understand the whole of the calculation in a M field transmutation creates a different dimension. But when we chose the central line, the H, not the distance of travel on the surface, as we call it, or the size of the circumference. Then we find out the age of the U is far, far, much, (:22). much bigger than what we call, "13 billion."

The reason for it is very simple, a plasma explodes from inside out, and takes its shape. Secondly, our scientists at the time when they calculated, theoretically the circumference of the U, they had this fantasy idea that is one U on its own, and it's spherical shape. In fact, it's not. We see that in the changed shapes of our own galaxies, other galaxies M fields. It's not a hard surface, it's a plasmatic, it takes different shapes and then when you put this in the order of magnitudes of the C14 and not Carbon 12 which has, because all our measurements are in a matter state, then you find out the whole ball game of the transmutation changes.

In a way, when we calculate, truly, in the future, our scientists will recalculate, there is no way that, to what we understand, to what we can calculate, that the life of this Universe is 13 billion. It is unconceivable to imagine the Universe has lived such a short life. And it has, ?? of itself, it has maintained its what we call, 'integrity'. And it has managed to keep Life, in 13 and a half billion years. (:24).

Even, you consider the building of the intelligence, the brain of the Man, the organs, which is ordered and structured, layers of everything else, and we are considering we are one of the late comers, it will take more than what we calculated, and what we see, what we understand. It doesn't matter if you are a cat or a dog or a man, a structure has been set up. And, what will be interesting, when we recalculate, understanding the position of the Soul of the Man (STM), and where the STM will end up in, or will become the seed of, then we'll find out, the life of this Universe, is in a way, if we go 13 billion "light years" magnitude, a few digits up and down.

So this is important for us in locating, positioning, through the new understanding of the technology, to be able to find, access, deliver the STM to a given point, your Soul of your grandfather is not on the next galaxy. Most probably, he's right on the other side of the planet, trying to balance the universe, trying to balance on this side. So the digital calculation, the understanding of the size of the universe, and then once you understand this, understanding the size of the Unicose, (:26). then you understand the digits, the numbers which our scientists have calculated, is totally wrong.

In the future, we will deliver systems for calculation. In a way, you want to go to such and such a place. You land in such and such a place. You will get a lot of opposition from the scientists, or the people who spend a lot of their time explaining this happened to Cosmos here, that happened to the Cosmos there. Because they have to protect those PhDs, and certificates and whatever. But our scientists, the way nowadays we have laser beam and put it down the line and say, "okay, Moon is so far away from us and this is a gap with us." The new understanding of the matter state magnetic (M) field, and the plasma state magnetic field strength, will open a knowledge and technology where we can literally, like the laser beams of today, measure truly the science of this universe, and through Carbon decay 14 and others, bring in a more realistic data for the

life of this universe. We will get a lot of opposition. We will get a lot of people who have to protect their degree. I was told it's 13 and a half million and I will stick to it because I've been told. I've read a book.

And it's for us to carry on with our work and ignore these, but understand what I opened in the teaching on last week. Open your eyes to another step, another dimension. In reality, our universe is even larger than our scientists have ever could imagine. (:28). Much bigger than the numbers we mentioned last week teaching. They say so many billion light years.

Then we come to understand, we need to, we have to, with the new technology of the plasma, create new set of data's. That when we send, when we connect to a given position, we land in a given position, and not a few billion kilometers away. "Oops, sorry, I made a small mistake in digit number zeros on the top and the bottom." And we will get this opposition from many, many scientists, and we have to become used to it.

Today I was in a meeting with one of our Knowledge Seekers (KS). We had an expert, supposedly one of the geniuses of a, what we call, a structure was brought in to give his verdict and regarding a part of the work of the Foundation. And the minute he sat and he heard about how we Nano coat and how we use Gans's, it was, "no, this is all wrong. This is all lies. It cannot be. Cannot have these things." And he could not stop himself. 82 year old man, as an expert, could not keep his mouth shut. Because, what I said, if he understands, it means all his degrees have gone. All his PhDs are good for, as I said, "something else." And the opposition and the strength of denial was so much that even he denied everything else, which was physically in front of him. (:30). We will get, and we have seen a lot of these.

So, I put a seed of thoughts amongst you last week, and I asked you to start working to understand. Many of you are not good mathematicians, but you'll find out you can add up two and two together. And then go back and see what did these scientists who told us it's 13 billion, what did they assume from the bone of the cat? Or do we have actually a carbon dating from the center of the universe? That they have found on Earth, and they can say a carbon dating. But does the carbon dating of the universe matches to the knowledge of the man today?

So what the whole purpose of the teaching has been last week and this week, is to open your eyes into understanding that if you're the "last man standing," and in your physical system, please make sure you don't end up in the wrong place in the universe, because you miscalculated it. There's one thing good, with the Soul you cannot go wrong. Traveling with the Soul. Because you create a given magnetic field strength through the wish and the structure of the emotion, you always end up in the .. right place. Going wrong is very, very seldom.

And then it comes for us to understand the next step of knowledge. What man can do with this knowledge? What can you, as Knowledge Seekers, do, (:32). having this accessibility to the knowledge dimensions of the universe, which some of you cannot even write the number of zeros in front of it. You've got to count 10 times if you've got the zeros right. But when you go to the Soul, automatically knows where you are.

In a coming time, in a process of development of the space technology, as we said, we have two separate systems. We have a physical system, spacecrafts. And you have the, what we call, magnetic field strength. Up to now, we taught you and we developed technologies for you that you could understand that creates gravity, creates magnetic field. And then we called it, MaGrav position. But I think it's the right time to introduce what we call, "cosmic travels," in a way of Cosmic Rays (CR). In a way that you do not need to

produce a gravity to be pulled to a destination. But you travel on the magnetic field lines of the universe. This is exactly what your Soul does.

These kind of travels, these kind of use of magnetic field motions, it's like in rivers. It's like being on a belt, it's one direction. So you can jump across (to) the one going backwards. We are used to this. We know this, but we have ignored it. We know this in a very simple way. From the first days we went to school, and they gave us a magnet, and we throw some iron dust on it, we saw the magnetic lines. (:34). When we were given two magnets, and we brought them together, we saw the two magnets coming together, or pushing away, through the fields forces of these magnetic lines.

So, if man's knowledge extends to the next level, if man's knowledge comes to understand the reality and the work of the universe, you will find very soon, that ... creating gravity, creating magnetical field, to be pulled and pushed in a direction where you want to go, becomes meaningless. The magnetic field, gravitational (G) field, is for matter state, physical tangibility. When it comes to the travel with the STM, within the, what we call, plasmatic packaging. You do not, you have, you do not, you cannot use a gravitational pull. You cannot adjust your brain, "now I increase the gravity to the Moon, and I reduce the gravity to the Mars, and then I go there and there."

In the world of the Creation, in the world of the magnetic field travel, you get on the rivers of the Universe magnetic field strength. And then, through the position and conversion, this is how you reach the mother. You, you... what we call, field strength of the brain of the man, creates that condition of travel.

So, when we start talking about transmutation, Now we have to speak about what we call, magnetic field flow lines. (:36). Not magnetic, or gravitational or MaGrav positioning. The STM, and when the man become expert to create lines of travel in the packages of the plasma, has to re-sign, re-assign, re-understand, re-educate himself to a new way of how, which rivers, which directions, to flow in that, in a way of a back, forward, up and down, and to where you want to be. Because, in a way, all magnetic fields of the universe, in one way or another, due to the strength order of magnitude, all travel and end up where the emotion of the man finds satisfaction of the emotion. You will not stop till you see the mom. But, because of the dimension and the field strength order of magnitude, it's a few seconds, not that you get lost in years and thousands of years in the universe.

So, as now you understand why I introduced the concept of the size and the life of the Universe and the size of this Universe. These, in so many ways, in the coming time, will become apparent. And in a very slow way, last week and the week before and this week, we start introducing you into magnetic field strength travel. (:38). Now you understand. You're traveling inside the sphere. And now you're bound with the order of magnitude. You're not on the surface to be on a linear line. You might "pop up" on the surface. But in traveling, due to the field strength interaction, you pop up from under somewhere else. It's much faster to travel within their fields, within their structure, that they run around on top of it.

This brings you to a new understanding. This brings you to understand how and the way man will travel in the future. And how we connect to the other Souls. Because the way we travel the span of universe through the emotion, we travel the emotion through span of the, what we call, the STM, in interaction with other Souls. It's not the reverse, it's amalgamation of the two.

And so, in the coming time, as we prepare you for the transmutation through your own Soul, through the dimension of the packages of this energies created through the interaction of the fields of yourself. Then you

understand how you will shape, how you will create destiny for your Soul and STP, and the rest of the caboodle you carry with yourself. (:40). Now you understand why we brought this subject, this topic, last week, and continuation of it, but connecting to it in the life of the man in this teaching.

At the moment, it looks a little bit "patchy." But as you understand, step by step, you will see the picture will be complete. Then you don't need to walk in dimension. You think and you literally hover to the position you want. You don't need to carry things, because if you run on the parallel lines of ... magnetic field, it will carry it for you in respect to position and time in magnetic field strength, where the emotion has interaction with the fields of the universe. "I want to go slow, I want to go fast, I want to go with the speed of whatever, to be with my lover." So, you create that transmutation, you create that condition of travel, and the body through its connections, which you left behind, will create that connection for you to be delivered where you wanted to deliver.

Now you understand, how we have come to the next phase of the development of the technology, which is order of the magnitude, and magnetic field strength, and time in the essence of the universe, and not time in the essence of the "matter man time." (:42). The circulation of the Earth around the Sun, we call it, a one year, is absolutely few seconds in the running of the operation of the STM in this universe. Then you will see, you will understand, how you have to distribute the field forces through emotion across the three dimensional structure of your ?? work.

Go back to the teachings of a very few weeks ago, where I explained how your emotion of the joy is in such a place, and the emotion of sadness in another, then you use this to travel to left, to right, up and down and the rest of it. But then you have to understand, is the left connected to which, what I call, magnetic field line. Does it take me backwards or does it bring me forwards? And does it throw me to the other side of the universe, where I didn't want to be?

So, in that process, in the consequences of working, and understanding order of magnitude, the spherical shape of the universe, roughly, and everything else which we have taught, you'll come to a very fantastic point of view, or knowledge. And that is, life of the man is not worth living on this planet. Where the man can have the joys of the life in the universe, for billions of years, and not suffering physical life, for a few meager seconds of universe time, in this planet of man. Then, man will create, understanding this, a new dimension for the elevation of his Soul. (:44). That with it, he'll find what we call, new dimension in life and living, across the creation of the Creator.

Then we come to another point. Then we come to understanding of another point. How far does man go? And how fast can the STM travel, without endangering the existence of the Soul, or the physicality of the man? Or, how much man will be able to understand the transmutation of his Soul through the strength of the physicality (P) of the Man?

The structure of life in Universe is in order of magnitude and in the field strength and it's not in the linear lines of the kilometers and what we call, the speed of the travel of this planet per day or hour. The understanding of this process, for many of you, who in the coming months become MOJHANS, and you go through the transmutation, will bring a shocking news, a shocking style of understanding and travel for many of you. Because then, at the beginning, many of you will land in a ditch where you wanted to be on a ridge. Many of you land in the sea where you wanted to be on an island where you are practicing. And then you'll find out gradually you become good to land where you wanted to land. And you be with who you want to be,

because their Soul, the strength of the field of their Soul, (:46). is at the strength field of you who wanted to meet, to enjoy and to be with.

Then the definition of the dream of the man become the reality of life of the man, where there is no place for dreams, as is man who had led his fancy dreams of life to become his dream. This process, this understanding, if understood by Knowledge Seekers, opens a new Pandora's box for travel. For all of you, one by one, without fail. And then you'll mature to understand the totality of the Creation and the way the Creator has created dimension of the travel.

Many "creatures of God" travel the span of the universe using this technology and where the man is still hackling with North Pole, South Pole, did we dig South Pole, do we have too much snow in the North Pole and at the end we are in the "mess of it," doesn't matter where you are. It's our job to teach you how to protect yourself, it's our job to teach you how to create a condition of the safety for the life of you and your Soul, and those who you are responsible for.

Life has to. Life means to. Mean life in a transmutation, not in transportation. Then no man will ever die. No man will ever go through the process of what we call, destruction of itself, through itself, through the lack of understanding, (:48). that you can tap into the universal energy of the plasma rather than the food on the table, in the next door and in the fridge.

In the coming time, in the process of understanding the technology, in the process of understanding the severity of lack of one or another knowledge will force Knowledge Seekers to come to understand. I stop this session. If there are any questions, we'll try to answer. But remember, extremely hard question. It's not going to be solved with one ?? meeting ?? alone.

Are there any questions?

Q: .. Hello Mr. Keshe, in the teaching you taught us, that what we see with our eyes depends on the fields of the environment and the fields of our own body, which have different amino acids (AA) from each other. And you also said that you can see far beyond what we see through our eyes. We know that through knowledge and through ethos we can expand our perceptions, but my question is, can the fields we breathe, (:50). can expand more the fields we see or feel, instead of the fields sent by our ears? .. (repeats) can the fields we breathe, expand more the fields we see or feel, instead of the fields sent by our ears?

K- It must be sensed by our ears, then sent by our ear.

R: Yes.

K- In a way, our nose is another receptor, for different strength magnetic field. Brings a different definition to the information of life, to confirmation of life, to existence of life. And in that way, we are responsible to understand how we as creatures, and not obviously the only creatures of this universe, have come to understand life, and have come to value life. And to what extent we can value life?

We use our senses as a connection to our universe, or to our limited dimension of physical life of universe. But the interesting point would be, does your Soul have a nose that can smell the universe? (:52). Or, does the interaction of the fields within the plasma of the STM, allows, creates, and conditions man to smell the universe? Isn't it this, the way that you said, or you say, or you've seen, I saw mom and I could smell she was wearing a nice perfume. I met dad and he still smell the same as years ago before he dies.

So, yes, it's another sensory, another dimension, another field strength order of magnitude sensors, which we have in the physical life and in dimension of the fields of the universe. In the future, we'll come to these things physically and we explain physically. But at the moment we're trying to explain to man, how you smell through your nose while you are dreaming, then it goes back to answer the way as you see while you are dreaming. You smell a rose in your dream and you get the sensation of the rose. But in fact, there is no rose except the Soul of the rose. So, in the long way, yes. Again, the smell in the dimension of the STM, it's field strength order of magnitude, and not linear.

Any other question?

Q: .. You said the planet Earth is the nursery of the universe. In correlation to our body, planet Earth would be the womb of a woman, thinking that the micro is equal to the macro? (:54).

K- Do all the creatures on this planet give birth, are only women, female? Or, do we have creatures who actually nurse and give birth too as a male? Then, you need to think a lot. And, understand, giving birth is not the gift of a female, or what we call, to have a womb. Giving birth is the right of sharing the Soul. That with it, manifests itself in dimension of the physicality.

Answer yourself in a very simple way. And I'm sure you know what's going to come. Did or does the Creator has a womb which led to the creation and birth of Mitra. So is our Creator or does the womb change to another being, an entity of life? Or do we, in the dimension of plasma of the universe, need what we call, a capsule, we call it, a womb of the birth? I think you know the answers. If you make Gans's, you already know the answer.

Any other question? (:56).

Q: .. I have a question related to the conference on 28th of October, with the ambassadors of the world for peace. And question is, how we can help you on doing this conference, how we can be involved, what are your expectations and the outcome of the conference will be only one day? And do you have the program and do you send the invitation and so on?

K- These things all ?? .. will be taken care of.

Q: I inform to the ..

K- .. It's a two day conference. It's a two day conference for Knowledge Seekers, and it's an evening session for the world dignitaries, ambassadors and the rest. We already know representative from two leading nations will be they're already, we all know they'll be present. We know the third one will ?? come in, and dignitaries from the government of United Kingdom will be present.

We do not start going public with a lot of things, and when we need, we go to the Universal Council. It's their job to bring, and the Earth Council members, the, (:58). all that is usually done by them and they will know when we announced it last week. They start getting prepared and what they can do. And the organization of the "Ambassadorial Meeting" will be more or less, work in conjunction with the Universal Council and the Keshe Foundation.

Our message will be very clear in London conference. And when we go out as usual the place of the conference will not be disclosed to public to the very last minutes because of what we've seen before. And in

that process we will announce everything to those who registered. The meeting is in London, in the central London and in one of the most prestigious hotels, or what we call, events areas of London. The presence of ambassadors, we have invited ambassadors and we really invite ambassadors and dignitary from outside United Kingdom this time. We will see a representative of United Nations. We will see a representative from BRICS. We will see a representative from what we call, European Union, as England now is out of the EU. We expect to see representative of the nation of Russia. (1:00). We've been assured, irrespective of what is the position in Ukraine, we will have representation by the Russians.

And in a way, we give the knowledge of the universal travel, we give the knowledge of space travel, to open the channel for the peace. Don't forget, Keshe Foundation is doing a lot of work in the background. I spend a lot of time moving, and making sure a lot of things comes in. Especially with the position we are in and the situation we have found ourselves in. We try to restructure Keshe Foundation in a way that it becomes back, as our resources come back to. The Keshe Foundation in Austria will shut down within the next 30 days, 60 days maximum, as we close our operation into dimension, moving to a major capital.

So in that process, new structures will come into operation. Then if you remember, prior to Corona, we held conferences around different cities around the world, the Corona put us to a halt. In 2024, most probably will be held in East Asia. And we'll announce that. It'll be part of the work of the Keshe Foundation.

And we go more in the way of space development, presentation and delivery than anything else. Technologies which were never seen before. (1:02). Technologies which allow space development to become a, what we call, a process for the governments to see how we're clearing the borders out with the development of new technologies. Hidden technologies will be opened up.

In a meeting today with some officials, we delivered the development of new technologies, which is not known at all across Keshe Foundation, which allows the governments to take steps in securing national security from resources. These technologies we start rapidly sharing with major governments. Because it's time to deliver. Because we have the technologies, we have developed it, and it'll not be shared with public. Because it needs to be done in the capacity of the governments. And now we have switched all our work, our majority of our work, with national governments, then when we were trying to centralize our work with what we call, individuals, organizations, and others.

So London conference will be held in a very beautiful way in London. Most of the Keshe Foundation team will be there. We might have a surprise for you when you attend the conference. But, that surprise, will come when we come much closer to it. And it will be announced by the Foundation in due course.

We are looking forward to the end of sanctions on Iran in the coming, very soon time. (1:04). Keshe Foundation will hold one of its major conferences in Tehran. And in that process, we'll open different dimensions. We are waiting for a lot of things to happen. As a lot of you know, we have had a battle with a lot of other things. But we have worked on the other end to change position, direction, and the strength of the Keshe Foundation. We have the technology to bring in major power work outside the Keshe Foundation, within the Keshe Foundation.

And London conference is one of those which will start that process, if we don't get hit again by another Corona. We are not relying on ambassadors from England of a nation. We're relying on ambassadors from different part of the world to attend that conference on behalf of their nations.

Q: I'm glad you restart these processes at the high level. And I'm sure will be a success at the Soul level and...

K- Oh, we shall see. We shall see. We have targeted this state for several reasons. Usually, we get a flow of ambassadors, world ambassadors, and world leaders through private meetings or private travel in September, October, going to United Nations and coming back. And usually, they stop over in London. Many of the world leaders, their private visits are never announced when they enter a country. (1:06). They're public official, you see. And we have access to a number of these world leaders, that we are looking for, to have or bring to be, in that meeting, in that conference. There's a lot of reasons why we chose that day, and that week. We'll be spending a lot of time in that area, during that course, and simultaneously, in other part of the world.

Any other question?

Q: Good luck, thank you very much and God bless you and all Knowledge Seekers and all the planet.

K- Thank you very much.

Any other question?

Q: .. I have trouble understanding the relevance of numbers in when we're talking about using gravitational magnetical fields for transportation. To me, it's always been an issue of just matching the field strengths or using the field strength. What significance does the number, where do the numbers come in?

K- The numbers will come in when you transmute and then you want to transfer.

Q: Do you not match the field strength of the destination?

K- The numbers comes when you want to manifest yourself in the dimension of physicality. And the numbers come into operation in a physical dimension. (1:08). In what we call magnetic field strength, there is "Zero-Time" to the point of manifestation. And in physical dimension, your time is already part of what you were, because you had a physical life within the structure and previous, before the structure, of the Soul, as a, what we call, carrier.

So, gradually, as we go into the teaching, we open this up, that you understand. In a way, in a physical life, you travel a million years, in seconds, with the time of the man. And then you come back in the other dimensions of the Universe, back to Earth. Let's say, if you understand it, opposite the way you went, in the direction of approach, you'll find out there is an age gap. There's a understanding of a time and a space. And these things will come into, gradually, we'll start teaching, then you'll understand. You need on matter state dimension of the fields, position and time. Not in the, what we call, magnetic field or plasma state.

The let ... we started a new chapter in teachings, in the real dimension of travel, and gradually, step by step, in different teachings, we bring the jigsaw together. And usually takes one or two years before you see the full light of it at the end of the tunnel.

Q: Okay, thank you. Thank you so much.

K- We didn't start this just to have an hour and a half session last week, (1:10). and what today we brought with the speed of the fields, magnetic fields for the STM. There is a pattern in the teaching and as you will see how it builds up gradually, that you understand both.

Many of you, many of you in the process of transmutation will make mistakes. The emotion will create manifestation of physicality. At a point and a place where you didn't know, want to be. And all these goes back to understanding of the way you ended up, where you landed in the middle of the universe, and how you're going to get yourself back to where you were at the beginning.

So, just bear with us, this is... You want a transmutation, you have to understand the alphabet of transmutation. But, as in the teachings, now the teaching is both for physicality and the STM, we have to teach both dimensions.

Q: Okay, thank you.

K- Last week we brought the size, dimension and the order of magnitude. The few lines of today's teaching is, if you understood it, about the Soul traveling on the fields of the magnetic fields, and there is no need, as you have in the dimension of physicality, to be pulled or pushed magnetically, gravitationally or MaGrav positioning. So, slowly we open a new knowledge of the universal travel, and this is part of a process of years of teachings to come.

Because, it's not anymore that you have to understand it. Fortunately or unfortunately, some of you, the way you made the MaGrav, you start testing it. And it has to be correct. (1:12). So, it needs time for you to understand and with the teaching gradually we open up, you'll understand, and then we develop (it). This goes to universal travel as energy in on and off, might take between 3 to 5 years of teaching. Because you have to understand the Totality, not just a little bit, and then you calculate something else.

And then you say, "oh, last year he was talking this .." It's like when a lot of you made a complaint, now he start going for the Soul. Now we understand the operation, so now we have to say, "how we carry this Soul? What's the speed, where it goes, how it goes?" And then, some of you are "chicken" (scared), or you like to be the slow one, or slow portion, you still want to get down the UFO's and see some physicality.

Not all of you will go, it's very much like, today as you go on the street, you see man on the donkey, man on the car, man in the bike, man in the motorcycle, man on a jet above you, and man in the space lab above, "waving" like crazy. Now we choose what we want to play and how we want to play. And for that we have to have a knowledge of how to ride a bike, how to drive a car, how to guide a rocket, and how to live in a space lab. And each one of us as the time comes, as we learn slowly, slowly, to be able to handle it. This time you're the "last man standing" and everything has to be with you. You can't go back, "oh, Papa, what can I do?"

Q: Whole new world. Thank you.

K- Thank you very much. (1:14).

Any other question?

Q: .. Hello Mr. Keshe, if we want and need to know where the STM is, in order to, not sure if the word is transmute or transmit, we need not only the distance, but also two angles, the azimuth and zenith, right? How do we find these two coordinates? Thanks a lot.

K- That's for your matter state. Your Soul does not know azimuth and the other bits. It has its own field strength transmutation. You have to understand ... ??, when you put two magnets (together) ... There are many, many lines on a magnet. So the magnet is connected to many, many other magnets or fields. So is the STM. Your Soul is not mono-connection just to Papa. Just because today you dreamed about Papa. It's already with the uncle, it's already with the Martian, it's already with the fish in the tank and everything else. You decide which frequency you want to tune in that time.

And we've seen that in the experimental test in the UNO center when we had people in the machine in the system. We could narrow the line, ask people where to go. "would you like to go and see the mama?" And they say, "oh, I went and I saw my mom." And the other one you don't say anything, they go wherever they like.

It's interesting in so many cases, (1:16). we look at that our wish without being spoken, is carried out by the Knowledge Seekers in the system. Which means we transmuted emotion, or Soul contact, and then you go, ?? shuttle, it works.

By the way, before I forget, tomorrow at 12 o'clock, we have the elevation of the Soul of those who abuse the children. And, we'll be starting at 12 o'clock, for maybe 2 or 3 hours. And we have many people who are now registering for the 3 sessions of 14th, 21st, 28th, and a final session of the, what we call, three sessions of the July.

Somewhere in July, once we secure everything we are working on, we announce the first "meeting of the 25." (first 25 of the 200 to train personally with Mr. Keshe). We give you about two months to gather, together, somewhere around end of August, maybe, or somewhere around that time. And the 25 people who are there, and then the 200 will be brought in for meeting. And what we asked for it to be done, to build up in the same manner to follow up.

There's a lot of work is going on in the background, And in a way the huge setbacks we had, has opened new doors of opportunity for us to create new dimension of work. (1:18). As I always say, "he closes one and open ten more somewhere else."

Any other question?

Q: .. On the subject of the perception of cold in the body, in the 481st Knowledge Seekers Workshop, I heard the following sentence, "when you are cold, it means that you are taking in more energy than your environment needs. So you're giving something to the environment." As much as I listen to this, I don't understand it. Could you Mr. Keshe, try to describe the inner idea differently? Maybe then the enlightenment will come.

K- Oh, you'll be enlightened if you understand. Go back to the process of when we say, you eat 20% of your food and you absorb 80% of it from environment. Your answer sits there. Why some of us don't feel any cold, and we can walk in the ice water? And some of us with a drop of cold water we freeze.

You find the answer in emotion, in the state of mind at a given time and emotion. Then read it again and if you understand what I said then you found your answer. (1:20).

Shall we call it a day.

R: Okay. Yeah I know we need to wrap things up here.

K- From next week hopefully we go back to normal. We don't know yet, but as I said, within the next couple of weeks in July we'll make an announcement about a new time zone for the teaching. A few hours here and there. And this will become permanent, at least for 6 months to 12 months.

Any other question?

R: Well there was a note from Joel who said, that's Joel from France, and he says, "the vineyards are in good health thanks, thanks to you, and to the beautiful plasma technology."

K- We have plenty of people very happy.

R: And also our background image here is sent by Gianni, part of a video that he showed the... This field was planted with plasma technology as well. And it's the wheat, I believe, in this case, and it's doing really, really well.

K- We will introduce in the coming time, very soon, as part of the work which we already started, new processing for new style of agriculture. Very much different than the present, and very deep in technology. We were in a meeting in past couple of days, with one of the, (1:22). what we call, very, what we call, man with the knowledge and work for agriculture. And, in a way he said, "I've seen three people bring in this technology to me, and none of them could follow, because, they didn't have the depth of knowledge. They just went there, it's just to see this guy, that we have Gans's, and we do this and this, and there wasn't much more knowledge to actually give it and complete it." And then we said to him, "we are the owner of the technology and knowledge, and these are other things." He says, "wow. Now we can work or something we can start actually testing and see."

So, a lot of Knowledge Seekers are going to companies, governments, says this is the technology they want to do, blah, blah. And very few succeed, because you have to understand the depth of the knowledge, in a different way. And in the coming, next season most probably, we introduce a new method of agriculture. It's a process which we are developing, and it'll be introduced in a very large scale.

Any other question?

Q: .. Hello Mr. Keshe, I'm a Knowledge Seeker from China. Can you explain the nature of the gravitational wave that is relatively hot at present? Because our Chinese Five hundred meter Aperture Spherical Radio Telescope, FAST, radio telescope, once again confirmed the existence of gravitational waves recently? (1:24).

K- Not really, because it's... we... In China you have, what you call, you want to get the confirmation of it, but you have a different factors when these things happen. And they try to tell us there's a gravitational wave. We have gravitational waves. The gravity fields of the Earth is not constant. And it reduces, or compresses, or expands according to the other fields within the solar system. And to some extent, into the pressures from the galaxy.

And we have to understand, if it is, actually, there is no confirmation. But in China now you have the huge heat waves and whatever which is going on, plus the pollutions which you have, it creates all sorts of fields and scientists can call it anything that it suits, to call it to be, and get confirmation to do. At the moment China is going through heat wave and massive pollution.

Any other question?

Q: .. Hi Mr. Keshe, I'm studying automobile technician course in India. I explained to them about our Foundation and work. They like to collaborate with us in education. How can we collaborate? (1:26). Given the link below.

K- Get in touch, send to info@keshe.foundation and they will sort it out something. Send an email and then we'll see what we can do.

Q: .. Could you open up a little more for our understanding about magnetic plasmatic packets, and what the difference is between magnetic and gravitational fields that are, that are for the matter state?

K- What does that mean? What do you mean by that? Can you explain?

R: Well, let me see, let me just re-read it here, perhaps it can be more clear. Can you open up a little more for our understanding about magnetic plasmatic packets, and what the difference is between magnetic and gravitational fields, that are for the matter state?

K- This will take... Can you bring this one to the next week's question, as the first question, and then we go through it in a very, very detailed way.

R: Okay, copy that for next week.

K- Because the answer, but it cannot be answered, to what we call... ??

R; One sentence... (1:28).

K- We have to go into understanding of gravitational field... it has to go into gravitational fields, and a lot of other bits.

R: Okay, very good.

K- Shall we call it a day for today?

R: Yes, yes, let's do that.

K- Tomorrow at 12 o'clock, and what you call it, till next week, next Thursday. The same time at nine o'clock, as usual.

R: Okay.

K- Thank you very much. And see you next week.

493rd Knowledge Seekers Workshop July 6 2023

(Transcription, Proofing done)
(Auto transcription by Elias)

Colonize whole solar system; Teach children both plasma & matter state sciences - need to know both; Don't become prophets or enslave those who don't understand; Study fields of matter magnets - plasma easier to understand; Book 8 origin M fields created Creator; Transmutation gift from Mitra - man will teach rest of U Community; UFO matter state not transmutation; MaGrav positioning = matter state - Transmutation with Soul is plasma - ride M field lines of U; Keep emotions of human - change shape; July session you experiment; Overcome dogmas of religion; NASA small player;

ENGLISH TRANSCRIPTION

(:16).

K- Yes, good morning, good day to you. As usual, wherever and whenever you listen these series of Knowledge Seekers teachings from the Keshe Foundation Spaceship Institute, we welcome you back and, as usual we try to share more knowledge, and to see where we go and how. We organize things according to the level of understanding.

In the past two or three weeks we have opened a new insight or new ways or trying to find out, now that we have become the "man of space," where are we going to land? What will be our future in space? And what are the possibilities? For sure, in a very, very short time, we will colonize this solar system. The key is not the moon anymore. Moon is part of us. The key is Mars, landing on Saturn, being able to swim in the oceans of the deepest, what we call, (:18). liquid part of the solar system and beyond.

We'll find out. And as we have seen, sometimes ago, many, many, many years ago, sent a little thing going out with a disk on it, saying, we are humans and the rest. And after over decades, we are not even sure if the thing has passed the border of this solar system. And for us to travel in the dimension of the physical condition, understanding of the physical transportation of today is beyond imagination. We can never even get to the end of the solar system, let alone entering the galaxy.

So mankind has to look into and understand the work of the universe (U). Understand the two separate .. ?? work, transportation, transmutations, energy, which we define in Keshe Foundation energy as magnetic fields in motion. Because for a field to move, it has to have an energy. In the coming time, man will learn to teach both states of conditions of the creation to his children, matter state and energy state as a plasma. Sooner or later, we have to resolve this matter. In the matter state, we have limitation of the friction. We have the limitation of the fuel. We have limitation of everything else.

When we go to the energy, what we call, dimension of the work of the plasma, (:20). then the limitation changes. There are no limitations, as long as we understand the totality of the knowledge. We cannot, in most of cases, transfer the working and the functionality of the parameters of the matter state into energy systems.

In a way, we cannot work with matter state. But we can live within matter state and transmute in the dimension of the fields of the universe. Transportation is a matter of the matter state. Transmutation is using the fields of the universe to travel through. You cannot fly with a donkey. So we have to understand what we use for what purpose and what we fly in, in the matter state, or we fly in what we call, energy state, and then transmute ourselves to a position and transfer ourselves back into matter state, if we need and we have to.

This opens new avenues of knowledge. This opens new opportunities for man to get involved in understanding both. And maybe, maybe in some cases, some knowledge of one can be used in the other. The limitation of the science of universe, as I've said many times, is the limitation of man his own understanding of the work of the universe. It's us who puts a limitation on what can be done and what is achievable. In a way, everything is possible and achievable in the space. How we do it, how we mix it, how we manifest it, (:22). how it .. disappearing, how it depends on how much we have understood the process of creation. What we understood become our limitation. And what we strive to understand becomes what we call, the target. (audio breaks) (trying to find the tools ..)

R: Sorry, Mr. Keshe, you've... You broke up there and ... you said something like ... is to become the target, I believe it was, and we lost that last part of your sentence there, just now.

K- We have a bandwidth problem. Yeah, I think we have a bandwidth problem. So we have to resolve it in another way. Let me see what we can do. Give me a minute. I have to switch over and see how we can do it. Just one second, please.

R: Okay, thank you Mr. Keshe. Okay, I'll bear with us for a minute or so, while Mr. Keshe switches some gear on his end and gets a better connection. We have a couple of questions already in the Q&A. (:24). And people that are attendees here are welcome to place questions in the Q&A for the second part of our show where Mr. Keshe will be answering questions. And also our YouTube and Livestream audience, Folks there are welcome also to put a question into the chat. Hello Mr. Keshe, are you back?

K- Yes, we'll try and fix ?? a couple of minutes to bring in new servers into operation. Just give me, if there is a cut or what we call it, short of bandwidth, we try to resolve it.

As I said, it's for us to understand the limitations. It's for us to be able to somehow interface the matter state into the plasma state, into the dimension (D) of energy. In one level, in one way, we started a new chapter in teachings in past couple of weeks in how man will achieve this. How man has to start changing a lot of calculations which become the cornerstone of his work, to totality of reality and the data, which is available to us in real time conditions. We have come to explain that what we call the speed of light limitation does not exist in transmutation. What the limitations has been put and the numbers and figures, and some unreal conditions we have accepted, is not workable in the dimension of what we call, present science of space technology. (:26). How would we in the future, in the coming time, will change. And how we will, in some ways, become able, have the possibility to understand and facilitate the both side of manifestation, matter state and transmutation, and what we call, the transmutation together.

In so many ways, if we apply the matter state into the plasma state, or energy fields in motion, in the dimension of magnetic (M) fields, in most of cases they don't fit. Do we have to send our children back to school, and many of us educated a long time ago, back to understand new things? Or are we going to fight it, because it didn't happen during our time? In where we sit, and in talks and conversations, in negotiations, and all sorts of cases over past decade. We have found out the biggest challenge for the new understanding, the

separate understanding of transmutation and energy, will be the biggest hurdle for next generation to overcome. And opposition will come from the leaders of the science, those who we accepted to lead us.

To break this level, it becomes the responsibility of us and the world leaders to bring, education leaders, (:28). to bring about the new parallel teaching. One of the points which will be raised in London conference will be this, separation or amalgamation of the science of the matter state and energy in real term conditions across this planet. We need to understand, we have to understand, we have two tools. And then we understand, researches like what goes in CERN, researches like plasma technology, researches like what we call, "Jet Projects," all will be revised. Because we need to understand the separation of between two, and teach our future generation from now, that they understand both together.

Our children go to school today and learn (mathematics), physics, chemistry, biology, all in matter state. In the condition of the new technology, understanding and emergence of technology, our children have to learn (mathematics) in matter states calculation, (mathematics) in plasma calculation, biology in the plasma condition, like we call, Gans, and in matter state we call, stones or weight, or what we call, "objects." To understand the physics of the plasma and matter state. Understand the chemistry interaction in plasma and in physics matter state, in chemistry matter state. We find out that, in the future our own children will have a lot of confusion about the emergence of the new science, because they don't fit, (:30). or one has to be clear about what is this and what is that, and where it needs to be done. Because they'll be transmuting through the Soul, they'll be transmuting the energy of their body, and then physically manifesting and hitting a car. In the plasma condition, there was no car, because I could go through it. Now I converted to matter state, I have to stand the problem of physicality. Oops, by accident I manifested in the highway with hundreds of cars going up, where I wanted to be as energy and manifest on the other side of the road and enjoy the park.

Now we understand what it sits. And it's not just teaching the plasma technology, traveling with the speed of light and beyond with the speed of magnetic fields, and then trying to exist in the matter state too. The education of the future, which sits with our leaders, will come in the ?? shape of teaching the two technologies together. It has to be done that way, that in the future, all generations of human race will understand the Totality.

And not for those who understood the two become to abuse the one who did not understand the plasma, and abuse and through dimension of physics, of matter state. Then, they become like prophets and magicians. The ignorance and illiteracy in the dimension of plasma technology (T), energy field motion, will cost nations beyond the slavery of today. If it's not understood fully. (:32). The slavery will be carried on by those who think they understood part of it, or some of it, or a bit of it, and then they take the rest, ransom. Or they become prophets and magicians of the future.

So it's important for us to set out to understand, to be able to comprehend the totality of the knowledge on both parallel line. This is important as you learn how your Soul works in the dimension of energy and embrace the physicality to transmute it to another position. You don't have a computer. Do you dream and match, and set a system for you to go and see the grandfather who died 200 years ago, or 100 years ago, or 500 years ago in the future, where the man lives a ?? speck of 1,000 years? Or do we do what our brain does, systematically finds a condition? System control position will not come to us. They're not going to fit our brain with a chip and a microchip here and there, that they can, .. we can control it. I set it at this. I'm going to see grandma. I set it at this. I'm going to see the grandpa. Our body, when it dreams at night, there is no control system in it when it goes and sees the grandpa.

Mankind has to unravel this knowledge. Mankind has to unravel the way through the Soul as a dimension of energy we travel the span of universe to see the grandfather, who we saw when we were young children, or young boy, or a girl. And now we are 70, 80, and that was 70 years ago. (:34). Where did he go? How come we can dream about him, but we cannot see him or know where he is? Now that we know the body of the man is creation to feed that Soul, that nursery of the Soul for the universe, now we understand the totality of the collection. We have to understand the totality of the connection, not only for this planet, but beyond. It's not just having an address on the 5th Avenue, block so and so, floor so and so, apartment so and so, blah, blah. Universe has no addresses and there is no zip code.

Our dream of the grandpa last night had no letter and no zip code to go to. It used the connection of the fields, it used the strength of the field. It used the strength of the emotion of us, for the grandpa which took us to the address. And strange enough, he still looks the way he was 50 years ago, he has not aged. Or, have we given him a picture frame, according to the memory of the time and place?

When we think or we go back 200 years, 5 centuries, 10 centuries, and we see we got in touch with the Soul of someone in that time, how do we do this? How is it done? There is no control system, no gadgets, no microchips in our brain. It's connection through the Soul of our ancestors. The way they pass through the DNA or RNA, the information to us. (:36). And how they were connected in my time and space and place to the others that we see that image control of the dimension of physicality.

Still a lot to learn. There is still a lot for us to understand. And in so many ways the education of the Keshe Foundation (KF) it actually starts in reality from now on. It's the responsibility of you Knowledge Seekers (KS) to understand and become the teachers of the future, but not to become the prophets of the future. Try to understand, to explain the upcoming time, the possibilities and the future, which is there in the dimension of plasma, in the dimension of field interaction. And then try to explain the two together. We cannot dismiss whatever man has achieved in the matter state. But we always add that it's additional knowledge that we need to learn. Dismissing most of the gained knowledge in the matter state, dismissing one's own creation in the dimension of matter state. But, does not mean whatever has been done is correct. But, in Totality we are in this position as a race, due to accumulation of the knowledge from the past and added on today. It'll be what it'll be for our future race.

The whole understanding of the world of Creation comes in the dimension of understanding the work of the plasma, energy fields, connection of the fields. In fact, mankind has not made much strive to understand this, even though we played with them for centuries. (:38). We get the magnet and we play with it with another magnet, but we never understood the work of the fields, the sharing of the fields of the two magnets, the interaction of the fields of the magnets with their environment that allows such a position, what we call, between the two, attraction, repulsion, what we call, MaGrav positioning.

If you really go back into the depth of it, we have not completed to understand the process of the matter state magnetic fields. And that is why we have a problem understanding the interaction of the fields of the plasma. And the biggest problem will be in the future, to be alert at any moment in respecting to which one you are in, and which one you want to go to, and which one you want to return back to. Does not mean that you always want to be in a matter state to ?? interact. You might find more pleasure in the plasma state. And sometime come to the matter state, for whatever reason, and go back to the plasma state, where there is no age time. When there is no time, you cannot age.

When you put a magnet on the table, does its energy change today? Does its energy and the position changes in 10 years time? Does the energy of the magnet varies in 100 years time? Would its effect on its surrounding will change? Then we understand we have not even managed to measure that. (:40). Let alone going to the next stage of the plasma, understanding the field interaction. Is the field interaction of a solid magnet the same as a plasma magnet? A plasmatic magnetic field is Earth. A solid state matter is a magnet in your hand. Is there any difference? And would they lose their energy at any time? Can you interact with it? Can you ?? lose it? Can you manipulate it, to move it? How do we connect the magnetic field of the matter state to magnetic field of the plasma state?

Many of you, you should have gathered that long time ago. How to connect the magnetic field of the plasma to magnetic field of matter state? If you don't understand, how do you want to transmute it? How do you want to transport yourself? Now we look at the Japanese magnetic tracking of the railways, we are wonder they do this. How do we get our Souls, our fields of energy of our life, on that track, but in the magnetic field of the universe? Is there any difference? (:42). Or because we haven't understood, one is a wonder and advancement in technology, and the other one we just ignore because at the moment we cannot even comprehend it.

The whole structure of the teaching, the whole understanding of the process of the teaching, it comes by understanding, discussing, and bringing up the points that you understand. This comes on the back of one of the questions of the last week. As I said, we have just started. And step by step, step by step, we'll bring in the whole understanding of the Totality. That you understand, the Knowledge Seekers of the future understand the separation, the interaction, and transmutation and transportation from one to the other. You don't get on a jet plane and you go to see the grandpa who died 200 years ago. Sorry, no plane has been built for the "dream line." You transfer energy of the emotion of the love, feeling, and connection, that connects you to the grandfather at that point in time. There are no donkeys between the body of the man and the Soul of the Man (STM). To take the body of the physicality (P) across to another part of the universe where the Soul of the grandfather is. (:44). Even the Creator haven't created such a donkey, let alone for man.

We have to understand the separation and clarity between each state of the, what we call, existence. There are other states of existence, which at the moment is blind to man. Once man matures and understands the process of energy, plasma, transmutation, magnetic field motion, another science of Creation will emerge. That science will give man the dimension of knowledge to be able to transmute across universes. That knowledge at this moment of time, will not be comprehended by man. You have to understand the knowledge of the Creation from matter state to plasma, and then the fields of the Creation, which leads to creation of plasma.

This goes back to the question, that how and where and the way our Creator, we call it, was created, if there was nothing. That knowledge is, knowledge is hidden because man cannot understand it. That knowledge is within the man today, but he has not understood the transmutation, he has not understood dimension of existence without tangibility, (:46). he cannot even imagine the next step. Where (?? he was) actually was created from the interaction of the fields of the plasma, for creation of his own physical body.

In a coming time, we shall teach about that state of interaction. That level of Creation, where the fields came from. This is the title of the Book number 8, "The Origin of Magnetic Fields". The essence of the creation of the Creator, and the environment, the way He was created. If you go back into my teachings, we always said, Book number 8 will be about the origin of magnetic field. The origin, the essence, our Creator was created. Out of his creation, we are created, and we call it the universe and Unicose.

That knowledge is not open to man, even though I can teach it today. The knowledge of the creation of the Creator, is the knowledge when the man masters the Totality of the knowledge of the Creation in the plasma and the motion of the magnetic fields. Now it is important for us to gradually to understand, not by formula, because unfortunately there was no formulas when you dreamt the grandfather last night to get you to him, but you went there, you saw him, you got the kiss and the cuddle, you got the smell, you got the emotion of the presence, maybe you had a dinner with him, and you came back and you say, (:48). "mom, last night I dreamt about the grandfather." Where in fact you say, "last night I was with grandfather." He was okay, he's busy, he's still trying to make a seed of the planet, but, in the dimension of energy, but he's very happy where he was, or where he is. And mom says, "you should have said hello to him, I miss him." Because, the mother would have been educated to the level, to understand the work of the plasma. Even though she has the ability to do the same herself.

One of the biggest challenge for the Knowledge Seekers will be the Totality, understanding of the Totality, whereas he is partially understanding the process of the Creation, life and existence in the dimension of plasma. To what extent our Knowledge Seekers will strive, to what extent our Knowledge Seekers will try to understand and practice the knowledge of the transportation and transmutation, depends on the fear of their own existence in both dimensions. Many of you will not go through the transportation to transmutation out of the fear of, would I come back? Would I be able to manifest or do I become a nomad in the space?

There are methods, there are ways that you can never get lost in the space ?? of the plasma. And the question you ask, would I carry my physicality with me? (:50). Would my physicality be there, if I get lost I can suddenly manifest myself, gain confidence and then if I feel good I go back to the transmutation? But there is primarily one big question. If you get scared and manifest yourself, where would you manifest yourself? On Earth? In the space? On another planet, in another galaxy? And if you had that fear and you've forgotten what to do in the matter state, to convert, to interact, to connect to the plasma state, would you become the man in the desert of the universe, lost and not know where to go?

The other position of the understanding of the teaching will come when we travel with the dimension of the plasma. We'll have a zero time transportation, as it is connected to the world of the magnetic fields. Then it becomes, can we or should we allow ourselves, our physicality, to transport itself in a matter dimension. Or would we be converting ourselves to the energy, transmutes, and then converts back into matter state? It'll be interesting time, when your child knows to do this, and she decides to go and see the uncle in New York, and you're sitting in London, and you have to get a plane 18 hours on the way, you go to the airport to get the ticket, to get on the plane, to get there, (:52). to get home to your brother, where he's actually been there, 10 seconds since he left you.

The biggest problem for human race in the coming time, will be the separation between the knowledge gained by youngsters, new generation and the old ones. It's very much like the computer games of today. We see our grandparents and our parents watching us with a wonder how we play on the computer game, where they have no clue. It's just a screen and you play the game. You have the knowledge and they have to watch as they have not practiced the amount of time, from age of 2, or 3 or 4 you played with that keyboard with everything else and you mastered it. Very soon you'll get to that position that your children will master transmutation and become what I call, a witness like your grandparents watching you (with) the computer game.

We need to bring the education of the public education to all dimensions, to all citizens of this planet on an equal basis, in a way that just because the Americans know how to transmute and transport some of them does, not become disadvantaged to the boys in South Africa, or in the jungles of Amazon. It is the responsibility of the Keshe Foundation, who has brought this knowledge, to share this knowledge, (:54). Irrespective of border, color, race and religion, nationality, and which place in the universe you are, you come from, and you'll be in.

The teaching of transmutation and transportation, will not be only for man, but man will teach the others in space, that they have the same ability to do, even though they are in the most advanced UFO's that man could not imagine 20 years ago, he would be ahead of them. They have mastered transportation, but the human race through the teaching, will master transmutation. And that is a gift from Mitra to Mankind.

If you understand this, you open the horizon of the universe. And it's your responsibility at any age, today, tomorrow, in a hundred years time, to teach it freely, unconditionally to another being. Irrespective respect, totally irrespective of his race, color, religion, creed, and which part of universe he comes from.

In so many ways, we had to clear this, that in the coming time, now that you work with the Gans's, you understood the field of the Gans's, you felt them, you went through the systems of the Linz Center and you did everything else. Now this has to become a mainstream understanding and education for all of us, in all schools across this planet, that no race in the future will be behind and ?? . (:56).

Advancement in science allows us to teach the Soul instantaneously, does not matter where in the universe it'll be. It's just to find out, to understand how, the way it has been done, and for us to understand it first, that we don't teach the wrong thing, the wrong way.

Operation and existence of life across this universe, is the same irrespective of where you could be. Irrespective of what knowledge you carry and what shape you might have. You might be happy with the features of two arms and two legs, and in another dimension you'll be just a box. But it's still the same emotion as you had when you were a human.

It'll be interesting in once the mankind understand this, how he will see the other creatures and creations of the Creator. We live in one dimension, as man with a Soul and mobility. And we carry the same Soul, and in dimension of physicality, you might be like a stone on that planet. Where it's advantageous for us to exist in that position, time and place in that manner.

As I said, as we enter the new educational part, (:58). in respect to the energy field transportation and transmutation, we have to continuously remind you, as Knowledge Seekers, in which dimension we are talking about. And from now on, most of the teachings is on the dimension of transmutation, interaction of the fields, and not physical interaction of the man. How you will react, how you embrace the knowledge, will give you the advantage in how far you can experience better or more ?? adventurous part of the life in the dimension of the plasma, or we call, the STM.

To what extent we'll share this knowledge, will not be on how much of it you understood as Knowledge Seekers. We teach it on the record (recording) that someone in the future might listen to it and grasp it the first time. And does not need someone to teach and change that it suits him or her for the system to be applicable to them, or to the people around. Understanding the life in the dimension of matter state, understanding the life in the energy state, or plasma state, and understanding of the manifestation of the one

within the other, is as normal as ABC today for man, but man has not seen it. Has not, and does not want to distinguish between the two, as he's happy with the status quo of today. (1:00).

One of the most important part of teaching comes in understanding dimension of the plasma, the strength of a plasma, and how each individual will enjoy to be part of the work of his plasma. Does not matter where, when and how.

In the coming time, we'll teach you how to connect through Soul to the matter state, through the Soul of the matter. Not in the dimension of physicality of the matter. How to separate the two, and how to live with both in the same position and dimension. Education of the new plasma technology in physical dimension is much harder than the first part of the teaching of this technology. There are many reasons for this. And in the coming time, we shall explain, step by step, how each one needs to be done. But initially we leave it to you as Knowledge Seekers, to come out with the questions, to come out to, in a way, strength of your understanding and what you're looking for in the future for.

In the coming time, (1:02). measurements of the plasmatic magnetic field strength will become the cornerstones of your transportation. Today we have problem even to choose the fuel. That's why we have different types and different ways of using fuel. In the future, mankind should understand how to use the resources, but do not abuse the resources. And this will be a big change for mankind.

In a way, if you are a baby today and you go to sleep at night, your energy, your level of understanding is set according to that time and place. Not for higher or more. This teaching of today had to be done, needs to be done, that Knowledge Seekers have a direct clarity and understand where we are going, and how we are going, and the way we are going.

A couple of weeks ago, I asked you, with what you know, what you have, tried to come up with estimation of the life on this planet, or the life of what we call, Universal Time Zone. How do we go from one to the other? What happens if one goes in another dimension and you're left behind in the other? Would the father will call you blind? Or have you become blinded by knowledge? (1:04).

The technology of plasma, motion of magnetic fields, and how they're connected is important for the future space technology. How do we get a matter state, the energy to somewhere else and convert it? Can we take the table and chair which are our favorite, to another dimension? As we travel this part of universe, that where we get there, we still would like to have that comfortable chair. Would our chair exist in the new dimension and field strength? Would our Soul lose part of his, what we call, memory bank, part of his energy, in interacting with the new plasmas or dimensions of plasmas in the universe? How do we protect it? How do we keep the way we do on the physical side, everything to keep the integrity of our body, the fingers, the hand, the toes, the nose and everything else together that it identifies us, as us in the dimension of the plasma?

And how do we teach our youngsters? How do we teach the coming up generation about the new plasma technology, changing the world of physics? A couple of nations who are planning to implement this, have a problem with this, and they don't know how to overcome it. And how to use it for the future generation.

Coming to the teaching, (1:06). it becomes important for us to understand, how do we change the strength of magnetic fields, that we can move up and down in different magnetic field strength into higher order, or to the order that manifests us as a matter existing condition, as who we are? To what extent, how do we

calculate through emotions and not by calculators, that we can tell the grandpa we missed, even though he died for a hundred years back?

How do we transmute between two positions, when one of the positions is already taken, even though you cannot see it? You have to go to the emotion of the STM. You have to go into understanding the totality of the existence of the man. You have to realize when you go in the dimension of the plasma, even though you are aware of the existence in the physical dimension, you trust the strength of the plasma to protect the integrity of life which it carries, plus existing to confirm his own existence. How do we calculate going from one place to another, and we actually land there? Need to be understood, (1:08). that magnetic fields will have a dimension and direction. And how to calculate both? Are there vectors? And are they, or do they have limitation in transporting one to the other?

In the coming week teachings, I'll teach you in detail, but not with numbers, because numbers game is over. Now we need to understand the combination of the work in plasma state. And the speed that we travel in conversion and time is zero.

Let me explain to you something, you understand very, very easy, and it's happened to all of you. You have traveled in the dimension of transmutation, magnetic field energy, and you're sitting with the grandpa who died years ago. He's giving you tea, coffee, cake on the table, a toy for your child who's with you to play, while you're enjoying his presence. And then suddenly somebody says, "John wake up, it's time to go to school." And then you have to bring everything back to the dimension of existence and become in the matter state getting up to go to school.

How do you calculate this transition if you want to do it? (1:10). I was standing in a mirror ?? field and watching a lot of people, waiting for harvest machine to harvest the seed. And in that process, no one knew what they will get. No one knew what the next process will be to get something. But they are physically present. They make a decision to be there to see what they get.

But does this apply in the dimension of transmutation? Do we queue up in the world of the transmutation? Or we rely on what we set as a mobile system and a bike that it can take us to a position, that we can take off and catch up with what we took? Ask yourself a question. What happened in that instant, when you have to come out of what you call a dream, to waking up to go to school? To waking up because someone says, "John, it's time to go." Did you switch off everything? How fast did you manage to come back? Grandpa was in another position across the universe, becoming a planet. And, how did you get there? You have no rockets, and you have none of these new technologies of mobile phones to transmit you, because you don't have the knowledge. How would you do it, in the dimension of physicality? (1:12). How do you nourish this and teach this to your body in the coming time?

Then, if you can understand how you came so rapidly from the other corner of the universe to be present, because mom called you with her voice and you are there solid, not moving, because you're still dreaming about going through the process. To get up, to teach and to feed, ?? and you can carry on. What would be and how you decide that, "okay, you woke me up. But today is a Sunday, I don't have to go anywhere, I'm going back to bed." And you decide, can you decide, and go back to the journey and see the grandpa again? Because, you didn't finish enjoying his existence.

What mechanism was used, in our brain, to bring us billions of kilometers, according to the man or light years, according to the science of today, across the universe, instantaneously to manifest yourself, to answer

in a physical dimension, "mom, I'm awake." What happened to the grandpa? And how did you manage to do this? High speed travel instantaneously. Does it mean what I talked you learned to do? Try for next week or by next week, to create a condition or find a system that you can fit into it. (1:14). And see if you can fit into dimension of the reality and physicality.

We have to discuss and bring these on the table, that you start distinguishing between the matter and the plasma state. You start distinguishing in what can be made, I want a wall here, but in the transmutation dimension of the transportation, and not in the solid state of "wall." I lose a little bit as a child. But I gain a lot in understanding the Totality.

We go for a small break, we come back and we answer some of your questions. (1:15). But please understand the work of the matter state and understand the work of plasma state. And then, in the coming time, we try to go through the process together, that we don't miss much, in the ?? creation. Rick, if you like, take us for a break, and we come back, and we see what we can answer.

<< **BREAK** >>> 493 KSW July 76 2023 (1:22).

K- Yes, yes, with great pleasure. A couple of things to announce, or to remind, is that the session of 7, 14, 21st, sorry 14, 21st, 28th, and 30th of the July, with the 3 hour sessions, will not close at the given time. It's open till, literally, 29th, is the session you join, or you can join the session of that week, or you can join from the beginning for all the sessions. We expect a lot of things in this process. First of all, it's not that you are joining for whatever purpose you are. We are testing strong developed technologies in the background, for our purpose, for development of technology. Keshe Foundation is a research structure. And whatever we do, (1:24). is for us to learn something and develop something, that benefits us and our future generation, in our future time.

In the last week, Friday, elevation of the Soul of the, what we call, abusers of the children, we usually have a survey. We do a survey to understand how you feel. But, we have developed the technologies in the background and we feed you in the process of the system, or we bring matters, structures, in the background into play, very simple ones, which allows us to see the effect of your Soul, collective Soul of the people participated, their emotion and their physicality and everything else, and we didn't need to do a survey anymore. Because, our systems in the background, gave us all the data we wanted. If I would have taken the data from the screen and put questions to the people, 90% would have been exactly what we got from our systems.

In a way, now we don't need to ask you, we didn't need to ask. We relied on the data we collected in the background from the feed, the energy of your Soul, which means it cannot lie. We see it directly, we see when the Soul takes to elevate the physicality and the Soul of the Physicality (STP), we see the challenges of the STP, we see how the physicality respond to the situation. And we understand this fully, and we monitor this in the background fully. We can add to it, we change parameters. (1:26). And in most of the cases, you see our, what we call, service line on, but all of your lines are off. Which means we are acting, we are testing, we are delivering new technologies. And then we understand how the next step shall be, how will be.

So, for the next, from the 14th on, the sessions will be 2 or 3 hours. Many of you asked us, "which session can I join? Can I come in this session? Can I come?" You can come in any session. We'll benefit you for that session. There are so many different people with different needs or different, what I call, wishes and different conditions, who come in. So, for us is not important if which one will fit. We don't announce this section today is for this, this, this, and next session is for that, that. We are testing.

Maybe you come in all the four sessions, and in the second session you receive what you're looking for. In the first session you may not feel anything. Maybe what you gain from the first and the second session, in the third session, will bring you to what you came or you wanted to. In the sessions of 24, sorry 14, 21st, 28th, you need 2 microphone heads (headphones) minimum. One, you put on your head as usual. And one, you connect as adapter to your, where you want the change in your body. So the session of this coming four sessions is for you. You want to elevate your Soul. (1:28). You want to get rid of a pain in the arm. You want to send a loved one an emotional change. You want to put their pictures. You want to change a sick dog, a fish in the tank. You have that facility this time. So you need to get hold of an adapter which can connect your mobile phone to two headphones at the same time, stereo, and join the session.

If you want to change a condition on the left side or the right side of the body, join one session just using the same ?? headphone on the right side or left side. It's all how you want to do it. We cover a full spectrum. And in some cases, we change things to fit our technology. Don't forget, you are joining for us to learn to help the next generation. On top of it, you get the satisfaction of maybe what you want, why and how you entered this session. And it will be very extensive. And most probably, at the end of it, we'll have a session to comprehend, to understand, how it affected some of you.

The process of the, what we call, the developments of the technology comes and has come out of the Knowledge Seekers teaching and Knowledge Seekers understanding the processes. So if you are planning to join us, you can join. We're trying to put a limit on it, because we want to understand exactly how it will work. (1:30). We want to understand how much we have helped you, how much you have helped yourself, how much it has brought change to you. You're an addict, you're an abuser, you've been abused, you have cancer, you have depression, you have a tooth broken, you want to grow a tooth, you want to extend your leg, you need a hip replacement, you are emotionally in a stress, you want to see if your fish will change its characteristics. All depends on you in how you apply your emotion to the system. We are here to deliver not what we call, to do with the physicality. We are here to see how we can elevate the Soul that the Soul brings a change on the need of the STP and how it will transfer that to the physical condition of the man, or the ?? beast, or the animal.

So join us in these 4 sessions, what we call, group of sessions we put, for your sake and for the sake of gathering knowledge. And then we'll see how we build up to the August, what we call, sessions. August sessions will be very, very interesting. We'll try to bring in August the 25 Knowledge Seekers together. And sometime in August or early September, that will take shape. We'll announce or we send you the place to

meet sometime in early August or sometime in August. (1:32). And we try to get consensus that you all can be in a place and time to be together. How you organize your ticket, how you organize your stay and the rest of it. Then we go for the 200 and then the 65 we put up.

The process of development of the technology has been amongst the Keshe Foundation Knowledge Seekers and has to stay free research base. Has to be no limitation and no control on it. And we control only to extend the knowledge and how we collectively we see it to go to the next step. We might have some news for you in coming weeks that will bring changes to the whole structure of the Keshe Foundation's operation internationally. We are still waiting ourselves for that. And once we are informed, when we are fully understand it, then we'll pass on to the Keshe Foundation family internationally. We hope that it'll be to the advantage of all of us, as "One Nation, One Planet, One Race."

The other point you have to, we have to remind you is that the Keshe Foundation Exhibition Center closes its door by end of next week or the week after. We are closing the Keshe Foundation exhibition altogether and it will be moved to one of the major cities in the world. Those of you who want to go to the exhibition maybe next week it will be the last week, or if we can extend it a week after that. But by second, third week of July, the exhibition center of the Keshe Foundation Linz will shut down for good. On the other hand, (1:34). the Keshe Foundation operation worldwide will expand in a different way that we'll inform you as we come to it in the coming months and weeks.

Are there any questions?

Q: .. Can you explain in more detail how the technique in the plasma session with units and headsets and the microphones work. Does the plasma fields or Souls follow the headphone line by way of the Internet?
Thanks a lot.

K- This is a well practiced situation with the Keshe Foundation KS for past nearly 7, 8 months. We use the headphones in a way of GPS location of your Soul. And the transfer and the rest of it is done that way, till gradually .. you receive your, what we call, "combination sets," which are getting ready, I think a number of them will leave (the factory) within the next couple of weeks or so. Then you use those for interaction and interface.

The, what we call, the "Headset Units," are going through their completion phase in the next few weeks, and they'll be released to those of you who purchased it. And then, you will see the differences. It's like listening to mono and stereo system, and then you see, you feel the difference. This, you will feel the emotion, than actually listening to the word. (1:36). And then you gradually have to learn how to translate these emotions to the words, to your way of living. Gradually you build it up. We even advise you some points you still use two headphones on top of each other. If you use a small inner headphones with the new headphones on top, to gradually "home in" the physicality and the STM together. When we come to it, we will teach you slowly, slowly, as the systems are getting finished and set up by our team in the next few weeks. On the other hand, you just use, what I call, adapter, that allows two headphones to join your, what we call, handset. And then use one as usual for the head and another one for whatever use you join it for.

Any questions?

We will advise you during the closed session, in how to actually place things (Headsets) and put things in places. Don't worry about that part. As you've been in other sessions, you gradually will learn and we guide

you how to switch your system on, how to switch your system off, and the where to go and what to do, because we control a lot of things in the background. It'll be more or less the same. In those private sessions, we explain to you the use of your headsets, for what purpose you are in and then, what you can do and you learn and as usual, there are translators who translates it to the languages of the people present. (1:38).

Any other question?

<< Connection of Mr. Keshe dropped >> ...

Q: .. How will the future of transportation be? Will large size group traveling be handled by big corporations and governments, like the plane traveling that we have today?

K- We got to realize, we, as I say, "we are running two horses in the same race," from the Keshe Foundation point of view. This is one of the discussions I had recently with some government officials and people who understand this. We are teaching about transportation, new MaGrav system, MaGrav ?? system. (1:40). And then at the same time we are teaching, or we're developing the energy transportation system, what we call, transmutation. In either case, Keshe Foundation will be major share player in, at least at the beginning of it, maybe the first half a century. And then, we'll see the talents from the rest of humanity and other races of the, what we call, universe, will bring in and add to it. And then it collaborates in.

Once we open the doors in the Universal Community on a physical dimension, mankind will get flood of new technologies coming in. At the same time, we will flood the other races with the technologies which we have, they don't have. It won't be one way traffic. That point, that part, will be a massive change for the dimension of physicality. You like to go with the UFO. The other part which comes with the transmutation and motion or energy of the plasma transfer, that will come as the unique work of the human race. Even the other races have tried this, have not succeeded or have not developed fully into what it should be, and it'll come through the human race. That is where you, you become the teachers, you become what it'll be. And for a long time, human race will be heading in that direction, and will be heading in what we call, the knowledge in this. Because of the situation which is and the way it's been brought up. (1:42). And again for part of this initial stage, Keshe Foundation will be part of the major player on this. And then we'll see the initiative, integration of the other things, will bring new dimensions of transportation.

We see clearly, and maybe in the next few weeks we can put a more light on it. The colonization of the Moon and Mars by 2025 is inevitable, is on the card, depending how our nations and world leaders decide on it. If they push it further back by 2030, we should be able to colonize most of the planetary system on this, in the solar system. Because once we learn to walk, running and jumping from one to another become easy.

The stumbling block will come when we have to learn how to cross the bandwidth strength of this solar system. It's not easy, it's very similar to how we exit this planet or we have tried to exit this planet. But in a larger scale, but we jump in a deeper ocean of magnetic fields. In that part we need to, we have to learn how to transmute. Transportation and learning about it on this side of the inner solar system will be part of the work of the Keshe Foundation, and I'll head it for a time as long as I'm alive to teach you, to bring you to that point. Before I close my eyes the last time, we hope to be able to take man into the universe beyond galaxy.

Which means there's a lot of teachings, a lot of work, a lot of understanding. (1:44). We carry so much knowledge that it has to be shared. And in that process, maybe in next 50 years, man will be able to cross this galaxy. It's quite feasible, understanding the intuition and the ingenuity of man once he's given the chance to

develop. Understanding it and the biggest problem for the human race will be the shortage of numbers. Colonization, re-habitation, curiosity of man to see the universe and the world of its creation. It will take a lot of men out of the work of this planet. Don't forget, we will, we have no more judges, we have no more hospitals, we have no more doctors, we have no more schools where we can teach through the Soul any language, any knowledge you need, then you see, there is a lot of what I call, "holiday makers." They don't need to be paid, because they can all make the gold, as much as they like, in the back garden. But, all the facilities through feeding the Souls, feeding the ?? P, looking after them, become job of the rest, because they enjoy serving, and the others serve them in the same way.

These are not fairy tales, these are on the card, within next 40 to 50 years. Then it comes, maybe take mankind another 200 to 500 years to cross this universe to another universe. Again this needs a lot if ???. And that will come through the Soul of the child of Mitra. That's her responsibility and not mine. And that's the path to the Creator and not mine. (1:46).

In that time then the knowledge what you read in the Book 1, 2 and 3 becomes your guideline, because it's the same as you are. Life in other universes still exists, but you have to understand, can you live today under the ocean without any clothing? Or can you travel outside the space of planet Earth without any monkey suit? You'll be in that kind of dilemma. You have to understand new technologies, mankind have to understand new sciences in how to survive in the space gap between the universes and then how to exist in the others.

Mankind will lose many men in this process. In a way as I said in one of my talks some time ago, it becomes like a Roman time. If you remember, read the history, Romans, the mothers gave birth to children for them to become the soldiers of Emperor. Many of us will create Soul of Man's life, to become the passengers of universe, to add to the knowledge of the man in the dimension of knowledge of the universe. Short term, next 5 or 10 years, for sure, we will colonize Moon and other planet, in a very mass numbers, not just one astronaut and one monkey suits, maybe you're flying out of Cape Canaveral or somewhere else.

This comes on the back of the teaching. Iran space technology will head with the Chinese space technology together to this point. (1:48). You will see close collaboration between the Iranian space nuclear industry and the Chinese in a very short time. And they will spearhead, through the ethos of their peace, to take us into the next level of the space travel. At least for a short time. And Keshe Foundation will be part of it. And we'll be heading the knowledge, and I'm sure the geniuses we have in university of Iran and China, and those in other nations of the peaceful level, would join us to take us to that level.

So we have to learn first physical, those of us which are still afraid, who do not want to touch the Soul. And then those of us who travel this space through the dimension of the Soul. If you travel dimension of the Soul, energy space, that will take not much long to travel the span of this universe. But the problem is you get lost in many places, I'm ?? going get you back. And then there is a lot of other bits which is needed. So, it's more or less what we said. Learning curve and understanding it will take about the same. So, we foresee these things to come up in a, what we call, alphabetic order in next 2 to 5 years. And as we have brought the technology, we look at the technology different than others, we go into the next step of colonization.

Possibly, possibly as what I call, as a human race, not as nation wise. And you hear things in the news which is the basis for that development in the coming ??? time. (1:50). So if you think what might happen, it's what is on the card. If you want to go with the donkey, you choose the airplane, because you like to wait in the airport, you choose the space time transportation, which takes you a few minute, or you would like to travel with the Soul. As we see there are still a lot of people who go around the world on the bicycle and we still see

people on the back of donkeys going from A to Z, even there is a car passing them as fast as they could imagine. And while we are driving car we see a craft above us doing hundreds of kilometers covering the same distance as we are trying to do in the car. And then we see our Space Station guy going faster than even the planes on top of them, watching them, ???. And now we add another level above that the space thing, which is there, what we call plasma, MaGrav technology, and above that, with the transportation of the energy ?? packs, what we call, the STM. So it's a development, step by step, in the knowledge of the man.

In the next level, transportation through what I call, MaGrav positioning, will bring a new dimension of instantaneous, more or less, 10 - 15 minutes flight time. And then those of you who like to go a step higher for what we call, to transmute across this planet and this universe, you learn how to go through the energy packs ?? of the STM. So it's ... the future is bright. And we are working very hard to make it happen in a smoothest way as possible.

Any other question? (1:52).

Q: .. Aren't the Moon and Mars not already colonized?

K- By other races, yes, we're talking about the Man. Man has not... I mean, there is a lot of question marks. We are in the process, we said, for the first two people to go to the moon, with a new plasma technology. Then we have to work.

You got to understand, there is a lot of bureaucracy. We are facing it today. I mean, even today at lunch I was facing it. We are dealing with legislation. Doesn't matter the technology is here. Legislating it that everybody can use it are the stumbling blocks in the technology and in the upcoming science and technology. We can deliver the system that you can travel, we can expand your Soul and do whatever you like to do. But because now it's done by equipment and then ethical situation comes into it because now goes against everything. A religion somewhere has said something, it comes into legislation.

Then you have this to come. This will be one of the biggest stumbling block for the release of this technology internationally. Unless a nation opens up and it says, we are going, you've got to be ???. We have this problem in Iran. And I've mentioned it many times before. (1:54). Iran and the Islamic nation has a huge problem to go to the moon. Moon is holy to the Islamic world. Now you have 1 million Muslims, many of them fanatic. Now you're trying to convince them that man can go to the moon. You cannot imagine this is impossibility to their brain, even though their nations are trying to ??? it.

We have illiteracy in the knowledge of Creation and in knowledge of God and abuses of the man through what we call, religion. It's one of the things which will emerge very soon. Once we open these doors, these Mullahs, and the Ayatollahs, and Rabbis and Priests have to go to the same church and tell their people the truth about how you can go to the moon, how you can go to the mars. And it cannot be just... It's very much, I said to one of my family members some time ago. You can't eat meat if it's not kosher or it's not ?? halal. So you go to a supermarket, Muslims and Jews never buy meat because it's not a ?? halal shop to buy meat in. Moon become the same. Moon is not for Muslims to go to because it's holy and it's blah and the rest of it. So there are exclusivity to places. You don't want to be with Muslims. (1:56). You buy a house, you buy a property, you establish a residence on the moon. Now you understand the hypocrisy. And many Muslims come, it doesn't matter if there's something wrong with it, or we don't believe it or the rest of it.

So we have to overcome a lot of dogmas with the same, there are the same problems in Jewish and Christianity and the rest of it. And this needs legislation or opening of the time by religious leaders and lawmakers. And then we see, in the next maybe three years, five years, emergence of the "international law." What it means? Laws that applies to all of us as a human race. Once we open the space, once we travel in the time of a zero-time, a few minutes from one nation to another, new laws will become a structure set to rule the heads of the nations, not the United Nations. United Nations is a disqualified body of organization.

We see this, part of this, to fall on the back of the Universal Council and the Earth Council. So those has to be passed that is equal for all of us. Does not matter where we do wrong, on this planet, or as a part of the colony on the moon, on mars, and the rest of it. Then it comes equal teaching right across, and sharing of the knowledge and technology equal amongst all the human race. This is one of the discussions I recently had with one of the men of power in one of the most powerful nations. (1:58). That how we share the knowledge and technology, not exclusivity of one nation. And we need administration to see this through very rapidly. That we don't create a third world nation in the matter state. We create an equal nation in plasma state, as One Nation.

From the day we said, "One Nation, One Planet, One Race," was not in the matter state. Because now all of you can do everything to create energy, matter, whatever you need, if you put your head into it. Now it comes to the matter of the plasma technology, energy in motion. And this knowledge has to be on "One Nation, One Planet." And as all of us are ?? illiterate to it, once the teaching starts, we all go together, irrespective of time, place and space.

So this will bring us to that point. And then there's the maturity of what and how those who see the totality as members of Universal Council lead in the, what we call, legislation part of this organization. How they guide them through, irrespective of what language or race they come from. These are the few things which brings back or forces in the nations, the governments, for a rapid development and ??.

There is a massive change in the pharmaceutical and world of medicine. People like Bill Gates and the others who planned, we saw the clandestine activities in other fields of the past 3 - 4 years for becoming the richest man just to bypass or have the control over, (2:00). will become to non-existence. We see a massive change in pharmaceutical, where pharmaceutical will have no meaning. If we understand. We saw this in situation with a, what we call, Covid in Iran. We worked with Iran National Defense University as a report, you, all of you seen, and everything was done. But people inside the health authorities blocked it and stopped it, because they're profiting through pharmaceuticals. Now these structures will be dismantled.

You understand the things, you can buy, you can use, which does not need pharmaceutical system technologies, which can be centralized. From one country, you can have all access to it. All these is not on the card. It's already, process has started. The wellness centers of the Keshe Foundation are the beginning of this process. When you go through the process of the wellness, doesn't matter what condition you go to them, where you are in the world, you get the same time, the same services as the rest. We have already brought this into operation.

Then it comes the feeding structure that again has to be addressed internationally by the world leaders. One of the biggest problem we have is world leaders, how for them not to lose their position as a world leader, but still be leading the section of the part of the world which they want to lead. In a way, all becoming one member, one party in the "party of the human race" as I call it, and how we better serve.

The biggest problem we'll see in next 10 - 20 years is taxation. (2:02). How do you tax people to provide services where people have access to everything from outside the dimension of the country you live in, because you are not providing a service. Now you go to a supermarket down the road, you buy the fruit, or you buy the energy you want to use, whatever. Now you go on the line on the app, you buy your energy for living from somewhere, somewhere in Iceland or in the middle of China. You don't need the government, government doesn't earn money from importing food or whatever, and controlling through food. National food security will change drastically, and governments have to adjust to it. This is the part where governing parties of the world will run into problem, as they want to keep the leadership.

But in transition and time, with the rapid development of the space technology and opening of colonization, all these things will resolve itself in the next 20 - 30 years. There is a lot of changes. And even today, we are working on that way to achieve this in the coming time. It's inevitable, and the human race needs this shock, this change. And sooner or later, will come once the, what I call, runaway train, starts running. Everybody will fit into it, to be able to be somebody in that train. And we have already pushed the train on track, and it's rolling.

Any other question? (2:04).

Q: .. We know about NASA's behavior and performance. Recently they spoke about the shutdown of the Internet due to the plasma emanated by the sun. Does this check out or is it a fallacy? Thanks for the guidance.

K- I don't know, go and ask them. NASA now is not everything. NASA is a very, very small player in the space technology. So, they do what they do. There is a problem and we know Russians and Chinese are looking into it. Even I know Iranian governments are looking into it, to move away from centralization of computers in the hand of the Americans. Microsoft and the rest of it. There's a lot of work is getting done.

But you got to realize, again in this line, the bringing of the new plasma communication, will change a lot of things in the Internet operation. There's, there are changes. Once we start releasing these new technologies, once releasing, is getting released, new emergence of new ways of transferring technology, knowledge will come up. Superconductors at room temperature, superconductors will create us new chips, that all the knowledge you need will be on one memory stick. (2:06). Literally, you have the whole of whatever at your demand on your, in your hand. And then nobody can disconnect you. Nobody can, what they did with Huawei, will become impossibilities, if we go the new way.

In a very short time, Keshe Foundation will open channels with Huawei, as we've done before, in ?? trends, for Huawei to use the new plasma communication line, which allows them to bypass boycotts and sanctions of big companies, because they're advancing the technology.

We will work with American organizations the same, it's not just the Chinese, where the... We work with the Iranian nuclear centers to transfer the space technology into Iran. In conjunction with understanding, don't forget the first plasma nuclear reactor for flight was tested in Iran. About this time, July, August of 2008, if the Iranian government opens the advancement in plasma technology to Iran, then in conjunction with other powerful nations, will change a lot of things.

There's no restriction, there's no limitation. And we are in it, and we are doing what we can to bring that change. It's a cat which is been let out of the bag, (2:08). and somebody has got the tail of the cat in their

hand, they think they can get the cat back in the bag, but it cannot be done. And the end which is out, is you Knowledge Seekers.

Any other question?

R: Mr. Keshe, I'm reminded there is a question that was asked in the last Knowledge Seekers Workshop, toward the end, that you wanted to open up at the beginning of this Workshop. So we kind of missed that, but here is the question.

Could you open up a little more about, for our understanding, about magnetic plasmatic packets for transmutation, and what the difference is between magnetic and gravitational fields that are for the matter state?

K- The plasmatic packaging is already been tested by Keshe Foundation. This is where, partially we use the, you traveling to Linz, for us to develop it further. And partially in us developing other technologies, which run in parallel. And many of you have participated in the Friday (monthly) sessions we run in past few months. In plasma packaging, the physicality doesn't come into line of operation. Plasma packaging in a way, you travel on the line of the fields of the universe. And is to do, it's to the new space development technology.

The MaGrav, magnetic field and gravitational field, is very much on the line of the matter state transportation. (2:10). Which means, you get attracted, you create a fields to get attracted, or you create fields to be rejected from a position. The packaging is to do with the transmutation. The MaGrav positioning, gravitational and magnetic field, is to do with the matter state transportation. And, even though you do the same thing, what is done in a way with the donkey, and what is done with the jumbo jet. And, the difference in understanding it, is according to, what I said in the teaching of today, in how much you understand about technology, and what you want to apply.

There is for sure, there can be no control on transmutation. If the Knowledge Seekers learn how to transmute, no government can control it. No race in the Universe can control it. The way nobody can decide what you dream tonight. Because it's not a dream, it's actually your Soul, who traveled the span of this universe. You had no passports, no taxation, no permission, you had needed no visa to go. Where, in the dimension of MaGrav technology, in the dimension of gravitational magnetic field technology, we will find governments, because it's physical, or people who think they are governing, will bring limitations on what, who can come, who can go, and the rest of it.

The beauty with this technology is, the balance of the wealth across the human race. We will not see the extremes of poverty, and we will not see the extremes of wealth. (2:12). Even though there will be a difference balance of. Part of it will be done through the technology, and part of it will be done by governments, or organizations, for not to get the things reversed back to worse than what it was.

One of the biggest problem has been, in my talks with many governments in the past years, is that opening the Keshe Foundation technology MaGrav, supporting it, that will bring chaos to the colonizing countries. You've seen the refugees of Ukraine. You've seen the refugees of Syria. You've seen the refugees of Libya. You've seen the Iranian refugees. We've seen refugees from Vietnam war in past 50, 60 years. How many millions have moved, displaced, moved for a better life. If you put, according to the United Nations, the total

refugees of the present time, of the past 60 years together, once this technology is released, this will be a peanut into what people will move and move rapidly.

One of the reasons that technology is so much objected and blocked and everything else by so many governments, is that bringing this technology today in open. That's why we are teaching it for you to do, and for you to teach the others. It is just for how many hungry people in 3rd world countries, who they became 3rd world country's, because of the debts to the colonizing countries, will move to the countries, which they colonized them. (2:14). I don't think you'll find a single room empty anywhere in the United States, or England, or France, or Germany. It'll be populated. People will sell tickets App on the mobile phone. We can send you to London to live in such and such a place. You don't need to pay no rent and nothing, and everything is there. These are the realities.

The way you come to us, the way you came to us, and you went to moon and mars, the way you came and you changed your pH in your body, very soon, once this technology understood and be complete, it will become an App technology. Which means people can send you anywhere in the world with buying a ticket on the App. Because all they need to do is to deliver the energy through your headphone, the way we do. Then, is there any border? Then, do you still see an African living in a, what I call, a hut? Than the luxury apartments in New York, Tokyo, and Washington. Now you understand why there is such a huge opposition to Keshe Foundation work.

They can delay it a few years, but they cannot stop it. So it comes to the point, when you have access to the plasma technology, plasma packaging, would you like to live on this planet which is full of so much abuse, than to go and start your own village, village colony on the planet or somewhere where you feel good. Extending the village, not up the hill, but up to the next galaxy and next other place where you feel good with it. (2:16). These are the realities.

But how fast they'll come to it is not that knowledge and the technology is there. It is how you Knowledge Seekers jump out of this silly making Gans's and playing MaGrav game, and actually get on with the real knowledge development of the technology in dimension of the expansion of the Soul, the magnetic field expansion. And that's the difference.

Any other question?

Q: .. In the last teaching you spoke about the cosmic rays. Are the boundaries of our universe related in any way to these magnetic field lines where Souls can travel?

K- Partially yes. But it's just like part of it, not all of it. There are certain limitations and in time mankind will learn. Yes.

Q: .. The point of connection of the magnetic fields of the material state, and the magnetic fields of the plasma, (2:18). is between the transmutation of Oxygen to Deuterium through emotion?

K- Can you repeat that?

Q: The point of connection of the magnetic fields of the material state, and the magnetic fields of the plasma, is between the transmutation of Oxygen to Deuterium through emotion? He says, I ask this because in the 165th Knowledge Seekers Workshop, after a beautiful teaching about the connection and conversion between

CH3 and CO2, a Knowledge Seeker asked a question starting at 1:57:58 about, how does Oxygen change to H2 energy, whether it is through the lung or through emotion? Could you please expand on that knowledge? Thank you very much.

K- It's the... We do it in a physical dimension in the lung, but the whole essence of it is to feed the Soul. And the passage of the Oxygen through, what I call, the breathing passage, to increase the order deposit, or to change the elevation of the strength of the STM.

The process of... One of the most important things to understand in the body of the man and in the dimension of the life on this planet. Oxygen is the gravitational field force. It's what is holding the life together as amino acid. (2:20). And that goes due by principle in the magnetic field the strength of itself. It's the heaviest element. Carbon is a communicator. Hydrogen is the deliverer of transport, and the Nitrogen storage tank.

And in a way, if you understand this, then in any position in the universe, when you see life, you understand the combination of the fields which leads to creation and sustaining that life, you look for the holder of it. And when you look at the Oxygen and in combination, conversion to Deuterium or Hydrogen, you go back on the line of what we call, universal line of creation of magnetic fields connection.

We have this across all the elements. But Oxygen on this planet, due to gravitational mass field for it of the plasma, holds that, what we call, responsible ?? position. You cannot be the lightest and holding everything together. But when you're heaviest, your gravitational pull, pulls the other together in common, and positions you in respect to them. And when this positioning is done, then you create life, because you can sustain it, you can create all ?? (hold) the position, then you get the position of the, what we call, communicating to bring what is needed and what to give. You bring the storage, what you need, you give out, what you need you take, and then you create a line of transfer of energy, (2:22). and you create life.

In this part of, due to, what you call, magnetic field positioning of the Earth and Oxygen, and adding of the Hydrogen to it, gives this opportunity to it. If you look at it, I look at the water, water or is a beautiful liquid gas. If you understand, which the combination of two gases gives the liquid. You have the Hydrogen and Oxygen. And then this common denominator, due to presence of the Oxygen, creates that common denominator of the gravitational Mass energy for protein, or the amino acid. That's why amino acid stays liquid in this environment. And that's why 95% of our body, more or less, weight is mass by water.

You, once you understand the physiology of the magnetic plasmatic fields, then you see how one is connected, and how life is created, and how life is connected and what holds the gravitational field of life in given time and position and place. Oxygen is one of the key players in life, because on one side has a common denominator in the liquid of this planet, which is the water. And then at the same time has a common denominator in the structure of the body of the life, which is amino acid. (2:24). That's why, when it combines together with another element, gives the flexibility of the tissue, a plant, and everything else.

And then you have the, when you have the amino acid with your spare Hydrogen's and connection with the amino acid again, and connection in line, then you bring active life. Because you have three Hydrogen's which are continuously interacting and juggling for field forces. And Carbon needs to play that game in the presence of Nitrogen. Then you see how life is created on this planet. And why our protein, our liquidish, what you call it, dynamic, and always make themselves to water. You've seen it, this, you should have understood this, when you made the Gans boxes, how you get the layer of amino acid on top. Because the

amino acid, by nature, has an Oxygen, which is the heaviest element connecting to the another Oxygen, which is within the water.

Any other question?

Q: .. Hello Mr. Keshe, what is the role of the sacral bone in the structure of human physicality? Thank you.

K- Would you like to use your, what I call, fantastic system, and show us what it is? (2:26).

R: Okay, just a second here.

K- I bet our translator are scratching their head. How to translate? And where it is?

R: So, let me see here. The sacral bone, I believe it's sacral vertebrae, there's actually several of them apparently, from S1 to S5. And basically the sacrum is the center part of this, the bones of the anatomy, essentially the base of the spine. And the vertebrae's of the spine go down to the sacrum.

K- What we call a tail bone. And this goes back to the time when we had a tail, as a creatures. And as we became upright and start sitting more, we gradually lost the tail and the bone bend in. And now it's still there. It's part of the support of the skeleton to sit upright, or to hold you not to fall backward. And does not have much. (2:28). It's the part of the history of the man when he was a mammal with a tail. But now we use it for balancing.

It has a very interesting, what you call it, field transmutation. And it has a lot of connection when it comes to reproduction through the STM. We'll teach this sometime in the future. Where this, especially the bottom end of the tail, is the deliverer of the field through containment of the Soul. It's a bit too early to teach this, but it is part of it.

Any other question?

Q: .. Where to put the second headphone, when you for example, want to help an animal who is not near you?

K- We'll go through this in the session. If there are any questions, we allow a few minutes at the beginning, for people asking questions.

Q: .. Can I support more than one Soul in a session? (2:30).

R: I think you've said before, only one person per headphone set up.

K- Yes, because it is connected to your emails, so you cannot do anything else.

Q: .. How will the people that don't understand the English language manage the connection in these sessions?

K- Usually we have translators, for the languages.

R: Yeah, it seems to be at least probably half a dozen of the popular languages.

K- You have the German, the English, the French, we have the Iranians, we have the Chinese, we have the Portuguese, anybody else? I think these are the languages. Italians. Yeah. It gets translated directly in the sessions. We've done this up to now. But because these sessions are there, instantaneously people absorb, understand.

Q: .. Can persons with implants attend the July sessions?

K- We advise you not to. We advise you not to.

R: You mentioned, you said that you know how to reverse the effects of plasma fields, so it's possible to reverse the effects over implants, and leave the rest of the body in the plasma state, (2:32). during the plasma processing, so that it could heal, whatever is wrong and not affect the implant zones at the same time?

K- Yes, yeah, but that's for special cases. But not for collective sessions like this.

Any other question?

Q: .. Do you have the backing of the Universal Community, I mean, the treachery of the Belgian King and Gates etc., would you, would do anything to stop this science, like these black opp people, assassinating scientists...

K- They already are doing and they are very busy with it. They are still doing and they're very busy with it. You got to understand, you touch a point which is very, what I call, we are not touchy about it, but it's the fact part of the Keshe Foundation work. A lot of the things we got involved and trapped with, and still even today we are trapped with, and we battle with, with the Belgium structure, was taking of the Keshe Foundation to Belgium. And all of it was set, and then was used by people who were inside the Keshe Foundation. And when we went out to get rid of them, they tried to still cause problems. But, in general, when there is no kingship, and when we come to end of these kingships, and then that state, that government, that country, will dissolve back into.

I was talking about this with one of the Knowledge Seekers, past couple of days, (2:34). about how this country was established and it's going to go back into what it was. This country is not our problem and headache anymore. We have moved on and in time it will be processed by themselves. The abuse and the misuse and the killing of different ways and different things, different people, for the benefit of rulers, is not exclusivity of one nation.

Any other question?

Q: .. Can one connect and maintain the knowledge and understanding of plasma technology in the July sessions?

K- Repeat.

Q: .. Can one connect and maintain the knowledge and understanding of plasma technology in the July sessions? Thank you.

K- I don't know, it's a question I can't answer. Depends the Knowledge Seekers present, understood, want to share through their Soul. (2:36).

R: Depends on one's intention and so on as well.

K-Yeah. Unless you want to tap into my brain, which I don't think I'm ???. Even though we are in session, we are outside the sessions. That's the way we set up. Even though we stay in most of the, we are in all the sessions, but we are outside the sessions. We keep that to 3 or 4 people the Keshe Foundation, in that level. The people who operate outside during the sessions are usually not part of the session, so he cannot tap into it. Or they don't get involved into the process. Unless they choose so.

Any other question?

Q: .. Mr. Keshe, good morning, thank you all, for all the love and patience. You always say that the Soul is conscious, when we create a dome with the intention of creating a condition of love and peace for other Souls that are in certain conflicts and cannot see that through peace and service it would be much simpler, somehow a communication begins to occur. Is this communication conscious even of those who don't have the knowledge or are we the ones who are seeking to understand that we are aware of it?

K- It's combination of both. It's not exclusivity of Knowledge Seekers, it's not exclusivity of man. It's a combination of everything put together for it. We carry inherently part of our ??? genetic code actually. (2:38).

You got to realize something which is very natural, in all processes of creation, is that even our brain has section, which is responsible for the interface between the STM and the STP of the man. When you look, when you find the position of the Soul, you always see that interface line. This is what I spoke about earlier today, that where we draw a line between the physicality and the plasma, in the emotion. And our brain has specifically developed, not us, all animals, all creatures which have a brain, Soul, structure, for that purpose, to that effect. To translate, to transfer, to, what you call it, synchronize, between the two emotions and two dimensions of the Souls. And we gradually, and those who become master in this, will have a beautiful time in doing it.

Any other question?

Q: .. So the Soul sits in the third ventricle and the spinal fluid is charged by it to reduce in strength as it travels to give certain field energies for certain parts of the organs, like the Sun's rays?"

K- What?

R: I thought you might say that. (2:40). So the Soul sits in the third ventricle, I guess in the heart he's saying, and the spinal fluid is charged by it, to reduce in strength as it travels, to give certain field energies for certain parts of the organs, like the Sun's rays?

K- I don't understand this, where the Soul got to the heart?

R: I guess he's saying that, if the Soul sits at the heart, it's like the Sun's rays giving out to the spinal fluid, which then travels to the organs to provide them energies. Is that the way it works?

K- Not really.

If you have a heart of a man you cannot make a man. If you have a brain of the man you can make a man. So, I think you get your answer.

R: Hmm, it's a good point.

K- Shall we call it a day, or is there more questions?

R: He mentioned it was the third ventricle of the brain he was talking about. Okay, so, is that kind of ties in?

Well perhaps we should wrap it up Mr. Keshe.

K- Yeah, we are done for today. Thank you very much for today and please, if you're joining us on the three sessions, try to complete and conclude as fast as possible. And we will let you know how to use the system, but make sure you have at least two headphones. Some of you might need 3 if you want to do different things, (2:42). ?? and examine and develop things for yourself.

And as I said, those of you who are, who've been trying to get yourself to Linz and Keshe Foundation Exhibition in Linz, will shut most likely at the end of next week. If we push it to the following week and that will be it. As we are closing operation in Austria. The exhibition will move to one of the wonderful world capitals in the coming weeks and then we move on to other works of the Keshe Foundation. Thank you very much for today and see you next week.

493 KSW July 6 2023

END

494th Knowledge Seekers Workshop July 13 2023

(Transcription, Proofing done)
(Auto transcription by Elias)

July session 2 headphones - free to experiment; Key is expansion of Soul & emotions; Details about what happens in Space travel; Whole families transmute; Ant on another planet - societies like man; Knowledge automatic through Soul; Knee Gans testimonial; Helix of AA; Leader shown T beyond imagination - nuclear weapons obsolete; KF Wellness programs; Skip transition time; Electric car scam; Governments don't allow new T in; Soul aware of each other; Same machine feed whole planet; No "Critical Mass" in plasma - field balancing; KS connects without headphones; Depression; Biden puppet - elevate Souls behind; Governments have to do TV; Support us through Soul

ENGLISH TRANSCRIPTION

(:16).

R: Background imagine of Keshe Knee GANS, a special GANS that's used for knee pain. You can participate in the research program.

(:18). ...

K - ... Good morning, good day to you as usual. Wherever, whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back as usual, and as usual we try to share knowledge, to understand more, and try to breakthrough new grounds of knowledge in space, and other matters.

As usual, we have a couple of small announcements to make. And one is about the 4 sessions which starts tomorrow, in respect to the, what we call, 3 hour sessions. These sessions are set up directly for what we call, new grounds of understanding and new, what we call, technologies which are developed, that we can see how much in what numbers and how in different applications, we can expand the knowledge of the technology. For example, tomorrow session we start at 12 o'clock, and you need minimum two headphones. (:20). This is a different way that we've done before. You can have three headphones, or maybe you can have access to one mobile phone with five entries. We leave everything to you. You write down what's the reason you took part, and what is your expectation. And we set up in the background to establish our way, our work, in the 4 sessions which come up. One is 14, 21st, 28th and the 30th.

Then, on the 30th, at the end of the session, we ask you what you achieved, what you wanted. And, maybe in one session you wanted to do something with your emotion, in one session you want to do something with your knee, in one session you wanted to do something with your lung, or whatever. We leave all that to you. We are not here to, what we call, interfere or anything. We want to see the process of the expansion of the Soul, in the dimension (D) of satisfaction of the emotion and physicality.

So, usually our medical people, on the health side, on wellness side, over decades have tried everything. Now what we want to establish is that, we want to create a condition as the citizens of one's country, as a citizen of one city. This is a pre-test for upcoming space cities which is going to be structured with Keshe Foundation cooperation. (:22). Which means you can come in one session and see how you feel, what you want to

change. And the test we monitor in the background continuously as we .. you saw us last week we didn't take any testimonial or any, what we call, ballots to see what happened, how you felt, because we could see the operation on our system.

So, in next 4 weeks, you come in and tell us, and we expect an email from all of you who participate, after each session, each connection, that you come into the session, on that email return back to us, an information at the end of each session. Which means, you tell us what you came in for, and what you felt after the session, and then you monitor yourself in the next 4 sessions. If you achieved more happiness, more, God knows, whatever, we don't know. We don't want to interfere. This was your expectation, this is what you came in (for). And then, let's see, after 4 sessions what was your experience, what did you achieve. And then, a month later you send us an email, that, in process, in progress, what has changed over the month.

This is part of the large scale, what we call, operation of the Keshe Foundation. There are a lot of things happening in the background in the Keshe Foundation, that we cannot disclose, or we don't want to open till we reach ?? final. A lot of things were supposed to be done, as you know, with the help, with the, what we call, the damage we received financially, (:24). and some of you helped us with it, and we tried to structure a new, but now we've gone a different way to achieve the same, through a much bigger structure.

The whole idea is to build a space city. In that space city, no one should get sick. No one should go ill. No one should go hungry. No one should feel cold. And this is part of that structure. This is part of that understanding of what we call, total process of the next step in reaching everyone at the same time. We have, those of you who join us in the sessions, you've always seen a number of lines open in the background, even when you're silent. We keep monitoring and feeding information or technologies in the background.

So, during the sessions, we add systems in the background, we test different systems. And maybe we ask you how you felt in this part, how you feel in that part, you feel happier, whatever. We'll come to that when we (start the) ?? sessions. So, for the next 4 sessions of the Keshe Foundation, in cooperation with the Knowledge Seekers (KS), in July, we are looking to see what you came in for, and what you received, how well you felt, or you came in for chocolate addiction, and you see, I eat more chocolate or I eat less chocolate. So, we have given you not one particular thing. (:26). You can come in all 4 sessions for the same thing, it's not a problem. But, you come in one session for this, next session for that, and another session for that, and each session, immediately after the session, or the following day, you send us an email, we collect your data, we understand what it is, and we compare some other things in the background.

Because, during the operation we change a lot of parameters, during the 3 hours. And then we see what parameter goes with what. So, is not excluded to one session, and then you say, "I came one session, nothing happened." It's a completion of the full 4 sessions. But if you feel good, one session, two sessions, that's your decision. We more or less have a good idea of what will be the results in many cases. But now in a way it's a information of the technology and then understanding more for the next cycle of what we call, approach to development.

The other point with the Keshe Foundation is that we will make announcements in a coming time where we call upon many Knowledge Seekers to join us in the research, in the deep research in different aspects. And we'll let you know how, what and it's not just good being a Knowledge Seeker with a Gans. We rely on your expertise outside the Keshe Foundation. That you emerge it, you amalgamate it with the knowledge of Keshe Foundation and we give you the direction to see what we can develop. This is very important for us as Keshe Foundation is going into a new era of its development. And maybe you are a space specialist. (:28). Maybe

you are an electrical engineer specialist. And how you have worked with it in conjunction with what we call, Keshe technology. We call upon you and then we'll organize things with you to come in to start.

In respect to the meeting of the 25 Knowledge Seekers who are coming for the special session, by early August, we make announcement for the meeting of the first 25, the place where we expect to be and where we hope to be able to meet the 25 of you during one week, Friday, what you call it, Monday to Friday. The option for us sits on three major cities of Manchester, greater United Kingdom, London, and Beijing. And the three sessions will be kept in one of these three cities. We have to decide which session we keep where. But the first session of 25 will be kept most probably in city of Manchester, United Kingdom. And then the session for the 200 will be held in the city of London. The final destination, if we can organize, will be held in Beijing, in China. Or we hold it in city of Frankfurt in Germany. We have to, primarily to let you know, with all chances, if everything goes okay, we announce the date, and the first session will be kept for one week, in the city of Manchester, United Kingdom, for the first 25. (:30). And if we can secure everything in many aspects, we'll inform you the place, the time, or we move the first session to London, Frankfurt, possibilities. But on target, we aim to have the first 65 people for it throughout the session of one week in Beijing. But that has to be ratified and it needs a lot of work to be done in what we call, November, December. But we'll inform you in early August, the exact position of first position, because many of you have to sort out visas. And we recommend to you the hotels. We will not release the position of the conference. It will be kept confidential, but it will be in the city of Manchester or London. The other point for us is the progress in the teaching will carry on the same. And we will see how we can bring all the matters to one point.

Going back to the teaching, we have tried in the past few weeks to bring a new dimension teaching, a new understanding in the way of space, time and travel. What will be interesting for many of you is that it goes back again to Book 1, Book 2, Book 3, but now we're putting a structure into it more or less what happened in the past .. 2 - 3 sessions in respect to the speed, the size of the universe (U). And in respect to how you arrive at a destination. (:32).

You were a plasma of a human, as a Soul. You have gone through transmutation in the way of traveling to a new position as an energy field. What's going to happen to you when you arrive? How would the emotion of the Soul let you know if it wants you to transmute and become part of the transfer? Which means, I want to see the place, I want to be part of the place, I want to feel the emotion of the physicality (P) of the place.

Then it comes to the point, how do you integrate the emotion of the physicality to the emotion of the Soul? How do you communicate through the Soul of the Physicality (STP) to the Soul of the Man (STM), to create dimension of physicality? To me, as a Soul, this ground feels solid. But if I manifest myself in the shape of a citizen of that planet, that position, with what I transfer, what I transmute to transfer, would I become sinking, or floating, or standing on the surface? Would I like to be a "fish behavior"? Or would I like to be walking as a man? Or would I like to be like a bird, flying the space of the place? Till I find somewhere I feel comfortable, then I change from being a, what we call, "a flying pattern," to a solid pattern. I want to feel a fish life, or what we call, submerged. Even you can, (:34). in the teachings of the future we'll teach you, you can land on the surface of a liquid. (audio drops ...)

R: Bear with us a minute, I think Mr. Keshe needs to mute for a period of time here. Can you hear us Mr. Keshe? Your microphone is muted. Oops! See he's restarting his microphone.

K- Sorry about that. Sorry, it was an emergency call, I had to accept.

K- ... The position is, you want to float on the water, or a liquid .. gas. You don't want to submerge. You have to make that decision. How do you make a decision to what matter state of the time, place, and position to convert into? A bird on Earth interacts with many conditions. And they know how to fly, they know how to transfer themselves with swinging the wings and whatever, (:36). duck and dive the rain, or whatever. You're a "newcomer." On the surface there is no bird, that you can take knowledge from, through the Soul. How do you decide, I came, I know the birds, I want to fly on this planet? How do you do it? How do you go back into the dimension of the transmutation, but still in a transfer of the physicality? Alertness, interaction with the STM and STP of the man and the "Soul of the planet," and the condition of the Inertia will dictate how you manifest yourself.

I don't like this. What happen if you lose control, if you don't understand the transmutation? What are the consequences of it? In part of the process of the next 4 weeks (July Sessions), you will go through this emotion. The part of the next 4 weeks is not just for you to come in for whatever. We're testing a lot of new conditions. You will tell us how you feel.

In a way, you have to go through that to be able to repair a lot of things. Because you landed on the surface as a dimension of the different physical condition, and you burn your wing. You burn your leg. You burn your point of contact. How do you heal it? How do you repair it? Or how do you go back in the dimension of the Soul and come back at a different dimension of physicality? (:38). A lot of the teachings will come into effect. And how would you feel if you land in a populated area of a given species in a given part of the universe? How do you interact with them? You are not in the shape of the man, the body of the man ?? in the amino acid (AA) in this dimension has no life to live. It is in a way, a different ?? condition, but you want to manifest yourself in physicality.

We know we are not the only citizens of this universe. So we should not be surprised if we come across population like ants, like cities we have, in a different shape of construction, intelligence of the building is not exclusivity of the human race. Science and technology is not exclusive of man. Races who have developed, like us over millions of years, they have developed tools to live. They have created societies. They establish the structure of life. ?? they do not need to eat the man does. They don't kill, but they live amongst each other. They respect each other's space and time. You land in, "ooh, it looks delicious." You don't eat. You pick up the Soul of the environment, that this planet does not need to kill to eat. You take from the point of the saturation of the field of the Universe.

How do we see ourselves in the new environment? How do we transmute? (:40). How do you convert from physicality to the Soul and from the Soul back to physicality? This teaching has been sitting in the Book number one from the first chapter. If you go through the first 3 chapters, the whole understanding of the transportation and conversion to a field, to matter, is fully explained. But you have to understand what it says. If you go in what we call, the first 3 chapters of the Book number 3, the ?? same structure is set. I keep on telling you, go to chapter at the end of the Book number 2, to the beginning of number 3, you'll understand the process of the Creation.

But now you have to create yourself in the time and position. You still have the emotion, physical condition of the man in the physical, what we call, capacity of the STP within the STM. How do you change the skin? By changing the skin, it means, how do you bring the STP out of the Soul, and bring the Soul inside, and the reverse? This knowledge has to be understood. When you run in a physical dimension, that's a physical transfer. How do you transmute, which means bringing this physicality inside, with the STP inside the STM?

(:42). Where now, it's the Soul fields strength, which interacts with the environment. Not the skin of the man in the dimension of physicality.

And then, would us, with the STP of the man, on the surface of the planet, end up to be a miniature things like an ant walking, or a giant of a thing like a dinosaur, compared to its environment? How do we adapt ourselves to be one of them, that we are not recognized (as being) from outside? These are the teachings which gradually we'll start teaching you. This is what... but we have to open your eyes into what is to come. It's no use telling you, this is the system, this is the way you do it, when you haven't had time to think. You haven't had time to understand what are the implication of it, what are the application of it.

We've been teaching for past months, and two or three years about the STM, about the STP of the man, about the physicality (P) of the man, that today's man has leeches upon the Soul. Now, the change of the game is what happen when the Soul leeches upon the P of the Man. How do you switch? What is the process of switching? How do we understand the way we need to switch? (:44). And how do we make ourselves available for this switch? That we are in full understanding of the process of the life. In what shape and to what point of need we convert.

In what shape and point of need we collectively bring changes. We travel as a family and we want the brother, the sister, the mom, the dad and the children to be with us. And we want to convert all of us together. In a way we've done the transmutation from A to B, from P of the man to the STM. Now, how do we do as a whole that no one knows we are from another planet? We become part of the society, even though the family know we are together. We are not the people from what you call, origin race.

And how do we learn the language or the line of communication? There are no schools, no universities, no foreign school languages. How do you tap into the "Soul of the knowledge"? How do you tap into the "Soul of the life of the planet"? These are the teachings which is coming up. These are the teachings, what again, I'll go back. The next 4 week sessions will bring us to the point to do, in how in the coming conferences, (:46). we will explain to you how, and you will learn how to do the conversion. How to do the transmutation, how to understand what transmutation means, and what effects we will have on life of every individual in this process.

It's important for us to understand the totality of the transmutation, and the totality of what we call, understanding of the work in every aspects of the work. How you switch the STM to become the container of the physicality on this planet. How you travel the span of this U, and at the point of arrival, you change, and you reverse the position where the STP and the P of the man manifests itself to become the holder of the Soul. In a way, put your hand in and pull the skin inside out. But this time, what you pull out, what you change, is the Soul strength or the STP. And then, in the interaction of the two, gives you the manifestation of physicality in that time, place, and position. But as you arrive in the dimension of the Soul, (:48). in the strength of field of the Soul, now you convert into the dimension of the fields of the physicality. Then you will see the shape of you.

We can replicate these on Earth without the shadow of a doubt. Knowledge Seekers in the coming time will make facilities for all these to be able to be done in a matter of seconds. But till then, we have to teach you. You have to understand how you use the emotion of physicality, in conjunction with the emotion of the STP, with the emotion of the STM, in the interaction with each other, to create the transmutation.

In fact, if ?? you understand. The physicality of the man is Book one. The STP is Book 2 and the STM is Book 3. If you understood the knowledge given in these 3, you should have already understood the transportation and transmutation.

To what extent you can deviate from the line and experience new dimensions? And then, to what extent you have understood at the point of arrival as a Soul, you interact with the "Soul of the destination," with the "Soul of the citizens of the destination," and in that lines of interaction, you create your new physical being, (:50). which allows you to work, to live, and to be part of the time, place and position.

How do you switch? In Book one, are you transmute? And how you end up in Book three? And how do you create the motion between one and three? Then you find out. Transmutation has no time, space, and position. Which means, the transmutation will bring man to travel in the dimension of ?? .. , will bring in to understand the Totality. We have to, we see, and ... We have to understand the totality of the energy. Energy in the terminology of the Keshe Foundation, not energy in whatever man measures. Energy in understanding of the field in motion. Understanding that each field strength has different emotion, what we call, strength. (:52). And each one has different emotion. So your emotion, field strength of emotion, understanding of the motion of the fields, all come together, in which line of the universe you will transport yourself. You will transmute yourself. You will come to the point that you can bring the change.

So first of all, in the coming months, in coming weeks, we have to teach you how to go through the conversion. From the Soul to become the holder of the physicality. And in that condition, to become the holder, container, what I call, interface with the STP. Then one of our most important points will be how we get you from Earth to Moon, from Earth to another position in the universe, with the dimension of the speed of the light of the universe. Considering the light of universe to man is dark, but in fact it's not. This is the light of the knowledge, the light of understanding, the, what we call, "enlightenment." And then, how to get you to the point, and then manifestation.

Then, you still have a problem, if you understand the whole process. You leave in the Soul of this man, to meet the mother who died 20 years ago. (:54). She has no physicality in the dimension of what you were expecting. She has a new dimension. But the Soul, the energy, tells you, this is the mother. What would you expect to see? What is your understanding of the emotion of the interaction? You see a field. You don't see the mother in physicality the way you knew. But you know this field is a field, which is the Soul of your mother. You interact with it, the way you do exactly in your dreams. Because the dream to you is the reality of the interaction of the Souls in the dimension of energy.

All these in the next few years will be taught, in a very, very detail. There is no calculation. If you go back into my first teachings, first lectures ever, 20 years ago, 15 years ago, I always said, "God does not have a scale, a measuring tool, that I'll put 50 gram of this and 200 gram of that and 10 liters of this." There is no grams and (liars) and mileage in the measurement of the Creation of universe by the Creator. And now you are the Creator. You can't put, "oh, I put 20% of my Soul and 30% of my physicality, and I'm going to end up there." You have to learn, in the dimension of the strength of the fields of the universe. (:56).

Then we have to understand, how we create these fields through emotion. Then you understand, even the very first teachings in health, we always spoke about the emotion, why it's important. It's not a blood flow, it's an emotion flow, which leads to the creation of the sense of the STM. You look at the redness, I look at the strength of the measurements of the fields. The fingerprint of the human race in the field energy. In the space you have no blood, but you have field flow emotion.

Now you understand, how much more, in the past couple of weeks, and in the next few weeks, I do a lot of talking, a lot of explanation, open your eyes to new dimensions. Because, if I don't do that, it'll be very hard, like many of you before, he went from Nano material to Gans, and now he's come to fields, he's ?? come from ?? radiation. Now we teach you, because now this is the school of the space technology. We taught you ?? for 10 years. Now, that's why we taught for 2 or 3 years about the Soul, in the handling of the field of energy. Now we are moving there. You have to understand, you have to, in a way, be educated to be ready to go through the transmutation, by yourself. You do that in your dream, you do that in the time of, when the physicality is resting, but you've learned to park it between the blanket and the bed, we call it, a sleep time. (:58). Now, there is no sleep time, because now you park it between the Soul and the STP and there is no physicality. Nothing, except the emotion of the physicality, of the STP, and the emotion of the STM, which allows you the point of manifestation of the physicality.

Unfortunately, we have not made any measurement tools to measure the strength of the fields of the emotion of the man, yet. And as I know very little, there is no such a system in the U. You go on the edge of a cliff, the fear stops you jumping over the cliff, it pulls you back. It's the emotion which does that. Fear is an emotion. Now, you are on the same point. You are on the cliff of jumping from the physicality into the Soul, and knowing there is emotion of STP, which has held me (back) ... ?? doing something. I hide, I turn my back, I say, "it's not there, but let it do it," and I call it a dream and a sleep. That's what we do when we go to sleep. We hide under the blanket, we put something on our ?? .. ourselves, we have the physicality that we are asleep, and we turn our back, we close our eyes and we said, "okay, now go." Dream, go, wherever you want to go, you are free, and I call you a dream, because I don't want to accept this is my capability, it's my responsibility and it's actually part of me."

Now, you have to understand this. (1:00). This Soul has no bed and blanket to hide in between. Except the energy fields of the environment it's in, and except the energy fields which is within it, we call it the STP of the man. Sometimes in and sometimes out. When you sandwich the STM, and the physicality of the man, and the Soul and the condition of the environment, you get the STP doing something and create what we call, the physical structure. Now, in this process, you have a plasma of STP, you have a plasma of STM, and then you have a plasma of Soul of the space, time and position. And you're trying to drag the STM to go in the other side, and pull the STP in the middle. And when you do that, you get the physicality.

Many of you, many of you who are used to dimension of the physicality, when you interface and interact with the first time, your new physicality, in new dimension, you will be panicking, hiding as fast as you can, (saying) "this is not me." Would I see with the eye of the man, in the mirror of the position and time, and see another body, which is not mine, but inside I know .. I am a man.

These things we have seen, we put you through the experience. We put you, we brought you to Linz, we let you go and you said, "I see blurred, I went to the Moon, I went to the sea, I became this, I saw the Soul of Christ and everything else." (1:02). We allowed you to experience. Because it was not you who experienced. Because as a man, you are part of the Soul of the race of the man, that knowledge has been embedded in the Soul of every man alive on this planet. Now, they have to tap into it. They have to progress to the level to be able to understand the transition.

Many experiences we did with you. In the time of the four or five hundred of you came to Linz to go through the system and we told you, come from all races, because we're storing, now you understand what we have

stored, your emotion, everything else is part of this. You came in for a test, you actually added to the knowledge of Totality. And this is how it will work, and this is how you will be.

When you arrive in a time and place and position, you'll receive the knowledge from the "Soul of the citizens," and not from the school of the teaching and universities of the citizens. They haven't gone so advanced to bring in a structure of what we call, the lying, cheating structure of the, what I want you to learn, and what I want to indoctrinate you to know is the truth, because it fits me. You learn from the Soul of the citizens of the universe, in time and position and the place and the point of arrival, because you interact with their Soul, and not with their physicality. Because you entered into the dimension, in the dimension of the Soul, not the physicality. You didn't come off the plane, "oh these are Chinese and these are blacks, and I'm a European and I'm an Asian." (1:04).

As I said, listen to one of the Intros. When somebody looks from outside, sees the Soul, the brightness of the light, does not see the Soul of the king, a peasant, or a dog. As the Soul of the king and the dog look exactly the same, from the brightness of the man observing in the Soul. So there is no difference between the dog and the king, in the dimension of the Soul, why should be in physicality? Unless the man decides it. And then, we have to understand, who is the real dog, the king or the dog?

In the dimension of universe, we have no hierarchy. And we have nothing hidden. And this is what many of you will come to understand. In your first trips, you'll come to understand. Have any of you had a dream, talking to your mom, and in the dream, the mom tells you, "you're lying to me." Then, I, in the dimension of the Soul, everything is transparent, everything is dimension of what we call, line of the fields. So, you learn the language of the fields, you learn the language of the emotion of the language, you learn everything else with it, what to eat, what not to eat, where to go, where not to go, as you are born in that society.

This is what I tell you, in the coming time when you learn this, when you come from France into China, and understand to arrive in the STM, (1:06). not off the plane of the man, you will understand Chinese, you speak the language of Chinese, you'll understand the emotion, and everything about the Chinese culture. Because you arrived through the Soul, you arrived through the fields of emotion, not through the plane with the fuel in the back, dropping your physicality.

The science of the man will change. The understanding of a life of the man will change. And then with it, the whole structure of the physicality of man will change. We tested this, without you knowing, through the process of the last meeting of you Knowledge Seekers, in elevating the Soul of the abusers, some couple of weeks ago. And it was so beautiful to see how the STM has taken over the STP and the physicality.

And the physicality had no line, it was a straight liner, a "flat liner." And how the physicality stayed on the line, and watched the STP and the STM battling it out to find balance, for the Soul to be in the opposite position, equal to the STP, that physicality stays flat liner, and there is no abuse. If we show you the graphs and the electronic information we collected, it just puzzles you, if you understand it.

Now it comes to the point, that how in a coming time, we can transmute you through the Soul. You can transmute yourself through the Soul, and then give yourself dimension of manifestation of physicality, (1:08). at the end of transmutation. This is what is part of the teaching, this is what, if you listen to the past two, three teachings, I start opening, telling you that when we bring you to the point, you already understand. You learned enough about physicality. We had to show you everything about the dimension of the Soul, and then dimension of the matter state, the Gans's, and the rest. Now, we put you through the transmutation. We

put you through, going from Book 1 to Book 3. But this time it's you. It's not a reactor, it's not a system. The system is you, understanding of it. And it goes back to what I always said. As Knowledge Seekers, you take from these teachings, according to your intelligence. According to what you decide to be the reality in life, which becomes your understanding.

We go through a break, and we come back, and try to explain. The teachings are surely short, half an hour, 45 minutes nowadays, Because, it's so intense if you understand it. There is no more mixing things, the only thing you mix is your energy of your Soul, energy of your STP, and your physicality and see what you get. And what you experience with the new transmutation. And gradually, as you go through the teachings, in the coming months and years, one by one of you will start going through the transmutation. You learn it, you understand it. Don't take it just a voice, understand what the voice means, which is teaching. And this you understand, when I tell you, when we teach, we teach for the whole of universe. Because universe taps in the Soul of the Creator. We go for a break and we come back, and then we'll see what we can do. And answer any questions. Thank you very much, Rick.

R: Thank you Mr. Keshe, excellent teaching today. Okay, well we'll take a short break here, and be back in a few minutes.

proofed

BREAK >> 494 KSW July 13 2023 (1:16).

K- Okay, carry on. Let's see what are the questions.

Q: Good morning Mr. Keshe, I have two short questions. One, (can) the earphones or only headsets can be used for the July sessions. So, can we use both earphones and headsets, (1:18). or does it have to be only headsets?

K- I don't understand.

R: I believe it's, you know, the earphones are the ones that just go into the ears. And the headsets rest on the ears. So either ones can be used for the July sessions, correct?

K- Either one can be used. Either one can be used. Can you give me five minutes, something urgent has come up, please? I'll come back and just put another ?? .. please. Thank you very much.

R: Well Dean you had a hand up, maybe it's a good time to say something to the public here, perhaps you've been at the center in Linz and directing groups and so on, in the, kind of the end days, you could say, of the center in Linz. How are you feeling about that? How is that going? . Talk a little about that.

Q: .. Yeah, thank you Rick. It's been, it's usual with humanity and with all of us. In Austria, it's become, for many Knowledge Seekers, a center of thought provoking, field strengths of emotions, and then some clarity coming through where you feel emotionally stable. You know, the Center has become a platform, and a position where Knowledge Seekers have come forward, and some have said ?? that they feel extremely comfortable in those positions. (1:20). They feel like they've received energies and when they're in the building itself and in surrounding areas, they feel a comfort. And we know this is directly related to their experiences on a Soul level where the Soul is bringing them forward, the Soul is present within the Foundation And all the Souls that are present, because it's not just the foundation Knowledge Seekers, there's many, many, many Souls present. And you sense it and feel it.

And I've understood that many Knowledge Seekers have experienced deep, deep self awareness and understanding that they probably didn't even know what it was. And then it just starts to open up like plasma does, you know, you get the first initial seed, you know, the first bit where you walk in through the door, or you experience it on the internet, you meet a Knowledge Seeker, the knowledge is shared, you know, you give them some of the knowledge, and then all of a sudden, it resonates so hard and so profoundly with the very essence of yourself that you just, you just want to know more. And then as soon as you want to know more, it opens up to you, and it becomes something much, much bigger.

So it starts off as it did for me, it started off with a just listening to Mr. Keshe and one of his teachings a long time ago. And the moment that the you know, the universal knowledge is portrayed to you, that field strength, then everything changes. And the knowledge, you know, when you share the knowledge, as Mr. Keshe does, the knowledge seems to talk directly to you. So when you receive the knowledge yourself, and then you share it once more, (1:22). it's the same feeling for the others that are coming forward. It touches them very deeply. When I was in the exhibition just the other day, I was speaking to some people and I just give them a little bit more knowledge of what I've come to understand. And you can see it in their eyes, you can see in their structure, the way that they respond to it. And you can see the, you know, this, the slight elevation, the, you know, the part of the enlightenment happen within the structure of them, you see in their eyes, and you can see when people have emotional imbalances that in the in the physical body, or in the emotional body.

And as soon as they walk, as I said, the walk in the door of the Centers and guided into the centers by their own Soul, they start to receive the balance and you can, it's a beautiful experience to see. And sometimes it's very subtle, very, very subtle. And, but you know, it's present. And other times, it's very, it's like, "bam," it's there. It's sort of like, you see it very physically. And I've experienced it many times where people get very emotional and some people like we all ?? they have different emotions and they will be very quiet and subdued and you wouldn't know but you sense it behind the structure, you sense that there's a big emotional change is happening.

So for me it's a constant evolution of sharing the knowledge and now we're coming to a position that Mr. Keshe has explained this morning, where, you know, it's the next stage. And I'd like to ask Mr. Keshe some questions about how it's really going to feel to transmute to how is man going to go through this emotional understanding to be able to comprehend, suddenly being in a different position with a different set of, even if it's the physical body, (1:24). like Mr. Keshe was speaking about, if you go into another body, how are we

going to feel about suddenly not, you know, not having, you know, the body that we're used to, and still feeling it's me, but in another environment, that we don't, we're not, we don't even know. So we don't, you know, we may land on, you know, in another position, even on planet Earth, we could land in another position that feels totally, for want of a better word, alien to us. However, we have to interact with it and we have to be part of it. And are we going to feel connected enough that we can emotionally be stable enough to interact in that environment and enjoy it, you know, and be enjoying in balance? How will that happen? So that would be one of my questions to Mr. Keshe when he comes back. Is there anything else you think I should explain, Rick? Or was that enough?

R: Well, there's the thing about the background image today, and of course, because we're broadcasting on YouTube, we have to be extremely careful of any testimonials of the medical kind, as you know, but you did give a very good testimonial in the public meeting for testimonials last Monday. And people can go to our Livestream channel, which I've put the, I've put the connection (link), that Livestream channel connection, to our chats here. And if you'd like to refer to a more detailed explanation by Dean, about the "Knee Gans." (1:26). But, perhaps you can, you know, say something about that Dean, that's not going to be impinging on our responsibilities, in terms of the medical, so called, medical misinformation. And just tell people that you had good results from using that product.

Q: Yeah, of course Rick. I will keep it in balance as we know we have to. So for me, I had a condition that I've experienced a long time ago where I used to play the game of soccer, football, as it's called in the UK and most parts of Europe. And it caused me where my knee had a condition where the fluid in the middle of the knee sort of more some part cartilage sort of "popped out" from experiencing this football game. And I never got it, I never got it medically looked at or anything, because I was very young and fit at the time. And I just went back to the, you know, my training schedules and just healed in that way, physically myself by just doing physical hard sports and activities. I went through a phase where as I've got older, it started to get, because I'm not obviously physically strong anymore, it started to cause me problems and started to, the structure of it started to, you know, I had a lot of pain when I was walking up and down stairs and other, you know, up and down mountains, I should say.

And so I mentioned this in the Foundation to Mr. Keshe with all his beauty, I said to him about it and then very shortly afterwards this Knee Gans came out. And I thank Mr. Keshe for that deeply. (1:28). And so I've used this Knee Gans and I used it according to the instructions and so what you see here is the Knee Gans on the right hand side. In the middle is the containment of the Gans itself and I've shaken this jar so you can just see some of the Gans just sort of fluttering down. And then on the left hand side, that brown bottle you see is actually the plasma water itself. And then you see the syringe and the bandage, the knee bandage that I would spray the knee bandage with some of the plasma water. And so I went through the procedure.

The procedure is very simple. you do a test first, where you would put a band, sorry, a "plaster" in the middle of your arm, opposite side to your elbow, the inside part of it. And you would just test it for 24 hours to make sure you don't get any reactions to the plasma. And then if that's okay, then according to the instructions, you mix up the Gans, shake it, let it settle to the bottom. So all that you see in the middle here would be floated all the way down to the bottom and it would be clear, like you see in the brown bottle. And then this brown bottle, the plasma water, you would then spray some different amounts of spray, creating a flow. So you may have two or three sprays on the front of the knee and one on the back of the knee. So you're creating a gradient. And then basically you keep doing this for seven days. And then after seven days, you assess what's taken place in the structure of your knee. And if you sense and feel that you need it once more, then you can reapply. So you wait seven days with no interactions, you're not using it at all. (1:30). And then you would

start to use it again for another seven days, spraying as you, once or twice a day, I would spray the bandage and then reapply it to the knee.

We say Knee Gans, but it's obviously for any joints. So it can be used across the body really. And I experienced many beautiful things. First of all, I experienced a connection, a reconnection of the neurological system. It seemed to me where when I first started using it within the very first couple of sprays, I think I went to bed that night and I felt a connection from my brain down the top of my neck, my back, that I knew was reconnecting the neural pathway from my brain to my knee, reconnecting it. And I think creating that flow again. And because that flow was connected, it meant that the knee then had a position to be able to start to re-grow and reposition itself using the Gans. And Mr. Keshe has made this specifically to help people and to help any, you know, creatures created and human beings to, you know, recondition something that's happened. It actually is there to, I don't want to go into medical terms, but it helps to rebalance the condition that you have and bring the ligaments and the tendons and cartilages back into balance.

And I personally have experienced that it has done this. It has taken a little bit longer than I would have liked, but this is because I had quite a severe thing that I'd left for quite a long time. One thing I did notice when I was using it as well, was I had like a sense of feeling of my knee getting bigger around the front to begin with. (1:32). And then it seemed to move around the knee. And then one time I remember feeling it on the back of my knee and I could feel the, you know the different areas of the knee responding. And it seemed to be readjusting, re-growing and reconditioning itself. And so this is probably two or three months ago now. And now my knee is, I wouldn't say it's 100%, but it's back to sort of 90 - 95%. And it means I can have an active life again and not be in pain when I just do the most simple things like walking up and down stairs, which is a massive thing, because this one technology alone that Mr. Keshe has released, if you multiply this, the amount of times somebody would strain themselves or hurt themselves or be in a position where, you know, they're in discomfort, then this opens up a huge, you know, this one product opens up a huge structure within the totality of positions on planet Earth with our physical bodies.

And so for me, it's a very, very important product that I know many people from the sports arenas, from lots of different positions. I mean, not just sports, I mean, just everyday physical life of many people that work very hard. have a repetitive problem or something they might do, then this would, I would suggest, would be a wonderful way of redressing and bring yourself back to balance. And it is a beautiful gift, a beautiful gift from Mr. Keshe to humanity. And as I said, this is just one, and it touches the full structure of humanity and all the creatures. (1:34). As I said, there's one product. You can then when we start looking into as Mr. Keshe said, 20 or 30,000 products, can you imagine the full spectrum of energies we're going to receive to bring back the balance of the physicality and emotional state that we all experience as Souls present on planet Earth and elsewhere. Is that good enough?

R: Thanks, Dean. That was more than enough, probably. But I gave a break for Mr. Keshe to do his thing there, too. So, thank you.

K- Yes, I am very busy in the back with a lot of things. Sorting a lot of things out. These kind of things, which we put out, and Dean speaks about, this is a wellness. We are not in a health business. This is what brings comfort. Don't forget these materials have all been, Gans's have been, received a certification. When we produced them, tested them in China, and it has a health certification for it. It's a normal Gans of materials, but in a specific way, which we have developed for these things.

And we are not in the health business. We are in the wellness, in feeling better. And as Dean said, he feels the emotion in his body before reaching the physical condition. There are a lot of people using in different ways. As I said, Keshe Foundation is entering a new, totally new environment of work. And in the recent past, we have tested a new dimension in the process of converting fields into energies, into matters, (1:36). and conversion of the matters in the new dimension work. into the structure of the body of man.

We had the pleasure in the past few days, as part of the same process, to see physically what we call, the helix structure of the amino acid (AA) in a very, very specific way. I set it up to see it. And when it was there, it was amazing. Where you see it in the matter of what we call, "visual structure." And we'll bring in new dimensions, new materials and products in the coming months, in two or three years.

We have merged the Keshe Foundation with one of the strongest nations on this planet as a collaboration with the nation. And we are set on course to bring huge changes. As one said very recently, the giants of power and science have finally met. And that'll bring the change. The trap we were set up by Europeans to keep the Keshe Foundation silent has failed drastically. And one of the most powerful nations on this planet has joined force with the Keshe Foundation to bring the technology, as its utmost to serve humanity. Knowledge in exchange for peace has taken shape. And this bottle is a small bottle. Compared to what is to come. And deeply involved. (1:38). And we have left it to the governments to announce the collaboration and extent of the collaboration between the two organizations.

.. It will be fundamental that technologies like this, so simple, can change people's life. Like Dean said, you cannot go up the stairs. And then you find out life has changed. The reason I released this wellness product was I got injured badly last year in a hiking accident ?? .. work. The doctors told me I need to replace my kneecap. The cartilage has totally gone. And on the MRI showed both legs were kneecaps, cartilages, and part of the knee itself, through this accident, has been damaged beyond and needs operation. I said to the doctors, I don't need it. I know how to repair it. And he said, when you've done it, come back. I couldn't go upstairs to the surgery to take pictures. I had to take ?? rest. Very painful.

And strange enough, on Sunday I was at the location and I was told that the electricity will be cut at 12 o'clock. And I was on the eighth floor. And I had to be outside. And I climbed the whole staircase, the whole eighth floor, round about 15 steps on each floor in one go, without any pain, without any actually thinking about it. And we see the change. (1:40). For me walking 100 meter was impossibilities for some time. And one of the Knowledge Seekers I said, when one of the teachings said, you, I felt you have a pain, there was a pain, and I said, yes it was. My cartilage doesn't need to be replaced, it's fully restored. And what you see in the bottle is what I used. And I thought the knowledge has to be shared. It's a kneecap operation, joint operation on the knee, because the MRI, we still have the MRI, we kept it for reference, shows totally there is no cartilage. And you cannot go up the stairs, eighth floor, at my age, in less than a minute or two, if you do not, and if you are not fit.

And this is how the knowledge is. I shared my technology (T) with all of you, like everything else. And, this is what it is. Many of you have tested it. There are different ways of doing, testing this, adding it. It's a wellness product. And this is exactly how it should be. Knowledge at the reach of man, at the point of demand. And I, many times, thought, I'll go back to the surgery in Vienna and tell the guy, "how many people would you like me to help?" (1:42). It's not a medicine, it conditions the environment in a ?? plaster of the fields. And I've seen the result. Don't forget, I originally used this in June of 2010 or 2011, when I fell off a horse. I rebuilt the whole structure of broken bones within 7 days. There is a lot of knowledge's which is to be shared, to be understood, to be in a way applied.

This technology creates condition, it's not healing, it's not medicine. And we've seen many people having used this different type of structures for this purpose. We have reached in the level of technology we have come to a point that ... (1:44). ?? today I have ?? very emergency things happening. Just please, one second.

R: Okay, bear with us a minute or two, while Mr. Keshe does his thing and reconnects in a minute.

Q: Rick ... one thing I forgot to mention, is Dean here again, is, what's beautiful about these products, about the... and I'm not, we're not trying to sell products, it's not about this, it's about the, the gift of creating fields, plasmatic fields, that bring, as Mr. Keshe said, wellness back to people. So you have here something that I know in this, in the matter state condition of this containment of this jar, this plastic container, a liquid plasma, you know, and Gans, gas in a Nano solid state. And you have the capability and what is the beauty, the real beauty of the knowledge is that you can share it. So physically, you can split this up and you can give it to other people, other creatures created to bring their structures and their emotions into balance. And for me, that is the real, the beauty of this knowledge. It is the fact that it can be shared, it's given and it's in the sheer power of this technology is in the fact that, (1:46). in that very small little bottle is a technology that is beyond what we've experienced before and can bring, as I said, a balance back to all sorts of conditions that we have. And the fact that we can share it with our loved ones, our friends and family, communities, nations, is the beauty of this technology. And that is, for me, that is the most incredible thing.

K- Thank you very much. And sorry, I'm back again. In the recent past days, we have tested, in a specific way, the fields interaction. That's part of a very large scale test. And again, this will come into (flourish) in the next few months. You will see it. Where we release another range of technological scientific materials which can help with daily life. Restoration of the energies in the body in a very, very specific way that will change a lot of things for many of us.

What we foresee in the next maybe 12 months, maybe 2 years, in collaboration with our new partners, where we enter feeding nations, (1:48). where we enter a cycle of wellness care for nations. For example, today you send food packages to disaster areas or for famine areas. I foresee next 5 years our partners will market, feeding a whole nation with the new technologies, emerging technologies, where we become responsible for feeding a nation. Technology has been tested, technology is available. But in that way we don't need to farm. In Africa, in third world nation, where food is one of the biggest problems for governments, will be resolved. Where through very much like what you see, we'll put that into reality of the delivering of the food through plasmatic conditions.

New plasma, a new definition in the world of plasma. It's matter of how we come to an agreement and in a way, it's not something new. You as Knowledge Seekers, we promoted a few months ago and it's still on the Keshe Foundation website, that you can join in a food contract where we feed you through the Keshe Foundation Apps for so much per family. Now this, or your wellness covered by this. (1:50). Now this with the new structure which is coming in the Keshe Foundation, makes us possible in collaboration with the governments we work with, to become nationwide. Which means for example, let's say, the nation of France accepts to feed nation citizens of, let's say, Algeria for 2,000 per head for a whole year, irrespective of position in Algeria. This technology now is available.

There is a reason we push this forward. And the reason for that is very simple. Technology is jumping in a very, very rapid way. The development of the Keshe Foundation technology is growing so rapid, that now it's possible, accepting in the next 5 years, for example, to feed a nation. You don't need to export rice and grain

and control the policy. You come to an agreement on a percentage of GDP to do this. Which means we take 2%, 3% of the GDP, whatever it is, whatever nation you are, and that becomes a payment for feeding the whole nation. And this ties up with the nation we have joined things to work, that we can do this.

This gives us a spare structure to learn more. Where a lot of problems with poverty brings a lot of diseases, malnourishment of the children, now we can cover. (1:52). And there's a lot of new breakthrough knowledge's and technologies, which we have started releasing. And we will carry on releasing this in the coming months and years with our new collaborators. We have signed agreements with the nation.

The Keshe Foundation has entered into full collaboration with one of the most powerful nations in writing, not in talk. We are in that process, to allow many, many, many positions to be cleared. The Wellness Center of the Keshe Foundation will be spread across this planet in a very specific way. We have allocated the first Wellness Center to work with the doctors, but has no operation within the Keshe Foundation. In the next couple of weeks, we'll announce the first Keshe Foundation Wellness Center set up and up and running. But you don't need to go to the Wellness Center. You can be anywhere around the world. We see the operation, the opening of the second Wellness Center in Arizona and Uruguay. Most probably in a very, very systematic way, we, in collaboration with our partners, we'll start the Service Centers like this. But Germany, Arizona, and Uruguay will become part of our best structure of the world by Christmas. Where, through Uruguay, we serve the southern hemisphere of the American continent. (1:54).

We need to understand that the separation will come in a very big way. We do not sell our systems, but we install with the doctors to operate for a nation, or for a place. The state of ??, we lost a lot of money. And that brought us to understand and open new collaborations. And those of you who invested with us, you know, most of you have received some of your money back already. And some will receive it back in the coming due course in the next few months. But it brought us what we wanted to do as a Foundation individually, in collaboration with the government. Which I always say, thanks God we lost the funds, because then we had to go through the whole process. Now we are not involved in that process, because we are just research developers. And the nation will do the rest.

And the nation we have signed an agreement and entered into work is one of the most powerful nations and the richest nations on this planet. The leadership of the nation have understood and backed us, tested us, tested the technology, and we keep out till they announce publicly about the Keshe Foundation technology as one of the prime works of the, what we call, the nation, as a new emerging science. It's a sadness to see so much work was done in Europe but in a way it built us up to what it should be and now the Keshe Foundation has entered a new era, that technologies like this will be available to every man, more or less, on this planet, because we don't have to worry about it.

Every product carries the name of the Keshe Foundation on it. It will not be something hidden behind somewhere, (1:56). from the gas production to oil production, comes to satellite space travel, food, agriculture, everything will carry the Keshe Foundation name on it. This is how they respected the technology is. Technology as our Knowledge Seekers develop, ?? we'll see and will come up into the structure to announce it on due course. But we still work and the Keshe Foundation team has not stopped working on this ground for past months.

Any other question?

Q: Good morning Rick, good morning Mr. Keshe, good morning everyone. Mr. Keshe, you, you talked a little bit, but, you know, I had, of course, Hassan said it's fake, but this is what I heard, that Elon Musk was talking about, they created AI that every single person can use that program to get funds everyday so you don't have to have jobs that you don't like, or don't have to be poor or don't have food or shelter. And it's 91% is accurate and you can do it. So my question is this, because I know in the past we always talked about how can we bring the plasma science, this technology to the society that we don't create more chaos and mayhem. (1:58). Say, when we talk about the energy field replacing oil, if we suddenly give everybody a generator or they have everything, we have so many people work in oil business, refineries, and so on and on and on. And then they lose job. So for example, in Middle East, so many people like Saudi Arabia, Kuwait, all those countries, people are going to be, we don't want to make people poor.

But then, with the advancement of plasma technology at the moment, it is 100% we know is possible if we create an App. There's one App for food. For example, when I touch the App, I say I want a banana. I feel the banana and I get the energy of it. And I don't have to eat the banana. Or for example, in terms of shelter, the shelter doesn't have, a home doesn't have to have a wall or a roof. Because we know with the plasma field, I can be on the mountain, someplace in anywhere and don't feel the wind, don't feel the cold or don't feel the heat and because I'm protected I have the shelter, it's a field. Just like the field we create that we can grow tomato or wheat in the middle of winter with the snow because we create like the dome. So we can have App for both. So if we have an App for both and people have it, so everything else is going to be resolved. Because when I have my food and shelter I don't need a job. So all the killing is going to stop and everything is going to be done. So why can't we do that?

K- Do what?

Q: Create this App.

K- We talked about these Apps will come, a few months ago. (2:00). But to structure it has taken a long time, and to structure it, come and take maybe a year or two. But there has to be a new approach, than to the App. We don't think about things on the basis of man on this planet. We are a space structure. So if you go back on the headphones and the new Combination Homes Units which we brought out. There is no App in it, there is no way you can App to it. The technology has developed, has gone further. If you're on planet Zeus, there is no Apps and no televisions and no computers that you can App it to feed yourself. But you carry the strength of the field of the human race or planet Earth. Or you see in the creature which is need of energy, you can transfer that to.

This "App business" we already passed by introduction of new technology. New technologies when will be released, has the combination of work. You can tap into it. This is part of the teaching. You don't need an App. You don't have a computer. You're in the middle of a desert. You lost your mobile phone. Sorry, you die. This is the present state of day today. (2:02). If you learn to tap into universal energy, if you learn to tap into energy centers, which is set up across we call it, Service Centers, you're fed. You have a headache...

Q: Mr. Keshe, I understand this.

K- These are what is the reality.

Q: Mr. Keshe, I understand this, as a Knowledge Seekers, we understand this. But one thing is, like right now at the present moment, there are people in the planet have been displaced or they have certain needs and stuff like this. So this App, it can be a transition for those people.

K- Yes, it can be a transition for those people, but this is what we said months ago. But the development is going to the next step. We showed and we have tested a lot of things in the background and it's getting developed to be tested. We don't set a system. I'm trying not to give too much, but at the same time trying to explain a lot. Just one second, please.

R: This seems to relate to Mark's question in the chat as well. He had the question, "would this product or technology be transferred into an application in the future?" (2:04). So, we seem to be getting an answer to your question there Mark.

Q: Yeah, you see Rick, because you see we understand, Mr. Keshe talk about we using the, because we start to recognize the field and not only we can use the energy of it as a food or traveling or transmutation or teleportation, but because we're not bound to this planet, we can go anywhere we want. But now, there are people that, you know, they don't have this knowledge. I was at the meeting yesterday, last night, it was a lecture, there were 10 doctors there. There was a lecture about implant and new technology in a implant. And then the doctor was from Italy and then describing how the implant can be done. When I was looking at it, all these doctors are so looking at it as such an advanced technology, when I looking at it, I mean I couldn't explain anything, but for me I was just like, I had, I was shivering my bone because all those metal and frame and everything in the mouth with everything. I mean, I feel I was like 200 years ahead of what they're talking about, but even if I want to explain to them what can happen in the future, what it entails, they wouldn't even understand it. So, there are these people, I mean, we have these people, and we have people who are suffering in terms of food and shelter, we have people who are doing crime because they don't have any means of support emotionally or physically. So, this transition can help them.

K- The transition can help, we can do a lot of things, a lot can be done. But, we can do it the old way or we can do it the newly developed. (2:06). I mean, we are not the end, we are not the answer to everything. We are even ourselves a transition, till, I'm sure, other people will come into it, and they do it bigger than this, better than this. But, the new structure of technology, allows us to upgrade in, we can do it by Apps, which will be done in the coming time. But we've gone a step further than that. And there is two ways to do it. To stick to what we've done, because it works, or to bring the new technology and add to it.

This is what you do. When you come tomorrow online, you bring us your Zoom number in. And then down, once we establish that, we connect to your Soul. That's all that's going to be done. So in the next sessions of Keshe Foundation development, we don't send you a Zoom number. We interact with you in a different way. But you receive much more, whatever information, be it wellness, be it hunger, or whatever, through the new lines of communication. If you are in the desert, you run out of battery, your App is good for nothing. But if you carry the new system, it never runs out of battery. It is connected to everything you need. (2:08).

We try to jump very fast. And I see this even in the past few weeks. It is a struggle for governments to understand the transition can cost a lot of money, can cost a lot of time. But if we don't pass this transition, if we jump the transition to a new level without the transition, we'll gain a lot. And in the next few months, this is part of what we have to convey and put into, especially in October meeting with the ambassadors in London. To show the transition is the... You see, it's very simple.

In America you use the most ?? , oldest system for your Internet. Because the cable was set 30 - 40 years ago, nobody knew these things (will) come out. But you still have to cover those costs. You're still behind Kenya and Africa in all sorts of things, in communication, computers, and the rest of it. Because they didn't have, they didn't spend on these infrastructures. So people financed it for themselves, and the government supported it through.

And we are trying to explain this to the governments, that we have to jump the transition. We have systems we can show you can jump to transition. And it costs nothing for governments. The beauty with this transition to a new science, governments don't like to spend money. But they like to earn money out of the science and technology, (2:10). but have control over it. And this new development gives them all of it.

So do we go to the Apps? We still go through the Zoom. But are we going to spend a lot of money on it, to develop it? Or we already know the next generation here. Cope with it till the next generation of science comes in, and it kicks in, and it's done. It is very much like the oil industry. We sell you the fuel to burn in your car, because if you don't do, it costs a lot of money to do it. Or we come up with the new tricks of electric cars. It's so advantageous to the refineries and to the oil companies. Unbelievable compared to the present cars. But are we going to the electric? In electric cars, which they need to be charged on the wall, or are we going electric cars, which never need to be charged? There's a lot of games played, even with this.

It's the same way we talk about feeding people. A lot of people, if you understand what electric cars means, if the present pattern is kept, it's a gift to the refineries, gifted to the oil companies. To produce electric power at the power stations we use the most crudest oil, cost nothing to refine. (2:12). We don't need to have petrol stations. We don't need to pay people to sell it. We don't need to transport it, and all sorts of mess. As a refiner, the biggest gift given to, is these electric cars, because we sell the oil of not clean, not clear to be burned into power stations. Governments are happy instead of paying 10 dollars a liter, of let's say a barrel, a gallon. They pay 1 dollar a gallon, but they charge you electricity at the end. It's a win and win for the government, oil companies, the electric cars.

But if you try now to bring the new technologies, which allows you to do 10,000 kilometers for one charge, governments will stop you. If you bring a car which doesn't need charging, there is no way they allow you to come, because they'll lose revenue. All this game you see with electric cars is one of the most profitable businesses for the governments. There is no environmental cleaning, car exhaust. The burning of the fuel in the power stations to produce your electricity is 100 times worse than your cars. Example, look at the ships and the amount of pollution they create. Governments don't care.

But if, as a scientist, you come up with a car which now, Tesla does 600 - 700 per cycle of charging, kilometers, if you bring this one to 10,000 kilometers, which the technology exists today, (2:14). the governments don't allow it to come in. Because they have not planned for the revenue from it to be less, unless they charge you the revenue, which gives you the 10,000, the same as you charge a 700. We are in the same position. Technologies, sciences, which the Keshe Foundation, I'm sure, many, many other scientific organization done, will not be allowed to come into the market so easily, because we shake the "apple cart."

If you took a bottle of the Knee Gans and you sprayed some water on your knee, as Dean says, it's changed his life 90%, 95%. Then what's going to happen to all the operating room? All the other things which they were supposed to, all the doctors we educated to do the knee operation. And all the incomes which brings with it. What about the pharmaceuticals, and the others who are going to look after you after your knee operation. If you spray our water, (it's) done. A life of pain away, no operation done.

The governments don't allow technology. We are now in a position, that we can eradicate a lot of problems health wise on the wellness. But it has to come in the right way. We can feed people. It has to come the right way. (2:16). And if I can tune, if you understand the gravity of what I'm going to state today, if you understand what I'm going to say, you understand how advanced we are.

If I can tune through the headphone to your Soul, to feed you, to change you, do you think we haven't reached a point of not needing the headphone and reach your Soul and feed it. Now you understand. But we have to get the governments to do it. And the best test of it is, let's do it in the space, because there is no food in space. We have to feed our astronauts, we have to feed our space people. Just flip the satellite 180 degrees, you feed the planet directly through the Soul.

It's not that we don't have the technology, it's not that we don't have the knowledge. It's if we release this technology, not if, it's already been released in past week, we have shown what, in past two weeks, we have shown the government, things that you cannot even imagine possible. It does not exist even in the sci-fi movies and in the imagination of the man today. They had to taste it, they had to touch it, they had to feel it, and even that has caused them more headache than where we are today. The leading scientists of a nation, the most powerful men of the nation, have stood in this environment, (2:18). and had to accept the technology is beyond even the knowledge of the man. They had to feel it. And even feeling it, they are baffled in how such a simple technology can create such a mayhem.

For me to feed the man it takes no time. I don't need no satellites or anything ?? But man has to understand it, that in the space can teach himself not to do what he's done on this planet. Most powerful man on this planet Earth are watching their eyes, the baffleness of what is happening around us, in past two weeks. What is next? We have the knowledge, we have the technology. But as I said, the political arena, the financial arena, the power point of arena of this planet, in past two weeks has changed. And, gradually will change a lot of things.

But we're in the space technology. Governments have to find a way that it becomes a human technology on Earth. I can cover myself with saying this is what we do in the space. But governments have to turn it for nationals and other governments to accept it. (2:20). We're so advanced in technology, it's beyond your imagination. And we don't talk we are, we have shown it.

Q: Mr. Keshe, I am thinking about all this, bring me back to another question I have is. You see, I started to teach the from beginning of the Knowledge Seeker number one. And we are right in the beginning. So when I listen to those, I wasn't a student there at that time. You were saying, "with the movement of my pen, I can make everything under the ?? surface talk. All your war mongering, all the killing, ?? everything."

<< audio breaks >>

K- We can't hear you.

Q: Can you hear me now?

K- Yeah.

Q: Okay, so my question is, why we so keen on attaching ourselves to the government and the government...

K- Let me, let me, let me tell you one thing Azarjan. We have moved our "pen." In past few days, we have released a "pen of knowledge" to the leaders of the world. Not by talk, by delivering of the technology and showing it. And, it takes time to go across to the other world leaders, (2:22). and go across to the understanding of the others, and the nationals, and then to the back of the African villages, and to the palaces of the kings. It's not that we haven't, we, as you say, you said, "I move my pen." My pen has moved in past few days. And there has been Knowledge Seekers witness to it. And the same with the world leaders. The Knowledge Seekers stood "shoulder to shoulder" with some of the most powerful man on this planet, to see the technology and its beauty.

And now it's in the hand of the leaders to understand it themselves. And then it takes time to think in how to implement it. And how to understand that the technology is not for the man on Earth, but it's for the "man in the space." When even we send you to another part of universe, you're still connected to Earth through the line of the fields of your birth. We still can feed you. Not food, and apple, and orange, but through the fields that you need to survive the span of the universe life.

We have shown one of the most powerful technologies ever existed to the world leaders in past few days. (2:24). And they are puzzled how this technology, like the cap you saw, the bottle you saw in simplicity, can change the course. We will use the London conference with the world ambassadors to bring in a massive change in the course of humanity. It's not just a simple presentation.

Q: Mr. Keshe, I have one last question. Say you left this planet and then, and maybe I die or leave this planet too, and then and if I bump into you, do I know you? Do I know, that I know you?

K- All your dream is how to bump into me somewhere. As a Soul we don't bump, we are aware of each other.

Q: We are aware of each other, but do I know, that I knew you on this planet?

K- Of course. Of course.

Q: Thank you Mr. Keshe.

K- Just be careful where you bump to, and who you bump in the Soul level. It could be much stronger fields and it can, you can end up in the other part of the Universe, ?? you know the bump will be ?? .

Q: Okay, thank you.

K- Thank you very much.

Keshe Foundation in structure will stay the same. But in operation and delivery of the technology, in the coming months will change drastically. (2:26). And one of the reasons we are moving totally out of Austria, is that we have moved into a new position with our collaborators which, through the strength of power, power of the political, and the financial, and military, and defense and the space, gives us the opportunity to open new doors and allows the nations to become more powerful, to be more peaceful. The gun policies of United States to be more, to sell more, to be more powerful in the arms. We have changed it to be much stronger in technology and sciences. That makes the arms of the United States obsolete.

The Iranian military forces have shown the power of this technology in defense, in January of 2020, in Iraq. Not to be aggressive, but to be defensive. To be in a way, to defend what was planned to deliver in a massive way. And it literally decentralized all the plans which Trump and his son-in-law planned in Tel Aviv for Iran.

And with it brought to show whatever was sold to Middle East, to the armed ?? militia countries as a defense against Iran, could not even defend the manufacturers and producers of defense, because ?? they couldn't defend themselves ??

Now we are entering the next phase, where with technology, we make everything obsolete of the past, in so many ways. Not only defense, space, not only space, the food, (2:28). the energy transfer, the health transfer. The same machine can feed billions of men on this planet. One machine. The same as the "Soul of the Creator" fed the whole universe.

So we have the knowledge on both sides. And now we have contemplated and we have come to an agreement with one of the most powerful nations on this planet, to bring that cycle in. But they need themselves to understand in a slow pace what is coming in. The "gun policy" to sell, to be, to create fear will be replaced with knowledge and technology, which brings comfort and peace and equality, not only on this planet. Then it goes back to the time when everything's peaceful, man will progress in knowledge and technology in a much, much more rapid way. That "heaven" which was promised has arrived. And we didn't need to do much, we just had to show the power of the technology, in its peacefulness and its beauty. And we have shown. It's now just getting slowly, next few months and years.

The rest of the world leaders on the same ?? ship as we call it, and ?? same soul. Making more aircraft carriers, making more nuclear weapons, making more weapons of mass destruction, has joined the, what I call, the time of the "bows and arrows" of the knowledge of today. (2:30). If you remember, when you go around Europe, and most of the places around the world, they used to dig trenches (and moats) around the castle, that no one can cross the water, and they could protect the castle. Till the first man came, first was the arrows, and then when a cannon came, and then when the planes came, these castles were nothing, became museum. The present nuclear war mongering and the systems, now has become those castles with all the, what we call, waters around them, obsolete, because you could cross it, you could bridge it. Now we can bridge that point.

Nuclear weapons have become obsolete, with what we have shown to the world, it is in past 7-10 days. All these aircraft carriers are good, for children to have holiday on and play with, on it. And it's for governments to start this ?? . And it's for governments to understand it. We've become very, very, what I call, outspoken about this. Because now we have started delivering technologies to a nation, to world leaders. That with it, they can see the changes they can bring in. Humanity is fed up of killing. Humanity is fed up of all this mess we created, as citizens. It is just a few people would like to be the leaders who create all the mess.

And with this new cycle, we take that out of their hand. (2:32). And in a way, we give it to the STM. Most of the world leaders suffer from all sorts of cancers, diseases, and they are like what we call, "Hollywood actors." They're pumped up, they're 80 years old, they make them up when they look 40, because 40 years ago they played in Western movie, which was very popular. People won't recognize their face compared to 40 years ago. It's the same with the world leaders. And now, they do anything to stay more in power, and be called, whatever. And with this technology, it does not exist anymore. We all become equal citizens and comfortable citizens.

But it takes time. And because the knowledge is transferred to scientists of a nation, will not be shelved. And in the peace conference of the world ambassadors in October in London, we will bring the shocking news and technologies, which none of you could imagine existed. We'll see. it's time to deliver the technologies, not to a few, but to all, but at the same time.

Any other question?

Q: Do we have so called, (2:34). "critical mass" in plasma technology like in nuclear field?

K- What do you mean by that?

R: Well I guess he's saying that...

K- We have "critical energy," ?? it's part of the... We have critical energies. But not critical mass.

R: Right. The critical mass in nuclear, as you know as an engineer, is the sort of a break even point where the...

K- I know nothing about it.

R: .. Things run away or whatever. But in plasma technology it's different. So, could you just explain that a little bit more, what you just said about that?

K- Critical mass, or whatever you call it, and when it runs away, we call it, "China Syndrome" in nuclear industry. Literally what we call, Fukushima, it was known as China Syndrome. In the energy, we don't have a critical point. In the energy of the plasma, everything finds balance. And if it reaches a point of not being holding the fields together, we reach a point of sharing and splitting. We call it, in a way, "fission."

So, critical mass to run away and create mayhem, does not exist in the world of plasma. (2:36). What we call, ?? "outer surface tension of the fields," cannot hold on with the inner gravitational field forces. Certain amount of gravitational field forces, take part in separation according to their strength, but they still carry the ?? outer strength level surface with them, which means they cannot enter each other.

In nuclear industry, as we know "China Syndrome," critical mass which, and then you go into overloading the energy, then the mass, going to China Syndrome is, it cannot happen in a plasma technology, impossibilities. And I know nothing about nuclear to start with, so it's much easy to understand the energy.

Any other question?

Q: .. Okay, hello Mr. Keshe, hello everybody.

K- Long time we haven't heard from you Mr. Mosfeq.

Q: Thank you. You just mentioned in response, what you mentioned in response to Azar's question, it kind of prompted me, I didn't want to ask this, but anyway I'll ask it and you may choose to comment on it. In the last few meetings in elevations of the children and the... those who are, you know, (2:38). abusers of the children. I participated in those meetings intentionally without any devices. I did not feel any difference compared to whether when I connected with the device. Of course, I didn't hear the actual voice instructions, but I felt things, and it was somewhat clear, I may not be perfect in it, but it did, something came through. And, would you like to comment a little bit on it? Perhaps it's my ?? descent enchantment with the...

K- Tell me how you connected?

Q: Directly through my Soul.

K- How did you, how did you connect?

Q: Essentially what I did is...

K- Yeah, but I mean, you didn't come through the Zoom?

Q: No, I didn't come through the Zoom. I just, through my Soul. I essentially tried to recreate, you know, there is a sensation one feels, once the connection happens. This is how I have been doing it. So I essentially lowered the field of the blood flow, and I feel something different when it happens, and then I connected with the system. And I feel certain something some other feelings and this is how I connected. It was very distinct sensation and, anyway so this is how I did it. And in any case um yeah, I'm not you know, I like this because it seemed to work. I mean, maybe it may not have been perfect, but it did. I mean, at least to me. And I just wanted to hear your comment on it. As I said, you know, I have enough of these digital computers. (2:40). But anyway.

K- It's not... If you have managed to link up to that level, you don't need it. The Martians and the people on planet Zeus receive the information and the knowledge the same as you do with the headphones and your telephones. There is no need for what we recently brought up as computers and communication systems we are aware of today.

If you have reached that level of maturity in the level of the Soul, you can quite easily bypass our, or even the systems, and reach the Soul of the abusers. There's no exclusivity.

Q: This is something else, in addition to what I just asked you. And I have tried that as well. And, and there is a feedback I get, when I do it. And this...

K- Can I ask you something? ...

Q: Yes.

K- Did you reach our system or did you reach what was the feeling? You reached our system?

Q: First, I mean I've done two experiments. One is...

K- You felt that you were in communication with the system that...

Q: Yes, that's the first one I did. And then I did the second one, which is whether I can do it directly. And actually I came in contact with a specific Soul. (2:42). When I was doing it for the children, and that's your son. You know what I mean. So it is something definite that comes through for me. I mean, I maybe there might be some errors here and there. And maybe I may get distracted in things at times. But things do come through and that's my feeling of course. It's a feeling and I don't know it beyond that I can .. it's difficult to talk about these things. But I'm just saying what my experience has been.

K- Yeah, but you don't... this is what I was saying earlier on. You do not need the system, but the system is a tool for you to know what to do. And as we go deeper and deeper in teachings, many of the teachings will become a silent time, than the voice time. Very much the way you have it during the sessions. During the sessions there is no talk. I mean if we instruct something we want to do, yes, but in general there is no, nobody talks except you listen, you hear, you receive the energy from a system, which is set in a specific way...

R: Even the talk is very minimal when you do that and most of the verbal that we hear is just the translation of that initial sentence or two that you say, (2:44). and it has to be translated into several languages and that takes time otherwise it's quiet time. And it's very, very bizarre, because you're using Zoom which is known as for social media, for videos, audio, visual and so on. And, we tune in to Zoom with no visual and no audio basically, to be quiet. And, but yet the microphone has to remain on. So, it's a very unique situation and forces everyone to go into a particular position that they don't normally do when we're on social media. Social media is normally about talking and interacting and all of that "busyness," with our busy brain and so

many things to think about and do as humans. But then in this, in this program it's a different situation. Everyone is quiet, but yet together. It's very, it's a beautiful approach and I thank you Mr. Keshe for coming up with that. And it's, it's great.

K- It's something which we, in a way, allow the expansion of the Soul. And this is what it is, when you expand your Soul. Once you learn to link, you don't need the intermediaries. And the more you link, the more you learn, the more access you receive. And this is the whole object of these teachings. (2:46). And in the future, many of you will, will do that automatically. It's just I have to show you how to get to the uncle's house. And once you learn the way, you go to the uncle's house, you don't need me to show you.

Any other question?

Q: ... Because recently, a very famous music star had suicide because of her depression. So our Chinese team has somebody asking, what's the reason to cause depression, and how to handle it?

K- Many reasons for depression. Many, many, many, many reasons for depression. And 99% of it, we bring it on ourselves. It's that we cannot achieve. This expectation could be communication, could be material, could be anything that we cannot reach. And we see ourselves as a failure, and man does not like failure. (2:48). And depression ...

When you speak for like a musician, a singer, we've seen this in very big numbers compared to in past 10 years, compared to before. The musicians expect to sell 100 million, but they don't sell, they sell 50 million. They don't look that they reached 50 million. But on the other hand, they see themselves as a failure. But their social life is not what we see outside.

Depression has many reasons, but primarily it's a change in the level of certain fields, which does not reach. Our team of doctors work on this quite a lot in the past recent months. But with the new technologies even what we use now, it's become obsolete. We can find the strength of the fields of the emotion of depression and feel it, that it become the strength.

But generally, depression comes from not receiving what you're expecting and not achieving what you wanted, and seeing yourself as a failure, and then it leads up one to another. Not being satisfied with, with what we call, (2:50). with life in the dimension of emotion. Which triggers by the physicality. It could be a word, which we like. Not having, it usually comes from shortage or loss << audio breaks >>.

It's very easy to process with the new technology. Very easy. And you have to feel what it is and how you can reach to add to the strength of it.

Any other question?

Q: ... Good morning, thank you very much. I would like to make this question to Professor Keshe. How to make a water Gans for world peace? << audio breaks >>. How to make a water Gans for world peace ?? spray to president Biden and Pentagon to gain peace with Russia? (2:52). Thank you.

R: You mean spray, not spry, I think.

Q: Spray, right.

K- Can you repeat Rick?

R: Well he put the question in the chat here, "how to do a water Gans for world peace to spray to president Biden to gain peace?" How do we spray President Biden and for all of the peace on the planet? Maybe, you know...

K- The thing is, he's just a "puppet," as we call it. You have to spray it over those who are the instigator of it. The people who make money out of war. You can wash it with a Gans water of peace ... It's impossibilities, because these people are just a voice box, especially in United States, for the people who pay them to be there. You got to reach the Soul of these people, not the water to wash them. See he's Italian, he still thinks of baptizing. And these people cannot, (2:54). or it is of the Christian mentality, we cannot, these people have to be elevated through the Soul.

Any other question?

K- ... Can we finish in about 15 minutes please?

R: Sure.

Q: Just to give you a proposal, to make a proposal, regarding our television, could be in a pod cast manner? What do you think? Because I am always thinking about our project. And I feel not so well because we didn't achieve yet to do this. And I am just thinking to solutions. Thank you. It's easier way to teach...

K- I don't understand what solution you're trying to find for what?

Q: For television. Television by pod cast.

K- The television .. and the rest of it, it does not work if they don't allow you to spread the knowledge. Or with the pod cast. This is one of the biggest problems which needs to be solved in different ways. I think in next few months you will see Keshe Foundation becomes fashionable. And all televisions and all the stations would like to speak about the technology in one way or another. We are reaching that point. We'll become our scientific work, (2:56). our peace work, our Soul work, will become very fashionable. And that's the time when we should ?? not lose track. And we need to reach masses and not a few. You got to remember, television and pod cast nowadays don't carry that much weight, not many people spend watching. The only majority of the old people watch television, television has become a thing of the past. The young generation does not have much time to sit in front of the TV, unless it's a beautiful football game, or another match or something.

The science of new communication has changed. And we have to reach those through the new sciences, new ways of communication. And it needs to be done by governments, that they have to, they can stand the, what you call, the abuses of the power of organizations.

Any other question?

We'll close in... after this question we can... ??

Q: Mr. Keshe, it's Dean here, may I ask a quick question Mr. Keshe?

K- It's been three hours now. Yes, yes, go ahead.

Q: Thank you Mr. Keshe. So you'd mentioned something very, very important just then. How do we reach the Soul of somebody to elevate them, who is creating a condition that's affecting many others, that we do not know who the Soul is, that's doing this. How would we reach that Soul, to be able to bring peace to their emotions?

K- Reach the Soul of the others, that they know how to reach. Find a friend who's got the telephone number, but in the Soul level. (2:58).

Q: Okay, thank you Mr. Keshe.

K- Many of you, many of you reached the elevation of Soul of the world leaders. And it has worked, you will see it.

Q: You just said that the world leaders are not the ones, it's there's others behind this. So, it's reaching the Soul of the... the seed...

K- You reach them, they got to... listen. If you reach them, if you reach the Soul of the world leaders, they already got to become world leaders by reaching, or being in reach of those Souls who reached them, their abusers, or the power players ?? If you understand what I'm talking about.

Q: I think partly Mr. Keshe, thank you.

K- Through the Soul ,we brought them to that point. It's the easiest way.

Thank you very much for today. I have to leave. It's over 3 hours. And we try to be very, very, what you call, upfront and open about the things. As usual, Keshe Foundation has been and we keep to that manner. But we don't expect, but we were working on a massive changes for the Keshe Foundation. Those who are close to us and work with us are aware of it, and we will not stop till that point reaches. And that needs a lot of support from a lot of you. You supported us financially and we worked very hard to bring things in past 10 years, 15 years, you've been there with us. Now we need the support of the Soul because then we have reached what we came here for, to bring the change. (3:00). And in past couple of weeks we see huge hope for that change to come. And we hope our hope becomes reality in a very short time. Thank you very much for today. Thank you very much Rick.

R: One last question Mr. Keshe. Do the sessions tomorrow start at, there's people are asking, do the sessions tomorrow start at 12 noon like previous?

K- At 12 ...

R: Sorry, you broke up there. Sorry, we can't hear you Mr. Keshe. He's gone totally. I think he was about to say 12 noon. And he's just cut out, I think things are happening there. Okay, I believe that's what it is.

494 KSW July 13, 2023

END

495th Knowledge Seekers Workshop July 20 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

China is partner to KF and will commercialize all products with KF name on it; Back KF with billions; KF part of Chinese structure for science & T; Mr. Keshe moves to China; Materials production shown in China - Energy to Matter; T release through Silk Road Policy; Chinese Army to become Peace Army; No space suits - free in Space; Mutate P before depart; Conferences; Detection of plasma - separate from matter; Nuclear warheads to gas - harmless; Water H & O both gas and Gans; New EU for Wellness shown; P blocked by emotions; Dr. Bararpour Soul still serving; Not weaken Soul - transfer; Plasma Gans of body already expanded over P; Good life in China - peaceful nation; Media lies about China; China will bring peace to world through T

(:17).

K- Yes, good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers Workshops of Keshe Foundation Spaceship Institute. We welcome you back. And, we hope, as usual, we share more knowledge with each other, and we learn from each other, as you're all Knowledge Seekers (KS) of the universe (U).

As usual, before we start the sessions today, there are a few announcements we have to make, that, it makes it easy for a lot of us to understand, some parts of the work of the Keshe Foundation. First of all, (:18). if you go back onto the Keshe Foundation website store, you will see most of the products of the Keshe Foundation has been reduced to "buy one, get one free," and the shipping cost on top. The reason for this is, as we said, we're closing our operation in Europe. And, as we have signed with our new partners, as we've said before, they'll takeover in management and the promotion of the Keshe Foundation products worldwide. And in the next 2 or 3 years we'll see at least 10, 20, 30,000 new products in the market, in the name of the Keshe Foundation, in the name of the Keshe products. We have to clear our stock, what is originally ours. And we go to that, or we start that path.

And, as we said, we are shutting down a lot of operations in Central Europe. And, we become part of the Chinese National operation. We have joined forces with Chinese government. And, we become international organization. The details of the joint venture has been signed last May. So, for the first time we announce, Keshe Foundation moves its formal operation to the Chinese central government's operation. And, we have received a massive backing. And the new developments will come out of China Keshe Foundation. We thank Chinese leadership in recognizing the power of this technology (T). Many of our work has been centralized in China, past few months, since opening of the Corona, and you will see products from Keshe Foundation from China, but with a quality of the Western quality standard. (:20).

In that process, whatever you have in the packages of the Keshe Foundation left, is there at prices, and the products will change to one, next six months, a year, to totally different way. Promotion and sale is out of our hand, we're a scientific support and development. So if you go on the Keshe Foundation website you will see products reduced for half price, or get one, get one free. And it will be actually sentimental things because that's the last time Keshe Foundation, as independent organization, puts products in the market. We're

committed into Chinese government structure of signing contract, that internally within China and externally outside China, all operations will be handled by the Chinese structure.

So, you will see us in, what we call, health, material, space. We are all tied up with Chinese central government and structure. This will bring us to where we wanted to be. To push the technology beyond barriers. To push the technology in where we want it to be. And, in a way, thanks to the work of our Knowledge Seekers in China, we have achieved, we have brought the technology to that level. And as I said, we thank the Chinese leadership, his Excellency President Xi of China, in realizing the value of the new technology. And allowing us to become part of the Chinese structure of science and technology.

You will see evolution and changes in our work. In a way that would have taken us 30, 40 years to achieve, will emerge in the coming months and years. So the teaching will carry on, as part of our agreement, our teaching will not stop. (:22). The sharing of the knowledge will not stop, but the high level technology techs, in space, defense and others, will be collaborated and agreed by the Chinese authorities, before we publish.

In a way, there is no strangle, but it gives us a freedom to do what we do. Our research centers will move into the central Chinese government hand, which means Keshe Foundation will do research with Chinese and the rest of the world scientists. The operation of the space technology, the operation of the medical and everything else. Now, we are a joint partner, signed and sealed with the Chinese central government. We are not going in partnership with the Chinese organization, but we are hand in hand in China, to spread the technology very rapidly.

We have done many years of tests, we have done many years of research, with the Chinese, with the help of our Knowledge Seekers. And now, we have become part of the Chinese central government, to structure science and technology. And we've been backed by massive financial support, by the management of the Keshe Foundation in commercialization, not in the scientific side, is not with us anymore. So, what you see on the shops, is the last time you buy a Keshe Foundation product. Which is done by Keshe Foundation. Even though the new products will be designed, will be evolved through the knowledge of the Knowledge Seekers worldwide. We invite many of you in the coming times, to join us in our research centers in China, as a joint venture international organization, even though the Chinese operation is belong, operates, and will be through Chinese government. (:24).

But our announcement is very simple. We have organized for number of you, which you have paid, to meet with us, end of August. The city chosen is City of Manchester in United Kingdom. The session will start at 9 o'clock on Monday the 29th, in the City of Manchester. There is around 20, 25 of you who have registered, or if you want still to join, we can add to it. Those of you who join these sessions, will go through the, what we call, flight test systems. Which means, we bring you to the first cycle of testing, and evaluation, and evolving into the space flight.

Some of you will test the new Flight Headsets. And then from it we learn to add, and will become part of the structure of the, what we call, the next step in the space technology. All the data gathered, and all the information given to you, as the Knowledge Seekers in this group, will be taken into October, November session in London. The Ambassadorial Meeting in London will come at the weekend of the next session in London. We had to move the London Ambassadorial Meeting to the first week of November, instead of the last week of October, as Keshe Foundation has to be presented in one of the major conferences in health in China, by the invitation of Chinese government, as a new health technology to be introduced. (:26).

As I said, we become part of the Chinese structure of the work, and our association group of national organizations, they want to introduce us, technology of the Keshe Foundation in health, as a world health, which become part of, in a conference in Macau, on the last week of October. So, to respect the request of our partners, we have moved the conference of the London ambassadors to first week of November. In the end of the first week of the November, and the week before, the five days before that weekend, we will have the Knowledge Seekers, who will be part of the 200 in London to meet. And then we go into the weekend session of those who will join us in London, ambassadorial meeting and you will rub shoulder with diplomats and ambassadors. And as now we become part of the national organization you will see the invitation will come not directly from the Keshe Foundation, but many nations. Iranian ambassador, Chinese officials, Russian officials will be joining this meeting.

This is important to bring the new technology forward. And this is important for us to change the course. In this process we will bring a lot of changes. A lot of people in the background, especially Wang Ling, the Chinese management team of the Keshe Foundation in China, have worked relentlessly in past few weeks, to make sure everything is set. And we thank all of them. We thank the Austrian team, who's relentlessly has made sure everything is positioned as the Chinese tested, we could deliver technologies that they could see and brought us to this position. (:28).

So, those of you who are meeting us on the 29th of, what we call, August, for a week meeting in city of Manchester, Then we meet in the first week of November, at the weekend of the first week, we meet as ambassadorial meeting, and then we see the opening of the Keshe Foundation international, some of the major scientific breakthroughs, backed by one of the most powerful nations in the world. We are not talking this might happen, we have signed and sealed the agreement with the Chinese authorities in May of this year. And it's complete. And now we're in the process of the transition of handover. And as you've seen, the operation in Europe is coming to an end. Linz Center will close. We had the last people being at the Center two days ago.

We have a news for you. We have moved the operation of the Wellness of the Keshe Foundation as a server operation, this week, to a new location. And what we promised you, that the server position for travel, for space, for Wellness, now is officially taken place in location, that we'll give you the pictures today. We are very open about it, because now we can show that this technology will evolve into. We show the works of it, most probably in the October presentation in Macau, that you will see evolution in the world of Health and Wellness. We are preparing everything to bring hand in hand with our partners of Chinese central government, the breakthrough in science and technology.

As part of this work, in the past weeks, we have delivered one of the most major, powerful, scientific breakthrough, (:30). to convert energy into matter. And we have managed to produce 20 plus elements. For it, confirmed by independent laboratories of the Chinese government. That the science breakthrough has come through, showing that for the first time, we can convert energy to mass. And this was to be watched. It was monitored, the whole operation, by Chinese military headquarters, head officers, that there is no interaction, physically by Keshe Foundation, except placing, developing and showing that, literally the sky rained with material.

So, this brings a new breakthrough for the Keshe Foundation and the worlds of space technology. Now we can control what materials we get to space. It shows what we can produce in space without depending on Earth. This is where we'll see Chinese space technology will take a leap from what we call, 'evolution in science', and we'll see the change in space technology in the coming months. Which means, we can produce

energies, that can be converted into matter, and the matter can physically be checked, and then be quantified, and then bring its analysis.

We have produced composite materials, which is something which is done in the creation. Like alloys, like creation of ferrous and non-ferrous, metallic and non-metallic material together, which allows us to create life in the space. It allows us to create muscles, it allows us to create heart tissues on this planet. Where we can literally replicate in the body of the man during his own life, repairs. (:32). If you had an accident, a knife, something goes through your body to your heart, you don't need to repair the part, you can literally rebuild it, while it's in the system. And now that we have moved our Wellness center out of the possession of the Austria and into a new location...

<< audio of Mr. Keshe breaks >> ...

K- ... Okay, you have to understand a lot of things in the background is trying to stop the information and the knowledge to be transferred.

So, with the new Wellness Center, in location, the server centers of Europe, South America, and Arizona will come into operation in the next few months. Which means, you do not need to travel anywhere to change the condition. And, will bring a new dimension to our work. Still, info@keshe.foundation, health@keshefoundation (health@spaceshipinstitute.org). You can contact the Wellness Centers through us, (:34). that we can help you to do what you like to do. This brings us a lot of credibility, this brings us a lot of change. And, thanks to our team, the new Wellness Center, now is operational as of today, it was completed last night.

So, we have done a lot of work, we have brought a lot of changes. And now, we are part of the international, national organization, which will go through the next step. The confirmation of the production of the materials, composite materials, will be done with British Nuclear Fuel, in UK, during the conference we have in Manchester. British nuclear fuel headquarters is at ?? Riseley, which is not very far from Manchester and where I used to work. So, we have set up a structure with British Nuclear Fuel, to test independently conversion of the energy to mass.

At the same time, we'll do the same systems in Washington and in NASA headquarters in Miami. Which means at the same time, three centers will confirm the finding and operation and testing of the material conversion, to confirm the correctness of the tests in China, done by Chinese government. With this brings a new change, new dimension into our work. It will bring a lot of understanding. We did this test in a environment that was set for a specific job before. The way we used to do. And we confirmed, we can even add to our tests, show what are the reserves, what other materials are within the structure of this area.

This is another way, that when we actually, when we arrive on Mars, we can say what product, what materials is within it. (:36). We don't need to drill hole, we don't need to go and excavate, we don't need to mine. By putting the new technology on the surface, we can see what are the ?? night, what are the reserves of the planet, what the planet is made of. We don't need the probes and drill holes. With this technology, as we stay longer on the surface, we can go deeper in the surface and find out the inner minerals of the, what we call, the planet.

Can we survive? Can we take the shape of man? At what center? At how much depth? At what height? What will be the condition of life which matches near our life? Colonization becomes secure. These will be done

with the Chinese national government space organizations. Achieve it, traveling to Mars and Moon and the rest, will come into operation in the next few months and few years. Now that we don't have to have the financial worries, we don't have to do ... What I did for 20 years, back in the Keshe Foundation, and running into bandits and criminals, that they tried to defraud us. Now, Keshe Foundation and Knowledge Seekers, we concentrate on delivering the new technology. That's all our job is, and we leave it to the most powerful nation on this planet. With the correct conduct, with the peace in mind, we have signed ourselves to technology in exchange for peace with the Chinese government. (silence)

This was my dream (emotional). (:38). And now we've achieved it. With Chinese government, we deliver "technology in exchange for peace," for every nation which signed for "One Belt, One Road." The "Silk Road Policy" will become a peace policy in conjunction with the work of the Keshe Foundation.

I'm trying to choose words which explain what we came here for. And we have achieved it. The Chinese leadership has signed themselves to use the technology for development of peace, and end to the "Gun Policy." And this is the reason we signed agreement with the Chinese.

In the coming weeks and months, we will sign this ?? for the nuclear bombs. In a way we show them, with the new technology, there is no need of weapon technology. And thanks to you Knowledge Seekers for so many years, backing us, has brought us to this point. And, in so many ways, I thank the Chinese leadership, and Chinese military officers, who worked with us, and are working for us to bring that change. (:40). A force, a military force, which is now working with us, to create the condition scientifically, to push armies to the "peace armies." And it's beautiful to see how our team works with high ranking military officers, hand in hand, to do, to show the technology and leave it to them to bring the next step in.

It's taken a long time. And in a way, the way I see it, in what we have signed ourselves to, we have made a "peace army" out of Chinese army. In the coming times, as the technology shows its power, to be able to make redundant development technology of the past. The arms race, more or less with signing agreement with the Chinese government, has come to an end. There is no race, as the technology is so powerful, that makes the nuclear, supersonic rockets, and the rest of it, a "toy in the hand of a child."

We kept silence for past few months, and we kept on informing you, we have achieved agreement. And now, with what we have in hand, and the commitments I've made, to the Chinese government, we'll work to bring that peace forward. Chinese government has committed itself to billions of dollars of investment, in Keshe Foundation and its technologies. And, all will be monitor by the heads of the nation, and not in the hand of the ?? bottom line. You will see massive factories getting set up, producing products which bring China prosperity, and brings fairness in wealth of the nation, to give to the poor people what they could not have.

And I thank our team in Austria, who's backed us solidly, through all this troubled time. (:42). And, as I said, maybe losing so much to the, what I call, "bandits of the Western World," it pushed us to do what we wanted to do, raising funds to bring peace through the powerful nation of China.

Today's teaching, to me, is confirming what we've worked for, for some 40 years, to exchange knowledge for peace. And I see the beginning of everything which President Xi of China set out, as a "Silk Road" to a "Peace Road," in the coming weeks and months. We exchange with nations, the technology of health, feeding a nation, in exchange for peace, with the power of Chinese government. We deliver technology step by step and the nations who are third world to us, become equal to us in coming months and years. As the Silk Road

policy of "One Road, One Belt," will change to the policy of peace, that Chinese will take leadership in changing and bringing peace.

We deliver to nations through "One Belt, One Road," the health, the feeding, the change in evolution of technology, and getting commitment from the world peace policy. Dismantling the armies and joining "one army" of the science and technology with the power of the Chinese government.

It's taken us and the Chinese team, six, seven years in China, relentlessly, traveling, showing, experimenting. And now, we are ready to go. And I thank again, Chinese team, the Austrian team, and the rest of Knowledge Seekers, who allowed us to achieve this point. (:44). You will see, as I said, it's the last time you buy Keshe Foundation products from Keshe Foundation. We would not do this, if we would not at this point. And our operations in Europe cease to exist in the next few weeks, as we transfer everything into China, and from China back to the rest of the world.

Now you understand why the Intro today was chosen this way. And everything with Chinese is perfection, it has to be checked, it has to be done. It has to be correct, and then we deliver. It's taken years to get to this point, and it's taken years of hard work, and sharing knowledge openly, that it has brought us to this position. And as I said, my vision was knowledge in exchange for peace. And I have found the partners that us as Knowledge Seekers can be proud. We exchange knowledge with the Chinese government to bring peace to the rest of the world. And we respect and honor Chinese signature to the document.

The teaching of today comes in another way. We always spoke about the travel, we spoke about the Soul. We spoke about how we can transfer energies. What we have seen in the test in past few weeks, with our Chinese counterparts, is brought in a very deep science of Creation. ?? our physicality in arriving in a new position will change. (:46). How do we change the environment to fit us? In tests we have seen how we can, by changing environment, change for example, Copper to Zinc. Even though the behavior is a Copper, but to exist in the new environment, will take ?? properties of Zinc for example, which can live in this environment.

This is important, that we understand in transmutation, for example, our muscles as Copper (Cu) based, will change to Zinc (Zn) base, but the life will still, will carry on in the new dimension. The life will step forward in that dimension. The life will become in a way still in physical dimension but in another order. What it means, if for example we change the gravitational magnetic (GM) field of an environment, then we see even ourselves as different creatures on this planet.

It means if we change the Inertia strength, in a given matter state, and in a given gravitational magnetic field, we will see mutation. We are actually traveling the space. (:48). And when we reach this point, when we reach this level of knowledge, we can travel to the point of destination, but already mutating at the point of departure. That when we arrive, we do not need to adjust. In a way, if you look at it, we put a spacesuit (on) already on Earth, before we travel to Mars. This gives us a dimension of understanding the mutation of the element as an energy.

When we monitored the production of the, what we call, materials in our tests, we noticed in a different way, in different compositions, how fields interact. Part of this (will) ?? made in the future, when we come to an agreement with our group, we will release these videos, because at the moment are property of the Chinese military. We will show and you will see how the structure will change by properties of the fields. This will allow us to transmute instantaneously. Then, the time of travel in a deep space, is the time of thinking. When

you think, you'll transmute. On Earth, you (will) have already start(ed) life, of the point of destination. This will change and brings new dimensions in the space technology. (:50).

In a way, we change, we guarantee life in the dimension (D) of physicality at point of arrival. Not arriving with the uncertainty that how we arrive and what will be the change. In a way, it's like going to a shop and buying a dress. You don't get the dress as you arrive at the party, you can test the dress in the shop. Does it suit? Am I happy with it? Can I live with this suit? Maybe 20 arms and 30 legs. The Soul of the Physicality (STP) will accept the change. and then the Soul of the Man (STM) will go through the transition of the change at the point of arrival. This is the change, this is a huge understanding in science and technology.

This is a huge change in how we'll come to travel the depth of the space. We don't need no more "monkey suits." We don't need no more, what I call, conversion and dressing ourselves up and become prisoners. If you look at the space technology of today, be it the Chinese space agency, be it NASA, they don't give us freedom. We go into a "monkey suit," and when we arrive, we're still in the monkey suit. You cannot hug your partner and feel the emotion, and have the love in a space suit. We cannot live that life. We cannot travel the span of universe with the monkey clothing, (:52). with space suits. We have to become to suit the space. Which means when we arrive, we are part of the environment and we are not outsiders.

And with the test we've done in the past few weeks, a lot of this has become clear. You've got to understand, when I stand with the test and watch the test, people look at the material condition, what is produced, how it's produced. I look at the field transition, transmutation. As one of our colleagues during the test said, "just in the room rains with everything." Is not anymore at the point, the source. Literally, the whole environment. Even the observation of our team, in development, was outside the building they could see the rain. It wasn't confined to the space lab, where we were testing. Which means we have managed to cross matter state. Which means there is no barrier, the glass, the brick wall, has no meaning anymore. Which means we can go through the dimension of space, with the strength of the man, as the STM.

The observation we had in the past weeks of testing, with our colleagues, with the Chinese officials and the military, it's brought closer for us to bring the reality of the space travel to the time, the place and the position of the departure. How these fields will interact with us?

We see a new dimension in the Health. (:54). We see a new dimension, using these fields to expand the Soul, beyond and within. What this means, now you expand your Soul to the point. Now you can expand your Soul into a plasma, in the dimension of the universe (U). The longer we run these systems, the longer we extend the fields of these systems, the further in U we can travel. At the moment, we put fuel in our rockets and we can go 200 kilometers up. We can fuel our rockets and go far enough that we can use other rockets to go to the Moon. The new science, the new understanding, the new technology, is by the expansion of the sphere of the fields, beyond the solar system, beyond the galaxy. And as we are within it, we can travel any point in it. Which means, instantaneous, zero time transmission.

We try to set this up, for the meeting of Manchester. That some of you will taste, will see, you'll feel this change. Transmutation through the Soul. Transmutation through understanding of everything else. Don't forget, when you join us in Manchester, you are part of teaching, while you are learning from me. You become our "guinea pigs," as much as we become your knowledge of destination. How much you will learn, most of you which attend the conference in London and in Manchester, your life will change. In a way, you come to understand different dimension, different understanding. (:56).

And then the final session of the 65 will take place in the city of Beijing, China, in December of this year. That 65 will be trained to become the first cycle of the passengers. We'll have many Chinese citizens as part of the 65, without a doubt, as we are centralized in Beijing. Then we'll start the transmutation, what we call, the "transition time." And hopefully, by December, we will see the first two space people (a couple), Russian and German, to take flight. And we'll go into the next step with the rest.

In all the meetings of the 25, the 200 and 65, the couple, the Russian and the German, will all be part of the 25. That they go through the transition. That they go through understanding, that we make them ready as the first people to take transmutation in the dimension of space and time. We will come to understand more. We will come to see more.

And in a way, we increase the dimension of the plasma, maybe to the size of the universe over years. It needs time to grow. It needs time to link up. It needs time to come in. And in that process, the Soul of child of Mitra will be within it to create a new source, to the new race. And she has been in it from the beginning of the trials.

In so many ways, we'll bring a new dimension. We bring within us the new expansion in the science of space and technology. (:58). In a way, financial strength is irrelevant as only "man made." Weakness of the health of the man is irrelevant, because it's only entangled with the physicality of the man. We don't get the sick Souls, we get different strength of Souls. And in that process, we go to the next step.

It'll be interesting, how many of you, when you attend the conference in Beijing, will be speaking Chinese fluently, without you knowing. It'll be interesting to see how the peace process, from November to end of December, will change governmental policies around the world. As, through the expansion of the field, we'll reach the Soul of the world leaders. The world has been yearning for this, to bring all equal. And then we see the process.

It'll be interesting to see, how the process of the development of the Soul, will bring one Soul out of all of us, as a common denominator. In a way, when you look at a stone, one atom of a stone in one position is no different than the other, it's equal. So shall be the "Soul of the Creation." And then we see the next step.

Then we see how this strength will come in. How will be, as I said, I have no financial limitation with my signing of the agreement with the Chinese government in development. We can prove it, we can show it, we are financed for to do it, in trillions. The restriction of financial game is over for us, as now our job is just to develop technologies, after technologies, (1:00). to bring prosperity to the nation of China and the rest of humanity, headed by the Chinese leadership.

We have a say in how and where, and they have a say at what speed. Don't forget, we can reach the Soul of all of us, with the new technology, to elevate, to go to the next step, as we expand this sphere. Learning languages, changing the crime scene. As I said, no jails, no courts, because none of us will commit a crime. We'll have no addicts, the end of drug trafficking, the end of child abuse, all will come through transfer of the balance of the Soul and the STP in dimension of physicality (P).

When we did the test in elevating the "Soul of the abusers," the Keshe Foundation team in the background and us looking on the graphs, we saw how at one point all three (lines merged into) ran one straight line, which meant they became one. And I said to our colleagues, "we've achieved what we came here for." One

day we'll release these graphs and these data's and you will see. That's why we didn't take any survey from you, because we knew we achieved in dimension of the Soul.

In the next 2 to 3 weeks, on the 14th which is tomorrow, sorry 21st which is tomorrow, on the 14th as last week, and 28, we'll bring that. Some of you say, "I don't feel anything." Some of you have tasted a new dimension of life. Those of you who participated, and those of you who want to participate, the channels are still open. (1:02). You can join us, and change, bring that change.

In the conference in Manchester, many of you will change. Many of you will change in upcoming time, to become ready for that process of becoming "man of universe." You gain the knowledge, through the Souls, not through schools. And this is what we came here for, to bring the change.

In the test we done, in past few weeks, with the Chinese military and the government officials, we have seen a breakthrough in total field development. A breakthrough that it could be seen, now it could be explained, that others understand, that does not become exclusivity of anything. We brought the knowledge to the position of understanding the knowledge of universe. Where, as we expand in the sphere of the magnetic (M) field, the plasma of this, what we call, systems, whoever is in it, becomes knowledge of all of it, which all carry.

It will be interesting at the end of the sessions in Manchester, in London, and then in the city of Beijing, by the end of the year, how you, Knowledge Seekers who participate, will see the change in your life. In the dimension of physicality. In the dimension of understanding the whole process. And then we'll see the next step.

In 2024, we'll introduce a new space development technology, which is unknown to man. And I started this process a few weeks ago, speaking about the life, the cycle of life, and the misunderstanding, and the assumptions on this planet. (1:04). If you remember a few weeks ago, I explained that the life on this planet cannot be 13 billion years, it's all mistake. And I brought the dimension of what we say the size of the universe for our scientists and the rest. And I received past few days a link from someone that the << audio breaks >> that the ?? life of this planet is actually ?? more than 26 billion, double what we thought before. But, as the knowledge expands, we'll see the life of this universe is in thousands of billions of years. But that is in man's billions of years. In the life of universe, it's a second, just created. There is no time and space in the universe.

In the coming time, in the coming progress, in development and science, we all learn new languages of technology. And the amazing thing is, the youngsters will understand it better than the older, because the older have already ingrained with the wrong information. And we bring it out, to be understood in full.

So, in the coming weeks, in the coming months, be ready for that change. The teaching will come in an open manner, no formulas. You have to understand to change it to a system, which that system is your Soul. How you want to link, how you want to create that link, how you control the strength of that link. And in so many ways, how you can make one Soul out of the whole race of the Creator? And that is the ultimate goal.

And in time man will understand, and in time the Universal Community will understand. (1:06). In time the changes will come, in a possession and a position, and in understanding of the science of Creation, which is very different than the science of the man, which he has made for himself to understand the matter state of his life.

Now we understand the power of the plasma, or what we call, magnetic field motion of the Creation. The most beautiful time for human race has arrived. And, the beauty of it is, we are all in it, and we will work all together for it, and the change will come. In the next few months, with the development of technology, we'll see the "silencing of guns," as the Chinese government will enforce peace in exchange for technology.

With it we will see the change in American policy of "Gun Policy," as the nuclear weapons of the America will become worthless. Then we talk as "One Nation," what we do together, and not one against each other.

In so many ways, we deliver so much technology to the hand of the Chinese government, with the, what we call, agreement for peace, that does not make Chinese government to become a superpower, but become all inclusive power of all the humanity. I trusted the Chinese leadership, and in this trust, we have seen the correct conduct of the officials, in the operation in past few months. And we agreed to go to the next step. And I'll open a flow of new knowledge, an ocean of knowledge, to the Chinese leadership, that they choose which part of this ocean of knowledge, (1:08). can be used to speed up the process of humanity to become peaceful, for everyone to be fed, and there'll be no hunger.

But, as we expand this sphere of the plasma, as I said, our Chinese military guy watched it outside the building, not inside the building. As it expanded, they stood outside, they saw, they can see things flying outside, not just in the room. And this brought us the expansion time. And this expansion can be gradually, throughout this planet. and then beyond.

I developed technologies for peace, and I developed knowledge to create the condition of peace. As I always said in China, Chinese government does not put gun on the street. Chinese government creates conditions that no one can commit crime. Making, committing crime, it becomes so hard that you don't even think about it. And this is the way to do. We create so much knowledge that no man needs to go hungry. No man needs to commit crime to feed himself and his children. And now, we have found the position to do.

The center of knowledge will be based in China. And laboratories and the structures are set, gradually in the coming months, that Knowledge Seekers who work with us, will come into it. As Knowledge Seekers you become teachers, because you have that knowledge, you have understood it, and now it's time for you to teach. We call upon many of you to join the Keshe Foundation Research Centers in China, and then spread the knowledge out back to your countries.

As we develop, very rapidly, new technologies, the Chinese leadership and Keshe Foundation management leadership will work "hand in hand" to bring the new technologies. (1:10). And, we make sure that it's equally shared, but it's not used against each other.

As I said, I thank the Chinese team, especially Wang Ling, Chen Ling, Chao and Xiaojin and many others who stood behind us, and the Chinese officials who spend every day with us for past 7 years, day in day out, making sure the structure is set up. And now Chinese Keshe Foundation, and the Keshe Foundation technology has become part of the 14 and 15 programs with Chinese government. Which means we have become part of the national structure of science and technology and development of the nation.

And in so many ways, you Knowledge Seekers from outside, you'll see the change as we are part of the national program of one of the world's most powerful nations and a peaceful nation. And I thank our team in Europe, especially Austrian team, the American team, the team in Iran who've literally stood behind. And we

thank the Iranian team, especially with all the suffering they suffered in past few months, as we concentrated to complete our work with the Chinese. We go through a break, and we come back, and if there is any questions to answer, we answer.

But, in one point, I have come home, and I have delivered what I promised.

Rick, would you like us to take us to break? (1:12).

End of Quick Index Part 1 - 495 KSW July 20 2023

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:17).

K- Yes, good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers Workshops of Keshe Foundation Spaceship Institute. We welcome you back. And, we hope, as usual, we share more knowledge with each other, and we learn from each other, as you're all Knowledge Seekers (KS) of the universe (U).

As usual, before we start the sessions today, there are a few announcements we have to make, that, it makes it easy for a lot of us to understand, some parts of the work of the Keshe Foundation. First of all, (:18). if you go back onto the Keshe Foundation website store, you will see most of the products of the Keshe Foundation has been reduced to "buy one, get one free," and the shipping cost on top. The reason for this is, as we said, we're closing our operation in Europe. And, as we have signed with our new partners, as we've said before, they'll takeover in management and the promotion of the Keshe Foundation products worldwide. And in the next 2 or 3 years we'll see at least 10, 20, 30,000 new products in the market, in the name of the Keshe Foundation, in the name of the Keshe products. We have to clear our stock, what is originally ours. And we go to that, or we start that path.

And, as we said, we are shutting down a lot of operations in Central Europe. And, we become part of the Chinese National operation. We have joined forces with Chinese government. And, we become international organization. The details of the joint venture has been signed last May. So, for the first time we announce, Keshe Foundation moves its formal operation to the Chinese central government's operation. And, we have received a massive backing. And the new developments will come out of China Keshe Foundation. We thank Chinese leadership in recognizing the power of this technology (T). Many of our work has been centralized

in China, past few months, since opening of the Corona, and you will see products from Keshe Foundation from China, but with a quality of the Western quality standard. (:20).

In that process, whatever you have in the packages of the Keshe Foundation left, is there at prices, and the products will change to one, next six months, a year, to totally different way. Promotion and sale is out of our hand, we're a scientific support and development. So if you go on the Keshe Foundation website you will see products reduced for half price, or get one, get one free. And it will be actually sentimental things because that's the last time Keshe Foundation, as independent organization, puts products in the market. We're committed into Chinese government structure of signing contract, that internally within China and externally outside China, all operations will be handled by the Chinese structure.

So, you will see us in, what we call, health, material, space. We are all tied up with Chinese central government and structure. This will bring us to where we wanted to be. To push the technology beyond barriers. To push the technology in where we want it to be. And, in a way, thanks to the work of our Knowledge Seekers in China, we have achieved, we have brought the technology to that level. And as I said, we thank the Chinese leadership, his Excellency President Xi of China, in realizing the value of the new technology. And allowing us to become part of the Chinese structure of science and technology.

You will see evolution and changes in our work. In a way that would have taken us 30, 40 years to achieve, will emerge in the coming months and years. So the teaching will carry on, as part of our agreement, our teaching will not stop. (:22). The sharing of the knowledge will not stop, but the high level technology techs, in space, defense and others, will be collaborated and agreed by the Chinese authorities, before we publish.

In a way, there is no strangle, but it gives us a freedom to do what we do. Our research centers will move into the central Chinese government hand, which means Keshe Foundation will do research with Chinese and the rest of the world scientists. The operation of the space technology, the operation of the medical and everything else. Now, we are a joint partner, signed and sealed with the Chinese central government. We are not going in partnership with the Chinese organization, but we are hand in hand in China, to spread the technology very rapidly.

We have done many years of tests, we have done many years of research, with the Chinese, with the help of our Knowledge Seekers. And now, we have become part of the Chinese central government, to structure science and technology. And we've been backed by massive financial support, by the management of the Keshe Foundation in commercialization, not in the scientific side, is not with us anymore. So, what you see on the shops, is the last time you buy a Keshe Foundation product. Which is done by Keshe Foundation. Even though the new products will be designed, will be evolved through the knowledge of the Knowledge Seekers worldwide. We invite many of you in the coming times, to join us in our research centers in China, as a joint venture international organization, even though the Chinese operation is belong, operates, and will be through Chinese government. (:24).

But our announcement is very simple. We have organized for number of you, which you have paid, to meet with us, end of August. The city chosen is City of Manchester in United Kingdom. The session will start at 9 o'clock on Monday the 29th, in the City of Manchester. There is around 20, 25 of you who have registered, or if you want still to join, we can add to it. Those of you who join these sessions, will go through the, what we call, flight test systems. Which means, we bring you to the first cycle of testing, and evaluation, and evolving into the space flight.

Some of you will test the new Flight Headsets. And then from it we learn to add, and will become part of the structure of the, what we call, the next step in the space technology. All the data gathered, and all the information given to you, as the Knowledge Seekers in this group, will be taken into October, November session in London. The Ambassadorial Meeting in London will come at the weekend of the next session in London. We had to move the London Ambassadorial Meeting to the first week of November, instead of the last week of October, as Keshe Foundation has to be presented in one of the major conferences in health in China, by the invitation of Chinese government, as a new health technology to be introduced. (:26).

As I said, we become part of the Chinese structure of the work, and our association group of national organizations, they want to introduce us, technology of the Keshe Foundation in health, as a world health, which become part of, in a conference in Macau, on the last week of October. So, to respect the request of our partners, we have moved the conference of the London ambassadors to first week of November. In the end of the first week of the November, and the week before, the five days before that weekend, we will have the Knowledge Seekers, who will be part of the 200 in London to meet. And then we go into the weekend session of those who will join us in London, ambassadorial meeting and you will rub shoulder with diplomats and ambassadors. And as now we become part of the national organization you will see the invitation will come not directly from the Keshe Foundation, but many nations. Iranian ambassador, Chinese officials, Russian officials will be joining this meeting.

This is important to bring the new technology forward. And this is important for us to change the course. In this process we will bring a lot of changes. A lot of people in the background, especially Wang Ling, the Chinese management team of the Keshe Foundation in China, have worked relentlessly in past few weeks, to make sure everything is set. And we thank all of them. We thank the Austrian team, who's relentlessly has made sure everything is positioned as the Chinese tested, we could deliver technologies that they could see and brought us to this position. (:28).

So, those of you who are meeting us on the 29th of, what we call, August, for a week meeting in city of Manchester, Then we meet in the first week of November, at the weekend of the first week, we meet as ambassadorial meeting, and then we see the opening of the Keshe Foundation international, some of the major scientific breakthroughs, backed by one of the most powerful nations in the world. We are not talking this might happen, we have signed and sealed the agreement with the Chinese authorities in May of this year. And it's complete. And now we're in the process of the transition of handover. And as you've seen, the operation in Europe is coming to an end. Linz Center will close. We had the last people being at the Center two days ago.

We have a news for you. We have moved the operation of the Wellness of the Keshe Foundation as a server operation, this week, to a new location. And what we promised you, that the server position for travel, for space, for Wellness, now is officially taken place in location, that we'll give you the pictures today. We are very open about it, because now we can show that this technology will evolve into. We show the works of it, most probably in the October presentation in Macau, that you will see evolution in the world of Health and Wellness. We are preparing everything to bring hand in hand with our partners of Chinese central government, the breakthrough in science and technology.

As part of this work, in the past weeks, we have delivered one of the most major, powerful, scientific breakthrough, (:30). to convert energy into matter. And we have managed to produce 20 plus elements. For it, confirmed by independent laboratories of the Chinese government. That the science breakthrough has come through, showing that for the first time, we can convert energy to mass. And this was to be watched. It

was monitored, the whole operation, by Chinese military headquarters, head officers, that there is no interaction, physically by Keshe Foundation, except placing, developing and showing that, literally the sky rained with material.

So, this brings a new breakthrough for the Keshe Foundation and the worlds of space technology. Now we can control what materials we get to space. It shows what we can produce in space without depending on Earth. This is where we'll see Chinese space technology will take a leap from what we call, 'evolution in science', and we'll see the change in space technology in the coming months. Which means, we can produce energies, that can be converted into matter, and the matter can physically be checked, and then be quantified, and then bring its analysis.

We have produced composite materials, which is something which is done in the creation. Like alloys, like creation of ferrous and non-ferrous, metallic and non-metallic material together, which allows us to create life in the space. It allows us to create muscles, it allows us to create heart tissues on this planet. Where we can literally replicate in the body of the man during his own life, repairs. (:32). If you had an accident, a knife, something goes through your body to your heart, you don't need to repair the part, you can literally rebuild it, while it's in the system. And now that we have moved our Wellness center out of the possession of the Austria and into a new location...

<< audio of Mr. Keshe breaks >> ...

K- ... Okay, you have to understand a lot of things in the background is trying to stop the information and the knowledge to be transferred.

So, with the new Wellness Center, in location, the server centers of Europe, South America, and Arizona will come into operation in the next few months. Which means, you do not need to travel anywhere to change the condition. And, will bring a new dimension to our work. Still, info@keshe.foundation, health@keshefoundation (health@spaceshipinstitute.org). You can contact the Wellness Centers through us, (:34). that we can help you to do what you like to do. This brings us a lot of credibility, this brings us a lot of change. And, thanks to our team, the new Wellness Center, now is operational as of today, it was completed last night.

So, we have done a lot of work, we have brought a lot of changes. And now, we are part of the international, national organization, which will go through the next step. The confirmation of the production of the materials, composite materials, will be done with British Nuclear Fuel, in UK, during the conference we have in Manchester. British nuclear fuel headquarters is at ?? Riseley, which is not very far from Manchester and where I used to work. So, we have set up a structure with British Nuclear Fuel, to test independently conversion of the energy to mass.

At the same time, we'll do the same systems in Washington and in NASA headquarters in Miami. Which means at the same time, three centers will confirm the finding and operation and testing of the material conversion, to confirm the correctness of the tests in China, done by Chinese government. With this brings a new change, new dimension into our work. It will bring a lot of understanding. We did this test in a environment that was set for a specific job before. The way we used to do. And we confirmed, we can even add to our tests, show what are the reserves, what other materials are within the structure of this area.

This is another way, that when we actually, when we arrive on Mars, we can say what product, what materials is within it. (:36). We don't need to drill hole, we don't need to go and excavate, we don't need to mine. By putting the new technology on the surface, we can see what are the ?? night, what are the reserves of the planet, what the planet is made of. We don't need the probes and drill holes. With this technology, as we stay longer on the surface, we can go deeper in the surface and find out the inner minerals of the, what we call, the planet.

Can we survive? Can we take the shape of man? At what center? At how much depth? At what height? What will be the condition of life which matches near our life? Colonization becomes secure. These will be done with the Chinese national government space organizations. Achieve it, traveling to Mars and Moon and the rest, will come into operation in the next few months and few years. Now that we don't have to have the financial worries, we don't have to do ... What I did for 20 years, back in the Keshe Foundation, and running into bandits and criminals, that they tried to defraud us. Now, Keshe Foundation and Knowledge Seekers, we concentrate on delivering the new technology. That's all our job is, and we leave it to the most powerful nation on this planet. With the correct conduct, with the peace in mind, we have signed ourselves to technology in exchange for peace with the Chinese government. (silence)

This was my dream (emotional). (:38). And now we've achieved it. With Chinese government, we deliver "technology in exchange for peace," for every nation which signed for "One Belt, One Road." The "Silk Road Policy" will become a peace policy in conjunction with the work of the Keshe Foundation.

I'm trying to choose words which explain what we came here for. And we have achieved it. The Chinese leadership has signed themselves to use the technology for development of peace, and end to the "Gun Policy." And this is the reason we signed agreement with the Chinese.

In the coming weeks and months, we will sign this ?? for the nuclear bombs. In a way we show them, with the new technology, there is no need of weapon technology. And thanks to you Knowledge Seekers for so many years, backing us, has brought us to this point. And, in so many ways, I thank the Chinese leadership, and Chinese military officers, who worked with us, and are working for us to bring that change. (:40). A force, a military force, which is now working with us, to create the condition scientifically, to push armies to the "peace armies." And it's beautiful to see how our team works with high ranking military officers, hand in hand, to do, to show the technology and leave it to them to bring the next step in.

It's taken a long time. And in a way, the way I see it, in what we have signed ourselves to, we have made a "peace army" out of Chinese army. In the coming times, as the technology shows its power, to be able to make redundant development technology of the past. The arms race, more or less with signing agreement with the Chinese government, has come to an end. There is no race, as the technology is so powerful, that makes the nuclear, supersonic rockets, and the rest of it, a "toy in the hand of a child."

We kept silence for past few months, and we kept on informing you, we have achieved agreement. And now, with what we have in hand, and the commitments I've made, to the Chinese government, we'll work to bring that peace forward. Chinese government has committed itself to billions of dollars of investment, in Keshe Foundation and its technologies. And, all will be monitor by the heads of the nation, and not in the hand of the ?? bottom line. You will see massive factories getting set up, producing products which bring China prosperity, and brings fairness in wealth of the nation, to give to the poor people what they could not have.

And I thank our team in Austria, who's backed us solidly, through all this troubled time. (:42). And, as I said, maybe losing so much to the, what I call, "bandits of the Western World," it pushed us to do what we wanted to do, raising funds to bring peace through the powerful nation of China.

Today's teaching, to me, is confirming what we've worked for, for some 40 years, to exchange knowledge for peace. And I see the beginning of everything which President Xi of China set out, as a "Silk Road" to a "Peace Road," in the coming weeks and months. We exchange with nations, the technology of health, feeding a nation, in exchange for peace, with the power of Chinese government. We deliver technology step by step and the nations who are third world to us, become equal to us in coming months and years. As the Silk Road policy of "One Road, One Belt," will change to the policy of peace, that Chinese will take leadership in changing and bringing peace.

We deliver to nations through "One Belt, One Road," the health, the feeding, the change in evolution of technology, and getting commitment from the world peace policy. Dismantling the armies and joining "one army" of the science and technology with the power of the Chinese government.

It's taken us and the Chinese team, six, seven years in China, relentlessly, traveling, showing, experimenting. And now, we are ready to go. And I thank again, Chinese team, the Austrian team, and the rest of Knowledge Seekers, who allowed us to achieve this point. (:44). You will see, as I said, it's the last time you buy Keshe Foundation products from Keshe Foundation. We would not do this, if we would not at this point. And our operations in Europe cease to exist in the next few weeks, as we transfer everything into China, and from China back to the rest of the world.

Now you understand why the Intro today was chosen this way. And everything with Chinese is perfection, it has to be checked, it has to be done. It has to be correct, and then we deliver. It's taken years to get to this point, and it's taken years of hard work, and sharing knowledge openly, that it has brought us to this position. And as I said, my vision was knowledge in exchange for peace. And I have found the partners that us as Knowledge Seekers can be proud. We exchange knowledge with the Chinese government to bring peace to the rest of the world. And we respect and honor Chinese signature to the document.

The teaching of today comes in another way. We always spoke about the travel, we spoke about the Soul. We spoke about how we can transfer energies. What we have seen in the test in past few weeks, with our Chinese counterparts, is brought in a very deep science of Creation. ?? our physicality in arriving in a new position will change. (:46). How do we change the environment to fit us? In tests we have seen how we can, by changing environment, change for example, Copper to Zinc. Even though the behavior is a Copper, but to exist in the new environment, will take ?? properties of Zinc for example, which can live in this environment.

This is important, that we understand in transmutation, for example, our muscles as Copper (Cu) based, will change to Zinc (Zn) base, but the life will still, will carry on in the new dimension. The life will step forward in that dimension. The life will become in a way still in physical dimension but in another order. What it means, if for example we change the gravitational magnetic (GM) field of an environment, then we see even ourselves as different creatures on this planet.

It means if we change the Inertia strength, in a given matter state, and in a given gravitational magnetic field, we will see mutation. We are actually traveling the space. (:48). And when we reach this point, when we reach this level of knowledge, we can travel to the point of destination, but already mutating at the point of departure. That when we arrive, we do not need to adjust. In a way, if you look at it, we put a spacesuit (on)

already on Earth, before we travel to Mars. This gives us a dimension of understanding the mutation of the element as an energy.

When we monitored the production of the, what we call, materials in our tests, we noticed in a different way, in different compositions, how fields interact. Part of this (will) ?? made in the future, when we come to an agreement with our group, we will release these videos, because at the moment are property of the Chinese military. We will show and you will see how the structure will change by properties of the fields. This will allow us to transmute instantaneously. Then, the time of travel in a deep space, is the time of thinking. When you think, you'll transmute. On Earth, you (will) have already start(ed) life, of the point of destination. This will change and brings new dimensions in the space technology. (:50).

In a way, we change, we guarantee life in the dimension (D) of physicality at point of arrival. Not arriving with the uncertainty that how we arrive and what will be the change. In a way, it's like going to a shop and buying a dress. You don't get the dress as you arrive at the party, you can test the dress in the shop. Does it suit? Am I happy with it? Can I live with this suit? Maybe 20 arms and 30 legs. The Soul of the Physicality (STP) will accept the change. and then the Soul of the Man (STM) will go through the transition of the change at the point of arrival. This is the change, this is a huge understanding in science and technology.

This is a huge change in how we'll come to travel the depth of the space. We don't need no more "monkey suits." We don't need no more, what I call, conversion and dressing ourselves up and become prisoners. If you look at the space technology of today, be it the Chinese space agency, be it NASA, they don't give us freedom. We go into a "monkey suit," and when we arrive, we're still in the monkey suit. You cannot hug your partner and feel the emotion, and have the love in a space suit. We cannot live that life. We cannot travel the span of universe with the monkey clothing, (:52). with space suits. We have to become to suit the space. Which means when we arrive, we are part of the environment and we are not outsiders.

And with the test we've done in the past few weeks, a lot of this has become clear. You've got to understand, when I stand with the test and watch the test, people look at the material condition, what is produced, how it's produced. I look at the field transition, transmutation. As one of our colleagues during the test said, "just in the room rains with everything." Is not anymore at the point, the source. Literally, the whole environment. Even the observation of our team, in development, was outside the building they could see the rain. It wasn't confined to the space lab, where we were testing. Which means we have managed to cross matter state. Which means there is no barrier, the glass, the brick wall, has no meaning anymore. Which means we can go through the dimension of space, with the strength of the man, as the STM.

The observation we had in the past weeks of testing, with our colleagues, with the Chinese officials and the military, it's brought closer for us to bring the reality of the space travel to the time, the place and the position of the departure. How these fields will interact with us?

We see a new dimension in the Health. (:54). We see a new dimension, using these fields to expand the Soul, beyond and within. What this means, now you expand your Soul to the point. Now you can expand your Soul into a plasma, in the dimension of the universe (U). The longer we run these systems, the longer we extend the fields of these systems, the further in U we can travel. At the moment, we put fuel in our rockets and we can go 200 kilometers up. We can fuel our rockets and go far enough that we can use other rockets to go to the Moon. The new science, the new understanding, the new technology, is by the expansion of the sphere of the fields, beyond the solar system, beyond the galaxy. And as we are within it, we can travel any point in it. Which means, instantaneous, zero time transmission.

We try to set this up, for the meeting of Manchester. That some of you will taste, will see, you'll feel this change. Transmutation through the Soul. Transmutation through understanding of everything else. Don't forget, when you join us in Manchester, you are part of teaching, while you are learning from me. You become our "guinea pigs," as much as we become your knowledge of destination. How much you will learn, most of you which attend the conference in London and in Manchester, your life will change. In a way, you come to understand different dimension, different understanding. (:56).

And then the final session of the 65 will take place in the city of Beijing, China, in December of this year. That 65 will be trained to become the first cycle of the passengers. We'll have many Chinese citizens as part of the 65, without a doubt, as we are centralized in Beijing. Then we'll start the transmutation, what we call, the "transition time." And hopefully, by December, we will see the first two space people (a couple), Russian and German, to take flight. And we'll go into the next step with the rest.

In all the meetings of the 25, the 200 and 65, the couple, the Russian and the German, will all be part of the 25. That they go through the transition. That they go through understanding, that we make them ready as the first people to take transmutation in the dimension of space and time. We will come to understand more. We will come to see more.

And in a way, we increase the dimension of the plasma, maybe to the size of the universe over years. It needs time to grow. It needs time to link up. It needs time to come in. And in that process, the Soul of child of Mitra will be within it to create a new source, to the new race. And she has been in it from the beginning of the trials.

In so many ways, we'll bring a new dimension. We bring within us the new expansion in the science of space and technology. (:58). In a way, financial strength is irrelevant as only "man made." Weakness of the health of the man is irrelevant, because it's only entangled with the physicality of the man. We don't get the sick Souls, we get different strength of Souls. And in that process, we go to the next step.

It'll be interesting, how many of you, when you attend the conference in Beijing, will be speaking Chinese fluently, without you knowing. It'll be interesting to see how the peace process, from November to end of December, will change governmental policies around the world. As, through the expansion of the field, we'll reach the Soul of the world leaders. The world has been yearning for this, to bring all equal. And then we see the process.

It'll be interesting to see, how the process of the development of the Soul, will bring one Soul out of all of us, as a common denominator. In a way, when you look at a stone, one atom of a stone in one position is no different than the other, it's equal. So shall be the "Soul of the Creation." And then we see the next step.

Then we see how this strength will come in. How will be, as I said, I have no financial limitation with my signing of the agreement with the Chinese government in development. We can prove it, we can show it, we are financed for to do it, in trillions. The restriction of financial game is over for us, as now our job is just to develop technologies, after technologies, (1:00). to bring prosperity to the nation of China and the rest of humanity, headed by the Chinese leadership.

We have a say in how and where, and they have a say at what speed. Don't forget, we can reach the Soul of all of us, with the new technology, to elevate, to go to the next step, as we expand this sphere. Learning

languages, changing the crime scene. As I said, no jails, no courts, because none of us will commit a crime. We'll have no addicts, the end of drug trafficking, the end of child abuse, all will come through transfer of the balance of the Soul and the STP in dimension of physicality (P).

When we did the test in elevating the "Soul of the abusers," the Keshe Foundation team in the background and us looking on the graphs, we saw how at one point all three (lines merged into) ran one straight line, which meant they became one. And I said to our colleagues, "we've achieved what we came here for." One day we'll release these graphs and these data's and you will see. That's why we didn't take any survey from you, because we knew we achieved in dimension of the Soul.

In the next 2 to 3 weeks, on the 14th which is tomorrow, sorry 21st which is tomorrow, on the 14th as last week, and 28, we'll bring that. Some of you say, "I don't feel anything." Some of you have tasted a new dimension of life. Those of you who participated, and those of you who want to participate, the channels are still open. (1:02). You can join us, and change, bring that change.

In the conference in Manchester, many of you will change. Many of you will change in upcoming time, to become ready for that process of becoming "man of universe." You gain the knowledge, through the Souls, not through schools. And this is what we came here for, to bring the change.

In the test we done, in past few weeks, with the Chinese military and the government officials, we have seen a breakthrough in total field development. A breakthrough that it could be seen, now it could be explained, that others understand, that does not become exclusivity of anything. We brought the knowledge to the position of understanding the knowledge of universe. Where, as we expand in the sphere of the magnetic (M) field, the plasma of this, what we call, systems, whoever is in it, becomes knowledge of all of it, which all carry.

It will be interesting at the end of the sessions in Manchester, in London, and then in the city of Beijing, by the end of the year, how you, Knowledge Seekers who participate, will see the change in your life. In the dimension of physicality. In the dimension of understanding the whole process. And then we'll see the next step.

In 2024, we'll introduce a new space development technology, which is unknown to man. And I started this process a few weeks ago, speaking about the life, the cycle of life, and the misunderstanding, and the assumptions on this planet. (1:04). If you remember a few weeks ago, I explained that the life on this planet cannot be 13 billion years, it's all mistake. And I brought the dimension of what we say the size of the universe for our scientists and the rest. And I received past few days a link from someone that the << audio breaks >> that the ?? life of this planet is actually ?? more than 26 billion, double what we thought before. But, as the knowledge expands, we'll see the life of this universe is in thousands of billions of years. But that is in man's billions of years. In the life of universe, it's a second, just created. There is no time and space in the universe.

In the coming time, in the coming progress, in development and science, we all learn new languages of technology. And the amazing thing is, the youngsters will understand it better than the older, because the older have already ingrained with the wrong information. And we bring it out, to be understood in full.

So, in the coming weeks, in the coming months, be ready for that change. The teaching will come in an open manner, no formulas. You have to understand to change it to a system, which that system is your Soul. How

you want to link, how you want to create that link, how you control the strength of that link. And in so many ways, how you can make one Soul out of the whole race of the Creator? And that is the ultimate goal.

And in time man will understand, and in time the Universal Community will understand. (1:06). In time the changes will come, in a possession and a position, and in understanding of the science of Creation, which is very different than the science of the man, which he has made for himself to understand the matter state of his life.

Now we understand the power of the plasma, or what we call, magnetic field motion of the Creation. The most beautiful time for human race has arrived. And, the beauty of it is, we are all in it, and we will work all together for it, and the change will come. In the next few months, with the development of technology, we'll see the "silencing of guns," as the Chinese government will enforce peace in exchange for technology.

With it we will see the change in American policy of "Gun Policy," as the nuclear weapons of the America will become worthless. Then we talk as "One Nation," what we do together, and not one against each other.

In so many ways, we deliver so much technology to the hand of the Chinese government, with the, what we call, agreement for peace, that does not make Chinese government to become a superpower, but become all inclusive power of all the humanity. I trusted the Chinese leadership, and in this trust, we have seen the correct conduct of the officials, in the operation in past few months. And we agreed to go to the next step. And I'll open a flow of new knowledge, an ocean of knowledge, to the Chinese leadership, that they choose which part of this ocean of knowledge, (1:08). can be used to speed up the process of humanity to become peaceful, for everyone to be fed, and there'll be no hunger.

But, as we expand this sphere of the plasma, as I said, our Chinese military guy watched it outside the building, not inside the building. As it expanded, they stood outside, they saw, they can see things flying outside, not just in the room. And this brought us the expansion time. And this expansion can be gradually, throughout this planet. and then beyond.

I developed technologies for peace, and I developed knowledge to create the condition of peace. As I always said in China, Chinese government does not put gun on the street. Chinese government creates conditions that no one can commit crime. Making, committing crime, it becomes so hard that you don't even think about it. And this is the way to do. We create so much knowledge that no man needs to go hungry. No man needs to commit crime to feed himself and his children. And now, we have found the position to do.

The center of knowledge will be based in China. And laboratories and the structures are set, gradually in the coming months, that Knowledge Seekers who work with us, will come into it. As Knowledge Seekers you become teachers, because you have that knowledge, you have understood it, and now it's time for you to teach. We call upon many of you to join the Keshe Foundation Research Centers in China, and then spread the knowledge out back to your countries.

As we develop, very rapidly, new technologies, the Chinese leadership and Keshe Foundation management leadership will work "hand in hand" to bring the new technologies. (1:10). And, we make sure that it's equally shared, but it's not used against each other.

As I said, I thank the Chinese team, especially Wang Ling, Chen Ling, Chao and Xiaojin and many others who stood behind us, and the Chinese officials who spend every day with us for past 7 years, day in day out,

making sure the structure is set up. And now Chinese Keshe Foundation, and the Keshe Foundation technology has become part of the 14 and 15 programs with Chinese government. Which means we have become part of the national structure of science and technology and development of the nation.

And in so many ways, you Knowledge Seekers from outside, you'll see the change as we are part of the national program of one of the world's most powerful nations and a peaceful nation. And I thank our team in Europe, especially Austrian team, the American team, the team in Iran who've literally stood behind. And we thank the Iranian team, especially with all the suffering they suffered in past few months, as we concentrated to complete our work with the Chinese. We go through a break, and we come back, and if there is any questions to answer, we answer.

But, in one point, I have come home, and I have delivered what I promised.

Rick, would you like us to take us to break? (1:12).

<< **BREAK** >> 495 KSW July 20, 2023 (1:17).

K- .. No, we are ready for answer, any questions? There is something I received the message, the products which are offered are the products, which only till they are available. (1:18). Once they are sold out, there is no more further products. And it will be taken off the, what we call, Keshe Foundation product list. We are not going to repeat, and most of these products will never be repeated. as our, what we call, partners, look at the structure of the retail and commercialization in different way than we used to do. So, whatever is there is, that's all. And, you can take it for sentimental value or whatever, or for usage, but this is the, what we call, the last time Keshe Foundation as an independent organization, will produce materials.

Any questions?

Q: ... Good morning Your Excellency and all Knowledge Seekers worldwide. It took a long time to come to Linz. I apologize for that. But it was a pleasure to me to see what my work is on this planet. And it's a planet ?? opener ?? for that, Your Excellency, I thank you very, very much. So that the planet comes from the root and heals itself and opens it up from the root. That's a very joyful task for me personally, because also for me personally, it took a long time to realize which reincarnation I am personally. I mean, you know it the first time I said and ?? rather to the Foundation, (1:20). you saved so much times my life and I thank you for that a very long time. And by the way, the square sum of this Knowledge Seeker Workshop is 18. So that means to me that not only I got matured, but the whole Keshe Foundation worldwide got matured. Thanks a

lot to all of Knowledge Seekers and thank you personally. And I have a lot of ideas which I want to realize with you all together. And I'm grateful to be a part of the Keshe Foundation team.

K- Thank you very much.

Any other question?

Q: ... Good morning Mr. Keshe. I booked a ticket for July 14th sessions, but I did not receive the Zoom link. I wrote to the customer support to reconsider the reservation for July 21st or 28th, but I did not receive any reply. Please help me to participate.

K- There are number of people. Send an email to info@keshe.foundation. Apparently, there are two or three people who have not actually linked up. Our servers does not show they are set even to come in. (1:22).

Q: So to info, info...

K- To info@keshe.foundation. I know, I was told yesterday, the day before, A couple of people who could not log in, because of their own side. Your Zoom is not connected, because we monitor everything.

Q: No, no, no. My Zoom is okay. ...

K- You see... Yeah, can you go on your Junk Box (Spam), and go on your, and look for an email from Keshe Foundation. Don't look at your normal email site. A lot of people email where to link up, was gone or it goes to the Junk. Your link was sent to you, or has been sent to you, and it's gone to your Junk section of emails. You'll be admitted to the next one, because you missed the last one. It's not a problem.

Q: So tomorrow I'll receive a link, eh?

K- You check your Junk.

Q: I checked it, I checked it, nothing is there.

K- Send the message to info and I'll get the IT people to look for it. We know one other person, I don't know if he missed it as well, but they couldn't get in through their Zoom fault. You have to log in to get in. But, we had all the people who were there last week, nobody had any problem, but one or two people we know couldn't get in. We have another one from US, I think we had the same problem. And we had one from Germany, who actually just because he signed, he never paid for it, he thought it just come in and payment will go through. (1:24). So, we've told them, just because you signed, it doesn't come in. I was told. So, check in, send the information to info and you'll be allowed or you'll be admitted for tomorrow, if everything is okay.

Q: Thank you, thank you, I hope so.

K- Thank you very much. We have no problem, it's last week we had 70, 80 people on the panel. So, it's just we have to find out why you don't get in and that's the IT job, not ours.

Any other question?

Q: ... When will the electric gas generator be delivered? Thank you for your service.

K- We are, hopefully, this should be done this quarter or next quarter, as we agreed, we're trying to see if we do it through China, and this will be a rapid production, and we don't see any problem with it. We had to stop

a lot of things, move a lot of things in the background, to move our operation into China, and now you're all fully aware what has happened and what's happening. And in the coming days, we will meet with the, what I call, Chinese officials in that line. And we are setting up, the factories are setting up. We've been on a trip in the past few days to central China, choosing the new factories and sites for the Chinese Keshe operation, where a lot of things will take place. (1:26).

The good thing with it now is that we, we don't have to worry. We just say, yes, this side fits us, we can do, and the rest is in the hand of the officials to arrange and get it done. But it should be done in next, this quarter or next quarter. We just got to see, because it has a lot of things to do. It's like the same as the House Unit. That has to go through the certification, which a lot of things was done by Austria, to bring that it can get set behind. A lot of changes, tests was done, because the units which came from Iran would not meet the standard, the European standard. And our team in Austria did a lot of work for this. And it should be easy to get done. And the Head Units are going through the same process.

Q: Okay, we have a question in the Q&A from Carlos, of the group in Brazil. He has a question about whether water is a beautiful Gans, or a beautiful liquid gas? It could guide us on Oxygen as one of the main agents of life, as it is the common denominator between the liquid part of this planet, which is water, and the structure of the body, which is Amino Acid (AA). We should have already understood this in our Gans boxes, when the AA forms at the top. He mentions they have new Knowledge Seekers participating in the group in Brazil. Thanks for the guidance.

K- We have a property within the Oxygen (O), (1:28). which behaves like, what I call, gravitational point of the liquid and gas together. We have gravitational fields of this planet which connects to Iron (Fe). That has a common denominator with the O. And when you speak about O on its own, it's a gas, when you speak about the Hydrogen (H) on its own is a gas. But when you mix these two together as H₂O. In Inertia and gravitational magnetic field of the Earth, the new combination exists in both dimensions depending on the field strength, and then the matter strength and what we call, energy.

What this means, in a matter state this gas become liquid as water. If you bring it into the plasma energy level of it, it behaves like gas. We see this as part of the work and understanding of the behavior of materials. And this is why we can boil it, we can steam it, we can vaporize it and we can separate it. Many of you should have understood this. When you created CH₃, (1:30). and when you create a CO₂, and when you mix the CO₂ with CH₃.

The CO₂ and CH₃, the Carbon (C) stays in a matter state gaseous condition of Gans. Where Hydrogen and Oxygen stay in energy level of the gaseous, which is different than the matter state combination.

In a coming days we will conduct a test in China where we will show new characteristics of Gans's, which is unknown to the present world of knowledge and science. And with this we actually show how the new, or the old systems of detection and confirmation does not work with plasma energy. And this will set a cornerstones for development of new equipment for the detection of the plasma.

In the tests to be carried out by the Chinese laboratories for Keshe Foundation. We will show a new dimension in the world of science that separates the Keshe technology completely from matter state physics of today. We did this test some years ago in Belgium. We kept very silent about it. (1:32). As what I call, the technology development which was exclusive of the Keshe Foundation. And we use it in matter development quite rapidly as it strengthened. And now, as we become part of the work with the Chinese government, what

we call, Chinese scientists have to understand this, that we get collaboration between the two sciences of matter and plasma.

And in that process, we can show the characteristics of, for example, Hydrogen as a gas, and Oxygen as a gas, and the combination of the two as a plasma, but within the natural magnetic field of the planet. This will give us a huge advantage in science and technology, and separation of the two sciences.

So yes, both are gases. And a combination of the two, as a gas, creates a liquid conditional upon Inertia and the gravitational magnetic field of the Earth. Where in the matter state, gravity comes from Iron. In a liquid and gas state, gravity comes from Oxygen. Even though the two coexist as one in respect to the others. Because part of the gas, part of the plasma state of the gas, converts into matter state, while it is still in the state of plasma. So, it shows itself as matter, as a gas, but in fact it's a state of plasma.

Now, with the new research centers and with the capability in our hand in the coming years. You will see Keshe Foundation centers, (1:34). research centers will solve a lot of these things and open new dimension in science. This is why we see strange things when we do things, because we always consider what we do is just matter and matter condition, because we call them. And maybe by next week or the week after we might open this new science and technology with the ?? permission of Chinese government officials that this knowledge can be released in public. Then you will understand.

If you understand one point is for example, nuclear warhead we can change the nuclear warhead material into a gas state, which has no effect, while it is within the warhead. We change it to a plasma of itself, which releases and converts. In a way what we say we transmute you from here to there. Americans can launch a warhead, but inside it is nothing on the warhead, even the rocket flies. And this is the beauty of new technology, understanding it. It's like shooting a blank bullet.

And this is part of understanding the changes. Transition between matter and gas. And this is what happens with water. We are so used to it that we have forgotten, or we never understood the reality of the existence of it, how two gases make a liquid. But in fact, they are still in the state of plasma. And that's why 95% of our body mass is a plasma of water, not water. (1:36). And in the world of science, they say 95% of our weight is water. In fact, it is a plasma of water, as we always said, within the skin of the man is a different atmospheric condition.

Any other question?

Q: ... When the energetic's change, the energetic's change does happen for humanity of using plasma technologies, will it complement the parts of the secret space program technologies, such as counter-gravity crafts, zero point energy and "Med-Bed" technologies, etc? How will it affect those existing technologies?

K- Can you repeat that?

R: When the... just get it clear here. When the energetic's change does happen for humanity, of using plasma technologies, will it complement the parts of the secret space program technologies? Such things, such as counter-gravity crafts, zero point energy and med bed technologies, etc?

K- This is somehow. I think, governments will not ever stop this secret program. It gives the leaders, that they're somebody special. And this will come to a point of governments and not the Keshe Foundation.

(1:38). And if we stop research and development, just because a new technology has come, we come backwards. Innovation and development of new technologies is the must for the human race. The moment we stop, because we think we found the final solution, is the time which we stop maturing. And governments will not stop developing, exploring the limits of the knowledge of mankind. And I think with the new technology coming up, these secret technologies will change drastically. Because now there'll be more need for finding more. The secret programs will become much, much deeper and much bigger. Because once we consider ourselves as One race, then there'll be no secret program. But as long as we have, we are proud in the color of the skin, the language, or shape we'll keep us divided and will create this mess.

I had a very strange experience yesterday. I was in a playground, I think, and I heard a blonde young girl in her fifth and sixth, telling another person, "can't you see my skin is white? I'm not one of yours." That kind of thing. And I thought, oh my god. (1:40). At this age it's ingrained in the brain of this child, that she's different, superior, because she carries a white skin. Anyone ?? was regretful to hear this. When the color of skin does not matter, then we'll become equal. Till that time, we'll suffer extensively.

Rick, I am forwarding you a video. You can play this video and it'll be interesting to play it back and I'll explain to you when you receive it, it's on the transition to you, it's getting transferred, it takes a few minutes. You will see the first server, a Space Wellness Center in the world. This is the beginning of and this center was completed yesterday. And in the coming weeks and months you will see Arizona, Uruguay, China, Tehran will be equipped with these equipments which one service center can serve tens of thousands of ill people around the clock irrespective of national, color and race. Same machine is used for a man in China as for a woman in Brazil, and in Tehran and in Africa. These systems are already operational in the hand of the Chinese, what you call, our doctors. And now for the first time we show you the future of the space technology in Wellness. Have you received it? (1:42).

R: Yes, I'm just about to play it here.

K- Okay, thank you very much. (Playing video) This is what you see, is what is to come. It's the first time you see a Space Center, Wellness Center. These systems can reach man in the deepest part of the Universe. (We can hear somebody breathing very hard (on the video)). As you can see, the transmutation and transportation of the Soul and the physicality is within the system. And you will see each system on its own, it can reach all conditions of own Wellness of the body of the man, operated by doctors. This is not a Keshe Foundation, what we call, space, but it's part of the space program. And for the first time we show what is to come. And these machines have been operating for past 12 months, we know how they work. And some of you who've been to Linz, sat in some of these systems. (1:44). Now they have been positioned as one of the first Wellness Centers in the world. Thank you very much. Now you see the future of Wellness, feeding and making peaceful man out of the man. Thank you very much Rick.

R: Do you want me to play that again or is that enough?

K- You can play it again. In this center in the coming months, hundreds of these units will be installed. And more or less, anyone in the world can reach. As you can see, there is room enough to add a huge number. And the doctors will monitor everything remote. Many of you have been through this system. And you sat in it. And you've been part of it. And many of you now using our doctors to use these systems. Now you can see what technology is helping you. This is more or less the hospitals of tomorrow, with no patients. (1:46).

Any other question?

Q: ... Hello Mr. Keshe, can we develop motors and generators based on MaGravs plasma energy, just like electric motors and generators?

K- Yes. But they are more powerful if you know how to use it. (You can stop the video when it finishes. And go to your standard pictures, please). Yes, it can be done. It is possible, but you have to understand how.

Q: ... Can we develop wires and circuitry that does not need Nano coating?

K- What does that mean?

R: I'm not sure, perhaps going beyond Nano coating. Plasmatic wires and circuitry, perhaps. I think you've mentioned that before. Or have used that before in the past. But he would have to explain more what he means by that. (1:48). Okay, we have a hand up here with Lin. Would you like to go ahead Lin?

Q: Yes, hello Rick, hello Mr. Keshe. Our Chinese team has some question, from Knowledge Seekers. He said, hello Mr. Keshe, there has one paragraph in the 14 days Peace Blueprint teaching is that, when physicality reached a point of balance of the field of itself, the essence of our creation is released to lead to a bigger creation, not only to our meager existence of our physicality. He wants to know what that means when physicality reached the balance of its own field? And what's the symptom for if the physicality is not in balance? What is the reason to cause the unbalance? And how to reach the balance of the physicality to its own field?

K- When you reach a balance, there is no sickness.

<< Lin speaks Chinese >>

K- You have to go to another channel Wang Lin. We can hear you, Chinese on this side.

When you reach balance there is no sickness. And when the balance reached between the STM, the STP and physicality (P) of the man, is more or less, we call it, reaching heavens. As the ultimate goal, as the ultimate position. (1:50). And in time, this will bring what we call, everlasting life, in all three dimensions. This is part of the work, of understanding, part of the principle of understanding.

You have to go a step further, in totality of understanding the fields interaction. And we always said, "the stronger feeds the weaker to become in balance." In the human life, this balance, always is blocked by emotion. It's like a "short circuit," in the work of the creation of physicality. And, with the new understanding, with new development, with the new cycle, the systems we've just seen, we try to reach a point where the STM, and the STP of the man, and the P of man, they don't see each other as different, or will not be different, as the emotion is the same between all three dimensions. And this is what is lacking within the magnetic field of the Earth.

I explained this once before, maybe I explain it in a different way today. (1:52). A small tilt in the position of the rotation of the Earth creates the seasonal and daily changes. If you understand this, it's the same planet, the same beauty. But it goes through different emotion, winter, summer, wind and the rest. Because it's a slightly other position. It's the same when one of the three, the Soul, the STP, and the P of man, one of them is slightly out of position. It creates diversity, which some of this diversity means killing. It's not in harmony

with the other two. And the same as the seasons, creating different emotion, killing, the characteristics and seasonal changes. This slight deviation in the emotion of the P of the man, which comes from the wrong fields given by the field of the Earth, has created that tilt. And now we are trying to correct it. That does not create emotion, which are wrong. And this is the job of the new science and technology.

It doesn't take long to create that little tilt to go back and create different emotions. (1:54). Then all the STP, P and the STM become on one line, and thou shall not commit a crime. And that's all it is. As the P of the man, as the emotion, is gravitational magnetic fields plasma based. So, we can correct it with the new technology. And this is what we'll come to realize more of.

Any other question?

While Wang Lin is on the line, I would like to thank you personally for all you've done for the Keshe Foundation China. In the past 6-7 years, relentlessly working to see, to come to agreement with the Chinese government, in what has been achieved in past 2 months. And I'm sure our job has just started. As up to now, was just a taste of work. Thank you very much for your work and your team.

Any other question?

Q: ... Good morning, I have a question to Mr. Keshe. You commented in one of the recent, previous workshops, about the recent passing of Dr. Bararpour, a very assiduous doctor on Keshe Foundation. We know that our Soul is eternal. (1:56). I would like to know if his Soul will continue to work in the Keshe Foundation towards the goals of the Keshe Foundation in the perfect harmony of the universe?

K- It'll never stop.

He was a beautiful man. And he walked through his Soul, then the physicality. His work had a dimension of P in it. But he served through his Soul. He did everything devoted to serving humanity and it will never stop. This will never stop. His work will never stop. Many of you, especially the Iranian team, knows how he worked. He even nearly lost his surgery. He will not go to surgery during Corona, because helping the Keshe Foundation was more important. Helping the sick people in Iran was more important than his surgery and his patients. He used to go to work 2, 3 o'clock in the morning where people were asleep. And his patients used to come to his surgery, because during the day when he was needed, he'll be there. That's how he was. Many times, Knowledge Seekers went to him for help for dental work. They had to go to him 3, 4 o'clock in the morning. (1:58). Because daytime, when there was a need, there were sick people, there were things to be done for the Foundation. He was there. And because he was such a perfect man, his patients accepted to go to him 12 o'clock, 1 o'clock, 3 o'clock in the morning. And he served. And he's still serving with his Soul. We lost one of the most beautiful men in the Keshe Foundation, but in the dimension of physicality. Bless his Soul.

Any other question?

Q: ... Good morning Mr. Keshe, we learnt that for the STM to expand and envelop the STP and P, the magnetic field of the STP needs to weaken. Thinking about transmutation, in order for the physicality to manifest at the point of arrival, would the same have to occur with the STM? Would the STM need to weaken its field strength to allow the STP to go outside? (2:00).

K- Yes, can you, what is the question?

R: Okay, I guess the basic question is, would the STM need to weaken its field strength, to allow the STP to go outside?

K- There is a, maybe misunderstanding, maybe needs a defining it in a better way that we all understand. You don't weaken, you transfer. It's very much in the dimension of acidic and alkaline. And you do not weaken the plasma as its own, as the Soul stays the same. Doesn't matter if it's inside the body of the man, or the body of the man, the STP is inside it. It is transformation between one to the other. It's like it's the same skin of the sheep. Depends you pull it out and use it.

This is what a lot of Knowledge Seekers need to understand. You don't weaken. You reduce the strength of the magnetical, while you strengthen the gravity. But it's the same field. It's very much in the teachings when we say, where is the change? (2:02). Always been one of the points of the science of today. Where is the change between gravitational and magnetic field of the Earth. In fact, it's the same field. Depends where you're standing, as it rotates right through the structure of the Earth. This is what we have to understand. It's not weakening. It's changing the direction of flow. It's in changing the position, which makes you to receive than to give. But in fact, in the dimension of what you are receiving, you're giving more.

Any other question?

Q: ... Thank you Mr. Keshe for this great service to humanity. The golden age is truly beginning. My question is, changing energy into matter, can that matter be changed back to energy through this same process?

K- Of course, of course. This is the magic of Creation when you work with the fields.

The taboo of the science has broken. The not understanding has... of the change in understanding the interaction of the fields. (2:04). It's just what I said just now. If you want to be in a plasma, and if you change the gravitational field force of the center of the plasma, you manifest yourself as a field, as a matter. In fact, it's instantaneous transmutation.

So, if you were a Copper, you became the energy of the Copper, now you become, ?? life through the Copper, it's normal. For it'll be very interesting. One day, man produces a system, that can measure the speed of fields of transition. We'll surely see a light. But the light is, we'll see in two times. Once in the strength of the field of the plasma, and once in the strength of the matter state. Transition time.

But the trick is how you change, when you came to the matter state observation, to actual matter ?? state. That trick is Inertia. And, soon or later, scientists have to understand Inertia in its true essence. But our body does it automatically, because our body doesn't change into matter state, it's still in the Gans state. (2:06).

When you look at the bone structure of the man, when we die the only thing which is left behind is the bone, which is the man, we ?? leave it, we break it, it's a matter state. But that bone inside, amongst the liquid of the lymph, the muscle tissue of the man, is actually in the Gans state. But behaves as a matter within the structure of the body of the man. So, the bone of the man, with that thin layer, which sticks on the skin of the bone, creates a different condition, that allows matter state lives within the Gans State.

In a way, if we look at the structure of the man itself, we see the man inside himself. We consider our physical body as a physicality, but in fact it's a Gans state, it's energy state. But, the way this, what I call, if you understand the terminology, In a way, it is Gans state, it is a plasma state, it is the Soul, encompassing a physical life, which is the bone, which is physical, tangible.

So, when we explain, you expand your Soul to encompass the physicality of the man, you're already in a physical dimension, encompassing the physicality of your bone. When you touch a tissue, it's soft, it's non-existence, it's you just push some plasma's aside and you call it your skin, your muscle or whatever. But when you push the bone, it's solid. It's in matter state within the structure of the plasma. So we know this state exists, but we deny it.

It's very amazing. When you speak to the specialists, (2:08). especially in China, they've used this to block new technologies to come out. And when you put it to them, they deny everything. When I speak about the expansion of the plasma of the STM, to cover the physicality of man, we already know this, because our muscles tissues is in a plasma condition, and encompasses our physicality of the bone within it. What are we afraid of?

When you break your bone, you tear that shield, that skin of the bone. It becomes part of, it tries to become part of the plasma state, but it cannot break through. Even your bone goes through your skin. But when it's inside, it's in the matter state, it compasses through that layer of skin of the bone, it's own environment. So we already know, matter state of the body can exist within the plasma state, we call it the bone. So now, the plasma state of the STM will encompass the physicality of man. What are we afraid of? Why we have brought so much abuse in lack of understanding of this puzzled me for years.

Any other questions? (2:10).

Q: ... Dear Mr. Keshe, thank you for the joyous news of today. My question has to do with Nitrogen, which is presented here in the Netherlands as an enemy of the environment, and it is hijacking, by that he means a drastic reduction of cattle, building permits not given, and so on, the present situation. What could be a more enlightened view, for one of the building blocks of the universes?

K- We were reading with one of the Knowledge Seekers in past couple of days about Nitrogen. And Rick, can you go to Wikipedia and open up... This is very strange when you read it. Open up about Nitrogen and how... where we think Nitrogen comes from. It's very, very funny. It's absolutely hilarious what we have in Wikipedia, which is a corner of our science and our children are taught, how H (Nitrogen) is created. It made me roll with laughter. ... Read it. It's very, very interesting, where is the source of H (Nitrogen)?

R: Okay, I'll just read in the first paragraph here I think, or perhaps not. Nitrogen is the chemical element with the symbol N and atomic number 7. Nitrogen is a nonmetal and the lightest member of group 15 of the periodic table, (2:12). often called the pnictogens. It is a common element in the universe, estimated at seventh in total abundance in the milky way and the solar system. At standard temperature and pressure, two atoms of the element bond to form N₂, a colorless and odorless diatomic gas. N₂ forms about 78% of Earth's atmosphere, making it the most abundant uncombined element in air. Because of the volatility of nitrogen compounds, nitrogen is relatively rare in the solid parts of the Earth.

K- Remember what it says, it's relatively rare in the solid part of the Earth. Read the rest of it.

R: Okay, it was discovered and isolated by Scottish physician Daniel Rutherford in 1772. Carl Wilhelm Scheele and Henry Cavendish independently did so at about the same time. The name nitrogen was suggested by French chemist Jean-Antoine-Claude Chaptal in 1790 when it was found that nitrogen was present in nitric acid and nitrates. Antoine Lavoisier suggested instead the name azote, from the Ancient Greek "no life", as it is an asphyxiant gas; this name is used in a number of languages, and appears in the English names of some nitrogen compounds such as hydrazine, azides and azo compounds. (2:14). Elemental nitrogen is usually produced from air by pressure swing adsorption technology. About 2/3 of commercially produced elemental nitrogen is used as an inert, or oxygen-free gas for commercial uses such as food packaging, and much of the rest is used as liquid nitrogen in cryogenic applications.

K- Note, where it says, how and where the Nitrogen on Earth comes, can you see it? Or go on the Internet and put "the source of the Nitrogen on Earth." Remember what you just read above, about Nitrogen. They say that Nitrogen doesn't exist. And then, when you go to another chapters of science, they say, "it's believed that the ?? knowledge and the Nitrogen was captured, inside the layers, in the layers of the Earth, and it's gradually released. And that's why we have so much Nitrogen." It's written in the papers. And this brings a laughter, one part contradicts the other.

But, what is important is that, in all the present physics, in all the knowledge of the man, because man is ignorant to the reality of the Creation, no science considers the interaction of the fields of the gravity and magnetic field, the speed of the rotation of the Earth. The interaction with the fields of the plasma of the solar system, anything is considered, (2:16). to be produced, to be created. And this is where most of the world of science, is abused and hijacked by scientists. Depending on which side they sit, even they are aware of it, the truth on both sides of ?? some of it.

If what we say in the world of science, that when you rotate the magnetic field against the matter state, creates current and energy as we use in turbines. Then, what happens when two magnetic fields, like Earth and Sun, interact? And they say, "nothing happens, nothing is created." And they don't want to accept the conversion of these magnetic field energies to matter state. So, in the present knowledge, in books, if you just check where is the source of Nitrogen, they tell you it comes from the center of the Earth, because our scientists never considered, actually, the Nitrogen which we see on the Earth, comes from the upper atmosphere interaction of the fields of the two entity.

And, this is the essence of the Creation in the Universe. Depending on the place, position and interaction of the fields, dictates what material is produced, and how far, to what distance, and what is the Inertia and gravitational pull field of the planet, that converts that energy into matter state, due to Inertia.

And, this is one of the biggest dilemmas at the moment, (2:18). in the world of science and conflict between the Keshe Foundation teachings and the present dogmas of teaching which we have in the schools. The gases come from the inner material which is encapsulating it, or they were capsulated billions of years ago. And then we deny the truth about interaction of the fields, create plasma and energy, which then with the interaction of Inertia leads to matter state confirmation of the new materials.

Because it's written, we can't accept it. As one of the Chinese leaders said in a meeting, we write the new books. Let them learn from us. The Chinese scientist sitting next to him said, "is everything here explained is opposite to what is done by scientists and is written." And he said, "now with Keshe technology, we rewrite the books. Let the people learn from us." And now we have to learn the truth. And we have to learn a lot of things in matter state does not fit into the plasma state.

Matter state is shackled to physicality, plasma state has the freedom of the universe. And you cannot explain one against the ???. How can you explain what freedom is, when you handcuff yourself to a wall? The wall of ignorance of knowledge created by ignorant scientists who never understood, and created that wall. Breaking that wall now, with the new technology, understanding the world of Creation, is very hard. (2:20). Because we accepted the past, and now if you go against it, we go against ourselves, what a stupid we've been to accept all that. All we agreed that is knowledge of the matter, this is the knowledge of freedom.

Any other question?

R: I see there's an article here from NASA, the Astrobiology part of NASA, which deals with life in the universe. They talk about, there's new insights about how Earth got it's Nitrogen. And they used to think that it only, they couldn't have Nitrogen originally on the inner planets, because they were too close to the Sun, and it was supposed to evaporate the Nitrogen or something. But, now they apparently have changed their perspective on that, and they now say that the inner planets can also have these volatile elements in them, such as Nitrogen.

K- Nitrogen is not volatile. This, you got to understand, we have to educate our people. I'm fully aware of what the question is, especially about Holland. The Dutch government is using this Nitrogen as a tool to close many, many farms. But in fact, if they were wise, they used this Nitrogen in expanding the, what you call, (2:22). the work of the farmers. They have brought so much false information, that our illiterate politicians have accepted the, what you call it, the false information.

And if we look at the present time, the way we produce or give energy to plants without fertilizing it, through the Gans technology, the scientists will not allow a drop of Nitrogen to be missed. And they'll put more cows on their fields to produce more Nitrogen. But our scientists are misinformed, they are paid by lobbyists and lobbyists pay service to the lips of those who pay them. I once said to someone in the lab, I said, "you're not a lobbyist, you're lipless. Because you lip talks about who put some money in your mouth." And if one day the politicians in Holland open their eyes to the truth, they will realize what damage they're doing to their nation. But that's a policy which is being fed by those who get benefited by it.

Any other question? (2:24).

Q: ... Good morning Mr. Keshe, thank you for so many gifts. There is a wholeness in the emotions of the Souls of a community. But as a band where we manage within a selective song and listen to the instruments separately, the Souls each show their emotion and strength. The union of these forces directs a behavior in the environment. Often one of these Souls has such a great strength, that it dictates the behavior of the entire environment. Could you describe how the Souls accommodate within these forces, even when the strength of some of the Souls within the environment behavior brings discomfort to some of the other Souls. Or in other words, how do Souls accommodate? Absorb fields and release fields? Could it be Plasma dilution?

K- It's accommodation. We accommodate. There is no dilution. We allow and we accommodate for this to happen.

I usually look at the crime rate and domestic violence as a measure of integrity of a nation. And it's amazing what you learn. Just type, you say, let's say, Japan. (2:26). And then look for domestic violence. Domestic violence is where always emotion involved. And then read what is the main structure of the domestic

violence. How is it built? This gives you a way how to build systems which fits the Japanese way of life and thinking. And emotion and social structure. Social structure, it means acceptance of emotion.

Socially, Dutch accept emotionally to have weed. When you speak on the, you walk on the streets of Amsterdam, you don't walk, you actually float. Because there's so much weed, the smoke, and back and forth, that you don't actually touch the material, but you're smoking out of 20 secondary smokes out of 10 people in front of and behind you. And it's socially, emotionally accepted.

It's the same with the violence. When you look at the domestic violence of a nation, you understand the, what you call, the structure of the emotion of that nation. And how and the way you have to restructure your system to fit to elevate them, that they move from this behavior. This is how emotion dictates physicality and the energy within it. (2:28). And it has got to the point that actually domestic violence has become a national sport. And this shows the weakness. When a man limits a person, goes to the point of physical touch or emotional touch or psychological touch, is already lost, has no emotion. Because the name goes with violence. It means, I want to assert my way at any cost. And I'm always right.

Look at the statistics on world domestic violence and then you understand the emotion of a nation, truly. Crime, street crime, does not give indication of the emotion. Comes from hunger, it comes from wanting something, it comes from whatever. But a good indication of the nation behavior, you look at the domestic violence chart. And then, you've seen some countries, women are more violent than the men in the domestic violence. And then you bring the emotion into it, and then you understand how things work. and then you understand the behavior of the emotion. (2:30). And the total understanding of the whole thing, in respect to one nation.

It's like when you go into the Enhancement Center. There are different fields, different people. But when you go in, you feel the fields of totality. We have the Germans. We have the Chinese. We have Iranians, we have Mexicans, Brazilians, Americans, all connected to it. But then you feel the emotion of all races in one go, in one place. And this is what has been ignored up to now in the world of science.

You cannot run a society without understanding its emotion. You cannot run the physicality without understanding the emotion of its Soul. And this is like the tablets of today. They fix you. Physically try to get chemicals made in your brain, but they don't understand the emotion which created that problem in the ?? brain. And we don't have no tablets for emotion because it's plasma based. And now with the new technology, we have plasma. As we handle the viruses, we can elevate the emotion. And ?? can change things.

Any other question?

Q: ... Can you ask Mr. Keshe if he could prepare a Gans for cataracts to be available like the one for the Knee Gans?

K- We have this technology. we have access to it, and is energizing and reversing. And yes. (2:32). With the new Enhancement Units, which are now running in the centers, as you've just seen, you can actually change cataract. But there are other ways that you, what you call it, you can use specific systems to change cataract. But with fields you are very, very, what you call it, in a better position to change it, with the new Enhancement Units. But there are Gans's for it, yes. I made it and it's amazing, the work of it.

R: It used to be eye drops available in the Keshe Foundation store at one point, but I think that was removed.

K- It was, yeah. It's like the, what do you call it, the Knee Gans's. In the future, now in the hand we are in partnership with our people, these kind of materials will be released rapidly. The whole thinking is more or less in next 3 to 5 years, to create a structure like, bigger than Amazon for the products, where everything is controlled under one center. And these things will be part of it. I said before, one of the largest conglomerate organizations in the world has been set up. (2:34). And our backing is not in millions, the backing in billions and trillions, in the coming time. And it carries the Chinese Keshe Foundation, Chinese Keshe ?? collaboration. You will see it. And these kind of things like Gans's and things, will be part of the products of the organization.

Shall we call it a day or you have any other question?

Q: ... I've cooperated with farmers locally to plant crops using Gans technology for two years. I mainly grow vegetables and fruits. At the present, I also grow grapes and strawberries. During this period, some problems were found. The irrigation facilities of local farmers generally have filtration devices. Among our cooperative farmers, the effect of applying Gans fertilizer without filtration devices is better than that through filtration devices, and the effect varies greatly. It is a common problem that some Gans fertilizers have little improvement in crops after being applied through systems with more filtration devices. (2:36). My question is whether the Gans planting technology has been upgraded or updated as the current usage method is not very suitable for local agriculture?

K- Yes, the way you tell us, or we know, use, one of the reasons are not as effective, because most of these systems carry metal springs and metal pipes, or metal connections, and this changes the characteristics, absorbs most of the energy.

Secondly, in the farming of today, I was explaining to this to our Knowledge Seekers in the agriculture very recently, is that you, you apply half of the material, not all of it. You need to understand, especially with agriculture, you need to have the Amino Acid (AA) added continuously. I remember a guy telling me, an Italian, he was putting oil on top of pizza, we have oil, I said, "why you put oil?" and he says, "can you cook without the water?" You cannot use fertilizers without the Amino Acid, and the Amino Acid will have a drastic change in your system, and this is one of the problems with the mass production of the plants.

I was explaining to our people very recently, that to have the same effectiveness as the Gans's you use at home, is forever absorbing and feeding and adding to your Gans's, the Amino Acid. But, the biggest problem or the biggest burden for present use of Gans's for farming is that, (2:38). the technology, the advanced technology of the production has changed forward.

We don't use Gans's anymore, in agriculture, the way you do. When we did the test prior to Corona, Xiaojin does most of the farming for the Foundation, he's the expert for us. He used to travel to different part of China with Gans's and help the farmers to mix the Gans's with the seeds and everything else and then, if they didn't add the right Amino Acid, you get different variation in, what you call it, harvest. The new, the old way has a problem that the Gans's has to be sprayed again over the farm and everything else. The new technology, as we have discussed with and I explained to our colleagues, Chinese colleagues, in the new structure, is that we don't need any Gans's anymore for agriculture.

The new systems we have developed and tested, will deliver what the farm needs, irrespective of what they cultivate. And the use of Gans's directly on seed, the grains, and then watering, has become obsolete. This new technology, through dimension of the fields, is in the hand of the Foundation in most of the new factories are set up across China. You'll be seeing it to be done and we'll say goodbye to fertilizers. In a way, we change the environment. And that environment allows increasing production and increasing harvest. (2:40).

But if you use pipes and Gans's and things like that, the effectiveness is not there, because you don't carry the ?? AA, you don't carry the glue, you don't add AA to it. And secondly, if you monitor, in some farms you're successful, in some you're not. Look at the valves and the spring system, if it's a metal on it or ?? metal across??. Because metal absorbs most of and transfers the energy of the Gans.

A lot has changed, a lot of technologies that we kept in the background, now is transferred directly into the new company or ?? corporation. So we'll see them very rapidly. In next two years, new technologies, new sciences, new materials, will emerge out of China Keshe ?? corporation. We will dominate the world of agriculture. We'll increase the harvest of Chinese farming by at least 3 to 10% depending on different grains and products. And China will become one of the main grain producers in the world, replacing Ukraine. Now you know why.

Keshe Foundation is committed to the Chinese nation to a signed the agreement. And we'll see the prosperity of the nation, with it, the rest of the race, of the human race. And the technology which was given, held back, we brought forward to bring advancement and prosperity for all of us, because this technology simultaneously will be transferred through "One Belt, One Road" agreements of China with all the nations who are part of it. (2:42). Very soon there'll be any third world nation, they'll all be One nation and all come to technology and support will come through Chinese structure.

Any other question?

Q: ... In Brazil we are unable to get the dual splitter for the correct configuration, and what would be the impact in the, or deviation in the research results, if we participate with only one system, as in the previous sessions?

K- The reason we recommended to get the splitter, you can still participate with the one headphone, but it works through the Soul. The reason we recommended if you can do a second or a third headphone, was to reach... because a lot of people are joining these sessions, for different reasons to themselves. We hear they're joining because they have cancer, they're joining because they have cataract, they're joining because they are depressed. And this is all up to you. And if you joined in the last week's session, we don't recommend anything more to put. But we just say, if you do, this is what is. If you could join in to expansion of the Soul, to find wellness within the body, that's quite well. Because you do it through the brain of the man.

But in a way, when you use the second and third headphones, you show where they wanted to be. (2:44). It's my knee hurts. That's where I want it. I want my Soul to be elevated. I feel depressed. It's an emotion of the man. And so the headphones recommendation is for you. And the new system does not have left or right headphones. It's set in a way that doesn't matter how you use it, it works.

Any other questions?

Q: Dean ... Mr. Keshe, you've mentioned many things today, as always, in Knowledge Seekers Workshops. My question was going to be about the plasma of a Soul of a government that takes on this new condition that you brought forward. How would this affect, first of all, economically, which I think we understand the impact it will have further on down the line, but emotionally for the other nations, that once one nation has this plasma as a Soul incorporated within their system, how will this affect the other plasmas of the governments and the Souls throughout the rest of the globe, the planet?

K- I tell you what I said to the Chinese leaders in a meeting. And is, when you speak to Biden, what would you like him to hear? You can plant words in his mouth through his brain and Soul. And what he says this time, you know it's the truth, because you planned. You decide the operation of the Soul. (2:46). Because you elevate it. You don't control it.

The biggest fear is, if the Chinese leaders become so aware and so self centered with the power they're given, that they start a new dilemma in what we call, world leadership. And now we have this technology, we are the ultimate. And I always warn them of that. That with this technology, your nation has to become more humble to serve, and not more arrogant than we have.

And so in that, with that frame of mind, we'll see the elevation of the peace across this planet. When you do technology in exchange for peace with an African nation, let's say, with 100 billion budget a year, which 30 billion of it goes on defense soldiers and the rest, now that 30 billion is available to the nation. It changes life of many people. And that's the commitment we'll take in exchange for technology development. And with it, you deliver technologies which shows.

In our thoughts, and the way we think, and it will most probably take shape in the new structure. Let's say if you have a disaster like an earthquake we've seen in Turkey recently. Many people suffered with pain. Many suffered with lack of many things. (2:48). Many suffered with lack of medicine. When we position the Chinese satellite over this zone, immediately they'll be fed, with the immediate effect, we feed this nation. We supply food through energy, we supply medicine through energy, and they take what they like. We shower prosperity, life on them. And this is where it becomes rapid deployment.

Nowadays, when we have an earthquake, we have damages, the survival takes months and years to receive supplies or whatever. We have shown in our tests we can change the environment. So if it's in the middle of winter, we can change the weather to minus. And we have seen it is that it can be done, but you have to know how and why. You don't make deserts to become green, because without the deserts the Earth's condition will change and brings more harm.

But temporarily for two years, three years, five years till the structure is rebuilt, people have home they don't need to suffer with cold in tents. They don't need to be short of food, because you feed through the system. They don't feel hungry, because they know food has arrived, it's already there. And I think within the next couple of years, working with the Chinese organization, we'll deliver these kind of satellites to disaster zones.

We learn more, because this become part of the colonization. (2:50). There's no use going to another planet with, as I say, "monkey suit." We have to be free. We have to feel the touch of the love of our child on Moon. We don't cuddle and kiss and feel each other till one day we come back on Earth, because the rest of the time we're in monkey suit. You should be able to feel that at any point in the universe. And this technology gives that opportunity. And if we can do it in space, we can do it in disaster zones.

Q: Mr. Keshe, how did the Chinese landing on the Moon go? Did they manage to retrieve the flag?

K- We tell you when it's done.

Q: Okay.

K- We tell you. A lot of things with us, with Chinese, is tied up with security and non-disclosure. And today's disclosure, what we disclose, we already informed the Chinese. We go public.

Q: Thank you Mr. Keshe for everything you're doing, quite amazing. Thank you very much Mr. Keshe.

K- You're welcome. Keshe Foundation has become one of the organizations which will bring change in conjunction and partnership. And I'm sure more and more nations will join this cooperation. And in long term part of the structure is to spread the knowledge to bring peace across humanity through prosperity. And prosperity is when no child sleeps hungry and no man dies on the streets of Washington frozen to death with cold. (2:52).

Q: That is the beauty of the... of what you're sharing Mr. Keshe. Thank you.

K- Oh, it's all of us. Keshe Foundation is all of us. You're taking little pictures and being there to share the knowledge on video camera. To those who spread Gans's in the cities of Mexico, and Brazil, and the old lady in Shenzhen pouring Gans water into the ocean, and the sea and the rivers. We all done our parts to where we got to today. And it's just started. It's not finished.

Q: Yeah, thank you for connecting all the Souls Mr. Keshe. When I meet other fellow Knowledge Seekers, and I see the emotions that it brings in them. And many people, when they first come, first of all, they come and they always have a problem, an issue with an emotional imbalance in their body that turns into a physical imbalance. And it draws people in. And then you see the plasma start to work with them and that you see the emotions start to change. And I don't think sometimes people realize it could because it's such a big readdress of the condition. That if you took it over a period of time and they go back to the moment they first became aware of it and let the plasma in to themselves, which is already always there. But once they do this, later on down the line and they look back, it's quite a big difference to their emotional state that's taken place. And it's that initial point where you allow it to happen, where you open up. (2:54).

K- Thank you very much. We'll see how we'll bring the change. As I said, for years my problem was creating finances to build up the factories and we saw the cheating and everything, all which went on in the past few couple of years around us. Now that burden is gone. I don't have to worry about where and how the factories are run, how the wages are paid. This is guaranteed by a nation. And all for us is to develop, and develop new technologies to guarantee prosperity of man. And what I've seen, Chinese have planned and we've seen in past time, you will see one of the most advanced factories, structures and, what I call, the start of work.

Q: Mr. Keshe, can I quickly ask another question? Because I think it's an important one, because many people's understanding of China, when I speak to people here, they always say, oh, China, I hear so many things about it in the wrong way. Can you just open up and explain a little bit about why China is going to, why it's going to be such a, you know, the right place for this technology to bloom and to be brought to the world?

K- China mainly two ways, two things. Their line of thinking is very much in line of us. They don't have a religion. Okay, some are Buddhist and then we have the others. (2:56). There is no fanaticism the way we

see in ?? embedded, except the Muslims in the West of the country which touch the Islamic world. And so you find a balance in Taoism, Confucianism and the other part of the upbringing of the nation.

Secondly, in the West, we are always been poked to be afraid of something that with that, they allow us to think how better we are, and how more powerful we are. And this is the problem. When you speak to the American military, I have spoken to them many times over the years. They are the superpower. We have the nuclear. We're going to do this, and we're going to do that. When I sit and talk and eat with the Chinese military, they talk, we don't want war. And we have to create weapons to stop the Americans to, their aggression. If we can stop the American weapons, we want peace. That's all we want. And it's totally different.

I've sat and I ate with American generals. And I've sat and ate with the Chinese generals, military officers, which is forbidden for civilian to be with. And it's a pleasure to sit with Chinese military. And it is, it brings into convulsion when I sit with American military. It's all about killing. It's all about superiority. (2:58). It's all about destruction. It's all about the weapons. I sat with them for three or four hours in Seoul in 2008. And I saw how evil the man can become. And in past 5, 6 years, I've sat with many Chinese military people.

<< audio of Mr. Keshe breaks >>

K- I'm back. Some people don't like us to talk. Can you hear me?

R: Yes, we hear you now.

K- Yeah, what did you hear?

R: Just when you said, Chinese military people, that's when we lost the connection.

K- Yeah, Chinese military people always talk about peace. American military people, (3:00). they talk about weapons, nuclear and war. And, it's very strange for Iranian nuclear physicists to sit with both sides. I'm one of the very, maybe the only one or very few, which could walk the American embassy in Brussels as Iranian nuclear physicist. I've been to the headquarters of the CIA in American embassy in all sorts and I've sat with them for many times in South Korea and everywhere else. They always talk about superiority, killing and this and that, and everybody else is wrong except us and our weapon.

When I speak with the Chinese military, it's a pleasure, it's absolute pleasure to work with these people. They talk about peace, we want to stop this war race, weapon race, and spend the money on our nation. But we can't do because the Americans... I said, "now we have the technology to stop all the weapons." What's going to happen now? What is going to happen to massive Chinese army? It's going to be a dilemma with them because there's no more enemy. You strip the enemy of his biggest, strongest ?? sword. And then we see the nation is different.

Taoism has a strong life in Chinese culture. Whatever I heard in the past, before I come to China, when I look at it, has no meaning, is the brainwash of Fox (News). You walk the streets of Beijing or furthest villages, you see cleanliness we don't even see in Switzerland. We see the safety which doesn't exist in the West. We cannot even think of it. (3:02). They can't tell us that because they can't give it to us, so they have to make a devil of China.

I lost my phone sitting on a shop front waiting for a bus, a few years ago. And I thought, that's it, I lost my phone, it's gone. And within a couple of hours my phone was back in my hand. It doesn't happen. In Europe your phone lost it's gone, they break it up, it's gone. And you walk the streets of Beijing, you walk the streets

of China at night, it's as good, as safe as daytime. And they have to make it. There is poverty here. Without a doubt, there is poverty. It's 1.4 billion. And so much to do. But everything is, as much as possible, has been brought, don't forget you have to change culture and life of billions.

In Europe, we still have many children going hungry at night, because there is no financial ???. It's the same here, it's the same as Africa, and this has to be changed. But in general, you find humans inside the Chinese culture, because they have suffered so much. I have a lot of respect for the Chinese, because I understand where they came from and where they are going to, and they are in the transition time. When I came here in 2008, 2007, for the first time, there was scaffolding, all these things, building and building everywhere. When I look at the horizons of Beijing, you hardly see any, if there is any, the development has gone, it's finished. (3:04). And in that process, they have taught their people how to be. You don't see anybody littering in China. It's impossibility. In Italy, littering the high streets and motorways is a national sport. You find bed mattresses, cupboards, bin, rubbish bins of the house on the highways of Italy. I lived there six years. It's national sport, as I call it.

And it's amazing. I haven't become Chinese to say this. I've lived amongst them long enough to see the society and the structure. There is still a lot of faults and a lot of things to be done. But in general, there is a lot of fear in the nation. And that fear has come through changes. But that fear stops them doing a lot of wrong things and keeps them on track.

You've got to understand, before his Excellency President Xi of China comes into power, bribery and all sorts of criminal work was part of the structure of the government itself. And it's taken Xi, 10 years plus to change that. From the judges to ministers to street cleaners were all involved in it. And they put people on the street and built houses on their land because they could make profit. He's put an end to a lot of things.

There's a lot of uncertainty transition. And with it, have brought a lot of confidence in the nation.

And I remember it's July of 2023. (3:06). Sorry, in July of 1976, my brother arrived, bless his Soul, from Tehran into London. And when he sat in the car going from Heathrow airport to home, he said, why have I come to live in this village? This is worse than Tehran. And they say, England is a beautiful place. We live in a better lifestyle in Tehran than here. I want to go back. Because they tell us it's a different thing, that the streets of London and Europe are this and that. And where we came from Tehran, London was a village.

And now, I see the same thing in China. When you come, you appreciate how beautiful country. There is change, there is transition, but most of the transition is done by the last generation. And, you walk the streets of Beijing and other villages, you, towns, and I have had the privilege of traveling all of it. And, you feel, but you feel safety, you feel good. And it's there, it's part of all the nations have different characteristics. The nation is going through a transition, it hasn't stopped yet. I think China needs another 50 years to complete this transition.

But where it is now is very different. You don't see violence on the street, impossibility to see violence here. As you know, in London, every night after 8, 10 o'clock, you don't want to walk the streets, (3:08). even daytime, drunkenness, violence, beyond imagination. Even in China, 6, 7 years going and coming, never seen violence. Car accidents here is very rare, extremely rare. Because in chaos there is order, in order there is rule.

It's different type of living and life, than we are used to. And they have made the devil of China, because they can't tell them how good it is. It's like Gaddafi in Libya, he gave everything to his people, they were the richest, most comfortable nation, and they made the devil to get in there, to get to the Central Bank. Don't believe what you hear on the Fox News, because the name goes with it, fox.

I'm sure many of you will come to visit us in December, and you'll understand China is not what they made us to believe to be. We went through a transition, it's not perfect. Still going through transition, like every other nation. We are catching up with technology difference, with advancement which creates problem for generations and separation, but in general. What you dream in the West, you live in China. It's not a dream, it's a reality. No crime on the street, no drunkenness, no theft. You leave your bike on the street, you come back and pick up your bike on the street. Nobody touches it. As I said, I was in Forbidden City, (3:10). two, three years ago. And so we were going through one section, to another up the stairs and to the platform, and going down stairs to these different palaces, whatever they call it. I noticed a Chinese girl with a backpack open with an iPad, open on it and whatever. And I tapped her on the shoulder, I said, "excuse me, your backpack is open, and your iPad, everything is showing." She said, "Sir, this is China, it's safe, I have no worries, I'm not in Europe." And I stood on the platform of Brussels train station, and I saw a Belgian opening a backpack of a Korean, and I said, "what're you doing, what're you're up to?" He said, it has nothing to do with you." That's the difference in the culture. You have no fear of guns on the street, you have no fear of whatever. You never see a drunk man on the streets of China. And you never see dirt. If it is happened, it gets cleared up very quickly. But you see, beautifully dressed people, even better than the West. Now, taking that culture takes a long time. Thank you very much, and we'll see you next week. Hopefully, we'll learn more from each other. Thank you, Rick.

R: ... Okay, thank you everybody for attending today's 495th Knowledge Seekers Workshop. Any leftover questions you can hold over until next week, and we can answer, answer them then. (3:12). Let me see our next Public Teaching Workshop. We get the calendar up here. We'll be coming up Tuesday, July 25th, which will be the One Nation, One Planet, One Race for world peace and justice. That starts at the 4 PM Central European Time. And that's with members of the Universal Council, who will be presenting the workshop and answering questions for folks.

K- Can I just come in once, please. Those of you who enrolled to be in the session, the for what, five day session in Manchester, please make sure your visas and everything is in order, that we don't have delays in arrival. And book yourself into one of the hotels in Manchester. Manchester is a small city center and the conference will be held within the city center, it's a beautiful city. I lived there for 30 years, so it's an amazing city. Thank you very much.

495 KSW July 20, 2023

ENGLISH TRANSCRIPTION

(:24).

K- Yes, thank you very much, as usual good morning, good day to you, and whenever and wherever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back and as usual we hope we share knowledge and we learn from each other some more knowledge of Creation and what we are up to as humans.

As usual we make you a couple of announcements that we keep ourselves up to date. The Keshe Foundation conference or what we call, the meeting of the August 28th, which will take place in Manchester. Is what is upcoming to us. And then we follow the meeting of the change of the date from October to November, 6th to 10th of November in London, and then 11th and 12th, the ambassadorial meeting and the weekend conference in London. We expect diplomats of a high caliber and from major nations to join. And invitations have already gone to a number of countries, and we're sure that they will attend. The purpose of the London meeting is introduction of new technology (T) in space, and bringing forward the next step in space development. (:26).

As usual, we keep our work to what it is and what's going on. And as we announced, the Keshe Foundation Wellness, what we call, Centers, has already gone into operation as of last week. And we'll see where we take it, and where it's going to go. And it's not in the hand of the Keshe Foundation, now it's in the hand of the doctors, and they will take it a step further. And hopefully soon we open operation in other countries the same.

Many of you ask questions and raise questions about the Keshe Foundation and our position with China, that we needed to be clarified. Keshe Foundation has become a joint collaboration, organization for a spread of the technology with the Chinese, what we call, nation and the government. We have become and very soon, the titles of the Keshe Foundation companies will switch over to the, and in the hand of the Chinese government authorities, in a way, of the partnership. In a way, Keshe Foundation will become China Keshe Organization Corporation. This allows us to spread the knowledge very fast, very rapid. The strength which come with the power of the Chinese government, financially strengthened, politically to spread the knowledge and technology, is beyond the imagination of many, many nations.

We've been lucky, thanks to most of your work, from all of you and the Chinese group. Keshe Foundation has, officially is becoming, what we call, a Chinese collaboration organization. We are the provider of technology. The rest of it, will come with the support of different aspects, sections of the Chinese

government and different organizations. (:28). We have been around ??, we tried to bring the technology to open, and in next 10 years we have a commitment with, from us, with the Chinese, to spread the knowledge as fast as possible.

And this will take shape in a different way. At the beginning it will be slow, but as it builds up in next 2, 3 or 4 or 5 years, you will see, massive changes in the Keshe Foundation operation and organization, and the spread of the technology. Does not matter if it carries the Keshe Foundation name or not, but if the knowledge creates peace, brings prosperity, and change the life of the humanity, that's what we came here for. And, we are not there to change, we are not there to... change in a way, next time, next change. And this is what it is, we stay the same, we stay the human race, we stay peaceful people. We will not change by the name of the religion, creed and whatever, we become one race, and opens up the door for us.

In our collaboration with the Chinese government we foresee colonization of the space in the next 2 to 5 years. All my effort goes to back, step by step. You have to understand, just becoming part of a partnership or connection. And establishing a line with the Chinese, does not make it easy. It's harder than, and harder than when we're operating on our own. The reason for it is, we have to prove every step of the technology, to scientists of Chinese government. We have to, step by step, go forward, expand, explain, show, demonstrate the correctness of the technology. And then find a way for the Chinese to commercialize it or whatever it is.

We are extremely highly involved in what we call, space and defense technology in the space. We don't create the defense technology for us, for Americans, or the Chinese. We create a defense technology in space, man can protect himself, (:30). defend his Soul. Defend the interaction of the fields of the universe (U) with his Soul. If you listen to the two intros, was very, very interesting. The first intro was totally about the physical life. What we do, what we've done, MaGravs, Gans's and everything else. And the Intro number two was about the Soul of the Man (STM). And both are covered within the teaching and education of the Keshe Foundation. Depends on the Man, if he wants to go with Soul of the Physicality (STP), or man wants to go physically. And this is where we bring a change, where we diversify.

We'll see many parallel technologies and sciences become, because the enlightenment comes through the STM, and not through the knowledge, Internet, and the rest. Some people receive the knowledge as Keshe Foundation Knowledge Seekers (KS), some others receive the knowledge, as I said, through the Soul. They no need to be from this planet, they are from other dimensions (D), but the message has become known how and the way to do.

In the coming weeks and months, we will see a radical change, even in our teachings, in our presentation of the teachings. And what is beautiful with is, we can still teach, where a lot of, a lot of other organizations have hit the firewall of Chinese teaching, Chinese system. We teach from China, we teach deep inside China, we teach with the Chinese, we work with the Chinese, and Chinese allow, that the teaching of the Keshe Foundation to spread from China. Very soon you will see different kind of teachings. Very soon, part of the Keshe Foundation knowledge will become part of the public knowledge. And this is thanks to many of you which has brought us to here.

But, what's next for us as Knowledge Seekers? What is the next to learn, to be there? (:32). To, in a way, be ready for the change. We are... we have decided to travel with the STM. We have decided to travel on a energy level, than the physical matter level. There are a number of questions, which I've raised this before, from Knowledge Seekers. And, it's nice for you to understand what it means, what it entails, and what is, what is to come, what it'll bring to us.

On Earth, many of us have witnessed the ?? Sun barrier. When the speed reach the point that the molecule, the structures compresses, and we see what we call, the Sun. As Einstein has put in our head, the speed of light to be the ultimate, which is 100% wrong, what is going to be the light barrier for the man? Is there such a thing as a light barrier? Or is it, in a way, going from one strength to another, will meet a barrier? Because the light is in every dimension of the field strength. What would be the effect of it, on the STM? What will be this transition, for man to learn to go to a higher order, or to go to a lower order?

When we get enlightened, we go through understanding of a higher order. Does that enlightenment means going through the light barrier? Going through a higher order to see more? Or do we come to the point that in transition, we find new dimension? (:34). How do we handle it? How does man goes from one strength to another? In the physical life, when you get enlightened, you'll feel it physically. Because your emotion changes. Your understanding changes. And then you say, "I understood."

What happened to us when we go from one field strength to a higher? By chance, by elevation, by receiving more in the process of giving, we connect to a higher order. Do we go through that light barrier? Or do we go through a Soul barrier? That the Soul needs to be enlightened. And does this need to be without the dimension of physicality (P)? Or does it happen when we are in a physical dimension?

Then it comes the fact that, do we need to die? Do we need to change the physical dimension of life, to receive the enlightenment, to receive the knowledge? And does it matter us, as a physical body of the man, feel the change? Do we go through the Soul barrier, and we feel it, and we come out of the other side with more knowledge of the Creation? Or do we, as we become traveler of the space, travel like everybody else in one dimension of the Soul level?

Then it comes for mankind to understand in space, as you have physical dimension changes, you have Soul dimension changes, where those who are enlightened, enlighten those who are less enlightened. (:36). And then what happened to those who reach the ultimate enlightenment? In a way they become part of the Creation and the Creator.

In the coming time, in the teachings, we start to explain this, especially in the upcoming sessions in Manchester, London and Beijing, for those who attend, the enlightenment. The ultimate goal, to reach the point where the dimension of physicality does not need jet planes. As a few of those who participate in Manchester sessions wrote, do we fly in with a plane, or the Foundation will transport us or transmute us with our Soul? Have you enlightened yourself to do that yourself?

Unfortunately, in the world of Creation, there are no travel agencies that you can buy a ticket of Soul. It's you who has to achieve, has to reach the dimension, that you buy the ticket for yourself to the next level.

When the man loses the fear of what we call, death, ?? at hand. The biggest barrier for most of the Knowledge Seekers, most of humanity, has been the fear of separation of the STM from the dimension of physicality of the man, for the man up to now considered the Soul to be somewhere.

Now it comes to the point for most of you Knowledge Seekers, to ask yourself one question. Would you attend the conference in Manchester, in London, or in Beijing and appear in the dimension of the physicality through your Soul. Or, as usual, like rest of us humans, (:38). you buy a ticket, wait in the airport, and appear with a suitcase on the other end.

Now it comes to the point that in upcoming teachings, in upcoming conferences and sessions in Manchester, in London, and in Beijing, we start training you to start understanding the process of the change. Transmutation. Because it cannot be done in an aircraft, it cannot be taught in a way that one does not understand, does not feel, does not see the expansion of the STM. And in the upcoming sessions, we try to bring the dimension of the Soul of those who participate, to understand another way of living.

We are not a religious organization, we are a scientific organization. And scientifically we show you, the way scientifically you go to NASA and you become part of astronaut and you go through all these years of training and maybe one out of twenty will be qualified to fly. With our teaching everyone has to qualify. To be able to travel in the dimension of the STM. To be able to travel without wings, to be able to travel without going to the airports. Unfortunately, there is no landing strips on Moon, Americans haven't gone there yet to do it for us, and there is no landing strip on the Mars and the rest of it. You come in and you literally land in. Would you like the legs down or would you like to land on your head?

So you understand, goes back to the same position, as I always said, "you're the last man standing for your Soul." Nobody else does. Everybody else is busy with their own Soul. And now you have to learn, you have no choice. (:40). In a way, as it becomes more fashionable and more people go to Mars and Moon and come back and tell you everything else, and you say, "is it really?" Because, you have not reached the process to understanding of the elevation of your own Soul. The connection, the loss of the fear of the physicality not be there, till you get there, and it's actually there, and you enjoy the presence of your own physicality. Even though you might have 20 legs and 4 heads, because, you have to directionally find which way you're going to land and how you're going to hold these 4 heads together again, with twenty arms and so many legs.

Or, would it be in dimension of plasma, and you'll never physically manifest yourself? In the upcoming sessions, especially in Manchester, and then in London. When you come and when you go through the sessions, through to the, what we call, meeting with the ambassadors, many of you will enlighten the world leaders, the ambassadors. Not even talking a word with them. You become masters in understanding. We just guide you, we just show you the way. It's you, who has to reach that point, not us. Nobody will come to pass exams or achieve something. Everybody comes in to find themselves, in the dimension of the Soul, in the dimension of the field strength of their own transmutation and transportation.

In a way, those of you who attend the Manchester session, and those of you then, with the others join the London session, and those of you then, gather together in Beijing, sometime in December hopefully, then you should be able to be the travelers of the Universe through your own Soul. (:42).

We have not built you any airports, even though Beijing has just opened up their own beautiful South Beijing airport. As we have no helicopter pads on the roof that you can go from there to take off. You take off within your own clothes, you departure with your own strength, you understand the expansion of the STM. And then, you'll find out, by your enlightenment, how many more will be enlightened. And the doors ??, what I call, to bring the change, gradually opens up. But, as I said, there is 8 billion.

<< audio of Mr. Keshe breaks >>

R: Hello Mr. Keshe, we lost your voice.

K- Can you hear me now?

R: Yes, yes we can hear you now.

K- We are in a position that you might lose us a few times, but it's okay. Apparently all our, what we call, VPNs and everything is in a big mess in the past 24 hours, we don't know. We know the reason, but it will be sorted. It's not our problem, it's an international problem.

In a way, in a coming time, in a way, in the next few months, as we push to the dimension of the both, travel with the Soul and travel with the dimension of physicality, we will help the nations to achieve what most of them want to see, physical transportation. And then, when we achieve these rapid fields ?? of transportation, we add the transmutation next to it. That it means, you can go, (:44). but there is a home there. We have already colonized the Moon. You don't need to wait and go in four days or four hours, you are there and you still see some more humans, could be cousins or could be somebody from another part of this planet.

As I said to our Chinese counterparts, colonization of the space is the responsibility of the Chinese nation. Because, it'll become place of peace, it becomes where most of people would try to achieve balance in both the physicality and emotion. The collaboration of the physicality, the STP, and the STM, is the responsibility of individuals and not governments. You cannot elevate the STM by borrowing money from the government, and you cannot elevate the physicality of the man by feeding it whatever a government gives you. It becomes your responsibility.

And in the process of next few weeks and months, we go in that direction. As I said, we'll talk a lot, we'll teach you a lot. And gradually, as there are no universities, and there are no education centers, to show you the elevation of your Soul, you'll become your own teachers. The new messengers. You'll receive the message by enlightenment of your Soul, and then you test it, through the dimension of physicality, through the dimension of the, your own interaction of the fields.

In sessions, upcoming sessions, we'll teach you how to expand the Soul. We'll teach you how to feel the expansion. And we teach you how you are in control of everything, in every dimension. And then, if your thoughts, from what we call, (:46). Manchester conference, to the London conference expands in dimension, you'll be able to enlighten the politicians, the diplomats, and those who attend the London conference on the 11th and the 12th.

You have got to remember, we are inviting many, many, many nations, and we're inviting world leaders this time. As you know, as I said, we had to change the conference from October to November, due to the, what we call, the conference in Macau. As the presentation of the health of the new science and technologies, hundreds of world scientists and health people will attend, will be inaugurated by his Eminence the President Xi of China. And Keshe Foundation is on the panelist of this conference. And for that reason, you will see, we can enlighten the world leaders, even during that time.

Many, many eminent scientists will turn up in this conference, and be a panelist guests of the conference. Through that conference we enlighten the world leaders, we enlighten, the, what we call, the scientists of the world, to understand about the creation of the man. And how the knowledge will come to sit, will come to change, will bring that change to all of us.

We are sitting here, at the verge of the change for humanity. And many of us are lucky enough, that we are not waiting for that "Methi." We are not waiting for that "Messenger." We are not waiting to change something to become. We are looking inwards, to bring the change ourselves to ourselves, without a change.

I was talking to one of our Knowledge Seekers very recently. (:48). I was in talk with Iranian officials, religious leaders. And I said to them, the discussion came about politics and religion. And I said to these religious people and politicians and whatever, I said, "I'm Iranian. And then, believe in Islam." Your problem is, you become first Muslim and then Iranians. And that's where you have to change, and I don't have to. I stay loyal to my roots, because, we are still believing in Muhammad, waiting for Methi. And when he comes, what are you going to call yourself? You're not a Muslim anymore. So, you have to change again. But, if you stay true to your nation, no religion can change you. Because you still believe in the principle of the truth. And this is how you stand.

If we go from this planet, we ?? bring the truth, the ethos of this planet. The ethos of Mitra. We don't do wrong. We don't do, we don't talk wrong. And even our actions, our talk, thinking, everything is one to elevate the others. We don't need to change just because a new religion comes, or we are waiting for that change to come. And what would be the name of all these Muslims when they come? Do they become Muslim Muhammad? Or do they become Muslim Methi? Or we forget about it. And what is all this war and conflict in the name of religions, where they're all waiting for that Methi? What are they going to call themselves? Christian Methi? And then Buddhist Methi? And Jewish Methi? And then, or we all believe in the totality of the change. (:50).

You can see, man, when he carries the truth within himself, does not need no Methi. But he is the Methi of himself. He is the savior of elevation of his own Soul. He understands where he wants to be. And this is the criterion of what I call, to become the "passengers of the universe." You cannot become passenger of the universe when you're always relying on a pilot. You're always relying on somebody to give you, somebody to guide you. Where you guide yourself, where you learn to tap into the universal knowledge, then there is no change of religion, you're always from planet Earth. Does not matter where you land, nobody can prophesize, and nobody tells you what is right and what is wrong, because there is no intermediary between the STM and the STP of the man, and the man in himself.

If you think of it, we always talked about emotion. Physicality is part of Mitra, when it says, "you don't do anything wrong. Do good, in the dimension of it." Do good, means the physical life." Think good, which comes from the Soul. And then you understand, the three Ethos of Mitra, is the Ethos of the Soul, STP and the physicality (P) and nothing else. It's the religion of the universe, it's the religion of the Creator. And nobody can come between you and the Creator.

Now, I'm still waiting for the Iranian politicians, who are Muslims and the diplomats, to answer me, which one they are? Are they Muslim Iranians? (:52). Or are we Iranians who accept Islam and then when the next comes we believe in a path, we see what it is. We don't change religion, we stay true to ourselves. And it's the same for all of you. As you become passenger of the universe, you stay human based, human race and with it you live through the "Ethos of Mitra." There is no religion, but the principle of living in the universe. One is for your Soul, one is for your STP, and one is for your P at the point of manifestation.

So, we have to come to understand, how what we choose, in the things we choose, we become to believe in, to live in, because of the power of our Soul and nothing else. This is the beauty, why you understand we chose China? Because there is no religion based fanaticism here to be, to create war. Chinese don't fight and create war to expand Buddhism or Taoism. They don't have what is in Vatican to have more followers, as they contain in what they have and they stay in what they keep. The nation is balanced.

So, with new understanding and the new knowledge, we bring that elevation too. And that elevation sits with all of you, with all you Knowledge Seekers. Is not how you make things, is how you make things out of what you have, through your Soul. Any of you, in the next few months, in the next few years, will be able to put his hands out and create what you need, if you understand. (:54). It's not the first time, I tell you. Now that the knowledge has expanded, you understood more, you can do. Go back to the teachings of the past, I said, "you can put your hand out, and between two hands you can create light, which the interaction of that light, and the light of the STM, can create anything."

So in a way, the knowledge, the creation of the knowledge, the expansion of the knowledge, the understanding of the knowledge, becomes the knowledge of the universe. It becomes what we want to carry with us as human race in the depth of the universe. Does not matter we fly, using UFO, we go to the Americans, we go with the rocket, or we travel with the dimension of our Soul. At the end of it, we have to manifest somewhere to confirm our existence. And wherever, in whatever shape and dimension, we manifest ourselves, we have no choice but to live by the Ethos of Mitra, in all three dimensions of the life, in all three dimensions of existence.

And then you come to understand one point. Your Soul is a live thing, it's a live entity. Your STP is a live entity. Your P is a live entity. And the interaction of the three has to be in balance, for it to find its best position and its elevation in all realms of the Creation by itself. And no prophets, no religion can tell you so.

As I said many times, I've traveled the span of the universe, except on Earth, I have seen no churches. I've traveled every corner of this universe, I've never seen a mosque. (:56). And I've traveled in all dimensions, I have not seen a synagogue, let alone rabbi. Every man, every creation you meet in the universe, is a prophet himself. Because, he believes and lives in the dimension of the correct conduct of the Soul, the STP and the P of the man. Now you understand, where we are taking you into.

You can still go with the balloons, be what I call, ?? you just do it because it's your great grandfather, the balloon ?? runner. Or, somebody did a flight with a rocket. But at the end of it, if you want to travel and have the freedom, you have to travel with your Soul. And, while we're under there, sooner or later, if not you, your grandchild or your great grandchild, will learn to do it. Why do you need ?? when you can do it yourself? Then when it comes to them, you can teach them already in what to do.

The totality of the teaching, the totality of the way we are going. Even though, as I said, when you're alive you have to keep yourself busy, otherwise you're just a stone. Sit there and wait, till the wave and the rain comes and gradually, even the stone cracks to pieces and become a dust. But, we have to do things. We keep ourselves busy, we show you Energy Unit, we do a bit of teaching and run around and do some other things. All of you, you do your own best to be physically alive. But, when do we start the separation, between the STM, and the dimension of P of the man? (:58). And then maybe you find peace, and maybe you become passenger of the universe. And maybe, we don't need someone to share knowledge with you, as you become the share of knowledge yourselves. Sharing knowledge with others of the universe, where you can tell where you've been, or what you've seen.

Then, as I said, if you remember, in the very beginning, we invited your Knowledge Seekers to the Linz Center. Whatever you say, we believe, because it's your Soul does the travel, and not your P. You captured the Soul inside your physical body, for decades. We brought you to Linz, we freed the Soul, and we kept your P captured within the system. And then, if the Soul believed what you did in your P, you have to believe the Soul, while the P was encapsulated within the system, in the magnetic fields of itself.

Now you know what we done with you, in the Universal Systems. And now you understand more, as the time comes, the new systems, we bring and show, and the technologies and the knowledge we share, is literally, we have given you all the dimensions. The space reactors, exactly 15 years ago. In 2008, about this time, through Sharif Tehran University Laboratory. So, we finished this physical teaching, physical flight and everything else, in 2008, or we started it. And then, now, in past few years, as we finish with the flight, we start covering the other things which you need, in your physical life heating, electricity, energy, food, medicine and everything else.

You cannot fly a man and leave him in space and say, "goodbye, we flew you." (1:00). You have to teach him the rest of it. And it's taken us another 15 years to teach you the rest of the things, how to fly physically, and what you need, and that's what it is. You just can't fly, you have to have the food and everything else to enjoy. Otherwise, it's a dead end, it's literally dead, because it's the end. You didn't take food with you, you didn't take medicine with you, and sorry, physicality needs these things to survive in the space.

And now, we have brought you the dimension of the energy, transformation, transmutation. And then we expand it, for you to understand, you are responsible for the elevation and nobody else, but you have to understand how you elevate your Soul. How you manage to switch in the dimension of energy, and switch back and gain in the trust. In a way, if you look at it, I'm that driver, teacher, sitting next to you in the car. I still control a bit of a pedal and a bit of the steering, but you are sitting in the main seat. If you do wrong or take a wrong turning, or break and not break something over, which is your own Soul, your physicality, I teach you which clutch and which gear box you need to be in. The rest is you, who teaches you how to become a driver. But this time, you drive your Soul. This time it's not a car, it's you in the dimension of fields of your own creation.

We go for a break and we come back, and we try to see if any of you Knowledge Seekers really understood, or we heard for this and that and other things, which it ?? might come to your, what we call, knowledge, that you want to share. Thank you very much Rick. If you want to take the usual break, tunes, we are here to listen and then we come back to answer any questions. (1:02).

<< **BREAK** >> 496 KSW July 7, 2023 (1:07).

K- As usual, no I'm not ready for next question. But let's see what we have to answer. Can you hear me?

R: Sorry, I missed part of that, could you say again?

K- I said, we are ready to answer any questions, if there are any.

(1:08).

Q: ... Is there such a thing as a taxi in the universe, where we can travel as a group?

K- They call it UFO, don't they? That's the what we call, Universe Taxi System, we call it, the UFO.

If you still want to travel. Go back to few years, quite a few years ago, teaching. In one of the teachings I explained, the time will come, maybe the time is today, if you understand it, the time has come. That we trust our Souls to one captain. That that captain will deliver us, our Soul in a given point, and then we take the shape of the place and time. And there are those who do this. This was explained in the very early teachings there, 100, maybe 200 (KSW), somewhere down there. That now you see, after maybe 6, 7 years from that time, you're back to the same point.

The time will come that you don't see the strength of yourself to go to higher elevation. But there are those, you call them taxi drivers, or I'll call them Soul elevators, who can take you across. And if you call them a Soul Taxis, I presume they are. (1:10). And this is something we brought into teaching years and years ago. And now that you understand the totality of the knowledge, you can understand how it's possible that in a way, you expand your Soul within the structure of another Soul. And then you release it where you want.

If you look at it as I explained in the Enhancement Units (EU) when you came to Italy, is in a way a version of that, where the Soul of the system took many of your Souls with it and is still there. Maybe you paid a visit last June or last July, but you still got the trace back there. You can connect back into it. In a way, you jump in off and ?? unlock the taxi, which you just got off once, and you met some others. And that kind of taxi ride exists.

But in time, when man understands, as I said, there's a lot of teachings still to come, where you not use, but you collaborate, to become part of another Soul, a group of Souls, who go through that leap of faith of the elevation of the Soul. And the totality of those who take that leap, will elevate together. That needs a lot of understanding and a lot of trust and similar emotions to do that kind of taxi ride, as I call it. But, we spoke about this in sessions long, long time ago. Now we speak about the Soul, we see it how it comes to be in reality. It's again, building a block until one day you see how the block takes shape.

Any other question? (1:12).

R: Thank you. I think you mentioned one time that often it's a group of four that travels together as well. Is there any particular reason for that group of four idea?

K- It's part of the Star Formation (SF). It's part. Usually, you don't get a balance in everything, in all. And by recognition of the fields, you always on, you find one which is short in one, maybe higher than the others, where it becomes the receiver, and the others feed it while they are feeding each other. It's a part of the SF, but you don't need to be in that formation of one on top. They could all be on the same level, but still feed one. And that allows the progressive development. That allows the creation of motion. That allows interaction of the fields from outside the circle into what I call, the outside of or in.

But in essence is, I was setting up a system in the past couple of days. And I was looking at it, I said, I wish Knowledge Seekers understand how this thing works on the star formation in the dimension of the Soul. I still sometimes get a chance to do some work and research. And it was amazing feeling to see how

everything is connected, if you understand it. When you set the system, everything connected to, with each other, with all the knowledge's together. (1:14). That when you develop something new, is a new dimension, new knowledge. As it's a collection of all the past knowledge's. And the star formation is one of the main ways of transportation of the Souls. You will learn gradually. Slowly you'll come to it.

Q: ... Do we have in London 11 and 12th this conference, or in Beijing, because I have an interruption of electricity, and I was not able to hear properly, and when...

K- 28th of August till the 1st of September, we're in Manchester. From the 6th of November till the 10th of November, the group moves to London. And then on the 11th and 12th, which is a weekend session, will include those who come from the five day session before as one integrated conference. And then on the evening of the 11th, around about 7 o'clock, we'll go into a session with world ambassadors, diplomats and politicians, and showing of the new technology. (1:16).

Q: Thank you very much. In the same day is the conference of peace, two days, in Paris. Maybe you know.

K- In where?

Q: In Paris.

K- No.

Q: 11th and 12th November, day of link with Bahá'u'lláh, you know.

K- We are not aware of such a thing. Then we move in December into the most beautiful capitals of the world in Beijing. And we might have surprises for those who come to Beijing session. A number of people have started moving and shifting the attending of these conferences. They were coming to come to Manchester. Now they want to shift it to London, and then maybe shift it to Beijing. We allow you to shift as much as you like. Those of you who paid for Manchester, you are already eligible for London and Beijing. You don't need to pay again. Those of you who pay for London, if you become part of the 65, you become eligible for the meeting in Beijing. In a way, the Beijing conference is, you cannot buy yourself in. You come in from the other two conferences. You cannot register for Beijing conference. It's impossibility. We will not allow it, because there is a reason for it. And we expect very, very interesting session in Beijing. You'll come to understand how and why. So once you attended London and Manchester, and if you become part of that 25, 65, you come to Beijing, then it's just you have to organize in all three cases, the hotels and transportation and the rest of it. By moving, (1:18). because a few people have moved themselves from Manchester now to London, and some people want to move to Beijing. It's all the same, because once you register for Manchester session, London and Beijing are included. Once you register from London, you are already automatically become part of ?? in Beijing session anyway. And Beijing session cannot be bought. No one can buy to be in Beijing session. And those who come to that point, they will understand. But you still have to register, if you are from the first two sessions, that you want to be in Beijing at the same time too.

Any other question?

Q: ... How could my Soul, who knew about this extraordinary Foundation only three months ago, be working assiduously alongside Keshe Foundation immediately after my passing? ... How will others who will not have known about the Keshe Foundation before their passing, have their Souls rescued to work alongside the Keshe Foundation?

K- We are not a religious organization. If you haven't heard from us through the physical dimension, your Soul has already heard and maybe part of your work comes after time. To serve the universe. We are just a

name on this page of paper. Nothing else. (1:20). If you haven't heard about the Keshe Foundation, you're going to go to hell and all that, it's all nonsense of it. When we teach, even if you haven't heard about us, your Soul has heard. Because we teach freely for the man to be free. And doesn't need a word or language. So in a way, we're all, heard or unheard, we are part of that cycle of evolution and revolution and elevation of the Soul by knowledge. We are not sending teachers on the road to go and teach and convert. You hear when the Soul is ready about it and when the time is made ready for it. We will hear from where we sit, from what we see, from what we have signed ourselves to.

If everything goes according to what is to be done, there'll be no one on this planet, no living creatures which will not be touched by the knowledge we brought. Heard or unheard about the Keshe Foundation. Be it the fish, be it the bird, be it the man, be it the beast, be the tree and the shrub. Because the knowledge we are bringing in, the knowledge now is getting implemented. The knowledge is getting spread in a way by changing the atmosphere, in a way by bringing a new dimension to growing vegetation, expanding the food, changing the condition of life, travel, energy, and everything else. You cannot, not be touched by it, because everything is plasma.

So in a way, even if you produce a MaGrav with some Gans's in it, in center of Tehran, you're still connect it, elevated the rest of the humanity and creatures because they go through the same process. (1:22). So it's not those times. If you don't, if you haven't heard, it's going to be the end of what's going to happen to them. They're going to go to hell, as is the belief of the Muslims and the Jews, and both run the same ?? horses, and the same horses are gathering more money and power. There is no such a thing. When we taught 10 weeks ago, of 10 years ago, our voice of knowledge is heard by the Soul of every creature. Because it's given unconditionally.

I was with some officials in the past few months. There's not a day we cannot, what I call, escape from these kind of meetings and interactions for these people. And today, in the discussion, I was with a Knowledge Seekers and said, you know what the guy asked, who's paying for Mr. Keshe? Has Mr. Keshe been ?? paid? And I said, no. But I said inside myself, "I've already been paid, I created that knowledge that a lot can be enjoying the peace." I received my payment, and somehow life will go on.

Most probably, if the things go the way it goes, we'll become part of the structure that we can influence the change. And somebody told me, "Mr. Bill Gates and what's his name, Saris or whatever, have got together to reduce the population to half a billion, because they have said (there are) too many." I said, "they're so stupid, even at 8 billion we are not enough, when we are planning to colonize the rest of the universe, and spread our Soul and physicality, and take our physicality, where our Soul is there, or has been of our ancestors." (1:24). How can these people contemplate on killing or limiting the numbers, when there is so much to be gained?

It's just... in a way, I explained to one of our Knowledge Seekers, our teaching, our spread of knowledge, it's that last water, where you give to harvest, before you harvest, that it comes out perfect when you harvest it. And now, these teachings are the "last waters of knowledge," which we give to the Soul of the created on this planet, before the beauty of the STM is harvested by the universe. How can you decide, and how can you change things, where is in a way the harvest time? How can you contemplate on destroying 90% of what has been cultivated to be harvested, to bring peace, to bring prosperity to the rest of the universe? This Gate is so ignorant, that his ignorance has brought him back to where he was. He stole when he was in the garage, and now he ... still thinks he can steal, steal from the palaces of faking ?? . Eight billion is not enough. And in a

way, eight billion elevated Souls is not enough to spread the love of the Creator in the universe. << audio cut >> he said ?? killing, (not) knowing what's the purpose of ??.

<< audio cut here on Youtube Recording, but in Elias recording this was what Mr. Keshe said: their following paragraph >>

It's a dust. But it's that little seed that it grows to become and the harvest across the universe. So, we wait and see. But now we're getting closer to the harvest time. How it's in the way elevation of the STM, to become passengers of universe. The correct way, without killing, knowing what is the purpose of living life.

Any other question?

Q: ... Yes, good afternoon Mr. Keshe. (1:26). My question is with the Manchester meeting, When people register for this, if I'm not mistaken, was 10,000 dollars for this.

K- It's 10,000 Euros.

Q: Euro. And then when people pay that, automatically they enroll in the two days conference in London after the second week in London?

K- Yes. That's included in that part here, because it's part of the same thing. Plus the 200 group session, the week just prior.

Q: So if somebody paid 2,000, they just have to pay 8,000 more to be in all of it.

K- Yeah, Manchester. The most beautiful part will be in London. London will be a pivotal point. It's in our plan to invite his Excellency, President Xi of China, to join us in London, or a member of Chinese government. As we attend the sessions and collaborate deeply with the Chinese, we expect to see the Chinese support for the peace work of the Keshe Foundation equally, mutually. And we've been told there'll be, something will be done. And it's the same with the Iranian government. We'll show the strength of peace through knowledge in London. And that's where what we call, colonization of the universe starts, where English colonized the rest of the world for centuries. But this time, we don't go to bring a slave. We are going there to be a slave, to bring peace to the rest ?? our knowledge.

Q: Mr. Keshe, I'm a little bit puzzled because you see...

K- You're always puzzled. I've got used to you being puzzled. (1:28).

Q: So, now maybe you get me out of this dilemma. You see, we came to this planet and God created us in His image, but then when we started, we totally didn't know who we are. Then He decided to send the prophet Moses, and then Jesus, and then Muhammad, and the rest. And then instead of learning who we are, we made more statues, added more to this by making temples, churches, mosque, and making huge mess out of ourselves. We got ourselves more deeper in the ground. So now with all these governments around the world with so long, for centuries, We have people who are ruling us, not knowing who we are. And then we call them superpower, USA, now China, Russia. And then once in a while, they come, they bring the tanks, the bullets, the missiles, and show off what they have, soldiers. And then if you look at it, when you go to Iran, you have to deal with VPN. There's no internet access. You have to do this, that. What makes you so sure, collaborating with Chinese government, you're there right now, that we have to use VPN to have access to this and that. Accessing the knowledge to them, they're not going to make more rules and regulations for us to have more control over the world, and now one superpower over again another one. Because you see, when I think about it...

K- ... Azar, .. I was with one of the high ranking Iranian diplomats very recently. And she said something very interesting to me. She said, (1:30). why don't you go back to Iran? We have set up everything for you to go back. Even the universities, that public don't know, are structured around your technology and knowledge. Why don't you go back? I said, as long as the women are not free in Iran, we have no freedom. She looked at me with eyes to the floor, even though she was dressed in Islamic clothes. I said, you're a high ranking diplomat, very high ranking diplomat. How can I go back to where there is freedom for only half of me?

But as I said, we don't trust nations that they will do. We have set the seed of changing the Soul of the leaders, and we are sure we'll achieve. It's a big difference in what I do in public, and what I do in private and what I do in the dimension of. If with all the funds and money built a big castle and God knows, and a new Keshe Foundation center, and temple and the rest of it, would have been the same as before. I still live like a nomad. I still travel from place to place, teaching just about technology and what that technology can do for peace. And I also... (1:32).

Q: .. Because the only thing came to my mind, because you said one time to me, you have a thousand hats. And I said, maybe you're playing one of your hat that I cannot see what's in it. So I trust you that you're doing the right thing. You are going to put us in a position where we're going to...

K- No, we still are, what you call it, 30% human physical life. And even if we make mistake, it's a good mistake. It's not bad. Because it didn't come with a bad intention and thoughts and emotion. We came with a good emotion. What looks wrong to us could be the seed for perfect things for the future. I lived a horrible life when I look at it for years. But I was happy to be there because it allowed a lot of things to take shape. But when I look at it, the joy, the happiness, the peace I have today, came because I lasted all those (years). I'm most probably one of the most joyful, comfortable, happy people, content, amongst all of you. Because I have found what I was looking for whole of my life, and with it has come peace for me. It didn't come from private jets and Rolls Royce's and God knows, some of you came to the homes and houses I lived. It meant nothing.

Now I live in a very, very simple, from hotel room to hotel room. And I found peace. And that peace allows me to create a condition of peace for the others and the world leaders. This is one of the, maybe, (1:34). best things ever happen into our lives. We don't see it when we are in it, but we are blessed to be in that position. No attachment. My attachment is not even to the suitcase I carry. Because when I fly, airlines have a habit of losing it. So, what is to be attached?

And we make mistakes, but the mistakes, and if you make it with a wish to serve, become success by it's own, you've seen it. You're part of that problem, which I created with us trying to do the expansion by the Keshe Foundation, and the Soul of the human said, no, it has to come in a faster way. And now, look, six months later, we have signed one of the biggest ever contractual agreements with the most largest, powerful nation on Earth. One day, one day, Knowledge Seekers will know what we have signed into. And even the officials who were, leaked the knowledge of the contract, were shocked how such agreement has been reached by the Chinese. And we didn't ask for it. It was put on the table, given the condition we wanted for the Knowledge Seekers and the world peace, and it was signed into.

I could never imagine, six months ago, when I arrived in Beijing, All was set. It was just like Chinese were waiting for us to return after Corona. We got to understand, Chinese, what they call it, the Keshe Foundation technology, has written into the 14th and the 15th program of the Chinese nation. (1:36). A technology is

written in the most powerful nation on this planet, in its national programs. We were told this 4 years ago, that your technology will be imprinted in the 14 and the 15, 5 year plan of the nation. Now it's written into it.

And, when I tell you, you'll hear, in next two or three years, you start seeing the emergence of the Keshe Foundation technology, as a Chinese Keshe collaboration structure, and then we'll spread around the world. I didn't do anything. We landed and within a week, the agreement was on the table. All the details ?? accepted in, arranged internally by them. We're just a tool to bring that implication of the spreading the knowledge across the nation and then across the world.

We will hear, very, very soon, how what turned out to be one of the biggest losses for the Foundation, turned out to be one of the biggest gains, for the whole of the Keshe Foundation worldwide. So, I make mistakes, but the Souls who conduct me to get that mistake done, is just, I understand why it happened now. I had many sleepless nights, why, how did I get to it. Now sitting in the most beautiful city of the world, in Beijing, and teaching you, sharing knowledge, I sit with a confidence that the technology to bring peace, has signed itself to the constitution of the nation, in work for next 10 years. And then we deliver, spread around the world.

We still work, we still work. (1:38). I just, one of the reasons teaching of today was delayed to 3 o'clock, is because we had sessions to actually show application of technology to some of the people who are influential, can bring that change, and how to be implemented worldwide. It wasn't just random, when we do this. We spend all the time possible in interacting to bring the change. But it takes time. It's not just we came and hullabaloo. It'll take another year for it to show itself. It takes another three, five years to bring the change gradually in the structure.

We have committed ourselves to make China self-sufficient food security within the next five years through technology. And maybe by 2030, one of the largest exporting food nations on this planet. The wheat is there, the land is there, is the technology and knowledge is there now, and the peaceful Nation is there. So, next maximum 5 years, China will become a bread basket. But, a "bread basket" of the food which is not GMO, which is clean, no fertilizer, natural food, and changes the habit of the nation by eating it, and then with it, bring the other changes?

There is something, I was in a shop in Vienna a few weeks ago. And I was looking at products and, as usual, because my background comes from 20 years of being a retailer and wholesaler and other things of the world. And I was surprised myself saying it. When I touched the quality of the material in the shop in the West. And a guy said, there's something wrong. I said, I get a better quality than this in China. (1:40). Why should I buy this rubbish? The guy said, but it's Chinese good. I said, you know Chinese 20 years ago. You don't know Chinese today. I said, come with me. You'll see quality of the clothing in China, that in the West you dream about. Why should I buy and I pay four times more than I pay in China for, quality ten times better? And, this is what we, we have to understand.

This change will come across to all of us. And, the beauty of it is, in the implication of the technology with the Chinese, we always emphasize, other nations have to be involved. It's not just how we are here, we are comfortable. As I said in my agreement, Iran stays paramount to me. The land of Iran, the nation of Iran. Then China, and then all equal the rest of the World. So, it can't be prejudice towards one or the other. And this has to be the ethos of the Knowledge Seekers. You're Indian, you're Pakistani, you are Arab, you are Muslim, you are Christian, it's all blind. We have to be blind to it, because these are the mistakes of the past, the future. We know our Souls has no color, or race, or religion. We'll see.

Q: Thank you Mr. Keshe.

K- The world will know about all of your work, Azar, and many other Knowledge Seekers, in the coming time.

Any other question?

Q: ... He says, (1:42). he bought the MaGrav Power Plasma Generator a few years ago and he still waits patiently, But now that the Foundation Store will be closed in Europe and goes to China, what will happen to all the orders like this?

K- All will be kept. Keshe Foundation is a worldwide operation. And we'll keep to all our (contracts and agreements). Actually ... the... what is going to be done in China, it'll be more expensive than the ones we sold before. But all commitments, anybody who bought anything from us, will receive it when it's done and it's going through the Chinese. The quality of Chinese products will be much, much higher than even we could produce in the West.

The process of setting up the factories, the process of setting up the industrial, what you call it, centers, is all going through. We travel, we see the new, new, what you call it, industrial factory setups for the Keshe Foundation, and joint collaboration is getting done, so we travel to places, different locations, and it's all in progress. And everything will be at the highest quality. When you buy something made in Keshe, what you call it, China, or wherever else, with the name of the Keshe Foundation on it, with the Chinese collaboration, you'll be proud, you're receiving one of the best.

Because everything is new, we are not going to start something, and we don't have to show profit to survive. Our finances of our companies, everything is guaranteed by Chinese central government. And the team we have will look after that the best is done. I brought Keshe Foundation to a position of strength, (1:44). with no "penny pinching." You will see it gradually, next year, two years, as it comes up, you'll see more.

We are not kicking back, because we came to China with the Europe, or the Americans, or South America. From here we strengthen you. You'll find more strength in Knowledge Seekers in Keshe Foundation. And most probably the distribution operation will become a massive scale jobs across, around, everywhere. We are not backed by "business man condition," we are backed by a nation to change the course. You will understand, gradually as it happens.

Any other question?

Q: ... What mental and emotional attitude and posture should we have to train the Soul transmutation with Gans and Keshe Foundation technology?

K- Are you short, are you tall? Is one ear like shorter than the other one? Do you limp? Are you blue eyes, black eyes? Are you black hair, blonde hair? Are you blind? There is no condition. You have... you... This is how the human race is. You have to find the essence of your own creation. Then nothing can happen, nothing matters. (1:46). Race, color, religion, physicality, is totally "skin deep." When you take a brown skin off, underneath is the red muscles, it's the same with the white man and the same with the yellow man. So we are all underneath the skin exactly the same. We don't have a pink meat, or yellow meat, we are all red, and we

believe the same. So, when you ask such a question, the only answer is, is only you. You have to find that way.

Q: ... What is responsible for creating the Inertia field of an element at a point on Earth? And how does Keshe technology produce the Inertia Gans?

K- Oh, that's a secret, we will not reveal. That's a secret Keshe Foundation will not release, that's for sure. And it's in our possession. And we use it extensively in some of our work. We use it extensively.

R: So why would you not release it? What is the... is it because of proprietary information that you want to...

K- It's the "knowledge of God." Who's got propriety on it?

R: Well, that's usually the way it is, except for, you know, dangerous technologies or something that's beyond our comprehension. (1:48).

K- This is part of... This is, in the future, most probably, it will come out, how we do it. It's like that "Coca-Cola bottle." You know, that secret magic "thingy," the liquid? (At that time people didn't know caustic made Nano material). It's ... I don't see it at the moment, needed to be taught. On the other hand, it's part of what once you become "man of the universe," create the Inertia of the place, time, and position. But you have to understand the essence of life, creation of this planet, and then you understand how Inertia is created.

R: Isn't it the time in general for mankind to start creating elements from the fields directly?

K- We... You brought something, I don't know if we can disclose or not, but... Let's put it this way. In the past days, handful of days, Keshe Foundation has, we got confirmation by test by governmental, or the co-official laboratories. We have produced 22 elements of the Creation. And it's been confirmed by three independent tests. By one of the most reputable laboratories and reliable in the world. So we have entered this cycle of creating matters out of fields in a massive way. (1:50).

As we evolve into position of peace, one of the most important things for me as a Iranian nuclear physicist is to show, especially to the Americans, that we can produce Plutonium pure 100% at will, at any time. Which, that brings to make nuclear industry obsolete. But the reason we do it, is because for the deep space travel, we need these kind of heavy fields. We're not looking for radiation. We are looking for atomic mass, field strength. And this is part of the process.

I presume in the next three, four weeks, we'll produce another maybe 30 to 50 new elements. And this, again, is part of our work. And this is part of the larger, bigger scale operation of the Keshe Foundation work with the Chinese government. And it will stay that way. I think a bomb is ticking somewhere (there is a beep in background of audio). It will stop somewhere. So it's not a time and a place for it, but it's part of the work we do. And we need to show we can produce as part of the colonization, we can produce Aluminum on Moon, we can produce Copper on the Moon, we can produce Zinc on the Mars, (1:52). with the interaction of the fields. And this is already been done and confirmed.

It's one of the biggest achievements of the Keshe Foundation development in science and technology, conversion of the fields. And 2 or 3 governments are already studying this achievement. It's not making gold. It's understanding how to create different matters, different conditions, be it metals, be it, what we call,

elements of non-ferrous and other things. In collective mixture, we produce 22, which is now fully confirmed and is a major breakthrough in science. And then, in next few weeks we, I will endeavor to produce another 50.

Today we produce two new elements, maybe three. That even one of the guys who was present, he said, "I can smell it." We created out of field materials which can be smelled, as is the original material. So, we are not going to. We are already deeply involved, and I presume in next year, two years, we produce a full spectrum of the elements in the universe, in the laboratories of the, what we call, the Chinese collaboration with us, with on every level of science and technology.

And we have. It's not when the time it comes. We have produced, we have delivered, and it has been tested. (1:54). And we handed over the documentation of the test to those who matter to understand the change has come. And with it, what is important is to be in command of the technology. We are setting the new rules of engagement in science and technology. And this is part of our work.

Next week, we set out to part of trying to deliver a new material, maybe release another 50 new products, new elements, created out of the fields. And we don't touch the samples, we stay totally up clear of it, militaries and Chinese officials are in charge of all the operation and sites. We just deliver the technology and we move out, and it is observed and looked after and collected by the Chinese, what you call it, officials, and gets tested by them. We just get the test results, what we have produced.

And in past two weeks we have produced 22 new elements, out of interaction of fields. Today we delivered two or three, and in the next few weeks we deliver another 50 new elements, which shows we can sustain life in space. We don't need to, but one of the major things which we will release, maybe in the next seven days, will be production of gases, which can be used for production of the breathing systems for colonization. (1:56). We were talking with the laboratories this afternoon, what kind of tests we want to confirm the existence of the plasma of it, that allows it to be as a gas.

As I said, we have entered partnership with one of the most powerful nations on this planet, with one of the most powerful organizations, and other things which goes with it. It just takes time to create, even though we've been here six, seven years. It's creating now the trust at the highest level with the leaders of the nation, with the Keshe Foundation scientists, step by step. It is, ok, let's go to the next step. We want to see this. What's the next step? We play a bit hard to get. They play a bit hard to get. But in a way, in essence, we both know where we are heading for.

This is part of my plan for colonization in the next two years. Because when we say, ok, we go to the Moon. Say, how? It says, look, two years ago we did all this. We know how to make the elements. We have no worries. Chinese planning to be on the Moon colonizing by 2030. Keshe Foundation plan is 2025. So we need to. We need to show we can.

One of our main targets today was production of water. That we can produce water. And we have done so. And it comes in a natural way, interaction of the fields. When we stand by the new systems. If you look at it, when you say, I ordered a gas generator and a power generator to go with it, (1:58). just go back a few years. On the main website of the Keshe Foundation was something called, "Oasis system." It's a box. Today, I stood with that box. So what we've shown, what we put out as a Oasis system, today is a reality with us, with the Chinese officials in different sections and military.

Today was a beautiful day, and that's why we, as I said, we delayed the session. When I looked, I said, this is what I promised 10 years ago, an Oasis system. Because through it, if the guy could smell the gas of it, the odor of it, it means I could have feed him the same way. Why would I put in this mixture? And with the tests we've done in past few weeks, I can add everything to be in the same system.

It was another fulfillment of promise. It's just how fast we can run to. That's the one, exactly the same square-ish, shape-ish (photo of Oasis system shown on screen). And what you see there, is what I stood with the Chinese officials today, looking at. And I said to them, I said, "this box is made for the time of disaster, if you have an earthquake. This box becomes the food, the water, the energy, the electricity, everything of a family." And it was fully understood. What you see in that picture, (2:00). today was on the table, physically. And I'm sure soon, will be implemented in different ways, for the Chinese for emergency, for earthquakes or whatever.

Any other question?

Q: .. You once said that every plasma that wants to gain or increase, must first lose or decrease. Could you explain this better to us? And what is its relationship with the elevation of Souls?

K- The Soul is a plasma, so whatever happens on that side, it happens on this side. And you cannot fill a cup with a fresh water, if you don't take some of the old ones away. And while you're taking the old ones away and you add more to it, the cup gets full. And it's very similar to the life of the man, the STM. Get rid of the old, get rid of the weak, because it's somebody else's, getting benefit, that it can receive it, that with that you have room to receive new. Just don't go and throw everything out, because new will come, new might not come, because you never understood that you have to pay for the new to come. But it's not a payment, it's elevation of the knowledge, which counts from now on. (2:02).

And so it's, the more you give, the more you get. You have to give from what actually you more need, than what you don't need. Because, as I said to a Knowledge Seeker once, I test, or you are tested, by the love you give up for the love you receive. And then you understand how much bigger the love you received is, compared to what you let go. But you have to understand, I don't let go to get more. I let go because I know it brings more to the others than to me. Then that's the elevation, if you understand it.

Any other question?

Q: ... Hello, blessings Mr. Keshe, will the everlasting MaGravs Plasma lighting technology be released in the near future to make all conventional lights obsolete? He says, I'm ?? not a big fan of lighting.

K- This technology, in a very short days, will be for the first time demonstrated to Chinese highest rank military officers. This technology, what you are asking, we, it will be delivered to the Chinese. And this is for the space technology. And what we call, Space Defense System. (2:04). And it's a combination of 4 technologies of the Keshe Foundation together. One system, if used properly, can literally supply all the energy needs of Beijing. That's how powerful the system is, and that's what we are delivering.

And, if you understand it, all of you who made MaGravs and the rest, has been with you, but you don't see it. You are too busy with plugging it in. Try to plug yourself into its environment, then you find out exactly what you need.

As I said, we will deliver some of the most advanced technologies man has ever seen in the coming weeks to the Chinese leadership and the government and military. To bring the peaceful change, to bring the change. Not to puzzle or gain position, but to understand what it needs to be done to create the proper leadership towards peace.

Q: ... At present the China Keshe Foundation has no official website or the site has stopped running. And there is no special organization for teaching translation. So is there... So he says the learning progress of Knowledge Seekers is slow, because of that. (2:06). Will you help China to do these things well, next?

K- In time, the teaching of the Keshe Foundation will become part of the teaching of the national teaching in the nation. As I said, one of the leaders said, the scientists said, "this is not in the... with the new ?? and the other books we read." He said, "we write the books, the new books, that the world will read and bring the new technology. You can forget about the old." So, the way we see it, as next few months and years, more collaboration way and more direct interactions showing technologies. The technology of Keshe Foundation, ?? will not need the Keshe Foundation website as such to teach. It'll be taught in the schools and the universities of the, of the nation. Through the structure of the new technology.

It's not that once we teach everything old is gone. This is what I explained before to many world leaders and ambassadors we met before, and even to the present ones. We have to understand, we have two structure of life in the universe. One is a matter state and one is the energy state. Up to now, everything we've done is in the matter state. That's why what we do in the energy state, like plasma, Gans's and everything, it looks odd.

Universities, education, has to teach both together. That when the man is in a state of the Soul and energy, knows what he can do with the physicality, or knows how to live in that state of energy, and when he's in the dimension of physicality, knows how to do. This is the purpose of it, not to make things and then become an energy.

The long term understanding is that, when you are aware of the energy of your Soul, your creation, then you can handle the physicality, because it needs protection. (2:08). Otherwise your lose energy in the cave, you need to be protected, then the physicality ?? will protect you, you do it yourself. And then at the same time, the two knowledge has to be taught hand in hand. And I see this in the structure of, what you call it, teaching and life, in a coming time. We cannot demolish and say, "we are the only knowledge, everything in the past is wrong." No! God forbid! When we do that, we become ignorant.

The knowledge we have up to now, is a matter state, physicality. The knowledge we teach is the energy, dimension of creation of universe. We have to learn this, then we have to learn how to transmute between the two. Then, we are correct in science and technology. The minute we say, "whatever is wrong in the past, now is..." No. Even Knowledge Seekers, I've seen a lot of you make this mistake. No, whenever you come to someone introducing the technology, explain to them, this is addition, up to now was matter, your body radiates that energy, now we know what that energy is, where it goes. Then you find people who stick to the knowledge, understand both.

The minute he says, "oh, everything is wrong with Newton and..." Everything is wrong with what Einstein said, without a doubt. Because he wasn't a scientist, he was whatever. Whatever came out of Stephen Hawking has to be written off the books, sooner or later it will be done. Then, you look at the scientists, Tesla and the others, they brought the intermediary between the plasma magnetic fields and the matter state. These are to be respected. We have scientists who discovered alcohol and whatever, centuries ago. And that's

we are alive with it. And because of it, most of us. (2:10). These have to be respected. Knowledge now, has two parts. And the both have, has to be understood parallel together, to create that "heaven on Earth."

When you become too materialistic, you lose the sight of energy, which actually influences matter. When you become too much energy, and then when you want to become matter, to show, you don't know how to do it, then you pay for it.

So, teaching and education, about the plasma technology, about the new science, about the space, has to be in parallel with the plasma. It's no use getting with the plasma fast from here to the Moon. I arrive! How do you make a house? How do you stand the conversion? How do you want physically to cuddle your lover, when you have no atmosphere created for you with the plasma energy? Soul kissing is not as nice as physical kissing.

So, nothing is wrong with the old. And, we are not promoting a new sect, a new knowledge. We are bringing addition to what we didn't know, and the two will go parallel. And I see the interaction for us is amazing with the Chinese authorities. Some of the most correct, knowledgeable people I've ever met, run this nation. They don't, they let some of their, what they call, physical life come into it, whatever. But, the target is the nation, it is not me. The target is bringing everything for change, for betterment of the others.

When we speak to the West, (2:12). if it's a thousand units, how much profit we make? Here, they speak about a hundred million, but it allows millions of people come out of the poverty, they don't have, how we get to them. We still make profit, but the nation will move on. We don't see this mentality in the West. And the leaders in this country, and most of what you call, countries like this, work that way. It's a beautiful experience, but we have to learn. We can't deny everything is wrong, now we are here.

As I said to, I was explaining to a friend of mine, very recently, then you understand. All of you who are in our twenties and thirties know exactly what I'm talking about. It's not something for talk. You know the first time a girl or a boy said, "I love you", you went home and says to Mom, "you never loved me, because you don't even know what love is, I've never been loved by no one." Because, somebody said, and it touched us, that he or she loves us, that's Goddess, that's what I call, the God.

And this should not be with the Keshe Foundation technology. It should be as much loved as I was loved in the house. But now, I found something new to love more. And that's how the technology should be done. And don't worry about the Keshe Foundation not being there. Keshe Foundation knowledge and technology will be in every book, of every school in China, and very soon. In a gap of time, in time. Maybe even on your televisions, as... Then if your leaders believe the knowledge has to be spread, that they can carry the nation with them.

Any other questions? (2:14).

Q: ... Can the system of STM and STP be considered a working model of C14, where STP plays the role of additional neutrons in the C14? Thank you very much.

K- I'm lost, can you translate Rick?

R: I'm lost as well. He's trying to compare STM and STP, those two systems, as a working model of the C14, and the additional neutrons would be the STP. I know that might be stretching it a bit.

K- ..

We are now developing technologies to create massive amounts of Carbon 14 (C14) in atmospheric condition. We already have achieved it, but it's something we'll be waiting for the proof of it. But in a way, it shows itself as a Carbon 12 (C12). But it is C14 by behavior and the field transformation? We will show you, I have pictures of it. Where C14 behaves as a C12 in the structure, in a matter state, but it's C14.

Because Carbon in the matter state of 12 does not behave this way. (2:16). It's non-existence, impossibilities. The C14 exists, operates, in the atmospheric condition, with the, as a C12. And now, with the knowledge we have, we can understand it, it's actually the way diamond is created. How a Carbon explodes into a diamond, at a given, doesn't need a high temperature, it can be done at a low temperature. Converts itself, as it converts from 14 to 12, it becomes at the structure of the stone.

All the teachings (will come) in the coming time. In a way it's Graphene, you already know it. But in a larger scale, as one single Carbon, it's like popcorn, as I call it. If you... I always used to say, "the most expensive popcorn called diamond." That's all it is. And if you've been in diamond business, you know, when you go to a cinema and you get a popcorn, it's all that fluff, but when you chew it, there's the hard bit, the original piece in it, diamond is the same. You get the most beautiful diamond. If you look in it, there's a black spot, the mother where it came and it cannot chew, it's dark.

That's a C14, conversion into C12, and in that explosion of expansion, you get a diamond. And they tell us, "oh, diamonds created (from) the high temperature. Blah, blah, blah, blah, blah, blah, blah, blah." You give me a C12 in a specific field, I make you the most beautiful, largest diamond man has ever seen. (2:18).

Shall we call it a day? We're nearly two and a half hours.

R: Sure, you got through, I think, all the questions we had here. Thank you.

K- Oh, how did I know that? Thank you very much. We'll see you next week. And we're getting ready to meet those of you who come to Manchester. And then we meet in one of the most beautiful cities of the world, even though with all the ?? nations, like his king, in the city of London, very soon. Thank you very much Rick. Somebody sent me a message. It's not too late to register for Manchester. You can still attend, and we facilitate. A lot of people have moved themselves to the other events, So, they created the gaps in Manchester's session. Thank you very much, and see you next week.

496 KSW July 27, 2023

497th Knowledge Seekers Workshop Aug 3, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

August Flight Sessions - Individual; 65th birthday - work starting - 400 years; New paper - creation materials from Fields; We are light of Creator; Graphs show Souls existence functions - like ultrasound - August Sessions individual; KS have elevated; Synchronize STM - STP - P; Schizophrenic teaching - Man has 2 Souls - STM hidden called dream; Crimes against Schizophrenics; Systems prove multiple Souls in one body; Switching point in body - elevate Souls; Soul & P have different emotions - equal means transmutation; Many ways to expand Soul - vision blurred; Servitude best way to Expand; Spread knowledge through plasma - Soul - not brainwashing; Graphs show KS have elevated; Soul of Prophet - same Soul for all - reincarnation teaching; Souls direct from Creator different then Humans - Children of Mitra - Prophets.

ENGLISH TRANSCRIPTION

(:22).

K- Thank you very much. Thank you for all the greetings. Good morning, good day to you as usual, wherever and whenever you listen to today's series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. And we welcome you back, as usual, to share knowledge with each other and learn a little bit more about the world of Creation and physical life of man.

As Rick said, I had a birthday, officially my birthday is today in the Iranian calendar, but on my passport it's yesterday. In any way, today I was in a meeting with those who we work in, we start new life of Keshe Foundation. And it came to me that, usually all of us, majority of us, look at the age of 65 to retire and take the shoes off and lay back and start rest. And at 65 I'm negotiating for man to change the course and join the Universal Community. So, I have just started, when a lot of us hang our coats and lay back, and we retire and we look for a long term, what I call, rest. And on my birthday I start actually to do more, to extend it. And whatever it is with life, it is. Another 40 years, another 40 days, another 400 years.

We are here to serve and bring that change in our capability and power and knowledge in any shape or form. As I said many times, we've been around a long time. We just, as you change clothes, we change the body of the man to carry on, to educate the man to the point of joining, understanding his, what we call, life. What is the purpose of life, not only for man, (:24). but the world of Creation.

In the process of the work, as we heard in the teaching today, Intro, is the ray of the Sun becomes another cycle. This cycle of the interaction of the rays, becomes Zinc and Carbon and becomes Copper. And it becomes sugar and everything else, to create the body of the man. As I mentioned last week, we have managed to produce some, 20 odd elements, and then furthermore elements, and this week, the test results gives us, we have managed to produce, actually maybe another 10, 15 elements, added to the past, in the same process. So, in a way, we have become the life, and the cycle of interaction of the fields, creating again matters, matter energy, matter interaction.

To celebrate the 65th birthday, yesterday I started and I asked the team of the Keshe Foundation (KF) a paper. The paper title is the same as the first Book, "The Universal Order of Creation of Matters," where from the rays we have created matters, elements. The Book was theory, that now with the work we are doing, with the team we are working with, we have created to prove and confirm the theory of the Book in reality of the test of existence. And in that process, what we said in Book one, (:26). that how matter is created from

interaction of the fields. Now we have created the matters. So the theory has confirmed in practicality and with a force, what we call, not just the Keshe Foundation, but as I said before, with presentation and being presence of the highest ranking officers, military, who ran the test. And they've done the test.

So in a way, what we wrote as a theory of the book, now has become the reality of science. This paper will be published in the next few weeks, as the structure of it, since yesterday, is getting drawn up. And evidences, scientific papers, will be added to it to confirm the correctness of the theory. So, in a way, the Book one as a theory, now has become reality in science and technology. And we'll see new breakthroughs with this knowledge.

I'm sure in a coming time, we shall do the same with the Book two, transportation and transmutation through the light, the structure of the light. And back to it, maybe near future, again we go into confirmation of the plasma. It is interesting to understand how life begins. And I think one of the most important parts for us, in the coming times, in the next maybe 5 or 10 years, in the teaching of maybe 1,000 or 999 (KSW) of the Keshe Foundation, somewhere down there, (:28). we reach to the educational level that we find the strength of the fields which lead us to the Creator. I can teach you that today. But you're not ready for it. I can show you how you can reach the essence of the creation of the Creator, because it's written in the Book two. But you always looked at it as light, not as a "light of Creator," and how His light has become us in different dimensions (D) and directions.

In understanding the transmutation, in understanding the condition of the transfer from energy to matter, one thing should have become clear to many Knowledge Seekers (KS). Are we the light of the Creator, the essence of His Creation? I am you, as you are I. When we understand this, when we come to the point of understanding of the transmutation, and then understanding on transmutation through the speed of the light, and understanding that different lights have different strengths, and then in that essence, we find within the light, the strength of the light of the Creator, it should not be very hard for many of us to reach our Creator, the Soul of our Creator, understand His structure, understand our own creation. (:30).

Is, or are some of us, as a light, appear in the essence of the knowledge of the Creator. In a way, we come from the Source. And not in the process of division, different galaxies and the stars and repetition. Where the light of the Creator becomes the dust of Creator and becomes the creation of the entity, be it Mitra or the children of Mitra. In essence, life now has a meaning in a different way, if we understand the process of the transmutation. Do not forget that all the fields of the universe, every single field, be it from a star, be it from a galaxy, be it from a man, has a common denominator. That's why they can MaGrav position themselves, in respect to each other. And that common denominator is the strength of the light, the field strength of the Creator. So every one of us, every being, every Soul, every single cell which has a Soul, has within it the strength of the light of the Creator, the knowledge, the love, the creation of the Creator.

In so many ways, once the scientist, once the wise men of creation understand the science of creation, very soon, man will find the path to his Creator. Much faster, much sooner than "banging their heads against a wall" somewhere, or "on the floor" somewhere else, or burning bodies and whatever, for the rain and the sun. (:32).

Man has to understand. Now that we have shown scientifically the transformation of the energy into matter state, and in the past week we have shown what we call, none, what we call, matter state. Structures of, in a way, gases, in a way, combination of life without matter state, that their existence and interaction with the

matter state elements, or elements of the metallic structure, confirms the existence of the life, the existence of matter itself.

This is important in the future teaching. It's important for man to understand how life can be confirmed. The existence of the entity can be confirmed by the energies of what we call, fields of non-matter levels. But, when we see these fields, it indicates to us, the essence and the origin of, combination of, interaction of, existence of, that matter.

In a way, in a future, through the Soul of the Man (STM), we can confirm the physicality (P) of the man. Where the energy of the Soul will indicate, will show us, the essence of the physical manifestation, at the point of interaction with the environmental fields. (:34).

In a coming time, in a very near future, we'll bring this forward. We will bring this to a point that by interaction of the fields we'll confirm the existence of the elements of the creation. Even those elements which man cannot even imagine that can exist.

In the essence of Creation the Universal order of the creation of matter, the Universal order of creation of energy is all the same. It's for man knowledge, essence of Creation, to understand this. And how to transmute it from energy to matter, and how to transfer it from matter to energy. In the present world of science, we burn elements to get energy. Where in the life of Creation, we give a strength to it, to change it. We add to it, to elevate it. We don't take from it, to annihilate it.

This is the difference between the process of the creation of the energy in a, what we call, plasma condition, than in a matter state condition. We create a new life, we create a new cycle, we create a new matter by elevation, by giving energy, field strength to. Where in the matter state, we burn it, we destroy it to release its energy.

In so many ways, the world of science in the world of matter state, (:36). is in a way, counterpart to the strength of the energy matter plasma of the same. In the future, when we open up the sessions, the graphs of the sessions of past four weeks, where we allow you fixing your physicality, you fixing your Soul, you fixing whatever. You will see when everything is in balance, STM will stand opposite, exactly 180 degrees opposite to the Soul of the Physicality (STP) and the physicality of the man, which they usually stick together.

It's amazing when we open these graphs, when we open this data recorded, you see how physicality and the STP of the man always stick together. And the STM in 180 degree in phase, "Yin and Yang," a "Loop of Infinity." And the interesting part is, when we see deviation from one or the other, we see all complications. When we see the physicality reaches towards the Soul, we see problem with the so called STP, with emotion, psychological pattern. And when we see the P on one side, and the Soul and the STP on the other, we see problem in P.

The data we have gathered, the knowledge we have gathered, is so deep, it's so vital for the future of the man, that we can show physically, (:38). when we put you on the system, where is the problem. Is your emotion creator of your cancer? Or have you "cancered" yourself to create the emotion? It's so simple.

In the past 4 weeks of trial with the Knowledge Seekers, we have gathered so much detailed information about the behavior of conversion of the STM and interaction with the STP and the P of the man. In a way, transmutation and transfer and transportation. The data, the what we have gathered, shows us how STM plays

game in the structure, interaction, and the cycle of life of the man. With all interest, with all what we have understood, this allows us, as we see how so rapid Soul flips to one side, and the STP and P to the other side, we have not even understood. And this is where we call it the light, the structure of the light. It happens in a flash of a second. The light which we are not even have the knowledge to absorb, to observe, to detect, and to confirm.

In a coming time, as we bring the data out that you can see, and we show the data as it comes up for us all to see. You will see the behavior of your Soul. You can see the behavior of your Soul in respect to your STP. (:40). And you can see the behavior of your STP towards your physical life. And then with the same system, we can detect your emotion. Have I created that cancer to myself? And how I can, I created it? To what extent I'm responsible for the harm I've done to my own physical condition.

Then with what we've seen in the pattern of the data, it explains to us how, when we put you together as a group of 70, 80, as we've done in past four weeks, you actually help each other. You give strength to each other. You bring change to each other. All moves together, because our data is the data collection of all 78 of you who participated in the trial.

In a way, in the next sessions, you can ask us, can I see the graph, the fingerprint of my Soul, the behavior of my Soul? And now our technology is so deep that we can show. Five minutes on the system, 10 minutes on the system, you can see how you deal with your STP. How you operate and separate your STP from your physical life and bring it all the diseases. And then how your Soul and the STP get to one side, that create the physical life to find a new dimension for itself. Elevation in the dimension of giving towards the Soul to elevate one or the other. (:42).

The data gathered, the information we have gathered, is so deep, is so amazing, that when I watch it during the test, during the time you're sitting in those quiet times in three hour sessions, two hour sessions, we gather so much information. If one of you falls out, if you collectively work together, if you work against each other, you work against your Soul, it all can be seen now. The knowledge, the technology is set to that level.

And we are on the verge of you getting into the system, a mental case, wanting to do everything with yourself. You put you through the system, and you land on the Mars, and you love yourself, and you create a condition of peace within yourself. Few seconds of elevation of the Soul to pass the dimension of the STP, remedies, fulfills the shortcoming and recovers from what the shortcomings are. In this process, in this understanding, with what we have seen and as I said, what will be published very soon as confirmation of the Book one, it'll bring you a change. It'll bring a change and shift in the world of science.

This knowledge, in the past few days, has been shared with the Iranian government officials, that the change has come. The creation of the matter, or interaction of the specific way of creation of fields, has completed and confirms the Book number one.

In the coming days, this technology will be shared with many governments, (:44). as they have to understand what is to come and what is the future for mankind. This information, as the paper of the confirmation of the transportation and transmutation of the space travel of the future, will be presented in the November session with the world ambassadors and world leaders to bring that change, to bring the position for all of us to understand.

As I said, the November session with the world leaders and ambassadors will be what I call, the "watershed" in the world of science and technology (T). We invite those who participated in tests with us, the officials, military, and the government officials who've been present, as they can say what they saw, how they felt, and what it was. This is important, as the man will trust those who they trust and lead us.

In the coming time, we start the process of conversion. We are starting the process of understanding. In a way, when we put you in the new systems, we give you the graph of you to you. You come to us, you go to our doctors, and you say, I have a cancer. I have emotion problem. I have psychological problem. I have tension and pressure in one part of my body or the other. Now we can give you the graph of you in all three dimensions. The Soul, STP and the P. (:46).

And then you can see what you are doing to yourself, and how you can correct it, and how you can take, you can add to the energy of the STP, to the P of the man. That with it, in replication, on the other side, you can elevate your Soul. When the STP and the P come near the zero line, you see the Soul is zero, too. Near to it. When the two expand to increase their strength, you see the Soul strength increases too. It's the mirror image of each other. And then you understand, when your Soul is on its own, and your STP on its own, and your physicality "hair wiring" everywhere, you have to understand how you can bring the two to be in line and in synchronized manner with each other. Then you learn how, through behavior, which is the STP of the man's interaction with the STM, you can elevate your Soul.

This is a knowledge which has never been open to man. You "bang your head against the Great Wall." You bang your head against a stone on the floor. You did everything possible in the name of whatever to find elevation, to find what I call, another step for you to be better. But you never knew why. You never understood why. From now on, you can.

In the October session and in the, what we call, November sessions, (:48). we'll open a new science to mankind. Where you see how you create your own demise, how you create your own diseases, how you create your own elevation. In August, we open a few sessions for those of you who wants to spend to see the graph of your Soul. The behavior of your Soul, with your STP, and your physical life.

We will announce the opening of these sessions, very limited numbers will be done. And it'll be literally you with the system, within the system, anywhere in the world. And we give you the graph of yourself. You've seen your face, you've touched your skin, you've seen inside your heart how it operates. Now you can see the operation of your existence as an energy. On the Keshe Foundation website, in the next few days, we open this channel, very limited, very limited numbers. And like you go and you get ultrasonic, or whatever, of your heart, or whatever. For the first time you will see the shape, the pattern of your own Soul. And how you interact with the STP and physicality of cells. And then you have to find out, where all diseases come to me. And where all the joys come to me. And how I can elevate my Soul.

We open this channel for a very few numbers. And we spend time with you, individually on the system. (:50). And as usually you go for a, what we call, "roller coaster," and you get a picture of you somewhere down the roller coaster, we give you a picture of the graph of your Soul. In respect to your STP and your physicality. And then, I'm sure many of you will share it with the rest of you, that others can see, how actually, what actually I do, how my Soul is connected to my physicality, and where and how I find peace.

The reason for past 6 months, 8 months, has been this, that when you're in deep space, as a physicians of the space, we don't take your blood pressure, we don't take your, what we call, sugar or the others. We see the

behavior of the Soul, we see the behavior of the STP, and we see the behavior of your physicality. And then we see what it needs to be elevated, and you need to elevate it too.

This should not be strange things for you. When you came to Italy and you sat in those chair number one, two and three, one was the physicality, one was the STP, one was the Soul. Now you can see what you've done in those systems. And then you go and work, how you can balance it, how you find a way to elevate your Soul, and walk away from diseases of Space, not from diseases of the man. Physicality can be entangled with everything, (:52). but the Soul can be at peace and happy to exist. And maybe in time, the Soul will change the dimension of physicality.

This is a time for change. This is a time for us, through the strength of the Soul, change the strength of the P and the STP. And maybe, in that process, we find, some of us, the path to our Creator, to the essence, to the origin, to what we came from. Where you, through interaction of the life of the physical dimension, which is Book one, in transmuting, transferring through the light of the fields of you, will elevate your Soul, which is Book number three.

Now you understand why we took this path and how and where we are heading. In a way in the future, this technology is important to us as we come across the new generation of lives in the space, new energy paths in space. Through such a simple system, we can understand their hostility, their love, their care, and what they are made of.

When we did the test, our military people were interested what matters are created. I was interested in what energies which attracted those matters, were interested. And when we got the data, it's amazing how energy interaction can lead to creation of the matter, even though those energies might not be within the matter. (:54).

In the upcoming time, in the upcoming paper, which will be published, you can see all this and understand more about the world of Creation. You understand more about yourself, how you lead to creation of life, as was in the Intro, and what lives your Soul shall create in the interaction with itself. What we call, the leap in the world of science, of Space, is so great and so rapid, that will take mankind centuries to understand even the teaching of past 10 minutes.

You will understand what I call, the observation of the fields of your existence, sessions which will be announced or opened up on the Keshe Foundation website will give you a very interesting point. How you came in, how you been and how you leave the systems. And then it's you, for you to understand how you felt in what emotions you came in, with what aims you came in, and what happened in between, and what happened at the end. Then this gives you, in a way, a recipe for the rest of your life. A recipe for the rest of the life of your Soul, and not your physicality. And a way for you to understand, to elevate your own existence. (:56).

Part of this work will be carried out, will be taught in the sessions in Manchester in a few weeks time. Where gradually, as Knowledge Seekers, you become knowledgeable, seeking knowledge about existence and elevation of your own Soul, and nothing else. And how you can elevate the others. And what is your expectation from other Souls. And not just money in the pocket.

The teaching, the understanding of the process of the Creation, now start taking shape and have meanings. And then, when we send you across from one part of this planet to another, from one part of the universe (U)

to another, by asking your Soul to travel, to tell us, you find out that you become master of what I call, transmutation, transportation. And this is not something new. If you remember those of you who came to Linz, you were sitting there and the minute we ask you, you can go and travel, go to the Moon, you wanted to go to the Moon, you zipped .. zooped off and you were there. You wanted to be somewhere else.

So, in a way, in past 12 months, we have taught you, we have shown you, many of you, hundreds of you, tested it. The process of the teaching, the totality of the understanding of the knowledge of Creation, is at the reach of man. And, in that process, in the November 11th presentation, in London, we might see some more, what I call, more advanced knowledge's about space travel. And understanding the process. (:58).

As I said, in August session, we'll have a very, very limited numbers, because it'll be individuals. In the past sessions has been 100 of you, 150 of you, now it'll be you and your Soul. You can see it for the first time, you can understand it for the first time. And you'll be given the pictures of your, what I call, the STP, the P and your Soul, and see how harmonious it is, and how separate they are. And what you need to do, to bring them in balance yourself. You become your own physician, you're "last man standing," as nobody (else) understands how you came to this point.

The last man standing sessions, which will be announced, released by Keshe Foundation next couple of days, for the August sessions, you will... it'll bring you to the point, for you to understand yourself, in the dimension of the Soul. And if you are clear with yourself, you can release the data, you can release your graphs for the others to see, and maybe from seeing some of yours and the others, understand where the pitfalls are, where they have misguided and abused their P and the STP. And then, we show you, when it came to one point, we told you we don't need to ask you any question, because we saw the STM, the STP, on the physicality of the man, of all the participants, were one straight line, next to each other. (1:00). Which means we brought peace, balance and collective decision, for that purpose. Which was to elevate the Soul of those who were abused by the abusers.

And it was amazing to see this, and I'm sure we will release this data one day. Which means there were no Souls who abused, no physicality of... no STP amongst those who were participants, even themselves. Because the biggest abuser of the man, is the man himself.

As I said, the teaching enters a new dimension of energy and not matter. A dimension of the Soul, which is the, what we call, magnetic fields in motion, what we call, energy. And the STM is a bundle of magnetic fields in motion. Energy which can be more than thousands of times stronger than Hiroshima bomb. By order of magnitude. Now you understand where the teaching's going. And now we use what we call, those who are in a way, not aware of themselves to become aware of their life. You don't go for sonograph. You don't go, I want to see my heartbeat. I want to see the scan of my brain. Soon, people like you will ask, I want to know the state of my Soul, the STP and my P. Where have I gone wrong? And what is needed to become in balance? (1:02).

The elevation of the STM is the responsibility of the man alone himself, and not banging on the wall or 17 times on the floor. It has to become for man to understand that elevation comes within the strength of the emotion and not in the strength of the motion.

One day soon, what we set out to do will become a normal pattern in life of many. And it'll become what I call, standard way to understand what is wrong and what can be done. We open this channel for a very short

time, for a very few number of people, and we'll close it very rapidly, as each one needs individual attention and session.

Thank you very much for being here today. And I couldn't give you a bigger gift as a birthday present to all of you. I hope you understand. And you find a way to elevate your Soul, your own, and not the others, unless they ask for it. And then you'll find out there is no need for prophets and messengers. And there is a need for teachers to teach the science of the Creation. Thank you very much for today. We go for a break, and we come back. And maybe, if you think about it and listen to the teaching of today, up to now, you will find out the gift we have given you. (1:04). Mankind has been waiting for this for thousands of years. Thank you very much, Rick. If you go to a break, and we come back to answer any questions.

<< **BREAK** >> 497 KSW August 03, 2023 (1:10).

R: ... Generally we have questions for Mr. Keshe, which he answers. Mr. Keshe would you like to maybe watch the video from the Brazilian community on to celebrate your birthday? Maybe we can play that now?

K- Why not? You can show it, it'll be a pleasure. And tomorrow, as has been our tradition, Keshe Foundation will release every 5 years, more or less, a portrait of the time of around my birthday. And the day of birthday of mine is the birthday of the Universal Council too. So, we celebrate the two together. And, in so many ways, we usher a new cycle of life in this cycle of 5 years. And I'm sure it'll be a very interesting 5 years, and by the end of this month, (1:12). we'll reach the 500th session of the Knowledge Seekers teaching program. Which itself is a massive breakthrough in teaching cycle, non-stop, for over 10 years. And I thank all of you for being there to make it possible, to make it happen. I'm sure in next five years, we will change a lot of things in the course of the man. And with what is to be released, most probably in November to world ambassadors will bring huge changes. Thank you very much for all your support in past ten years, and for everything you've done for the Humanity.

Go ahead Rick, let's see.

<< Plays birthday video done by Brazilian Community >>

K- Thank you very much. Thank you for all the efforts by the Brazilians and the others. As I said, it's a collective work and now we are pulling from all parts. And in time, each one of us, time Nigerians, time

Australians, time Brazilians, Canadians, and English, and Germans, (1:18). and the Iranians and the Chinese, each one of us in our own turn brought the change and supported to move in one way or another, to bring that change. And where we sit today, where we stand with the knowledge today, we see the change is about to come in a big way. But if it comes in one way, it becomes magic and people do not appreciate it. But the way we've done, step by step, Soul by Soul, we bring enough momentum, that it gets accepted by all, through natural process, and not by force. And that's where is needed, this technology to come now, to be understood, and to be applied and implemented by each one of us, for our own benefit, and not to benefit it by the others, in the process of our own existence. Thank you very much, and I hope, next 12 months, will be a bigger change for all of us, and as we see it, it can be a massive change. It's a beautiful horizon for all of us, in science and technology. As I said, we are not the only one. We see new technologies and new sciences emerge. And collectively, the new science will bring the new change. Thank you very much.

Are there any other questions?

R: ... In previous times you've discussed the relationship between the STP and the STM. (1:20). I believe in the way that humans are "schizophrenic," in that we have these, sort of a dual personality that way. So, we have a question from Leila in the YouTube, who says, I recall Mr. Keshe's earlier teachings, he commented, and how he would welcome the company of a schizophrenic, because they're better suited or adaptable for environments or circumstances under pressure. She continues, I wonder if you could please elaborate on this further, especially with regards to the quality of this condition, or characteristic, or expression, relative to the development of the Soul. Thank you.

K- We call schizophrenic man himself, because he has a Soul and STP. And he does everything when he suits him in the name of the STP, you call it, the life of the man. And when it suits him in the dimension of the Soul and he calls it a dream. He has managed a very beautiful way, to hide the other life, as a dream. And, it's very interesting, some of you dream, and you wake up and you say, I have a strange dream, I went there and there and I did this and that happened. But, you don't say, sometimes, it's something strange today, I went to this shop, to that shop, I shopped this, I went there, I had food there and there, and I came back. What you do in the dimension of physicality, is your normal life. But, when you have it in the dimension of the Soul, it's a dream and it went to strange places.

You've never been to a, what I call, (1:22). Chinese restaurant with cats and dogs loose in the restaurant. But you did it today, and that was it. But, if you have that in your dream, I went something strange. So, we live this life of a schizophrenic ourselves every day. And, we don't call ourselves a schizophrenic, we call other half, which we have hidden inside us, the... what we call, a dream. Or, the work of our Soul has become a dream.

Because we cannot say, actually, I have two existing lives within me. One is what I am physically, and one is inside me, which creates all the conditions of my life for me. If that Soul was not created within the womb of the mother, there was no physicality of you.

You've seen these organizations or partnerships, which the partner, which is the brain of the whole operation in the background, is never allowed to be seen by the partner, which actually knows nothing and is busy with everything. It shows that he's doing everything. And that's the characteristic of a man. Two partners when one is hiding. And now we are showing how that schizophrenic life we do cover it as a dream is a reality, and we can benefit by it, actually. It can change the course of your physical life in a huge way, if you understand it. (1:24). So, the biggest schizophrenic is the man himself.

And, as I said, if we talk about other conditions of what we call, schizophrenic in a medical condition, medical life, that is a natural process which we all know, we have taught many times about it, and that is the reality of, we are seeing triplets. In a place, they all looked at three girls, looking the same. Each one carries his own Soul, and each one carries his own physicality. We see Siamese twins, because there's two head, or one head, stuck together as two parts, or one brain. Oh look, this is one, two bodies, and two Souls. But what we denied is, as part of the process of life, there could be two Souls or three Souls within the structure of one physical life. And has to be respected. If we respect Siamese twins as... because we see two heads or two faces and one body, or two bodies stuck together, we have not managed to respect another process of creation of life, which is one body with three Souls. Which the interaction of those three, has made the dimension of physicality of what we see.

If there was one, it could have been totally different physical manifestation. Or if it was two of them, was the same. And there is a very big difference between the schizophrenic, and what we call, people having or creating different, (1:26). understanding emotion interaction of the fields, and creating characters within them. It's a very big difference. And that, is a totally different knowledge and understanding of the work, of one body, which allows itself to evolve.

But, in essence, as I worked for years with schizophrenic, I have brought to understand, you have to respect life, as the biggest schizophrenic is us. At least with them, we see the Souls. The Souls manifest themselves individually in the characteristics and the character of the behavior and presentation of life of them.

When I used to go to psychiatric hospitals and watch the behavior of the life of the schizophrenics, in those days, my biggest dilemma was, am I actually the real one? And they are actually the true man of life? Because they are there and we can see all. They show their emotions. They show their individual characteristics. And we sit there and we hide our Soul.

In spending time in trying to understand this, it brought a clear understanding of the work of the STM. (1:28). In a way, it was part of what I call, the training of today's understanding how to handle the Soul, where the Soul is, and how you can elevate it, how you can separate it, how its function is, and what is its purpose. I used to sit and watch them, and the doctors used to inject them with different medication, and they used to line up the tablets. And I thought, is the crazy man the doctor and these people are sane. And how, because we have the power, we have imprisoned them, incarcerated them. And in fact, it's us who are the criminals and need to be locked up, not them. As we don't understand their condition.

I wonder if the time comes when the world of science becomes wise to this and one day we will show, the same as what we did with the Souls and the STP, which now we announce in a week, in the next couple of days, you can book yourself to see your Souls and your, what I call, physicality performance. I'm sure in the very near future, we will have the technology to see each Soul individually, with the same physicality. What this means, we have to develop a system, where, let's say we know, or the doctors tell us they are schizophrenic, (1:30). and put them in a machine, and see how we see three or two or four graphs, running systematically together, but totally different. Representing clearly the existence of individual Souls within these bodies.

We put man as political prisoners into prison. We incarcerate innocent people with the scarves on their head and nakedness of their head, with hair out, to justify our own meager weakness and stupidity. When the time will come, that we realize what we done to the people we call, the schizophrenic? The crimes we have

committed. And we are still committing? And we call them specialists and psychologists and psychiatric treatment, where the doctors should be in those places locked up, than these people. I wonder, in a very near future, when we put a number of schizophrenic in the systems, as you'll be paying to go and see yours, and we show all Souls within one body, with the same behavior, what will the science will stand for, for the crimes they've done to humanity in past decades? We have to lock up psychiatric doctors, as their stupidity has led to the crime of locking these "beautiful people" up. (1:32). They call, they say, "ignorance is a bliss." And in a way, our doctors and scientists are ignorant, and we bless them.

We are on the verge of proving this. As I said, now we show scientifically what is in book one. Very soon, we are heading that direction, where we bring those who they call, schizophrenic, and we show the Souls within them. And then we put the world of medicine to shame. Let alone those who call themselves psychiatric doctors, as they need help, and not those who we commit to these, what I call, "locked up conditions." It's so inhumane, we won't keep our dogs in that position.

It's very close. In the next few months and years, as we develop the technology, the way I put 80, 100, 150 of you in the system and brought it. Now, we have the knowledge to show the Souls of these people, within them. Those who are imagination, we cannot do anything. But those who are true schizophrenic, then you can see, the presence of the 4 Souls, and now you pay to come and see your Souls. And if we run two systems, you see two Souls, we tell you, excuse me, would you like to tell us who's the other one you've been hiding?

Any other question?

Q: ... (1:34). In the 346th Knowledge Seekers Workshop, after 3 hours and 37 minutes, the lady asked a question about your teaching of how to bring the level of the STP to such a level that it becomes in contact with the STM. And she continues saying that you said that you had a technique for that, and then she asks, how? Then you answer saying that the STM was not ready, and that this technique would be shown in the right time, after March 21st. That the new Soul will teach this technique. I know that elevation is individual, and that each one has to find his elevation. The question is, could you tell us a little more about this technique that was mentioned, or how to find within us, this knowledge through the new Soul? Thank you very much Mr. Keshe.

K- The knowledge is within us, and the elevation of the STM, is part of the daily life. We just ignore it, and we have become so ignorant, that we cannot confirm his existence. We sleep through it most of the time. All the time. And if you manage to be awake at the point of the transition, you can feel, (1:36). you complete a cycle of how the energies can be added to it. This is part of the elevation of the STM, through the conduct of the behavior of the P of the man and his emotion.

We do this different way to absorb different field strength within our body, without knowing. Our physical life has tuned itself to it. We call it the rest time. But that transition point of few microseconds of the switch allows, if one ever understand how to do it, for you to be able to, in a way, add to your Soul, add to your existence. And it happens so often in our body, in our life, that we do not take notice of it. What I call, the "zero point."

Our sleep pattern is usually a four hour pattern, roughly, where we switch from one hemisphere of the body to the other. Our lungs do this switching. Our nose does this switching every hour. Our kidneys do this switching. One kidney goes to rest. (1:38). One kidney will create. In the life of our female part, we create

egg in one ovary a month and then the other. In the life of the man, we do the same switching. One testicle produces one ?? moment, and the other one does not produce that to give a rest, to allow.

And if man becomes wise, there is a cycle between all this at a specific time, a specific cycle where all falls to zero. And in that point is the time when you can elevate your Soul. In a way, in a specific way, in a specific harmonic way, all the organs, all the cycles, all the, what I call, sleeping pattern, awaken pattern, will switch, and this happens a few times in the life of the man, for microseconds, for a very short time, and if you find out, if you can understand it, it's the time where most of our absorption, everything is given to.

The older we become, this more frequently happens. And in one of these points of switch, is when the life stops. (1:40). Those who die natural life (death), they die at this point of switch. Where that switch reaches the point that cannot add anymore to the Soul, to its elevation, and the Soul departs, and the physically shuts down. All natural deaths happens at this point of switch. Without the fail.

And this point, this zero point time, which is harmonious, and during our lifetime, we switch a lot. And in one second, many, a few times in our life, we said, it happens in the life of the planet. We call it change of polarity. It happens in the life of the solar system. Our solar system switches fields on the same way. Our scientists don't understand it, never considered it. It happens in the galaxy. It happens in the universe. One half of the universe switches fields with the other. And in those time cycles, we see mayhem in some of galaxies as they try to catch up.

In the life of the man, sometimes when this happens, it's so intertwined with the switching of the Soul. Switching of the STP, sometimes you see it, you feel it, because all the organs, everything goes together. (1:42). It's like a heartbeat missing. And if, in the future, there is no "ifs" in the future, we'll teach you how to calculate this time. That's the point where the Soul is at the point of receiving to switch to another for the higher order. In a way, you prepare yourself for that point to be able to add to, to elevate your understanding of the Soul.

This happens in the time of life of those who accept missions as prophets. They're born as normal people. And in the cycle of life, at a given point, the switch comes. But then it becomes enlightenment. And that enlightenment is literally for understanding more.

So, all can do it, and it all can be measured and brought in. And this is what I said, with the new technology, with the new knowledge we brought, there is so much to understand that man would not have time to fight and create wars. That's the beauty of gaining knowledge, super passes what we call, dominion, and gaining lands and properties and power.

And if you reach that zero point, if you understand that zero point, you understand... I was explaining to one of the Knowledge Seekers (KS) very recently, past few days, about this. You feel, as I spoke about it many times before, (1:44). your physicality is estranged to your senses. And you know you received elevation. Or you have managed to understand more, more of it. And then you start looking at life totally different.

Many of you KS who went through the process of past few months with us, have reached that point. Or you have felt it, there is a difference. And you have received the elevation through your own understanding. Many, many of you, when I look at the graphs, which comes in during the process, I see glitches. And that glitch tells me somebody has been elevated. And if we shred these down, we can say he went poof. Many of you, in past sessions, or past year with us, I'm sure, as we have reached that point of elevation, slide

understanding, changes in life, which brings a new, you understand totally things you couldn't understand about the Creation, about a lot of other things. And that comes through the structure, the way we set our systems. And if I put you in one of these systems, when I know more about the dimension of physicality, I can tell you the "switch time."

Any other question?

Q: ... (1:46). Yesterday I was in the Soul teaching and was discussing about the love and emotions. And the point is that we not understand well, is to expand our Soul and transmute, we have to detach the environment emotions, or your own emotions? Thank you.

K- It's your emotions, you have to understand in another way if you put it. If you can understand your emotion in the physical dimension, and emotion in the Soul dimension, and then you can do transmutation very, very easy.

A lot of people say, what is the emotion in the Soul dimension? It's very easy. In the physical life, you cuddle your child and you feel the emotion of love. That's the emotion of physicality. You dream about your child and you still hug her and you feel the emotion of love. That's the emotion of the Soul. If you understand, the touch you had, you felt with cuddling your child, it's you who felt it. We don't know what you gave. But in the Soul dimension, your child feels the whole of the emotion, receives all the fields of it. Where physicality is entangled with, you're giving all the strength of your, cuddling your child, (1:48). and she's watching over your shoulder, the television. Then you understand, which emotion belongs to Soul, which emotion belongs to physicality and how physicality behaves, and what, some of what your emotion does not even carries ?? on, to be done, where in the Soul is felt and received.

So, it's... if you can understand those, because, in a way, make no distinction between the Soul of the emotion of the physicality, and the Soul of emotion of the STM, then you can go through transmutation very easy, because then they work together, they're the same. It's not easy.

I used to call it, in the physical test time, the "tickle factor." I spoke about this many times. When we used to do the test in Sharif Tehran University, nearly 15 years ago now. In 2008, I had drivers and bodyguards, which they usually sitting outside the lab. Or they were hanging around till I work, and then they take me back home. And sometimes I used to call them, when I used to run the system. And for example, I used to ask them, do you want something or whatever. And you see them walking in, and as they walked in, I was waiting for their twitch in their body. And that, for me, was, in a way, they could feel the magnetic field, the Soul of my system, (1:50). touching them. And they used to react. It's just, I used to call it a tickle factor. You see that shiver. You see that cringing. It's like somebody putting their hands in your belly. And, I used to find an excuse, something, and they used to go, and I said, can you come back in, can you bring this back for me? Oh, we'll be back in ten minutes. And they come back in, and I see if I managed to increase the field by another meter, because I changed some things, and then I see. Or I mark the floor (where they reacted to M field). There it is. That twitch.

You have that twitch in emotion, when you extend your STP and the STM interaction, inside the brain, or outside the body. You feel that shiver .. you feel that warmth, when your Soul takes over. You see the world is not so clear, it's fuzzy. Don't worry you don't have cataracts. Cataracts doesn't come for a few second at age of 20. Then, you realize you have reached the position to expand your body, and dimension of his Soul. Then you know.

And you can do it with many, many different ways. There is not one way to do it, to changing the rhythm of the breathing, to change the rhythm of thoughts, to change the emotion, to... it's a lot of different ways. But you can do it with drugs and alcohol and the rest. If you go that way, you're in the physical dimension, you to get drunk. (1:52). You're addicted. But if you can do it in dimension of understanding of the fields, the way you go through what I call, the dream cycle, which is a work of the Soul, gradually you learn how to expand it. And that expansion allows you to transmute.

In a way, it comes in so many way from servitude. And that servitude is the STP serving the STM, or the STM serving the STP. And if you understand that servitude, then you understand transmutation. And you can create it. Put it this way, when you go to sleep, the body does it automatically, so it cannot be that hard. You do it every 24 hours, for 8 hours. And sometimes even during the day, you say, "oh, I was daydreaming." Sorry, my Soul went on a travel to see what's going on, nosing around.

Then you can train yourself. And no coincidence. Usually, one of the best way to see the expansion of the Soul is by the vision of ... you'll understand what I mean when it happens. We put people in the system, and we allow that expansion. And always, as I said many times, some of you have been in there. You don't. You see blurred. It's not clear, but your eyes are open. You see me, and you call it blurred. That's where your Soul has expanded beyond your physicality.

Any other question? (1:54).

Q: ... Do you foresee transmutation on a large scale, to be taught in the future, as part of the compulsory education?

K- It's not compulsory education, it's a lovable education. This, gradually as the systems develop, we develop, and I'm sure others will develop it with us, and we'll see Samsung making it as much as Huawei and the rest. You will come to the point that mass machines will become a reality. Production of systems, which can allow a number of us to do this, it's become. It's on the cards, it's just how fast the technology gets accepted. As I always say, the guy said, when it's on CNN, I believe it. I say when it's on the, on world televisions. But the biggest problem for us is that nobody watches that much CNN, except the Americans, who are bringing their own power.

And, what you call it, we were talking about it, two, three days ago with our Knowledge Seekers. We think about less than 5% of the world, and majority of it, all people watch TV. Television has no room in the present society. Everybody's on the Internet and watches all sorts of things as they like, and not as they are forced to, unless we decide, (1:56). it's like American's got talent, or England has got talent, a few thousand people watch. But the numbers is too limited to a few.

If you go on the most watched YouTube videos, for example, today is a child song called, "Sharks." I was just seeing, trying to see who's been watched those videos. And apparently, 13 billion times, every system of this Earth, more or less, even the ones in Africa, have watched this thing twice up to now. And no television channel has 13 billion viewers. So the shift, the teaching, and the process of teaching the knowledge has to be shifted into a different way, then into what we call, the present Media.

And the next step to the present media is very much, we have tried it, we have tested it a few times without anybody knowing. It's not embedding, but bringing for you the understanding while you are with us. And

then you say, "oh, this happened to me, or that happened to me." But in fact, I asked you to go and do this thing. It's not a brainwash. It's in a way, gifting a Soul. And this will be the way that many of you will learn languages and emotions in the Space. (1:58). There is no sign language in the world of Souls. And the future teachings about the Souls and everything will come through the Souls themselves, teaching each other, and elevation of, once we understand more, how gradually to do this.

The biggest enemies, the biggest enemies, who stop this process will be religious people, because then religion has no meaning. And the Rabbis and Mullahs have no place, because there's no intermediary between your STP and your STM.

Any other question?

Q: ... When we talk about the graph during the sessions, we talk about, like when we have the STP and the STM, like "Yin and Yang." So, they make a circle. So, when those two are balanced, is a circle and then, the outcome of it is a physicality. Now, if the Yin is on top of the Yang, or Yang on top of the Yin, or different angulation (angles) means there's something wrong with the emotion or physicality, and that's the outcome to physicality, has a problem. Am I correct?

K- You have to understand how to interpret it. It's not just as straight as that. (2:00). You have to understand how to interpret the, what I call, the data.

Q: Okay, so if we take 10 babies who are just born, and we put them in the session, how would you see the Yin and Yang? They all, they're going to be a circle, they're all balanced.

K- Very easy. No, no, no, no, no, no, there is no such a thing. There is no such a thing. Not to match each other. Impossible.

Q: So no, I mean, .. no. I'm talking about the Yin and Yang, like 180 degree, you said, is handling opposite each other. They're balanced. We are not balanced because...

K- Yes, when they are balanced, they're opposite each other. When they run in different way, or they run in harmony on one side, it's misbalanced. There is a lot... And when we get this, you got to understand, during the process of the series we run, we continuously, I think every two minutes, we get a graph. We know the status of a lot of you in that process. As I'm talking to you, I'm looking at some of them. I'm trying to see if we can release some of this. But it's so intense, it shows disharmony, it shows so much things.

But in a way, it's the behavior of you in both dimensions. In a way, when you look at these graphs, it's the 3 Ethos of Mitra. How harmonious they are together, and how one changes and brings change to the other. (2:02). And we used to see in the very first series of testing, totally different. (Hear Brazilian simultaneous translation ..)

And we see this. How? Because most of you are the same people who keep on coming to these sessions. And we see how you have changed. It's amazing when we compare the graphs of January to graphs of June. How you as people have literally elevated them .. yourselves. When I was looking at the graphs last Sunday, it was amazing I was looking at it. If I show you the graphs of January when you lot came in, without you knowing, you have changed your life beyond your imagination. We have touched your Souls.

Those of you who've been continuously with us, if I show you a graph of last January, when we started it last December, and the graphs of last week, you'll be astonished how harmonious you lot have become. It's astonishing. When we had you in January, you're all on one side. The Soul, the STP, and the P was all on one side of the line. When you look at the graphs of last week, it's 180 degree, works totally in harmony. (2:04).

And in a way, many of you who went through the process, especially in past four weeks, have reached a position that you can do the transmutation. And you call it, a dream, something happened. Or you feel the change. And then your physicality bring your partners, your lovers, your children say, you've changed. There's something different. If I show you and go back and see who has been in January session, and then bring out who's been in the, what you call it, last Friday session, and find you lot who've been in both sessions, then you can see the change in yourselves. You'll be shocked. And many of you are ready for that transition. You wouldn't let the STP and the STM go, because you didn't trust. Now you do. And we don't talk. It's right in front of me. As I'm speaking to you, I'm looking at the pictures. Shall I show you a shock on how you've changed?

Q: Mr. Keshe, something strange happened because, I think it was after this Sunday session. I was at the airport, standing in line and suddenly the heartbeat, usually you feel your own heartbeat, and sometimes it's silent and sometimes it's higher, but suddenly the heartbeat was in the room, (2:06). and the place I was standing wasn't in me, it was coming from outside to me. How does this, because I was just... I was...

K- Did you see a nice pilot passing by any chance? I don't know. You have to explain, you've been there.

Q: Okay, so I don't know, I didn't... Maybe my Soul got excited with somebody else, it wasn't me.

K- You never know, if the Soul has passed your physicality, is doing it's own job.

Q: .?? the heartbeat was very bad to see what's happened here, maybe it was the Sunday session. Okay, thank you.

K- Thank you very much.

Now when we look at these data's, and you have to understand, during the sessions, our team continuously bombard us. Every hour of the session, we get at least 10 graphs. And many of you who've been in the sessions, especially in the past three or four weeks, we have a full control over the systems. We add systems. You see many microphones with different numbers and things are on, but everybody else switched off. And these are the processes which we use. And then we switch over which numbers, what we add, what we take off. And even when the systems are on, in the background, we add a lot of things, and we take a lot of things out of the system. And we observe how your Souls, your STP and physicality response. And our team just puts an arrow on the graph. This is where we took this, or we add this, or we change something there. Then everything is registered. And then we see how these things affects you, affects your Soul, how you expand it. (2:08).

It's a science. It's not anymore, what you call it, a talk. It's becoming a technology. And we have good command of it. I'm sure in the near future, we will release the different sessions of the graphs of these sessions and the notes which we made, observations. And backup sessions with it, that what happened in what period, and how all of you responded. It's not one or two people. In some sessions, 100, 150 people, 120 people. In some sessions, 70, 80 people. It's a collective awareness.

When we open this fields of the Soul and the physicality, don't expect much. And just try to understand how, and what you need to do for yourself. And where you stand. And how harmonious your STP, and is your Soul and physicality ?? are with each other. We are that photographer, we are that doctor, you know when you go to an ultrasound and he just puts the thingy in with a bit of a silicon and then shakes it and says, (2:10). "oh there is a baby there." Even if it's a tadpole size. Our graph is that, ultrasonic. But this time it's ultrasonic, it's all your energies. We developed it that way. And then it's for you to see how that tadpole of the STM works within the massive structure of the physicality and still controls it.

Any other question?

K- Can I answer your question? I've just received a question. How would we do? You'll be contact, once you register, you'll be contacted and be given a session. Attend that time, and that's the only slot you're going to get. Because once we do it, we program it for 2 or 3 days or whatever, and you're given a slot, you have to be there at that time, that slot, for your time. And then, we'll send you or we'll give you the, what we have, what picture we have gathered from your time, and the structure of the fields of what we call, the three fields of the man. And then it's for you to assess. We try to give you one at the beginning if possible, one in the middle and one at the end, and in that process, don't forget, you're continuously receiving condition for elevation of the fields. So you can see how you change and what you need to do to bring that in.

Very, very limited numbers will be put out, because it's a very time consuming. But we need to do this for the next step for space development, which is coming up. But at the same time, for the first time you can photograph of your energy fields, (2:12). of what we call, the plasmas, the three plasmas of your body, which is the physicality, the Soul and the STP. It'll be very interesting, what we see.

Q: ... Are space flights available for reservation now? Or were they just available for the previous time? Because I'm very interested to experience it.

K- We have moved the systems out of position. It's not possible anymore. The systems have been moved to a new location, and it is not possible. As we are moving out of Austria, we are relocating a lot of our systems around the world. And these have been moved. Those of you who went through the flight system and that was, that is "one off" experience, a very few numbers compared to number of Knowledge Seekers ?? The same will be this, what you call it, the "fields of the STM and the physicality." It'll be very, very, very few be done.

R: In a way, they're the new space flights, the new way to go. In a way, we travel to where you're collecting the information, and back from wherever we are in the world.

K- It is not cheap, because it takes literally half an hour, 45 minutes, and our systems are time priced for it, that it covers the cost of it. (2:14). But, it will be one hour, it's like, you get one portrait of (ultrasound), what you call it, when your child is a tadpole. And I'm sure in the future, we'll come back to you and we collect, what you call, the research papers to be published. Because maybe in six months time, a year time, we invite you back, and put you through one and see how you have managed to elevate yourself, (or) how you managed to move away from it. Did you commit a crime during that time? Or did you serve humanity in that time? Did you receive blessing? And then you'll see.

It'll be very, very limited numbers, because it's very ?? time research. And in a way, you get to know yourself the way you didn't know before. We will open the channels very soon, and we'll close it very soon.

Any other question?

We're running nearly two and a half, two and a half, two, over two hours. Yes, carry on

R: We have an important question, I think, from Sebastian in Livestream. He's been a regular listener for many years, actually. And he talks about, you mentioned about the lifting the Soul and elevation and so on. And you've also talked in the past about taking out the middle man and going direct to source, but yet we have various prophets in the past such as Jesus, Mohammed, Buddha and so on. (2:16). So, Sebastian is saying, he says, the lifting of our Soul also involves finding and accepting Jesus within us. By loving him, we create an interaction between us and him, which causes our Soul to rise. Can we also do this with Jesus and other people, and consequently lift other people's Souls?

K- That's your job. And that was their job. And secondly, if you don't believe in Jesus, what's going to happen? But don't forget, in essence, in true essence, the Soul of all the Prophets is the same Soul. Just because the man wears a sportswear in the morning and a suit lunchtime and a swimwear at night does not mean he's a different man. So is the Soul of all the Prophets. It's the same Soul. And the sooner the human race understands this, the sooner most of these, what they call, religious conflicts, which is all fake religions, will go. We have to look at the true essence of the message, not what is written to suit what message.

There is no difference in the Soul of all those Messengers. (2:18). It's the same Soul, in different frocks, in different time. If you look at my portraits 5 years ago, 10 years ago, and today, it's different age, but it's the same man inside. So, it's the Soul of the Prophets. But the time is not 15, 16, 20 years, it's hundreds years of gap and depends where it's needed to manifest itself, to change.

Q: Mr. Keshe, that brings a question, if the Soul of the Prophets were the same Soul, came different physicality. Now the question is, are some of us came to this planet in different bodies at the same time, it means reincarnation or no?

K- We are collection of the fields, if you are created through the Soul of the Creation, which is the children of Mitra. It's different. But man is through interaction of the physicality. You're a collection of the fields in the dimension of physicality. It's totally different.

In the future, I will teach something very, very radical, very different than what you, as what you call it, dimension of physical life, expect or think. And the truth about the, what I call, the "children of Mitra." It's very, very different. (2:20).

You have to teach, to show, to take the fear away. Otherwise you become a magician. and you create fears. And that's not our job. That's how, step by step, we bring you forward to that point.

There is something which ?? was raised to me by our team, which we mentioned before and we mention again. The Keshe Foundation account in Holland is closed. Please do not send funds to the account. And or you send to buy coins through the account, or you send donation. Everything, the instruction is a new instruction on the Keshe Foundation website. Follow that. Because people buy things and or send a donation, and send to, and it goes back to them. The account of the Keshe Foundation in Holland is closed for nearly

three months, last two, three months. And we informed you. And some of you still make a donation, whatever. There is an instruction where to do and then it's for us to internally or move things around within the Foundation (accounts).

Any other questions, or shall we call it a day?

.... how about one last question.

Q: ... Happy birthday Mr. Keshe. Are birthdays also celebrated in the Universal Community, or is that just a tradition on Earth?

K- We don't have birthdays, (2:22). because you don't know where the Soul was created, from which part of the universe. There is no time frame, it's manmade.

R: Our custom is that we go around the sun once, and we call that one of our years of our life. (K- in U we ?? don' have) But the Souls aren't just circling around suns out there in space, right?

K- No, that's the beauty of the Creation.

Thank you very much for today, and thank you very much for your greetings, and I hope, as I said, we'll release new pictures, as it's tradition, every five years, and it should be done by tomorrow. And we'll see what brings us for next teaching, And please, those of you who want to join this, what I call, the fields of Souls and physicality, follow the time you are given. As very, very few numbers will be allowed to come in to do this. And as you know, when we stop, we stop as, what we said, we have no more flight test, because the system is not there anymore. and soon these systems will not be there, as they'll be moved around the world for different purposes. Thank you very much Rick, and hopefully we see you next week.

498th Knowledge Seekers Workshop Aug 10, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Goal of material production to reach fields of Creator - jump on line going to Creator; Creator created out of His own fields; Make system to reach; Gans of Gans; Every Soul connected to Creator; Show T to humanity; Matter & Plasma both respected; Visualized fields of MaGrav & Gans - become part of; Elevated Soul of leaders works - Ukraine Church war; No guns in Space; Planet can disappear; Astral travel; Cannot formulate Plasma - core teaching; First Space reactors fly in Lab; Plasma & Current saturation - Parkinson's; Asteroid Belt made from fields - rings; Practice Soul; Soul working P asleep; CIRBU forming; China brings peace to Middle East; Arabs ruling Iran; America Gun & GMO policy ending;

ENGLISH TRANSCRIPTION

(:20).

K- Yes, thank you very much. Good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers program of the Keshe Foundation Spaceship Institute. As usual, we welcome you back. And as usual, we try to understand a little bit more. (:22).

Last week, we touched on something very, very important, and the week before. And we build our knowledge of today on the basis of the past 3, 4 weeks. One of the most important points of our work, as we said, we have managed to, in connection and cooperation with the Chinese military, show the production of materials, show production of organics, show the production of elements, doesn't matter in what shape or form. But, what is the ultimate target? Are we still going to make Calcium, Copper, and Zinc and whatever? Or, is the ultimate target of all this work, is to be able to understand, to make the Fields of the Soul of the Man (STM)? At the strength of it's work.

We have replicated to show the energies of the Matter. The ultimate goal is to be able to replicate and produce the energy, the spectrum of the Fields of the Universe (U). And one of them be the strength of the Field, which leads us to the Creator. This is the work, this is what we are targeting for.

And this is not just to show we made elements, it's not to show we, we managed to make a gas. It is a stepping stone towards the ultimate goal. To create that ultimate field which makes us, and that process allows us in that position, create a condition for us to board the line, jump on the line, connect with the line into our Soul, to the dimension (D) and direction of the Soul of the Creator.

But, we are learning step by step, we are learning gradually. (:24). We came in with nothing, we came in with a stick in our hand in the caves. We didn't even know what a fire was, that we understand the energy conversion. We learned step by step about the metals. We mastered them. We alloyed them. We made chemicals. We became nuclear physicists. Now we become Plasma Physics, and then we become "Creator Physicist." How do we find a line to our Creator? And then with that we become the ultimate goal, we become what all the Creation is about. To become that part, and parcel of the Creation.

When you look at the magnetic fields of the Earth, it starts from the North Pole and it turns back to the South, as you've seen in many (pictures), that Earth is the "creator," it's the center. And those fields show the way you can get to the center of it and become part of it. Creates its atmosphere, creates its dimension of Creation, interaction with the others. And this is all the ultimate goal, to be able to jump on one of those fields. That in rotation and movement, in the direction of what we call, attraction, we become part of, we touch the Soul of our Creator within, when we go through it.

When a magnetic field goes through the Earth, touches what's inside, in the center, absorbs energies from it. And as we know, the North Pole, the North Pole of the Sun, or the Earth, is always slightly warmer than the South, because it's gathered energy, it's gathered magnetic fields from the center. And, somehow it's become part of it. And this is the whole subject, this is the whole principle of the teaching. The ultimate goal.

Will it come to the point that we can create fields, that the interaction of their fields, will... the interaction of the field of our Soul, (:26). puts us on that path. That we become in that part of the hemisphere. We become that part of the atmosphere and rotating, we create the dimension of manifestation of the existence of the Creator. Now you understand what it means, "I am the beginning, I'm the end." I'm the Creator and I'm created from the creation of my own.

Now, what's the ultimate goal? How do we make that system? To make what... if you go back to the teaching of the... some months and years ago, I taught you, I told you many times, "make Gans's of Gans's." That the interaction of the Gans's of the Gans's, allows you to create that field which leads at the strength, if you get it right at a certain position, the strength of the fields to get on that line of the loop, of the fields of the Creator. How closer you getting, or the further you are, is the strength you absorbed. And then the closer you become, the more enlightened you become. The more you have to give.

The fields of the Earth, 50 kilometers are cold, and the fields which are near, in interaction with the field of other, and the Inertia, creates life, condition of life. Condition of existence, manifestation, creation. And this is all it is, we are somewhere 500,000 kilometers away from the center. And we are trying to jump in, "frog leap," and come into the inner circles, to be able to get close enough to Earth, to close enough to the Soul of the Creator, that we manifest, we show the Creation and the Creator through his Creation. (:28). Now you understand.

In the coming time, in the coming days and months and weeks, we endeavor to make that system. We are working on it. We are working on making a system that creates the fields of the Creator, the ultimate goal. And then in the interaction with the STM, becomes the will of the man. "I am in command, through the interaction of field of my Soul, to create what my wishes, in the dimension of the wishes of Mitra." We are all servant to her, and nothing else. And through serving her, we serve the Creator, and nothing else. And Mitra it's not a creation, it's not an entity, it's the principle of interaction of the fields of the universe. It's a path of living, it's the way you interact to lead to creation of the perfection.

Now you understand. All this teaching, all this going from Gans's to this and that, and the MaGrav system, and the rest, has been to bring you gradually to the position to be able to create the fields of the Creation. Then, you become the beginning, and you become the end. Depends where you jump into the circle, on the North Pole as it comes out, or on the South Pole as it goes in. But that "Pole" is your Soul, that Pole is the Soul of the connection of you with the Creator.

Every Soul, in the essence of its creation, at the point of its manifestation, has the field line common denominator with the Source. There is none, no life, there is no Soul, there is no existence in the universe, which has no direct connection to the Soul of the Creator. (:30). Now it's our job to find that, to find the strength of, to create, to build systems within ourselves, outside. Man is genius in building machines to replicate and create that field. That single field, that in coming in touch with, in connecting to, we get enlightened. And then, we see the whole knowledge of the Creation. And we become part of the Creator, that itself is created out of his own creation. It's very much if you read the Book 1, it's the story of the Creation, interaction of the field, which leads to Mass and to Weight, out of interaction of their own by them.

Now where are we going? And how (do) we reach this? We have shown in the position and the power, creation of some 30, 40 elements and organic elements in the past few weeks. Keshe Foundation (KF) in collaboration with the Chinese military, now endeavors into the next step in the coming days. We endeavor to create a new condition. We endeavor to show the existence. That is, how actually it starts. And where and

we enter the fields. And then where can we exit the fields. For you to get from North Pole to the South Pole, if you're lucky, and you're on a rocket, or you can drive and swim and everything else, takes you a few weeks to get from the North Pole to the South Pole, or at least a few days. But, the fields of the Earth from North to the South, is instantaneous.

Now, we are interacting with the field of the Earth. (:32). What about the fields of the universe, which already interact with the field of the Earth, and we jump on them? And then, what about the fields of the Unicose, we interact with us, within the structure of our universe, if we get on them? And then we know all these fields comes from the fields of the existence of the Creator. What about if we jump on that? It's not impossibility. It's the lack of knowledge. It's not that it's in the dream, it's the reality that we have not understood the principle. And now we are setting in that direction of dimension.

In the coming days and weeks, we will show a new dimension, a new structure, a new way to think, to interact, to feed. I walk within the fields of the system and I receive what I need, as medicine, as food, as energy, as the interaction of the fields to interact with the Creator. We are entering a new dimension in science and technology, we are entering into a dimension that we can put a blind (man) near the system, and he walks out, that he can see the whole Creation. Not only the physicality (P) of the man and the Earth.

The exploration of the science and technology in the coming days, with the Chinese military, will open a dimension in the world of science, that even the scientists will not be able to understand. It'll take them hundreds of years to understand how we did it. And how we will develop this position and condition. where you can bring a man blind and walk him out. (:34). He can not only see himself with the eye of the man, but opens the eye of the STM to the world of the Creation.

We saw the beginning of this process. We saw the structure of this process weeks ago. When the first Chinese military officers walked into the room, and they saw fields, they saw everything, and they could not believe. But I cannot tell them what's in there, because it breaks ?? .. our understanding, these people are blind to the knowledge. Now we set to watch. We set cameras, field detectors, and everything else possible, to understand how can we find a Soul, can we find a fields interactions, and then we invite the world leaders to see the world of the Creation as it's created.

The collaboration between the Iranian government, Iranian scientists and Chinese in next few weeks will break through a new world of science, beyond man's imagination. Because when we showed it, and when it was seen, in the past few weeks, has put the scientists, and the military and the man to be baffled.

It's an unknown science, but we have two choices. We have... we can drag you along in bits and bits, or literally drown you in it. And I think drowning the man will be better, because he will learn to swim, than dragging it, that the hope he'll one day get to the water. The understanding of the science, the understanding of the technology (T), the understanding of the knowledge of Creation, is at the reach of every man. (:36). It doesn't need any Prophet or any Holy book. It needs clarity of understanding, it needs the being in the position. Being in a position to accept, to see, to analyze and then not to judge.

As I always said, repeated most of the time, when you came to Linz, we said, we are not there to judge (you). We accept what you see, what you've seen. Some saw the mermaid and some saw and felt the Soul of the Christ. Some went on the Moon and touched the stone. And some came to see nothing, came blind and went out blind. The arrogance bring blindness. And the servitude brings wisdom, understanding. And that comes through the Soul, that comes through the interaction of the fields. In talking to man, Man has seen and has to

see everything in the dimension of physicality. In talking to the wise man, he understand the wisdom of the Creation and sees the fields.

In the coming days, and I'm sure if we get the collaboration and the work of our team and with the team of the Chinese military, we will open, we will show, we will detect, we will do everything to bring in a new dimension in the world of the science and technology. Where we do not need to produce anything to live, and once we connect to it, we are connected for life. We shall not kill, as we receive what we need. (:38). We live through the dimension of the purity of Mitra and the ethos of creation, and in all three dimensions of the essence of the creation of Mitra.

Maybe, maybe now, maybe in the coming time, maybe in the next few weeks, we'll change the course of humanity by physically showing it to humanity. Many of you will burn your books, and many of scientists will deny the existence of the ?? past. But it has to be understood. We deal, we work, and we show the dimension of the fields in motion. What we dealt with up to now, as I've said many times before, is a matter state.

There is a difference. Maybe. In a simpler way, I can explain, it' .. matter state is connected to the Inertia of the fields in matter state. And the plasma state is connected to the inertia of the plasma state. And both exist in collaboration, in conjunction, and within each other. The man exists with the Soul within it. So man is aware of both dimensions. To what extent, to what limit, you as Knowledge Seekers (KS) come to cross that line, get rid of your dogmas, get rid of what you've been told in the matter state, hold it, treasure it, and keep it. And then try to understand the world of plasma, world of Creation.

But the best tool, the first thing I could give you was MaGravs. And I keep on telling you. (:40). And I'm hammering it in, and I'm hammering it in, and it's still there. "It gives only 30% reduction." No. See what fields it creates. What are its potential? What are its dimension? And then take the next step. And maybe, maybe in the coming time, you as KS will become the first passengers of the Unicose, then the Universe. It doesn't take much. It's just a "flick of a finger." It depends how you flick that finger and how it ends up, and how that coil rotates, and how it lands.

Try to visualize the interaction of the fields from a bottle of Gans in front of you. Try to visualize the interaction of the fields from a dynamic coil in front of you. Try to visualize the existence and interaction of the fields of the Gans's in front of you, with the room fields, with the atmosphere you're in, within the Earth. And then see, if you have not missed one thing, you were too busy to see how these fields goes, and you forgot that fields are already interacting with your Soul. Then you understand the wisdom of knowledge. As usual, too physical, you forgot about the reality of the Creation.

The teachings from now on, is not so much about making things, is so much about understanding how to connect fields. And, as I said, (:42). the Creator did not make a machine to make fields, He was created out of and He created from it. Now you're in the same position. Try to see, try to understand how you can make reactors without motors, that only interacts within the fields. I released this paper years ago, "Creation of the Motion in the Universe," and no one looked at it. Maybe, it's time to go and back and look at it and read it, and understand it. And then you might be enlightened, how man has reached the condition of creating motion, as you call it, motors, without engines, without burning fuel, without coal mining, without the donkey pulling and something else pushing.

In the process of understanding, in the process of the totality of being part of that, in completion of the course, man needs to understand the interaction of the fields. How and which fields he will use, to heal his cancer. How and which fields he'll use to satisfy his hunger. What fields and what position he'll use to create water, that he does not go ?? off. A few of you who joined, you were flooded and you could not hold enough water. You were producing so much that you were drowning in it. If you push it a step further, you should be producing so much fields, (:44). that instead of feeling it in your mouth, you feel it as elevation of your Soul. Enlightenment. But, as you are so materialistic, having that water was more important than actually elevating your own Soul.

In the coming time, as we develop the systems for the creation of the ultimate fields of the Creator, many of you will walk away from physical life. Many of you around the world will link to the line, to become the "passenger of the universe." Many of you will come to the position to understand, this physical life is not worth, as it stops the pleasure of enjoying the dimension of the fields of the universe. We were happy with the room in the village. We came to town, we made apartments and villas to enjoy the city. Now we take our Souls for a trip, in the dimension of universe. But we have to understand, how and what, and what to give and what to take, that we make sure we reach home, we don't go backwards. And come forward and says, "oh, I was there before, haven't I?"

Try to envisage, try to envisage the fields and not the matter state. Don't look for electricity, look how interaction of the fields created that electricity. (:46). Many times, I asked you to look at the fields of the MaGravs to understand it. Try a new way to interact with your Soul. Try a new way to elevate your Soul. Try to understand the fields. Try to become part of it, and not an outsider observing it.

In the coming weeks, I will show many of you how to reach that point? How to extend the Soul? In the meeting in Manchester in the next couple of weeks, we start this process. And in a way, you have time till November to practice it, your "homework." And see how many of you in that process manage to reach or understand the process of the creation out of the fields and not out of the books of the history. (:48).

In the conference in Manchester, in the ?? teaching part, many of you will come to meet, to feel, to understand your Soul. To be able to cross that line, and to be able to understand the Totality of the Creation. My only wish is, that by the time we finish on Friday, those of you who understood, do not need a flight back home, as you already are home. Home is not in the dimension of going back to Mexico, or Canada, or somewhere else. Home is finding a way to the path of the Creator. For yourself, by yourself. Through understanding of the fields, interaction of the fields, in being able to manipulate the fields of Creation.

I hope many of you will come to understand more in a shorter time. But I'm sure in the trials coming up with the Chinese military, as we try to understand and transmute in the time to come, the Chinese military forces from one point to another, we bring in a new dimension of life, a new dimension of science and technology, as we become the "soldiers of the knowledge." (:50). It's not easy. It's not going to be an easy task. But, we have to. We have no choice, but to start somewhere, and then build on it. To the next step, to the next understanding, to the next completion, and accomplishing what all of you have been waiting and wishing for.

Try to understand the fields of the connection. Try to understand the Totality of the Creation. Try to feel the fields, and try to understand the operation of the fields within you. Many years ago, I explained to you, you can hold your hand and create a light in the palm of your hand. I think the knowledge has reached that point that some of you can. If you understood the work, some of you by now should be able to do this. At least you can make attempt to do it. And then, it's not the light in the palm of the hand which we are looking for. Then

it's the light of enlightenment, the light of understanding, the light in a way as knowledge, not the physical light to be absorbed.

New systems, new technologies will emerge from the Keshe Foundation in the coming months, and weeks, and months, and days, and God knows years. But, we're still making Gans's, and still making Gans waters, (:52). and God knows what. But again, as I said, it's like a school from zero to twelve. Depends how much you understood, in which class you sit. Try to comprehend, try to feel the fields. Try not to pretend, but understand the reality of the Creation.

Thank you very much. The teachings are short, but very deep, and you have to understand it. We go through a small break, and we come back, and see how we ?? baffle the knowledge. Thank you very much Rick, if you want to take us to a short break and come back. (:53).

<<< **BREAK** >>> 498 KSW Aug 10, 2023 (:57).

K- Not really, we always say what we have to say. There are a couple of things as you know, that we are planning to end the productions and the materials which are at Keshe Foundation. We've made some of them, two for the price of one. That we clean out our, what we call, stock. (:58). And as we, in the next 6-12 months, gradually become part of a bigger structure and you will see much more materials and products through the new joint venture with the Chinese.

It'll be interesting to, what you call, how we will bring new materials, new understanding in the next cycle of what we call, products. But we have to get, we have to finish with these. As we have given notice to, literally move out of the Linz Exhibition Center, to all that products, we are trying to, what you call, share, it'll be, what we call, the last products from the Keshe Foundation as an organization.

In regard to Manchester meeting, a few people have moved their position to another sessions, like in November. So, if you, there are some of you still want to join, there's still one or two places available. And, now we are taking, looking for the November, and the meeting, the world ambassadors. We are striving now to have a very, what I call, colorful, exhilarating experience, in the weekends with the world ambassadors. Some of them might join us from the beginning of the day, then just the evening session. And, we have put forward our invitation to some of the world leaders. ?? (They are) understanding the position we are in. It's much easier to create that condition, and we will, in a way, push to the advantages of this position, to be able to share the new Space Technology, and new understanding.

And, as I said, in next two years, (1:00). Keshe Foundation, the way you as Knowledge Seekers knew it, I think only, this Thursday teachings will be a remnants of the, greater Keshe Foundation work originally. As everything will move into a different scale. But, we'll keep the Thursday teaching as part of the totality of the teaching. We are working on it, step by step. The, what I call, it's not an easy job. And, as we grow, now out of what we are as a, what we call, a Foundation work, as a Foundation and a, what I call, part of a larger international organization. You got to bear with us, we will as usual, this is the habit of the Keshe Foundation, we still make mistakes, we will make some good mistakes and some bad mistakes, But overall, we should be able to move to a new dimension and direction. And we'll see where and how we will come out of what we call, this position in next 5 or 10 years.

If you look at the digits on the screen, we've been here 498 sessions, non-stop, every Thursday, doesn't matter how .. we shuffled it from hours, or whatever, we've always been there to share knowledge. In two sessions it'll become 500. And this is a huge, huge ?? Non-stop shared, non-stop participated.

In the back of now working with the strong nation and the structure like China, (1:02). we'll go back to a lot of things which we left before, with the intimidation of, what I call, we just take from, from the Germans and the hooligans in Belgium and the rest of it. We will organize ourselves in a way that no one can touch, no Knowledge Seekers. And we go back to open sharing, that you can come and show your products, you can come and show your intellect. You could share a way to be able to add to the knowledge of the others, without getting intimidated by the others. We'll bring in national security forces to protect the Knowledge Seekers to be able freely to work.

And as I always said, it's time for us to move on. It's time to change and a lot of us are working to bring that change forward. And now we have people who understand what the change is and are there to support, to give the helping hand for humanity to move forward, it doesn't matter in name of what knowledge and whatever.

So join us in Manchester, or join us in November in London, and then we hopefully start seeing a new dimension in what I call, understanding. And move away from this "Gans production" and everything else.

Any questions or anything you would like to share?

Q: ... (1:04). .. (K- You know it's a very strange feeling when you keep on saying Derek (Red Circle's name was Derek). Q: Hello your Excellency. ..

K- Could you tell us where you are from.

Q: I'm from Münster, Germany. And I visited the Space Center in Linz in June the 12th and the 13th this year. And well, I was very excited. And first I want to thank you, Mr. Keshe, that you give all this knowledge, which I'm getting through the workshops. And during that time I got mature with an age of 53. And I just add, my name is Dirk, D-I-R-K, and in German the day is "Dienstag," I opened the planet at 6 pm. I want to thank all who gave me this power to do it. And the only two things I saw was that the people calmed down, they don't walk that stressed like before. And all the paintings on the cars and walls and stuff got like they were sold yesterday. That was these two things I saw. But I guess there are a lot of more things which happened during that opening. (1:06).

So my question to you Mr. Keshe is, what else happened? Because I think this was starting the peace process, or the initiation of the peace process for the, globally, for this planet. That's, that what I, that's my thinking.

K- I don't understand your question, I don't understand what you explained.

Q: Well, I just pushed at the 6pm on that day, pushed the energy into the planet. And I just saw that the people calmed down and the cars got new painting and stuff. But my question is, what else happened during that planet opening us initiating the peace process on this planet, that's my question. If there are any other, other reactions happening during that opening?

K- The peace process is a long, long, long haul, road, and work. We as human race have battled and fought and we still seeing skirmishes of fighting, that a lot of us have ?? occurred and that peace can exist. But we have to establish that peace .. within ourselves first. And we've seen a huge leap compared to 10 years ago, with wars. We have more or less one war, which is going on now, which is, in a way, can be stopped with a flick of finger, but it's Christians fighting each other, as I call it, nothing else, in Ukraine. (1:08). And, otherwise, if you look, all of the scenery in Middle East is peaceful. The whole of scenery in far East, we had Vietnam, we had all the skirmishes in the far East, we had wars, Japan and the rest. All these are gone. This last war between the Christians in Ukraine, in what you call it, Catholic Church and the Russian Orthodox Church, soon will come to an end. And then we'll see a permanent peace. They might try a few skirmishes.

But, we have to maintain a momentum that man does not go back to this. You can make war out of peace, very easily you just need one trigger point. We have to change that position, we have to ?? reach that comfort, it's not there. And I see this doable, it's achievable. And once we finish with this animosity between, or what you call it, "two Churches who's got more gold," we will see a long haul of peace on Earth. But we have to push it, that there is a hope, there is a change. There is a next step, that we don't go back to it, that we start forgetting.

If you look at it, it's a habit. I'm Iranian and I'm proud to be from land of Iran. And one of our biggest points, (1:10). one of our glorious time, is that we have not crossed our borders over 300 years to war. We have matured a little bit. We've seen the Islamic government of present time, which half of them are not Iranian. Our parliament in the first 20 years were half Iraqis. Our leaders are not Iranian. They don't carry a single blood from Iran in the first cycle. As Iranian, we never cross borders. 300 years, we don't see any reason for war. And if you go back to the time of the Persian Empire, During the time of Darius and Kourosh, they didn't fought. They expanded to Iran to be the largest, even to today's standard, ever, nation on Earth. By other leaders joining in without a fight, to be part of, to be part of a peace nation.

But, in times in between, we got arrogant leaders who wanted to show they have "testosterone" more than the other, and they went into wars. With 300 years we have kept our borders within. Now, can the humanity come and say in 300 years no bullet has been fired? In 500 years we don't have factories to produce tools of killing. And then we'll see we change gradually.

Q: So it's nice to know that the people who invented the firepower of China is now turning into a peace state. The first one. (1:12). ??

K- Either way we have to ingrain peace within ourselves, within our nations, within our, within our structure. And there are two ways now, at this point, to do. And I explained this to military people a few times up to now. We can go for building a more advanced weapon to be better, but by fear of having it, stop the others doing, or just don't make any weapons and just keep there. We were looking at the military data in the past few days, analysis in what you call it, political dimension. China has 2.4 (million) soldiers or military people under .. arms, or under the military base. And some of the not very far nations from this country have only

16,000 soldiers. Then you ask yourself, do we need soldiers? Because the 2.4 million and 16 (thousand) is nothing, just march it over, it's an ants.

What are the nation spending money on defense? We are in a position now, we are in a position of scientifically in a way to "put the carrot out," open the Space. And open the space not with war, that will be no war in the Space. (1:14). The way the politics of the Space has to change is that, we are going there because we are peaceful. It will be amazing for me to see... I wondered many times when I look at like this Apollo 1, Apollo 9 or 10 or whatever and we see this Mr. Armstrong supposedly walking on the moon. I asked this question for Americans once, and I put it to you maybe for the first time. Did he carry a side gun in his suit, in case he sees somebody he has to shoot? Do you understand?

Q: Yes, I understand.

K- This is the principle that we have to look at. Did any... does any of the people go to space labs with the whatever international labs, and the ones who are planning to go to the Moon, how many of them will carry a sidearm?

Q: None.

K- So are we going to say goodbye to killing?

Q: Yes, I guess through the next 5 to 10 years we are saying goodbye. That's my ..

K- Yes, but we have to watch, we have to watch, that we have to offer an alternative. We have to bring a condition of peace. As you know, Keshe Foundation is expanding in a very, very different... You've just seen the "tip of iceberg" in what is done, even people are inside the Keshe Foundation, most of them don't know what, where it's going, what is happening, or whatever. But, if you understand, if you comprehend what is going on, (1:16). in the next 5 or 10 years, do we need to eat, do we need to feed? Every time we introduce you, we ask you to come to these (Monthly) sessions of the Keshe Foundation. What are we offering you? What are we putting as a proposal?

(Just one second please, I've just got to get a cup of tea...)

What are we offering? What alternative we can put to our government? What is the proposition to Biden? In the upcoming meetings, in the ambassadors in London, what do we have? What can we show to the world leaders as an alternative? We have to, as a scientific organization, as those who many of you prayed, put (sprayed Gans) water in the things, and Universal Council members prayed for the wish for a peace, and now you got the peace, and we just want to tell you, only we look at this "flinky" job in Ukraine, how many of your wishes has been answered? All of it.

Why didn't it happen in past 20, 30 years, (peace) marching (on) all these streets and everything else. So the Soul of you Knowledge Seekers has a power. Doesn't matter how you turn it. And this brings you to a new point. What can we offer our governments, our leaders, our nationals, that they will not carry that "side arm" into space. (1:18). And what would be in the breakthrough for all of us, when we see this position?

I asked NASA people years ago, were there any guns on the Apollo? They said, "why you ?? shoot there?" I said, "why you lot keep on talking about demilitarizing the space?" Don't take the gun (you didn't take a gun,

so), don't do anything. Space is demilitarized. Or are you trying to say, it'll be interesting, and I'm sure sooner or later somebody going to test it. How far a bullet will go, if you shoot it in the open space of the Moon. Can we shoot the aliens if we see them? Has the space people ever thought to leave a gun in there, in case we have to shoot an alien in space?

So, automatically we have lost this idea, when it comes to space. Our space leaders, our scientists, our astronauts, don't consider it necessary. Can we make it the habit of the man. Can we bring that change. But we have to offer a valid alternative.

As I said many times, when I went to England in 1973, the first time, I was shocked. In Iran we saw soldiers, I was brought up near an army camp, guns, and different shapes and size of it. I saw Americans as our neighbors and tenants and everything else, guns everywhere. I came to London the police officers had no gun. It was a strange, very strange feeling. (1:20). Police with no side gun. And this was ?? its comfort zone. A few .. years later, for the first time I saw an officer in London with a gun. I went to him and said, "why are you carrying a gun?" He said, "the streets are becoming dangerous." I said, "you make it more dangerous carrying a gun, carrying it like this." Because to me it was a nation going backwards. Nation which was no arms on the streets, became armed. Now in London it's just worse than Holland. The only one who hasn't got a gun, I think, is the sick people on the bed in the hospitals. Everybody else carrying something somewhere.

So we have to not only make the Space a place of no war, but do the same with Earth. And we have to create and deliver a viable alternative. And that viable alternative is, teach you about your Soul. Teach you understand you don't need the cars and the, what I call, ??angers and eagers of the financial world and the rest of it as we have not managed yet. I know the bank of China and the World Bank have not opened any branches on the Moon yet, that you can get somebody. Think of it, if you go to the Moon, and you run out of money, what do they do, they unplug your breathing suit? Or if you go with your Soul, you don't need it anyway.

So, a lot of things we created on Earth, automatically becomes obsolete in space, and automatically will come back to Earth to make it obsolete. We have to go through that transition. (1:22). And we have to keep the option and the technology open. So, we have already started the world peace.

We started the Universal Council, on the 2nd of August, few years ago. And that time, none of you Knowledge Seekers knew, except a very handful, maybe less than a handful of people, that actually the establishment of the Universal Council, the first session and everything else of it, was when we were in China. It was broadcasted from China, it was set up from China. And the whole program of the beginning of the Universal Council, started in the isle of Tarsania in South China Sea. So, China has been the birth of the place of the whole process of the new cycle, it's not new.

I still remember, we were with other Knowledge Seekers in the island, and at about the time, midnight, when we were starting the things, and the whole thing was going on, we saw a massive UFO over the whole island, over the buildings, with the lights and everything. We went outside, listen to the recordings of that time, how it was spoken about.

Because it's a Universal knowledge, it's a Universal desire of the man. And we stood out in our villa on the balconies, and other Knowledge Seekers near us in their villas, in their balconies, (1:24). looking at the sky and seeing the lights, the beautiful conditions of, what you call, UFOs, but in a plasma condition. It was amazing "fireworks." And wherever we went to establish, to bring that essence of peace, we see it happening.

Space is a peaceful place, and by taking man to space, and bring him back to Earth, he'll become peaceful, because he doesn't have it there, what should it be here.

But we have to satisfy the hunger of the man, we have to satisfy the, what I call, health of the man, and we have to satisfy man to be secure on this planet. And then we move to a peaceful Souls, peaceful conditions and so on. Once you learn, you can travel with dimension of the Soul. Once you get, learn that you can expand the dimension of the Soul, to get rid of the illnesses. Once you learn that you can use the expansion, connection of the Soul, to get the energies you want. Do you see slaving ourselves for 8,000 days behind the desk, that somebody gives you something you put something in your mouth. Or you spend your time gradually in developing conditions for peace within yourself, and then ?? move through your neighbors.

In a way, we have started the world peace. Go back when we started years ago, when we elevated the Soul of the world leaders, and look at it today. And even the situation in Ukraine is resolvable within one telephone call, and nobody is prepared to make that call. Telling the Vatican to, "pack your bag and go." And then we're all at peace. (1:26). As I said once to those who were in Italy with us, if the Swiss guards and the priests keep themselves ?? with each other, which is their job, then most of the world will be at peace. A bunch of "gay guys creating fun among themselves" has created ?? a mess for the others. And this is the position we are in. You always bring people around you who are the same as you to protect you. Ask yourself, why do we have a Swiss guard? The biggest gay club in the world. And who are they protecting? Bunch of child abusers. And now they want to take over the biggest Church in the world and Russians are not letting. Soon later it will be resolved, but it will be the end of Vatican. You'll see and you'll understand. We see the end of it.

Q: No more fairy tales.

K- No, this is reality. I lived in Italy, you see them. How many of Swiss guards you see walking a straight?

Any other question, please?

Q: And I just want to thank you for the ?? ring, I got the message.

K- Thank you very much.

Any other question?

R: Yes. We have another hand up here with...

K- You know something Rick. Sometimes, baffled, past 10 years we've been with each other in teachings, to see your face, when I talk about things. And you still keep a straight face. (1:28).

R: .. yeah

K- Where are our Italian translators? ..

Q: ... My question is a very simple question. As we know, our planets run around the Sun. (K- Yes) Now all our planets run around the Sun. (1:30). And every planet has the same center as the Sun?

K- You mean in our solar system?

Q: Yes, but the question is, is the Sun the result of the Sun of the plasma produced by each planet? Is it possible to reproduce the Sun in our world with small ?? gaps?

K- The total mass of all the planetary systems within the Solar system is in the same ratio as we see in the universe, about 5%, less than even 5%. If you put the total mass of all the planets, Mars, Moons, everything together, ?? and all the dust, cosmic dust, and everything together, it's not more than 5%, even if that, of the total mass of the solar system and the Sun. So we see the planetary system moving around and playing their games with the different sizes. But then we realize mass is irrelevant. It's the fields which dictates their position and their speed the rest of it. But their existence has certain control over the Sun, but does not make the Sun. We are the containment of it. (1:32). But we cannot make it to be.

The gravitational pull, the strength of the fields of the mother is too heavy. The love is too strong. So we cannot make it, but with the energies within it, we can be part of it or create another cycle with it. Not necessarily within the Sun, but outside the Sun. This is why Earth is a greenhouse (nursery). We're creating those little "dusts," called the STM. And these Souls in the future, in time to come, become the stars.

So, it has a capability, the totality of the structure of this matter state of the solar system, has the capability to create another star, without a doubt. But you have to create a condition for it, that they change from matter state to the plasma state. You have to observe, you have to understand how it works, that it leads to creation of. We can start with one atom at a high energy, and start the process of attraction between the two, and like an egg and a sperm, start the cycle.

In our assumption in the world of physics, it's totally upside down and wrong way, and we stuck to it, because that's what they told us. And that is, you, any of you, can start the cycle of life, by creating the interaction of the fields. (1:34). And creating a condition that, once you started this, you can feed it and create condition of the, what you call, life for it. Life means consistency to exist.

So yes. You can do, if you know how, you can start with one atom. But, the whole of the solar system, planetary and matter state of it, is too minute to control the Sun. The size of the solar system is not dictated by the Sun in a way, but it is dictated by the fields of the other structures outside it, which they allow it to expand into and control.

If we suddenly fall into a lighter field strength in what you call, our galaxy, if there is such a possibility, and suddenly our boundaries expand beyond, to fill up the gap, which is now it has encountered, and the whole of life existence, planet system, within second will disappear. We are freaks of accidents of the Creation. You know when you go into, on a plane, and when you are flying, you suddenly they call you, you will get, jump in the hole, or turbulence, and you just go, up and down, or loose. Always imagine what happens if a solar system, or our Earth, (1:36). inside the solar system, hits one of these troughs, or one of these low field forces in the universe. How much will it drop? Trillions of kilometers. And if in that position there is nothing to control it, on expansion, the size of solar system doubles. So our position in respect to our Sun changes, and within seconds there is no life.

In some tests I have shown this, and I've shown how it becomes. Maybe in the future we replicate this test and you will understand. We are soon going back into labs and I think life will be very exciting for us to go back into these laboratories and development of new technologies for Space and everything else. And you

will see a different sides, and we can replicate a lot of these conditions. Because we have the knowledge that we have moved into a very, very advanced stage of interaction of the fields and creation of dimensions.

Any other questions?

Q: ... Astral travel has been practiced for a long time by the physical Man. Is this astral travel done by the Man a separation of the physical and the Soul of the Physicality (STP)? (1:38).

K- Explain.

R: Well I suppose Cristiano would have to define what he means exactly by astral travel. I suppose coming from Brazil it might mean Shamans for example, claim to be able to travel outside of their body and go to other places, or other dimensions. And he's saying, is that separation, that travel, astral travel, done by a separation of the physical or physicality perhaps, and the STP?

K- It's not a separation, this is not separation, it's collaboration, cooperation. It's far from separation. When you can control, maintain, or operate. And this is the beauty of the knowledge, if you can do it. And it should not take long to be done.

Any other question?

You can take a drug and go high, which most of these people do. And then you can dream anything.

Q: ... (1:40). I want to work on mathematics and mathematical formulation of plasma. Do you think the plasma processes of the Keshe Foundation have been mathematically modeled yet? From Gans formulas to other applied processes?

R: So, he's interested in working on the mathematical formulation side of plasma. Is there any work for someone like that? The way you... You haven't given us too many formulas exactly for plasma.

K- I always said, "have you ever seen God putting, measuring things, and mixing together, and making a solar system?" Everything is accidental, coincidental interactions.

Let me explain to you, why it cannot be done. It's in a very, very simple way. You cannot, if you understood the process of the Keshe Foundation work, as a plasma, as a Gans, as a field, you cannot find two similar Gans's, I'm talking individual Gans's, with exact, specific characteristics at the same time, in the same place. It's absolutely impossible, it doesn't matter how you turn it. Now, how are you going to write a formula with... on... about something which you have no control over? You can say, "okay, I put one drop of Amino Acid (AA), I put one drop of Gans of CO2." (1:42). Excuse me, how many Gans's are in that drop? Would it come to the time when we can count the Gans pieces in a drop? But then there is another problem, sorry, they don't all have the same energy. So, writing a formula for Keshe Foundation process of fields, you can try, it'll be very interesting. As much as you can stop a woman shoe shopping, you can do what I call, calculating. It's impossibilities.

Because the... we can work within a frame, try to create a condition within a frame. But, in that framework, you cannot even dictate. It's all in the hand of Creation and create, what you call, creation of the fields and interaction of the fields. This is how the universe has been. Opportunist and at the same time, with no control.

I said once, do you know why the universe and all the Creations you have, they're spherical like a ball? Because God loves to play football. And the footballers are the best opportunist. So, it's impossible, we cannot formulate it. If you understand the principle of the work, it's impossibility to formulate anything about dynamic plasmatic fields and the rest of it. (1:44).

You will understand this if you go back. I don't know if you even can find these papers anymore. Russian scientists in nineteen nineties and middle ?? end of nineteen eighties, start making computer programs and assumptions, how vortexes of magnetic fields of matter state, are created within the Sun, and they went all the way to the center. I have these papers somewhere, I've collected, because it was very interesting, how self-centered became the whole structure. How, actually, fields of, or what you call it, vortexes of the Hydrogen or Helium, build themselves into the center of the Sun, and then by compression of the center, they create that elusive fusion to go out as a field. Which is a lot of nonsense, if you understand it.

So, what was interesting for me, how did these people calculate what's the strength of these fields. How many Hydrogen pieces they consider into it. But it was very nice the imagination they used to do it. And it's impossibilities. Because every atom of Hydrogen, depending on its environment, depending on its strength, at the point of creation, and how long it's been created, .. what is given or taken, has different field strength. It's impossible, if you truly understand the work of the plasmas. Because you cannot repeat it. Something is calculable, if you can. You cannot repeat it, because the next Gans you made, (1:46). even you use 100% Copper, has in it a different atomic structure of isotopes. And these isotopes in the pack you put, you put a one drop, how many of these isotopes are in there? You cannot measure it, and you cannot feel it. So, if you've been with me enough, long enough, you know, I work on average of, it does what it's supposed to do so, it has the fields. We cannot calculate it.

In .. 2008, right now, in August, September, when I was in Sharif Tehran University laboratories, building the first flight systems, first what we call dynamic power generators. This became a discussion between me and the Iranian scientists. They said to me, "you open your reactor, a few times a day." Because those days we had these, and now you all know, was the radiation source from the smoke detectors we were using. And I never used gloves on these things, I just picked them up, put them back in and then I created the activation for them. (They said), how does this guy works with radioactive material without anything, because I don't absorb it. And, I built a sense of where to position these two or three hundred, what you call it, radiation sources, in what manner, to get what field creation and what direction of motion (I wanted). And, I never relied on that, we do it this way.

I relied on what I could see, physically the fields will create, ionization and everything else, fields of the plasma, and I could say, (1:48). "okay, you've seen it, the big ball, how this ball will, what you call it, will move. Will it move to the left, will it move to the right? Would it, what you call, spin out of control?" And, this became a game for me for weeks in Sharif University. And, I used to open a reactor, move some of the sources to one side, and then close the reactors, it wasn't just opening and closing, it was all these silicon seals I had to use, and screws and tightening and everything else. Used like what, an hour, two hours, to actually get one system set. And I used to take the glue off the back of this radiation sources, move them in slightly, and I could say, "okay, now the system has to fly in the left side at what angle." And then we turn the system on, and we actually get it. And put this way, we were correct 2 out of 10, if we were lucky, but then we start to mastering it in more deeper, We became like 3 out of 10. And even that, 2 of 10 was a bit dodgy, but we could now dictate the position of the, what you call, rotation, or rejection.

We could not calculate, it's impossible to calculate how plasma will interact. How plasma will manifest itself, it's impossibilities. You cannot write a formula for the "Knowledge of the Creator." He didn't come up with a, what you call, a formula, why man is trying to do the job he never wanted Himself to do. Otherwise, you know, when He created the Earth, He would have dropped a letter in (saying), mix this, you get this, mix that, you get that. (1:50). He didn't do it, and I don't think any of you ever, with even the fastest computers, will be able to establish such a thing. It is absolutely impossible. It's far from it.

Try. I have had this discussion with many theoretical physicists. You can't put in a formula, it doesn't mean exist, it cannot exist. I said, "I put it in a system and it works." So you write a formula which you don't even understand. It is not easy task, but it's literally impossible to write a formula. And you can repeat it. Once something is repeated, can be repeated, it's a technology. And we don't have knowledge to be able to repeat. Because it's in nature, it's a natural process.

I used to have a lot of laugh with this in Sharif Tehran University. And it was, as I said, it's guesswork, but seeing how your guesswork is and understanding what you guess, not just doing it. I would love to see if you can write a formula, and (if) you can repeat it. (1:52). That that formula can be used to repeat the same process. Good luck. And I really wish you the best. If you can do it, you have found in the solution for ?? I think the Creator would love you. Then He can say, "okay, repeat this, you get the Earth. Repeat that, you get the Moon and the Mars, and repeat that, you get this and that." He didn't do it. I don't think man will have the command of his knowledge to do it.

When you look at these two pictures, When I open up, it's exactly as you see it. These are the two reactors built just about 15 years ago in Sharif Tehran University. Originally, we built the left one. And the left one, the top part, is the one which flew for the first time. This is the first plasma reactor ever, took off the ground, the top part. The bottom part we had to rebuild, because the bottom part, it just blew its bottom. And we had to restructure it, and rebuild it. And, what you see, exactly on the other side, the small one, is the Moon side, or is the Earth. Inside these reactors there is a structure, a specific structure of reactors, in both of them. And, the left reactor, the bigger one, doesn't move. It's impossible, when you put these two together, (1:54). to get the bigger one moving. The smaller one always moves.

So, by putting different radiation sources, on what I call, let me see if I can do something here... If you look at the one on the left, the bigger one, the bottom side is a tank reserve. It's literally a tank reserve of elements we want. There is a specific ring, which is not here now. It's not in this one. This ring was a specific field separation. It's a specific steel, which Iranian government overnight shipped from Japan to Tehran for us to be able to put it in. And in this, once we put the ring, and the inside is specifically designed that the fuel adds up to the top as it's used. As we consume, it converts it to plasma, we call in from the reserve tank in the bottom. The top side, the dome, the half shape, is inside, has reactors, inside has a different proposition of work. Knowledge Seekers who work with me in the, in the San Sano, they opened this up, and they know the structure inside more or less. And then you see in the background, you see a little brownish thing in the back, this is the cooling system for the motor which was in the vacuum. (1:56). And what you see, cover up dots in the front, black dots, these are, again, what you call, the control systems of what we needed to change the charge.

If you see on the top, there is a pipe coming up and it's in different shape or direction, you could change some of the compositions to create different field of radiation. And inside, there are some 350 nuclear radiation sources in it. So how we move these radiation sources, and where we put the units on the right, we could decide how the right reactor will jump off and fly. You have to understand, now you see a framework. In

Tehran test, this didn't have a framework. It was standing free on its own. It's like a moon rotating. So we fill it up. Now, in this small one, we again have another thing, 240 radiation sources, something in that region. This is, again, multiple core. Both of them are multiple core. They are not single core. and cores are designed, if you... Still some of them is an original work, still in the labs in Austria. We added materials to it, inside it, we took material outside it. Then we could dictate, randomly, and when it happened, "oh, I was over the Moon."

And, we created a field in the big one. That the field we could see expanding beyond. We created a field in a small one, and we waited to see where these two fields touch, interact. (1:58). You could see a small vibration, always in the small one, and then it just flies off. Magnetic field forces of the bigger one, push the smaller one off position. And then it was a, what you call it, a "baseball game," "catch the ball." You got to understand, this thing when it used to takeoff, it has I think 12 screws, sharp steel screws. Try to ?? catch a "baseball" with 12 screws rotating at higher speed. I cut myself many times with it.

But an interesting point for me was, the lab is big. We never hit the glasses (windows) of the lab. We used to, we had a long table in the center, and we set this thing up. But the little ball, you see in the front, on the right side, even though we managed to fly some of that, we hit the ceiling once or twice. We managed, we fell on the floor a few times. We couldn't catch it. And it was impossibility to calculate. Even we. The radiation system inside was lined. We moved the line by half a centimeter in one direction, twice we got it the way we wanted to go. The other eight times it flew the other way. We could not calculate it. But at the same time, if you look at the small one on the top, you see pipes. (2:00). We were changing parameters to see how rapid these two reactors can fly away from each other. So we could create and control the intensity of the magnetic fields. We could never calculate it.

I'm sure Iranian scientists sat down, "bang their head" to it, to do it. And when you look at it, this small one, is the first proper flying nuclear power generator system. This one, after it took off and it exploded its bottom, we had to rebuild it. We never allowed it to fly again. It's too dangerous. So as one of the professors from the Iranian side said to me, he said, "Mr. Keshe, you came here to build the small one. You didn't come here to build the big one. And you got what you wanted." We had inspection. We had scientists from Iran, armed forces, military, Sepah, and all sorts paid a visit continuously to see the development was the next step. Even at night, when I used to call, used to ?? markets, was there, obviously, at night. They were coming in and checking and trying to understand it.

And if you understand, if you see this reactor, This is the same reactor that Netanyahu claimed to be Iran nuclear bomb. And we "washed it down the drain." He's been on the television convincing his pal, "Mr. Trump," that the Iranians are building, and this is a nuclear bomb. And this is ??. Yes, it's a nuclear based flying system, Mr. Netanyahu. And we are proud to announce. To extend it beyond, Iran military forces in Space are beyond the imagination of the man. And we respect and salute them, (2:02). for the integrity of not crossing Iranian borders with such a knowledge, but defending Iranian territory.

This is, that you cannot replicate fields. I am master it, but still impossibility to do. The next generation which we are developing will have a different effect, different position, different things. But, in essence, most of, most of the work is understanding and being able to repeat that position.

And the new reactors, the new style of reactors in the systems you came in with, takes off a lot of things out of discussion. You've got to see. If you look at the big reactor, it's actually a UFO. It's the shape of a UFO with a tank reserve. If I reduce the capacity of the reserve tank, closer to the top, what you see is more or less

a UFO. The reason we brought this in, the reason I devised this and built such a system, because we did a lot of tests in Belgium, before I go to Iran. So when we are in Iran, we had a lot of clear idea how we're doing it.

This will not allow the turning of the reactor. We understand the field flow, plasma field strength, can create flipping. Because it happens on Earth, (2:04). it happens on the Sun. And the Sun magnetic field flips every 11 and a half years, every 23 years, goes back to its original position. When you build the system like this, you understand a lot of things inside it, doesn't allow flipping. That's why you can go with high speed, like a UFO. This system does not give you that possibility. It's absolutely loose, but it can reach saturation, it can reach current saturation, the current saturation in plasma is worse than plasma saturation. Because, and most of our scientists don't even understand this. And current saturation in the brain of the man, brings Parkinson's, epileptic. And we understand this, how to control it. In the flight system, brings disaster.

So, when you look, and you try to send, calculate a formula, you understand it's impossibilities to them. But, if you become master in it, you can approximately use it. This goes back now to the more advanced systems, which now you all come, or you came to, what you call it, to Linz. None of you saw any spherical ball on any of the machines. Because now we have gone into what we call, Book number two, transmutation through light. The cylindrical, what you call, plasma field flow. Which is, none of you will "have a clue" how it exists. (2:06). And this is why it's a different story.

Now your Soul is the "big ball," in a way. And the little Soul (reactor) is the STP of you. And if I play with it, you will see shimmering of lights, manifestation of the structure, somewhere, as you see, on the right in the escalator. I can give it manifestation. I can give it physicality. And you actually, physically see it. And the system is inside.

This is what we did with you when you came to Linz. Blurred eye, you could see blurred, because the Soul has expanded. Cannot be formulated. But, there is one common denominator in all of it, if you understand it, then you can structure it. It's impossibility to write formulas. Because no energy system is the same. That's why God gave up and said, "I'll mix it, whatever comes up, it'll come and what it turns out, to be Earth." He couldn't control it, he couldn't write his formula, I don't think you'll stand a good chance for it.

These two reactors have a beautiful history behind them. And how they were built, and how they became, and the latest controversy we've seen, the use of it by Netanyahu, the most evil man on this planet. Using a space reactor to be a nuclear bomb, trying to find, to gather forces to kill more. (2:08). But in essence what you see on the table is the way universe works. But you cannot formulate it, we have to understand it, to get the desire of it.

Any other question?

R: Mr. Keshe, I found the video that, where you actually show those two units and talk about them, would you like me to play that, or are you done with that?

K- ??, from how long ago you are going back to, years ago.

R: Yes, this is way, way back. Back in the days of the Spaceship Institute in...

K- When you and I were ?? around, yeah.

R: Yeah, when, back when I was there, just around that time, just after that time, I think, this video. Okay, if you think it's fine, I'll play that now.

K- Yep. Yep.

<< Rick plays old video of KF about KF reactors >> (2:14).

K- Thank you very much. That brought back a lot of memories, Rick. This was done in the education side of our home, in the San Sano. And it has brought a lot of changes. We see the development and delivery of the next cycle of what I call, space flight system to be done in conjunction with the Iranian military and Chinese military in the space in the coming weeks. It'll be amazing to see how technology, even being the same, has leaped forward by hundreds of years in 10 or 15 years. (2:16).

We, for example, in this configuration, you saw things going on the floor. And it was the beginning of the setup. Later on, in tests, we managed to create 129 Tesla. And then, in the same lab, every night when we ran these systems, when we switched off the lights, the fluorescent tubes on the ceiling, used to dance, used to switch the light up and watch how the fields from these reactors interacted with the fluorescent lights. And we had a light show every night, more or less, for 5, 10 minutes, till all the plasmas in the room were used by the tubes.

If you look in a deeper way, at the moment you see these pipes, the blue pipes going in. The new systems which will be introduced, will be controlled by thoughts. It means, "what I do, what I think, I'll control." In a way, you call it interaction of the Soul. And it'll be interesting to see how it will change the characters of the people around it. It will be interesting to understand how this feels, if you understand it now, there is a third reactor already on this table, which is the Soul of the presenter, which at that time we could not explain to discuss. (2:18).

When you look at the star formation, the STM is an operating ?? life (live) system in that system. It's a controller, your emotion controls a lot of it and a lot of people could not understand, still cannot understand. But now that we have shown the working of the systems in Linz, a lot of you understand, you are the Sun when you sit in that system. You're not just a Soul. You, when we put you in the Head Units, your Soul is the Sun, it's the dictator of the whole thing. The expansion, the control, it's totally dictated by it, and it's emotions. And it's the same with here. That's why many tests I did, it could not be replicated. Because I cannot explain, I'm using the power which is within. As I said, man is too physical.

You see this, the new, what we call, Space Center, in... of the Keshe Foundation. When you sit in these units, even the Head Unit, your Soul is the dictator of the change within your physicality. We will see many of these centers to open up around the world. The center and the system will openly shown in public in Macau, (2:20). what we call, conference. Where we allow people in the conference to personally test the system, the scientists from around the world.

And, it's interesting for the whole understanding of the creations within this system. It needs a wise man to see and a wise man to know how to use it. These systems as you see are more or less obsolete, compared to what now has been produced and sitting in... Most of you who joined the, what we call, July Session, were connected to that system. Only one part, these systems were connected to you and we saw a lot of you, shown a lot of emotion and changes, using this, in one of the sessions. All these systems were connected to all of you, when you were in the session.

And, if you understand the power of the STM, you have managed to achieve a lot. Thank you very much.

Any other question?

Q: ... (2:22). I have a question about our solar system. There is an asteroid belt between Mars and Jupiter. Was this a planet in the past? Can you tell us something about it? Thank you very much.

K- No, asteroid belts and all these things comes from the condition created, and has the Inertia, plasmatic field Inertia to not only trap, but create materials which can sustain that Inertia. And it's between all planetary systems. It's the face of.

When your Soul interacts with your STP, and with the Inertia of the environment of Earth, makes your body, your physical manifestation. So, all these asteroid belts, when you see them, when they talk about it, now that you understand the knowledge, is the interaction of the two fields, what it creates. Don't forget the Inertia in that case, when you see them, is the Inertia of the field, or strength of the Inertia of the plasma of the solar system. So you always have that. And these belts we see them, brings, you call it, the belts, asteroid belts. The same thing in another version we call it, the "rings of Saturn." It's no difference. It's exactly the same thing. And depending on the strength, it manifests itself in different ways.

Many of you, I've seen this so I can tell you for the first time, (2:24). maybe you will laugh at it, but soon you will see it. Many of you, when you go through a transition, you'll see your head but you don't see your body. You go through a transmutation, because the field of the environment you're in, is different matching to the physical Soul, and it's like you see half of the body. The first time we saw this was hilarious. And we saw it again with the disappearing of the hand when we were doing tests with Ali in Canada.

And the reality is, each field interaction between two systems, creates it's own, what you want to call it, a belt or ring. And it's usually is on the strength of the two fields, because it's like a funnel, between the center line fields, which is more balanced. So, there's nothing different, is a manifestation of two fields interaction, this, one of them call it, a Soul, one of them we call it, the STP, and the Inertia environment of the solar system, that allows to create a condition, that in that condition, call it a ring of Saturn, we have it around the Earth. Around the Earth we have such a belt, it's very, very faint. And most of our meteorites get bulleted through that part. In the dust you see, comes from this point. And it's just fields convert to matter and then now, depending on gravitational pull of one or the other, they shoot inside the ?? (2:26).

So it's nothing new, with the knowledge you have, you should have understood that straight away. And many of you, you will see it, again and again. It's the natural characteristics of a spherical field interaction. If you adjust it, it can become liquidish, If you adjust it could be solid, you could, then if you adjust again, it could be different size of blocks, or whatever in those belts. As we see with the ring of Saturn. Read the paper I've written about the creation of ring of Saturn. And these things are answered immediately by all of you.

Any other question?

Q: A question Newton had back in the day ... Why does the apple fall from the tree? Is the apple magnetic?

K- Oh no, those all to do with inertia and the rest of it. Can you imagine where science would have been, if he wouldn't have fallen asleep under the tree. And it was a time when the apples were falling. Where would the science of man be today? Thanks to the apple. (2:28).

R: Well we had a little short discussion about that in the Plasma Group, that what if instead of figuring out all the laws of the apple and the Earth and all that stuff, why didn't he cut the apple in half and have a look at the

construction of the apple, which is very interesting in its kind of a vortex shape inside, as well as the way the seeds and the inner core, literally we call it the core of the apple. It is a reactor with its own core.

K- Yeah.

R: It's similar to other reactors in the universe. Maybe we could have gotten into plasma technology, instead of all the, the other nonsense that's came, come from the gravity. We still don't know what gravity is, in terms of the scientists of today. So, they have all the formulas though. They do have the formulas, but they still don't know what it is.

K- Yes, but the formula is because you have a solid mass, you can measure the mass. Formulas goes through the window when you have a plasma. It's a big difference. This is why us, as Knowledge Seekers, "have to always stay on top of it." We're dealing with two different entities, and both of them are real. One is a plasma, one is a matter state. If you understand this, we see a lot of steps forward for humanity and his knowledge.

But, we cannot ridicule what man has done. That's the matter state, we've done the best we could. (2:30). Now, we look at the energy, what we call, plasma. This, the matter state is the world of the man. Plasma is the world of the Creator, and Creation. And the sooner we understand this, the sooner we will overcome these dogmas of science. We cannot laugh at them. They went wrong. They didn't go wrong. They are right in the matter state where you can measure everything. It cannot be done in a plasma state where it's just fields.

I taught once this to a Knowledge Seeker. He tried very hard to make a consistent, what you call it, Gans. That he can do a specific test. I said, "you know what's your best choice? Is to dry it." And then when you dried it, try to understand how you measure the fields, and then count the number of Gans's in your dried pack, and then go back and do it. In the future maybe we'll do that. Even today we have knowledge to do it. And maybe we come to nearest, because not every Gans drop is the same.

But, in essence, we have to always to be on top of us, in ourselves, in knowledge. Which world do we live in our schizophrenic life? The energy side, or what you call it, the matter side? (2:32). In a way, if you look at it, the energy side in slowing down, or not slowing, reducing the strength, become matter state. So, even the matter state is still the energy. So, we have to understand, which state of fields interaction we're talking (about). Manifestation of it, or still loose as fields.

I always explained it in a very, very beautiful way. To me it has a lot of meaning. Is it love, or is it the lover? We cannot quantify and explain the shape of love, but we can explain the shape, the color of the eye, the hair, the leg, the arm, whatever of the lover. Does love live, exist without the lover? And can we explain what love is, if we don't understand the love? And this is the dilemma man has with the matter state and the plasma. If you understood that, you understand this. Otherwise, respect both. Because you still say, "I love, but I have no lover to love. I have a lover, but I don't know what a love is." And this is very common in Chinese. Chinese tell you they don't know what love is. But there is a lover. You have to appreciate both, to understand both. And this is the position man is today. We have had many lovers, but we don't understand what the love is, and we call it, plasma. (2:34). Because we can tangibly touch the love. And this is what, as Knowledge Seekers, we have to understand they both exist, and one cannot exist without the other one, if you're going to enjoy the creation of the Creator.

Any other question?

Q: ... After the addiction session of last April 27th, I was a lot connected to my Soul and could remember many of the Soul interactions during my sleep time, day and night, every day. Three months later, I lost the connection in a way and can barely remember time to time interactions. Why am I losing the connection? Is it because I went back to increase of my food consumption? And what can I do to maintain that connection?

K- It's like to keep fit you have to exercise, isn't it? You got lost because you had it. That's all it is. Once you learn it, practice it. Don't let it go, till it becomes second habit. And then you'll see a lot of other things. And this is part of what we need to understand. Once you learn it, don't let it go. Practice it. And then it becomes more and more perfect and everything else.

I've said many times, 99% of the time, (2:36). I have had, especially when it comes to sleep time, am I asleep or am I awake? They tell me I snore the whole night, good. But to me, I'm there, I'm working, I'm putting things, I'm testing, or understanding. But, physicality has gone it's own way. It's repairing itself and "I am snoring half of the time." But to me, I'm awake. And they say, "oh no, you cannot be, you were snoring." I couldn't because I'm literally working. And I know what I've done, what I'm doing, and what is in the middle of... When they let me go, I go back to what you call, physical sleep, but actually doing what I was doing. There's no difference between sleep and life, for past, God knows, years and years for me. But somewhere down the line, physicality takes his rest.

Q: ... What does it mean when during the sleep time it shows you a huge family verbal fight? Does it mean the Soul goes also for fight?

K- It's the habit of the man, isn't it? I always said, when you fight for something, you have already lost. When you fight to keep a lover, you already lost the lover. When you fight to keep something, it's already not yours. Otherwise, you don't need to fight for it. So if you, in your dream, you fight, find out what you've lost, that you manifested it as a fight. When you see two people together, couples or whatever, watch them, (2:38). why they are fighting at each other all the time. Because they already lost the love, it's not there. Because, if it was there, they wouldn't fight for it.

Last question, and I have to go.

Q: ... I'm pretty alright, but there's something that's niggling at me in the need for understanding about Iran's position. ... Now, if I'm correct in understanding, The Iranian people have a problem with kingship of other people in nearby neighbors that call themselves kings, and they have a problem with the kingship. But lately there's been a new way of thinking from both sides. And this has changed everything. And it may be a geopolitical question, but how do you think that things have changed? (2:40). And why Saudi Arabia just suddenly decided that, knowing both sides of the equation, that they would come closer to them?

K- You mean with the Iranians? I'm going to put it to you in two or three different ways. There is a reason for it. First of all, Iranians are not against the kingship. We are a kingdom. We've always been an empire. The first time in the history of Iran in past ?? 40 years, the foreigners took over the Arabs, what we call, the "Ayatollah side." The most of the first years of Ayatollahs are not the Iranians at all. The two brothers heads of the parliament of Iran, and the rest of it.

The opposition or what I don't accept personally as a kingship, is that there is nobody higher than the other. So it is not the Iranians. Iranians are king lovers. We always had kings. At the moment, what you call it, the rule of "gun and swords," and Arabs who are ruling Iran. You saw the uprising of past few months, and you saw how the people were slaughtered. These are all Palestinians, people .. brought in from Syria. They don't speak a single word of Farsi. They are paid triple price to kill, to hold on to power. Would we see back, .. a king in Iran? I doubt it. (2:42). Not at the present position. But it's not that Iranians, are not "king lovers." We are very much, very much, it's ingrained in our life.

But as a scientist and working at this level, I don't see anybody higher than the other, knowing the Soul's work, than actually the physical frock. But, in the present position with Saudi, it's a totally different matter. There is a new structure of work, which is works on a matter of peace, because economical needs are bigger than peace. And a lot of things happened in the past two years in Middle East, which pushed Saudi Arabia away from America. And the Chinese saw the opportunity, and brought the Iranians and Saudis on the table.

The original reason, Saudis did not know where to go, but on the other hand, they had nowhere to go. They listen to the Israelis, if you look in past 4 years, Israelis open relationship with the Middle East, the Arab nations and the rest of it, and everything else, and go back into news, they sold, I think, 100 million defense technology to Saudis, from Saudi, from Israel, to defend themselves against Iran, and everything else. And, when in January of 2020, Iran wiped out the American most advanced base (in Iraq), plus Europeans on it, with hundreds and hundreds of military officers wiped out. To defend the territory of Iran, for what was planned to attack Iran. (2:44). The position came, and I directly put it internationally, and it was passed on, and understood by the Saudis and Middle Eastern countries, if the Americans could not protect their most advanced base, from the new simple systems of Iran, which the Russians recorded, it's just black things moving forward and just annihilating the whole land. Why are the Saudis sitting there for? And buying these technologies, when the people who sell it themselves, cannot actually show any use for it, they couldn't defend themselves.

That attack in January of 2020, changed the whole structure of the Americans selling weapons, in exchange for keeping Iran out. Saudis were running with their heads in their hands, what a fool, but they made a mistake, and they gave the system back, and the Americans were kicked out of Saudi about a year ago. In their defense, what you call it, missiles. But on the other hand, there was a fear now, they don't have this, they don't believe in it, all these Scud missiles and the rest. China moved in and brokered a peace between the two. And Iran has a very deep relationship with Saudis. American exploited it to split it, "divide and rule" with the British. And now China has put it back in track. And we'll see more and more of this, because they're all making, what you call it, things out of it.

If you remember, we still own a website called CIBRU, which is China, Iran, Brazil. I set this up some years ago. (2:46). And we now see CIBRU taking shape in a physical dimension. Iran, China, Brazil, Russia have joined the CIBRU. Look Brazil in April of this year signed a specific contract in space development technology with China. Back of it, Keshe Foundation Technology. Iranian space technology is backed with it. So, we see what we said years ago, there is one left out, that you would end, which you put as United States, and there is a correction with it, I was explaining very recently to some Chinese and that is the rest of the "United Earth." Which means we share the technology with the rest of the world.

We do not consider America to be anymore on the edge of the space technology. Actually now you're at bottom of it. And so the CIBRU has taken shape. China, Iran, Brazil, Russia. .. This is what is in the news. We don't say anything because we just set up. We always put things in advance and we see it.

So, we see there is no need to spend 100 million to buy things from Israelis and the Americans Scud missiles which does not work, because the "devil" they made Iran to be, is not there, and you will see a massive trade relationship. But, the good things for the Chinese has been, in establishing peace between Iran, and Saudis and the rest of the nations in Middle East, they're guaranteeing their own oil supply and gas supply. (2:48). Because, the biggest consumer of oil and gas is China, they need it, so they have to play the tune of China. And the tune of China is peace policy. Economical growth is above "gun policy." Where America "gun policy" is above economical (policy), because we're doing.

Very soon, in a very, very short time, in the coming years, you will see Keshu Foundation in conjunction with the Chinese and the Iranians, we will move to eradicate seed control, GMO. It is already "on the cards," the structure is getting set up. And, when now we got rid of this "gun policy" of United States, we get rid of this "seed control policy," that no farmer in India needs to kill themselves and leave their children orphaned. And no Chinese will, what you call, farmers can live on poverty, because they cannot lose one cycle. The Chinese farmers in a very soon cycle, maybe even in the next year, if we can start it, will use the same GMO seed, but convert it to the natural seed, which means they don't need to buy seed next year, which is half of their income for the next harvest to live. It'll bring China out of poverty, especially a lot of farmers. Chinese have a different understanding of it.

And so, we will see the two things which brought mayhem and war around the world, and hunger, and literally hundreds of thousands of farmers kill themselves, because they cannot buy the seed next year. What they eat, that's all. Next year they don't have the money to buy. We'll change this with the collaboration with the Keshu Foundation Chinese, what you call it, scientific and farming community.

So maybe in two years time, three years time, in China we buy, what you call it, GMO seeds. But in the process, we take it out of the process, and become a normal seed. (2:50). And the farmers don't need to buy again. So this is creating a condition of peace. And this is one of the works now Keshu Foundation is involved in China. That seed policy, like the gun policy finishes, then we see nations can feed themselves.

From where we sit, I'm looking across the most beautiful city of the world, Beijing at the moment, where the teaching is coming from. We see China to become the breadbasket of the world, on the emergency, not for control. It's a big difference. America pushed itself to become breadbasket by creating wars, division, and then seed control, GMO. China is going the reverse, where we put the knowledge, we put the technology, we put the use, the technology, to show, to bring the farmers that the seed control does not exist.

It's literally, you know, you buy a poison food and you put something on it and you get rid of the poison. It's like a dirt, more or less, on the seed. We can change it through fields. And we have shown it, it has been done. And so we will see another "feather" of the, what you call it, the wings of American policy, gun policy and GMO policy. And this soon will stop.

GMO is needed for betterment of seeds, better harvest. But not the layer to not allow the next generation. And we have found a trick how it works. How you can buy GMO seed, grow your, what you call it, tomatoes, potatoes, rice or whatever, (2:52). and using the right structure, right field structure, the seed will change. Don't forget GMO is built in. It's like you, it's a frock. We can take it off. But up to now, we didn't know how. Now with plasma technology, we know. And the GMO is down the drain. It's for sure.

You will see the structure of the Chinese grows that way. But the food policy, national food security of China for the world, is that we all have. And if you want to bring comfort and peace, you have to work not only for your nation, but all the nations. And this is part of our work and signed agreements with the Chinese government. Our technology will not stay within the border of China, but will go out of the border of China for the rest of humanity, unconditionally. They didn't put any condition on application. And we have tested, we have shown how new position comes.

And this will help countries like Iran. Now we get rid of GMO, we can feed our nation. Arabs will come to the same way and the rest. And in a way, step by step, we are moving towards maybe another 5 to 10 years, that we can feed every man on this planet. And I said in the past few days, we were at dinner, with one of the most, with the people who run this country and I explained that, go a step further. If you're sending food, if you can transform food to people on the telephone line, we can feed nations on the telephone line. (2:54). National food security by holding grain in thousands of tons and controlling, is finished with the new technology.

And all your Knowledge Seekers know it, you put the headphones on. We tested it, we're testing more and then we see more and more how it comes. And as I said to the Chinese, we have found the code. Now we all have to decode step by step how we bring that position together.

Some of the targets of the Americans for most of the nations when they're going to war, which usually doesn't come out in public, is hitting food silos, national food reserves. But they never tell you in public. You don't do that to your dog, let alone to a nation. And with the new systems, especially what, like, what Rick just showed, into a new advanced systems, we can feed, if there is a disaster in the US, and we can feed them from China, with the service centers. Just put a headphones on, you want a "fish and chips," you get a fish and chips. So national food security and using food as a tool to control, it shows itself. This is the system right in front of you. We are testing it every day with you. This is the change.

Shall we call it a day? I have to leave.

Thank you very much Rick. Thanks for today and hopefully we meet you here. (2:56). We try to share on the, what we call, Thursday of the teaching from Manchester, that you share with us, with all the Knowledge Seekers who are present in the conference. We run a, what we call, open session and we hope we can share knowledge with each other at that point. Thank you very much Rick, and see you hopefully soon.

R: Okay, thank you Mr. Keshe, another great workshop here. This has been the 498th Knowledge Seekers Workshop, here on Thursday August 10th. Two more workshops to the magic 500th mark.

K- I think the 500th will be from Manchester. I think so, somewhere near there. Possibly.

R: That could be fun.

K- Maybe that would be fun, yeah.

498 KSW August 10, 2023

499th Knowledge Seekers Workshop August 17, 2023

(Transcription, Proofing done) (Auto transcription by Elias) (Note: Poor quality audio many ?? unknown words)

Ambassadorial Meeting London moved to Armistice Day - end wars; Elite scientists accepted materials production from fields; Nature shows how plasmas connect; M fields keep distance between plasmas; Creator created from interaction of own fields; Souls interact don't see fields; Soul guides space travel; relationships with Souls - can't lie; "Calibrate Souls"; Test Space life on Earth; Matter & Energy side of Creation; M fields missing from science; Soul is dynamic reactor - control M fields - make magnets for everything; Feed Soul through food - enlightenment; Intellect not Soul; Souls make arrangement for P; Subconscious not separate entity - emotion of Souls; Create new species through plasma; Change leaders with thoughts - elevate Soul; Gans of Gans.

ENGLISH TRANSCRIPTION

(:16).

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual, we welcome you back and look forward to learn a little bit more, and be a little bit more educated in different dimension and directions of the work of the universe (U) and ourselves.

As our Soul is part of the Universe, we are part of this integrated system. We are not part of an odd man out, even though we think so. Even if you are lonely in a desert, you're still part of the system. We cannot run away from it, we have a Soul and we have a physicality (P). And even if we lose life in desert, our Soul becomes part of the universe. And if we die in palaces as its residents, we'll still go to the same place. It's just matter of where you leave this physicality behind. And how you have made peace with it, and how you make peace with it. And if in your cycle of life, you were a cause, or a step forward for that peace, doesn't matter for you, for an animal, another creature, or even the Soul and the Soul of the Physicality (STP) of yourself.

As usual, we have some small announcements and things to catch up as what's happening around the Foundation. As you're aware, in about more or less 10 days time, the first group of Knowledge Seekers (KS) will join us in Manchester. We'll have the same first session of the first steps towards what we call, the space technology, in a way, in a new ways. (:18). We still have a lot of people shuffling and shivering from Manchester to London, so there are still a couple of places, if somebody wants to join us, as some people have moved their position to London suddenly. In any way, the London, when you .. is going to be an amazing session, because maybe some of you have already noticed, and some of you have not noticed. The... we had to move the ?? (day) of the meeting with the world ambassadors, to the Saturday, the 11th of November.

Those of you who are familiar with the Western World work, 11th of November is a "day of peace." Is the day when the guns in the First World War went silent. And most of the Europe celebrates this day, 11th day of the 11th month. And as is traditional, here in London, on the 11th hour, at 11 minutes, The king of England, at Cenotaph (Tomb of Unknown Soldier) lays its flower for the dead, at the beginning of the peace, or end of war.

It's good to be in London in that day, and we have invited many dignitaries, who are in London, and politicians, to be, as part of the end of the war, beginning of the peace, and beginning of the world peace. Technology (T) in exchange for peace. And it's just by coincidence, or deliberately had to move it, but it's turned out to be very beautiful the way it is. When man decided to stop the war, but he went to war again a few years later, but still celebrates the end of two wars. We will not be very far from Cenotaph where the conference will take shape. (:20). And maybe as part of us on Saturday or a Sunday. As tradition is, and as I used to live in London, we always try to go near as possible to Cenotaph, to pay respect for those who died by the ignorance of man. So, be prepared that on Saturday and Sunday 11th and 12th, you'll feel the feeling of the whole nation is in the mood of peace. Remembering the dead, with the poppies, which is tradition, which goes with this time. Maybe we bring new flower of peace, and new understanding. Join us and bring the wish of Totality, and we'll see where we go.

We are inviting the Iranian ambassador to London. Chinese ambassador and dignitary from Chinese embassies will be invited. The American ambassador and American embassy staff, they have always promised us, the next world ambassador will be there, we'll see if they stand to their commitment. We'll have the Russians and the Ukrainians invited to the same peace talks, table of peace. We test the world leaders and the governments, to their commitment to peace, technology in exchange for peace. Knowing that we have the backing of two nations, and we are there to show one of the breakthroughs in the space technology, that many, many scientists have been waiting for centuries.

Don't forget, this comes on the back of a week, five days before, of the second session of the, what we call, preparation, for the final stage in Beijing, in December. Many people are shifting from, what we call, the Manchester to London venue, (:22). because they think they want to be there. But the, whoever attends the Manchester venue, is automatically qualified for London. And, so we see how it comes, and how things will turn out to be.

The process of peace has to come with the change in technology. The process of peace has to come with an understanding of the technology that can bring that change. In the past days, in the past week, Keshe Foundation (KF) has stepped forward in what we call, confirmation of the technology by leading scientists in China. In a way, the technology is accepted, and in totality, as a breakthrough. And this gives us that springboard we were looking for. In a way, by what we call, the elite scientists, step by step approving and seeing the results of the technology at the end, at the highest where a lot of people don't see, where we are proving the technology, we are opening doors. And hopefully, within next year, and next couple of years, we'll see major breakthroughs, right across the technology. Not only in China, but most probably through Iran.

We will show technologies which brings the Soul of the Man (STM) into operation, not the physicality of aircrafts, submarines, UFOs and the rest. And this will be the breakthrough. The way we have shown, we have changed what we call, matter to energy and energy to matter. Now we show how we change the man to energy. This is the beauty of the new space technology, traveling through the STM. And this will shock many world leaders. This brings new dimension (D) to space technology. Where we can show, we can expand the

STM, and transmute the Man across borders. We'll set our utmost by December to complete this task. And in the, what we call, Beijing Conference, (:24). we will show you the beauty of this, how you travel through the Soul, through the dimension of the ?? of the Soul, through understanding. And this will bring the next step, to understanding the Totality.

What would we do the next step? What would be the next understanding? What would be the totality of the understanding of the work? One of the most amazing things for us in the 11th of November, in the meeting with world ambassadors, it will be if we get and bring the audacity of the Iranian ambassadors, Iranian dignitaries, sitting next to the American and Israelis, as we saw in the last ambassadorial meeting in Rome, Palestinian ambassadors amongst the others, and this will be a wonderful step, this will be the next step, in a way to bring the next step of peace. And then, we'll strive to reach the next step. Showing technologies to the world ambassadors, that they could not believe it exists. They get involved in it, they'll be in it, and there's no way to deny.

As I said to the Chinese scientists, the best thing is to deliver it while you're watching it. To taste it while you're sitting in it, and then understand it. We'll bring systems and technologies into London, that the world ambassadors can feel, understand and bring themselves, to be able to explain to the nations and to their president, what is the change.

In one point or another, we strive to show what the Soul is. How you operate through your Soul. How we have ignored our Creator. How we have ignored our controller and how we have ignored the understanding of our own creation. (:26). What is this, what happened to you, when you go to space? You travel the dimension of space. As I said before, when we did the first lifts (flights), about this time, in 2008 in Tehran Sharif University research center, the one question raised amongst all of us, without a doubt. And when I sat with the Iranian officers, from the office of Ahmadinejad, he said, "ok, we achieved lift. We achieved motion. What's next?" What do we do? We arrive on the moon. What do we do? We just got there. What do we have to do to be more natural? What do we have to be more understanding?

And as I said in the teaching of the past weeks, the, what we call, the next technology has started. Delivery of the next technology, completion of Totality. I arrive on the Moon. What's next? As the children always say in the "backseat of the car, have we arrived yet?" Are we there yet? We were there physically. If we could get our crafts on the Moon, on the Mars, we can get our Souls on the surface of the Moon and turn up to be the strength of our Soul, is the strength of a stone, or is the strength of the animal we don't even know, in the depth of the ocean of the waters of one planet or another.

But what is next? How do we create a condition of life? And this question for us became the next target. We achieved flight. What is next? What do we do? How do we feed ourselves? How do we create environment that we can live natural life? We don't live like monkeys in suits, like the Americans do in the space lab. (:28). Did you see if it was real astronauts cuddling and kissing each other, or was it just pieces of metal and cloth banging against each other? Who likes to live in what we call, an "oil drum," when you're on the Moon, where you cannot do anything outside. And your daughter, your son, your wife, your lover is in another drum next to you. We create a condition of life.

This became a question. And we strived further to understand how, what happened, if you get sick? What happen, we can bring you there faster? And that said, in the writing of the first and second Book, and then releasing of the knowledge about the "Gans technology," conversion of the matter to energy. And now we have, we understand that energy. We call it the STM. We call it, the whatever. And how do we, in transition,

convert this energy into a mass, into physicality, in a dimension of life on the Moon or Mars, or another position in the universe.

We miscalculate on the way going to Mars. We remember the beauty. We forgot to kiss our daughter to say goodbye when I left Earth. I'm going to kiss goodbye. I land on another planet in another universe. What am I going to do? I know where the Earth is, but how am I going to behave? I become a stone in this environment. I become a creature which I do not know, but my Soul is aware of my existence. What's next? And what do we do next? How far can we push this? How can I get out of this position? How can I go back to Earth? I'm a stone on the Moon, feeling the emotion and the strength of the field of the environment and other conditions, (:30). ?? and other stones. But what's next? What is the capability? What's the capacity? What is the knowledge? And how can we push this for us to understand?

To go through the transition, to go through the conversion, or go through transmutation. These are part of the technologies, which in the upcoming sessions we will teach. We'll try to explain for you to understand. You cannot teach this knowledge. You have to feel this knowledge. It has to become the "second skin" of the STM, and not the physicality of the man. You know, in English, when we say "second skin," it means that become, to be "literally home with it," understand it. It's very much reflex. What I am ?? .. I ?? change ?? to matter.

Understanding of this, transition of the energy of the STM to the physicality of the time, place and position, becomes a priority. It becomes the truth about our lives. It becomes what we have to understand. And to what extent can we accept this? And to what extent can we extend this?

It'll be good for many of us to understand there is much more ?? beyond, and ?? behind in the depth of the universe. Then in this village of man we call, "Earth." How do we react? How do we go? How do we change? What happens even if I come from Africa and I land in China. I don't know the language, or do I feel the language? I speak through the emotion, I understand the culture through the understanding of the culture of the Soul.

We need to learn this, we need to understand this, as in the depth of the universe, (:32). there are no languages, school, classes to go to, and there are no evening classes to go and learn languages. Learning, communication, has to be natural, second course, second life of the man. Does not matter where man lives and where man will go. And to what extent man will tend to extend his knowledge to this limit. We sit in the room, we have translators, we don't understand the emotion of the language, but we see the body language, and the face and what the things talked about, and the translator half of the time, does not even understand himself, what is translating, because he doesn't have the essence of our word, in the totality of the language and in understanding the language.

And then you sit with something very strange and very comical. You talk about the weather, translator speaks about how the business is. And then you look and you understand, they are laughing. And you look, why they're laughing? You spoke about something which you thought you understood and it was easy to translate. But, the translator does not understand the essence of the culture in what, how you spoke, takes it as it's in dictionary.

Can you do that with your Soul? Can you make that mistake on Mars or the Moon? How will you handle it? Or, we still stick to the, what we call, "fallacy of the totality of understanding." The fallacy of that, we know the fallacy of, we've done it, we should be able to do it. How do we practice? You know that in the word of

computer, you have a sandbox you can practice. (:34). Where do we practice this on Earth? How we, as scientists, create that sandbox, for you as the citizens, to be able to go through that transition, to go through that phase, to go through that testing.

We make you so many pools, as Alekz did in Nigeria. One pool is the feeling and the emotion and the sense of the Mars, and one pool is emotion and feeling of the another planet in the universe. What pool? How do we teach each other? But you got to understand, in the world of the man, the pool has the water. And we connect ourselves to it. In the pools of the upcoming sessions of man to learn, these are pools of fields, magnetic fields, gravitational fields, plasmatic fields. And to what extent would we be able to know how to tune and which ?? pool to land in?

These is what is on the card, this is what we are setting up now, to get to this understanding, this is what now we are setting up, to create that condition. This is an upcoming session of the teaching. A ?? whole session, a pool of knowledge, a pool of emotion, a pool of understanding the totality of the transition. But, the most interesting part for many of you Knowledge Seekers will be, Can we do it in a mass? Can we, as a family, decide we're going to the park in the center of Tehran, and one of us turns up on the top of a building in New York, because there was a mis-emotion. How do we tune Souls, that we all end up in the same place, with the same dream, with the same understanding? (:36). All this needs to be taught to the man. In a physical life, we hold each other's hand, not to get lost in the crowd. How do we connect our Souls together, that we end up in the same place?

One of the interesting things which man will learn, is very simple. And you will understand how to hold hands, how to be connected. This brings a totality, a new subject, a new understanding, of connection of fields. Look at the structure of the universe. Look at the structure of the life, how do the planetary system connect to each other. But follow the rules of the plasma. Follow rules of the interaction of the fields. The best teacher for man is the Creation. And the Creation to be understood by his true sense, not by matter sense. Otherwise, man will fall from another, what I call, "pigeon hole of ignorance." Another one way we have done, in many parts of the physics and understanding, ?? are lacking on this planet.

Look at the universe, what you see. Look at your solar system, what do you understand? Very interesting. Look at the Sun. The Sun is moving in which direction? Then you go by the law of physics. North Pole connects to the South Pole. And understand that the opposite polarity of the field forces has to create dimension of field.

In a very interesting way. Which way does Earth move? But Earth itself is connected with a stronger field to the Moon. (:38). Which way does Moon moves? Then you understand, how you have to connect the Soul of your son, your wife, your lover and your dog, that you all fall, end up in one place. Nature of the Creation teaches you, natural process of the Creation teaches you. And as we said many time, how can we change clockwise to anticlockwise? Why does our system stops and reverses direction of motion?

How do you better the STM, that instead of approaching, we create distance from one another. How do you create two fields at the same time that your gravitational matches to the Earth and your magnetical rejects the surface of the Moon? And these are the "tests of time." These are the tests of the scientists, the Knowledge Seekers of the future to open up. In opening up new dimensions, in opening up the new structures, in opening to understand the plasma as a parallel science and technology, in respect to the matter state. It's time for us to understand the Creation, the world of Creation and dimension of fields.

The teaching is not to show you, systems. The teaching is to enlighten you, to give you a new direction and dimension, to bring in the Totality. As I said to one of the, what I call, ?? (top) man of the science very recently, "God has no patent. How do you want us to patent His work?" Does patent worth anything on the Moon? (:40). And has the patent submitted on Earth has any value in ?? the universe? Then what the heck are we patenting? Why are we limiting the knowledge of the Creation to pieces of papers and computers which worth nothing, a few meters above this planet. If man learns to teach unconditionally, the way we do. If man learns to teach directly, the way we do, there is no need for patent, because then, we set the patent of the Creation in the STM, in the dimension of physicality, and understanding of the Totality of the Creation.

What this means is, (it) means we understand how interaction with the fields has led to the creation of the Creator. And then we understand how we as created, become to be created from the interaction of the same fields. Is that field the Sun? And is our Soul Earth? Or is it one of the satellites which is connected to the dimension of the bigger planet system which we don't see?

How does our Soul position itself in respect to the position of the Creator? How many intermediaries, magnetic fields, and pattern of the shape of the galaxies and universes is between us and the Creator? Is the point of enlightenment comes when we are in the opposite direction? Motion doesn't matter how many intermediaries as with the Creator, or in the same direction as Creator. What do we get when we travel in the opposite way? Reflection ?? , the release of energy, in the dimension of creation. (:42).

One of the biggest things which I have already explained, and it's very hard for a lot of Knowledge Seekers, even scientists to understand, is that the interaction of the fields, two plasmatic fields as friction, creates fields in the upper atmosphere with the Inertia changes to matter. What is the interaction of our Soul with the other Souls that we don't see? What plasmatic fields, the dimension of the dynamic STM creates with the other Souls crossing the street, being on ?? another planet. The way without knowing, creating plasmatic fields, we have to, but because it's so minute, it's so small, we have come to ?? create, to ignore it, because we have no knowledge of it. The ignorance comes from a lack of what we call, understanding.

Then it comes to a lot of points, why these plasmas are created? Why these interactions of the plasmas of, interaction of our plasma, our Soul, with another, create an invisible fields of plasmas, which we have ?? not ?? (understood or knew about). Are those plasmas at any time created? You cross on the man on the street, your Soul is dynamic, his Soul is dynamic. Somewhere in the fields they interact. What happens in that ?? fields? The interaction of the fields of the Earth and the Sun creates the day light. What is the interaction of our Soul with another Soul passing next? (It) does not matter if our physicality is a meter away, or we rub shoulder to shoulder with each other.

As I explained to you many a time, if you have a child, if you have a lover, hold them next to you and see how you feel their emotion through their, (:44). what I call, the Soul, not the dimension of physicality. Do you see a light? And what is the expansion of this light? What is the extraction of this light to the dimension of physicality explains to you about your emotion with what you hold. We feel, "oh, he's holding me tight. Oh, he's holding me, loving me. Oh, he's holding me the way I could dream." But you're looking into the Soul. (While) the guy is thinking about the other lover. I'm just the object of the affection from the another. But is it truly love? And then, next time when the lover holds you, and ?? you know what it is, you feel that he knows how to hold you. Is it true love, the true affection? Because you feel a tightness or a pressure, and you think he loves me? Or is it actually the ?? rubbing of the Souls? And you recognize I'm loved. The truth, the true understanding.

Then you understand, even the life, everyday life, our interaction with our partners, with our lovers, with our children, with our parents, with our friends, with the society will change. Because we'll become wise to the dimension, dimension of physicality, and the dimension of the Soul. And this is what all these teachings are, to open you up to ?? deepen, to understand the interaction of the fields.

This become important for you, because you will understand why, in the space technology. You want to go to the planet. And through the emotion of the Soul, it tells you all the energy you carry, where you come from. This planet is dangerous. (:46). It can create your demise. Or a planet welcomes you, because your fields is the same as it is. And brings in ?? power . It brings ??, it brings in ??. Then you understand. What we tell you to understand, to explanation of the lover and the child and all that, is not the same as you think about the physicality. It's to open your eyes, in where you learn ?? about ?? your Soul. Is it good for you? Or who you come across as a fields of the plasma, is it, in a way, life for you? Or is it a demise for you and your Soul?

The teaching of the Keshe Foundation is not about the lovers and about the interaction of the physicality, it's about to compare, to understand as the man is so physical, the truth about himself, in the dimension of the Soul, in the dimension of physicality of existence. Then this teaches you ?? , in space, this does not feel good. This is not a place for me, because most of the spectral of the energies are ?? created ??. I can give, is more than this planet can take. I can put it in danger, one of the creature in touch in front of me, or I become, it becomes dangerous to me, that it can endanger my condition of life as a plasma.

Then you understand. Life in deep space takes a different meaning, if you understand it in dimension of physicality, but test it here. Next time, when you hold your lover, and he or she holds you tight, and he or she tells you, "I love you", and you feel the pressure, and the love, and the tightness, and the joy you want to give back. (:48). Can I feel the Soul? Is he really squeezing me, or the ex-lover, or the girl (he) is being with, or man is being with ??. Or he likes to be (with me), I'm just a replacement, or is it the true love?

Do I feel the interaction of the Souls? Do I take and do I give? Do I enlighten him with mine? And don't forget, he knows the same as you do. We cannot lie to each other. This is where most of the relationships on this planet falls apart. Because man always know and interaction of physicality, but does not see the dimension of fields interaction of the STM, the creator of the man. In space we have to be aware of it. As I always say, "you have no choice, you're in it." You better understand it, or you will not be in it, because there's nothing of you left to be part of it.

Then it comes in the process. In the next coming times, what feeling, what emotion, what colors and interaction of the fields means to me and my Soul ?? . This way you start in a way, "calibrating the Soul." What feelings of what dimension of the emotion and interaction means to me? And this is like, I hear a shouting, I hear a talk, I hear a whisper, I hear no noise, and what does each one means to me? This emotion of this level means danger, this level of emotion to the Soul, means life, this level means I'm in danger in some way. (:50). And so ?? we learn, we understand, we extend and we expand.

Then in that process, we learn about the travel of the Soul, the expansion of the Soul, the understanding of the Soul, And in that process, to what extent do we understand about ourselves, about our Soul, about the creation of the man, and about the manifestation of the man in every dimension, in every level of the existence? Man is made in the image of the Creator, when the man is Creator himself. Now, what do you create? How do you interact with your own creation? And what does your creation means to you in essence of the emotion of the STM, it's energy levels, not dimension of physicality. As you cuddle your child, the child says, "mom, you're strangling me, you're squeezing too tight." Where you want to show your love, and

your child feels losing life, because you're too strong for it. It cannot take in the dimension of physicality. You've forgotten about your strength. Or, for a ??, you are a very beautiful, slim person and the partner is a giant and he squeezes you. He shows his love, but you're losing your breath.

Then you understand, this is the same in the dimension of the creation, in the STM. Is the fields I come in touch with, to embrace. Is it good for me? I don't look at the size of it, I look at the strength of it. If it's the dimension of my life, is it good for me to receive and do I have enough to give? Then we understand the position of love, (:52). the position of understanding of life in space takes a new dimension. While we are getting squeezed to be loved, to be held, to be loved, we are looking in the dimension of the Soul. Don't forget, the ears are next to each other and the Souls are connected and interacting. Now we read two messages, one in the dimension of the Soul, and one in the dimension of physicality. And this will bring you a new dimension of life.

Try it next time. Put your ear and head next to your lover when he or she is asleep, and see with thoughts, how you can wake her up. With ?? no thoughts, with whatever you think, and see if it says, does the bell rings. Can you tell her, I love you, ?? can you ?? hold me to the dimension of the STP. And next morning she wakes up, says, I had a dream you were holding me and telling me ??. Try it. It has a beautiful, it has a wonderful effect. I've done it many times. I do that with my children quite often when they're little. And it's amazing. We don't wake them up to wake up. ?? You just put your hand near them and you will ?? turn love through the Soul. That it's time to get the physicality ??. And they just sit up and stand up and sit on the bed. And you look at their eyes and ?? die for the first time. It opens at the first beautiful thing she sees, it ?? mean your ?? healthy. It is the first thing that you can carry the Soul of the, the message of your love, through the eye, through the Soul. (:54).

Next time, when you're lying next to your lover or your child, lie there and wake them up through your Soul. And watch when their eyes opens, and you feel the emotion of the Soul, as the first flashes of the Soul, trying to come into balance. And then you understand, how man will travel the depth of the space, with the children and lovers and the others.

Now you understand, what it was said from the beginning. "Thy shall not lie." Now you understand what exactly means, as it's you who actually deprives yourself, not to be able to interact, not to be able to live in the dimension of the energy of the man, and not the dimension of physicality.

Now you understand what the teaching of today is about. And I hope you understand when we put you in the cycle of these processes, in the next few weeks and months, you are ready for it. Don't forget, we are not a religious cults, and we are not those who do ?? funny things. We test the dimension of true cycle of life, true existence, by understanding the value of the love, the love of the man, and the world of the Creation.

We go for a small break and we come back, and then we are ready to answer any questions. Rick, if you like to take us through your normal advertising, please. And then it gives us a chance to break up in the next session.

<< **Break** >> 499 KSW August 17, 2023 (1:02).

K- Yes, ready, willing, I hope, ready. I don't know about that. But yes, we can try.

R: Okay, would you like to take questions now, or is there something else you'd like to say before that?

K- No, it's interesting what you showed us, part of the new space systems. We are entering a new era in the world of Creation. And entering a new era in understanding the energy side of the world of Creation and the matter side. And it's important for us to be very clear about this. I was explaining this, and I explained this before, in the last teaching, and we try to go back on it every now and then, that for Knowledge Seekers and the newcomers to understand.

We're not talking about separate thing, with the Keshe Foundation technology. We are talking about the energy side of the life, which we have ignored. Energy side of the Creation, where in the life of the man, we deal with the physicality of the man, the car, the hand, the table, the chair, the food, where we have ignored the fields of the universe, which keeps the planetary system apart. The fields of the universe, which creates the separation of ourselves from each other. The fields of our plasma of life, which even separates our Soul from our physicality, even though it is entrapped with it.

So, we are not creating something new. (1:04). We are understanding what is there, who has kept us apart. We knew about it, but we ignored it. Now we are trying to understand the system, its technology. And in that way, we see the Totality. In that way, we come to understand what we call, the two parts of the Creation, the matter side and the field side. Up to now, we went through Newton. We went with, God knows, every science of understanding the speed, the rotation, that God knows angles and distances. Now we have to understand about the strength. Now we have to understand about the interaction of the fields. Because this strength and these interactions, and the strength of the change creates the dimension of separation between the Earth and the Moon, between the cell of your heart in one layer to the other.

Those cells, that Moon, that Earth, that Sun, what keeps them separate from each other? We always talked about it, you never understood. Now we have to understand. Earth moves around the Sun. But what keeps Earth moving around the Sun? What keeps it in constant speed and constant distance? The fields, magnetic fields of the two systems. The field strength of the two. In the world of science, we have ignored that. And with the plasma technology, we can ?? cover it. So, the knowledge is complete.

I am the Moon, or I am the Sun, and I sit so much distance from the Sun, (1:06). or from the Earth. What dictates this separation? What dictates in what position, in what speed, I rotate around it, or around myself? If you don't have energy, how do you want to run? If you are not rotating to create fields interaction, how do

you want to rotate around another field? So what is the principle of the motion? You don't have legs. We accepted Earth rotates. We accepted the Sun rotates. We accepted that we rotate around the Sun. But we always ignored the fields which are creator of this separation, distance, speed. And the Keshe Plasma Technology is about this.

The connection lines, the separation lines. What creates and how much of it creates, what distance ?? and what separation. And does this create interaction, we call it, emotion? Then we understand, what is about this new technology? Why Keshe Foundation technology and plasma technology are ?? pronounced so different? Because we are filling in the gap. We're filling the gap, the distance between the Earth and the Sun. What is in this gap? How does it exist? Why doesn't Earth stick to the Sun? And why doesn't Moon stick to the Earth? What causes this separation and rotation? And who dictates where and how to ?? . This is the Keshe Foundation technology. This is the space technology we talk about.

You are happy with your rocket. We are happy how to get the rocket where you want to be. (1:08). As this way, using the field interaction, by putting a rocket fuel in the back, like the Chinese ?? fireworks. This is what the new technology is. Understanding the interaction of the fields, the knowledge of the gap, between the entities, what has dictated it, what is creating it, what is maintaining it, and what strength gives, what maintains, what gap. If you understand this, then you see, the picture is complete.

The science of knowledge of the Creation in the universe, when you have a matter, you know, why it's there, what is the gap of it, why it creates 24 hours rotation, and why do we go around the Sun, and in all that time, what is in between us and it, and why do we see all these changes.

The same is the STM. Why do we have a separation with another Soul? How do we interact with the Soul? How fast? How much enlightenment? In what strength our Soul is, that understands more, sees more of? Or why strength of our Soul is not there to understand? Is it the consumption of adding more fields on it, because it's dynamic? The way we do. If you understand it, as I explained before, you're a scientist and maybe you understand more of today about yourself.

But we speak about the dynamic reactors. We say, we have a control, we can add and ?? exchange it, so we can create different magnetic fields, so we have ?? different magnets of everything. Where up to now it was only magnet of metals. Now we have the capability to adjust the field strength of our reactors. So we can expand the fields, we can reduce the fields, we can create different fields, or whatever. Isn't that enlightenment? (1:10). Isn't this what man does by eating different foods, by adding knowledge? Does the knowledge brings enlightenment, or does the food you eat allows you to be enlightened, that you understand more? Who's adjusting the filter of your knowledge? Who's adjusting the feed of the material into your Soul, that you create more lights and you become enlightened?

Now you understand the knowledge of Creation is the same. Be it the Earth and the Sun, be it the two reactors, or be it the STM. If you're not facing it, how can you see the light? And when you pass it, you're on the dark side, because you're not interacting. But it doesn't mean you're the dark side in respect to the Sun. But are you on the dark side in respect to the Moon? Are you on the dark side in respect about another entity? Or are you creating lights with it? So in each direction, you create different lights according to what fields you interact. Now we understand, the knowledge of the plasma, is the knowledge of Creation, the fields in between. The understanding of the interaction of the fields, which creates condition of separation, for matter state, or plasma state, or another bunch of plasmas.

The most beautiful subject in the world is physics, if you understand it. But, the most beautiful subject in the world is the interaction of magnetic fields, and their plasma. As I always said, life doesn't start with matter, life starts with the fields. Interaction of the fields creates a plasma, interaction of the plasmas creates physics, and interaction of the two plasmas of physics creates chemistry, and then multiply with its biology and multiply of it, is the essence of enlightenment of the Soul. (1:12). And then when enough Souls interact and work together, become the Soul of the Creator.

And this is what ?? has been said from beginning to the end. We understand the Totality. We understand the beauty and the creation ?? of. We understand the Totality. We understand the love, because we are part of that love. We created that Soul, and that Soul is us, it is created within us. Then you understand the ?? change, the knowledge. Then you understand the clarity of the ?? simplicity. Without the matter state, we as the plasma of ?? existence cannot confirm anything, because we are just fields in the universe, traveling nowhere. Or, we create another plasma, that we can confirm the existence of another ?? fields (<bad audio >). If you Knowledge Seekers, understood in the past five minutes of teaching you have, entered, you have the key to the world of Creation. And that will be the best thing for all of us.

Any questions?

Q: ... Does intelligence mean the ability that one can balance one's own fields, and can create more field strengths through his own field strengths, and interact with other plasma?

K- Can you repeat that again? You've got the answer in your own question.

R: It's possible, yeah. Does intelligence mean the ability that one can balance one's own fields, (1:14). and can create more field strengths through his own field strengths, and interact with other plasma?

K- What does intelligence have to do with the Totality? Or does the intelligence we call, is enlightenment? And, the beauty of it is, that, how much of it do I understand? And how much of it do we want to comprehend, that we have the intelligence to understand? Then, I think you'll find the answer yourself.

Intelligence, you might understand in intelligence, knowledge of another creation, which to you on this planet has no meaning. But when you arrive by accident, or by choice because your Soul knows you're going to end up in this environment in the coming time, and then you understand, you already have the knowledge you've been in, what you call it, you've been "pre-taught." Where on Earth this had no meaning. Now for you, it has a meaning. Because then you say, "Oh, it's deja vu. I don't know why, I've been here before." Have you been enlightened to the knowledge of the present?

I was with one of the Knowledge Seekers very recently. And she said, I don't feel good today. (1:16). There is something wrong. And she doesn't feel good. And by the end of the day, it wasn't that good. It didn't turn out the right way. And I suddenly ?? thought, this Soul knew was going to be a bad day today, but the physicality was not aware of it. It was pre-telling about what the Soul itself is going to do. And, in a way, it was planning the party to go on its own. To the party. And, it was a time to confirm that. It was a time, in a physical way, to achieve, to pre-tell, enlightenment of the Soul.

In a way, you stand, I'm going to the party, and this party, I'm going to wear this kind of dress, and I'm going to behave like this. Now, the Soul has done the job. The Soul has, in a way, preset everything, to put everything together. And, the physicality had no clue. But, in a way, it's a dream, you have watched it,

physicality knew that the Soul is moving that way. And, the Souls already knew, what's the outcome of this. Because that's what it was supposed to be. Because that interaction of the Soul, that physicality representation of the Soul, emotion, creates, it's a condition that other Souls have to interact and respond. (1:18). And what would that respond be, would have created the next generation of disciples, which, what they were involved in, had to be done.

And it's amazing, you look at the condition in a physical dimension, but we look at the same situation through the Soul, through the field, and then it has totally different meaning, different understanding, and different purpose. And I sat back and I said, poor ?? Chick, he didn't know what the Soul was telling him it's going to do. But, the feeling was that, I don't feel good, something is wrong. Because, I knew I'm going to be naughty in this party, and my naughtiness will bring others people to do something with me, or with it, and create a new dimension. But, none of the others Souls knew, because, I'm going to be decided to be a naughty one in a physical dimension.

Is it enlightened? Is it preset? Or, was it agreed by the Souls who are collectively ?? work with the Soul, that you do this, the outcome will be what it needs to be? And then with it, you find freedom. Because now, you carried out the wishes of your Soul, but your physicality was totally ignorant to it, till it puts you in this ?? (position). How many times you said to yourself, why did I do this? This is not my character. Change the position. Ah, my Soul created the condition that my physicality carry on, because the other Souls were set to show this reaction, because of what I did physically. And then you look at the life differently. Then you don't call it, "I don't know why I did this, (1:20). I don't understand, this is not my character." This is the ?? arrangement of the Souls. Does not matter what your character is, or what you do.

We'll see this beautifully on the 11th of November. Many of you who'll attend the 11th of November, you'll be shocked in what is to come, and what is to be inspired, and what is to bring the change.

It'll be interesting to see what will come out of 11th of November meeting of the ambassadors. Would we end up, are we setting up the same for the world peace through ambassadors negotiating during the conference, "breaking the ice," interacting of the Soul, or sets up a new condition. As I said, it's so interesting to see how and where, and the way we will move. And our Soul is just preset to it. But we are just there to carry out the physicality. And then we see what the other physicality's do, which moves their Soul to a new dimension.

Is it enlightenment? Is it the education of the Soul? Or is it part of us learning about ourselves, in both dimensions? Very interesting if you understand it. And very interesting to see here, I am just a pawn in the game of Souls, and we thought, you're setting up the game for the Souls to interact. But you actually yourself, you're played up by the Souls to carry out the physicality and the things we're going to ?? do for it, (1:22). for the change of dimension of the existence.

Any other questions?

K- I would like to suggest something while we are at this topic. What I would like you, Knowledge Seekers who will attend the ambassador meeting, is to write your wish, without a name, on a piece of paper, in multiples, and give it to the ambassador you meet. Give it to another Knowledge Seeker you meet. And wait and see what happens with your wish. A lot of you will write, "I wish world peace." But go a step further. I give you everything possible, that you can create that condition of peace for yourself, and for those whom you represent. And then see the image that they receive ?? every gift. Because you give a Soul to them, you enlighten them. And this will bring a lot of, a lot of ?? enlightenment.

Any other question? (1:24).

Q: ... If hopping onto the fields to travel is like driving a car on the motorway, would a traffic jam or congestion ever occur?

K- Get a few magnets and put it on the table and push them and you'll see. Get a few magnets, magnetic balls, the ones which are very traditional now, and put them on a table ?? and see if you get a traffic jam. Unless somebody drives around, ?? we didn't ?? get everybody attracted to it. But when that happens, you call it accident. I call it a new stronger Soul. It's created by the interaction ?? of it on that ??. What would that will do, that all the other magnets in the ?? set have ?? their own Souls, ... ?? ?

It'll be very interesting result. And then you see, if you creates a traffic jam, if it keeps the pattern of life, there should be no traffic jam. Do we see a traffic jam of the stars? Do we see a traffic jam of galaxies? Magnetically, they position themselves. Even if they get squeezed, they still have a gap in the distance.

Any other question?

Q: ... So that I can understand, is the subconscious and the STP the same thing? And how do we interact with it, so that it can help us with something in the physical life?

K- Can you repeat again?

R: He's asking, is the subconscious and the STP the same thing? (1:26). And how do we interact with it?

K- Is subconscious interaction of the STM? Or the STP? You can't have something on its own and call it subconscious, if it's not interacting with something else to create that ?? dimension. Is the subconscious the interaction of the fields of the physicality and the STP? What we call STP, or we call it, the "Spirit."

I have explained this before. We have two types of emotion. One emotion is the interaction of the fields of the physicality with the STP. And one is between the STP and the STM. But there is a third one, which is again is the interaction of the fields of the P with the STM. This is where you stand at a traffic light, and you suddenly find yourself pulled back ?? and a car passes you. The STP and the physicality were asleep, but the STM protects the physicality by interacting with it ?? , overriding the STP.

Then you find out there is no such an answer to such a complex interactions. Because that other dimensions of the, what we call, emotion. (1:28). Which again, is the story of the Mass and the Weight. When the STM and the STP of the man interact they create that emotion. While the STP and the physicality of man creates that an emotion, what does the interaction between these two emotions create? Subconsciousness? A more purified field interaction of a higher order which understands, and is enlightened to more than what the Soul is ?? going to ?? do? Or STP is aware of? When you talk about these things, work without ?? prejudice, and understand that every interaction creates another interaction, that that interaction interacts with the interaction that was created out of. This is how we call, "I am the beginning, I am the end", because I ?? am created , ?? I'm his creation. I create, ?? I get created.

Any other question?

Q: ... The subconscious attends to human thought and emotion, creating things in our physical life. That is when we have thoughts aligned with a strong emotion. Please explain the relationship between this and the Soul.

R: I think you have just done that.

K- I answered that. Any other question.

Q: ... Mr. Keshe, (1:30). can we create new plants, using plasmatic biology?

K- Yes, why not? But you have to understand, everything about the ?? plant. We don't call it plasmatic modification, but it's a creation on it's own.

Is there any other question?

Q: ... Will the Plasma Energy Apps improve the life of people in every aspect?

R: Plasma Energy Apps. I guess means, maybe applications of the plasma energy will improve the life of people.

K- Of course it does. It does ... You see, we all are aware of the knowledge, we all understand it. Mastering it's application.

We, as I've told you before, we, in the past few days, one of our Knowledge Seekers came with a problem of health for one of the members of the family. (1:32). They're all very knowledgeable Knowledge Seekers. They know everything, as much as I do. And I just said, you know what you need to do? Just do this and do that. And something which is impossible in the world of wellness happens to the person within minutes. It's not that they are any different in knowledge than me, but I understand more about the fields of interaction, about conditions needed and conditions created to interact with the fields. And that's the difference. And it'll come by experience. And sometimes you don't need anything to do. It's just knowing how and where to interact your ?? fields with.

I have spoken with this, about this many times, about Naomi in the hospital. After 30 days of accident, standing on outside through the glass window. Only by thoughts, only by interaction of the Soul, I made arms and the legs move, dancing. And there were 10, 20 people witness to it. And Giovanni was standing on top of the ?? bed. I don't need to do anything. I don't need to go in there and do. It's just my connection to the Soul. (1:34). It's the Soul which moves the physicality.

And we are masters in it, but we don't abuse it. With a click of finger, with one thought, I can bring every president without anyone telling them to sign the world peace and disarmament. But what we're going to do with the generals? What we're going to do with those who work in the armies and make the guns for them? So we have to teach the man the peaceful way. That man does not make the gun. Does not matter who is the president and who is the nation, or the star, or the planet. This is the difference. And you need to understand that. And then you come to the point that as I always said, in this cycle, we are not magicians. We let you understand the magic. Then nobody can "magic" you.

Any other question?

Q: Hello Mr. Keshe, do the Souls of humanity upon death or transmutation, entering the flow of the Earth's poles, become part of the process of creating the MaGrav fields and Inertia of the planet, and then go on to participate in the creation of other parts of the universe by the same process?

K- Everything is connected to everything. In the world of the Creation, everything is connected, you have to find the path. (1:36).

Q: ... Hello Mr. Keshe, what is the reason that the Soul is hiding from the physicality? And why does the Creator, why doesn't the Creator show itself in front of its creation? Thank you for being amongst us. ..

K- It does, the man is blind. It does, the man is blind. And he calls it a dream.

Any other question?

Q: ... Good day Mr. Keshe and again thank you for another astounding teaching. In the last Knowledge Seekers Workshop you talked briefly about Gans of Gans. Can you elaborate more about it and give us some applications on what we can do with Gans of Gans? Thank you.

K- We've taught about this quite in the past a lot, and you can do a lot with it. There's a stage that you can even go further, to make Gans's of the Gans's of the Gans's. But you have to understand how to make, how to create a condition for it to be created. And it has many, many applications.

But in a way, the Knowledge Seekers are not ?? aware, they don't want to understand it. It's a little bit too far. And how can you .. understand something happens when there's nothing there, for something else to happen, but it happens? So, application of it, is elevation of the Soul. In so many ways, elevation of understanding. (1:38). But, it has to be in the right way, it has to be done in the correct way. And at the same time, that Soul has to be ready to accept it. You can take a horse to the water, you can never make it to drink. And this is the key. And this is the key to the existence of the man. And if you understand it, you understand the Totality of the Creation.

Any other question?

There is something I have to mention. We are looking at it. We don't bring it in yet. We just wait to see how far it goes. But, sooner or later we will lock and stop those who are attending the London conference for a weekend. Because once we reach a number, we don't have many openings left. You have to understand that we still have 200 Knowledge Seekers which come from the week of the training, adding to this. And to find a venue in a four or five hundred numbers, which accommodate security and everything else and all that, it's a "forbidable" (formidable) task. So, those of you who are attending the London Conference over the weekend of it, please complete as fast as you can, because we're going to block it, we have to block it. We have a lot of people, (you) will be asked, (1:40). prior to attending, to link to, what you call it, provide a lot of details (about yourself) for us. And this is part of what we call, the security structure. We have ambassadors, we have delegations, we have dignitaries. And even though you're Knowledge Seekers and you are ?? being amongst them. Their governments want to make sure they're secure. So from sometime in September, we start the, what you call it, security vetting. ?? we hand it over to national governments security vetting. So please understand, we have a limited numbers. We can allow ?? Knowledge Seekers to attend this session of the week before.

Any other question?

R: ... I'm not sure how we can address it, but I'll just give you the question, and we'll have to be careful, because it has medical connotations, but perhaps we can address it differently.

K- Do not bring in, do not even bring it in. Do not even bring it in. Do not even ask it.

R: Okay.

Q: ... So, service onto the Creation has no limits, to create that Inertia in yourself for expansion of the Soul, And wouldn't kids be doing it all the time, seeing they are enlightened by the smallest things in life, (1:42). but just don't know what's happening, like waking up in your sleep, flying in a white light.

R: So, it's more of a statement than a question, but ... we can just leave it as it is.

Q: ... I would like to know if the "Gans of the Gans" is thought. Thought, thinking or thoughts. Is that the Gans of the Gans?

K- In a way it could be, if you explain it that way.

Any other question?

Q: ... Hello Mr. Keshe, can you expand a little on how to contain Neutron Gans?

K- .. Please go to, (1:44). what you call it, to Fukushima Center, they have a need for it, they can help you a lot. They can contain everything in there. Neutron Gans, first of all, if you understand what a Neutron Gans is. Claiming it, does not mean making it.

Any other question?

R: I think you've actually covered all the questions that we have outstanding here.

K- I wanted to finish less than two hours today, so my wish came true. Thank you very much for today. Please, those of you who are coming to Manchester, we'll see you on Monday morning at 10 o'clock. The reason we start at 10, because Manchester is a busy place, 9 o'clock pushing into getting in there, harassing is not good. So the sessions are from 10 till 6 or 10 till 5. And as is usual, traditional with the Keshe Foundation, on the last day of Friday night, or we call it, the last supper, we all eat together, we book a restaurant somewhere. And we'll go for ... the last night of the session. Please come without expectation. (1:46). Come in with a clear mind, and let's see what you take back with you. Because what you take back with you, will be elevated so much by the time you meet us back in London. And then we'll see the next cycle.

Because what you make and what is gathered as energy in the London Conference, comes from those who are in that one week of Conference. This is a peace condition, this is elevation of the "Soul of the world leaders." And the conditions are not so good for many of our leaders, in the level of their Souls. And we try to bring to that position.

Those of you who have enrolled or registered for the, what you call, "?? imprinting of your Soul," as I call it, you'll see the traces of the interaction in your Souls. You will get invitation, some for next week and some for the week after the, what you call it, the Manchester session. So, some of you will be invited to be with us, we'll give you the date, you'll receive the email, please check your Junks (Spam) continuously, because some of our emails end up in the Junk and say, "I don't know, I wasn't invited."

We decide, we try to meet most of your requests on the time. But, you'll be invited in half an hour session. Be on time, because when you miss it, we have to put you back, for next session, what could be. So, those of you who want, I'm going to give you a full meeting of your, what you call it, being able to see, and a representation of the field of your Soul. And how you actually are, how you feel, how your feeling in truth is in the background, traces itself. (1:48). How, what is the conflict between your Soul and STP, what's the conflict between your physicality and your Soul, you will see it in the graph. And it'll be interesting, how synchronized you are, how in touch you are with each other, doesn't matter how you think you are. The machine does not lie, the man always lies himself.

So, it'll be interesting, those of you registered for the sessions of, what you call it, to see the structure of the Soul, in the next few days you will receive invitation for that session. And, most probably we'll see you again next week, but in the following Monday, we meet those who join us in Manchester. Now we start a new ??, all of us together, to the next cycle ??.

Thank you very much for today. And hopefully we see you in the next few days. But please, for the London Conference weekend, make sure once we close it, we ask you really early on to provide us with all your names and details, and you have to be vetted as the dignitaries and ambassadors are present and it's very, very tight. Especially when the Americans turn up, it's mayhem. They think they own the world. And we have to show them we are all equal. This is what's the biggest problem, why American ambassadors don't turn out, because the security is so bad, that they don't even trust their own ?? security, let alone the others. Thank you very much for today. I will meet you all in the next session, next week.

499 KSW August 17, 2023

END

500th Knowledge Seekers Workshop August 24, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Milestone 500 KSW; History of KF and troubles & successes; BRICS; CIBRIU; How Soul interacts with Soul of planet - galaxy - U; New "Interactive Sessions" - make fingerprint to advance T - discover where come from in U - get home; Bottled water from world changes emotions thoughts; Nuclear power stations Europe overloaded; Teaching what STM & STP are all cells - all organs; re-grow organs; Grow food quickly desert without water - need to chew; Water all over u not same - different energy levels,

ENGLISH TRANSCRIPTION

(:16)

R: .. Today is kind of a special day, it's a milestone at the number 500. And I have had the honor of being there through these all 500 workshops. And of course, so has Mr. Mehran Keshe, the reason that we have these workshops. Hello Mr. Keshe, are you ready to begin today's teaching?

K- Yes, good morning, good day to you as usual whenever and wherever you listen to these series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. As Rick said, it's a 500 times plus, which we welcome you to the knowledge of the Universe (U). And, even this 500 plus sessions, it's not just even put us on a first step of a ladder of the universe's knowledge.

It's interesting to look back how we started, and the first sessions, and the first teachings, and then building it up, and then growing it up. The whole knowledge of the Keshe Foundation (KF), the whole structure of the Keshe Foundation started in 2000 and about 2005. Where I met one guy and he said, "Mr. Keshe, let's make a website." And we called it keshefoundation.com. It's not there anymore, but it's on the history channels or panels, sections of the Internet, if you can find it. And we started, and it was so much excitement, putting the first website out and monitoring, who's coming in, who's going out, who's monitoring it. And we start making booklets of everyday hits of who came in, which pages they watched. Because the brother of the guy was an Internet guy, he could do everything in the background, when he did the first page. And gradually, from that time, we come to where we are today. And, two men starting it, in more or less, kitchen table. (:18). And then building it up to become now one of the largest, most powerful scientific organizations in the world.

The power of knowledge comes as us, as Knowledge Seekers (KS). And the past 500 sessions, step by step, has brought more and more Knowledge Seekers. From the man on the street, woman in the kitchen cooking, people on the sleep, in bed listening, to the ministers and world leaders, step by step, we have walked ourselves to where we are.

In a coming time, in a very, very short time, Keshe Foundation will come out of obscurity in the West, not anywhere else in the world. We've stood the challenge of the kings, we've stood the challenge of governments, we've stood the challenges of every way to stop this technology (T) to come out. But you can never fight the forces of the Creator. Even the man thinks he won the battle, but in fact that battle was their battle which they lost, deeper.

Today, as Rick said, 500 sessions of the Knowledge Seekers, plus many we did before that, before we start calling it Knowledge Seekers, and all the teachings, more or less started around the 1970's in England. I start teaching, explaining to my fellow students, same class, and then to the professors, and then to the militaries and the rest. It has brought us to a point of maturity. In a way, the more we teach, the more is revealed, the more we understand deeper. I remember in the summer of 1979, (:20). when I went to Queen Mary College, I sat in front of my professor, Professor Leslie, one of the brightest man in the nuclear industry. He said, "I don't know what to do with you, you come in, I took you, but I'm responsible to see you through, but you are a different character, you're different knowledge and you can cause us a lot of problem, but you will bring a lot of insight for us to see what we are missing." And that build up, where we are today.

In summer of 2003, 2004, setting and signing agreement with the minister of defense of England I realized how powerful the technology has come. The British government refused to sign a non-disclosure with the ministry of defense of England, but with the minister direct, which means I was answerable to the Parliament, I was answerable to the Cabinet of British Government. Then I realized how strange things have turned up.

Some of you know the history of the Keshe Foundation. But, when in 2000 I stopped the work, the business, and concentrated on the development of the technology, to build the first gravitational system, it took me some time, I bought the centrifuge, it didn't work, because I didn't have the right nuclear material, and I knew my target was to create the first nuclear base reactor. I went back to British Nuclear Fuel, where they know who I am, I worked with them before, and I said, "can I have some nuclear material, for me to be able to test the system?" (:22). In summer of 2004, I received a call that, "you better come to the, what we call, "Military Museum" in Trafford, and we shall meet there. We discuss your request." I thought, what has this got to do with military and museum?

I went to the Military Museum, it's not very far from Manchester United, football ground. I lived in Manchester for 20 - 30 years, so I knew where I go. I walked into this place, I said, "I've been told to come here for a meeting." They showed me up to a office level, and to a room. The room wasn't more than three by four (meters). A round table in the middle, and about 4 or 5 guys sitting around. I walked into the room. And I said, "hello, I come here, I was told, I requested for some materials." The guy stood up, and he said, "hello, Mr. Keshe. We knew you'd come back. Welcome back." I said, "can you explain?" He said, "from your university time, we kept an eye on you. We knew you have brought a breakthrough. But it's nice to see you back." And he introduced what everyone around the table, from which ministry, ministry of Defense, Military, and the rest were on the table. The guy said, "I'm represented to sign on behalf of the British government to this technology." And they brought the papers out. It was already drawn that I'm signing on behalf of the Minister, and Ministry of Defense was not to be known. (:24). And that's the time where the troubles of the Keshe Foundation in everything in that room started. The technology was marked for more killing. The technology was marked for defense technology.

I talked in a number of occasions. They tried to impress me. They said, "the minister has invited you to the Farnborough Air Show for you to see the power of the technology you bring." As you know, there are two air shows a year, every two years. One in Farnborough, one in France, where most of the military hardware is sold to governments. I went to Farnborough. And the other part of the problem of the Keshe Foundation, exactly around this time, if you check Farnborough Fair, it's about this time. The first 3 or 4 days is closed to public. The last two days, is open to public to see the shows, the air shows, and the military hardware they want to show. I was invited there the first day. I went there with my, what used to be my wife. And I walked, literally, along the runway, watching different "Phantoms" (jets) "F this and F that," flying. As I was walking,

waiting to meet with the appropriate people of the Ministry of Defense of United Kingdom, because this section is not public, I met many ministers, many cars and entourage and the rest of it.

I walked up to the top of this little hill. There was a big blue building, huge. And I walked in there. (:26). And nobody was talking to me anywhere. I was just like, "playing on my own," but everybody else was there. And I walked into this building. I saw Lockheed Martin banner by the door. So I knew Lockheed Martin is part of the American Defense technology, Space technology, and everything else. And I went to the information desk and said, "can I speak to someone about a new technology?" The lady said, "can you wait for a minute?" She went in, and a short fellow, very short fellow, maybe 150 centimeters, about 155, came to me and says, "can you come back at 12 o'clock? The person you want to speak to is not here." Me, walking around, wasting time because nobody from the Ministry of Defense was there to see me. I was a "lonely child" walking everywhere, seeing how ambassadors come with their entourage ?? and watching the flights, and walking around different exhibition park, missiles, weapon technology, all sorts of things was in show.

I came back 12 o'clock, trying to be precise. I walked into the building again, but there was nobody in it. I was the only Soul in this huge exhibition center. I hung around. Nobody was there. I heard a massive noise coming. I went to the window. It was a F-18 getting tested to be shown how it goes up vertical, and the noise it makes to go up itself vertical. While I was watching it, I had a tap on my shoulder. Two guys were behind me. (:28). They said, "would you mind coming outside?" I said, "what's wrong?" He pulled the badge out. He said, he is that MI-6 we want to talk with you. "On this side of the window, you're in American territory. On the other side of the window, it's a British subject." The other guy said, again, he's from Secret Service. and they asked me to move out. Now I knew why the place was empty. "They were catching a spy."

I walked out through the revolving door outside on the balcony. And the guy told me, "Mr. Keshe, you're here to serve secrets." I said, "what?" I started shouting, they started shouting. And outside the road, it was full of black cars. You see it "in the movies." They captured a huge spy, so everything was cleared to be in public. I put my phone out, I called the guy who assigned the contract with me, the Minister of Defense, (I said), "you brought me here to trap me." He said, "no, it's a mistake." I said, "I've got two MI5, MI6 officers in front of me, and they want to arrest me for selling secrets of British government. This is my technology and not yours." He said, "there is a mistake, just stay there, stay put, don't move." The phone rang with the other two guys. There was going a lot of shouting and howling. Me losing totally my head, that I knew, if they take you in as a spy, you have years in prison. The guy telling me, "there is a mistake." The other guy shouting at me, "don't move." The guns were pulled, more or less ready, if I do anything. And the phone call in my hand said, "Mr. Keshe, just today we're talking to the head of MI5, MI6. They're on the line. There's a mistake. It's totally a mistake." Then everything calmed down a few minutes. (:30). MI6 officer gave me the phone, says, speak to the lady. The lady said, "Mr. Keshe, there has been a huge mistake. We apologize. We made a mistake. Don't do anything. And don't get angry." And I said to them, "this is finished. British will never going to get this." They said to me, "you can talk to Lockheed Martin. They negotiated somewhere with the Americans. He's not talking to us anymore. You better have him."

I went back to that room. < break in audio > They wouldn't let me go in while I was standing outside. At that time with my partner, she arrived with a briefcase with the documents in it. The short fellow appeared again. He said, "who is?" Head of missile strike of Lockheed Martin. They want to negotiate. I said, "I didn't come here for this." He said, "Mr. Keshe, go out, go home, in 48 hours we call you from New York and Washington, and we come to an agreement." I said, "no way, no way." All those black cars and everything disappeared, as nothing was happening. And, the guy said, "please go back home, we call you in 48 hours, and we sort this out, we buy your technology, we are here to assist, my technology is not for weapons."

On the way back home, walking along the runway to leave Farnborough, my ex-wife, not knowing she was an agent of Belgium's, she said, "I've got to speak to the Belgians, on the way up I've seen them." On the way she already spoken to them. And, come back, and I sat in a cafe, by the runway, I said, (:32). "I'm not going anywhere, I'm packing my technology, They want to use it to kill more." She walked back to the Belgians, being their agent, being, working with them. And she said, "Let's go back, they want to talk to you." I walked back, at that time totally angry with the British and what happened. And the Americans on top of it. I walked into a hall where the Belgians were selling their weapon technology. The hall had two sections, the left side and the right side, but looking at each other. They said, "you wait here." Another guy came, after half an hour, sat on the other side. Belgium ambassador to United Kingdom was flown in to negotiate. We agreed to go to Belgium, and establish the first tests. We go in September. And we went in September to Belgium, we used to have a home there, so to us was not going somewhere strange, we just moved from the British home to the Belgium home. And after going to Belgium, they said, "now the technology has to be assessed."

One of the top nuclear scientists in Belgium was appointed, to oversee this assessment till March, every week, every couple of weeks, questions came, you have to answer this for us to assess. They wanted to know the intricacy of the technology. And in March, after the Iranian New Year, I called the professor. I said, "what happened to the report it was supposed to be out (by now)." He said, "the actual report is going to the Ministry of Defense, Belgian government. But I can give you a report, just to say, as the paper you've seen on the Internet, the technology is feasible."

I met one of the top Belgian professors in nuclear weapon, called Dr. Deer, a lady brought in, especially from America, (:34). to assess the correctness of the technology. And then that, after that letter, within two, three days, Belgium signed a company to build the system. Because in their assessment, theoretically it's correct. I spent four months with a company a lot of you know, going through intricacy of mechanical system. And after four months, they said, "yes, technology is correct. System can be built, which can fly, and can create energy."

Then they said, "there's somebody important is coming to the company to see." I said, "can I come?" They said, "no." I said, "how come me, as an owner of technology, cannot be when this guy comes." It touched me. So I went and parked my car outside to see who it is. Here it comes. Today, King Philip, the king of Belgium, at that time prince, came to see the technology. And from that day, my problem started, and we had to escape Belgium and the rest of it. Again, the target was military. And then I found out what we call, "Red Circle" was part of that organization later on. Trap after trap trying to get hold of the information. Getting poisoned, getting shot at. And the strange thing is, all the assassination attempts was known by my partner. She was pre-informed. The day I got bombed in the car, suddenly she had a headache and she couldn't come. The day Fabio was assassinated, suddenly she had to be home. She couldn't be there. We knew all why. (:36). This brought us to Italy. This brought us to work and not stop.

You Knowledge Seekers came more ?? a few of, hunger for knowledge. And me being a fool taught you more. And in that process, and in a different direction, we got pulled to China. We went to China to escape the hands of the Belgians who were trying to get me back in, to assassinate, or to get the technology. Chinese government pulled us back in and held us during the court session. That if anything goes wrong, we are in China. And as we know what happened, the fake courts and the rest of it. And this gave us a ground to work with the most advanced nation in the world in its own way, most populous nation in the world. And that brought us to today. 500 teachings down the line. We have signed one of the most powerful agreements with a nation, where we deliver everything to change the course of humanity.

It's not that we are unknown. We are well known. And we are well known for what we do. And we came to know this, which is a way, a proud point for all of us Knowledge Seekers. Today, this weekend, is the BRICS conference in South Africa. The last BRICS conference was in Brazil, when we had the first Brazilian conference. I was asked to stay in the same hotel as the prime minister of India, but everybody else was cleared of that hotel. We were the only outside organization inside with the rest. (:38). And we were told, we were cleared by the Chinese and the others to stay. Keshe Foundation is trusted. Then I knew we were part of the "international game," where in the morning, the whole of Keshe Foundation team packed their suitcases, was in the corridor, ready to leave Brazil. We were told to stay. And we were put back in our rooms again till the end.

We met with the officials of governments, some in secret, some with members of the Keshe Foundation to lay out what is there, but in general, (it) was to understood. And the interesting part was, a known Foundation for its work, was welcomed by BRICS, and cleared to be where the presidents and the leaders of the world come and go for dinner and negotiations. You can ask this from the members of the Keshe Foundation who've been there. And we sat across the table with different governments.

So we are not obscured. We are not dreamers. And today, the 500th teaching, 10 years down the line, we have jumped what it would have taken decades or centuries for a knowledge to be spread. Now we understand why. And we understand we are correct. We are more than correct, but we have to stay correct. Not to get "big headed," now that we have received the full support of Chinese government, and all the rest which goes with it.

Yesterday, my communication with the American ambassador, I invited the whole of American structure to the 11th of November meeting, officially, with all their scientists, if they want to. And in that letter I wrote, the invitation is very simple. (:40). CIBRIU has been set up. You want to be the last person in the queue? Or in a meeting, we rub shoulder with each other, and we extendedly meet other ambassadors of the CIBRIU, that we can set up the technology in exchange for peace. And Iran will be recognized as a space provider technology, where CIBRIU is China, Iran, Russia, Brazil, India, and United States. So the official invitation to the American president, to the American government, has been made yesterday. And American ambassador in Brussels years ago told me, "in the next meeting, we'll be there. We promise you." We want to see if they keep their promise.

And we see in the 10 years what we jumped, we can bring the change. To you, it's a few minutes of history you listen to. This is 20 years of my life, withstanding poisoning, assassination by bombing, high speed chase and everything else. And the strange thing is, when I sit back and look, what the change will bring, I say, "the life of a man was worth it to bring change to so many." Welcome you back to the Keshe Foundation. One day I might tell you some more secrets, or history of the Keshe Foundation. Where I drew the first UFO, and I explained how it works. And a friend of mine said, "why don't you make it?" Now, we don't need to make it, because it's made by nations. (:42). And it'll be shown by nations.

<< Audio Breaks >>

K- Hello, can we hear me?

R: Yes, we couldn't hear you for a minute there. We hear you, we did hear you, but you had an echo.

K- Okay, we're okay. Sorry about that. A lot of people don't like to hear the truth.

R: Maybe. Thank you.

K- Thank you very much.

Anyway, now on the 500th anniversary, you understand a little bit more, what we've gone through. And, even in the past week, I received a message. The way we lost millions, in the past two years, was set up again, (:44). by those who were there to stop us. But losing that brought us to a bigger position, beyond our imagination.

But, it comes back to the teaching. We listened to the Intro, we listened to the whole cycle of life. Interesting enough is, as a Soul, as a part of the structure of a plasma, how do we interact with the Soul of a planet? How do we interact with the Soul of a galaxy and a universe? And is there a difference between these things?

In the Keshe Foundation website today, later on, you will see a new session set up. This is what we call, "interactive Soul." The reason for this is that, in this session we try for you to test yourself in what we do with you from outside. We've done this test, we know we have some data's, but now we want to see, collectively, (if) we can reach all of you to the same level. In a way, Keshe Foundation is back on what we call, practical ground.

You came and you built the reactors and MaGravs, now you bring the "play of the Soul." Those of you who signed for this, it's two ... two sessions. One first week and one the week after. There is a reason we done it this way. (:46). Those of you who come in and join with the interactive session, please buy yourself a pH tester. It's very simple, you go to a chemist, you went, you tell them, "I want to test my pH." They give you something to test. And then the second week, we want to test your sugar level. If you're diabetic, join us in that session. If you're not diabetic, but it's good to see, it shows that we give you the data, what is the chances of what diseases you might get, or what position you have through the Soul.

This interactive session is a cornerstone of feeding man in space. Where we want to know you confirm the ?? disease. And this will start the next cycle of the space technology development. Those of you who signed in for the "signature of your Soul," as of today, we don't accept anymore. And now, the first set of these tests will be done in the meeting of Monday in Manchester. And then the rest of you will be informed. When is your time to get the "signature of your Soul."

It's important for us to not dilute our system and have a picture directly, people we see in front of, new technology, never seen before, will be brought into Manchester, and we carry on with the system to see the operation of the Soul and how we control. And then we do a session again later on with the same people and see what is going to change and the effect on the new technology. (:48).

I ask you as many as you can join the, what we call, the "new trial," the new set. In a way, it might show you a lot of things. In a way, it brings the knowledge to the next step. This interactive test, which we'll carry out next Friday, not this Friday, which is the sessions on now, but the following Friday on the 8th of September, it'll be one of the most important confirmation of the technologies. The more of you join us, the more we can cover the whole structure of the next step in the space technology. In a way, it closes one chapter, but opens another.

What is to be do? What does this mean? What this data will bring us? Allows us, in our work, to set up the next step, to structure the next stage of the space development. In a way, what you tell us interactively, with you testing yourself, allows us, through the systems to be developed now, to do a lot of good things for

humanity. To bring a new dimension in the backbone works of the Keshe Foundation. It allows us to see where we need to strengthen, and where we have to reduce the tension for the next step in colonization in space.

As I said, (:50). Chinese government is the first government who has committed themselves to colonization by 2030 on the Moon. Their colonization will not be in the "monkey suit," as I said before, or (it will) be conditioned like where we are today. We congratulate the Indians managing to land after 50, 60 years of the Americans, but this does not show being behind in technology. It's just being too busy making another 1.4 billion be added to us. Indians are busy with something else than going somewhere to party. We saw the party yesterday and it's beautiful to see, but was most probably one of the last flights we see man will take with a "firework."

This morning I was a bit late and as Rick said, "you never been late since the time, you're late by one minute." I said, "I was talking about the space development." I was talking to our Knowledge Seeker, where we develop the next stage of landing, accurate landing on the Moon, or any space in the world. The new design, the new structure of the technology, where it took them from the 14th of August to get to the Moon and now they landed, congratulations to Indians, but the next step, in next 12 months, 24 months, it will be 14 seconds. Where going to the Moon in next 5 years, will be the way we go, "for a walk in the park."

In next 10 years, commercialization of the space technology will be like the way our children at the age of 1 and 2 are savvy to the laptops, (:52). and iPad, and you see them at the age of 1 and 1/2 playing computer games on the back seat while the mom is driving.

Technology evolution is so rapid. And technology development is so rapid that in the coming months, in the coming year, two years maximum, in collaboration with the Chinese government, Iranian government, and most probably Brazilian government, we open the space technology in a very rapid way. The rapidity of it is not building a swimming pools and jumping in it and see how it is ??. The rapidness of it is the same environment as we live in. So we just move in home. The simplicity of the technology that every nation can reach, the development. We don't need have a hidden budget, hidden secrets, and organizations to test flight.

In these test flights we have to be able to control everything for your transmutation, for your change from the matter state of the Earth to the matter state condition of the Moon. I'm sure many of you will do that many of us does, when it goes to Amazon for example. We go with a "tie and a suit" and everything else, and as we stay longer things goes away and we start living and eating as the natives do. When we go on the Moon we don't want to be in the spacesuits now but now have a freedom of the Earth environment. We want to see how it is on the other side of the "dome." And the transmutation coming to operation. With a man, ?? lung will die crossing the bridge. (:54). With a man, understanding of the transmutation of Soul to dimension of physicality of the Moon will survive.

We change according to the environment. In these tests, we lose many. It will not be sweet time. In these tests, for the knowledge to be transferred and understood, we will lose many physicality's, but we free many Souls. In a way, the actual "wild west" of the space technology has started. We have to understand how you transmute and how you come back. How much of it we can assist you. And how much of it you learn to use your Soul. This is why the interactive sessions we put in is important. 3, 4, 500 people. The more we test, the more we understand combinations.

In these processes, I will tell some of you, because I know what I'm looking for, when we come to the individual positions, where your bloodline comes from. From which galaxy, from which star. I come from that dimension. I understand the technology. Many of you will be surprised. You are not from this planet. Your origin doesn't come from here, as you were travelers of the space. And there's a fingerprint on it. We tried to prove this to the Chinese military past few weeks. And in a way, trying to prove the confirmation, I showed them another way how to understand with the energy levels. You can talk about the energy source, (:56). origin of the planet, and the rest of it. But they need to be educated. They need to understand what every data means.

In a way, we open the history of the universe to man from now on. When we asked you to join in for your "fingerprint of your Soul," it's because we are going to the next phase of "interactive sessions." Where in that interaction, we'll tell you exactly where your origin comes from. United Nations charges you so much to tell you which way your ancestors escaped out of Africa, and where they came in from. In a coming time, we can tell you the origin of your life, if you're the "Passengers of the Universe," it's like day and night. Because the energy comes from the universe. Energy comes from the fields of the universe. And as was in the Intro, you see when you go to a planet, if it has got the fingerprint of the Earth. It's the same. See the fingerprint of the birth from where the bloodline of the man on this planet looking like a man comes from.

As I said, we're entering a beautiful phase. We are entering to recognize and confirm that we are part of the Universal Community as much as they are with us. And we were so ignorant to understand it. Now we see how, to what extent, and how long they've been with us. (:58). What we learned from and what we taught.

The next sessions of the next three formats of the Keshe Foundation, these interactive sessions, will open a new knowledge, new understanding for many of you as Knowledge Seekers. We use those who came in with a fingerprint of the Souls, who will go, start going through the sessions in next week or two, as a reference point as their Soul brought them to this position. And then we "mark the bench." And we go through as many as you who come into the sessions of interactive sessions.

The interactive sessions will bring you and us a knowledge, will take the space agencies 10, 20 years to gather. We know what we are doing, we know where we are. And this allows us to use your fingerprint to make a system for us to take you back home where you came from. I can search the whole of the Universe for a star, if there is a life. You are the sample of that star and with us. Now you understand how we will map for man, as you call it, the GPS. Because you have already come from a position and in a way, universally GPS you.

Now you understand, how simply with you sharing knowledge with us, we are opening man to the space in a beautiful way. As we could make materials, now we make the fields of the universe. (1:00). And as you have the connection to, we latch on, we copy of your fields and we take you back home. As we go home with you, we learn more about works of the universe.

Today's teaching is teaching of understanding the history of the Keshe Foundation and the history of the man will go. But in a way is a break point for us. In the sessions of Manchester meeting, you will see new systems which we've brought in. These systems to our team is for another purpose, but to me is for another purpose. And this is why we chose a few, that we have a full understanding of. If you remember when we did the first trainings in Trani and in Barlleta, was very few of you. And in that process we learned a lot, we brought a lot, and we added to the totality of the knowledge by different people in different way. Even they left, but they took the Soul of the knowledge with them and that still works for us, and it's still delivering for us.

Man should understand where and how his Soul goes after leaving the physicality. Or man can test his Soul and see if he likes where he's going and what is he prepared to do to bring that change for it. The elevation of the Soul of the Man (STM). In a way you go to China and stay there a few days and then you decide, (1:02). "do I like to live in China or I come back." Now the development of the technology and what we tell you, is what we call, interactive sessions, allows you to find where your Soul in one level has found itself, and where it'll be finding itself. For the first time men will be given a chance to evaluate its conduct. And you have time till you change the physicality, or by time, to elevate the Soul without the dimension of physicality.

In a way, the "heaven and hell" is in your hand. It is the joy to be, or regret where you're going, and you have no say to it. The elevation of the STM, the position that Soul will find in the universe, becomes the responsibility of the man. And these trials are the beginning of that course. How can I elevate myself? How can I bring myself to be in a position where I'm comfortable to be for the rest of the existence in the dimension of Creation?

Now you understand. step by step. Every work we do is well planned in advance to bring that position. We have to establish the world peace. Most of you Knowledge Seekers who join in the fingerprint are a peace loving people. We got to know you over years, and we know how you feel and that's why we use the benchmark, zero, peaceful, men of peace, those who work and look for world peace. And we build on this. That's why we open this channel.

Next step for us is to, (1:04). in a way for you to see how you change, in the, what we call, interactive sessions. And then you see how you manage to understand to move from dimension of material state to state of energy and how to convert back to. It won't happen in one session or two, you have to practice it yourself. In a way, the interactive sessions are, as we set it up, we'll start teaching you the conversion of come, what we call, transmutation. You will understand how, you'll understand the reason why, but it's the way, step by step. As the Armenians say, "gamas, gamas", slowly, slowly, we will do it, we'll get there. But you have to understand, otherwise all becomes a magic, and then it has no meaning, because you look for the next magic. This way, nobody can become a magician for you. And no one can teach you what you do not know.

We teach you in this process, how to tap into the Knowledge of the Universe. And never doubt in what you receive, and what you have to do. You tap into the knowledge of the languages, as easy as a child speaking 10 - 20 languages for you, is not a language. It's just the way you mutated to be able to live on the Moon, understand the culture, the environment you have to live in. Now you understand how to change in the position, not only on Earth, how you communicate with another, what we call, "body of information," life, in the universe, and gather their information, and give the information about us, how we live. (1:06).

Interesting point for many of you, was and completed in the testing as we said, with production of materials with the Chinese military in past few weeks. One of the basic things we see again within the structure is, Hydrogen. Which means again through the same tests, we can gather the field strength of it.

Interesting point for many of you will be in the process of these interactive tests, that as I was listening to beautiful talk yesterday with the Indian space people, we got to the South Pole, we found there's water can be there and there could be life. There is water all over the universe. But when you bring the water of the Moon back to Earth, if you find it, does not have the same fingerprint of the water on this planet. You will have common denominators, but it's not the same water.

Go to the history of what we call, the "beating water," homeopathy. And then, if you understand, people who are familiar with this, I've written a paper about the truth about homeopathy. You will understand, different beating gives different strength and different dimension to the water. One behaves like a zinc, and one is antibiotic. So, man will see the water, but man has to test the water, to show the fingerprint of the Moon, not the water from Earth.

Water is one of the most abundant, what we call, liquid in the universe, (1:08). but not all the waters are the same. The salinity, the heaviness, the interactions of all creates the what we call, condition of life. And scientists soon will understand. They are too busy finding water, they are missing the principle of the creation of that water, and what that water means, and what kind of life it supports. We have to look in the energy levels of the water, not just that we found the water. And that energy level, that combination of interaction of the fields between the Hydrogen and Oxygen, or another element, which manifests itself as a liquid, gives us an indication of life, gives us an indication of existence, gives us indication of the fields which we can survive.

It's very interesting and many of you, I'm sure, you have never thought about it. Many of you, today, you buy bottled water, coming from Nepal. Bottled water coming from South Africa. Bottled water coming from South America, and you're in Europe or in America, and you drink it. You, if it's the water from the origin where they say it is, you start changing behavior in yourself. And if you would have drank the water from down the road, or from your tap. This new bottling water has brought a new dimension in the life of (the mixing) of the emotion, intelligence of the man. And man is not aware of it.

In the coming time, man gradually will start looking at it, and understand it. (1:10). People who continuously drink water from sources of a given position will start creating certain characteristics, like you're Chinese. But now this time, it touches your emotion and physicality in a different way. Now you understand. As I always say, "whoever's got a mustache, is not your uncle." Just because it's a water, it doesn't mean it's water. It's the essence of the creation. It's the essence of the fields which affects you, creates emotion in you, and with it creates a new image of you.

In the coming time, I'll teach more about this. In the coming time, we'll see more about this. And in the coming time, we'll see how this beautiful adventure we see with the Indians will bring a new light. Don't get excited that they found water. Be excited what kind of life that water supports. It will not support the life, the same as us on this planet, it's slightly different. You start living on the Moon and drink from that water if you get a hold of it. If you need water to survive, then you see you might become more Indian looking, or more Chinese looking, or nothing from this planet, because the fields of it affects you.

This goes back to my teaching, which I said, when they split India to Pakistan, the Muslims, and the Hindus, we see the two character of the same race for thousands of years together. Aggressive, aggression in the face of the Pakistanis, peacefulness, and in a way, sanity in the face of Hindus. They are the same blood. They came from. (1:12). They just drank different blood.

Now you understand how important this will become in the science technology of tomorrow. In the "interactive sessions" we put, is the opening of the knowledge to future scientists who interact with us, as a human race, and us interacting with them, man who came from the Earth.

Thank you very much for being with us for the past 500 sessions. And I hope you learn a little bit more about what is to come in the world of science. And please join as many as you can in the interactive sessions,

because it's a database for the first time ever be gathered. And it's a database will give us a lot of information about a lot of you. And allows us to set the course to make it easy for you in the future for your transmutation. Thank you very much, Rick. If you can go to a break and we come back.

>> **BREAK**>> 500 KSW August 24, 2023 (1:20).

K- Yes. Just referring back to what you just shown about the new center. Today, standing here, scientifically, even the systems you see, which is unimaginable by many people, which now is set up. These systems are already obsolete. Through the test development in the past 12 months, since they've been built, technology has taken a leaping jump over a lot of other things. And in a way without you knowing, in the last session of the 4 sessions we had with you last time, last month, we brought in a new system, which replaces even these systems. And many of you felt different in the last session, because we tested the validity of the new technology in a much more advanced, in a way maybe it's 20 - 30 years of research jumped in less than a year.

And the systems which you will see to be brought in on Monday in Manchester is the edge of the science of man till today. And you will see how we'll make a fingerprint of your Soul. And then during the sessions many of you will go through the confirmation of transmutation. These systems even as you see it looks so futuristic, (1:22). they have lost them their futuristic characteristics or work with what has been developed. We tested systems in China very heavily in past four weeks, six weeks.

I thank the Chinese Keshe Foundation team in the background, and I thank the Chinese officials without them knowing, brought us a vast knowledge of technology. I'm saying the Chinese military, in a way they work with us, in a way they understand our technology. China has chosen one of the top scientists, the man of vision to work with me. And this man will open huge doors for the humanity. He thinks he's... he has the audacity to push, but he finds out in pushing, it brings new dimensions for us. I open technology to people who I trust and we have built the trust with this high ranking military officer and this will open advanced knowledge and technology for China.

The same as we done with the others. When we trust we teach unconditionally. And what you see the breakthrough will come in science and technology will bring changes in specially in next six months, which whatever we done in past 20 years will be overshadowed by this rapid development.

Those of you who come to Manchester will feel what I tell you today. In less than 4 or 5 days you'll be on the receiving end of one of the most advanced space technologies ever created by man. (1:24). And you'll understand how this space unit, as you see it to be so advanced, has become what we call, "museum piece" by its own work. What it taught us, what it brought us, and what we learned from these, and our team understood for the development of next step. Those of you who joined us in the last session of the four sessions and we brought in a special system in the background brought us a lot of knowledge, brought us a lot of what we call, jumping technology to be confirmed.

And those of you who will join us in the interactives will feel the difference this time. Amazingly how this system will be and how amazing the whole changes will be. Allows you for the first time to in a way, know about your energies, your Soul, and how you can start the process of transmutation.

Any question?

Q: ... Hello Mr. Keshe, hello Knowledge Seekers. I just have some thoughts which I want to present right now. And it goes like this. Because it's possible for me to let all people worldwide calm down and turn all old colors into new ones, I got the idea to build in all so called, democratic countries our own political party called "All Men One," thanks to Ferd Amini for the name, (1:26). where "All" in German means "universe" in English, "Men" for mankind and "One" for one race. So I can give once again energy to all human minds to choose only one at the next election. But our first rule is that we do not lie and all the other peaceful things we represent with the Keshe Foundation. So that we displace step by step all the other oppressive political parties. For the party of Ivory Coast and Nigeria already have two perfect candidates for presidency. During the next weeks, .. I will inform the four biggest German health insurance companies about our headset devices so that they can finance the orders of local hospitals and ?? infirmaries, which is much cheaper for them to cure the roots and not to treat the symptoms with expensive pills. Would be nice if someone helps me with an example device, so that we do it together and they can see it, the results "live." Even our latest results with growing new teeth, would be great to show. After that we can continue with other countries, who have health insurance like Germany.

K- Thank you very much. In a way, it's the job of you Knowledge Seekers, to take the technology now to your nations. It does not matter where and when. As I said, we have asked our Chinese counterpart that sooner or later, China in committing his nation has to announce a collaboration too. And one way or another in next few weeks you will hear that coming from China. Once that happens, the doors of the Knowledge Seekers will open up. (1:28).

I'm back in Europe for Manchester conference and more or less rapidly we retrieve back to Beijing to complete the cycle of technology. This should give you as Knowledge Seekers to start making the ground, and if you put us in touch with your governments, we can show the collaboration directly with the Chinese in different levels and how interactive it will become.

Something interesting happened with our team in Iran without them knowing what we know happening, showed another what we call, direct interactions between Iran and China and how they're monitoring the development to technologies in two nations. And we should see this more with the other governments. And doesn't become a "leak" of the information, but it becomes a "leap" of information with other nations.

If you take such a step to introduce the technology to different organizations with results, we back you. Our scientific side will back you, and we have agreement with the Chinese that outside China we have a freedom in collaboration with China to do a lot of things. So we can bring more of you in.

The sessions of the 11th of November we stay very calm, because there's no use trying to do things when there is nobody home. August is a time of holiday for most of the ambassadors. They return usually between 5th and the 10th of September, back to their position. And, in that process, (1:30). from early September, we come back to you Knowledge Seekers, to start the rapid invitation of your ambassadors, not only in England, but across Europe. If you are German, you send the invitation to all the German embassies, right across the world, not just to the ambassador in London. This way, we stop the pushes we've seen from the Belgians and the German groups, which they think they can do what they like. We saw that in the opening of the exhibition in Linz.

We ask you, we give you the letters, those we trust, to make the invitation to your ambassadors and your government, yourselves. Germans are responsible for all the embassies across the planet for the invitation. Americans are responsible the same, the same with the British, the Nigerians, Australians, and the rest. You invite all your ambassadors. In a way, nobody can block the system. But we let the ambassadors have their holidays. And then we, you as Knowledge Seekers, we invite the world to the world peace conference.

We will show technologies on the 11th of November to world ambassadors, which will shake the backbone of the knowledge and technology of today. Everything is getting set up. And the most interesting part will be that the ambassadors will feel, will be part of, will see everything. That no doubt it will be in it. We saw that with the Chinese military. The officers had to explain to the scientists, (1:32). "it cannot be nothing because our clothes is covered with this and that, and we feel this and that." So, technology will be shown in the way, you will see what we gave as MaGravs in Rome, will be MaGravs, but with their effects, that you as Knowledge Seekers up to now could not show.

So take a rest, like we are, because we know the system. And don't forget, 11th of November is one of the busiest days on the calendar of the ambassadors in London. There are a lot of parties and a lot of meetings. And so we create that condition, with you as Knowledge Seekers to support. Get in touch with insurance companies. Get in touch with whoever you think will bring the change. As I said, we are "under the door and the business has started."

In a way, if comes to the national levels, we bring our heavy weapon, the Chinese government, on the table. Because we have signed a joint collaboration worldwide with the Chinese government. Not only within China. If need be, we can ask for the Chinese financial support to set up things in nations in collaboration. We've chosen the right partner to go where we are going. And even if your government say we don't have the finances, we look into the structure. We have to make a proposal to our Chinese officials. And if agreed, it will be financed. So, if they have a problem with financing it, (1:34). and that's the usual way, you just tell them, "finances could be organized." And it's our job, through our structure in China, to set up the finances for the German government.

This is part of the "Silk Road," but this time the Silk is beautiful, and it'll bring peace. And it's not just a road, it's a road to peace. And we have received our collaboration from the Chinese central government. We have signed ourselves to it. As much as they've signed themselves to it. So, get in touch with your insurance companies, get in touch with who you think, doesn't matter Nigeria, Ivory Coast, Beijing, Washington. We are there, with the help of one of the most powerful nations, to bring it about to happen.

Any other question?

Q: (auto translator from German) ... Good morning, on August 20th, 2023. That would be 4 days ago, let's say. In the Hungarian town of Lenti, the Windy Weather App showed an average radiation exposure of 866,754. The average radiation exposure in Chernobyl is 7,500. Since my Geiger counter also constantly displayed an alarm, I can rule out a technical defect in the weather app. (1:36). On 8/22/23, that would be two days later, the measuring station was switched off, and one could not read... And one could read that the data had not been renewed for two days. Can you please tell us something about this process? Thank you.

K- I know nothing. I cannot make a comment on something we don't know. But if there are more data's across Europe, then we have to look at something.

We know there is a problems in Ukraine. And IAEA is doing their best to cover (up). But the process is not one way or another. There are a lot of testing going on in this... Ukraine now is a testing ground for many, many weapons. Very a lot of old weapons now have been used. Whatever was left after the, what you call, opening of the Eastern Bloc. The end of, or opening of, the European Common Market. A lot of weapons were kept. They cannot do anything with it. And now it's been tested in Ukraine. We know nuclear shell, all shell radioactive material has been used.

But there's a huge danger with two of the main reactors in Ukraine. (1:38). But you got to realize the present situation has put a huge pressure on the Western European nuclear power stations. Fuel has gone up, so governments cannot afford paying for these fuels. And they have ramped up their nuclear power stations to their maximum capacity. And these reactors are not set up to react like this. And the fuel rods will show fatigue. I expect nuclear damage report in Western Europe in the next 3 to 5 years. Because the fuel is so high, the prices, nuclear power used to be used for emergency push ups. Whenever there was a high peak, nuclear power stations can be brought in and out and kept back up. Now they're working full time. It's bound to fail.

And the nuclear, especially the power stations in France, are under huge pressure. And we've seen them closing, many of them, for repair. They don't tell you why. But as nuclear physicists, I understand why. This is one of the critical failures of the system. Rods are good as long as they're operated in a cycle. That its pallets gets a rest time. When you put it under too much pressure you get accidents. I've been waiting for a nuclear accident in France, the past ?? two years. Maybe we'll see, I hope we won't see much, but we will see failures coming up. Because cannot take it and we will see radiation increases, releases and the rest of it.

But Ukraine nuclear power are under huge pressure, (1:40). especially with a shortage of moderators, shortage of replacing materials, shortage of cooling systems. Everything has brought the condition of a disaster closer. I'll not be surprised if they close more and more radiation centers. It's not, ?? recall, you don't need to be a genius to understand how it works. But primarily European nuclear power stations are under huge, huge stress. They were not built for this job, this way. Such a rapid continuous (loads). It needs time, it needs lapse time, it needs fields to build up, it needs field to, what you call, change in concentration.

Then this is what you call, a disaster in waiting. And it can be any time in next 3 to 5 years, if they keep relentlessly using their power stations. The best way is to buy two detectors, if you are worried, and rely on them. If the two are near each other, you know you are in a disaster zone, or you are in the radiation field. You got to understand governments cannot afford panic move. With a fire, they can see, they can move in the

boundaries, as we've seen in Canada. With the radiation, is a panic movement of population, and government cannot afford. So they keep silent. (1:42).

But especially you people in Germany, and what you call, your Eastern front, have to keep an eye on the situation, what's happening in Ukraine. Especially with what we hear. If it's true and confirmed that the head of ?? Wagner ?? has died yesterday, in a plane crash with a missile, this will bring a mayhem into Ukraine. Now you have to bring soldiers under control, which they have no leader, and they don't want to be led by Moscow. The worst thing could happen, but as the head of Wagner and the financier of Wagner both have died in one car crash, in an airplane crash with a missile. If it's true, then we're sitting for huge problems with what I call, the rebels, which have no control, because they don't want to relent to Moscow. And the Moscow does not have the finances to pay them. We have to wait and see, but don't rely on one system, buy two detectors and see if the two report the same, and if it is, cover yourself.

Any other question?

Q: ... What does the physical energy and power and light mean, under the Keshe Universal Plasma Insurance Policy? (1:44).

K- We provide you systems that meets your demand, energy demand. This system soon, next maybe year, will be completely supplied through China. These steps we'll take. But the technology has moved up so advanced that we... We have a big problem in Keshe Foundation. The technological leap makes our own latest technology obsolete. And we are facing this for past 3 years, 4 years. It's just, we release the technology and within months, with the development, we make our own system obsolete. And we stop somewhere and say, "okay, we have to go by ?? time." We start going, we jump so much.

As I said to the American ambassador and Mr. Biden in the communication of yesterday, we have moved enough technology and facilities into the mainland China, that if anything happens to me, Chinese will be given an address where they can pick up and follow with the technology. The situation like Wagner and scientists like me is very common. But in a way we have warned the American administration. If any "clandestine thoughts" goes into their head, I deliberately moved facilities into a safe position, coming from 3 different countries, that the Chinese military, space and other parts, will be given a coded place, (1:46). and they can pick up everything and carry on with the technology, in a very rapid way.

So, the Insurance ?? Policies means, you tap on to as much energy as you like, especially with the new development, as you need. And our system is not building energy. Our system, the way we structured it and the ways it's structured, will take energy from the universal fields. So, we are not burning fuel, we're just connecting you, we're like a transformer, we're like a substation. We connect your need to our need, our need is connected to what is available in the universe.

Most of my team do not even understand how I set things up and how these things going to be. And these, what we call, trials, starting from this session on, in the second session of other sessions, will bring you the power production. In a way, we ask you through the same method as "interactive," to see with a specific way we set you up, to see if your meters in your house stops, taking energy, but you have all the energy in the house.

We said this up months ago, we told you this is what comes as part of the policy. But at that time we could not explain to you. You will, in due course, receive a small unit that, that unit gives you the full policy,

power, health, food and energy. (1:48). And we supply from the Center. This is how the new Headset Units you will see especially, even the units you will see in the meeting of Monday for next week are already obsolete. But because they were produced we could not take them out.

But the new cycle will be much more advanced and it'll be amazing what it is and how it is. And you literally tap into the unit to your house and you take as much energy as you like. There is no meter because I haven't seen a meter from God put on anywhere how much energy comes to Earth. So you interactively from us convert energy to yours and you will find out a lot of your systems needs to be changed to AC, much more convenient for us to transfer energy. And gradually we'll reach you to do the conversion to AC for power at your end, if you need.

And those of you who take these policies up, signing to it, we'll increase the price of these policies very soon. Because we realized we have a small, what you call it, connection to it, because now we have a partner, they want to share of this structure as well. So whoever signs beforehand will stick to what, but I reckon the prices will double easily, once we sign in and complete our work with Chinese.

But in a way, it's a, let's say if you receive a box and that box you put in the house, and from that box, then we introduce you to the. What I tell you is not something we just talk about. Go back on the patent. These are all in the patent we released 15 years ago. (1:50). More, 20, 18 years ago. So now it's coming to reality. You, when you see these units in the house, you'll find that you don't need to know why they're working. The way we transfer energy to you, to your system, you download that energy system to your refrigerator. There is no wires. You download that energy directly into your, what you call, the cooker and the rest of it. This is how it's going to work.

I was yesterday talking with our team. The system has six antennas connected, connected, connected. This way we transfer energy to you, you take as much as you need. And there is no earthquake, there is no storm which can disconnect you and the rest of it. And then maybe a year you'll understand and you'll see that one of the most powerful systems which in a way based on the work of the universe has been copied by man, but in a much more comprehensive way.

So when you sign into it and we give you the date to start, you don't need to worry how much the electricity (costs), if it's an air conditioner or is you need heating for winter. We get it, what we call, through our system and you are the receiver from other end from our system to your system according to your need.

Any other question? (1:52).

Q: ... Hello Mr. Keshe, you said in the 458th Knowledge Seekers Workshop, "our body carries the DNA and our Soul carries the RNA." I would call it of the Soul, which is the memory bank of every noise, sounds, us, our ancestors, and those who have come through the cosmos, and those who we have, those who have come through the cosmos have heard. It's just that we have to be able, and get the knowledge how to tap into it. So, can you explain the RNA, the essence of RNA, and how to tap into, and how to tap into it to get the knowledge, or the memory bank. Thank you very much.

K- Can I be a bit direct? Most of those who join us in the sessions in Manchester will start this process with themselves. And we let them go and back in November we see how much they developed. Those of you who will come to Manchester meeting, will leave the Manchester meeting, Soul wise, totally different. And that will translate to your physical life and physical dimension, with it.

You need to understand the difference between the strength of the fields of your Soul, and the strength of the fields of your physicality, and the difference between the two emotions. (1:54). And then it's very easy to do. Step by step we have to open this. As I always said, they were mentioned earlier, if we release all the knowledge in "one go" and show you this and that, we become a magician. And my work has always been that, the more people carry with me to understand the knowledge, the less it becomes magic and it becomes part of life.

And so, we need to understand by few and by more and then, gradually, because more and more understand, they change. And we have to change. We have to educate people at a ground level and people at the top, at the same time. And somewhere, the two will come to operate.

When I released the knowledge, the "Key," in 2012, many of you old Knowledge Seekers, we lost a lot of Knowledge Seekers, that I betrayed the humanity, the Knowledge Seekers, and I gave the knowledge to the governments and not to the people. And that was an uprising against me by many, many Knowledge Seekers. Then, when in 2016, 17, we released the, what you call it, the Key to public, because the officials of Singapore released it to an outside Knowledge Seeker, what you call it, scientist. Then some of the Knowledge Seekers came back. Now we have it (you've had the Key), for past 7 years, you've done nothing with it. (1:56).

As I wrote to the American ambassador yesterday, under the Biden administration. When I gave you the Key on the 15th of November 2012, you "shelved it." When I gave the Key to the Chinese, they opened it up. And for some times they looked at it, for some times they started testing part of it, but they didn't shelve it. And that's when I tell you, we have our cooperation with China, because Chinese structure has worked on the Key, the knowledge of the Key step by step, step by step.

Chinese are very cautious. Americans shelved it. European went to destroy it. Chinese brought their scientists and different organizations to look after it, to see if it's true. We were appointed one person, which is our interface between other ways, and the government from the day one, we entered China. And he took us, he's a beautiful man, into... as he doesn't know anything, "blah, blah," to test us, to see where we stand. And the same man now sits in our negotiations with the government and the rest. He hasn't left us. He was appointed to see this technology through.

Americans shelved it, ignored it and everything else with it. In my communication with the Americans I wrote, the beauty of it is, that you've been on the receiving end of the trials and tests, and you know what I'm talking about. We wanted to test how we can capture, we use your drone. (1:58). We wanted to see if we can reach you on the seas. We gave you the "Donald Duck." And we wanted to tell you have no power in respect to energy development technology. You had Iraq and Erbil (after they attempted to assassinate Mr. Keshe in Istanbul a year or so ago).

So in a way when we tell you are on a trial, on a test, "interactive," Americans have been on the receiving end of the physical test of the systems. So we have to push with the technology, with those who understand and now we have reached that "breakpoint." And it'll be amazing what will come out in next few years out of the this technology for many of you.

As I said to our Chinese friends, they were looking for something they said, if we can give us it'll solve a lot of problem. I said, "you remember the test we did, you did it was analyzed by laboratories. I've look at the

data. You already had it five years but you're so hungry you ignored it." And now they understood. And this will go the same with many parts of this technology. Gradually, gradually. And is as I said, once the Chinese publicly announce the collaboration (with KF), you'll find out you Knowledge Seekers will become "gold dust." Everybody (will) wants to know.

Any other question? (2:00).

Q: .. Mr. Keshe, has Mankind reached the level of maturity yet, to have you explain to us how to communicate with the fields? Can you elevate our level of understanding, energy field communication?

K- We already do, we don't need to be educated. We just have to stop being ignorant to it. There's nothing that you need to be taught, you already know. But as long as you ignore it, you can't benefit by it. You have to go back and see how you ignored your communication and what you called, "oh, by accident." Coincidentally, we have created so many words, it's just in the English language, God knows in other languages, put together in between tens of thousands of it, to deny ourselves our own existence in the energy and field level.

And it's been... it'll be amazing, once we get to know how we find out. We've come to do that, to ourselves. And partially, mainly, the biggest, what I call, "enemy of the man," to grow this part, is the churches, the mosques and the religious people. Today people bend back and forth if they see a priest on the road or the Mullah. (2:02). In a few months time we'll stone them with our thoughts, not with the hard stone. How you abused us and separated us, ourselves from ourselves. Very soon to be called a priest will be the most shameful thing. As you call somebody a thief. To be called Ayatollah, we be the most, what we call, sins word you can hold, you can use. We don't fight with guns, with the religions. We teach that you find out the religion doesn't exist, you don't need to fight it.

And this is the biggest problem, for many of you. Your attachment to being weak, and needing someone to pray to, does not allow you to see the strength within you, that you are what they need to pray to, by your own Soul and physicality. And this is where the problem is. You are fully aware of all these fields. They denied you, they called it "Satan" and every other word, because you come to be enlightened with the knowledge of the Creation of (on) your own. You already have it, you denied it, so you have to accept it and you see the path of your own way.

Any other question?

Q: ... Hello Mr. Keshe, first of all thank you for your tireless service to humanity. Question is, if I've understood you correctly, then the reflection point of the Soul is in the middle of our head, (2:04). which you have described as a black point on the X-ray image. If this is so, then there must also be a such a reflection point of the Soul of the Physicality (STP). Could it be that the place discovered by Dr. Hanisch in the 1920's is this place? He said that in the back part of the fourth ventricle, or in the left auricle, atrium, there is a fifth chamber in which there is a perfect vacuum. This chamber is also called the hot spot and is about 4 mm. It is called the "hot spot" because a few years ago, American doctors found a spot in the upper left part of the heart, the size of a pinhead, which was much hotter than the rest of the heart. Heart specialists usually know about this mysterious spot in the heart, but they usually don't talk about it, because they have no explanation for it. Could it be that this is the reflective place, where the STP is located? Can you say something about it? Thank you.

K- I think, maybe we need to explain more. the difference between the Soul and the STP. The STM is from the collection of the fields of every cell. Because all have a common denominator. The STP is the Soul of every part, the energy of every part, collectively interacting. They are two different, it's like a Weight and Mass. (2:06).

When you speak about the hot spot of the heart, if the scientists look deep enough, that's the soul of the heart, that's where all the fields interact. You'll find the same thing with the kidney. There's a spot in the kidney, there's the same spot in the liver, there's the same spot in the intestine. Where the interaction of these fields, create the STP. Because it comes from the physical dimension of the part of the body of the man.

That's where the difference is. So, even if you consider every muscle, it has his own hot spot. And collectively, these fields are, in a way, interacting with each other through the blood flow, which again has its own hotspot. So, when we talk about the Soul, the STM, is the collective fields of every cell of the body, energy balance. When we talk about the STP, what we call, the "Spirit," is the collective interaction of the fields of every part, every, what you call, organ. And the balanced interaction with the environment, shows the physical dimension of the man. And then you understand the difference between the Soul and the STP.

In a way, you are a family with your wife and your children in your own house, (2:08). but you are a family with your parents, with your sisters and brothers and everything else, to make that home of the parents as a home. Home of the parents is collective energy of you lot, is the Soul. And you and your brothers and your children and their children as a whole is our organs, which makes that Soul, the Spirit.

And so, when you speak about this, you have to understand the totality. And what it means to be the Spirit and what it means to be the Soul, what we call, the STP of the man. It comes from the fields, collective fields of that organ and on its own cannot do. This is why we get diseases, we get a heart problem, we get something wrong with our liver, we get something wrong, the other ones move. Because it's like a solar system, when something happens with Earth moves forward, or explodes, the others have to move to adjust for the fields of what happens on the Earth, or with Earth.

So when we get that problem we get physical diseases because things have to move. In the future, once man understand this, for example when you get people with one kidney. If you change some field strength in other part of the body, you'll find out the body will start creating the second kidney, without you doing anything. This is how in the teachings I always say, you can reconstruct the heart without doing it. You don't work on the heart. You work on what has created the condition for heart to run into problem. (2:10). Which is the fields and energy of the STP.

You have to move the operation of the lung. The biggest problem, most of the hearts run into problem, comes from the conversion capacity of the lung, in its interaction with the energy flow out of it, which is the blood circulation. And once the man of medicine understand this, you don't need a heart operation, you have to change the environment of the heart, you have to change the environment of the blood through fields. Then the heart will repair itself.

I never understand why do they do open heart surgery and changing valves. Valves can be repaired. In the coming time we'll show this. You get people having, creating a lot of water in their lung. Why? Because now this condition of the heart has changed. The lung has changed. And now this puts a condition of the two fields creating rain, which we call, water, in the lung. You change the position of the lung, you change the position of the heartbeat, and you don't produce any more water.

My daughter in law is a well known heart surgeon. And he says the problem is people which have a big problem, they snore, whatever, they can't breathe. When we do the open heart surgery, and we close the chest, then they don't have a problem. And it is because we just open to the cage of the chest to get to the heart. (2:12). We can't put it back together the way it was. So it creates a small capacity extra. The lung changes, has more room, and there is no more snoring. there is no breathing problem. So by change of, small change of cutting the bone of the chest to reach the heart and put it back together, as it looks everything is the same, we change the lung capacity and change the life, and puts less pressure on the heart.

So we have to understand how fields are connected to each other of the Soul and the STP, and how they manifest themselves as a problem in the physical life.

Any other question?

Q: ... Hello, do the Gas Electric Units still make sense, in relation to the new technology developments? Thank you.

K- Yes they do, and in a way we promote it, we put it across, because there is going to be huge changes, and these changes has to come through governments. I explained that to our counterparts in Chinese government, in past couple of weeks in the meeting, (2:14). that China controls, or influences political arena in many countries due to his financial power. And if China loses that financial power, no need for the nation they're dealing with to do anything with, because they can do it themselves, then it becomes isolated and the governments are not ready for this. It will be phased in, for sure it will be phased in. But till that phasing in, these gases and other things will create a financial backing for stability of nations. So we carry on. Yes, we do, we will not... There are so many technologies we will not put in public because the economical damage worldwide is so huge that no government is ready for it.

Us trying to show what we can do, can bring mayhem to governments. Can bring chaos to governments. China in next 3-5 years will become one of the biggest breadbaskets of the world. Replacing Ukraine for sure. And for sure will replace the American grain market. Because the Chinese will market no GMO, which most of the nations are dying for. And this will cut the arms of the control of food, for national food security, international food security of United States. (2:16). And as I said to our Chinese counterpart, if you do it too fast, you'll find out you create more problems. If it's done in the gradual steps in the next 5 or 10 years, we can see the change through.

There is a huge misunderstanding in the world of grain and agriculture and the power of United State, and why United States has gone to GMO and pushing it so much, and they are testing it in North Korea, and using Israelis as a support to do these tests. One of the biggest breadbaskets of the United States for past decade comes from deserts which the water was drained from the water reserves below. And that is coming to an end. The superiority of the supplying grain of United States has gone under 3 to 5 years. Because the bedrock of water is gone. All of you know which states I'm talking about. And then everything goes to what we call, the West coast where most of these things get grown. But West Coast gets most of his water again from the same area, then three years later, four years later we see again green lands becoming dust land.

And it gives an opportunity for the Chinese with the new technology to be able to supply. We have a huge structure in Gobi Desert in China, which we'll explore rapidly to grow maybe five season growth of the harvest. (2:18). I'll explain this later on in teachings in next few months or so. But if you understand the

growth of the grain, you don't need the cycle of six months or 130 days, 160 days. You can create the same growth, give the same pleasure of eating, but reduce the cycles, very rapidly. You don't need to go through the stem growth, you don't need to go through the flowering phase in such a, what you call, long term. Everything can be shortened. And that comes from the availability of the material in the environment of the production.

We'll bring into operation Chinese satellites to create this condition. Desert can still stay desert, but it can become a huge supplier of what you call it, nourishment. The reason for this is that, as I was talking with our Chinese counterparts, they say, nation needs to eat. Does not matter if you feed them down the line. Chinese love to eat. And we have to create that stability. But now we have to meet the two "devils" at the same time. Be able to produce and still get the man to eat.

We met this for the first time in 2006, 2007, where we took the very, very, very, very first case, to test the wellness credibility of the technology. Where we had a girl, a woman, in her 35 or so, having many epileptic attacks a day. And I managed, and she was taking about 20 tablets a day on top of the attacks. (2:20). And we managed to bring it to zero and no tablets. Actually, Belgium authorities used (this as) a case against us, making a sick woman with 20 tablets a day, with no tablets and no epileptic attacks, a crime. That was that puzzled me. One of the cases they brought to court was, a man who uses fields to stop a woman for 20 years, 30 years, taking 20 tablets a day, having seizures on the street, a crime. This is the most amazing thing I ever heard.

So this lady, in the process, stopped eating. Because the system was giving everything she needed. And it was the very first system I built. The knowledge was so perfect from the first test. And then she said, give me something to eat, I want to choose something and we had to give her a banana. So, I understand what the Chinese say, the nation needs to see something on the table, that they can share and socialize. We can feed them down the line in emergency, but we still have to provide the looking things to chew.

And this will become part of the future understanding of the technology. The advancement has to catch up with the social structure of the nation. Otherwise we have failed to fulfill. Our pride to show we can do, can bring demise to years of culture. And I understood that in the meeting. So, we're running "two horses." We develop the technology in case of emergency, we can get the same food to them without feeling hungry. (2:22). But at the same time we grow the grains, in Gobi Desert. That we can change the course, without any water. Doesn't mean we don't have... We develop this technology to create food for you on the Moon. Why can't we do it on Earth? This is why you come into these "interactive sessions" from next week.

Any other question?

Q: ... What salts do I use in each cup from the 5 Cup system? I couldn't find information about this so far in the public teachings.

K- Oh, it's in the note you receive when you buy one. Salinity is written in the instruction. Even when you buy the training boxes of the Keshe Foundation, there's a little label comes with it, how to connect, and the salinity, everything is given. It very much depends on what water you use, what's the content of your water, how much Calcium it carries. One of the best things for you to do if you are using, making these "Gans boxes" or whatever, try to use not mineral water but the filter water, you know these waters you put through the filter and you take the Calcium out, then you get a very good natural result. And then the salinity changes according to the Calcium.

When you boil your water you see a lot of Calcium in your pot. (2:24). Let that water cool, use it for your Gans test. Because you've taken that mineral part out of it. Then it dictates what salinity you can use. Again it depends what type of salt you use. Purified salt or what you call, mine salts and some of this what they call, fake Himalayan salt. If the amount of salt is selling as a Himalayan salt, came out of Himalaya, there'll be no Himalaya left. I always wonder where do they call this coming from. They color it a little bit pinkish and they call it, Himalayan salt. But it's purified, what you call, salt from the sea and added color to. So depends what color salt you have, do you do you take salts from the sea salt? Actually you go to sea and you pick up, but then in there you have a lot of residues.

Any other question?

The average percentage is between 9 and 15 percent depending on the Calcium content in your water, on the ?? you collect ?? from.

Q: ... When the Soul elevates is the chakras or endocrine system all aligned and creates a giant star formation, (2:26). and is this, this cerebral spinal fluid charged up like the 129 Tesla system in Italy?

K- Depends what you call chakra. And depends what conditions are your chakras. It's very interesting, people talk about chakras, but they don't understand as an energy point what it means and how you can influence it, and how you can change it, with direct understanding of plasma fields. I can make your fifth chakra to be as good as your first chakra and ?? work for it. So energy points, it doesn't matter how you call it, it's you who controls it. You can interact it externally, or you can interact it internally, change them.

Any other question?

Q: ... In Crimea were found two important spaceships, which Mr. Putin recovered with the help of the ?? Palladis. Yesterday violent anomalies and strong irritations were felt.

R: That was the comment. I don't know if you have anything to say about that?

K- No. Mr. Putin is very busy rocketing people at the moment, so I don't think... (2:28).

Q: ... Congratulations on the 500th Knowledge Seekers Workshops episode, KFSSI family. So much taught, learned, discovered and accomplished, in all the time and work put in. I give credit to Mehran Keshe and Rick Crammond, for all their hard work and dedication, teaching this workshop each week. I personally have learnt so much from the plasma teachings here.

K- The worst thing is, I only come in one of them, Rick is in all of them every week. In, what you call it, Testimonial, Wednesday workshops, what you call it, Universal Council meeting. He's everywhere. He knows more than I do.

R: Well, I wouldn't say that. But I'm definitely present there.

K- I don't think you haven't missed any of them, have you?

R: No. I think we were late for one. And a couple of them had some crashes happening. But, yep, that's what I do.

K- Any other questions. By the way, did you get a bear back this year or not?

R: No, but strangely enough, I did see one yesterday, bear crossing the road where I was driving on a remote location nearby, a gravel road, and a rather large black bear. First one I've seen in quite some time, since the last one here. It just jumped across the road in front of me, (2:30). and I tooted my horn to say hello, and away it disappeared into the woods. So, I took that as a sign that the bears were around, and they seem to be still happy and shy of people, so that's good. As long as they stay out of my lower basement area, that'll be fine with me too.

K- Shall we call it the day?

Q: ... Mr. Keshe, how is it that you are so amazing?

K- I don't know. I never thought I was amazing.

Any of you want to join us in Manchester we have, as I said, still people moving, shuffling things around. You can still join us for Monday. It'll be a very exciting time. And we come back to you, as is the habit of the Keshe Foundation, after the ambassadorial holidays, to collectively work across the planet with all the world ambassadors, to invite to the meeting of the London. And as I said, maybe we re-establish and complete the 5+1 work in London conference. Looking forward to it and I'm sure we get response from different governments for it. And we'll see what the next step will be.

Thank you very much Rick. And those of you who signed for the fingerprint of the Soul, we closed that session from now, and now the time allocation will come up. And, those of you who want to be in the interactive session, (2:32). I think, should have been open by now, join us, because, in a way, it's the beginning of the understanding of how you go through transmutation. It's how you can create that condition of the transmutation. And you'll understand through the process of the work.

Thank you very much for today, and thank you very much for 500 weeks of non-stop sharing knowledge. And soon we'll go into our 11th year of teaching. And this is one thing I agreed with the Chinese, my teaching does not stop, and they have no objection, because I think they are learning more themselves, than sitting around the table and seeing test results. Thank you very much and see you on Monday, some of you, and next week in another part of sharing knowledge. Thank you very much, Rick.

500 KSW August 24, 2023

END

501st Knowledge Seekers Workshop August 31, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

From Manchester ready for flight; 2 visitors not from Earth; Man is amalgamation of recycled fields of U - nothing special; Sperm requires matching strength - not strongest; Learn to accept pain of first breath -

transmutation; Experience knowledge of all being on planet fed into Mother systems - equal access to all; Visitors to Earth amalgamate - can't recognize; Fingerprint of energy added to system; M fields of U always recycled - humans; Field strength of element have to be part of Soul of Planet - part of body; Wait for China to announce collaboration; Ether made up concept; Feel Souls

ENGLISH TRANSCRIPTION

(:10).

K- Yes, thank you very much. Good morning, good day to you as usual. wherever and whenever you listen to this series of Knowledge Seekers from the Keshe Foundation, the Spaceship Institute, we welcome you back. Today is a rather different way of teaching. Today we are in Manchester as part of the cycle of the teaching and what we call, the starting of the Spaceship Institute programs for Space. And today we have 19, 20 rebels with us, I call them. They're all sitting around the table, they wanted to be part of the teaching. So, you might hear a lot of coughing and sneezing and the rest, it's just comes from the background noise. Later on, in the second part of the teaching as usual, they might would like to come in, and to, if you want to ask them any questions, or to ask any question from us.

Today's teaching is very simple, it goes back to the origin of what we said, how we come, where we come from and where we land. (:12). Many things, especially till we don't put it on the table, does not show itself. And people cannot understand and realize what is to be. In the teaching of this past few days, here in Manchester, a few small points has risen and it's very interesting for people to start trusting in themselves, trusting in what their Soul will do if they are ready to go, or they are still attached.

And, in so many ways, the life of the Man is a progressive development of the amalgamation of the Fields of the Creator. We are nothing special and we never become special, because we are totally connection, accidents of the Universe. Even when our parents meet each other and fall in love and create the human body, it's just a pure accident. How, what, it will happen, the way it happens. How life takes place.

The present science and technology of the medicine tells us, the strongest sperm will manage to break into the egg and the life is created. This is again another fallacy in the science of the man and the creation of the man. In fact, we know from the Plasma Technology, the seed which is going to be the creator of the man, in the womb of the mother, is already pre-decided from the first second of the interaction. It's not the strongest, because this is the way Man always look at, the strongest. In fact, the one which matches the egg and the sperm, they pull together. This is one of the reasons why many people cannot have children, because they cannot create the matching fields. (:14).

We talk about the matter-state, but in fact, the interaction of the egg and the sperm is the creation of the Soul. So the two have to fit too, the two have to be connected with. In the present science they tell us the strongest egg can get and we see all the movies fighting to get there to penetrate the egg. Such a thing is a fallacy. When you know the two plasmas, when they match, now we have managed to create plasma of the magnetic (M) field of any entity, be it plastic, be it wood, with metal, with iron or copper. So now we understand the truth about the creation.

In a way, the minute the sperm takes motion, is already, if it fits the strength field of the egg, it'll be attracted to it. And the rest of it is fallacy. Because it cannot be, the two have to match to create the what we call the 'twinity', the twin cells. And this is the way it works. And if you have two or three of them matching, then you have the twins and triplets. If you have them creating in one dimension (D) of the physical life, dimensions of different matter-state of the strengths, then you'll have triplets. If you manage to create different Souls, but one Soul of Physicality (STP), we call it the schizophrenic, we call it "beautiful people."

Now we understand, through the process of the creation. This is how we go through, this is what we see. It's interesting that a lot of people, this has come up in the teaching of process of the yesterday especially, and I was explaining this morning before the teaching. (:16). We are told, we are seen, we are, we expect the life to be a smooth life. It's not that way. We have to go through transition. We have to go through the process of understanding what it means to be born in the real condition.

As I was explaining earlier on to the Knowledge Seekers (KS) here, when you go through the birth, when you come to take the first breath in this, on this planet, we go through a pain, and that pain is what makes a child to cry. The first breath, to convert, to divert, to change. Yesterday we had this with one of the Knowledge Seekers, who managed very rapidly to depart in the dimension of the Soul, and then we had to ask to breathe, exactly the same position of taking the first breath when you are born.

Many of you, when you go through this transition, when you arrive back to be a human body, you come back from transmutation, you have to take that first breath. And most of the time, we see the people who go through this process, they cry, because it's a conversion of the first pain. It's a conversion of matter state and the plasma state and transmutation.

So, in a way, we start seeing, gradually, the process of the transmutation. People who pretend they've been, and the people who actually go, it's very simple to see. We don't teach these things, because then people learn to, what we call, "play it." But in a way, it's part of the process of birth. Every time we come back in a transmutation to the dimension of the life of the physical dimension, we go through it. We have to take the first breath. As I explained in the teaching yesterday, when you go to the Moon, there is no air to breathe. You have to find. (:18). Your body has to adjust in a way, to take energy from the environment to feed the Soul, to bring that dimension into operation.

In these tests, in these programs, like past week and past few days, and coming up, more and more of this structure will reveal itself. It is for the Knowledge Seekers to understand, and for Knowledge Seekers to set what we call, the pattern for it. And then we'll see more. We expect, in a way, to see the transition between the body of the man and the Soul of the Man (STM). It becomes as normal as ABC. In the teaching of past days, we have explained and Knowledge Seekers gradually come to understand, they don't need a tool. We just here, as I said, we start opening schools where people learn how to go through transmutation to physicality (P) and the rest of it.

In that process we start seeing how things work, how we need to adjust. Amongst us in the meetings are many different characters, there are many different Souls, there are many different strengths. In the coming time, we have to be able to tune a system that it meets the demand of every individual, every Soul. That there is no exclusivity, that certain people are left behind, and they cannot be seen, or they cannot be operated with, or be able to transmute. This is a development of the technology (T). And in the upcoming time, gradually, and by progressive understanding, we take the fingerprint of these Souls. And we can match the fingerprint of the Soul with what we call, the system. That it makes it possible for everyone to be able to transmute.

This is the reason why in the past, in the past teachings I explained, those are not, who are not from this planet, (:20). they will not tune into the system of the planetary system, as we have it, confirmation of the Earth. We have to design systems which match their Soul. Otherwise they would have been able to do it themselves. In a way, if you are from planet Zeus, we have to find the fingerprint of the Soul of the system of the planet Zeus, and make it, arrange it, develop it, and deliver it, that the citizens of planet Zeus can go back home. This is part of the development of the technology, this is what we expect to see and what we are working on.

In a way, we can do the same, in the next few weeks and months, new technologies will emerge, new systems will emerge, which facilitate different speed of transmutation, different speeds of transportation. These all depends on actual how the Knowledge Seekers and the world accepts, the evolution in science. Evolution in understanding the totality of the knowledge of the man.

In the next few days, and in the coming weeks, Keshe Foundation (KF) will release new technologies, which makes it possible for all of you, at the same time, to be fed, at the same time, to receive energy, at the same time, to transmute. These systems are under development, these systems are getting actually manufactured to deliver, a full planetary system, transmutation, within the body of the man.

The next step after this development is to create structures without embodiment. What it means? Up to now you've seen MaGravs, you've seen systems which is made by man and carries matter state energy. In the next few months you will see systems which have no structure. It means it has no dimension of physicality. You don't see the MaGrav but you see the energies of it, the plasma of it. (:22). And gradually, we do without matter state conditions.

We'll create the systems in a way, now the Knowledge Seekers gradually can see, they can travel themselves how to create this situation. And the point of need does not matter if they're in the body of the man, or in the body of another direction and dimensions in the universe (U). It's the knowledge of the Soul. It's the knowledge of understanding the physicality in conjunction with what we call, dimension of the field flow of the universe.

In the coming time, in the coming months and years, many of you Knowledge Seekers, knowingly or unknowingly, will take into Space. In a way, you don't have any wishes, you don't have any desire. You think about it and you achieve it. It becomes a second nature, in understanding that you can live in both dimensions, and both of these reality's. One in the dimension of matter state, and one in the dimension of energy state. And in a way, the MaGrav systems we introduce, is that system. You want current from it, you're happy with a few volts. Or you can use them to reach to the point of the understanding, of the use of the energy of the universe.

In so many ways, in the next coming few months and years, the evolution of the science and technology with the what we see now, we start promoting and delivering, to bring a new dimension, a new understanding. In so many direct and indirect ways, we are accommodating these through one system, what we call, the "mother" system, maybe you call it, what the whole process of the structure, that you all can be connected through the same. (:24). Knowledge will become equal as everybody will have access to it, food, medicine and everything else. This is why we brought you in to Linz, to update, upgrade and gather this information into one center. You walk on the street, you see pictures, you see buildings, you see people. And then, years

later, months later, or sometime in the future, you come back and say, "I've seen this building." Because it's in your memory, you've seen it. You remember the face, "I've seen this face before."

Now, this is the structure we're setting up. Everything every man learns, everything every creature learns, sees, goes into that central system, that we all have access to it. And the knowledge becomes free, knowledge become part of the emotion of the man, at the time, and the place and the position.

The beauty of the new technology, puts fear on governments. But we have to understand, there is no one to govern us a few meters above this planet. So we were equal, and sooner or later the governments and those who want to govern, they realize they are no different than the others. And this brings us back to the point of what we call, equality, equality of the man with the rest of the Universal Community.

In the process of past few days amongst the people in this room, we've seen two people from not this planet. They are not from here. They have an origin, and ancestry from outside this system. And it's very clear who they are and how they operate, without them knowing. In the body of the man, they are man. In the body of the Universal Community, they are still connected to the point of birth. It's very hard for Knowledge Seekers to realize this. But in the upcoming time, Knowledge Seekers who are in this room, they'll recognize who they are, (:26). what they are, and where, and how they can go back home.

But you'll find out Earth is a beautiful place. Many of them opt (take option) to stay in the dimension of physicality, but know the roots, know where they come from. We had this situation in the Rome conference, as I explained before. And this is the way we start recognizing. As we see, there is no prejudices. There is no racism. Doesn't matter who they are and what they are. And this has to become the pattern of their life from the Knowledge Seekers. Does not matter where you go. It does not matter where you sit, does not matter who and where you are from, or where they are from, it's equality in knowledge. Equality knowing we all have the same, and knowing we all come from the same source. What are we fighting for?

This brings a lot of changes, this brings a lot of understanding for the world leaders. My work, and most of the Keshe Foundation work, from today on, from this regard, is to bring our world leaders to understand the equality of the man. And this process will start in London conference. As I said, some of the things we're going to do in London, it's already been explained to the Knowledge Seekers. But gradually we bring it up to the world leaders. It's the responsibility of the Knowledge Seekers to make sure your ambassadors are present in London conference. Or, if we wish we can, we have the capability and understanding to bring the world leaders to answer to the world in a conference or outside.

The beauty of the change is, that is within us. It's not individually one person. We don't have gurus, prophets, and we don't have those who lead us and we have to follow. It's the dimension and accommodation of the Soul according to their strength. And this will be a very harsh things for a lot of people. (:28). We always been subordinate, we always followed to have a leader. Where we find out the only person, the only things we ever lead to, is the dimensional direction of the, what we call, the Creator. We are part of, and it's part of us, we create the Creator. And we are the created of the Creation.

In this process, many of you will come to understand, how the life on this planet will go. How life on this planet will change. How man will become independent of this planetary system. How man become independent of physicality. Unless you choose to taste it, unless you choose to test it. Unless you decide to understand it, and then add to the knowledge of the universe.

Today we learn something and we teach it. In the upcoming time, we'll learn about the universe, the culture, the structure of interaction of the fields. And whatever we learn, will become part of the universal knowledge. It is not anymore me, I patent it, I hold it, and it's mine. In moving into the dimension of transmutation, this is what will happen. Your knowledge, through the dimension of the Soul, becomes the universal knowledge. And everyone has access to it. Now you understand why we don't believe in patents. Because as I always say, the Creator never opened a patent office. How does the man do?

Now you understand, whatever you do, whatever you gather in the knowledge, in the dimension of physicality or the Soul, now you understand, become part of the Totality. And then, as I said, you remember the building. They know who brought that knowledge in. You can go to the STM who added the knowledge, to understand what he's seen, what he's done. (:30). And then it goes back, do you want to do something wrong? Do you want to leave a wrong fingerprint, in the dimension of Totality of the Soul of the Creation?

Then this brings back us to the same point, as what we call the "Ethos of Mitra." We do good, we act good and we think good. Because, this is how we'll create a perfect Soul for the rest to ?? evolve, to live with it. Understanding this, brings us to a new dimension, new understanding. How do we educate the other 8 billion, the ants, the dogs, the cats, and the other citizens of the universe, to be perfect? As you can hear, we have some people making a lot of noises in the background, but we get used to it, it's part of being there. They can't stop talking. It's very interesting when you talk. "We can hear you, you are not very far from me."

Understanding this, is part of the teaching. We do not go in the depth teaching today. Maybe at the beginning you understood, I opened up the secret of the Creation. And then, if you understand it, you can open up the rest.

Part of understanding the work of the Creation, is understanding the motion of the fields. And then, understanding the separation between matter state and the energy. What we call, "magnetic fields in motion." And this is the job of you Knowledge Seekers from now on, to understand this, and to comprehend it. And then you find out your MaGravs will give you megawatts. And your Soul will feed you in a very easy way. You do not need to create. I have somebody here laughing very deep, knowing exactly what I'm talking about. (:32).

In this process, we see how things are done, how things are developed. And one of the things that you come to understand, is does the man need the structure of physicality to show his love, to show his affection? Does the man need dimension of physicality to create energy for his, what we call, Souls be fed to survive the span of the universe? The answer to all of it is, "no." But man is too physical, and in that dimension of physicality, man needs to confirm his existence. And this is 99% of the problem with the humanity, continuously confirming we exist. We have not accepted that we have existed and we exist for eternity, if we understand that we are part of the structure. We've been here from the beginning. We are part of the structure of the Creator. And we go back to Creator. As I always said, "what are we fighting for?"

In so many ways, if you understand the motion of the fields, even when we talk about the egg and the sperm, that they are fields of plasma, even those that are regurgitated fields of the universe in past billions of years. But we still would like to see we are individuals. We still would like to think we are unique. But in a way, in fact, we are regurgitated fields of the universe, uniquely at this point of time here. And soon, we'll become another regurgitated body in a few million years, or whatever, of the body of another part of (another) entity in the universe.

What has been the problem with the man is that man has not understood. (:34). He has taken a frame of the physical life, existence on the Earth has to be the only existence where he does not understand he is part of a cycle. He is pieces, a part of, what it is bigger than him. And then he is too, what we call, feeble and arrogant to think that's it. As I said from the beginning, this is my beginning, this is my end. I was born and I die. But does not understand I was born from the regurgitated powers and fields of the past. And then, when I die, I become another part in pieces of the others in the future.

In the teaching of the past, I always explained, what do you think about your Soul, where you never knew. Now it becomes a star. It becomes a planet. It becomes the source of life. So you understand. You are regurgitated fields, gathered here. And now you split to regurgitate for other children to be born of you in the interaction with the fields of other fields of the plasma of the universe with each other.

In a way, when you become a star, your field does not go only to your own planet, or what you create as life. Part of it is become part of the universal energy, part of it becomes you, part of the universal Cosmic Rays. And you do not know where this field, in conjunction with other fields, feeds another life. Now you understand, the Totality of the Creation and the Creator is all one. There's no difference. What you call, a Cosmic Ray, is the ray from another Soul, which has radiated from the existence of the regurgitated fields of the past, and in the future it'll become another cycle.

If man understands this point, man will not fight for one second. Man become to understand, he is just a progressive development, a mixture of the fields of the universe, (:36). and is a temporary condition, to be in the matter state, mixture of matter state, to be itself. The teaching is very simple, once you understand it. The teaching become very difficult, where you always look for matter state confirmation of existence.

In the coming time, in a very near future, man will see himself, he can identify his greed, he can identify his fears within itself, and gradually we bring systems to show that what is fear, what you're afraid of and what it needs to be done by yourself for your understanding to overcome these fears.

In a way, you become equal. man who has no fear, is a man who's strong enough to understand the totality. When you're afraid of learning, you create dilemmas. When you're afraid of somebody else, you create another dilemmas. When you understand, your level of understanding is equal to the others, and what we have is equal to the others, there are no fears. It takes time to achieve this, but on the other hand it doesn't take that much to do, because all men have the same fear and nothing else. And the biggest fear of the man in most of the cases is wealth and death. And as you understand wealth has no meaning, and death has no existence in the dimension of Creation, man will become man of peace.

To what extent we can teach this, to what extent we can bring this for man to feel, it depends on man understanding of his own creation. One day, in the upcoming time, some of you and many of you, as you become the Passengers of Universe, you come, you come back and then you teach the rest of us, (:38). that there is no difference. Some of you will elevate to the position to reach the Totality, the Center to what we call position of the Creation, the center of Creation. And then at that point you'll understand the total Souls that you have ever created or been created out of will come together to become one universal knowledge to be shared amongst the others. This point is not exclusivity, but it's the totality at one point or another we all go back to this point. We all go back to the Creator. We go back to where is the whole thing started from.

In a way, I'm the beginning, I'm the end. It's understanding of Totality, it's understanding of the Creation and it's understanding of the created. And once we understand this, land, wealth, and no life on anywhere in the

Universe will have any value as we know we are part of it and it's part of us. Always go back, understand how you are created and did you need anything in the womb of the mother? Did you have a jacket, or did you have a coin? Or were you wealth in the womb of the mother? And understand in the universe you're that baby in the universe, you're that infant in that embryo which is in the womb of the mother. Universe provides everything for a Soul to exist. You do not need to wear the frock of the man, the Rolls Royce car of the man, and the jumbo jets, and the guns and bullets to confirm you exist, or you have the power.

We don't see twins or triplets in the womb of the mother fighting. They all accommodate as they are Souls. They don't worry about who's wearing what, and which one has what. (:40). So why is the man fighting for? If you understand, the destination of the creation is all one point and one place. And this is what is part of the Keshe Foundation teaching. World peace is actually the world which is you, and you have to be peaceful with yourself. This is the totality. We aim governments, we aim societies, but in fact it's you. It's you who's the society, and it's you which is a governor of your own Soul. This is the whole aim, is not to bring, is not to change, is to understand, to comprehend, and take the next step for a change.

In the coming time, the more we learn, the more we become detached, The more we understand the process of the Creation, the more we become part of. And then we find out one point. We are the beginning and we are the end. We are amalgamation of the totality and nothing will change. Does not matter what the man does. In the process, the systems we develop, the machinery we show you, it's just to facilitate for you to understand how simple life has been, and how complicated we made it to confirm our own existence.

In the teaching of the, what we call, London and then Beijing, we open a new dimension for the world leaders to understand they have no power. For the world leaders to understand they're answerable to Totality of us, as the Soul of this planet and not for them to be as part of one. We don't exist and we don't enter, we stay equal the same and we teach the same. We pass the knowledge and it's for the Man to understand the Totality.

I bring the teaching of today to early close, as we have the Knowledge Seekers with us today. And then you can ask any question you like. If that's okay with you Rick, and we go back to answering questions.

R: Sure of course, you want to take a break first then and...

K- Yes, we never change the tradition.

<< **BREAK** >> 501 KSW Aug 31, 2023 (:48).

K- I just put a "cat amongst the pigeons," as we call it in English. As we are a scientific structure, and we see data, we look at the graphs, we look at actually what is physically there. And I explained to our Knowledge Seekers here, is 19 of them today. And that two of them are not from the origin of this planet. They are passengers through our ancestors or whatever. And they're asking me, "is it one male and one female?" I'm not going to tell you that. It'll come even in everything, even like those across the roads in the back. You've seen a lot of them on Saturday.

In so many ways, we are a mixture of races. And if we up to now fought for the color of the skin, or the culture, now we have to understand how we are going to handle these twos in here. They have well fitted into our structure, they look like us, they live like us, they make love like us, and then we do not know. (You have to leave that door open. Because, there's a couple of people coming back in).

So, are we going to see each other? And the interesting thing is, in the process of the week, it's amazing how these two, now we know who they are, behave totally different. It's like, you heard all the story, (:50). the Indian guy calls home mom, after being a week in London. He says, "nobody knows I'm from India, I speak such a good English." So, even though they pretend, or they don't pretend, they're actually amalgamated across us. Now I see them for the first time in these meetings, or second time, or the third time, it's very interesting, now we have a data. We have physical data and I'll mark it one day for Knowledge Seekers to understand, that we have already passengers of the universe in this room. If you put out, then it becomes "headhunting" (looking for corporate executives).

So you got to understand and the best thing is, guess who is it? You'll never find out. They have gathered the culture of man, mentality of the man, life of the man, and they actually, when they call home, says, "mom, they don't know me at all. I've managed to well amalgamate." This is the story of man. And it was wonderful. I was hoping that I get one of you here, because I know the other one for a long time. The second one was not a surprise, but it was a beautiful gift. And we see it, we understand it, and this is not the first time I've done this.

If you, as I explained in the, these past few days here, if you were in the Rome conference, I explained the same. There is somebody from outside, from us, and a foolish lady got up and says, "it's me." The rule is, the "golden rule" is, you never reveal yourself. (:52). And the beauty of it is, once you start traveling in what we call, transmutation, you know them immediately. I put the team here in a more or less locked circle yesterday, to see how these two actually operate. And it was amazing. Everybody was looking at them, if they flew, or what they not flew. These two are rock. They will not reveal who they are. But you can see them. They create a different field dimension.

And in a way, for not to disturb, we did not take anything, data, back on it. It's interesting, now these people in this room thinking, who is it? Am I the one? You only know when you go through the dimension of transmutation. You only know when you go to the dimension of getting ready to go to the dimension of the energy. And then you understand your energy is already locked to a destination, then you decide.

But many of you, even lived mixed amongst the men, you still carry a fingerprint. And your children will carry that fingerprint with them. In a way, we call it, mixed race marriage. Now we have mixed "universal marriages." Because some of this structure have married into man. They have managed to do. Those who cannot or have not done, have found a different dimension of life. We know them in the teachings in the past. I referred to them. And in the future, we'll see more of them.

Are there any questions? (:54).

By the way, they are not aliens. They feel, they bleed like us. They love like us, and they have managed to fit perfectly in our structure.

Q: ... Thank you very much for the teaching. I wanted to ask, when you say, "they are from another dimension of life", what you mean by dimension of life?

K- We all... What we explained dimension in the Keshe Foundation, is the origin of the source of the planet. We are a Earth dimension, because we are created out of the field interaction of the Soul of this planet.

It is very interesting in... I don't have my pad, but I explain it in a very simple way. When we carried out the test, we did not need, I explained this before, to drill a hole, to find out what's in the ground. By creating a field atmosphere we wanted, we could tell what is in that ground, from outside. This will become a new evolution is in what we call a lot of mining and other things. But it's the same. You cannot have these matters in that point, if they don't have a connection with the Soul of the planet. If they don't carry the essence of what exists inside, the field strength of this planet.

In a Periodic Table, we say we have how many elements? 200 and something. Whatever we have, it's actually 200,000 of it. But this planet does not hold it. We don't have the strength of it. So, it's not part of us. (:56). Whatever the Soul of this planet holds, doesn't matter what material is, it's in the body of the man. From Uranium, Plutonium to Hydrogen, is part of our physicality, actually works. The body of the man, the STM, has learned a way to use it for its advantage, to extend life.

In the future time, as I always say, I'll show you how body has learned to use radiation from the cosmos to extend the life of the man on this planet. Without it, we'll die. It's like a disinfectant, but we're not used to it. We don't understand it, because we never knew it exists. Many of the materials in our body is done to extend life and it's used as a, what I call, disinfectant. In a way putting out germs or fields, which (if) we don't (neutralize), we can (bring) danger to life. Whatever, whatever is on this Soul of this planet is in the body of the man. (.. Are you recording what ?? ?)

Q: I tried to offer you my iPad.

K- It's okay, thank you very much.

So, we have to understand this is part of us. And I'll be very interested now that gradually we learn how to go out of, or not to go out, to extend our Soul. And if this gentleman extends his Soul, and this gentleman managed to extend his Soul, (:58). and this gentleman managed to extend his Soul, and then this lady, and all of you, look to the left. Look, she's not from here. Because at the Soul level, you recognize each other. This is how you recognize each other in the space. Who's from where? And two of you in this room have a beautiful Soul, or with two ?? source, and you shine totally differently.

Your Soul, your structure, even though has a cover of human race on it, it's actually what I call, "GMO" of the Soul. You have adapted. But if you know it, you see it a different way. And this is part of us, because do I feel safe? Or you have chosen, or your ancestors, or the way originally you came here, they felt safe. Man will not eat us, so we become like a man. Man will not kill us.

We know in the process of life of this planet, very few, one or two of these people have brought knowledge with them. But they never revealed the knowledge, because man was not ready for that knowledge. And it's in inscriptions, it's in books, where we can tell you who these people are. Tesla was one of them, definitely. But it's a process of understanding. It's not anymore us from this planet. (1:00). It's us from this universe. If you have managed to live amongst each other, peacefully on this planet, we can live peacefully in the universe. And these people will be the key for taking man in a peaceful way to space. So, when we say the origin, it is connected to the Soul of this planet. It has a fingerprint.

Any other questions?

Nobody else asking? Oh, we have Azar as usual. If she's on the panelist, she puts her hand out, she's here, she puts her hand out.

Q: Mr. Keshe, if for example, when we go out, our Soul goes out, like I am blue, because I'm from this planet, the other people are not blue, because they're not from planet, they got different color. (MK) Yeah.

K- Yeah.

Q: That's it, that's right, yes?

K- yes, it's more or less understanding field strength.

Q: And also, imagine the whole, we teach the whole humanity how to transmute, so it means we can go to different places. Now, how do I make sure if I'm sleeping in my bed, my neighbor doesn't come into my bed and look I'm naked in my bed?

K- This is the only thing Azar thinks about, who gets in her bed? But, the understanding is, nobody gets in nobody's bed.

You got to understand the work of the plasma. Only two which both accept, interact. You get two magnets, you get three magnets. And try to connect the head of the magnets together. Only two fit, the third one is up or down, (1:02). does not fit. It's very simple, it's as simple as ABC. And secondly, you have to have the strength to do. You cannot bring a copper next to a steel and try to put them together. We create that distance. And don't worry, nobody will get into bed with you, you already have a husband.

Anybody else? Any other question?

Q: Well, can I explain the dream that brought me here, and the experience that I had here?

K- Yes.

Q: My name is Nick Vlahos from Sydney, Australia. I've been roughly, listening to the public teachings, One Planet, One Nation, One Race, and some of Rick's teachings for past 6 years. Now, what brought me to this seminar, it was actually a dream I had, and when I wake up, I had dreamt that I went to a planet, I'm not sure which planet it was. But the difference with this dream is that, there was a physicality to it, it was a density to where I was, like, I was truly there, without a doubt. And from that moment I realized, it's like my Soul was telling me, "Please", because I heard about the "25 plus 200" seminar that was coming up. And this was around May or June this year. And then I realized, it's like my Soul was telling me, "Please, you know the savings that you've saved, please do this for me." Because it's like, I've done this, some things for you, please do this for me. It was like, I realized then, like, it was like there's a man inside me or something, something like that. And that was my realization to it. (1:04). So I put the money down and I came here this week. Now, what happened on Monday, we all came here and it was nice to put a picture on some of the faces that I used to hear in the teachings, like Azar and a few other people that were here, like people like me who talking now.

So what happened we had some of the Head Units here, and we were told by Mr. Keshe at about two o'clock, the control room will turn them on. So I was really drawn to, I was waiting for someone else to put their headsets on before I do, in case I do a mistake and you know, I didn't want to be like a bit silly, but I was drawn to the Head Unit. So exactly about ten past two I put it on and then I grabbed the two hand pieces that are with it. Now as I was doing I seen Mr. Keshe say, come to my unit said, this number and ran the control and please give me the graphs for it. I was on roughly about half an hour, Mr. Keshe said, all right take your hands off the hand pieces, and then go for another 20 minutes. After that, he told me to stop and then told the control room, send the graphs that are in it, of my Soul and my STP. And what I noticed, and what Mr. Keshe said that, I was really, really physical, that's why I held on to the two pads for that long, and he showed me in the graphs and he was very surprised, you know. It's a little bit different graph he sent, he was surprised how physical I was, and holding on to the physicality, not letting the Soul go. But he said, "then look at this, when I told you to take the hand, your hands off the two pads. Mr. Keshe said, "look at the graph now." (1:06). And I noticed that the graph were more even, my Soul and my STP almost into a line. And he also told me that there's something, you might have a sickness, or the graph shows that you might have a sickness in you or it might be a big fear, but we have to delve more into it, and I have to look more into it.

But what happened the next day is what really surprised me. We all had our turns on the Units and we started talking. Now I first noticed a silhouette behind Azar. It was like a lady, or behind Azar. There's no one else in the room but it was a silhouette, a white silhouette behind Azar. And it was coming in and out. I couldn't see it properly and I had to adjust my eyes to try to keep it there. Then straight after that I seen another silhouette but much more clearer behind Galib, another Knowledge Seeker that's here. And I actually seen the silhouette, the person that was behind Galib, he was very surprised that I seen him. And he actually had a, he's quite a big guy, and actually had a upside down, ?? moustache, a long one. And when he seen me, he sort of went down ways into the floor.

But there was another Knowledge Seeker here, Catherine, a Chinese Knowledge Seeker. She had been on the headsets for about one hour. And Mr. Keshe was saying, "look at her face, she's definitely somewhere." Because she had a big smile on her face and she was doing, you can tell in her face she was somewhere in a happy place, somewhere. Then Mr. Keshe told her to please explain where she's been and this and that. And she said, "I was actually on the Moon with my family, this and that." And then when she talked about her mom, that's when I seen a lady just appear behind, from behind her. And this lady was different from the others, she was almost, (1:08). it's like she was almost there, but just her face was blackened out. And I was thinking to myself, how did this happen? It must be the, maybe something to do with the headset the other

day, and the fields that these units actually bring, do something to the plasma of this air that made me see that. Now this lady that appeared, she went behind Catherine again and then she reappeared to me. And, I didn't hear a voice in my head, but it's like I had a feeling, that she wanted me to acknowledge her, and then when I said to my head, "Yes I can see you", she disappeared and I really, I'm really happy that I came here and witnessed that. And something so clear and so almost, it's almost like a pure person came into the room. And I thank my Soul and Mr. Keshe and all the Knowledge Seekers for giving me this chance. Thank you. Nick Vlahos from Sydney, Australia.

K- Thank you very much. Is there anybody else who wants to say anything?

Q: How about China opening up publicly and acknowledging the KF? I am Mark for US, what about China opening up publicly and acknowledging I know they're in the midst of testing, and confirming and looking at it this way and that way and upside down and backwards and forwards. But we're waiting for them to actually come out in the public domain and say there is a new science and a new technology on the planet. Is this in the card?

K- You can see how American he is. It has to be on the CNN to be confirmed. (1:10). A lot of things happens without the CNN knowing, and they cannot confirm it. But this is the job for them, not for us. We have a freedom to review, to explain, but Chinese are very reserved. They do it their way.

Q: But the Americans are waiting to start working with the Chinese.

K- The Americans cannot work with Chinese. It's impossibility at the moment. Because, on the economical side, America thinks it has won a big battle. Bringing back a lot of work back to US. They closed a lot of factories in China, or they encouraged with taxation, to go back to US. But in fact, that was the biggest mistake they ever made. You'll come to understand the reason very soon. Because, they cannot export, they do not export what they make, more or less, out of US. It'll be a bigger financial disaster in the next 5 to 10 years for Americans. You'll come to understand, very, very soon.

Because, the point is, it's not what you manufacture anymore, or what you produce. From now on, the science will take over. How much you can put in. And the structure with us, part of our work with the Chinese is very simple. America attracted ?? brain (brain drain of poorer countries) by paying a lot of money. "American dream". You'll become rich if you come to America. In our work with Chinese is, we make China, the center of the space technology and the space knowledge. (1:12). Game has changed.

In a way, it took time to explain to the Chinese that you cannot just manufacture, you have to bring the talent to be part of. And in next few months you will see the Keshe Foundation will literally go out to bring the experts of the Keshe Foundation. We know who you are. 10, 20 years we've been watching. We know who you are, who the people sit with, plus the international scientists into China.

You want to be with the next generation of science development, you come to China. We'll shift it. Whatever American took, was the superiority to create war. Whoever joins us in China, with the development of new space technology is for peace. We leave it to the scientists. Where they go, people with the knowledge where they sit. Do you want to go to United States and create weapon technology to kill? Or would you like to move into China, where is the land of peace of knowledge for space technology.

We are advisors, and we advise thoroughly, we just don't go there, we have new technology. We look at all aspects of it. My job has been, not just showing technology, but showing what technology can bring to China, what can bring into the, what you call it, North China Sea, be it Vietnam, be it the rest of it. So, when you say, "what's going to happen?" In a way, in the next year, two years, in next six months, Keshe Foundation will drive heavily, to absorb international scientists into Keshe Foundation research and development in China. (1:14).

We make a very clear line. We don't fight. If you're a scientist, you have a technology, using our technology or yours. In China we give you room, to join with us, to work with us, but for peaceful application. It's a very clear line we drew and Chinese government leadership understood. And this is the way we're going to go. We are not bringing you more scientists who can make a better weapons. We're bringing more scientists to create more peace.

And it's a change of game. Because, when you speak, when you I eat and sit with Chinese high ranking generals and the government officials. None of them ever talk about superiority of China. Says, "how we can bring peace, that we can live without this?" The biggest problem with Taiwan, with China is, American are using it to create a new war, to say they are superior. Chinese want to bring the balance, that the Taiwanese will become part of China in a peaceful way, without interference of America.

Americans, sorry to say, a lot of you come from America, you carry a little bit, or mainly, British blood. You are in England. English mentality, foreign policy, is "divide and rule." And this has become ingrained in constitution of United States. The policy in China is Taoism. Bring in to all be one. We were talking about it yesterday. We have a food, and we put it in the middle, and we all shared. (1:16). And I explained what happened with a German minister who came to China before Corona, and they set a table, a round table with swings. And they gave a menu to the minister and two of his entourage. With the Chinese ministers, they called, six of them sitting around the table. They all ordered what they thought the Chinese would easily put in the middle, and everybody eats from it. When they put the food on the table, the German minister put it in front of him and started eating his plate. They are not used to sharing.

There is a big difference between the Japanese chopstick and the Chinese chopstick. Japanese have a little box. They eat it themselves. They don't share. Chinese have a longer stick. They put it in the middle. Everybody shares it. The Koreans have a flat stick. Chinese chopstick is round. If you look, the culture of how you feed yourself is how you think. So it's part of the structure, part of understanding.

Normally, most of you, when you go to a country, you look at how the walls are. I have a beautiful advantage, I don't speak Chinese. I know, after six or seven years in China, I only know about five or six words. And most of it they don't like. One of them is ?? "bing shwei", which means cold water. And the Chinese like warm water, so I'm marked out.

And it's because I don't speak the language. When I (sit) in the meeting, it has to be translated. I watch the Soul of the people. (1:18). I watch the behavior. And I know what the thing is long before they decide. How they come in, how they shake hands, how they sit, where they sit you. China Oil Corporation has a beautiful policy. The door is always, comes with a table going along to the door. Their officials always sit on the door side that if it's too dangerous, they can run out. They put the other's side, far away from the door. And this explains a lot. When you go into a Russian cabinet room with a minister, the door is right in the rectangular, furthest possible from the table of the minister. And then it's a T-shape. He always sits on the top. And then the rest have to answer. And then you see them, when they walk from that door to sit in their chair, how they

change in character. I had the pleasure of this with the minister of oil of one of the Russian satellite countries. He said, "Mehran, come and sit next to me and understand the power of my seat."

You don't have this. In understanding a culture, understanding your Soul, you understand the interactions. And physical interaction is a reflection of the Soul, it explains a lot to you.

Any other question?

Rick, it's your side. I have no questions here. The chicken is done. (1:20).

Q: ... Mr. Keshe, my question is, the Souls that come from another planet, is it to learn, or to resolve a karmic lesson that they come to Earth and are some aware of who they are?

K- Can you repeat that again, please?

Q: My question is, the Souls that come from another planet, is it to learn, or is it to resolve a karmic lesson that they come to Earth or...

K- Most of them are homeless, they are refugees. In a way they lost their, what you call, (planet) or they came and it was too good and they stayed. I've spoken about this before. We let them explain to us when we put our prejudices apart, how to be, and how it is.

The city of Manchester where we are, I was explaining to the Knowledge Seekers here, is actually a slave city, is known inside England. Manchester has been the slave center of the whole British Empire. Where we, the slaves were used, taken from George Island, originally in Gambia, into America, and then, cottons they produced, brought back to Liverpool, up the canals, they built the canals with the slaves, to come to Manchester, (1:22). because there were rivers around here, and the water was flowing all the time. They built the mills, and they put the children of 5 years, 7 years, 10 years old into the mills, just enough food to eat a day to run the mill. And the slavery carried on. And they used the same slaves to push the Finnish cotton back into British empire. So the whole slavery was set around running this city, and it was part of it. Manchester is one of the most slave centers of the world. We don't know so much of, because we always see as part of the picture. Most of the slaves went to America. Grow the cotton was to run the factories in Manchester. Without them, these factories were closed. And they are not very far from us. And when you walk out of this place, maybe less than 200 yards, you see the mills.

In a fortunate or unfortunate way, we have the usual "last supper" in one of these old mills in the basement of it. And sometimes you hear the noise of it. You feel the Souls in it. It's very, very indicative, or in so many ways, very amazing. We have two people here from Nuremberg, Germans from Nuremberg. Every time I go to Nuremberg, a city I don't like to go to, I feel the marching of German soldiers. It gives you that feeling. Parts of Belgium gives you that feeling. You feel the Soul of the people. You feel the pain. You feel the same in Linz. In Linz, part of Linz, you actually feel the Soul, the emotion of the people in the city. (1:24). And this is part of our life. We are part of it. It affects us and brings us back. And then are we still aliens to ourselves, which we are. Most of us are. If you go through places like Nuremberg just as a tourist to see and you don't feel it. If you go to Linz and you don't feel it, it means you're still in the matter of state of matter state. You came to see. You have to feel. And then you move with the nation.

Any other question?

The problem with me is I've traveled to too many places around the world.

Q: ... Does the mixed race Soul work on the same principle as genetics, where it's 50/50, equally from the mother and the father?

K- Not really. It depends. It takes the best. That's the beauty with the Souls. It takes the best. We don't find defunct Souls. We don't find the Souls, one leg missing, or one arm missing. They take the best. And in a way, everything stays in, because we don't know which part might need it and what's connected to what.

No more questions?

Q: Is there anybody from South Africa in Manchester, (1:26). that could come home to teach more of us here?

K- No, not as far as I know.

Q: Good morning Mr. Keshe, I have a question. What is aether energy in plasma technology? And is the aetheric body energy, is the field of the STP in the physical body, or the fields of the human Spirit?

K- Can you, can somebody tell us what this thing is?

R: Aether you mean?

K- Yep. Go to your friend, Wikipedia.

R: ... Okay we'll get the so called official version. ...

K- You are the official reader of the official thing

R: It's not giving me. It just says organic compounds .. ether, ethernet ... (1:28).

Okay, here we go. So, in physics for example. Well, there's a number of different definitions for aether, but according to ancient and medieval science, aether is also known as the 5th element or quintessence. It's the material that fills the region of the universe, beyond the terrestrial sphere. The concept of aether was used in several theories, to explain several natural phenomena, such as the propagation of light and gravity.

K- The question to ask is, does such a thing exist? Or we made it up and the rest accepted? If you look at, or go for some scientific papers speaking about aether. They say, "it's what we are made of, or what is part of our structure of life." But nobody can tell us what it is. It's a made up thing, does not exist. In a way, I call the aether, when it came to a discussion some time ago, is the field of the universe. Do you want to call it the human, or part of it, you want to add to be, what you want to explain to, but you cannot find answer for, or try to create a, what we call, fabrication.

But aether, as we call it, environment or the material, whatever, (1:30). it's easier when you put it as part of the magnetic field of the universe. So, it's all the same. It does not exist, or we call it, a cat or a dog. It's a collection of the fields. And, nobody has ever actually confirmed its existence. But we call it something which is there, we can't say what it is, and then we call it this, because then nobody will ask the question.

Any other question?

And secondly, whatever you call it, is part of us, it's part of the magnetic field of the universe. ...

R: Sorry, you broke up there, is part of the magnetic field of...

K- Of the Universe.

R: Of the U. ... One sentence is kind of interesting here, is a theory that was originally put out by this Bernoulli. In his theory, all space is permeated by aether, containing excessively small whirlpools. So, in other words, it's all magnetic whirlpools. And that's essentially what you were talking about in your book, and so on, that the fields of the universe, you know, can be exceptionally small whirlpools, and then larger magnetic fields, and all interacting and so on.

Q: << Speaking in Italian >> (1:32).

Q: Okay (1:34). Mr. Keshe, Giancarlo is asking you, you just spoke about that you were listening, you were feeling in Linz and in Nuremberg, you were feeling this Soul. And his question is, the Soul you were feeling and listening, they're are STP or they're are Souls ... He just wanted to know if you can go deeper on what you felt, which type of Soul did you felt? STP or STM, or both?

K- Thank you very much. It's usually the STM, the emotion of the Soul. It's not the physicality that you can hear or see things. You feel the emotion of the environment. You feel the same thing when I went to Vatican, here in Italy. That you feel the emotion, that how it feels and how it is. It's usually the feeling of those who lost life, and still connected in a dimension to the place. You usually feel the injustice, that the Soul is not at peace. And there is a specific place in Belgium, (1:36). wherever I go, I hear marching soldiers. The way, nowhere else happens, except in this place in Belgium. Wherever I go I hear marching soldiers. You can hear them. And for a long time I was trying to understand why, and I haven't found out why I hear marching. You can actually hear the marching of the soldiers on the road. One day I'll find out and then I'll let you know.

Any other question?

Q: ... Regarding these Souls, how can we bring peace to them?

K- Oh, you always make it available. You don't make a peace. You don't bring them peace. It is for them to take if they are. This is what I always said many times before. We are not there to force to take them. We make it available for them to take if they want.

Any other question?

Q: ... After watching the 500th Knowledge Seekers Workshop, especially when it was discussed how conventional medicine, especially in open surgery, is lagging behind in repairing or transplanting organs. (1:38). Whereas, according to Mr. Keshe, it is already perfectly possible to create physiological conditions and environments, so that the body itself can repair all of our organs naturally, and much more safely. I would like to take the opportunity to ask Mr. Keshe the following question. ... I use the 8 essential amino acids daily, so I'd like to know if instead of mineral water I could dissolve them in Gans water from the Cup of Life 1 or 2, which would be more beneficial to our health?

K- If you use any of the, what you call, amino acids, you just need to put them in a Gans water once, and just use the Gans water. You don't need to every time to put them in the Gans water. And then you have to understand, you cannot take a cup full of it or whatever, a few drops of it will do the same. You have to understand the propagation of the field strength. And if you use a Gans water, use a few drops of the Gans itself. Usually the amino acids connect to the CO₂, Zn, and CuO. Try not to use the CuO unless on a specific ways. But if you use this, you make the, what you call, the mixture once, and you take a few drops, one or two drops. Usually it'll be as effective as everything else. And usually take it on the tongue. (1:40). And you'll find out it does work. You'll find it's too much to take the amino acids, which you mixed with the Gans's in a cup full.

Any other question?

Q: ... Are they first generation travelers of the universe? And do they realize who they are?

K- It's a continuous "refugee center," as I call it. They always come and they always go. You know we had the Iranian refugees in the eighties and then we had the others and they're still coming in different names. It's the same with the passengers of the universe. Some of them are not refugees, some of them are travelers. And they come and go.

It will be very interesting in a coming time, how they explain to us, they arrived here, how some of them come and go, and they take us back. In a way, it's a very good thing, because it's just like, you know, you have the Jamaicans, a lot of them in London. They come and then they tell you how beautiful the place is, and say, oh, next holiday I'm going to Jamaica. It'll be the same with all of us. This is where we go. They explain to us. They show us, actually, the beauty of their place. Those of who are "tourists," I call them. And then we go back to see. (1:42). It's the nature of the man and the nature of the Soul, to travel, to be in dimension and motion. But man at the moment travels the village of the Earth to see new things. Now we learn the new things.

Any other question? We're nearly running into two hours.

Q: ... So is service to the Creation one way to create the Inertia within, to elevate the Soul? And could you become like a second Sun, to be a feeder to others?"

K- Can you repeat?

Q: So is service to the Creation one way to create the Inertia within, to elevate the Soul. And could you become like a second Sun, to be a feeder to others?"

K- In a way, yes. It's easily done, if you know the way. Easily done. It's a difference between a ?? mercenary (missionary) and charity worker, I always said. If you, when you are a missionary, you steal from the others, to go somewhere to change something else, the way you want. But, when you are there as a "charity worker," it doesn't matter what it is, you do it because, comes out of the sense of obligation to change somebody's life. And this is how the Soul works. And that's why actually we call ourselves a foundation. (1:44).

There is something else, I was explaining this to one of Knowledge Seekers very recent. And something was brought up here. Years ago I wrote to an international organization which was claiming peace. I said, if you want to claim peace, has to have the color of the planet Earth, which is blue, because they have a stupid

structure in their system, and the... it has to be in writing of gold, where blue represents the man from the Earth, and then, the gold is the greed of the man. When you can bring the two together, to work in perfection, then you'll find out, you'll find a man of peace. And it's carried by the flag of the organization. And it's how it should be.

We don't carry a flag on our Souls. But we carry the color of our greed. And where we come from, in the color of blue of the STM, as you call it. So, if you work, you understand, as somebody who wants to elevate, the elevation of what you give, as a man from this planet, as a color, they know who has given, and how it's been given, and if I want to take it.

This is what we say, you have to perfect the man, to live by the Ethos of Mitra, because then, What you give has no taint on it, there is no death, what you call, killing, and there's nothing else to it. One day man will understand these teachings.

Any other question? (1:46).

Q: ... How can we feed with our thumbs? Is there something about feeding with thumbs?

K- I think the babies usually feed themselves with a thumb, don't they?

R: That's what I was going to say, that at least gets your salivation going, and that would be one way to create water perhaps. Stick your thumb in your mouth.

K- I don't know, yeah. Maybe.

Do you have any other question? Or shall we call it the day.

Q: ... In spiritual terms the aetheric body is used. Aetheric body and energy is the field of STP in the physical body. Oh he is asking. Is the aetheric body energy, is it the field of the STP in the physical body, or the fields of the human Spirit?

K- We haven't, we don't understand what aetheric is, to say what it is. Does it exist, and if it doesn't, it doesn't come into, how can we place it? (1:48).

R: Yeah, it's difficult without some defining and it's a... it's kind of a... it's a word that different people use differently, so we'd have to get into that in more detail.

K- Yeah. You have no more questions?

Q: ... Is the August session finished? They say they paid for the ticket for the August session. Can they join the 8th of September?

K- August session will be next Wednesday and the following Wednesday. It will be set, we wanted to do the conference first before we do it. Next Wednesday and the following Wednesday, people who registered will be given time to be on live with it, for the fingerprint of the Soul. And then on a Friday 8th and Friday 15th, we go through what I call, the two sessions for September. We didn't want to complete the session till we do the conference first, and now that we do the fingerprint of the Soul afterwards. It was something we had to

learn with our systems, that it gives us a more clear understanding of the fingerprint. Because then in the picture we can analyze the fingerprints exactly what it needs.

R: Okay, how about one last question from Jalal here in the...

K- Two questions you mean?

R: Okay, sorry. Jalal, would you like to go ahead?

Q: Thank you Rick. Hi Mr. Keshe. Good day.

K- Hi Jalal, good day to you. Can we have the second question first? (1:50).

Q: Okay. I have no question Mr. Keshe. As always I would like to ask the Knowledge Seekers, which is near you. We didn't hear what they are, what they experienced, what they done, what happened? So...

K- Can I answer you Jalal? You have enough spies in this room that they'll report to you, don't worry.

You, you have put enough roots everywhere to find out what it is.

Q: Okay, then I will not...

K- Thank you very much.

If there are no questions, we bring the sessions, it's nearly two hours, to an end.

R: Yes, that sounds good.

K- Thank you very much. But please listen to the first 5 or 10 minutes of the teaching of today. If you understand it, I gave you the key to become traveler of the space. But again, it needs the wisdom to understand it.

Thank you very much, and see you next time.

R: Ok, very good. Thank you Mr. Keshe.

Q: KS who is near Mr. Keshe, make it worth it. take care of ???. Thank you.

R: I think he's got a good batch there, so I'm sure...

K- The phone was on silence, they answered. Do you want to answer him again? Nope. They said, we'll try hard Jalal. That's from Ekmar.

Thank you very much. See you next time. (1:52).

Q: ... We are sending to you all who are participating in these experiences in Manchester, the most wonderful fields from our wishes and love. Take care and enjoy. Thank you all.

R: I think we all have those feelings as well.

K- See you next week.

501 KSW August 31, 2023

END

502nd Knowledge Seekers Workshop September 7, 2023

(Transcription, Proofing done)

(Auto transcription by Elias)

Will show T in London Ambassadorial Meeting - fulfill promise; A lot about transmutation & STM & STP - energy packs; One energy pack encaging another; All knowledge gathered shared universally; Part of intellect of U; Understand emotion to transmute; Switch between STP & STM; Extend strength of STM & STP; Individually realize Soul; Dream becomes reality; Buddhism - no reincarnation - Understanding Knowledge of Creation - Transmutation never die; Life is interaction of 2 fields - creates plasma; Skin M fields separate organs; Salinity in stomach create Gans energy; Seed made in stomach fed by U; London make seeds - fed forever; Transmutation ready now; Manchester white slavery; Meaning of Last Supper - new cycle began; Why vegan danger to health - kill thousands - meat eater kill 1; Biden not in power - Kamala takeover leadership - like China - Taiwan back to motherland - peace

ENGLISH TRANSCRIPTION

(:17).

K- Hello, ... Good morning, good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. As usual we welcome you back to a 500 and second teaching on this one. We have couple of messages for you. First of all, today we are in Amsterdam. And we officially invite, through the channels of you know, through Holland, (:18). we'll give a private meeting for the Knowledge Seekers (KS) of the, what we call, the home of the Keshe Foundation (KF) in Holland. Get in touch with your people, we wanted to keep it very quiet, but now we are here for another day or two, And through the China, and right channels, you will be able to meet us. At least we can meet together. Not many of us, I think we'll be able to get together. Sometimes, maybe Friday, or later Saturday, we'll meet in one of the beautiful places in Amsterdam. And we, in a way, come back home. And we wanted to keep it very quiet, just for the Dutch. But, if the Dutch Knowledge Seekers are, what I call, prepared to make the journey to Amsterdam, we're here, we announce it through the channels of the Keshe Foundation in Holland, to be able to attend this meeting. It'll be a pleasure to meet you again, after 12, 14 years of gap. We used to give lectures in Holland on regular basis, weekly and monthly, for a long time. That's where the main support of the Keshe Foundation built up, between Holland and Belgium, and became a "worldwide disease." We'll let you know where the venue will be, and if by sometime next 24 hours we know the numbers, we know the size of the room we need to take up. It'll be nice to meet you all back again, and we'll see where we go.

In ?? regards to the meeting of the 11th of November. We have upgraded the 11th of November to a magnificent presentation. (:20). We'll present the technology of Space, beyond imagination of Man. Systems

will be brought in, technologies will be shown, that the present space technologies cannot even dream is existing and is operation. We will limit the number of the people of the Knowledge Seekers that can come in on the 10th and the 11th and the 12th and we will be stepping up the presentation, not only to the astronauts, but the space agencies, to scientific organizations, and to the Press. We will show technologies which man could not imagine is at the present in the hand of the man. And then we build on it, and we go forward.

The, what I call the... what we put has run about 300 people, we'll increase it to about 500 and those Knowledge Seekers who are booked by next few days, we keep that position. And the rest, the... what we call, the seats will be allocated to the... what we call major corporations will come to see and as ambassadors are invited. Expect to see things which have not even been discussed in the teaching. We have kept a lot of knowledge in the background, because we thought man is not ready. Now having the Chinese government with us as collaborators in development of the technology (T), we release this knowledge to be seen in the West. Knowledge which even our own Knowledge Seekers do not understand exists within us. And then we take this progress forward to the next step. (:22).

Those of you who are attending the week before the 11th of November, complete registration as soon as you can, because we are targeting the weekend plus the people who were with us last week in Manchester, to bring to the next step of what we call, the development of the technology. The London teaching for the week, it'll be an amazing teaching. I think some of those who attended the Manchester meeting understands what it means. The change it brings, and it brings to us, is not that we're going to change the world, we're going to increase the understanding of ourselves for our own work.

In this process, we go one step further. We'll bring you to understand the limitation of transmutation and transportation (T&T). The limitation of what is possible to be done. In the coming weeks and months, massive new technologies will be released. Now that we have stepped to the Space development and Space technology and we have finished, more or less, teaching you the alphabet of the energy transformation. Now we come to the Space ?? transmutation, coming to Cosmic Rays (CR), coming to understand how to transport, transmute and live in both dimensions (D). Understanding of Totality of the knowledge, in... on both side of the fence, as I call it. But, depends what you want, what you have decided, which side of the fence you want to sit to watch? One side of the fence is the Soul of the Man (STM), energy pack. One side of Man is the Soul of Physicality (STP), another energy pack. How do we interact this? How do we become to decide, which one runs and which one shows, and which one does what it does? (:24).

In a long term, Keshe Foundation teachings will come to flourish, in a different way. At the same time, through the development of the technology, Keshe Foundation, in coming days, will open a new channel, a new way, a new presentation of technology, of what we call, to interact with the wellness of the Man. Conditions which up to now were not and could not be understood, can be brought on the, what we call, 'new dimension of the work'. Diseases that the doctors could not imagine, can be changed in minutes and days, now will be offered to the scientific world. Conditions which will, we could not imagine, can be handled so easily, by interaction of the fields, new technologies, new systems will be delivered, and it's already on the use, that will bring the possibility of eradication of Parkinsons. Eradication of illnesses like ILS, and other conditions. Very much eradication of what we call the 'neurosystem of the man', which cannot handle the physicality (P) of the man. in connecting the STM with the STP, and with it, connecting to what we call, the physical dimension of the Man.

Keshe Foundation, as we showed you, and as we developed the technologies, in respect to coma, as we showed, it took us weeks and months of operation, to bring back a coma in condition, as we saw with Naomi

and other cases. Now the technology has developed, in such a rapid way, that it can be done within minutes. (:26). We'll open this side of the knowledge, hopefully with the permission of the Chinese government in the Macau presentation of the help. We will show the effectiveness of the new breakthrough in science, where people with Parkinson, within days, hours and minutes, walk away from the painful life, which has been brought through the condition.

We will open a new technology that will be delivered in conjunction with what we already developed, eradication of the cancer through the scientific world, and through again working through the operation of ours in China. In a way we transfer the knowledge to the doctors and we show them the system and it's for them to use. We have tested this in many ways, but now in the past few weeks we see an end to a lot of these things. Some of the results and tests from our side shows the 100% correct result has been achieved, and can be achieved, and can be developed over weeks and months, eradicating the what we call the paralysis of the body of the man in the physical dimension.

This technology has been done very much before. But now is coming into flourishing. What we ask for, and what we'll ask, is to start of the new trials. What we call, conversion of the energies of the man in a dimension of the STP to the, what we call, P of the man. These we have seen the results of. We know exactly what we've got to do. In a way, even our UBESU's (Universal Body Enhancement Space Unit), and the systems we use in Linz and now into our service centers, has become totally obsolete. (:28).

I kept this technology back till the day, someday, like the conference in London comes, that the man can test. And now we are ready to show. We are ready to show most of the disease of the P of the man, can be eradicated in the space, will not exist, in a way it's a gift. In a way is understanding how to transmute between and how to become physical dimension in another position and time. And then we'll see the next step.

I always dreamt about the day where I'll be able to release this technology in its true sense, and London meeting is the venue, we'll open new doors. You (did) not understand when he said, "the dead will rise and the man paralyzed in a wheelchair will walk in an instant." We'll bring this technology forward in a rapid way to bring that change. And this will start, has already started, in a very, what we call, quiet way, our doctors and our systems have been tested to show the correctness of it, that they understand. People who are using the system have felt the change in their body when they use it through our system, internally.

But now we take this even a step further, much, much further. Because there's two choices. I can teach another 10 years to bring you to it, or now that you understand most of the knowledge, I can show it, and I can deliver it, and then you have to understand it. What we say in English, "the proof of the pudding is in eating it." We bring the "pudding," see if you can eat it and understand it. Intellect, knowledge, science, will become instantaneous transfer. Whatever is the knowledge of the man, (:30). can be transferred instantaneously. It does not matter what language, what emotion.

Going through the teaching of last week, sitting with the Knowledge Seekers, some of them old Knowledge Seekers, some of them loyal to the Keshe Foundation for years, I realized they've been waiting, and waiting, that, that promise will complete. Now is time to complete. Delivery of the technologies, beyond imagination of the man. Deliveries of technologies which bring eradication of the illnesses from the physicality of the man, will be shown. I tested this in China, in the past few weeks, and it was amazing to see it. And I thought, Knowledge Seekers do not even understand what stands in front of them. They're too busy with physicality,

they're too busy with understanding of nothing. And they're still waiting, as they did not understand the full comprehension, the full understanding of the technology.

Maybe, it's time to show, but not become magician, as you have the fundamental understanding of the technology, as many of you have understood. As I said to a Knowledge Seeker in the past few days, the biggest show on Earth about the space technology will be shown on the 11th of November in London. A show will not be "a show," but it shows what technology is, and what the space technologies of today have to abandon.

We'll bring an end to nuclear warfare, and bring an end to greed of the man for every elements of the Creation. We are not here to impress, we are here to bring the change. And this change will be shown in its first step on the 11th of November in London. (:32). The venue is limited, and as I said to the head of the Keshe Foundation in the past few days, close the registration within next few days. We'll increase the price to the position that no Knowledge Seekers can afford. Because we want to bring in the world to see as there is enough Knowledge Seekers who come in through the "200 sessions" and through the other channels of the Keshe Foundation. Now it's time for the world to see, and for Press to be impressed in what they denied themselves on humanity for past years.

I'll show technologies in London on the 11th of November, that will baffle the world of science. We'll change the course and we'll bring what I plan to do for years. Knowledge and technologies, which make most of the technology of today obsolete. This transformation and this transmutation in knowledge, is needed to be brought in now, that we have enough time to stop every other possibility of another cycle of war, as the man is not busy with something else.

In London presentation, you will see some of the most amazing things, as Knowledge Seekers and say, "wow, it was in front of us and we didn't see it. He always talked about it, but now he shows it." Now you understand the change. Now you understand the limitation. Those of you who were in Manchester, were touched by just the, what I call, the first "soft feathers" of the knowledge in understanding yourself. In transmutation and transportation of dimension of physicality and understanding it, how you can do it.

We'll bring and show technologies in London, that will baffle the world of the science. That how much we have misunderstood, (:34). and how much we've done wrong. In our dimension of understanding the transmutation, we have reached the limitation of matter state life. Now we open a new horizon in energy life. Dimension of the Soul, dimension of understanding, interaction of the dimension of the fields, and not just a few amps and volts and watts, and just a few "bits and bobs." You had enough time to play with MaGravs, you had enough time to play with the Star Formation (SF), I gave you enough knowledge to play with every possibility of every knowledge. And you, as usual, as naughty children, just played and played. Now it's time to show.

It's time to bring the dimension of understanding, and the challenges which face man in the dimension of the physical transportation and transmutation. Teaching of today is very simple. Teaching of today is, again realizing, you Knowledge Seekers, sitting there for a week in front of me, how much you have played, and how much more you need to play, to be happy that you can do something. To be happy that you can understand, how situations and conditions can be created. In understanding of the technology, in understanding of the, what we call, the Totality of the work of the energies of the body of the man, we come to realize something very important. (:36). We come to realize, how much we can work.

Rick, I have a problem, I don't know how these people are moving around on my screen.

<< Problems with the white board >>

(:40).

K- (:40:41). Oh, there it is. I found it. ??, the knowledge increases, and we become more ignorant into it. ... (:41:10).

... Going back to the teaching, in understanding something which we never understood, but we emphasize again and again on it for you to understand. In the dimension of the physicality of the man. ... (Oh, very nice shape. Now, where do I find colors?)

We know in the dimension of physicality of the man. (:42). Man has no physical dimension, if there is not an environmental field. Which means we have no dimension, if there was no magnetical gravitational (MG) field of the Earth around us. If we move to another dimension, if we move to another position, and the environment changes, we'll find out that us as man will not exist. (This is a very nice trick.) But what will be interesting for most of us is, if we change the field, the environmental field, do we become invisible?

In the field dimension of the man, on Earth, we have a physicality. When we change the fields, we disappear. What kind of new creatures would be us manifesting ourselves as? Is the possibility of a "line of life" changes? Or do we still have that possibility, that what I call, having the Soul inside it? Having the Soul that can bring the dimension of P through the STP, in a new condition of life. (:44). (Shows odd shape with Soul in center).

In a way, if we change, if we bring a new condition, a new environment, how would we look? Would we trust to be able to go back to our real colors and conditions and life as a man? (Draws shape of man). Would we think as a man in the dimension, or would we think as a new creature, new understanding according to the environment we manifest ourselves (in)? The truth about all this is, that, have we understood, that we have a nuclear bomb, with massive radiation capabilities. That is a Cosmic Rays sits within the center of the body of the man, we call it the STM. It is more energetic, it's more powerful in strength, than the whole of the physicality put together.

The body of the man is made of billions and billions of cells, and each cell itself has a energy to maintain its position and the condition of life. So, the body of the man physically is a energy packs times billions, trillions. (:46). And that energy in the dynamic motion transfer of the fields to what we call, its blood, creates a cage to hold us in. One energy pack encaging another. But there is an interconnection between these two, that allows one to be embedded inside the other.

In a way, if you look at it in a bigger scale, you have your physical dimension outside from the interaction of these two. It's very much like gravity and magnetical fields. In their interaction, we create the Mass, physicality. There is no difference if you call the STP, M field, and the STM, the G field. with the capability that one can change position with the other. Through an interconnection, through an interline power level, what we call, "common denominator," they can switch from one to another. Then this switch will decide in interaction with the environment, how you manifest yourself at a point and a place. (:48).

(If) you switch the fields to the dimension of physicality, what do we have? We are going to have an amazing condition where what we call, the dimension of the interaction, dimension of the position, and the possession of the fields can create the different dimension of physicality of the man in the same environment. What it means? You can change slightly, the emotion, the dimension, and the direction. And then in that process, you can turn from being a white man to a black man. Because the environment of the Earth has not changed. It's the field emotion of the place you live with, allows you to do the transmutation. You look like Chinese, you speak Chinese, you understand the emotion of the Chinese language. Because now, you kept within a gravitational magnetic field of the planet Earth. It's the Inertia and the position in respect to the center and the condition of the fields of the Inertia created, which gives you that environment.

Don't forget, when you enter a new environment. Let's say, from England you go to China, the "Soul of the Chinese" dictates part of that Inertia. The Soul of emotion of the nation, culture, language, dictates that part of Inertia. (:50). That's why you manifest yourself, if you decide as a Chinese and understand the whole lot. Then the language and the dictionaries are not needed. Because now you don't need to press this and it gives you the meaning, but not the emotion of. Now when you speak you understand your Soul has the emotion of the feeling of the word too.

Now you decide to change the gravitational field of the Earth to the Moon. Now you manifest yourself in that position, in the Moon, as a "man of the Moon." Is there a life on the Moon? Is the collective life and interaction of your Soul with it, teaches you how to communicate, how to exist? Or, you create a new dimension, that the interaction of the emotion of the STM, and the STP of the man, translates that to the existence on that planet. You learn the language, you learn the feature, not out of transmutation, but by the collection of the interaction of the fields of the environment of the Soul of the people, entities, who live in that environment. They transfer the energy, they transfer the knowledge to you, as much as you transfer to them.

It's not only the transmutation by the physical dimension, is interaction of the STM in transmutation, that interacts with the Soul of the citizens of that environment, that allows you to be part of, to be understood, (:52). and to live like them. Now you understand, how some of the citizens of the universe (U) live amongst us, talk like us, show emotion like us, they fall in love like man, but they have no intention to show their existence, where they come from. Now we graduate into that knowledge.

Now with understanding this, with the training we have started in Manchester, and follow up in London, in Beijing, and courses and sessions will be put by the Keshe Foundation, and the world governments will bring that new dimension in. It will not be exclusivity of the rich, it will not be exclusivity of scientists, it will not be exclusivity of the man, even a dog can be educated into this knowledge. As we teach the Soul, not the physicality. Does not matter if you walk on two or four or ten (legs).

Now you understand how the environmental cognition in collective understanding of interaction of the fields makes man knowledgeable of the dimensions and the positions in the universe, as he manifests himself in that position on time and space. But once you interacted, once you (transmute), once you gather the knowledge, it becomes part of the Universal Knowledge. You move to another position in the universe, you gain the knowledge from them and the knowledge you gain from the previous positions will become the knowledge of the new citizens of the environment, to the area you landed in.

In understanding, in moving forward, (:54). in a way adding to the knowledge, we add to the Knowledge of the Universe. Do not work, do not forget that you are part of the intellect of the universe. And you become

that position, and time and space. In a way, when your soul lands in an environment, and then you decide to manifest your STP, which now is embeds inside the Soul. Then, in the interaction with the Soul of the citizens, you'll be knowledgeable in the interaction to the whole knowledge of the environment you have manifested yourself. Now you understand how the fields of the STP in dimension of interaction, understanding, can manifest itself and move to the position of the new strength, which you have manifested yourself in.

In a way, man will become very fast aware of how to move in and out of the position without really knowing anything about it. In a way, even if you takeoff and land by mistake somewhere you did not think, imagined existed, (:56). you will find your Soul. And then you decide if the STP, which you embedded with you, will manifest itself in that dimension or not. This is why we keep on asking you. This is why we keep on teaching you how to understand the emotion, and how to complete the understanding of the work of the STM. Then you understand the STM is nothing but an energy pack. The STP of the man is nothing but (an) energy pack. And then you understand all we have talked about from the beginning of the teaching, 500 and something before and before that, is about transmutation and transportation of the packs of energies. You call it the Soul, you call it the physicality, you call it both in the dimension of transportation and transmutation. That's all it is.

Now we have to gain the knowledge how to switch between the two, irrespective of environment. Then man, fear of transmutation, will walk away from him. As it's become a natural and normal process in understanding of the totality of the existence in the universe. And if you understand this, we go back as I always say in Koran, << speaks in Farsi or Arabic >>. "We have completed the knowledge of the Creation." (:58). We have completed in understanding the process of the Creation, how we create ourselves, how we manifest ourselves according to the time, place, position, strength of the fields, and in understanding of the Totality.

(Rick, they're asking to change your background, as I close the whiteboard).

In understanding the Totality, in understanding the reality of the existence, now we come to the next step. We come to the next understanding. How do we transfer one energy to another, to another energy? What is the common denominator, link between the STM and the STP? And if you understand that, then it gives you a link to the Creator. Because it comes through the same strength. It comes through the same path. And how do we communicate? How do we connect to the rest of the universe?

In teaching of the past, I have touched on this, I explained this in a very soft way. But in the coming time, in the coming months, in the coming years, we'll show you more and more, in how to connect, in how to add on, in how to understand the process of the creation, and transmutation and transportation. Depends, if you want to travel in the dimension of physicality, you go for the transportation, the way we do, 18 hours on a flight, from one position to another. (1:00). If you want to go through the transportation and transmutation of the fields of the planetary system, the same distance, instead of 18 hours, 18 seconds. And then, if you learn how to travel with the strength field of the Cosmic Rays of the higher order, in the same position, in milliseconds. That's all the difference is.

How do you want to ship the package, called the physicality of the man? And what method of the transportation you want to use? If you understood this, it's the same as what you do today. We call it different strength magnetic fields. You call it a donkey, a car, a jumbo jet, a rocket. There, you use more fuel, you feed it more to get something out of it. Here, you go by the order of magnitude strength of the fields interaction.

Otherwise, it's the same Soul. Otherwise, it's the same STP, using different method of transportation. Then you understand, when you travel with a donkey, you need the saddle to sit on to carry you. Or if you're good enough, you sit on the donkey. When you go to travel by the jet, they sit you in the seat, they strap you up and everything else. And then they put more fuel, you go faster. And then if you're in a rocket technology, you shake and shiver, maybe it doesn't explode on the way up, and then you go to the condition of weightlessness. Now there is no weightlessness, but change the donkey to the rocket, using different magnetic field strength, you find new dimension of the emotion of the Soul, (1:02). you find the speeds of the interaction needs faster understanding of the position, time and place.

Then this brings man a new intellect, a new knowledge, becoming the, what we call, Passengers of the U, the true passengers of the universe. Not with the "monkey suit" of the Americans, and not with the imaginary talks in the fancy books, and fantasy of the dream of the man. Because you make that dream the reality, because you understand the interaction of the fields of the STM and the STP. How these two interact, how you position them, how you distance them from each other, how you use the different layer of the strength of these, in respect to each other, you decide your method of existence, you decide your position and the foundation of life, anywhere in the universe.

Man decided to engage the Soul and give it a cage which is flexible. We call it the body of the man, we chose the Earth to manifest itself with two legs and two arms. Now if you decide to use a higher order dimension of the physicality, then you still be on this planet, maybe invisible, but understanding more of the Knowledge of the Creation, because you interact in different dimension field strength. The atmosphere of the Earth did not change, if you were on a donkey or a jumbo jet. A jumbo jet or a rocket has no more intelligence than the donkey, maybe the donkey is more intelligent than a piece of metal. At least he can make a decision where to turn, and how to turn and where to sit. (1:04). Where the plane has no, where the rocket has no decision. Somebody pushes a button and that's it.

You have to be that donkey, which still carries the emotion, the understanding of interaction with the environment. It's a real water, I don't cross. It's grass, I eat. I'm going to enjoy this one and not the other. I'm going to swim in this water and not the other. So, in a way, we are back to the position of the Creation, with no intelligence, but understanding of the emotion. And then, that interaction of the emotion of the man, with his environment, brings man that intellect. Does not matter where you are, because the knowledge of drinking and eating and walking on Earth has no application and no need on Planet Zeus, because there is no air, there is no water, and the life is in dimension of fields of the universe. What's the use to carry a bucket of water and a sack of hay? There is no donkey, and there is no condition for a donkey to live on this new position, time and space.

And this is what the lack of knowledge has made the "donkey of the man" on this planet. And the more we become ignorant of it, the more we deny the rest of it, the higher degrees are given to professors and scientists, because they become more narrow minded, more focused on ignorance of the Totality of the Creation. Sometime, when I sit in front of the scientific world, I see them in understanding of the Creation, (1:06). less than that donkey. Because, in a way, they are settled with the ignorance and pride of the Man, and have forgotten about the true life of existence, that the Man is created out of the energy of the universe. It'll come from it and it'll go back to it. It's just how clever you become, to use that position and time, to, in a way, advance your knowledge, in a way, enjoy more, as time comes, the beauty of the creation of the Creator.

Because, one way or another, in one position or another, in a dimension of physicality, in a dimension of field of the STM, in a dimension of interaction of the fields of the universe, there is always an end. Only, the only entity who will come from the beginning to the end, is the Creator and no other creature in the universe. But you have to understand, we are part of that creation. So we are responsible for it. We are there to bring that change, elevation of the understanding of the creation of even our own Creator in the dimension of this creation.

It cannot exist, if there wasn't an environment to confirm His existence. You are the God of your own physicality, and your child, is a God of his own physicality. Is there only one God? Is there only one existence? Without the existence of the child, there's no confirmation of the father. So, in understanding this, (1:08). we understand, we decide the emotion of how the father feels, and the emotion of how his child (feels). And in the time and place, and the collective society of the existence, of the fields of the universe and Unicose.

This dilemma will bring an end to the religions once he understood. And soon will make it to be understood by those who make themselves to be religious, and the religious leaders, as they understand the time of cheating the man through his ignorance of the knowledge of his creation is over.

I hope today I opened your eyes a little bit more to another dimension, a little bit more to understand more of the teaching of the past, a little more for you to understand you're in possession of the capabilities that you denied yourself and no one else. Extend the dimension of the STM. Extend the dimension strength of the STP of the man. And then, decide, in which field interactions, you want to manifest yourself. You can create the condition of the Mars on this planet, and show yourself, how you will look on Mars. Do I like this? I don't like the color of the skin, I'm going to another planet. Do I like to crawl, like animals on this planet? I don't want, I want something I can go faster. And then you find out, man expectation of the life in the universe, will change to the position of the perfection of life.

Where we all strive to reach the ultimate goal. (1:10). To become part of the Creation and become part of the Creator. And then at that point, man has matured to the knowledge of this universe. Now we have to understand the process of the knowledge of the Unicose and every other universe within it, as each one is unique, as is each man on this planet. Then, we learn the knowledge of sharing in a different dimension, of the field strength of the Creation, which the man is blind to at this moment of time. But in time he'll understand.

The point of the teaching of today is to open your eyes in a way that you understand the next cycle of teachings which come in. In what strength of the fields I want to travel. In what strength of the field I want to manifest the STP. In which dimension of field strength I want my two emotions to be in balance with each other, that I can confirm my existence to the best beauty of Mitra. And then we come to the "beginning and end." And we see the beauty of the Creator and the Creation. This was part of, in essence of the teachings of the past week in Manchester. And in London, we create condition that some of you will be able to go to this dimension, condition and dimension of the transmutation, by your will, not by us. We are just the creator of environment. It's a condition, strength of your own understanding, between the STM and the STP of the man, to go through that transition. (1:12).

I can bring you to the airport, I cannot push you in the plane, unless I handcuff you as a prisoner, and this is not our job. Every man has to take that flight of fancy on his own accord, and own understanding of the Totality of his own creation. << speaks in Farsi >>. We have said what we have to say, it's for man to

understand. Does not matter, it takes him days, minutes or centuries. It's the dilemma of the man himself, and nobody else. And it has, it's a trip, that it has to be made by each man individually. There is no collective gathering, a collective awareness. That game was the game, so they tried by collectiveness, to make a slave of the man, by the man who will lead that collection.

Now you understand, it's in the capability of every Soul, to reach the point of understanding of the Creation. And it's for man to decide, which school, which mode of transportation, and which dimension of the emotion and the strength that man uses, and nothing else. We are not here to slave man with another, we are here to free man from all others. And this is your responsibility to understand, the position and strength of your STP, and how you can transmute between one the other.

Up to now you called it a dream, now that dream has become reality. And it's only you who can ignore it, that nobody else, because nobody had the dream you had. And nobody has a dream which you have, except you. (1:14).

We go for a break, we come back, and we go through the usual method of answering any questions. Rick, if you want to take a break. The usual, the same things, but it has a lot of knowledge, the same system, but it has so much meaning, that we see. Thank you very much.

>> BREAK >> 502 KSW September 07, 2023 (1:21).

K- Yes. If there's any questions?

R: Actually, no there isn't. This is the first time in 500 workshops that there's no Q&A, There's none in the YouTube and none in the Live stream. (1:22).

K- That's fantastic. So we say goodbye. Thank you very much. We hope you enjoyed the teaching. And join us next week.

R: We have a hand up.

K- Please, just something to, just to mention. Those of you who take part in the session tomorrow, please make sure you do your, what we call, test before. And you can test after the session. And we would like to put a question there to you during the end part of the session. And then it'll be the same next Friday. And those of you who registered for the, what we call, the "sign of your Soul," Monday the 11th and the 18th, you've received emails. Please respond to it. Most of you have. I think about three or four people, I was told,

have not responded. If you can go to your Junk, if you haven't received any mail, maybe has gone to your Junk Mail, and respond to the time you want to be during the session, or what we call, fingerprint of your Soul. So tomorrow, we got the numbers which we wanted this to, what we call, test the most important part of the technology's application. And then, the same next week. And it's a very interactive, within the first one hour, one and a half hour, we'll see the condition and the results. And then we ask you to retest yourself, and then come back in and fill in the questionnaire. (1:24). And this is important for us that we see the change. And then we'll tell you later on what does this mean, and how you have brought a massive next step towards the space development, space technology, and many, many other applications.

So if you have a question, you have a hand raised, let's answer it, and then we close it. It's the only question today.

R: The only question today? Ok.

K- Is that what you said? I think that's the only one with a hand, with a man's hand up. You have no others.

R: There's a longer question in the Q&A now from Hong Yuei...

K- There is something I have to mention, there's something, we have a very critical condition in part of the translation and operation of the Keshe Foundation China. Wang Lin is not available for next 2 to 3 months. And we are trying to find a replacement and a position to cover all the situations which has risen in China. The translation and the operational management of the Keshe Foundation China, in next week or so, we'll address that directly and we bring a new translator. To translate all the teachings and send a point of the communication between the Keshe Foundation China and the rest of the Keshe Foundation outside. No, no, no difficulties, it's just that we have to restructure, as everything was structured around Wang Lin, and now she's away for about 2-3 months. We have to restructure it, that it can be brought back, that there is no gap in the knowledge, and other parts of the Keshe Foundation work in China. (1:26). This does not affect our work with the Chinese government at all. It's just something personal, and then it will be readdressed, and then it will be brought back to normal, hopefully after next couple of weeks. Okay, let's hear.

Q: ... I have a little question regarding the 11th of November. Maybe I'm a little early. But will there be a connection over Zoom?

K- No, no, no, nothing. We will not allow. We've done this before. We'll explain this again. We will not allow any cameras, any telephones, any recording of the sessions. When you attend the meeting, please make sure, I will give you, we've done that in, what you call, Belgium before. We'll make sure that there is no electronic operation in the room. You'll not be allowed to take any pictures, any recording. You'll be physically body checked with everything possible. We'll cover every aspect. But the reason is not that we're trying to put things aside. It's just that the fields and the condition created in the room can affect everything else. (1:28).

Q: ... And I'm sure you will inform us or give us some hints or show something after.

K- No. It'll be done by the Press. We'll not show, we'll not show anything. Keshe Foundation, the way we've done the same in Manchester. Nothing will be shown. We are not here to go in that extent. There is a reason we're doing it. And the London condition is that there are different condition in London than we ever been positioned in.

Q: I see. So maybe we will be informed through the presence of the Press afterwards?

K- All people. Depends how it gets reported. But even the Press, we try to bring a very tight control on it. There is a huge reason for this. And as I said, there is no difference between the cameramen of the Press and the individuals. This is a very... We don't want to go into detail, but we create a condition that we don't see fit for electronics. Even us have a problem in trying to see how we present things, will not affect our own system.

It's a beautiful presentation and a breakthrough in science. And it'll be shown in a very, very effective way. We'll follow the same procedure we've done before. If you attended the conference in city of Ghent, on the 3rd of December, 2011, (1:30). we gave you a plastic bag and everything goes in it. And your plastic bag gets numbered and kept out of the room. And if you attended the Bulgarian conference, we thoroughly body search everything you carry. And we are even planning to bring in a special system that, like airports, shows what your clothing is made of or whatever it is. We are very, very thorough with this. Don't forget, we are inviting ambassadors. We cannot take any risks. Do not bring with you, or you bring a mobile phone or whatever, will be taken off you in a sealed bag, registered at the end of the session. You can take it back as normal with everything else. Very, very tight. We bring this to a very, very tight security. We cannot allow, and we have to create a condition of safety for what we call, number of ambassadors which will attend.

This is one of the reasons when we did the first ambassadorial meeting in Nino, we did not allow any Knowledge Seekers, because we had to create that condition of safety for the ambassadors. Now there is many people and we have to control it in a very massive... We have to give undertakings that the dignitaries are safe.

Q: I see. Thank you very much for your explanation.

K- You're welcome. The fee for Saturday evening will rise to 5,000 euro in the next few days. All Knowledge Seekers who registered before still stands for that weekend for 1,500. But the fee for that weekend will rise to 5,000 euro. Because it goes to the governmental and to what we call, (1:32). institutes, and they come as part of the understanding of the research. We are not looking for numbers, we are looking for quality and what we call, people of the knowledge will be there, and that's what we are looking for. So, the 1,500 for that weekend, within next few days will rise to 5,000, which brings in what we call, the organizations we are looking for. They come in to see the change, we don't just bring people in just to be there. Those of you who registered for the, what we call, the weekend, the week before, you have an automatic entrance into the weekend session and the meeting with the ambassadors.

We start the work from next week, the whole, what we call, cycle. We already have found the venue where we want to hold it. It's in central London, capacity is about 500 people. And the people will create all the security structure we need for the meeting, for, to give confidence to the embassies for the ambassadors.

Any other question?

R: Okay, we have a number of questions in the Q&A here now. Let's begin with ...

K- I think they were asleep.

Q: ... Hello Mr. Keshe, you said quote, "there is no reincarnation," many times before. (1:34). I think what you mean is, all my cells structure, all Souls of cells and STP, will not be completely copied and regenerated in my next life. In addition, according to Buddhist scriptures, after leaving the body, a STM, or an animal, will enter the fertilized egg of a person or animal, under the action of karma. There is a lot of interaction with the Soul of parents in previous lives, no matter which side is helped or hurt. And then this Soul and the fertilized egg will be closely combined to start a new life. In addition, I think, all individual Souls were directly created by the Creator, separating a small part of its own energy at the beginning, and a huge number of individual Souls were created at that time, allowing them to enter the material world or physical world, which created at the same time to experience, and continuously sending the information they experience back to the Creator to confirm their existence. I would like to hear your views on the above three points, or could you talk directly about the process of creating individual Soul and its purpose, and where it goes after leaving the body, and how it enters the fertilized egg, or has a new physicality to start a new life? Thank you very much.

K- First of all, we got to look at it two ways. One is the transmutation. In the transmutation you never die, in a way. Because you change from the dimension of the STP to be, (1:36). or the dimension of the Soul to be, in charge of. So, death the way explained in Buddhism does not exist. Or what you explained just now. We do not die and fertilize another egg.

If you extend the knowledge of fertilizing another egg, with your Soul taking a new position, in a new dimension, after your physical death of today, as you call it, now it has a new environment and in the interaction with the new environment, or what you call it, the egg, it starts a new cycle. What we said, the creation of another star, another galaxy, another system. So, in a way you don't enter into another egg, your Soul, in gaining its strength and through its strength, of what we call, gravitational and magnetical, finds its position in the universe. And that, if you want to call it position, becomes the egg, becomes where, now, possessing both gravity and magnetical field, start the cycle of gathering energy from this environment, the womb of the universe, and then starts the process of cycle of life, what could be.

So, in a way, maybe part of your belief in Buddhism now can be explained in more detail scientific way, by the understanding more about the Creation. And in that process of creating new condition, new environment, you give new life, you create condition for new existence, as the fields by interaction, by natural process, create friction, create smaller plasmas and the interaction of the plasmas with a plasma of environment leads to creation of life. (1:38).

Two dynamic fields in interacting create a condition common denominator, which becomes the seed of the next collective connection between the two. As happens with the egg and the sperm in the womb of the mother. The only difference is that instead of the womb of the mother we have the womb of the universe. Collective energy in the womb of the mother to give additional energy to the, what we call, new dimension of the fields, which becomes later on the STM. Then it brings us to position of what we call, the life in the universe. It's just change of name and the dimension and the field strength and the freedom of the plasma.

In the physical dimension, we always begin with, start with the STP, which is the physical dimension of the two sperm and the egg, leading to creation of the Soul. Collective field strength of the totality. And at the same time, as different condition for transfer of energy, holding on to energy, conversion of the energy of the environment to the physical body, leads to the creation of the man.

If you are born on another condition, dimension, where there is no food, but you still exist, you don't need the dimension of the digestion system. So, your body doesn't create it, your STP in that dimension, is according to the physical need, confirmation of existence of the man in that time and place and position. The STP is not just energy pack, it's carrier of information in its interaction with its environment. (1:40). It's no use creating another man on the Moon when there is no food, there is no air and there is no water to eat, drink or breathe.

So, the STP creates condition of the physical life, in interaction with the Soul, for confirmation of existence in that point, place and position. You have a life without the lung, because there is no air to breathe. You have a life without the digestion system, because there is no food to eat. And what's the use of kidney, when you have no water? Now you understand, the common denominator, the emotion of the existence, in interaction of the field of the STM and the STP of the man. You call it the Soul and the "Spirit."

So, now, which way, which story through Torah, Bible, or Koran, or the word of Buddha you want to accept? All is the same knowledge, is how they interpret, how they put it that the knowledge of the man understands more? In Buddhism there is more interaction with the emotion. In Islam is more interaction with the physicality. You kill, you are punished, you cut your hand (off) and everything else. Because people of time of Buddha were more spiritual, understood more about the Soul. Arab guy understood about the hand and the finger, and where to put it. So, they deprived of him, to punish him, to teach him. Where, in Buddhism, you enlighten to understand more. But it's the same story. The same slavery of one into the other, where now is the freedom of both. With the new knowledge and understanding of both. (1:42).

Any other question?

Q: ... In the 493rd Knowledge Seekers Workshop, a Knowledge Seeker asks about the sacrum, and then Rick goes on Wikipedia to look up what the sacrum is, then an image of the pelvis caught my eye, which had the appearance of a dynamic core, with the sacrum positioned in the center. Then you replied that it was too early to teach about this. This reminded me of two teachings, in it you say that when we breathe in, part of the fields are to feed the Soul, and through the lymph, the Soul spreads the fields throughout the body. It also reminds me of the gas reactors, where you introduce gases into the inner core to expand the fields. So, would the basin and the skull of the man be the two reactors, just like the Sun and the Earth? Is the interaction between the two through the blood flow, like the heartbeat of physicality, and through the lymph, like the heartbeat of the Soul? Thank you very much Mr. Keshe for today's knowledge, which brings more understanding and clarity.

K- You can look at any physical part of the Man, and you come to the same conclusion. (1:44). Move from the bottom, to the top, to the brain. It's the same structure. You have the left brain and right brain. There, there is no physical bone condition of the shape, but it's a physical condition of the soft tissue. Bring the same knowledge into the two kidneys. bring the same picture into the heart of the man, bring the same picture into the lung of the man.

You always need, for life, a slightly two different field strengths, that the interaction in trying to bring a balance between the two, it creates continuity.

Man looks at the lung as two pair of things, but the two lungs are not the same. A slightly different structure, a slightly different composition, one works to get the other one going and vice versa. The same is the brain, the two half of the brain are not the same. In having a slightly different structure, they have different what we

call, part of the Spirit, part of the STP strength, which creates that heartbeat, the time to balance, it creates intellect and emotion.

The same is with the hip, the same is with your toes, left toe, right toe, the same is with your thumb, the same is with your ear. There is a reason we have two of everything in the present physical body of the man on this. And if you go back to the very first teachings we always spoke about the condition and the shapes, which the Copper creates in this condition. Go back to the early teaching. (1:46). This is a characteristics physical interaction of existence of Copper in the dimension of physicality of the man on this ?? earth, which is in your muscles. Go back, long back into the teachings.

Splitting and then confirmation of the balance between the two, is one of the characteristics of the Copper which is a cornerstone of life on this planet. Because of its conductivity and in the position of the dimension of the vacuum condition of the physical body of the man as a Gans, it creates this, what we call, twin structure.

Any other question?

Q: ... Is the skin of organs and bones or muscles a Nano coating in our body? What is the function of the sack covering of these organs? Or does it provide information about the appearance and movement of a given body part?

K- In a way, the skin of every organ, even the skin of the man, is to contain its properties and field strength, and nothing else. And in that condition, it creates a condition of holding the part, and the collective structure field, the strength of the STP. Whatever is in that sack, be it the kidney, be it a heart, be it a bone, (1:48). has a rhythm, has a field strength of itself, that it identifies as that. So that creates part of the Spirit in passing, transferring that energy through the river of blood.

It's very much like you take a water from a river and you say there are these contaminations and these materials in this river. And it's because a factory of the roads has put some poison in, the factory of the roads has put some more rubbish in. That factory is called the kidney, the other factory is called the heart, and collectively they put the energies in this river of life, we call, blood, or we call it's interaction, the Spirit of the man.

So, and again, the skin itself is another plasmatic magnetic field containment, which has the strength enough to contain the field strength of the cells of that organ inside it. That it doesn't interfere with outside, or interferes the way the totality of the structure of physical life has decided for them to do.

It's very much, if you go back to the teaching, part of medical teaching, we always in the, what we call, dimension of the digestion system. We always say, oh, we eat the food and it goes in the stomach, and the acidity of the stomach digest the food, and then it goes to the long intestine, and then it come out of the big intestine, and we absorb the food.

And then, I ask one question, you put a banana, Where does it cross? Where does the banana go? And then now we find out there's hardly anything to do with the acidity of the stomach that the food converts. (1:50). The conversion of the energy comes from the salinity of the stomach when it converts into the gas. The acidity which you created is part of Nano structure production. Now you're familiar with it.

So once you Nano coated the material you put in stomach in a way, the salinity opens it up into a Gans and now is available as an energy to your body. And this is what the world of science has not understood. This is why we are doing this test tomorrow. To find out how the conversion of the matter into Nano in the stomach of the man leads to separation, and creation of Nano materials, which then the salinity in the stomach converts it into a Gans and travels the span of the, what we call, the intestine.

And then, oh, now they say there is a gate here, it opens up this goes. What a nonsense. The layers of your stomach is another Gans transmission, transmutation between the lymph in the body of the man and the food inside. And that transformation allows the energy of the food you ate crosses to your liver. And then, again, from the lymph into different organs according to the structure. And the interesting part is when the lymph receives the energy of whatever from the Gans's of the material going through intestine, now it feeds back the lining of intestine to support the next cycle. (1:52).

So, the world of science, of all the problem we have created, is the creation of our own lack of understanding of the world of Creation. We have created a mayhem of a nonsense, and now we believe in it because somebody has written it in a book. Now we have to destroy that knowledge which is half imaginary, and it doesn't exist, and we've given it pictures, shapes, and everything else.

So where does it come from? How do we confirm? How we change the matter into energy? Now we understand for the first time. And then the rest is understood. How a banana becomes vitamin blah, blah, blah in your lymph, and then converts again back into transmutation to blah, blah, blah, it becomes blood. If you look at it, that banana came as a matter when your stomach went through a transmutation, became energy, crossed the wall of the intestine, now appears as a blood cell in your body. Now appears as a bone. It's gone through the full transmutation from food to energy, energy back into a mass, you call it a bone. Nobody came and planted a bone in your structure. You went through a transmutation and then through it, came through a transportation and you've moved, as you call it, the body of the man.

We entered the world of Creation through men of nonsense. People like Einstein, who have created so much problem. And others who created the more problem, trying to confirm their existence, (1:54). in a way bringing, bringing more and more fancy thinking into the dimension of reality of Creation.

Yesterday I received a message, I think from Azar or somewhere, that an 11 year old girl in London sat for a test, IQ test, and in Oxford University, and she has come out with a 162. Up to now, the highest man we had was one Einstein and one cheated guy who was given all their things, called Stephen Hawking. Now, this girl at the age of 11 has come up with two points higher than Einstein. And now, what is the IQ of our Souls when we put them to this test? 1,000 ... 10,000? And if you look, both, what I call, fabricated knowledge providers, Einstein and what I call, Stephen Hawking, both don't even exist, their knowledge in the world of reality of the Creation. Two fake people put up by two fake structures and made to be the most clever, where 11 year old can beat both of them.

And now, the new generation of man, born out of the Soul of children of Mitra, will have 10,000, 20,000 IQs. And then what we'll say? We accepted too many fallacies, (from) the "man of no knowledge," (1:56). who made themselves to become, to look to be knowledgeable. The way the Americans are, in a way, running away from the German guy, who became the father of the space of NASA, very soon, man of knowledge will erase the name of Einstein and Stephen Hawking from every page of science of man. Because our children can not be hold and cover with the fabrication of lies. Because now we understand, we can analyze. We see a

new knowledge through energy, not through the physicality that any man could imagine, whatever fancy it has written.

I wrote to the Chinese authorities saying, in the presentation of upcoming time, we would like to show how we can eradicate Parkinson, in Macau presentation of the Keshe Foundation, in minutes. To show the change in the knowledge. To show the difference in the new understanding.

Any other question?

R: Okay, in our Q&A here, Irmgard is having difficulty understanding the blood test.

K- If you don't have a blood test, you can do a urine test. You go to any doctor, to any chemist and say, I want to test my pH. And they give you a film and you test it. (1:58). It's as easy as ABC.

R: But the blood test is special, you'd either have to have a blood sample...

K- That's a very complicated one, if you want to do it. You do this with a film, you go to a chemist and they just give you a film, and usually you pass water on it and it shows. It's that kind of thing, or some fertilities show with ?? there, with the saliva.

Q: ... Tomorrow we need to measure the pH, this is clear. What do we need to measure next Friday?

K- Insulin.

R: So the blood sugar or...

K- Yeah, yeah. It's very important, this is... This will give us a dimension of transmutation of the Soul. Then, those of you who participate in the sessions tomorrow and next week, then I'll explain to you, if this goes, especially many of the Knowledge Seekers who came to Manchester will understand how effective this will be. To know how to transmute from one to another. Salinity gives you condition of the manifestation. holding on to physicality. The, what you call, sugar or whatever, will give us a dimension of transmutation. It's energy given. Sugar, like you. This is the way you understand it in the world of matter state. But we use this knowledge for another dimension, to start teaching the Knowledge Seekers to understand when their body is ready for transmutation. (2:00).

And you know, we have, they say, women with the temperature and blah, blah, know when they have an egg ready to be released. That's the cycle of life. Now, Knowledge Seekers, in setting up conditions and tests like this, you become part of the structure to understand for yourself how you can bring a position from the dimension of physicality to dimension of transmutation. That's the reason for the test in next two sessions. If you put it that way, "oh, we want to know. Mr. Keshe said." No, you have to understand. You have to realize.

We'll bring this back into the next positions through the same process. We show you how to feed yourself. Those of you who participate in the test from now on, we put up, you are, in a way, collaborating for us to bring knowledge forward. But in a way, it's for yourself to find out the way of feeding yourself without touching the nature, how to absorb fields. Just what I said a few minutes ago. What happened in your stomach? How the fallacies of the knowledge has thrown us away from how we actually digest food and what the digestion system is.

If you can create that condition which the salinity creates a condition of the Gans in your body, inside your body, without eating, you absorb energy from Unicose. This is what it does in your intestine. Your intestine is not a place for energy to cross your wall of the intestine to feed the lymph. (2:02). By the law of physics, by the law of plasma, you create that seed inside the stomach. And the cosmos has a bigger dimension field strength that by trying to feed, trying to connect with that seed in your stomach, creates energy crossing your body.

This is what we do. We put a double loaded patch on the back and a single patch in the front. Why do we do this? Your spinal cord is a transmitter of that energy which comes through your body. If I explain how in depth we have got you to do things without you knowing, you'll understand how you've been educated to the knowledge of the universe. But you don't understand. You're still looking for that "blip, blip." As I said in the last week, with one of our Knowledge Seekers who's heavily involved in MaGravs, you're always looking for a few volts. But you do not see the "mega" energy which is available through the whole system.

If you understood why we encouraged, and some of the Knowledge Seekers went through production of the Gans water and they drank the Gans water, and say they don't need anything. Why? Because instead of eating the food, converting it into a Nano, converting it into a Gans in the stomach, and then putting it into the intestine, this energy water you drink becomes that seed that absorbs energy from the Unicose, the 80% you need.

How hard is this to understand? Why does it look like a magic? Because you didn't understand the knowledge. You were too busy not hearing, not seeing, but you never understood the structure of the science behind it. (2:04). I always said, you take from this technology according to your intelligence.

Drinking the water, the Gans water, it's not that it gives you energy. No, no way. It puts the seed of the energy in your intestine, in your body, in your stomach, that allows being a weaker to absorb energy from the universe. And that's how you're fed and say, oh, I drink a Gans water, and I don't eat food. What a nonsense. You eat more than before, because this time, you don't even spend energy to break it up into Nano. You directly receive energy fields from the universe, what your body needs to carry.

Now you understand how you're feeding yourself with Gans waters. You're seeding, you're sowing the seed of energy in your body, and the cosmos feeds you. This is where the 80% that is the essence of your life comes from. Now, "oh, I took Gans water. I didn't eat for 10 days. I'm eating the Gans water. I'm drinking this. Excuse me." Do you understand the work of plasma? You created that weak plasma, and the universe has to feed you. It becomes your father. It becomes your lamb. It becomes your banana. By balancing the fields in the stomach, the body says, what energy I need to get from the universe? And it feeds you.

This is what, as Knowledge Seekers, you have not understood. And you say, "oh, the guys in China didn't eat for seven months or two years." Or the man on the space. We just placed the seed of, we don't even need, this is the knowledge you'll gain in London. We don't even need to feed you the Gans water. We sow the seed of the energy of universe in your body in that conference. You'll be fed by the universe. I wonder how many of you who truly connect, will walk out of the London conference, and you'll feed yourself for rest of your lives. Because we have set the seed, it's you who have to control it through your Soul.

And then you understand. I told you, in London conference, we show such a technology, that baffles the world of science of today. Many libraries burn their books of the nonsense they have stored, to teach the man

the lies of Creation. Many of you, who come to London Conference, your life will change, will be touched. And those who attend the week before, you will prepare for that change.

Now you understand, why do we need to eat? Was all this knowledge. We're coming to a point of the delivery, to make man ready, to understand in his physical body, does not need to eat, that then he goes to space, he's adapted, he understands it, he shall not kill another entity in the universe. London Conference is the biggest show on this planet, to bring the biggest change in the race of the man. One day you will understand, those of you who participate in it, say, "I was there when the history of man changed." No magic.

R: Hello Mr. Keshe, I lost your audio there. (2:08).

K- ... Just give me a couple of minutes, I received the call, I have to accept, it's important. (break ...)

K- ... (2:10). Hi Rick, I'm back. Sorry about that. This is a very important call for the Foundation. I had to accept it. This is the reason we came to Netherlands, for this reason. It had to be completed. It's important for the future of the Foundation worldwide. We are a Dutch structure and we have to work within the structure of the Dutch government. And these things need to be sorted. Soon later, you as Knowledge Seekers, when I pass away, become responsible to oversee these functions, interaction between the Foundation and the governments. And I do most of these things, as I've done from the beginning.

But, as I said to Knowledge Seekers, those of you who we are preparing to take over the function of running the Foundation, have to interface with governments, interface with what we call, legal side of everything in every country according to their law. And so, this is the reason we came to Holland. (2:12). And we are here for past 3 - 4 days with the head of the Keshe Foundation management team, standing by to complete part of the process of the Keshe Foundation with the Dutch authorities, and it has to be done, it has to be completed. And we had the same with Austrian, with the Chinese, with the Americans, and the rest of the world we operate.

Keshe Foundation operates in 51 Nations, through it's organization and companies. And these are the, what we call, management structure, which I have run, more or less, for past 20 - 25 years. And now gradually, as I prepare to leave the physicality, it's your responsibility, you have to learn. You have to learn how to interact with governments, how to talk them, and how to, what I call, teach them. And how to prepare them for the next step.

And the biggest problem for you Knowledge Seekers, is, once you become in charge of running (the KF), your headaches just start. I have just cut the grass off the ground. Now you have to dig a hole, put the foundation in, and build the building of knowledge on this planet. I've done the easy part, the hardest part is left with you, because it's your planet, you have to deal with it. And we try to make it as smooth as possible and part of these calls and these things and these meetings, is bringing nations, governments, authorities in line to work with each other. This meeting, we just had few seconds of calls being held back, it's taken 8 months of the Keshe Foundation to change everything from Central European authorities to national and international at a governmental level, (2:14). to accept the Keshe Foundation in a different way. And now we are here to complete it with the Dutch authorities. It'll bring a big change. In the next few weeks you'll understand the change, even the silence, you're waiting, will bring to the Foundation, in the coming days and months.

The next question.

Q: ... How will the Press work, the old fashioned way?

K- Show them a new way. I was walking on the streets of Manchester last week, and I was with Knowledge Seekers. And we passed through the West, back end of Manchester center. It used to be called the "Fleet Street of North." It's called Angkor Road, and all the, if you remember, the old presses, the ink presses, tick, tick, tick, tick. So you run, create the newspapers, daily newspapers, were on this road. And now, with the new computerized systems, we don't have these old ink belts, and the rest of it, because we used to stand when I went to Manchester, nearly 50 years ago, 40 odd years ago, these are still running. And now I passed, all these old buildings have been demolished, and the most modern city in the center has been built. And I'm saying, we used to watch newspapers to be printed here. And, yes, was that. What came out on the morning, on the headline of news, was the news, the most important news. Doesn't matter who detected it, what it was lied to, whatever it was important, that was there.

Now the Press comes different way, "awareness of the Soul." (2:16). Would we see, what I call, Internet communication? Or would we go through the new system of the wireless plasma communication, which Keshe Foundation has brought into operation? The first of these systems in a wireless, what we call, plasma condition, was taken away by the Knowledge Seekers in the conference last week. And the rest is getting sent out in the coming weeks, to those of you who purchased it. And then you'll find out, "I heard this, I know this knowledge." Then you start realizing, "I'm getting a knowledge through the new way. I'm getting informed of the truth, the new way."

It's not anymore coincident, "oh, I thought of this." How did you think about it? Where the knowledge came on? It goes back to, "How did I use the new plasma communication system packs?" And then, there are a lot of things we teach you in the future, how to be connected. Those of you who had a headphone sets, you took and you use, you connect to the conference directly, because we'll set a system inside. The knowledge, the information will come as knowledge, as emotion, as pictures, whatever you want to do it. You call it a dream, it's the reality of connection to the new technology. These are the things we start teaching you, you start understanding it. And then you have a favorite, this system or that system.

It was very interesting, our Knowledge Seekers know what I'm talking about, if you were in a meeting last week. I connect with this system more, because each system was numbered. So, I want to take system 1 or 3 or 5, because I have a connection to it. You never understood, it's you who have connected to the new line of communication. (2:18). It's like, I like Apple, I like Samsung. Now is how the structure of system has matched my field strength, that I can connect to the rest of the universe. And these are the new ways. And then it's not a dream anymore. It's your new Press. It's new understanding and new knowledge. And it's not coincidental anymore, because now you connect to all the dimensions of ?? knowledge. What you want to know, the way you want to know. I want to speak Chinese with the emotion of it, not the word of it. And then I understand why they said, what the joke meant, because I carry the essence of the knowledge of the life in the language. Then it becomes sweet to become man of the universe, because you understand everyone, and not just the words.

Any other question?

Q: ... Dean made an announcement in the One Nation, One Planet, One Race meeting on Tuesday, concerning the Cosmic Ray Communication Bundle. Can you expand on this Mr. Keshe?

K- I don't know what he said, how can I expand on it? I wasn't there.

R: He started expanding, but he was asked not to reveal any more, than what he already had.

K- He doesn't have a system, it's his understanding of it. No one has a "Communication Bundle." The Communication Bundles are getting dispatched for those who bought it this week. The manufacturing has started this week. (2:20). So nobody has, except me, no one, and our production team, has ever put a communication bundle on their head. And even me, I don't like to be in it, because it brings a lot of things in.

Even the systems we gave, the Knowledge Seekers took last week, is not a communication bundle, but uses the plasmatic field line of communications. It's two to different things. Those systems are totally for different purpose. We put five units out to five of the participants. They took it with them last week. And there is a reason for it. Don't touch it. Don't do anything with it. Keep it the way it is. And it creates the condition we want. Each one has gone to a different part of the world. And will bring that condition for us, an extension of the Souls and interaction.

Whatever Dean has said, as a member of the Universal Council, is to their understanding, interaction of the Souls. But you cannot reveal something you haven't had. There is no, not a single Communication Bundle, up to this minute, has left Keshe Foundation manufacturing, even though they are produced. They're so complicated, in essence, that it take us, all our team, one unit a day to produce. Sometimes two days to produce one unit. And they're not easy.

And when you receive it, don't touch it. Just use it the way it is. The new Communication bundles, which you receive in the next few days and weeks, (2:22). as they go through the production, has no cables, has nothing, it's changed. Has no wires to connect anywhere, has nothing. Headphone sits on the unit. And let me go somewhere. If I can show you. It is actually a production line. There is one unit was placed last, or this week, at the Linz Center. It's a dummy. It's totally empty. But it shows the new communication. The new communication bundles is not fully completed, because there's so much rapid development coming in. In the next few months, a new edition will come in. But I show you, this is what a new communication bundle. Nobody has seen this up to today in public, has not been delivered. I think we showed it to the Knowledge Seekers in, what you call it, in Manchester conference. And I'm going to see if I can share it. (2:24).

This is what you will receive. It's the first time we show it in public. If you remember the original units we showed, had wires and everything else. It's all gone. Again, it's advancement in technology. And even this is like "Apple 1." We'll have Apple 10 and 15 and 20, and you can imagine what will come. Very soon, the way we see it, this white unit, as we develop, will go into the headset. So one headset will be a complete unit with everything.

And what you see there, you don't dream anymore, because you're a creator of reality in the dimension of fields. We have to learn that we live two dimensional life. We call it a dream. No, that dream is not a dream. It's a reality we ignored. We called it a dream because we couldn't handle it. Now we have to handle it. And I foresee, maybe in two years, five years, that we reduce even those headphones to single units, embedded within the structure of the physical life of the man, in the communication with the STP, in a way, in the bloodstream. Quite possible. That allows instantaneous conversion and transmutation. (2:26). But this is in time ahead.

So what, what you call it, Dean has brought, is part of his own intuition, and part of being maybe a member of Universal Council. And in the past few days, we have delivered such a dummy unit. There is nothing in it. just shows, it's in, what you call it, in the Exhibition center, which is still running, till we pack it up in the next few days or weeks. The Linz, we have given notice to our, what we call, the owners of the properties that we're leaving by the end of October. So, till we get to that point, it's just anybody goes into exhibition you can see things. There is nothing that we cannot reveal, there is nothing there that can be revealed ?? ?? revealed.

And people who attended the Manchester conference, they had a feel of where this, how this thing will look and be, but the units which were in, what you call it, in Manchester, are again totally different and for different application.

Q: ... Can you tell a bit more about the new possibilities and how advanced the possibilities are, which are developed in the background? Thanks. (2:28).

K- We work with different structures of research. We have frontal research and at the same time I work with a lot of people individually or group of one and two in the background. So, if you take overall structure of the research and what is getting developed, we are very, very advanced. Some of it is frightening how advanced we are. Even our own Knowledge Seekers don't understand what they are doing, but they understand part of it, and they follow it because they see other effects. But the actual system is set up for a totally different outcome. And as we come to it, we bring your attention to it. And that's the only way, as Knowledge Seekers have seen, its work, whatever, they can connect.

Instead of targeting something which I want to achieve, I bring the environment of understanding, and then show the same system for different targets applications. We are extremely advanced. We can complete transmutation even now. We can complete transportation, London to New York, in minutes today. But first of all, our people are not understood.

The Iranian team, within the structure of Iranian flight system, are years ahead. Even them with being years ahead, they are still years behind what is actually taking place. Because there is a very big problem, or there is a very big difference. In Keshe Foundation, I head everything in research. More or less, our team had their own bits into it. (2:30). But the direction we take is, we decide today we've gone far enough. I teach the next step. I don't wait, to wait for the budget, somebody decides. I see our Knowledge Seekers, our team, have understood most of the grasp, some of it, or understand, we jump 10 years. Forget about it, you understood these things, let's do this.

When it comes to the government structure, it's different. You want to change one screw, or one panel, it has to go through acceptance, authorization, money spend, blah, blah. The only country which is fast speeding these things It's the Iranian SEPAH, an Iranian defense technology in nuclear industry. Decision made by head of divisions, done. This is what we understood with the Keshe teaching today, we go. Iranians have put a team to understand my mentality of thinking, not with what I say. And they're very good at it. This is why we even brought the Chinese to work with the Iranians. With the Iranians, they... Ahmadinejad had a very... or Ayatollah Khamenei had a very, very clear understanding of the teaching. This guy speaks, we look at the word. We have to understand the essence that we can be with him.

And that team, you listen to the teaching today. I work with the Iranian Keshe Foundation team. But there is a team behind which has worked with my work for past 14 years. They sit to understand the essence of the

knowledge, not the word of the knowledge. And they work at it. Because they have seen the essence of it. So, how it will take shape, (2:32). is how you understand it, and how you interpret it, and how much technology is behind the scene.

Our technology, our team, have everything to complete the transmutation today. Within the capability of the Keshe Foundation, we have built the system. Actually, some of you have already used it, without you knowing, to convert energy into matter. But our Knowledge Seekers don't still understand it, so I have to take time. We built it last year. I built it 15 years ago. I said to the Knowledge Seekers before, those who came and went to the Moon and they brought handful of dust, or brought a stone with them, I said, "you need a system to convert this dream to reality, that it becomes a material." We already built that system.

What you touch as a stone on the Moon, when I put your hands inside the system, becomes that stone. So you didn't dream, you actually been on the Moon. We've done the reverse of this with Ali in Canada 7 years ago, when the hand disappeared in the system. So it's not something we dream.

It's our Knowledge Seekers have to understand the society when it's shown, as we understand, how can you bring a stone in your imagination, as you call it. You put it in the environment, it becomes that stone. And the scientists from Earth put the stone and say the stone is from Moon. It's come from Moon. (2:34). We showed this to the Chinese military in one week of tests in China in past five weeks. So we're not talking about something's going to happen. And they tested it, and they confirmed it.

So, the knowledge is there, the man is not ready. I brought the car, but nobody knows how to drive a car, so the car is parked. And the key is in my pocket. Show me a driving license you can ride, and knowledge of the universe, I give the key to it. Very complete, the knowledge. What sits in two or three of laboratories of the Keshe Foundation, and the people are taught individually to, is immense. If the Knowledge Seekers who are taught, are Iranian scientists, in Iran defense technology, in the space development, release the knowledge they understood, America become slave to Africans, in the lack of knowledge.

This is how advanced we are, but you are not ready. Then I become a magician, and I promised I'll never do magic. I'll make you to understand the science of it.

Any other question? (2:36).

Q: ... Is the "all in one system" you mentioned last week, in fact, a replication of the environment of Earth, where it was created perfectly, allowing people to tap into it, like the process of transmutation?

K- In a way, yes. (Would you like to change your screen please?) In a way, yes. In a way, no. But in a way, if you understand, your Soul does the job. We just train you how to use your Soul. You know, you can drive a car from the day you're born. If you can understand what a clutch, what a brake and what the accelerator and what the gearbox is, and .. how you can mix it and get what you want out of it. You don't need to wait till age of 18, you can drive while you are in the womb of the mother. It's the same situation. We all know, but we need to be taught, and we have to be at the age of maturity to understand, you can't use a brake, the car, to kill someone with the speed, or run yourself into a wall.

It's just time of the maturity man needs to understand the knowledge. Otherwise the knowledge is there. None of the things we (taught) is magic or something made up. We just open your eyes to the knowledge which exists, but you've been ignorant to it or you've been put the wrong way. That's all. Instead of calling

and call it, you know, when you drive a car, they put a "L" plate on your car, you're a learner. (2:38). We change that learner to Knowledge Seeker. You're in that stage, learning about the knowledge. You're "L" drivers of the knowledge of the Creation.

Any other question?

R: We will have to have a new "K" rating. Knowledge Seeker, look out.

K- Dangerous. You know what the Indians have a beautiful word. In Urdu, in Persian, no, they say, they call it, << speaks in Farsi >>. It means, half a doctor is dangerous for life, because he doesn't know the whole thing. He can make a mistake in his medicine, because he's just, "I learned half of the knowledge." And it's the same with the man.

R: Yes indeed, my first experience of the freedom of having a bicycle, was running directly into a telephone pole.

K- Not knowing the telephone pole was already there.

R: Yeah, it was there, but it just seemed to magnetically attract the bicycles, so...

K- It was... I went to this... I spent a week in Manchester, 10 days in Manchester, and as I've been away for nearly 20 years from Manchester, I had to go through this city, and it brought back so many, so many memories. And I passed the place, going out of Manchester, just a few, a couple of kilometers away from Manchester United football ground. I was going to my, what you call it, place of what I call, beautiful game. And there's a, about, there's a hand wall in the middle of two carriageways, they put a wall with a plant on top of it and everything else. And I just bought a new car, a Volkswagen, (2:40). and at 4 o'clock in the morning, I stood on the street, watching the car being on top of the plant pot (concrete wall were the plants are).

The police came and says, "how did you get on top of that plant pot, nearly a meter and a half from the ground? And you're standing here, with no scratches on your body." I said, "I don't know, I just found myself on the street." And, they said, "you have to go to the hospital, because it cannot be like this, you have nothing." They took me to a hospital, they said, "no, there is nothing." And the police, later on, questioned me saying, "the front of the car is gone. The engine sits in the driver's seat, more or less. But how did you get out of that car, on the street, with no scratch?" I said, "I don't know, I just saw a car coming on the side. And, next thing I know, I'm standing on the street." Brand new car, 250 miles on the dial, was sitting one third of its length, short, on top of a plant pot. And I thought, myself asked a question, did I learn how to drive? How did I end up on top of this pile?

And it was amazing, you talk about the bicycle and the lamppost, I don't know how the car ended up on top of a plant pot. It was attracted to it, or something happened? But according to law of physics and law of cars, the car should have been half way in my stomach, but I was on the ground, standing next to it, without any scratch, watching it. Four o'clock in the morning. Very interesting.

Manchester has changed. If some of you know, I explained to the Knowledge Seekers, Manchester is known as a city of slaves. (2:42). It's where man slaved man in the same color. But, when you stand in the city center, we call it "Mills," we have a "Canal" Street, where the canal was built to move cotton. Manchester

was a city of slaves, because we have water coming from the mountains of what we call, ?? Pennine and the other side, and these waters created the running water needed for the mills to run. And the slavery of a white man in the slave city of Manchester, started with slaving the black man in Africa, in George Island. Where man, a slave man, in the color of the skin, took him to America to grow cotton. The same slave was used to bring the cotton to Liverpool, put on the canals, brought into Manchester, into different mills, to convert the cotton to thread and clothing, or fabric. And, in Manchester, the children of the white man, and the white man was a slave to run these mills. And if you stand in the city of Manchester, in the center, and all the mills around it. You have a mill, depends how many people lived or worked in this mill. The owner of the mill built houses next to it. They call it two up, two down, two room downstairs, and two room upstairs, two bedroom, and toilet was outside. And the man was given a job. Then his children, 5 years, 7 years, 10 years, worked with the father in the mill. (2:44). The slave literally paid enough to eat in those houses he gave them, because, "I gave you that ?? combination, you just need enough to live." Man had no saving, no future, no holidays.

In the slavery of the Bahamas, slaves fought to get one day off, called "Junkanoo Days". If you go to Bahamas, you know it on Christmas Day, called "Junkanoo". Junkanoo fought to get one day off a year, day of Christmas, that he go to church, free of the slavery. And in Manchester they didn't get that. So, the man worked as a father, his children age of 5, 6, 7, when they could know what the finger is, they put it into these mills. And when their father died, they put the children the same day, with the everything children, on the street. They lost everything. And, the next man moved in.

The slavery of white man in Manchester is very deep, But British are too ashamed of speak about slavery of their own. And people died on these mills. Just to have food to eat and a shelter for their children. They were a slave. Children of theirs were a slave. And Manchester was known as a slave city of the white man, where the slave was used from Africa to America. Slave brought the cotton, and the white man slave, made money for the white man.

And, there is a lot of pain in this city, you feel it. I lived there for nearly 30 years. And, this week brought back, understanding being away, the totality of things I've missed being too busy living in that city. And it's changed, it's become skyscrapers, it's getting the features of the skyline of New York and big cities, just building on top of each other to show man has more, become more arrogant and I can go higher. (2:46). But it's very interesting how we change our understanding. And we try to cover, that it doesn't show how bad it is.

But if you pay a visit to Manchester, or northwest of England, Manchester Bolton, that area, is the biggest slave city of the white man, without ever man knowing that they've created these things. We just call it the cotton or wool from England. We never understood, this is done with the white slaves. Children, age of 5, 6, put in, who used to work in these mills, who used to store in these mills, and I always ask, no one says, "can we see the certificate? I want to know if what we buy was the history behind this building. When was it built? How it was built?" In Manchester, a good example of how the white man is good to cover his own slavery, his own abuse. And all this was brought home, spending back again, what I call, the city where I grew up.

Any other question?

R: We were looking at some of the accommodations they had for the employees back then, and they didn't have beds for them. So, and they worked, what, 20 hours a day or something, enough for their food. And so

they had a rope strung across the room, and that would be where they would sleep. You would just hang your body, your waist, this waist high rope, you'd hang your body over it, and that's how you would rest, apparently. And that's how they got the name, "flop houses." (2:48). You flop your body over a rope.

K- There's a lot of history in British culture that is not. No, they don't like to speak about it, but it's actually a sense of how the nation is built up. It's like, you know, when Queen Victoria used to have a bath once a year, it was a public knowledge, it was announced that the Queen had a bath today. You know, like you celebrate the birthday of the Queen, public knew when the Queen Victoria had a bath. It was announced, because she washed herself once a year, put it that way. But the strangest thing is, the miners washed themselves every day. And the people who work in the mills, because it was so dusty and everything, they washed themselves every day.

There was a, what you call it, metal tub. They filled it up with the water. And they had to wash the soot and the dirt off, otherwise they couldn't even see what they're eating, put it that way. And then, after the father washed itself, then they washed the mother, if she could wash. And then the children. And it started with the age. And the last one was the baby of the house washed in the same tub, same water. So a minor was washed more than the queen. But you know the story, we say, don't throw the bath water with the baby. Because the water which the father washed himself coming from the mine was so black, you couldn't see the baby you washed. And many times they threw the water, the baby was still in the water, was thrown away. Now it becomes expression in English. You say, don't throw the, I mean, don't throw everything out without knowing what you are doing. So you talk about the rope. There is a lot of history in the history of the British empire, which was a very falsified empire, all by image of one palace in London, (2:50). and didn't give the truth.

You know about the story of the Queen and the "Tupperware"? You know what Tupperware is? Tupperware is these plastic boxes which has a little lid on plastic lid, and it's for poor people, or common people to, you know, store food. Used to be very fashionable in nineteen seventies, eighties. And somebody broke into the palace and sat with the Queen across the bed, while she was having her breakfast. And then says, "oh, Queen eats out of Tupperware, not out of the gold plates and things they tell us." Because she's so poor. So, don't get fooled by the palaces, inside is empty.

It's very, very interesting. We have a good expression in English for it, we said, and we say, "fair coats and no knickers." It look to be very expensive coat, but they don't have the (under) clothing to wear underneath it. You just look at the outside, got a beautiful fur, which was stolen from the others. And then to get that fur coat, you go to "flea market." The flea market, it was where they used to sell the "second hand," and the everything of the fur, with the fleas used to live in it. So, you didn't buy a fur coat, you bought a coat which was full of fleas.

R: ... Free fleas at the flea market.

K- That's where the (word) "flea market" comes from. I think Dean can tell you more about that. And this is what I say... This is what I say, when you speak a language, you have to understand the essence and the culture of it. (2:52). And talking English about the language is very different than living inside it. And living in England you get the... partially the essence of the culture and the life. And living in that way with the English community, you learn a lot about them and about the beauty of their culture and the pitfalls of the culture.

Any other question?

Q: ... In the teaching of the 499th Knowledge Seekers Workshop, you said that the meeting in Manchester will close like the "last supper." How can our Souls understand these words? I would like to put my question into context with a short passage from the Bible, which says that in Luke's Gospel, Jesus says the following at the last supper, "I have longed to eat this Passover with you before I suffer, for I tell you I will not eat again until it is fulfilled in the Kingdom of God, and I will not drink of this wine until the Kingdom of God comes." Would you like to speak a little more to our hearts about your quote on the last supper? Thank you Mr. Keshe for all your love and for not giving up on us.

K- Being on both I can explain what it means, both on the time of Christ and the time of the man. In essence, last week, as is tradition with the Keshe Foundation, When we have conferences, and when we have meetings, public meetings, for a sessions of days or weeks, whatever, the last night, after the last session, (2:54). we always invite the Knowledge Seekers to eat together, we call it, it's become traditionally known as a "last supper." So, last Friday night, all the Knowledge Seekers, before they leave, back to their home, and one of the Knowledge Seekers left, literally, at the end of the order, during the food, because he had to catch his bus or train to go back. We eat together, and we enjoy the time, celebrating the time we spend together. It's known as a last supper in Keshe Foundation, if you've been with us around the world, we always have this ?? Traditionally, we end up in an Iranian restaurant. This time, because of the position, it was easier to go to an Indian restaurant, which is another favorite food of mine. And as we had the last supper.

But, during the course of the week, was the "last supper," it was the beginning, an end of the past, beginning of a new cycle for those who understood. Expansion of the Soul, understanding of. And, in a way, we woke up with, or we try to wake up our Knowledge Seekers, in a way to understand the operation of the STM for transportation and transmutation. We had the last "joys" of physical dimension and we entered dimension of, as you say, "I eat in a different dimension." Many Knowledge Seekers in the session understood, and they got touched by the new knowledge. And, in a way, it was important to be felt. It wasn't there to teach.

The purpose of last week was for Knowledge Seekers to come in touch with understanding the feeling of their Soul. And that was why we brought, as I call it, the ?? "L Plate" systems (learners systems), (2:56). for them to do, to understand their own way of doing it. And when you understood, and then the next cycle is the dimension of bringing to physicality and emotion of the man.

And so, in a way, in one week, we went through the sessions of what we call, completion of, beginning of a new way, for man to live, and closure of the past, but it takes time for man to go through it. And to understand it, and to implement it. It was a beautiful week, because usually we get in conferences and things, a lot of mixture of things. But this meeting was, all people more or less, totally focused on what it was, it was very easy, what you call it, transfer of knowledge at the emotional level, at the level of the Soul.

And, it was amazing to see, how we had couple of youngsters with us, they're mature in Soul, but we had Knowledge Seekers, who are deep Knowledge Seekers, understand, they are well versed in the work of the Soul. It was a very mature meeting, extremely mature meeting, and it made it so easy to go through the "last supper," as I call it, the beginning of the new race of man, to be flourished. And that's the best example of it. I can put in what you ask, new horizons, new understanding, new... first time drinking from the energies of the universe through the STM. (2:58).

As Christ said, when I wake up next time, and now we all... we have awakened the STM to that knowledge. You will see more and more of it. The London conference, and those of you who attend it, will not be to tell your grandchildren I was there. You'll tell the men of universe, I was there when it took place. Because that's the time of transition. You have to feel it, you have to be in it. When, in a way, I stood in it with the Chinese militaries, in China, past few weeks ago, I thought, "I wish man could understand what I'm doing to them." Because, they will not change a second of this, for all the wealth on this planet.

Any other questions?

Q: ... You once said that a vegan diet can cause problems after 10 years. Can you say something about this?

K- I sat in front of a vegan to have a dinner very recently. And I thought, what can I tell? To bring regrets or create an enemy. I sat across a vegetarian called, a lot of us know, a few years ago. And after I finished, a couple of days later, he said, Mr. Keshe, I can't be a vegetarian. I start eating meat. (3:00).

I have spoken about this in depth in some of the teachings, some of the health teachings in the past. Our body, physical body, is a combination of millions of years of what I call, evolution. We have adjusted our bodies according to the environment we eat, we live, we... and is available to eat. And majority of us in the Western world, maybe a couple of centuries ago, meat was a luxury, if we could get access to it. We were vegetarian. Because in the cities getting meat was expensive, and in the villages to grow up the meat. Meat was luxury, Christmas, occasions, slaughter the pig or whatever.

The generation of man today, is very much through the luxury of being able to have to do, to eat, has added the meat into the structure of the body of the man in past century. Our children, from the day born with milk, and then, which is the essence of life. And then, they deny that access to that life. So, they shoot themselves in the foot from day one. You become vegan, "I don't touch dairy." You are made of it. The first thing you took in your body, is the milk of the mother, the love of the care of the Creator. And then you deny it. So, you're stopping a Juggernaut, (3:02). going down the road, 120 kilometers an hour, to a stop. Because, you made from that day the decision, "I'm not taking anymore, whatever." Even with you, with your vegetarians.

Then, this process has a knock on effect. You put a brake on, in your head. You haven't put a break on in your body. Now, body has to go to a transition. In one go, I'm vegetarian from the... it's become fashionable. I'm become a vegan, it's become fashionable. You become a vegan in a very short time. And we already have a start seeing diseases, psychological patterns. We start seeing changes in the body, which body cannot respond to. And then we have to create other conditions for it to cover it. And now we come up with it, we'll see the vegans are children of the West. We have vegans in India and other places, they never ate meat at all. Even they are not called vegans, they still drink milk or whatever.

These, no dairy, no eggs, blah, blah. Body, used to go at the speed of 120. You decide in your brain to pull the plug. Body now has to adjust. And then we'll create mayhem. We see a specific psychological pattern with these kind of children who suddenly become fashionable to be vegan. We now see something very interesting. I was talking about it very recently with Knowledge Seekers. As you know I spent a lot of time in China and I live in a very affluent part of Beijing, (3:04). and the same when we are in Sanya is in, what you call, (South) China Sea. You notice very slim girls. All we looked at, very slim. We talk in size 6 and 4 and 8, if you talk in Western sizes. And they're all gathered in a certain area of Beijing. All educated, all money and availability. Or they come from the golden spoon and silver spoon dimension.

But when, in the middle of summer, you go in the heat of summer, literally, if you lived in Beijing, Chinese tell you, it's a murder. 40 degrees, 35, but special heat. Breathing is hard. You go to the clothing, ladies clothing shop. You find winter clothing during the summer in most of the shops. How? What is this could not be sorted. One of the Knowledge Seekers cracked it, and then with research or whatever, now we understood. These girls and these guys starve themselves. And then we were sitting in the restaurant, And I watched a very slim girl, size 6 - 8, and I was sitting in another position, that they keep on pulling something up. They're not actually size 6 - 8, and they're size 8 to 10. They put the body in a corset to be slim, because it's fashionable. And those who actually starve themselves to be bone in skin, (3:06). body has no blood, they need these warm winter clothing to keep their body warm in the middle of the summer. The secret of, what you call it, winter clothing in the summer in this area was unraveled. And actually, they shake in the middle of the summer. The body has no blood to hold. And then now you imagine this body supposed to create the next generation of man, what defects we're going to see, what damages we're going to see psychologically, because the mother is already psychologically damaged, the father is psychologically damaged, what child they're going to create.

It's the same with the vegans. It's the same with those who suddenly try to be vegetarian. You want to be a vegetarian, you want to be a vegan, you plan it over 5 years, 10 years, step by step. And even that has its own dilemmas with it. And then the truth is, I'm vegan. I only eat rice and noodles and the vegetable. I'm proud to be a meat eater. I kill one animal, one Soul. Every grain has a Soul, you kill thousands of Souls, you are more criminal than I am, and then you call me a meat eater, a killer? One grain has enough life to it, that when you sow it, it creates a hundred grains, hundred new lives. (3:08). And in a bowl of rice you put ten, hundred, five hundred of it, and you chew it so happily, "I'm a vegetarian, I'm vegan."

This is the story of Mr. Einstein, and speed of light, being the maximum speed. This is the speed of idiocy of a new generation of the man, has put no speed and no limit to it, and they call it vegan and vegetarian. And the damages this create. To be a vegan, to deny milk, you're born out of, it's a lot of reverse psychology. A lot of advertising on television. Then denying the essence of what you came out of. God forbids, where this Soul is going to go. So, this if you're born as a Buddhist, if you're born, your body, over time, in the area you're born, has prepared you, in a slow way for it. You can't stop a Juggernaut, fully laden, 24 ton, because you decide to break. The rest of the cars are going down the motorway, they're going to ram you in.

One will be a cancer, one will be all sorts of psychological problem, and everything else which goes with it. And this is why we see so much psychological depression, suicide, in the young generation, most of them have gone through the process of the new fashion vegan, being size 6, because it's on the papers and newspapers, has to be, (3:10). and a vegetarian road path of life. If we educate our children the right way, you want to be a vegetarian, plan it over 10 years minimum, and I hope you're lucky you get away with it.

We just look at it, I'm much healthier. See you down the line, when the new cancers appear, when new psychological pressures will come in. We see a lot of these, vegans, new vegans, new worlds of veganism and vegetarianism, in the psychological and mental institutes. And it's growing, and governments don't know how to handle it. Because it's covered under another, another, and another thing. I hope one day doesn't come that somebody says, "I'm only plasmasist, I only eat plasma." God forbids that day.

Any other question?

Q: ... Hi, would it be all right to set up stalls outside of libraries, showcasing highlights of the books by the Keshe Foundation and sales? Not asking for anything, just be interested and see it get out there for those that aren't aware.

K- Oh, you can do anything, first of all, if you can get hold of the books. Oh, you got go to an arrangement with the Keshe Foundation, but in a way, knowledge has to be gone that way. Maybe, maybe a slightly different way, but we have to reach the governments, to be able to teach the new technology. (3:12). In libraries we will start a beginning, our bookshops is a beginning of a start of a sharing of the knowledge. One of our Knowledge Seekers wrote to me very recently, "I was looking for the book, I don't know one or two, whatever, and I couldn't find it, I found it on the store, and I bought it as a second hand." I said, "oh, the book has already been put in the store as a second hand, somebody has read it, and didn't want it." And what was interesting is, the book is signed, it's one of the very few books which are signed by me. And it's got a code number. And it's interesting, I think it would be bought in this, what you call, a second hand shop book. People read it and put it out, or somebody died and they put all the books out. Because they didn't know what they had in their hand.

R: A bit of a hidden treasure for somebody that's looking.

K- It's one of the Knowledge Seekers, he sent me the book, he said, "I bought it online, it's bought from a second hand shop." And the number and the signature and the date is on the book front page, inside. It's very few of them, because most of the signed books I signed, has been confiscated and destroyed by the Belgium post office. They were told anything which goes from this place with this name, just hack it. They had a room, I think, somewhere, storing, we signed the books. People said they never received it, and the Belgian king was laughing his head off. The more they blocked us, the more we went through. And we see a lot of it.

Any other question? (3:14).

Q: ... Mr. Keshe, can a Soul of a man be taken out of the body and put in another body, or swap Souls in special circumstances?

K- Come again? I'll open a Soul shop.

Q: ... Can a Soul of a man be taken out of the body and put in another body, or swap Souls in special circumstances?

K- I heard about transplant of the heart and brain. This will be very interesting.

R: Well you have a new name for a body shop.

K- You know the shop's called Victoria's Secret. Now we have to open a new secret shop. You know what they say about the Victoria's Secret shops. The Victoria is Victor, not Victoria. That's what the secret is.

Any other question?

R: Nick would like to confirm what you said a year ago, that the Kamala Harris might take over from President Biden due to illness. It was shown in the Australian news today, he says.

K- There are a lot of reports about the state of Biden. And he has not been governing for some times. I gave an example of this very... to a Knowledge Seeker very recently. I said, you know, Biden, (3:16). because of the present situation, cannot be shown. There's a huge problem with Mr. Trump and the rest of it. That he's not there, because he can jump on it in so many ways. It's like the way we transferred the Keshe Foundation to Ella to run when she was young, years ago when we were in Ghana. I said to her, "run the Foundation in my name, as is my decisions, till you learn the ways, but nobody will know." And I said to them, "it's at the moment, White House is run the same way." If you remember, five or six weeks ago, there was a report of seeing a body bag to be taken into the White House. And then officials explained that Biden has already passed away. It was on the 4th of July, it could not be announced, but now it's become a norm, they are running it, and there are a couple of people who run it ?? is a double (Biden), till they have the right place, right things in the position. There's a lot of talk about this, but how they're going to break it into public is a different way. Official government, at the highest level, the foreigners have accepted that Biden is not in operation for weeks now. But we have to wait and see.

Any other question?

You've got to understand, if she comes into power, it's not that, she's already in power, you will see a huge shift between China and America. As I explained before, she's a very pro-communist. This is one of the problems they have. (3:18). How are they going to bring her out if she's there. She is extremely pro-China. You will see things you could not imagine. And knowing this, I have put the Keshe Foundation in that course of work. That once if she comes into power, China and America in a line to start a new world collaborations (from) being enemies to work together, and we're there to bring the changes for it necessary to be done. And part of our work being in what you call it, in Amsterdam today is part of that initiative, a big part of it.

We assume and we presume if the elections of the next set goes to the next election, even if Biden's still operational, she'll come into operation. He cannot last a second, even we don't think he's already lasted. Official news at the highest level tells us he's not physically there for a few weeks. But the biggest problem is you have a black lady, in a way of a caste, with a very high influential Jewish background through her husband, with the extreme sense of communist, communism, through upbringing of the parents. And this has created mayhem for the White House. And she's very outspoken. And we'll see a lot of things moving in all sorts of directions now.

One thing, ?? we have put the Keshe Foundation in path of peace, with, when she comes into power. (3:20). We'll see a lot of things which now, encouraged by the White House, will diminish very rapidly. The situation with, what we call, the little island in South China Sea will be resolved, and ?? and China is ready for it. They know what they have in their hand. Taiwan will be resolved within the next five years, in a very, very different way. It will go back to the motherland. And it'll be not a confrontation, but a gift for peace. And Chinese leadership has prepared themselves for this transition.

And if Kamala comes and this is what they don't want, because Taiwan is a point of, they can sell arms to the others, pushing, pushing China expansionism in the China Sea and the rest of it, this will die with her in power. She's extremely, extremely biased towards China, and the value of the life. And they have found some sort of balance between them. And we'll see a huge change in that direction.

But she's in charge, more or less, for weeks. I was in a meeting with very high ranking officers when the death of Biden was leaked out. And they wanted to see how much we leak out, which we didn't leak out, we just watched it. But Biden has not been operational for a long, long time in the White House. And we'll see it.

But there's a power struggle within the Tel Aviv and what I call, Vatican and other part, (3:22). how to handle a black lady, deeply communist, came to power by selling her Soul to the Jews by marrying a Jewish guy, pre-planned, it will look and operate in the nation of United States. And this is not unraveled yet. We'll watch it. And it's a very good point.

The way I see it, we see from the people we sit and eat and talk around the world with, Taiwan will be given back as a peace token by the Americans. In a way, not given back in a way we see it, but gradually withdrawing from all objections. And China is prepared to take Taiwan back within the next five to seven years. Everything is set up for it. And this bring that.

You got to understand some things we don't, in the world of common public, we don't see. But, in the world of diplomacy and nations, they know. And they operate according to what they know, not what we see in public. I was in Korea, in the spring of 2008. And as a delegation from the Keshe Foundation. And I had two or three breakfasts at my hotel by the invitation of the Minister of Unification of Korea. Talking about 15 years ago. And in one of these breakfasts we were discussing how we're going to handle the North Korea and the rest of it, because I just came a couple of days before that, giving a lecture to the nuclear physicists of the South Korea, their nuclear center, a lot of them, (3:24). and the President asked the Minister to have a breakfast, who was talking about how we can use the technology to unify the North and South. One of the talks on the breakfast was that he said, "the father of the present North Korean leader," he said, "he will die in such a time frame." And I looked at him, he said, "he's critically ill, it's not known in public, but he will die within this limit." And they were expecting for the other son to take over, not this son. But he switched to this son, the father, before he died. And he said, "we are expecting this, and maybe that's the position, we can use your technology with his death at such time." I just listened to the conversation.

Sometimes later, the President died in the frame they gave me. They knew how long it's going to last. And I thought, "oh God, was it planned, or do they actually know, because of the span of the illness and the condition he had, how long it was given?" They knew of the death of their enemy, years ahead. Because of his condition, health condition. So, they know about the condition of Biden. The world leaders understand the situation, and they always have a duplicate running around, to cover up till a solution is found. And it's quite possible, he's not already there for a long time, from the meeting I had, some time ago. But, we listen to a lot of these things and one day will come up. Maybe he is still on the life support, maybe he still walks. But, he will not, and he has not been in the decision seat for some time. (3:26). And if he is, he will not be in the second term. If the same party is going to take him and hold seat.

So we're going to have this woman, sooner or later, as the leader of the United States, but a lot of her work, due to work of her father and mother, setting up the first Communist Party organization in the United States in a structured way, she's brought up in that mentality, and she always followed that mentality. It's a lion lying down, we are waiting to see when it wakes up, when it does. But as a gift, as a point of understanding, we know she will pull out of, what we call it, the conflict in South China Sea, with the excuse of what you call, Taiwan. And Taiwan will go back to motherland. And that will start a new process of peace between the nations and a lot of things to do with the arms race will change, in that process.

Any other question?

K- ... We are nearly 12:30, we've been going for 3 and a half hours. Doesn't matter whatever it is.

R: It's pretty much covered it. Yeah, you've done well.

K- Please, those of you who participate tomorrow, make sure you can do the test or get the strips. It's very cheap, it's one or two dollars. You can get it from any chemist to test both. And those of you who join us on Monday, 11th and 18th for the fingerprint of your Soul, you will learn more about yourself. (3:28).

And then we head on to London conference. And it'll be one of the most historical, what I call, shows ever, as is not, it'll be seen, as I said, I want it to be done. It'll be felt by the ambassadors. So deep. It'll be felt by the representatives, or people who are there, the whole session. It will touch the STM, and the physicality will talk. In a way, in a very packaged way, I explained to the Knowledge Seekers who were in Manchester, what is going to be essence of the London conference. And, we kept in one of the most prestigious places for conferences in London, at the City Center. And we'll see how it'll come, and we start promoting it in the next 2-3 weeks, even in the media. And the Knowledge Seekers had enough time to take their seat to, but you can take their position to be in the conference. We leave it open for a few more days, or a couple of weeks, and then we close to Knowledge Seekers.

And then you have to go through the public, ?? I know. And the price will go directly to 5,000 per seat for that venue. And we already know it'll be sold out, because it goes to the agencies who work to these things. We give everything to the professionals, we don't leave it for us. Scientific organizations, heads of operations will be invited to be there, to see and how it's going to affect their operations and their industry.

And then we'll go on to Beijing conference, and we'll see where we go. Thank you very much indeed, (3:30). and we'll see some of you tomorrow, and a few of you again on Monday, and hopefully we'll see you next week. Thank you very much Rick. And it was nice to be back to Manchester last week, because it brought a lot of things home, and a lot of beauties.

In the next few hours, we will announce through the Dutch channel connections, if any of the Dutch Knowledge Seekers would like to meet us, to have another coffee after a few years, or new Knowledge Seekers want to meet through our Universal Council member and through the structure of the Netherlands community, through our people who will be put across. We wanted to keep it very quiet but, what you call it, you're in a position we expected to be in Holland for maybe maximum two days. But due to negotiations it's taken longer, so... We were hoping to do it on Tuesday night before we leave, but now, we'll bring it next, 25, 48 hours, and it'll be announced through the channels. If anybody would like to have a meeting with us, we meet, and we'll see where we go. Thank you very much indeed, and see you tomorrow.

London Meeting show T & ambassadors will feel - shock humanity start change; Will be inside stationary spaceship - STM will travel U; Compare Tesla (AC) & Edison (DC) merge both in T; New Headphones will start change; Air charge STM - food charge STP & P; One central Server for whole planet & U; STP encages Soul with Ca - feeds small bits as emotion; Can separate G & M fields create boundaries - cage; Weaker fields are stronger - travel through low level fields of U; Went to Moon - own Soul created U - be detached - change desert into heaven through own fields for Soul's own children; Exhibition become spaceship; Apologize to Dean; Headphone usages single or multiple; KF Flying Car coming back; End of greed & jealousy; Turkey & UA Emirates secret sanctions; Speak through Soul; 2 emotions inside; System created to change Humanity;

ENGLISH TRANSCRIPTION

(:13).

K- Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back as usual, and we try to share knowledge, and see how things take shape, and how the knowledge goes. Traditionally, we make a few announcements at the beginning, and then we dive deep into the knowledge seeking. And then we run out of energy by about 10 o'clock or so, and then we go home to see how we can give each other a breathe of fresh air, with our knowledge, with our thoughts, and what we can share.

A couple of announcements which we have today for you is very simple. For those of you who've been thinking to come to London, for the week conference and then the weekend with meeting with ambassadors. (:14). We have a bit of good news. As you know the cost of the week teaching, including Manchester and London, and then if you go to the next level, Beijing, was put at 10,000, and still stays at 10,000. We have received a donation from one of the Knowledge Seekers, which allows us to allow a few people, to be able to reduce the price or the cost of it to 5,000. We can give 2, 3, 4 tickets free to people, but then it's just sitting around, because we already have. We had donations we passed on to people. But now, something like about 10 - 20 seats are available. And 5,000 we put it. And if you can be with us, the donation we receive, we'll cover the other part.

The whole structure will be set from Monday the 6th of November, 5 days in London. We have already chosen the venue. It will be announced very late in the sessions. But the ambassadors and the dignitaries and some of the Knowledge Seekers (KS), which will be invited and governmental offices and scientists. Will receive the location in due time. When you receive it, please give it confidential, that we don't get mayhems as usual. But the venue is right, and actually it befits the, what we call, the Space Development and everything else, and has a lot of tradition behind it. And it's one of the center points, has been for years of London. (:16).

In this process, we go further to understand more. There will be one of the most elaborate shows of the space technology (T). NASA puts their show by launching rockets. We show the new space technology can be done inside a dome, inside a building. And with it, we'll show the implication, application of life. What life

will be and how system to support life will take shape. And this will be one of the most, what we call, advanced technologies shown, which changes that. Meeting in London will change the Space technology. We are not coming to talk. We are not coming in to just walk and show something. While you're in a meeting, while you're in the session, You will feel, as you have become part of the Space. You'll feel how you'll be for the passengers of Space to be in. How we can guarantee life. How we can support life. And you will feel it.

We'll let you taste banana. And we'll let you to swim in the depths of the oceans of the waters of the Universe (U). The way we have set it up, will bring shock to a lot of people. In a way, the whole purpose of London Ambassadorial Meeting, is to bring shock to humanity, that what are we fighting for? Where everything can be available, 500 people to a 1000 people at no cost. The change in what will be shown, will bring changes very rapidly. (:18). Media's from all aspects of what we call, Internet, broadcast, and the rest, are invited to be there to record it. And that will bring the knowledge where we want it to be.

It'll be a changing point, where we'll show, the way we've done to the Chinese military. The change has come. And Chinese authorities have understood the change will be so radical. As one of them said, "The scientists have nothing to say." "This is a new technology, we do not understand, but it works." And be part of it. The Saturday session, those of you who come for the Ambassador Meeting, you will not be allowed in. It's the session of the ?? part of Saturday and Sunday till 2 o'clock. And those of you who take part the week before, will be prepared to show part of this in the Sunday, or we call Saturday session.

It'll be one of the most radical shows. I was talking to one of Knowledge Seekers. I said, you know, when the race was put on to show the first light in Chicago Fair, where Tesla and Edison in two different sides, took part on the side of DC and AC, and Edison lost. And we saw the change, Tesla brought to touch the life of all of us. And then, by coming to that point, strange enough, we go back to Edison. We bring the AC to our homes, because it's easier and cheaper. And then we plug an adapter to make a DC, (:20). that it works with our system.
